3.2.S.4.1 . - 3.2.S.4.2	Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by Drug Product manufacturer is required.	Firm have submitted Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by Drug Product manufacturer. However, the chromatographic test conditions were different as compared with drug substance manufacturer. For example, the chromatographic conditions used by the **drug substance manufacturer are:** **Related substances:** Mobile phase; Water R (0.01M NaH2PO4); Acetonitrile R (50;5 v/v) Detector 225nm Injection; 20ul Flow rate; 1ml/min **Drug product manufacturer;** **Related substances:** Mobile phase; Methanol:Water (70;30 v/v) Detector 223nm Injection; 20ul Flow rate; 1.5ml/min Temperature; 40ºC **Drug substance manufacturer:** **Assay:** Mobile phase; Water R (0.01M NaH2PO4); Acetonitrile R (50;5 v/v) Detector 225nm Injection; 20ul Flow rate; 1ml/min Temperature: 25ºC **Drug product manufacturer;** **Assay:** Mobile phase; Methanol:Water (70;30 v/v) Detector 223nm Injection; 20ul Flow rate; 1.5ml/min Temperature; 40ºC

3.2.S.4.3	Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance(s) shall be submitted.	The firm have submitted Analytical Method validation studies performed by the Drug Product manufacturer for drug substance(s)
3.2.S.4.4	• In batch analysis of drug substance performed by drug product manufacturer, in test for identification you have submitted that it is positive for empagliflozin while the applied product is dapagliflozin, clarify? • Justification shall be provided for any incomplete analyses of the drug substance/API by Drug Product manufacturer (propanediol, residue on ignition, heavy metals, related substances, residual solvents, particle size)	• The firm submitted that during analysis Dapagliflozin was identified. *However due to typo-graphical error Empagliflozin was written instead of dapagliflozin in COA. The rectified COA with supportive documents is submitted*. • No justification provided for incomplete analysis
3.2.P.1	• You have used lactose monohydrate in your formulation while innovator product has used lactose anhydrous. Justify that the applied product is equivalent to innovator product.	The firm submitted that we designed formulation qualitatively similar to innovator (Forxiga tablet). *We actually used lactose anhydrous and was mistakenly written as lactose monohydrate. The firm have submitted revised BMR.*
3.2.P.2.2.1	The batch number of innovator product Forxiga 10mg tablet mentioned in Pharmaceutical equivalence report is 132642 while the batch number mentioned in comparative dissolution report is NX101. Clarify that which batch number product was used in both the studies	The batch No. of innovator product Forxiga 10mg tablet taken in Pharmaceutical equivalence report is NX101. Submitted chromatogram too is written with batch No. NX101. *It was a typo error in report. Corrected repot is submitted.*
3.2.P.4	• In control of excipients you have given specifications for croscarmellose while you have not used croscarmellose in formulation, clarify? Moreover, you have used lactose monohydrate while you have not provided specifications of lactose monohydrate?	It was mistakenly written, specifications for lactose anhydrous is submitted
3.2.P.5.2	• The Mobile phase composition in assay test is not mentioned in analytical procedure?	Method for analysis of drug product is submitted along with chromatographic conditions / mobile phase composition in assay analysis
3.2.P.8.1	• Stability data of drug product at initial time point is not submitted • Stability summary sheet for accelerated and real time stability data at 6th month time point is not submitted	• Stability data of drug product at initial time point is submitted • Stability summary sheet for accelerated and real time stability data at 6th month time point is submitted

	• You have mentioned in house specifications in module I section 1.5.6 while innovators specifications in stability summary sheets, clarify?	• The firm submitted that they have designed their product on innovator's specifications and updated the specifications at section 1.5.6. as innovator's specifications without submission of applicable fee. The firm also submitted revised form 5F
	• Submit invoice for the imported raw materials. • Submit Compliance Record of HPLC software 21CFR • Provide complete calculation for determining the quantity of dispensed drug substance keeping in view water content	• The firm have not submitted invoice for the imported raw material • The firm submitted A General Compliance certificate of HPLC software 21CFR • The firm have submitted calculation for determining the quantity of dispensed drug substance on theoretical basis. *The water content was not kept in consideration while making calculation for dispensing drug substance*

Previous Decision (M-316-DRB) : Deferred for following:

- Justification for using different chromatographic conditions for analysis of related substances and assay test by the drug product manufacturer than drug substance manufacturer.
- Justification for incomplete analyses of the drug substance / API by Drug Product manufacturer
- Clarification for not considering the water content while making calculation for dispensing of drug substance
- Submission of the fee of Rs. 7,500 for correction/pre-approval change in product specifications, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.

Evaluation by PEC:

Deferment reasons	**Response**
• Justification for incomplete analyses of the drug substance / API by Drug Product manufacturer	The firm submitted that testing of propanediol contents were not performed due to unavailability of GC. In future testing will be done through 3rd party i.e. M/s Rotex Pharmaceuticals and submitted copy of agreement for contract testing of raw materials
• Justification for using different chromatographic conditions for analysis of related substances and assay test by the drug product manufacturer than those applied by drug substance manufacturer.	The firm has submitted revised DMF of drug substance manufacturer from drug substance manufacturer and chromatographic conditions of drug substance manufacturer and drug product manufacturer are same. The firm further stated that this source of API have been used for the manufacturing of product for stability batches. The previous DMF has been mistakenly submitted in the dossier
• Clarification for not considering the water content while making calculation for dispensing of drug substance	The firm submitted that Water contents are already calculated in factor calculation
• Submission of the fee of Rs. 7,500 for correction/pre-approval change in product specifications, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.	Firm has submitted fee Rs. 7500/- on deposit slip# 433726858656 for correction/pre-approval change in product specifications, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.

Decision: Deferred for submission of following:

- **Clarification regarding legal provision of outsourcing testing of drug substance from M/s Rotex Pharmaceuticals since applied application is of self-manufacturing.**
- **Clarification from the drug substance manufacturer regarding revised DMF along with trail of revision of drug substance analytical procedure.**

	Details of fee submitted	PKR 30,000/-: Dated 04/10/2021 (Deposit Slip#489820062060)
	The proposed proprietary name / brand name	Ondansetron Tablet 4mg
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated tablet contains: Ondansetron…….4mg (as Ondansetron Hydrochloride Dihydrate BP)
	Pharmaceutical form of applied drug	Film coated Tablet
	Pharmacotherapeutic Group of (API)	Antiemetics and antinauseants, Serotonin (5-HT3) antagonists.
	Reference to Finished product specifications	USP
	Proposed Pack size	7's, 10's, 14's, 20's, 28's, 30's.
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Zofran 4mg film coated tablet MHRA approved
	For generic drugs (me-too status)	Ongene 4mg Tablet by M/s High-Q Pharmaceuticals (Reg#091206)
	GMP status of the Finished product manufacturer	The firm was inspected on 22-03-2022 & 05-04-2022 by the panel for renewal of DML, regularization of section as per layout plan and additional sections and decision of panel is: Keeping in view the good facilities provided for manufacturing and quality control of pharmaceutical products registered in the name of firm being produced at the site and overall good maintenance of plan and the required documentation and SOPs, the panel recommended the grand of DML of the firm as well as regularization of sections as per layout plan and approval of additional sections
	Name and address of API manufacturer.	M/s Anugraha Chemicals, No D-47 to D-50, C-62 and C-63, KSSIDC, Industrial Estate, Doddaballapur, Bengaluru Rural District-561203 India
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls,

		specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Stability studies	Stability study conditions: Real time:30°C±2°C/75% ± 5%RH Accelerated:40°C±2°C/75%±5%RH Stability of all three batches at accelerated conditions (AOND-17002, AOND-17003, AOND-17004) conducted for 06 months Real time stability study of two batches AOND-17002, AOND-17003, conducted for 36 months while real time stability study of one batch AOND-17004 conducted for 24 months
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand that is Zofran 8mg Tablet by **GlaxoSmithKline Research Triangle Park, NC 27709** **Marketed by: Novartis Pharmaceuticals UK Limited** performing quality tests (Identification, Assay, Dissolution, disintegration). CDP of ondansetron 8mg tablets has been performed against the zofran 8mg tablets in Acid media (pH 1.2), acetate buffer (pH 4.5) & Phosphate Buffer (pH 6.8). The values for f2 are in the acceptable range.
	Analytical method validation/verification of product	Firm has submitted method verification studies including range, accuracy, precision, specificity and robustness.

Manufacturing Date	03/2021	03/2021	03/2021
Date of Initiation	25/03/2021	25/03/2021	25/03/2021
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has referred to previous inspection for authenticity of stability data of Rofl 500mcg tablet on the basis of which Registration Board in its 277th meeting dated 27-29 December, 2017 decided to approve registration of Rofl 500mcg tablet. Inspection date: 10-10-2017 The report shows that: The HPLC software is 21 CFR compliant. Adequate monitoring and control are available for stability chambers
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	The firm have submitted copy of GMP certificate #DCD/SPL.CL-1/CR-1510/2020-21 dated 06-02-2021 of M/s Anugraha Chemicals, No D-47 to D-50, C-62 and C-63, KSSIDC, Industrial Estate, Doddaballapur, Bangaluru Rural District-561203 India valid upto one year from the date of issue. The firm has submitted copy of DML #DCD/MFG/Applicant Id-240 dated 26/06/2020 of M/s Anugraha Chemicals, No D-47 to D-50, C-62 and C-63, KSSIDC, Industrial Estate, Doddaballapur, Bangaluru Rural District-561203 India valid upto 13/02/2025
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of invoice # OND1200 dated 10-11-2020 for import on 300gm of Ondansetron HCl Dihydrate Batch #AOND-20014, AOND-20012 and AOND-20013 in the name of M/s Atco Laboratories Ltd Karachi form M/s Agraha Chemical India. *However, the invoice is not attested by AD (I&E) DRAP field office*
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted data of stability batches supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Compliance Record of HPLC software 21CFR & audit trail reports on product testing is submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)

Remarks of Evaluator [XI]:

Section	Observations	Response
1.6.5	Submit valid GMP certificate of drug substance manufacturer	

<table>
<tr><td>3.2.S.4</td><td>• Copies of the analytical procedures used for routine testing of the Drug substance / Active Pharmaceutical ingredient by Drug Product manufacturer is required.
• Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance(s) shall be submitted.</td><td>•</td></tr>
<tr><td>3.2.S.5</td><td>Firm has submitted COA of primary reference standard which follows usp specifications and secondary reference standard which has followed Ph. Eu specifications while applied product manufacturer follows bp specifications</td><td></td></tr>
<tr><td>3.2.P.2</td><td>• Submit compatibility study as the qualitative composition of the applied formulation is not similar to innovator / reference product.
<table>
<tr><td>Applied product</td><td>Zofran 4mg tab</td></tr>
<tr><td>Lactose anhydrous</td><td>Lactose</td></tr>
<tr><td>Sodium starch glycolate</td><td>Microcrystalline Cellulose</td></tr>
<tr><td>Crospovidone</td><td>Pregelatinized maize starch</td></tr>

<tr><td>3.2.P.8</td><td>Submit documents for the procurement of API with approval from DRAP.</td><td></td></tr>
</table>

Previous Decision (M-322-DRB): Registration Board deferred the case for submission of reply to the above cited shortcomings within six months.

Evaluation by PEC:

Section	Observations	Response
1.6.5	Submit valid GMP certificate of drug substance manufacturer	The firm has submitted valid copy of GMP certificate #DCD/SPL-1/CR-13/2023-24 dated 10-04-2023 of M/s Anugraha Chemicals, D-47, TO D-50 C-62 AND C-63, KSSIDC, Industrial Estate, Doddaballapur, India valid upto one year from the date of issue.
3.2.S.4	• Copies of the analytical procedures used for routine testing of the Drug substance / Active	• Firm has submitted copy of the analytical procedures used for routine testing of the Drug substance by Drug Product manufacturer

<table>
<tr><td></td><td>Pharmaceutical ingredient by Drug Product manufacturer is required.
• Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance(s) shall be submitted.</td><td>• Firm has submitted analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance.</td></tr>
<tr><td>3.2.S.5</td><td>Firm has submitted COA of primary reference standard which follows usp specifications and secondary reference standard which has followed Ph. Eu specifications while applied product manufacturer follows bp specifications</td><td>M/s. Anugraha Chemicals is manufacturing and supplying Ondansetron Hydrochloride Dihydrate worldwide and complies with both USP specifications and Ph. Eur. specifications depending on the requirements of their customers. They have also provided COA of reference standard which follows Ph. Eur. Specifications.</td></tr>
<tr><td>3.2.P.2</td><td>• Submit compatibility study as the qualitative composition of the applied formulation is not similar to innovator / reference product.
<table><tr><td>Applied product</td><td>Zofran 4mg tab</td></tr><tr><td>Lactose anhydrous</td><td>Lactose</td></tr><tr><td>Sodium starch glycolate</td><td>Microcrystalline Cellulose</td></tr><tr><td>Crospovidone</td><td>Pregelatinized starch</td></tr><tr><td>Magnesium stearate</td><td>Magnesium Stearate</td></tr><tr><td>Opadry white</td><td>Methyl hydroxypropyl cellulose</td></tr><tr><td>Purified water</td><td>Titanium dioxide (E171)</td></tr><tr><td></td><td>Iron oxide (E172)</td></tr></table>• Justification is required as the pharmaceutical equivalence and CDP of higher strength has been submitted
• Justify why the pharmaceutical equivalence study does not include complete testing of the drug product and the innovator product including the tests recommended by USP monograph (dissolution, identification, assay, uniformity of dosage unit).
• Provide details of innovator product used during pharmaceutical equivalence study (batch #, mfg, exp)</td><td>• Firm has submitted protocol for drug excipient compatibility study and the report of drug excipient compatibility study. The results show that insignificant variation occurs during compatibility studies. Hence it is concluded that drug is compatible with excipients
• Pharmaceutical Equivalence report of Ondansetron Tablets 4mg and comparative dissolution profile studies (CDP) report for our product Ondansetron Tablets 4mg is being attached.
• Critical tests recommended by USP monograph e.g. Physical Description, Identification, Disintegration, Assay, Dissolution and Impurities was included in the pharmaceutical equivalence study of Ondansetron Tablets 4mg. Furthermore, Uniformity of dosage units (content uniformity) is an in-process control test and should meet the requirements of Acceptance value at the time of release which is well controlled during release of drug product. The firm has submitted pharmaceutical equivalence report
• Firm has provided details of innovator product. Zofran 4mg tablets, Batch Number B83122A, Manufactured by M/s Aspen Bad Oldesloe GmbH, Bad Oldesloe, Germany for Novartis Pharma AG, Basle, Switzerland Mfg date;01-2022, Exp date; 12-2024.</td></tr>
<tr><td>3.2.P.5.1</td><td>Justification for finished product specifications of USP is required as the drug substance has been analysed as per BP specifications by M/s Atco.</td><td>The firm submitted that initially at the time of development, we have started the material and product development according to British pharmacopeia monograph. During the development of product, we found that the drug release of both</td></tr>
</table>

		test and reference sample is greater than 85% within 15 minutes in comparison studies while the time limit mentioned in BP was 45 minutes. We switched to more stringent specification for our products and complies with USP specifications which states that "NLT 80% (Q) of the labeled amount of ondansetron is dissolved in 15 minutes".
3.2.P.6	Firm has submitted COA of secondary reference standard which has followed Ph. Eu specifications while the applied product follows USP specifications	The firm submitted that initially, at the time of development, we have started the material and product development according to British pharmacopeia monograph which is sync with Ph. Eur. Monograph. Afterwards, we switched to more stringent specification for our products and complies with USP specifications.
3.2.P.8	**Submit documents for the procurement of API with approval from DRAP.** The firm submitted that for product development purpose, initially ATCO has arranged Ondansetron drug substance form M/s Anugrha Chemicals, India via our UAE based indenter Pan Golf Sourcing and Trading International on 10-11-2020. This sample was imported by our indenter in Sharja, UAE and then supplied us complementary through courier service. Due to direct courier of material on ATCO premises from Sharja, material was not hold at port for clearance and we forgot to attest the invoice with DRAP ADC. We have used this material for product development and further put the 03 development batches for stability studies up to 6 months on accelerated and real time conditions as per requirement of Zone IV-B. Same stability data as well as material arrangement documents with non-attested invoice were initially submitted with dossier in DRAP. After pre-screening, dossiers were accepted by DRAP and log for further evaluation. At the time of dossier compilation before the submission in DRAP, we have already gauged that non-attested ADC invoice issue can be identified during dossier evaluation. Therefore, we have immediately arranged another lot of Ondansetron drug substance from the same manufacturer i.e. M/s Anugrha Chemicals, India with attested ADC invoice. We have manufactured another 03 development batches with this material and also conducted the stability studies up to 6 months on accelerated and real time conditions as per Zone (IV-B) requirement. At the time of dossier evaluation, Evaluator has advised us to submit the attested ADC invoice and we have submitted the ADC attested invoice of second supply mentioned Ondansetron Batch#AOND-21007. But the BMR and Stability report which was produced with first supply of Ondansetron Batch# AOND-20013 were not replaced in dossier. This is the reason for difference in Batch No. of API between the material invoice and product development documents. Now all tracking record for import of first material (API) dated 10-11-2020 which was imported by our UAE based indenter Pan Golf Sourcing and Trading International form M/s Anugrha Chemicals, India has been arranged from indenter and attached along with CoA and un-attested sale invoice for your kind perusal. Above clarification related to submitted API invoice via letter number 197/Reg/11-2022 dated 3rd November, 2022 (copy with supporting documents enclosed) which was accepted by the Drug Registration Board in its 322nd meeting and we have been granted the drug registration certificate of Ondansetron Tablet 8mg and Ondansetron Syrup 4mg/5ml with brand name Ubkino (copy of meeting minutes and drug registration certificate, enclosed). We would like to state that kindly consider the same justification/explanation regarding procurement of API for Ondansetron Tablet 4mg.	

	Keeping in view the above facts, the firm has requested to consider that we have tried our level best to meet all quality requirements for the development and stability studies of ondansetron tablet. And executed more development work to meet the compliance requirement. We are expecting your favorable response regarding the approval of subject products by ignoring our reluctance regarding the ADC attestation of material invoice and consider the development record and stability studies produced with ondansetron first supply. We assure you that we will be more vigilant in future to meet the compliance as per requirement.

Decision: Deferred for submission of transportation details of API from supplier including courier details

Remarks of Evaluator [XI]:

Section	Observations	Response
	• Submit valid DML as the submitted DML has been expired on 24-11-2021 • Submit latest GMP inspection report conducted with in last three years • Submit valid GMP certificate of drug substance manufacturer	• The firm have submitted valid copy of DML issued in name of M/s Magns Pharmaceuticals on 06/06/2022 • The firm have submitted GMP certificate issued on 13-04-2022 based on inspection conducted on 11-03-2022. • The firm have submitted cGMP certificate of Vision Pharmaceuticals issued on 25-03-2022 based on inspection conducted on 11-02-2019 and further extended till 09-05-2022.
2.3.R.1	• Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3>	Firm has submitted Batch Manufacturing Record (BMR) for all the batches (T-003, T-004, T-005) of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3>. ***Two more batches, Batch T-004 and T-005 was manufactured on 12/10/2021 and 15/10/2021 respectively while batch T-003 was manufactured on23/06/2019. The details of these two batches are incorporated in above table.***
3.2.S.4	• Copies of the Drug substance specifications and analytical	• ***Copies of the Drug substance specifications and analytical procedures used for routine testing of***

	procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by Drug Product manufacturer is required. • Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance(s) shall be submitted.	***the Drug substance /Active Pharmaceutical Ingredient by Drug Product manufacturer is not submitted.*** • ***Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance(s) is not submitted.***
3.2.P.2.2.1	• Justify why the pharmaceutical equivalence study does not include complete testing of the drug product and the comparator product including the tests recommended by innovator product. • Comparative dissolution profile against the innovator product shall be submitted	• ***No clarification is submitted. However pharmaceutical equivalence is again submitted. Test like content uniformity, loss on drying and identification are not performed.*** • ***The firm submitted that we have performed comparative study for assay and dissolution hence Comparative dissolution profile is not required***
3.2.P.4	• Justify the use of gelatine capsule shell in dexlansoprazole capsule since innovator product has specified hypromellose capsule shells. • For excipients of human or animal origin, a certificate shall be provided, confirming that the excipient(s) are free from BSE and TSE. • Halal certificate for gelatin shall be provided	• The firm submitted that hard gelatine capsules are easily available and having same dissolving time and behaviour and other competitors are also using gelatine capsule shell. • ***No clarification submitted*** • The firm have submitted Halal certificate for gelatin shall
3.2.P.5	• You have mentioned innovator specifications under section 1.5.6 while you have followed manufacturer specifications for applied product, justify? • The tests of content uniformity and loss on drying were not included in the submitted specifications as recommended by literature of innovator product, justify? • Results of specificity test in method validation is not submitted • The copies of complete analysis of at least two batches shall be provided while you have provided batch analysis of only one batch, justify?	• The firm submitted that we have followed innovator's specifications. • ***The firm submitted that content uniformity test is recommended for dosage form which have API 25mg or less than 25mg in all pharmacopeia reference, so we have not performed.*** • ***Results of specificity test in method validation is not submitted*** • Firm have submitted copies of complete analysis of two batches
3.2.P.8	• Submit latest inspection report for exemption conducted by the	• ***Inspection report for exemption conducted by the panel for authenticity of stability data (PSI) is not submitted***

	panel for authenticity of stability data (PSI) • Submit Raw data sheets & analytical record of stability studies containing calculation formula for both assay & dissolution test • Justify why you have submitted stability study data of only one batch while it is required to submit stability study data of three batches as per zone IV-A conditions • Submit Record of Digital data logger for temperature and humidity monitoring of stability chambers (accelerated conditions)	• ***Firm has not submitted stability study data including summary data sheets, COA, raw data sheet and attested respective chromatogram as per requirement.*** • ***Record of Digital data logger for temperature and humidity monitoring of stability chambers (accelerated conditions) is not submitted***

Previous Decision (321-DRB): Deferred for following:

- Submission of Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by Drug Product manufacturer
- Submission of Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance(s)
- Submission of Comparative dissolution profile against the innovator product
- Submission of results of specificity test in method validation studies of drug product
- Submission of stability study data including summary data sheets, COA, raw data sheet and attested respective chromatogram as per requirement.
- Submission of Record of Digital data logger for temperature and humidity monitoring of stability chambers (accelerated conditions)

Response of Firm:

- Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by Drug Product manufacturer is submitted
- Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer *for drug substance(s) is not submitted instead Analytical Method validation studies for drug product is submitted*
- Comparative dissolution profile against the innovator product *is not submitted instead pharmaceutical equivalence report is again submitted.*
- *The firm submitted that in as in specificity test placebo product is required but we are using ready to fill pellets and we have no placebo pellets and specificity test of API manufacturer is attached.*
- *Stability study data including summary data sheets, COA, raw data sheet and attested respective chromatogram is not submitted as per requirement*
- Record of Digital data logger for temperature and humidity monitoring of stability chambers (accelerated conditions) *for time in which Batch T-004 and T-005 is manufactured is submitted*
- The firm further submitted that our product Cetamol tablet has been approved in 321st meeting and we have submitted audit trial and CFR 21 compliance already but if required PEC can conduct inspection for stability data

Previous Decision (323-DRB):

- Submission of Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance(s)
- Submission of Comparative dissolution profile against the innovator product
- Submission of results of specificity test in method validation studies of drug product
- Submission of stability study data including summary data sheets, COA, raw data sheet and attested respective chromatogram as per requirement.

- Submission of Record of Digital data logger for temperature and humidity monitoring of stability chambers (accelerated conditions)

Response of Firm:

Section	Observations	Response
3.2.S.4	• Submission of Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance(s)	• Firm has submitted Analytical Method Verification studies including specificity, accuracy and repeatability (method precision), linearity and range performed by the Drug Product manufacturer for drug substance
3.2.P.2.2.1	• Submission of Comparative dissolution profile against the innovator product	• Firm has submitted Comparative dissolution profile of their product against Dextop capsule 30mg by M/s The Searle Company Ltd in acid media pH 1.2, phosphate Buffer pH 5.5 and Phosphate Buffer pH 7. The values of f2 factor are in acceptable range.
3.2.P.5	• Submission of results of specificity test in method validation studies of drug product	• Firm has submitted results of specificity test in method validation studies of drug product
3.2.P.8	• Submission of stability study data including summary data sheets, COA, raw data sheet and attested respective chromatogram as per requirement. • Submission of Record of Digital data logger for temperature and humidity monitoring of stability chambers (accelerated conditions)	• Firm has submitted stability study data including summary data sheets, COA, raw data sheet and attested respective chromatogram as per requirement. • Firm has submitted of Record of Digital data logger for temperature and humidity monitoring of stability chambers at accelerated conditions

Decision: Approved with innovator's specifications.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Registration letter will be issued after submission of:

- **Fee of Rs. 7,500/- for correction/pre-approval changes in product specifications, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.**

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	N/A
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Empagliflozin:** Firm has submitted copy of GMP certificate in the name of M/s Fuxin Long Rui Pharmaceutical Co., Ltd, Fluoride Industrial Park, Fuxin City, Liaoning Province - 123000, China issued by Fuxin Food and Drug Administration China valid upto 27-09-2020. Firm has submitted copy of DML (Certificate# Liao20150233) in the name of M/s Fuxin Long Rui Pharmaceutical CO., Ltd., China valid upto 20-12-2022. **Metformin HCl:** The firm has submitted GMP certificate for M/s Aarti Drugs Limited., (Unit-II) Plot No. 211 & 213, Road No.2 G.I.D.C., Sarigam, Dist.: Valsad, Gujarat State India issued by Food & Drug Control Administration Gandhinagar India. The certificate is valid till 09-01-2020
3.	Documents for the procurement of API with approval from DRAP (in case of import).	**Empagliflozin:** Firm has submitted copy of invoice No. HN190108-C dated 08-01-2019 for import of

		0.41Kg of Empagliflozin (Batch No# E-20181027-D02-E06-01) in name of M/s Welwrd Pharmaceuticals attested by AD (I&E) DRAP Peshawar dated 23-01-2019. Firm has also submitted copy of form 6 dated 23-01-2019 for import of 0.41Kg of Empagliflozin in name of M/s Welwrd Pharmaceuticals attested by AD (I&E) DRAP Peshawar dated 23-01-2019. **Metformin HCl:** Firm has submitted copy of invoice No. EXP/1678/18-19 dated 21-11-2018 for import of 500Kg of Metformin HCl (Batch No# MEF/18091912) in name of M/s Welwrd Pharmaceuticals attested by AD (I&E) DRAP Peshawar dated 05-12-2018.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Fir has submitted data of stability batches supported by attested respective documents like chromatograms, summary data sheets etc.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not submitted

Remarks of Evaluator [XI]:

Section	Observations
1.3.5	• GMP inspection report/ GMP certificate of the manufacturing unit issued within the last three years shall be submitted
1.4.1.	• The applied drug product is a generic drug product while you have applied for a new drug product, clarify
1.6.5	• Valid GMP certificate / DML of drug substance manufacturer for Empagliflozin and Metformin issued by relevant regulatory authority of country of origin is required • Address of M/s Aarti drugs Limited in submitted application is different than that mentioned in GMP certificate, clarify
2.3.R.1	• Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3>
3.2.S.3	• Details of Elucidation of Structure and other Characteristics for metformin HCl shall be submitted • List of Drug Substance / API-related impurities and process-related impurities metformin HCl shall be submitted along with acceptance limits
3.2.S.4	• Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug Substance Metformin HCl by both drug substance manufacturer and Drug Product manufacturer is required. • Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug Substance Empagliflozin by Drug Product manufacturer is required.

	• Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance Metformin HCl and Empagliflozin shall be submitted. • Clarification is required as the drug substance manufacturer has performed assay of drug substance Metformin HCl in batch analysis by potentiometric method instead of HPLC method as recommended by USP. • Justification is required for not performing test for identification (IR & Reaction of Chloride) and residue on ignition for drug substance metformin HCl in batch analysis by drug product manufacturer as recommended by USP • Justification is required for not performing test for identification and residue on ignition for drug substance empagliflozin by drug product manufacturer as recommended by drug substance manufacturer. • Unsigned copy of batch analysis of drug substance empagliflozin by drug product manufacturer is submitted
3.2.P.2	• Justify why Pharmaceutical equivalence of the applied product has not been performed against the innovator product? • Submit detailed CDP studies including details of dissolution parameters, dissolution media, sampling time point and details of analytical parameters used and f2 factor calculation
3.2.P.5	• Justification is required for not including test for content uniformity for empagliflozin in finished product specifications as recommended by innovator product review document • Justification is required for not including the test for assay in finished product specifications • Justification is required for not mentioning the time for dissolution studies in finished product specifications as recommended by innovator product review document • Detailed analytical procedures used for testing the drug product shall be provided. • Results for specificity test is not submitted in method validation studies • Justification is required for not performing test for content uniformity in batch analysis as recommended by innovator product review document
3.2.P.6	• Detail of the container closure systems of drug substance is submitted instead of drug product
3.2.P.8	• Submit complete analytical record of stability study including summary data sheets, COA, Raw data sheets, and chromatograms • Compliance Record of HPLC software 21CFR & audit trail reports on product testing is not submitted • Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) is not submitted

Previous Decision (M-326-DRB): Board deferred the case for submission of reply to the above cited shortcomings within six months as the board was apprised that the letter of shortcoming has been initially shared with the firm and waiting firm reply.

Evaluation by PEC:

Section	**Observations**	

1.3.5	• GMP inspection report/ GMP certificate of the manufacturing unit issued within the last three years shall be submitted	• Firm has submitted copy of GMP certificate issued on 10-06-2022 based on inspection conducted on 30-03-2022
1.4.1.	• The applied drug product is a generic drug product while you have applied for a new drug product, clarify	• *No response submitted*
1.6.5	• Valid GMP certificate / DML of drug substance manufacturer for Empagliflozin and Metformin issued by relevant regulatory authority of country of origin is required • Address of M/s Aarti drugs Limited in submitted application is different than that mentioned in GMP certificate, clarify	**Empagliflozin:** The firm has submitted written confirmation for active substance exported to EU to M/s Fuxin Long Rui Pharmaceutical Co., Ltd, China for Active substance Empagliflozin confirming that the manufacturing plant complies with requirement of Chinese Good Manufacturing practices. This certificate is valid till 25-05-2024 **Metformin HCl:** The firm has submitted GMP certificate for M/s Aarti Drugs Limited., (Unit-II) Plot No. 211 & 213, Road No.2 G.I.D.C., Sarigam, Dist.: Valsad, Gujarat State India issued by Food & Drug Control Administration Gandhinagar India. *The certificate is valid till 19-03-2023*
2.3.R.1	• Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3>	• Firm has submitted copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3>
3.2.S.3	• Details of Elucidation of Structure and other Characteristics for metformin HCl shall be submitted • List of Drug Substance / API-related impurities and process-related impurities metformin HCl shall be submitted along with acceptance limits	• Details in this section are submitted as per guidance document
3.2.S.4	• Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug Substance Metformin HCl by both drug substance manufacturer and Drug Product manufacturer is required. • Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug Substance Empagliflozin by Drug Product manufacturer is required. • Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug	• Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug Substance Metformin HCl by drug substance manufacturer is submitted. *However, Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug Substance Metformin HCl by drug product manufacturer is not submitted* • *Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug*

	substance Metformin HCl and Empagliflozin shall be submitted. • Clarification is required as the drug substance manufacturer has performed assay of drug substance Metformin HCl in batch analysis by potentiometric method instead of HPLC method as recommended by USP. • Justification is required for not performing test for identification (IR & Reaction of Chloride) and residue on ignition for drug substance metformin HCl in batch analysis by drug product manufacturer as recommended by USP • Justification is required for not performing test for identification and residue on ignition for drug substance empagliflozin by drug product manufacturer as recommended by drug substance manufacturer. • Unsigned copy of batch analysis of drug substance empagliflozin by drug product manufacturer is submitted	*substance Metformin HCl and Empagliflozin is not submitted* • The firm submitted that drug substance manufacturer has performed assay of drug substance Metformin HCl in batch analysis by potentiometric titration method and HPLC method. *However, no evidence of HPLC method or performance is submitted* • *No response submitted* • *No response submitted* • *No response submitted*
3.2.P.2	• Justify why Pharmaceutical equivalence of the applied product has not been performed against the innovator product? • Submit detailed CDP studies including details of dissolution parameters, dissolution media, sampling time point and details of analytical parameters used and f2 factor calculation	Firm has again submitted Pharmaceutical Equivalence of applied product against the brand that is Empaa-M 12.5/500mg tablet by M/s Weatherfolds Pharma by performing quality tests (Identification, Assay, Dissolution, weight variation). • Firm has submitted details of CDP studies including details of dissolution parameters, dissolution media, sampling time point and details of analytical parameters. *However CDP has been performed against the comparator product Empaa-M 12.5/500mg tablet by M/s Weatherfolds Pharmaceuticals.*
3.2.P.5	• Justification is required for not including test for content uniformity for empagliflozin in finished product specifications as recommended by innovator product review document • Justification is required for not mentioning the time for dissolution studies in finished product specifications as recommended by innovator product review document • Justification is required for not including the test for assay in finished product specifications	• Firm has submitted revised finished product specifications containing content uniformity test for empagliflozin, time point for dissolution studies and details of assay test. • Firm has submitted analytical procedures for assay and dissolution tests. *Complete Analytical procedure is not submitted* • Results for specificity test is submitted in method validation studies

	• Detailed analytical procedures used for testing the drug product shall be provided. • Results for specificity test is not submitted in method validation studies • Justification is required for not performing test for content uniformity in batch analysis as recommended by innovator product review document	• *Firm has submitted unsigned copy of revised batch analysis report containing results of content uniformity test*
3.2.P.6	• Detail of the container closure systems of drug substance is submitted instead of drug product	• Firm has submitted details of the container closure systems of drug product. Alu-alu blister packed in bleach card box
3.2.P.8	• Submit complete analytical record of stability study including summary data sheets, COA, Raw data sheets, and chromatograms • Compliance Record of HPLC software 21CFR & audit trail reports on product testing is not submitted • Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) is not submitted	• Firm has submitted analytical record of stability study including summary data sheets, COA and chromatograms. *However detailed Raw data sheets are not submitted* • Compliance Record of HPLC software 21CFR & audit trail reports on product testing is submitted • Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) is submitted

Decision: Deferred for submission of following:

- **Clarification as the applied drug product is a generic drug product while you have applied for a new drug product.**
- **Valid GMP certificate / DML of drug substance manufacturer for Metformin issued by relevant regulatory authority of country of origin**
- **Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug Substance Metformin HCl by drug product manufacturer**
- **Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance Metformin HCl and Empagliflozin**
- **Clarification as the drug substance manufacturer has performed assay of drug substance Metformin HCl in batch analysis by potentiometric method instead of HPLC method as recommended by USP.**
- **Justification for not performing test for identification (IR & Reaction of Chloride) and residue on ignition for drug substance metformin HCl in batch analysis by drug product manufacturer as recommended by USP**
- **Justification for not performing test for identification and residue on ignition for drug substance empagliflozin by drug product manufacturer as recommended by drug substance manufacturer.**
- **Justification for submission of unsigned copy of batch analysis of drug substance empagliflozin by drug product manufacturer**
- **Justification as Pharmaceutical equivalence and CDP studies of the applied product has not been performed against the innovator**

- **Detailed analytical procedures used for testing the finished drug product.**
- **Justification for submission of unsigned copy of revised batch analysis report of finished product**
- **Detailed Raw data sheets**

Case No. 05: Deferred Registration applications of New Section of Human drugs on Form 5-F (Local)

861.	Name, address of Applicant / Marketing Authorization Holder	M/s Titlis Pharma (Pvt.) Limited., 528-A, Sunder Industrial Estate, Raiwind Road, Lahore.
	Name, address of Manufacturing site.	M/s Titlis Pharma (Pvt) Limited., 528-A, Sunder Industrial Estate, Raiwind Road, Lahore.

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted		
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**<u>Linagliptin:</u>** The firm have submitted written confirmation for active substance exported to EU to M/s Fuxin Long Rui Pharmaceutical Co., Ltd, China for Active substance Linagliptin by Deputy General Director confirming that the manufacturing plant complies with requirement of Chinese Good Manufacturing practices. This certificate is valid till 25-05-2024 Metformin HCl: The firm has submitted GMP certificate for M/s Aarti Drugs Limited (Unit-II) India issued by Food & Drug Control Administration Gandhinagar India. The certificate is valid till 19-03-2023		
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not submitted		

4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted data of stability batches supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not submitted

Remarks of Evaluator [XI]:

Section	Observations	Response
1.1	• Submit differential fee as the applied product is new drug molecule	
1.3.2	• The name of applicant as per form 5F is M/s Titlis Pharma (Pvt.) Limited., while name mentioned on DML is M/s Titlis Pharma., Clarification is required	
1.4	• Clarification is required as the applied drug product is a New Drug Product while you have applied for generic drug product	
1.6.5	• Submit valid GMP certificate / Drug Manufacturing License of the Drug Substance manufacturer for Linagliptin issued by relevant regulatory authority of country of origin	
3.2.S.4	• Justification is required for not including the test for sulphated ash in drug substance specification of drug substance metformin by drug product manufacturer as recommended by BP. • Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance(s) linagliptin and Metformin HCl shall be submitted. • Clarification is required as the drug substance manufacturer has performed assay of drug substance Metformin HCl in batch analysis by potentiometric method as per BP while drug product manufacturer has performed assay of drug substance Metformin HCl by titrimetric method. • Justification is required for not performing test for appearance of solution and sulphated ash test in batch analysis of drug substance metformin by drug product manufacturer as recommended by BP.	
3.2.S.7	• Stability study of Linagliptin drug substance batch No. L-20170604-D01-L9-03 at accelerated conditions is not submitted	
3.2.P.2	• Compatibility studies of the Drug Substance(s) with excipients shall be provided as the qualitative composition of the formulation is not similar to innovator / reference product.	

Applied product	**JENTADUETO tablet**
Linagliptin	Linagliptin
Metformin HCl	Metformin HCl
Lactose	Arginine
Avecil PH 102	Corn Starch
Starch	Copovidone
PVP K30	Colloidal Silicon Dioxide
Aerosil 200	Magnesium Stearate
Ac-di-sol	

	Magnesium stearate Purified water
	• Pharmaceutical equivalence and CDP of the applied product has not been submitted. • Only protocol for CDP is submitted
3.2.P.4	• The specifications, Analytical procedures and Validation of analytical procedures for excipients shall be provided as the firm have stated that excipient specifications follow in-house or manufacturer specifications
3.2.P.5	• Justification is required for setting dissolution specification of NLT 75% in 45 minutes while innovator product review document recommends NLT Q in 30 minutes • Justification is required for not including test for identification test active substances and uniformity of dosage units in finished product specification as recommended by innovator product review document. • Justification is required since composition of dissolution media and rotation (0.03M Potassium dihydrogen phosphate and 75rpm) mentioned in dissolution method for applied drug product is different than that recommended by innovator product review document (0.1N HCl and 50 rpm)
3.2.P.8	• Justification is required since composition of dissolution media (0.03M Potassium dihydrogen phosphate) mentioned in dissolution test for applied drug product in stability summary sheets is different than that recommended by innovator product review document (0.1N HCl) • Justification is required for setting dissolution specification NLT 75% in 45minutes in stability study summary sheets instead of NLT 75% in 30minutes as recommended by innovator product review document. • Submit documents for procurement of API with approval from DRAP • Submit Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) • Submit compliance Record of HPLC software 21CFR & audit trail reports on product testing

INDICATIONS AND USAGE

JENTADUETO is indicated as an adjunct to diet and exercise to improve glycemic control in adults with type 2 diabetes mellitus.

Limitations of Use

JENTADUETO should not be used in patients with type 1 diabetes.

JENTADUETO has not been studied in patients with a history of pancreatitis. It is unknown whether patients with a history of pancreatitis are at an increased risk for the development of pancreatitis while using JENTADUETO

2 DOSAGE AND ADMINISTRATION

2.1 Recommended Dosing

The dosage of JENTADUETO should be individualized on the basis of both effectiveness and tolerability, while not exceeding the maximum recommended dose of 2.5 mg linagliptin/1000 mg metformin hydrochloride (HCl) twice daily. JENTADUETO should be given twice daily with meals. Dose escalation should be gradual to reduce the gastrointestinal (GI) side effects associated with metformin use.

Recommended starting dose:

- In patients currently not treated with metformin HCl, initiate treatment with 2.5 mg linagliptin/500 mg metformin HCl twice daily.
- In patients already treated with metformin HCl, start with 2.5 mg linagliptin and the current dose of metformin HCl taken at each of the two daily meals (e.g., a patient on metformin HCl 1000 mg twice daily would be started on 2.5 mg linagliptin/1000 mg metformin HCl twice daily with meals).
- Patients already treated with linagliptin and metformin HCl individual components may be switched to JENTADUETO containing the same doses of each component.

Previous Decision (M-323-DRB): Registration Board deferred the case for submission of reply to the above cited shortcomings within six months.

Evaluation by PEC:

The submitted COA from Drug substance manufacturer and finished product manufacturer does not depict the enantiomeric form of Linagliptin

Section	Observations	Response
1.1	• Submit differential fee as the applied product is new drug molecule	Differential fee Rs 7500/- for the applied product is submitted vide deposit slip No. (3132785169) by the firm. Firm has submitted differential fee Rs. 37500/- for applied product vide deposit slip No. 0869445288.
1.3.2	• The name of applicant as per form 5F is M/s Titlis Pharma (Pvt.) Limited., while name mentioned on DML is M/s Titlis Pharma., Clarification is required	The firm submitted that the title of our company has been changed in 279th meeting of Central Licensing Board held on 18th February 2021, and the new approved title is "Titlis Pharma (Private) Limited". The change of title approval letter No. F. 1-11/2009-Lic (Vol-I) from Central Licensing Board in the name of "Titlis Pharma (Private) Limited" is submitted.
1.4	• Clarification is required as the applied drug product is a New Drug Product while you have applied for generic drug product	The firm submitted that we have applied for New Drug Product but Generic Drug Product was mentioned by typographic error.
1.6.5	• Submit valid GMP certificate / Drug Manufacturing License of the Drug Substance manufacturer for Linagliptin issued by relevant regulatory authority of country of origin	The firm have submitted written confirmation for active substances exported to EU to M/s Fuxin Long Rui Pharmaceutical Co., Ltd, China for Active substance Linagliptin by Deputy General Director confirming that the manufacturing plant complies with requirement of Chinese Good Manufacturing practices. This certificate is valid till 25-05-2024
3.2.S.4	• Justification is required for not including the test for sulphated ash in drug substance specification of drug substance metformin by drug product manufacturer as recommended by BP. • Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance(s) linagliptin and Metformin HCl shall be submitted. • Clarification is required as the drug substance manufacturer has performed assay of drug substance Metformin HCl in batch analysis by potentiometric method as per BP while drug product manufacturer has performed assay of drug substance Metformin HCl by titrimetric method. • Justification is required for not performing test for appearance of solution and sulphated ash test in batch analysis of drug	• The firm submitted that we have revised our testing method and now performing testing of Metformin HCL by HPLC method as per USP43 monograph and test for sulphated ash is not mentioned in USP monograph. • The testing and COA of most recent batch of metformin HCL (Batch no; MEF/12051645) as per USP Method is submitted. • Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance(s) linagliptin and Metformin HCl is submitted. • The firm submitted that previously, we were performing the assay of Metformin HCL on titrimetric method. However, we have revised our testing method and now performing testing of

	substance metformin by drug product manufacturer as recommended by BP.	Metformin HCl by HPLC method as per USP43 monograph. The testing and COA of most recent batch of metformin HCL (Batch no; MEF/12051645) as per USP Method is submitted. • The firm submitted that previously, we were performing the analysis of Metformin HCl on titrimetric method. However, we have revised our testing method and now performing testing of Metformin HCL by HPLC method as per USP43 monograph and test for appearance of solution and sulphated ash is not mentioned in USP monograph. • The testing and COA of most recent batch of metformin HCl (Batch no; MEF/12051645) as per USP Method is submitted.
3.2.S.7	• Stability study of Linagliptin drug substance batch No. L-20170604-D01-L9-03 at accelerated conditions is not submitted	Stability study of Linagliptin drug substance batch no. L-20170604-D01-L9-03 at accelerated condition is submitted.
3.2.P.2	• Compatibility studies of the Drug Substance(s) with excipients shall be provided as the qualitative composition of the formulation is not similar to innovator / reference product. **Applied product** / **JENTADUETO tablet** Linagliptin / Linagliptin Metformin HCl / Metformin HCl Lactose / Arginine Avecil PH 102 / Corn Starch Starch / Copovidone PVP K30 / Colloidal Silicon Dioxide Aerosil 200 / Magnesium Stearate Ac-di-sol Magnesium stearate Purified water	• The firm submitted that as per literature review and study of Hand Book for Pharmaceutical Excipients, it is notable that all the excipients used in our formulation are inert, and are compatible with active pharmaceutical ingredient of Linet tablet 2.5mg/500mg. Moreover, their safety and compatibility have also been established as no harsh / adverse effect has been observed in our stability studies. • The firm further stated that we have also performed Drug Excipients Compatibility studies concluded that all the excipients are inert and has no harsh effect on product stability.
	• Pharmaceutical equivalence and CDP of the applied product has not been submitted. • Only protocol for CDP is submitted	• The firm submitted that the innovator product **Jentadueto 2.5/500mg Tablet Manufactured by Boehringer Ingelheim, Germany** is not registered/available in Pakistan and we also didn't found in UAE (Abroad). Therefore, we could not perform the Comparative dissolution Profile of Linet 2.5/500mg Tablet due to unavailability of original sample. • It is notable that we have performed Comparative dissolution Profile of Linet 2.5/850mg Tablet (Linagliptin + Metformin) and Linet 2.5/1000mg Tablet (Linagliptin + Metformin) against the Innovator Brand Jentadueto and found

		that both said products release more that 80% within 30 minutes in all three media (0.1 N HCl pH 1.2, Acetate buffer pH 4.5 and Phosphate buffer pH 6.8. o The results show that dissolution profile of test and reference products are almost similar. o F2 value comply with acceptance criteria (Evidence is submitted) • Moreover, composition of all the three products Linet 2.5/500mg, Linet 2.5/850mg and Linet 2.5/1000mg Tablets are same except the quantity of Metformin HCl (Evidence is submitted). • *As per DRAP Guidelines for Industry on Investigation of Bio-Equivalence (BE) /Bioavailability (BA) studies for Multisource Generic Drug Products (9.3.1/(ii)):* ➢ If the amounts of the different excipients or capsule contents are same for the strengths concerned and only the mount of the API has changed ➢ If the amount of filler is changed to account for the change in amount of API: the amounts of other core excipients or capsule content should be the same for the strength concerned. • *Therefore, as per DRAP guidelines, we have conducted and complied the Comparative Dissolution Profile of Major Strengths (Linet 2.5/850mg & Linet 2.5/1000mg). So it is requested to waive off the small strength (Linet 2.5/500mg).* • We further undertake to perform Comparative Dissolution Profile (CDP) of Linet 2.5/500mg Tablet once we get the Innovator brand **Jentadueto 2.5/500mg Tablet Manufactured by Boehringer Ingelheim, Germany**
3.2.P.4	• The specifications, Analytical procedures and Validation of analytical procedures for excipients shall be provided as the firm have stated that excipient specifications follow in-house or manufacturer specifications	The firm submitted that all the excipients used in our formulation, follow pharmacopoeial specifications and submitted pharmacopoeial monographs of all the excipients.
3.2.P.5	• Justification is required for setting dissolution specification of NLT 75% in 45 minutes while innovator product review document recommends NLT Q in 30 minutes • Justification is required for not including test for identification test active substances	• The firm submitted that initially we performed dissolution by using following parameters: Media: 0.03 M Potassium Dihydrogen phosphate RPM: 75 rpm Apparatus: II (Paddle)

	and uniformity of dosage units in finished product specification as recommended by innovator product review document. • Justification is required since composition of dissolution media and rotation (0.03M Potassium dihydrogen phosphate and 75rpm) mentioned in dissolution method for applied drug product is different than that recommended by innovator product review document (0.1N HCl and 50 rpm)	Time 45 min. • Stability batches were analyzed at 0 & 3 months on in house testing but after innovator's product literature review, we revised our testing method and performed 6th month stability studies (accelerated + long run) as per innovator's specifications with below parameters. **Media: 0.1M HCl** **RPM: 50 rpm** **Apparatus: II (Paddle)** **Time 30 min.** • Moreover, we manufactured 3 new batches (Batch numbers: LP-22, LP-23 and LP-24) for performance of accelerated and long run stability testing as per innovator's specifications / dissolution parameters and "0", 3rd & 6th month testing has been completed and results are complying with innovator specification. (Reports and chromatogram are attached for kind perusal).
		Batch No. / **LP-22** / **LP-23** / **LP-24** Batch Size / 700 tablets / 700 tablets / 700 tablets Manufacturing Date / 04-2022 / 04-2022 / 04-2022 Date of Initiation / 21-04-2022 / 21-04-2022 / 21-04-2022
		CONCLUSION: Therefore, we have performed 0, 3, & 6th month stability studies as per innovator's specifications / dissolution parameters and the results are complying with innovator's specifications. The firm submitted that we have revised the specification and included the test for identification test for active substance, uniformity of dosage units in finished product specification as recommended by innovator product review document and submitted revised specifications
3.2.P.8	• Justification is required since composition of dissolution media (0.03M Potassium dihydrogen phosphate) mentioned in dissolution test for applied drug product in stability summary sheets is different than that recommended by innovator product review document (0.1N HCl) • Justification is required for setting dissolution specification NLT 75% in 45minutes in stability study summary	• The firm submitted that initially we performed dissolution by using following parameters: Media: 0.03 M Potassium Dihydrogen phosphate RPM: 75 rpm Apparatus: II (Paddle) Time 45 min. • Stability batches were analyzed at 0 & 3 months on in house testing but after

sheets instead of NLT 75% in 30minutes as recommended by innovator product review document.

- Submit documents for procurement of API with approval from DRAP
- Submit Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)
- Submit compliance Record of HPLC software 21CFR & audit trail reports on product testing

innovator's product literature review, we revised our testing method and performed 6th month stability studies (accelerated + long run) as per innovator's specifications with below parameters. (Revised stability study summary sheets are attached)

Media: 0.1M HCl
RPM: 50 rpm
Apparatus: II (Paddle)
Time 30 min.

- Moreover, we manufactured 3 new batches (Batch numbers: LP-22, LP-23 and LP-24) for performance of accelerated and long run stability testing as per innovator's specifications / dissolution parameters and "0", & 3rd and 6th month testing has been completed and results are complying with innovator specification (Reports and chromatogram are submitted).

Batch No.	**LP-22**	**LP-23**	**LP-24**
Batch Size	700 tablets	700 tablets	700 tablets
Manufacturing Date	04-2022	04-2022	04-2022
Date of Initiation	21-04-2022	21-04-2022	21-04-2022

CONCLUSION:

Therefore, we have performed 0, 3 & 6th month stability studies as per innovator's specifications / dissolution parameters and the results are complying with innovator's specifications.

- The firm has submitted copy of invoice No. EXP/321/20-21 dated 18-05-2020 in name of M/s Titli Pharma for import of Metformin HCl (Batch No. MEF/10041416) 1000kg attested by AD (I&E) DRAP Lahore.
- Firm has submitted copy of Form 6 for import of 0.220kg of Linagliptin from M/s Fuxin Long Rui Pharmaceutical Co., Ltd., China attested by AD (I&E) DRAP Lahore dated 09-08-2021.
- Firm has also submitted copy invoice No. HN210713-J dated 13-07-2021 for import of 0.22kg Linagliptin in name of M/s Titlis Pharma attested AD (I&E) DRAP Lahore dated 09-08-2021.
- Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) is submitted

		• Certificate for compliance Record of HPLC software 21CFR is submitted. *Audit trial report is not submitted.* The firm submitted that date and time of this HPLC (QC-HPLC-001) is locked and data alteration/editing is strictly restricted. Moreover this HPLC (QC-HPLC-001) has access control and only two authorized QC analysts have authorization to access and operate this HPLC (QC-HPLC-001).
Decision: Deferred for submission of following: • **Clarification for using the type of enantiomeric form of Linagliptin used in product development and stability studies and test performed for enantiomeric purity from drug substance manufacturer and drug product manufacturer** • **Pharmaceutical equivalence and CDP studies of the applied product against the innovator product.** • **Clarification for not using arginine in finished product as stabilizer as recommended by innovator product** • **Fee of Rs. 75,000/- for revision in stability data, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.**

Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted
2.	Approval of API/ DML/GMP certificate of API manufacturer issued	**<u>Linagliptin:</u>** The firm have submitted written confirmation for active substance exported to EU to M/s Fuxin Long Rui

	by concerned regulatory authority of country of origin.	Pharmaceutical Co., Ltd, China for Active substance Linagliptin by Deputy General Director confirming that the manufacturing plant complies with requirement of Chinese Good Manufacturing practices. This certificate is valid till 25-05-2024 Metformin HCl: The firm has submitted GMP certificate for M/s Aarti Drugs Limited (Unit-II) India issued by Food & Drug Control Administration Gandhinagar India. The certificate is valid till 19-03-2023
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not submitted
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted data of stability batches supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not submitted

Remarks of Evaluator [XI]:

Section	Observations	Response
1.1	• Submit differential fee as the applied product is new drug molecule	
1.3.2	• The name of applicant as per form 5F is M/s Titlis Pharma (Pvt.) Limited., while name mentioned on DML is M/s Titlis Pharma., Clarification is required	
1.4	• Clarification is required as the applied drug product is a New Drug Product while you have applied for generic drug product	
1.6.5	• Submit valid GMP certificate / Drug Manufacturing License of the Drug Substance manufacturer for Linagliptin issued by relevant regulatory authority of country of origin	
3.2.S.4	• Justification is required for not including the test for sulphated ash in drug substance specification of drug substance metformin by drug product manufacturer as recommended by BP. • Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance(s) linagliptin and Metformin HCl shall be submitted. • Clarification is required as the drug substance manufacturer has performed assay of drug substance Metformin HCl in batch analysis by potentiometric method as per BP while drug product manufacturer has performed assay of drug substance Metformin HCl by titrimetric method.	

- Justification is required for not performing test for appearance of solution and sulphated ash test in batch analysis of drug substance metformin by drug product manufacturer as recommended by BP.

3.2.S.7
- Stability study of Linagliptin drug substance batch No. L-20170604-D01-L9-03 at accelerated conditions is not submitted

3.2.P.2
- Compatibility studies of the Drug Substance(s) with excipients shall be provided as the qualitative composition of the formulation is not similar to innovator / reference product.

Applied product	**JENTADUETO tablet**
Linagliptin	Linagliptin
Metformin HCl	Metformin HCl
Lactose	Arginine
Avecil PH 102	Corn Starch
Starch	Copovidone
PVP K30	Colloidal Silicon Dioxide
Aerosil 200	Magnesium Stearate
Ac-di-sol	
Magnesium stearate	
Purified water	

- CDP of the applied product has not been submitted.
- Only protocol for CDP is submitted

3.2.P.4
- The specifications, Analytical procedures and Validation of analytical procedures for excipients shall be provided as the firm have stated that excipient specifications follow in-house or manufacturer specifications

3.2.P.5
- Justification is required for setting dissolution specification of NLT 75% in 45 minutes while innovator product review document recommends NLT Q in 30 minutes
- Justification is required for not including test for identification test active substances and uniformity of dosage units in finished product specification as recommended by innovator product review document.
- Justification is required since composition of dissolution media and rotation (0.03M Potassium dihydrogen phosphate and 75rpm) mentioned in dissolution method for applied drug product is different than that recommended by innovator product review document (0.1N HCl and 50 rpm)

3.2.P.8
- Justification is required since composition of dissolution media (0.03M Potassium dihydrogen phosphate) mentioned in dissolution test for applied drug product in stability summary sheets is different than that recommended by innovator product review document (0.1N HCl)
- Justification is required for setting dissolution specification NLT 75% in 45minutes in stability study summary sheets instead of NLT 75% in 30minutes as recommended by innovator product review document.
- Submit documents for procurement of API with approval from DRAP
- Submit Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)
- Submit compliance Record of HPLC software 21CFR & audit trail reports on product testing

INDICATIONS AND USAGE

JENTADUETO is indicated as an adjunct to diet and exercise to improve glycemic control in adults with type 2 diabetes mellitus.

Limitations of Use

JENTADUETO should not be used in patients with type 1 diabetes.

JENTADUETO has not been studied in patients with a history of pancreatitis. It is unknown whether patients with a history of pancreatitis are at an increased risk for the development of pancreatitis while using JENTADUETO

2 DOSAGE AND ADMINISTRATION

2.1 Recommended Dosing

The dosage of JENTADUETO should be individualized on the basis of both effectiveness and tolerability, while not exceeding the maximum recommended dose of 2.5 mg linagliptin/1000 mg metformin hydrochloride (HCl) twice daily. JENTADUETO should be given twice daily with meals. Dose escalation should be gradual to reduce the gastrointestinal (GI) side effects associated with metformin use.

Recommended starting dose:

- In patients currently not treated with metformin HCl, initiate treatment with 2.5 mg linagliptin/500 mg metformin HCl twice daily.
- In patients already treated with metformin HCl, start with 2.5 mg linagliptin and the current dose of metformin HCl taken at each of the two daily meals (e.g., a patient on metformin HCl 1000 mg twice daily would be started on 2.5 mg linagliptin/1000 mg metformin HCl twice daily with meals).
- Patients already treated with linagliptin and metformin HCl individual components may be switched to JENTADUETO containing the same doses of each component.

Previous Decision (M-323-DRB): Registration Board deferred the case for submission of reply to the above cited shortcomings within six months.

Evaluation by PEC:

The submitted COA from Drug substance manufacturer and finished product manufacturer does not depict the enantiomeric form of Linagliptin

Section	Observations	Response
1.1	• Submit differential fee as the applied product is new drug molecule	Differential fee Rs 7500/- for the applied product is submitted vide deposit slip No. (546145406) by the firm. Firm has submitted differential fee Rs. 37500/- for applied product vide deposit slip No. 7990568766.
1.3.2	• The name of applicant as per form 5F is M/s Titlis Pharma (Pvt.) Limited., while name mentioned on DML is M/s Titlis Pharma., Clarification is required	The firm submitted that the title of our company has been changed in 279th meeting of Central Licensing Board held on 18th February 2021, and the new approved title is "Titlis Pharma (Private) Limited". The change of title approval letter No. F. 1-11/2009-Lic (Vol-I) from Central Licensing Board in the name of "Titlis Pharma (Private) Limited" is submitted.
1.4	• Clarification is required as the applied drug product is a New Drug Product while you have applied for generic drug product	The firm submitted that we have applied for New Drug Product but Generic Drug Product was mentioned by typographic error.
1.6.5	• Submit valid GMP certificate / Drug Manufacturing License of the Drug Substance manufacturer for Linagliptin issued by relevant regulatory authority of country of origin	The firm have submitted written confirmation for active substances exported to EU to M/s Fuxin Long Rui Pharmaceutical Co., Ltd, China for Active substance Linagliptin by Deputy General Director confirming that the manufacturing plant complies with requirement of Chinese Good Manufacturing practices. This certificate is valid till 25-05-2024
3.2.S.4	• Justification is required for not including the test for sulphated ash in drug substance specification of drug substance metformin by drug product manufacturer as recommended by BP. • Analytical Method Verification studies including specificity, accuracy and	• The firm submitted that we have revised our testing method and now performing testing of Metformin HCL by HPLC method as per USP43 monograph and test for sulphated ash is not mentioned in USP monograph.

	repeatability (method precision) performed by the Drug Product manufacturer for drug substance(s) linagliptin and Metformin HCl shall be submitted. • Clarification is required as the drug substance manufacturer has performed assay of drug substance Metformin HCl in batch analysis by potentiometric method as per BP while drug product manufacturer has performed assay of drug substance Metformin HCl by titrimetric method. • Justification is required for not performing test for appearance of solution and sulphated ash test in batch analysis of drug substance metformin by drug product manufacturer as recommended by BP.	• The testing and COA of most recent batch of metformin HCL (Batch no; MEF/12051645) as per USP Method is submitted. • Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance(s) linagliptin and Metformin HCl is submitted. • The firm submitted that previously, we were performing the assay of Metformin HCL on titrimetric method. However, we have revised our testing method and now performing testing of Metformin HCl by HPLC method as per USP43 monograph. The testing and COA of most recent batch of metformin HCL (Batch no; MEF/12051645) as per USP Method is submitted. • The firm submitted that previously, we were performing the analysis of Metformin HCl on titrimetric method. However, we have revised our testing method and now performing testing of Metformin HCL by HPLC method as per USP43 monograph and test for appearance of solution and sulphated ash is not mentioned in USP monograph. • The testing and COA of most recent batch of metformin HCl (Batch no; MEF/12051645) as per USP Method is submitted.
3.2.S.7	• Stability study of Linagliptin drug substance batch No. L-20170604-D01-L9-03 at accelerated conditions is not submitted	Stability study of Linagliptin drug substance batch no. L-20170604-D01-L9-03 at accelerated condition is submitted.
3.2.P.2	• Compatibility studies of the Drug Substance(s) with excipients shall be provided as the qualitative composition of the formulation is not similar to innovator / reference product. **Applied product** / **JENTADUETO tablet** Linagliptin / Linagliptin Metformin HCl / Metformin HCl Lactose / Arginine Avecil PH 102 / Corn Starch Starch / Copovidone PVP K30 / Colloidal Silicon Dioxide Aerosil 200 / Magnesium Stearate Ac-di-sol Magnesium stearate Purified water	• The firm submitted that as per literature review and study of Hand Book for Pharmaceutical Excipients, it is notable that all the excipients used in our formulation are inert, and are compatible with active pharmaceutical ingredient of Linet tablet 2.5mg/850mg. Moreover, their safety and compatibility have also been established as no harsh / adverse effect has been observed in our stability studies. • The firm further stated that we have also performed Drug Excipients Compatibility studies and concluded that all the excipients are inert and has no harsh effect on product stability.

	• Pharmaceutical equivalence and CDP of the applied product has not been submitted. Only protocol for CDP is submitted	• CDP has been performed against the brand Jentadueto 2.5/850mg tablet by M/s Boehringer Ingelheim Pharma Germany in Acid media pH 1.2, acetate buffer pH 4.5 & Phosphate Buffer pH 6.8. The values for f2 are in the acceptable range. • Pharmaceutical Equivalence have been established against Jentadueto 2.5/850mg Tablet of M/s Boehringer Ingelheim Pharma Germany by performing quality tests (Identification, disintegration, weight variation, content uniformity, Dissolution and Assay).
3.2.P.4	• The specifications, Analytical procedures and Validation of analytical procedures for excipients shall be provided as the firm have stated that excipient specifications follow in-house or manufacturer specifications	The firm submitted that all the excipients used in our formulation, follow pharmacopoeial specifications and submitted pharmacopoeial monographs of all the excipients.
3.2.P.5	• Justification is required for setting dissolution specification of NLT 75% in 45 minutes while innovator product review document recommends NLT Q in 30 minutes • Justification is required for not including test for identification test active substances and uniformity of dosage units in finished product specification as recommended by innovator product review document. • Justification is required since composition of dissolution media and rotation (0.03M Potassium dihydrogen phosphate and 75rpm) mentioned in dissolution method for applied drug product is different than that recommended by innovator product review document (0.1N HCl and 50 rpm)	• The firm submitted that initially we performed dissolution by using following parameters: Media: 0.03 M Potassium Dihydrogen phosphate RPM: 75 rpm Apparatus: II (Paddle) Time 45 min. • It is notable that the data of comparative dissolution profile report for Linet 2.5mg/850mg tablet is remarkable and recognizes that the product is highly soluble and dissolves not less than 75% after 45 minutes in all three media (0.1 N HCl pH 1.2, Acetate buffer pH 4.5 and Phosphate buffer pH 6.8) at all seven sampling points. Therefore, it is ascertained that dissolution studies of test and reference products are almost similar in all three prescribed dissolution mediums including Acetate buffer pH 4.5. Moreover, f2 values comply with the acceptance criteria. • Stability batches were analyzed at 0 & 3 months on in house testing but after innovator's product literature review, we revised our testing method and performed 6th month stability studies (accelerated + long run) as per innovator's specifications with below parameters. **Media: 0.1M HCl** **RPM: 50 rpm** **Apparatus: II (Paddle)** **Time 30 min.** • Moreover, we manufactured 3 new batches (Batch numbers: LP-25, LP-26 and LP-27) for performance of accelerated

		and long run stability testing as per innovator's specifications / dissolution parameters and "0", 3rd & 6th month testing has been completed and results are complying with innovator specification. (Reports and chromatogram are attached for kind perusal). **Batch No.** **LP-25** **LP-26** **LP-27** Batch Size 700 tablets 700 tablets 700 tablets Manufacturing Date 04-2022 04-2022 04-2022 Date of Initiation 18-04-2022 18-04-2022 18-04-2022 **CONCLUSION:** Therefore, we have performed 0, 3, & 6th month stability studies as per innovator's specifications / dissolution parameters and the results are complying with innovator's specifications. The firm submitted that we have revised the specification and included the test for identification test for active substance, uniformity of dosage units in finished product specification as recommended by innovator product review document and submitted revised specifications
3.2.P.8	• Justification is required since composition of dissolution media (0.03M Potassium dihydrogen phosphate) mentioned in dissolution test for applied drug product in stability summary sheets is different than that recommended by innovator product review document (0.1N HCl) • Justification is required for setting dissolution specification NLT 75% in 45minutes in stability study summary sheets instead of NLT 75% in 30minutes as recommended by innovator product review document. • Submit documents for procurement of API with approval from DRAP • Submit Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) • Submit compliance Record of HPLC software 21CFR & audit trail reports on product testing	• The firm submitted that initially we performed dissolution by using following parameters: Media: 0.03 M Potassium Dihydrogen phosphate RPM: 75 rpm Apparatus: II (Paddle) Time 45 min. • Stability batches were analyzed at 0 & 3 months on in house testing but after innovator's product literature review, we revised our testing method and performed 6th month stability studies (accelerated + long run) as per innovator's specifications with below parameters. (Revised stability study summary sheets are attached) **Media: 0.1M HCl** **RPM: 50 rpm** **Apparatus: II (Paddle)** **Time 30 min.** • Moreover, we manufactured 3 new batches (Batch numbers: LP-25, LP-26 and LP-27) for performance of accelerated and long run stability testing as per innovator's specifications / dissolution parameters and "0", & 3rd and 6th month

testing has been completed and results are complying with innovator specification (Reports and chromatogram are submitted).

Batch No.	**LP-25**	**LP-26**	**LP-27**
Batch Size	700 tablets	700 tablets	700 tablets
Manufacturing Date	04-2022	04-2022	04-2022
Date of Initiation	18-04-2022	18-04-2022	18-04-2022

CONCLUSION:

Therefore, we have performed 0, 3 & 6th month stability studies as per innovator's specifications / dissolution parameters and the results are complying with innovator's specifications.

- The firm has submitted copy of invoice No. EXP/321/20-21 dated 18-05-2020 in name of M/s Titli Pharma for import of Metformin HCl (Batch No. MEF/10041416) 1000kg attested by AD (I&E) DRAP Lahore.
- Firm has submitted copy of Form 6 for import of 0.220kg of Linagliptin from M/s Fuxin Long Rui Pharmaceutical Co., Ltd., China attested by AD (I&E) DRAP Lahore dated 09-08-2021.
- Firm has also submitted copy invoice No. HN210713-J dated 13-07-2021 for import of 0.22kg Linagliptin in name of M/s Titlis Pharma attested AD (I&E) DRAP Lahore dated 09-08-2021.
- Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) is submitted
- Certificate for compliance Record of HPLC software 21CFR is submitted. *Audit trial report is not submitted.* The firm submitted that date and time of this HPLC (QC-HPLC-001) is locked and data alteration/editing is strictly restricted. Moreover this HPLC (QC-HPLC-001) has access control and only two authorized QC analysts have authorization to access and operate this HPLC (QC-HPLC-001).

Decision: Deferred for submission of following:

- **Clarification for using the type of enantiomeric form of Linagliptin used in product development and stability studies and test performed for enantiomeric purity from drug substance manufacturer and drug product manufacturer**

- **Clarification for not using arginine in finished product as stabilizer as recommended by innovator product**
- **Fee of Rs. 75,000/- for revision in stability data, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.**

Case No. 06; Deferred Registration applications of human drugs on Form 5F (New DML)

863.	Name, address of Applicant / Marketing Authorization Holder	M/s Biogen Life Sciences, 8-km Chakbeli Road Rawat Rawalpindi
	Name, address of Manufacturing site.	M/s Biogen Life Sciences, 8-km Chakbeli Road Rawat Rawalpindi
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy.No 28774 dated 11-10-2022
	Details of fee submitted	Not submitted
	The proposed proprietary name / brand name	**Fusigen-H 15gm Cream**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each gram cream contains: Fusidic Acid (BP)……..….20mg (2% w/w) Hydrocortisone Acetate……10mg (1% w/w)
	Pharmaceutical form of applied drug	White to off white color cream.
	Pharmacotherapeutic Group of (API)	Antibiotics & corticosteroid For Topical Use
	Reference to Finished product specifications	Innovator Specification
	Proposed Pack size	As per SRO
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Fucidin H cream MHRA approved
	For generic drugs (me-too status)	Fusimax-H 2%+1% Cream by M/s Maxitech Pharma (Reg# 83733)
	GMP status of the Finished product manufacturer	New license granted on 13/02/2020
	Name and address of API manufacturer.	**Fusidic Acid**: Joyang Laboratories., Haidu North Road, Sheyang Economic Development Zone, Jiangsu, China **Hydrocortisone Acetate:** Henan Lihua Pharmaceutical Co Ltd., Middle of Huanghe Street, Anyang Hi-Tech Industry Development Zone, Henan China
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers,

		description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The firm as submitted detail of nomenclature, structure, general properties, solubilities impurities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	**Fusidic Acid:** Firm has submitted stability study data of fusidic acid. Stability study is conducted Real time: 30˚C ± 2˚C / 65% ± 5%RH for 24 months and at Accelerated conditions 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (121002FA, 121003FA, 121004FA) Batches: (150501FB, 150502FB, 150503FB) **Hydrocortisone Acetate:** Firm has submitted stability study data of Hydrocortisone acetate. Stability study is conducted Real time: 30˚C ± 2˚C / 65% ± 5%RH for 24 months and at Accelerated conditions 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (160801, 160802, 160803)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, specifications, analytical procedure and its validation studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand Genidic-H Cream by performing quality tests (Identification, Assay, Uniformity of dosage, pH).
	Analytical method validation/verification of product	Method verification studies have submitted including specificity, repeatibility, recovery and accuracy.

STABILITY STUDY DATA	
Manufacturer of API	**Fusidic Acid**: Joyang Laboratories., Haidu North Road, Sheyang Economic Development Zone, Jiangsu, China **Hydrocortisone Acetate:** Henan Lihua Pharmaceutical Co Ltd., Middle of Huanghe Street, Anyang Hi-Tech Industry Development Zone, Henan China
API Lot No.	**Fusidic Acid:** 200507 FB **Hydrocortisone Acetate:** K06M20210604
Description of Pack (Container closure system)	Cream filled in Aluminium pre-printed tube packed in unit carton

Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	T-001	T-002	T-003
Batch Size	500 tubes	500 tubes	500 tubes
Manufacturing Date	10-2021	10-2020	10-2021
Date of Initiation	14-10-2021	14-10-2021	14-10-2021
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Fusidic Acid:** Firm has submitted GMP certificate No#CQ20180013 in the name of M/s Joyang Laboratories., Haidu North Road, Sheyang Economic Development Zone, Jiangsu, China issued by Chonging Food and Drug administration China valid upto 06-06-2023
3.	Documents for the procurement of API with approval from DRAP (in case of import).	**Fusidic Acid:** Firm has submitted copy of invoice No# 00025096 dated 02-04-2020 in name of M/s Biogen Pharmaceuticals for import of 1.5kg of Fusidic Acid. ***However, the invoice is not attested by AD (I&E) DRAP Field office.***
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not Submitted

Remarks of Evaluator [XI]:

Section	Observations	Response
1.1	• Fee for registration of applied product is not submitted	
1.6.5	• Details of each drug substance manufacturer should be provided in this section separately • Valid GMP certificate / DML of drug substance manufacturer for hydrocortisone acetate issued by relevant regulatory authority of country of origin is required	
1.3.2	• The name of applicant as per form 5F is Biogen Life sciences while name mentioned on DML is Biogen Pharmaceuticals. Clarification is required	

2.3.R.1	• Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3>	
3.2.S.4	• Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient fusidic acid by Drug product manufacturer is required. • Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient hydrocortisone acetate by both drug substance and Drug product manufacturer is required • Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance(s) i.e. fusidic acid and hydrocortisone acetate shall be submitted.	
3.2.P.2	• Submit details of reference / comparator product including batch numbers, manufacturing & expiry date, name of manufacturer in pharmaceutical equivalence • Justify why Pharmaceutical equivalence of the applied product has not been performed against the innovator product?	
3.2.P.3	• Description of manufacturing process does not include the step in which the hydrocortisone is added in the formulation in manufacturing process, clarification is required	
3.2.P.8	• Documents for procurement of API with approval from DRAP • Submit Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	

Previous Decision (322nd–DRB): Registration Board deferred the case for submission of reply to the above cited shortcomings within six months.

Response of the Firm:

Section	Observations	Response
1.1	• Fee for registration of applied product is not submitted	Firm has submitted challan No. 78950080271 dated 07-11-2022 for registration fee of Rs. 30000/- submitted for applied product Fusigen H Cream
1.6.5	• Details of each drug substance manufacturer should be provided in this section separately • Valid GMP certificate / DML of drug substance manufacturer for hydrocortisone acetate issued by relevant regulatory authority of country of origin is required	• Firm has submitted details of each drug substance manufacturer in this section **Fusidic Acid**: Joyang Laboratories., Haidu North Road, Sheyang Economic Development Zone, Jiangsu, China **Hydrocortisone Acetate:** Henan Lihua Pharmaceutical Co Ltd., Middle of Huanghe Street, Anyang Hi-Tech Industry Development Zone, Henan China • Firm has submitted GMP certificate No. HA20170054 of M/s Henan Lihua Pharmaceutical Co Ltd., Middle of Huanghe Street, Anyang Hi-Tech Industry Development Zone, Henan China issued by Henan Province Food and Drug Administration for hydrocortisone acetate ***valid upto 26-10-2022*** • Firm has also submitted DML No. Yu 20150014 of M/s Henan Lihua Pharmaceutical Co Ltd.,

		Middle of Huanghe Street, Anyang Hi-Tech Industry Development Zone, Henan China valid upto 31-12-2025.
1.3.2	• The name of applicant as per form 5F is Biogen Life sciences while name mentioned on DML is Biogen Pharmaceuticals. Clarification is required	The firm submitted letter No. 1-2/2019-Lic dated 18th March 2021 for change of title of the firm from M/s Biogen Pharmaceuticals to Biogen Lifesciences.
2.3.R.1	• Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3>	Firm has submitted copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3>
3.2.S.4	• Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient fusidic acid by Drug product manufacturer is required. • Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient hydrocortisone acetate by both drug substance and Drug product manufacturer is required • Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance(s) i.e. fusidic acid and hydrocortisone acetate shall be submitted.	• Firm has submitted copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance fusidic acid by Drug product manufacturer • Firm has submitted copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance hydrocortisone acetate by both drug substance and Drug product manufacturer • Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance(s) i.e. fusidic acid and hydrocortisone acetate is submitted.
3.2.P.2	• Submit details of reference / comparator product including batch numbers, manufacturing & expiry date, name of manufacturer in pharmaceutical equivalence • Justify why Pharmaceutical equivalence of the applied product has not been performed against the innovator product?	• The firm submitted details of reference / comparator product. The details of comparator product are: Name: Genidic-H Cream; B. No: 2204, Mfg Date: 05-21, Expiry Date: 05-23 Manufacturer by: Biogen Pharma., 8-Km chakbeli Road Rawat Rawalpindi • The firm submitted that due to Easley Access of comparator *(Genidic-H manufacturer by Biogen pharma)* that's why perform pharmaceuticals equivalence study.
3.2.P.3	• Description of manufacturing process does not include the step in which the hydrocortisone is added in the formulation in	The firm submitted that due to Typographically mistake hydrocortisone acetate was not mentioned. The firm has submitted revised manufacturing process

	manufacturing process, clarification is required	
3.2.P.8	• Documents for procurement of API with approval from DRAP • Submit Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	• The firm has submitted copy of invoice No. 2021LH-0785 dated 29-07-2021 in name of M/s Biogen Lifesciences *Plot No. 260, Industrial Triangle, Kahuta Road, Islamabad for* Hydrocortisone Acetate (Batch No. K06M20210604) 10kg. *The invoice is not attested by AD (I&E) Field office. Further the address of firm mentioned in invoice is different from the actual address of the firm* • The firm has submitted copy of invoice No. 00025096 dated Apr 02-2020 in name of M/s Biogen Pharmaceuticals 8-km Chakbeli Road Rawat Rawalpindi for Fusidic Acid (Batch No. 190713FB) 1.5kg. *The invoice is not attested by AD (I&E) Field office. The batch No. of drug substance mentioned in invoice is different from that mentioned in batch analysis* • Firm has submitted Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)

Previous Decision (324-DRB): Deferred for Documents for procurement of drug substance with approval from DRAP I&E office.

Evaluation by PEC:

- Firm has again submitted copy of commercial invoice No. 2021LH-0785 dated 29-07-2021 wherein M/s Biogen Life Sciences have imported 0.5kg of Hydrocortisone Acetate (Batch No. K06M20210604). It is submitted that quantity mentioned in already submitted invoice was 10kg. Firm has submitted DHL invoice for hydrocortisone Acetate. *However, DRAP attested clearance is not provided.*
- The firm has again submitted copy of invoice No. 00025096 dated Apr 02-2020 in name of M/s Biogen Pharmaceuticals for Fusidic Acid (Batch No. 200507FB) 1.5kg. *However, in the submitted document Batch number is over written and changed from original ones. Furthermore, DRAP attested clearance is not provided for the same.* Firm has submitted DHL invoice for fusidic acid

Decision: Deferred for submission of following:

- **Documents for procurement of drug substance with approval from DRAP I&E office.**
- **Pharmaceutical equivalence studies of the applied product against the innovator product**

The batch No. of drug substance mentioned in invoice is different from that mentioned in batch analysis* • Firm has submitted Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)

Previous Decision (324-DRB): Deferred for Documents for procurement of drug substance with approval from DRAP I&E office.

Evaluation by PEC:

- The firm has again submitted copy of invoice No. 00025096 dated Apr 02-2020 in name of M/s Biogen Pharmaceuticals for Fusidic Acid (Batch No. 200507FB) 1.5kg. *However, in the submitted document*

Batch number is over written and changed from original ones. Furthermore, DRAP attested clearance is not provided for the same. Firm has submitted DHL invoice for fusidic acid • The firm has submitted copy of invoice No. 93 dated 02-11-2020 in name of M/s Biogen Pharmaceuticals for Betamethasone valerate (Batch No. EV/BV-256/20) 0.3kg. *However, DRAP attested clearance is not provided.* Firm has submitted DHL invoice for Betamethasone valerate.
Decision: Deferred for submission of following: • **Documents for procurement of drug substance with approval from DRAP I&E office.** • **Pharmaceutical equivalence studies of the applied product against the innovator product**

Case No. 07: Deferred cases of Priority Registration of Fludrocortisone tablets on Form 5:

The Drug Regulatory Authority of Pakistan in its 91st meeting held on 4th September 2020, exercising its power under Rule 26 of Drugs (LRA) Rules amended vide SRO 713(I)/2018 dated 8th June, 2018, allowed to submit registration applications on Form 5 / Form 5-A / Form 5-D instead of Form 5F, for Registration of Fludrocortisone tablets in light of approvals granted by the reference regulatory authorities and with the following additional conditions:

i. The applicants can submit their applications till 30-09-2020 and these applications will be considered out of queue.
ii. Registration Board may consider grant of registration and submission of data of product development and 6 months accelerated and 6 months real time stability studies data before sale of product along with other data as may be required.

865.	Name and address of manufacture / Applicant	M/s Pharma wise Labs Pvt Ltd., 25-M. Q.A Industrial Estate, Kot Lakhpat Lahore, Pakistan
	Brand Name+Dosage Form+Strength	Floricort 0.1mg Tablet
	Composition	Each Tablet Contains: Fludrocortisone Acetate…….0.1mg
	Dairy No. date of R &I fee	Form-5D Dy.No 25498 dated 29-09-2020 Rs.50,000/- 29-09-2020
	Pharmacological Group	Mineralocorticoid
	Type of form	Form 5D
	Finished product specifications	USP
	Pack size and Demand Price	As per SRO
	Approval status of product in Reference Regulatory Authorities	Fludrocortisone Acetate 0.1mg Tablets MHRA Approved
	Me-too-status	
	GMP Status	GMP certificate issued to M/s Pharma Wise Labs (Pvt.) Ltd on 13.12.2019 based on inspection conducted on 16.10.2019
	Previous Remark of Evaluator [XI]	• The firm submitted revised layout plan approved for regularization of sections mentioned vide covering letter No. F. 1-7/85-Lic (Vol-II) dated 18/12/2017 showing steroidal tablet section. • The firm submitted GMP certificate issued on 13.12.2019 based on inspection conducted on 16.10.2019 having tablet steroidal section. However, the conclusion of inspection report contains the following statement: • The resumption of production activities in the following sections: a. Oral liquid section (syrup/suspension b. Antiseptic section c. Cream/Ointment section d. General tablet section

		• Resumption of production activities in the following sections be allowed only after installation of 400 KVA transformer. The installation / operations would be verified by area FID and forwarded to DRAP, Islamabad for resumption. a. Sachet section b. Repacking section c. Capsule section d. General antibiotic tablet section e. General antibiotic dry powder section f. Steroid tablet section • Panel did not recommend the resumption in penicillin area
	Previous Decision (297-DRB)	• Deferred for updated status of GMP of the firm as explanation letter issued to the firm on 11th January 2021 from QA & LT division.
	Evaluation by PEC	• The firm have submitted inspection report conducted by FID dated 25-10-2021 and conclusion of inspection was: In view of above inspection proceedings, it was observed that the firm had rectified most of the deficiencies pointed out during last GMP inspection, hence the firm display positive approach towards compliance.
	Previous Decision (316-DRB)	• Deferred for confirmation of manufacturing facility i.e. Steroid tablet section from Licensing Division
	Evaluation by PEC	• The firm has submitted panel inspection report dated 21-03-2023 for renewal of DML and Regularization of Layout plan wherein the panel has recommended the grant of renewal of DML and regularization of Layout plan to M/s Pharma wise Labs (Pvt.,) Ltd., 25-M, Kot Lakhpat Industrial Estate, Lahore for following sections: 1. Oral liquid section (syrup/suspension) 2. External Applications/Antiseptic Liquid section 3. Cream/Ointment section 4. Tablet section (General) 5. Oral Dry powder Sachet section 6. Repacking section 7. Capsule section 8. Oral Dry Powder for suspension (General antibiotic) 9. Tablet (General antibiotic) section 10. Tablet (Steroid) section
	Decision:	

Agenda of Evaluator PEC-XIII.

Case 01; Registration applications of Routine cases (Human) drugs on Form 5F.

866.	Name, address of Applicant / Marketing Authorization Holder	M/s Ferozsons Laboratories Ltd., Amangarh, Nowshera, Khyber Pakhtunkhwa.
	Name, address of Manufacturing site.	M/s Ferozsons Laboratories Ltd., Amangarh, Nowshera, Khyber Pakhtunkhwa.
	Status of the applicant	☒ Manufacturer

		☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 3417 dated 04-02-2022.
	Details of fee submitted	PKR 30,000/-: vide slip No. 426086645 dated 07-12-2021.
	The proposed proprietary name / brand name	Nebita 2.5mg tablets.
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each tablet contains: Nebivolol HCl eq. to Nebivolol ……2.5mg
	Pharmaceutical form of applied drug	Tablet.
	Pharmacotherapeutic Group of (API)	Beta blocking agents, selective ATC code: C07AB
	Reference to Finished product specifications	Innovator specifications.
	Proposed Pack size	10's, 14's, 20's, 28's & 30's.
	Proposed unit price	As per SRO.
	The status in reference regulatory authorities	BYSTOLIC® (Nebivolol) 2.5mg, 5mg, 10mg & 20mg tablets, USFDA approved
	For generic drugs (me-too status)	Nebix Tablet 2.5 mg, Highnoon laboratories, Reg. No. 062776,
	GMP status of the Finished product manufacturer	GMP certificate issued on 25-08-2021 on the basis of inspection conducted on 10-08-2021.
	Evidence of section approval.	Tablet (general) section approved vide letter No. F. 3-14/2004-Lic dated 08-04-2015.
	Name and address of API manufacturer.	M/s Cadila Pharmaceuticals Ltd., 294, G.I.D.C. Estate, City: - Ankleshwar – 393 002, Dist. Bharuch Gujrat State, India. Copy of GMP certificate No. 21102987 dated 21-10-2021 issued by Food & Drug Control Administration Gujrat State, India on the basis of inspection conducted on 32-24/09/2021 & 16/10/2021 valid till 20-10-2024 is submitted.
	Module-II (Quality Overall Summary)	Firm has submitted QOS details as per WHO QOS PD template.
	Module III (Drug Substance)	Firm has submitted detail of nomenclature, structure, general properties, solubility, manufacturers, description of manufacturing process and controls, tests for impurities & related substances, specifications, analytical procedures and its verification, batch analysis (20NV023, mfg. date 06-2020) and justification of specification, reference standard, container closure system and stability studies of drug substances.
	Stability studies (Drug substance.)	Stability study conditions:

		Real time: 30°C ± 2°C / 75% ± 5% RH for 36 months Accelerated: 40°C ± 2°C / 75% ± 5% RH for 6 months. Batch No. 17NV001, 17NV002 & 17NV003.
	Module-III (Drug Product):	Firm has submitted detail of description & composition of the drug product, formulation development, manufacturer, description of manufacturing process and controls, specifications, analytical procedure and its validation studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence is performed against the innovator product i.e. Bystolic 2.5mg manufactured by Janssen Pharmaceutica N.V., Belgium, batch No. W03791, Expiry date 06-2022 by performing quality tests i.e. Identification, Average, weight, impurities, Dissolution and Assay. CDP has been performed against the innovator product i.e. Bystolic by Allergan USA, batch No. W03791, Expiry date 06-2022 in three different medias i.e. Acid media (pH 1.2), Acetate buffer (pH 4.5) & Phosphate Buffer (pH 6.8). F2 values are in acceptable range.
	Analytical method validation/verification of product	Method Validation studies have submitted including linearity, range, accuracy, precision, specificity.

STABILITY STUDY DATA

Manufacturer of API	M/s Cadila Pharmaceuticals Ltd., 294, G.I.D.C. Estate, City: - Ankleshwar – 393 002, Dist. Bharuch Gujrat State, India.		
API Lot No.	20NV023.		
Description of Pack (Container closure system)	14 core tablets packed in a blister made up of Alu-Alu foil. Two blisters packed in unit carton.		
Stability Storage Condition	Real time: 30°C ± 2°C / 75% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	NVTab-001.	NVTab-002.	NVTab-003.
Batch Size	3000 tablets	3000 tablets	3000 tablets
Manufacturing Date	01-2021	01-2021	01-2021
Date of Initiation	04-02-2021	04-02-2021	04-02-2021
No. of Batches	03		

REQUEST OF EXEMPTION FROM ON SITE INSPECTION

The firm has requested for Exemption from On-site Investigation of their submitted stability data and provided the following documents in conjunction with the checklist approved by the Registration Board.

Administrative Portion

13.	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has referred to their product Empagen 10mg & Empagen 25mg Tablets which was approved in 294th Meeting of Registration Board held on 09th April 2020. Inspection was conducted on 25th October, 2019. According to the report following points were confirmed.

		• The firm has 21 CFR compliant HPLC software • The firm has audit trail reports available. • The firm possesses stability chambers with digital data loggers.
14.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. 21102987 dated 21-10-2021 issued by Food & Drug Control Administration Gujrat State, India on the basis of inspection conducted on 32-24/09/2021 & 16/10/2021 valid till 20-10-2024 is submitted.
15.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of form-6 No. 00764/2020-DRAP/PS/3300 Dated: 09-09-2020 wherein they have imported 125gm of Nebivolol hydrochloride with batch No. 20NV023 from M/s Cadila Pharmaceuticals Ltd., India. Form-6 is also attested by the Assistant Drug controller, DRAP, Peshawar. Firm has also submitted commercial invoice No. 3202040484 dated 26-08-2020 mentioning Nebivolol hydrochloride 125gm with batch No. 20NV023 from M/s Cadila Pharmaceuticals Ltd., India
16.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
17.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
18.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks OF Evaluator:

Sr. No.	Section	Observation	Reply by the firm
1.		CDP report has mentioned API lot No. 20NV027 while the stability data sheets and procurements have shown 20NV023 as API lot number. Clarification shall be submitted.	Firm has submitted that batch number i.e. 20NV027 mentioned in CDP report is of that lot which was standardized against vendor working standard and utilized throughout analytical testing as working reference standard and the same was procured during import of trial/stability batches lot i.e. batch No. 20NV023. Firm has also provided attested form 6 for ready reference of both the API lot and working standard.
2.		Specifications of the drug product has mentioned dissolution specifications of NLT 80% (Q + 5 = 85%) released in 45 minutes. While the literature review of the innovator product has mentioned dissolution specifications in 15 minutes. Justification shall be submitted.	Firm has submitted that their specifications are not as per innovator specifications. However, results of the already conducted testing are in accordance with the specifications of the innovator literature i.e. NLT 80% (80 +5 = 85%) release in 15 minutes. *They further revised their specifications for dissolution from NLT 80% (Q + 5 = 85%) released in 45 minutes to NLT 80% (Q + 5 =*

		85%) released in 15 minutes with submission of 7500/- fee vide slip No. 85095863182 dated 18-05-2023.
Decision: Approved. • **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.** • **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Copy of GMP certificate No. 21102987 dated 21-10-2021 issued by Food & Drug Control Administration Gujrat State, India on the basis of inspection conducted on 32-24/09/2021 & 16/10/2021 valid till 20-10-2024 is submitted.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of form-6 No. 00764/2020-DRAP/PS/3300 Dated: 09-09-2020 wherein they have imported 125gm of Nebivolol hydrochloride with batch No. 20NV023 from M/s Cadila Pharmaceuticals Ltd., India. Form-6 is also attested by the Assistant Drug controller, DRAP, Peshawar. Firm has also submitted commercial invoice No. 3202040484 dated 26-08-2020 mentioning Nebivolol hydrochloride 125gm with batch No. 20NV023 from M/s Cadila Pharmaceuticals Ltd., India
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted

6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks OF Evaluator:

Sr. No.	Section	Observation	Reply by the firm
1.		CDP report has mentioned API lot No. 20NV027 while the stability data sheets and procurements have shown 20NV023 as API lot number. Clarification shall be submitted.	Firm has submitted that batch number i.e. 20NV027 mentioned in CDP report is of that lot which was standardized against vendor working standard and utilized throughout analytical testing as working reference standard and the same was procured during import of trial/stability batches lot i.e. batch No. 20NV023. Firm has also provided attested form 6 for ready reference of both the API lot and working standard.
2.		Specifications of the drug product has mentioned dissolution specifications of NLT 80% (Q + 5 = 85%) released in 45 minutes. While the literature review of the innovator product has mentioned dissolution specifications in 15 minutes. Justification shall be submitted.	Firm has submitted that their specifications are not as per innovator specifications. However, results of the already conducted testing are in accordance with the specifications of the innovator literature i.e. NLT 80% (80 +5 = 85%) release in 15 minutes. *They further revised their specifications for dissolution from NLT 80% (Q + 5 = 85%) released in 45 minutes to NLT 80% (Q + 5 = 85%) released in 15 minutes with submission of 7500/- fee vide slip No. 28172908844 dated 18-05-2023.*

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

	The proposed proprietary name / brand name	Cina 30mg Tablets.
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Film coated Tablet Contains: Cinacalcet as hydrochloride ……..…..…30mg
	Pharmaceutical form of applied drug	Film coated tablets.
	Pharmacotherapeutic Group of (API)	Anti-Parathyroid Agents. ATC Code: H05BX01.
	Reference to Finished product specifications	Innovator Specifications
	Proposed Pack size	10's
	Proposed unit price	As per SRO.
	The status in reference regulatory authorities	SENSIPAR® (Cinacalcit) film coated tablets, 30mg, 60mg and 90mg USFDA Approved.
	For generic drugs (me-too status)	Mimcipar 30mg Tablets, Genome Pharmaceutical, Reg. No. 082301.
	GMP status of the Finished product manufacturer	Copy of GMP certificate No. F. 3-16/2018-Addl. Dir. (QA&LT)-1 dated 04-01-2022 on the basis of inspection conducted on 03-01-2022 is submitted.
	Evidence of section approval.	Tablet section (general) vide letter No. F. 1-1/96-Lic. (Vol-II) dated 13-06-2017 is approved.
	Name and address of API manufacturer.	M/s Mehta API (Pvt.) Ltd., Gut No. 546, 571, 519 & 520, Village Kumbhavali, Tarapur, Boisar, Dist. Palghar, Maharashtra, India. Copy of GMP certificate No. NEW-WHO-GMP/CERT/KD/84495/2019/11/29495 dated 19-09-2019 valid till 18-09-2022 issued by FDA, Maharashtra, India is submitted.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Firm has submitted detail of the drug substance regarding its nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis (LT-OCLL/003/20-21SF1, mfg. date 05-2020) and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies (Drug substance.)	Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 48 months. Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months. Batches: (LT-OCLH/001/15-16, LT-OCLH/002/15-16 & LT-OCLH/003/15-16)

	Module-III (Drug Product):	Firm has submitted detail of the drug product including its description and composition, manufacturer, description of manufacturing process and controls, process validation protocol, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence is established against the product Mimcipar 30mg tablets manufactured by Genome Pharmaceuticals (Pvt.) Ltd., (Batch No: 006, Mfg. 02-2021) by performing quality tests (Identification, Assay and Dissolution). CDP has been performed against the same brand that is Mimcipar 30mg tablets manufactured by Genome Pharmaceuticals (Pvt.) Ltd., (Batch No: 006, Mfg. 02-2021) in three different mediums i.e. pH 1.2 in 0.1 N HCl, pH 4.5 Acetate buffer & pH 6.8 Phosphate buffer. F2 values calculated for all the three mediums are in acceptable range.
	Analytical method validation/verification of product	Method validation studies have submitted including specificity, linearity, accuracy, precision, System suitability & robustness.

STABILITY STUDY DATA			
Manufacturer of API	M/s Mehta API (Pvt.) Ltd., Gut No. 546, 571, 519 & 520, Village Kumbhavali, Tarapur, Boisar, Dist. Palghar, Maharashtra, India.

Date of Initiation	02-11-2021	02-11-2021	02-11-2021
No. of Batches	03		

REQUEST OF EXEMPTION FROM ON SITE INSPECTION		
The firm has requested for Exemption from On-site Investigation of their submitted stability data and provided the following documents in conjunction with the checklist approved by the Registration Board.		
Administrative Portion		
19.	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has referred to onsite inspection report of their product Promig plus tablets 375mg/20mg which was conducted on 1st, 13th & 14th March 2019 and was presented in 289th meeting of Registration Board held on 14-16th May, 2019.

		According to the report following points were confirmed. • The firm has 21 CFR compliant HPLC software • The firm has audit trail reports available. • The firm possesses stability chambers with digital data loggers.
20.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. NEW-WHO-GMP/CERT/KD/84495/2019/11/29495 dated 19-09-2019 valid till 18-09-2022 issued by FDA, Maharashtra, India is submitted.
21.	Documents for the procurement of API with approval from DRAP (in case of import).	Copy of NOC with diary No: 1434 dated 24/09/2020 is submitted wherein the permission to import Cinacalcet hydrochloride for the purpose of test/analysis and stability studies is granted. Firm has also submitted commercial invoice No. 2021/LUT00036 dated 24-08-2020 wherein they have imported 03kg of Cinacalcet HCl with Batch No. LT-OCLL/003/20-21SF1 attested by Assistant Director I&E, DRAP, Islamabad dated 24-09-2020.
22.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
23.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
24.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator:

Sr. No.	Section	Observation	Reply by the firm
1.	1.3.4	Valid copy of DML of the applicant shall be submitted as the submitted one is w.e.f. 26-02-2018.	Firm has once again submitted the previously submitted copy of DML w.e.f. 26-02-2018. ***Firm has also submitted copy of receiving for renewal of DML dated 21-02-2023.***
2.	1.6.5	Valid copy of GMP certificate of the drug substance manufacturer shall be submitted.	Firm has submitted copy of GMP certificate No. NEW-WHO-GMP/CERT/KD/11960/2022 /11/42037 dated 09-09-2022 valid till 08-09-2025 issued by FDA, Maharashtra, India.
3.	3.2.S.5	COA of the provided reference standard has mentioned that use before 02-11-2020. Justification shall be submitted.	Firm has submitted that attached COA of Reference standard was the part of DMF, and they didn't use in testing. We have attached the actual one that had been used for testing in product part of the dossier.
4.	3.2.P.2.2	• Justification for not performing CDP & PE against the innovator product shall be submitted.	Firm has submitted that Innovator's pack was not available at time of study due to Covid -19 that's why they have performed CDP and pharmaceutical equivalence study with competitor brand as per DRAP guidelines. They also provided new CDP results with reference product i.e. Sinsipar 30mg tablets with batch No. 182541, Exp. date of 04-2024 in

		all the three mediums with similarity factor F2 value in acceptable range.
	• Justification for not performing most of the quality test to be performed on tablets dosage form in PE.	Firm has submitted that in pharmaceutical equivalence studies all the test were performed. However, they have not mentioned all the test in submitted report. They also submitted new report for pharmaceutical equivalence wherein they have mentioned all the tests.
5.	• Justify the dispensing of drug substance for trial batch manufacturing without potency adjustment.	Firm has replied as follows; In BMR of Cina 30mg & 60mg tablets potency is adjusted, as 30mg of Cinacalcet is eq. to 33.06mg of Cinacalcet HCl and 60mg of Cinacalcet is eq. to 66.12mg of Cinacalcet HCl. Water content is 0.249% so calculation of potency in assay of API on OAB is 99.38% and on as basis is 99.14%. Molecular weight of Cinacalcet HCl is 393.9 g/mol. & molecular weight of Cinacalcet is 357.4 g/mol. Now calculation of Cinacalcet on as basis is below, 99.14 x 357.4/393.9 = 89.9% Calculation for 30mg tablet = 100/89.9 x 30 = 33.3mg Calculation for 60mg tablet = 100/89.9 x 60 = 66.7mg The difference without water adjustment in Cina 30mg tablet is 0.24% and for Cina 60mg is 0.5%. Assay Limit is 95.0% - 105.0% and our result is in between 98.0% - 102.0% uptill now so the change is negligible with respect to water content but we commit that water content will be adjusted on commercial batches.
	• Justify the potency used in the calculation of both assay dissolution test with respect to the potency of the drug substance used in development batches. As 90% is used in assay calculation while the COA has mentioned 99%.	Firm has submitted that 90% potency of the drug substance is due to HCl factor. They also submitted calculation for the HCl factor in Cinacalcet HCL.
	• Batch analysis has not performed most of the tests as required by the tablets. • Complete six-month stability data shall be submitted.	Firm has submitted revised batch analysis wherein they have added all the tests performed on the applied formulation. Firm has submitted complete six-month stability data for all the three trial batches both at real time and accelerated conditions.
6.	Clarification is required for clearance of Cinacalcet HCl that commercial invoice is in the name of M/s Global pharmaceutical while form 6 is in the name of M/s Vision pharmaceutical Islamabad.	Firm has submitted that basically import department of both Global Pharmaceuticals & Vision Pharmaceuticals sit together beside to Regulatory department at our premises. That had caused this confusion and instead of attaching Form-6 of Global Pharmaceuticals

		for CINACALCET clearance, we sent the other one from Vision Pharmaceuticals. They also provided copy of form 6 in the name of M/s Global pharmaceuticals they also submitted copy of Form 6 for Global pharma attested by Assistant Director I&E, DRAP, Islamabad.
Decision: Approved. • **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.** • **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

REQUEST OF EXEMPTION FROM ON SITE INSPECTION		
The firm has requested for Exemption from On-site Investigation of their submitted stability data and provided the following documents in conjunction with the checklist approved by the Registration Board.		
Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has referred to onsite inspection report of their product Promig plus tablets 375mg/20mg which was conducted on 1st, 13th & 14th March 2019 and was presented in 289th meeting of Registration Board held on 14-16th May, 2019. According to the report following points were confirmed. • The firm has 21 CFR compliant HPLC software • The firm has audit trail reports available. • The firm possesses stability chambers with digital data loggers.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. NEW-WHO-GMP/CERT/KD/84495/2019/11/29495 dated 19-09-2019 valid till 18-09-2022 issued by FDA, Maharashtra, India is submitted.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Copy of NOC with diary No: 1434 dated 24/09/2020 is submitted wherein the permission to import Cinacalcet hydrochloride for the purpose of test/analysis and stability studies is granted. Firm has also submitted commercial invoice No. 2021/LUT00036 dated 24-08-2020 wherein they have imported 03kg of Cinacalcet HCl with Batch No. LT-OCLL/003/20-21SF1 attested by Assistant Director I&E, DRAP, Islamabad dated 24-09-2020.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted

5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator:

Sr. No.	Section	Observation	Reply by the firm
1.	1.3.4	Valid copy of DML of the applicant shall be submitted as the submitted one is w.e.f. 26-02-2018.	Firm has once again submitted the previously submitted copy of DML w.e.f. 26-02-2018. *Firm has also submitted copy of receiving for renewal of DML dated 21-02-2023.*
2.	1.6.5	Valid copy of GMP certificate of the drug substance manufacturer shall be submitted.	Firm has submitted copy of GMP certificate No. NEW-WHO-GMP/CERT/KD/11960/2022 /11/42037 dated 09-09-2022 valid till 08-09-2025 issued by FDA, Maharashtra, India.
3.	3.2.S.5	COA of the provided reference standard has mentioned that use before 02-11-2020. Justification shall be submitted.	Firm has submitted that attached COA of Reference standard was the part of DMF, and they didn't use in testing. We have attached the actual one that had been used for testing in product part of the dossier.
4.	3.2.P.2.2	• Justification for not performing CDP & PE against the innovator product shall be submitted.	Firm has submitted that Innovator's pack was not available at time of study due to Covid -19 that's why they have performed CDP and pharmaceutical equivalence study with competitor brand as per DRAP guidelines. They also provided new CDP results with reference product i.e. Sinsipar 60mg tablets with batch No. 182547, Exp. date of 04-2024 in all the three mediums with similarity factor F2 value in acceptable range.
		• Justification for not performing most of the quality test to be performed on tablets dosage form in PE.	Firm has submitted that in pharmaceutical equivalence studies all the test were performed. However, they have not mentioned all the test in submitted report. They also submitted new report for pharmaceutical equivalence wherein they have mentioned all the tests.
5.		• Justify the dispensing of drug substance for trial batch manufacturing without potency adjustment.	Firm has replied as follows; In BMR of Cina 30mg & 60mg tablets potency is adjusted, as 30mg of Cinacalcet is eq. to 33.06mg of Cinacalcet HCl and 60mg of Cinacalcet is eq. to 66.12mg of Cinacalcet HCl. Water content is 0.249% so calculation of potency in assay of API on OAB is 99.38% and on as basis is 99.14%. Molecular weight of Cinacalcet HCl is 393.9 g/mol. & molecular weight of Cinacalcet is 357.4 g/mol. Now calculation of Cinacalcet on as basis is below, 99.14 x 357.4/393.9 = 89.9% Calculation for 30mg tablet = 100/89.9 x 30 = 33.3mg

		Calculation for 60mg tablet = 100/89.9 x 60 = 66.7mg The difference without water adjustment in Cina 30mg tablet is 0.24% and for Cina 60mg is 0.5%. Assay Limit is 95.0% - 105.0% and our result is in between 98.0% - 102.0% uptill now so the change is negligible with respect to water content but we commit that water content will be adjusted on commercial batches. Firm has submitted that 90% potency of the drug substance is due to HCl factor. They also submitted calculation for the HCl factor in Cinacalcet HCL.
	• Justify the potency used in the calculation of both assay dissolution test with respect to the potency of the drug substance used in development batches. As 90% is used in assay calculation while the COA has mentioned 99%. • Batch analysis has not performed most of the tests as required by the tablets. • Complete six-month stability data shall be submitted.	Firm has submitted revised batch analysis wherein they have added all the tests performed on the applied formulation. Firm has submitted complete six-month stability data for all the three trial batches both at real time and accelerated conditions.
6.	Clarification is required for clearance of Cinacalcet HCl that commercial invoice is in the name of M/s Global pharmaceutical while form 6 is in the name of M/s Vision pharmaceutical Islamabad.	Firm has submitted that basically import department of both Global Pharmaceuticals & Vision Pharmaceuticals sit together beside to Regulatory department at our premises. That had caused this confusion and instead of attaching Form-6 of Global Pharmaceuticals for CINACALCET clearance, we sent the other one from Vision Pharmaceuticals. They also provided copy of form 6 in the name of M/s Global pharmaceuticals they also submitted copy of Form 6 for Global pharma attested by Assistant Director I&E, DRAP, Islamabad.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

	Proposed unit price	As per SRO.
	The status in reference regulatory authorities	Nexium 20mg & 40mg delayed release capsule, USFDA Approved.
	For generic drugs (me-too status)	Nexum 20mg Capsule, Getz Pharma, Reg. No. 033890.
	GMP status of the Finished product manufacturer	**Contract giver:** Copy of GMP certificate No. 131/2020-DRAP (AD-1952624-1099) dated 02-10-2020 issued on the basis of inspection conducted on 22-09-2020 is submitted. **Contract acceptor:** Copy of GMP certificate No. 47/2020-DRAP (AD-849966-789) dated 26-02-2020 issued on the basis of inspection conducted on 13-02-2020 is submitted.
	Evidence of section approval.	Capsule General section is approved in the above mentioned GMP certificate.
	Name and address of API manufacturer.	M/s Vision pharmaceuticals, Plot No. 22-23, Industrial Triangle Kahuta Road, Islamabad. Copy of GMP certificate No. 3-26/2019-Addl. Dir. (QA&LT-I) dated 31-07-2019 on the basis of inspection conducted on 11-02-2019 is submitted.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubility, manufacturers, description of manufacturing process and controls, specifications, analytical procedures, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Firm has submitted detail of the drug substance regarding its nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, tests for impurity, specifications, analytical procedures, batch analysis (EMZ045931, Mfg. date 27-09-2019) and justification of specification, reference standard, container closure system and stability studies of drug substance.

	Stability studies (Drug substance.)	Firm has submitted both real time and accelerated stability study data for the drug substance for three batches. Stability study conditions: Real time: 30˚C ± 2˚C /65% ± 5%RH for 36 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (EMZ044440, EMZ044265 & EMZ044152).
	Module-III (Drug Product):	The firm has submitted detail of the drug product including its description & composition, Pharmaceutical equivalence, manufacturers, description of manufacturing process and controls, process validation protocol, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence is established against the brand Nexium 20 mg Capsules manufactured by Getz Pharma by performing quality tests (Identification, weight variation, loss on drying, Dissolution in acidic and buffer stage, uniformity of dosage units & Assay). CDP is performed against the brand Nexium 20mg capsules batch No. 883C19 manufactured by Novartis Pharma in acidic media of pH 1.2 and buffer media of pH 6.8. values of F2 are in acceptable range.
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, accuracy, precision, specificity.

STABILITY STUDY DATA			
Manufacturer of API	M/s Vision pharmaceuticals, Plot No. 22-23, Industrial Triangle Kahuta Road, Islamabad.		
API Lot No.	EMZ045931.		
Description of Pack (Container closure system)	14 capsules are sealed in Alu-Alu blister with aluminum foil having leaflet and packed in unit carton.		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	20L560	20F525	20C516
Batch Size	140,000 Capsules	140,000 Capsules	140,000 Capsules
Manufacturing Date	06-2020	06-2020	06-2020
Date of Initiation	05-06-2020	09-06-2020	13-06-2020
No. of Batches	03		

REQUEST OF EXEMPTION FROM ON SITE INSPECTION
The firm has requested for Exemption from On-site Investigation of their submitted stability data and provided the following documents in conjunction with the checklist approved by the Registration Board.
Administrative Portion

25.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.
26.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of manufacturing license No. Lu 20150511 valid till 26-10-2025. (Raw materials, Sterile raw materials)
27.	Documents for the procurement of API with approval from DRAP (in case of import).	Not submitted.
28.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
29.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not Submitted
30.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not Submitted

Remarks by the Evaluator:

Sr. No.	Section	Observation	Reply by the firm
1.	1.3.4	• Valid copy of DML of the manufacturer shall be submitted.	Firm has submitted copy of receiving in DRAP dated 06-06-2022 wherein they have applied for renewal of their DML with a fee of 75000/- vide slip No. 4594197690 dated 28-05-2022.
		• Valid copy of GMP certificate of the contract acceptor shall be submitted.	Firm has submitted copy of GMP certificate No. 47/2020-DRAP (AD-849966-789) dated 26-02-2020 issued on the basis of inspection conducted on 13-02-2020. *GMP certificate is not within last three years.*
2.	2.3	• Justification shall be submitted for providing information regarding Esomeprazole instead of Esomeprazole magnesium trihydrate pellets in section 2.3.	Firm has submitted that as Identified by you, it's been a Drafting error. Esomeprazole Magnesium Trihydrate has been used & same could be verified by Nomenclature in open part of DMF by Vision Pharmaceuticals & also by COA of Drug substance manufacturer which is attached. Nomenclature and COA provide by the firm has mentioned Esomeprazole Magnesium Trihydrate.
		• Revised table for literature references with correct information regarding the drug substance with applicable fee shall be submitted.	Revised table for literature references with correct information regarding the drug substance is submitted. ***Fee for pre-registration variation is not submitted.***
3.	2.3.R.1.1	Provide copy of Batch manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3	Submitted.
4.	3.2.S.4.1	Specifications of the drug substance by the drug substance manufacturer	Firm has submitted that no USP monograph is available for the Esomeprazole pellets, the

		has mentioned USP specification while there is no monograph available for Esomeprazole magnesium trihydrate pellets. Justification shall be submitted.	specifications were referred as USP since the limits of several tests have been adopted form the USP monograph of Esomeprazole delayed release capsules. Kindly consider it as in-house.
5.	3.2.S.4.2	Analytical procedures for the drug substance from the drug substance manufacturer shall be submitted.	Submitted.
6.	3.2.S.4.3	Verification studies of the drug substance performed by the drug product manufacturer shall be submitted.	Submitted.
7.	3.2.S.4.4	Batch analysis has performed dissolution test on UV method. Justification shall be submitted.	Firm has submitted that Drug substance analytical method does not exist in any Pharmacopeia, that's why test method from API supplier was used for the analysis of Pellets.
8.	3.2.S.5	Details/COA of the working standard used for analysis of the trial batches shall be submitted.	Submitted.
9.	3.2.P.1	This section has mentioned that 102.2mg of Esomeprazole pellets (22.5%) is equivalent to 20mg of Esomeprazole. Justification shall be submitted.	The filled weight is calculated on basis of the Assay results of Esomeprazole magnesium on as is basis which is further adjusted for the factor of Magnesium to get the label claim of Esomeprazole.
10.	3.2.P.2.2	• Justification shall be submitted for not performing CDP and PE against the innovator product. • Details of the comparator product shall be submitted. • Justification shall be submitted for carrying CDP in acidic media for 60 minutes only.	Firm has submitted that since the innovator product is not registered in Pakistan hence the CDP studies were performed against the comparator product. Comparator product Details: Product name: Nexum capsule. By Getz Pharma Firm has submitted that it was an error in compiling record for CDP Report. They further submitted that they perform CDP in acidic medium till 120 minutes and the results are satisfactory. They also provided the results of CDP in 0.1 N HCl till 120 minutes and values of F2 are in acceptable range.
11.	3.2.P.5.4	Uniformity of dosage units is not performed in batch analysis. Justify.	Firm has submitted that they performed Uniformity of dosage units, however, in compilation it was missed. They submitted revised batch analysis wherein they have added Uniformity of dosage units for the applied product.
12.	3.2.P.8	• Stability data sheets has mentioned 06-2020 as manufacturing date while stability conclusion has mentioned 01-2021 as manufacturing date. Justification is required. • Documents for procurement of API shall be submitted.	As identified by your good office, there was a Drafting mistake in drafting i.e., Stability summary and conclusions, all three batches were manufactured in 06/2020 & same could be verified with Analytical record that is attached in 3.2.8.3 i.e., stability. Firm has submitted copy of invoice No. 601023 dated 08-10-2019 mentioning 45kg of 22.5% pellets with batch No. EMZ045931, Mfg. date 09-2019)

	• Compliance Record of HPLC software 21CFR & audit trail reports on product testing shall be submitted.	Firm has submitted that it is not applicable.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Registration letter will be issued upon submission of latest GMP certificate/last inspection report of the contract acceptor within last three years and fee of Rs. 7,500/- fee for revision as per notification No.F.7-11/2021-B&A/DRAP dated 07-05-2021.**

872.	Name, address of Applicant / Marketing Authorization Holder	M/s Stallion Pharmaceuticals (Pvt.) Ltd., Plot No. 581, Sunder Industrial Estate, Lahore.

REQUEST OF EXEMPTION FROM ON SITE INSPECTION

The firm has requested for Exemption from On-site Investigation of their submitted stability data and provided the following documents in conjunction with the checklist approved by the Registration Board.

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has submitted that Bio-Mark is new license facility, hence no such inspection has been conducted.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. 3-26/2019-Addl. Dir. (QA&LT-I) dated 31-07-2019 on the basis of inspection conducted on 11-02-2019 is submitted.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not submitted.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks by the Evaluator:

Sr. No.	Section	Observation	Reply by the firm
1.	1.3.4	• Valid copy of DML of the manufacturer shall be submitted.	Firm has submitted copy of receiving in DRAP dated 06-06-2022 wherein they have applied for renewal of their DML with a fee of 75000/- vide slip No. 4594197690 dated 28-05-2022.

		• Valid copy of GMP certificate of the contract acceptor shall be submitted.	Firm has submitted copy of GMP certificate No. 47/2020-DRAP (AD-849966-789) dated 26-02-2020 issued on the basis of inspection conducted on 13-02-2020. *GMP certificate is not within last three years.*
2.	2.3	• Justification shall be submitted for providing information regarding Esomeprazole instead of Esomeprazole magnesium trihydrate pellets in section 2.3.	Firm has submitted that as Identified by you, it's been a Drafting error. Esomeprazole Magnesium Trihydrate has been used & same could be verified by Nomenclature in open part of DMF by Vision Pharmaceuticals & also by COA of Drug substance manufacturer which is attached. Nomenclature and COA provide by the firm has mentioned Esomeprazole Magnesium Trihydrate.
		• Revised table for literature references with correct information regarding the drug substance with applicable fee shall be submitted.	Revised table for literature references with correct information regarding the drug substance is submitted. *Fee for pre-registration variation is not submitted.*
3.	2.3.R.1.1	Provide copy of Batch manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3	Submitted.
4.	3.2.S.4.1	Specifications of the drug substance by the drug substance manufacturer has mentioned USP specification while there is no monograph available for Esomeprazole magnesium trihydrate pellets. Justification shall be submitted.	Firm has submitted that no USP monograph is available for the Esomeprazole pellets, the specifications were referred as USP since the limits of several tests have been adopted form the USP monograph of Esomeprazole delayed release capsules. Kindly consider it as in-house.
5.	3.2.S.4.2	Analytical procedures for the drug substance from the drug substance manufacturer shall be submitted.	Submitted.
6.	3.2.S.4.3	Verification studies of the drug substance performed by the drug product manufacturer shall be submitted.	Submitted.
7.	3.2.S.4.4	Batch analysis has performed dissolution test on UV method. Justification shall be submitted.	Firm has submitted that Drug substance analytical method does not exist in any Pharmacopeia, that's why test method from API supplier was used for the analysis of Pellets.
8.	3.2.S.5	Details/COA of the working standard used for analysis of the trial batches shall be submitted.	Submitted.
9.	3.2.P.1	This section has mentioned that 204.4mg of Esomeprazole pellets (22.5%) is equivalent to 40mg of Esomeprazole. Justification shall be submitted.	The filled weight is calculated on basis of the Assay results of Esomeprazole magnesium on as is basis which is further adjusted for the factor of Magnesium to get the label claim of Esomeprazole.
10.	3.2.P.2.2	• Justification shall be submitted for not performing CDP and PE against the innovator product.	Firm has submitted that since the innovator product is not registered in Pakistan hence the CDP studies were performed against the comparator product.
		• Details of the comparator product shall be submitted.	Comparator product Details: Product name: Nexum capsule.

		• Justification shall be submitted for carrying CDP in acidic media for 60 minutes only.	By Getz Pharma Firm has submitted that it was an error in compiling record for CDP Report. They further submitted that they perform CDP in acidic medium till 120 minutes and the results are satisfactory. They also provided the results of CDP in 0.1 N HCl till 120 minutes and values of F2 are in acceptable range.
11.	3.2.P.5.4	Uniformity of dosage units is not performed in batch analysis. Justify.	Firm has submitted that they performed Uniformity of dosage units, however, in compilation it was missed. They submitted revised batch analysis wherein they have added Uniformity of dosage units for the applied product.
12.	3.2.P.8	• Documents for procurement of API shall be submitted. • Compliance Record of HPLC software 21CFR & audit trail reports on product testing shall be submitted.	Firm has submitted copy of invoice No. 601023 dated 08-10-2019 mentioning 45kg of 22.5% pellets with batch No. EMZ045931, Mfg. date 09-2019) Firm has submitted that it is not applicable.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Registration letter will be issued upon submission of latest GMP certificate/last inspection report of the contract acceptor within last three years and fee of Rs. 7,500/- fee for revision as per notification No.F.7-11/2021-B&A/DRAP dated 07-05-2021.**

Remarks by the Evaluator:

Sr. No.	Section	Observation	Response by the firm
1.	1.5.4	Proposed pack size for the applied formulation shall be submitted.	Firm has submitted 30's as proposed pack size for the applied formulation.
2.	3.2.S.4.1	Neither drug substance manufacturer nor drug product manufacturer has mentioned that assay in on anhydrous basis or as is basis.	Firm has submitted that drug pellets manufacturer has claimed assay of drug substance on as is basis and same is from finished product manufacturer.
3.	3.2.S.4.4	COA from drug substance manufacturer potency is on anhydrous basis or as is basis.	Firm has submitted COA from the drug substance manufacturer wherein the potency is on as is basis.
4.	3.2.S.5	Details and COA of the working standard used during formulation development shall be submitted.	Submitted.
5.	3.2.S.6	Justification shall be submitted regarding packaging material used during the stability studies of the drug substance as section 3.2.S.6 has mentioned LDPE and HDPE while the stability data sheets has mentioned PET bottles.	Firm has submitted that stability samples are filled in polybags and finally packed in HDPE bottles, they also submitted corrected and updated stability data for the drug substance.
6.	3.2.P.2.2	• Justification for not performing CDP & PE against the innovator product shall be submitted.	Firm has submitted that Dexilant is innovator product and at the time of studies the innovator sample was not available in the

			local market and we performed CDP & PE against razodex 30mg capsules manufactured by Getz pharma.
		• Comparison of CDP in all the three mediums separately shall be submitted.	Firm has submitted revised CDP results for the applied formulation in acidic medium pH 1.2 and buffer pH 6.8.
7.	3.2.P.5.1	Drug product specifications has mentioned assay as BP specifications. Clarify.	Firm has submitted revised specifications for the drug product wherein they have changed BP specifications to Innovator's specifications. *Fee required for pre-registration variation is not submitted.*
8.	3.2.P.5.2	• Analytical procedures for assay test of the finished product has mentioned 0.01mg/ml standard solution while the descriptive procedure has strength of 0.05mg/ml strength of standard solution. Clarification shall be submitted. • Similarly, sample solution has mentioned 0.01mg/ml standard solution while the descriptive procedure has strength of 0.025mg/ml strength of sample solution. Clarification shall be submitted. • Calculation formula for assay test is also different from the analytical procedure. Justify.	Firm has submitted that it was typo error and concentration of both sample and standard preparation 0.01mg/ml. they also submitted corrected and revised testing method. Firm has also submitted calculation formula.
9.	3.2.P.8	• Justify the weight of standard in assay test with respect to the analytical procedure for assay test. • Justify the weight of standard in dissolution test with respect to the analytical procedure for dissolution test.	Firm has submitted that this mistake was due to typo error in the testing method which has now been rectified. Firm has submitted rectified testing method wherein the standard preparation in the dissolution test has mentioned that "take accurately weghed Dexlansoprazole working standard (on anhydrous basis) equivalent to 50mg" *However, the raw data sheets have clearly mentioned 30mg which is not justified by the firm.*
		• 92.56% potency used in assay and dissolution test shall be justified.	Firm has submitted COA of the working standard used in the trial batches and has potency of 92.56.
		• Stability data shall be as per decision of 293rd meeting with inclusion of API lot number in the stability data sheets.	Firm has submitted revised stability data sheets with inclusion of API lot number. *However, the API lot number mentioned in the stability data sheets is RLP-0360321 while the batch analysis provided by the firm in 3.2.S.4.4 is having lot no. DLP 864.*
		• Reference of previous approval of applications with stability study data of the firm (if any) shall be submitted.	*Not submitted.*
		• Compliance Record of HPLC software 21CFR & audit trail reports on product testing shall be submitted.	*Not submitted.*

- Documents for the procurement of API with approval from DRAP (in case of import) shall be submitted.

Decision of 326th meeting of Registration Board: Deferred for following:

- Justification for variation in the standard solution concentration as declared n raw data sheets from that mention din the drug product analytical procedure for Assay & Dissolution test.
- Justification for variation in calculation formula applied in the raw data sheet from that mentioned in the drug product analytical procedure for Assay test.
- Clarification for variation in the API lot# mentioned in the stability summary sheet from that declared on the drug substance COA.
- Submission of fee of Rs. 7,500/- for correction/pre-approval change in product specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021

Reply by the firm:

Sr. No.	Reason for deferment	Reply submitted by the firm
1.	Justification for variation in the standard solution concentration as declared n raw data sheets from that mention than the drug product analytical procedure for Assay & Dissolution test.	Firm has submitted that it was a typo error in assay Method, concentration of sample and standard is 0.015mg/ml, correction made revised testing method is attached. As per testing method for dissolution testing, 50mg of standard required for dissolution testing but only at initial testing that is zero (0) frequency, analyst by mistake weigh 30mg of standard and the same weight will be used for calculation. Throughout the stability studies testing that is at 3rd & 6th month of both accelerated and long term, 50mg of standard weight is used and same will be used in calculation. Raw data for stability are attached for your reference
2.	Justification for variation in calculation formula applied in the raw data sheet from that mentioned in the drug product analytical procedure for Assay test.	Firm has submitted that it was typo error and they also provided corrected calculation formula.
3.	Clarification for variation in the API lot# mentioned in the stability summary sheet from that declared on the drug substance COA.	Firm has submitted revised stability data sheets wherein they have changed API lot No. as per the API lot No. mentioned in the COA of the drug substance.
4.	Submission of fee of Rs. 7,500/- for correction/pre-approval change in product specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021	Firm has submitted 7500/- fee vide sip No. 100610619966 dated 10-03-2023.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

REQUEST OF EXEMPTION FROM ON SITE INSPECTION

The firm has requested for Exemption from On-site Investigation of their submitted stability data and provided the following documents in conjunction with the checklist approved by the Registration Board.

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No.F. 3-26/2019-Addl. Dir. (QA&LT-I)-56 dated 22-08-2022 on the basis of inspection conducted on 14-06-2022 is submitted.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not submitted.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks by the Evaluator:

Sr. No.	Section	Observation	Response by the firm
1.	1.5.4	Proposed pack size for the applied formulation shall be submitted.	Firm has submitted 30's as proposed pack size for the applied formulation.
2.	2.3.R	Table for literature references has mentioned USP for drug substance and drug product while there is no official monograph for dexlansoprazole pellets. Revised table for literature references with applicable fee shall be submitted.	Firm has submitted revised table for literature references wherein they have not mentioned anything against the drug substance and drug product with submission of 7500/- fee vide slip No. 1377271048 dated 02-03-2023.
3.	3.2.S.4.1	Neither drug substance manufacturer nor drug product manufacturer has	Firm has submitted that drug pellets manufacturer has claimed assay of drug

		mentioned that assay in on anhydrous basis or as is basis.	substance on as is basis and same is from finished product manufacturer.
4.	3.2.S.4.4	COA from drug substance manufacturer potency is on anhydrous basis or as is basis.	Firm has submitted COA from the drug substance manufacturer wherein the potency is on as is basis.
5.	3.2.S.5	Details and COA of the working standard used during formulation development shall be submitted.	Submitted.
6.	3.2.S.6	Justification shall be submitted regarding packaging material used during the stability studies of the drug substance as section 3.2.S.6 has mentioned LDPE and HDPE while the stability data sheets has mentioned PET bottles.	Firm has submitted that stability samples are filled in polybags and finally packed in HDPE bottles, they also submitted corrected and updated stability data for the drug substance.
7.	3.2.S.7.3	• Specifications has mentioned release in buffer pH 5.5 of 15-40% in one hour while the stability data sheet has mentioned NMT 30%. Clarification shall be submitted. • Similarly, the release in pH 7 medium has different values than mentioned in specifications. Justify.	Firm has submitted that previously submitted stability data was of trial batches and testing performed on stringent specifications, to get confidence on formulation prior to commercialize. But from very first commercial consignment, specifications were same as mentioned in shared COA and recently provided stability data is of commercial lots and on the same specifications.
8.	3.2.P.2.2	• Justification for not performing CDP & PE against the innovator product shall be submitted. • Comparison of CDP in all the three mediums separately shall be submitted.	Firm has submitted that Dexilant is innovator product and at the time of studies the innovator sample was not available in the local market and we performed CDP & PE against razodex 60mg capsules manufactured by Getz pharma. Firm has submitted revised CDP results for the applied formulation in acidic medium pH 1.2 and buffer pH 6.8.
9.	3.2.P.5.1	Drug product specifications has mentioned assay as BP specifications. Clarify.	Firm has submitted revised specifications for the drug product wherein they have changed BP specifications to Innovator's specifications.
10.	3.2.P.5.2	• Analytical procedures for assay test of the finished product has mentioned 0.01mg/ml standard solution while the descriptive procedure has strength of 0.05mg/ml strength of standard solution. Clarification shall be submitted. • Similarly, sample solution has mentioned 0.01mg/ml standard solution while the descriptive procedure has strength of 0.025mg/ml strength of sample solution. Clarification shall be submitted. • Calculation formula for assay test is also different from the analytical procedure. Justify.	Firm has submitted that it was typo error and concentration of both sample and standard preparation 0.01mg/ml. they also submitted corrected and revised testing method. Firm has also submitted calculation formula.

11.	3.2.P.8	• Justify the weight of standard in assay test with respect to the analytical procedure for assay test.	Firm has submitted that this mistake was due to typo error in the testing method which has now been rectified. Firm has submitted rectified testing method wherein the standard preparation in the dissolution test has mentioned that "take accurately weighed Dexlansoprazole working standard (on anhydrous basis) equivalent to 50mg" *However, the raw data sheets have clearly mentioned 30mg which is not justified by the firm.*
		• Stability data shall be as per decision of 293rd meeting with inclusion of API lot number in the stability data sheets.	Firm has submitted revised stability data sheets with inclusion of API lot number. *However, the API lot number mentioned in the stability data sheets is RLP-0360321 while the batch analysis provided by the firm in 3.2.S.4.4 is having lot no. DLP 864.*
		• Reference of previous approval of applications with stability study data of the firm (if any) shall be submitted.	*Not submitted.*
		• Compliance Record of HPLC software 21CFR & audit trail reports on product testing shall be submitted.	*Not submitted.*
		• Documents for the procurement of API with approval from DRAP (in case of import) shall be submitted.	

Decision of 326th meeting of Registration Board: Deferred for following:

- Justification for variation in the standard solution concentration as declared n raw data sheets from that mention than the drug product analytical procedure for Assay & Dissolution test.
- Justification for variation in calculation formula applied in the raw data sheet from that mentioned in the drug product analytical procedure for Assay test.
- Clarification for variation in the API lot# mentioned in the stability summary sheet from that declared on the drug substance COA.
- Submission of fee of Rs. 7,500/- for correction/pre-approval change in product specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.

Reply by the firm:

Sr. No.	Reason for deferment	Reply submitted by the firm
1.	Justification for variation in the standard solution concentration as declared n raw data sheets from that mention than the drug product analytical procedure for Assay & Dissolution test.	Firm has submitted that it was a typo error in assay Method, concentration of sample and standard is 0.015mg/ml, correction made revised testing method is attached. As per testing method for dissolution testing, 50mg of standard required for dissolution testing but only at initial testing that is zero (0) frequency, analyst by mistake weigh 30mg of standard and the same weight will be used for calculation. Throughout the stability studies testing that is at 3rd & 6th month of both accelerated and long term, 50mg of standard weight is used and same will be used in calculation. Remarks by the Evaluator:

Sr. No.	Section	Observation	Response by the firm
1.	1.5.4	Proposed pack size for the applied formulation shall be submitted.	Firm has submitted 10's, 14's, 20's, 30's as proposed pack sizes for the applied formulation.
2.	1.5.5	Revise pharmacological group as per WHO ATC classifications with applicable fee shall be submitted.	Firm has revised pharmacological group as per WHO ATC classifications with submission of 7500/- fee vide slip No. 17180803563 dated 23-02-2023.
3.	1.6.5	• Address of the drug substance manufacturer mentioned in section this section, Clearance certificate and on DMF is completely different from that mentioned on GMP certificate. Justification shall be submitted. • Furthermore, valid copy of GMP certificate of M/s Almelo Private Limited., Unit-II Survey No. 227, 228 & 136, 137 Shabashpally(V), Shivampet(M) Medak District, Telangana- 502334 India.	Firm has submitted that they have mistakenly attached GMP certificate having different address in our dossier. They also provided copy of GMP certificate No. L. Dis. No: 92502/TS/2022 Dated:11/07/2022 issued by Drugs Control Administration Government of Telangana in the name of M/s Almelo Private Limited Unit Ii Situated at Address Survey Nos. 227, 228 & 137, 136, Shabashpally Village, Shivampet Mandal, Medak District, Pin code 502334, Telangana State, India. Valid till 10/07/2023.
4.	2.3.R	Table for literature references has mentioned USP for drug substance only. However, it is also available in BP and other. Revised table for literature references with applicable fee shall be submitted.	Firm has submitted correct table for literature references.

5.	3.2.S.4.3	Verification of the drug substance performed by the drug product manufacturer shall be submitted.	Submitted.
6.	3.2.S.4.4	COA of the drug substance from both the drug substance manufacturer and finished product manufacturer with same batch number shall be submitted.	*Firm has once again submitted the same COA with different batch number from that of the drug substance manufacturer*.
7.	3.2.P.1.3	This section has mentioned Alu/Alu Blister strips of 2x7 Tablets packed in unit carton. Clarify.	Firm has submitted that It was Typographic mistake and they also submitted revised copy of Section 3.2.P.1.3. wherein they have replaced tablets with capsules.
8.	3.2.P.2.2	Justification for not performing CDP & PE against the innovator product shall be submitted.	Firm has submitted that Lyrica is an innovator of pregabalin capsule. In local market at the time of study only Lyrica 75mg capsule is available so we have chosen another market leader for performing CDP that is Gabica 50mg capsule manufactured by Getz Pharma.
9.	3.2.P.5.1	Specifications and stability data sheets have not mentioned any dissolution time. Justify.	Firm has submitted that dissolution time is mentioned on testing method and they also submitted revised specification & Stability Summary sheets wherein they have added dissolution time.
10.	3.2.P.8	• Stability data shall be as per decision of 293rd meeting with inclusion of API lot number in the stability data sheets. • Complete six-month stability data shall be submitted. • Reference of previous approval of applications with stability study data of the firm (if any) shall be submitted. • Compliance Record of HPLC software 21CFR & audit trail reports on product testing shall be submitted.	Firm has submitted revised stability data sheets wherein they have included API lot number. Complete six-month stability data is submitted by the firm. Firm has submitted that in DRB 323 Meeting our 8 Products of tablet section was approved. Submitted.
11.		Justification shall be submitted for using 2 different volumes in sample one and two for preparation of test solution in calculation of assay of trial batches.	Firm has submitted that It was typo graphical error, as per testing method it is 250 instead of 100 correction made revised reports are also submitted.

Decision of 326th meeting of Registration Board: Deferred for justification for variation in batch no. of COAs provided from drug substance manufacturer and drug product manufacturer.
Reply submitted by the firm:
Firm has submitted that it was a typo error and they also provided corrected COA with same batch number as that of the drug substance manufacturer.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The official monograph of Pregabalin is present in USP & BP. Firm as submitted detail of the drug substance regarding its nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis (KBF/K/21/0014, mfg. date 15-11-2021) and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies (Drug substance.)	Firm has submitted stability data sheets for both real time and accelerated stability data as per zone IV-A for three batches. Stability study conditions: Real time: 30˚C ± 2˚C / 75% ± 5%RH for 24 months. Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 06 months. Batch No. (PEF/H/18/0003, PEF/H/18/0004 & PEF/H/18/0005)
	Module-III (Drug Product):	Firm has submitted detail of drug product regarding its description & composition, pharmaceutical development, Process validation protocol, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence is established against the innovator brand that is Lyrica 75mg Capsules, Batch No. EY7448, mfg. date 01-2021 manufactured by M/s Pfizer Pharma, Germany by performing quality tests (Identification, Average weight content, Disintegration time, Dissolution & Assay). Results of both the products are comparable. CDP is also performed against the same brand that is Lyrica 75mg Capsules, Batch No. EY7448, mfg. date 01-2021 manufactured by M/s Pfizer Pharma, Germany in Acid media (pH 1.2) & Phosphate Buffer (pH 6.8) and acetate Buffer (pH 4.5). The values for f1 and f2 are in the acceptable range.
	Analytical method validation/verification of product	Analytical Method verification studies have submitted including Accuracy, Precision (Repeatability), specificity.

REQUEST OF EXEMPTION FROM ON SITE INSPECTION

The firm has requested for Exemption from On-site Investigation of their submitted stability data and provided the following documents in conjunction with the checklist approved by the Registration Board.

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	NA
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. L. Dis. No. 101460/TS/2022 dated 04-11-2022 issued by the DCA, Telangana State in the name of M/s Almelo Private Limited, Plot No. A-38 & 39, Road No.7, IDA Kukatpally, Gandhi Nagar, Hyderabad-500037., Balangar Village, Balangar Mandal, Medchal-Malkajgri District, Telangana State, India. Valid till 03/11/2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted computerized certificate No. K-399471413819 dated 28/04/2022 wherein they have imported 2kg of Pregabalin USP from M/s Almelo Private Limited., Unit-II Survey No. 227, 228 & 136, 137 Shabashpally(V), Shivampet(M) Medak District, Telangana- 502334 India.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not submitted.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks by the Evaluator:

Sr. No.	Section	Observation	Response by the firm
1.	1.5.4	Proposed pack size for the applied formulation shall be submitted.	Firm has submitted 10's, 14's, 20's, 30's as proposed pack sizes for the applied formulation.
2.	1.5.5	Revise pharmacological group as per WHO ATC classifications with applicable fee shall be submitted.	Firm has revised pharmacological group as per WHO ATC classifications with submission of 7500/- fee vide slip No. 306443220047 dated 23-02-2023.
3.	1.6.5	• Address of the drug substance manufacturer mentioned in section this section, Clearance certificate and on DMF is completely different from that mentioned on GMP certificate. Justification shall be submitted. • Furthermore, valid copy of GMP certificate of M/s Almelo Private Limited., Unit-II Survey No. 227, 228 & 136, 137 Shabashpally(V), Shivampet(M) Medak District, Telangana- 502334 India.	Firm has submitted that they have mistakenly attached GMP certificate having different address in our dossier. They also provided copy of GMP certificate No. L. Dis. No: 92502/TS/2022 Dated:11/07/2022 issued by Drugs Control Administration Government of Telangana in the name of M/s Almelo Private Limited Unit Ii Situated at Address Survey Nos. 227, 228 & 137, 136, Shabashpally Village, Shivampet Mandal, Medak District, Pin code 502334, Telangana State, India. Valid till 10/07/2023.
4.	2.3.R	Table for literature references has mentioned USP for drug substance only. However, it is also available in BP and other. Revised table for literature references with applicable fee shall be submitted.	Firm has submitted correct table for literature references.
5.	3.2.S.4.3	Verification of the drug substance performed by the drug product manufacturer shall be submitted.	Submitted.
6.	3.2.S.4.4	COA of the drug substance from both the drug substance manufacturer and finished product manufacturer with same batch number shall be submitted.	*Firm has once again submitted the same COA with different batch number from that of the drug substance manufacturer.*
7.	3.2.P.1.3	This section has mentioned Alu/Alu Blister strips of 2x7 Tablets packed in unit carton. Clarify.	Firm has submitted that It was Typographic mistake and they also submitted revised copy of Section 3.2.P.1.3. wherein they have replaced tablets with capsules.
8.	3.2.P.2.2	Evidence of the pack of the innovator product shall be submitted.	Firm has submitted evidence of the innovator product with same batch number and manufacturing date as mentioned in CDP and PE.
9.	3.2.P.5.1	Specifications and stability data sheets have not mentioned any dissolution time. Justify.	Firm has submitted that dissolution time is mentioned on testing method and they also submitted revised specification & Stability Summary sheets wherein they have added dissolution time.
10.	3.2.P.8	• Stability data shall be as per decision of 293rd meeting with inclusion of API lot number in the stability data sheets. • Complete six-month stability data shall be submitted. • Reference of previous approval of applications with stability study data	Firm has submitted revised stability data sheets wherein they have included API lot number. Complete six-month stability data is submitted by the firm. Firm has submitted that in DRB 323 Meeting our 8 Products of tablet section was approved.

	of the firm (if any) shall be submitted. • Compliance Record of HPLC software 21CFR & audit trail reports on product testing shall be submitted.	Submitted.
11.	Justification shall be submitted for using 2 different volumes in sample one and two for preparation of test solution in calculation of assay of trial batches.	Firm has submitted that It was typo graphical error, as per testing method it is 250 instead of 100 correction made revised reports are also submitted.

Decision of 326th meeting of Registration Board: Deferred for justification for variation in batch no. of COAs provided from drug substance manufacturer and drug product manufacturer.

Reply submitted by the firm:

Firm has submitted that it was a typo error and they also provided corrected COA with same batch number as that of the drug substance manufacturer.

	Reference to Finished product specifications	USP specifications.
	Proposed Pack size	20gm and 50gm.
	Proposed unit price	As per SRO.
	The status in reference regulatory authorities	Silvadene 1% (Silver Sulfadiazine) cream, USFDA approved.
	For generic drugs (me-too status)	Quench 1% cream, Ferozsons laboratory, Reg. No. 013090.
	GMP status of the Finished product manufacturer	New License issued on 14-09-2021.
	Evidence of section approval.	Cream/Ointment section (general) approved vide No. F 1-7/2012-Lic dated 14-09-2021.
	Name and address of API manufacturer.	M/s Shenyang Funing Pharmaceutical Co., Ltd. No.115, Hushitai North street, Shenbeixinqu, Shenyang China. Copy of GMP certificate No. LN20160005 issued by CFDA in the name of M/s Shenyang Funing Pharmaceutical Co., Ltd. Dated 12-01-2016 valid till 11-01-2021 is submitted.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubility's, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of Silver sulfadiazine is present in USP. Firm has submitted detail of nomenclature, structure,

		general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, tests for organic impurities, specifications, analytical procedures and its verification, batch analysis (B. No. 20210801, mfg. date, 11-08-2021) and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies (Drug substance.)	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 36 months. Accelerated: 40˚C±2˚C / 75% ± 5% RH for 6 months. Batches: (20171201, 20171202 &20171203)
	Module-III (Drug Product):	Official monograph of the applied formulation is present in USP. Firm has submitted detail of the drug product including its description, composition, manufacturer, description of manufacturing process and controls, process validation protocol, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence is established against the brand leader that is Quench 1% cream, Batch No. 4401, Mfg. date 03-2022 manufactured by Ferozsons Laboratory by performing quality tests (Identification, pH and Assay).
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.

STABILITY STUDY DATA

Manufacturer of API	M/s Shenyang Funing Pharmaceutical Co., Ltd. No.115, Hushitai North street, Shenbeixinqu, Shenyang China.		
API Lot No.	20210801.		
Description of Pack (Container closure system)	Aluminum tube packed in unit carton (1's , 20gram).		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 03 months Accelerated: 03 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	CR-01/R20	CR-02/R20	CR-03/R20
Batch Size	237 tubes.	237 tubes	237 tubes
Manufacturing Date	03-2022	03-2022	03-2022
Date of Initiation	16-03-2022	16-03-2022	10-03-2022
No. of Batches	03		

REQUEST OF EXEMPTION FROM ON SITE INSPECTION

The firm has requested for Exemption from On-site Investigation of their submitted stability data and provided the following documents in conjunction with the checklist approved by the Registration Board.

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	

2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. LN20160005 issued by CFDA in the name of M/s Shenyang Funing Pharmaceutical Co., Ltd. Dated 12-01-2016 valid till 11-01-2021 is submitted.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not submitted.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks by the Evaluator:

Sr. No.	Section	Observation	Reply by the firm
1.	1.5.5	Revise pharmacological group as per WHO ATC code with submission of applicable fee.	
2.	1.6.5	Valid copy of GMP certificate of the drug substance manufacturer shall be submitted.	
3.	3.2.S.4.1	Specification of the drug substance by the drug product manufacturer shall be submitted.	
4.	3.2.S.4.2	• Analytical procedures for the drug substance by the drug product manufacturer shall be submitted. • Mobile phase, Composition of the diluent, wave length of the detector, flow rate in the assay test of analytical procedure provided by the Drug Substance manufacturer is different from USP. Clarification shall be submitted.	
5.	3.2.S.4.3	Analytical method verification protocol shall be submitted.	
6.	3.2.S.4.4	• COA of the drug substance provided by the drug product manufacturer has no test for content of nitrate and silver content. Clarification shall be submitted. • COA of the drug substance provided by the drug product manufacturer has supplier name of Mansoor Chemicals. Justification shall be submitted.	
7.	3.2.S.5	Details and COAs of the working standard used in the development of trial batches shall be submitted.	

8.	3.2.P.5.2	• Calculation formula for assay in the analytical procedure for the finished product is different from USP. Clarify. • Analytical procedures for all the test of the finished product shall be submitted.	
9.	3.2.P.5.3	• Minimum fill and microbial enumeration test are not performed in the provided COA of trial batches. • COAs of the finished product are for Adapalene instead of silver sulfadiazine. Clarification shall be submitted.	
10.	3.2.P.8	• Submitted chromatograms does not reflect any wave length, injection volume etc. • Submitted chromatograms also does not reflect any resolution between sulfadiazine and sulfamerazine as required by the official monograph. • Justification shall be submitted for two different form of chromatograms. • Documents for the procurement of API with approval from DRAP (in case of import) shall be submitted. • Compliance Record of HPLC software 21CFR & audit trail reports on product testing shall be submitted.	

Decision of 326th meeting of Registration Board: Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.

Reply submitted by the firm

Observation	Reply by the firm
Revise pharmacological group as per WHO ATC code with submission of applicable fee.	Firm has revised pharmacological group for the applied formulation as Sulfonamide antibiotic/chemotherapeutic as per WHO ATC code. ***However, fee required for pre-registration variation is not submitted by the firm.***
Valid copy of GMP certificate of the drug substance manufacturer shall be submitted.	Firm has submitted copy of license No. Liao 20150048 issued by Liaoning Provincial Drug Administration in the name of M/s Shenyang Funing Pharmaceutical Co., Ltd. Valid till 20-12-2025.
Specification of the drug substance by the drug product manufacturer shall be submitted.	Submitted.
• Analytical procedures for the drug substance by the drug product manufacturer shall be submitted.	Firm has submitted analytical procedures for the drug substance in line with USP.
• Mobile phase, Composition of the diluent, wave length of the detector, flow rate in the assay test of analytical procedure provided by the Drug Substance	Firm has submitted revised analytical procedures for the drug substance and are in line with USP pharmacopoeia.

manufacturer is different from USP. Clarification shall be submitted.	
Analytical method verification protocol shall be submitted.	Submitted.
• COA of the drug substance provided by the drug product manufacturer has no test for content of nitrate and silver content. Clarification shall be submitted.	Firm has submitted revised COA of the drug substance wherein they have added nitrate and silver content test in the submitted COA.
• COA of the drug substance provided by the drug product manufacturer has supplier name of Mansoor Chemicals. Justification shall be submitted.	Firm has submitted that Mansoor chemical is the indenter, that why his name is written on COA.
Details and COAs of the working standard used in the development of trial batches shall be submitted.	Firm has submitted COA of the working standard.
• Calculation formula for assay in the analytical procedure for the finished product is different from USP. Clarify.	Firm has submitted that in analytical procedure for the finished product, calculation formula from USP is followed.
• Analytical procedures for all the test of the finished product shall be submitted.	They also attached the analytical procedures for the finished product.
• Minimum fill and microbial enumeration test are not performed in the provided COA of trial batches.	Firm has submitted that both the tests were performed on the trial batches. However, they were not added in the COA. They further submitted revised COAs for all the three trial batches with inclusion of above mentioned tests.
• COAs of the finished product are for Adapalene instead of silver sulfadiazine. Clarification shall be submitted.	Firm has submitted that it was a compilation mistake and they now submitted corrected ones.
• Submitted chromatograms does not reflect any wave length, injection volume etc.	Firm has submitted that their HPLC software by default not show the wavelength, injection volume mentioned on chromatograms.
• Submitted chromatograms also does not reflect any resolution between sulfadiazine and sulfamerazine as required by the official monograph.	Firm has submitted that they perform resolution between sulfadiazine and sulfamerazine in the next time point. Two peaks are completely separate from each other and hence no calculation is required. They also submitted the next time point chromatograms wherein two different peaks are clearly visible.
• Justification shall be submitted for two different form of chromatograms.	Firm has submitted that they have two HPLC systems i.e. Water and Perkin Elmer. Sometimes due to malfunctioning of one system, sample is run on another HPLC system because the stability time is due. That's why two different type of chromatograms are submitted.
• Documents for the procurement of API with approval from DRAP (in case of import) shall be submitted.	Firm has submitted computerized clearance certificate No. E-114180281593 dated 24-02-2022 mentioning 0.15kg of silver sulfadiazine USP with batch No. 20210801, mfg. date of 11-08-2021 attested by assistant director I&E, DRAP, Islamabad.
• Compliance Record of HPLC software 21CFR & audit trail reports on product testing shall be submitted.	Firm has submitted that they are newly licensed unit, therefore, HPLC software 21CFR is not applicable. However, they have submitted audit trial report.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**

• **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.** • **Registration letter will be issued after submission of pharmaceutical equivalence against the innovator product and Rs. 7,500/- fee for pre-registration variation as per notification No.F.7-11/2021-B&A/DRAP dated 07-05-2021.**

REQUEST OF EXEMPTION FROM ON SITE INSPECTION

The firm has requested for Exemption from On-site Investigation of their submitted stability data and provided the following documents in conjunction with the checklist approved by the Registration Board.

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has referred to onsite inspection report of their product "Rofl 500mcg Tablets" which was conducted on 10-10-2017, and was presented in 277th meeting of Registration Board (27 - 29 December, 2017). Following observations were reported in the report: ✓ The HPLC software is 21CFR Compliant. ✓ Audit trail reports on the testing were verifiable. Firm has adequate monitoring and controls for stability chambers.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate issued by Anhui Anqing Daguan Economy Development Area Management Committee Environmental Protection Agency in the name of M/s Anhui Haikang Pharmaceutical Co., Ltd., dated 09-11-2018. Valid till 07-11-2022.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of Invoice No. WD20201020 dated 20-10-2020 mentioning 400gm of Silodosin, Batch No. 20092102, mfg. date 21-09-2020 attested by Assistant Director I&E, DRAP, Karachi dated 07-11-2020.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator:

Sr. No.	Section	Observation	Reply by the firm
1.	1.3.4	Valid copy of DML of the applicant shall be submitted.	Firm has submitted copy of DML No. 000188 w.e.f. 11-04-2021.
2.	1.6.5	Valid copy of GMP certificate of the drug substance manufacturer issued by the concerned/relevant regulatory authority shall be submitted.	Firm has submitted copy of License No. 20190399 for Anhui Haikang Pharmaceutical Co., Ltd. No.21 Huancheng West Road, Daguan District, Anqing, Anhui, 246000 China valid till 31-12-2025. License is verified from official website of NMPA and they also have scope of production of silodosin.
3.	2.3.R	Revised table for literature references with correct information regarding the drug substance with applicable fee shall be submitted.	Firm has submitted revised table for literature references wherein they have updated pharmacopoeial status of the drug substance. *However, fee applicable for pre-registration variation is not submitted.*
4.	3.2.S.4.1	• Specifications of the drug substance from drug substance manufacturer shall be submitted. • Justification shall be submitted regarding most of the specifications of the drug substance provided by both the drug substance manufacturer and finished product manufacturer as they are different from Japanese pharmacopoeia.	Submitted. Firm has submitted revised specifications and COA from both the drug substance and finished product manufacturer as per Japanese pharmacopoeia.
5.	3.2.S.4.2	• Justify the standard preparation and sample preparation in assay test with respect to that of the drug substance standard and test preparation. • Justification shall be submitted regarding the standard preparation and sample preparation in assay test with respect to that of the Japanese pharmacopoeia as final concentration is different.	Firm has submitted that analytical method according to Japanese pharmacopoeia has been adopted and applied on the drug substance analysis. They also submitted analytical methods from both drug substance and finished product manufacturer. *However, the submitted analytical procedures in the initial dossier the standard and test preparation both are different from drug substance manufacturer and Japanese pharmacopoeia.*
6.	3.2.S.4.3	Verification studies of the drug substance performed by the drug product manufacturer shall be submitted.	Submitted.
7.	3.2.S.7	Justification shall be submitted regarding the container closure system of the drug substance as it is mentioned to be packed in LLDPE while the official monograph has mentioned Well-closed containers. Storage—Light-resistant.	Firm has submitted that drug substance manufacturer has performed stability studies in the same container closure system as marketed previously and now they have adopted Japanese pharmacopoeia specifications. They will provide upcoming consignment according to updated specifications using the same container closure system as recommended by the JP monograph.
8.	3.2.S.7.3	Most of the specifications of the drug substance provided in 3.2.S.4.1 are changed in the stability data sheets. Clarification shall be submitted.	Firm has submitted that drug substance was comply with in house specifications in which critical test required in stability studies were covered and already adopted from Japanese

			pharmacopoeia. Further relevant section of drug substance part will be updated as attached letter from drug substance manufacturer in section 3.2.S.7.3.
9.	3.2.P.2.2	Justification shall be submitted for not performing Uniformity of dosage units in pharmaceutical equillance.	Firm has submitted that uniformity of dosage unit is a parameter to ensure the consistency of the dosage form. We have performed this test on all stability batches of both applied strength in initial stages to comply with the release requirements and found complies with the established criteria.
10.	3.2.P.8	Silodosin is a light sensitive material therefore the whole analytical procedures should avoid exposure to light using brown volumetric flask and sampler vials. Justify the performance of analytical procedures in volumetric flasks and other glassware without taking this precaution.	Firm has submitted that precaution as recommended for drug substance by JP monograph has been adopted for analysis of drug product and applied the same throughout the development studies of applied product. They also provided updated analytical procedures.

Decision of 326th meeting of Registration Board: Deferred for following:

- Justification shall be submitted regarding the standard preparation and sample preparation in assay test of the drug substance as it is different from both the drug substance manufacturer and Japanese pharmacopoeia.
- Submission of updated stability data for drug substance with revised specifications and container closure system as recommended by the JP monograph.
- Submission of Rs. 7,500/- fee for revision of specifications as per notification No.F.7-11/2021-B&A/DRAP dated 07-05-2021.

Reply submitted by the firm;

Reason for deferment	Submission by the frim
Justification shall be submitted regarding the standard preparation and sample preparation in assay test of the drug substance as it is different from both the drug substance manufacturer and Japanese pharmacopoeia.	Firm has submitted that they have applied analytical method according to Japanese Pharmacopoeia which has been adopted and applied on the drug substance analysis. They have also provided copy from both the drug substance and drug product manufacturer.
Submission of updated stability data for drug substance with revised specifications and container closure system as recommended by the JP monograph.	Firm has submitted revised specifications for the drug substance. They also provided stability study data for the drug substance against the revised specifications. Batch No. 20021101, 20021301 & 20021501 Sheets have mentioned that "Samples are packed under simulated market container."
Submission of Rs. 7,500/- fee for revision of specifications as per notification No.F.7-11/2021-B&A/DRAP dated 07-05-2021.	Firm has submitted 7500/- fee vide slip No. 28546366031 dated 16-03-2023.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

REQUEST OF EXEMPTION FROM ON SITE INSPECTION			
The firm has requested for Exemption from On-site Investigation of their submitted stability data and provided the following documents in conjunction with the checklist approved by the Registration Board.			
Administrative Portion			
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has referred to onsite inspection report of their product "Rofl 500mcg Tablets" which was conducted on 10-10-2017, and was presented in 277th meeting of Registration Board (27 - 29 December, 2017). Following observations were reported in the report: ✓ The HPLC software is 21CFR Compliant. ✓ Audit trail reports on the testing were verifiable. Firm has adequate monitoring and controls for stability chambers.	
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate issued by Anhui Anqing Daguan Economy Development Area Management Committee Environmental Protection Agency in the name of M/s Anhui Haikang Pharmaceutical Co., Ltd., dated 09-11-2018. Valid till 07-11-2022.	
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of Invoice No. WD20201020 dated 20-10-2020 mentioning 400gm of Silodosin, Batch No. 20092102, mfg. date 21-09-2020 attested by Assistant Director I&E, DRAP, Karachi dated 07-11-2020.	
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted	
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted	
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted	

Remarks of Evaluator**:**

Sr. No.	Section	Observation	Reply by the firm
1.	1.3.4	Valid copy of DML of the applicant shall be submitted.	Firm has submitted copy of DML No. 000188 w.e.f. 11-04-2021.
2.	1.6.5	Valid copy of GMP certificate of the drug substance manufacturer issued by the concerned/relevant regulatory authority shall be submitted.	Firm has submitted copy of License No. 20190399 for M/s Anhui Haikang Pharmaceutical Co., Ltd. No.21 Huancheng

			West Road, Daguan District, Anqing, Anhui, 246000 China valid till 31-12-2025. License is verified from official website of NMPA and they also have scope of production of silodosin.
3.	2.3.R	Revised table for literature references with correct information regarding the drug substance with applicable fee shall be submitted.	Firm has submitted revised table for literature references wherein they have updated pharmacopoeial status of the drug substance. *However, fee applicable for pre-registration variation is not submitted.*
4.	3.2.S.4.1	• Specifications of the drug substance from drug substance manufacturer shall be submitted. • Justification shall be submitted regarding most of the specifications of the drug substance provided by both the drug substance manufacturer and finished product manufacturer as they are different from Japanese pharmacopoeia.	Submitted. Firm has submitted revised specifications and COA from both the drug substance and finished product manufacturer as per Japanese pharmacopoeia.
5.	3.2.S.4.2	• Justify the standard preparation and sample preparation in assay test with respect to that of the drug substance standard and test preparation. • Justification shall be submitted regarding the standard preparation and sample preparation in assay test with respect to that of the Japanese pharmacopoeia as final concentration is different.	Firm has submitted that analytical method according to Japanese pharmacopoeia has been adopted and applied on the drug substance analysis. They also submitted analytical methods from both drug substance and finished product manufacturer. *However, the submitted analytical procedures in the initial dossier the standard and test preparation both are different from drug substance manufacturer and Japanese pharmacopoeia.*
6.	3.2.S.4.3	Verification studies of the drug substance performed by the drug product manufacturer shall be submitted.	Submitted.
7.	3.2.S.7	Justification shall be submitted regarding the container closure system of the drug substance as it is mentioned to be packed in LLDPE while the official monograph has mentioned Well-closed containers. Storage—Light-resistant.	Firm has submitted that drug substance manufacturer has performed stability studies in the same container closure system as marketed previously and now they have adopted Japanese pharmacopoeia specifications. They will provide upcoming consignment according to updated specifications using the same container closure system as recommended by the JP monograph.
8.	3.2.S.7.3	Most of the specifications of the drug substance provided in 3.2.S.4.1 are changed in the stability data sheets. Clarification shall be submitted.	Firm has submitted that drug substance was comply with in house specifications in which critical test required in stability studies were covered and already adopted from Japanese pharmacopoeia. Further relevant section of drug substance part will be updated as attached letter from drug substance manufacturer in section 3.2.S.7.3.
9.	3.2.P.2.2	Justification shall be submitted for not performing Uniformity of dosage units in pharmaceutical equillance.	Firm has submitted that uniformity of dosage unit is a parameter to ensure the consistency of the dosage form. We have performed this test on all stability batches of both applied strength

			in initial stages to comply with the release requirements and found complies with the established criteria.
10.	3.2.P.8	Silodosin is a light sensitive material therefore the whole analytical procedures should avoid exposure to light using brown volumetric flask and sampler vials. Justify the performance of analytical procedures in volumetric flasks and other glassware without taking this precaution.	Firm has submitted that precaution as recommended for drug substance by JP monograph has been adopted for analysis of drug product and applied the same throughout the development studies of applied product. They also provided updated analytical procedures.

Decision of 326th meeting of Registration Board: Deferred for following:

- Justification shall be submitted regarding the standard preparation and sample preparation in assay test of the drug substance as it is different from both the drug substance manufacturer and Japanese pharmacopoeia.
- Submission of updated stability data for drug substance with revised specifications and container closure system as recommended by the JP monograph.
- Submission of Rs. 7,500/- fee for revision of specifications as per notification No.F.7-11/2021-B&A/DRAP dated 07-05-2021.

Reply submitted by the firm:

Reason for deferment	**Submission by the frim**
Justification shall be submitted regarding the standard preparation and sample preparation in assay test of the drug substance as it is different from both the drug substance manufacturer and Japanese pharmacopoeia.	Firm has submitted that they have applied analytical method according to Japanese Pharmacopoeia which has been adopted and applied on the drug substance analysis. They have also provided copy from both the drug substance and drug product manufacturer.
Submission of updated stability data for drug substance with revised specifications and container closure system as recommended by the JP monograph.	Firm has submitted revised specifications for the drug substance. They also provided stability study data for the drug substance against the revised specifications. Batch No. 20021101, 20021301 & 20021501 Sheets have mentioned that "Samples are packed under simulated market container."
Submission of Rs. 7,500/- fee for revision of specifications as per notification No.F.7-11/2021-B&A/DRAP dated 07-05-2021.	Firm has submitted 7500/- fee vide slip No. 74102816257 dated 16-03-2023.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

881.	Name, address of Applicant / Marketing Authorization Holder	M/s Safina Pharmaceuticals (Pvt.) Ltd., 17 Km, Lahore Sheikhupura Road, Lahore.
	Name, address of Manufacturing site.	M/s Safina Pharmaceuticals (Pvt.) Ltd., 17 Km, Lahore Sheikhupura Road, Lahore.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)

	The proposed proprietary name / brand name	Sinocef 250mg Suspension.
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each 5ml contains: Cephradine ……..…… 250mg
	Pharmaceutical form of applied drug	Oral Suspension.
	Pharmacotherapeutic Group of (API)	First generation cephalosporin.
	Reference to Finished product specifications	USP Specifications.
	Proposed Pack size	1 x 60ml and 1 x 90ml.
	Proposed unit price	As per approved price.
	The status in reference regulatory authorities	Nicef Syrup 250mg/5ml / Cefradine Syrup 250mg/5ml MHRA approved. Active Ingredient Per 5ml Cefradine 250 mg
	For generic drugs (me-too status)	Velosef 250mg Suspension, GSK Pakistan, Reg. No. 001868.
	GMP status of the Finished product manufacturer	New license granted on 18/02/2021 Tablet (General & General Antibiotic) section, General Capsule Section, Cream Ointment & Gel and Cephalosporin (Capsule & Dry Suspension) Section approved.
	Evidence of section approval.	Oral Dry Powder Suspension (Cephalosporin) section vide No.F.1-43/2006-Lic (Vol-I) dated 10-06-2021.
	Name and address of API manufacturer.	M/s Pharmagen Limited. Kot Nabi Bukshwala, 34 km Ferozepur Road Lahore. Copy of GMP certificate No. 129/2020-DRAP (AD/1998630-530) dated 02/09/2020 issued on the basis of inspection conducted on 22-06-2020 is submitted.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of Cephradine is available in USP & BP. Firm has submitted detail of the drug

		substance regarding nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, tests for impurities, specifications, analytical procedures and its verification, batch analysis (B. No. 00203/038/2022, mfg. date 03-2022) and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies (Drug substance.)	Firm has submitted both real time and accelerated stability study data for the drug substance. Stability study conditions: Real time: 5˚C ± 3˚C %RH for 36 months Accelerated: 25˚C ± 2˚C / 60% ± 5%RH for 6 months Batch No. (00202/001/2008, 00202/050/2008 & 00202/100/2008)
	Module-III (Drug Product):	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical equivalence and comparative dissolution profile	Firm has submitted Pharmaceutical Equivalence against the cephradine suspension 250mg/5ml, manufactured by M/s Sami, by performing quality tests (Identification, Assay, and Uniformity of dosage form).
	Analytical method validation/verification of product	Firm has submitted verification studies of the drug substance and the drug product.

REQUEST OF EXEMPTION FROM ON SITE INSPECTION		
The firm has requested for Exemption from On-site Investigation of their submitted stability data and provided the following documents in conjunction with the checklist approved by the Registration Board.		
Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. 129/2020-DRAP (AD/1998630-530) dated 02/09/2020 issued on the basis of inspection conducted on 22-06-2020 is submitted.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not submitted.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not Submitted

Remarks by the Evaluator:

Sr. No.	Section number	Observation	Response by the firm.
1.	1.5.2	Justification shall be submitted regarding the label claim of the applied formulation as the label claim has only cephradine while the executed BMR's, Batch formula and COA for the finished product has Cephradine as monohydrate.	
2.	3.2.S.4.1	• Specification for the drug substance by the drug product manufacturer shall be submitted. • Firm has submitted BP and USP specifications for the drug substance wherein no limits for 4,5 dihydrocefradine are given while BP has mentioned the same. Clarify.	
3.	3.2.S.4.2	• Analytical procedures for the drug substance by the drug product manufacturer shall be submitted. • Concentration of the standard and test samples in analytical procedures from the drug substance manufacturer are different from BP. Justification shall be submitted.	
4.	3.2.S.4.3	Verification studies for the drug substance performed by the drug product manufacturer shall be submitted.	
5.	3.2.S.4.4	• Justify the physical form of the drug substance whether monohydrate or otherwise.	

		• COAs from both the drug substance manufacturer and drug product manufacturer having same batch number shall be submitted. • COA submitted by the drug substance manufacturer has mentioned that it complies with BP specifications while submitted COA have no limits for 4,5 dihydrocepfradine and BP has mentioned it. Justify.
6.	3.2.S.5.	• Specifications has mentioned BP specifications for the drug substance while the reference standard provided is that of the USP. Clarification shall be submitted. • Working standard standardized against the reference standard has mentioned that use before 26, October 2016. Clarify.
7.	3.2.P.1	Qualitative composition of the applied formulation is different from reference product. Justification shall be submitted.
8.	3.2.P.2	• Justification for not performing Pharmaceutical Equivalence against the innovator brand shall be submitted. • In one page PE against Sami pharma product is established while on another page PE against Velosef suspension by GSK pharma is submitted. Calrify. • Justification shall be submitted for using UV method in assay test for PE while the official method has assay test on HPLC method. • No details of mfg. date, Exp. Date & batch numbers are provided in pharmaceutical equivalence studies.
9.	3.2.P.5.1	Specification provided for drug product by the drug product manufacturer has different pH limits from pharmacopoeia and also not mentioned cephalexin in assay test.
10.	3.2.P.5.4	COA for the finished product has only mentioned cephradine while the USP has mentioned sum of Cephradine and cephalexin. Clarification shall be submitted.
11.	3.2.P.5.3	• Method verification protocol shall be submitted. • Sample and standard solution preparation used in method verification studies shall be submitted. • Provide justification for accuracy range i.e 90% - 110%.
12.	3.2.P.8	• Justify the label claim of the applied formulation in the assay calculation of submitted chromatograms as 25mg is claimed while the actual value is 50mg. • Documents for the procurement of API with approval from DRAP (in case of import) shall be submitted.

	• API lot number used during the development studies shall be mentioned in the stability data sheets. • Compliance Record of HPLC software 21CFR & audit trail reports on product testing shall be submitted. • Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) shall be submitted. • Reference of previous approval of applications with stability study data of the firm (if any) shall be submitted. • Complete six months stability study data shall be submitted.	

Decision of 326th meeting of Registration Board: Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.

Reply submitted by the Firm:

Sr. No.	Section number	Observation	Response by the firm.
1.	1.5.2	Justification shall be submitted regarding the label claim of the applied formulation as the label claim has only cephradine while the executed BMR's, Batch formula and COA for the finished product has Cephradine as monohydrate.	Firm has submitted that label claim of the applied formulation is cephradine anhydrous. Cephradine as monohydrate was typo error. They also provided COA from the drug substance manufacturer wherein Cephradine anhydrous is mentioned.
2.	3.2.S.4.1	• Specification for the drug substance by the drug product manufacturer shall be submitted. • Firm has submitted BP and USP specifications for the drug substance wherein no limits for 4,5 dihydrocefradine are given while BP has mentioned the same. Clarify.	Firm has submitted specification of the drug substance from drug substance manufacturer. Firm has also mentioned limits for 4,5 dihydrocefradine as per official pharmacopoeia.
3.	3.2.S.4.2	• Analytical procedures for the drug substance by the drug product manufacturer shall be submitted. • Concentration of the standard and test samples in analytical procedures from the drug substance manufacturer are different from BP. Justification shall be submitted.	Submitted. Firm has submitted revised analytical procedures as per official monograph.
4.	3.2.S.4.3	Verification studies for the drug substance performed by the drug product manufacturer shall be submitted.	Firm has submitted method verification studies of the drug substance.
5.	3.2.S.4.4	• Justify the physical form of the drug substance whether monohydrate or otherwise. • COAs from both the drug substance manufacturer and drug product manufacturer having same batch number shall be submitted.	Firm has submitted that physical form of cephradine is anhydrous. Firm has submitted COA of the drug substance from both the drug substance manufacturer and finished product manufacturer with same batch number.

		• COA submitted by the drug substance manufacturer has mentioned that it complies with BP specifications while submitted COA have no limits for 4,5 dihydrocepfradine and BP has mentioned it. Justify.	Firm has submitted limits for 4,5 dihydrocepfradine in the submitted COA as per BP specifications
6.	3.2.S.5.	• Specifications has mentioned BP specifications for the drug substance while the reference standard provided is that of the USP. Clarification shall be submitted. • Working standard standardized against the reference standard has mentioned that use before 26, October 2016. Clarify.	Firm has submitted that during compilation of dossier, COA of the reference standard of USP was submitted. However, actually they have used another one. Firm has submitted new working standard details that actually this working standard was used in the trial batches.
7.	3.2.P.1	Qualitative composition of the applied formulation is different from reference product. Justification shall be submitted.	Firm has submitted that only one inactive is different from the reference product. However, their product is stable and has shown no change during stability studies.
8.	3.2.P.2	• Justification for not performing Pharmaceutical Equivalence against the innovator brand shall be submitted. • In one page PE against Sami pharma product is established while on another page PE against Velosef suspension by GSK pharma is submitted. Calrify. • Justification shall be submitted for using UV method in assay test for PE while the official method has assay test on HPLC method. • No details of mfg. date, Exp. Date & batch numbers are provided in pharmaceutical equivalence studies.	Firm has submitted new report for pharmaceutical equivalence performed against Velosef suspension 250mg, B. No. B54H, Mfg. date 11-, by performing quality tests (Identification, Assay, and Uniformity of dosage form). Firm has submitted that it was typo error. Firm has submitted new results for pharmaceutical equivalence wherein they have performed assay test on HPLC. Velosef suspension 250mg by GSK B. No. B54H, Mfg. date 11- 202
9.	3.2.P.5.1	Specification provided for drug product by the drug product manufacturer has different pH limits from pharmacopoeia and also not mentioned cephalexin in assay test.	Firm has submitted revised specifications for the finished product with corrected limits of pH and cephalexin content.
10.	3.2.P.5.4	COA for the finished product has only mentioned cephradine while the USP has mentioned sum of Cephradine and cephalexin. Clarification shall be submitted.	Revised and corrected COA is submitted.
11.	3.2.P.5.3	• Method verification protocol shall be submitted. • Sample and standard solution preparation used in method verification studies shall be submitted. • Provide justification for accuracy range i.e 90% - 110%.	Submitted. Submitted. Firm has submitted that accuracy range was mistakenly written as 90% - 110%, now we have corrected the range and our results were within the limit of ±2% as defined by ICH guidelines.
12.	3.2.P.8	• Justify the label claim of the applied formulation in the assay calculation of	Firm has submitted that it was typo error.

	submitted chromatograms as 25mg is claimed while the actual value is 50mg. • Documents for the procurement of API with approval from DRAP (in case of import) shall be submitted. • API lot number used during the development studies shall be mentioned in the stability data sheets. • Compliance Record of HPLC software 21CFR & audit trail reports on product testing shall be submitted. • Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) shall be submitted. • Reference of previous approval of applications with stability study data of the firm (if any) shall be submitted. • Complete six months stability study data shall be submitted.	Firm has submitted purchase invoice for the drug substance. Firm has submitted revised stability data sheets with inclusion of API lot number. Firm has submitted that they are newly licensed pharmaceutical unit. Submitted. Not applicable Submitted.
Decision: Registration Board decided to defer the case for onsite inspection for verification and authenticity of the submitted stability data.

2.	3.2.S.4.2	Analytical procedures for the drug substance by the drug product manufacturer shall be submitted.	
3.	3.2.S.4.3	Verification studies for the drug substance performed by the drug product manufacturer shall be submitted.	
4.	3.2.S.4.4	COAs from both the drug substance manufacturer and drug product manufacturer having same batch number shall be submitted.	
5.	3.2.S.7.3	Justification shall be submitted for performing only few tests in the stability studies of drug substance.	
6.	3.2.P.2	pH of the product mentioned in pharmaceutical development is 2.6 – 4.1 while official pharmacopoeia has mentioned 2.5 – 4.5. justify.	
7.	3.2.P.2	• Justification shall be submitted for using UV method in assay test for PE while the official method has assay test on HPLC method. • No details of mfg. date, Exp. Date & batch numbers are provided in pharmaceutical equivalence studies.	
8.	3.2.P.3.2.	Batch formula has mentioned Cefixime trihydrate 100 instead of Cefixime as trihydrate 100. Revised batch formula along with applicable fee shall be submitted.	
9.	3.2.P.5.3	• Method verification protocol shall be submitted. • Sample and standard solution preparation used in method verification studies shall be submitted. • Provide justification for accuracy range i.e 90% - 110%.	

10.	3.2.P.8	• Official pharmacopoeia has mentioned that Adjust flow rate so that the retention time of Cefixime is about 10 min while all the submitted chromatograms has run time of 6 to 7 minutes and retention time is about 3 minutes. • Submitted chromatograms does not reveal system suitability parameters as required by the USP monograph. Justify. • Submitted chromatograms does not column efficiency as required by the USP monograph. Justify. • API lot number is not mentioned in stability data sheets. • Documents for the procurement of API with approval from DRAP (in case of import) shall be submitted. • Compliance Record of HPLC software 21CFR & audit trail reports on product testing shall be submitted. • Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) shall be submitted. • Reference of previous approval of applications with stability study data of the firm (if any) shall be submitted. • Complete six months stability study data shall be submitted.	

Decision of 326th meeting of Registration Board: Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.

Reply by the firm:

Sr. No.	Section number	Observation	Response by the firm.
1.	3.2.S.4.1	Specification for the drug substance by the drug product manufacturer shall be submitted.	Submitted.
2.	3.2.S.4.2	Analytical procedures for the drug substance by the drug product manufacturer shall be submitted.	Submitted.
3.	3.2.S.4.3	Verification studies for the drug substance performed by the drug product manufacturer shall be submitted.	Firm has submitted verification studies of the drug substance including specificity, accuracy and precision.
4.	3.2.S.4.4	COAs from both the drug substance manufacturer and drug product manufacturer having same batch number shall be submitted.	COAs of the drug substance from both drug substance manufacturer and finished product manufacturer having batch No. 00243/081/2022 with manufacturing date of April, 2022 are submitted.

5.	3.2.S.7.3	Justification shall be submitted for performing only few tests in the stability studies of drug substance.	Firm has submitted that stability studies are conducted on stability specifications which are different from the release or shelf life specifications. Usually those tests are performed in stability studies which are expected to be affected by temperature and humidity conditions over the period of time. Pharmagen is a DRAP approved API manufacturer and its stability study data for Cefixime has been accepted by Registration Board in various meetings.
6.	3.2.P.2	pH of the product mentioned in pharmaceutical development is 2.6 – 4.1 while official pharmacopoeia has mentioned 2.5 – 4.5. justify.	Firm has submitted revised pH for the product as per official pharmacopoeia i.e. 2.5 – 4.5.
7.	3.2.P.2	• Justification shall be submitted for using UV method in assay test for PE while the official method has assay test on HPLC method.	Firm has submitted that they perform pharmaceutical equivalence studies using the same method provided in 3.2.P.5.1 & 3.2.P.5.2 and there was some typographical mistake while compiling dossier and by mistake some UV method was attached. They also provided the results of HPLC.
		• No details of mfg. date, Exp. Date & batch numbers are provided in pharmaceutical equivalence studies.	Firm has submitted details of the innovator product as follows; Batch No. D1836, Mfg. date 06-2022, Exp. Date 05, 2024
8.	3.2.P.3.2.	Batch formula has mentioned Cefixime trihydrate 100 instead of Cefixime as trihydrate 100. Revised batch formula along with applicable fee shall be submitted.	Firm has submitted revised batch formula for the applied formulation without submission of applicable fee.
9.	3.2.P.5.3	• Method verification protocol shall be submitted.	Submitted.
		• Sample and standard solution preparation used in method verification studies shall be submitted.	Firm has submitted that sample and standard preparation method used in verification studies are exactly same as defined in the analytical procedures of drug product.
		• Provide justification for accuracy range i.e 90% - 110%.	Firm has submitted that accuracy range was mistakenly written as 90% - 110%, now we have corrected the range and our results were within the limit of ±2% as defined by ICH guidelines.
10.	3.2.P.8	• Official pharmacopoeia has mentioned that Adjust flow rate so that the retention time of Cefixime is about 10 min while all the submitted chromatograms has run time of 6 to 7 minutes and retention time is about 3 minutes.	Firm has submitted that they have performed verification studies and system suitability studies as defined by USP. During verifications studies they have performed HPLC analysis for run time greater than 10 minutes, but our analyte peak was observed from 3 to 4 minutes so as per USP recommendations they adjusted the HPLC run time to 07 minutes. Both standard as well as sample analysis show similar retention time which justify the identification as well as other analytical tests.
		• Submitted chromatograms does not reveal system suitability	Firm has submitted that their default software for HPLC show limited options while printing HPLC chromatograms

	parameters as required by the USP monograph. Justify. • Submitted chromatograms does not column efficiency as required by the USP monograph. Justify. • API lot number is not mentioned in stability data sheets. • • Documents for the procurement of API with approval from DRAP (in case of import) shall be submitted. • Compliance Record of HPLC software 21CFR & audit trail reports on product testing shall be submitted. • Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) shall be submitted. • Reference of previous approval of applications with stability study data of the firm (if any) shall be submitted. • Complete six months stability study data shall be submitted.	however, all parameters related to system suitability like number of theoretical plates, tailing factor, column efficiency etc. are recorded and saved within the system for each chromatograms. API lot No. is 00243/081/22. Firm has submitted purchase invoice for the drug substance. Firm has submitted that they have newly licensed facility therefore, this point is not applicable. Submitted. Not applicable. Firm has submitted complete six month stability studies for all the three trial batches as per decision of the 293rd meeting of Registration Board.
Decision: Registration Board decided to defer the case for onsite inspection for verification and authenticity of the submitted stability data.

	Name and address of API manufacturer.	M/s Pharmagen Limited. Kot Nabi Bukshwala, 34 km Ferozepur Road Lahore. Copy of GMP certificate No. 129/2020-DRAP (AD/1998630-530) dated 02/09/2020 issued on the basis of inspection conducted on 22-06-2020 is submitted.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module III (Drug Substance)	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubility, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis (B. No. 00243/081/22 date of analysis 12-05-2022) and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies (Drug substance.)	Firm has submitted stability study data of 03 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65 ± 5% RH for 36 b months. Batches: (00244/135/2010, 00244/136/2010 & 00244/137/2010)

	Module-III (Drug Product):	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical equivalence and comparative dissolution profile	Firm has submitted Pharmaceutical Equivalence against the brand Caricef 200mg/5ml Dry Suspension, manufactured by M/s Sami, by performing quality tests (Identification, Assay, and Uniformity of dosage form).
	Analytical method validation/verification of product	Firm has submitted verification studies of the drug substance and the drug product.

REQUEST OF EXEMPTION FROM ON SITE INSPECTION

The firm has requested for Exemption from On-site Investigation of their submitted stability data and provided the following documents in conjunction with the checklist approved by the Registration Board.

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. 129/2020-DRAP (AD/1998630-530) dated 02/09/2020 issued on the basis of inspection conducted on 22-06-2020 is submitted.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not submitted.
4.	Data of stability batches will be supported by attested respective documents like chromatograms,	Submitted

	Raw data sheets, COA, summary data sheets etc.	
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not Submitted

Remarks by the Evaluator:

Sr. No.	Section number	Observation	Response by the firm.
1.	3.2.S.4.1	Specification for the drug substance by the drug product manufacturer shall be submitted.	Submitted.
2.	3.2.S.4.2	Analytical procedures for the drug substance by the drug product manufacturer shall be submitted.	Submitted.
3.	3.2.S.4.3	Verification studies for the drug substance performed by the drug product manufacturer shall be submitted.	Firm has submitted verification studies of the drug substance including specificity, accuracy and precision. Linearity and range are not verified.
4.	3.2.S.4.4	COAs from both the drug substance manufacturer and drug product manufacturer having same batch number shall be submitted.	COAs of the drug substance from both drug substance manufacturer and finished product manufacturer are submitted.
5.	3.2.S.7.3	Justification shall be submitted for performing only few tests in the stability studies of drug substance.	Firm has submitted that stability studies are conducted on stability specifications which are different from the release or shelf life specifications. Usually those tests are performed in stability studies which are expected to be affected by temperature and humidity conditions over the period of time. Pharmagen is a DRAP approved API manufacturer and its stability study data for Cefixime has been accepted by Registration Board in various meetings.
6.	3.2.P.2	• Justification shall be submitted for using UV method in assay test for PE while the official method has assay test on HPLC method.	Firm has submitted that they perform pharmaceutical equivalence studies using the same method provided in 3.2.P.5.1 & 3.2.P.5.2 and there was some typographical mistake while compiling dossier and by mistake some UV method was attached. *Submitted raw data in the originally submitted dossier is from UV method and no data of HPLC is submitted by the firm.*
		• No details of mfg. date, Exp. Date & batch numbers are provided in pharmaceutical equivalence studies.	Firm has submitted details of the innovator product as follows; Batch No. D1836, Mfg. date 06-2022, Exp. Date 05, 2024
7.	3.2.P.3.2.	Batch formula has mentioned Cefixime trihydrate 100 instead of Cefixime as trihydrate 100. Revised batch formula along with applicable fee shall be submitted.	Firm has submitted revised batch formula for the applied formulation without submission of applicable fee.

8.	3.2.P.5.3	• Method verification protocol shall be submitted.	Not submitted.
		• Sample and standard solution preparation used in method verification studies shall be submitted.	Firm has submitted that sample and standard preparation method used in verification studies are exactly same as defined in the analytical procedures of drug product. However, dilution prepared for the verification studies are not provided.
		• Provide justification for accuracy range i.e 90% - 110%.	Firm has submitted that accuracy range was mistakenly written as 90% - 110%, now we have corrected the range and our results were within the limit of ±2% as defined by ICH guidelines.
9.	3.2.P.8	• Official pharmacopoeia has mentioned that Adjust flow rate so that the retention time of Cefixime is about 10 min while all the submitted chromatograms has run time of 6 to 7 minutes and retention time is about 3 minutes.	Firm has submitted that they have performed verification studies and system suitability studies as defined by USP. During verifications studies they have performed HPLC analysis for run time greater than 10 minutes, but our analyte peak was observed from 3 to 4 minutes so as per USP recommendations they adjusted the HPLC run time to 07 minutes. Both standard as well as sample analysis show similar retention time which justify the identification as well as other analytical tests. Conditions applied are similar to USP however, retention time is not in line with USP.
		• Submitted chromatograms does not reveal system suitability parameters as required by the USP monograph. Justify. • Submitted chromatograms does not column efficiency as required by the USP monograph. Justify.	Firm has submitted that their default software for HPLC show limited options while printing HPLC chromatograms however, all parameters related to system suitability like number of theoretical plates, tailing factor, column efficiency etc. are recorded and saved within the system for each chromatograms.
		• API lot number is not mentioned in stability data sheets.	Firm has stated that API lot number is 00243/081/22. *However, the Purchase invoice has some other batch number of the raw material.*
		• Documents for the procurement of API with approval from DRAP (in case of import) shall be submitted.	Firm has submitted copy of invoice No. 2645 dated 10-05-2022 mentioning Cefixime micronized with batch No. 00243-04/081/2022 with 2kg quantity.
		• Compliance Record of HPLC software 21CFR & audit trail reports on product testing shall be submitted.	Firm has submitted that their HPLC system is not 21 CFR compliant however they have maintained all relevant logs as per the GMP requirements.
		• Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) shall be submitted. • Reference of previous approval of applications with stability study data of the firm (if any) shall be submitted.	Submitted.

• Complete six months stability study data shall be submitted.	Firm has submitted that they have recently been granted with manufacturing license and till date they have not received any approval of application with stability data. Submitted.

Decision of 326th meeting of Registration Board: Deferred for the following;

- Performance of Assay test in Pharmaceutical equivalence studies, as per USP monograph.
- Justification shall be submitted for retention time of Cefixime with respect to the USP which states that "Adjust flow rate so that the retention time of Cefixime is about 10 min" while all the submitted chromatograms has "run time" of 6 to 7 minutes and retention time is about 3 minutes.
- Justification shall be submitted for difference in the API lot number in stability summary data sheets and purchase invoice.
- Submission of Rs. 7,500/- fee for revision of specifications as per notification No.F.7-11/2021-B&A/DRAP dated 07-05-2021.

Reply submitted by the firm:

Sr. No.	Reason for deferment	Reply submitted by the firm
1.	Performance of Assay test in Pharmaceutical equivalence studies, as per USP monograph.	Firm has submitted new results for Pharmaceutical equivalence studies wherein they have performed assay test as per USP monograph with HPLC.
2.	Justification shall be submitted for retention time of Cefixime with respect to the USP which states that "Adjust flow rate so that the retention time of Cefixime is about 10 min" while all the submitted chromatograms has "run time" of 6 to 7 minutes and retention time is about 3 minutes.	Firm has submitted next time point data wherein the chromatograms have retention time of about 7 to 8 minutes while the run time of the chromatograms is about 13 minutes. They further submitted that in future they will follow pharmacopoeial specifications.
3.	Justification shall be submitted for difference in the API lot number in stability summary data sheets and purchase invoice.	Firm has submitted that this was typo error. They also submitted revised stability data sheets wherein the API lot No. is as per purchase invoice.
4.	Submission of Rs. 7,500/- fee for revision of specifications as per notification No.F.7-11/2021-B&A/DRAP dated 07-05-2021.	Not submitted.

Decision: Registration Board decided to defer the case for onsite inspection for verification and authenticity of the submitted stability data.

Case 03; Registration applications of deferred import cases (Human) drugs on Form 5F.

884.	Name, address of Applicant / Importer	M/s Pfizer Pakistan Limited, B-2, S.I.T.E. Karachi.
	Details of Drug Sale License of importer	License No: 030. Address: M/s Pfizer Pakistan Limited, B-2, S.I.T.E. Karachi. Address of Godown: (a) 12-Dockyard Road, West Wharf, Karachi. (b) C-II-D S.I.T.E. Karachi. Validity: 25-02-2023. Status: Drug License by way of Wholesale.
	Name and address of marketing authorization holder (abroad)	M/s Hospira UK Limited, Horizon, Honey Lane Hurley Maidenhead SL6 6RJ United Kingdom
	Name, address of manufacturer(s)	M/s Zydus Hospira Oncology Pvt., Ltd., Plot No. 3, Pharmez-Special Economic Zone, Sarkhej Bavla Highway, N.H. No. 8A Matoda, Taluka Sanand, District Ahmadabad, Gujrat, India.

	Name of exporting country	United Kingdom.
	Detail of certificates attached (CoPP, Free sale certificate, GMP certificate)	CoPP: Firm has submitted legalized & Notarized copy of CoPP certificate (No. PP10170759) dated 17-03-2021 issued by MHRA. Name of the product mentioned for Pakistan is Oxaliplatin 50mg/10ml Concentrate for Solution for Infusion. Certificate has mentioned M/s Hospira UK Limited, Horizon, Honey Lane Hurley Maidenhead SL6 6RJ United Kingdom as product License/marketing authorization holder with product license No. PL 04515/0215. Status of the product License/marketing authorization is "C" which means not involved in manufacturing, packaging or labelling the dosage form but is responsible for the quality and release of the product. Certificate has also mentioned the name of the manufacturer as M/s Zydus Hospira Oncology Pvt., Ltd., Plot No. 3, Pharmez-Special Economic Zone, Sarkhej Bavla Highway, N.H. No. 8A Matoda, Taluka Sanand, District Ahmadabad, Gujrat, India. GMP: Applicant has submitted copy of GMP certificate No. 2062066 dated 06-06-2020 issued by Food & Drug Control Administration, Gandhinagar, Gujrat State of India in the name of M/s Zydus Hospira Oncology Pvt., Ltd., Plot No. 3, Pharmez-Special Economic Zone, N.H. No. 8A Sarkhej-Bavla Road, Matoda, Tal- Sanand, District Ahmadabad, Gujrat, India having manufacturing License No. G/28/1267. The certificate is issued on the basis of inspection conducted on 03-04/10/2019 & 06/02/2020 and is valid till 05/06/2023.
	Details of letter of authorization / sole agency agreement	Firm has submitted copy of letter of authorization from M/s Hospira UK Limited having its principal place of business at Horizon, Honey Lane Hurley Maidenhead SL6 6RJ United Kingdom wherein Hospira UK Limited authorizes M/s Pfizer Pakistan Limited, located at B-2, S.I.T.E. Karachi to be the marketing authorization holder in Pakistan for Oxaliplatin Hospira 50mg/10ml & 100mg/20ml concentrate for solution for infusion and be responsible for all matters pertaining to the regulation of this product in Pakistan. Authorization letter also confirms that these products are manufactured and released by Zydus Hospira Oncology Pvt., Ltd., Plot No. 3, Pharmez Special Economic Zone, Sarkhej Bavla Highway, N.H. No. 8A Matoda, Taluka Sanand, District Ahmadabad, Gujrat, India.
	Status of the applicant	☐ Manufacturer ☒ Importer ☐ Is involved in none of the above (contract giver)

	Details of fee submitted	PKR 150,000/- vide slip No. 60745999 Dated: 07-06-2021.
	The proposed proprietary name / brand name	Oxaliplatin 50mg/10ml, Concentrate for Solution for Infusion.
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each 10ml contains; Oxaliplatin ……. 50mg (5mg/ml)
	Pharmaceutical form of applied drug	Concentrate for Solution for Infusion.
	Pharmacotherapeutic Group of (API)	Antineoplastic Agents (L01)
	Reference to Finished product specifications	Not submitted.
	Proposed Pack size	1's.
	Proposed unit price	No information provided.
	The status in reference regulatory authorities	Eloxatin (Oxaliplatin 50mg/10ml (5mg/ml) USFDA Approved.
	For generic drugs (me-too status)	Oxitan 50/10ml, Reg. No. 110554, Atco pharma.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has also summarized information related to the drug substance and drug product both.
	Name, address of drug substance manufacturer	Heraeus Deutschland GmbH & Co. Address: Heraeusstr. 12-14. 63450 Hanau, Germany. UMICORE Argentina S.A. Address: 14 Street, Building # 229 - B1629MXA Pilar Industrial Park, Buenos Aires Province, Argentina.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubility, appearance, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of more than 03 batches for drug substance at accelerated as well as real time conditions. The real time stability data is conducted at 25ºC ± 2ºC & 60% ± 05% RH. The stability study data is till 60 months and accelerated stability study data is conducted at 40ºC ± 2ºC & 75% ± 5% RH for six months. Heraeus Deutschland GmbH & Co.

		Batch No. 10902, 11002 & 11102. UMICORE Argentina S.A. Batch No. OX12011, OX12012 & OX12013.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, batch formula, pharmaceutical development, manufacturer, manufacturing process and process control, process validation report, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis (OX11202, OX11203, OX11605, OX21202), justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Not submitted.
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	Type – I clear glass vial, with elastomeric closure, and aluminum seal with plastic flip-off top.
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 03 batches of drug product. Accelerated stability study data is conducted at 40ºC ±2ºC & 75% ± 5% RH for 06 months. The real time stability study data is conducted at 30ºC ±2ºC & 75% ± 5% RH for 24 months. Batch No. OX11202, OX11203 & OX11605.

Evaluation by PEC:

Sr. No.	Section	Observation	Reply by the firm
1.		• Original, legalized copy of GMP certificate of the manufacturer shall be submitted.	Firm has once again submitted coloured copy of GMP certificate. *Legalized and notarized GMP certificate shall be submitted.*
		• Original/notarized authorization letter shall be submitted.	Firm has submitted notarized letter of authorization.
2.	1.4.1.1	Authorization letter has mentioned the territory of Pakistan only, while in module one section 1.4.1.1 has mentioned domestic and export sales. Clarification shall be submitted.	Firm has submitted revised Form 5F wherein they have made change in section 1.4.1.1 from domestic and export sales to domestic sales. *Fee required for pre-registration variation is not submitted.*
3.	1.5.6	Finished product specification for the finished product shall be mentioned.	*No specification is submitted for the finished drug product by the applicant.*
4.	3.2.S.4.1	Specification of the drug substance by the drug product manufacturer shall be submitted.	Firm has submitted two tables of specifications for both the drug substance manufacturers and stated that each lot of Oxaliplatin is tested and must meet the specifications listed in the provided table.
5.	3.2.S.4.2	Analytical method for drug substance by the finished product manufacturer shall be submitted.	Submitted.
6.	3.2.S.4.3	Analytical method verification studies for the drug substance performed by the drug product manufacturer shall be submitted.	Firm has provided validation report completed at Mulgrave, Victoria, Australia (Mulgrave) site. They further submitted that they have provided the method transfer

			report demonstrating successful transfer of the determination of Identification and Assay by HPLC, Impurity B, Impurity E, Impurity C, Unspecified Impurities, residual solvents (for Heraeus API only) and silver contents of Oxaliplatin method from the Mulgrave to Zydus Hospira Oncology Private Limited (ZHOPL) manufacturing sites.
7.	3.2.P.2.2	The comparison of the developed formulation with innovator product with applied strength including the results of all the quality tests (pharmaceutical equivalence) shall be submitted and discussed.	Firm has submitted pharmaceutical equivalence of their product against the innovator product i.e Sanofi Synthelabo's Eloxatin™ Injection marketed in UK, Germany and Sweden for Appearance of Solution, pH, Assay and Related substance (impurity A, B, E, C, D and unknown impurities). Results providedhas shown that Mayne Pharma's Oxaliplatin Injection and the competitor product, Sanofi Synthelabo's Eloxatin™ Injection marketed in UK(50mg/10mL;100mg/20mL), Germany (50mg/10mL; 100mg/20mL) and Sweden (50mg/10mL) were similar with respect to Appearance of solution, pH, potency and related substances. Therefore, Mayne Pharma's Oxaliplatin Injection is considered equivalent to Sanofi Synthelabo's Eloxatin™ Injection marketed in UK, Germany and Sweden. *Pharmaceutical equivalence provided by the applicant is Mayne Pharma Limited Australia instead of M/s Zydus Hospira Oncology Pvt., Ltd., Plot No. 3, Pharmez-Special Economic Zone, Sarkhej Bavla Highway, N.H. No. 8A Matoda, Taluka Sanand, District Ahmadabad, Gujrat, India.*
8.	3.2.P.5.1	This section has mentioned In-house specifications for the Assay test of the drug product while official monograph is available in USP. Justify.	Firm has submitted that the specifications and acceptance criteria for Oxaliplatin Injection 5 mg/mL comply with the USP monograph for Oxaliplatin Injection requirements. The compendial analytical procedures have been verified suitable for their intended use and comply with compendia. Assay and Related Substances tests are performed according to validated in-house analytical procedures. Validation reports are provided in dossier section 3.2.P.5.3. Justification of specifications is provided in dossier section 3.2.P.5.6.

9.	3.2.P.5.3	Submitted Validation of analytical procedure is by Hospira Australia since the drug product manufacturer responsible for manufacture & quality control of drug product is in India. Clarification is required.	Firm has submitted that Validation of the in-house analytical procedures was performed by the Hospira Australia development site. As the product was subsequently transferred for commercial manufacture to the ZHOPL facility located in India, the method transfer study from Hospira Australia to ZHOPL was completed demonstrating the ability of the receiving site to perform testing. They also refer to Report QCC-008-TMR-005 submitted previously.

Decision of 324th meeting of Registration Board: Deferred for following;

- Valid, legalized and original GMP certificate of the finished product manufacturer shall be submitted.
- Justification shall be submitted for providing pharmaceutical equivalence of the product from M/s Mayne Pharma Limited Australia instead of M/s Zydus Hospira Oncology Pvt., Ltd., Plot No. 3, Pharmez-Special Economic Zone, Sarkhej Bavla Highway, N.H. No. 8A Matoda, Taluka Sanand, District Ahmadabad, Gujrat, India.
- Current regulatory status with respect to the market authorization and manufacturing sites for the applied formulation of both the firms i.e. M/s Mayne Pharma Limited Australia and M/s Hospira Australia shall be submitted from where the Pharmaceutical equivalence and Validation of analytical procedures are provided respectively.

Reply by the firm:

M/s Pfizer Pakistan Limited vide their reference No. PFZ-DRAP-2023-044 dated 31-03-2023 has submitted that registration application of the above mentioned product shall be considered as Withdrawn from their side.

Decision: Registration Board decided to acceded the request of M/s Pfizer Pakistan Limited, B-2, S.I.T.E. Karachi regarding withdrawal of their registration applications i.e., Oxaliplatin 50mg/10ml, Concentrate for Solution for Infusion and declared the application as disposed of.

885.	Name, address of Applicant / Importer	M/s Pfizer Pakistan Limited, B-2, S.I.T.E. Karachi.
	Details of Drug Sale License of importer	License No: 030. Address: M/s Pfizer Pakistan Limited, B-2, S.I.T.E. Karachi. Address of Godown: (a) 12-Dockyard Road, West Wharf, Karachi. (b) C-II-D S.I.T.E. Karachi. Validity: 25-02-2023. Status: Drug License by way of Wholesale.
	Name and address of marketing authorization holder (abroad)	M/s Hospira UK Limited, Horizon, Honey Lane Hurley Maidenhead SL6 6RJ United Kingdom
	Name, address of manufacturer(s)	M/s Zydus Hospira Oncology Pvt., Ltd., Plot No. 3, Pharmez-Special Economic Zone, Sarkhej Bavla Highway, N.H. No. 8A Matoda, Taluka Sanand, District Ahmadabad, Gujrat, India.
	Name of exporting country	United Kingdom.
	Detail of certificates attached (CoPP, Free sale certificate, GMP certificate)	CoPP: Firm has submitted legalized & Notarized copy of CoPP certificate (No. PP10170758) dated 17-03-2021 issued by MHRA. Name of the product mentioned for Pakistan is Oxaliplatin 100mg/20ml Concentrate for Solution for Infusion. Certificate has mentioned M/s Hospira UK Limited, Horizon, Honey Lane Hurley Maidenhead SL6 6RJ United Kingdom as product License/marketing

		authorization holder with product license No. PL 04515/0215. Status of the product License/marketing authorization is "C" which means not involved in manufacturing, packaging or labelling the dosage form but is responsible for the quality and release of the product. Certificate has also mentioned the name of the manufacturer as M/s Zydus Hospira Oncology Pvt., Ltd., Plot No. 3, Pharmez-Special Economic Zone, Sarkhej Bavla Highway, N.H. No. 8A Matoda, Taluka Sanand, District Ahmadabad, Gujrat, India. GMP: Applicant has submitted copy of GMP certificate No. 2062066 dated 06-06-2020 issued by Food & Drug Control Administration, Gandhinagar, Gujrat State of India in the name of M/s Zydus Hospira Oncology Pvt., Ltd., Plot No. 3, Pharmez-Special Economic Zone, N.H. No. 8A Sarkhej-Bavla Road, Matoda, Tal- Sanand, District Ahmadabad, Gujrat, India having manufacturing License No. G/28/1267. The certificate is issued on the basis of inspection conducted on 03-04/10/2019 & 06/02/2020 and is valid till 05/06/2023.
	Details of letter of authorization / sole agency agreement	Firm has submitted copy of letter of authorization from M/s Hospira UK Limited having its principal place of business at Horizon, Honey Lane Hurley Maidenhead SL6 6RJ United Kingdom wherein Hospira UK Limited authorizes M/s Pfizer Pakistan Limited, located at B-2, S.I.T.E. Karachi to be the marketing authorization holder in Pakistan for Oxaliplatin Hospira 50mg/10ml & 100mg/20ml concentrate for solution for infusion and be responsible for all matters pertaining to the regulation of this product in Pakistan. Authorization letter also confirms that these products are manufactured and released by Zydus Hospira Oncology Pvt., Ltd., Plot No. 3, Pharmez Special Economic Zone, Sarkhej Bavla Highway, N.H. No. 8A Matoda, Taluka Sanand, District Ahmadabad, Gujrat, India.
	Status of the applicant	☐ Manufacturer ☒ Importer ☐ Is involved in none of the above (contract giver)

	Details of fee submitted	PKR 150,000/- vide slip No. 52026247959 Dated: 07-06-2021.
	The proposed proprietary name / brand name	Oxaliplatin 100mg/20ml, Concentrate for Solution for Infusion.
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each 20ml contains; Oxaliplatin ……. 100mg (5mg/ml)
	Pharmaceutical form of applied drug	Concentrate for Solution for Infusion.
	Pharmacotherapeutic Group of (API)	Antineoplastic Agents (L01)
	Reference to Finished product specifications	Not submitted.
	Proposed Pack size	1's.
	Proposed unit price	No information provided.
	The status in reference regulatory authorities	Eloxatin (Oxaliplatin 100mg/20ml (5mg/ml) USFDA Approved.
	For generic drugs (me-too status)	Oxitan 100/20ml, Reg. No. 110555, Atco pharma.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has also summarized information related to the drug substance and drug product both.
	Name, address of drug substance manufacturer	Heraeus Deutschland GmbH & Co. Address: Heraeusstr. 12-14. 63450 Hanau, Germany. UMICORE Argentina S.A. Address: 14 Street, Building # 229 - B1629MXA Pilar Industrial Park, Buenos Aires Province, Argentina.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubility, appearance, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of more than 03 batches for drug substance at accelerated as well as real time conditions. The real time stability data is conducted at 25ºC ± 2ºC & 60% ± 05% RH. The stability study data is till 60 months and accelerated stability study data is conducted at 40ºC ± 2ºC & 75% ± 5% RH for six months. Heraeus Deutschland GmbH & Co. Batch No. 10902, 11002 & 11102. UMICORE Argentina S.A. Batch No. OX12011, OX12012 & OX12013.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, batch formula, pharmaceutical development, manufacturer, manufacturing process and process control, process validation report, control of drug product, specifications, analytical procedures, validation of

		analytical procedures, batch analysis (OX21202, OX21203, OX21605), justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	Type – I clear glass vial, with elastomeric closure, and aluminum seal with plastic flip-off top.
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 03 batches of drug product. Accelerated stability study data is conducted at 40ºC ±2ºC & 75% ± 5% RH for 06 months. The real time stability study data is conducted at 30ºC ±2º C & 75% ± 5% RH for 24 months. Batch No. OX21202, OX21203 & OX21605.

Evaluation by PEC:

Sr. No.	Section	Observation	Reply by the firm
1.		• Original, legalized copy of GMP certificate of the manufacturer shall be submitted. • Original/notarized authorization letter shall be submitted.	Firm has once again submitted coloured copy of GMP certificate. *Legalized and notarized GMP certificate shall be submitted.* Firm has submitted notarized letter of authorization.
2.	1.4.1.1	Authorization letter has mentioned the territory of Pakistan only, while in module one section 1.4.1.1 has mentioned domestic and export sales. Clarification shall be submitted.	Firm has submitted revised Form 5F wherein they have made change in section 1.4.1.1 from domestic and export sales to domestic sales. *Fee required for pre-registration variation is not submitted.*
3.	1.5.6	Finished product specification for the finished product shall be mentioned.	*No specification is submitted for the finished drug product by the applicant.*
4.	3.2.S.4.1	Specification of the drug substance by the drug product manufacturer shall be submitted.	Firm has submitted two tables of specifications for both the drug substance manufacturers and stated that each lot of Oxaliplatin is tested and must meet the specifications listed in the provided table.
5.	3.2.S.4.2	Analytical method for drug substance by the finished product manufacturer shall be submitted.	Submitted.
6.	3.2.S.4.3	Analytical method verification studies for the drug substance performed by the drug product manufacturer shall be submitted.	Firm has provided validation report completed at Mulgrave, Victoria, Australia (Mulgrave) site. They further submitted that they have provided the method transfer report demonstrating successful transfer of the determination of Identification and Assay by HPLC, Impurity B, Impurity E, Impurity C, Unspecified Impurities, residual solvents (for Heraeus API only) and silver contents of Oxaliplatin method from the Mulgrave to Zydus Hospira Oncology Private Limited (ZHOPL) manufacturing sites.
7.	3.2.P.2.2	The comparison of the developed formulation with innovator product	Firm has submitted pharmaceutical equivalence of their product against the

		with applied strength including the results of all the quality tests (pharmaceutical equivalence) shall be submitted and discussed.	innovator product i.e Sanofi Synthelabo's Eloxatin™ Injection marketed in UK, Germany and Sweden for Appearance of Solution, pH, Assay and Related substance (impurity A, B, E, C, D and unknown impurities). Results provided has shown that Mayne Pharma's Oxaliplatin Injection and the competitor product, Sanofi Synthelabo's Eloxatin™ Injection marketed in UK(50mg/10mL;100mg/20mL), Germany (50mg/10mL; 100mg/20mL) and Sweden (50mg/10mL) were similar with respect to Appearance of solution, pH, potency and related substances. Therefore, Mayne Pharma's Oxaliplatin Injection is considered equivalent to Sanofi Synthelabo's Eloxatin™ Injection marketed in UK, Germany and Sweden. *Pharmaceutical equivalence provided by the applicant is Mayne Pharma Limited Australia instead of M/s Zydus Hospira Oncology Pvt., Ltd., Plot No. 3, Pharmez-Special Economic Zone, Sarkhej Bavla Highway, N.H. No. 8A Matoda, Taluka Sanand, District Ahmadabad, Gujrat, India.*
8.	3.2.P.5.1	This section has mentioned In-house specifications for the Assay test of the drug product while official monograph is available in USP. Justify.	Firm has submitted that the specifications and acceptance criteria for Oxaliplatin Injection 5 mg/mL comply with the USP monograph for Oxaliplatin Injection requirements. The compendial analytical procedures have been verified suitable for their intended use and comply with compendia. Assay and Related Substances tests are performed according to validated in-house analytical procedures. Validation reports are provided in dossier section 3.2.P.5.3. Justification of specifications is provided in dossier section 3.2.P.5.6.
9.	3.2.P.5.3	Submitted Validation of analytical procedure is by Hospira Australia since the drug product manufacturer responsible for manufacture & quality control of drug product is in India. Clarification is required.	Firm has submitted that Validation of the in-house analytical procedures was performed by the Hospira Australia development site. As the product was subsequently transferred for commercial manufacture to the ZHOPL facility located in India, the method transfer study from Hospira Australia to ZHOPL was completed demonstrating the ability of the receiving site to perform testing. They also refer to Report QCC-008-TMR-005 submitted previously.

Decision of 324th meeting of Registration Board: Deferred for following;

- Valid, legalized and original GMP certificate of the finished product manufacturer shall be submitted.
- Justification shall be submitted for providing pharmaceutical equivalence of the product from M/s Mayne Pharma Limited Australia instead of M/s Zydus Hospira Oncology Pvt., Ltd., Plot No. 3, Pharmez-Special Economic Zone, Sarkhej Bavla Highway, N.H. No. 8A Matoda, Taluka Sanand, District Ahmadabad, Gujrat, India.

• Current regulatory status with respect to the market authorization and manufacturing sites for the applied formulation of both the firms i.e. M/s Mayne Pharma Limited Australia and M/s Hospira Australia shall be submitted from where the Pharmaceutical equivalence and Validation of analytical procedures are provided respectively. Reply by the firm: *M/s Pfizer Pakistan Limited vide their reference No. PFZ-DRAP-2023-044 dated 31-03-2023 has submitted that registration application of the above mentioned product shall be considered as Withdrawn from their side.*		
Decision: Registration Board decided to acceded the request of M/s Pfizer Pakistan Limited, B-2, S.I.T.E. Karachi regarding withdrawal of their registration applications i.e., Oxaliplatin 100mg/20ml, Concentrate for Solution for Infusion and declared the application as disposed of.

	The proposed proprietary name / brand name	EXOPIO 380 mg.
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial contains: Naltrexone extended-release powder for suspension for injection ……..…380 mg Each vial of Diluent contains: Carboxy methylcellulose Sodium ……150mg Sodium Chloride……36mg Polysorbate……...……4mg Water for Injections…….…up to 4ml
	Pharmaceutical form of applied drug	Powder for suspension for injection.
	Pharmacotherapeutic Group of (API)	Drugs used in alcohol dependence.

	Reference to Finished product specifications	Innovator's Specifications.
	Proposed Pack size	1's.
	Proposed unit price	As per DPC.
	The status in reference regulatory authorities	VIVITROL (naltrexone for extended-release injectable suspension), USFDA Approved.
	For generic drugs (me-too status)	Not Available
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Name, address of drug substance manufacturer	Temad Co. Active Pharmaceutical Ingredients Address: 28th km of Karaj Makhsous Road, Tehran, Iran.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubility, appearance, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches for drug substance at accelerated as well as real time conditions. The real time stability data is conducted at 30°C ± 2°C & 65% RH The stability study data is till 24 months and accelerated stability study data is conducted at 40°C ± 2°C & 75% ± 5% RH for six months. Batch No. NAB5058001, NAB5058002 & NAB5058003.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis (21002, 21003, 20003), justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted Pharmaceutical Equivalence for the applied product against the reference product i.e. Vivitrol manufactured by Alkermes, Inc. by performing following tests; Appearance before preparation of suspension, Dispersion time, Appearance after preparation of

		suspension, pH, Osmolarity, Water content, Identification, Assay and In-vitro release.
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	Type – I clear colourless glass vial with lyophilized bromobutyl rubber stopper.
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 4 batches of drug product. The real time stability study data is conducted at 5°C ±3° C for 24 months. Batch No. 19003 24 months, 20001 18 months, 20002 18 months & 20003 12 months.
	Therapeutic indications in USFDA.	VIVITROL contains naltrexone, an opioid antagonist, and is indicated for the treatment of alcohol dependence in patients who are able to abstain from alcohol in an outpatient setting prior to initiation of treatment with VIVITROL. Patients should not be actively drinking at the time of initial VIVITROL administration (1.1). • VIVITROL is indicated for the prevention of relapse to opioid dependence, following opioid detoxification (1.2). • VIVITROL should be part of a comprehensive management program that includes psychosocial support (1).

Evaluation by PEC:

Sr. No.	Section	Observation	Reply by the firm
1.	1.3.4	Valid copy of Drug Sale License of the applicant shall be submitted.	Firm has submitted copy of DSL No. 565 dated 13-06-2022 in the name of M/s Martin Dow limited, Plot No. 37, Sector 19, Korangi Industrial Area, Karachi valid till 16-06-2024.
2.	1.6.5	Valid copy of GMP certificate of drug substance manufacturer shall be submitted.	Firm has submitted copy of GMP certificate No. 665/18253 dated 17-05-2020 issued by Iran Food and Drug Administration in the name of Temad Co. Active Pharmaceutical Ingredients, 28th km of Karaj Makhsous Road, Tehran, Iran valid for three years.
3.	1.5.5	Pharmacotherapeutic Group of (API) shall be revised.	Firm has submitted that Pharmacotherapeutic group of Naltrexone is Narcotic/Opiate antagonist.
4.	3.2.S.4.1	Specification provided by the drug substance manufacturer has water content of NMT 2.0% while FPP has mentioned NMT 6.0%. Clarification shall be submitted.	Firm has submitted revised/corrected specification of the drug substance by providing a new COA for the drug substance from drug substance manufacturer. They also provided COA of the drug substance from both the drug substance and drug product manufacturer and both the COA's are having NMT 6% limit of water content.
5.	3.2.S.4.3	Analytical method verification studies of the drug substance performed by the drug product manufacturer shall be submitted.	Submitted.

6.	3.2.S.5	The submitted COA of the working standard used for analysis is of Naltrexone Hydrochloride. However, USP describes the reference standard for Naltrexone base (Cat. No. 1453504) only. Clarify.	Firm has submitted that same material was reported in section 3.2.S.5 as USP codes in drug substance and drug product. However, method of analysis which was reported in USP was for Naltrexone HCl. The method analysis of Naltrexone base was also the same. Because in the sample solution media & mobile phase, both forms become base form because of the pH conditions
7.	3.2.P.2.2	Justification of 12.9% of overage of naltrexone in the formulation shall be submitted.	Firm has submitted that Exopio has been prepared according to the data from originator product, Vivitrol, which applies 12.9% excess Naltrexone. Firm has also submitted a document confirming 12.9% of an excess quantity of naltrexone. *However, the authenticity of the document could not be confirmed.* *Furthermore, the review of the reference product in USFDA has also not mentioned any overage of the active substance.*
8.	3.2.P.8	• Complete real time stability data of the product shall be submitted.	Firm has submitted complete real time stability data for all the three batches i.e. 20001, 20002 & 20003 for which initially 18 months and 12-month data was submitted.
		• In use stability studies for the applied drug product shall be submitted.	Firm has submitted that the drug product should be used immediately after reconstitution process, and it should not remain unused after reconstitution. Also, it was mentioned in the booklet and guide card too.
		• Accelerated stability data for the applied drug product shall be submitted.	Firm has referred to the ICH Topic Q1A (R2) wherein for drug products intended for storage in a refrigerator, accelerated stability condition is 25°C ± 2° C / 60% ± 5% RH. Failure to meet the acceptance criteria for appearance, physical attributes, and functionality test (e.g. colour, phase separation, suspensibility, caking, hardness, dose delivery per actuation) If significant change occurs between 3 and 6 months' testing at the accelerated storage condition, the proposed re-test period should be based on the real time data available at the long term storage condition. If significant change occurs within the first 3 months' testing at the accelerated storage condition, a discussion should be provided to address the effect of short term excursions outside the label storage condition, e.g., during shipping or handling. Firm has further submitted that both Exopio and RLD samples had colour change and phenotype change after one in

	25ºC ± 2º C / 60% ± 5% RH. The accelerated studies were stopped and the storage condition (2 ºC - 8 ºC) noted on vial packaging of drug product.

Decision of 324th meeting of Registration Board: Deferred for following;

- Scientific justification of using 12.9% overage of drug substance i.e., Naltrexone in the applied formulation.
- Justification for use of Naltrexone Hydrochloride as working standard in the analysis while USP monograph recommends Naltrexone base as reference standard.

Submission by the firm;

Sr. No.	**Reason for deferment.**	**Reply by the firm**
1.	Scientific justification of using 12.9% overage of drug substance i.e., Naltrexone in the applied formulation.	Firm has submitted that Vivitrol is the originator brand available as NDA on USFDA, whereby the MA holder is Alkermes. Alkermes has entered into agreement for the same brand in Russia with Cilag GmBH international (Subsidiary of Johnson & Johnson) where the PIL shows that Naltrexone has been used 12.9% excess. Thus, it is evident that Vivitrol being the originator brand contains Naltrexone 12.9% excess. Therefore, Exopio has been developed according to the originator brand and thus, also contains 12.9% excess of Naltrexone.
2.	Justification for use of Naltrexone Hydrochloride as working standard in the analysis while USP monograph recommends Naltrexone base as reference standard.	Finished product manufacturer of the applied formulation clarify that Naltrexone HCl is not considered as the standard material in finished product's analysis. We only use Naltrexone base as a reference standard as per USP. They further submitted that their method of analysis for the finished product and details of the reference standard show that we are following Naltrexone USP standard only.

Decision: Deferred for following;

- **Scientific justification of using 12.9% overage of drug substance i.e., Naltrexone in the applied formulation.**
- **Justification for use of Naltrexone Hydrochloride as working standard in the analysis while USP monograph recommends Naltrexone base as reference standard.**

Case 04; Registration applications on the basis of Export facilitation of Locally manufactured (Human) drugs on Form 5D.

Deputy Director PRV/EFD vide letter No.F.1-6/2019-PR-I (EFD dated 28-02-2023 has informed that DRAP Authority in its 133rd meeting held on 13th April 2022, decided to grant registration on priority basis to the pharmaceutical i.e. one molecule for each 100,000 USD worth of export of medicines (to a maximum of 15 such molecules) during a fiscal year. In compliance to the aforementioned decision of the authority, the following firm i.e. **M/s Tabros Pharma (Pvt.) Ltd., Karachi** have achieved the benchmark of more than 100,000 USD **(575,683.20 USD)** during the fiscal Year 2021-2022 and submitted their applications for priority consideration in lieu of export facilitation for Registration Board please.

Following products are presented before the Board in light of the decision of the 133rd meeting of DRAP Authority held on 13th April 2022 for consideration.

887.	Name and address of manufacturer / Applicant	Tabros Pharma, Essa House, 32-1/C, Block 6, P.E.C.H.S, Karachi.

	Brand Name +Dosage Form + Strength	Zontiv Tablets 40mg
	Diary No. Date of R& I & fee	Dy. No. 377, R&I dated 29.12.2014, Rs. 20,000.
	Composition	Each Tablet contains Azilsartan kamedoxomil eq.to azilsartan medoxomil.40mg
	Pharmacological Group	Anti-hypertensive/Angiotensin-II receptor blocker
	Type of Form	Form 5
	Finished product Specifications	Manufacturer's.
	Pack size & Demanded Price	1x14's & Rs.264.2 per tablet
	Approval status of product in Reference Regulator Authorities	Edarbi 40mg Tablet (FDA Approved).
	Me-too status	Not Available
	GMP status	Last GMP Inspection 11.3.2014 (overall GMP rated as Good)
	Remarks of the Evaluator	The firm couldn't provide evidence of me-too status and replied to re-submit the application on form-5D with differential fees as me-too doesn't exist.
	Decision of 270th meeting of Registration Board.	Deferred for confirmation of evidence of me-too status and latest GMP inspection report conducted within one year.
	Copy of Form 5-D with 30,000/- fee vide slip No. 0275686 attested by statistical officer, DRAP dated 12-07-2017 is submitted.

11.	Record of comparative dissolution data (where applicable)	Firm has submitted comparative dissolution of their applied formulation i.e. Zontiv (Azilsartan Medoxomil potassium) 40mg Tablet against the innovator product Edarbi 40mg tablets, Batch No. 11701856, Mfg. date 07-2019 manufactured by M/s Takeda Pharmaceutical in Acid media (0.1N HCl), acetate buffer pH 4.5 & Phosphate Buffer pH 6.8. The F2 values are found satisfactory.
12.	Data of 03 batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
13.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	Submitted
14.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator:

Sr. No.	Observation	Reply by the firm
1.	Valid copy of GMP certificate of the drug substance manufacturer shall be submitted.	Copy of GMP certificate No. 22063346 dated 30-05-2022 in the name of M/s CTX Lifesciences, Block No. 251/P, 252/P, 253 to 255, 256/P, 258/P, 276/P, 277, 278/P, 279 to 282, 283/P, 284/P GIDC, City Sachin, Dist. Surat, Gujrat State India issued by Food & Drug Control Administration Gujrat State, India. Valid till 29.05.2025. *Firm has also submitted copy of GMP certificate No. 53/2022-DRAP (K) dated 15-04-2022 issued on the basis of inspection conducted on 07-04-2022.*
2.	Justification shall be submitted regarding the submitted stability study data for the drug substance at refrigerated conditions i.e. Real time conditions; 25˚C ± 2˚C / 60% ± 5% RH for 18 months and at Accelerated conditions; 5˚C ± 3˚C for 6 months while the innovator product has shown stability data of the drug substance at (up to 24 months at 25°C/60% RH and satisfactory 6 months results at 40°C/75% RH.	Firm has submitted that as per drug substance manufacturer storage condition is recommended, refrigerated i.e. 5˚C ± 3˚C. For refrigeration the real time storage condition is 5˚C ± 3˚C and accelerated condition is 25˚C ± 2˚C / 60% ± 5% RH. They further submitted they have submitted their stability as per ICH guidelines.
3.	Submitted BMR's for the trial batches have shown manufacturing date of 04 & 05 & 06 October while the stability data sheets have mentioned 17-11-2021 as date of initiation. Justification for this delay shall be submitted.	Firm has submitted that they acknowledge the comments of the competent authority that we have been delayed to charge the stability considering to its manufacturing date, due to huge load of routine stability samples testing. Therefore, we have little bit delayed to charge the stability, while 03rd and 06th month interval testing was done within the specified time.

Decision: Approved with innovator's specifications.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment**

submitted in the registration application.

- **Registration letter will be issued after submission of Rs. 7,500/- fee for revision of specifications as per notification No.F.7-11/2021-B&A/DRAP dated 07-05-2021.**

	Remarks of the Evaluator	• Reference product contain dihydrostreptomycin sulphate 0.25gm (equivalent to

		dihydrostreptomycin 0.20gm) while the applied formulation contains dihydrostreptomycin sulphate 0.25gm. • Manufacturing facility/section approval could not be confirmed.
	Decision of 312th meeting of Registration Board.	Deferred for confirmation of required manufacturing facility / section from Licensing Division.
	Submission by the firm.	Firm has submitted copy of GMP certificate No. 10/2023-DRAP (AD-7613761776-5101) dated 27-02-2023 issued on the basis of inspection conducted on 24th & 25th January, 2023 wherein Injectable (Steroid) section is mentioned. Firm has also submitted their registration letter for the same formulation in 50ml packs with registration number 080952. Firm has also submitted Section approval letter wherein there in no steroidal injectable section is mentioned.
	Remarks of the Evaluator	***GMP certificate has mentioned separated Injectable (Steroid) section. However, no section approval from Licensing Division is provided by the firm.***
	Decision: The Board after delibereation decided to defer the case for confirmation of approved section /manufacturing facility of the firm from Licensing Division.	

Agenda of Evaluator PEC-XV

NEW CASES OF FORM 5-F:

904.	Name, address of Applicant / Marketing Authorization Holder	M/s Global Pharmaceuticals (Pvt.) Ltd. Plot # 204-205 Industrial Triangle, kahuta Road, Islamabad-25000, Pakistan
	Name, address of Manufacturing site.	M/s Global Pharmaceuticals (Pvt.) Ltd. Plot # 204-205 Industrial Triangle, kahuta Road, Islamabad-25000, Pakistan
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☒ New Drug Product (NDP) ☐ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 3729 date of submission: 09-02-2022

	Details of fee submitted	PKR 75,000/-: dated 01/02/2022
	The proposed proprietary name / brand name	Segana XR 10mg/5mg/1000mg tablet
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each tablet contains: Empagliflozin…….10mg Linagliptin……5mg Metformin HCL……...1000mg (as extended release)
	Pharmaceutical form of applied drug	Tablet, Extended Release
	Pharmacotherapeutic Group of (API)	Metformin HCL biguanide class of antidiabetics Empagliflozin: Sodium-glucose co-transporter 2 (SGLT2) inhibitors. Linagliptin: dipeptidyl peptidase-4 (DPP-4) inhibitors.
	Reference to Finished product specifications	Innovator specs
	Proposed Pack size	30's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	TRIJARDY XR Tablet of BOEHRINGER INGELHEIM (FDA approved)
	For generic drugs (me-too status)	N/A
	GMP status of the Finished product manufacturer	The firm is granted GMP certificate based on inspection conducted on 03-01-2022 and it is valid till 02-01-2024.
	Name and address of API manufacturer.	<u>EMPAGLIFLOZIN:</u> • FUXIN LONG RUI PHARMACEUTICAL Co., Ltd. <u>METFORMIN HCL:</u> • AARTI DRUGS LIMITED <u>LINAGLIPTIN:</u> • M/s. Venkata Narayana Active Ingredients
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for impurity & related substances, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 66 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months

		EMPAGLIFLOZIN Batches: (20160606, 20161017, 20161219) METFORMIN HCL Batches: (MEF/1410027 MEF/1410028, MEF/1410029) LINAGLIPTIN batches: (LNG20131220 LNG20141220, LNG20151220)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	The Firm has performed pharmaceutical equivalence profile of their developed formulation Segana XR 10mg/5mg/1000mg tablet (B #ST21J011) with innovator product Trijardy XR Tablets (B # 3185605) of M/s Boehringer Ingelheim Pharma, USA. The results showed that release profile of both test and comparator products were comparable.
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.

STABILITY STUDY DATA			
Manufacturer of API	EMPAGLIFLOZIN: • Manufacturer: FUXIN LONG RUI PHARMACEUTICAL Co., Ltd. METFORMIN HCL: • Manufacturer: AARTI DRUGS LIMITED LINAGLIPTIN: • Manufacturer: M/s. Venkata Narayana Active Ingredients		
API Lot No.	(Empagliflozin): E-20190920-D02-E06-01 (Metformin HCL): MEF/10030953 (Linagliptin): LG0131220		
Description of Pack (Container closure system)	HDPE bottles (30's)		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 36 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6, 9,12,18, 24 & 36 (Months)		
Batch No.	ST21J011	ST21J012	ST21J013
Batch Size	3000 tablets	3000 tablets	3000 tablets
Manufacturing Date	09-2021	09-2021	09-2021
Date of Initiation	05-10-2021	06-10-2021	06-10-2021
No. of Batches	03		

Administrative Portion		
37.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has referred to previous inspection of stability data of the same dosage form on the basis of which Registration Board in 289th meeting decided to approve registration of Promig Plus 500mg/20mg Tablet and

		Promig Plus 375mg/20mg Tablet. Inspection date: 14th March, 2019 The report shows that: The HPLC software is 21 CFR compliant.The firm has provided data loggers with stability chambers.
38.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	EMPAGLIFLOZIN: Copy of GMP issued by Food & drug authority china valid till 23/08/2023. METFORMIN HCL: Copy of GMP certificate No. 20031933 issued by Food & drug Control Administration valid till 19/03/2023. LINAGLIPTIN: Copy of GMP certificate issued by drug Control Administration Andhra Pradesh valid till 07/12/2024.
39.	Documents for the procurement of API with approval from DRAP (in case of import).	The firm has submitted copy of invoice for the import of EMPAGLIFLOZIN (1.5 Kg, Invoice # HN19120501-H) and attested copy of form 6 (I&E) DRAP, Islamabad dated 10-01-2020. The firm has submitted copy of invoice for the import of METFORMIN HCL (1000 Kg, Invoice # EXP/302/20-21) and attested copy of form 6 (I&E) DRAP, Islamabad dated 05-08-2020. The firm has submitted copy of invoice for the import of LINAGLIPTIN (0.350 Kg, Invoice # 202110329) and attested copy of form 6 (I&E) DRAP, Islamabad dated 08-03-2021.
40.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
41.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Compliance Record of HPLC software 21CFR & Audit trail on testing reports of product submitted.
42.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks OF Evaluator:

S.no.	Sections	Observations/Deficiencies/ Short-comings	Response of the Firm
1.	3.2.S.4.2 Metformin HCl	Justify for performance of assay via potentiometric titration, since the USP recommended HPLC method for assay testing of metformin HCl.	Firm replied that they have now performed the assay of metformin HCl via HPLC method as per USP 43 and accordingly performed the verification studies of assay procedure on HPLC.
2.	3.2.S.4.2 Linagliptin	Justify for using different method for performing the enantiomeric purity test from that specified by the drug substance manufacturer. Further, submit the evidence of availability of chiral HPLC (chiral Pak AD column) as you have mentioned in the procedure of enantiomeric purity test.	Firm again submitted the procedure of enantiomeric purity test which is different from the procedure followed by the drug substance manufacturer.

3.	3.2.S.7	Please confirm the claimed re-test period of empagliflozin and linagliptin, accordingly provide the stability data of long term till the claimed re-test date.	Firm submitted the stability data of both drug substance.
4.	3.2.P.1	Justify the double film coating on the core of metformin comparing the formulation of innovator product in which single film coating has been done on the core of metformin.	Firm replied that " we have performed drug coating of empagliflozin and Lina gliptin in single step as performed by innovator and then finish coat (film coating) is done in order to protect the drug coating and smoothen the final tablets.
5.	3.2.P.5.1	Justify for not including the arginine content test and water content in the finished product specification since these test are included in the specification of finished product of innovator product.	Firm replied that they now included the arginine content test and water content in the finished product specification since these tests are included in the specification of finished product of innovator product. Firm submitted the procedure of arginine content and water content test.
6.	3.2.P.8	Submit the remaining stability data of drug product ,since you have submitted only three month stability data.	Firm submitted the stability data performed at long term stability condition till 12 months.
7.	3.2.R.1.1	Scientific justification is required for using 10% excess quantity of linagliptin and empagliflozin in the trail batches as evident from the submitted Batch manufacturing record comparing the review literature of innovator brand in which the composition did not mentioned the excess amount of said active ingredients.	Firm replied that to compensate the machine loss in coating they use 10% excess quantity of linagliptin and empagliflozin.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

PREVIOUSLY DEFERRED CASES OF FORM 5-F

a. IMPORTED PRODUCT:

905.	Name, address of Applicant / Importer	M/s. Hospital Supply Corporation
	Details of Drug Sale License of importer	License No:0013 Address: 42, Darul Aman Housing Society, Karachi Address of Godown: 46-E-2, Block-6, PECHS, Karachi Validity: 29-06-2022 Status: License to sell drugs as distributor Renewal: NA
	Name and address of marketing authorization holder (abroad)	BIEM ILac Sanayi ve Ticaret A.S., Anittepe Mah, Turgut Reis Cad. No.: 21 Tandogan Cnkaya, Ankara Turkey
	Name, address of manufacturer(s)	Mefar Ilac San A.S. Ramazanoglu Mahalles Ensar

		Caddesi No.2 Istanbul Turkey
	Name of exporting country	Turkey
	Detail of certificates attached (CoPP, Freesale certificate, GMP certificate)	CoPP: Firm has submitted original, legalized copy of CoPP certificate (No.2021/3007) dated 01-10-2021 issued by Turkish Medicines and Medical Devices Agency. The CoPP confirms free sale status of the product in exporting country as well as GMP status of the manufacturing site through periodic inspection every 3 years. The name of importing country on CoPP is mentioned as Pakistan. Furthermore the CoPP was valid till 01-10-2023.
	Details of letter of authorization / sole agency agreement	Firm has submitted copy of letter of distribution certificate from BIEM ILac Sanayi ve Ticaret A.S., Anittepe Mah, Turgut Reis Cad. No.: 21 Tandogan Cnkaya, Ankara Turkey. The letter species that the manufacturer appoints M/s. Hospital Supply Corporation to register their products in Pakistan. The authorization letter is valid till 31-12-2024.
	Status of the applicant	☐ Manufacturer ☒ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	For imported products, specify one the these	☒ Finished Pharmaceutical product import ☐ Bulk import and local repackaging ☐ Bulk import and local repackaging for export purpose only
	Dy. No. and date of submission	Dy. No.795 : 10-01-2022
	Details of fee submitted	PKR 150,030/-: 26-10-2021
	The proposed proprietary name / brand name	Biemexol 350mgI/ml vial (50ml)
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial contains: Iohexol……755mg/ml (755mg Iohexol equivalent to 350mg I)
	Pharmaceutical form of applied drug	Injectable
	Pharmacotherapeutic Group of (API)	X-Ray Contrast Media
	Reference to Finished product specifications	In-house specification/USP
	Proposed Pack size	50ml vial
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	USFDA Approved.
	For generic drugs (me-too status)	Monopague 350mg/ml Injection (063945) of M/s. Graton Pharma, Karachi.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template.

		Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Name, address of drug substance manufacturer	Zhejiang Taizhou Hisyn Pharmaceutical Co. Ltd. Chemical and Medical Raw Materials Base, Linhai Park Zhejian Province Zhejiang Starry Pharmaceutical Co. Ltd. No.1 Starry Road of Xianju Zhejiang Province, China
	Module-III Drug Substance:	Firm has submitted detailed drug substance data for both sources related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of API at accelerated as well as real time conditions. The real time stability data is conducted at 25°C±2, 60% RH±5%. The stability study data is till 36 months. Zhejiang Taizhou Hisyn Pharmaceutical Co. Ltd. Chemical and Medical Raw Materials Base, Linhai Park Zhejian Province Batch no. H18920080501, H18920080502, H18920080503 Zhejiang Starry Pharmaceutical Co. Ltd. No.1 Starry Road of Xianju Zhejiang Province, China Batch no. C006-0802003, C006-0802004, C006-0802005
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical Equivalence established against Omnipaque 350mgI/ML Vial (Batch no. 14778967)
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	Colorless type I Glass vial (50ml), bromobutyl closure, blue tear off cap
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 2 batches The accelerated stability study data is conducted at 40°C ±2°C / 75% ± 5% RH for 6 months. The real time stability study data is conducted at 30°C ±2°C / 65% ± 5% RH. The real time stability study data of 24 month has submitted.

INDICATIONS AND USAGE:
OMNIPAQUE (iohexol) injection is a radiographic contrast agent indicated for intrathecal, intravascular, oral, rectal, intraarticular and body cavity use. OMNIPAQUE oral solution is indicated for oral use only in conjunction with OMNIPAQUE injection administered intravenously for computed tomography (CT) of the abdomen.
DOSAGE AND ADMINISTRATION:
The concentration and volume required will depend on the indication, size and condition of the patient, and the equipment and imaging technique used. For CT of the head and body, OMNIPAQUE may be used with an automated contrast injection system or contrast media management system cleared for use with OMNIPAQUE. See full prescribing information for complete dosing information.
Evaluation by PEC:

S.no.	Sections	Observations/Deficiencies/ Short-comings
1.	Submit valid drug sale license of importer Hospital supply corporation ,since the submitted DSL was expired on 29-06-2022.	
2.	According to the composition table associated with CoPP of drug product, API iohexol comply USP specification while the submitted COA of both API vendors claimed that their material complies EP specification, so clarification is required in this regard.	
3.	3.2.S.4	Submit copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by the drug product manufacturer as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required".
4.	3.2.S.4.3	Submit data of verification of analytical procedure of drug substance in section 3.2.S.4.3 as per the guidance document approved by Registration Board which specifies that *"Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted".* Since you have submitted the validation report of drug substance manufacturer.
5.	3.2.S.7	Justify for not performing the test of sterility, bacterial endotoxin test, ionic compound test, free iodide test, ionic compound test, heavy metal test, residual solvent test and color of solution test during the stability studies of drug substance as evident from the data of both API suppliers.
6.	3.2.P.2.2.1	Justify for not performing the test of free iodine, particulate matter, sterility and bacterial endotoxin test while establishing the pharmaceutical equivalence against the reference product.
7.	3.2.P.5.1	Justify for not adopting the USP or BP specification for finished product, since the official monograph of iohexol injection is present in both BP and USP Pharmacopeia. Justify for adapting the wider assay limits i.e. from 90-110% comparing the assay limit recommended in USP monograph of iohexol injection i.e. 95-105%.
8.	3.2.P.8	Submit the batch size details of batches whose stability data has been submitted in section 3.2. P.8. Submit the complete data of long term stability studies performed at zone IV-a conditions, since you have claimed shelf life of 36months and provide the data of 24 months.

Decision of 326th meeting of Registration Board:
Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.

Response of the Firm:

S.no.	Sections	Observations/Deficiencies/ Short-comings along with Response of the Firm
1.	Submit valid drug sale license of importer Hospital supply corporation, since the submitted DSL was expired on 29-06-2022.	

	Firm submitted the copy of valid DSL issued in the name of M/s. Hospital Supply Corporation 42, Darul Aman Housing Society, Karachi (DSL no. 0237) and validity granted till 29/06/2024.	
2.	According to the composition table associated with CoPP of drug product, API iohexol comply USP specification while the submitted COA of both API vendors claimed that their material complies EP specification, so clarification is required in this regard. Firm submit the explanation letter from Product License holder i.e. BIEM ILac Sanayi ve Ticaret A.S., Anittepe Mah, Turgut Reis Cad. No.: 21 Tandogan Cnkaya, Ankara Turkey, in which it is stated that "during pharmaceutical development and first application in country of origin, first DMF of API supplier Zhejiang Starry Pharmaceutical Co. Ltd. No.1 Starry Road of Xianju Zhejiang Province, China was in compliance of USP. Accordingly, batch formula was established according to USP specifications. Lately, starry pharmaceutical has update their specifications according to EP specifications and get approval for CEP. Biem has applied for CEP submission variation in 03-08-2016 and get approval for variation in 10.10.2016. Firm submitted the copy of variation letter issued from Turkish Medicines and Medical Agency for the approval of updated European Pharmacopeia certificate of conformity.	
3.	3.2.S.4	Submit copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by the drug product manufacturer as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required". Not submitted the requisite information.
4.	3.2.S.4.3	Submit data of verification of analytical procedure of drug substance in section 3.2.S.4.3 as per the guidance document approved by Registration Board which specifies that *"Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted".* Since you have submitted the validation report of drug substance manufacturer. Not submitted the requisite information.
5.	3.2.S.7	Justify for not performing the test of sterility, bacterial endotoxin test, ionic compound test, free iodide test, ionic compound test, heavy metal test, residual solvent test and color of solution test during the stability studies of drug substance as evident from the data of both API suppliers. Not submitted as the API supplier was on leave and commit to submit as soon as received.
6.	3.2.P.2.2.1	Justify for not performing the test of free iodine, particulate matter, sterility and bacterial endotoxin test while establishing the pharmaceutical equivalence against the reference product. • Product license holder replied that Product was developmental batches manufactured in non-sterile R&D Laboratory, because of this sterility test and bacterial endotoxin test was not performed. • Further, excipients used for manufacturing of Biemexol are standard excipient used in injectable solutions. Iohexol is very soluble in water. Trometamine dissolves in water and it is used for increasing solubility in our formulation. Therefore, particulate matter test was not performed in the developmental phase. • In the formulation of the drug product, the only source for free iodine is the API Iohexol. According to the analysis results (lower than 10 PPM) obtained from CoA of API, the free iodine was evaluated as low risk for effecting of product quality. Therefore, free iodine was not performed during the development phase. Also, it is confirmed by stability data that active ingredient has not got negative effects on free iodine and stability.

7.	3.2.P.5.1	Justify for not adopting the USP or BP specification for finished product, since the official monograph of iohexol injection is present in both BP and USP Pharmacopeia. Firm replied that for specifications which limits given In-house methods as related substances, assay and density-analysis methods are established following the USP monographs.
8.	3.2.P.5.1	Justify for adapting the wider assay limits i.e. from 90-110% comparing the assay limit recommended in USP monograph of iohexol injection i.e. 95-105%. Firm replied that the assay release and shelf life specifications of Biemexol 350mgI/ml vial containing solution for IA, IV Injection are proposed as 90.0%-110% according to the results obtained from analytical results of developmental batches, validation batches and reference product. However, the assay limit recommended in USP monograph of iohexol injection is 95-105%.
9.	3.2.P.8	Submit the batch size details of batches whose stability data has been submitted in section 3.2. P.8. Firm submitted the following details: Batch no. / Batch size (Litre) / Batch size (vials) 711001 (50ml) / 80L / 1,584 712002 (50ml) / 80L / 1,584 However, as per the CTD guidance document for selection of number and size of batches applicant may follow, any of the following options: a) ICH/WHO guidelines. b) At least 2 batches having the following minimum batch size considering the scientific reliability • OSDs: 5000 Units • Oral Liquid/Suspension: 2000 • Injectable: 2000 • Aerosol and any other specialized preparations: 500 c) At least 3 batches having scientifically rational batch size, sufficient enough to perform complete testing till the claimed shelf life.
10	3.2.P.8	Submit the complete data of long term stability studies performed at zone IV-a conditions, since you have claimed shelf life of 36 months and provide the data of 24 months. Firm submitted the stability data of two batches of 50ml till the claimed shelf life of 36months.

Decision: Deferred for the submission of following shortcomings/justifications:

- **Submit copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by the drug product manufacturer.**
- **Submit data of verification of analytical procedure of drug substance in section 3.2.S.4.3 by the Drug Product manufacturer for drug substance.**
- **Justification for not performing the test of sterility, bacterial endotoxin test, ionic compound test, free iodide test, ionic compound test, heavy metal test, residual solvent test and color of solution test during the stability studies of drug substance as evident from the data of both API suppliers.**
- **Justification for not performing the test of free iodine, particulate matter, sterility and bacterial endotoxin test while establishing the pharmaceutical equivalence against the reference product.**
- **Justify for not adopting the USP or BP specification for finished product, since the official monograph of iohexol injection is present in both BP and USP Pharmacopeia.**
- **Justify for adapting the wider assay limits i.e. from 90-110% comparing the assay limit recommended in USP monograph of iohexol injection i.e. 95-105%.**

• **Submit stability data of batch sizes in accordance with the CTD guidance document approved by Registration Board.Since you have submitted the stability data of drug product of batch sizes consist of 1584 vials while minimum requirement 2000 vials per batch.**

	Details of fee submitted	PKR 150,030/-: DATED 03-01-2022
	The proposed proprietary name / brand name	BenzylPenicillin Sodium for injection 1 mega
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial contains: Benzylpenicillin Sodium eq. to Benzyl penicillin…1 mega
	Pharmaceutical form of applied drug	Powder for Injection
	Pharmacotherapeutic Group of (API)	Beta-lactamase sensitive penicillin
	Reference to Finished product specifications	BP specification
	Proposed Pack size	10 vials/box
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	MHRA Approved
	For generic drugs (me-too status)	Benzyl penicillin sodium injection 1000,000 IU OF IMPORTER United international (Reg.no. 043024)
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Name, address of drug substance manufacturer	M/s. CSPC Zhongnuo Pharmaceutical (Shijiazhuang) Co. Ltd. No.88 Yangzi Road Economic & Technological Development Zone Shijiazhuang City Hebei Province China.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of API at accelerated as well as real time conditions. The real time stability data is conducted at 25°C±2, 60% RH±5%. The stability study data is till 24 months. Batch no. 891805901, 891805901, 891805901 Claimed 48 months but provided data of 24 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or

		materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	submitted. Pharmaceutical Equivalence established against the product of M/s. Shandong Lukang Pharmaceuticals Co. Ltd., China Benzyl penicillin Sodium for Injection (1mega)
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	7ml Type-II glass vial rubber stopper flip off cap.
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches The accelerated stability study data is conducted at 40ºC ±2ºC / 75% ± 5% RH for 6 months. The real time stability study data is conducted at 30ºC ±2ºC / 65% ± 5% RH. The real time stability study data of 36 months has submitted.

S.no.	Sections	Observations/Deficiencies/ Short-comings
1.	Submit evidence of approval status of applied formulation in the approved reference regulatory agencies in the same strength i.e. 1,000,000 IU.	
2.	Clarify the strength of applied formulation, since you have applied for benzyl penicillin sodium injection 1,000,000 IU while the CoPP is of benzyl penicillin sodium for injection 1 mega. Please submit the conversion/equivalent calculation from 1,000,000 IU to 1 mega.	
3.	3.2.S.4.1-3.2.S.4.2	Submit copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by the drug product manufacturer as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required". Analytical procedure of drug substance by drug substance manufacturer is different from the procedure specified in EP monogragh,Justify how the raw material comply EP specification as claimed in the batch analysis report.
4.	3.2.S.4.3	Submit data of verification of analytical procedure of drug substance in section 3.2.S.4.3 as per the guidance document approved by Registration Board which specifies that *"Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted".* Since you have submitted the validation report of drug substance manufacturer.
5.	3.2.P.1	According to the composition of finished product given in section 3.2.P.1 599mg equivalent to benzyl penicillin 1mega powder for injection is filled per vial while the reference product approved in MHRA claimed that Each vial contains Benzylpenicillin sodium 600 mg (1 mega unit). Comparing the label claim/ strength justify how the applied product is similar to the reference product.
6.	3.2.P.1 (c)	Provide details of type and quantity of diluents used for reconstitution for of applied product.
7.	3.2.P.2.2.1	According to the pharmaceutical equivalence report content of penicillin has calculated while the BP recommends quantification of benzypenicillin content, justification is required in this regard.
8.	3.2.P.5.1	Clarify the content of penicillin in term of benzyl penicillin as recommended by BP monograph.
9.	3.2.P.5.3	Assay procedure followed while performing the validation studies is different from the recommended assay procedure given in BP monograph of benzypenicillin sodium injection, justification is required in this regard.
10.	3.2.P.8	Justify for not including the bacterial endotoxin test in the stability studies of drug product since the BET is recommended in BP monograph.

Decision of 326th meeting of Registration Board:
Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.

Evaluation by PEC:

S.no.	Sections	Observations/Deficiencies/ Short-comings
1.	Submit evidence of approval status of applied formulation in the approved reference regulatory agencies in the same strength i.e. 1,000,000 IU. Firm submitted the reply in which they stated "As a generic drug product with many years of production experience, Benzyl penicillin sodium for injection has been registered in many countries and obtained registration qualification, which is consistent with the formulation registered in Pakistan this time". (As a reference they attached registration certificate of Ghana and Nigeria) However, the reference product approved in MHRA Benzylpenicillin Sodium 600 mg powder for solution for injection / infusion contains: Benzyl penicillin Sodium 600 mg powder for solution for injection / infusion: Each vial contains 600 mg benzylpenicillin as sodium salt. Each vial contains 38.6 mg of sodium. Further the conversion details are mentioned in the SmPC of reference formulation is For international units (IU) and mass values, the following ratios apply: 1 mg benzylpenicillin sodium is equivalent to 1670 IU benzylpenicillin. 1 million IU benzylpenicillin is equivalent to 598.9 mg benzylpenicillin sodium. In general, 600 mg benzylpenicillin sodium is considered to be equivalent to 1 million IU benzylpenicillin.	
2.	Clarify the strength of applied formulation, since you have applied for benzyl penicillin sodium injection 1,000,000 IU while the CoPP is of benzyl penicillin sodium for injection 1 mega. Please submit the conversion/equivalent calculation from 1,000,000 IU to 1 mega. Firm replied that 1,000,000 IU is equivalent to 1Mega.	
3.	3.2.S.4.1	Submit copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by the drug product manufacturer as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required". Firm submitted the specification of drug substance by drug product manufacturer which is in accordance with BP.
4.	3.2.S.4.2	Analytical procedure of drug substance by drug substance manufacturer is different from the procedure specified in EP monograph, justify how the raw material comply EP specification as claimed in the batch analysis report. Firm submitted the analytical procedure of drug substance by drug product manufacturer which is inaccordance with EP monograph.
5.	3.2.S.4.3	Submit data of verification of analytical procedure of drug substance in section 3.2.S.4.3 as per the guidance document approved by Registration Board which specifies that *"Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted".* Since you have submitted the validation report of drug substance manufacturer. Firm replied that we will submit later.
6.	3.2.P.1	According to the composition of finished product given in section 3.2.P.1 599mg equivalent to benzyl penicillin 1mega powder for injection is filled per vial while the reference product approved in MHRA claimed that Each vial contains Benzyl penicillin sodium 600 mg (1 mega unit). Comparing the label claim/ strength justify how the applied product is similar to the reference product.

		Firm submitted the calculation as followings: Potency of Benzyl Penicillin Sodium= 1670 IU/mg (Each 1mg of C16H17N2NaO4S is equivalent to 1670 penicillin units, prescribed in pharmacopeia. Quantity per vial= 1,000,000IU/1670 IU/mg =598.8mg=599mg Fill weight may vary based on potency of active ingredient. The difference between the "599mg" in our product with "600mg" in the reference product may be because of rounding.
7.	3.2.P.1 (c)	Provide details of type and quantity of diluents used for reconstitution for of applied product. Firm replied that the reconstitution diluent are water for injection and 0.9% sodium chloride.
8.	3.2.P.2.2.1	According to the pharmaceutical equivalence report content of penicillin has calculated while the BP recommends quantification of benzyl penicillin content, justification is required in this regard. Firm did not submit the relevant reply.
9.	3.2.P.5.1	Clarify that either the content of penicillin is calculated in the assay of drug product comparing the assay criteria BP monograph in which the assay results are based on the quantity of benzyl penicillin. Firm did not submit the relevant reply.
10.	3.2.P.5.3	Assay procedure followed while performing the validation studies is different from the recommended assay procedure given in BP monograph of benzyl penicillin sodium injection, justification is required in this regard. Firm submitted the reply that it was a writing error and they have submitted the revised analytical procedure in accordance with BP. However, the revised analytical procedure was also not in accordance with BP as evident from the submitted report.
11.	3.2.P.8	Justify for not including the bacterial endotoxin test in the stability studies of drug product since the BET is recommended in BP monograph. Firm submitted the revised stability summary sheets in which Bacterial endotoxin test were included and the assay results are related to quantification of penicillin instead of Benzylpenicillin.

Decision: Deferred for the submission of following shortcomings/justifications:

- **Submit data of verification of analytical procedure of drug substance in section 3.2.S.4.3 as per the guidance document approved by Registration Board which specifies that *"Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted".* Since you have submitted the validation report of drug substance by drug substance manufacturer.**
- **Justify the assay testing of drug product comparing the assay test in BP monograph, wherein the assay of benzypenicillin is recommended while the firm performed the assay of penicillin.**

	Pharmaceutical form of applied drug	Injectable
	Pharmacotherapeutic Group of (API)	cholinergic muscarinic antagonist
	Reference to Finished product specifications	BP specification
	Proposed Pack size	1mg/1ml Injection
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	TGA approved
	For generic drugs (me-too status)	Atrosol injection 1mg/ml of M/s. Indus Pharma (Pvt.) Ltd. Korangi Industrial Area Karachi
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Name, address of drug substance manufacturer	M/s. Henan Purui Pharmaceutical Co. Ltd. Yezhuangqiao Village, Xinhua County, Zhoukou City, Henan Province, China
	Module-III Drug Substance:	Firm has submitted detailed drug substance data for both sources related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of API at accelerated as well as real time conditions. The real time stability data is conducted at 25℃±2, 60% RH±5%. The stability study data is till 36 months. Batch no. 20040301,20040302,20040303
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	submitted. Pharmaceutical Equivalence established against the products of M/s.Aspen Pharma Trading Limited, M/s. Xinxiang Changle Pharmaceutical Co. Ltd., M/s. Zhejiang Xianju Pharmaceutical Co. Ltd.
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	Glass ampoule low borosilicate glass volume of 1.5ml.

	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches The accelerated stability study data is conducted at 40°C ±2°C / 75% ± 5% RH for 6 months. The real time stability study data is conducted at 30°C ±2°C / 65% ± 5% RH. The real time stability study data of 24 month has submitted.

Evaluation by PEC:

S.no.	Sections	Observations/Deficiencies/ Short-comings
1.	1.4.1	Provide clarification, whether the applied product (drug product) is intended for sale in domestic market or both for domestic and export market.
2.	3.2.P.1	Justify for using 8.5 mg /ml sodium chloride comparing the composition of innovator brand in which 9mg/ml sodium chloride is used. Further, the composition of innovator brand includes sodium hydroxide and/or sulfuric acid for pH adjustment, while you have not been using any of the pH adjustment agent in the composition of applied product.
3.	3.2.P.3.1	Can you please co-relate the manufacturing procedure given in section 3.2.P.3 with the composition of applied injection because neither the procedure includes any of the active ingredient or excipients nor the pH measurement/adjustment is the part of solution preparation.
4.	3.2.P.3.5	Justify for keeping the pH limit of injection between 3.0-4.0 while the process validation ,since the recommended pH limit as per BP is 2.8-4.5.
5.	3.2.P.5.3	Justify for not complying the BP monograph while performing the analytical method verification studies of drug product.
6.	3.2.P.6	Submit COA of reference/working standard used in the analysis of drug product.
7.	3.2.P.8	Please clarify the designation of signing authority ,who correct the storage condition on the stability data sheet of Batch no. W170419 along with documented evidence.

Decision of 326th meeting of Registration Board:

Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.

Response of the Firm:

S.no.	Sections	Observations/Deficiencies/ Short-comings	Response of the Firm
1.	1.4.1	Provide clarification, whether the applied product (drug product) is intended for sale in domestic market or both for domestic and export market.	We (the manufacturer: Anhui Chengshi Pharmaceutical Co., Ltd) clarity that the applied product (Atropine Sulphate Injection) is intended for sale in domestic market (note: the domestic market is considered as China) and export market (note: the export market is considered as Pakistan).
2.	3.2.P.1	Justify for using 8.5 mg /ml sodium chloride comparing the composition of innovator brand in which 9mg/ml sodium chloride is used. Further, the composition of innovator brand includes sodium hydroxide and/or sulfuric acid for pH adjustment, while you have not been using any of the pH adjustment agent in the composition of applied product.	Firm replied that Physiological saline, also known as sterile saline, refers to the sodium chloride solution in physiological experiments or clinical common osmotic pressure is basically equal to the osmotic pressure of animal or human plasma. The concentration of sterile saline used in amphibians was 0.67% to 0.70%. When sterile saline is used in mammals and humans, the concentration is 0.85% to 0.9%. Considering the influence of the drug combination and excipients on the osmotic pressure, the sodium chloride concentration of the product is 0.85% (the concentration of

			NaCl in Atropine Sulfate Injection 1mg/1ml is 8.5mg/1ml). In the actual production, our company added sulfuric acid to adjust the product pH, and also specified in the product production process procedures. At the initial registration of the drug approval number, our MOH requires that all components of the product should be marked quantitatively. Because sulfuric acid is used to regulate the pH of atropine sulfate injection, it cannot be written quantitatively into the formula, so it is not reflected in the product formula.
3.	3.2.P.3.1	Can you please co-relate the manufacturing procedure given in section 3.2.P.3 with the composition of applied injection because neither the procedure includes any of the active ingredient or excipients nor the pH measurement/adjustment is the part of solution preparation.	Firm replied that for the protection of the process technology, our company just briefly introduced the production process. Please see the submitted documents of Atropine Sulfate Injection Production Process Procedure C-STP-SC-SC01026A" for details.
4.	3.2.P.3.5	Justify for keeping the pH limit of injection between 3.0-4.0 while the process validation ,since the recommended pH limit as per BP is 2.8-4.5.	Firm in their reply stated that "In the manufacturing process validation, the pH standard of semi-product is 3.0-4.0 and the pH standard of final product is 2.8-4.5. The semi-product is produced in the solution preparation process. After the solution preparation process, there are solution filling/sealing and sterilizing process. In order to ensure the pH of the final product comply with the BP standard (2.8-4.5) after experiencing the subsequent manufacturing process, the pH standard of semi-product should be stricter than the pH standard of final product."
5.	3.2.P.5.3	Justify for not complying the BP monograph while performing the analytical method verification studies of drug product.	Firm replied that The analytical procedure of the Atropine Sulphate Injection 1mg/1ml is according to the BP. So we only do the assay validation. In order comply with the requirement of the Drug Regulatory Authority of Pakistan, we do an overall analysis method validation according to the BP and ICH. Revised documents submitted.
6.	3.2.P.6	Submit COA of reference/working standard used in the analysis of drug product.	Submitted.

Decision: Deferred for submission of following shortcomings/justifucation:

- **Justify for performing the verification studies on assay procedure different from the assay method recommended in BP monograph of "atropine Sulphate Injection".**
- **Submit the manufacturing procedure of drug product specific to the applied formulation in relevant section.**

	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches. Accelerated stability studies have been conducted at 40°C±2°C and 75%±5% RH for 6 months. Real time stability studies conducted at 30°C±2°C and 65% ± 5% for 24 months
Evaluation by PEC:		

Sr. no.	Observations/Deficiencies/ Short-comings	Response of the Firm
1.	Submit data of analytical Method verification studies under section 3.2.S.4 including specificity, accuracy and repeatability (method precision) since you have submitted validation studies GC method for determination of residual solvent of Sunitinib Malate.	Firm has submitted the reply of this query.
2.	Scientific justification is required that how the applied product will be pharmaceutically equivalent to the innovator product i.e. sutent in which the granules are filled in capsules, while in the applied product dry powder mixture of active material and excipient are filled in capsules.	Firm has not submitted the reply of this query.
3.	All quality test which have been included in the finished product specification was not performed during pharmaceutical equivalence studies, clarification is required in this regard.	Firm has not submitted the reply of this query.
4.	Assay limits mentioned in the pharmaceutical equivalence data is in percentage without the clarification that either it is the quantification of salt or its base form. While the acceptance criteria specified in the finished product specification was content of sunitinib per capsule :22.50mg to 27. 50mg.Justification is required regarding the disparity in acceptance criteria of assay of drug product.	Firm has not submitted the reply of this query.
5.	As per the chromatographic condition specified in the procedure of dissolution testing under section 3.2.P.2: wavelength of UV detector was 230nm, column temperature 25°C and retention time is 2 min (as per chromatograms) while the chromatographic condition specified under section 3.2.P.5.2: wavelength of UV detector is 430nm, column temperature 30°C and retention time is approx.6.0 minutes. Justification is required regarding the variation in chromatographic condition despite using the same dissolution medium i.e.0.1M HCl +0.5% sodium lauryl sulphate.	Firm has not submitted the reply of this query.
6.	According to the FDA's Dissolution guidance document 2018 (same document has been referred for innovator product) the standard dissolution testing condition for sunitinib malate capsule should be *"Paddle Method (USP apparatus 2) • Stirring rate = 50 RPM • 500 mL of 0.1N HCl in aqueous medium • No surfactant in medium • 37±0.5°C"*. While the dissolution condition specified by the drug product manufacturer under section 3.2.P.2 and 3.2.P.5.2 was different from the said FDA's guidance document. Scientific justification is required in this regard.	Firm has not submitted the reply of this query.
7.	Justify the dissolution specification NLT 70% of the labelled amount of sunitinib is dissolved	Firm has not submitted the reply of this query.

	in 60 minutes since the acceptance criteria as per the FDA dissolution database for the innovator product is "*for immediate release solid oral drug products containing a high solubility drug substance the dissolution criterion is Q=80% in 30 minutes".*	
8.	Same comparative dissolution profile data has been submitted for sunitix 25 capsule and sunitix 12.5 capsule, clarification is required in this regard.	Firm has not submitted the reply of this query.
9.	Detailed analytical method validation report is required mentioning the concentration of test solutions and their individual results along with the results of mean value. Analytical method validation protocol specified assay method for capsule containing granules while the manufacturing process of drug product evident that capsule containing dry powder mixture of active material and excipient has been prepared. Justification is required that how the validation studies performed on assay method of capsule containing granules be applied on capsule containing dry powder mixture of active and excipients.	Firm has submitted the revised analytical method validation for drug product.
10.	Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product under section 2.3.R.1.1, for which stability studies data is provided in Module 3 section 3.2. P.8.	Firm submitted BMR, according to which 269.19 gm of sunitinib Malate having potency of 99.3% has been for manufacturing of 8,000 capsule.
11.	Firm has already had registration of sunitinib Malate Capsule imported from Germany and details are as follows: Product License Holder: Aqvida GmbH Kaiser-Wilhelm-Strabe 89 20355 Hamburg Germany. Manufacturer: M/s Combino Pharm (Malta) Ltd. HF 60, Hal Far Industrial Estate, Hal Far, Birzebbugia, BBG3000, Malta. Sunitinib Aqvida 12.5mg hard capsule (Reg.no.103778) Sunitinib Aqvida 25mg hard capsule (Reg.no.103779) Sunitinib Aqvida 50mg hard capsule (Reg.no.103780)	

Decision of 322nd meeting of Registration Board:
Deferred for submission of following:

- *Scientific justification is required that how the applied product will be pharmaceutically equivalent to the innovator product i.e. sutent in which the granules are filled in capsules, while in the applied product dry powder mixture of active material and excipient were filled in capsules.*
- *Submission of pharmaceutical equivalence report in which all the quality parameters of drug product specification should be included.*
- *Justification is required regarding the disparity in acceptance criteria of assay of drug product, assay limits mentioned in the pharmaceutical equivalence data is in percentage without the clarification that either it is the quantification of salt or its base form. While the acceptance criteria specified in the finished product specification was content of sunitinib per capsule :22.50mg to 27. 50mg.*
- *Scientific justification is required for using dissolution condition different from the dissolution parameters recommended in USFDA's innovator brand review report.*
- *Justify the dissolution specification NLT 70% of the labelled amount of sunitinib is dissolved in 60 minutes since the acceptance criteria as per the FDA dissolution database for the innovator product*

is "for immediate release solid oral drug products containing a high solubility drug substance the dissolution criterion is Q=80% in 30 minutes".

- *Same comparative dissolution profile data has been submitted for sunitix 25 capsule and sunitix 12.5 capsule, clarification is required in this regard.*

Response of the Firm:
Scientific justification is required that how the applied product will be pharmaceutically equivalent to the innovator product i.e. sutent in which the granules are filled in capsules, while in the applied product dry powder mixture of active material and excipient were filled in capsules.

Firm replied that as per *GUIDELINE THE INVESTIGATION OF BIOEQUIVALENCE* (Doc. Ref.: CPMP/EWP /QWP/1 401/98 Rev. 1/ Corr**) (EMA guidelines) Medicinal products are pharmaceutically equivalent if they contain the same amount of the same active substance(s) in the same dosage forms that meet the same or comparable standards.
We have manufactured Sunitix Capsule is identical as oral capsule dosage form as reference product (Sutent Capsule). Sunitix Capsule contains Sunitinib Malate equivalent Sunitinib which is identical Sutent Capsule which contains Sunitinib Malate equivalent Sunitinib.
An open label, balanced, randomized, two-treatment, two-sequence, two- period, crossover oral bioequivalence study of single dose of Sunitix Capsule (Each capsule contains Sunitinib Malate equivalent Sunitinib) of Beacon Pharmaceuticals Limited with Sutent Capsule (Each capsule contains Sunitinib Malate equivalent Sunitinib) of Pfizer Limited already performed. There was no serious adverse effect reported during study period & clinically safe as a single oral dose administration. Based on Pharmacokinetic Variables & statistical evaluation, it was observed that for both the test & reference product are bioequivalent.

Submission of pharmaceutical equivalence report in which all the quality parameters of drug product specification should be included.

Firm submitted the revised pharmaceutical equivalence report in which all the quality test was included in line with drug product specification.

Justification is required regarding the disparity in acceptance criteria of assay of drug product, assay limits mentioned in the pharmaceutical equivalence data is in percentage without the clarification that either it is the quantification of salt or its base form. While the acceptance criteria specified in the finished product specification was content of sunitinib per capsule :22.50mg to 27. 50mg.

Firm submitted the revised pharmaceutical equivalence report in which the assay limit is specified both in percentage and in mg.

As per the chromatographic condition specified in the procedure of dissolution testing under section 3.2.P.2: wavelength of UV detector was 230nm, column temperature 25°C and retention time is 2 min (as per chromatograms) while the chromatographic condition specified under section 3.2.P.5.2: wavelength of UV detector is 430nm, column temperature 30°C and retention time is approx.6.0 minutes. Justification is required regarding the variation in chromatographic condition despite using the same dissolution medium i.e.0.1M HCl +0.5% sodium lauryl sulphate.

Firm replied that "We have four (04) strength of Sunitinib Capsule and developed in different time as in-house method. In that time the molecule was not available in FDA and till now not available in pharmacopoeia. Recently we observed that assay, dissolution, impurity chromatographic conditions are not harmonized. We take initiative and harmonized these methods and solved the different chromatographic conditions. So there have some variations in previous condition with current condition. In future it will be inline."
Scientific justification is required for using dissolution condition different from the dissolution parameters recommended in USFDA's innovator brand review report.

Justify the dissolution specification NLT 70% of the labelled amount of sunitinib is dissolved in 60 minutes since the acceptance criteria as per the FDA dissolution database for the innovator product is "for

immediate release solid oral drug products containing a high solubility drug substance the dissolution criterion is Q=80% in 30 minutes".

Firm submitted the revised dissolution with the claimed of in line to innovator product sutent capsule of USFDA, but the revised dissolution conditions and acceptance criteria is still not in accordance with innovator product.

Dissolution condition of applied product	**Dissolution condition of Innovator's Formulation**
Apparatus USP II (Paddle System)	Apparatus USP II (Paddle System)
Dissolution medium: 0.1N HCl	Dissolution medium: 0.1M HCl
Volume: 500ml	Volume: 900ml
RPM: 50	Temperature: 37°C ± 0.5°C
Temperature: 37°C ± 0.5°C	Dissolution acceptance criteria : NLT Q in 30 minutes.
Dissolution Time: 60 minutes	
Acceptance Criteria: NLT 70% of the labeled amount of sunitinib is dissolved in 60 minutes.	

Same comparative dissolution profile data has been submitted for sunitix 25 capsule and sunitix 12.5 capsule, clarification is required in this regard.
Firm replied that This is referring to Bioequivalence study completed for product with higher strength, bio waiver for bioequivalence is acceptable for lower strength based on bioequivalence study on higher strength, dissolution testing of both higher and lower strength and proportional similarity of the formulations between lower strength and higher strength.

Decision: Deferred for the submission of following shortcomings:

- **Submit the revised dissolution conditions along with dissolution acceptance criteria in line with innovator product. Further the dissolution performance report of stability batches which are in accordance with revised acceptance criteria.**
- **Submit separate comparative dissolution profile data of both strength of sunitix 25mg and 12.5mg capsules.**

	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches. Accelerated stability studies have been conducted at 40°C±2°C and 75%±5% RH for 6 months. Real time stability studies conducted at 30°C±2°C and 65% ± 5% for 24 months

Evaluation by PEC:

Sr. no.	Observations/Deficiencies/ Short-comings	Response of the Firm
1.	Submit data of analytical Method verification studies under section 3.2.S.4 including specificity, accuracy and repeatability (method precision) since you have submitted validation studies GC method for determination of residual solvent of Sunitinib Malate.	Firm has submitted the reply of this query.
2.	Scientific justification is required that how the applied product will be pharmaceutically equivalent to the innovator product i.e. sutent in which the granules are filled in capsules, while in the applied product dry powder mixture of active material and excipient are filled in capsules.	Firm has not submitted the reply of this query.
3.	All quality test which have been included in the finished product specification was not performed during pharmaceutical equivalence studies, clarification is required in this regard.	Firm has not submitted the reply of this query.
4.	Assay limits mentioned in the pharmaceutical equivalence data is in percentage without the clarification that either it is the quantification of salt or its base form. While the acceptance criteria specified in the finished product specification was content of sunitinib per capsule :22.50mg to 27. 50mg.Justification is required regarding the disparity in acceptance criteria of assay of drug product.	Firm has not submitted the reply of this query.
5.	As per the chromatographic condition specified in the procedure of dissolution testing under section 3.2.P.2: wavelength of UV detector was 230nm, column temperature 25°C and retention time is 2 min (as per chromatograms) while the chromatographic condition specified under section 3.2.P.5.2: wavelength of UV detector is 430nm, column temperature 30°C and retention time is approx.6.0 minutes. Justification is required regarding the variation in chromatographic condition despite using the same dissolution medium i.e.0.1M HCl +0.5% sodium lauryl sulphate.	Firm has not submitted the reply of this query.
6.	According to the FDA's Dissolution guidance document 2018 (same document has been referred for innovator product) the standard dissolution testing condition for sunitinib malate capsule should be *"Paddle Method (USP apparatus 2) • Stirring rate = 50 RPM • 500 mL of 0.1N HCl in aqueous medium • No surfactant in*	Firm has not submitted the reply of this query.

	medium • 37±0.5°C". While the dissolution condition specified by the drug product manufacturer under section 3.2.P.2 and 3.2.P.5.2 was different from the said FDA's guidance document. Scientific justification is required in this regard.	
7.	Justify the dissolution specification NLT 70% of the labelled amount of sunitinib is dissolved in 60 minutes since the acceptance criteria as per the FDA dissolution database for the innovator product is "*for immediate release solid oral drug products containing a high solubility drug substance the dissolution criterion is Q=80% in 30 minutes".*	Firm has not submitted the reply of this query.
8.	Same comparative dissolution profile data has been submitted for sunitix 25 capsule and sunitix 12.5 capsule, clarification is required in this regard.	Firm has not submitted the reply of this query.
9.	• Detailed analytical method validation report is required mentioning the concentration of test solutions and their individual results along with the results of mean value. • Analytical method validation protocol specified assay method for capsule containing granules while the manufacturing process of drug product evident that capsule containing dry powder mixture of active material and excipient has been prepared. Justification is required that how the validation studies performed on assay method of capsule containing granules be applied on capsule containing dry powder mixture of active and excipients.	Firm has submitted the revised analytical method validation for drug product.
10.	Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product under section 2.3.R.1.1, for which stability studies data is provided in Module 3 section 3.2. P.8.	Firm submitted BMR, according to which 269.19 gm of sunitinib Malate having potency of 99.3% has been for manufacturing of 8,000 capsule.
11.	Firm has already had registration of sunitinib Malate Capsule imported from Germany and details are as follows: Product License Holder: Aqvida GmbH Kaiser-Wilhelm-Strabe 89 20355 Hamburg Germany. Remarks of Evaluator:

S.no.	Sections	Observations/Deficiencies/ Short-comings
1.	3.2.S.4.2	Submit data of verification of analytical procedure of drug substance in section 3.2.S.4.3 as per the guidance document approved by Registration Board which specifies that *"Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted".* Since you have only submitted the requisite information provided by drug substance manufacturer.
2.	3.2.S.4.4	Justify how you have calculate the potency of nebivolol without HCl as mentioned in the COA of drug substance comparing the COA of drug substance by drug substance manufacturer calculated the assay on anhydrous basis only.
3.	3.2.P.2.2.1	• Justify for not performing the test of content uniformity by HPLC and water content test while establishing the pharmaceutical equivalence aginst the reference product, since these test are included in the specification of innovator brand of USFDA. • Justify for not performing the pharmaceutical equivalence and comparative dissolution against the innovator brand/brand leador approved in Pakistan.
4.	3.2.P.5.1	• Justify for not including the test of water content in the release specification of drug product, since these test are included in the specification of innovator brand. • Clarification is required that in assay either you have quantified the nebivolol or nebivolol HCl, since the calculated % is of nebivolol HCl, while the main peak in the chromatogram represent the nebivolol without HCl.

		• Sample preparation for assay is more general rather than specific, without the clarity that transfer quantity of the sample equivalent to 50mg represent either the quantity of nebivolol or nebivolol HCl. • Justify for adapting the acceptance criteria of dissolution NLT 80% within 45 minutes comparing the results of CDP in 0.01N HCl medium which was more than 80% within 15minutes and the acceptance criteria of innovator brand approved in USFDA.
5.	3.2.R.1.1	Justify for taking the strength of tablet with HCl factor for calculation of dispensed quantity of powder as revealed from the batch manufacturing record since you have taken the potency of drug substance without HCl on as is basis.

Decision of 324th meeting of Registration Board:

Decision: Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.

Response of the Firm:

S.no.	Sections	Observations/Deficiencies/ Short-comings	Response of the Firm
1.	3.2.S.4.2	Submit data of verification of analytical procedure of drug substance in section 3.2.S.4.3 as per the guidance document approved by Registration Board which specifies that *"Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted".* Since you have only submitted the requisite information provided by drug substance manufacturer.	Firm submitted the analytical method verification report of drug substance performed by drug product manufacturer. However, the official monograph of drug substance is present in EP 11.0 and the applicant imported in-house complied drug substance.
2.	3.2.S.4.4	Justify how you have calculate the potency of nebivolol without HCl as mentioned in the COA of drug substance comparing the COA of drug substance by drug substance manufacturer calculated the assay on anhydrous basis only.	Firm replied it is an error which was rectified and correct COA of drug substance by drug product manufacturer has submitted.
3.	3.2.P.2.2.1	Justify for not performing the test of content uniformity by HPLC and water content test while establishing the pharmaceutical equivalence against the reference product, since these test are included in the specification of innovator brand of USFDA.	Firm submitted the analytical procedure instead of pharmaceutical equivalence report including the test of content uniformity by HPLC and water content test.
4.	3.2.P.5.1	Justify for not including the test of water content in the release specification of drug product, since these test are included in the specification of innovator brand.	Firm submitted the revised analytical procedure of drug along with specification.

5.	3.2.P.5.1	Sample preparation for assay is more general rather than specific, without the clarity that transfer quantity of the sample equivalent to 50mg represent either the quantity of nebivolol or nebivolol HCl.	Firm revised the sample preparation procedure in which 50mg is the quantity of nebivolol.
6.	3.2.P.5.1	Clarification is required that in assay either you have quantified the nebivolol or nebivolol HCl, since the calculated % is of nebivolol HCl, while the main peak in the chromatogram represent the nebivolol without HCl.	Firm replied that We have used Nebivolol HCl raw material in production of our trial batches as per Innovator's specifications not Nebivolol base as it is evident from our COA of raw material attached here but since international and our claim is Nebivolol as HCl (Nebivolol base) that's why we had used only Nebivolol in our chromatograms. The peak in chromatograms is of Nebivolol HCl but to justify our claim in product we write only Nebivolol on it which is also evident from the assay of standard which we use as 90.53%. The pictures of reference products to justify our claim are attached herewith along with some supporting data.
7.	3.2.P.5.2	Justify for adapting the acceptance criteria of dissolution NLT 80% within 45 minutes comparing the results of CDP in 0.01N HCl medium which was more than 80% within 15minutes and the acceptance criteria of innovator brand approved in USFDA.	Firm claimed that they submitted the updated documents but the submitted analytical procedure again specified the same acceptance i.e. criteria NLT 80% within 45 minutes.
8.	3.2.R.1.1	Justify for taking the strength of tablet with HCl factor for calculation of dispensed quantity of powder as revealed from the batch manufacturing record since you have taken the potency of drug substance without HCl on as is basis.	Firm replied that In trial BMR we have taken the potency of drug substance with HCl on as is basis, the potency given in COA is on as is basis with HCl.

Decision: Deferred for submission of following shortcomings:

- **Submit the revised acceptance criteria of dissolution in line with innovator product along with performance report of dissolution testing of stability batches in accordance with the revised acceptance criteria.**
- **Pharmaceutical equivalence report including all the quality test as per the revised specification of finished product.**

911.	Name, address of Applicant / Marketing Authorization Holder	Name: Pharmedic Laboratories (Pvt.) Ltd. Address: 16km Multan Road, Lahore-Pakistan

	The proposed proprietary name / brand name	Axaban 2.5mg Tablet
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated tablet contains: Apixaban……2.5mg
	Pharmaceutical form of applied drug	Pink colored, round shaped, biconvex film coated tablets with both sides plain.
	Pharmacotherapeutic Group of (API)	Antithrombotic agents, direct factor Xa inhibitors
	Reference to Finished product specifications	Innovator Specification
	Proposed Pack size	10's , 14's and 20's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Bristol-Myers Squibb Company, USA (USFDA Approved) Bristol-Myers Squibb/Pfizer EEIG, Ireland
	For generic drugs (me-too status)	Elixaban Tablet 2.5mg (Reg.no. 105238) of M/s. Martin Dow Limited Karachi
	GMP status of the Finished product manufacturer	Last GMP was granted on 09/06/2020 GMP is in Renewal Process
	Name and address of API manufacturer.	Name: Jiangsu Yongan Pharmaceuticals Co., Ltd Address: No. 18, 237 Provincial Road, Economic Development zone, Huaian, Jiangsu, China.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, Test for Impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies

		of drug substance
	Stability studies	Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 18 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: (23111001,2311102,23111101)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand leader that is Eliquis 2.5mg Tablet by Pfizer Bristol-Myers Squibb/Pfizer EEIG Dublin Ireland. by performing quality tests (Identification, Assay, Dissolution, Uniformity of dosage form). CDP has been performed against the same brand that is Eliquis 2.5mg Tablet by Bristol-Myers Squibb/Pfizer EEIG Dublin Ireland……. in Acid media (pH 1.0-1.2) & Phosphate Buffer (pH 6.8). The values for f1 and f2 are in the acceptable range.
	Analytical method validation/verification of product	Method verification studies have submitted including Specificity, linearity, accuracy, precision (repeatability and Intermediate), Limit of Detection, Limit of Quantification, Robustness.

STABILITY STUDY DATA			
Manufacturer of API	Jiangsu Yongan Pharmaceuticals Co., Ltd		
API Lot No.	APB-202004002		
Description of Pack (Container closure system)	Alu-PVC blister packed in unit carton (10's , 14's and 20's)		
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 3 months Accelerated: 3 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6(Months)

Manufacturing Date	10-2021	10-2021	10-2021
Date of Initiation	10-2021	10-2021	10-2021
No. of Batches	03		

Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. NIL issued by Huai'an Pharmaceutical Industry Association valid till 14/01/2024.

3.	Documents for the procurement of API with approval from DRAP (in case of import).	• Copy of letter No.10927/2020DRAP-AD (I&E) dated 07/08/2020 is submitted wherein the permission to import Apixaban for the purpose of test/analysis and stability studies is granted.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator:

S.no.	Sections	Observations/Deficiencies/ Short-comings
1.	3.2. S.4.3	Provide analytical Method verification studies including specificity, accuracy and repeatability parameter of drug substance performed by the Drug Product manufacturer.
2.	3.2.P.2.2.1	In compliance of notification no. 14-1/2022-PEC dated 16th January,2023 issued by DRAP, submit the image/picture/snapshot of innovator /reference/comparator pack against which Pharmaceutical equivalence/Comparative dissolution profile studies have been performed.
3.	3.2.P.8	Submit the remaining stability data of drug product ,since you have submitted only three month stability data.

Decision of 326th meeting of Registration Board:

Decision: Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.

Remarks OF Evaluator:

S.no.	Sections	Observations/Deficiencies/ Short-comings	Response of the Firm
4.	3.2. S.4.3	Provide analytical Method verification studies including specificity, accuracy and repeatability parameter of drug substance performed by the Drug Product manufacturer.	Firm submit the analytical verification report of drug substance performed by drug product manufacturer.
5.	3.2.P.2.2.1	In compliance of notification no. 14-1/2022-PEC dated 16th January,2023 issued by DRAP, submit the image/picture/snapshot of innovator /reference/comparator pack against which Pharmaceutical equivalence/Comparative dissolution profile studies have been performed.	Firm submitted the snapshot of innovator product against which Pharmaceutical equivalence/Comparative dissolution profile studies have been performed.
6.	3.2.P.8	Submit the remaining stability data of drug product ,since you have submitted only three month stability data.	Submit the stability data till 12 month.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**

• **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Remarks OF Evaluator:

S.no.	Sections	Observations/Deficiencies/ Short-comings
1.	3.2. S.4.1	Justify for not including the test of parcticle size distribution, palladium test and solid state form test in the specification of drug substance by drug substance manufacturer, since these tests are included in the specification of drug substance of innovator product.
2.	3.2.S.4.1-3.2.S.4.2	• Submit copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by the drug product manufacturer as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required". Since you have only submitted the specification and analytical procedure by drug substance manufacturer. • Submit detailed analytical procedure of drug substance by drug substance manufacturer, since the submitted procedure seems incomplete or only refer the general chapters of USP.
3.	3.2.S.4.3	• Justify for performing validation study of assay procedure which is different from the assay method by drug substance manufacturer given in section 3.2.S.4.2. • Further drug substance manufacturer used RID detector in the HPLC system for assay while the submitted chromatogram of validation studies reflect that the assay has performed by setting the wavelength of detector at 210nm, Justify for using the different detector from that specified by drug substance manufacturer.
4.	3.2.S.5	COA of primary/secondary reference standard including source and lot no. is required.

5.	3.2.S.7	According to the review literature of innovator brand storage condition of drug substance is 5°C±3°C with the retest period of 36months then justify the testing condition of given stability data of drug substance i.e. 30±2°C RH 65±5% & 40±2°C RH 75±5%.
6.	3.2.P.2.2.1	• Clarification shall be submitted for the reported results of CDP studies without the aid of surfactant in the dissolution mediums while referring to the innovator drug product literature wherein the drug substances have been reported as BCS Class II drug substances and the recommended dissolution medium contains surfactant polysorbate 80. • In compliance of notification no. 14-1/2022-PEC dated 16th January,2023 issued by DRAP, submit the image/picture/snapshot of innovator /reference/comparator pack against which Pharmaceutical equivalence/Comparative dissolution profile studies have been performed.
7.	3.2.P.5.2	Clarification is required for not using reference standard/working standard for the preparation of standard solution as reflects from the given analytical procedures while performing the assay and dissolution of drug product.
8.	3.2.P.5.3	Justify for not performing the validation study on the same assay procedure which is given in section 3.2.P.5.2, specifically with reference to the preparation of both standard and sample preparation. Further , analytical method validation reports reflects that the assay procedure which has been validated is different from assay procedure given in section 3.2.P.5.2 and also not similar to the method specified in AMV protocol.
9.	3.2.P.5.4	Justify for not performing the content uniformity test while finished product analysis of drug product , since the test is included in the specification of finished drug product.
10.	3.2.P.8	• Submit the updated stability data of drug product, since you have submitted only three-month stability data. • Submit documents for the procurement of API including copy of commercial invoice attested by AD (I&E) DRAP. • Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.
11.	2.3.R.1.1	Justify for not adjusting the water content in the dispensing weight of API since the assay results are achieved on anhydrous as evident from the COA of API.

Decision of 327th meeting of Registration Board:
Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.

Remarks OF Evaluator:

S.no.	Sections	Observations/Deficiencies/ Short-comings	Response of the Firm
1.	3.2. S.4.1	Justify for not including the test of particle size distribution, palladium test and solid state form test in the specification of drug substance by drug substance manufacturer, since these tests are included in the specification of drug substance of innovator product.	Firm forward the response of API supplier i.e. Reply from API Manufacturer: For PSD due to different customer has various requirements we did not include it in DMF. about palladium test or solid-state form test, it's not a regular item for an API supplier. We have no method and we did not study yet. Further the substance is of In-house standards and due to international patent rules, we can't use same innovator's specifications. However, Physicochemical characteristics of the active substance that impact the quality of the finished product are particle size distribution which plays a critical role in the content uniformity and dissolution of the tablets. https://www.ema.europa.eu/en/documents/assessmentreport/ocaliva-epar-public-assessment-report_en.pdf

			However, particle size distribution of active substance has not been controlled /performed either by Drug substance or Drug product manufacturer.
2.	3.2.S.4.1	Submit copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by the drug product manufacturer as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required". Since you have only submitted the specification and analytical procedure by drug substance manufacturer.	Firm submit the specifications and analytical procedure of drug substance by both drug substance manufacturer and drug product manufacturer.
3.	3.2.S.4.3	Justify for performing validation study of assay procedure which is different from the assay method by drug substance manufacturer given in section 3.2.S.4.2.	Firm has not submitted the reply of this response.
4.	3.2.S.4.3	Further drug substance manufacturer used RID detector in the HPLC system for assay while the submitted chromatogram of validation studies reflect that the assay has performed by setting the wavelength of detector at 210nm, Justify for using the different detector from that specified by drug substance manufacturer.	HPLC method used for the API is literature based and validated. UV detector is used as it is easily available. Method validation has been performed to justify the results.
5.	3.2.S.5	COA of primary/secondary reference standard including source and lot no. is required.	Submitted
6.	3.2.S.7	According to the review literature of innovator brand storage condition of drug substance is 5°C±3°C with the retest period of 36months then justify the	Firm submitted the real time stability data of drug substance performed at condition 5°C±3°C till 24 months.

		testing condition of given stability data of drug substance i.e. 30±2°C RH 65±5% & 40±2°C RH 75±5%.	
7.	3.2.P.2.2.1	Clarification shall be submitted for the reported results of CDP studies without the aid of surfactant in the dissolution mediums while referring to the innovator drug product literature wherein the drug substances have been reported as BCS Class II drug substances and the recommended dissolution medium contains surfactant polysorbate 80.	Firm replied that According to FDA recommended media for the CDP are pH 1.2, 4.5 and 6.8 buffer. These do not contain any surfactant. While testing the finished product, polysorbate 80 has been used as surfactant in the dissolution medium. As per USP and FDA, medium used for CDP should not contain any surfactant. Because CDP is in-vitro bioequivalence comparison and not a performance test of finished product. Given test method contains medium consist of polysorbate 80. Furthermore, the dissolution acceptance criteria of applied formulation is NLT 75% (Q) within 45 minutes while the innovator product approved in USFDA claimed NLT (Q) within 15 minutes. Firm further clarified that the dissolution time of their applied product is 15 minutes it was mentioned in testing method,however at one place it was erroneously mentioned 45 minutes but their all provided data is according to 15 minutes.
8.	3.2.P.2.2.1	In compliance of notification no. 14-1/2022-PEC dated 16th January,2023 issued by DRAP, submit the image/picture/snapshot of innovator /reference/comparator pack against which Pharmaceutical equivalence/Comparative dissolution profile studies have been performed.	Submitted
9.	3.2.P.5.3	Justify for not performing the validation study on the same assay procedure which is given in section 3.2.P.5.2, specifically with reference to the preparation of both standard and sample preparation. Further , analytical method validation reports reflects that the assay procedure which has been validated is different from assay procedure given in section 3.2.P.5.2 and also not similar to the method specified in AMV protocol.	Firm replied that Method used for the analysis for the finished product is same as AMV protocol. Test method has been revised as per actual performance method and attached.
10	3.2.P.5.4	Justify for not performing the content uniformity test while finished product	Firm replied that "Content uniformity has been performed as per finished test method and part of our record. Shared COA is of 0th month that's why we have not included Content

		analysis of drug product , since the test is included in the specification of finished drug product.	uniformity test. Now revised COA and already performed data of 0th month has been shared with you".
11	3.2.P.8	Submit the updated stability data of drug product, since you have submitted only three-month stability data.	
12	3.2.P.8	Submit documents for the procurement of API including copy of commercial invoice attested by AD (I&E) DRAP.	Firm submit the copy of Form-6 issued dated 13-oct-2022 and submit commercial invoice which is not attested by DRAP.
13	3.2.P.8	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm submitted the copy of GMP certificate of M/s. JARI Pharmaceutical co. Ltd. No.18 Zhenhua Road, Lianyungang, China which is valid till 29-11-2024.
14	2.3.R.1.1	Justify for not adjusting the water content in the dispensing weight of API since the assay results are achieved on anhydrous as evident from the COA of API.	Firm replied that the assay result of the API is achieved on anhydrous basis which indicated an assay result of 100.91%, in this case adjusting the dispensing weight of the API based on its water content would not be necessary, as the assay result is already indicative of the potency of the anhydrous material. Further Firm submit a commitment letter that they will adjust the water content in the dispensed quantity of API while manufacturing of commercial batches.

Decision: Approved with Innovator's Specifications. Firm shall submit 7,500/- fee for revision of specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021 before issuance of registration letter.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

916.	Name, address of Applicant / Marketing Authorization Holder	M/s Don Valley Pharmaceuticals Private Limited 31km Main Ferozepur Road Lahore

	Dy. No. and date of submission	Dy. No. -6676 dated: 9th March 2023
	Details of fee submitted	PKR 30,000/-: dated 09/02/2023
	The proposed proprietary name / brand	Ocalidon 10mg Tablet

	name	
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated tablet contains: Obeticholic Acid…….10mg
	Pharmaceutical form of applied drug	Red colored, Round biconvex shaped, without any score, Film coated oral tablet
	Pharmacotherapeutic Group of (API)	Farnesoid X receptor agonists
	Reference to Finished product specifications	In-house
	Proposed Pack size	3×10's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Ocaliva 10mg tablet by M/s Intercept Pharma Limited EMA Approved.
	For generic drugs (me-too status)	Abeticholic 10mg Tablet by M/s Dyson Research Laboratories Pvt. Ltd., Reg. No. 109522
	GMP status of the Finished product manufacturer	Firm has submitted GMP certificate issued on dated 06-08-2019. Section approval letter issued on 05.11.2019
	Name and address of API manufacturer.	M/s Jari Pharmaceutical Co., Ltd. 18, Zhenhua Road, Lianyungang, Jiangsu Province China.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 24 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: (20171001, 20171101, 20171102)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the Brand Leader that is Ocaliva 10mg tablet by Intercept Pharma International Limited, Ireland (Batch no. CE00024E) by performing quality tests (Identification, Assay, Dissolution, Uniformity of dosage form).

		CDP has been performed against the same brand that is Ocaliva 10mg tablet by Intercept Pharma International Limited, Ireland (Batch no. CE00024E) in Acid media (pH 1.0-1.2) & Phosphate Buffer (pH 6.8). The values for f1 and f2 are in the acceptable range.		
	Analytical method validation/verification of product	Method validation studies have submitted including linearity, range, accuracy, precision, specificity.

Remarks OF Evaluator:

S.no.	Sections	Observations/Deficiencies/ Short-comings
1.	3.2. S.4.1	Justify for not including the test of parcticle size distribution, palladium test and solid state form test in the specification of drug substance by drug substance manufacturer, since these tests are included in the specification of drug substance of innovator product.
2.	3.2.S.4.1-3.2.S.4.2	• Submit copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by the drug product manufacturer as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required". Since you have only submitted the specification and analytical procedure by drug substance manufacturer. • Submit detailed analytical procedure of drug substance by drug substance manufacturer, since the submitted procedure seems incomplete or only refer the general chapters of USP.
3.	3.2.S.4.3	• Justify for performing validation study of assay procedure which is different from the assay method by drug substance manufacturer given in section 3.2. S.4.2. • Further drug substance manufacturer used RID detector in the HPLC system for assay while the submitted chromatogram of validation studies reflect that the assay has performed by setting the wavelength of detector at 210nm, Justify for using the different detector from that specified by drug substance manufacturer.
4.	3.2.S.5	COA of primary/secondary reference standard including source and lot no. is required.
5.	3.2.S.7	According to the review literature of innovator brand storage condition of drug substance is 5°C±3°C with the retest period of 36months then justify the testing condition of given stability data of drug substance i.e. 30±2°C RH 65±5% & 40±2°C RH 75±5%.
6.	3.2.P.2.2.1	• Clarification shall be submitted for the reported results of CDP studies without the aid of surfactant in the dissolution mediums while referring to the innovator drug product literature wherein the drug substances have been reported as BCS Class II drug substances and the recommended dissolution medium contains surfactant polysorbate 80. • In compliance of notification no. 14-1/2022-PEC dated 16th January,2023 issued by DRAP, submit the image/picture/snapshot of innovator /reference/comparator pack against which Pharmaceutical equivalence/Comparative dissolution profile studies have been performed.
7.	3.2.P.5.2	Clarification is required for not using reference standard/working standard for the preparation of standard solution as reflects from the given analytical procedures while performing the assay and dissolution of drug product.
8.	3.2.P.5.3	Justify for not performing the validation study on the same assay procedure which is given in section 3.2.P.5.2, specifically with reference to the preparation of both standard and sample preparation. Further , analytical method validation reports reflects that the assay procedure which has been validated is different from assay procedure given in section 3.2.P.5.2 and also not similar to the method specified in AMV protocol.
9.	3.2.P.5.4	Justify for not performing the content uniformity test while finished product analysis of drug product , since the test is included in the specification of finished drug product.

10.	3.2.P.8	• Submit the updated stability data of drug product, since you have submitted only three-month stability data. • Submit documents for the procurement of API including copy of commercial invoice attested by AD (I&E) DRAP. • Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.
11.	2.3.R.1.1	Justify for not adjusting the water content in the dispensing weight of API since the assay results are achieved on anhydrous as evident from the COA of API.

Decision of 327th meeting of Registration Board:
Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.

S.no.	Sections	Observations/Deficiencies/ Short-comings	Response of the Firm
1.	3.2. S.4.1	Justify for not including the test of particle size distribution, palladium test and solid state form test in the specification of drug substance by drug substance manufacturer, since these tests are included in the specification of drug substance of innovator product.	Firm forward the response of API supplier i.e. Reply from API Manufacturer: For PSD due to different customer has various requirements we did not include it in DMF. about palladium test or solid-state form test, it's not a regular item for an API supplier. We have no method and we did not study yet. Further the substance is of In-house standards and due to international patent rules, we can't use same innovator's specifications. However, Physicochemical characteristics of the active substance that impact the quality of the finished product are particle size distribution which plays a critical role in the content uniformity and dissolution of the tablets. https://www.ema.europa.eu/en/documents/assessmentreport/ocaliva-epar-public-assessment-report_en.pdf However, particle size distribution of active substance has not been controlled /performed either by Drug substance or Drug product manufacturer.
2.	3.2.S.4.1	Submit copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by the drug product manufacturer as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required". Since you have only submitted the specification and analytical procedure by drug substance manufacturer.	Firm submit the specifications and analytical procedure of drug substance by both drug substance manufacturer and drug product manufacturer.

3.	3.2.S.4.3	Justify for performing validation study of assay procedure which is different from the assay method by drug substance manufacturer given in section 3.2.S.4.2.	Firm has not submitted the reply of this response.
4.	3.2.S.4.3	Further drug substance manufacturer used RID detector in the HPLC system for assay while the submitted chromatogram of validation studies reflect that the assay has performed by setting the wavelength of detector at 210nm, Justify for using the different detector from that specified by drug substance manufacturer.	HPLC method used for the API is literature based and validated. UV detector is used as it is easily available. Method validation has been performed to justify the results.
5.	3.2.S.5	COA of primary/secondary reference standard including source and lot no. is required.	Submitted
6.	3.2.S.7	According to the review literature of innovator brand storage condition of drug substance is 5°C±3°C with the retest period of 36months then justify the testing condition of given stability data of drug substance i.e. 30±2°C RH 65±5% & 40±2°C RH 75±5%.	Firm submitted the real time stability data of drug substance performed at condition 5°C±3°C till 24 months.
7.	3.2.P.2.2.1	Clarification shall be submitted for the reported results of CDP studies without the aid of surfactant in the dissolution mediums while referring to the innovator drug product literature wherein the drug substances have been reported as BCS Class II drug substances and the recommended dissolution medium contains surfactant polysorbate 80.	Firm replied that According to FDA recommended media for the CDP are pH 1.2, 4.5 and 6.8 buffer. These do not contain any surfactant. While testing the finished product, polysorbate 80 has been used as surfactant in the dissolution medium. As per USP and FDA, medium used for CDP should not contain any surfactant. Because CDP is in-vitro bioequivalence comparison and not a performance test of finished product. Given test method contains medium consist of polysorbate 80. Furthermore, the dissolution acceptance criteria of applied formulation is NLT 75% (Q) within 45 minutes while the innovator product approved in USFDA claimed NLT (Q) within 15 minutes. Firm further clarified that the dissolution time of their applied product is 15 minutes it was mentioned in testing method,however at one place it was erroneously mentioned 45 minutes but their all provided data is according to 15 minutes.
8.	3.2.P.2.2.1	In compliance of notification no. 14-1/2022-	Submitted

		PEC dated 16th January,2023 issued by DRAP, submit the image/picture/snapshot of innovator /reference/comparator pack against which Pharmaceutical equivalence/Comparative dissolution profile studies have been performed.	
9.	3.2.P.5.3	Justify for not performing the validation study on the same assay procedure which is given in section 3.2.P.5.2, specifically with reference to the preparation of both standard and sample preparation. Further , analytical method validation reports reflects that the assay procedure which has been validated is different from assay procedure given in section 3.2.P.5.2 and also not similar to the method specified in AMV protocol.	Firm replied that Method used for the analysis for the finished product is same as AMV protocol. Test method has been revised as per actual performance method and attached.
10	3.2.P.5.4	Justify for not performing the content uniformity test while finished product analysis of drug product , since the test is included in the specification of finished drug product.	Firm replied that "Content uniformity has been performed as per finished test method and part of our record. Shared COA is of 0th month that's why we have not included Content uniformity test. Now revised COA and already performed data of 0th month has been shared with you".
11	3.2.P.8	Submit the updated stability data of drug product, since you have submitted only three-month stability data.	
12	3.2.P.8	Submit documents for the procurement of API including copy of commercial invoice attested by AD (I&E) DRAP.	Firm submit the copy of Form-6 issued dated 13-oct-2022 and submit commercial invoice which is not attested by DRAP.
13	3.2.P.8	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm submitted the copy of GMP certificate of M/s. JARI Pharmaceutical co. Ltd. No.18 Zhenhua Road, Lianyungang, China which is valid till 29-11-2024.
14	2.3.R.1.1	Justify for not adjusting the water content in the dispensing weight of API since the assay results are achieved on anhydrous as evident from the COA of API.	Firm replied that the assay result of the API is achieved on anhydrous basis which indicated an assay result of 100.91%, in this case adjusting the dispensing weight of the API based on its water content would not be necessary, as the assay result is already indicative of the potency of the anhydrous material.

			Further Firm submit a commitment letter that they will adjust the water content in the dispensed quantity of API while manufacturing of commercial batches.

Decision: Approved with Innovator's Specifications. Firm shall submit 7,500/- fee for revision of specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021 before issuance of registration letter.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Remarks of Evaluator:

- CAS NO. of starting material used in the applied product is 229016-73-3 i.e. sterile Ceftaroline fosamil monoacetate
- CAS no. of starting material used in the manufacturing of innovator brand is 866021-48-9 i.e. Ceftaroline Fosamil monoacetate monohydrate with the statement that Ceftaroline Fosamil is not stable in the anhydrous form

S.no.	Observations/Deficiencies/ Short-comings	Reply of the Firm
1.	According to the review literature of innovator brand salt form of drug substance is Ceftaroline fosamil acetic acid solvate monohydrate, while the drug substance used in the applied drug product is Ceftaroline fosamil monoacetate as per the information submitted in substance part. Justification is required for variation in the drug substance against the innovator product.	Firm replied that the drug substance used in the applied drug product is same as used by the innovator brand i.e. Ceftaroline fosamil monoacetate monohydrate. However, the CAS number of starting material mentioned in the documents of drug substance manufacturer is different from the CAS no. specified in the review documents of innovator brands.
2.	Please provide complete composition of drug product, specifiy the composition of ceftaroline fosamil monoacetone and L-arginine separately.	Firm replied that Ceftaroline fosamil and arginine are mixed in ratio of 1:0.66 so as per ratio quantity used for injection is Ceftaroline fosamil monoacetate monohydrate eq. to ceftaroline fosamil…400mg Arginine eq. to….264mg
3.	As per the assay results of pharmaceutical equivalence report ceftaroline is quantify instead of ceftaroline fosamil, justification is required in this regard.	Firm replied that it was a typographical error and in pharmaceutical equivalence report in assay ceftaroline fosamil was quantified.

4.	• Justify for not including the test of Constitution Time, Content Uniformity (by Assay) and extractable volume test in the release specification of drug product, since these test are included in the specification of innovator brand. • Elaborate the calculation formula for determination of potency of ceftaroline fosamil.	Firm replied that product is dry powder injection so extractable volume is not applicable and content uniformity test is applicable at the blending stage. However, the test of Constitution Time, Content Uniformity (by Assay) and extractable volume test is included in the release specification of innovator product. Firm submitted the following calculation formula: Assay = 99.2% (on anhydrous, acetic acid & arginine free basis) Potency = {(100-water-arginine-acetic acid)/100}x assay
5.	Submit the remaining stability data of drug product ,since you have submitted only three month stability data.	Submitted
6.	Justify the dispensed quantity of ceftaroline fosamil injection comparing the potency of active (ceftaroline fosamil).	Filled weight = (Label claim/Potency) x 100 Ceflaro 400mg Injection= (400/56.8416)x100= 703.7mg per vial.

Decision of 324th meeting of Registration Board:

Deferred for scientific justification for the drug substance used for the formulation of the applied product since as evident from the submitted data drug substance used in applied formulation i.e., Ceftaroline fosamil monoacetate (229016-73-3) is different from that used in the innovator drug product i.e., Ceftaroline fosamil monoacetate monohydrate (866021-48-9).

Response of the Firm:

Following points are submitted for your consideration please:

1. Ceftaroline fosamil as starting material:
    a. Ceftaroline fosamil monoacetate monohydrate is not a starting material rather it is formulated through chemical transformation of the starting material "Ceftaroline fosamil". The CAS number (229016-73-3) mentioned in the DMF attributes to the starting material i.e., "Ceftaroline fosamil" and the same has also been mentioned in the US FDA Chemistry review document for innovator product. While the CAS no. 866021-48-9 is for the intermediate product Ceftaroline fosamil monoacetate monohydrate, formulated subsequently.

16. CHEMICAL NAME, STRUCTURAL FORMULA, MOLECULAR FORMULA, MOLECULAR WEIGHT:

A) CAS : 229016-73-3

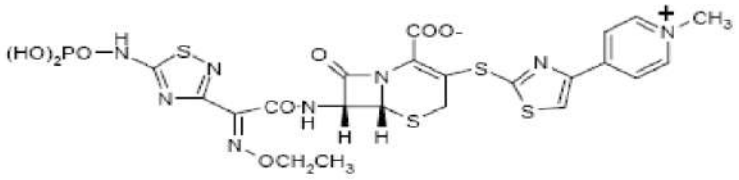
USAN: Ceftaroline Fosamil

(6R,7R)-7-{(2Z)-2-(ethoxyimino)-2-[5-(phosphonoamino)-1,2,4-thiadiazol-3-yl]acetamido}-3-{[4-(1-methylpyridin-1-ium-4-yl)-1,3-thiazol-2-yl]sulfanyl}-8-oxo-5-thia-1-azabicyclo[4.2.0]oct-2-ene-2-carboxylate

Molecular weight 684.68

Formula $C_{26}H_{21}N_8O_8PS_4$

Structural Formula:



2. ~~Revised USAN nomenclature for the Ceftaroline fosamil monoacetate:~~

- Please refer to the attached extract (Annexure-I) from US FDA Chemistry review document for innovator product i.e., "Teflaro" Injection which states as under:
    - "The title of the USAN monograph for this drug substance is Ceftaroline fosamil according to the current USAN dictionary online (8/30/10). The USAN monograph currently lists as

the chemical name the monoacetate monohydrate (Structure B). The Ceftaroline Fosamil USAN monograph may be changed in the future to show instead the chemical name and Structure A".

- Structure A refers to the title and molecular structure of "Ceftaroline Fosamil" having CAS no. 229016-73-3.
- Also in the most recent editions of USAN (United State Adopted Name) the nomenclature for Ceftaroline fosamil acetate has been revised and is adopted as "Ceftaroline Fosamil" with CAS no. 229016-73-3.
- Based upon above cited facts the nomenclature and CAS number 229016-73-3 for Ceftaroline fosamil has been mentioned in the submitted DMF from Qilu antibiotics.

3. Monohydrate monoacetate form of Ceftaroline Fosamil:
   - As submitted in above points that Ceftaroline fosamil monoacetate monohydrate is formulated as intermediate between starting material "Ceftaroline fosamil" and "Sterile Ceftaroline fosamil with arginine". Qilu antibiotics also process the starting material in the same manner as per innovator product wherein Ceftaroline fosamil is converted to Ceftaroline Fosamil monoacetate solvate (hydrate form) through reaction with acetic acid and glacial WFI (extract of DMF presented below). It is pertinent to mention that the monoacetate form is a solvate hydrate wherein water molecule is available as water of crystallization and hence it was not separately mentioned in the nomenclature of the Intermediate form, whereas it is evident form the Manufacturing outline and Drug substance specifications that "Ceftaroline fosamil monoacetate" contains water.

   - The limit of water content of $\leq$ 3.0% also makes it evident that water content equivalent to about monohydrate form is available in the drug substance.

4. Approval of DMF of Qilu antibiotics by US FDA for the ANDA applications:
   a. It is pertinent to mention that the same DMF of same drug susbatcne titled as "STERILE CEFTAROLINE FOSAMIL WITH ARGININE" has been approved by US FDA as Type –II DMF that has passed the completeness assessment and are available for reference by ANDAs, meaning by that the submitted DMF is acceptable to be presented along with any ANDA (generic application) to be filed for the "Ceftaroline Fosamil Injection".
   DMF No.: 28245.
   Status: Active.
   Ref: Types of Drug Master Files (DMFs) | FDA

Decision: Approved with Innovator's Specifications. Firm shall submit 7,500/- fee for revision of specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021 before issuance of registration letter.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator:

- CAS NO. of starting material used in the applied product is 229016-73-3 i.e. sterile ceftaroline fosamil monoacetate
- CAS no. of starting material used in the manufacturing of innovator brand is 866021-48-9 i.e. Ceftaroline Fosamil monoacetate monohydrate with the statement that Ceftaroline Fosamil is not stable in the anhydrous form

S.no.	Observations/Deficiencies/ Short-comings	Reply of the Firm
1.	Submit differential fee for the registration of applied new drug product as per the notification for revision of fee vide SRO No. F.7-11/2012-B&A/DRA dated 7th May 2021.	Firm submit Rs. 45,000/- differential fee vide Challan No.786519557 dated: 09-01-2023
2.	According to the review literature of innovator brand salt form of drug substance is ceftaroline fosamil acetic acid solvate monohydrate, while the drug substance used in the applied drug product is ceftaroline fosamil monoacetate as per the information submitted in substance part.Justification is required for variation in the drug substance against the innovator product.	Firm replied that "Molecular formula and structure submitted by the manufacturer (Qilu Antibiotics Pharmaceutical Co., Ltd. China) did not reflect the solvate hydrate. The reason being that they are using USAN (synonym) chemical name of the molecule as the title of the USAN monograph for this drug substance is Ceftaroline fosamil according to the current USAN dictionary. The USAN monograph currently lists this as monoacetate monohydrate as the chemical name. However, the CAS number of starting material mentioned in the documents of drug substance manufacturer is different from the CAS no. specified in the review documents of innovator brands.
3.	Submit stability data of drug substance as per zone-IV-A condition OR In case where the real time stability data of drug substance is not conducted at zone IV-A conditions (e.g 30°C ± 2°C/65% RH ± 5% RH), the drug product manufacturer shall have to submit long term stability studies data of the product for 6 months along with degradation studies in the finished pharmaceutical product.	Firm in their reply submit the validation report of forced degradation studies while the Registration Board in its decision stated that the drug product manufacturer shall have to submit long term stability studies data of the product for 6 months along with degradation studies in the finished pharmaceutical product.
4.	• Justify for not including the test of Constitution Time and extractable volume test in the release specification of drug product, since these test are	Firm replied that Since we do not have access to innovation's specification, therefore we have performed universal tests (related to dry powder injection) and some specific tests on the finished product. However, considering the importance of

	included in the specification of innovator brand. •	these two tests (constitution time & extractable volume), we have performed the tests on retention samples of trial batches of Daytef 400 mg Injection to know the compliance level of our product in comparison with the innovator's product. The results are attached. We have also included these tests in the following documents: Specification and Testing Methods of Daytef 400 mg Injection • Stability Protocol for Commercial batches • Certificate of Analysis format for Finished Product Copies of revised documents, as above, enclosed for your reference.
5.	Elaborate the calculation formula for determination of potency of ceftaroline fosamil.	Firm submitted the following calculation formula: Calculation formula as provided in Doc # API/STM-093 (Raw Material Specification and Control methods): % of Ceftaroline Fosamil in the sample=(ru/rs) x (Cs/Cu) x P Where: ru= Peak area of sample solution rs= Peak area of standard solution Cu= Concentration of sample solution in mg/ml = Weight of sample x 10 / Dilution (100 ml) 100 Cs= Concentration of working standard in mg/ml = Weight of standard (Ceftaroline fosamil) / Dilution (100 ml) P= Potency of Ceftaroline Fosamil working standard = Taken from the respective CoA from the supplier (ru/rs) = Peak area of Sample / Peak area of Standard
6.	Justify, how ceftaroline fosamil separately eluted using the reference standard of ceftaroline fosamil with arginine.	Firm replied that "Prior to analyzing API mix (Ceftaroline fosamil monoacetate monohydrate + L-arginine) we had run working standard of Ceftaroline fosamil and Reference standard of L-Arginine separately, following exactly the same method as to be used for API mix analysis, in order to identify the peaks and to ensure proper resolution (Certificate of Analysis of both these standards are enclosed in Annexure 3). As you would see from the chromatograms of API mix and the reference standard; the peak due to Ceftaroline fosamil and L-arginine are completely separate and reproducible.
7.	Submit the remaining stability data of drug product ,since you have submitted only three month stability data.	Firm submit the stability data of drug product till 6 month.
8.	Justify the dispensed quantity of ceftaroline fosamil injection with respect to the potency of active.	Firm replied that Ceftaroline fosamil with L-arginine is received as sterile powder, in ready to fill form, therefore the sealed container, of known

net weight, is dispensed as such to maintain the sterility. The potency of ceftaroline fosamil is adjusted while calculating the fill weight of powder in vials.

% Potency of Ceftaroline fosamil (as monoacetate, monohydrate) = _____%

Factor (Ceftaroline fosamil to Ceftaroline fosamil monoacetate monohydrate) = 1.114*

Label Claim = Ceftaroline fosamil 400 mg (as Ceftaroline fosamil monoacetate monohydrate) and 264 mg L-arginine per vial

Target Fill Weight (Ceftaroline fosamil monoacetate monohydrate)

$$= \frac{\text{Label claim x F x 100}}{\text{\% Potency of Ceftaroline fosamil}}$$

$$= \frac{400 \text{ x } 1.114 \text{ x } 100}{\text{\% Potency of Ceftaroline fosamil}}$$

$$= \_\_\_\_\_ \text{ mg/vial (A)}$$

Total Fill Weight (Ceftaroline fosamil monoacetate monohydrate + L-arginine)

= A + 264 mg

= _____ mg / vial

* calculated from the molecular weights of Ceftaroline fosamil and Ceftaroline fosamil monoacetate monohydrate:

Molecular weight of ceftaroline fosamil monoacetate monohydrate =762.8

Molecular weight of ceftaroline fosamil = 684.7

or

1 mg of ceftaroline fosamil = 1.114 mg of ceftaroline fosamil monoacetate monohydrate

Decision of 324th meeting of Registration Board:

Deferred for scientific justification for the drug substance used for the formulation of the applied product since as evident from the submitted data drug substance used in applied formulation i.e., Ceftaroline fosamil monoacetate (229016-73-3) is different from that used in the innovator drug product i.e., Ceftaroline fosamil monoacetate monohydrate (866021-48-9).

Response of the Firm:

Following points are submitted for your consideration please:

1. Ceftaroline fosamil as starting material:
    a. Ceftaroline fosamil monoacetate monohydrate is not a starting material rather it is formulated through chemical transformation of the starting material "Ceftaroline fosamil". The CAS number (229016-73-3) mentioned in the DMF attributes to the starting material i.e., "Ceftaroline fosamil" and the same has also been mentioned in the US FDA Chemistry review document for innovator product. While the CAS no. 866021-48-9 is for the intermediate product Ceftaroline fosamil monoacetate monohydrate, formulated subsequently.

16. CHEMICAL NAME, STRUCTURAL FORMULA, MOLECULAR FORMULA, MOLECULAR WEIGHT:

A) CAS : 229016-73-3

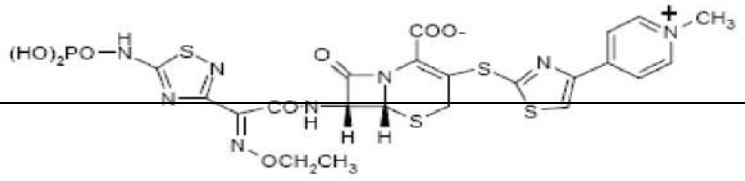
USAN: Ceftaroline Fosamil

(6R,7R)-7-{(2Z)-2-(ethoxyimino)-2-[5-(phosphonoamino)-1,2,4-thiadiazol-3-yl]acetamido}-3-{[4-(1-methylpyridin-1-ium-4-yl)-1,3-thiazol-2-yl]sulfanyl}-8-oxo-5-thia-1-azabicyclo[4.2.0]oct-2-ene-2-carboxylate

Molecular weight 684.68

Formula $C_{26}H_{21}N_8O_8PS_4$

Structural Formula:



Minut

2. Revised USAN nomenclature for the Ceftaroline fosamil monoacetate:

- Please refer to the attached extract (Annexure-I) from US FDA Chemistry review document for innovator product i.e., "Teflaro" Injection which states as under:
    - "The title of the USAN monograph for this drug substance is Ceftaroline fosamil according to the current USAN dictionary online (8/30/10). The USAN monograph currently lists as the chemical name the monoacetate monohydrate (Structure B). The Ceftaroline Fosamil USAN monograph may be changed in the future to show instead the chemical name and Structure A".
- Structure A refers to the title and molecular structure of "Ceftaroline Fosamil" having CAS no. 229016-73-3.
- Also in the most recent editions of USAN (United State Adopted Name) the nomenclature for Ceftaroline fosamil acetate has been revised and is adopted as "Ceftaroline Fosamil" with CAS no. 229016-73-3.
- Based upon above cited facts the nomenclature and CAS number 229016-73-3 for Ceftaroline fosamil has been mentioned in the submitted DMF from Qilu antibiotics.

3. Monohydrate monoacetate form of Ceftaroline Fosamil:
    - As submitted in above points that Ceftaroline fosamil monoacetate monohydrate is formulated as intermediate between starting material "Ceftaroline fosamil" and "Sterile Ceftaroline fosamil with arginine". Qilu antibiotics also process the starting material in the same manner as per innovator product wherein Ceftaroline fosamil is converted to Ceftaroline Fosamil monoacetate solvate (hydrate form) through reaction with acetic acid and glacial WFI (extract of DMF presented below). It is pertinent to mention that the monoacetate form is a solvate hydrate wherein water molecule is available as water of crystallization and hence it was not separately mentioned in the nomenclature of the Intermediate form, whereas it is evident form the Manufacturing outline and Drug substance specifications that "Ceftaroline fosamil monoacetate" contains water.

    - The limit of water content of $\leq$ 3.0% also makes it evident that water content equivalent to about monohydrate form is available in the drug substance.

4. Approval of DMF of Qilu antibiotics by US FDA for the ANDA applications:
    a. It is pertinent to mention that the same DMF of same drug substance titled as "STERILE CEFTAROLINE FOSAMIL WITH ARGININE" has been approved by US FDA as Type –II DMF that has passed the completeness assessment and are available for reference by ANDAs, meaning by that the submitted DMF is acceptable to be presented along with any ANDA (generic application) to be filed for the "Ceftaroline Fosamil Injection".
    DMF No.: 28245.
    Status: Active.

Ref: Types of Drug Master Files (DMFs) | FDA

Decision: Approved with Innovator's Specifications. Firm shall submit 7,500/- fee for revision of specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021 before issuance of registration letter.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Withdrawal of Registration Applications by M/s. Al Habib Pharmaceuticals:

M/s. Al Habib Pharmaceuticals in its letter dated 20th March ,2023 informed that they would like to withdraw following registration application of their imported products due to discontinuation of their foreign beneficiary. Further, firm requested for re-shuffling and consideration of the paid fee vide slip no.

7575709392 dated 26-01-2022 of following product for registration of product kunyrin (Leucovorin Calcium) 100mg Injection submitted on 08-12-2022.

Sr.no.	Name and Address of Manufacturer & Importer	Brand name along with composition	Details of Registration Application
1.	M/s Al-Habib Pharmaceuticals. Plot No. 81, Block B, SMCHS, Karachi, Pakistan By M/s Naprod Life Sciences Pvt Ltd. Plot No. G-17/1, MIDC, Tarapur, Boisar, Thane 401506, Maharashtra State, India	Cafonate 300mg/30ml Lyophillized Powder for Injection Each Vial Contains: Leucovorin Calcium…300mg/30ml	Form-5F Dy.No 5223 dated 24-02-2022 Rs.150,000/- dated 26-01-2022

Decision: Registration Board acceded the request of withdrawal of firm and declared the above registration applications as disposed off. Further, the Board did not accept the request of re-consideration of already paid fee of the instant application for the registration of product "Kunyrin (Leucovorin Calcium) 100mg Injection."

	Approval status of product in Reference Regulatory Authorities	DuoCover EMA Approved
	Me-too status	075978 CoPlavix Tablets 75/75mg by M/s Sanofi Karachi.
	GMP status	
	Remarks of the Evaluator	• Reference of finished product specifications. • Latest GMP inspection report conducted within a period of last three years. Internationally it is available as bilayer tablet. Whereas, firm has applied for monolayer tablet and combination contains clopidogrel instead of clopidogrel bisulphate. Revision of formulation with submission of requisite fee. Evaluation: EMA Approved Duo Cover is presented as film-coated tablets containing two active substances. Tablets are bilayer clopidogrel and acetylsalicylic acid (ASA). Pharmaceutical Development The objective of the formulation development was to obtain fixed-dose combination tablets, which would be equivalent to therapy consisting of Iscover 75 mg tablets combined with commercially available acetylsalicylic acid tablets. The product has been developed as film-coated bilayer tablets containing two active substances. The aim of a preliminary development was to define the technology to be used for manufacturing tablets containing two active substances. Film-coated tablets were finally selected. The 75 mg clopidogrel granulate corresponds to the already marketed Iscover 75 mg core formula and is granulated according to the existing processing for this product. No modifications have been introduced to the formula, batch size and granulation process of the clopidogrel granulation. Further formulation development was performed on the blend containing acetylsalicylic acid. Various grades of acetylsalicylic acid granulated with maize starch with varying particle size distribution were mixed with additional excipients in order to achieve a homogenized blend. The weight of the acetylsalicylic acid blend varies proportionally in order to achieve the various strengths of the combination. The acetylsalicylic acid granulation blend was optimised for consistent release of acetylsalicylic acid and to produce granulation with good flow and compressibility properties.

	GMP status	**Firm submitted the GMP certificate dated 30-06-2022 based on evaluation conducted on 14-04-2022 and valid for three years from the date of inspection.**
	Remarks of the Evaluator	• Firm shall submit section approval letter of Liquid injectable section issued by CLB. • Revise your label claim along with submission of full fee as per the innovator's product as per following: Each ml contains: Metoclopramide Hydrochloride monohydrate equivalent to 5mg of anhydrous metoclopramide hydrochloride. • Firm did not mention the specification of finished product in the submitted dossier. • Latest GMP inspection report conducted within a period of last three years.
	Decision: Approved with USP specification and with the following label claim: **Each ml contains:** **Metoclopramide Hydrochloride monohydrate equivalent to 5mg of anhydrous metoclopramide hydrochloride.** **The firm shall submit fee of Rs. 30,000/- for correction/pre-approval change in product label claim as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021, before issuance of registration letter.**	
1043.	Name and address of manufacturer/ Applicant	M/s Neutro pharma (Pvt) Ltd., 9.5Km, Sheikhupura Road, Lahore
	Brand Name + Dosage Form + Strength	Bisonid F 200mcg/6mcg Rotacaps
	Composition	Each Rotacap Contains: Budesonide…200mcg Formoterol Fumarate…6mcg
	Diary No. Date of R & I & fee	Dy.No 13994 dated 07-03-2019 Rs.20,000/- dated 07-03-2019
	Pharmacological Group	Glucocorticosteroid/Selective β2 adrenoceptor agonist
	Type of Form	Form-5
	Finished product Specification	
	Pack size & Demanded Price	As per SRO
	Approval status of product in Reference Regulatory Authorities	Symbicort 200/6 Turbohaler, Inhalation Powder by M/s AstraZeneca (MHRA Approved)
	Me-too status	Combivair 200mcg + 6mcg capsule of M/s Highnoon
	GMP status	**Firm submitted the GMP certificate dated 30-06-2022 based on evaluation conducted on 14-04-2022 and valid for three years from the date of inspection.**
	Remarks of the Evaluator	1. As per 290th decision of Registration board, provide evidence of separate manufacturing facility/section for manufacturing of DPIs including specialized mixing facility to ensure the required particle size of the formulation blend. 2. As per 290th decision of Registration board, provide evidence of equipment for performing the test of "Uniformity of Delivered Dose" and "Aerodynamic Particle Size Distribution" as per Pharmacopoeia.

		3. The reference formulation has mentioned the hydrated form (dihydrate) of Formoterol fumarate in the label claim while you have not mentioned the hydrated form. Revise the label claim as per reference formulation mentioning the hydrated form along with submission of applicable fee. 4. Submission of stability studies data of three batches as per Requirements of Registration Board decision of 293rd meeting. 5. Submit the detailed information regarding accompanied dose delivery device. 6. Firm shall submit section approval letter of steroidal DPI capsule section issued by CLB. 7. Latest GMP inspection report conducted within a period of last three years.
	Decision: Registration Board decided to reject the application since the firm has not submitted stability study data of 3 batches of the drug product before the lapse of agreed deadline decided by DRAP Authority i.e. till 31st December 2022.	
1044.	Name and address of manufacturer/ Applicant	M/s Neutro pharma (Pvt) Ltd., 9.5Km, Sheikhupura Road, Lahore
	Brand Name + Dosage Form + Strength	Fibride Injection 12.5mg/50ml
	Composition	Each ml Contains: Tirofiban As HCl Monohydrate…0.25mg
	Diary No. Date of R & I & fee	Dy.No 13989 dated 07-03-2019 Rs.20,000/- dated 07-03-2019
	Pharmacological Group	Antithrombotic agents
	Type of Form	Form-5
	Finished product Specification	
	Pack size & Demanded Price	As per SRO
	Approval status of product in Reference Regulatory Authorities	AGGRASTAT (250 micrograms/ml) concentrate for solution for infusion 50ml vial by M/s Correvio (UK) Ltd (MHRA Approved)
	Me-too status	Aggrastat Injection 0.25mg/ml 50ml vial by M/s Atco Labs (Reg#025299)
	GMP status	**Firm submitted the GMP certificate dated 30-06-2022 based on evaluation conducted on 14-04-2022 and valid for three years from the date of inspection.**
	Remarks of the Evaluator	• Same formulation with the same filled volume has been approved in the name of M/s. Neutro Pharma (Pvt.) Ltd. in 295th meeting of Registration Board. **(Registered with the brand name neutirof injection and Reg.no. 109753)** • Firm did not mention the specification of finished product in the submitted dossier. • Latest GMP inspection report conducted within a period of last three years.
	Decision: Registration Board was apprised that the applicant already hold registration of the above mentioned finished products. The Board discussed that the new applied products contain same formulation as that of already registered products thus the Board decided to reject the applications for Tirofiban as HCl 0.25mg Injection.	
1045.	Name and address of manufacturer/ Applicant	M/s Neutro pharma (Pvt) Ltd., 9.5Km, Sheikhupura Road, Lahore

	Pharmacological Group	
	Type of Form	Form-5D (just mentioned form name without the form content and requisite documents)
	Finished product Specification	
	Pack size & Demanded Price	
	Approval status of product in Reference Regulatory Authorities	
	Me-too status	
	GMP status	**Firm submitted the GMP certificate dated 30-06-2022 based on evaluation conducted on 14-04-2022 and valid for three years from the date of inspection.**
	Remarks of the Evaluator	• Firm has not submitted the requisite Form nor the requisite documents as per the requirement. • Latest GMP inspection report conducted within a period of last three years.
	Decision: Deferred for submission of complete dossier on the requisite Form as per the formulation mentioned on the covering letter and fee challan along with full fee of registration.	
1048.	Name and address of manufacturer/ Applicant	M/s Neutro pharma (Pvt) Ltd., 9.5Km, Sheikhupura Road, Lahore
	Brand Name + Dosage Form + Strength	Rasti Sachet
	Composition	
	Diary No. Date of R & I & fee	Dy.No 13965 dated 07-03-2019 Rs.50,000/- dated 06-03-2019
	Pharmacological Group	
	Type of Form	Form-5D (just mentioned the form name without the form content)
	Finished product Specification	
	Pack size & Demanded Price	
	Approval status of product in Reference Regulatory Authorities	
	Me-too status	
	GMP status	**Firm submitted the GMP certificate dated 30-06-2022 based on evaluation conducted on 14-04-2022 and valid for three years from the date of inspection.**
	Remarks of the Evaluator	• Firm has not submitted the requisite Form nor the requisite documents as per the requirement, only the specification and analytical procedure details revealed that label claim of applied formulation is Each film coated tablet contains: Linagliptin …2.5mg Metformin HCl…500mg. • Latest GMP inspection report conducted within a period of last three years. • Submit of stability study data for applied formulation as per guidelines approved in 293rd meeting of Registration Board is required, as the applied formulation is

		subsequent drug generic version.
	Decision: Deferred for submission of complete dossier on the requisite Form as per the formulation mentioned on the covering letter and fee challan along with full fee of registration.	

Previously Deferred Cases of Form-5:

1049.	Name and address of manufacturer / Applicant	Bryon Pharmaceuticals (Pvt.) Ltd. 48-Hayatabad Industrial Estate, Peshawar
	Brand Name +Dosage Form + Strength	Paroxil-CR Tablets
	Diary No. Date of R& I & fee	(Duplicate Dossier) Dy. No. dated 04/04/2012 of Rs. 8,000/- (Photocopy) Differential fee (photocopy) of Rs. 12,000/- submitted on 09/10/2015 (Receipt of application was verified by R&I)
	Composition	Each CR tablet contains: Paroxetine HCl eq. to Paroxetine…12.5mg
	Pharmacological Group	Selective Serotonin Reuptake Inhibitors (SSRIs)
	Type of Form	Form 5
	Finished Product Specification	Manufacturer's Specification
	Pack Size & Demanded Price	As per S.R. O
	Approval Status of Product in Reference Regulatory Authorities	USFDA Approved (PAXIL® CR™ (paroxetine hydrochloride) Controlled-Release Tablets)
	Me-too Status	Paroxiwel 20 mg Tablets of M/s Welwrd Pharmaceuticals
	GMP Status	GMP Inspection conducted on 17/10/2019 and concluded with the following remarks "The firm may be considered operating in satisfactory level of cGMP compliance".
	Remarks of the Evaluator.	• Firm applied for registration of drug on Form 5-B instead of Form-5, firm inform that it is a typographical error instead of "Form-5" word "Form 5-B" was printed and request to replace the incorrect form with the rectified copy. Correct copy has been submitted by the firm. • According to the reference/innovator product it is an enteric, film-coated, bilayer, controlled-release tablet, while the manufacturing method/master formulation submitted by the firm did not clarify that which polymer has been for enteric coating.
	Decision of 308th meeting of Registration Board:	*Deferred for submission of manufacturing outline as per reference formulation which is enteric, film-coated, bilayer, controlled-release tablet contains paroxetine hydrochloride equivalent to paroxetine 12.5mg. One layer of the tablet consists of a degradable barrier layer and the other contains the active material in a hydrophilic matrix.*
	Response of the Firm	Firm submitted the manufacturing outline in line with innovator formulation but the label claim is not in accordance with innovator product. Further, firm submit the fee of Rs 30,000/- in the head of correction of composition (pre-registration variation) vide slip no. 16600215752 dated 08-22-2022. • Revise your label claim along with submission of full fee as per the innovator's product as per following: Each enteric, film coated, controlled release tablet contains: Paroxetine (as HCl)…12.5mg
	Decision: Approved	

Registration applications of locally manufactured (Human) drugs on Form 5F.

No. of Batches	03		

Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has referred to onsite inspection report of their product: EMPAZON 10mg Tablets, EMPAZON 25mg Tablets (Empagliflozin), Dayzol 30mg Capsules, Dayzol 60mg Capsules (Dexlansoprazole), which was conducted on 1st June, 2021 and was presented in 307th meeting of Registration Board held on 08-10th June, 2021. Following observations were reported: i. The HPLC software is 21 CFR compliant. ii. Audit trail on the testing reports of EMPAZON 10mg and 25mg Tablets, Dayzol 30mg and 60mg Capsules is available. iii. Adequate monitoring and control are available for stability chamber. Chamber are controlled and monitored through software having alarm system for alerts as well.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	G.M.P Certificate dated 22-05-2020, issued by Drug Control Administration, Government of Telangana. Valid for one year from the date of issuance. Firm has also submitted DML copy of API manufacturer which is valid till 09- 09- 2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of invoice No. 2122OD029/EXP dated 29-04-2021 from Optimus Drug Pvt. Ltd. Sy.No. 239 & 240, Dothigudem Village, Pochampally Mandal, Yadadri – Bhuvanagiri District – 508 284, Telangana, India for import of Pirfenidone (Batch No. OP-PIF-A1-002/20, Mfg. Date: 01-07-2020), quantity 08kgs. However, the invoice has not been attested by the concerned AD (I & E). Working standard Batch No. 21 WS0161 (Mfg.Date 26-06-2021), Mfg. date 28-06-2021.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted

6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks OF Evaluator: (PEC-XVII)

Sr. No.	Observation	Reply by the firm
1.	Provide valid GMP certificate of API manufacturer as the submitted GMP certificate validity is for one year from the date of issuance that is 22-05-2020.	Firm submitted the GMP certificate of API manufacturer M/s. Optimus Drugs Pvt. Ltd. which is valid up till 09-09-2023.
3.	The batch number of Pirfenidone 267mg mentioned in pharmaceutical equivalence studies and that mentioned for comparative dissolution studies and of trial batches manufactured are different.	Firm replied that the batch of perfenidone tablets used for pharmaceutical equivalence was proposed trial batches while the batches of pirfenidone tablets used for CDP study are those batches of pirfenidone batches which are manufactured for the evaluation of stability studies.
4.	Chromatographic conditions given by API manufacturer has a C8 column, while that mentioned by the Drug product manufacturer as C18 column. Moreover, the run time as recommended by the BP monograph is 4 times that of Pirfenidone, while the run time employed in analysis is about 20 minutes.	Firm replied that the C18 column and run time in analytical method verification report of drug manufacturer was typographical mistake. The actual column was used C8 and run time was 48 minutes, so they submitted the amended analytical procedure and analytical method verification report. Moreover, the chromatograms have been attached as evidence.
5.	Provide AD (I & E) attested invoice copy for import of Pirfenidone.	Firm submitted the ADC attested invoice for import of Pirfenidone dated 31-08-2021 Dy.no. 13061/2021-DRAP.
6.	Provide Evidence for import of innovators products (Esbriet 267mg, 534mg & 801mg) for pharmaceutical equivalence and comparative dissolution studies.	Not provided.
7.	Provide details of available minimum handling capacity for trial batches manufacturing.	Firm provide the details of machines used for manufacturing of trial batches.
8.	Potency as per CoA of drug product manufacturer is 100.33% (on dried basis), while that given in stability studies calculation/analysis as 99.2.	Firm clarify that 99.2 was the potency of working standard while 100.33%(on dried basis) is the potency of drug product.
9.	API real time stability data submitted for 12 months	Firm submitted the stability of drug substance of 36 months, details of the batches is as under:
10.	Only 03 months stability studies data (both accelerated & real time) have been provided	Updated stability data till 6 month has submitted by the Firm

Decision: Deferred for submission of image/picture/snapshot of innovator pack i.e. (Esbriet 267mg, 534mg & 801mg) against which Pharmaceutical equivalence/Comparative dissolution profile studies have been performed.

Manufacturer of API	M/s Optimus Drugs Pvt. Ltd. Sy.No. 239 & 240, Dothigudem Village, Pochampally Mandal, Yadadri – Bhuvanagiri District – 508 284, Telangana, India.
API Lot No.	OP-PIF-A1-002/20
Description of Pack (Container closure system)	A Film coated red color, oval tablet in Alu-Alu blister pack in unit carton occupied 21′s tablets.
Stability Storage	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH

Condition			
Time Period	Real time: 3 months Accelerated: 3 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	PFM-001	PFM-002	PFM-003
Batch Size	1500 Tablets	1500 Tablets	1500 Tablets
Manufacturing Date	10.2021	10.2021	10.2021
Date of Initiation	11.10.2021	12.10.2021	13.10.2021
No. of Batches	03		

Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has referred to onsite inspection report of their product: EMPAZON 10mg Tablets, EMPAZON 25mg Tablets (Empagliflozin), Dayzol 30mg Capsules, Dayzol 60mg Capsules (Dexlansoprazole), which was conducted on 1st June, 2021 and was presented in 307th meeting of Registration Board held on 08-10th June, 2021. Following observations were reported: iv. The HPLC software is 21 CFR compliant. v. Audit trail on the testing reports of EMPAZON 10mg and 25mg Tablets, Dayzol 30mg and 60mg Capsules is available. vi. Adequate monitoring and control are available for stability chamber. Chamber are controlled and monitored through software having alarm system for alerts as well.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	G.M.P Certificate dated 22-05-2020, issued by Drug Control Administration, Government of Telangana. Valid for one year from the date of issuance. Firm has also submitted DML copy of API manufacturer which is valid till 09- 09- 2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of invoice No. 2122OD029/EXP dated 29-04-2021 from Optimus Drug Pvt. Ltd. Sy.No. 239 & 240, Dothigudem Village, Pochampally Mandal, Yadadri – Bhuvanagiri District – 508 284, Telangana, India for import of Pirfenidone (Batch No. OP-PIF-A1-002/20, Mfg. Date: 01-07-2020), quantity 08kgs. However, the invoice has not been attested by the concerned AD (I & E). Working standard Batch No. 21 WS0161 (Mfg.Date 26-06-2021), Mfg. date 28-06-2021.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail	Submitted

	reports on product testing	
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks OF Evaluator: (PEC-XVII)

Sr. No.	Observation	Reply by the firm
1.	Provide valid GMP certificate of API manufacturer as the submitted GMP certificate validity is for one year from the date of issuance that is 22-05-2020.	Firm submitted the GMP certificate of API manufacturer M/s. Optimus Drugs Pvt. Ltd. which is valid up till 09-09-2023.
3.	The batch number of Pirfenidone 267mg mentioned in pharmaceutical equivalence studies and that mentioned for comparative dissolution studies and of trial batches manufactured are different.	Firm replied that the batch of perfenidone tablets used for pharmaceutical equivalence was proposed trial batches while the batches of pirfenidone tablets used for CDP study are those batches of pirfenidone batches which are manufactured for the evaluation of stability studies.
4.	Chromatographic conditions given by API manufacturer has a C8 column, while that mentioned by the Drug product manufacturer as C18 column. Moreover, the run time as recommended by the BP monograph is 4 times that of Pirfenidone, while the run time employed in analysis is about 20 minutes.	Firm replied that the C18 column and run time in analytical method verification report of drug manufacturer was typographical mistake. The actual column was used C8 and run time was 48 minutes, so they submitted the amended analytical procedure and analytical method verification report. Moreover, the chromatograms have been attached as evidence.
5.	Provide AD (I & E) attested invoice copy for import of Pirfenidone.	Firm submitted the ADC attested invoice for import of Pirfenidone dated 31-08-2021 Dy.no. 13061/2021-DRAP.
6.	Provide Evidence for import of innovators products (Esbriet 267mg, 534mg & 801mg) for pharmaceutical equivalence and comparative dissolution studies.	Not provided.
7.	Provide details of available minimum handling capacity for trial batches manufacturing.	Firm provide the details of machines used for manufacturing of trial batches.
8.	Potency as per CoA of drug product manufacturer is 100.33% (on dried basis), while that given in stability studies calculation/analysis as 99.2.	Firm clarify that 99.2 was the potency of working standard while 100.33%(on dried basis) is the potency of drug product.
9.	API real time stability data submitted for 12 months	Firm submitted the stability of drug substance of 36 months, details of the batches is as under:

10.	Only 03 months stability studies data (both accelerated & real time) have been provided	Updated stability data till 6 month has submitted by the Firm
Decision: Deferred for submission of image/picture/snapshot of innovator pack i.e. (Esbriet 267mg, 534mg & 801mg) against which Pharmaceutical equivalence/Comparative dissolution profile studies have been performed.		
1052.	Name, address of Applicant / Marketing Authorization Holder	M/s Horizon Healthcare (Formerly M/s Wellness Pharmaceutical Pvt. Ltd. Pvt. Ltd.) Plot No.33, Sundar Industrial Estate, Lahore. (DML No.000782)

	Details of fee submitted	PKR: 75,000/- vide online deposit slip No.35641913 dated 13-01-2022.
	The proposed proprietary name / brand name	PRINONE Tablets 801mg
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Film-Coated Tablet Contains: Pirfenidone……801 mg
	Pharmaceutical form of applied drug	Film-coated green color, oval tablet in alu-alu blister with leaflet pack in unit carton.
	Pharmacotherapeutic Group of (API)	Immuno-suppressants, other immune-suppressants, WHO ATC Code: L04AX05
	Reference to Finished product specifications	Innovator's Specifications
	Proposed Pack size	As per SRO
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	ESBRIET® (Pirfenidone) 801mg film-coated tablets (USFDA approved)
	For generic drugs (me-too status)	Mac-Fenid 801mg tablet of M/s Macter International Limited. Registration No. 105300
	GMP status of the Finished product manufacturer	GMP certificate issued on 06-07-2020, based on evaluation conducted on 18-06-2020. Tablet Section (General) mentioned GMP certificate.

	Name and address of API manufacturer.	M/s Optimus Drugs Pvt. Ltd. Sy.No. 239 & 240, Dothigudem Village, Pochampally Mandal, Yadadri – Bhuvanagiri District – 508 284, Telangana, India.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Firm has submitted detailed drug substance data on CTD format related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications and analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies	Pirfenidone: Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 60 months at 0, 3rd, 6th, 9th, 12th months. Accelerated: 40°C ± 2°C / 75% ± 5%RH for 06 months at 0, 1st, 2nd, 3rd & 6th months. Batches: (OP-PIF-A1-001/20, OP-PIF-A1-002/20, OP-PIF-A1-003/20)
	Module-III (Drug Product):	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacturing process and process control, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical equivalence established against innovators product Esbriet 801mg film-coated tablet (Batch No. M1020321, Mfg. Date: 03-2021). Summarized test report/results submitted. Comparative dissolution was performed against the same product (Esbriet 801mg film-coated tablet, Batch No. M1020321, Mfg. Date: 03-2021) in HCl buffer (pH 1.2), Acetate buffer (pH 4.5), Phosphate buffer (pH 6.8) and water as dissolution medium with sampling time points as 05, 10, 15, 20, 30 & 45 minutes. The dissolution profile similarity factor f2 calculated as 95 (acidic buffer pH 1.2), 99 (Acetate buffer pH 4.5), 96 (Phosphate buffer pH 6.8) and 91 (water as dissolution medium).
	Analytical method validation/verification of product	Method validation studies have submitted including, Specificity, linearity, range, accuracy, precision Repeatability, Intermediate precision, Robustness, System Suitability.

Remarks OF Evaluator: (PEC-XVII)

Sr. No.	Observation	Reply by the firm
1.	Mobile phase ratio at 3.2.P.5.2 (Drug Product analytical procedure) for assay determination given as Acetonitrile and 0.02% of Formic acid (65:35) and flow rate of 1.3ml/minute while in the "analytical method validation summary report for Obeticholic acid" at 3.2.P.5.3 (Validation of analytical procedure), the Mobile phase mentioned as Acetonitrile: Buffer Solution (35:65), with flow rate as 01 ml/minute. Moreover, the standard solution preparation (0.5mg/ml), quantity of Obeticholic acid WS given as 50mg in 50ml diluent.	Firm replied that the mobile phase ratio, flow rate and standard dilution preparation written in the analytical method validation summary had a typographical error. We have replaced the summary report, which is concordant with our standard analytical procedure and detailed method validation report. Changed summary report is attached.
	The firm has submitted two different finished analysis report titled as "Finished analysis report" and "Finished Product Certificate of analysis" for trial batch No. OBH-002 with different assay and dissolution results as 100.73%, 94.15% & 100.93%, 95.08% respectively. Same variation observed in the trial batch No.OBH-001 also. Moreover, chromatograms for sample 1 & sample 2 for assay determination of finished product also not provided.	The finished product certificate of analysis in the batch analysis sheet contains the results based on observations. The finished analysis report was a typographical error. We have changed it as per the certificate of analysis in the batch analysis sheet. The changed finished analysis reports are attached.
2.	Chromatograms for the analytical method validation of raw material not provided by the drug product manufacturer. The title given as analytical method verification report of Obeticholic acid with specificity and accuracy studies.	Firm replied that API analytical method verification was performed for specificity, repeatability and accuracy. Detailed report is attached with the chromatograms.

3.	The stability studies data of both trial batches has been submitted in disorder fashion making it difficult to evaluate and understand. It is therefore advised to submit the requisite data in properly arranged form for both trial batches.	Firm replied that the properly arranged data has submitted.
4.	API stability studies data submitted for 18 months.	Firm submitted the API stability data of 24months and the period of study mentioned on stability data sheets is 60months.

Decision: Deferred for submission of Module 3 of Form 5-F compiled in accordance with CTD guidance document along with full fee of registration.

	Name and address of API manufacturer.	M/s KIMIA BIOSCIENCES LIMITED (Formerly Laurel Organics Ltd.),Village: Bhondsi, Tehsil: Sohna, Distt: Gurugram (Haryana).
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Firm has submitted detailed drug substance data on CTD format related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications and analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies	Obeticholic acid: (Storage conditions 2 -8 ^{o}C. Stability study conditions: Real time: 5°C ± 3°C for 18 months at 0, 3rd, 6th, 9th, 12^{th,} 18th months. Accelerated: 25°C ± 2°C / 60% ± 5%RH for 06 months at 0, 1st, 3rd & 6th months. Batches: (KB/OBT/SPP/19/001, KB/OBT/SPP/19/002, KB/OBT/SPP/20/001)
	Module-III (Drug Product):	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacturing process and process control, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical equivalence established against innovators product Ocaliva 10mg film-coated tablet (Batch No. B482037, Mfg. Date: 09-2020). Summarized test report/results submitted. Comparative dissolution was performed against the same product Ocaliva 10mg film-coated tablet (Batch No. B482037, Mfg. Date: 09-2020) in HCl buffer (pH 1.2), Acetate buffer (pH 4.5), Phosphate buffer (pH 6.8) and Sod. Phosphate dibasic + Tween 80 (dissolution medium) with sampling time points as 10, 15, 20, 30, 45 & 60 minutes. The dissolution profile similarity factor f2 calculated as 80 (acidic buffer pH 1.2), 72 (Acetate buffer pH 4.5), 86 (Phosphate buffer pH 6.8) and 87 (Sodium Phosphate dibasic + Tween 80, pH 6.8).
	Analytical method validation/verification of product	Method validation studies have submitted including, Specificity, linearity, range, accuracy, precision Repeatability, Intermediate precision, Robustness, System Suitability.

		Working standard Batch No. WS-OBI004/21, quantity 2gm.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks OF Evaluator: (PEC-XVII)

Sr. No.	Observation	Reply by the firm
1.	Mobile phase ratio at 3.2.P.5.2 (Drug Product analytical procedure) for assay determination given as Acetonitrile and 0.02% of Formic acid (65:35) and flow rate of 1.3ml/minute while in the "analytical method validation summary report for Obeticholic acid" at 3.2.P.5.3 (Validation of analytical procedure), the Mobile phase mentioned as Acetonitrile: Buffer Solution (35:65), with flow rate as 01 ml/minute. Moreover, the standard solution preparation (0.5mg/ml), quantity of Obeticholic acid WS given as 50mg in 50ml diluent.	Firm replied that the mobile phase ratio, flow rate and standard dilution preparation written in the analytical method validation summary had a typographical error. We have replaced the summary report, which is concordant with our standard analytical procedure and detailed method validation report. Changed summary report is attached.
2.	Chromatograms for the analytical method validation of raw material not provided by the drug product manufacturer. The title given as analytical method verification report of Obeticholic acid with specificity and accuracy studies. Whether validation or verification studies required??	Firm replied that API analytical method verification was performed for specificity, repeatability and accuracy. Detailed report is attached with the chromatograms.
3.	The firm has submitted two different finished analysis report titled as "Finished analysis report" and "Finished Product Certificate of analysis" for trial batch No. OBH-002 with different assay and dissolution results as 100.73%, 94.15% & 100.93%, 95.08% respectively. Same variation observed in the trial batch No.OBH-001 also. Moreover, chromatograms for sample 1 & sample 2 for assay determination of finished product also not provided.	The finished product certificate of analysis in the batch analysis sheet contains the results based on observations. The finished analysis report was a typographical error. We have changed it as per the certificate of analysis in the batch analysis sheet. The changed finished analysis reports are attached.

4.	Chromatograms for standard runs not provided for trial batch OBH # 001 for accelerated stability data at 3rd month time point.	The chromatograms for standard run of OBH-001 3rd month accelerated study has attached.
5.	Starting dates for stability studies given as 30th & 31st August 2021, while the 3rd month & 6th month stability studies conducted on 21st, 22nd November 2021 & 20th February 2022 that is few days earlier than the scheduled dates.	Firm replied that "The ending date of stability was 28 February,2022, which was written as 31-02-2022, which does not exist. Therefore, our stability study schedule dates are within ± 7 days of the stability ending date. We have corrected the stability ending date on the certificates of analysis of stability studies".
6.	Submit audit trial reports for the 6th month time stability studies data	The audit trail reports stability data is submitted.
7.	Submit digital data logger record from 14th November onward till 6th month time point for stability chambers (both accelerated & real time).	The audit trail reports of 6th month stability data is submitted by the firm.
8.	API stability studies data submitted for 18 months.	Firm submitted the API stability data of 24months and the period of study mentioned on stability data sheets is 60months.
Decision: Deferred for submission of Module 3 of Form 5-F compiled in accordance with CTD guidance document along with full fee of registration.		

Agenda of Evaluator PEC-XX

A) Priority consideration on account of Export Facilitation:

In pursuance of decision of 133rd meeting of the Authority held on 13th April 2022, wherein it was decided that for each 100,000 USD worth of export of medicine during a fiscal year, one molecule will be considered on priority subject to fulfilment of all prescribed requirements

Following registration application of firms may be considered on priority in light of Export Facilitation Policy as communicated vide letter No.F.1-6/2019-PR-I (EFD) dated 11.04.2023:

1055.	Name, address of Applicant / Marketing Authorization Holder	The Searle Company Limited F-319, S.I.T.E., Karachi, Pakistan.
	Name, address of Manufacturing site.	The Searle Company Limited F-319, S.I.T.E., Karachi, Pakistan.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale

		☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 7089 dated 10/03/2023
	Details of fee submitted	PKR 30,000/-: dated 17/02/2023
	The proposed proprietary name / brand name	ACTINIB 5mg Tablets
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	ACTINIB 5mg Tablets Each Film coated tablet contains: Tofacitinib (as Citrate) ……5mg
	Pharmaceutical form of applied drug	Film coated tablet
	Pharmacotherapeutic Group of (API)	Immunosuppressant
	Reference to Finished product specifications	As per Innovator's Specifications
	Proposed Pack size	As per DPC
	Proposed unit price	As per DPC
	The status in reference regulatory authorities	Approved by EMA with the name of XELIJANZ 5mg Tablet https://www.medicines.org.uk/emc/product/2500/smpc#gref
	For generic drugs (me-too status)	TOFAJAK 5mg Tablets by Hiranis Pharmaceuticals (Pvt.) Limited Reg No 110057
	GMP status of the Finished product manufacturer	GMP inspection report dated 07.07.2022 wherein firm was considered to be operating at GOOD level of GMP compliance. Tablet (General) section approved dated 29.10.2020.
	Name and address of API manufacturer.	TOFACITINB CITRATE: Manufacturer: Nantong Chanyoo Pharmatech Co., Ltd Address: No.2 Tonghai Road, Yangkou Chemical Industrial Park, Rudong Coastal Economic Development Zone, Nantong, Jiangsu Province, 226407 P.R. China
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of Tofacitinib is not present in any pharmacopeia. The firm has submitted details of nomenclature, structure, general properties, manufacturers, description of manufacturing process and controls, structure elucidation, tests for impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies	TOFACITINIB CITRATE Stability study conditions: Long term: 30°C ± 2°C / 75% ± 5%RH for 24 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months

		Batches: [TFBB-707-210101, TFBB-707-210102, TFBB-707-210103]
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its validation studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence has been established against the brand leader that is TOFAJAK 5mg Tablet by Hiranis Pharmaceuticals (Pvt.) Limited Batch No 014 by performing quality tests (Physical Appearance, Assay, Disintegration, Dissolution, Content uniformity and test for related substance) against Test Product Batch No 082D04 CDP has been performed against the same the brand leader that is TOFAJAK 5mg Tablet by Hiranis Pharmaceuticals (Pvt.) Limited Batch No 014 in Hydrochloric Acid Solution (pH 1.2), Acetate Buffer (pH 4.5) & Phosphate Buffer (pH 6.8) against Test Product Batch No 082D06 The values for f1 and f2 are in the acceptable range.
	Analytical method validation/verification of product	Method validation studies have submitted including linearity, range, accuracy, precision, specificity, robustness, and system suitability

STABILITY STUDY DATA			
Manufacturer of API	TOFACITINB CITRATE: Manufacturer: Nantong Chanyoo Pharmatech Co., Ltd Address: No.2 Tonghai Road, Yangkou Chemical Industrial Park, Rudong Coastal Economic Development Zone, Nantong, Jiangsu Province, 226407 P.R. China

No. of Batches	03		
Administrative Portion			
Reference of previous approval of applications with stability study data of the firm (if any)	The firm has submitted documents for Reference of Previous Approval Tapendol tablet approved in 289th meeting of RB		

	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	TOFACITINB CITRATE: GMP Certificate of Manufacturer: Nantong Chanyoo Pharmatech Co., Ltd Valid Till: 21-Feb-2026
	Documents for the procurement of API with approval from DRAP (in case of import).	TOFACITINB CITRATE: Invoice Invoice Number: CY121448 dated 02-Mar-2022 Quantity: 0.36 kg Batch: RD-TFBB-202109181 Mfg Date: Sep-18-2021 Retest Date: Sep-18-2023 Approval from DRAP is not provided.
	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted all documents related to stability data i.e Chromatograms, Raw data sheets, COA, summary data sheets
	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Assessor (DD PEC-XX):

Sr.#	Observation	Reply	Remarks
1.	The active substance specification includes tests for description, identification (IR, Chiral LC), particle size, assay (LC), counterion of citric acid (LC), impurities (LC), residue on ignition (USP), heavy metals (USP), residual solvents (GC), water content, palladium (ICP-OES). https://www.ema.europa.eu/en/documents/assessment-report/xeljanz-epar-public-assessment-report_en.pdf Tests such as Heavy metals, particle size and water content have not been mentioned in CoA of Drug Substance.	Particle size distribution was not performed at that time due to unavailability of equipment. Now we have procured the equipment and have performed the test, results have been incorporated in CoA accordingly. Heavy metals test evaluation in Drug Substance because USP eliminated the Heavy metal test chapter in their official monograph after	Tofacitinib is not found in USP or any other monograph hence specifications/tests of Drug Substance to be adopted as per innovator, justification for not performing heavy metal tests in drug substance (either by DS

		January 2018 that's why not mentioned on drug substance CoA. Water content test has been incorporated in CoA	manufacturer or product manufacturer) is not acceptable. ***Later on firm has provided CoA from DS Manufacturer wherein specification of heavy metal testing was mentioned.***
2.	Results of specificity parameter along with HPLC chromatograms (sample, standard, blank) has not been provided under Analytical method verification study	Provided	Complied
3.	Documents for the procurement of API with approval from DRAP to be provided.	License to import drug 0.36Kg dated 24.03.2022 issued by DRAP, Karachi is submitted.	Clearance certificate from DRAP yet to be submitted ***Later on firm has provided approval from DRAP (I&E Karachi)***

Remarks: ***Reply submitted against above mentioned shortcomings found satisfactory.***

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

	For generic drugs (me-too status)	NA
	GMP status of the Finished product manufacturer	GMP certificate No. F. 11-6/2021-DRAP-65 dated 25/08/2021 Valid up to 10-08-2023. Tablet (General) section approved vide letter No. F.3-14/2004-Lic, dated: 08-04-2015 is submitted.
	Name and address of API manufacturer.	M/s Kimia Biosciences Limited, Address: Village Bhondsi Tehsil-Sohna District-Gurugram Harryana, India
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Prucalopride succinate is non pharmacopoeial substance, the firm submitted detail of nomenclature, structure, general properties, solubility, physical form, manufacturers, tests for single/total impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies	Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 36months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months

		Batches: (LA/PPD/SF/18/001, LA/PPD/SF/18/002, LA/PPD/SF/18/003)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the Reference Brand that is Resolor 1mg Tablets (Batch No KLL1Q02) by Janssen-Cilag S.p.A. via C. Janssen, 04100 Borgo S. Michele, Latina, Italy, by performing quality tests (Description, Assay, Dissolution, Disintegration time and impurities) against Test product PCTab-001 CDP has been performed against the same brand that is Resolor 1mg Tablets (Batch No KLL1Q02) by Janssen-Cilag S.p.A. via C. Janssen, 04100 Borgo S. Michele, Latina, Italy against Test product PCTab-001 Dissolution profile of Prucalopride 1mg tablets and Resolor 1mg tablets has shown Similarity factor f2 is more than 50 in all three media, Buffer pH 1.2, Phosphate Buffer pH 6.8 and Acetate Buffer pH 4.5. Hence dissolution profile of both Prucalopride 2mg tablets and Resolor 2mg tablets is similar.
	Analytical method validation/verification of product	Method verification studies have submitted including specificity, linearity, range, accuracy, precision.

STABILITY STUDY DATA	
Manufacturer of API	M/s Kimia Biosciences Limited Address: Village Bhondsi Tehsil-Sohna District-Gurugram Harryana, India
API Lot No.	KB/PPD/SPP/21/001
Description of Pack (Container closure system)	Alu-Alu blisters of 10's
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH
Time Period	Real time: 6 months Accelerated: 6 months
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)
Batch No.	PCTab-001, PCTab-002, PCTab-003.
Batch Size	1350 film-coated tablets
Manufacturing Date	12-2021
Date of Initiation	27-12-2021
No. of Batches	03

Administrative Portion		
	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has submitted the document.
	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. 4/138-1 Drug 1-2019/8359 issued by State-Drugs-Controller-Cum-Controlling & Licensing Authority. Food and Drugs administration Haryana, Sco No 94, Sector-5, Panchkula valid till 17/11/2022.
	Documents for the procurement of API with approval from DRAP (in case of import).	Copy of, Commercial invoice No KBLEXP/21-22/032 dated 28.06.2021 wherein Prucalopride succinate (0.025Kg) was purchased (Batch No KB/PPD/SPP/21/001). Acknowledgment from DRAP Peshawar dated 03.08.2021
	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Assessor (DD PEC-XX):
Firm has taken the dissolution specification from FDA assessment report of innovator "Motegrity tablet" NDA 210166 which specify following dissolution parameters:

Apparatus	USP Apparatus 2 (Paddle)
Speed	50 rpm
Dissolution media	0.1 N Hydrochloric Acid
Volume	900 mL
Time	10, 20, 30, and 45 min
Temperature	37 ± 0.5 °C
Specifications	NL (b) (4)% (Q) in 20 minutes

S. No	Observations	Reply	Remarks
1.	Valid Approval of API/ DML/GMP certificate of API issued by concerned regulatory authority of country of origin to be provided.	Firm has provided updated GMP certificate No 4/138-1Drugs-1-2022/6790 dated 07.09.2022 valid till two years issued by Food and Drug Administration, Haryana	Complied
2.	Same Batch No of reference product was mentioned in CDP report i.e KLL1Q02 both for Resolor 1mg tablet and Resolor 2mg tablet. Clarify it	There was a typographic mistake. The actual batch No of Resolor 2mg tablet was mentioned on chromatogram and CDP protocol i.e KJL3200	Complied

3.	Under specificity parameter of Analytical Method Verification studies of Drug Product, results of sample and its HPLC Chromatogram has not been included	Results of specificity parameter and HPLC chromatogram is provided	Complied

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Registration letter will be issued upon submission of Rs. 7,500/- fee for revision of specifications as per notification No.F.7-11/2021-B&A/DRAP dated 07-05-2021.**

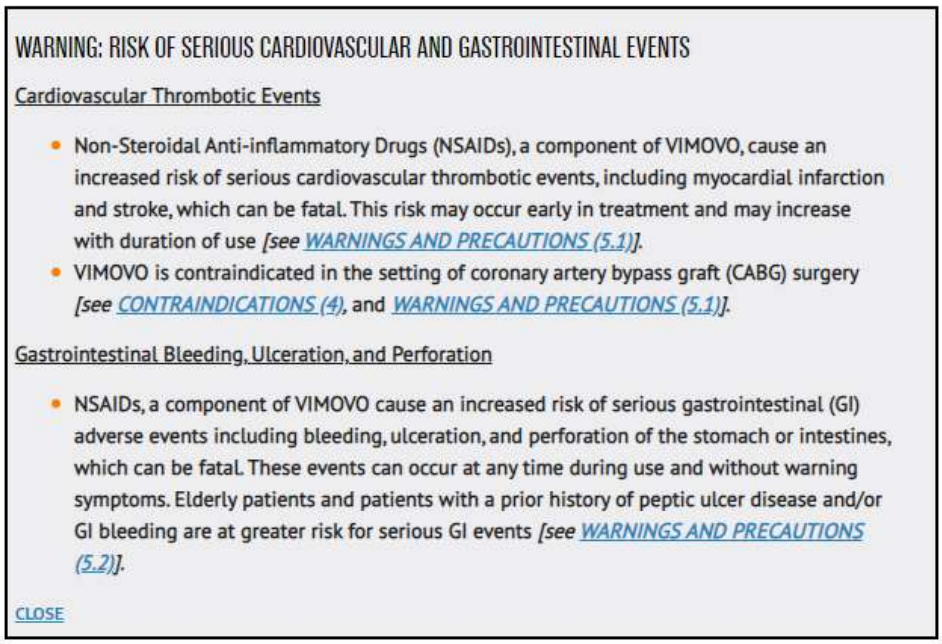
Remarks of Assessor (DD-PEC XX):

Formulation is approved in USFDA with Box warning:



WARNING: RISK OF SERIOUS CARDIOVASCULAR AND GASTROINTESTINAL EVENTS

Cardiovascular Thrombotic Events

- Non-Steroidal Anti-inflammatory Drugs (NSAIDs), a component of VIMOVO, cause an increased risk of serious cardiovascular thrombotic events, including myocardial infarction and stroke, which can be fatal. This risk may occur early in treatment and may increase with duration of use *[see WARNINGS AND PRECAUTIONS (5.1)]*.
- VIMOVO is contraindicated in the setting of coronary artery bypass graft (CABG) surgery *[see CONTRAINDICATIONS (4)*, and *WARNINGS AND PRECAUTIONS (5.1)]*.

Gastrointestinal Bleeding, Ulceration, and Perforation

- NSAIDs, a component of VIMOVO cause an increased risk of serious gastrointestinal (GI) adverse events including bleeding, ulceration, and perforation of the stomach or intestines, which can be fatal. These events can occur at any time during use and without warning symptoms. Elderly patients and patients with a prior history of peptic ulcer disease and/or GI bleeding are at greater risk for serious GI events *[see WARNINGS AND PRECAUTIONS (5.2)]*.

CLOSE

S.No	Observations	Reply	Remarks
1.	Formulation/label claim to be standardized in line with RRA, as follows: Napra MR 375/20mg Tablet Each modified release tablet contains: Naproxen …….. 375mg (enteric coated core) Esomeprazole (as Magnesium trihydrate) …… 20mg (immediate release outer coating)	Firm has submitted fee of Rs 30,000/- for correction of label claim in line with RRA as: Napra MR 375/20mg Tablet Each modified release tablet contains: Naproxen …….. 375mg (enteric coated core) Esomeprazole (as Magnesium trihydrate) …… 20mg (immediate release outer coating)	Complied

2.	Provide updated GMP status of finished product manufacturer along with relevant section approval letter.	Firm has submitted updated GMP status of finished product manufacturer dated 15.06.2021valid till two years	Complied
3.	Enteric coating solution, seal coating solution, Esomeprazole magnesium coating solution and film coating solution was prepared 30% in excess to compensate loss during coating (as provided in stability BMR) Justify it.	*To obtain optimum results Enteric coating solution, seal coating solution, Esomeprazole magnesium coating solution and film coating solution was prepared 30% in excess* *(required dissolution, complete covering, desired assay and uniform appearance)*	
4.	Esomeprazole degrades rapidly in acidic solutions; more than 80% of esomeprazole drug substance is degraded within 10 minutes. Therefore, it is not relevant to quantitatively determine the amount and rate of esomeprazole dissolution under acidic conditions as per PAR of the Medicines Evaluation Board in the Netherlands https://db.cbg-meb.nl/pars/h106235.pdf However, CDP report submitted by firm revealed that Esomeprazole Drug substance did not release (found undetected) in acid medium (0.1N HCl) and acetate buffer medium (pH 6.8). Justify it.	*Esomeprazole is acid liable in nature so, it will rapidly degrade in acidic mediums (0.1N HCl & Acetate buffer pH 4.5) within 10 minutes. Hence, because of the complete degradation of esomeprazole it does not quantified in the sample while analyzing on chromatographic system so we describe the absence of esomeprazole peak as a term not detected i.e. ND*	Justified
5.	Provide Drug excipients compatibility study report for Microcrystalline cellulose and Magnesium Carbonate, being qualitatively different from innovator product.	*Microcrystalline Cellulose (Avicel PH 101) is used as a diluent. Magnesium carbonate is incorporated into the coating solution as opacifier that improve product appearance and protect the Esomeprazole from light. Both excipients contribute in product processing performance and finished product quality attributes. Thus, the development of an optimized formulation/process*	Firm has to perform Drug excipients compatibility study or provide relevant literature reference wherein aforementioned excipients found compatible with Drug substance.

		requires the addition of Microcrystalline Cellulose (Avicel PH 101) and Magnesium carbonate in order to obtain product with satisfactory physical and chemical parameters. *The product kept on stability and no changes observed in physical and chemical parameters throughout the shelf life.* *Stability studies demonstrated the compatibility of the formulation excipients with the drug substance.* *Because stability studies are one of the techniques for Drug-Excipients compatibility studies.*	
6.	Method used for analysis of API from both API Manufacturer and Finished Product Manufacturer to be provided	Provided	complied
7.	Certificate of Analysis of API from finished product manufacturer has not been provided	Provided	complied

8.	Stability study data of API from API manufacturer to be provided.	Stability data of both API is submitted as follows: **Naproxen** Batch No M5M042 M5M043 M5M042 Real time: 30°C ± 2°C / 65% ± 5%RH for 60 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months **Esomeprazole** Batch No ESM-M/089 ESM-SPC/100 ESM-SPC/001 Real time: 30°C ± 2°C / 65% ± 5%RH for 60 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months	complied

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Registration letter will be issued after performance of Drug excipient compatibility study or relevant literature reference to be provided wherein aforementioned excipients found compatible with Drug substance**.

a) Registration applications of drugs for which stability study data is submitted for exemption from onsite verification of stability data

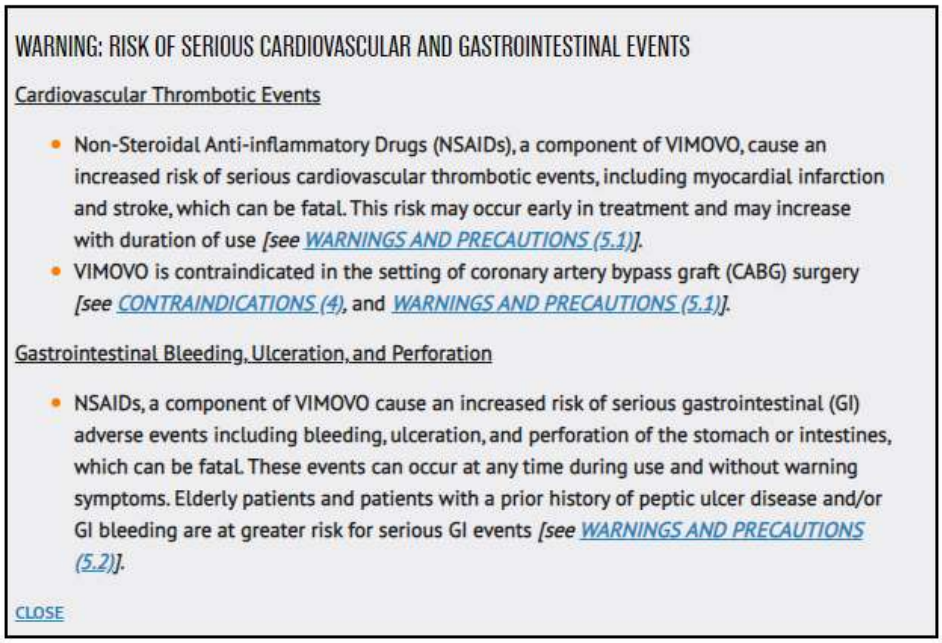
14.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Assessor (DD-PEC XX):

Formulation is approved in USFDA with Box warning:



WARNING: RISK OF SERIOUS CARDIOVASCULAR AND GASTROINTESTINAL EVENTS

Cardiovascular Thrombotic Events

- Non-Steroidal Anti-inflammatory Drugs (NSAIDs), a component of VIMOVO, cause an increased risk of serious cardiovascular thrombotic events, including myocardial infarction and stroke, which can be fatal. This risk may occur early in treatment and may increase with duration of use *[see WARNINGS AND PRECAUTIONS (5.1)]*.
- VIMOVO is contraindicated in the setting of coronary artery bypass graft (CABG) surgery *[see CONTRAINDICATIONS (4)*, and *WARNINGS AND PRECAUTIONS (5.1)]*.

Gastrointestinal Bleeding, Ulceration, and Perforation

- NSAIDs, a component of VIMOVO cause an increased risk of serious gastrointestinal (GI) adverse events including bleeding, ulceration, and perforation of the stomach or intestines, which can be fatal. These events can occur at any time during use and without warning symptoms. Elderly patients and patients with a prior history of peptic ulcer disease and/or GI bleeding are at greater risk for serious GI events *[see WARNINGS AND PRECAUTIONS (5.2)]*.

CLOSE

S.No	Observations	Reply	Remarks
1.	Formulation/label claim to be standardized in line with RRA, as follows: Napra MR 375/20mg Tablet Each modified release tablet contains: Naproxen ……... 375mg (enteric coated core) Esomeprazole (as Magnesium trihydrate) …… 20mg (immediate release outer coating)	Firm has submitted fee of Rs 30,000/- for correction of label claim in line with RRA as: Napra MR 375/20mg Tablet Each modified release tablet contains: Naproxen ……... 375mg (enteric coated core) Esomeprazole (as Magnesium trihydrate) …… 20mg (immediate release outer coating)	Complied
2.	Provide updated GMP status of finished product manufacturer along with relevant section approval letter.	Firm has submitted updated GMP status of finished product manufacturer dated 15.06.2021valid till two years	Complied
3.	Enteric coating solution, seal coating solution, Esomeprazole magnesium coating solution and film coating solution was prepared 30% in excess	*To obtain optimum results Enteric coating solution, seal coating solution, Esomeprazole magnesium*	

	to compensate loss during coating (as provided in stability BMR) Justify it.	*coating solution and film coating solution was prepared 30% in excess* *(required dissolution, complete covering, desired assay and uniform appearance)*	
4.	Esomeprazole degrades rapidly in acidic solutions; more than 80% of esomeprazole drug substance is degraded within 10 minutes. Therefore, it is not relevant to quantitatively determine the amount and rate of esomeprazole dissolution under acidic conditions as per PAR of the Medicines Evaluation Board in the Netherlands https://db.cbg-meb.nl/pars/h106235.pdf However, CDP report submitted by firm revealed that Esomeprazole Drug substance did not release (found undetected) in acid medium (0.1N HCl) and acetate buffer medium (pH 6.8). Justify it.	*Esomeprazole is acid liable in nature so, it will rapidly degrade in acidic mediums (0.1N HCl & Acetate buffer pH 4.5) within 10 minutes. Hence, because of the complete degradation of esomeprazole it does not quantified in the sample while analyzing on chromatographic system so we describe the absence of esomeprazole peak as a term not detected i.e. ND*	Justified
5.	Provide Drug excipients compatibility study report for Microcrystalline cellulose and Magnesium Carbonate, being qualitatively different from innovator product.	*Microcrystalline Cellulose (Avicel PH 101) is used as a diluent. Magnesium carbonate is incorporated into the coating solution as opacifier that improve product appearance and protect the Esomeprazole from light. Both excipients contribute in product processing performance and finished product quality attributes. Thus, the development of an optimized formulation/process requires the addition of Microcrystalline Cellulose (Avicel PH 101) and Magnesium carbonate in order to obtain product with satisfactory physical and chemical parameters.* *The product kept on stability and no changes*	Firm has to either perform Drug excipients compatibility study or provide relevant literature reference wherein aforementioned excipients found compatible with Drug substance.

		observed in physical and chemical parameters throughout the shelf life. Stability studies demonstrated the compatibility of the formulation excipients with the drug substance. Because stability studies are one of the techniques for Drug-Excipients compatibility studies.	
6.	Method used for analysis of API from both API Manufacturer and Finished Product Manufacturer to be provided	Provided	complied
7.	Certificate of Analysis of API from finished product manufacturer has not been provided	Provided	complied
8.	Stability study data of API from API manufacturer to be provided.	Stability data of both API is submitted as follows: **Naproxen** Batch No M5M042 M5M043 M5M042 Real time: 30°C ± 2°C / 65% ± 5%RH for 60 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months **Esomeprazole** Batch No ESM-M/089 ESM-SPC/100 ESM-SPC/001 Real time: 30°C ± 2°C / 65% ± 5%RH for 60 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months	complied

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**

- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Registration letter will be issued after performance of Drug excipient compatibility study or relevant literature reference to be provided wherein aforementioned excipients found compatible with Drug substance**.

Routine applications.

Remarks of Assessor DD PECXX:

Firm has submitted reply as follows:

Sr.#	Observation	Reply	Remarks
1.	Valid Approval of API/ DML/GMP certificate of API i.e Metformin HCl manufacturer issued by concerned regulatory authority of country of origin	Firm has provided Retention of License No G/25/2038 dated 21.03.2014 valid from 21.03.2019 to 20.03.2024 issued by Food and Drug Control Administration Gujrat state. Product permission to manufacture Metformin HCl valid from 21.03.2019 to 20.03.2024 issued by Food and Drug Control Administration Gujrat state.	Complied

2.	Results of specificity parameter along with HPLC chromatograms (sample, standard and blank) of Metformin HCl has not been provided under Analytical method verification study of Drug Substance.	Provided	Complied
3.	As per public assessment report of innovator product Dissolution to be analyzed by HPLC method while applicant mentioned dissolution of Metformin HCl by UV-Vis spectroscopic method. Justify it	We have developed the Empagliflozin, Metformin and Dapagliflozin, Metformin combinations. We followed the same dissolution procedure for metformin HCl for both products. The reference of which is provided by FDA for Metformin HCl in Empagliflozin, Metformin Tablets, CENTER FOR DRUG EVALUATION AND RESEARCH, APPLICATION NUMBER:206111Orig1s000, which describes on Page 4, the Dissolution of Metformin HCl on HPLC/UV or UV spectrophotometry. We did validation by UV-VIS spectrophotometer and used for Metformin HCL dissolution in both products.	Verified UV spectrophotometry was mentioned to interchangeably use to determine Metformin HCl in dissolution method.
4.	The finished product specification and stability testing includes quality parameter of microbiological testing as per public assessment report of innovator product while same has not been performed by the applicant. https://www.ema.europa.eu/en/documents/assessment-report/xigduo-epar-public-assessment-report_en.pdf)	Microbiological testing reports of stability batches are provided	Complied
5.	Stability data including Raw data sheet and BMR of stability batches is not provided.	Provided	Complied
6.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has provided copy of commercial invoice No ZY19101701G/W dated Oct 17,2019 wherein	Complied

		Dapagliflozin propanediol monohydrate 500g was purchased Batch No 7100-201910001. Approved by DRAP dated 24.10.2019 Copy of commercial invoice No EXP/1456/20-21 dated 19/08/2020 wherein Metformin HCl 1000Kg was purchased Batch No MEF/10082862. Approved by DRAP dated 21.09.2020.	
Remarks: The reply submitted against above mentioned shortcomings found satisfactory.			

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Firm has summarized information related to nomenclature, structure, general properties, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module III (Drug Substance)	Firm has submitted detailed data for both drug substance data related to nomenclature, structure, general properties, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies	Stability study conditions: (Dapagliflozin propanediol monohydrate) Real time: 30°C ± 2°C / 65% ± 5%RH for 36 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: (130401, 130402, 130501) Stability study conditions: (Metformin HCl) Real time: 30°C ± 2°C / 65% ± 5%RH for 60 months Batch No MEF/1410027, MEF/1410028, MEF/1410029 Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months

		Batch No: MET/17010010, MET/17010011, MET/17010012.
	Module-III (Drug Product):	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the innovator that is Xigduo film-coated tablets, by Bristol-Myers Squibb/AstraZeneca (Batch No Z454A) by performing quality tests including Description, Average weight, Assay, Disintegration etc against Test product Dapa-Met 5/1000mg Batch No T-0001TAO CDP has been performed against the same brand that is Xigduo film-coated tablets (Batch No Z454A) by Bristol-Myers Squibb/AstraZeneca in 0.1N HCl (QC medium), Acid media (0.1N HCl), acetate buffer pH 4.5 & Phosphate Buffer pH 6.8 against Test product Dapa-Met 5/1000mg Batch No T-0001TAO. The % drug release at 15 min was greater than 85% of both Test product and reference product hence f2 value was not calculated.
	Analytical method validation/verification of product	Firm has submitted report of validation studies of Drug Product.

STABILITY STUDY DATA			
Manufacturer of API	Dapagliflozin: Jiangsu Yongan Pharmaceutical Co Ltd 18 Provincial Highway 237, Huaian Economic Development zone, Jiangsu. Metformin HCl: Aarti Drugs Ltd (Unit II) Plot No 211 & 213 Road 2 G.I.D.C At & Post Sarigam		
API Lot No.	Metformin HCl Monohydrate MEF/10082862	Dapagliflozin Propanediol 7100-201910001	
Description of Pack (Container closure system)	Alu—Alu Blister packed in unit carton		
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 1, 2, 3, 6 (Months) Real Time: 0, 3, 6 (Months)

Manufacturing Date	09-11-2020	09-11-2020	03-12-2020
Date of Initiation	08-01-2021	08-01-2021	08-01-2021
No. of Batches	03		
Administrative Portion			
Reference of previous approval of applications with stability study data of the firm (if any)	Not provided		

Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Dapagliflozin: Firm has submitted GMP certificate No JS2020921 in the name of Jiangsu Yongan Pharmaceutical Co Ltd 18 Provincial Highway 237, Huaian Economic Development zone, Jiangsu valid till 20.09.2025 Metformin HCl: Firm has submitted GMP certificate No. 20031933 in the name of M/s Aarti Drugs Ltd (Unit II) Plot No 211 & 213 Road 2 G.I.D.C At & Post Sarigam, valid till 19.03.2023
Documents for the procurement of API with approval from DRAP (in case of import).	Not provided
Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted stability data in the form of COA summary data sheets and chromatograms. Raw data sheet and BMR of stability batches is not provided.
Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted.
Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator:

Sr.#	Observation	Reply	Remarks
1.	Valid Approval of API/ DML/GMP certificate of API i.e Metformin HCl manufacturer issued by concerned regulatory authority of country of origin	Firm has provided Retention of License No G/25/2038 dated 21.03.2014 valid from 21.03.2019 to 20.03.2024 issued by Food and Drug Control Administration Gujrat state. Product permission to manufacture Metformin HCl valid from 21.03.2019 to 20.03.2024 issued by Food and Drug Control Administration Gujrat state.	Complied
2.	Results of specificity parameter along with HPLC chromatograms (sample, standard and blank) of Metformin HCl has not been provided under Analytical method verification study of Drug Substance.	Provided	Complied
3.	As per public assessment report of innovator product Dissolution to be analyzed by HPLC method while applicant mentioned dissolution of Metformin HCl by UV-Vis spectroscopic method. Justify it	We have developed the Empagliflozin, Metformin and Dapagliflozin, Metformin combinations. We followed the same dissolution procedure for metformin HCl for both products.	Verified UV spectrophotometry was mentioned to interchangeably use to determine Metformin HCl in

		The reference of which is provided by FDA for Metformin HCl in Empagliflozin, Metformin Tablets, CENTER FOR DRUG EVALUATION AND RESEARCH, APPLICATION NUMBER:206111Orig1s000, which describes on Page 4, the Dissolution of Metformin HCl on HPLC/UV or UV spectrophotometry. We did validation by UV-VIS spectrophotometer and used for Metformin HCL dissolution in both products.	dissolution method.
4.	The finished product specification and stability testing includes quality parameter of microbiological testing as per public assessment report of innovator product while same has not been performed by the applicant. https://www.ema.europa.eu/en/documents/assessment-report/xigduo-epar-public-assessment-report_en.pdf)	Microbiological testing reports of stability batches are provided	Complied
5.	Stability data including Raw data sheet and BMR of stability batches is not provided.	Provided	Complied
6.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has provided copy of commercial invoice No ZY19101701G/W dated Oct 17,2019 wherein Dapagliflozin propanediol monohydrate 500g was purchased Batch No 7100-201910001. Approved by DRAP dated 24.10.2019 Copy of commercial invoice No EXP/1456/20-21 dated 19/08/2020 wherein Metformin HCl 1000Kg was purchased Batch No MEF/10082862. Approved by DRAP dated 21.09.2020.	Complied
Remarks: The reply submitted against above mentioned shortcomings found satisfactory.			

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

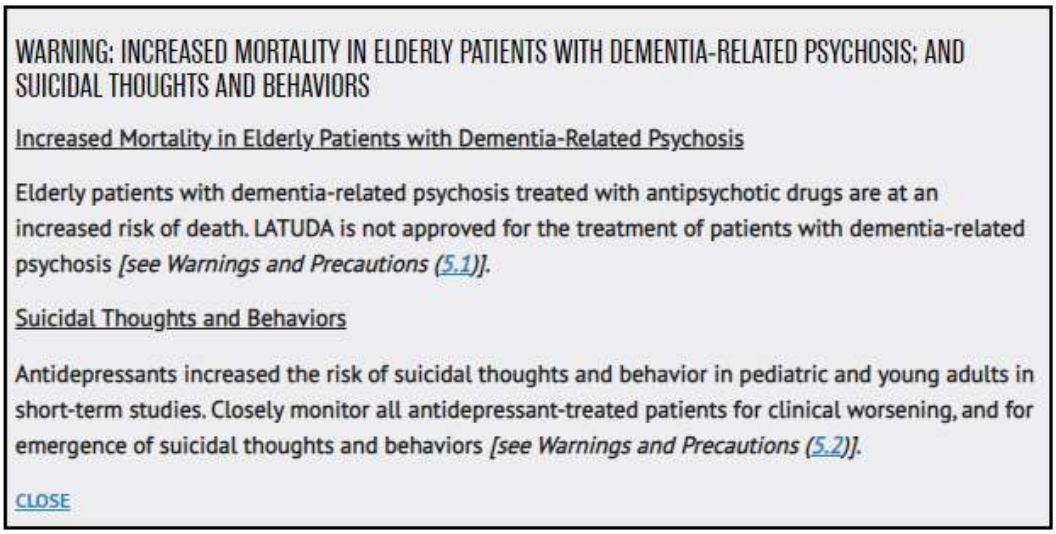
Remarks of Assessor (DD PEC XX):

Box warning by USFDA for approved product as follows:



WARNING: INCREASED MORTALITY IN ELDERLY PATIENTS WITH DEMENTIA-RELATED PSYCHOSIS; AND SUICIDAL THOUGHTS AND BEHAVIORS

Increased Mortality in Elderly Patients with Dementia-Related Psychosis

Elderly patients with dementia-related psychosis treated with antipsychotic drugs are at an increased risk of death. LATUDA is not approved for the treatment of patients with dementia-related psychosis *[see Warnings and Precautions (5.1)]*.

Suicidal Thoughts and Behaviors

Antidepressants increased the risk of suicidal thoughts and behavior in pediatric and young adults in short-term studies. Closely monitor all antidepressant-treated patients for clinical worsening, and for emergence of suicidal thoughts and behaviors *[see Warnings and Precautions (5.2)]*.

CLOSE

S.No	Observation	Reply	Remarks

1.	The finished product specification and stability testing includes quality parameter of microbiological testing and water content as per public assessment report of innovator product while same has not been performed by the applicant. (microbial test performed at initial time point only https://www.ema.europa.eu/en/documents/assessment-report/latuda-epar-public-assessment-report_en.pdf	Water content test was performed during development study but not included in specification. Now firm has submitted revised specification wherein water content test was included. Moreover, microbiological testing will be performed at 24th month as well. As incorporated in protocol.	Complied Fee of Rs 7500/- to be submitted on account of pre-registration variation.
2.	Documents for the procurement of API with approval from DRAP (in case of import).	Not provided	Not complied Name of API manufacturer mentioned on submitted documents is different.
3.	Stability data including summary data sheet, COA, raw data sheet and chromatograms for 6th month and onward (both accelerated and real time) to be provided.	Stability data including summary data sheet, COA, raw data sheet and chromatograms for 6th month was already submitted dated 07.06.2022	Verified

Decision: Deferred for following submissions:

- **Submission of documents for the procurement of API with approval from DRAP**
- **Submission of fee for pre-approval variation in finished product specification as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.**

	Details of fee submitted	PKR 30,000/-: dated 27/1/2022
	The proposed proprietary name / brand name	Obico Tablet 5mg
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated tablet contains: - Obeticholic acid……....5mg
	Pharmaceutical form of applied drug	Film coated tablet
	Pharmacotherapeutic Group of (API)	Bile Acid and Derivatives (A05AA04)
	Reference to Finished product specifications	Not mentioned
	Proposed Pack size	10's, 20's and 30's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	USFDA approved
	For generic drugs (me-too status)	Abeticholic acid tablet 5mg M/s Dyson Research Lab Reg No 109521
	GMP status of the Finished product manufacturer	GMP certificate based on inspection dated 13.01.2022 valid for two years. Tablet General section has been approved vide DML renewal approval letter dated 30.10,2019
	Name and address of API (pellets) manufacturer.	M/s Zenji Pharmaceuticals (SUZHOU) Ltd No 122 Xuquin Road, Xuguan town, Suzhou, Jiangsu, China.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, Solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The firm has submitted detail of nomenclature, structure, general properties, solubility, physical

		form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 25°C ± 2°C / 60% ± 5%RH for 12 months Accelerated: 2-8° C for 6 months Batches: B#3A421912241, B#3A421912191, B# 3A421912131
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the innovator product that is Ocaliva Tablet Batch No CE00030H by Intercept Pharma (Dublin Ireland) by performing quality tests (Appearance, Assay, Dissolution, weight Variation) against Test product Obico Tablet 10mg. Batch No 543DS02 CDP has been performed against the same brand that is Ocaliva Tablet Batch No CE00030H in Acid media (pH 1.0-1.2), Acetate Buffer (pH 4.5) and Phosphate Buffer (pH 6.8). The values for f1 and f2 are in the acceptable range.
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.

STABILITY STUDY DATA	
Manufacturer of API (pellets)	M/s Zenji Pharmaceuticals (SUZHOU) Ltd No 122 Xuquin Road, Xuguan town, Suzhou, Jiangsu, China.
API Lot No.	1778-145-18
Description of Pack (Container closure system)	Alu-Alu blister packed in unit carton (10's,20's and 30's)
Stability Storage Condition	Real time: 30°C ± 2°C / 75% ± 5%RH

	Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3,6 (Months) Real Time: 0, 3,6,9,12 (Months)		
Batch No.	543DS01	543DS02	543DS03
Batch Size	2500 tablets	2500 tablets	2500 tablets
Manufacturing Date	07-2020	08-2020	08-2020
Date of Initiation	01-09-2020	01-09-2020	01-09-2020
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Nil
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of DML No Su 20170537 dated 07.12.2020 valid till 22.11.2025 issued by Jiangsu Drug Administration.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted documents for import of 0.75Kg of Obeticholic acid (Batch No 1778-145-18) invoice no. 20ATGZ083 dated 17.06.2020 . Attested by DRAP (I&E, Islamabad) dated 26.06.2020
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Provided
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Provided
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Provided

Remarks of Assessor (DD PEC XX):

Sr.#	Observation	Reply	Remarks

1.	Analytical Method Verification studies of Drug Substance including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer to be provided	Provided	HPLC chromatograms for different parameters tested (specificity, accuracy and repeatability etc) during verification study have not been provided Moreover data of specificity Parameter has not been provided
2.	Complete CDP report to be provided along with calculation of f1 and f2 values	Provided	Complied CDP has been performed against the same brand that is Ocaliva Tablet Batch No CE00030H in Acid media (pH 1.0-1.2), Acetate Buffer (pH 4.5) and Phosphate Buffer (pH 6.8) against Test product i.e Batch No 543DS02
3.	Physicochemical characteristics of the active substance that impact the quality of the finished product are particle size distribution which plays a critical role in the content uniformity and dissolution of the tablets. https://www.ema.europa.eu/en/documents/assessment-report/ocaliva-epar-public-assessment-report_en.pdf However, particle size distribution of active substance has not been controlled /performed either by Drug substance or Dug product manufacturer	Updated CoA from DS manufacturer is provided wherein particle size distribution has been performed	Complied

4.	Title of Drug substance manufacturer mentioned on GMP /DML as M/s Zenji Pharmaceuticals (SUZHOU) Ltd while title of manufacturer mentioned on commercial invoice as Jiangsu Zenji Pharmaceuticals Ltd. Clarify it.	Declaration has been provided from M/s Zenji Pharmaceuticals (SUZHOU) i.e M/s Zenji Pharmaceuticals (SUZHOU) is subsidiary company of Jiangsu Zenji Pharmaceuticals Ltd. However the production site is M/s Zenji Pharmaceuticals (SUZHOU) No 122 Xuquin Road, Xuguan town, Suzhou, Jiangsu, China.	Complied

Remarks: The reply submitted against above mentioned shortcomings was found unsatisfactory

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Registration letter will be issued after submission of results of specificity Parameter under Analytical Method Verification studies of Drug Substance**

<tr><td colspan="3">Discussion & Decision: Registration Board was apprised regarding the CDP results of applied formulation from two different applicants i.e., M/s Horizon Healthcare and M/s NabiQasim Industries wherein conflicting results were reported despite of using same reference product i.e TWYMEEG Tablet 500mg.
In the CDP data presented by M/s Horizon Healthcare maximum drug release was reported in phosphate buffer of pH 6.8 while the CDP data of M/s Nabiqasim Industries reported minimum drug release in phosphate buffer of pH 6.8.</td></tr>
</table>

On basis of above cited observation Board decided to defer the instant application for justification of the reported results of CDP studies, with reference to the innovator drug product literature.

Reply:

Now M/s Horizon Healthcare, Lahore and M/s Nabiqasim Industries, Karachi have submitted reply as follows:

Comparison of Dissolution profile results of Twymeeg Tablet 500 mg

tested by Horizon Healthcare (Pvt.) Ltd. And Nabiqasim Industries (Pvt.) Ltd.

Dissolution Media (Phosphate Buffer pH 6.8)		
Time Point (min)	Twymeeg dissolution analyzed by Horizon (%)	Twymeeg dissolution analyzed by Nabiqasim (%)
5	42.11	-
10	68.32	51.57
15	86.14	67.85
20	90.71	86.62
30	97.78	97.33
45	96.99	97.59
60	96.61	97.54

Dissolution Media (Acetate Buffer pH 4.5)		
Time Point (min)	Twymeeg dissolution analyzed by Horizon (%)	Twymeeg dissolution analyzed by Nabiqasim (%)
5	24.99	-
10	45.97	46.79
15	63.50	68.07
20	74.91	80.56
30	84.27	87.32
45	93.49	88.28
60	93.47	88.51

Dissolution Media (0.1 M Hydrochloric Acid)		
Time Point (min)	Twymeeg dissolution analyzed by Horizon (%)	Twymeeg dissolution analyzed by Nabiqasim (%)
5	24.26	-
10	43.90	67.10

15	62.04	86.30
20	71.92	95.94
30	92.79	-
45	93.11	-
60	92.77	-

It is evident from above cited results that more than 80% of drug release is achieved within 30 minutes in all three dissolution medias of pH 1.2, 4.5 and 6.8, hence it could be stated that the average results comply the profile of an immediate release drug product and there is no major disparity among the release profile of innovator product submitted by both firms. The only slight variation in results at few time points of 0.1N HCl may please be attributed to the analytical variation

Remarks of Assessor (DD PECXX):

Although more than 80% of drug release is achieved within 30 minutes in all three dissolution medias of pH 1.2, 4.5 and 6.8 yet striking differences in CDP profile were observed at 15min.

Both firms may be asked to submit packs of innovator product of relevant batch no, used in performing CDP.

Submitted for consideration of Registration Board please.

Discussion & Decision: Registration Board considered the fact that the resulst of f2 similarity factor were above 50, for the Dissolution profiles of the innovator product by M/s NabiQasim Industries & M/s Horizon Laboratories, hence Board decided to approve Imeglu Tablet 500mg of M/s Horizon Healthcare.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Revise API specifications for QC release having Residue on ignition test is provided</td><td>Complied

Firm has submitted revised analytical testing method and CoA, wherein “Residue on ignition” is tested, by Finished product manufacturer.</td></tr>
<tr><td>2.</td><td>The proposed specification of Drug Product includes uniformity of dosage units (mass variation test) as per Report on deliberation results of Twymeeg Tablets 500 mg by PMDA same has not been tested by finished product manufacturer. Justify it</td><td>We have previously submitted COAs of Imeglimin HCl Tablets 500mg at Initial testing having uniformity of dosage units by mass variation test same enclose in for ready reference.

We also conducted weight variation test as on today basis, results of the same are enclose in Annexure-B.</td><td>Complied

Uniformity of dosage units was performed at initial testing in stability studies , same was mentioned in CoA (NMT 15)</td></tr>
</table>

3.	3% overage is added to compensate water content as mentioned in batch formula, need further deliberation.	In formulation of Imeglimin HCl Tablet, there is no bulking agent used for potency adjustment so potency calculation is set on basis of results of water content as Drug substance having maximum limit of 5% water content , we have set median limit of 3% water content in our batch formula to comply the product assay results on QC release specifications i.e. 95% - 105% of label claim to assure product quality for patient compliance.	

Discussion & Decision 324th meeting : Registration Board was apprised regarding the CDP results of applied formulation from two different applicants i.e., M/s Horizon Healthcare and M/s Nabiqasim Industries wherein conflicting results were reported despite of using same reference product i.e TWYMEEG Tablet 500mg.

In the CDP data presented by M/s Horizon Healthcare maximum drug release was reported in phosphate buffer of pH 6.8 while the CDP data of M/s Nabiqasim Industries reported minimum drug release in phosphate buffer of pH 6.8.

On basis of above cited observation Board decided to defer the instant application for justification of the reported results of CDP studies, with reference to the innovator drug product literature along with scientific justification of using 3%overage of drug substance in the drug product formulation.

Reply:

Now M/s Horizon Healthcare, Lahore and M/s Nabiqasim Industries, Karachi have submitted reply as follows:

Comparison of Dissolution profile results of Twymeeg Tablet 500 mg

tested by Horizon Healthcare (Pvt.) Ltd. And Nabiqasim Industries (Pvt.) Ltd.

Dissolution Media (Phosphate Buffer pH 6.8)		
Time Point (min)	Twymeeg dissolution analyzed by Horizon (%)	Twymeeg dissolution analyzed by Nabiqasim (%)
5	42.11	-
10	68.32	51.57
15	86.14	67.85
20	90.71	86.62
30	97.78	97.33
45	96.99	97.59
60	96.61	97.54

Dissolution Media (Acetate Buffer pH 4.5)		
Time Point (min)	Twymeeg dissolution analyzed by Horizon (%)	Twymeeg dissolution analyzed by Nabiqasim (%)
5	24.99	-
10	45.97	46.79
15	63.50	68.07
20	74.91	80.56
30	84.27	87.32
45	93.49	88.28
60	93.47	88.51

Dissolution Media (0.1 M Hydrochloric Acid)		
Time Point (min)	Twymeeg dissolution analyzed by Horizon (%)	Twymeeg dissolution analyzed by Nabiqasim (%)
5	24.26	-
10	43.90	67.10
15	62.04	86.30
20	71.92	95.94
30	92.79	-
45	93.11	-
60	92.77	-

It is evident from above cited results that more than 80% of drug release is achieved within 30 minutes in all three dissolution medias of pH 1.2, 4.5 and 6.8, hence it could be stated that the average results comply the profile of an immediate release drug product and there is no major disparity among the release profile of innovator product submitted by both firms. The only slight variation in results at few time points of 0.1N HCl may please be attributed to the analytical variation.

Regarding scientific justification of using 3% overage of drug substance in the drug product formulation M/s Nabiqasim submitted that since there is no bulking agent used for potency adjustment so potency calculation is set on basis of results of water content as Drug substance having maximum limit of 5% water content , we have set median limit of 3% water content in our batch formula to comply the product assay results on QC release specifications i.e. 95% -105% of label claim to assure product quality for patient compliance.

Water content in API testing achieve is 2.94% and Assay of API calculated on As is basis found to be 97.61%. On the basis of above assay result on as is basis quantity of Imeglimin HCl is calculated for batch manufacturing as: 500 x 100/97.6 = 512mg Remarks of Assessor (DD PECXX): Although more than 80% of drug release is achieved within 30 minutes in all three dissolution medias of pH 1.2, 4.5 and 6.8 yet striking differences in CDP profile were observed at 15min. Both firms may be asked to submit packs of innovator product of relevant batch no, used in performing CDP. Submitted for consideration of Registration Board please.
Discussion & Decision: Registration Board considered the fact that the resulst of f2 similarity factor were above 50, for the Dissolution profiles of the innovator product by M/s NabiQasim Industries & M/s Horizon Laboratories, hence Board decided to approve Meglim Tablet 500mg of M/sNabiQasim Industries. • **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.** • **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

	Reference to Finished product specifications	Inhouse
	Proposed Pack size	28's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Reference Product: TASIGNA FDA approved By M/s Novartis pharmaceuticals.
	For generic drugs (me-too status)	N/A
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Name, address of drug substance manufacturer	HETERO labs limited. 7-2-A2 Industrial Estates Sanath Nagar, Hyderabad, Telangana, India
	Module-III Drug Substance:	Firm has submitted detailed of drug substance related to nomenclature, structure, Elucidation and characteristics, general properties, solubility , physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of API at accelerated as well as real time conditions. The real time stability data is conducted at Temperature 40 ± 2° Relative humidity 75 ±5% RH. The long-term stability study data at Temperature 25 ± 2° Relative humidity 60 ±5% RH. till 60 months.

	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability. Product development data has been submitted from HETERO labs limited. 7-2-A2 Industrial Estates Sanath Nagar, Hyderabad, Telangana, India, product has been manufactured by technology transfer from HETERO labs limited.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted Comparative Dissolution Profile for the applied product as follows Test Product Neonib 200mg capsule B.No NIL-H0200-F128 Reference product Tasigna 200mg capsule B.No F0034 Medium 0.1NHCl media (pH 1.0-1.2) f2 value has been calculated which was within acceptable range CDP has been performed by HETERO labs limited.7-2-A2 Industrial Estates Sanath Nagar, Hyderabad, Telangana, India
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies from HETERO labs limited.7-2-A2 Industrial Estates Sanath Nagar, Hyderabad, Telangana, India
	Container closure system of the drug product	Container: High Density Polyethylene (HDPE) Container 60 cc

		Closure: Child resistant plastic caps with pulp liners 30mm
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches of drug product. The accelerated stability study data is conducted at 40oC ±2oC / 75% ± 5% RH for 6 months. The real time stability study data is conducted at 30oC ±2oC / 75% ± 5% RH. The real time stability study data of all 3 batches is submitted till 18 months. Batch size 50000 capsules Batch No C1905 C1906 C1903

Remarks by Assessor (AD-PECXX):

Product development data, CDP and analytical method validation studies has been performed by HETERO labs limited.7-2-A2 Industrial Estates Sanath Nagar, Hyderabad, Telangana, India, as submitted by manufacturer that product has been manufactured by technology transfer from HETERO labs limited hence all development research performed by this company.

USFDA approved box warning about Tasigna (Nilotinib) 200mg capsule as follows:

TASIGNA® (nilotinib) capsules, for oral use
Initial U.S. Approval: 2007

WARNING: QT PROLONGATION AND SUDDEN DEATHS

See full prescribing information for complete boxed warning.

- **Tasigna prolongs the QT interval. Prior to Tasigna administration and periodically, monitor for hypokalemia or hypomagnesemia and correct deficiencies (5.2). Obtain ECGs to monitor the QTc at baseline, seven days after initiation, and periodically thereafter, and following any dose adjustments (5.2, 5.3, 5.7, 5.15).**
- **Sudden deaths have been reported in patients receiving nilotinib (5.3). Do not administer Tasigna to patients with hypokalemia, hypomagnesemia, or long QT syndrome (4, 5.2).**
- **Avoid use of concomitant drugs known to prolong the QT interval and strong CYP3A4 inhibitors (5.8).**
- **Avoid food 2 hours before and 1 hour after taking the dose (5.9).**

----------RECENT MAJOR CHANGES----------

S.No	Observations	Reply	Remarks
1.	Firm has submitted DSL (License No: 01-374-0006-049485D) (Validity 19-01-2022). Submit valid DSL	Firm has submitted copy of valid DSL (License No: 01-374-0006-96845D) (Validity 04-08-2024)	Complied

2.	The title of importer mentioned on sole agency agreement mentioned as M/s Lab Diagnostic Systems (SMC) Pvt. Ltd while title mentioned on DSL as M/s Lab Diagnostic Systems Pvt. Ltd. Clarify it	Title mentioned on new DSL is M/s Lab Diagnostic Systems (SMC) Pvt. Ltd, same was mentioned in sole agency agreement	Verified
3.	Formulation approved in RRA (USFDA and MHRA) is Nilotinib (as Hydrochloride monohydrate) while applied formulation is Nilotinib (as Hydrochloride dihydrate). Provide reference of applied formulation.	Firm has provided declaration from Actero Middle East, Iran as follows: We, Actero Middle east Company hereby declare regarding the selection of API of Nilotinib Hydrochloride Dihydrate (Form-A), based on the Quality Target Product (QTPP) and formulation development study with the goal to develop a formulation that is similar to RLD (Tasigna®) with respect to dissolution profile. The attached IFDA approval of dissolution study (Attachment 1) confirms that the in-house formulation is similar to RLD. Meanwhile the IFDA approved In-vivo study (Attachment 2) proves that the quality and efficacy of Neonib® is similar to Tasigna® (RLD)	The attachments referred as 1 and 2 were approval letters from Iran Food and Drug Administration (IFDA) for conducting in vitro and in vivo studies rather than study performed.
4.	Provide Compatibility of the Drug Substance(s) with excipients (Dibasic calcium phosphate and Povidone K90) being qualitatively different from innovator product Tasigna 200mg capsule	Compatibility of the Drug Substance(s) with excipients (Dibasic calcium phosphate and Povidone K90) has been provided	Complied

5.	Since applied product has been manufactured by technology transfer from HETERO labs limited hence all development research was performed by this company. Agreement to be provided between HETERO labs limited and product manufacturer i.e Actero Middle East, Iran regarding technology transfer.	Agreement has been provided regarding technology transfer between HETERO labs limited, India and Actero Middle East, Iran.	Complied

Decision 324th meeting of RB: Deferred for following:

Submission of product development and method validation data from the manufacturer site i.e., M/s Actero Middle East on the corner of 8th Golestan, Sarvestan Blvd., Baharestan industrial zone, Karaj, Iran.

Scientific justification of variation of salt form of drug substance form that used in the innovator drug product formulation.

Updated submission:

S.No	Observation	Reply	Remarks
1.	Submission of product development and method validation data from the manufacturer site i.e., M/s Actero Middle East on the corner of 8th Golestan, Sarvestan Blvd., Baharestan industrial zone, Karaj, Iran.	Product development data performed at HETERO labs limited, India was again submitted. instead of product manufacturing site i.e M/s Actero Middle East on the corner of 8th Golestan, Sarvestan Blvd., Baharestan industrial zone, Karaj, Iran.	*Later on firm has provided product development data such as formulation development, Pharmaceutical equivalence/CDP, manufacturing process development and process validation protocol/report,*

			performed at manufacturing site i.e M/s Actero Middle East on the corner of 8th Golestan, Sarvestan Blvd., Baharestan industrial zone, Karaj, Iran. *However complete CDP report is required since provided document contain study performed at 0.1NHCl only.*
2.	Scientific justification of variation of salt form of drug substance form that used in the innovator drug product formulation.	The comparative In vitro and In vivo studies results confirms that our generic products meets the same requirements of innovator "Tasigna" and so it means no barriers and limitations to use Dihydrate salt instead of monohydrate salt. This can be proved by IFDA approval for Bioequivalence study (No 665/7473) dated 19.04.2020.	Both Test and Reference products were found equivalent in the result of in vitro (comparative dissolution profile) and in vivo analysis (Bio equivalence study).
Remarks	The reply submitted against above mentioned shortcomings found unsatisfactory		
Decision: Approved as per Policy for inspection of Manufacturer abroad. • **Before issuance of registration letter CDP (all three medium) to be submitted, performed at manufacturing site i.e M/s Actero Middle East on the corner of 8th Golestan, Sarvestan Blvd., Baharestan industrial zone, Karaj, Iran**			

Deferred case of 326th meeting of Registration Board:

1073	Name, address of Applicant / Importer	M/s Martin Dow Limited., Plot No. 37, Sector 19, Korangi Industrial Area, Karachi-74900, Pakistan.
	Details of Drug Sale License of importer	License No: 565 Address: Martin Dow Limited, Plot no. 37, Sector 19, Korangi Industrial Area, Karachi. Address of Godown: (a) 1st floor, Plot no. 211, Sector 23 Korangi Industrial Area, Karachi (b) Plot No 32, Sector 16, Korangi Industrial Area, Karachi

		Validity: 16-06-2024 Status: License to sell Drugs by way of Wholesale Renewal: Yes
	Name and address of marketing authorization holder (abroad)	EXELTIS HEALTHCARE, S.L. Av. Miralcampo 7 19200 Azuqueca de Henares (Guadalajara) España/Spain
	Name, address of manufacturer(s)	LABORATORIOS FARMALAN S.A. C/ La Vallina s/n, Edificio 2, Poligono Industrial Navatejera 24193 Villaquilambre (Leon) España/Spain
	Name of exporting country	Spain
	Detail of certificates attached (CoPP, Freesale certificate, GMP certificate)	CoPP: Firm has submitted original, legalized copy of COPP certificate (No. 2022/02191) dated 10-07-2020 issued by AGENCIA ESPAÑOLA DEL MEDICAMENTO Y PRODUCTOS SANITARIOS, Spain. Firm has submitted second original, legalized copy of CoPP certificate (No. 5.8.1-2022-64806) dated 22-08-2022 issued by Swedish Medical Products Agency. The CoPP confirms free sale status of the product in Sweden with different marketing authorization holder. The name of importing country on CoPPs is mentioned as Pakistan.
	Details of letter of authorization / sole agency agreement	Firm has submitted copy of letter of authorization from Chemo SA, Lugano branch. The letter specifies that Chemo SA, Lugano branch appoints M/s. Martin Dow Limited to register their products in Pakistan. The authorization letter is valid. Firm has also submitted a letter clarifying that Chemo has been entitled by the manufacturer and license holder to promote and distribute their product.
	Status of the applicant	☐ Manufacturer ☒ Importer ☐ Is involved in none of the above (contract giver)

	Status of application	☒ New Drug Product (NDP) ☐ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	For imported products, specify one the these	☒ Finished Pharmaceutical product import ☐ Buk import and local repackaging ☐ Buk import and local repackaging for export purpose only
	Dy. No. and date of submission	Dy. No. 31354 : 02-11-2022
	Details of fee submitted	PKR 150,000/-: 31-12-2021 ,Slip No.43533251754
	The proposed proprietary name / brand name	Vestant Solution for Injection in pre-filled syringe 250mg/5ml
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each ml contains: Fulvestrant…….50mg
	Pharmaceutical form of applied drug	Solution for Injection
	Pharmacotherapeutic Group of (API)	Anti-estrogens (ATC code: L02BA03)
	Reference to Finished product specifications	As per innovator
	Proposed Pack size	1's
	Proposed unit price	As per DPC
	The status in reference regulatory authorities	FASLODEX Injection of ASTRAZENECA (USFDA Approved).
	For generic drugs (me-too status)	Not available
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.

	Name, address of drug substance manufacturer	Industriale Chimica s.r.l. Address: Via E. H. Grieg 13, 21047 Saronno (Varese), Italy
	Module-III Drug Substance:	Firm has submitted detailed drug substance data for both sources related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of API at accelerated as well as real time conditions. The real time stability data is conducted at 5oC ± 3oC and accelerated at 25°C ± 2°C. The real time stability study data is till 5 years.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical Equivalence has been established with reference product FASLODEX Pre filled syringe 250mg/5ml by establishing comparative study of critical quality attributes.
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	Syringe 5mL Glass Type – I and Plunger Stopper
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches The accelerated stability study data is conducted at 25oC ±2oC / 60% ± 5% RH for 6 months. The real time stability study data is conducted at 5oC ±3oC. The real time stability study data of 3 batches is for 36 months.

Remarks of Evaluator:

Sr. No	Observations
01	COPP section 1.4 mentioned that this product is not actually on the market in the exporting country ,i-e Spain, please clarify.

02	Sole Agency agreement between Marketing Authorization Holder of Country of Export and Applicant, is required.
03	GMP certificate of API /Drug Substance manufacturer was granted by AIFA based on GMP inspection dated 21-09-2018 valid for 3 years, which is expired, valid copy is required please.

Previous Decision (M-324-DRB): Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.

Firm's response against letter No. F.1-1/2020/PEC-DRAP(DD PE&R/PEC):

Sr#	Observations	Response of firm
01	COPP section 1.4 mentioned that this product is not actually on the market in the exporting country, i.e. Spain, please clarify.	The product from this same manufacturer is marketed in Sweden, for which a copy of COPP from Swedish Medical Products Agency, Box 26, Dag Hammarskjolds vag 42, 751 03 Uppsala, Sweden for Pakistan has been submitted in the dossier.
02	Sole Agency agreement between Marketing Authorization Holder of Country of Export and Applicant, is required.	Sole agency agreement between the distributor i.e., Chemo SA, Lugano branch and applicant i.e., Martin Dow Limited has been submitted along with a clarification letter that Chemo SA, Lugano Branch (Distributor), Exeltis (MA Holder) and Laboratorio Farmalan (manufacturer) belong to one Insudpharma group.
03	GMP certificate of API /Drug Substance manufacturer was granted by AIFA based on GMP inspection dated 21-09-2018 valid for 3 years, which is expired, valid copy is required please.	Firm has submitted valid copy of GMP certificate of API/Drug substance manufacturer, i.e. Industriale Chimica s.r.l. Address: Via Edvard Hangerup Grieg 13, 21047 Saronno, Italy vide certificate No. NBF /2/2022/V based on inspection conducted on 2020-12-15 was valid for three years from date of inspection.
04	Finished Product analytical method validation report conducted by Finished Product manufacturer is required.	The methods of analysis of Fulvestrant 250 mg / 5 mL Solution for Injection prefilled syringe has been validated by Ricon Pharma and then transferred to Laboratorios Farmalan. Validation transfer reports of the analytical methods used for the control of Fulvestrant 250 mg / 5 mL Solution for Injection prefilled syringe are submitted
05	Stability study data revealed that batch no. 180002 at Accelerated condition of 25 degree Celsius with 60% relative humidity have significant deviation of Assay results more than 5%. Moreover, the same batch at real time stability study at 5 degree Celsius also revealed significant change in Assay results more than 5%. Please clarify.	No clarification is submitted

Decision: Deferred for submission of following:

Sole Agency agreement between Marketing Authorization Holder of Country of Export and Applicant

Finished Product analytical method validation report conducted by Finished Product manufacturer

Clarification as stability study data revealed that batch no. 180002 at Accelerated condition of 25ºC with 60% relative humidity have significant change of Assay results i.e., more than 5%.

Remarks of Assessor (DD PEC XX):

Firm has submitted reply against above mentioned shortcomings as follows:

S.No	Observation	Reply	Remarks
1.	Sole Agency agreement between Marketing Authorization Holder of Country of Export and Applicant, is required.	Sole Agency agreement (original/legalized) between Marketing Authorization Holder i.e EXELTIS HEALTHCARE, S.L. Av. Miralcampo 7 19200 Azuqueca de Henares (Guadalajara) España/Spain and Applicant i.e M/s Martin Dow Limited., Plot No. 37, Sector 19, Korangi Industrial Area, Karachi-74900, Pakistan.dated 03.05.2023 for authorization of Fulvestrant 250mg/5ml Pre filled syringe (brand name in Pakistan Vestant) The same has been notarized by Apostille as the embassy of Pakistan in the country of origin is no longer providing services of legalization after the accession of Pakistan in Hague Convention Abolishing the Requirement of Legalization for Foreign Public Documents (Apostille Convention) of 1961.	Complied
2.	Finished Product analytical method validation report conducted by Finished Product manufacturer is required.	Finished Product analytical method validation report conducted by Finished Product manufacturer i.e	Complied

		LABORATORIOS FARMALAN S.A.is submitted.	
3.	Clarification as stability study data revealed that batch no. 180002 at Accelerated condition of 25ºC with 60% relative humidity have significant change of Assay results i.e., more than 5%.	The out of trend result of Assay for Batch 180002 in upright position at T3 of Accelerated studies was evaluated and it was concluded that it is due to the intrinsic variability of the analytical method and not due to any degradation of product, which is also confirmed by the 97.2% assay result in horizontal position at the same conditions of accelerated T3 time point. Moreover, the assay results remained within specifications throughout the 36 months storage in long term conditions in both orientations (upright and horizontal) of syringe. Detailed clarification and discussion of OOT Results of Stability data along with signed statement given by Finished product manufacturer is provided.	Clarified The out of trend result for Batch 180002 in upright position at T3 of Accelerated studies was recorded as 91.2% (up right position) while assay result in horizontal position at the same conditions of accelerated T3 time point was recorded as 97.2%. Regarding real time stability study result for Batch 180002 in upright position at T3 was recorded as 95.1% (upright position) while assay result in horizontal position at the same conditions of real time studies T3 time point was recorded as 98.1% in horizontal position. Moreover, the assay results remained within specifications throughout the 36 months storage in long term conditions in both orientations (upright and horizontal) of syringe.

Remarks of Assessor (DD PEC XX):

The reply submitted against above mentioned shortcomings is found satisfactory

Decision: Approved as per Policy for inspection of Manufacturer abroad.

Deferred case of 326th meeting:

1074	Name, address of Applicant / Marketing Authorization Holder	M/s Med Asia Pharmaceuticals (Pvt) Limited Plot #7 Nowshera Industrial Estate Risalpur KPK Pakistan

	Name, address of Manufacturing site.	M/s Med Asia Pharmaceuticals (Pvt) Limited Plot #7 Nowshera Industrial Estate Risalpur KPK Pakistan
	Status of the applicant	☒ Manufacturer

		☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy No 610 dated 06.01.2023
	Details of fee submitted	PKR 30,000/- dated 01.12.2022
	The proposed proprietary name / brand name	Sulvipride 25 mg Tablets
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each tablet contains: Levosulpiride.....25 mg
	Pharmaceutical form of applied drug	Tablet
	Pharmacotherapeutic Group of (API)	Antipsychotic
	Reference to Finished product specifications	Innovator
	Proposed Pack size	As per SRO
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	LEVOPRAID 25 mg tablet by M/s TEOFARMA Srl - Via F.lli Cervi, AIFA Italy Approved
	For generic drugs (me-too status)	Vesulpid Tablets 25mg by M/s Martin Dow Pharmaceutical(Pakistan) Ltd, Reg. No. 041008
	GMP status of the Finished product manufacturer	New DML granted on 11/11/2021 Tablet General ,Capsule General ,Oral dry powder suspension General) section approved.
	Name and address of API manufacturer.	M/s Atlas Life Sciences Private Limited C-1/360-361, G.I.D.C Estate , Odhav, Ahmedabad – 382415, Gujarat,India.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and

		controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Levosulpiride is not present in any official monograph. The firm as submitted detail of nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, tests for related substances, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 60 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 12 months Batches:LSP0010415,LSP0020515,DC- LSP0030515
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure and its validation studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand leader that is Levopraid 25 mg tablet (Batch No AQ1801R) by Pacific pharmaceuticals by performing quality tests (Identification, Assay, Dissolution, Disintegration time and weight of tablet) against Test product i.e Sulvipride 25mg Tablet (Batch No T001) CDP has been performed against the same brand that is Levopraid 25mg Tablet by Pacific pharmaceuticals in Acid media (pH 1.0-1.2), Acetate medium (Ph 4.5) & Phosphate Buffer (pH 6.8). The values for f1 and f2 are in the acceptable range.
	Analytical method validation/verification of product	Method validation studies have submitted including linearity, range, accuracy, precision, specificity.
STABILITY STUDY DATA		
Manufacturer of API	M/s Atlas Life Sciences Private Limited C-1/360-361, G.I.D.C Estate , Odhav, Ahmedabad – 382415, Gujarat,India.	
API Lot No.	LSP0260120	
Description of Pack	Alu-Alu blister packed in unit carton	

(Container closure system)			
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	T-001	T-002	T-003
Batch Size	1000 tab	1000 tab	1000 tab
Manufacturing Date	6-2022	6-2022	6-2022
Date of Initiation	4-6-2022	4-6-2022	4-6-2022
No. of Batches	03		

Administrative Portion		
1	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.
2	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted GMP certificate No S-GMP/20021839 issued by Food and Drug Control Administration , Gujrat state India valid till 10.02.2022
3	Documents for the procurement of API with approval from DRAP (in case of import).	Not provided
4	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not provided
6	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not provided
Remarks Assessor (DD PECXX):		

1.6.5 Valid Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin

3.2.S.4 Provide results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (COA) of the same batch from Drug Substance / API manufacture.

3.2.S.4 Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer to be provided

3.2.S.4 Detailed analytical procedures for the testing of drug substance to be provided by Drug product manufacturer.

3.2.P.2 CDP report need to be clarified whether Test product was Sulvipride 25 mg Tablets or Sulvipride 50 mg Tablet.

3.2.P.2 Batch formula for proposed commercial batch size should be provided that includes a list of all components of the drug product to be used in the manufacturing process, their amounts on a per batch basis, and a reference to their quality standards

3.2.P.8 Documents for the procurement of API to be submitted.

3.2.P.8 Compliance Record of HPLC software 21CFR & audit trail reports and record of Digital data logger for temperature and humidity monitoring is not submitted.

Decision: Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.

Now the firm has submitted reply as follows:

Sr.#	Observation	Reply	Remarks
1.	Valid approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has provided valid GMP (No S-GMP &GLP/22023124 valid till 10.02.2024 Issued by Food and Drug control administration Gujrat	Complied
2.	Batch formula for proposed commercial batch size should be provided that includes a list of all components of the drug product to be used in the manufacturing process, their amounts on a per batch basis, and a reference to their quality standards.	Batch formula has been submitted for proposed commercial batch size i.e 10,000 tablets	Complied
3.	For Sulvipride 25 mg Tablet, CDP report need to be clarified whether Test product was Sulvipride 25 mg Tablet or Sulvipride 50 mg Tablet, since both products were mentioned in CDP report. Moreover, CDP of Sulvipride 50 mg Tablet was only performed in	Not provided	Not complied ***Later on firm has re submitted CDP report wherein name of Test product was corrected as Sulvipride 25 mg Tablet***

	phosphate buffer medium (pH 4.5) as per CDP report.		
4.	Documents for the procurement of API to be submitted.	Commercial invoice has been submitted (No AT-018/2021-22) dated 02.05.2022 batch No LSP-0260120 0.3KG API was imported.	Approval from DRAP is required
5.	Compliance Record of HPLC software 21CFR & audit trail reports and record of Digital data logger for temperature and humidity monitoring is not submitted.	provided	Compliance Record of HPLC software 21CFR & audit trail reports yet to be provided
6.	Detailed analytical procedures for the testing of drug substance to be provided by Drug product manufacturer	Provided	Complied
7.	Provide results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (COA) of the same batch from Drug Substance / API manufacture.	Provided	Complied
8.	Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer to be provided	Provided	HPLC chromatograms for different parameters tested (specificity, accuracy and repeatability etc) during verification study have not been provided. ***Moreover results of specificity parameter has not been provided***
Remarks	Reply submitted against above mentioned shortcomings found unsatisfactory		

Decision: Deferred for following submissions:

- **Submission of approval from DRAP for procurement of API.**
- **Results of specificity parameter under Analytical Method Verification studies of Drug substance.**

3.	Documents for the procurement of API with approval from DRAP (in case of import).	Paracetamol (BP): Not Required Tramadol HCL USP : Not Provided
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted audit trail record of product testing of HPLC.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not Provided.

Evaluation by PEC:

Evidence of approval of applied formulation in reference regulatory authorities as defined by the registration Board shall be submitted. As the applied formulation in reference regulatory authorities is approved as "uncoated" tablets while the applicant has applied as film coated tablets

Decision: Since the applied product is approved as "uncoated tablet" in reference regulatory authorities while the applicant has applied for film coated tablet. Therefore, Registration Board decided to defer the case for evidence of approval of applied formulation in reference regulatory authorities/agencies a

"film coated tablet" which were declared/approved by the Registration Board in its 275th meeting.

Reply of the firm :

Decision 322nd meeting of RB: Registration Board deferred the case for submission of reply to the above cited shortcomings within six months.

Sr. No	Observation	Reply	Remarks
1.	Provide certificate of analysis of relevant batch(es) of Drug Substance(s) (Paracetamol & Tramadol HCL) used in product development (By both Drug Substance and Drug Product manufacturer.	CoA are provided for different batches.	Not complied CoA to be provided for relevant batches. The CoA of Tramadol HCl batch No TDH 0480218 has been provided instead of batch no TDH 0041019 which was mentioned in import invoice.

2.	The Pharmaceutical equivalence studies and comparative dissolution Profile studies are not conducted with the innovator Product.	Pharmaceutical equivalence /CDP performed against the Tonoflex-P Forte Tablet 75/650 mg by M/s Sami Pharmaceuticals (Pvt) Ltd, Karachi Batch No 001E	Pharmaceutical equivalence /CDP performed against established brand
3.	Documents for the procurement of API with approval from DRAP (in case of import) of DS Tramadol HCL USP	Copy of invoice provided No E002 dated 06.11.2019 , attested by DRAP Lahore confirming import of 200Kg Tramadol HCl Batch No TDH 0041019	Complied
4.	As per submitted data of comparative dissolution profile following points have been observed: For Paracetamol: Value of F2 factor is 46% in Buffer Acetate pH 4.5 Value of F2 factor is 38% in Phosphate Buffer pH 6.8 For Tramadol HCl: value of F2 factor is 44% in 0.1N HCL Value of F2 factor is 46% in Phosphate buffer pH 6.8 Please justify scientifically.	Rectified CDP report has been submitted with f2 values as follows For Paracetamol: Value of F2 factor is 53% in acid medium pH 1.2 Value of F2 factor is 52% in Buffer Acetate pH 4.5 Value of F2 factor is 53% in Phosphate Buffer pH 6.8 For Tramadol HCl: Value of F2 factor is 54% in 0.1N HCL Value of F2 factor is 67% in Buffer Acetate pH 4.5 Value of F2 factor is 55% in Phosphate buffer pH 6.8	The F2 values are found satisfactory.

5.	Specificity testing in Analytical method validation has not been performed for the applied Product.	Analytical method validation study has been performed including parameter Specificity.	Complied
6.	Analytical Method for related substances /impurities testing of DS Paracetamol (BP) the HPLC testing procedure/chromatographic conditions are different from the one as specified in BP	Analytical Method for related substances /impurities testing of DS Paracetamol (BP) has been submitted wherein HPLC testing procedure/chromatographic conditions are as per BP (2019)	Complied
7.	DS manufacturer of Paracetamol has followed analytical method for testing(Assay) of API of BP while the Drug Product manufacturer has tested by USP Specs. (The analytical method by DS manufacturer is mentioned as BP but on COA of DS Assay is mentioned as USP)	Drug Product manufacturer has tested Drug Substance (Paracetamol) as per BP. CoA has been provided.	Complied
8,	The excipients being used are different from the ones used in Product Development of Innovator/Reference Product, therefore, provide compatibility studies protocol/method along with results.	Drug-Excipient compatibility study has been provided The binary study makes it clear that both API are compatible with all excipients	Complied

Decision 326th meeting: Deferred for following:

Submission of CoA of relevant batch of Tramadol HCl i.e., TDH 0041019 as mentioned in import invoice.

Scientific justification for the results reported in CDP studies with acceptable f2 value, whereas previously firm had reported different results of f2 value which were not within acceptable range, while the firm has not made any formulation change.

Remarks:

Now the firm has submitted CoA of relevant batch of Tramadol HCl i.e., TDH 0041019 from both Drug Substance and product manufacturer.

Regarding justification for disparity in CDP results, firm has submitted undertaking that there was clerical mistake in formula of excel sheet for calculation of similarity factor f2 in Darvin Forte tablet.

Decision: Authenticity of data to be verified through onsite inspection.

Agenda of Evaluator PEC-XXI

Agenda Item No. 01: Priority Applications of Human Drugs Locally Manufactured (New Section) applied on Form - 5F.

Case 01: M/s Gray's Pharmaceuticals, Plot No. 2, Street No. N-3, National Industrial Zone, Rawat was granted following Additional Section on 18-11-2021: -

i. Sachet (General)

1079.	Name, address of Applicant / Marketing Authorization Holder	M/s Gray's Pharmaceuticals, Plot No. 2, Street No. N-3, National Industrial Zone, Rawat.
	Name, address of Manufacturing site.	M/s Gray's Pharmaceuticals, Plot No. 2, Street No. N-3, National Industrial Zone, Rawat.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 39371 dated 29 DEC 2022.
	Details of fee submitted	Slip No. 436545955517 PKR 30,000/- dated 16-11-2022.
	The proposed proprietary name / brand name	EPRACO 20/1680 mg Sachets
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each sachet contains: Omeprazole USP….20mg Sodium Bicarbonate…1680mg (USP Specifications)
	Pharmaceutical form of applied drug	Immediate Release Powder for Oral Suspension in Sachet.
	Pharmacotherapeutic Group of (API)	A02BC01, Drugs For Peptic Ulcer And Gastro-Oesophageal Reflux Disease (GORD), Proton Pump Inhibitors.
	Reference to Finished product specifications	USP Specifications
	Proposed Pack size	As per SRO
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	ZEGERID (For Suspension; Oral) of Santarus, Inc., San Diego (USFDA Approved).
	For generic drugs (me-too status)	Risek Insta Sachet 20mg + 1680mg (Reg. No. 58547) of M/s Getz Pharma.

	GMP status of the Finished product manufacturer	GMP Certificate No. F.3-78/20118-Addl.Dir.(QA&LT-I)-34 dated 24th December , 2021.
	Name and address of API manufacturer.	Omeprazole: M/s Metrochem API Private Limited, Unit –I, Plot No. 62/C/6, Pipe Line Road, Phase-I, IDA, Jeedimetla, Hyderabad, India. Sodium Bicarbonate: CFL Chemische Fabrik Lehrke GmBH & Co. Kohthenwaldester 2-6, D-31275 Lehrte.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, Solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of Omeprazole and Sodium Bicarbonate is present in USP. The firm has submitted detail of nomenclature, structure, general properties, Solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 36 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 06 months Batches: Omeprazole: OMP-PMN20001, OMP-PMN20002 and OMP-PMN20003. Sodium Bicarbonate: 041717127112020, 04171712712020 and 041717127132020.
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand Zegerid

		20mg/1680mg Sachet (Santarus) by performing quality tests (Identification, Assay, Dissolution, Uniformity of dosage units). CDP has been performed against the same brand that is Zegerid 20mg/1680mg Sachet (Santarus) in Acid media (pH 1.2) Acetate Buffer (pH 4.5) & Phosphate Buffer (pH 6.8). The values for f1 and f2 are in the acceptable range.
	Analytical method validation / verification of product	Method validation studies have been submitted including linearity, range, accuracy, precision, and specificity.

STABILITY STUDY DATA				
Manufacturer of API		Omeprazole: M/s Metrochem API Private Limited, Unit –I, Plot No. 62/C/6, Pipe Line Road, Phase-I, IDA, Jeedimetla, Hyderabad, India. Sodium Bicarbonate: CFL Chemische Fabrik Lehrke GmBH & Co. Kohthenwaldester 2-6, D-31275 Lehrte.

Remarks of Evaluator:

The deficiencies / shortcomings were communicated to the firm and their response is received as follows: -

Sr. No.	Deficiencies / shortcomings communicated	Response of the Firm
i.	Please confirm the name of Firm as it is mentioned as "M/s Axis Pharmaceuticals (Pvt.) Ltd." on DML and on Renewal of your DML whereas the same is mentioned as "M/s Axis Pharmaceuticals" throughout your application. Please revise accordingly.	Typographic error which was later corrected. The firm have now submitted correct copy of DML (of M/s Axis Pharmaceuticals) date of issue w.e.f. 10-06-2019.
ii.	GMP Certificate was issued based on Inspection conducted on **09-06-2020** which is more than 03 years old. Please provide latest GMP Inspection Report (not older than 03 years).	The firm have now submitted a copy of valid GMP Certificate No. 100 / 2022 - DRAP (AD-51001963034) (validity till 12-06-2024) of drug product manufacturer, based upon evaluation conducted on 13-06-2022.
iii.	Please provide 06th Month (Real Time and Accelerated) Stability Study Data and relevant supporting documents for further processing of your application.	Submitted.
iv.	3.3. P.2.2.3. In Physicochemical and Biological Properties, Manufacturer (Axis Pharmaceuticals) Justification is given stating parent company having manufacturing license by way of formulation (semi-basic). Please clarify.	The firm have submitted that it was a **Typographic error**. The product is being manufactured by Axis Pharmaceuticals for registration purpose having valid manufacturing license by way of formulation and approved section.
v.	3.2. P.3.3. In Description of Manufacturing Process and Process Controls, under Process Flow Diagram, it has been mentioned that ''the maximum hold time of bulk product is NMT 10 working days''. Please justify / provide supporting evidence for the claim in terms of hold time studies.	The firm have submitted that for commercial batches they will perform manufacturing process validation as well Hold time study.
vi.	Furthermore, the same is not included in submitted Manufacturing Process Validation Protocol in 3.2.P.3.5 Process Validation and/or Evaluation. Please clarify.	The firm have submitted revised Manufacturing Process Validation Protocol and have included Hold time stability study.
vii.	The submitted GMP Certificate of API Manufacturer was issued based on Inspection conducted on 11th February 2019 and was valid until 10th February 2022. Please provide a valid GMP Certificate of API Manufacturer.	The firm have submitted a copy of valid GMP Certificate (validity: 13-06-2024) & DML of drug substance manufacturer.
viii.	Please provide Reference of previous approval of applications with stability study data of the firm (if any).	The firm have referred to their CTD applications approved in 321st, 322nd and 323rd Registration Board Meetings.
ix.	Please provide Compliance Record of HPLC software 21CFR &	Audit trail reports on product testing is submitted.

	complete audit trail reports on product testing.	
x.	Against documents for the procurement of API, copy of Invoice No. 60011 Dated 07-09-2021 from M/s Vision Pharmaceuticals (local source) is submitted whereas all the Trial Batches have been manufactured and placed for Stability Studies in 08 – 2021. Please justify.	The date mentioned on the invoice is in **month / date / year** format. Material processing timeline is tabulated below; **Sr. # / Stage / Date** 1. Invoice Generated — 9th July 2021 2. API Receiving Date — 13th July 2021 3. Sampling Date — 14th July 2021 4. Analysis Date — 27th July 2021 5. Dispensing Date — 03rd August 2021 6. Processing Date — 6th August 2021 7. Stability Start Date — 24th August 2021

Decision of 329th Meeting: Approved with Innovator's Specification.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Registration Board further decided that firm shall submit full fee of registration for revision of the data submitted in registration application and verification of firm's claim regarding format of date of Invoice No. 60011 Dated 07-09-2021 from M/s Vision Pharmaceuticals (local source) before issuance of Registration letter.**

	Name and address of API manufacturer.	M/s Vision Pharmaceuticals Plot No. 22-23, Industrial Triangle, Kahuta Road, Islamabad.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, Solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of Dexlansoprazole is present In-house. The firm as submitted detail of nomenclature, structure, general properties, Solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 36 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 06 months Batches: DLP123T, DLP124T, DLP125T,
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and

		controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand Delanzo 60mg Capsule by M/s Sami Pharma by performing quality tests (Identification, Assay, Dissolution, Uniformity of dosage form). CDP has been performed against the same brand that is Delanzo 60mg Capsule by M/s Sami Pharma in Acid media (pH 1.2) Acetate Buffer (pH 5.5) & Phosphate Buffer (pH 7.0). The values for f1 and f2 are in the acceptable range.
	Analytical method validation / verification of product	Method validation studies have been submitted including Linearity, Range, Accuracy, Precision, Specificity and System Suitability.

STABILITY STUDY DATA			
Manufacturer of API	M/s Vision Pharmaceuticals Plot No. 22-23, Industrial Triangle, Kahuta Road, Islamabad		
API Lot No.	DLP665		
Description of Pack (Container closure system)	Alu-Alu blister packed in unit carton (3×10's)		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real Time: 06 Months Accelerated: 06 Months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	T-001	T-002	T-003
Batch Size	1250 Capsules	1250 Capsules	1250 Capsules
Manufacturing Date	08 – 2021	08 – 2021	08 – 2021
Date of Initiation	24 – 08 – 2021	24 – 08 – 2021	24 – 08 – 2021
No. of Batches	03		

Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any).	Nil
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. F.3-26/2019-Addl.Dir. (QA&LT-I) Dated 31-07-2019 is submitted. Valid till 10th February 2022.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Copy of Invoice No. 60011 Dated 07-09-2021 from M/s Vision Pharmaceuticals (local source) is submitted.

4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Audit trail reports on product testing is submitted.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator:

The deficiencies / shortcomings were communicated to the firm and their response is received as follows: -

Sr. No.	Deficiencies / shortcomings communicated	Response of the Firm
i.	Please confirm the name of Firm as it is mentioned as "M/s Axis Pharmaceuticals (Pvt.) Ltd." on DML and on Renewal of your DML whereas the same is mentioned as "M/s Axis Pharmaceuticals" throughout your application. Please revise accordingly.	Typographic error which was later corrected. The firm have now submitted correct copy of DML (of M/s Axis Pharmaceuticals) date of issue w.e.f. 10-06-2019.
ii.	GMP Certificate was issued based on Inspection conducted on **09-06-2020** which is more than 03 years old. Please provide latest GMP Inspection Report (not older than 03 years).	The firm have now submitted a copy of valid GMP Certificate No. 100 / 2022 - DRAP (AD-51001963034) (validity till 12-06-2024) of drug product manufacturer, based upon evaluation conducted on 13-06-2022.
iii.	Please provide 06th Month (Real Time and Accelerated) Stability Study Data and relevant supporting documents for further processing of your application.	Submitted.
iv.	3.3. P.2.2.3. In Physicochemical and Biological Properties, Manufacturer (Axis Pharmaceuticals) Justification is given stating parent company having manufacturing license by way of formulation (semi-basic). Please clarify.	The firm have submitted that it was a **Typographic error**. The product is being manufactured by Axis Pharmaceuticals for registration purpose having valid manufacturing license by way of formulation and approved section.
v.	3.2. P.3.3. In Description of Manufacturing Process and Process Controls, under Process Flow Diagram, it has been mentioned that ''the maximum hold time of bulk product is NMT 10 working days''. Please justify / provide supporting evidence for the claim in terms of hold time studies.	The firm have submitted that for commercial batches they will perform manufacturing process validation as well Hold time study.
vi.	Furthermore, the same is not included in submitted Manufacturing Process Validation Protocol in 3.2.P.3.5 Process Validation and/or Evaluation. Please clarify.	The firm have submitted revised Manufacturing Process Validation Protocol and have included Hold time stability study.

vii.	The submitted GMP Certificate of API Manufacturer was issued based on Inspection conducted on 11th February 2019 and was valid until 10th February 2022. Please provide a valid GMP Certificate of API Manufacturer.	The firm have submitted a copy of valid GMP Certificate (validity: 13-06-2024) & DML of drug substance manufacturer.
viii.	Please provide Reference of previous approval of applications with stability study data of the firm (if any).	The firm have referred to their CTD applications approved in 321st, 322nd and 323rd Registration Board Meetings.
ix.	Please provide Compliance Record of HPLC software 21CFR & complete audit trail reports on product testing.	Audit trail reports on product testing is submitted.
x.	Against documents for the procurement of API, copy of Invoice No. 60011 Dated 07-09-2021 from M/s Vision Pharmaceuticals (local source) is submitted whereas all the Trial Batches have been manufactured and placed for Stability Studies in 08 – 2021. Please justify.	The date mentioned on the invoice is in **month / date / year** format. Material processing timeline is tabulated below;

Sr. #	Stage	Date
1.	Invoice Generated	9th July 2021
2.	API Receiving Date	13th July 2021
3.	Sampling Date	14th July 2021
4.	Analysis Date	27th July 2021
5.	Dispensing Date	03rd August 2021
6.	Processing Date	6th August 2021
7.	Stability Start Date	24th August 2021

Decision of 329th Meeting: Approved with Innovator's Specification.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Registration board further decided that firm shall submit full fee of registration for revision of the data submitted in registration application and verification of firm's claim regarding format of date of Invoice No. 60011 Dated 07-09-2021 from M/s Vision Pharmaceuticals (local source) before issuance of Registration letter.**

	Dy. No. and date of submission	Dy. No. 4644 dated 18-02-2022
	Details of fee submitted	Slip No. 41607990659 PKR 30,000/- dated 31-01-2022
	The proposed proprietary name / brand name	Vonomed 20mg Tablet
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated Tablet contains: Vonoprazan Fumarate equivalent to Vonoprazan 20mg (Innovator's Specification)
	Pharmaceutical form of applied drug	White colored round shaped, biconvex film coated tablets, having both sides plain.
	Pharmacotherapeutic Group of (API)	A02BC08, Drugs For Peptic Ulcer And Gastro-Oesophageal Reflux Disease (GORD), Proton Pump Inhibitors.
	Reference to Finished product specifications	Innovator's Specification
	Proposed Pack size	10's, 20's , 30's, & 14's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Takecab Tablets 20mg by Takeda Pharmaceutical Company Limited, PMDA Japan approved.
	For generic drugs (me-too status)	Vocinti Tablet 20mg (Reg. No. 108836) by M/s The Searle Company Limited.
	GMP status of the Finished product manufacturer	DML Renewal granted vide letter No. F.1-9/2003-Lic(Vol-II) dated 14th September 2021 based on Inspection conducted on 06-08-2021.
	Name and address of API manufacturer.	Enantiotech Corporation Limited, Zhongshan Torch Hi-tech Industrial development zone, Guangdong Province, China.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, Solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.

	Module III (Drug Substance)	The firm has submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for impurity & related substances, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies	Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 24 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: TAK09R170801, TAK09R170301 and TAK09R171001.
	Module-III (Drug Product):	The firm has submitted detail of manufacturer, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its validation studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the Innovator product that is Takecab Tablet 20mg by Takeda Pharmaceuticals Company by performing quality tests (Identification, Disintegration, Assay, Dissolution, Related substances). CDP has been performed against the same brand that is Takecab Tablet 20mg by Takeda Pharmaceuticals Company, in Acid media (pH 1.2), Acetate buffer (pH 4.5) & Phosphate Buffer (pH 6.8). The profiles are considered similar.
	Analytical method validation / verification of product	Method validation studies have been submitted including Linearity, Range, Accuracy, Specificity, Repeatability and System Suitability.

STABILITY STUDY DATA	
Manufacturer of API	Enantiotech Corporation Limited, Zhongshan Torch Hi-tech Industrial development zone, Guangdong Province, China.
API Lot No.	TAK09R210401
Description of Pack (Container closure system)	Alu-Alu Blister pack, with insert in unit carton.
Stability Storage Condition	Real time: 30°C ± 2°C / 75% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH
Time Period	Real Time: 06 Months Accelerated: 06 Months

Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	RD/PR21-090/T1/S1	RD/PR21-090/T1/S2	RD/PR21-090/T1/S3
Batch Size	2,000 Tablets	2,000 Tablets	2,000 Tablets
Manufacturing Date	08-2021	08-2021	08-2021
Date of Initiation	16-09-2021	16-09-2021	16-09-2021
No. of Batches	03		

Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any).	-
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. 202105010 submitted valid till 2024/04/30.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Copy of Assistant Director (Lahore) attested Invoice No. EAI20210604048 dated 2021/06/04 is submitted.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator:

Initial Stability Study Data was provided for 03 Months along with application dossier on Form 5F, which was later on completed to 06 Months (Accelerated and Real Time) vide Dy. No. 11696 dated 14 MAY 2022.

Decision of 329th Meeting: Approved with Innovator's Specification.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Agenda Item No. 03: Priority applications on the basis of Export Facilitation of Locally Manufactured Drugs:

The following dossiers have been evaluated reference to the letter No. F.1-6/2019-PR-I (EFD) dated 06th October 2022 from Assistant Director (PR-I/EFD) wherein it has been stated that DRAP Authority in its 133rd meeting held on 13th April 2022, decided to grant registration on priority basis to the pharmaceutical

i.e. one molecule for each 100,000 USD worth of export of medicines (to a maximum of 15 such molecules) during a fiscal year. In compliance to the aforementioned decision of the authority, the following firm (M/s Getz Pharma (Pvt.) Limited) have achieved the benchmark of export of more than 100,000 USD (2311157.75 USD) during the fiscal year 2021-2022 and have submitted their applications for priority consideration in lieu of export facilitation for Registration Board please: -

1087.	Name, address of Applicant / Marketing Authorization Holder	M/s Getz Pharma (Pvt.) Limited 29-30, Sector 27, Korangi Industrial Area, Karachi.
	Name, address of Manufacturing site.	M/s Getz Pharma (Pvt.) Limited 29-30, Sector 27, Korangi Industrial Area, Karachi.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☒ New Drug Product (NDP) ☐ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 18003 dated 21-06-2022.
	Details of fee submitted	Slip No. 74763446899 PKR 75,000/- dated 27-08-2021.
	The proposed proprietary name / brand name	UVF DPI Capsules 62.5mcg + 25mcg + 100mcg
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each DPI capsule contains: Umeclidinium Bromide equivalent to Umeclidinium 62.5mcg Vilanterol Trifenatate equivalent to Vilanterol 25mcg Fluticasone Furoate 100mcg (Innovator's Specification)
	Pharmaceutical form of applied drug	Hydroxypropyl methylcellulose (HPMC) capsule shell containing white powder for Inhalation.
	Pharmacotherapeutic Group of (API)	R03AL08, Drugs For Obstructive Airway Diseases, Adrenergics in combination with anticholinergics incl. triple combinations with corticosteroids.
	Reference to Finished product specifications	Innovator's Specification
	Proposed Pack size	3 x 10's (30's)
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Trelegy Ellipta (fluticasone furoate 100 mcg, umeclidinium 62.5 mcg, and vilanterol 25 mcg) Inhalation Powder by GlaxoSmithKline (USFDA Approved).
	For generic drugs (me-too status)	Not applicable
	GMP status of the Finished product manufacturer	GMP Certificate No. 06/2022-DRAP(K) issued dated 17-01-2022.

	Name and address of API manufacturer.	**Umeclidinium Bromide:** M/s INKE, S.A. C/ Argent, 1, Área Industrial del Llobregat, 08755 CASTELLBISBAL (Barcelona) Spain. **Vilanterol Trifenatate:** M/s INKE, S.A. C/ Argent, 1, Área Industrial del Llobregat, 08755 CASTELLBISBAL (Barcelona) Spain. **Fluticasone Furoate:** M/s Aarti Industries Limited, D-53, Phase-II, Kalyan shill road, Dombivli (E.), Dombivli- 421204, District- Thane, Zone6 – India.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, Solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The firm has submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for impurity & related substances, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies	Stability study conditions: **Umeclidinium Bromide** Real time: 30˚C ± 2˚C / 65% ± 5%RH for 18 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: DS-1M, DS-2M, DS-3M **Vilanterol Trifenatate** Real time: 30˚C ± 2˚C / 65% ± 5%RH for 18 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: PP-5M, PP-6M, PP-7M **Fluticasone Furoate** Real time: 30˚C ± 2˚C / 65% ± 5%RH for 60 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: UK/1601/01/010, UK/1503/I/01/127, UK/1403/01/126.
	Module-III (Drug Product):	The firm has submitted detail of manufacturer, description of manufacturing process and controls,

		impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its validation studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against innovator's product **Trelegy Ellipta 62.5mcg + 25mcg + 100mcg Inhalation Powder by M/s GlaxoSmithKline, USA** by performing quality tests (appearance, assay, deposition of emitted dose, uniformity of delivered dose, aerodynamics particle size distribution test and related substances).
	Analytical method validation / verification of product	Method validation studies have submitted including, system suitability, specificity, linearity, accuracy, precision repeatability, intermediate precision, robustness, stability of solution and range.

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any).	Firm has referred to onsite inspection report of their product Estine (Ebastine) Tablets 10mg & 20mg on 6th May, 2019. Further, the said panel inspection report was discussed in 289th Drug Registration Board meeting held on 14th – 16th May 2019.

<table>
<tr><td></td><td></td><td>The case was approved and the inspection report confirms following points:
The HPLC software is 21CFR Compliant as per record available with the firm.
Audit trail on the testing reports is available.
Adequate monitoring and control are available for stability chamber. Chambers are controlled and monitored through software having alarm system for alerts as well.
Related manufacturing area, equipment, personnel and utilities are GMP compliant.</td></tr>
<tr><td>2.</td><td>Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.</td><td>Umeclidinium Bromide & Vilanterol Trifenatate:
Firm has submitted copy of GMP Certificate No. NCF-II/2123/001/CAT issued by Ministry of Health of Government Catalonia – Spain (valid till 31-12-2023).

Fluticasone Furoate:
Firm has submitted copy GMP Certificate No. 6102121 issued by Food and Drug Administration, Maharashtra State, India (valid till 29-09-2022).</td></tr>
<tr><td>3.</td><td>Documents for the procurement of API with approval from DRAP (in case of import).</td><td>Copy of invoice attested by AD I&E DRAP, Karachi, has been submitted as follows:

Administrative Portion				
1.	Reference of previous approval of applications with stability study data of the firm (if any).	The firm has referred to their Inspection of Canazin 100mg & 300mg Tablets (Canagliflozin) conducted on 14th March, 2019 and discussed and approved in 289th meeting of Registration Board held on 14th – 16th May, 2019.		
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP Certificate No. GD20180909 issued by China Food and Drug Administration valid till 05/12/2023 has been submitted.		
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Copy of Invoice No. CESU210802JZ dated 02-08-2021 cleared on 11/08/2021 by AD (I&E) DRAP Karachi for 200Kgs of Cefoperazone Sodium and Sulbactum Sodium (1:1) has been submitted.		
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted.		
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted.		
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted.		

Remarks of Evaluator:

The deficiencies / shortcomings were communicated to the firm and their response is received as follows: -

Sr. No.	Deficiencies / shortcomings communicated	Response of the Firm
i.	In 1.5.10 Dosage form of applied drug, b) Description of Dosage Form, it is mentioned as "A white to yellowish orange, sterile crystalline powder, filled and sealed in 20ml clear glass vial with Red color plastic flip off seal". However, the same has been mentioned as "A white to off-white sterile crystalline powder, filled and sealed in 8ml clear glass vial with blue color plastic flip off seal in rest of the dossier". Please clarify	The firm have submitted revised section 1.5.10 Dosage form of applied drug, b) Description of Dosage Form as "A white to off-white sterile crystalline powder, filled and sealed in 8ml clear glass vial with blue color plastic flip off seal in rest of the dossier".
ii.	In 2.3.S.4 Control of the Drug Substance, 2.3.S.4.1 (a) Drug Substance specifications of the Drug Product Manufacturer, the standard specification and reference number has been mentioned as "USP 43" whereas the Tests are conducted as per "In-House" Specifications. Please clarify	The firm have submitted revised section 2.3.S.4 Control of the Drug Substance, 2.3.S.4.1 (a) Drug Substance specifications of the Drug Product Manufacturer as "In-House".
iii.	In 2.3.S.4.5 Justification of Specifications, it is stated that "Cefoperazone sodium and Sulbactum sodium being In-House product is analysed as per Manufacturers Specifications", however the official monograph of Cefoperazone Sodium and Sulbactam Sodium for Injection is present in Japanese Pharmacopoeia. Please justify the reason for not adopting the same	The firm have submitted that the product mentioned in Japanese Pharmacopeia Monograph is freeze lyophilized solution while they are manufacturing product by direct filling of powder aseptically into final container hence both are considered as different products and have different product specifications.
iv.	In 2.3.P.5.4 Batch Analysis, a) Description of the Batches, date of Manufacturing of Batch "TR-3/PB 500mg Inj" is mentioned as "12 – 2019". Please clarify	The firm have submitted revised section 2.3.P.5.4 Batch Analysis, a) Description of the Batches, date of Manufacturing of Batch "TR-3/PB 500mg Inj" as "10 – 2021".
v.	Pharmaceutical Equivalence have been established against "2Sum 500mg Injection by M/s Healthtek (Pvt.) Ltd". Please justify the reason for not establishing the same against Reference / Innovator / Originator Product	The firm have submitted that the innovator Product Magnex 500mg Injection (Cefoperazone + Sulbactum) by Pfizer (Japan) was not available in Pakistan hence they have established Pharmaceutical Equivalence against "2Sum 500mg Injection by M/s Healthtek (Pvt.) Ltd".

Decision: Registration Board Referred to Expert Working Group for the review of specifications Cefoperazone Sodium & Sulbactam Sodium for Injection (JP Specifications).

- **Registration Board further decided that firm shall submit full fee of registration for revision of the data submitted in registration application before issuance of Registration letter.**

Agenda of Evaluator PEC-XXIII

Case no. 01 Registration applications for local manufacturing of (Human) drugs (Form 5)

a. New cases

1090.	Name and address of manufacturer / Applicant	M/s Wnsfeild Pharmaceuticals Plot No. 122, Block A, Phase-V, Industrial Estate Hattar, Pakistan. (DML No. 000610) Tablet section (General)
	Brand Name +Dosage Form + Strength	TEROD tablet 3mg
	Composition	Each tablet contains: Tegaserod ……..3mg
	Diary No. Date of R& I & fee	Dy No. 14534 dated 07-03-2019 Fee paid PKR 20,000/- vide Deposit Slip No. 1900629 dated 05-03-2019.
	Pharmacological Group	Other drugs for constipation ATC Code A06AX06
	Type of Form	Form 5
	Finished Product Specification	USP, as stated by applicant
	Pack size & Demanded Price	As per SRO
	Approval status of product in Reference Regulatory Authorities.	Not found in applied composition and strength
	Me-too status	Serrod Tablets 3mg M/s Pulse Pharmaceuticals Reg. No. 049011
	GMP status	Last GMP inspection conducted on 10-12-2020 on the basis of which Certificate No. F.11-195/2021-DRAP-32 dated 06-05-2021 was issued.
	Remarks of the Evaluator[xxiii].	• Revision in finished product specifications from USP to In-house specifications along with requisite fee. • Revision in master formulation from Tegaserod Maleate to Tegaserod according to the label claim, along with requisite fee. • Evidence of approval of applied product in reference regulatory authority as approved by the Registration Board in its 275th meeting is required. • Form-5 and annexures are signed by Qualified personnel (Production Incharge and Quality Control Incharge) but not signed by applicant.
	Decision: Deferred for following: • **Revision in finished product specifications from USP to In-house specifications along with fee prescribed vide S.R.O 496(I)/2023 dated 17-04-2023 (PKR 7500);** • **Revision in master formulation from Tegaserod Maleate to Tegaserod according to the label claim, along with fee prescribed vide S.R.O 496(I)/2023 dated 17-04-2023 (PKR 30,000);** • **Submission of Form-5 and annexures duly signed by the applicant instead of the qualified persons;** • **Evidence of approval of applied formulation in reference regulatory authorities/agencies which were adopted by the Registration Board in its 275th meeting. The Board further decided that the applicant shall submit the response within 1 month after publication of the minutes, otherwise the application shall be placed in the upcoming meeting of the Board for final decision.**	
1091.	Name and address of manufacturer / Applicant	M/s Wnsfeild Pharmaceuticals Plot No. 122, Block A, Phase-V, Industrial Estate Hattar, Pakistan. (DML No. 000610) Tablet section (General)
	Brand Name +Dosage Form + Strength	TEROD tablet 2mg
	Composition	Each tablet contains: Tegaserod ……..2mg

	Diary No. Date of R& I & fee	Dy No. 14533 dated 07-03-2019 Fee paid PKR 20,000/- vide Deposit Slip No. 1900628 dated 05-03-2019.
	Pharmacological Group	Other drugs for constipation ATC Code A06AX06
	Type of Form	Form 5
	Finished Product Specification	USP, as stated by applicant
	Pack size & Demanded Price	As per SRO
	Approval status of product in Reference Regulatory Authorities.	Tegaserod (as maleate) tablet is discontinued by USFDA. Status could not be confirmed from PMDA Japan, Health Canada, ANSM France and TGA Australia.
	Me-too status	Tegaser 2mg Tablet M/s Nexus Pharma (Pvt) Ltd., Karachi Reg. No. 86653
	GMP status	Last GMP inspection conducted on 10-12-2020 on the basis of which Certificate No. F.11-195/2021-DRAP-32 dated 06-05-2021 was issued.
	Remarks of the Evaluator[xxiii].	• Revision in finished product specifications from USP to In-house specifications along with requisite fee. • Change in label claim from Tegacerod to Tegaserod (as maleate) according to product already/previously approved by USFDA & DRAP, along with requisite fee. • As product is discontinued in USFDA, evidence of approval of applied product in reference regulatory authority is required. Strength of 6mg was not allowed marketing authorization by EMA due to risks of use outweighting the benefits. • Form-5 and annexures are signed by Qualified personnel (Production Incharge and Quality Control Incharge) but not signed by applicant. • ***Later on, the firm rectified the shortcomings vide Letter No. Nil dt 01-06-2023 (Dy No. 13787 dated 02-06-2023) alongwith Deposit Slip No. 926154083 and the Board was apprised of the same during the meeting. However, RRA status could not be confirmed.***
	Decision: Deferred for evidence of approval of applied formulation in reference regulatory authorities/agencies which were adopted by the Registration Board in its 275th meeting. The Board further decided that the applicant shall submit the response within 1 month after publication of the minutes, otherwise the application shall be placed in the upcoming meeting of the Board for final decision.	
1092.	Name and address of manufacturer / Applicant	M/s Wnsfeild Pharmaceuticals Plot No. 122, Block A, Phase-V, Industrial Estate Hattar, Pakistan. (DML No. 000610) Tablet section (General)
	Brand Name +Dosage Form + Strength	TEROD tablet 6mg
	Composition	Each tablet contains: Tegaserod ……..6mg
	Diary No. Date of R& I & fee	Dy No. 14535 dated 07-03-2019 Fee paid PKR 20,000/- vide Deposit Slip No. 1900630 dated 05-03-2019.
	Pharmacological Group	Other drugs for constipation ATC Code A06AX06
	Type of Form	Form 5
	Finished Product Specification	USP, as stated by applicant
	Pack size & Demanded Price	As per SRO

	Approval status of product in Reference Regulatory Authorities.	Tegaserod (as maleate) tablet is discontinued by USFDA and EMA. Not confirmed from PMDA Japan, Health Canada, ANSM France and TGA Australia
	Me-too status	Serrod Tablets 6mg M/s Pulse Pharmaceuticals Reg. No. 86654
	GMP status	Last GMP inspection conducted on 10-12-2020 on the basis of which Certificate No. F.11-195/2021-DRAP-32 dated 06-05-2021 was issued.
	Remarks of the Evaluator[xxiii].	• Revision in finished product specifications from USP to In-house specifications along with requisite fee. • Change in label claim from Tegaserod to Tegaserod (as maleate) according to product already approved by USFDA & DRAP, along with requisite fee. • As product is discontinued in USFDA & refused marketing authorization in EMA, evidence of approval of applied product in reference regulatory authority is required. (According to European Medicines Agency Post-authorisation Evaluation of Medicines for Human Use Doc.Ref. EMEA/CHMP/109088/2006 dated 23-3-2006, on 15 December 2005 the Committee for Medicinal Products for Human Use (CHMP) recommended the refusal of the marketing authorisation for the medicinal product Zelnorm (Tegaserod) 6 mg tablets. Following request from the applicant, the CHMP re-examined the opinion and confirmed its previous view on 23 March 2006. The CHMP was of the opinion that Zelnorm's benefits are not greater than its risks. Hence, the CHMP recommended that Zelnorm be refused marketing authorisation.) • Form-5 and annexures are signed by Qualified personnel (Production Incharge and Quality Control Incharge) but not signed by applicant. • ***Later on, the firm rectified the shortcomings vide Letter No. Nil dt 01-06-2023 (Dy No. 13787 dated 02-06-2023) alongwith Deposit slip No. 93081752261 and the Board was apprised of the same during the meeting. However, RRA status could not be confirmed.***
	Decision: Deferred for evidence of approval of applied formulation in reference regulatory authorities/agencies which were adopted by the Registration Board in its 275th meeting. 	Remarks of the Evaluator[xxiii].	• The Registration Board in its 316th meeting, considering an application for registration of Mifepristone 200mg tablet (Agenda item 79) had decided as follows: *"Registration Board deliberated the case in detail regarding the clinical indications and potential abuse of the product. The Board after thread bare deliberations decided to refer the case to DRAP Authority with submission that drug qualifies criteria for grant of Registration. However, Registration Board referred the case to DRAP Authority whether Registration Board should proceed for grant of registration or otherwise due to its potential for abuse. Director DTL Sindh opined not to register the product due to its potential abuse as abortifacient drug."* Decision of Authority, if any, may be considered prior to decision of instant case otherwise the case may once again be referred to DRAP Authority for consideration. • If allowed for registration by Authority, application is required on Form 5D instead of Form 5 for Mifepristone as me-too is not available.

		• Revision of label to mention oral tablet and vaginal tablet in label of Mifepristone and Misoprostol tablets, respectively. • Change in specifications of Misoprostol tablets from Innovator's specifications to Pharmacopoeial Specifications along with relevant fee is required. • Evidence of applied strength of Misoprostol (200mcg) vaginal tablet already approved by DRAP (generic / me-too status) along with registration number, brand name and name of firm. • Form-5 and annexures are signed by Qualified personnel (Production Incharge and Quality Control Incharge) but not signed by applicant.
	Decision: The Board decided to refer the case to Expert Working Group on human drugs to review the therapeutic requirements keeping in view the safety, quality and efficacy parameters.

(DML No. 000610) **contract manufacturing** from M/s Weather Folds Pharmaceuticals Plot No.69/2, Phase II, Industrial Area, Hattar (DML No. 000644) Liquid syrup section (General)
	Brand Name +Dosage Form + Strength	WIPROATE syrup 250mg/5ml
	Composition	Each 5ml contains: Doxofylline …….100mg
	Diary No. Date of R& I & fee	Dy No. 14563 dated 07-03-2019 Fee paid PKR 50,000/- vide Deposit Slip No. 1902537 dated 05-03-2019.
	Pharmacological Group	Xanthines R03DA11
	Type of Form	Form 5
	Finished Product Specification	Innovator's Specifications
	Pack size & Demanded Price	60ml, As per SRO
	Approval status of product in Reference Regulatory Authorities.	Not found
	Me-too status	Unifyline Syrup M/s Platinum Pharmaceuticals, Karachi Reg. No. 047180
	GMP status	Last GMP inspection conducted on 10-12-2020 on the basis of which Certificate No. F.11-195/2021-DRAP-32 dated 06-05-2021 was issued to M/s Wnsfeild Pharmceuticals. Last GMP inspection conducted on 12-10-2022 on the basis of which Certificate No. F.3-12/2022-DRAP-179 dated 28-10-2022 was issued to M/s WeatherFolds Pharmaceuticals.
	Remarks of the Evaluator[xxiii].	• Name of applied product on cover letter is Wiproate 250mg/5ml syrup. On challan the product name is Valproic acid 250mg/5ml. Name of product on Form 5 and annexed documents is Doxofylline 100mg/5ml syrup. Doxofylline 100mg/5ml syrup has already been applied for registration vide Dy No. 14564 dated 07-03-2019 (Fee paid PKR 50,000/- vide Deposit Slip No. 1902538 dated 05-03-2019). As the name on Form 5 is same, hence, this may be considered as duplicate application of Doxofylline Syrup 100mg/5ml.
	Decision: The Registration Board while considering the fact that firm had already applied for the formulation of Doxofylline 100mg/5ml syrup for registration vide Dy No. 14564 dated 07-03-2019 (Fee paid PKR 50,000/- vide Deposit Slip No. 1902538 dated 05-03-2019) which has been considered above, decided to declare the instant application as disposed of.	
1156.	Name and address of manufacturer / Applicant	M/s Wnsfeild Pharmaceuticals Plot No. 122, Block A, Phase-V, Industrial Estate Hattar, Pakistan. (DML No. 000610) Dry Powder Suspension section (Cephalosporin)

1158.	Name and address of manufacturer / Applicant	M/s Wnsfeild Pharmaceuticals Plot No. 122, Block A, Phase-V, Industrial Estate Hattar, Pakistan. (DML No. 000610) Dry powder injection (general)

	Brand Name +Dosage Form + Strength	ARENATE 120mg injection
	Composition	Each 2ml vial contains: Artesunate ……120mg
	Diary No. Date of R& I & fee	Dy No. 14481 dated 07-03-2019 Fee paid PKR 20,000/- vide Deposit Slip No. 1902515 dated 05-03-2019.
	Pharmacological Group	Anti-malarials ATC code: P01BE03
	Type of Form	Form 5
	Finished Product Specification	International Pharmacopoeia Specifications
	Pack size & Demanded Price	Transparent vial along with Sodium bicarbonate 2ml glass ampule packed in unit carton; As per SRO
	Approval status of product in Reference Regulatory Authorities.	Applied component is included in WHO approved formulation
	Me-too status	Gen-M 120mg Injection M/s Genix Pharma, Karachi Reg. No. 076073 (Inclusion of solvent not confirmed)
	GMP status	Same as above
	Remarks of the Evaluator[xxiii].	• Applicant has submitted master formulation and packaging details for combo pack having following two components: Artesunate 120mg in 2ml vial along with 5% Sodium Bicarbonate Solution in Water for Injection packed in 2ml ampule. WHO approved formulation is as follows "Each vial contains: Artesunate powder 120 mg Each ampoule of solvent contains: Sodium bicarbonate 50 mg/ml, 2 ml (5%) Each ampoule of diluent contains: Sodium chloride 9 mg/ml, 10 ml (0.9%)"; According to the International Pharmacopoeia, the reconstituted injection is a sterile solution of Artesunate in 5% sodium bicarbonate intravenous infusion. It is prepared by dissolving Artesunate for injection in the requisite amount of 5% sodium bicarbonate intravenous infusion immediately before use. This solution is diluted further with a suitable diluent for injection in accordance with the manufacturer's instructions. Accordingly, separate application for registration of solvent for Artesunate (5% sodium bicarbonate solution in Water for Injection) is required along with full fee of registration. • Form-5 and annexures are signed by Qualified personnel (Production Incharge and Quality Control Incharge) but not signed by applicant. • ***Later on, the firm submitted requisite signed Form 5, and master formulation without sodium bicabonate solution alongwith Deposit Slip No. 775169097 (PKR 7500) vide Letter No. Nil dt 01-06-2023 (Dy No. 13787 dated 02-06-2023) and the Board was apprised of the same during the meeting.***

	Decision: Approved

	Type of Form	Form 5

	Finished Product Specification	International Pharmacopoeia Specifications
	Pack size & Demanded Price	Transparent vial along with Sodium bicarbonate 2ml glass ampule packed in unit carton, As per SRO
	Approval status of product in Reference Regulatory Authorities.	Applied component is included in WHO approved formulation
	Me-too status	Gen-M 120mg Injection M/s Genix Pharma, Karachi Reg. No. 076073 (Inclusion of solvent not confirmed)
	GMP status	Same as above
	Remarks of the Evaluator[xxiii].	• Applicant has submitted master formulation and packaging details for combo pack having following two components: Artesunate 120mg in 2ml vial along with 5% Sodium Bicarbonate Solution in Water for Injection packed in 2ml ampule. WHO approved formulation is as follows "Each vial contains: Artesunate powder 120 mg Each ampoule of solvent contains: Sodium bicarbonate 50 mg/ml, 2 ml (5%) Each ampoule of diluent contains: Sodium chloride 9 mg/ml, 10 ml (0.9%)"; According to the International Pharmacopoeia, the reconstituted injection is a sterile solution of Artesunate in 5% sodium bicarbonate intravenous infusion. It is prepared by dissolving Artesunate for injection in the requisite amount of 5% sodium bicarbonate intravenous infusion immediately before use. This solution is diluted further with a suitable diluent for injection in accordance with the manufacturer's instructions. Accordingly, separate application for registration of solvent for Artesunate (5% sodium bicarbonate solution in Water for Injection) is required along with full fee of registration.
	Decision: Approved.

	Remarks of the Evaluator.	**[4/19/2022]** FDA issued warning letters to 12 companies for selling over-the-counter (OTC) skin lightening products containing hydroquinone that do not meet the requirements to be legally sold as OTC drugs. The warning letters explain that these OTC skin lightening products containing the active drug ingredient hydroquinone are unapproved drugs and are not generally recognized as safe and effective (not GRASE). FDA has received reports of serious side effects including skin rashes, facial swelling, and ochronosis (discoloration of skin) from the use of skin lightening products containing hydroquinone. FDA advises consumers not to use these

		products due to the potential harm they may cause, including ochronosis which may be permanent. Consumers should talk to their health care professional about treatment options for certain skin conditions including aged or dark spots. FDA is alerting consumers there are no FDA-approved or otherwise legally marketed OTC skin lightening products. Some manufacturers and distributors have already removed their OTC skin lightening products from the marketplace, and FDA plans to take action against those continuing to market these potentially harmful and illegal OTC products. Currently, Tri-Luma is the only FDA-approved drug containing hydroquinone. Tri-Luma is a prescription product approved for the short-term treatment of dark spots associated with moderate-to-severe melasma of the face. Tri-Luma should only be used under the supervision of a licensed health care professional. In addition to the COVID-19 response efforts, the Coronavirus Aid, Relief, and Economic Security Act (CARES Act) included important reforms that modernized the way certain OTC drugs are regulated. This reform finalized the legal status of products with certain active ingredients or other conditions that had been pending under the previous rulemaking framework, including finalizing the status of OTC skin lightening products. As a result, since enactment of the CARES Act, **OTC skin lightening products containing hydroquinone are deemed to be new drugs and are misbranded. All OTC skin lightening products require an FDA approved new drug application before they can be legally marketed.** As a result of CARES Act, effective September 23, 2020, manufacturers and distributors of OTC skin lightening products that do not have FDA approval must remove the products from the marketplace. The warning letters FDA issued today are to companies still marketing OTC skin lightening products containing hydroquinone without an FDA approved new drug application. FDA has asked the companies receiving warning letters to take prompt action to correct any violations outlined in the respective warning letters and respond to FDA within 15 days with what they have done to address any violations and prevent their recurrence. FDA is taking a comprehensive approach to protect consumers from the risks posed by skin lightening products containing hydroquinone. The agency is notifying companies that have listed these drugs with FDA, but may not actively be distributing them, of the current legal status of these drugs to prevent companies from distributing these illegal products. FDA is also adding certain skin lightening product manufacturers to an import alert to help stop their products from entering the U.S. Many of FDA's safety concerns regarding the use of hydroquinone in OTC skin lightening drug products also apply to the use of hydroquinone in cosmetic products. FDA reminds manufacturers and distributors it is their responsibility to comply with all requirements of federal law and FDA regulations, and to ensure their drugs meet federal

		standards for safety and effectiveness. Those who fail to comply with the law are subject to FDA action. The Ministry of Health and Prevention in the UAE has previously issue advice about unregistering whitening creams sold online, and explained that, **"while <u>hydroquinone is an active ingredient in therapeutic creams, very long-term use of these type of creams could lead to skin cancer</u>."**
	Decision: Deferred for evidence of approval of applied formulation in reference regulatory authorities / agencies which were adopted by the Registration Board in its 275th meeting. The Board further decided that the applicant shall submit the response within 1 month after publication of the minutes, otherwise the application shall be placed in the upcoming meeting of the Board for final decision.

	Decision: Deferred for submission of evidence of approval of required manufacturing facility of "Topical Lotion section" from CLB. The Board further decided that the applicant shall submit the response within 1 month after publication of the minutes, otherwise the application shall be placed in the upcoming meeting of the Board for final decision	

Registration-I Section

Case No.01. Recommendation of Provincial Quality Control Board, Punjab Regarding Cancellation of Muscadol Tablet (R.No.067173)

Registration Brad in its 324th meeting held on 24th-26th January, 2023 considered the recommendation of PQCB, Punjab regarding cancellation of "Muscadol Tablet (Reg. No.067173)" manufactured by M/s Lisko Pakistan (Pvt) Ltd., Karachi as per following detail:

Proceedings of M-324:

Provincial Quality Control Board in its 251st meeting held on 20th October, 2022 considered the following case under section 11 of the Drugs Act, 1976 on grounds that Drug Testing Laboratory showed inability for the test/ analysis of the following sample:

S/N	DTL Letter No. & Date	Product Name & Batch No.	DTL	Manufacturer	Area DI	Memo No. & Date	Reason of FNA rom DTL
1	DPN/17350 /DTL Dated 18-03-2022	Muscadol Film Coated Tablet (Paracetamol: 450mg Orphenadrine Citrate USP: 35mg) Batch No. T-052	Lahore	Lisko	Sir Ganga Raam Hospital	0000117776 dated 03-02-2022	Due to provision of wrong method of analysis from manufacturer

In this context, it has been communicated that PQCB after deliberation and discussion decided to recommend the Drug Regulatory Authority of Pakistan (DRAP) for cancellation of registration of drug in best of public interest.

Decision of M-324:

Registration Board decided to issue show cause notice to M/s Lisko Pakistan (Pvt) Ltd., L-10/D, Block 21, Federal B Industrial Area, Karachi (DML No.000110) under Section 7 (11)(c) of the Drug Act, 1976 that why the registration of their drug product 'Muscadol Tablet (Reg.No.067173)' may not be cancelled for violation of the conditions subject to which the drug product was registered. The Board also decided to provide an opportunity of personal hearing to the management of the firm under section 42 of the Drugs Act, 1976.

In line with the above-mentioned decision, show cause notice was issued to the firm vide letter dated 26-04-2023. In this regard, response received from M/s Lisko (vide letter dated 02-05-2023), has been summarized as under:

- *"M/s Lisko Pakistan is supplying medicines to government institutes / hospitals & market of Pakistan since 1980s and whenever any testing method, COA, reference standard or any other requirements have been asked by DTLs or DRAP, we have always made sure to timely submit requirements.*
- *We supplied Muscadol tablet 450mg/35mg to Sir Ganga Ram hospital and subsequently, DTL Lahore asked us to submit analytical method via letter no# 17003 (received on 11-2-2022) to test samples of supplied batch# T-052. We submitted our reply with method of analysis and other required documents on 15-2-2022.*
- *We agree that there was **typographical mistake in heading of submitted method** in which wrong strength of Muscadol forte (650mg/50mg) tablet was mentioned instead of Muscadol plain tablet (Paracetamol 450mg and /Orphenadrine citrate 35mg). We would like to clarify that it was human error while typing heading of method of analysis. All other submitted information like product description, method of analysis and calculation were correct of Muscadol tablet 450mg/35mg.*
- *It should not be treated as inability of firm to test / analysis of the product as we have tested said product numerous time through given method as Muscadol tablet is frequently being manufactured by us.*
- *It is also to be noted that we have already shared contact No. of our Quality Control manager to concerned persons of PQCB and DTLs of Punjab in case of any query and for better communication and timely submission of requirements to avoid any delays but in this case, no one from DTL Lahore contacted us to re-submit method with correct heading and if anyone from DTL Lahore would have contacted us for re-submission, we would have immediately submitted it without any delays.*
- *We request you not to take any action against our product (Muscadol tablet 450mg/35mg) as **we apologize on our typographical mistake which was an unintentional human error and we assure you that we will be more careful in future** that we do not repeat such mistake.*
- *Our product Muscadol tablet is running product of market and we also supply same product to government institutions of Pakistan to fulfil demand of such essential medicine. If you wish us to explain our case before the registration board, kindly communicate us date and time of meeting."*

Decision: **Keeping in view the response submitted by M/s Lisko Pakistan (Pvt) Ltd., Karachi (DML No.000110) to the show cause notice issued on 26.04.2023, Registration Board decided that the firm shall be issued an advisory to remain cautious in future and avoid submission of any unverifiable information.**

Case No.02. Request of M/s Abbott Laboratories (Pakistan) Limited, Karachi for Discontinuation of Manufacturing of Oral Drug Products

M/s Abbott Laboratories (Pakistan) Limited, Opposite Radio Pakistan Transmission Centre, Hyderabad Road, Landhi Karachi (DML No. 000001) vide their letter dated 24-01-2023 requested for discontinuation of manufacturing of following registered oral drug products due to commercial non-viability. Detail is as under:

Sr.No.	Reg.No.	Product Name	Reason for Discontinuation
1.	008160	Theograd Tablet 350mg (Theophylline)	Various alternative therapeutic molecules for bronchodilation like Doxofylline used in asthma, chronic bronchitis and emphysema are already available in the market with better efficacy
2.	000042	Cecon Oral Drops (Vitamin C) 10ml	Various alternative therapeutic molecules in the segment of this dietary vitamins supplement are available for infants and children in the market.
3.	007279	Cofcol Tablet	Various alternative therapeutic molecules in the segment of this Cold, flu and cough relieve preparations are available in the market.
4.	025526	Neophage Tablet (Metformin HCl) 500mg	Various alternative brands that are use with diet to lower high blood sugar levels in patients with type 2 diabetes are available in the market
5.	025527	Neophage Tablet (Metformin HCl) 850mg	

The firm also stated that there is no possibility of any shortage or lack of availability for these established molecules to the patients and public at large. Furthermore, the firm will also look into the possibilities to file hardship in DRAP for the said products soon.

Vide letter dated 02-03-2023, the firm was directed to comply with the following conditions of registration under Rule 30 of Drugs (L, R & A) Rules, 1976 and to ensure regular and adequate supply of above-mentioned products to avoid shortage in the market.

i. **Every drug shall be produced in sufficient quantity so as to ensure its regular and adequate supply in the market.**
ii. **The manufacturing of any drug shall not without the prior approval of the Registration Board, be discontinued for a period which may result in its shortage.**

The firm (vide letter dated 07-03-2023) has responded as under:

- Through our application dated 24th January 2023, we had applied for the approval from Registration Board, to discontinue the drugs.
- The second clause stated in your letter is incompletely stated. The complete clause of (L, R & A) Rule 30(5) states: *"The manufacture of any drug shall not without prior approval of the Registration Board, be discontinued for a period which may result in its shortage.* ***Provided that in the circumstances beyond the control of manufacturer of a drug which may lead to reduction in the production of that drug, the circumstances may be intimated to the Registration Board****."*
- We have already highlighted the reasons in our letter that are beyond our control and forcing us for the discontinuation of above-mentioned drugs. The reasons are reiterated again for consideration of our application:
  i. All products are having negative margin and hence commercially non-viable to continue production.
  ii. Better and new advanced formulations are now registered and available in the market, due to which patronage by the physicians has reduced to greater extent, resulting in commercially non-viability of the products.
  iii. The matter of hardship case of Cofcol Tablets is pending for many years and has been under discussion in many DRB meetings and recently discussed in 323rd DRB meeting held on December 6-8, 2022, as ***"Case No. 13. Concerns of Health Task Force, M/o National Health Services Regulations & Coordination, Page #. 2381 2386"***. Since relief in hardship application has not yet been granted which has resulted to discontinue the production due to commercially non-viability of the product.

The firm has again requested to consider their application on urgent basis and grant approval at earliest as there is no possibility of marketing these products.

With respect to the case considered by the Board in its 323rd meeting (as referred above by the applicant), it is informed that the Board decided to ***refer the product to Pakistan Chest Society for evaluation of therapeutic value with respect to the quality, safety and efficacy of cough and cold preparations.***

Decision: **Registration Board deliberated that in line with the conditions of registration described under Rule 30(4) and 30(5) of L.R.A Rules, 1976, availability of a registered drug product is responsibility of registration holder. Furthermore, requests for de-registration/ discontinuation/ withdrawal of registered therapeutic goods on grounds of commercial non-viability due to negative profit margin raise serious concern regarding fate of other registrations granted to these manufacturers/ registration holders.**

Accordingly, keeping in view that such cases raise concerns of availability due to pricing issues, Registration Board decided to refer the case to DRAP's Authority for seeking guidance regarding disposal thereof.

Case No.3. **Request for Change in Registration Status of Products from M/s Getz Pharma Pvt. Ltd Plot No. 29-30, Sector 27, Korangi Industrial Area Karachi to M/s. Getz Pharma Pvt. Ltd Plot No. 01, Sector 25, Korangi Industrial Area Karachi.**

M/s. Getz Pharma Pvt. Ltd Plot No. 01, Sector 25, Korangi Industrial Area Karachi (DML No.000933) has requested for change in registration status of below mentioned products from M/s. Getz Pharma Pvt. Ltd Plot No. 29-30, Sector 27, Korangi Industrial Area Karachi (DML No.000284) to their name.

Detail is as under:

Administrative Documents Submitted in the light of SOP approved by the Registration Board in its 283rd meeting
Copy of registration letter and last renewal status.
Copy of DML of M/s. Getz Pharma Pvt. Ltd Plot No. 01, Sector 25, Korangi Industrial Area Karachi (Manufacturer) issued on 25-05-2021(DML No.000933)
Copy of approved sections by Central Licensing Board of M/s. Getz Pharma Pvt. Ltd Plot No. 01, Sector 25, Korangi Industrial Area Karachi confirming "Tablet (general)" section.
Copy of GMP certificate of M/s. Getz Pharma Pvt. Ltd Plot No. 01, Sector 25, Korangi Industrial Area Karachi based on evaluation conducted on 17-11-2021.
NOC dated 29-05-2023 from M/s. Getz Pharma Pvt. Ltd Plot No. 29-30, Sector 27, Korangi Industrial Area Karachi for transfer of products in the name of M/s. Getz Pharma Pvt. Ltd Plot No. 01, Sector 25, Korangi Industrial Area Karachi.
Request dated 29-05-2023 from M/s. Getz Pharma Pvt. Ltd Plot No. 29-30, Sector 27, Korangi Industrial Area Karachi for withdrawal/ cancellation of registration.
Application with Form-5F and required fee as per relevant SRO.
Relevant undertakings & commitments.
Firm has also submitted comparative batch manufacturing record, method transfer / method verification studies of drug substance to new site.

Detail of submitted documents/ remarks of evaluators have been mentioned as under:

Evaluator: Mst. Urooj Fatima (DD-QMS)

DML Issued by: Jiangsu Drug Administration Valid till 06-12-2025 **Metformin HCl:** M/s Shouguang Fukang Pharmaceutical Co., Ltd., North-East of Dong waihuan Road Dongcheng Industrial Area, Shouguang City, Shandong Province GMP certificate Issued by: Shandong Food and Drug Administration valid till 12-03-2024.
	1.5.11-Proposed Label	Specimen of proposed label (secondary + primary) provided which are in accordance with the Drug (Labelling & Packing) Rules, 1986.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information of **Empagliflozin**, related structure, solubilities, and other general properties, manufacturing site, character elucidation, impurities characterizations, specifications based on In-house specifications, analytical procedures and its validation, batch analysis, reference standard, container closure and stability studies summaries of Empagliflozin. Firm has summarized information of **Metformin Hydrochloride**, related structure, solubilities, and other general properties, manufacturing site, character elucidation, impurities characterizations, specifications based on USP, analytical procedures and its validation, batch analysis, reference standard, container closure and stability studies summaries of Metformin Hydrochloride. Similarly, information summaries for drug product (Diampa-M) including its description, composition, pharmaceutical development, justification for selection of manufacturing process and in-process controls, analytical procedure and its verification, batch analysis and specification, reference standard, container closure system and stability studies has been provided.
	Module-III Drug Substance:	Firm has submitted data for drug substances (Empagliflozin and Metformin HCl) related to nomenclature, structure, general properties, solubilities, character elucidation, physical form, manufacturer, a brief on manufacturing process, polymorphism, structure elucidation, impurities, specifications, analytical method, its validation, analytical method verification performed by DP manufacturer, certificate of analysis, impurity profiling of all listed impurities of Empagliflozin and Metformin HCl, specifications (in-house for Empagliflozin and USP for Metformin HCl), analytical procedures, batch analysis, reference standard and its CoA, container closure system, specification and stability studies with study protocol.
	Stability Studies of Drug Substance (Conditions & duration of Stability	**Empagliflozin**: Firm has submitted stability study data of 3 batches of drug substance (Empagliflozin) at both

<table>
<tr><td></td><td>studies)</td><td>accelerated as well as real time conditions. The accelerated stability data was conducted at 40ºC ± 2ºC / 75% ± 5% RH for 6 months and the long-term stability data was conducted at 30ºC ± 2ºC / 65% ± 5% RH for 24 months. DS was packed in polyethylene bag. The DS remained within specified limits as tested on defined intervals.

Metformin Hydrochloride: Firm has submitted stability study data of 3 batches of drug substance (Metformin HCl) at both accelerated as well as real time conditions. The accelerated stability data was conducted at 40ºC ± 2ºC / 75% ± 5% RH for 6 months and the long-term stability data was conducted at 30ºC ± 2ºC / 75% ± 5% RH for 60 months. DS was packed in double layered LDPE bags and packaged again in paperboard drums. The DS remained within specified limits as tested on defined intervals.</td></tr>
<tr><td></td><td>Module-III Drug Product:</td><td>Firm has submitted data of drug product including its composition, manufacturing process and process control, manufacturing process validation protocol, excipients testing methods, pharmaceutical equivalence, specifications, analytical procedures and its validation, dissolution method verification, batch analysis, justification of specifications, specification procedure for organic impurities, reference standard or materials, container closure system and stability. The Specifications and control tests comply to innovators' specifications.</td></tr>
<tr><td></td><td>Pharmaceutical Equivalence and Comparative Dissolution Profile</td><td>Pharmaceutical equivalence was performed against Jardiamet tablet of Boehringer Ingelheim, Newzealand, which shows comparable results within specified limits.
The comparative dissolution profile was performed for Diampa-M 5+850mg Tablet against the Jardiamet tablet of Boehringer Ingelheim, Newzealand. Comparison was performed using 12 samples at pH 1.2, pH 4.5 and pH 6.8 for 60 mins.

Calculation of value for <u>Empagliflozin</u> is as under:
<table>
<tr><th>Media</th><th>Time interval</th><th>Jardiamet Tab (%)</th><th>Diampa-M Tab (%)</th></tr>
<tr><td rowspan="8">Acidic buffer (pH 1.2)</td><td>5 min</td><td>48.59</td><td>50.71</td></tr>
<tr><td>10 min</td><td>83.59</td><td>87.83</td></tr>
<tr><td>15 min</td><td>96.79</td><td>98.86</td></tr>
<tr><td>20 min</td><td>99.88</td><td>99.42</td></tr>
<tr><td>30 min</td><td>99.92</td><td>99.83</td></tr>
<tr><td>45 min</td><td>100.05</td><td>99.58</td></tr>
<tr><td>60 min</td><td>100.16</td><td>99.87</td></tr>
<tr><td colspan="3"></td></tr>
<tr><td rowspan="8">Acetate buffer (pH 4.5)</td><td>5 min</td><td>42.67</td><td>61.38</td></tr>
<tr><td>10 min</td><td>80.36</td><td>92.81</td></tr>
<tr><td>15 min</td><td>97.89</td><td>98.60</td></tr>
<tr><td>20 min</td><td>99.58</td><td>98.71</td></tr>
<tr><td>30 min</td><td>99.78</td><td>98.99</td></tr>
<tr><td>45 min</td><td>100.25</td><td>99.25</td></tr>
<tr><td>60 min</td><td>100.85</td><td>99.47</td></tr>
</table>
</td></tr>
</table>

Phosphate Buffer (pH 6.8)	5 min	46.77	52.80
	10 min	79.58	88.36
	15 min	96.78	97.76
	20 min	97.12	97.98
	30 min	98.99	98.16
	45 min	100.36	98.78
	60 min	100.85	99.57

f1 and f2 value has not been calculated because both reference and test sample achieved 85% dissolution within 15 minutes, hence, comparative profile is considered similar.

Calculation of value for **Metformin HCl** is as under:

Media	Time interval	Jardiamet Tab (%)	Diampa-M Tab (%)
Acidic buffer (pH 1.2)	5 min	61.89	52.34
	10 min	91.21	88.16
	15 min	92.85	91.51
	20 min	99.20	95.69
	30 min	99.71	96.76
	45 min	99.83	98.41
	60 min	100.36	99.79
Acetate buffer (pH 4.5)	5 min	62.15	45.26
	10 min	92.36	76.34
	15 min	99.14	95.14
	20 min	99.76	95.97
	30 min	100.10	99.78
	45 min	100.36	101.28
	60 min	100.89	103.44
Phosphate Buffer (pH 6.8)	5 min	59.65	43.31
	10 min	89.74	73.23
	15 min	99.47	93.30
	20 min	100.15	95.08
	30 min	100.35	97.94
	45 min	100.58	99.05
	60 min	100.74	100.15

f1 and f2 value has not been calculated because both reference and test sample achieved 85% dissolution within 15 minutes, hence, comparative profile is considered similar.

Firm has also submitted comparative dissolution results of product manufactured at current manufacturing site and newly proposed manufacturing sites. The dissolution results of Empagliflozin and Metformin shows that comparative profile is similar.

Analytical method validation/verification of product	Firm has claimed In-house specifications for which report of validation of analytical method for the drug product has been provided**.** Assay method and dissolution method validation

		protocol and study reports were also provided.

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Last panel inspection was conducted for Emclide (Empagliflozin + Linagliptin) 10+5 mg tablets on 02-12-2021. The said panel inspection report was discussed in 316th meeting of Registartion Board held on 15th - 18th March, 2022 and the Board decided to approve the product.
2.	Approval of API/DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copies of DML for: **Empagliflozin:** M/s Jiangsu Yongan Pharmaceutical Co., Ltd. No. 18, 237 provincial highway, Jiangsu Huai'an Economic Development Zone, Jiangsu, China. DML Issued by: Jiangsu Drug Administration Valid till 06-12-2025. A GMP certificate dated 25-05-2020 was also provided which certifies that manufacturing is carried out according to current Chinese GMP requirements. **Metformin HCl:** M/s Shouguang Fukang Pharmaceutical Co., Ltd., North-East of Dong waihuan

		Road Dongcheng Industrial Area, Shouguang City, Shandong Province GMP certificate Issued by: Shandong Food and Drug Administration valid till 12-03-2024 certifying that manufacturer is complying to current Chinese GMP requirements.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	**Empagliflozin:** Firm has submitted copy of commercial invoice from Jiangxi Cavir Apollo Pharma Co., Ltd., China for import of Empagliflozin manufactured by M/s Jiangsu Yongan Pharmaceutical Co., ltd. China (invoice dated 26-11-2021, cleared 01-12-2021 from DRAP, Karachi). **Metformin HCl:** Firm has submitted copy of commercial invoices from M/s JCTECH Pharma Ltd., China for the import of Metformin HCl manufactured by M/s Shouguang Fukang Pharmaceutical Co., Ltd., (invoice dated 14-02-2022, cleared 22-03-2022 from DRAP, Karachi).
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted audit trail of stability batches.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks OF Evaluator:

The drug substances for Diampa-M 5+850mg Tablet (Empagliflozin & Metformin HCl) are manufactured by:
Empagliflozin: M/s Jiangsu Yongan Pharmaceutical Co., Ltd. No. 18, 237 provincial highway, Jiangsu Huai'an Economic Development Zone, Jiangsu, China.
Metformin HCl: M/s Shouguang Fukang Pharmaceutical Co., Ltd., North-East of Dong waihuan Road Dongcheng Industrial Area, Shouguang City, Shandong Province.
The impurity profiling of DS is also carried out for listed impurities. Manufacturing and controls, comparability protocols, structural characterization, and stability protocol has been submitted. Specification for Empagliflozin and Metformin HCl are in-house and USP, respectively. Finished Pharmaceutical Product (FPP) manufacturer has also performed analysis of Drug Substance (DS) according to aforementioned specifications.

The drug product is film coated tablet of 5+850mg manufactured by M/s. Getz Pharma Pvt. Ltd Plot No. 01, Sector 25, Korangi Industrial Area Karachi (DML# 000933) (Formulation) (Cream coloured, oblong shaped, biconvex film coated tablet, plain on both sides). The method of manufacturing is wet granulation and film coating with adequate process controls at critical points. Submitted regulatory specifications are as per innovator's and submitted stability data shows no degradation product at specified time points.

M/s. Getz Pharma Pvt. Ltd Plot No. 01, Sector 25, Korangi Industrial Area Karachi (DML# 000933) is a GMP complaint unit as per GMP inspection conducted on 17-11-2021 with recommendations for grant of GMP certificate to the firm.

Diampa-M 5+850mg Tablet's pharmaceutical equivalence has been established against the **Jardiamet tablet of Boehringer Ingelheim, Newzealand**, which shows comparable results within specified limits. Comparative dissolution profile was conducted against the **Jardiamet tablet of Boehringer Ingelheim, Newzealand**. The clinical particulars and pharmacological properties of the Diampa-M, based on the reliance principle, are as per the reference regulatory authority's product. This product is indicated for the treatment of adults with type-II diabetes mellitus as an adjunct to diet and exercise.

Conclusion:

The applicant shall maintain consistency in clinical particulars and pharmacological properties with the current version of the reference medicinal product as approved by reference regulatory authority and this information shall be updated regularly when the new information becomes available for reference medical product in accordance with the post registration variation procedures.
The firm shall also ensure black boxed information "Life-threatening lactic acidosis can occur due to accumulation of metformin. Risk factors include renal impairment, old age and the use of high doses of metformin above 2000 mg per day" in the beginning of the leaflet.

Application is complete as per SOP/ guidelines. Accordingly, the case is recommended for consideration of Registration Board.

Evaluator: Mr. Salateen Waseem Philips (DD-PR)

	Intended use of pharmaceutical product		☐ Domestic sale ☐ Export sale ☒ **Domestic and Export sales**
	Dy. No. and date of submission		Dy. No. 10620 (dated: 26-03-2023)
	Details of fee submitted		PKR 30,000/-: dated: 03-11-2022 (Invoice # 607780278188)
	The proposed proprietary name / brand name		**Tablet FEXET 60 mg**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit		Each film coated tablet contains: Fexofenadine HCl BP……. 60 mg
	Pharmaceutical form of applied drug		Film coated Tablet
	Pharmacotherapeutic Group of (API)		Other antihistamines for systemic use
	Reference to Finished product specifications		BP Specification
	Proposed Pack size		20's & 30's
	Proposed unit price		MRPs: 320.85/- (20s) & 481.27/- (30s)
	The status in reference regulatory authorities		*USFDA approved* **ALLERGA®** a trademark of Sanofi
	For generic drugs (me-too status)		**Telfast tablet 60mg** by M/s Sanofi.

	GMP status of the Finished product manufacturer	Routine GMP inspection conducted on 12-01-2023 and cGMP compliance level rated as **"Good"**
	Name and address of API manufacturer.	Source of API is same for drug product manufacturer at **existing facility as well as proposed facility** IND-SWIFT LABORATORIES LIMITED Village Bhagwanpur, Barwala Road, Derabassi, District – S.A.S. Nagar (Mohali), Punjab, INDIA **GMP valid till 05-12-2024**
	Module-II (Quality Overall Summary)	The firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The firm has submitted detail of nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	**Stability study conditions**: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 36 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 06 months
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	**DML # 000284 (Formulation)** *existing facility* The firm has submitted results of pharmaceutical equivalence for all the quality tests for their product as per specification and comparative study against the **comparator product i.e. Telfast Tablets 60mg by M/s Sanofi** by performing quality tests (appearance, identification, average weight, Disintegration Dissolution, Assay). **DML # 000933 (Formulation)** *New Facility* The firm has submitted results of pharmaceutical equivalence for all the quality tests for their product as per specification and comparative study against the **comparator product i.e. Fexet Tablets 60mg by M/s Getz DML # 000284** by performing quality tests (appearance, identification, average weight, Disintegration Dissolution, Assay).
	Analytical method validation/verification of product	Firm has submitted report of validation of analytical method for the drug product including

		system suitability, specificity, accuracy, repeatability, intermediate precision, linearity, range & robustness.

49.	Reference of previous approval of applications with stability study data of the firm (if any)	Not applicable		

50.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	provided	
51.	Documents for the procurement of API with approval from DRAP (in case of import).	**Existing unit**	Invoice # 9100013442 dated 11/07/2016
		New Unit	E-939512113247 dated 23-04-2022
52.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted.	
53.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted	
54.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted.	

Remarks of the Evaluator:

Fexet® is already a registered brand of M/s Getz Pharma (Pvt.) Ltd, since 14-12-2002 with **DRAP's Registration No. 029434** at their manufacturing facility with **DML # 000284 (Formulation)** for the manufacturing site located at Plot # 29 – 30, Sector 27, Korangi Industrial Area.

M/s Getz Pharma (Pvt) Ltd has recently established another manufacturing facility with **DML # 000933 (Formulation)** for the manufacturing site located at Plot # 01, Sector 25, Korangi Industrial Area, Karachi.

Firm has now applied for **Replacement** of the manufacturing site of their registered brand **Fexet®**

Disintegration Time	NMT 15.0 minutes	10 minutes	6.0 minutes	8.0 min	6.0 min	7.0 min
Identification of Candesartan Cilexetil	The retention time of the major peak in the chromatogram of the assay preparation corresponds to that of the standard preparation as obtained in the Assay.	Complies	Complies	Complies	Complies	Complies
Assay of Candesartan Cliexetil	Release Limit: (95.00 – 105.00) % Shelf: 90.0 – 110.0 %	99.70%	100.20%	96.71%	99.10%	100.97%
Dissolution of Candesartan Cilexetil	NLT 75.00% (Q) of the labelled amount dissolved in 45 minutes	94.86%	92.16%	98.08%	99.46%	101.64%
Uniformity of dosage unit of Candesartan Cilexetil by content uniformity	%L1 is less than or equal to 15.0	7.4%	6.1%	3.9%	4.3%	4.1%

Firm has submitted comparative dissolution profile and pharmaceutical equivalence of **ADVANT®** as under: -

Pharmaceutical Equivalence and Comparative Dissolution Profile	
(At New Manufacturing Facility) DML # 000911	***(At Previous Manufacturing Facility)*** DML # 000284
Comparator product is the batch of same brand **Advant® 16 mg** manufactured in existing manufacturing facility with **DML # 000284 (Formulation).**	Comparator product is **Blopress® 16 mg** innovator brand.

Remarks of Evaluator	**Application is complete as per SOP/ guidelines. Accordingly, the case is recommended for consideration of Registration Board.**

Decision: Registration Board decided as under:

i. Cancelled registration of following products from the name of M/s Getz Pharma Pvt. Ltd. Plot No. 29-30, Sector 27, Korangi Industrial Area Karachi (DML No.000284):

S. No.	Reg. No.	Product Name & Composition
1.	**103093**	**Diampa-M Tablet 5mg + 850mg** **Each film coated tablet contains:** **Empagliflozin……..……..…5mg** **Metformin Hydrochloride……..…..850mg**
2.	**029434**	**Fexet Tablet 60mg** **Each tablet contains:** **Fexofenadine…….……60mg**
3.	**036059**	**Advant Tablet 8mg** **Each tablet contains:** **Candesartan Cilexetil……8mg**

4.	**034070**	**Advant Tablet 16mg** **Each tablet contains:** **Candesartan Cilexetil……16mg**

ii. Approved registration of following products in the name of M/s Getz Pharma Pvt. Ltd. Plot No. 01, Sector 25, Korangi Industrial Area Karachi (DML No.000933).

a) Manufacturer will place first three production batches of both products on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.

b) Manufacturer will perform process validation of first three batches of both products as per the commitment submitted in the registration application.

c) For product at S.No. 1 of below table, the applicant shall submit fee of Rs. 7500/- (in the light of notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021) for pre-registration variation/ change in finished product specifications from "Manufacturer's Specifications" to "As per Innovator's Specifications".

S. No.	Product Name & Composition
1.	**Diampa-M Tablet 5mg + 850mg** **Each film coated tablet contains:** **Empagliflozin……..……5mg** **Metformin Hydrochloride…….…....850mg** **(As per Innovator's Specifications)**
2.	**Fexet Tablet 60 mg** **Each film coated tablet contains:** **Fexofenadine Hydrochloride…….. 60mg** **(BP Specifications)**
3.	**Advant Tablet 8mg** **Each tablet contains:** **Candesartan Cilexetil…….8mg** **(USP Specifications)**
4.	**Advant Tablet 16mg** **Each tablet contains:** **Candesartan Cilexetil……..……16mg** **(USP Specifications)**

iii. Reference will be sent to Costing and Pricing Division for confirmation of maximum retail price (MRP).

Case No.4. Request for Change in Registration Status of Products from M/s Getz Pharma Pvt. Ltd Plot No. 29-30, Sector 27, Korangi Industrial Area Karachi to M/s. Getz Pharma Pvt. Ltd Plot No. 01, Sector 25, Korangi Industrial Area Karachi.

M/s. Getz Pharma Pvt. Ltd Plot No. 01, Sector 25, Korangi Industrial Area Karachi (DML No.000933) has requested for change in registration status of below mentioned products from M/s. Getz Pharma Pvt. Ltd Plot No. 29-30, Sector 27, Korangi Industrial Area Karachi (DML No.000284) to their name.

Detail is as under:

Administrative Documents Submitted in the light of SOP approved by the Registration Board in its 283rd meeting
Copy of registration letter and last renewal status.
Copy of DML of M/s. Getz Pharma Pvt. Ltd Plot No. 01, Sector 25, Korangi Industrial Area Karachi (Manufacturer) issued on 25-05-2021(DML No.000933)

Copy of approved sections by Central Licensing Board of M/s. Getz Pharma Pvt. Ltd Plot No. 01, Sector 25, Korangi Industrial Area Karachi confirming "Tablet (general)" section.
Copy of GMP certificate of M/s. Getz Pharma Pvt. Ltd Plot No. 01, Sector 25, Korangi Industrial Area Karachi based on evaluation conducted on 17-11-2021.
NOC dated 29-05-2023 from M/s. Getz Pharma Pvt. Ltd Plot No. 29-30, Sector 27, Korangi Industrial Area Karachi for transfer of products in the name of M/s. Getz Pharma Pvt. Ltd Plot No. 01, Sector 25, Korangi Industrial Area Karachi.
Request dated 29-05-2023 from M/s. Getz Pharma Pvt. Ltd Plot No. 29-30, Sector 27, Korangi Industrial Area Karachi for withdrawal/ cancellation of registration.
Application with Form-5F and required fee as per relevant SRO.
Relevant undertakings & commitments.
Firm has also submitted comparative batch manufacturing record, method transfer / method verification studies of drug substance to new site.

Detail of submitted documents/ remarks of evaluators have been mentioned as under:

Evaluator: Mr. Salateen Waseem Philips (DD-PR)

Observations		**Reply**		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Getz Pharma (Pvt.) Limited situated at Plot No. 01, Sector 25 Korangi Industrial Area, Karachi is a new License facility hence no such inspection has been conducted.		
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (Certificate No. Drugs (10)Pb.2019/5348) issued by Food and Drugs Administration Punjab, India valid till November 29, 2022.		
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of invoice attested by AD I&E DRAP, Karachi.		
		Batch No.	**Invoice No.**	**Date of approval by DRAP**
		7270221008	9100131157	02-03-2021
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted data of stability batches along with attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets.		
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	Firm has submitted compliance certificate of HPLC software and audit trail reports on product testing.		
6.	Record of Digital data logger for temperature & humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature & humidity monitoring of stability chambers (real time and accelerated)		

Case History:

In 312th meeting of Drug Registration Board conducted on 14-16th September, 2021, the case of replacement of manufacturing site was discussed. Firm submitted stability data of **Fexet®** of 03 months only, for their newly established manufacturing facility. Meanwhile, firm decided to withdraw application to complete stability data of minimum 06 months. Accordingly, the Drug Registration Board decided as under: -

Decision of 312th meeting of DRB
Acceded to firm's request regarding withdrawal of their submitted applications for change in registration status of following products. Accordingly, below-mentioned applications for registration at M/s Getz Pharma (Pvt)

Ltd, Plot No.01, Sector 25, Korangi Industrial Area, Karachi (DML No.000933) stand disposed of and firm will continue manufacturing at M/s Getz Pharma (Pvt) Ltd, 29-30, Sector 27, Korangi Industrial Area, Karachi (DML No. 000284).

S. No.	Reg. No.	Product Name
1.	029435	Fexet Tablets 120mg Each tablet contains: - Fexofenadine HCl …… 120mg
2.	029436	Fexet Tablets 180mg Each tablet contains: - Fexofenadine HCl …… 180mg

Now firm has submitted stability data for the studies conducted on interval of 06th month for samples of the batches manufactured & placed in accelerated and real time conditions in proposed manufacturing facility, along with requisite fee of Rs. 30,000/- for replacement / change of manufacturing site.

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Getz Pharma (Pvt.) Limited situated at Plot No. 01, Sector 25 Korangi Industrial Area, Karachi is a new License facility hence no such inspection has been conducted.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (Certificate No. Drugs (10)Pb.2019/5348) issued by Food and Drugs Administration Punjab, India valid till November 29, 2022.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of invoice attested by AD I&E DRAP, Karachi.

Batch No.	Invoice No.	Date of approval by DRAP
7270221008	9100131157	02-03-2021

4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted data of stability batches along with attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	Firm has submitted compliance certificate of HPLC software and audit trail reports on product testing.
6.	Record of Digital data logger for temperature & humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature & humidity monitoring of stability chambers (real time and accelerated)

Miscellaneous Data:

The firm has submitted the following documents as per WHO TRS 981,2013 (47th report, Annex 3) and SOP for approval of post-registration variations approved in 283rd DRB meeting:

- Stability Data of 3 batches till shelf life manufactured at their existing facility located at Plot No. 29 – 30, Sector 27, Korangi Industrial Area.
- Stability Data of 2 stability batches (at initial time point) from new facility located at Plot No. 01, Sector 25, Korangi Industrial Area as per Guidance Document for Submission of Application on Form 5-F (CTD) for registration of pharmaceutical drug products for human use issued in October, 2020.
- Pharmaceutical Equivalence studies of the product with the innovator from existing manufacturing facility & also submitted Comparative Dissolution Profile against innovator from new manufacturing facility.
- Comparative batch analysis data on two batches from the new facility and comparative data on the last three batches from the existing facility.
- Executed Production document of stability batch.
- Process Validation Protocol from new site.
- Undertakings in accordance with SOP for approval of post-registration variations by DRAP.
- Analytical Method Verification studies of API & Finished product.
- Valid GMP certificate of the API manufacturer.

Remarks of Evaluator:

Shortcomings communicated	Reply by firm	Evaluation by PEC
Provide results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (CoA) of the same batch from Drug Substance / Active Pharmaceutical Ingredient manufacture.	Relevant batch analysis of Drug Substance performed by Drug Product manufacturer submitted.	Submitted.
Drug excipient compatibility studies shall be submitted since, "Lactose" has been used in addition to reference product excipients.	Firm has submitted that that Lactose has been used in formulation to increase the bulk density of powder blend. Moreover, Lactose is inert that has no added advantage on product performance. All added excipients in the formulation including Lactose are compatible with active ingredient based on the stability studies both at real time and accelerated conditions tested on stability indicating parameters and stability indicating method such as assay and related substances as per analytical testing method published in BP monograph. Hence, it is concluded that addition of Lactose in formulation has no impact on product performance and quality.	Justification for Drug-excipient compatibility studies submitted.

	Till date 298 batches of Fexet Tablets 120mg & 206 batches of Fexet Tablets 180mg have been manufactured. Moreover, annually one batch of Fexet Tablets 120mg and Fexet Tablets 180mg is put on stability at real time conditions as per WHO requirement. The results are satisfactory and no degradation and out of specification / out of trend result is reported. Therefore, performing drug excipient compatibility study will be of no significance.	
System suitability solution analysis in the Assay test is not as per BP monograph.	Firm has submitted that the test of system suitability (%RSD, tailing factor/peak symmetry and theoretical plates) is performed prior to conducting test of assay during routine batch analysis. Moreover, with regards to resolution between Fexofenadine HCl and Impurity A, the said parameter is evaluated during assay method verification and result is in compliance with BP monograph of Fexofenadine Tablets i.e. ≥ 10. Repeat testing of said parameter is not required during routine batch analysis as the chromatographic conditions including the column dimension (4.5 x 250mm, L11, 5µm), mobile phase composition, retention time window (10.0 – 13.0 minutes) are fixed and verified. Further, the brand of column used in routine testing of assay method is same as that used in verification studies. Hence, evaluating system suitability parameters such as %RSD, tailing factor/peak symmetry and theoretical plates suffice the requirements of establishing system suitability during routine batch analysis.	Justification submitted.

Case History:

In 312th meeting of Drug Registration Board conducted on 14-16th September, 2021, the case of replacement of manufacturing site was discussed. Firm submitted stability data of **Fexet®** of 03 months only, for their newly established manufacturing facility. Meanwhile, firm decided to withdraw application to complete stability data of minimum 06 months. Accordingly, the Drug Registration Board decided as under: -

Decision of 312th meeting of DRB

Acceded to firm's request regarding withdrawal of their submitted applications for change in registration status of following products. Accordingly, below-mentioned applications for registration at M/s Getz Pharma (Pvt) Ltd, Plot No.01, Sector 25, Korangi Industrial Area, Karachi (DML No.000933) stand disposed of and firm will continue manufacturing at M/s Getz Pharma (Pvt) Ltd, 29-30, Sector 27, Korangi Industrial Area, Karachi (DML No. 000284).

S. No.	Reg. No.	Product Name
1.	029435	Fexet Tablets 120mg Each tablet contains: - Fexofenadine HCl …… 120mg
2.	029436	Fexet Tablets 180mg Each tablet contains: - Fexofenadine HCl …… 180mg

Now firm has submitted stability data for the studies conducted on interval of 06th month for samples of the batches manufactured & placed in accelerated and real time conditions in proposed manufacturing facility, along with requisite fee of Rs. 30,000/- for replacement / change of manufacturing site.

iii. Reference will be sent to Costing and Pricing Division for confirmation of maximum retail price (MRP).

Case No.5. Decision of DRAP' Authority Regarding Extension in Validity of Registrations of Potassium Iodide Tablet Issued on Priority Basis

Background & Previous Decision:

Drug Regulatory Authority of Pakistan in its 88th meeting held on 7th August, 2020 discussed the application of Pakistan Atomic energy Commission (PAEC) for the registration of Potassium Iodide tablets. In order to facilitate & expedite the process of registration of Potassium Iodide tablets; the Authority exercising its power under Rule 26 of Drugs (LRA) Rules amended vide SRO 713 (1)/2018 dated 8th June, 2018 allowed to submit registration applications on Form 5/ Form 5-A/ Form 5-D instead of Form 5-F, for registration of Potassium Iodide tablets in light of approvals granted by the reference regulatory authorities and with the following additional conditions;

i. The applicants can submit their applications till 30-09-2020 and these applications will be considered out of queue.
ii. Registration Board shall consider grant of registration and submission of data of product development and 6 months accelerated and 6 months real time stability studies data before sale of product along with other data as may be required

Accordingly, Registration Board approved a number of applications for registration of "Potassium Iodide Tablets 65mg & 130mg" subject to following additional condition:

"The Board further decided that registration shall be valid for one (01) year only and the registration holder shall perform product development including stability studies for 6 months as per intervals and data requirements decided by Registration Board in its 293rd meeting and shall submit within one year time for consideration by Registration Board for further extension of validity period of registration."

In line with the above-mentioned decision, a number of registrations of Potassium Iodide Tablets 65mg and 130mg have been issued. Furthermore, validity period of some of these registrations has either been elapsed or near to expiry. However, requisite data including product development and stability studies for 6 months has not been submitted by any registration holder.

Previously Authority in its 117th meeting (held on 24th August, 2021) decided to extend the validity period of all registrations issued in context with COVID-19 pandemic to 5 years from the date of registration with the condition to ensure submission of data of product development including stability studies for 6 months as per intervals and data requirements decided by the Registration board in its 293rd meeting before marketing of the products. Accordingly, a case was forwarded to DRAP's Authority for extension in validity of these registrations.

DRAP's Authority in its 152nd meeting (held on 25-11-2022) decided as under:

"The Authority decided to approve the recommendation of the Registration Board to extend the validity period of potassium iodide's registration up to 05 years from the date of registration with the condition to ensure submission of data of product development including stability studies for 6 months as per intervals and data requirements decided by Registration Board in its 293rd meeting before marketing of the products."

Keeping in view the above-mentioned decision of DRAP's Authority, pending registration letters of Potassium Iodide Tablets have also been processed with above-mentioned condition.

Accordingly, the case is submitted for information and endorsement by the Registration Board.

Decision: **Registration Board deliberated that the registrations of "Potassium Iodide Tablets 65mg & 130mg" were issued subject to performance and submission of product development including stability studies (for 6 months) within one-year. However, till to date, relevant registration holders have not submitted the requisite information.**

Foregoing in view, Registration Board decided that relevant registration holders shall be directed to submit compliance of the above-mentioned condition subject thereto the registrations were issued for 01 year. The Board further directed PE&R Division to evaluate data/ studies submitted in this regard and subsequently place evaluation reports for consideration and final decision by the Registration Board.

Case No.06. Request of M/s Asian Continental (Pvt) Ltd., Karachi for Issuance of Registration Letter with Correct Composition

Registration Board in its 296th meeting held on 08th-10th Sep, 2020 approved registration of following product in favour of M/s Asian Continental (Pvt) Ltd. D/32 SITE Super Highway Karachi (DML No. 000643):

Name and address of manufacturer / Applicant	Asian Continental, D-32, Site II, Super Highway, Karachi
Brand Name +Dosage Form + Strength	Calocin-D Tablet (830 mg +400 IU)
Diary No. Date of R& I & fee	Dy. No.187, R&I Dated 17-11-14, Rs: 20,000/-
Composition	Each film coated tablet contains: Ossein mineral complex…830 mg Hydroxyapatite compound 830 mg (eq. to calcium 177.6 mg, phosphorous 82.2 mg, residual mineral salts 24.9 mg, collagen 224 mg, other proteins 66.4 mg, trace elements F, Mg, Fe, Ni.Cu) Vitamin D……..400 IU
Pharmacological Group	Calcium ,Vitamin D Supplement
Type of Form	From 5
Finished Product Specification	As per innovator Specifications.
Pack size & Demanded Price	30's, Alu- Alu Blister, As per SRO.
Approval status of product in Reference Regulatory Authorities.	Ossopan MD by Xymogen ,USA
Me-too status	Ossobon D by Platinum Pharmaceuticals (R. No. 044003)

GMP status	GMP inspection report dated 03-06-2020 with the following conclusion: Based on the above observations their current GMP compliance level is rated as Good.
Remarks of the Evaluator.	I. Presence of Atomic Absorption Spectrophotometer confirmed by FID inspection report. II. Referred product in reference regulatory authority could not be confirmed.
Previous Decision	Registration board in its 270th meeting decided as under: Deferred for confirmation of approval status in reference regulatory authorities.
Evaluation by PEC (AD PEC-XII)	• Firm provide the evidence of Me-Too Product Ossobon D Tablet by M/s. Platinum Pharmaceuticals (Reg.no. 044003). • Firm provide the evidence of GMP inspection report dated 11th Nov, 2015, wherein the area FID stated that the firm has recently installed Atomic Absorption Spectrophotometer.
Decision: Approved with Innovator's specifications.	

While processing for issuance of registration letter, it was identified that applied composition is different that of the generic product. Detail is as under:

Product Name and Applied Composition	**Product Name and Composition of Generic Product/ Brand Leader**
I	II
Calocin-D Tablet (830 mg +400 IU) Each film coated tablet contains: Vitamin D……..400 IU Ossein Mineral Complex…830 mg **Hydroxyapatite compound 830 mg** (eq. to calcium 177.6 mg, Phosphorous 82.2 mg, Residual mineral salts 24.9 mg, Collagen 224 mg, other proteins 66.4 mg, trace elements **F, Mg, Fe, Ni.Cu**)	Ossobon-D (Platinum)/ Osnate-D Tablet (AGP) Each film coated tablet contains: Vitamin D……..400 IU Ossein Mineral Complex…830mg Corresponding to Calcium……177.6mg Phosphorous…….. 82.2mg Residual Mineral Salts……. 24.9mg Collagen…….. 224mg Other Proteins……..66.4mg Trace Elements **F, Mg, Fe, Zn, Cu, Ni** ***Corresponding to approx.** **Hydroxyapatite……440mg**

In this context, the firm has now submitted correct composition (as mentioned in column II of above table) along-with following documents:

i. Revised form-5.
ii. Fee of Rs.30000/-(DS#3810798304).
iii. Copy of Last GMP Inspection Report (dated 27-09-2022) stating "Good" compliance.

Decision: Registration Board noted that the above-mentioned formulation falls in grey area between pharmaceuticals and H&OTC products, therefore, the case shall be referred for seeking opinion of committee on grey molecules.

Case No.07. Request of M/s Medimarker Laboratories (Pvt) Ltd. Hyderabad for Cancellation of Registrations.

M/s Medimarker Laboratories (Pvt) Ltd. Plot No. A-104 S.I.T.E Hyderabad (DML No. 000615) has requested for cancellation of registration of their following products which were registered by way of contract manufacturing at M/s Uni-Tech Pharmaceuticals, Karachi.

S. No.	Reg. No.	Product Name & Composition	Reason for Cancellation

1.	047034	Markxim Dry Powder 500mg Injection Each vial contains: Cefotaxime (as Sodium)…….500mg	• Non-submission of renewal/ extension in contract manufacturing permission. • The firm has been granted fresh approvals for registration of same formulations (for self-manufacturing) vide 322nd meeting of Registration Board.
2.	047037	Rifodime Dry Powder Injection 500mg Each vial contains: Ceftazidime……..……500mg	
3.	047031	Cefmark Dry Powder Injection 500mg Each vial contains: Ceftriaxone (as Sodium)……500mg	

Decision: **Registration Board acceded to the request of M/s Medimarker Laboratories (Pvt) Ltd. Plot No. A-104 S.I.T.E Hyderabad (DML No. 000615) and cancelled the registrations of above-mentioned products due to non- submission of renewal/ extension in contract manufacturing permission.**

Case No.08. Request of M/s Mission Pharmaceuticals Karachi for Cancellation of Approvals Granted by Registration Board.

Registration Board in its 324th meeting, held on 24th-26th January, 2023, approved following products in favour of M/s Mission Pharmaceuticals Plot No. A-94, S.I.T.E Super Highway Karachi (DML No. 000809) has requested for cancellation of registration of their following products:

Table-I

S. No.	Product Name & Composition	Decision of M-324
1.	Cepaxin Tablet 250mg Each Film Coated Tablet Contains: Ciprofloxacin As Hcl…250mg	Approved.
2.	Cepaxin 500mg tablet Each Film Coated Tablet Contains: Ciprofloxacin Hcl Eq To Ciprofloxacin …500mg	Approved.
3.	Diafac K 50mg Tablet Each Film Coated Tablet Contains: Diclofenac Potassium…50mg	Decision not mentioned in minutes.
4.	Merzole Capsule 40mg Each Capsule Contains: Esomeprazole Enteric Coated Pellets…40mg	Approved as per following label claim: Each Capsule Contains: Esomeprazole as Magnesium Trihydrate (enteric coated pellets)…40mg The firm shall submit fee of Rs.30,000/- for correction/pre-approval change in product label claim as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021, before issuance of registration letter.

However, the firm has now requested to cancel the above-mentioned approvals stating that they have already been issued registrations of same formulations. Detail is given below:

Table-II

S. No	Reg. No.	Name of Drug(s) & Composition

1.	096357	Cipracept Tablet 250mg Each film coated tablet contains: Ciprofloxacin as Hydrochloride……..250mg (USP Specifications)
2.	096358	Cipracept Tablet 500mg Each film-coated tablet contains: Ciprofloxacin as Hydrochloride ……..500mg (USP Specifications)
3.	096359	Vorenac-K Tablet 50mg Each film coated tablet contains: Diclofenac Potassium……...50mg (USP Specifications)
4.	098804	Prasium Capsule 40mg Each capsule contains: Esomeprazole Magnesium Trihydrate Enteric Coated Pellets eq. to Esmomeprazole……..40mg (USP Specifications)

Decision: **Registration Board acceded to the request of M/s Mission Pharmaceuticals Plot No. A-94, S.I.T.E Super Highway Karachi (DML No. 000809) and declared the decisions of 324th meeting regarding approval of products mentioned in Table-I above as redundant/ disposed of.**

Case No.09. Cancellation of Approval Granted to M/s Lisko Pakistan (Pvt) Ltd., Karachi for Registration of Maxime DS Suspension 100mg/5ml

Registration Board in its 324th meeting, held on 24th-26th January, 2023, approved following products in favour of M/s Lisko Pakistan (Pvt) Ltd., L-10/D, Block 21, Federal B Industrial Area, Karachi (DML No.000110):

Table-I

S. No.	Product Name & Composition	Decision of M-324
1.	Maxime DS 100mg/5ml Each ml contains: Cefixime as Trihydrate……..100mg	Approved.

While processing for issuance of registration letter, it was identified that the firm has already been issued registration of same formulation in same strength and dosage form. Detail is as under:

Table-II

S. No	Reg. No.	Name of Drug(s) & Composition
1.	050427	Liskoxime Dry Suspension 100mg/5ml Each ml contains: Cefixime as Trihydrate……..100mg

Decision: **Registration Board declared the decision of 324th meeting regarding approval of product mentioned in Table-I above as redundant/ disposed of.**

Case No.10. Request for Change in Registration Status of Mosegor 0.5mg Tablet from M/s Novartis Pharma Pakistan Limited, 15 West wharf, Karachi to M/s Novartis Pharma (Pakistan) Limited, C-21, S.I.T.E. Area, Karachi.

M/s. Novartis Pharma (Pakistan) Limited C-21, S.I.T.E. Area, Karachi (DML No.000003) has requested to change the registration status of Mosegor 0.5mg Tablet from M/s Novartis Pharma Pakistan Limited, 15- West Wharf, Dockyard Road, Karachi (DML#000193) to M/s Novartis Pharma Pakistan Limited (Formerly M/s Bayer Pakistan (Pvt.) Ltd,), C-21, S.I.T.E, Area, Karachi (DML#000003). They have also requested for change in manufacturing site from M/s GSK CHC, Petaro Road, Jamshoro (DML No. 000010) (i.e., contract manufacturer) to M/s Novartis Pharma Pakistan Limited, C-21, S.I.T.E, Area, Karachi (i.e., self-manufacturing).

The detail of the case is as follows:

Administrative Documents Submitted in the light of SOP approved by the Registration Board in its 283rd meeting
i. Copy of GMP certificate on the basis of inspection conducted on 08-09-2021.
ii. Copy of DML of M/s Novartis Pharma Pakistan Limited (DML # 000003) renewed w.e.f. 18-09-2020.
iii. Copy of Tablet (General) section approval letter dated 28-12-2021 issued by Licensing Division in the name of M/s Novartis Pharma Pakistan Ltd, C-21, S.I.T.E Area Karachi (DML# 000003)
i. NOC from M/s. Novartis Pharma Pakistan Limited, Karachi for transfer of Mosegor 0.5mg Tablet in the name of M/s. Novartis Pharma Pakistan Limited, C-21, S.I.T.E, Area, Karachi, issued on 03-01-2023
ii. Relevant undertakings & commitments.

Detail of submitted documents and remarks of evaluators have been mentioned as under:

Evaluator: Mr. Asadullah (DD-QMS)

	1.5.11-Proposed Label	Same as already registered
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. DS monograph exist in BP while DP monograph is not available in any pharmacopeia. Firm has summarized information of DS for its physical properties, solubility, polymorphism facts and other general properties. The DS manufacturer Novartis Pharma Switzerland is GMP certified and responsible for all steps of manufacturing, packing and testing, however certain in-process steps were being performed at three other sites in the Switzerland. Manufacturing process and process controls were briefly stated. Characterization elucidation studies was conducted using UV an NMR and spectroscopic techniques. Degradation and process related impurities was listed and analyzed and acceptable limits were defined. DS manufacturers followed BP specification and accordingly analytical methods were verified. DS lot procured was analyzed by DP manufacturer. Working standards, container closure and stability studies summaries of 04 batches were provided for long term study parameter at 25°C ± 2°C / 60% ± 5% RH. Similarly, information summaries for drug product

		related to its description, composition, choice of excipients, formulation development, manufacturing process, pharmaceutical equivalence and comparative dissolution profile against reference product were provided. Development of manufacturing process, and in-process controls were provided. DP specifications were developed based on in-house / manufacturer's specification. Excipients control as per pharmacopeia reference were provided. Analytical procedure and its validation were performed. Batch analysis of 03 stability batches were provided. Working standard its CoA, container closure system and stability studies summaries have been provided.
	Module-III Drug Substance:	Firm has submitted data for drug substance related to nomenclature, structure, general properties, solubilities, synthesis process, manufacturer and manufacturing process, character elucidation using spectroscopy, and NMR, physical form, polymorphism, structure elucidation using UV, FTIR, NMR, etc. intermediates and potential Impurities were identified and acceptable limits were assigned. Testing methods for impurities was provided. DS specifications were based on the BP monograph. 2% overages were added to compensate inherent processing loss. Analytical method and its verification were performed. DP manufacturer also performed analytical method verification of DS. Manufacturing process and in-process control and process validation studies were provided. Certificate of analysis of DS lot, batch analysis, reference standard and its CoA were provided. Container closure system, specification and test methods for packing materials, and stability studies sheet were provided.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at long term conditions**. The stability studies were conducted at 25ºC ± 2ºC / 60% ± 5% RH for 36 months.** DS was packed in a double polyethylene bags which were sealed in plastic closure band and place di metal drum wit temper resistant seal. The DS remained stable and within specified limits as tested on defined intervals. The firm has also provided temperature data logs for transposition of DS (batch C0035). Firm has also provided transport studies of Drug Substance (Pizotifen) conducted at 30ºC ± 2ºC / 65% ± 5% RH and 50ºC. Although it was established that DS is not sensitive to humidity and remains stable at 50ºC, but these studies were conducted in 1994. Furthermore, firm has also provided real time studies of DP for 06 months and informed that these studies will be continued for shelf life. However, forced degradation studies are not made part of

<table>
<tr><td></td><td></td><td>these real time studies.</td></tr>
<tr><td></td><td>Module-III Drug Product:</td><td>Firm has submitted data of drug product including its qualitative and quantitative composition, formulation development, manufacturing process development and in-process control, manufacturing process validation protocol and report, excipients testing methods based on pharmacopeia references with analysis reports, pharmaceutical equivalence and comparative dissolution profile, specifications and analytical procedures developed on the basis of in-house method and its validation studies, dissolution method validation, batch analysis, justification of specifications, reference standard, container closure system and stability studies.</td></tr>
<tr><td></td><td>Pharmaceutical Equivalence and Comparative Dissolution Profile</td><td>Pharmaceutical equivalence was performed against the Mosegor product manufactured by GSK, which shows comparable results within specified limits.
The comparative dissolution profile was performed of the stability batch (BAC303) against the Mosegor 0.5mg Tablet (Batch HK7R) manufactured by GSK, Karachi. Comparison was performed using 12 samples at pH 1.2, pH 4.5 and pH 6.8 for 30 min. CDP method was also validated by DP manufacturer. Calculation of value is as under:
<table>

No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	-
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate No. GMP-CH-1002419 dated 06-08-2021 issued by Swissmedic, Swiss Agency for Therapeutic Goods, Switzerland valid till 16/03/2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	API was purchased from Novartis Pharma AG, Switzerland, invoice # 2001723021 dated 19-01-2022, cleared on 27-01-2022 from DRAP, Karachi.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted audit trail of stability batches.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation Remarks and Response:-

Following queries were asked from the applicant during evaluation round:-

S. No.	Query	Response
1.	DS Stability was conducted at 25C /60RH. Registration Board decision in this regard with respect to force degradation studies and transport log maintenance.	Kindly be informed that since stability of DS is conducted at 25C /60RH, therefore as per the CTD Guidelines PE&R/GL/AF/004 dated 01-10-2020, we are providing you data logger of DS in Annex 1. In addition to this, being the finished product manufacturer, we have also provided you real time stability studies of the product along-with accelerated studies for 6 months. The real time stability studies are ongoing and will be continued till shelf life. Additionally, we are providing you stability studies for DS at zone IV-A as well which is included in DMF of Pizotifen Malate in 3.2.S.7 of module 3. We are attaching stability data as well for your kind consideration.
2.	Why firms is carrying an analytical method for Mosegor tablets from Sandoz, is it the same as developed by Sandoz decades ago and no amendments were made by Novartis or GSK site?	The analytical method shared in CTD dossier is current and validated and method validation is part of CTD.
3.	Why dissolution testing were excluded at 3, 6 month intervals in long term studies?	As per ICH Q1F Stability guidelines, "It is not expected that every test listed be performed at each point." attached in Annex 2. Given the provided guidelines, we have set the following periods for performing the dissolution studies at 0, 12 & 24 months and we will perform the tests as per protocol matrix till shelf life. Furthermore, we have already submitted dissolution studies for 0, 3, 6 months on accelerated conditions 40/75 and results are satisfactory as well.
4.	Justification for process loss is covered with 2% overages?	Mosegor 0.5mg Tablet contains a very small quantity of Pizotifen Hydrogen Malate (API) at 0.5mg per tablet (equivalent to 0.9% of individual tablet core weight). API is introduced at the granulation stage from initial step and undergoes sieving, dry mixing, wet mixing, fluidization, dry granulation and finally blending. These manufacturing steps inherit minor process losses during activity by design. Therefore, to compensate the inherit processing loss within entire manufacturing process, a minor 2% of API quantity (equivalent to 30 grams in total Core batch size of 110Kg) is added, subsequently validated and ensures that the final product contains the API quantity as per label claim for intended dosage and purpose.
5.	Why unfilled BMR was signed and submitted in the dossier?	As per the CTD guidance document PE&R/GL/AF/004 dated 01-10-2020 for submission of application form 5-F (CTD) in

		section 3.2.R it is stated that "for application of locally manufactured drug product, provide blank master production document / batch manufacturing record to be used during the commercial manufacturing of the applied product." Therefore, as per the requirement, we have provided unfilled BMR, signature is the evidence that the BMR template is controlled & approved.

Conclusion:

As per the decision of 290th meeting of Registration Board, the firm was required to submit followings information:-

- ✓ *In case where the real time stability data of drug substance is conducted at 25°C ± 2°C/60% RH ± 5% RH, the firm shall submit the record of data logger for the storage conditions throughout the transportation.*
- ✓ *Moroever, in case of use of ingredients whose stability testing has not been done as per Zone IVA, then the manufacturer of finished pharmaceutical product, shall submit real term stability studies data of the product for atleast 1 year along with degradation studies in the finished pharmaceutical product.*
- However, the firm has submitted stability study data of 3 batches of drug substance conducted at long term conditions **of 25ºC ± 2ºC / 60% ± 5% RH for 36 months.**
- The firm has also provided temperature data logs for transposition of DS (batch C0035). Firm has also provided transport studies of Drug Substance (Pizotifen) conducted at 30ºC ± 2ºC / 65% ± 5% RH and 50ºC. Although it was established that DS is not sensitive to humidity and remains stable at 50ºC, but these studies were conducted in 1994.
- Furthermore, firm has also provided real time studies of DP for 06 months and informed that these studies will be continued for shelf life. However, forced degradation studies are not made part of these real time studies.
- Pharmaceutical equivalence and comparative dissolution profile study have not been performed against the innovator's product. In this context, the firm has stated that Mosegor tablet is innovator product of Novartis Pakistan approved at GSK Jamshoro site for the manufacturing. Since we are transferring the product from GSK manufacturing Site, we have compared the dissolution profile with the Mosegor Tablet manufactured at GSK manufacturing site.

Decision: **Registration Board deferred the case for submission of following documents/ information by the applicant:**

i. Long term stability studies data of the finished pharmaceutical product for at least 1 year including degradation studies performed by M/s. Novartis Pharma (Pakistan) Limited, C-21, S.I.T.E., Karachi.

OR

Updated stability studies data of 3 batches of drug substance as per long term conditions of Zone-IV-A, performed by M/s Novartis Pharma AG Lichtstrasse 35, 4056 Basel, Switzerland.

ii. Request for withdrawal/ cancellation of registration of "Mosegar Tablet 0.5mg (Reg. No.006641) to be submitted by existing registration holder.

Case No.11. Request for Change in Registration Status of Panadol Extend Tablet (Reg. No.097070) from M/s GlaxoSmithKline Pakistan Limited, F-268, S.I.TE. Karachi to M/s GSK Consumer Healthcare Pakistan Limited, Petaro Road Jamshoro Along-with End to End Local Manufacturing.

Registration Board in its 323rd meeting held on 06th-08th December16th-17th May, 2022 considered the request of M/s GSK Consumer Healthcare Pakistan Limited, Petaro Road Jamshoro for change in registration status of Panadol Extend Tablet (Reg. No.097070) from M/s GlaxoSmithKline Pakistan Limited, F-268, S.I.TE. Karachi to their name as per following details:

Detail of Previous Proceedings:

M/s GSK Consumer Healthcare Pakistan Limited, Petaro Road Jamshoro initially applied for change in registration status from M/s GlaxoSmithKline Pakistan Limited, F-268, S.I.TE. Karachi to their name along-with end to end local manufacturing (Dy.No.33338/R&I dated 21-12-2021). However, the firm vide their letter No.REF/DRAP/Reg-003/0322 received dated10-03-2022 (Dy.No.6669) revised their request by informing that there is no change in manufacturing site (abroad) and repacking site (local). The case was considered by the Registration Board in its 317th meeting (held on 16th-17th May, 2022) and decided as under:

Decision of M-317:

Registration Board deferred the case for submission of updated approval status of the applied formulation along-with safety and efficacy profile in reference regulatory authorities adopted by the Board in its 275th meeting. Moreover, the Board further advised to submit valid and legalized CoPP of the product as existing has been expired.

In line with the above-mentioned decision of Registration Board, following information has been collected regarding risk-benefit profile of Paracetamol MR Tablet and regulatory steps taken by different reference regulatory authorities in the best interest of patients.

[Reference: Application to amend the Poisons Standard - Modified Release Paracetamol (tga.gov.au) accessed dated 04-11-2022]:

Paracetamol Modified Release Tablet:

Paracetamol MR tablets are constructed in two layers, an IR layer (31%) and a SR layer (69%) that gradually releases paracetamol over a period of 8 hours at normal doses.

The highest recommended dose of paracetamol for adults is 1.3 g and the maximum daily dose is 4 g (i.e., 2 tablets 3 times a day with highest dose of 6 tablets a day). A toxic dose is 10g or 200mg/kg (whichever is greater). The majority of patients who overdose take less than 30 g.

Summary of Benefits of MR Paracetamol:

i. Three times daily dosing and reduction of tablet burden (compared with four times daily dosing of IR formulations);
ii. MR paracetamol may be preferred over IR paracetamol for long term use in patients with chronic pain conditions such as osteoarthritis.

Summary of Risks of MR paracetamol:

i. Unpredictable and undefined pharmacokinetic profile following an overdose with MR paracetamol.
ii. Severe consequences of overdose may be more likely to occur in patients who have ingested MR paracetamol;
    a. High potential for treating clinician to not be aware that a patient has ingested MR paracetamol
    b. Unpredictable pharmacokinetic profile making monitoring and treatment difficult
iii. Current best practice guidelines do not completely address MR toxicity.
iv. Chronic supratherapeutic overdose is also thought to be not uncommon. This is likely largely due to confusion about the difference in dose between MR and IR paracetamol with the maximum dose being 6 tablets per day for the MR formulation rather than 8 tablets per day for IR. This confusion may be contributed to by the products being available adjacent to one another OTC without counselling/education provided at the point of sale.
v. Paracetamol overdose can result in liver failure requiring liver transplant and may be fatal if not treated appropriately in a timely manner.

To overcome the risk associated with overdosing of Paracetamol MR Tablet, following different regulatory actions have been taken by EMA and TGA:

A. **European Medicines Agency (EMA)** on recommendations of Pharmacovigilance Risk Assessment Committee (PRAC) suspended the marketing of MR paracetamol formulations in September 2017 as the **advantages of a longer-acting product did not outweigh the complications of managing an overdose of the medicine**, since the treatment procedures for immediate-release products are not appropriate for modified-release paracetamol.

   In many cases, it may not be known whether an overdose of paracetamol involves immediate-release or modified release products, making it difficult to decide how the overdose should be managed.

   Furthermore, the **medicines will remain suspended unless the companies that hold the marketing authorizations can provide evidence of appropriate and practical EU-wide measures to help prevent overdose with these products and adequately reduce its risks.**

B. Therapeutic Goods Administration (TGA) Australia has up-scheduled MR paracetamol from ***Schedule 2 'Pharmacy Medicine'*** to ***Schedule 3 'Pharmacist Only'*** in order to ensure appropriate patient counselling on correct dosing and the risks associated with overdose, whether intentional or accidental.

- There are well established guidelines in Australia for the management of paracetamol overdose including with MR paracetamol.
- The treatment of paracetamol overdose is dependent on a number of factors and treatment given will vary accordingly. Key parameters include dose taken and time since exposure, if known.
- The mainstay of treatment is with acetylcysteine. Whether acetylcysteine is administered depends on certain clinical parameters, including the use of the paracetamol treatment nomogram which plots the blood paracetamol concentration against time.
- Other investigations include measurement of liver function to assess for liver toxicity.

Approval status of Paracetamol extended-release tablets in different regulatory authorities is as under:

S/N	Country	Authority	Product	Approval status
1.	Australia	TGA (Therapeutic Goods Administration) PANADOL OSTEO (reformulation) paracetamol 665 mg modified release tablet blister pack (260264) | Therapeutic Goods Administration (TGA)	PANADOL OSTEO paracetamol 665mg modified release tablet of M/s GlaxoSmithKline Consumer Healthcare Australia Pty Ltd	Active (Non-prescription medicine) **(Pharmacist Only Medicine)**
2.	Australia	TGA (Therapeutic Goods Administration) PANADOL BACK & NECK LONG LASTING paracetamol 665mg modified release tablets blister pack (78493) | Therapeutic Goods Administration (TGA)	PANADOL BACK & NECK LONG LASTING paracetamol 665mg modified release tablets of M/s GlaxoSmithKline Consumer Healthcare Australia Pty Ltd	Active (Non-prescription medicine) **(Pharmacist Only Medicine)**
3.	USA	US FDA Drugs@FDA: FDA-Approved Drugs	Acetaminophen 650mg extended release tablet	Active (Human OTC drug)
4.	Canada	Health Canada Search results summary (canada.ca)	ARTHRITIS PAIN EXTENDED RELIEF tablet 650mg (Paracetamol extended release tablet)	Approved.
5.	Finland	The Finnish Medicines Agency (Fimea) Drug search - Fimea	Panadol Extend 665mg modified release tablets of M/s GlaxoSmithKline Consumer Healthcare APS	Marketed.
6.	Denmark	Danish Medicine Agency Search - Summary of Product Characteristics (produktresume.dk)	Panodil, Modified Release Tablets 665mg of M/s GlaxoSmithKline Consumer Healthcare APS	Marketed.

List of Countries (Other than RRAs) where Paracetamol MR Tablet has been reported to be available	
i.	New Zealand **(Pharmacist Only Medicine)**
ii.	Singapore
iii.	Hong Kong
iv.	Malaysia
v.	UAE

vi.	Lebanon
vii.	Oman
viii.	Qatar

Approval Status of Paracetamol MR tablets in Pakistan:

Application for registration of Panadol Extend Tablet (containing Paracetamol 665mg in modified release form) for finished import from Australia was received dated 22.06.2012 from M/s GlaxoSmithKline Pakistan Limited, 35-Dockyard Road, West Wharf, Karachi and initially considered by the Registration Board in its 243rd meeting held on 08th – 09th May, 2014. Later on, the firm revised the application from 'finished import' to 'bulk import and local repacking'. Registration Board in its 289th meeting held on 14th – 16th May, 2019 approved registration of aforementioned product such that the tablets will be imported in bulk from M/s GlaxoSmithKline Australia Pty Limited, Consumer Healthcare Division, 82 Hughes Avenue, Ermington NSW 2115, Australia and will be blistered and packed along-with final quality control release of the finished pharmaceutical product at M/s. GlaxoSmithKline Pakistan Limited, F-268 S.I.T.E, Karachi. The approval was granted on following grounds:

- Evidence of approval of applied formulation by the reference regulatory authority i.e., Therapeutic Goods Administration (TGA), Australia and confirmation of free sale status in Australia as determined from submitted legalized Certificate of Pharmaceutical Product (CoPP) for bulk labeled tablets.
- On-site Investigation by a panel comprising of Dr. Saif ur Rehman Khattak (Director, CDL, DRAP, Karachi), Dr. Najam us Saqib (Additional Director, DRAP, Karachi) and Mr. Kirshan Das (Assistant Director, DRAP, Karachi) for confirmation of Authenticity / Genuineness of stability data in final container closure system performed by M/s. GlaxoSmithKline Pakistan Limited, F-268 S.I.T.E, Karachi.

Reg. No.	**Product Name & Composition**	**Registration Trail**
097070	Panadol Extend Tablet Each modified release tablet contains: Paracetamol……665mg (USP Specifications) Bulk Import & Local Repacking	**Initial Reg. Date:** 08-07-2019 **Change of Source of Bulk Tablets dated 12- 03-2021:** From M/s GlaxoSmithKline Australia Pty Limited, Consumer Healthcare Division, 82 Hughes Avenue, Ermington NSW 2115, Australia to M/s Glaxo Welcome, S.A. Avda. Extremadura, 3, Pol. Ind. Allendeduero, Arvanda de Duero, 09400 Burgos, Spain **Change of Local Repacking Site dated 26- 10-2021**: From M/s GlaxoSmithKline Pakistan Limited, F-268, S.I.TE. Karachi to M/s GSK Consumer Healthcare Pakistan Limited, Petaro Road Jamshoro
Information printed on label regarding management of Overdose:		In case of overdose, immediate medical management is required by visiting nearest Emergency Medical Center, even if symptoms of overdose do not appear.

Detail of Revised Application Considered in M-323-RB:

M/s GSK Consumer Healthcare Pakistan Limited, Petaro Road Jamshoro has now requested for change in registration status of Panadol Extend Tablet (Reg. No.097070) from M/s GlaxoSmithKline Pakistan Limited, F-268, S.I.TE. Karachi to their name along-with **end to end local manufacturing**. The product is currently registered for bulk import (of tablets) from Glaxo Welcome Spain and local repacking along-with quality control release at M/s GSK Consumer Healthcare Pakistan Limited, Petaro Road Jamshoro.
Evaluation report will be placed before the Registration Board during the meeting.

Decision of M-323:

Registration Board deferred the case for following reasons:

i. *Evaluation of application submitted for change in registration status of Panadol Extend Tablet 665mg (Reg. No.097070) from M/s GlaxoSmithKline Pakistan Limited, F-268, S.I.TE. Karachi to M/s GSK Consumer Healthcare Pakistan Limited, Petaro Road Jamshoro along-with end to end local manufacturing.*

ii. *The applicant shall submit detail of measures adopted by other countries (whether RRA or non-RRA) to mitigate the risk as reported by EMA.*

iii. *The applicant shall also submit detail of practicable measures which will be adopted after grant of marketing authorization to prevent the risk of toxicity associated with over-dose of above-mentioned product.*

i. Evaluation Report:

Administrative Documents Submitted in the light of SOP approved by the Registration Board in its 283rd meeting
i. Copy of GMP certificate on the basis of inspection conducted on 15-09-2020.
ii. Copy of DML (000010) of M/s GSK Consumer Healthcare Pakistan Limited, Petaro Road Jamshoro renewed w.e.f. 31-03-2020.
iii. Approval of "Tablet (General) Section" confirmed from Licensing Division's letter dated 27-01-2022.
iv. NOC (dated 13-01-2022) issued by M/s. GlaxoSmithKline Pakistan Limited in the light of De-Merger order of Sindh High Court.
v. Relevant undertakings & commitments.

Evaluator: Mr. Abdul Mughees Mudassir (AD to CEO)

	Name, address of Applicant / Marketing Authorization Holder	GlaxoSmithKline Consumer Healthcare, Sandoz Nagar, Petaro road, Jamshoro, Sindh, Pakistan.
	Name, address of Manufacturing site.	GlaxoSmithKline Consumer Healthcare, Sandoz Nagar, Petaro road, Jamshoro, Sindh, Pakistan.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 1636 dated 02/12/2022
	Details of fee submitted	Fee Slip Number: 231886180613, PKR 30,000/- dated 22/11/2021
	The proposed proprietary name / brand name	Panadol Extend Tablets
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each modified-release tablet contains: Paracetamol ….665mg
	Pharmaceutical form of applied drug	Oral (Tablet)
	Pharmacotherapeutic Group of (API)	Analgesic
	Reference to Finished product specifications	USP Specifications.
	Proposed Pack size	20's

	Proposed unit price	As per DRAP approved price
	The status in reference regulatory authorities	Panadol Osteo Paracetamol 665 mg modified release blister pack By GSK Consumer Healthcare, Australia
	For generic drugs (me-too status)	-
	GMP status of the Finished product manufacturer	-
	Name and address of API manufacturer.	Rhodia Operations SAS (Novacyl Pharmaceutical), 8 Guang Shi Xi Road, China 214185 Wuxi
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of Paracetamol is present in BP. The firm as submitted detail of nomenclature, structure, general properties, Solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Accelerated: 40°C ± 2°C, 75%RH ± 5% Long-term: 25°C ± 2°C, 60%RH ± 5% Batches: 20040226G01, 20040228G01 and 20040229G01
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Firm has claimed to be innovator
	Analytical method validation/verification of product	Method Verification studies have been submitted.

Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	-
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	-
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Submitted
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Panadol Extend Tablets are white to off-white, bi-layer, capsule-shaped, film-coated tablets with flat edges embossed with an 8 logo on the front face and plain on the back face.	
Remarks OF Evaluator:	**Firm's Response:**

• GMP certificate of DS manufacturer and Invoice clearance from ADC.	• The applicant has submitted certificate of suitability of API by EDQM i.e., valid till to date along-with copy of invoice attested by ADC on 12-11-2019.
• Forced degradation studies of DS are required as the long-term stability has been performed on 25°C ± 2°C, 60%RH ± 5%.	• Not submitted yet

ii. Measures Adopted by other Countries (whether RRA or non-RRA) to mitigate the risk as reported by EMA:

The applicant has shared following information under the heading of "Risk Mitigation Measure Adopted in Finland":

Risk Minimization Measure	Purpose	Information
Implementing additional warnings on the packaging material/leaflet	Proposal by GSK: Inform and increase focus on use of paracetamol, increase focus on handling overdose. FIMEAS response: *Please provide the updated PI for assessment.* GSK CH response: *Updated SPC sections 4.4 and 4.9 is attached to this response.*	GSK CH commits to submit the next global data sheet v 7 after closure of the current ongoing GDS updates. The updated text linked to OD in v7: "the lowest dose necessary to achieve efficacy- should be used for the shortest duration of treatment." The updated sections in the FI SPC were approved by Fimea.
Education of HCPS	Proposal by GSK: Encourage HCPs to educate patients of safe use and storage of the medicine. Encourage HCPs to prescribe 48 tablet blister packs for acute cases, 96 tablets blister packs for chronic cases and 100 tablet bottles only for hospital use and dose dispensing. FIMEAS response: *Encouraging HCPS to educate patients on safe use and storage of the medicine and to prescribe 48 blister packs for acute case is not consider necessary.* *The 100 tablet bottles should be restricted to hospital use only. Only the blister*	GSK CH commits to send out communication to HCPs upon relaunch if the suspension would be lifted. The final Finnish DHCP communication that was accepted by Fimea was sent out to HCPs in FEB 2019.

	packages should be available for dispensing to patients from pharmacies. The *Applicant is asked to comment on this proposal.* <u>GSK CH response:</u> *We confirm that 100 tablet bottles will be restricted to hospital use only and that only* *blister packages will be dispensed by pharmacies. We will make the necessary* *changes to implement this and in the meantime we will not produce or deliver any* *bottles.* <u>Proposal by GSK:</u> Increased focus on risk of overdose. <u>*FIMEAS response:*</u> *Informing emergency department and the PIC that MR paracetamol is back on the market is essential as well as a reminder of the updated treatment guideline. The current Finnish guideline states that the nomogram should only guide* *treatment in case of acute intoxications and is not reliable in case of intoxication with* *MR products. To minimise the risk of liver damage the Applicant should send out a* *DHCP communication to the Finnish emergency departments and the PIC* *emphasizing this update of the guideline as well as the need for repeated sampling* *of paracetamol.*	
Patient information campaigns	<u>Proposal by GSK:</u> Inform about risk of liver damage and importance of appropriate use of paracetamol. Inform and increase focus on the importance of storing medicines safely – both at home and on the move. Help parent to have "safe medicine" conversations with their children.	GSK CH commits to roll out: "Safe storage of medicine" campaign. Guide to guidegivers regarding medication management in elderly. Parent's guide. Patient folder. Information campaign targeting young people.
Child proof packaging	<u>Proposal by GSK:</u> Limit accessibility for children with child resistant packages.	GSK CH is committed to implementing child resistant packaging on all their products.

	FIMEAS response: *Will GSK implement child resistant blister packaging? And if so, the Applicant is asked* *to give an estimate of the timetable for this implementation.*	CRSF foil is implemented for all the registered pack types.

Furthermore, the applicant has also shared a review article on ***"Updated guidelines for the management of paracetamol poisoning in Australia and New Zealand"*** (https://pubmed.ncbi.nlm.nih.gov/31786822/)

iii. Measures to prevent the risk of overdosing after grant of marketing authorization:

PANADOL EXTEND TABLETS - OVERDOSING PREVENTION

Following are the practicable measures which will be adopted to prevent the overdosing risk of paracetamol through our product:

Globally we are mitigating the risk of overdose associated with all paracetamols' containing products including modified-release paracetamol through routine risk minimisation measures that includes product's labelling (GDS), the company's signal management activities and a targeted follow-up questionnaire (TFUQ) for medically confirmed spontaneous reports of liver or hepatobiliary adverse events in the context of paracetamol overdose. Also, our routine pharmacovigilance practices include:

- Established processes for the collection and as required, notification of any adverse events occurring anywhere in the world.
- Established processes for the regular and systematic review of ongoing safety data relating to its pharmaceutical products.

This employs a routine, pro-active process for identifying safety signals with four main components:

A. Ongoing awareness and review of important individual cases, including all reports with a fatal outcome.
B. Systematic, regular and proactive review of aggregate safety data. This includes trend analysis to detect increased frequency of reporting and, qualitative and quantitative methodologies to detect safety signals.
C. Systematic, regular review of the literature.
D. Starting 22 Feb 2018, regular review of data from EudraVigilance, the pharmacovigilance database of the EMA, for products included in EMA's list of medicines under additional monitoring as of 25 Oct 2017. Note that paracetamol is not included in EMA's list of medicines under additional monitoring.

Also, the TFUQ includes a comprehensive set of questions aimed at capturing specific and pertinent details regarding the potential paracetamol overdose such as: patient demographics, whether the patient was hospitalised, the quantity of paracetamol taken, the type of packaging, details about any other drugs ingested and quantities, whether treatment with N-acetylcysteine was given, details of any relevant laboratory results including serum paracetamol levels, N-acetyl-p-benzoquinoneimine and glutathione levels etc. Potential safety issues identified from non-clinical studies, clinical trials, individual case reviews, signal detection and data mining activities, Periodic Benefit Risk Evaluation Report/Periodic Safety Update Reports, from regulatory queries or other sources are carefully evaluated. Adverse drug reactions identified during these reviews are incorporated into the Core Safety Information for paracetamol and subsequently reflected in local country labelling.

On the basis of above locally we have following in place and in process:

1. Updated Patient information leaflet with paracetamol overdosing.
2. We have safety contact, and one may reach out to us through published e-mail and telephone numbers on our product's labelling and packaging.
3. We will establish website and upload right dosing and overdosing information for both healthcare professionals (HCPs) and patients.
4. Our on-ground expert team will reach out hospitals and provide related literature, educate on right dosing and overdosing.
5. In UK we have a website for patient awareness on different products www.letstreatitright.com we will develop one such for Pakistan and see the utility for HCPs and Patients.

In addition to above-mentioned information, the firm has also shared the following statistics regarding overdose instances reported globally with respect to paracetamol containing product:

Data Collected Globally Regarding Overdose Instances of Paracetamol Containing Products:

a. Since, Panadol Extend Tablet was launched, no complaints have been received with respect to formulation safety and no healthcare professional has raised any concern; in fact, this is currently the most in-demand product due to its efficacious nature and ease of administration.
b. Due to proper product labelling w.r.t. its indication, dosage and maximum daily intake quantity, no cases of overdosing or misuse of the product have been reported and nothing was communicated by authorities either.
c. From July 1, 2020, to December 31, 2022, a total of 46 overdose instances of Paracetamol products were reported globally as mentioned below in the country-wise table. Out of these, 20 were paracetamol combination products and junior, or children's, range products of paracetamol. Two of the remaining 26 cases are of Panadol Osteo, which is an SR formulation, while the rest are reported from the source countries as adult Paracetamol overdose cases.

Country	**Count of Case Number**
Australia	14
Sweden	6
Turkey	5
Spain	3
Denmark	2
Peru	2
United Kingdom	2
Canada	1
Russian Federation	1
Finland	1
China	1
South Africa	1
Colombia	1
Sri Lanka	1
New Zealand	1
France	1
Costa Rica	1
Hong Kong	1
India	1
Grand Total	**46**

d. Further dissecting the provided data with the available information of below 26 cases, global overdose instances were less than 26 during the last 30 months, as it includes some reported countries where Paracetamol SR formulation is not on the market. Out of these, 11 are reported as serious cases, and most were reported during the peak COVID period, where healthcare professionals' (HCP) accessibility was compromised.

Country	**Count of Case Number**
Australia	7
Sweden	3
Turkey	5
Spain	1
Denmark	1
United Kingdom	1
Finland	1
China	1
South Africa	1
Colombia	1
New Zealand	1
Costa Rica	1
Hong Kong	1

India	1
Grand Total	**26**

e. As a result, the proposal to educate HCPs and patients via different modes, highlighting the maximum daily intake, warnings and precautions of this formulation are helpful in ensuring its safe use in the local market.

Proceedings of M-326th Meeting:

i. Mr. Abdul Mateen, Deputy Director (Division of Pharmacy Services, DRAP) apprised the Board that the firm has merely reported number of overdose instances regardless of submitting complete case reports. Furthermore, keeping in view the practices adopted by different RRAs/ Non- RRAs, following proposals were also placed for consideration of Registration Board:

a. Possibility for change in prescription status of Panadol Extend Tablet in Pakistan from OTC to prescription only medicine; Or to be sold through pharmacies only across Pakistan *"Pharmacist only"*.
   - Or the firm should be asked about the legal status (OTC, prescription or pharmacist only) in all countries where the drug is registered/marketed.

b. Warning on outer carton/pack regarding the risk
   - Reference: Public assessment report of EMA (Page 24)

https://www.ema.europa.eu/en/documents/referral/paracetamol-article-31-referral-prac-assessment-report_en.pdf

c. Reduction in pack size of OTC product or the firm should be asked to submit detail of pack size in all the countries where the drug is registered/marketed both for prescription and OTC product.
   - 12 caplets in Malaysia and EMA public assessment report (https://www.panadol.com/en-my/adult-products/panadol-extend/
   - Australia has decided to reduce the OTC pack size to 16 from 20 (https://www.tga.gov.au/resources/publication/scheduling-decisions-interim/interim-decision-paracetamol-access-controls-poisons-standard-questions-and-answers)
   - 18 in Singapore (https://www.panadol.com/en-sg/products/adult/muscle-and-joint-pain-relief/panadol-extend.html)
   - 18 in Egypt (https://www.panadol.com/en-eg/products/adult-products/panadol-joint.html)

d. Educational tool for healthcare professionals and patients for reduction of risk of overdose toxicity.

ii. Dr. Ayesha Yaqoob, Govt. Analyst, DTL, Rawalpindi apprise that Board that DTL, Rawalpindi receive some samples from the market, which show different manufacturing sites / MA Holder. Accordingly, the case was taken up by the PQCB regarding availability of 3/three different types of packs of Panadol Extend Tablet in the market.

Decision of 326th meeting:

Registration Board deferred the case on following grounds:

i. The applicant shall submit following information/ documents for further deliberation by the Board:

a. Stability studies of active substance (API) as per conditions of Zone IV-A or/otherwise submission of requisite information/ documents as already decided by the Registration Board in its 290th meeting under "Requirement of The Storage Conditions for The API Stability and FPP Stability".

b. Reports of Pharmaceutical Equivalence and Comparative Dissolution Profile Study performed against the innovator's product.

c. Justification for adopting USP specifications with reference to following claim of innovator's product regarding release profile:

<table>
<tr><td>USP Dissolution Test 1</td><td>Claim of Innovator's Product (regarding release profile)</td></tr>
<tr><td><table><tr><td>Time</td><td>Amount Dissolved</td></tr><tr><td>15min</td><td>45%-65%</td></tr></table></td><td>MR paracetamol tablets are constructed in <u>two layers</u>, an IR layer that is absorbed rapidly (similar to standard paracetamol formulations)</td></tr>
</table>

1h	*60%-85%*	*and a sustained release layer which allows for the gradually release of paracetamol from tablet over a period of 8 hours.*
3h	*NLT 85%*	

ii. *Existing registration holder i.e., M/s GlaxoSmithKline Pakistan Limited, F-268, S.I.TE. Karachi (DML No.000233) shall submit NOC (issued within 6 months) for grant of same brand name in favour of M/s GSK Consumer Healthcare Pakistan Limited, Petaro Road Jamshoro (DML No.000010) along-with a request for withdrawal/ cancellation of registration of Panadol Extend Tablet (R#097070).*

iii. *The firm shall submit the details of its pharmacovigilance system in line with guidelines issued by DRAP regarding the reporting of any ADR/ADE. The firm shall report any ADR/ADE accordingly.*

iv. *Educational tool to be adopted for healthcare professionals and patients to reduce the risk of toxicity associated with overdose*

v. *All the provincial health departments shall be requested to report any case/incidence regarding the Panadol Extend Tablet to the Quality Assurance Division DRAP.*

In line with the decision of 326th meeting of Registration Board, M/s GSK Consumer Healthcare Pakistan Limited, Petaro Road Jamshoro (DML No.000010) has submitted as under:

Table-I

S/N	Required Information/ Documents (As per Decision of M-326)	Response of the Firm	Remarks of Evaluator (Reg-I Section)
I	II	III	IV
1.	Stability studies of active substance (API) as per conditions of Zone IV-A or/otherwise submission of requisite information/ documents as already decided by the Registration Board in its 290th meeting under "Requirement of The Storage Conditions for The API Stability and FPP Stability".	Submitted	Complied.
2.	Reports of Pharmaceutical Equivalence and Comparative Dissolution Profile (CDP) Study performed against the innovator's product.	Submitted	i. In line with the notification No.14-1/2022-PEC dated 16-01-2023, it is required to submit image/ picture/ snapshot of the innovator pack against which pharmaceutical equivalence and CDP have been performed. Provided image/ picture/ snapshot should reveal the details of brand name, manufacturer, batch# and expiry date of the innovator's product. ii. Although, Pharmaceutical Equivalence Report has not been attached with current submission, however, the one shared via e-mail received dated 15-03-2023 has been reviewed wherein release profile/dissolution of the product has been analysed at **"15min, 30min, 60min and 120min"** time points which correspond to **'Table 1'** of the **'Test 1'** described in USP monograph. Similarly, CoA of the innovator's product (shared via email dated 16-03-2023) also depicts that analysis has been performed at aforementioned time-points. While, in current submission, it has been categorically stated that applied

<table>
<tr>
<td></td>
<td></td>
<td></td>
<td>product conforms to 'Table 2' of 'Test 1' described in USP monograph. Accordingly, clarification is required.

Table 1
<table><tr><th>Time</th><th>Amount Dissolved</th></tr><tr><td>15 min</td><td>45%–65%</td></tr><tr><td>1 h</td><td>60%–85%</td></tr><tr><td>3 h</td><td>NLT 85%</td></tr></table>
Table 2
<table><tr><th>Time</th><th>Amount Dissolved</th></tr><tr><td>30 min</td><td>40%–60%</td></tr><tr><td>90 min</td><td>55%–85%</td></tr><tr><td>4 h</td><td>NLT 80%</td></tr></table></td>
</tr>
<tr>
<td>3.</td>
<td>Justification for adopting USP specifications with reference to following claim of innovator's product regarding release profile:

<table><tr><th>USP Dissolution Test 1</th><th>Claim of Innovator's Product (regarding release profile)</th></tr><tr><td><table><tr><th>Time</th><th>Amount Dissolved</th></tr><tr><td>15min</td><td>45%-65%</td></tr><tr><td>1h</td><td>60%-85%</td></tr><tr><td>3h</td><td>NLT 85%</td></tr></table></td><td>MR paracetamol tablets are constructed in two layers, an IR layer that is absorbed rapidly (similar to standard paracetamol formulations) and a sustained release layer which allows for the gradually release of paracetamol from tablet over a period of 8 hours.</td></tr></table></td>
<td>i.Panadol Extend was formulated in such a way that it follows coated tablets dissolution profile in USP monograph. Kindly refer table 2 of test 1 in USP monograph of Acetaminophen ER Tablet.
Furthermore, for innovator's product claim we are providing GSK/HLX Australia's MAH approval letter, which suggest that it is 8 hours relief over a period of 8 hours, we are reiterating MAH sentence below:
Product Specific Indications
Effective relief from persistent pain for upto 8 hours.

ii.The firm has also submitted that dissolution test is performed as net dissolution of both layers and separate release profile of both layers is not applicable due to following technical rational:
• USP general chapter <711> does not provide any guidance for carrying out dissolution test on individual layers of bi-layered tablets.
• The scientific knowledge also compels to understand that the dissolution of any dosage form is net dissolution of all layers.
• The test method received from innovator I.e., Glaxo Wellcome S.A. Aranda Spain is also check and it is verified that this is the total dissolution time for both layers.
• Reference pharmacopeial specifications for an overall claim of the product i.e., Extended release tablets and it meets the Test 1-Table 2 of USP monograph.</td>
<td>i. Product claim i.e., "Effective relief from persistent pain for upto 8 hours" still need to be justified in the light of description of the product available on Application to amend the Poisons Standard - Modified Release Paracetamol (tga.gov.au) i.e., "MR paracetamol tablets are constructed in two layers, an IR layer and a sustained release layer that gradually releases paracetamol over a period of 8 hours at normal doses."

ii.Furthermore, justification given for adopting finished product specifications (i.e., USP) and for analysing net dissolution of both layers is not sufficient as it will not be able to discriminate between the release profile of IR layer and SR layer.</td>
</tr>
<tr>
<td>4.</td>
<td>Existing registration holder i.e., M/s GlaxoSmithKline Pakistan Limited, F-268, S.I.TE. Karachi (DML No.000233) shall submit NOC (issued within 6 months) for grant of same brand name in favour of M/s GSK Consumer Healthcare Pakistan Limited, Petaro Road Jamshoro (DML No.000010) along-with a request</td>
<td>NOC dated 24-05-2023 has been submitted by GlaxoSmithKline Pakistan Limited, Karachi.</td>
<td>Complied.</td>
</tr>
</table>

	for withdrawal/ cancellation of registration of Panadol Extend Tablet (R#097070).		
5.	The firm shall submit the detail of its pharmacovigilance system in line with guidelines issued by DRAP regarding the reporting of any ADR/ ADE. The firm shall report any ADR/ADE accordingly.	We are providing our Pharmacovigilance System Master File (SOP). It is in alignment with the guideline of good pharmacovigilance practice for registration holders.	Provided document describes pharmacovigilance system for MAHs of the members of the Haleon Group of Companies for Consumer Health (CH) products. However, region specific details (e.g., facilities, training, QPPV etc.,) in line with the guidelines issued by DRAP have not been attached.
6.	Educational tool to be adopted for healthcare professionals and patients to reduce the risk of toxicity associated with overdose.	Product global data sheet (GDS) attached in which complete guidance is available for healthcare professionals and patients to reduce the risk and toxicity associated with overdose.	Provided document is a confidential global data sheet (GDS) which is usually not accessible to health care providers and patients especially in case of OTC products. Even, if accessible, proper counselling of the patient to develop awareness regarding difference between IR and MR formulations of paracetamol is important as both are available over the counter.

Proceedings of 329th Meeting:

Registration Board was apprised that the firm (vide letter received dated 05-06-2023) has submitted response against the remarks mentioned vide column IV of Table-I

Table-II		
S. No.	**Remarks of Evaluator (Reg-I Section)**	**Firm's Response**

<table>
<tr>
<td>1</td>
<td>i. In line with the notification No. 14-1/2022-PEC dated 16-01-2023, it is required to submit image/ picture/ snapshot of the innovator pack against which pharmaceutical equivalence and CDP have been performed. Provided image/ picture/ snapshot should reveal the details of brand name, manufacturer, batch# and expiry date of the innovator's product.

ii. Although, Pharmaceutical Equivalence Report has not been attached with current submission, however, the one shared via e-mail received dated 15-03-2023 has been reviewed wherein release profile/dissolution of the product has been analysed at "15min, 30min, 60min and 120min" time points which correspond to 'Table l' of the 'Test 1' described in USP monograph. Similarly, COA of the innovator's product (shared via email dated 16-03-2023) also depicts that analysis has been performed at aforementioned time-points. While, in current submission, it has been categorically stated that applied product conforms to 'Table 2' of 'Test l' described in USP monograph. Accordingly, clarification is required.

Table 1
<table><tr><th>Time</th><th>Amount Dissolved</th></tr><tr><td>15 min</td><td>45%–65%</td></tr><tr><td>1 h</td><td>60%–85%</td></tr><tr><td>3 h</td><td>NLT 85%</td></tr></table>
Table 2
<table><tr><th>Time</th><th>Amount Dissolved</th></tr><tr><td>30 min</td><td>40%–60%</td></tr><tr><td>90 min</td><td>55%–85%</td></tr><tr><td>4 h</td><td>NLT 80%</td></tr></table></td>
<td>We are providing the image of the innovator pack against which pharmaceutical equivalence and CDP have been performed.

Dissolution profile of the product Panadol Extend Tablet fully complies with the acceptance criteria defined under Table-2/ Test I of USP monograph "Acetaminophen Extended-Release Tablets". The same has been demonstrated in comparative dissolution profile (CDP) test report.

Technical transfer and evaluation of this product was made from Glaxo Wellcome S.A. Aranda Spain where it was registered according to innovator's specifications. The dissolution method, time points and acceptance criteria were different from USP monograph as indicated in the COA from innovator. Accordingly, the initial pharmaceutical equivalency report was also indicating innovator's specifications for dissolution test.

After completion of technical transfer, in order to abide by the DRAP circular regarding compliance of Pharmacopeial specifications we had revised the specifications and testing method of dissolution test as per USP monograph and the product is fully compliant with Table-2/ Test 1 of USP monograph "Acetaminophen Extended-Release Tablets".</td>
</tr>
<tr>
<td>2</td>
<td>i. Product claim i.e., "Effective relief from persistent pain for upto 8 hours" still need to be justified in the light of description of the product available on Application to amend the Poisons Standard - Modified Release Paracetamol (tga.gov.au) i.e., "MR paracetamol tablets are constructed in two layers, an IR layer and a sustained release layer that gradually releases paracetamol over a period of 8 hours at normal doses."

ii. Furthermore, justification given for adopting finished product specifications (i.e., USP) and for analysing net dissolution of both layers is not sufficient as it will not be able to discriminate between the release profile of IR layer and SR layer.</td>
<td>For clarification we are providing ARTG link below, under which formulation is registered in TGA. Also please find the summary document of ARTG, supporting 8 hours relief claim as annexed.
PANADOL OSTEO (reformulation) paracetamol 665 mg modified release tablet blister pack (260264) | Therapeutic Goods Administration (TGA)

Regarding performance of dissolution test on individual IR & SR layers, we are performing dissolution test as described in the USP general chapter <711> DISSOLUTION which do not provide any method for performing dissolution test on individual layers. The test method received from innovator i.e. GSK Aranda Spain also states net dissolution for both layers. Furthermore, we could not find any other official method or guideline that could describe any such test.</td>
</tr>
<tr>
<td>3</td>
<td>Provided document describes pharmacovigilance system for MAI-Is of the members of the Haleon Group of Companies for Consumer Health (CFI) products. However, region specific details (e.g., facilities, training, QPPV etc.,) in line with the guidelines issued by DRAP have not been attached.</td>
<td>We have provided our regional master SOP for management of pharmacovigilance in this region (we fall under Europe Middle East region). This was further tailored and implemented locally with requirement deemed necessary as per local regulation. Kindly find attached the details of local safety officer (LSO) as per the issued DRAP guidelines.</td>
</tr>
</table>

4	Provided document is a confidential global data sheet (GDS) which is usually not accessible to health care providers and patients especially in case of OTC products. Even, if accessible, proper counselling of the patient to develop awareness regarding difference between IR and MR formulations of paracetamol is important as both are available over the counter.	We have already provided overdosing preventive practicable measures under the same heading addressed in the agenda at page no. 1262. Therefore, shared internal document (GDS) as master document for implementation. Our expert teams (Field Medical Representatives) will utilise same document for the education of HCPs.

Decision: **Registration Board deferred the case on following grounds:**

i. **DRAP's circular regarding compliance of "Pharmacopeial Specifications" is applicable to those formulations for which product specific monographs have been included in official pharmacopeiae.**
ii. **However, Panadol Extend Tablet 665mg is a modified release bi-layered tablet with defined content/ percentage of active substance in each layer (i.e., 31% in IR layer and 69% in SR layer).**
iii. **Therefore, the firm shall submit sound scientific justification for adopting "USP Monograph for Acetaminophen Extended Release Tablet", keeping in view that the adopted analytical method should be able to discriminate between release behaviour of IR and SR layers of the product.**
iv. **Furthermore, the firm shall also submit justification for adopting 'Table 2' of 'Test 1' (described in USP monograph) which is applicable for "Gelatin Coated Tablet" (as stated in USP), keeping in view that the submitted/ claimed formulation and manufacturing method of 'Panadol Extend Tablet' does not involve 'gelatin coating'.**
v. **Furthermore, keeping in view that "Panadol Extend Tablet (Reg. No. 097070)" has been registered since July, 2019 and despite of the fact that different reference regulatory authorities/ agencies (i.e., TGA, Finland) have adopted several measures to address the risk associated with overdosing/toxicity of the product, the firm has failed to develop a well-established system for addressing pharmacovigilance activities. Accordingly, Registration Board showed displeasure on absence of well-established pharmacovigilance system in such a renowned firm i.e., M/s GSK Consumer Healthcare Pakistan Limited, Petaro Road Jamshoro (DML No.000010).**

Registration-II Section

Case No.01: Issuance of Duplicate Registration Letter

M/s. P.D.H Laboratories (Pvt) Ltd. 9.5-Km Sheikhupura Road (Khaki) Lahore has submitted an application for Duplicate Registration Letter of following products as original registration letters were misplaced during shifting of their head office. Detail of products is as under:

Sr. No.	Registration Number	Brand Name and Composition
1.	**000794**	Aqua Pro Injection 5ml
2.	**000793**	Atropine Injection 1mg/ml
3.	**000784**	Benzyl Pencillin 5 Lac
4.	**000786**	Benzyl Pencillin 10 Lac

5.	**000792**	Chloroquine Phosphate Injection 5ml
6.	**000790**	La'Pen Injection 12 Lac
7.	**000791**	La'Pen Injection 6 Lac
8.	**000785**	Polybiotic Injection 1gm
9.	**000782**	Procaine Penicillin Forte 4 Lac
10.	**000783**	Streptomycin Injection 1gm

Firm has also submitted following documents:

i. Fee of Rs.7500/- each for issuance of duplicate registration letter, verified from website.
ii. Notarized copy of FIR.
iii. Copy of Newspaper in which advertisement reading loss of registration letters was published.
iv. Affidavit regarding contents of application for duplicate registration letter

As per computerized record (RDI) which is also confirmed from The Gazetter of Pakistan, Extra, October, 14, 1981 above mentioned products are registered with following details.

Sr. No.	Registration Number	Brand Name and Composition	Pack Size	MRP
1.	**000782**	Procaine Penicillin Forte Injection 4lac Each vial contains: Procaine Penicillin 4 lac	4 lac 20 lac	Rs.1.42/- Rs.4.08/-
2.	**000783**	Streptomycin Injection Each vial contains: Streptomycin Sulphate 1gm	1 vial	Rs.1.50/-
3.	**000784**	Benzyl Pencillin Injection 5lac Each vial contains: Benzyl Penicillin 5 lac	1 vial	Rs.1.42/-
4.	**000785**	Streptomycin Procaine Penicillin Forte Injection Each vial contains: Streptomycin Sulphate 1gm Procaine Penicillin 3,00,000 Units Benzyl Penicillin 1,00,000 Units	1 vial	Rs.2.67/-
5.	**000786**	Benzyl Pencillin Injection 10lac Each vial contains: Benzyl Penicillin 10 lac	1ml	Rs.2.20/-
6.	**000790**	Benzathine Penicillin Injection 12 lac Each vial contains: Benzathine Penicillin 12 lac	1 vial	Rs.4.50/-
7.	**000791**	Benzathine Penicillin Injection 6 lac Each vial contains: Benzathine Penicillin 6 lac	1 vial	Rs.2.45/-
8.	**000792**	Chloroquine Phosphate Injection Each ml contains: Chloroquine Phosphate 40mg	5ml x 100	Rs.82/-

9.	**000793**	Atropine Sulphate Injection Each ml contains: Atropine Sulphate 1mg	1ml x 100	Rs.25/-
10.	**000794**	Aqua Pro Injection Each ampoule contains: Aqua Pro Injection	100 x 5ml	Rs.30/-

Case was referred to RRR Section for confirmation of renewal status of these products and reply of RRR Section is reproduced as under:

> *"The renewal applications for the year 2021 and 2016 were submitted within time w.r.t date of registrations as provided by the firm in renewal application.*
>
> *The section is requested to verify the date of registration from their record as the copies of the registration letters are not submitted by the firm in aforesaid renewal applications*."

Decision of 323rd Meeting of RB.

> **Registration Board advised to seek guidance from Legal Affair Division.**

Case was referred to Legal Affair's Division for their opinion which is reproduced as under:

> ***"…that duplicate registration letter may be issued to the firm after duly verification of previous letter, MRP issued on that very letter, Gazette notification and non-cognizable police report. Moreover, the duplicate registration letter will have same contents as contained in original letter issued to the firm including MRP mentioned at original letter. Moreover, on duplicate registration letter, the word 'Duplicate' must be mentioned on the letter".***

Extract of requisite products from The Gazetter of Pakistan, Extra, October, 14, 1981 is attached as under:

000768. ALLERPHENE TABLET (P.D.H)
Chlorpheniramine Maleate 4 mg.
1000's : 14.10.

000769. SULPHADIMIDINE TABLET (P.D.H)
Sulphadimidine 0.5 gm.
1000's : 66.00 ; 5000's : 248.75.

000770. ZINCOCID EYE DROPS (P.D.H)
Each 100 ml contains :—
Boric acid 1.6 gm.
Zinc Sulphate 0.46 gm.
20ml : 2.95.

000771. BENZYL BENZOATE APPLICATION (P.D.H)
Each ml contains :—
Benzyl Benzoate 25% w/v
60 ml : 3.00 ; 1 lb : 14.70. 120ml5.00

000772. PANOCID EYE DROPS 10% (P.D.H)
Each 10 ml contains :—
Solution of Sulphacetamide Sodium 10%
10cc : 3.40.

000773. PANOCID EYE DROPS 20% (P.D.H)
Each 10 ml contains :—
Solution of Sulphacetamide Sodium 20%
10 cc : 4.00

000774. PANOCID EYE DROPS 30% (P.D.H)
Each 10 ml contains :—
Solution of Sulphacetamide sodium 30%
(Sulphacetemide Sodium 3gm)
10ml : 4.25.

000775. SULPHADIAZINE TABLET (P.D.H)
Sulphadiazine 0.5 mg.
1000's : 76.00

000776. TRISULPHA TABLET (P.D.H)
Each tablet contains :—
Sulphadiazine 167.0 mg.
Sulphadimidine 167.0 mg.
Sulphamerazine 167.0 mg.
1000 s : 50.00. 100 : 14.00

000777. AMMONIUM CHLORIDE COUGH SYRUP (P.D.H.)
Each ml contains :—
Ammonium Chloride 100 mg.
Sodium Citrate 60 mg.
Chlorpheniramine Maleate 2 mg.
Ephedrine Hydrochloride 7 mg.
Menthol crystal 1 mg.
120 ml : 5.00 ; 450 ml 14.50

000778. VITAMIN C TABLET 100 (P.D.H.)
Ascorbic Acid 100 mg.
100's : 3.50 ; 1000's : 29.75.

000779. VITAMIN C TABLET 500 mg. (P.D.H.)
Ascorbic Acid 500 mg.
40's : 6.25.

000780. SODIUM CHLORIDE INJECTION 0.9% (P.D.H.)
Each 100 ml contains :—
Sodium Chloride 0.9 mg.
100 × 10 ml : 60.00

000781. CYANOCOBALAMIN INJECTION (P.D.H.)
Cyanocobalamin 1000 mcg.
10 ml : 6.20.

000782. PROCAINE PENICILLIN FORTE INJECTION 4 LAC (P.D.H.)
Each vial contains :—
Procaine Penicillin 4 lac.
4 lac : 1.42 ; 20 lac : 4.08.

000783. STREPTOMYCIN INJECTION (P.D.H.)
Each vial contains :—
Streptomycin Sulphate 1 gm.
1 vial : 1.50.

000784. BENZYL PENCILLIN INJECTION 5 lac (P.D.H.)
Each vial contains :—
Benzyl Penicillin 5 lac
One vial : 1.42.

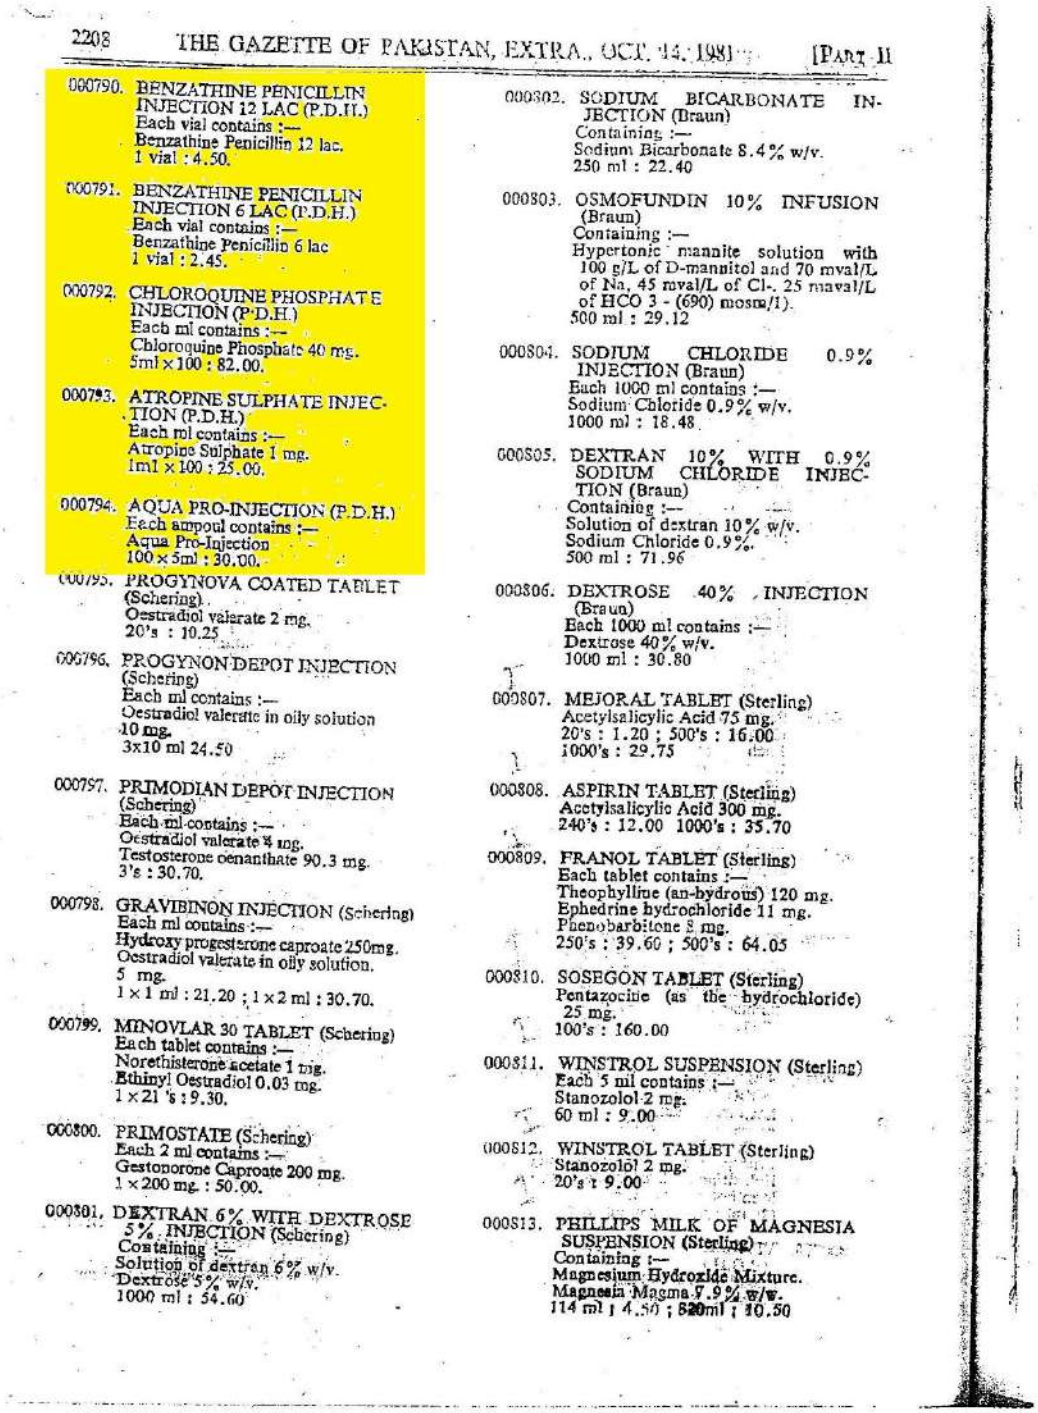
000785. STREPTOMYCIN PROCAINE PENICILLIN FORTE INJECTION (P.D.H.)
Each vial contains :—
Streptomycin Sulphate 1 gm.
Procaine Penicillin 3,00,000 Units.
Benzyl Penicillin 1,00,000 Units.
One vial : 2.67.

000786. BENZYL PENCILLIN INJECTION 10 LAC (P.D.H.)
Each vial contains :—
Benzyl Penicillin 10 lac.
1 ml : 2.20.

000787. NIKETHAMIDE INJECTION (P.D.H.)
Containing :—
Niketharnide 25%.
One vial : 1.40 ; 1 × 100 : 45.00

000788. DEXTROSE 25% INJECTION (P.D.H.)
Each 100 ml contains :—
Dextrose 25 gm.
25 × 25 ml : 50.00

000789. SULPHADIMIDINE SODIUM 33.33% (vety) (P.D.H.)
Each 100 ml contains :—
Sulphadimidine Sodium 33.33 gm.
100 ml : 12.00.



2208 THE GAZETTE OF PAKISTAN, EXTRA., OCT. 14, 1981 [PART II

000790. BENZATHINE PENICILLIN INJECTION 12 LAC (P.D.H.)
Each vial contains :—
Benzathine Penicillin 12 lac.
1 vial : 4.50.

000791. BENZATHINE PENICILLIN INJECTION 6 LAC (P.D.H.)
Each vial contains :—
Benzathine Penicillin 6 lac
1 vial : 2.45.

000792. CHLOROQUINE PHOSPHATE INJECTION (P.D.H.)
Each ml contains :—
Chloroquine Phosphate 40 mg.
5ml×100 : 82.00.

000793. ATROPINE SULPHATE INJECTION (P.D.H.)
Each ml contains :—
Atropine Sulphate 1 mg.
1ml × 100 : 25.00.

000794. AQUA PRO-INJECTION (P.D.H.)
Each ampoul contains :—
Aqua Pro-Injection
100 × 5ml : 30.00.

000795. PROGYNOVA COATED TABLET (Schering)
Oestradiol valerate 2 mg.
20's : 10.25

000796. PROGYNON DEPOT INJECTION (Schering)
Each ml contains :—
Oestradiol valerate in oily solution
10 mg.
3x10 ml 24.50

000797. PRIMODIAN DEPOT INJECTION (Schering)
Each ml contains :—
Oestradiol valerate 5 mg.
Testosterone oenanthate 90.3 mg.
3's : 30.70.

000798. GRAVIBINON INJECTION (Schering)
Each ml contains :—
Hydroxy progesterone caproate 250mg.
Oestradiol valerate in oily solution.
5 mg.
1 × 1 ml : 21.20 ; 1 × 2 ml : 30.70.

000799. MINOVLAR 30 TABLET (Schering)
Each tablet contains :—
Norethisterone acetate 1 mg.
Ethinyl Oestradiol 0.03 mg.
1 × 21 's : 9.30.

000800. PRIMOSTATE (Schering)
Each 2 ml contains :—
Gestonorone Caproate 200 mg.
1 × 200 mg. : 50.00.

000801. DEXTRAN 6% WITH DEXTROSE 5% INJECTION (Schering)
Containing :—
Solution of dextran 6% w/v.
Dextrose 5% w/v.
1000 ml : 54.60

000802. SODIUM BICARBONATE INJECTION (Braun)
Containing :—
Sodium Bicarbonate 8.4% w/v.
250 ml : 22.40

000803. OSMOFUNDIN 10% INFUSION (Braun)
Containing :—
Hypertonic mannite solution with 100 g/L of D-mannitol and 70 mval/L of Na, 45 mval/L of Cl-, 25 mval/L of HCO 3 - (690) mosm/l).
500 ml : 29.12

000804. SODIUM CHLORIDE 0.9% INJECTION (Braun)
Each 1000 ml contains :—
Sodium Chloride 0.9% w/v.
1000 ml : 18.48

000805. DEXTRAN 10% WITH 0.9% SODIUM CHLORIDE INJECTION (Braun)
Containing :—
Solution of dextran 10% w/v.
Sodium Chloride 0.9%.
500 ml : 71.96

000806. DEXTROSE 40% INJECTION (Braun)
Each 1000 ml contains :—
Dextrose 40% w/v.
1000 ml : 30.80

000807. MEJORAL TABLET (Sterling)
Acetylsalicylic Acid 75 mg.
20's : 1.20 ; 500's : 16.00
1000's : 29.75

000808. ASPIRIN TABLET (Sterling)
Acetylsalicylic Acid 300 mg.
240's : 12.00 1000's : 35.70

000809. FRANOL TABLET (Sterling)
Each tablet contains :—
Theophylline (an-hydrous) 120 mg.
Ephedrine hydrochloride 11 mg.
Phenobarbitone 8 mg.
250's : 39.60 ; 500's : 64.05

000810. SOSEGON TABLET (Sterling)
Pentazocine (as the hydrochloride) 25 mg.
100's : 160.00

000811. WINSTROL SUSPENSION (Sterling)
Each 5 ml contains :—
Stanozolol 2 mg.
60 ml : 9.00

000812. WINSTROL TABLET (Sterling)
Stanozolol 2 mg.
20's : 9.00

000813. PHILLIPS MILK OF MAGNESIA SUSPENSION (Sterling)
Containing :—
Magnesium Hydroxide Mixture.
Magnesia Magma 7.9% w/w.
114 ml : 4.50 ; 820ml : 10.50

Proceedings of 329th Meeting:

The Legal Affairs Division has been summoned to present themselves before the Board in order to provide clarification regarding their aforementioned opinion. Assistant Director of the Legal Affairs Division, appeared before the Registration Board to discuss the case in thorough detail. It is important to

note that the renewal applications for the years 2021 and 2016 were duly submitted within the specified timeframe, as indicated by the RRR Section of the PE&R Division of DRAP. Moreover, evidence of product registration can be found on pages 2207-2208 of the notification published in the Gazette of Pakistan on October 14, 1981. Hence, based on these factual considerations, the Board may issue the Duplicate Registration Certificate in compliance with the relevant laws

Decision: **Registration Board after through deliberation decided to issue duplicate registration letter to M/s. P.D.H Laboratories (Pvt) Ltd. 9.5-Km Sheikhupura Road (Khaki) Lahore as per details mentioned in The Gazette of Pakistan, Extra, October, 14, 1981.**

Case No 02: **Allocation of Quota for Control Substances Ephedrine HCl for the year 2017 to M/s. Sharex Laboratories, Sadiqabad.**

The case of M/s. Sharex Laboratories, Sadiqabad was considered in 275th and 286th meeting of Registration Board as per detailed below: -

2. Proceedings of 275th Meeting of Registration Board:

The instant case was presented based on the letter received from Assistant Director (CD) (Dated 21st Sep, 2017) wherein it has been stated that M/s Sharex Laboratories, sadiqabad applied for quota allocation of product Tracodil syrup (Reg. 003158). The case was presented before 43rd meeting of committee on allocation of controlled drug held on 26th July, 2017, the committee deferred the case for issuance of show cause by DRAP for manufacturing of Tracodil syrup (Reg. 003158) 60ml, 400ml pack without approval. It was requested to verify the status of product registration of Tracodil syrup (Reg. 003158) 400ml pack size.

The approved pack sizes of product Tracodil Syrup‖ (Reg. No. 003158) have been verified as per available record i.e 120ml, 450ml (National Formulary 1981) and 60ml (dated 27th October 1988).

3. Decision of 275th meeting of Registration Board:

Registration decided to call M/s Sharex Laboratories, Sadiqabad for personal hearing and for deliberating above mentioned matter before the Registration Board.

4. **Proceedings of 286th meeting of Registration Board:**

Mr. Muhammad Ishfaq, production pharmacist, appeared before Registration Board and apologized on behalf of the firm for applying quota of 400ml pack size of product Tracodil syrup (Reg.003158) without approval.

5. Decision of 286th meeting of Registration Board:

Registration Board in its 286th meeting decided to refer the case to Legal Affair division for legal opinion.

6. Accordingly, the case was refer to Legal Affairs, Division and in response, Legal Affairs, Division has provided following opinion:

i. That M/s. Sharex Laboratory applied for the quota allocation of product Tracodil Syrup (Reg.No.003158).

ii. That the Committee on Allocation of Controlled Drugs held on 26.07.2017 deferred the case for issuance of show cause by DRAP for manufacturing of "Tracodil Syrup" (Reg.No.003158) 60ml, 400ml pack without approval. It was requested to verify the status of product registration of "Tracodil Syrup" (Reg.No.003158) and 60ml (dated 27th October, 1988).

iii. That the approved pack size of the product "Tracodil Syrup" (Reg.No.003158) have been verified as per available record i.e 120ml, 450ml (National Formulary 1981) and 60ml (dated 27th October, 1988).

iv. That Mr. Muhammad Ishfaq production pharmacist, appeared in 286th meeting before Board and apologized on behalf of the firm for applying quota of 400ml pack size of product "Tracodil Syrup" (Reg.No.003158) without approval.

v. That the Registration Board in 286th meeting referred the case to Legal Affairs, Division for legal opinion.

vi. Drug Regulatory Authority of Pakistan Act, 2012 in Schedule-II A(1) (a) (vii) prohibits export, import or manufacture and sale or sell of any therapeutic goods which is not registered or is not in accordance with conditions of registration as disclosed in the registration dossier and that has undergone pharmaceutical evaluation. Furthermore, Schedule-II(A)(c) prohibits to sell any therapeutic goods except under, and in accordance with the conditions of a license issued under this Act. In addition, Schedule-II A(a)(f) prohibit to supply an incorrect, incomplete or misleading information when required to furnish any information under this Act or the rules.

vii. In this regard, DRAP Act, 2012 under section 27 read with schedule-III (6) provides penalty for violating the prohibitions mentioned above.

7. Decision of 289th meeting of Registration Board:

In light of the opinion of Legal Affair's Division on the matter, Registration Board deliberated the case and decided to issue show cause notice to M/s Sharex Laboratories, Sadiqabad for violation of condition of drug registration, as follows:

- Cancellation of registration.
- Suspension of registration.
- Prosecution in Drug Court

8. Accordingly, show cause notice was served to M/s. Sharex Laboratories, Sadiqabad.

9. Registration Board in its 295th meeting deliberated on the matter in details and decided to give an opportunity of personal hearing as per Drug Act, 1976 and Rules framed there under to M/s. Sharex Laboratories, Sadiqabad in forthcoming meeting of Registration Board.

10. In 296th meeting M/s. Sharex Laboratories, Sadiqabad was called for personal hearing. Mr. Muhammad Ishfaq, production pharmacist, appeared before Registration Board and apologized on behalf of the firm and stated that firm was unaware about the approval of pack sizes of Tracodil Syrup (Reg.No.003158) as on initial registration letter no pack size was written. He has further stated that firm will submit all the relevant documents / approvals granted by DRAP regarding said product.

11. Registration Board in 296th meeting deferred the case for further deliberation after submission of documents as stated by representative of the firm.

In compliance with 296th meeting of Registration Board firm has submitted following documents;

i. Initial registration letter of Ammonium Chloride Syrup Reg. No. 003158 dated 06-11-1977 in which Pack size & MRP are not mentioned.

ii. Change of brand name letter from Ammonium Chloride Syrup to Tracodil Cough Syrup dated 16-08-1979

iii. Price revision of locally manufactured / fixation of prices of additional packs letter dated 27-10-1988 in which Pack sizes along with MRPs are mentioned with following details;

Sr. No.	Reg. No.	Name of Drug	Packing	MRP
1.	003158	Tracodil Cough Syrup	120ml	8.00
			60ml	5.00
			450ml	18.50

12. **Decision of 308th Meeting of registration board:**

Registration Board after through deliberation decided as follows:

- Referred the case to Costing & Pricing Division for proceeding as per rules for overcharging of MRP.
- Manufacturing of product as per approval granted by relevant forums.

13. Accordingly, above decision of Registration Board was communicated to Costing & Pricing Division and reply of said Division is as under;

"In light of opinion of the Legal Division, the matter is of selling of an un-approved pack size which may fall under violation of the conditions of Registration. Moreover, no evidence of overpricing has been provided. Therefore, Division of PE&R may proceed in accordance with the opinion of the Legal Division."

14. Opinion of Legal Affair's Division is as under;

i. Drug Regulatory Authority of Pakistan Act, 2012 in Schedule-II A(1) (a) (vii) prohibits export, import or manufacture and sale or sell of any therapeutic goods which is not registered or is not in accordance with conditions of registration as disclosed in the registration dossier and that has undergone pharmaceutical evaluation. Furthermore, Schedule-II(A)(c) prohibits to sell any therapeutic goods except under, and in accordance with the conditions of a license issued under this Act. In addition, Schedule-II A(f) prohibit to supply an incorrect, incomplete or misleading information when required to furnish any information under this Act or the rules.

ii. In this regard, DRAP Act, 2012 under section 27 read with schedule-III (6) provides penalty for violating the prohibitions mentioned above.

Decision of 317th meeting of RB

Registration Board deliberated on the matter in details and decided to give an opportunity of personal hearing as per Drug Act, 1976 and Rules framed there under to M/s. Sharex Laboratories, Sadiqabad in forthcoming meeting of Registration Board.

As per above decision of the Board, case was referred to **Legal Affairs Division and opinion of said division** is as under:

"The apex courts have guided that Principles of natural justice must be read into each and every statute unless and until it is prohibited by the statute itself---Even if there is no provision as to issuance of notice of personal hearing to the affected party, in a statute, it cannot override the principles of natural justice and an opportunity of a hearing has to be provided to the affected party. Registration Board is statutory Board constituted under Section 7 of the drugs act, 1976. And if some new facts came before the Registration Board regarding the firm, then an opportunity of personal herring may be provided to the firm before final decision of the Board if it thinks fit to fulfill the principle of natural justice. It is pertinent to note that in case of any grievance the firm has alternate remedy of appeal under Section 9 of the drugs act, 1976 before the Appellate Board of the Authority."

Proceedings of 323rd Meeting:

It was discussed in meeting that before proceeding for penalty for prohibitions, as per opinion of the Legal Affair's Division mention in para 14 above, show-cause notice has to be issued to the firm for violation of condition of registration as firm is manufacturing un-approved pack size of their registered product.

Decision of 323rd Meeting of the Board

Registration Board decided to issue show-cause notice under Section 7 (11) (c) to M/s. Sharex Laboratories (Pvt) Ltd. KLP Road Sharex Colony, P.O Box No. 11, Sadiqabad District Rahim Yar Khan for violation of condition of registration.

As per above decision of the Board, Show-Cuase notice has been issued to the firm and reply of the firm is as under:

i. They have submitted that they have been manufacturing Tracodil Syrup (Ammonium Chloride Syrup) since 1965. When the Drug Act 1976 got implemented, they were issued a Registration Letter dated 06-11-1977 for Ammonium Chloride Syrup having registration number 003158. In this letter no pack size and no retail price was mentioned.

ii. On 16-08-1979, another letter was issued by Ministry of Health granting them the named of Tracodil Syrup for their registered product Ammonium Chloride Syrup Reg.No.003158.

iii. On 27-11-1988, a letter was issued for Tracodil Syrup where 60ml, 120ml and 450ml pack sizes were mentioned with MRP. It is important to mention that this product was de-controlled for pricing till 2000. At that time firm was manufacturing Tracodil Syrup in 400ml pack size and continued producing in the same pack size. As the price was decontrolled at that time, fixing MRP was not used to be an issue at that time.

iv. Firm continued producing and submitting Ephedrine HCl consumption record of Tracodil Syrup till early 2017 until the Assistant Director (CD) mentioned it in her letter dated 20-04-2017. It is to clarify that the consumption record the Ephedrine HCl was absolutely correct and no discrepancy was found as far as the consumption of Ephedrine was concerned.

v. They have further submitted that no mal intention what so ever was involved in the production of "Tracodil Syrup" 400ml as consumption record for Ephedrine HCl was submitted according to 400ml pack size. As this is 55-year-old registered product and at that time there were not much regulations and price was also de-controlled, this product somehow mistakenly kept manufactured in this pack size.

vi. They have requested to kindly forgive this mistake of their, as they are in this business for around 6 decades and never been involved in any unlawful activity.

Now, firm has been called for personal hearing.

Proceedings of 329th meeting:

M/s. Sharex Laboratories, Sadiqabad was called for personal hearing. Mr. Muhammad Ishfaq, production pharmacist, appeared before Registration Board and stated that they were manufacturing pack size of 400ml as till 2000, MRP of their product was decontrolled.

Decision: Registration Board deferred the case for further deliberation.

Case No.03: Cancellation Registration of Drugs in lieu of cancellation of DML/Surrender of Sections

Central Licensing Board in its 287th meeting held on 04-06-2022 approved "Syrup Section" in place of "Liquid Vial (Infusion) Section" of M/s. Caraway Pharmaceuticals, Plot No. 12 Street No. N-3 National Industrial Zone, Rawat under Drug Manufacturing License No. 000629 (Formulation).

Accordingly, M/s. Caraway Pharmaceuticals was issued show cause notice.

Now, firm has been called for personal hearing.

Proceedings of 329th meeting:

M/s. Caraway Pharmaceuticals, Rawat was called for personal hearing. Syed Tauqeer Ali (COO) and Mr. Murad Ali (QCM) appeared before Registration Board and stated that they are shifting of their liquid infusion products for toll manufacturing to M/s. Linear Pharma.

Decision: Registration Board decided to refer the case to PR Section of PE&R Division.

Case No. 04: Registration of Drug(s)

Registration Board in its different meetings approved following products in the name of firms mentioned against each and registration letters are pending due to reasons also mentioned against each. Shortcoming letters as well as reminder letters were issued to these firms but response of the firm is still pending. Detail of products along with meeting number of the Board is as under:

Sr. No.	Name of Product	Name of Registration Holder	Reason for non-issuance of Registration Letter	Meeting of Registration Board

1.	Bpride Tablets	M/s. Shaigan Pharmaceuticals,14 Km, Adyala Road, Post Office Dahgal, Rawalpindi	Submission of alternate brand names and fee for change of specs	296
2.	MOXILEX Tablet 400mg	M/s Caylex Pharmaceuticals, (Pvt) Limited, 27-Km Raiwind road Lahore.	Verification of fee challan is required, Fee for change of specifications, BNR	296
3.	Tramax 50mg Injection	M/s Vision Pharmaceuticals, Plot No. 22 & 23, Industrial Triangle Kahuta Road, Islamabad.	Fee for change of title is required.	296
4.	Orbic- C 500 Tablet	M/s Aneeb Pharmaceuticals Pvt Ltd., 24-Km Bedian Road, Lahore	Clarification of formulation required as chewable tablet is approved in RRA	296
5.	Pharmedic Vitamin C 500mg Tablet	M/s Pharmedic Laboratories Pvt Ltd.,16-km, Multan Road Lahore	Clarification of formulation required as chewable tablet is approved in RRA	296
6.	Logestrel tablet 0.75mg	M/s Fredmann Pharmaceuticals, Plot No.82-83, B, Old Industrial Area, Mirpur, AJK.	Approval for steroidal hormone section from Licensing Division before issuance of Registration letter	297
7.	Tegaser tablet 2mg	M/s Well & Well Pharma (Pvt.) Ltd., Plot No. 7, Street No. S- 8, National Industrial Zone, Rawat, Islamabad	Submission of alternate brand names and fee for change of specs	297
8.	Tegaser tablet 6mg	M/s Well & Well Pharma (Pvt.) Ltd., Plot No. 7, Street No. S- 8, National Industrial Zone, Rawat, Islamabad	Submission of alternate brand names and fee for change of specs	297
9.	Febogen 80mg Tablets	M/s Genesis Pharmaceuticals Pvt Ltd., Plot No. 25, Sunder Industrial Estate, Sunder, Lahore	Fee for change of Specs	307
10.	Misoben 200mcg Tablet	M/s Benson Pharmaceuticals Plot # 3, Main road RCCI industrial estate Rawat	Fee for change of Specs	307
11.	Mecowin Injection 500mcg	M/s Winilton Pharmaceuticals (Pvt.) Ltd., Plot # 45, Street # S-5, National Industrial Zone, Rawat, Islamabad.	Fee for change of Specs	316
12.	Irowin 100mg Injection	M/s Winilton Pharmaceuticals (Pvt.) Ltd., Plot # 45, Street # S-5, National Industrial Zone, Rawat, Islamabad.	Fee of Rs. 75,000 for standardization of label claim.	316

13.	J-Lac .3.355g /5ml Syrup	M/s Jinnah Pharmaceuticals Pvt Ltd. 13 km, Lahore Road, Multan	Submission of GMP Certificate/DML of API Manufacturer and Stability Study of Lactitol	316
14.	ONDATRO Syrup 4mg/5ml	M/s Horizon Healthcare (Pvt) Ltd. Plot No. 35-A, Small Industrial Estate, Taxila.	Fee for correction in label claim	317
15.	ZOLONAF Capsule 150 mg	M/s Dynatis Pakistan Pvt Ltd., Plot No.710, Sundar Industrial Estate, Raiwind Road, Lahore	Submission of alternate brand names	317
16.	Wilxime 400mg capsules	M/s. Winilton pharmaceutical (Pvt) Ltd. Plot No.45, Street S-5, National Industrial Zone, Rawat-Islamabad	Submission of alternate brand names	317
17.	Wilxime suspension 100mg/5ml	M/s. Winilton pharmaceutical (Pvt) Ltd. Plot No.45, Street S-5, National Industrial Zone, Rawat-Islamabad	Submission of alternate brand names	317
18.	Wilxime DS suspension 200mg/5ml	M/s. Winilton pharmaceutical (Pvt) Ltd. Plot No.45, Street S-5, National Industrial Zone, Rawat-Islamabad	Submission of alternate brand names	317
19.	Wilpine 500mg injection	M/s. Winilton pharmaceutical (Pvt) Ltd. Plot No.45, Street S-5, National Industrial Zone, Rawat-Islamabad	Submission of alternate brand names	317
20.	Wilpine 1gm injection	M/s. Winilton pharmaceutical (Pvt) Ltd. Plot No.45, Street S-5, National Industrial Zone, Rawat-Islamabad	Submission of alternate brand names	317
21.	Wincef 250mg injection (IV)	M/s. Winilton pharmaceutical (Pvt) Ltd. Plot No.45, Street S-5, National Industrial Zone, Rawat-Islamabad	Submission of alternate brand names.	317
22.	Wincef 500mg injection (IV)	M/s. Winilton pharmaceutical (Pvt) Ltd. Plot No.45, Street S-5, National Industrial Zone, Rawat-Islamabad	Submission of alternate brand names	317
23.	Wincef 1gm injection (IV)	M/s. Winilton pharmaceutical (Pvt) Ltd. Plot No.45, Street S-5, National Industrial Zone, Rawat-Islamabad	Submission of alternate brand names	317
24.	Wilbac1gm injection	M/s. Winilton pharmaceutical (Pvt) Ltd. Plot No.45, Street S-5, National Industrial Zone, Rawat-Islamabad	Submission of fee of Rs.75,000/- for correction in formulation as per decision of DRB and alternate brand names.	317

25.	Wilbac 2gm injection	M/s. Winilton pharmaceutical (Pvt) Ltd. Plot No.45, Street S-5, National Industrial Zone, Rawat-Islamabad	Submission of alternate brand names	317

Decision: **Registration Board after through deliberation decided to issued final reminder to above mentioned firms to fulfil above mentioned queries within one month after approval of minutes.**

Case No. 05: **Report on Assessment and Confirmation of Manufacturing Capacity of M/s. Cure Laboratories (Pvt) Ltd, Plot No. 11-12, Street No. NS-2 RCCI, Rawat (DML No. 000897)**

Reference No: F.5-1/2023-Reg-II (M-323) (Misc.)

Inspection Date: 20th March, 2023.

Background: The inspection was conducted on 20.03.2023 in compliance to letter of Assistant Director (Reg-II) vide No.5-1/2023-Reg-II(M-323) (Misc.) dated 07.02.2023

Composition of Panel:

i. Muneeb Ahmed Cheema, Deputy Director PE&R, DRAP Islamabad.
ii. Adil Saeed, Deputy Director PEC-IX, DRAP Islamabad.

Scope of Inspection:

The inspection was conducted for assessment and confirmation of manufacturing capacity of M/s Cure Laboratories (Pvt) Ltd, Plot # 11-12, Street # NS-2,RCCI, Rawat for following sections;

i. Dry Powder Injection (Cephalosporin).
ii. Dry Powder Suspension (Cephalosporin).
iii. Capsule (Cephalosporin).

Manufacturing record/data of last Quarter of 2022 **(1st September 2022 to 31st December 2022)** and 1st Quarter of year 2023 (**1st January, 2023 to March, 2023 till date**) was evaluated for aforementioned purpose. The details of capacity calculations are as under:

Registered Products				
	Dry Powder Injection (Cephalosporin) Section	Dry Powder Suspension (Cephalosporin) Section	Capsules (Cephalosporin) Section	Total
Total registered products of manufacturer	41	17	13	71
Registered Products on Contract from the manufacturer	Nil	02	01	03
Total	41	19	14	74

			Average capacity available:	**88.74%**

Ms. Maria Burki Plant Manager/ Production Incharge, Mr. Tasawar Hussain Shah QC Manager and Mr. Umair Aslam QA Manager assisted during the inspection. The details are given below;

1. Raw Material Store:

The raw material store of cephalosporin facility was inspected in detail and following observations were noted.

i. Humidity of RMS at time of inspection was 64% and HVAC system was not operational, which was turned on during inspection.

ii. Boxes of some materials were checked randomly (e.g. Cefixime micronized batch CFEM220042, Cefixime compacted batch CFEC220097 and Magnesium stearate) and it was observed that the poly bags were not sealed to protect the material from environmental factors.

iii. Containers of Cefixime micronized (batch CFEM220042, analysis No. RM0024/QC/API/23 GRN No. 01278) and Cefixime compacted (batch CFEC220097, analysis No. RM0023/QC/API/23 GRN No. 01278) did not contain label of manufacturer. In QC their analysis documents were checked and found that they both were released for use on UV analysis rather HPLC testing which is pharmacopoeial requirements. The firm produced a COA of M/s Covalent Laboratories India of aforesaid API's but couldn't provide their clearance documents.

iv. There was discrepancy between entries of dispensing log book and raw materials stock registers. Some entries in dispensing log book were missing. The storage and documentation practices of the firm for raw materials were found very poor.

2. Production Area:

a. Dry Powder Injection:

The section was not operational at the time of inspection. The production Incharge described the manufacturing process which includes:

i. Vial washing with de-ionized water.

ii. Loading in DHS for sterilization. After sterilization they were

iii. Transfer to filling line through HEPA fitted trolley for filling and capping.

It was noted that firm is using deionized water for final rinsing of vials rather WFI. Moreover, the batch size was not standardized and it was observed that the firm is manufacturing multiple strengths of finished product having different batch numbers and batch sizes as per market demand while using single API container.

b. Dry Suspension:

The section was not operational at the time of inspection. In dry suspension area 200kg mixer was present and again it was observed that batch size was not standardized. Biodroxil 125mg batch No. 23010 was of 7734 units and batch No. 22029 was of 3703 units. Some batches were so small that their mixing in a 200kg mixer is not possible. Humidity of the area was not controlled.

c. Capsule:

The section was not operational at the time of inspection. There was no hygrometer in mixing area. The capacity of mixer in capsule section was 100kg. Again the batch size was not standardized. Roxykef 500mg Capsule batch 22023 had a size of 5607 capsules and batch No. 22003 of same product had a size of 47546 capsules. The mixture to fill 5607 capsules was approximately equal to 3.3kg. Mixing of material of 3.3kg in 100kg mixer is not possible and when it was inquired during inspection the firm informed that they are performing manual mixing in poly bags for such small batches.

There was only one pharmacist looking after all 3 sections of cephalosporin facility and also dispensing of raw materials.

3. In-process quarantine:

There was no in-process quarantine area in cephalosporin manufacturing facility. Quarantine area was established in Finished Goods Store (FGS). In quarantine area following observations were noted;

i. Unlabelled filled vials were present in various boxes. The boxes had labels indicating Vakxon 500mg IM injection batch No. 22115 manufactured in November 2022.

ii. Unlabelled filled vials were also present in other boxes which even did not bear labels. The firm claimed that these are ceftriaxone vials of above batch however they couldn't establish their identity.

iii. Unlabelled dry suspension bottles were also present in boxes having aluminium caps mentioning Herbion. The boxes had labels indicating Biodroxil Suspension 200mg/5ml

Upon inquiry the firm informed that above mentioned unlabelled filled products were placed in quarantine due to the shortage of labelling and packaging material. However as per QC record these batch were passed for release to the market.

4. Finished Goods Store:

The FGS was located in basement of the manufacturing facility. It was common for whole facility.

5. Packing material store:

The foils used for blistering were placed in uncontrolled environment and their polybags were not closed.

6. Quality Control:

a. Main Quality Control Lab:

The firm had 2 HPLC systems and one UV-Vis spectrophotometer. The firm did not had following instruments which are necessary for testing of products being manufactured:

i. FTIR
ii. Liquid particle Counter (LPC)
iii. TOC analyser

b. Microbiology Lab:

The firm had an established microbiology laboratory. Betalactamase enzyme, ATCC strains, LAL test lysate etc were present. Air particle counter was also available.

It was also noted that firm was releasing the API for manufacturing and finished products in the market on UV testing only. Two stability chambers were available for accelerated and real time stability studies of finished products. In accelerated stability chamber, samples of Biodroxil 200mg/5ml were available, the aforesaid product was registered in year 2022 in name of M/s Herbion Pharma Islamabad for contract manufacturing by the firm. The firm informed that they are conducting the accelerated and real time stability

on request of registration holder, however on the other side without completion of study for six months the same product was manufactured on continuous basis and huge stock for market release was available in FGS.

7. Water System:

The firm had double RO system connected with ion exchange cartridges. Firm also had water distillation system but it was not functional. Firm was using deionised water for washing of vials and final rinse of equipments used in sterile manufacturing. Hot loop was not present.

Recommendations & Conclusion:

Keeping in view the above practices, following is being recommended by the panel;

i. Immediate sampling of finished products specifically cephalosporin injectable products available with the firm and released in market.
ii. Panel GMP inspection as it was observed that since grant of DML in 2019, no panel GMP inspection has been conducted so far.
iii. Improvement in raw material storage and documentation practices.
iv. Standardization of batch sizes with process validations.
v. Hiring of at least three more pharmacists to supervise manufacturing and dispensing activities.
vi. Installation of water distillation system for bulk WFI.
vii. Provision of in-process quarantine area in cephalosporin manufacturing facility
viii. Installation of FTIR, TOC analyser and LPC in QC lab.
ix. Installation of hygrometers and improvement of environmental controls.

Despite of the fact firm possess sufficient manufacturing and testing capacity, however keeping in view the storage, documentation, production and testing practices of the firm recorded above, the panel **DO NOT RECOMMEND** to allow contract manufacturing till the compliance of above recommendations and their verification.

Decision: **Registration Board on basis of the findings of above presented inspection report decided to defer the registration applications of contract manufacturing from M/s. Cure Laboratories (Pvt) Ltd, Plot No. 11-12, Street No. NS-2 RCCI, Rawat till any further decision. Moreover, Registration Board decided to refer the above inspection report to QA&LT Division for further necessary action.**

Post Registration-I Section

Case No.01: Change in Specifications/ Standardization of Formulations

Sr.#	Required Documents as per approved SOP
i.	Copy of registration letter and last renewal status
ii.	Document in support of proposed change
iii.	Analytical reports as per monograph of FPP
iv.	Undertaking that: i. The change is made exclusively to comply with the pharmacopeia of Reference Regulatory ii. No case is pending at any forum / court of law regarding this product.

	iii.	In case of any quality complaint/ OOS result observed by the marketing authorization holder as a result of this change, the same shall be reported to registration board and all the stock shall be recalled from the market immediately.
	iv.	The provided information/ documents are true/ correct.

The following firms have requested for change in specifications Pharmaceutical Form/ registration letter of their registered products as per following details:

A. <u>Fresh cases</u>

M/s. Pfizer Pakistan Limited, B-2, SITE, Karachi					
Sr. No.	**Reg. No.**	**Name of Product with existing composition, Specifications**	**Name of Product with proposed Change in Specifications**	**Initial Date of Registration Renewal Application**	**Fee /R&I Date**
1.	089096	Myrin tablet Each tablet contains: Ethambutol Hcl…300mg Rifampicin…150 Isoniazid…75mg **(USP Specifications)**	Myrin tablet Each tablet contains: Ethambutol Hcl…300mg Rifampicin…150 Isoniazid…75mg **(Manufacturer Specifications)**	21-05-2018 Last Renewal 17-05-2023	Fee Rs 10,000/- deposited dated 15-05-2022 R&I Dy. No. 6453 dated 07-03-2023

Myrin Tablet

(Rifampicin, Ethambutol HCl & Isoniazid Tablet)

- Total other degradants	NMT 0.2%	NMT 0.2%	
-Total degradants	NMT 0.6%	NMT 0.5%	
Water Content	1.2 – 6.0 %	-	More stringent than USP as this test is not part of USP specifications
Assay content of Pseudoephedrine HCl	93.0 -107.0%	93.0– 107.0%	Similar limit
Assay content of Fexofenadine HCl	93.0– 107.0%	93.0– 107.0%	Similar limit
Microbiological quality			
Total aerobic microbial count	≤ 103 CFU/g	≤ 103 CFU/g	Similar limit
Total combined yeast/molds count	≤ 102 CFU/g	≤ 102 CFU/g	Similar limit
Escherichia coli	No. *E.Coli* / g	No. *E.Coli* / g	Similar limit

Remarks: The analytical procedures/specifications are performed as per Innovator specifications. This product is manufactured in France and exported to SRA countries (e.g., Australia) including Pakistan with similar specifications (i.e., Innovator specifications).

Remarks: The firm has stated that their specifications are less stringent than pharmacopoeial specifications.

Decision: Drug Registration Board did not accede the request of the firm as the applied specifications are less stringent than the official pharmacopeia

Post Registration-II Section

Case 01. M/s Gray's Pharmaceuticals Rawat: Deferred Cases in 316th Meeting of Registration Board.

It is submitted M/s Grays Pharmaceuticals Plot No. 2 Street N-3 National Industrial Zone Rawat has requested for issuance letters of transfer of registration of below mentioned products registered in their name:

Sr. No.	Reg. No.	Brand Name	Composition
1.	030655	Ciprogray 250mg Tablets	Each tablet contains; Ciprofloxacin 250mg
2.	030654	Ciprogray 500mg Tablets	Each tablet contains; Ciprofloxacin 500mg

2. The matter of shifting of these registered products from facility at plot No. 442, St. No. 7 Sector I-9/2 Industrial Area Islamabad to new facility at Plot No. 2, Street N-3, National Industrial Zone Rawat was considered in 233rd meeting of Registration Board and the board decided to accede to the request of firm subject to fulfillment of latest Fee requirement and confirmation of sections, required for each category of drugs.

3. The letter of transfer of registration to new facility couldn't be issued and matter was again presented in 316th meeting of registration board for consideration as under;

Sr. No	Reg. No.	Brand Name & Composition	Initial date of Registration PRV (If any)	RRA status	Remarks of RRR	Remarks of PR- II
	I	II	II I	V	VI	VII
51.	030655	Ciprogray 250mg tablet Each tablet contains Ciprofloxacin..... 250mg	26-07-2003	Film coated tablet is available in RRA	The renewal application for the year 2018 is submitted on 15th July 2019 and is submitted after due date	The formulation shall be corrected as "Film coated tablet" and firm
52.	030654	Ciprogray 500mg tablet Each tablet contains Ciprofloxacin..... 500mg	26-07-2003	Film coated tablet is available in RRA	but within one year w.r.t initial date of registration. Firm may be advised to submit differential fee under SRO 1005(I)/2017 for consideration of products for regularization of registration.	shall also submit the reference of finish product specifications as per decision of 295th meeting of Registration Board with prescribed fee.

4. The board in its 316th meeting decided to deferred the request of firm for submission of differential fee as per SRO 1005(I)/2017 for regularization of registration. Incompliance of decision of 316th meeting of Registration Board, the firm has submitted fee of Rs165,000/- per product. Initially for renewal, the firm had submitted Rs. 10,000/- per product on 15.07.2019.

5. The firm M/s Grays Pharmaceuticals Plot No. 2, Street N-3, National Industrial Zone Rawat, Islamabad vide letter dated 11.04.2023 has intimated that they have submitted fee of Rs. 165,000/- per product as per Rule 27 of the Drugs (LR&A) Rules 1976.

6. The current renewal status of the 2 products mentioned above is tabulated below;

S. No.	Product	Registration No. & Date of Registration	Renewals
1	Ciprogray 250mg tablet Each tablet contains Ciprofloxacin…….250mg	030655 26.07.2003	Renewals submitted on 26.07.2008 26.07.2013 15.07.2019

			Rs. 165000/- submitted on 11.04.2023 vide Slip No. 8983651701
2	Ciprogray 500mg tablet Each tablet contains Ciprofloxacin…….500mg	030654 26.07.2003	Renewals submitted on 26.07.2008 26.07.2013 15.07.2019 Last renewal Rs. 165000/- submitted on 11.04.2023 vide Slip No. 19208912

7. The matter is placed before the board for regularization of registration and transfer of registration from M/s Gray's Pharmaceuticals, Plot No. 442, St. No. 7 Sector I-9/2 Industrial Area Islamabad (DML No. 000518) to new facility at M/s Gray's Pharmaceuticals, Plot No. 2, Street N-3, National Industrial Zone Rawat (DML No. 000518)

Decision: **The Board deliberated the matter at length. Considering the facts narrated above, the board decided to cancel the above registrations in name of M/s Gray's Pharmaceuticals, Plot No. 442, Street No. 7, Sector I-9/2, Industrial Area Islamabad (DML No. 000518) and grant them in name of M/s Gray's Pharmaceuticals, Plot No. 2, Street No. N-3, National Industrial Zone Rawat (DML No. 000518) subject to confirmation of renewal status under Rule 27 of the Drugs (LR&A) Rules 1976 amended vide SRO 1005(I)/2017 dated 05.10.2017. The firm shall also submit the fee if required under the afore said provisions.**

Case 02: **Cancellation of Registration of Drugs: Norigest Injection (Norethisterone Enanthate) Reg. No. 000693- Locally Manufactured.**

The cases for change of specifications (to retain manufacturers/ innovator's specifications) of Nova Ject Injection and Norigest Injection of M/s Bayer Pakistan (Pvt.) Ltd. 108 Kot Lakhpat Industrial Estate Lahore were approved in 85th meeting of Post Registration Variation Committee (PRVC) held on 01.09.2022.

2. During issuance of letter it was observed that formulation of both prodcuts is same. Details of these products is given below;

S. No.	Product Name & Formulation	Registration No.
1	**Nova ject Injection:** Each ml Contains: - Norethisterone enanthate…200mg	019823
2	**Norigest Injection** Each ml Contains: - Norethisterone enanthate …….200mg **(Innovator's Specifications)**	000693

2. The letter for change of specifications of Norigest Injection Reg No. 000693 was issued on 20.09.2022. The letter for change of specifications of product Nova Ject Reg. No. 019823 was withheld due to duplicate formulation.

3. The matter was discussed with the technical person of M/s Bayer Pakistan (Pvt.) Ltd. 108 Kot Lakhpat Industrial Estate Lahore and they have now requested for cancellation of registration of product **Norigest Injection Reg. No. 000693** vide letter No. BPPL-DRAP-23-038 dated 10.05.2023.

4. The firm M/s Bayer Pakistan (Pvt.) Ltd. 108 Kot Lakhpat Industrial Estate Lahore intends to retain the brand name Nova Ject Injection and have requested for issuance of letter for its change of specifications as per decision of 85th meeting of PRVC.

4. The matter is placed before the Board for consideration.

Decision: **The Board acceded to the request of firm for withdrawal of Registration of Product Norigest Injection Reg No. 000693. Further the relevant section shall issue letter for change of specifications of Nova ject Injection Reg No. 019823 as per decision of 85th meeting of post registration variation committee.**

Case 03. : **Change of Specifications: Noctamide Tablets and Primolut N Tablets.**

The firm M/s Bayer Pakistan (Pvt.) Ltd. 108 Kot Lakhpat Industrial Estate Lahore has requested to retain manufacturers specification of their products Noctamide and Primolut N.

2. The matter was discussed in 74th 100th and 101st meetings of Post Registration variation committee and was referred to registration board for consideration. The details of PRVC cases is given below;

S. No.	Reg. No.	Product & Formulation	Requested change	Renewals	Fee
1.	000677	Primolut N Tablet Each tablet contains Norethisterone.....5mg	Primolut N Tablet Each tablet contains Norethisterone.....5mg **(Innovator Specifications)**	12-01-1984 **Last renewal** 10-01-2019	Fee Rs. 10,000 deposited dated 19-07-2021
2.	006900	Noctamid Tablet Each Tablet contains: - Lormetazepam.....1mg	Noctamid Tablet Each Tablet contains: - Lormetazepam.....1mg **(Innovator Specifications)**	12-05-1984 **Last renewal** 10-01-2019	Fee Rs. 10,000 deposited dated 28-06-2021

Decision of 74th PRVC

Post Registration Variation Committee considered the case in its 74th Meeting. The Committee deferred the case for clarification of "Q" value. Which should not be less than 75% in any case as per the recommendations of United States Pharmacopoeia (USP) General Chapter Dissolution, Dissolution testing in BP finished products monographs for solid oral dosage forms and The International Pharmacopoeia Ninth Edition, 2019. Dissolution testing of tablets and capsules

Reply by the firm

The firm has submitted the replies to fulfillment of their deficiencies. In the reply firm has quoted Appendix XII B. Dissolution of the British Pharmacopoeia. The para of this Appendix of BP is reproduced below;

"Where one tablet or capsule is directed to be placed in the appraratus, for each of the six tablets or capsules tested the amount of active ingredient in solution is not less than 70% of the prescribed or stated amount, unless otherwise specified in the monograph, except that if one fails this requirement a further six may be tested individually and all must comply."

The firm has further stated as under;

"Based on above cited points, Bayer inhouse specification for dissolution test [limit 75% (Q+5%), Q=70%] is fully in line with B.P for product- Noctamid tablets and no change is required"

Same reply was submitted for Primolut N tablets

Decision of 100th PRVC:

The Chairman Registration Board on recommendation of the Committee referred the case to Registration Board for further deliberation.

Remarks: -

The Head of Quality of M/s Bayer Pakistan (Pvt.) Ltd Ms. Alia Shahzad visited PE&R Division for discussion on matter of the specifications of their 2 products.

Noctamid tablet;

The product monograph is only available in British Pharmacopoeia. The BP Monograph does not mention dissolution test of the product so general chapter of dissolution was referred to for it. As per general chapter the dissolution shall not be less than 70%. The dissolution specifications of M/s Bayer are in line with British Pharmacopoeia general chapter. Rest of the specifications of M/s Bayer are more stringent than BP. In view of this the firm requested to give manufacturer/ innovator's specifications for their product Noctamid Tablet.

Noctamid Tablet

Each tablet contains:-

Lormetazapam… 1mg

(Reg. No. 006900)

Sr. No.	Test Parameters	Bayer's Product Specification	B.P 2021 - Monograph
1	**Appearance**	White round tablet. Slightly Convex on both sides, and marked "CF" in	---

		regular hexagon on one side & reverse side scored.	
2	**Tablet Friability**	weight loss: ≤1.0%	---
3	**Disintegration**	max. 15 min	---
4	**Uniformity of Mass**	≥ 90 % of the tablets 111.0 to 129.0 mg , no tablet < 102.0 mg or > 138.0 mg (≥18/20±7.5%,≤ 2/20±15%, No tablet >±15%)	---
5	**Identification of Lormetazepam (TLC)**	To Pass (The spot of sample must match the spot of reference in terms of Rf value and intensity of fluorescence quenching.)	The principal spot in the chromatogram obtained with sample solution corresponds in position and colour to that in the chromatogram obtained with reference solution.
6	**Identification of Lormetazepam**	To Pass (HPLC : The retention times of the lormetazepam peak in the chromatograms of the sample and reference must only differ from each other by a maximum of 5%.	I.R: Infrared absorption spectrum concordant with the reference spectrum of lormetazepam (RS 207).
7	**Related substances and degradation products of lormetazepam***	Release: N.A Shelf life: individual < 0.5%, total ≤ 1.0%	BP uses **Isocratic elution** for determination of related substances by l**imit test** & only one identified related substance (Lorazepam). In the chromatogram obtained with Sample solution: the area of any secondary peak is not greater than 0.5 times the area of the principal peak in the chromatogram obtained with Reference solution (0.5%); the sum of the areas of any secondary peaks is not greater than the area of the peak in the chromatogram obtained with Reference solution (1%). Disregard any peaks with a retention time of less than half that of lormetazepam.
8	**Lormetazepam: (content uniformity)** (HPLC Method)	Acceptance value of 10 samples. 0.850 to 1.150 mg per tablet (85% to 115%) If the requirement is not met proceed as per Ph. Eur. 2.9.40, USP <905> Uniformity of dosage units – content uniformity".	Limit as specified in the Uniformity of content B.P. Appendix XII C3 [Ph. Eur. 2.9.4]
9	**Assay of Lormetazepam** (HPLC Method)	0.950 to 1.050 mg per tablet (95% to 105%)	95.0 to 105.0% of the stated amount.
10	**Dissolution Of Lormetazepam**	Q = 70%, t = 30 min level 1 = individual values of 6 tablets ≥ 75% (Q + 5%);	---

		level 2 = mean value of all 12 tablets tested (level 1 + level 2) ≥ 70%, and no tablets < 55% (Q - 15%);	
		level 3 = mean value of the total 24 tablets tested (level 1 + level 2 + level 3) ≥ 70%, ≤ 2 tablets < 55% (Q - 15%) and no tablet < 45% (Q - 25%)	
11	**Microbial Contamination**** (agar plate method)	Total number of colony forming, aerobic units (TAMC): 10^3 per g Max. acceptable limit 2000 per g); Total combined yeasts / moulds count (TYMC): max. 10^2 p er g Max. acceptable limit 200 per g); Absence of Escherichia coli determined in 1 g	---

Primolut N Tablet (Norethisterone… 5mg):

In case of Norethisterone Tablets, monographs are available in both BP and USP. The specifications initially given by the firm had dissolution limits (Q=65%+5 = 70%). The limits of dissolution in USP monograph of Norethisterone tablet are NLT 80% (Q).
The firm vide letter No. BY2853 dated 23.05.2023 has stated that they have revised the acceptance criteria for dissolution test of their product Primolut N tablet. The dissolution acceptance criteria is now stated as NLT 80% which is similar to USP. The rest of the specifications are given below;

Product specifications - Primolut N Tablet:

S.No.	Test Parameters	Bayer Specifications	BP 2021 Monograph Acceptance criteria	USP 2021 Monogrpah Acceptance Criteria
1	Appearance	White round tablet. Slightly Convex on both sides and marked "AN" in regular hexagon on one side & reverse side plain.	---	---
2	Tablet Friability (Eur.Ph. 2.9.7)	≤1.0%	---	---
3	Disintegration (Eur.Ph. 2.9.1)	max. 15 min	---	---
4	Uniformity of Mass (Eur.Ph. 2.9.5)	≥ 90 % of the tablets 111.0 to 129.0 mg, no tablet < 102.0 mg or > 138.0 mg (≥18/20±7.5%, ≤ 2/20±15%, No tablet >±15%)	---	---

5	Identification of Norethisterone (TLC)	Passes Test	TLC: The principal spot spots of sample and reference match with respect to position and color under UV light at 365nm.	IR: The IR absorption spectrum of a potassium bromide dispersion prepared from the residue so obtained exhibits maxima only at the same wavelengths as that of a similar preparation of USP Norethindrone RS.
6	Identification of Norethisterone (HPLC)	Passes Test	---	---
7	Dissolution Of Norethisterone	Individual values of 6 tablets ≥ 80% (Q + 5%); Q = 75 level 2 = mean value of all 12 tablets tested (level 1 + level 2) ≥ 75%, and no tablets < 60% (Q - 15%); level 3 = mean value of all 24 tablets tested (level 1 + level 2 +level 3) ≥ 75%, and no tablets < 50% (Q - 25%);	---	NLT 80% (Q) of the labeled amount of norethindrone is dissolved.
8	**Assay** (HPLC Method)	4.60 - 5.40 mg per 120 mg tablet 92 – 108%	**90.0 – 110.0%**	**90.0 – 110.0%**
9	**Content Uniformity Of Norethisterone** (HPLC Method)	acceptance value ≤ 15.0% for 10 samples [4.25 - 5.75 mg per tablet (85% to 115%)] if acceptance value > 15.0%, repeat the test with additional 20 tablet: acceptance value from 30 tablets ≤ 15.0% and no individual content < 75% or > 125% from the reference value M	---	Uniformity of dosage units (905): Meet the requirements The requirements for dosage uniformity are met if the acceptance value of the first 10 dosage units is less than or equal to L1%. If the acceptance value is > L1%, test the next 20 units, and calculate the acceptance value. The requirements are met if the final acceptance value of the 30 dosage units is ≤ L1%, and no individual content of any dosage unit is less than [1 − (0.01) (L2)]M nor more than [1 + (0.01) (L2)]M as specified in the Calculation of Acceptance Value under Content Uniformity or under Weight Variation. Unless otherwise specified, **L1 is 15.0 and L2 is 25.0**

10	**Microbial Purity: Microbial Enumeration Tests** (Eur. Ph. 2.6.12, USP <61> , JP 4.05)	Total number of colony forming, aerobic units (TAMC): 10^3 per g (max. 2000cfu); Total combined yeasts / moulds count (TYMC): 10^2 per g (max. 200cfu);	---	---
	Test for specific microorganisms (Eur. Ph. 2.6.13, USP <62>), JP 4.05)	Absence of Escherichia coli determined in 1 g	--	--

3. Matter is placed before the board for consideration of change of specifications to innovator's Specifications.

Decision: **Keeping in view the fact that product monographs are available in pharmacopoeia, the Registration Board did not accede to the request of firm for grant of innovator specifications. The firm shall apply afresh for pharmacopoeial specifications and relevant section shall process the case accordingly.**

EXPORT FACILITATION DESK

Case No.01: Registration of Drug (s) of M/s Nabi Qasim Industries (Pvt.) Ltd, 17/24, Korangi Industrial Area, Karachi, for export purposes only.

Firm has applied for registration of drug(s) only for export purpose as per following details:

Requirements As Per SOP	Submitted Documents
Application on Form-5/ Form 5-D with required fee as per relevant SRO.	Form5;
Copy of DML (Renewal status) along with approval of relevant sections verified by licensing Division or inspection report for renewal of DML before 2005.	Copy of DML provided Approval of relevant section verified from letter No. F 2-20/85-Lic dated 27-04-2020
GMP Status. Copy of Inspection report/GMP certificate.	GMP status verified from Inspection report renewal of DML dated 27-05-2022
Undertakings that the applied product is exclusively for export purpose and the proposed names/ label/ colour do not resemble with already registered brands in importing country.	Provided

Detail of the products is given below:

Sr.#	Name of Drug(s) with composition	Generic/RRA Status	Dy.No.(EFD)/Fee with date
I	II	III	IV
1.	Blokner Lyophilized Powder for solution (I.V) Injection 25mg Each vial contains: Atracurium Besylate USP.....25mg	Purchase order from Tanzania	Dy. No. 387(03.05.2023) Rs.75,000/- (16.03.2023)
2.	Blokner Lyophilized Powder for solution (I.V) Injection 100mg	Purchase order from Tanzania	Dy. No. 401(09.05.2023) Rs.75,000/- (16.03.2023)

	Each vial contains: Atracurium Besylate USP.....100mg		
3.	Blokner Lyophilized Powder for solution (I.V) Injection 50mg Each vial contains: Atracurium Besylate USP.....50mg	Purchase order from Tanzania	Dy. No. 402(09.05.2023) Rs.75,000/- (16.03.2023)
4.	Blokner Lyophilized Powder for solution (I.V Injection 250mg Each vial contains: Atracurium Besylate USP.....250mg	Purchase order from Tanzania	Dy. No. 403(09.05.2023) Rs.75,000/- (16.03.2023)
Remarks: The Applied products are lyophilized. RRA and me-too reference of lyophilized Atracurium is not available. The applied formulations are RRA approved as liquid injections. Me-too of 100mg and 250mg is not available in liquid ampoule either.			

Decision: **Registration board while considering the purchase order from the importing country i.e., Tanzania and availability of same strength in RRA in liquid injection form, decided to approve the applied products Blokner Lyophilized Powder for Injection 25mg, 50mg, 100mg & 250mg for export to Tanzania only.**

Case No.02: Registration of Drug (s) of M/s ISIS Pharmaceuticals & Chemical Works, 25/1-3, Sector 12-C, North Karachi Industrial Area Karachi, for export purposes only.

Firm has applied for registration of drug(s) only for export purpose as per following details:

Requirements As Per SOP	Submitted Documents
Application on Form-5/ Form 5-D with required fee as per relevant SRO.	Form5;
Copy of DML (Renewal status) along with approval of relevant sections verified by licensing Division or inspection report for renewal of DML before 2005.	Copy of DML provided Approval of relevant section verified from letter No. F 2-11/2005-Lic dated 15-06-2021
GMP Status. Copy of Inspection report/GMP certificate.	GMP status verified from Inspection report renewal of DML dated 12-02-2020
Undertakings that the applied product is exclusively for export purpose and the proposed names/ label/ colour do not resemble with already registered brands in importing country.	Provided

Detail of the products is given below:

Sr.#	Name of Drug(s) with composition	Generic/RRA Status	Dy.No.(EFD)/Fee with date
I	II	III	IV
1.	Cold Care Syrup Each 5ml contains: Paracetamol.....120mg Chlorpheniramine maleate.....2mg Pseudoephedrine.....10mg	Purchase order from Uganda	Dy. No. 412(10.05.2023) Rs.30,000/- (27.02.2023)
2.	Cold Care Capsule Each capsule contains: Paracetamol.....400mg Caffeine.....30mg Chlorpheniramine maleate.....4mg Pseudoephedrine.....30mg	Purchase order from Uganda	Dy. No. 413(10.05.2023) Rs.30,000/- (27.02.2023)
Remarks: Me-too and RRA reference of these products is not available. Firm has provided export order of Uganda and images of products registered in Uganda.			

Decision: **Deferred for evidence of approval of applied formulation in reference regulatory authorities/agencies which were adopted by the Registration Board in its 275th meeting.**

Case No.03: Registration of Drug (s) of M/s Vision Pharmaceuticals (Pvt.) Ltd, Plot No. 22, Industrial Triangle Kahuta Road Islamabad, for export purposes only.

Firm has applied for registration of drug(s) only for export purpose as per following details:

Requirements As Per SOP	Submitted Documents
Application on Form-5/ Form 5-D with required fee as per relevant SRO.	Form5;
Copy of DML (Renewal status) along with approval of relevant sections verified by licensing Division or inspection report for renewal of DML before 2005.	Copy of DML provided Approval of relevant section verified from letter No. F 1-26/2009-Lic dated 07-06-2021
GMP Status. Copy of Inspection report/GMP certificate.	GMP status verified from Inspection report renewal of DML dated 22-06-2022
Undertakings that the applied product is exclusively for export purpose and the proposed names/ label/ colour do not resemble with already registered brands in importing country.	Provided

Detail of the products is given below:

Sr.#	Name of Drug(s) with composition	Generic/RRA Status	Dy.No.(EFD)/Fee with date
I	II	III	IV
1.	Visosol-R IV Infusion 1000ml Each 1000ml contains: Dextrose Anhydrous.....50g Sodium chloride.....5.5g Potassium Chloride.....0.38g Magnesium Chloride.....0.155g Sodium Acetate Trihydrate.....6.81g Water for Injection.....q.s 1000ml **Electrolytes in 1L:** Sodium (NA+).....143.3mmol Potassium (K+).....5mmol Magnesium (Mg+).....1.63mmol Chloride (C1-).....102.4mmol Acetate (C2H302-).....50mmol	Purchase order from Philippine	Dy. No. 414(17.05.2023) Rs.75,000/- (02.05.2023)
2.	Visosol-M IV Infusion 1000ml Each 1000ml contains: Dextrose Anhydrous.....50g Sodium chloride.....1.42g Potassium Chloride.....0.97g Magnesium Chloride.....0.157g Sodium Acetate Trihydrate.....2.18g Water for Injection.....q.s 1000ml **Electrolytes in 1L:** Sodium (Na+).....40mmol/L Potassium (K+).....13mmol/L Magnesium (Mg+).....1.65mmol/L Chloride (C1-).....40mmol/L Acetate (C2H302-).....16.02mmol/L	Purchase order from Philippine	Dy. No. 415(17.05.2023) Rs.75,000/- (02.05.2023)
Remarks: The firm has submitted reference of Philippines National Formulary wherein these formulations are available. The export order is also of Philippines.			

Decision: **Registration board while considering the purchase order from the importing country i.e., Philippines and availability of same formulations in National Formulary of Philippines, decided to approve the applied products Visosol-R IV Infusion 1000ml & Visosol-M IV Infusion 1000ml for export to Philippines only.**

Case No.03: Registration of Drug (s) of M/s Maxitech Pharma (Pvt.) Ltd, Plot No. F-178, S.I.T.E. Phase-II, Super Highway Karachi, for export purposes only.

Firm has applied for registration of drug(s) only for export purpose as per following details:

Requirements As Per SOP	Submitted Documents

Application on Form-5/ Form 5-D with required fee as per relevant SRO.	Form5;
Copy of DML (Renewal status) along with approval of relevant sections verified by licensing Division or inspection report for renewal of DML before 2005.	Copy of DML provided Approval of relevant section verified from letter No. F 2-12/2012-Lic dated 25-11-2016
GMP Status. Copy of Inspection report/GMP certificate.	GMP status verified from Inspection report renewal of DML dated 07-07-2021
Undertakings that the applied product is exclusively for export purpose and the proposed names/ label/ colour do not resemble with already registered brands in importing country.	Provided

Detail of the products is given below:

Sr.#	Name of Drug(s) with composition	Generic/RRA Status	Dy.No.(EFD)/Fee with date
I	II	III	IV
1.	Prednivate-N Lotion Each ml contains: Methylprednisolone acetate.....2.5mg Neomycin sulphate.....2.5mg	Myanamar	Dy. No. 458(19.05.2023) Rs. 75,000/- (01.09.2021)
Remarks: The firm was asked to provide export order and evidence of RRA approva. The firm has submitted export order of M/s Medisure Biotech, Rangon Myanmar. The firm has submitted RRA reference of health Canada (Neo-medrol) The status of RRA reference is cancelled due to marketing reasons.			

Decision: **Registration board while considering the purchase order from the importing country i.e., Myanamar and fact that same formulation was marketed in Canada and was withdrawn due to marketing issues and not due to any safety or efficacy issues, decided to approve the applied product Prednivate-N Lotion for export purpose only.**

Case. No. 4: Formulations Containing more than 100mg Tramadol: Case Meeting with Nigeria and the Islamic Republic of Pakistan.

A summary of case meeting with the Government of Nigeria and the Global Rapid Interdiction of Dangerous Substances (GRIDS) program was forwarded by Mr. Muhammad Arif Chaudhary, Additional Director, Control Drugs Division. The meeting was attended by following officers of the Authority;

i. Mr. Ahmad din Ansari, Director Division of controlled drugs DRAP Islamabad.
ii. Mr. M. Arif Chaudhry, Additional Director Division of Controlled Drugs, DRAP Islamabad.

2. On the basis of proceedings of the meeting, above mentioned officers of the Authority have given following recommendations;

"It is submitted that in the light of discussion made during the meeting and stance of Nigerian Authorities, it is recommended that DRP may revise its policy for the already registered products containing "Tramadol" over 100mg and all the products registered with strength over 100mg may be withdrawn (even if for export purpose) after following due process of law. It is further recommended that policy regarding export of products containing synthetic opioid may be revised to make it in line with status of the material in importing country. The concerned authority of the importing country may also be taken on board for verification of import orders or request for registration of new strength as in case of Tramadol to avoid any sort of scam in future"

3. The list of products registered for export purpose containing tramadol more than 100mg is prepared as per available record and given below;

LIST OF TRAMADOL FORMULATIONS REGISTERED FOR EXPORT PURPOSE

Sr. No.	Name of Firm	Reg. No.	Brand Name & composition	Date of issue
1.	**M/s. Universal Pharma (Pvt) Ltd. 131-A, Hayatabad Industrial Estate, Peshawar.**	**007674-Ex**	**Tramadol ER 200mg** **Each Extended Release tablet contains:** **Tramadol HCl.....200mg**	**-do-**
2.	M/s. Friends Pharma (Pvt) Ltd.,31-KM, Ferozepur Road Lahore.	007689-Ex	Profend tablet 300mg Each extended release tablet contains: Tramadol HCl ……...300mg	-do-
3.		007690-Ex	Profend tablet 400mg Each extended release tablet contains: Tramadol HCl…..……400mg	-do-
4.	**M/s Medicraft Pharmaceuticals (Pvt) Ltd.126-B Industrial Estate, Hayatabad Peshawar.**	**007857-Ex**	**Tremomed SR 200mg tablet** **Each prolong released tablet contains:** **Tramadol HCl.....200mg**	**-do-**
5.	**M/s Unison Chemical works Lahore**	**008063-Ex**	**Tymil ER 200mg Tablet** **Each film coated extended release tablet contains:** **Tramadol Hydrochloride…….200mg**	**June, 2019**

	Authorization Holder: - M/s. Medivet sa, route de Korbous Km 5 Soliman, 8050, Tunisia.		

Accordingly, an inspection was carried out by inspection panel dated 4th & 5th January 2023 and final remarks of the panel are as under:-

FINAL REMARKS:

The following observations were noted during the virtual inspection:

i. The firm i.e., M/s Medivet SA, Route de Korbous Km 5-8020 Soliman Tunisia was manufacturing Penicillins products along with other general products in the same facility however as per international regulatory practices, dedicated facilities are required for production of penicillin drug products.
ii. The temperature and humidity was not maintained/ controlled at the time of inspection.
iii. The firm did not possess stability chambers for real time stability testing. The finished product samples were placed in ware house in a separate area for real time stability where the temperature and humidity was not maintained/controlled.
iv. The firm did not possess microbiology laboratory for microbiological testing.

In view of above the panel **do not recommend** the registration of above products.

Decision:- In view of the shortcomings highlighted and the recommendations given by the inspection panel, the Board decided to reject the registration application(s) of above mentioned drugs manufactured by M/s. Medivet sa, route de korbous km 58020 Soliman, Tunisia as per recommendations of the panel.

Case No. 02: Registration of Drugs under the Drugs Act, 1976-Virtual Inspection Reports of Manufacturer Abroad.

	District Lahore./ **Manufacturer:-**M/s. Dorcas, zone industrielle Kondar, 4020 Sousse, Tunisia. **Marketing Authorization Holder:-** M/s Medivet, Korbous Road 5Km soliman, 8020 Tunisia.	**(M-308)**	

Accordingly, an inspection was carried out by inspection panel dated 1st & 2nd February 2023 and final remarks of the panel are as under:-

FINAL REMARKS:

The following observations were noted during the virtual inspection:

i. The firm i.e., M/s Dorcas, Zone Industrielle de Kondar 4020 Sousse, Tunisia was manufacturing veterinary and human injectable drugs in the same facility. The firm was also manufacturing steroidal injectable drugs along with the general injectable drugs in the same production facility which is not recommended as per international regulatory practices.

ii. The firm was not performing quality control testing of the raw materials and quality release of finished products. It was informed during inspection that aforesaid quality tests are being performed by M/s Medivet SA, Route de Korbous Km 5-8020 Soliman Tunisia. However, during virtual inspection of Medivet SA, Route de Korbous Km 5-8020 Soliman Tunisia the firm didn't mention regarding performance of quality testing of the products being contract manufactured by M/s Dorcas, Zone Industrielle de Kondar 4020 Sousse, Tunisia.

iii. M/s Medivet SA, Route de Korbous Km 5-8020 Soliman Tunisia do not possess microbiology laboratory therefore the sterility testing is questionable.

iv. The firm was not performing the stability testing and during inspection they informed that it is being conducted by M/s Medivet SA, Route de Korbous Km 5-8020 Soliman Tunisia, which requires verification. Moreover, the panel during the virtual inspection of aforesaid facility noted that they did not possess stability chambers for real time stability testing. The finished product samples were placed in ware house in a separate area for real time stability where the temperature and humidity was not maintained/controlled.

In view of above the panel **do not recommend** the registration of products mentioned in Part III of the report.

Decision:- In view of the shortcomings highlighted and the recommendations given by the inspection panel, the Board decide to rejected the registration application(s) of above mentioned drugs manufacturer by M/s. Dorcas, Zone Industrielle Kondar, 4020 Sousse, Tunisia as per recommendations of the panel.

Case No. 03: Registration of Drugs under the Drugs Act, 1976-Virtual Inspection Reports of Manufacturer Abroad.

Following veterinary products approved in various meeting of Registration Board subject to inspection of manufacturer abroad as per import policy.

S. No.	Name of Importer/ Manufacturer & meeting number	Name of Drug/ Composition/	Panel of Inspector(s)/ Date of inspection
1.	M/s. Huzaifa International, Commercial Area, Aziz	(i) Henzole-10% Suspension Each 100ml contains:-	(i)Mr. Manzoor Ali Bozdar, Director (HOTC), Drug

	Bhatti Town, Sargodha./ M/s. Shandong Soocom Animal Remedy Co., Ltd. Xundakang Road No. 666 of Agricultural High & New Technology Development Zone of Jinan, China.	Albendazole…….10g **(M-297)** (ii) Florfenicol-30% Injection Each 100ml contains:- Florfenicol…….30g **(M-297)**	Regulatory Authority of Pakistan, Islamabad. (ii)Mr. Muneeb Cheema, Deputy Director (RRR), Drug Regulatory Authority of Pakistan, Islamabad.

Accordingly, an inspection was carried out by inspection panel dated 03rd March, 2023 and final remarks of the panel are as under:-

FINAL REMARKS:

Based on the preceding's of virtual inspection, documents reviewed and videos of the unit seen, the panel has reached to the conclusion that the firm has basic systems to manufacture veterinary drugs. However, panel of the view that matter needs to be placed before the Registration Board for following reasons:

***"There was sheer breach of trust and misrepresentation by the firm that on one hand firm was saying that they not manufactured Albendazole-10% Suspension & Florfenicol-30% Injection since long. But on the other hand the stock of Albendazole-10% Suspension & Florfenicol-30% Injection was found in the finished goods store with* urdu labelling".**

Decision:-

Registration Board deliberated the matter and decided to remand back the case to inspecting panel for clear and candid recommendation.

Case No.04:- Request of M/s. Star Laboratories (Pvt) Ltd, Lahore for Correction of Composition of already Registered Veterinary Drug.

M/s. Star Laboratories (Pvt) Ltd, Lahore has requested for correction of composition of already registered veterinary drug as per detail mentioned against each:-

Case No. 06: Registration of Drugs under the Drugs Act, 1976-Virtual Inspection Reports of Manufacturer Abroad.

Following veterinary products approved in 308th meeting of Registration Board subject to inspection of manufacturer abroad as per import policy.

S. No.	Name of Importer/ Manufacturer & meeting number	Name of Drug/ Composition/	Panel of Inspector(s)/ Date of inspection
1.	M/s. Medicinia Corporation, 234, Sunny Plaza, Hasrat Mohani Road, Karachi. / Manufacturer & Marketing Authorization Holder:- M/s. Reyoung Pharmaceutical Co., Ltd., No.1, Ruiyang Road, Yiyuan County, Shandong Province, China.	**(i)** Amoclave Tablet 375mg Each film coated tablet contains:- Amoxicillin as Trihydrate…250mg Potassium Clavulanate as Clavulanic Acid……...125mg **(ii)** Amoclave Tablet 625mg Each film coated tablet contains:- Amoxicillin as Trihydrate……500mg Potassium Clavulanate as Clavulanic Acid……...……..125mg **(iii)** Amoclave Tablet 1000mg Each film coated tablet contains:- Amoxicillin as Trihydrate……..875mg Clavulanic Acid as Potassium Clavulanate ……..125mg **(M-308)**	(i)Mr. Abdullah Abro, Deputy Director (Controlled Drugs), DRAP, Islamabad. (ii)Mr. Muhammad Kashif, Deputy Director (Biological), DRAP, Islamabad. **13h & 14th February, 2023**

Accordingly, an inspection was carried out by inspection panel dated 13h & 14th February, 2023 and final remarks of the panel are as under:-

Conclusion & Recommendations:

Based on the proceedings of virtual inspection, documents reviewed and videos of the unit seen, the panel has reached to the conclusion that the firm has basic systems to manufacture tablets and appeared to comply the cGMP requirements. Hence, the panel recommends that the registration of the applied products namely registration of applied products namely Amoclave Tablet (375mg,625 and 1000mg) may be granted to M/s. Medicinia Corporation, 234, Sunny Plaza, Hasrat Mohani Road, Karachi Karachi,

However, the panel strongly recommends on-site inspection in order to verify/ascertain the Good Manufacturing Practices (GMP) of the firm **within one year** as virtual inspection can never replace/in-person inspection.

Inspection report was placed before the Registration Board in its 327th meeting and Board decided as under:

"Registration Board deliberated the matter and decided to remand back the case to inspecting panel for clear and candid recommendation"

Accordingly, letter was issued to the panel members and the panel reply is as under:

S.No.	Conclusion & Recommendations	Explanation
1.	Based on the proceedings of virtual inspection, documents reviewed and videos of the unit seen, the panel has reached to the conclusion that the	The panel clearly recommended that the firm has basis system to manufactured tablets and appeared to comply the

	firm has basic systems to manufacture tablets and appeared to comply the cGMP requirements. Hence, the panel recommends that the registration of the applied products namely Amoclave Tablet (375mg,625 and 1000mg) may be granted to M/s. Medicinia Corporation, 233, Sunny Plaza, Hasrat Mohani Road, off. 1.1 Chundrigar Road, Karachi.	cGMP requirements. The registration of the applied products namely Amoclave Tablet (375mg, 625 and 1000mg) may be granted to M/s. Medicinia Corporation, 233, Sunny Plaza, Hasrat Mohani Road, off. 1.1 Chundrigar Road, Karachi. **Panel has neither barred grant of registration nor given conditional approval.**
2.	However, the panel strongly recommends on-site inspection in order to verify/ascertain the Good Manufacturing Practices (GMP) of the firm **within one year** as virtual inspection can never replace/in-person inspection.	Panel has emphasized for on-site inspection as it is the best way to determine the compliance of GMP standards, so waiver of on-site inspection shall not exceed more than one year. However, in public health emergencies and other situations when it not feasible for inspectors to travel then for a temporary time on-site inspections may be waived but not more than one year.

Decision:-

Registration Board deliberated the matter and decided to remand back the case to inspecting panel for clear and candid recommendation.

Case No. 07:- Reconstitution of Expert Working Group on Veterinary Drugs

Drug Registration Board in its 281st meeting held on 11-13th April, 2018 has constituted expert working group on veterinary drugs regarding matters related to veterinary drugs.

Decision of 281st meeting of RB: -

The Board observed that the constitution of the veterinary expert Committee notified under Section 10 of Drugs Act, 1976 vide SRO No.81(I)/2015 dated 26-01-2015 needs to be revised for inclusion of relevant expert(s) member(s) of the Board etc. However, since process of revision of constitution may take some time as the approval of Federal Government and other relevant organizations are required before revised Gazette notification, so, in order to avoid pendency/delay in processing of issues relating to veterinary drugs requiring input/recommendation of pertinent veterinary expert, the Board decided to constitute an Expert Working Group on Veterinary Drugs having following composition: -

1.	*Dr. Qurban Ali, Ex-Director General* *National Veterinary Laboratory, Islamabad.* *Expert Member Veterinary Drugs*	*Chairman*
2.	*Animal Husbandry Commissioner or his representative,* *M/o National Food Security & Research, Islamabad.*	*Member*
3.	*Dr.Mazhar-ul-Haq* *Veterinary Pharmacologist* *Arid Agriculture University, Rawalpindi.*	*Member*
4.	*Any other relevant expert(s)*	*As Co-opted member(s)*
5.	*Deputy Director (Reg-I), DRAP*	*Member, Secretary*

The expert working group will provide expert advice / views and recommendations to the Registration Board on matters relating to veterinary drugs referred by the Board including review of existing/new veterinary drug formulations. The group can Co-opt any relevant expert(s) as Co-opted member(s).

The Board further advised that in order to avoid any pendency, the "expert working group" needs be notified immediately without waiting till formal approval of the minutes of 281st

meeting so that the meeting of the expert working group may be called earlier.

Accordingly notification of expert working group was issued on 08th May 2018. Chairman of Expert working Group co-opted Dr. Shabnum Firdous, Secretary PVMC as a co-opted member, and letter for in this regard was issued on 16th June 2022.

After completion of 2nd term Dr. Qurban Ali, (Chairman EWG) was retired as member registration board [under Rule 24 (f) of Drugs (LR&A) Rules, 1976 (Expert Member for Veterinary Drugs)]. Accordingly denotification letter of EWG, after approval from Chairman, Registration Board, was issued on 24th February, 2023 vide letter No. 7-4/2018 (M-281) and endorsed in 325th meeting of Registration Board.

Decision of M-326: - The Board observed that the constitution of the veterinary expert Committee notified under Section 10 of Drugs Act, 1976 vide SRO No.81(I)/2015 dated 26-01-2015 needs to be revised in order to avoid pendency/delay in processing of issues relating to veterinary drugs which require input/recommendation of pertinent veterinary expert, hence Board decided to constitute an Expert Working Group on Veterinary Drugs having following composition: -

1.	*Dr. Qurban Ali,* *Ex-Director General,* *National Veterinary Laboratory, Islamabad.*	*Chairman*
2.	*Dr. Ayesha Yaqoob, Drug Testing Laboratory, Rawalpindi.*	*Member*
3.	*Mst. Najia Saleem, Deputy Director (PE&R), DRAP*	*Member*
4.	*Any other relevant expert(s)*	*As Co-opted member(s)*
5.	*Assistant Director (I&V-I), DRAP*	*Member, Secretary*

The expert working group will provide expert advice / views and recommendations to the Registration Board on matters relating to veterinary drugs referred by the Board including review of existing/new veterinary drug formulations. The group can Co-opt any relevant expert(s) as Co-opted member(s).
The Board further advised that in order to avoid any pendency, the "expert working group "needs be notified immediately without waiting till formal approval of the minutes of 281st meeting so that the meeting of the expert working group may be called earlier.

Decision: - The Board observed that the constitution of the veterinary expert Committee notified under Section 10 of Drugs Act, 1976 vide SRO No.81(I)/2015 dated 26-01-2015 needs to be revised in order to avoid pendency/delay in processing of issues relating to veterinary drugs which require input/recommendation of pertinent veterinary expert, hence Board decided to constitute an Expert Working Group on Veterinary Drugs having following composition: -

1.	*Dr. Qurban Ali,* *Ex-Director General,* *National Veterinary Laboratory, Islamabad.*	*Chairman*
2.	*Dr. Ayesha Yaqoob, Drug Testing Laboratory, Rawalpindi.*	*Member*
3.	*Mst. Najia Saleem, Deputy Director (PE&R), DRAP*	*Member*
4.	*Dr. Irfan Yousaf* *Dean Faculty of Veterinary and Animal Sciences Pir Meher Ali Shah Arid Agriculture University, Rawalpindi*	*Member*
5.	*Any other relevant expert(s)*	*As Co-opted member(s)*
6.	*Assistant Director (I&V-I), DRAP*	*Member, Secretary*

Case: Deferred cases of Import (Veterinary Drugs)

Name and address of Applicant	M/s Fartal Pharmaceuticals Flat no. 409 shalimar pride plaza near Mehran depo model colony Karachi

Manufacturer & Marketing Authorization Holder	M/s Laboratorios Microsules Uruguay S.A. Camino al Paso Escobar s/n, Canelones Department Uruguay
Type of Form	**5A**
Diary No. & Date of R& I	Dy. No 419 Dated 21-10-2015
Fee including differential fee	Rs. 100,000/- Dated 21-10-2015
Brand Name +Dosage Form + Strength	Vitmic complement
Composition	Each 100ml contains: Vitamin B1…….0.1gm Vitamin B2…….0.01gm Nicotinamide……..0.1gm Glucose anhydrous…….10gm Sodium Chloride…….0.5gm Potassium chloride……..0.09gm Calcium Chloride Hexahydrate……...0.03gm Magnessium Chloride Hexahydrtae……0.015gm Caffeine…….....0.4gm
Finished Product Specification	In-House
Pharmacological Group	Vitamin suplement
Shelf life	24 months
Demanded Price	Decontrolled.
Pack size	100mL, 250mL
Me-too status	Could not be confirmed
Stability studies	Firm has submitted long term (24 months) at 25^{o}C±2^{0}C, 60±5%RH & accelerated (06 months) stability data at 30^{o}C, 60±5% RH for three batches
Detail of certificates attached	Original legalized of veterinary product registration certificate issued by Ministry of Agriculture and Fisheries Oriental Republic of Uruguay declaring the use of the product in the country, valid till 02-08-2019, Notarized Copy of GMP certificate dated 21-02-2019 expires dated 22-05-2019 is submitted. Notarized copy of Power of attorney from Product License holder is submitted
Remarks of the Evaluator:	Accelerated stability data is not submitted. • As per submitted real time stability data, the assay results of different APIs/ingredients are out of specifications in all 03 batches (Batches: BJ140466, BJ140567, BJ140768) • Evidence of approval of the applied formulation in reference regulatory authorities could not be confirmed. However, the firm has submitted copy of Overseas Site GMP Compliance report (date of inspection: 02/06/2019) wherein the applied product is endorsed to be manufactured by the firm. • As per available database of me-too product, the applied formulation is not registered in Pakistan

Decision of 312th meeting: Deferred for evidence of approval of applied formulation in reference regulatory authorities / agencies which were adopted by the Registration Board in its 275th meeting or evidence of applied formulation/drug already approved by DRAP (generic / me-too

status) alongwith registration number, brand name and name of firm.

Submission by firm:

The firm has stated that the availability of the exact formulation as the applied product in reference agencies could not be confirmed as it is a novel product. However, Australian Pesticides and Veterinary

Medicines Authority has provided Australian GMP certificate.

The provided copy of GMP certificate No. M-7908 contains a list of products including the applied product Vitmic Complemento

Decision of 316th meeting: Registration Board deferred the case for clarification from the firm regarding pharmacological role of Caffeine in applied formulation and then will be forwarded to Dr. Qurban Ali (member Registration Board) for review of applied formulation.

Evaluation by PEC:

Dr. Qurban Ali via e.mail to Incharge PEC dated 05-03-2023 has forwarded his opinion as under:

Subject: **Vitmic Complemento Inj. M/s Fartal Pharmaceuticals, Karachi; Veterinary Import from M/s Laboratorios Microsules, Uraguay**

Dear Sir/ Madam

The subject cited product is a Routine Application Submitted on Form 5A (Veterinary Import)
– Deferred Cases. The product was considered in 316th meeting of Registration Board and deferred for want of elucidating the role of caffeine in applied formulation and a review.

Whereas the evaluator remarks stand on stability data; the product has been claimed novel and as such its me-too status or status in any reference authority could not be confirmed. The product however had a tag of GMP certification of manufacturer in Uraguay from Australian Pesticide and Veterinary Medicine Authority.

The dosage form is injectable (S/C or I/V) for Bovine (cattle buffaloes), Ovine (sheep, goats), and Equine (Horse) indicated for downer cow syndrome, general wakening, acetonemia and recovery of essential elements loss due to physically demanding sports in equines. The product has not been tagged for withdrawal period due to absence of MRL for any of the ingredients in the product. Moreover, the product is registered for use in animals by Uraguay Ministry of Livestock, Agriculture and Fisheries under Registration Number: A-2301 and is allowed for free sale in the country. The product is registered in Bolivia, Chile, Costa Rica, Ecuador, Mexico, Panama, Paraguay, Peru, Venezuela, and Albania. The product has composition per each 100 ml is as follows:

Active ingredients		***Excipients***	
Anhydrous glucose	*10 g*	*Sodium benzoate*	*0.4 g*
Vit B1 (Thiamine HCl)	*0.1 g*	*Disodium EDTA*	*0.01 g*
Vit B2 (Riboflavin Phosphate Sodium)	*0.01g*	*Nipagin*	*0.08 g*
Nicotinamide	*0.1 g*	*Nipasol*	*0.02 g*
Sodium Chloride	*0.5 g*	*Distilled water*	*q.s ad*

			100 ml
Potassium Chloride	*0.09 g*		
Calcium Chloride	*0.03 g*		
Magnesium Chloride	*0.015 g*		
Caffeine	*0.4 g*		

In formulation, the glucose, essential electrolytes elements and vitamins are known for maintaining bodily muscular and nervous functions; the charged elemental ions are also known important for maintaining balance of internal environment and pH levels besides help in keeping the body sufficiently hydrated.

Pharmacological properties of Caffeine have been made case for study in few animal investigations indicating a stimulating effect on the central nervous system of animals. It enhances and regulates the processes of excitation in the cerebral cortex, strengthens conditioned reflexes, and increases motor activity. The stimulating effect of caffeine leads to increased physical performance reduces fatigue and sleepiness. The drug increases heart activity, diuresis, gas exchange, and water and nitrogen metabolism. The effect is dose dependent.

Use of aforesaid product has also been made part of clinical studies by manufacturer indicating safety, improvement of body condition and desired stimulatory effects achieved in 60 heifers (cattle). For veterinary use, injectable caffeine products (alone or in combinations are few); an Austrian product previously registered in Pakistan namely Novacoc forte did had injectable Caffeine (0.35 g/ 100ml) and Caffeine alone with preservative (Caffeine 75 mg and 120 mg Sodium Benzoate per ml) has been registered in Russia for use.
Keeping in view the situation above, safety of product, novelty in terms of availability of a product for animals in need to recoup post convalescence weakness, management of debility, acetonemia, management of post strenuous exercise of horses through utilizing potential of caffeine has sufficient justification for veterinary use and purpose. The product is therefore, recommended for registration and a consequent availability to the clinical veterinarian.

Decision:-
Keeping in view the above Registration Board deliberated the matter and decided to Approved the product subject to import policy of manufacturer abroad.

Import & Vet-II Section

Case No: 01 <u>REQUEST OF M/S NOVARTIS PHARMA PAKISTAN LIMITED, FOR IMPORT OF GEMCITABINE "EBEWE" 200MG/VIAL AND 1G/VIAL INJECTION.</u>

The firm has submitted as under: -

As we informed you earlier through our letter no NPP-DRAP-27-0238 dated 23-Sep-2021, we, M/s Novartis Pharma (Pakistan) Limited, have divested certain portfolio of our products to AGP Limited [AGP] through its subsidiary OBS AGP (Private) limited. As per the aforesaid divestment

transaction, AGP has successfully acquired a portfolio of 22 pharmaceutical products from Sandoz AG, a company organized under the laws of Switzerland, which are commercialized in Pakistan under the Sandoz brand. Registration of most of these products have been transferred to AGP from Novartis Pharma (Pakistan) Limited [Novartis], while some are still in the process of being transferred.

Accordingly, continuing with transfer of registration process, AGP has received approval from DRAP dated 07-Mar-2O23 for transfer of registration of Gemcitabin "Ebewe" 200mg/vial and 1g/ vial injection in their name. Gemcitabin is an imported chemotherapy drug used to treat different types of cancers.

Novartis being the registration holder of the Products, at that time, places the order for the Products on 21-Nov-2022 for both strengths. On 22-Feb-2022, the manufacturer of Products based in Austria informed about the readiness of the order, and since then, Novartis have been working on the bank contract for the payment of this consignment. Unfortunately, due to the economic challenges in Pakistan, there was a significant delay, and finally the approval was granted on 22-Mar-2023 for Gemcitabine Ebewe 1g injection & 17-Mar-2023 for Gemcitabin Ebewe 200mg injection. Due to this delay, the remaining shelf life of the batch no MV5297 for Gemcitabin Ebewe 200mg injection has reduced to 69.5%, which is lower than the recommended shelf-life limit at the time of drug importation and the registration of the Products has transferred in the name of AGP. Since, the shelf life at the time of import would be low than ' recommended 75% we will also apply for the approval to import the product with short shelf life.

The details of the consignment ordered for Gemcitabin are as follows:

Name of Product	Batch No	Date of manufacturer	Date of Expiry
Gemcitabine Ebewe 200mg injection	MV6297	28.09.2022	3L.08.2024
Gemcitabine Ebewe 1gminjection	MW2306	23.02.2023	31.01.2025

As the importer has changed by virtue of transfer of registration over the course of time, i.e., at the time of ordering it was Novartis and at the time when consignment is expected to be received at the port it is AGP, Novartis will face extreme difficulty in releasing the consignment as deregistration letter has been already issued to Novartis with respect to the products. As previously mentioned, the Products are chemotherapy agents critical for the treatment of cancer patients in Pakistan, and their continuous availability must be ensured in the best interest of patients.

Further, the next ordering cycle with the new registration holder, i.e., AGP, will take another 9 months to receive the stocks, which will lead to a shortage of this medicine in Pakistan.

The Products are ready for shipment, but the import is not possible without DRAP's approval. Therefore, we kindly request your permission to import the Products into Pakistan. Your permission will not only save several cancer patients but also secure the availability of these critical Products during a time when extreme shortages for such cancer treatments are already prevalent in the country.

Decision:- Registration Board deliberated the matter and decided to refer the case to Licensing Authority.

Case.No.02. <u>REQUEST OF M/S PFIZER PAKISTAN LIMITED FOR CHANGE IN REG. STATUS FROM BULK IMPORT TO FINISHED IMPORT WITH CHANGE IN MANUFACTURING SITE-CARPSOL INJECTION 150MG/15ML.</u>

M/s Pfizer Pakistan Ltd, B-2 SITE, Karachi has submitted request for change in registration status from bulk import to finish import with change in manufacturing site for following product:

Reg. No.	Name & Composition of Drug / address	Detail of approved Sites as per approval (01-04-2016)	Detail of approved Sites as per CoPP

013966	Carpsol 150mg/15ml Injection Each ml contains: Carboplatin….10mg	**Name & Address of Manufacturer:** M/s Pfizer (Perth) Pty Ltd, Technology Park 15 Brodie Hall drive, Bentley WA 6102 Australia	Market Authorization Holder: M/s Pfizer Australia Pty Ltd Level 17 151 Clarence Street Sydney NSW 2000 Australia. Manufacturer: Hospira Australia Pty Ltd, 1-5,7-23 and 25-39 Lexia Place, Mulgrave, Victoria, 3170, Australia Finished Import

The firm has submitted the following supporting documents: -

a) Fee of Rs.150,000/- for above product.
b) Copy of registration letter issued on 30-01-1993.
   - Change of name of drug from Deltaplatin Injection 10mg/ml to Carpsol Injection 10mg/ml dated 20-07-1993.
   - Change of title of manufacturer (bulk import with local repacking) on 01-04-2016.
   - Transfer of Registration from M/s Parke Davis & Compnay to M/s Pfizer Pakistan Ltd on 01-06-2011.
   - Renewal Submit on 28-05-2021
   - Due date 01-06-2021.
c) Copy of valid Drug Sale License.
d) Copy of CoPP.
e) Form 5-F
f) Letter of Authorization.

Decision:-
Registration Board deliberated the matter and decided to approve the change in registration status from bulk import to finish import along with change in manufacturing site for following product:

Reg. No.	Name & Composition of Drug / address	Existing approved Sites (01-04-2016)	New approved Sites as per CoPP
013966	Carpsol 150mg/15ml Injection Each ml contains: Carboplatin….10mg	Name & Address of Manufacturer: M/s Pfizer (Perth) Pty Ltd, Technology Park 15 Brodie Hall drive, Bentley WA 6102 Australia	Market Authorization Holder: M/s Pfizer Australia Pty Ltd Level 17 151 Clarence Street Sydney NSW 2000 Australia. Manufacturer: Hospira Australia Pty Ltd, 1-5,7-23 and 25-39 Lexia Place, Mulgrave, Victoria, 3170, Australia Finished Import

Case No.03 **REQUEST OF M/S NOVARTIS PHARMA (PAKISTAN) LIMITED FOR PERMISSION TO IMPORT INTERNATIONAL APCKS OF RITALIN LA 20MG CAPSULE (REG.NO.110548).**

M/s Novartis Pharma (Pakistan) Limited, 15 West Wharf, Dockyard Road, Karachi has stated that product Ritalin LA 20mg (Reg. No.110548) manufactured in USA and manufacturer have informed that due to very specific and limited quantity of product they are unable to provide this medicine in country specific packs.

Details of Product:

S. No.	Reg. No.	Name of Product	Remarks

1.	110548	Ritalin LA Capsules 20mg Each capsule contains:- Methylphenidate hydrochloride……20mg	Reg. Letter date 22.11.2022.

The firm has requested to allow them to print the following components on outer box of product locally at licensed premises i.e. C-21, SITE, Karachi DML No. 000003 as per labeling and packaging rules 1986.

- Urdu text.
- Registration number.
- Maximum retail price.
- Name and address of sole agent.
- 2D Matrix Barcode
- Other information (as per labeling requirements)

The firm has provided the following documents along with the application: -

a. Fee challan of Rs.10,000/- for said product.

Case.No.05: Request of M/s. Amgomed, Islamabad for Registration of Drug.

M/s Amgomed case was presented in different meetings of Registration Board (M-295,M-287) Registration Board in its 262nd meeting approved the following products of M/s. Amgomed, Islamabad for import from Korea as per details mentioned alongside;

S. No	Name of importer / manufacturer	Name & Composition of Drug(s)	Demanded Pack size & Price	Decision of Board
1.	M/s Amgomed, Islamabad. **Manufacturer:** M/s Dong Kook Pharmaceutical Co. Ltd. 33-19, yongso 2-gil, Gwanghyewon-myeon, Jincheon-gun, Chungcheongbuk-do, Republic of Korea.	Diluent for Lorelin depot 3.75 mg Each ampoule (2ml) contains: D-Mannitol..100mg Sodium Carboxymethylcellulose…10mg Polysorbate 80……2mg Water for Injection…..q.s.	Free of Cost.	Approved
2.	M/s Amgomed, Islamabad. **Manufacturer:** M/s Dong Kook Pharmaceutical Co. Ltd. 33-19, yongso 2-gil, Gwanghyewon-myeon, Jincheon-gun, Chungcheongbuk-do, Republic of Korea.	Lorelin depot 3.75 mg Injection Leuprolide acetate 3.75mg Injection	As per SRO	Approved

While issuance of registration letter it has been observed the above mentioned product "Lorelin Depot 3.75mg injection" has already been granted registration in favor of M/s. Medisure Pharma International, Karachi from the same source having registration number **027357**.

Accordingly M/s. Amgomed, Islamabad was informed about the above stated position. The firm informed that the principle has already cancelled/terminated the sole agency agreement from the name of M/s. Medisure Pharma International, Karachi in 2013 (provided copy of that cancellation letter dated 16-03-2013) for the reasons that M/s. Medisure Pharma International, Karachi has never imported a single vial since the time of registration i.e 2002 and violation of conditions of agreement.

It is pertinent to mention that the inspection of the above mentioned manufacturer has been carried out dated 21st -22nd June, 2018 by nominated panel comprised of Mr.Malik Irshad Hussain (Member Policy Board), Mr.Sayyad Hussain (Deputy Director, DRAP).

Decision of 287th meeting:-

Registration Board decided to issue show cause notice to the firm M/s. Medisure Pharma International, Karachi as to why not the registration of product Lorelin depot 3.75 mg Injection may not be cancelled because of the termination of their sole agency agreement by M/s. Dong Kook Pharmaceutical Co. Ltd, Korea, as reported by M/s. Amgomed, Islamabad.

Fresh Proceedings:

In the light of Registration Board decision a Show Cause Notice has been served to the firm on 21st June, 2019 but no reply has been received. Furthermore, a reminder (No.F.1-40/2007-Reg-I-Pt) through registered post has been issued on on 26th August, 2019 to the firm (C-145, K.D.A. Scheme No.1 Off Karsaz Road, Karachi) with advised to submit reply within seven days after issuance of this letter, the same has been received back with failed delivery status. Afterwards, on 18th September 2019 the reminder letter handed

over to firm's representative (Mr. Atta) & till the date no reply from M/s Medisure Pharma International, Karachi has been received.

Decision of M-292:

Registration Board advised to issue final showcase notice to M/s Medisure Pharma International Karachi and in case of no reply, case will be considered by Registration Board.

Fresh Proceedings:

M/s Medisure Pharma International has submitted their reply as under: -

M/s Medisure Pharma International is a respectable commercial pharmaceutical organization committed to provide best quality products registered and accredited from all concerned departments of Government of Pakistan.

M/s Medisure Pharma International is fully honored and respects the land of laws, to fulfil the Pakistan regulations and fully comply with the Drug Laws. Accordingly, a per mandate and requirements of Drugs Act, 1976 and Drugs (Licensing, Registration & Advertising) Rules, 1976, the Medisure Pharma International entirety is to follow the regulations.

The aforesaid product is currently registered with M/s Medisure Pharma International and has a valid registration number. Subsequent to registration, we are regularly maintaining its registration and last renewal was filed in DRAP in June 2017.

We are not aware about the letter of cancellation of sole agency agreement whit M/s Dong Kook Pharmaceutical Co., Ltd, 33-19, Yongso 2-gil, Gwnghewon-myeon, Jincheon-gun, Chungcheongbuk –do, Republic of Korea and even not have been officially informed regarding termination of sole agency agreement from M/s Dong Kook Pharmaceutical Co., Ltd.

We are also wondering that how DRAP pharmaceutical evaluation cell accepted and included the case in Drug Registration Board (M-287) meeting without taking consideration of No Objection Certificate (NOC) from existing Marketing Authorization Holder which is the basic requirement of DRAP Post Registration Variation SOP of Marketing Authorization transfer from one importer to another importer.

Decision OF 295TH Meeting: Registration Board advised to M/s Medisure Pharma International to submit fresh Sole Agency Agreement/Authorization Letter in their name from Product License holder for above mentioned products.

Fresh Proceedings:

The above decision was conveyed to the firm on 7th August, 2020 and reply form firm is not received till yet.

M/s Medisure Laboratories Pakistan file Constitutional Petition No.D-5539 dated 02-12-2020 in the High Court of Sindh, Karachi Federal of Pakistan and others.

Decision M-297:

Registration Board referred the case to Legal affair division to seek their opinion regarding issuance of show cause notice in the light of Constitutional Petition No. D-5539 dated 02-12-2020 in the High Court of Sindh, Karachi Federal of Pakistan and others.

Fresh Proceedings: -

Comments of Legal Affair Division.

As per available facts/ record of the case, M/s Medisure Pharma International filed constitutional Petition No.5539/2020 wherein till date the court has not granted any status quo order. Therefore, the Registration Board may issue show cause notice to the firm under relevant provisions of the Drug Act, 1976.

Decision of M-308 (21-22 June 2021): -

Keeping in view the above position, Registration Board decided as follow:-

a) **Approved the cancellation of registration of Lorelin depot 3.75mg Injection (Reg.No. 027357) from the name of M/s Medisure Pharma International, Karachi.**
b) **Approved the registration of Lorelin depot 3.75mg Injection (Reg.No. 027357) in the name of M/s Amgomed, Islamabad as per policy for imported finished drug registration (in accordance with details of composition and manufacturer as per CoPP).**
c) **A reference shall be sent to Costing & Pricing Division for their comments regarding MRP of the said products.**

As per decision of the Board cancellation letter of Lorelin depot 3.75mg Injeciton (Reg. No. 027357) issued to M/s Medisure and registration letter issued to M/s Amgomed) dated 20-04-2022.

2nd strength of the same class of product was approved in the same meeting
The detail is as under:

S. No	Name of importer / manufacturer	Name & Composition of Drug(s)	Demanded Pack size & Price
1.	M/s Amgomed, Office no. 4, 1st floor, Ghousia Plaza, Jinnah Avenue blue area, Islamabad **Manufacturer & Product License Holder:** M/s Dongkook Pharmacetuical Co., Ltd., 33-19, Yongso 2-GIL, Gwanghyewon-Myeon, Jincheon-Gun, Chungcheongbuk-Do, Korea.	Lorelin Depot 7.5mg Subcutaneous injection Each vial contains: Leuprolide acetate…7.5mg Gonadotropin releasing hormone analogue 3 years	As per SRO
Decision M-308: Approved with innovator's specifications and as per Policy for inspection of Manufacturer abroad and verification of local storage facility.			
2.	**-do-**	Diluent for Lorelin Depot 7.5mg Subcutaneous injection Each ampoule of 2ml contains: D-mannitol……...100mg Sodium carboxymethylcellulose...10mg Polysorbate 80……..2mg Water for injection……q.s	As per SRO
Decision M-308:- Approved with innovator's specifications as diluent of Lorelin Depot 7.5mg Subcutaneous injection (S No.32). Approval is as per Policy for inspection of Manufacturer abroad and verification of local storage facility.			

Current status of Petition No.5539/2020 is dismissed.

ORDER SHEET

IN THE HIGH COURT OF SINDH, KARACHI.

C.P No. D-5539 of 2020

Dated Order with signature of Judge.

Priority
1. For hearing of Misc. No.23605/2020
2. For hearing of Main Case.

20.09.2022.

Mr. Rashid Mureed, Advocate for the Petitioner.
Kazi Abdul Hameed Siddiqui, D.A.G. Syed Hakim Masood, FID, DRAP, Karachi

YOUSUF ALI SAYEED, J- The Petitioner has invoked the jurisdiction of this Court under Article 199 of the Constitution soas to assail two letters issued by the Drug Regulatory Authority of Pakistan ("**DRAP**") regarding the cancellation of the Petitioner'sregistration in respect of certain pharmaceutical products, with it being averred that the Petitioner had responded to a Show-Cause Notice that had been issued by DRAP on the subject and it being sought that DRAP be restrained from taking any coercive action in pursuance of the impugned letters without considering the representation of the Petitioner.

As it transpires, the comments submitted on behalf of DRAP reflects that the principal of the Petitioner had apparently intimated DRAP that it had cancelled/terminated the Petitioner's agency in relation to the subject products and appointed a third party as its agent/representative, with the matter thus being placed before the Registration Board and a decision being taken to issue the show cause notice to the Petitioner. Thereafter, the ensuing proceedings taking place during pendency of this Petition had culminated in a decision by the Registration Board that if the Petitioner desired to preserve its registration for the given products, it ought to submit a fresh license agreement/authorization letter from the proprietor, and such decision was open to challenge by way of an appeal under section9 of Drug Act 1976 before the Appellate Board.

When asked, learned counsel for the Petitioner could notcontrovert the veracity of what had been stated in the comments. Under the given circumstances, it is manifest that subsequent events have overtaken the Petition, which accordingly stands dismissed along with the pending miscellaneous application, leaving the Petitioner at liberty to pursue the alternate remedy available, if so desired.

Decision: -
Keeping in view the above position, Registration Board decided as follow:-

a) **Approved the cancellation of registration of Lorelin depot 7.5mg Injection from the name of M/s Medisure Pharma International, Karachi.**
b) **Approved the registration of Lorelin depot 7.5mg Injection in the name of M/s Amgomed, Islamabad as per policy for imported finished drug registration (in accordance with details of composition and manufacturer as per CoPP).**
c) **A reference shall be sent to Costing & Pricing Division for their comments regarding MRP of the said products.**

65.	048552	Tycef DS Suspension Each 5ml contains: Cefixime Trihydrate eq. to Cefixime….200mg **Manufacturer:** M/s. Opal Laboratories (Pvt) Ltd., LC/41 SITE Landhi Karachi.	20/03/2008 Approval of contract Mfg: 24.11.2020 Valid till: **23.03.2022**	Rs: 10000/- dated **25.04.2022** Rs: 75000/- dated 25.04.2022 Rs.75000/- dated 29.07.2022

Back ground of the case is that the firm was given an approval of contract manufacturing under former contract manufacturing policy of above products from M/s. Opal Laboratories (Pvt) Ltd., LC/41 SITE Landhi Karachi for a period of sixteen months i.e. till 23.03.2022 vide DRAP approval F.296-RB/2020 (PR-I) dated 24.11.2020 with the advice to submit quarterly progress on the activities undertaken by the firm in 296th meeting. The undertaking given by the firm at the time of grant of permission is reproduced as under:

Phase 1: Renovation of general packaging area (tablets and capsules) will be completed by Dec-2020

Phase II: Renovation of blistering, coating &encapsulation will be completed by May 2021.

Phase III: Renovation of Dry Suspension, blending, granulation and packaging will be completed by
November 2021

Phase IV: Renovation of liquid manufacturing, filling and packing will be completed by March 2022.

Phase V: Renovation of oral cephalosporin (capsule and dry powder suspension) will be completed by Feb,2022.

The firm submitted application of extension in contract manufacturing on 25.04.2022 as indicated in Column V above which was placed in before the Renewal Sub Committee in its 8th meeting held on 21st February 2023. Wherein the committee deferred the renewal applications for submission of progress report as per undertaking in 296th meeting of Registration Board.

In response to the above decision of the Committee the firm submitted reply vide Dy. No. 8391 dated 27.03.2023 wherein they have submitted that they have applied for withdrawal of Cephalosporin section due to non-feasibility for manufacturing of cephalosporin registered products. Accordingly, DRAP–Licensing section issued letter No. F.2-20/84-Lic (Vol-V), dated:23rd Oct, 2020 for withdrawal of Cephalosporin section. The firm further submitted that they had applied for contract manufacturing on basis of renovation /upgrade Cephalosporin area but later on we have withdrawn Cephalosporin section as mentioned above. The firm requested to consider the submitted application for renewal of Contract manufacturing for their registered Cephalosporin products & grant us the Contract Manufacturing for 05 years at your earliest on basis of withdrawal of Cephalosporin area.

The case was placed before the Registration Board in its 327th meeting of Registration Board with all the facts mentioned above. The Board is of the view to take assistance of the Legal Affairs Disvion on the matter regarding following:

i. The firm was granted contract manufacturing permission for their registered products as mentioned above for a period of sixteen months based on renovation of their manufacturing facilities with the advice to submit quarterly progress on the activities undertaken by the firm as mentioned above.
ii. However instead of submitting aforesaid report the firm approached the Licensing Disvion and get approval of layout plan for regularization vide letter No. 2-20/84-Lic (Vol-V) dated 23.10.2020 wherein Dry Powder Suspension (Cephalosporin) and Capsule (Cephalosporin) and Warehouse (Cephalosporin) were withdrawn.
iii. It is pertinent to mention that the firm didn't inform the PE&R Disvion of the aforesaid development instead submit an application of contract extension after due date which is mentioned column V of table above.

In view of foregoing Legal Affairs Division was requested to please opine on following:

a. Whether application for extension in contract manufacturing submitted after the due date can be considered under SRO 1347(I)/2021 or the firm has to apply afresh because the permission is valid for sixteen months only.
b. The Legal status of the registrations after the withdrawal of section without the intimation to the PE&R Disvion as per decision of Registration Board in its 29th meeting wherein the firm has to submit quarterly progress on the activities of renovation
c. The legal status of unauthorized manufacturing after the expiry of permission granted till 23.03.2022.

The Legal Affairs Division has responded to above queries and their response is recorded as under:

Sr. No.	Query by PE&R	Response by Legal Affairs
a.	Whether application for extension in contract manufacturing submitted after the due date can be considered under SRO 1347(I)/2021 or the firm has to apply afresh because the permission is valid for sixteen months only.	Rule 20A(2)(a) of the Drugs (Licensing, Registering and Advertising) Rules, 1976 as amended vide S.R.O. 1347(I)/2021 stipulates that the provisions of, *inter alia*, rule 27 shall apply *mutatis mutandis* to rule 20A. First proviso of rule 27 as amended vide S.R.O. 1005(I)/2017 provides that an application shall be made within sixty days after the expiry of the registration and when an application has been made as aforesaid the registration shall subject to the orders passed on the application for the renewal continue in force for the next period of five years and a certificate to this effect shall be issued within one month. The application of the firm may be considered under rule 27.
b.	The legal status of the registrations after the withdrawal of section without the intimation to the PE&R Division as per	The permission for contract manufacturing was validly granted in 296th meeting of the Registration Board. Both the contract giver and contract acceptor fulfilled the requisite conditions of rule 20A of the Drugs (Licensing, Registering and Advertising) Rules, 1976 at the

	decision of Registration Board in its 296th meeting wherein the firm has to submit quarterly progress on the activities of renovation.	time of grant of contract manufacturing permission. Registration of products remain intact and valid until otherwise suspended or cancelled by the Registration Board following the procedure laid down in section 7(11) of the Drugs Act, 1976 read with section 41 thereof. It has to be kept in mind that the present case is of contract manufacturing and withdrawal of any section of contract giver having valid DML has no consequences on products manufactured by the contract acceptor on behalf of the contract giver.
c.	The legal status of unauthorized manufacturing after the expiry of permission granted till 23.03.2022.	In case the application submitted by the firm is covered under first proviso of rule 27 of the Drugs (Licensing, Registering and Advertising) Rules, 1976, the registration shall remain valid until explicit orders are passed by the Registration Board.

Decision: **Keeping in view the opinion of Legal Affairs Division recorded above, Registration Board granted the extension in contract manufacturing under Rule 27 of Drug (LR&A) Rules 1976 as per validity mentioned against each below:**

Sr. No	Reg. No.	Brand Name & Composition	Initial date of Registration PRV (If any)	Decision

Cases of DD (Mr. Muhammad Kashif)

Imported Human Biological product from Reference countries/WHO PQ:

1.	Name, address of Applicant / Importer	**M/s TIMAX LIFE SCIENCES Pvt Ltd.** Address: M-1 FL-37, Block-B, Gulshan-e-Jamal, Karachi.
	Details of Drug Sale License of importer	License No: 0323 Address: M-1, FL-37, Block-B, Gulshan-e-Jamal Karachi Address of go-down: R-172, Block-F, Gulshan-e-Jamal, Karachi. Validity: 05-03-2028
	Name and address of marketing authorization holder (abroad)	M/s Octapharma GmbH, Address: Elisabeth-Selbert-Straße 11 40764 Langenfeld, Germany.
	Name, address of manufacturer(s)	M/s Octapharma Produktionsgesellschaft Deutschland mbH Wolfgang-Marguerre-Allee 1, 31832 Springe, Germany.
	Name of exporting country	Germany
	Detail of certificates attached (CoPP, Free sale certificate, GMP certificate)	CoPP: Valid original legalized CoPP No. 20090301 dated 03-09-2020 issued by Bezirksregierung Düsseldorf Postfach 300865 40408 Düsseldorf Germany. GMP: Legalized GMP Certificate Ref # 41401/H-43 dated 12-02-2020.
	Details of letter of authorization / sole agency agreement	New Legalized Letter of Authorization Number 78/2022 issued dated July 28th 2022 valid till 27-07-2027 & Legalized Sole Agency Agreement (copies are attached)
	Status of the applicant	☐ Manufacturer ☒ Importer ☐ Is involved in none of the above (contract giver)

	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	For imported products, specify one the these	☒ Finished Pharmaceutical product import ☐ Bulk import and local repackaging ☐ Bulk import and local repackaging for export purpose only
	Dy. No. and date of submission	Dy. No. 3117 Dated: 27-01-2021
	Details of fee submitted	Deposit Slip # 2035154 of Rs.100,030/- (One lac thirty only) Dated 21-01-2021
	The proposed proprietary name / brand name	ALBUNORM 20% 50ML
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Human Albumin Albunorm 20% is a solution containing 200g / L of total protein of which at least 96% is human albumin.
	Dosage form of applied drug	Injection
	Pharmacotherapeutic Group of (API)	Blood Product
	Finished product specifications	Ph. Eur. Specifications
	Proposed Pack size	50ml glass Vial
	Proposed unit price	Retail price equivalent to Grifols current prices.
	Shelf Life	36 months
	Storage Conditions	2°C -25°C
	The status in reference regulatory authorities	Available in Germany, France, Belgium, Austria, Switzerland.
	For generic drugs (me-too status)	AlbuRx 20% 50ml of Hakimsons (Reg # 083695)
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per EEC guidelines. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Name, address of drug substance manufacturer	M/s Octapharma Froduktionsgesellschaft Deutschland mbH Wolfgang-Marguerre-Allee 1, 31832 Springe, Germany
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of fractionation process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance derived from human plasma.

	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study 60 months final data are available for the long-term conditions at 5°C ±3°C, 25°C±2°C/60% RH±5% and 30°C±2°C/75% RH±5%. 6 months final data are presented for the accelerated condition at 40°C±2°C/75% RH±5%.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, fractionation process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Analytical method validation/verification of product	Firm has submitted that the data from the product Fractionation process consistently yields drug product that meets the predetermined acceptance criteria for all quality attributes and the in-process tests are suitable to monitor the fractionation process.
	Container closure system of the drug product	50 ml glass Infusion Vial with sealed cap.
	Stability study data of drug product, shelf life and storage conditions	36 months at +2°C to 25°C, **not to be frozen and protected from light.** The stability study report FFH-1104 comprises a total of 12 batches. Stability was investigated under the following storage conditions: • Long term conditions for 60 months at 5°C ±3°C, 25°C±2°C/60% RH±5% and 30°C±2°C/75% RH±5%, • Accelerated conditions for 6 months at 40°C±2°C / 75% RH±5%.
	Module-IV	Albunorm was registered in the European Union as a bibliographic (well established use) application according to Article 10a of Directive 2001/83/EC. According to this regulation results of preclinical and clinical trials have been replaced by references to published scientific literature. For this reason, no complete Module 4 has been included in the dossier for Albunorm. An overview and summary for preclinical and clinical literature data can be found in Module 2 of the dossier.
	Module-V	By definition, when a medicinal product is given intravenously, its bioavailability is 100%, so for plasma-derived products of human origin, that are given intravenously, clinical studies to investigate the products' bioavailability are not requested. This statement is supported by the European Medicines Agency (EMA) - Guideline on Similar

		Biological Medicinal Products, CHMP/437/04, 2005: "The standard generic approach (demonstration of bioequivalence with a reference medicinal product by appropriate bioavailability studies) is normally applied to chemically derived medicinal products. Due to the complexity of biological/biotechnology-derived products the generic approach is scientifically not appropriate for these products."
	Remarks	The firm has not performed any non-clinical or clinical studies. It is evident from public assessment reports of different products approved in RRAs like Australia, Germany that these products were authorized on the basis of well-established use and no new non-clinical or clinical studies were performed.
	Decision: Keeping in view the legalized CoPP indicating product availability in the country of origin, Registration Board approved the product subject to compliance to the current Import Policy for finished drugs.	
2.	Name, address of Applicant / Importer	M/s TIMAX Life Sciences Pvt Ltd., Address: M-1 FL-37, Block-B, Gulshan-e-Jamal, Karachi

5.	Name, address of Applicant / Importer	**M/s Hakimsons (Impex) (Pvt.) Ltd.** Hakimsons Building, 19 West Wharf Road, Karachi 74000, Pakistan.
	Details of Drug Sale License of importer	**License No:** 043 **Address:** Hakimsons Building, 19 West Wharf Road, Karachi 74000, Pakistan. **Address of Godown:** NA **Validity:** 15-09-2023. **Status:** License to sell drugs as distributor
	Name and address of marketing authorization holder (abroad)	CSL Behring AG Wankdorfstrasse 10 3014 Bern Switzerland
	Name, address of manufacturer(s)	CSL Behring AG Wankdorfstrasse 10 3014 Bern Switzerland
	Name of exporting country	Switzerland

	Detail of certificates attached (CoPP, Freesale certificate, GMP certificate)	**CoPP:** Firm has submitted original, legalized **copy** of CoPP certificate (No.20005252) dated 17.11.2020 issued by Swissmedics for AlbuRx 25 (Albumin CSL 25% Solution for Infusion). The CoPP states that the product is **not on free sale in exporting country**.
	Details of letter of authorization / sole agency agreement	Firm has submitted copy of letter of distribution certificate from CSL Behring AG. The letter species that the manufacturer appoints M/s Hakimsons (Impex) (Pvt.) Ltd. to register their products in Pakistan. The authorization letter is valid till 30.06.2023
	Status of the applicant	☐ Manufacturer ☒ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☒ New Drug Product (NDP) ☐ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	For imported products, specify one the these	☒ Finished Pharmaceutical product import ☐ Buk import and local repackaging ☐ Buk import and local repackaging for export purpose only
	Dy. No. and date of submission	08-06-2021
	Details of fee submitted	PKR 100,000/-: 29-04-2021
	The proposed proprietary name / brand name	**AlbuRx™ 25 50ml**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial contains: Human Plasma Protein …….250g/L (of Which ≥ 95% is Human Albumin)
	Pharmaceutical form of applied drug	Human Albumin 25% Solution is filled in type-II vials.
	Pharmacotherapeutic Group of (API)	Blood substitutes and plasma protein fractions (B05AA01)
	Reference to Finished product specifications	Ph. Eur
	Proposed Pack size	**1 vial of 50ml**
	Proposed unit price	66.38 US$- single dose vial
	The status in reference regulatory authorities	Alburx 25% (USFDA Approved)
	For generic drugs (me-too status)	Plasbumin 25 inj. Manufactured by Grifols, USA. Imported by Popular International
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure

		system and stability studies of drug substance.
	Name, address of drug substance manufacturer	CSL Behring AG Wankdorfstrasse 10 3014 Bern Switzerland
	Module-III Drug Substance:	Firm has submitted detailed drug substance data for both sources related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Albumin is isolated from human plasma according to the manufacturing procedure described in section 3.2.S.2.2. The pure albumin is never isolated from the continuous process which leads to human albumin solution. Therefore, no stability summary or conclusions, post – approval stability protocol or stability commitment stability data are available for the drug substance. However, legalized plasma expert report is attached as 1.6.5
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Not Required.
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	USP Type II glass vials
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches The accelerated stability study data is conducted at 40°C ± 2°C for 6 months. The real time stability study data is conducted at 30°C ±2°C the real time stability study data as per ICH guidelines
Remarks of the Evaluator :		
DSL expired. Updated copy of DSL provided. The CoPP states that the product is **not on free sale in exporting country**. However, the firm submitted Certificate of Pharmaceutical product issued by Health Canada indicating product availability in Canada. Additional fee PKR 50,000/- (Slip # 2030578) dated 19-07-2021 is submitted.		
• **Decision: Keeping in view the legalized CoPP indicating product availability in the Reference country (Canada), Registration Board approved the product subject to compliance to the current Import Policy for finished drugs.**		
6.	**Name, address of Applicant / Importer**	**M/s Hakimsons (Impex) (Pvt.) Ltd.** Hakimsons Building, 19 West Wharf Road,

		Karachi 74000, Pakistan.
	Details of Drug Sale License of importer	**License No:** 043 **Address:** Hakimsons Building, 19 West Wharf Road, Karachi 74000, Pakistan. **Address of Godown:** NA **Validity:** 15-09-2023. **Status:** License to sell drugs as distributor
	Name and address of marketing authorization holder (abroad)	CSL Behring AG Wankdorfstrasse 10 3014 Bern Switzerland
	Name, address of manufacturer(s)	CSL Behring AG Wankdorfstrasse 10 3014 Bern Switzerland
	Name of exporting country	Switzerland
	Detail of certificates attached (CoPP, Free sale certificate, GMP certificate)	**CoPP:** Firm has submitted original, legalized **copy** of CoPP certificate (No.20005253) dated 17.11.2020 issued by Swissmedics for AlbuRx 25 (Albumin CSL 25% Solution for Infusion). The CoPP states that the product is **not on free sale in exporting country**.
	Details of letter of authorization / sole agency agreement	Firm has submitted copy of letter of distribution certificate from CSL Behring AG. The letter species that the manufacturer appoints M/s Hakimsons (Impex) (Pvt.) Ltd. to register their products in Pakistan. The authorization letter is valid till 30.06.2023
	Status of the applicant	☐ Manufacturer ☒ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☒ New Drug Product (NDP) ☐ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	For imported products, specify one the these	☒ Finished Pharmaceutical product import ☐ Bulk import and local repackaging ☐ Bulk import and local repackaging for export purpose only
	Dy. No. and date of submission	08-06-2021
	Details of fee submitted	PKR 100,000/-: 29-04-2021
	The proposed proprietary name / brand name	**AlbuRx™ 25 100ml**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial contains: Human Plasma Protein …….250g/L (of Which ≥ 95% is Human Albumin)
	Pharmaceutical form of applied drug	Human Albumin 25% Solution is filled in type-II vials.
	Pharmacotherapeutic Group of (API)	Blood substitutes and plasma protein fractions (B05AA01)
	Reference to Finished product specifications	Ph. Eur specifications

	Proposed Pack size	**1 vial of 100ml**
	Proposed unit price	132.77 US$- single dose vial
	The status in reference regulatory authorities	Alburx 25% (USFDA Approved)
	For generic drugs (me-too status)	Plasbumin 25 inj. Manufactured by Grifols, USA. Imported by Popular International

Deferred case of Nivolunix 40 & 100mg Injection applied by M/s Himmel Pharmaceuticals (Pvt) Ltd Lahore.

The following products of M/s Himmel Pharmaceuticals (pvt) Ltd Lahore was deferred in 324th meeting of Registration Board as per following details.

9.	**Name, address of Applicant / Importer**	**M/s Himmel Pharmaceuticals (Pvt.) Ltd, 793-D, Block 'C', Faisal Town, Lahore-54000, Pakistan**
	Details of Drug Sale License of importer	**License No:** 05-352-0065-0016174D **Address:** 793-D, Block 'C', Faisal Town, Lahore-54000, Pakistan **Address of go-down: N/A** **Validity: 06-02-2022** **Status:** License to sell drugs by way of Distributor
	Name and address of marketing authorization holder (abroad)	M/s Beacon Pharmaceuticals Limited **Plant address**: Kathali Bhaluka Mymensingh **Bangladesh.** **Office Address**: 9/B/2 Toyenbee Circular Road Motijheel, Dhaka 1223 Bangladesh
	Name, address of manufacturer(s)	-do-
	Name of exporting country	Bangladesh
	Detail of certificates attached (CoPP, Free sale certificate, GMP certificate)	**CoPP:** Firm has submitted original legalized COPP (DA/6-110/2016/3355) issued on 4-June-2020 **by** Directorate General of Drug Administration Ministry of Health & Family welfare Government of the people's republic of Bangladesh. The CoPP specifies free sale status of the product in country of origin along with its availability. The CoPP also confirms the GMP status of the firm. (Periodicity of routine inspection:2years)
	Details of letter of authorization / sole agency agreement	Firm has submitted product specific letter of authorization dated 02-06-2020 from Beacon Pharmaceuticals limited. The letter specifies that the manufacturer appoints M/s Himmel Pharmaceuticals Pvt. Ltd. to register & sell their products in Pakistan.

	Status of the applicant	☐ Manufacturer ☒ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	For imported products, specify one the these	☒ Finished Pharmaceutical product import ☐ Buk import and local repackaging ☐ Buk import and local repackaging for export purpose only
	Dy. No. and date of submission	Dy. No32920 Dated 10.12.2020, Dy. No.8733 Dated 05.04.2022, Dy. No.13612 Dated 06.06.2022
	Details of fee submitted	Rs. /- 50000 Dated 19.11.2020
	The proposed proprietary name / brand name	Nivolunix 40 Injection
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each dose contains Nivolumab INN….40mg
	Dosage form of applied drug	Injection
	Pharmacotherapeutic Group of (API)	Antineoplastic agents (Anti-cancer), Monoclonal Antibodies
	Reference to Finished product specifications	In house
	Proposed Pack size	Pack Size: 1's
	Proposed unit price	Retail price As per SRO
	Shelf Life	24 months
	Storage Conditions	2 ^{O}C -8^{O}C
	The status in reference regulatory authorities	OPDIVO (NIVOLUMAB 40mg/4mL single dose vial) | BLA #125554 | BRISTOL MYERS SQUIBB in USFDA
	For generic drugs (me-too status)	Not available in Pakistan
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO. Firm has summarized information related to nomenclature, structure, general properties, manufacturers, description of manufacturing process and controls, Characterization (Elucidation of Structure and Other Characteristics), impurities, specifications, analytical procedures, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Name, address of drug substance manufacturer	Geneway Bio-Technology co., Ltd Address: No. 6 Anmin Road, Huangdai Town, Xiangcheng, Suzhou, Jiangsu China

	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at 25±2°C for 10 days, at 5 ±3 °C for 6months & ≤-30 °C for 12 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Analytical method validation/verification of product	Firm has submitted specification & in-house analytical method along with Analytical method validation studies for the applied product.
	Container closure system of the drug product	Nivolunix 40mg injection is provided in 5mL clear glass vial (USP type-I glass) 20 mm rubber stopper, type -1 and 20 mm Flip off seal with red color top.
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 commercial batches. The accelerated stability study data is conducted at 40° C ± 2° C & 75% ± 5% RH for 6 months. The real time stability study data is conducted at 2 ^{O}C -8^{O}C for 24 months.
	Module-IV	**Pharmacology studies:** The binding of product to human CD279 (programmed cell death 1, PD-1): • Effects on interaction between PD-1 and PD-1 ligands using the PD-1/CHO cell line and biotin-labeled recombinant human PD-L1- Fc and PD-L2-Fc fusion proteins. • Effect on immunoreactivity (on alloantigen-induced T-cell activation, antigen-specific T cell reactivity using Cynomolgus monkeys) • Activity against malignant tumors in mice with malignant melanoma B16F10 cells. • Secondary pharmacodynamics (antibody-dependent cell-mediated cytotoxicity) • Safety pharmacology (Effects on the central nervous system, Effects on the cardiovascular system, Effects on the respiratory system) **Pharmacokinetic studies:** (Analytical procedures-assay, antibody assay, Single-dose administration, Repeated-dose administration) **Toxicology studies:** Single-dose toxicity using cynomolgus monkeys, Repeated-dose toxicity in cynomolgus monkeys, Extended study of pre- and postnatal development in cynomolgus monkeys, Cross-reactivity studies, Four-week repeated intravenous dose toxicity study with ipilimumab coadministration in cynomolgus monkeys) **Note:** The submitted clinical trial data is from bulk manufacture not from the finish product manufacter.

	Module-V	**Phase I study:** • An open-label study to investigate the pharmacokinetics (PK) in 17 patients with advanced solid tumors resistant to conventional therapies. **Phase II study:** An open-label study to investigate the PK and other endpoints in 35 patients. **Phase III study:** A Phase III trial to compare the efficacy & safety of FX02 and Opidivo (Nivolumab) injection in patients with advance NSCLC who had received prior platinum-based chemotherapy. **Note:** The submitted clinical trial data is from bulk manufacture not from the finish product manufacturer.
10.	Name, address of Applicant / Importer	**M/s Himmel Pharmaceuticals (Pvt.) Ltd, 793-D, Block 'C', Faisal Town, Lahore-54000, Pakistan**
	Details of Drug Sale License of importer	License No: 05-352-0065-0016174D Address: 793-D, Block 'C', Faisal Town, Lahore-54000, Pakistan Address of go-down: N/A Validity: 06-02-2022 Status: License to sell drugs by way of Distributor
	Name and address of marketing authorization holder (abroad)	M/s Beacon Pharmaceuticals Limited Plant address: Kathali Bhaluka Mymensingh Bangladesh. Office Address: 9/B/2 Toyenbee Circular Road Motijheel, Dhaka 1223 Bangladesh

	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development,

		manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Analytical method validation/verification of product	Firm has submitted specification & in-house analytical method along with Analytical method validation studies for the applied product.
	Container closure system of the drug product	Nivolunix 40mg injection is provided in 5mL clear glass vial (USP type-I glass) 20 mm rubber stopper, type -1 and 20 mm Flip off seal with red color top.
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 commercial batches. The accelerated stability study data is conducted at 40° C ± 2° C & 75% ± 5% RH for 6 months. The real time stability study data is conducted at 2 OC -8OC for 24 months.
	Module-IV	Pharmacology studies: The binding of product to human CD279 (programmed cell death 1, PD-1): • Effects on interaction between PD-1 and PD-1 ligands using the PD-1/CHO cell line and biotin-labeled recombinant human PD-L1- Fc and PD-L2-Fc fusion proteins. • Effect on immunoreactivity (on alloantigen-induced T-cell activation, antigen-specific T cell reactivity using Cynomolgus monkeys) • Activity against malignant tumors in mice with malignant melanoma B16F10 cells. • Secondary pharmacodynamics (antibody-dependent cell-mediated cytotoxicity) • Safety pharmacology (Effects on the central nervous system, Effects on the cardiovascular system, Effects on the respiratory system) Pharmacokinetic studies: (Analytical procedures-assay, antibody assay, Single-dose administration, Repeated-dose administration) Toxicology studies: Single-dose toxicity using cynomolgus monkeys, Repeated-dose toxicity in cynomolgus monkeys, Extended study of pre- and postnatal development in cynomolgus monkeys, Cross-reactivity studies, Four-week repeated intravenous dose toxicity study with ipilimumab coadministration in cynomolgus monkeys) Note: The submitted clinical trial data is from bulk manufacture not from the finish product manufacter.
	Module-V	Phase I study: • An open-label study to investigate the pharmacokinetics (PK) in 17 patients with advanced solid tumors resistant to conventional therapies. Phase II study: An open-label study to investigate the PK and other endpoints in 35 patients. Phase III study: A Phase III trial to compare the efficacy & safety of FX02 and Opidivo (Nivolumab) injection in patients with advance NSCLC who had received prior platinum-based chemotherapy.

		Note: **The submitted clinical trial data is from bulk manufacture not from the finish product manufacturer.**

Bio-similarity studies:

WHO Bio-similarity guidelines	**Data submitted by the firm**
Quality Comparison Physicochemical characterization	**a) Primary Structure:** i. Amino acid sequence by LC-MS & MS/MS ii. N-terminal sequence by LC-MS. iii. C-terminal lysine by LC-MS. iv. N-glycosylation site by Liquid Chromatography with tandem mass spectrometry (LC-MS-MS) **b) Secondary Structure & high order Structure** i. Intact mass by LC-MS ii. Disulfide bond by LC-MS iii. Free thiol (Ellman's) iv. Circular Dichroism (Secondary Structure) by Far spectrogram. v. Thermostability by differential fluorimetry (DSF) **c) Heterogenicity** i. Glycan by LC-MS ii. Heterogenicity of glycosylation by FLD-HPLC iii. Isoelectric point by CIEF iv. Charge variant (CEX-HPLC
Biological Activity	Biological activity by: • PD-I binding activity by ELISA
Impurities	• Purity by SEC-HPLC • Purity by CE-SDS • Protein A by ELISA • DNA residual by qPCR • Host cell protein by ELISA
Stability Studies	Stability studies are provided.
Non-clinical Studies	Primary pharmacodynamics by: • Binding to PD-I • Inhibitory effect against binding of PD-I to PD-L1 or PD-L2 • One month repeated doses toxicity study in monkeys • Six months repeated doses toxicity study in monkeys
Clinical Studies	Comparative clinical study has not been submitted.

Evaluation by BE&R:

Sr. No.	**Decision of 324th meeting**	**Response by the firm**
1.	Regulatory status of products in various countries where the bulk of the product is exported.	The Firm has submitted the registration certificate of the product Nivolunix 40 Injection manufactured by M/s Beacon Medicare Limited Bangladesh.
2.	Publication of clinical trial in any peer reviewed journal.	Not submitted
3.	Data of Periodic Safety Updated report of applied formulation marketed in Bangladesh.	**Not submitted**

Decision: Registration Board deferred the cases for the following clarification /data/information:

- **Regulatory status of products in various countries where the bulk of the product is exported.**
- **Publication of clinical trial in any peer reviewed journal.**
- **Data of Periodic Safety Updated report of applied formulation marketed in Bangladesh.**

• **Differential fee of Rs. 100,000 /- for each product.**		
11.	**Name, address of Applicant / Importer**	M/s Himmel Pharmaceuticals (Pvt.) Ltd. 793-D, Block ‘’C’’, Faisal Town Lahore.

	Name, address of manufacturer(s)	M/s BEACON Pharmaceuticals Limited Plant address: Kathali ,Bhaluka, Mymensingh Bangladesh Office address: 9/B/2, Toynbee Circular Road, Motijheel Dhaka, Bangladesh
	Name of exporting country	Bangladesh
	Detail of certificates attached (CoPP, Free sale certificate, GMP certificate)	**CoPP:** Original legalized COPP (Certificate# DA/6-110/2016/3353 issued on 04-06-2020 by Government of the people’s republic of Bangladesh, Ministry of Health & Family welfare, Directorate General of Drug Administration, Oushad Bhaban, Mohkhali Dhaka-1212, Bangladesh. **GMP:** Firm has submitted Legalized GMP certificate (Certificate No. DA/6-110/06/10002) issued by M/s Beacon Pharmaceuticals limited. Also Renewal certificate is submitted (Certificate No. DA/6-110/06/4950).
	Details of letter of authorization / sole agency agreement	Firm has submitted copy of letter of distribution certificate from Beacon Pharmaceuticals limited. The letter specifies that the manufacturer appoints M/s Himmel Pharmaceuticals Pvt. Ltd. to register their products in Pakistan. The authorization letter is valid till June, 2025.
	Status of the applicant	☐ Manufacturer ☒ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☒ New Drug Product (NDP) ☐ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	For imported products, specify one the these	☒ Finished Pharmaceutical product import ☐ Buk import and local repackaging ☐ Buk import and local repackaging for export purpose only
	Dy. No. and date of submission	Dy. No32920 Dated 10.12.2020

		Dy. No.8733 Dated 05.04.2022, Dy. No 1531 Dated 17.01.2023
	Details of fee submitted	PKR: 50,030/- Date: 10-12-2021
	The proposed proprietary name / brand name	Pembroxim Injection 100mg
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each 4 ml contains Pembrolizumab INN….100mg
	Pharmaceutical form of applied drug	Injection
	Pharmacotherapeutic Group of (API)	Anti-cancer
	Reference to Finished product specifications	In house
	Proposed Pack size	1 s
	Proposed unit price	As per current pricing policy of DRAP
	The status in reference regulatory authorities	Keytruda 100mg
	For generic drugs (me-too status)	NA
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Name, address of drug substance manufacturer	Geneway Bio-Technology co., Ltd Address: No. 6 Anmin Road, Huangdai Town, Xiangcheng, Suzhou, Jiangsu China
	Module-III Drug Substance:	Firm has submitted detailed drug substance data for both sources related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted long term stability study data of 3 batches of drug substance at 25°C ± 2°C / 60 ± 5% RH for 12 months. The accelerated stability data is conducted at 40°C ± 2°C / 75 ± 5% RH for 6 months
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials,

		container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Comparative analysis Studies against the reference product Keytruda (Merck sharp & Dohme, B.V Netherlands) has been submitted
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	Type 1 Glass Vial
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches. Accelerated stability studies have been conducted at 40ºC±2ºC and 75%±5% RH for 6 months. Real time stability studies conducted at 2 ºC -8 ºC and 65% ± 5% for 24 months

Bio-similarity studies:

WHO Bio-similarity guidelines	**Data submitted by the firm**
Quality Comparison **Physicochemical characterization**	**a) Primary Structure:** i. Amino acid sequence by LC-MS & MS/MS ii. N-terminal sequence by LC-MS. iii. C-terminal lysine by LC-MS. iv. N-glycosylation site by Liquid Chromatography with tandem mass spectrometry (LC-MS-MS) **b) Secondary Structure & high order Structure** i. Intact mass by LC-MS ii. Disulfide bond by LC-MS iii. Free thiol (Ellman's) iv. Circular Dichroism (Secondary Structure) by Far spectrogram. v. Thermostability by differential fluorimetry (DSF) **c) Heterogenicity** i. Glycan by LC-MS ii. Heterogenicity of glycosylation by FLD-HPLC iii. Isoelectric point by CIEF iv. Charge variant (CEX-HPLC
Biological Activity	Biological activity by: • PD-I binding activity by ELISA
Impurities	• Purity by SEC-HPLC • Purity by CE-SDS • Protein A by ELISA • DNA residual by qPCR • Host cell protein by ELISA
Stability Studies	Stability studies are provided.
Non-clinical Studies	Primary pharmacodynamics by: • Binding to PD-I • Inhibitory effect against binding of PD-I to PD-L1 or PD-L2 • One month repeated doses toxicity study in monkeys • Six months repeated doses toxicity study in monkeys
Clinical Studies	Comparative clinical study has not been submitted.

Evaluation by BE&R

Sr. No.	Decision of 324th meeting	Response by the firm
1.	Regulatory status of products in various countries where the bulk of the product is exported.	The Firm has submitted the registration certificate of the product Pembroxim Injection manufactured by M/s Beacon Medicare Limited Bangladesh.
2.	Publication of clinical trial in any peer reviewed journal.	The Firm has submitted following case report published in SciTechnol Journal: *Improved Survival Outcome with Flat Dosing Pembrolizumab (Pembroxim®) in Late-Stage Non-Small Cell Lung Cancer-* However, the study was without conclusive remarks in improving the patient quality of life.
3.	Data of Periodic Safety Updated report of applied formulation marketed in Bangladesh.	The periodic safety report of the product is submitted by the firm with conclusion as under: **"***Though the overall risk-benefit ratio of treatment with Beacon's Pembroxim remains unchanged, changes to the SPC for the product are recommended in order to bring the same in line with the SPC for the innovator. The overall risk-benefit balance for the product remains acceptable*.**"**

Decision: Registration Board deferred the cases for the following clarification /data/information:

- **Regulatory status of products in various countries where the bulk of the product is exported.**
- **Publication of clinical trial in any peer reviewed journal.**
- **Data of Periodic Safety Updated report of applied formulation marketed in Bangladesh.**
- **Differential fee of Rs. 100,000 /- for the applied product.**

Cases of DD-III (Ms. Haleema Sharif)

12.	**Name and address of Importer**	**M/s. Mustafa Brothers 186-D Peoples Colony No. 1, Faisalabad**
	Detail of DSL	M/s. Mustafa Brothers PT-186-D Peoples Colony No. 1, Faisalabad. Valid Up to 21.06.2027
	Name and address of Manufacturer	M/s. Vira vaccine Shaya Co., Sepher Industrial district, Nazarabad, Alborz province, Iran
	Name of exporting country	Iran
	Brand Name +Dosage Form + Strength	Vira- Peste®
	Diary No. Date of R& I & fee	Dy. No. 32428 R&I Dated 29-11-2021 Rs. 75,000/- (Slip No. 557604810169) Firm has submitted fee challan of differential fee of Rupee 75000/- Slip No. (13860179271).
	Composition	Each dose contains:

		Lyophilized dried suspension containing "peste des petitis ruminants (PPR) virus Nigerian 75/I" strain ….$10^{2.5}$ $TCID_{50.}$ Diluent(Solvent): 0.9% sterile isotonic sodium chloride solution (saline solution)
	Pharmacological Group	Viral Vaccine
	Type of Form	Form-5A
	Finished Product Specification	Manufacturer's specifications
	Shelf Life	2 years (2^0C-8^0C)
	Document Details	• Free sale certificate (No.30/96352) dated December, 2022 issued by Ministry Of Agriculture Veterinary Organization is submitted by the firm. • Original Legalized product specific translated distribution agreement is submitted by the firm. • GMP Certificate No.(1400/6378) dated 24/05/2021 Iran veterinary organization Albroz Veterinary Department General valid for one year.
	Pack size	100doses/vial Diluent:100ml
	Reference Regulatory Authority Availability	Not provided
	Products already registered in Pakistan	PESTVAC K by Huzaifa International Live freeze-dried vaccine Each 1ml dose of lyophilized vaccine contains: Freeze dried Modified Peste Des Petits Ruminant virus strain Nig 75/1 not less than $10^{2.5}$ TCID/50 Diluent Diluent for Pestvac K Each 1L contains: NaCl.....8.0g KCl.....0.2g Na2HPO4.....1.15g KH2PO4.....0.2g Distilled water.....upto 1000mL
	Remarks of Evaluator	i. Analytical method for analysis of product is required. ii. Stability data of the product on all parameters as mentioned in finished product specifications is required as submitted data only virus titter and moisture content is determined.
	Decision: Registration Board deferred the case for the following: **i. Submit analytical method for test/analysis of applied product.** **ii. Stability data of the product on all parameters as mentioned in finished product specifications is required as in submitted data only virus titter and moisture content is determined.**	
13.	**Name and address of Importer**	**M/s. Mustafa Brothers** **186-D Peoples Colony No. 1, Faisalabad**
	Detail of DSL	M/s. Mustafa Brothers

		PT-186-D Peoples Colony No. 1, Faisalabad. Valid Up to 21.06.2027
	Name and address of Manufacturer	M/s. Vira vaccine Shaya Co., Sepher Industrial district, Nazarabad, Alborz province, Iran
	Name of exporting country	Iran
	Brand Name +Dosage Form + Strength	Vira- Etyvax®
	Diary No. Date of R& I & fee	Dy. No. 32429 R&I Dated 29-11-2021 Rs. 75,000/- (Slip No. 16918330679) Firm has submitted fee challan of differential fee of Rupee 75000/- Slip No. (16918330679).
	Composition	Each dose contains: Live attenuated Ecthyma virus …. > $10^{4.5}$ $TCID_{50.}$ Diluent(Solvent): Sodium chloride…. 0.9%.
	Pharmacological Group	Biological product
	Type of Form	Form-5A
	Finished Product Specification	Manufacturer's specifications
	Shelf Life	2 years (2^0C-8^0C)
	Document Details	• Free sale certificate (No. 1401/33728) dated January 18, 2023 valid till 06.01.2025 issued by Veterinary organization of the country Albroz General Veterinary Department is submitted by the firm. • Original Legalized product specific translated distribution agreement is submitted by the firm.
	Pack size	50doses/vial, Diluent:50ml
	Reference Regulatory Authority Availability	Approved in USDA (Ovine Ecthyma Vaccine)
	Products already registered in Pakistan	Not available
	Remarks of Evaluator	iii. Analytical method for analysis of product is required. iv. Stability data of the product on all parameters as mentioned in finished product specifications is required as submitted data only virus titter and moisture content is determined.
	Decision: Registration Board deferred the case for the following: **i. Submit analytical method for test/analysis of applied product.** **ii. Stability data of the product on all parameters as mentioned in finished product specifications is required as in submitted data only virus titter and moisture content is determined.**	

E. Miscellaneous/ Deferred Cases

Imported Human Biological i.e. Abrilada 20mg/0.4mL applied by M/s Pfizer Pakistan Limited, Karachi deferred in 324th meeting of Registration Board.

Following product of M/s Pfizer Pakistan Limited Karachi deferred in 324th meeting of Registration Board as per following details:

14.	**Name, address of Applicant / Importer**	**M/s Pfizer Pakistan Limited,** **12 Dockard Road West Wharf Karachi.**
	Details of Drug Sale License of importer	**License No:** 029 **Address:** 12 Dockard Road West Wharf Karachi. **Validity: 25-02-2023** Status: License to sell drugs by way of Whole sale.
	Name and address of marketing authorization holder (abroad)	M/s Pfizer Canada ULC, 17300 Trans-Canada Highway Kirkland, QC Canada, H9J 2M5.
	Name, address of manufacturer(s)	M/s Catalent Indiana, LLC 1300 South Patterson Drive Bloomington, Indiana (IN) 47403, USA
	Name of exporting country	Canada
	Detail of certificates attached (CoPP, Freesale certificate, GMP certificate)	• Firm has submitted original, legalized CoPP (No. 78703) dated 21-12-2021 issued by Health Canada. The CoPP specifies that the product is licensed for sale in country of origin but actually not available.
	Details of letter of authorization / sole agency agreement	Firm has submitted notarized copy of Letter of product specific authorization from Manager Regulatory Affairs Canada of *M/s Pfizer Canada ULC, Canada*. According to the letter, the firm *M/s Pfizer Canada ULC, Canada* authorizes "Pfizer Pakistan Limited" to be Market Authorization Holder in Pakistan and to be responsible for all matters pertaining to the regulation of this product in Pakistan. The letter was issued on 25-02-2022.
	Status of the applicant	□ Manufacturer ☒ Importer □ Is involved in none of the above (contract giver)
	Status of application	□ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	Domestic and Export sales
	For imported products, specify one the these	☒ Finished Pharmaceutical product import □ Buk import and local repackaging □ Buk import and local repackaging for export purpose only
	Dy. No. and date of submission	Dy. No. 766 (R&I) Dated 16-05-2022
	Details of fee submitted	PKR 150,000/-: 25-03-2022
	The proposed proprietary name / brand name	Abrilada 20mg/0.4mL

	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each PFS (0.4mL) contains: Adalimumab ……20mg
	Dosage form of applied drug	Solution for Injection in Pre-filled Syringe
	Pharmacotherapeutic Group of (API)	TNF Blocker
	Reference to Finished product specifications	As per Innovator.
	Proposed Pack size	1's PFS
	Proposed unit price	Not Provided.
	Shelf Life	36 months
	Storage Conditions	0 0 2 C-8 C
	The status in reference regulatory authorities	HUMIRA® (adalimumab) injection 20 mg/0.4 mL in a singleuse prefilled glass syringe.
	For generic drugs (me-too status)	The product in **40mg/0.8ml PFS** is already approved by the RB & under process for price fixation.
	Module-II (Quality Overall Summary)	Firm has submitted QOS on WHO Template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product. The firm has also submitted the non-clinical and clinical overviews and summaries.
	Name, address of drug substance manufacturer	M/s Wyeth BioPharma Division of Wyeth Pharmaceuticals LLC. One Burtt Road, Andover, MA 01810, USA
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 7 batches of Drug Substance at accelerated and real time conditions. The real time stability data conducted at -20°C±5°C is for 60 months for 4 batches and for 36 months for 03 batches. The accelerated stability data conducted at 5°C±3°C is

		for 6 months for 4 batches and for 9 months for 03 batches.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Analytical method validation/verification of product	Firm has submitted that Validation of test methods performed to ensure the quality, identity, potency, purity, and safety of PF06410293 drug product have been performed. The suitability of methods for their intended use was performed by assessment of all relevant validation elements described in International Conference on Harmonization (ICH) Guidelines on Validation of Analytical Procedures: Text and Methodology Q2 and the current USP <1225> Validation of Compendial Methods.
	Container closure system of the drug product	• 1 mL BD Hypak Type I Borosilicate glass with 29 gauge, ½ inch, thin-walled stainless steel staked needle, and
		thermoplastic elastomer (TPE) elastomeric needle shield that is not manufactured from natural rubber (latex) within a nonproduct contact rigid polypropylene cover. • 1mL West Pharmaceutical chlorobutyl elastomeric closure Plunger stopper
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 process validation batches. The accelerated stability study data is conducted at 30 ± 2^0C /60±5%RH for 6 months. The real time stability study data is conducted at 5 ± 3^0C for 36 months. The batches are not stable at accelerated conditions.
	Module-IV Non-Clinical	Summarized in Biosimilarity data.
	Module-V Clinical	Summarized in Biosimilarity data.

Bio similarity data as per WHO guidelines submitted by the firm is as follows:

WHO Biosimilarity Guidelines	**Data Submitted by the firm**

Quality Comparison • Physicochemical Characterization	• Primary Structure and Posttranslational Modifications a. Establishment and Verification of Adalimumab Amino Acid Sequence b. Characterization of Molecular Mass, Primary Structure and Posttranslational Modifications c. HILIC/MS - N-Linked Glycan Mapping d. N-LINKED GLYCAN STRUCTURE - SIALIC ACID ANALYSIS • Charge Heterogeneity a. Heightened Characterization of Charge Isoforms b. LC/MS Characterization of Charge Isoforms c. Characterization by Carboxypeptidase B Treatment d. Biological Activity of Charge Isoforms • **Disulfide Bonds** a. Characterization of Disulfide Bonds b. Sulfhydryl Analysis • **Higher order structure** a. Secondary Structure Characterization – Far-UV CD Spectroscopy b. Secondary Structure Characterization – FTIR Spectroscopy c. Tertiary Structure by Near-UV CD Spectroscopy d. Tertiary Structure Characterization – Intrinsic Fluorescence Emission Spectroscopy e. Thermal Stability Characterization – DSC f. Higher Order Structure - X-ray crystallography
Biological Activity & Immunochemical properties	• **Functional Characterization of the Fc domain** i. Characterization of Antibody-Dependent Cellular Cytotoxicity (ADCC) Function a. Primary NK Cell ADCC Assay

	b. PBMC ADCC Assay (FcγRIIIa 158 V/F donor genotype) c. PBMC ADCC Assay (Fc RIIIa 158 F/F donor genotype) d. FcγRIIIa Reporter Gene Assay (FcγRIIIa RGA) e. Binding to FcγRIIIa by SPR Analysis ii. Characterization of Complement Dependent Cytotoxicity (CDC) Function a. CDC Assay b. C1q Binding ELISA c. CDC Effector Function Conclusion d. Mixed Lymphocyte Reaction (MLR) Assay e. Additional Fcγ Receptor Binding SPR Assays f. FcRn Binding SPR Assay • **Functional Characterization of the Fab Domain** i. Functional Assays Demonstrating Blockade of sTNF a. Inhibition of Apoptosis Assay b. Inhibition of ELAM-1 Expression Assay c. Binding to sTNF Target Antigen by ELISA ii. Functional Assays Demonstrating mTNF Binding Activity a. Binding to mTNF Target Antigen on NS0 Cells b. Reverse Signaling iii. Lymphotoxin alpha (LT-a) Binding Activity
Impurities	• Product Purity a. HMMS and Monomer – Size Exclusion HPLC b. Fragments and Heavy Chain + Light Chain - Capillary Gel Electrophoresis (Reducing) c. Intact IgG - Capillary Gel Electrophoresis (NonReducing)
Stability Studies	**Forced Degradation** Confirmation of similar degradation profiles forced degradation conditions of Elevated temperature, Light exposure, Forced deamidation and Forced oxidation with peracetic acid.
Non-clinical Comparison	**Primary Pharmacodynamic Studies** Already recorded in Biological Activity **Pharmacokinetic Studies** a. Quantitation of PF-06410293 and Adalimumab-EU in Cynomolgus Monkey Serum. b. Detection of Anti-PF-06410293 and AdalimumabEU Antibodies in Cynomolgus Monkey Serum. c. Repeat-Dose Toxicokinetics
Clinical Comparison	i. A double-blind (Sponsor-open), randomized (1:1:1), parallel-group, 3-arm, single-dose, PK similarity study of PF-06410293 and adalimumab sourced from the US and EU administered SC in the lower abdomen by a PFS to healthy adult. ii. A double-blind (Sponsor-open), randomized (1:1:1), parallel-group, 3-arm, single-dose, definitive PK similarity study of PF-06410293 and adalimumab sourced from the US and EU administered SC in the lower abdomen by a PFS to healthy adult subjects.

	iii. An open-label, randomized (1:1), parallel-group, 2-arm, single-dose PK comparability study to assess the PK of PF-06410293 following SC administration in the lower abdomen or upper anterior thigh (alternative assignment in each device weight group) using a PFS or a PFP in healthy adult subjects iv. A multi-national, 2-arm, randomised (1:1), double-blind, parallel-group study designed to evaluate the safety, efficacy, population PK, and immunogenicity of PF06410293 versus adalimumab-EU administered SC in the abdomen or thigh by a PFS, both in combination with methotrexate (MTX) to treat subjects with moderately to severely active RA who had an inadequate response to MTX therapy.
Remarks: The CoPP submitted by the firm indicates that the product is licensed but not available in country of origin. The firm has submitted that Pfizer is currently preparing to launch **Abrilada** 20mg PFS in Canada & they will submit a marketed CoPP to DRAP as soon as possible following the launch in Canada. The firm has also submitted the **Abrilada** 20mg PFS product has not yet been launched in any country.	
Previous Decision in 324th RB meeting: ***Registration Board deferred the case for submission of valid legalized CoPP / Free Sale Certificate from country of origin or any other reference regulatory authority wherein the product marketed/on free sale.***	
Evaluation by DBE&R: Now the firm has submitted valid legalized COPP (No. 82024) valid for one year from the date of issue i.e. 13.03.2023 indicating that product is freely available in Canada.	
Decision: Keeping in view the legalized CoPP indicating product availability in the country of origin, Registration Board approved the product subject to compliance to the current Import Policy for finished drugs.	

Imported Human Biological i.e. AdimFlu-S (QIV) applied by M/s ASTO Life Sciences Private Limited. Lahore deferred in 316th meeting of Registration Board.

Following product of M/s ASTO Life Sciences Private Limited. Lahore deferred in 316th meeting of Registration Board as per following details:

15.	**Name and address of Importer**	**M/s ASTO Life Sciences Private Limited.** Plaza No. 1, Block Orchard No.1 Paragon City, Barki Road, Dist. Lahore.
	Detail of DSL	Drug Sale License as a distributor No. 05-352-0068-045428D valid upto 21-09-2021
	Name and address of Manufacturer	**Product License Holder & Manufacturer:** M/s Adimmune corporation, No. 3 Section 1, Tanxing Road, Tanzi District,Taichung city 42743 Taiwan.
	Brand Name +Dosage Form + Strength	AdimFlu-S (QIV) Quadrivalent Influenza Vaccine
	Diary No. Date of R& I & fee	Dy. No. 31262 Dated 24-11-2020 (Rs. 100,000/- Dated 24-11-2020)
	Composition	Each 0.5ml PFS contains: Hemagglutinin of Influenza A Virus (H1N1) ..... 15µg HA Hemagglutinin of Influenza A Virus (H3N2) ..... 15µg HA Hemagglutinin of Influenza B Virus (Yamagata lineage) ..... 15µg HA Hemagglutinin of Influenza B Virus (Victoria lineage) 15µg HA
	Pharmacological Group	Human Influenza Vaccine
	Type of Form	Form-5F

	Finished Product Specification	EUR. Ph. JP and CP
	Shelf Life	24 months (2^0C-8^0C)
	Document Details	i. CoPP No. 080558 dated 13-10-2020 (Notarized but not legalized)ii.GMP valid till 5-9-2021(Notarized but not legalized) ii. Copy of Sole Agency Agreement
	Pack size/ Price	1's PFS/ As per SRO.
	International Availability	Vaxigrip Tetra of M/s Sanofi Pastures France
	Products already registered in Pakistan	Vaxigrip Tetra of M/s Sanofi Aventis Pakistan Ltd.
	Initial Remarks of Evaluator (Khurram Khalid)	i. Notarized copy of Sole Agency/ Market Authorization certificate. ii. CoPP and GMP certificates are not legalized. iii. In stability data, following tests have not been performed in long termstability data; a. Fractionation test b. Test for freedom from Ether c. Test for freedom from abnormal toxicity d. Identity test e. Overall albumin content test. While accelerated studies of only one batch has been provided. iv. Clinical Trial Data a. Phase II: A Phase II, One arm, Single dose, Open label, Single center study, in120 subjects b. Phase III: As Phase III, Single Dose, Randomized Double blind, Multiple-centerStudy. in 710 subjects. c. Phase III: Open label, Multiple-center Study, 174 subjects.
	Decision of Registration Board (297th meeting) Registration Board deferred the product for submission of following by the firm: a. Valid legalized Certificate of Pharmaceutical Product (CoPP) OR valid legalized GMP Certificate & valid legalized Free Sale Certificate. b. Original or Notarized copy of sole Agency Authorization. c. Pharmacopoieal monograph of the product. d. Clarification regarding not performing Fractionation test, Test for freedom from Ether, Test for freedom from abnormal toxicity, Identity test, Overall albumin content test in stability data. e. Accelerated stability data of three batches.	

Evaluation by DBE&R for 308th Reg. Board meeting

It is submitted that It is submitted that in context to the decision of Reg. Board the firm replied on 08-06-2021. The case was evaluated and is summarized as under;

Document required as per decision of RB	***Response submitted by the firm***	***Remarks of Evaluator***
Valid legalized Certificate of Pharmaceutic8al Product (CoPP) OR valid legalized GMP Certificate & valid legalized Free Sale Certificate.	Manufacturer, has submitted that CoPP and GMP were notarized and legalized from notary public and ministry of foreign affairs of Taiwan.	The firm has not submitted any document regarding the legalization by the Pakistan embassy.
Original or Notarized copy of Sole Agency Authorization.	Provided	Provided

Pharmacopoieal monograph of the product.	The firm has submitted that they follow Chinese Pharmacopoeia in Taiwan which is the same as European Pharmacopeia. However, pH Value, Test for freedom from ether and Formaldehyde complies with JPXVII Influenza HA vaccine. Furthermore, all other have been referred to European Pharmacopoeia for which the firm has also submitted the monograph. The firm has also submitted the Japanese monograph which is not for the applied product.	No single Pharmacopeia is being followed. The reason for following two different standard pharmacopeias is not mentioned.
Clarification regarding not performing Fractionation test, Test for freedom from Ether, Test for freedom from abnormal toxicity, Identity test, Overall albumin content test in stability data.	These are the parameters that do not decrease and increase over time. All the results complied with specifications; therefore, they were only tested at release.	The firm has provided following tests in stability data; 1. Appearance 2. pH Value 3. Potency test 4. Sterility test 5. Bacterial endotoxin.
Accelerated stability data of three batches.	We only have one batch for accelerated stability data. Generally, we do not have accelerated stability as regular items, which also do not necessary in Taiwan, so we do not have the accelerated stability data for three batches.	Accelerated stability data of three batches is not available.

The firm was asked to provide following documents through letter dated 15th June 2021:

1. The CoPP is not legalized by Embassy of Pakistan.
2. Regarding specifications
   a. A comparative summary of specifications of Chinese and European Pharmacopeia in tabulated form to assess similarity.
   b. Why two different standard pharmacopeias are being followed i.e. Japanese & European Pharmacopeia for different tests.
   c. The provided Japanese Pharmacopeia monograph is not for the applied product.
3. Any documental evidence that accelerated stability data of only one batch is required.

The complete response by the firm is pending and the firm has only responded to query raised at Sr. No.1. The firm has submitted that there is no embassy of Pakistan in Taiwan, hence the documents are only legalized and Notarized by the Notary Public.

Decision of Reg. Board in its 308th Meeting

"Registration Board deferred the products for submission of following by the firm:
a. Tabulated comparison of finished product specifications with pharmacopoeia monograph.
b. Accelerated stability data of three batches for 06 months."

Evaluation by DBE&R for 313th Reg. Board meeting

The firm has submitted the following:

a. Tabulated comparison of finished product specifications with pharmacopoeia monograph indicating that the product complies with Ph. Eur. Specifications.
b. The firm has submitted accelerated stability data of 3 months for 1 batch and 02 months for 02 batches and informed that they don't have 6 months data.

Decision of Reg. Board in its 313th Meeting:

The case was deferred in 313th meeting of Registration Board as per following details:
Registration Board deferred the case in its 313th meeting for following:

i. *Confirmation from Ministry of Commerce regarding Trade of vaccines from Taiwan.*
ii. *Submission of valid CoPP legalized from Embassy of Pakistan by the firm.*
iii. *Submission of 6 months accelerated stability data of 03 batches by the firm.*

Evaluation by DBE&R for 316th Reg. Board meeting

In this context, it is submitted that in response following letter has been received from Ministry of Commerce:

3. According to Policy Guidelines on Taiwan, there are no restrictions on trade with Taiwan subject to the following conditions:

- Trade is conducted strictly on un-official basis and through private sector only.
- No direct contacts to be made with the Taiwan authority agencies.
- No Pakistan government functionary can visit Taiwan.
- No Taiwan authority functionary can visit Pakistan.
- Government/official investment from Taiwan is not allowed into Pakistan.
- Exchange of delegation(s) is not allowed.
- Holding of trade exhibitions, establishment of display is not allowed.
- No publicity is given to Pakistan's trade or commercial contacts with Taiwan.
- Private businessmen can, technically, interact with Taiwan parties.
- No Pakistan government functionary can visit Taiwan.

Moreover, the firm has not yet submitted any response.

Decision of Reg. Board in its 316th Meeting:

Keeping in view response from M/o commerce, Registration Board referred the case to DRAPAuthority for seeking guidance whether to proceed with grant of registration of finished drugproduct from Taiwan or otherwise.

Evaluation by DBE&R for 328th Reg. Board meeting:

A. *The Authority, after detailed deliberations and discussions decided as under:*

1. *Approved following guidelines regarding import of therapeutic goods from Taiwan:*

i. *The consignments of raw materials imported from Taiwan will be cleared by the DRAP Field offices subject to fulfilment of requisite codal formalities.*
ii. *Registration/Enlistment of finished therapeutic goods from Taiwan will be granted, subject to fulfilment of conditions of registration/enlistment, except those requiring mandatory inspections by government functionaries (through physical presence).*

2. *The decision of the Authority will be shared with MOFA / Ministry of Commerce for their input and advice to further refine / modify or change if required under the prevailing policy dealing with Taiwan for private business activity.*

B. *Firm has submitted 6 months accelerated stability data of 03 batches however SRD value (potency) is not within specification limits i.e.12µg HA/0.5ml dose from 2 months to onward in accelerated stability studies.*

C. *Firm has not yet submitted valid CoPP legalized from Embassy of Pakistan for which the firm has already submitted in their reply that Embassy of Pakistan does not exist in Taiwan.*

Decision: Registration Board deferred the case for submission of legalized CPP either attested from the embassy of Pakistan in China or by Ministry of foreign Affairs of Taiwan or any web link to verify the approval of subject product in any reference regulatory authority.
The Board further directed the division of BE&R to present the case in the next RB meeting after confirming/verifying the submitted document from the official website of Ministry of foreign Affairs Taiwan.

Locally Manufactured Human Biological i.e. Heparin Injection applied by M/s Macter International Limited deferred in 323rd meeting of Registration Board.

Following product of M/s Macter International Limited. Karachi was deferred in 323rd meeting of Registration Board as per following details:

16.	**Name of Manufacturer**	**M/s Macter International Limited.** **F- 216, S.I.T.E, Karachi 75700, Pakistan.**
	DML and last GMP details	DML No. 000141 Address: F- 216, S.I.T.E, Karachi 75700, Pakistan. **Evidence of section:** Liquid and Lyophilized recombinant DNA technology products (biological) section dated 19th July, 2012 GMP: Last GMP conducted on 13-08-2020 valid up to 12-08-2022
	Bulk Manufacturer	Hubei Enoray Biopharmaceutical Co.,Ltd. No.108, Yanjiang Road, Xiaochi Town, Huangemei County, Hubei Province, China. (Formulation (**dilution), filling, testing & packing**)
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	For imported products, specify one the these	☐ Finished Pharmaceutical product import ☒ Buk import and local repackaging ☐ Buk import and local repackaging for export purpose only
	Dy. No. and date of submission	Form 5 Dy.No.30665 dated 09-11-2021. Fee Submitted: Rs.30,000/- dated 20-10-2021.
	Details of fee submitted	Rs: 30,000/- dated: 20-10-2022
	Brand Name + Dosage Form + Strength	Inhixa Solution for Injection
	Composition	One ml of solution for injection contains 5000 IU of heparin sodium. While 1 vial (5 ml) contains 25000 IU of heparin sodium.
	Dosage form of applied drug	Injection

	Pharmacotherapeutic Group of (API)	Anticoagulants
	Reference to Finished product specifications	B.P
	Proposed Pack size Proposed unit price	1's, 2's, 5's, 10's & 25's vialAs per DPC/
	Shelf Life	24 Months
	Storage Conditions	(Store below 25^0C)
	The status in reference regulatory authorities	Heparin Sodium Injection, USP FDA Approved
	For generic drugs (me-too status)	Brand Name: Heparin Injection 25000 IU/ 5ml, 1's Pack Importer Name: M/s Leo/ Zam Zam Pharma
	Module-II (Quality Overall Summary	Firm has submitted QOS as per WHO. Firm has summarized information related to nomenclature, structure, general properties, manufacturers, description of manufacturing process and controls, Characterization (Elucidation of Structure and Other Characteristics), impurities, specifications, analytical procedures, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubility, physical form, manufacturers description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis an justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches at long term conditions at 25 ℃ RH 60%±10% for 48months. The accelerated stability data is conducted at 40℃ ± 2 ℃ /60% ± 5%RH for 06 months for accelerated conditions.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.

	Analytical method validation/verification of product	Firm has submitted the details of analytical method validation.
	Container closure system of the drug product	USP Type-I glass vial (5mL),13mm slit less butyl grey stopper 133 mm Flip off aluminum caps
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches (two pilot scale & one lab scale) at long term conditions at 25 ℃ RH 60%±10% for 06 months. The accelerated stability data is conducted at 40℃ ± 2 ℃ /75% ± 5%RH for 06 months for accelerated conditions.

Decision of 320th meeting of RB:
"Registration Board referred the case to Licensing Division for confirmation of manufacturing section for production of Heparin Sodium".

The case was processed to Licensing division for the section requirement of local manufacturing non-rDNA Biological Drugs (i.e. Heparin) whether such products can be manufactured in rDNA Biological section as per current rules/regulation/practice of licensing division or not?

The Licensing division has conveyed the following comments:
"The Central Licensing Board approved **Liquid and Lyophilized recombinant DNA Technology** products (Biological) section in its 229th meeting held on 13-06-2021 under Drugs Act 1976 and rule framed thereunder. However, it is pertinent to mention that matter regarding conditions/requirement for manufacturing and registration of drugs does not come under the purview of Licensing Division, DRAP".

Decision: Registration Board deferred the case for following:

- *Submission of section wise products details of M/s Macter International Limited Karachi.*
- *Submission of pharmaceutical equivalence (Quality comparison) of the product.*

Evaluation by DBE&R:
Now the firm has following:
a. Product list of M/s Macter International Limited for biological section:

S.no	Reg.#	Product name	Strength	Dosage	Generic	Drug class
1.	091268	Momentum	25mg/mL	Lyophilized powder for injection	Etanercept	Immunosuppressant (tumor necrosis factor receptor)
2.	092610	Epocan	2000 IU	Solution for Injection	Recombinant Human erythropoietin Alfa	Hematopoietic agent
3.	092611	Epocan	4000 IU	Solution for Injection	Recombinant Human erythropoietin Alfa	Hematopoietic agent
4.	092612	Epocan	10,000 IU	Solution for Injection	Recombinant Human	Hematopoietic agent

					erythropoietin Alfa	
5.	105601	Pegstim	6mg	Solution for Injection	Pegylated filgrastim	Anti-neoplastic & immune modulator

b. Pharmaceutical equivalence report of test product 25000IU(5000IU/ml) with Heparin Sodium Injection of Hikma Pharmaceuticals USA Inc.

Comparison regarding dosage form, API, strength and route of administration:

S.No	Characteristics	Comparison	
		Innovator Product Heparin Sodium Injection	Test Product INHIXA 25000 IU (5000 IU/mL)
1.	API	Heparin Sodium	Heparin Sodium
2.	Dosage Form	Liquid solution for injection	Liquid solution for injection
3.	Strength	5000 IU/mL	5000 IU/mL
4.	Route of Administration	IV/ SC	IV/ SC

Comparison of Tests and Specifications

Sr.No.	Tests & Specifications	Innovator product	Test Product
1.	**Identity by Zone Electrophoresis:** The ration of the distance migrated by the principal band of bands in the gel obtained with sample solution (1) to the distance migrated by the principal band in the gel obtained with standard solution (2) is 0.9 to 1.1.	Complies 0.98	Complies 0.97
2.	**Anti-Factor Xa Activity by Chromogenic assay:** 95 – 105%	101%	98.9%
3.	**Anti-Factor lla Activity by Chromogenic assay:** 4500 – 5550 IU/mL (90% - 111%)	4990IU/ml(99.8%)	4776IU/ml(95.5%)
4.	**Ratio of Anti-Factor Xa to Anti-Factor lla Activity:** 0.9 – 1.1	1.01	1.04
5.	**Related Substances by HPLC:** The area of the peak in the sample due to dermatan sulfate and chondroitin sulfate is note greater than 0.25 times the are of the corresponding peak in the standard solution D. (2.0%) The area of any other peak is not greater than 0.0025 times the area of the peak due to dermatan sulfate and chondroitin sulfate obtained with solution D (disregard limit 0.02%). Disregard any peak that appears during the initial isoratic	Not detected	Not detected
6.	**Primary packaging:**	USP type I clear glass vial, Bromobutyl rubber stopper	USP type I clear glass vial, Bromobutyl rubber stopper

Conclusions

The pharmaceutical equivalence study was carried out and the test product (INHIXA 25000 IU (5000 IU/mL)) was compared with reference product (Heparin Sodium Injection). The two products found to have identical active ingredient, identical strength/ label claim, identical dosage from and identical route of administration. Certain comparative tests were also performed including identification, purity and assay tests. The results of two products for mentioned tests compared and found that these are within the specified limits. On the basis of above satisfactory comparison, both the products are said to be pharmaceutically equivalent.

Decision: Registration Board deferred the product for submission of rational/evidence from RRA by the firm for production of non rDNA product in rDNA manufacturing facility.

Locally Manufactured Human Biological i.e. Enoxaparin Injections applied by M/s Macter International Limited deferred in 323rd meeting of Registration Board.

17.	**Name of manufacturer**	**M/s Macter International Limited.** **F- 216, S.I.T.E, Karachi 75700, Pakistan.**

Data as per guidelines of 289th meeting of Registration Board;

i) For Bulk Concentrate Import, Local formulation Filling:

	Documents Required	**Documents submitted by the firm**
i.	The firms shall provide legalized GMP certificate of biological drug substance manufacturer abroad (who will provide concentrate / ready to fill bulk of biological drug to Pakistani manufacturers for further processing) as an evidence that the manufacturer is an authorized manufacturer of biological drug in the country of origin.	Copy of GMP No.2020-20 dated 07-09-2020 issued by Hubei Provincial Drug Administration, China. Copy of GMP issued by Mo Industry and trade of the Russian Federation. Manufactuerer and its address: Hubei Enoray Biopharmaceutical Co.,Ltd. No.108, Yanjiang Road, Xiaochi Town, Huangemei County, Hubei Province, China

ii.	The firms shall provide legalized free sale certificate/CoPP either from country of origin or by any reference regulatory authority as adopted by Registration Board of finished product as evidence that the final product has been manufactured by same concentrate/ready to fill bulk after submission of data to the concerned regulatory authority.	Not provided.
iii.	The firm shall provide the complete data as adopted for imported Enoxaparin injections in 281st meeting of Registration Board of the finished product of same source (bulk concentrate or ready to fill) manufactured either from country of origin or by any reference regulatory authority as adopted by Registration Board to demonstrate the similar efficacy and safety to innovator product covering following requirements:	
	a) The first criterion for demonstrating sameness of enoxaparin is equivalence of physicochemical properties, such as molecular weight distribution using size exclusion chromatography, chain mapping by cetyltrimethylammonium-coated strong anion exchange chromatography, matrixassisted laser desorption ionization mass spectrometry (MALDIMS), gel permeation chromatograph—electro spray ionization mass	Heparin sodium is dissolved and through salification, esterification, it is converted to heparin benzyl ester, then, Enoxaparin sodium is formed by alkaline degradation. Following a series of purification process (filtration, oxidization, ultrafiltration, membrane filtration, lyophilization, grinding and mixing), the final product Enoxaparin sodium is obtained.
	spectroscopy (GPC-ESI-MS), or reverse phase ion pair—electro spray ionization mass spectroscopy (RPIPESI-MS).	The structure & quality of Enoxaparin sodium has been compared with reference standard (Eu) & reference product**:** **a. Elucidation of Structure and other Characteristics:** i. Molecular weight distribution by LC & eighteen-angle laser scattering instrument, Electronic balance. ii. Quantitative analysis of uronic acid by Microplate reader. iii. Qualitative analysis of amino sugar by Ion chromatograph, ampere pulsed, electronic balance. iv. Qualitative analysis of free anions and combined sulfo groups by Ion chromatograph, Electrical conductivity Dectector. v. Nuclear Magnetic Resonance analysis by NMR analyzer. vi. Infrared analysis by Fourier transform infrared spectrometer. vii.Disaccharide composition analysis by HPLC viii. Reducing end content analysis by HPLC. ix. Oligosaccharide sequence LC-MS
	b) The second criterion for demonstrating the sameness of enoxaparin is equivalence of heparin source material (ie, heparin that is derived from porcine intestinal mucosa and that meets USP monograph standards for heparin sodium USP) and mode of depolymerization (ie, cleavage by alkaline b-elimination of the benzyl ester derivative of heparin). The equivalent heparin source material should have at least a similar distribution of natural disaccharide building block sequences (within the context of its variability). If an equivalent mode of depolymerization is used, the generic drug products should be at least similar.	

	c) The third criterion for demonstrating the sameness of enoxaparin is equivalence in disaccharide building blocks, fragment mapping, and sequence of oligosaccharide species. This can be achieved by exhaustive digestion of enoxaparin with purified heparin digesting enzymes (heparinases I, II, and III) and nitrous acid, among other means, to yield the constituent disaccharide building blocks comprising enoxaparin. These individual disaccharide building blocks can be quantified by capillary electrophoresis (CE), reverse phase highperformance liquid chromatography (RP-HPLC), strong anion exchange HPLC (SAX-HPLC), mass spectroscopy, and nuclear magnetic resonance (NMR) spectroscopy. Chemical approaches such as analysis with modifying reagents (e.g. sodium borohydride, nitrous acid) or modifying enzymes (eg, 2-0-sulfatase, 6-0-sulfatase, and 5glucuronidase) can be included.	analysis by Superhigh pressure liquid chromatograph-mass spectrometer x. Fingerprinting analysis with 2D-LC-Q/Tof-MS **b. Equivalence of heparin source material:** Based on USP monograph, the starting material of Enoxaparin sodium is from porcine intestinal mucosa & these are obtained from marketing authorization. CoA of crude Heparin Sodium has been submitted. Equivalence of Heparin degradation by chemical reaction (Benzethonium heparinate, nHeparin benzyl ester)
	d) The fourth criterion for establishing sameness of enoxaparin is equivalence of in vitro biological and biochemical assay results using activated partial thromboplastin time (aPTT) and Heptest prolongation time. The equivalence in anti-Xa activity, anti-IIa activity, and anti-Xa/anti-IIa ratio between the generic LMWHs should be provided.	Invitro Bioequivalence study of Low molecular weight Heparins for comparison of the product on aPTT & FXa activity with that of reference drug by aPTT assay & Anti-FXa assay. Equivalence in Biological & Biochemical assays: Anti-factor Xa activity & Anti-factor IIa activity by potency test method of USP mpnograph.
	e) The fifth criterion for establishing sameness of enoxaparin is equivalence of ex vivo pharmacodynamic (PD) profile in human volunteers. The comparison of in vivo PD profiles is based on measurements of in vivo anti-Xa and anti-IIa profiles.	Single center, open, randomized, single dose, two cycle, two-sequence & cross pharmacodynamics bioequivalence study aims to pre-estimate the effects of subcutaneous injection of test preparation Enoxaparin Sodium Injection & reference preparation Clexane in Chinese healthy subject under fasting.
iv.	The firm shall provide the lot release certificate of the finished product manufactured by same bulk concentrate/ ready to fill from country of export (If applicable).	NA
v.	The firm shall provide the 6 months accelerated and real time stability studies for drug substance.	24months real time stability study data at 25°C±2°C, 60%RH±5% RH & 6 months accelerated stability study at 40°C±2°C, 75%RH ±5% RH of drug substance from API manufacturer.

vi.	The local manufacturer shall perform all the tests on Enoxaparin Sodium bulk as detailed in Pharmacopoeial monograph of Enoxaparin Sodium.	• Identification by Size-Exclusion Chromatography (GPC) • Anti-Factor Xa Activity Chromogenic assay • Anti-Factor Ila activity Chromogenic assay • Color & clarity of solution • Light Absorption • Sodium by Atomic Absorption Spectrophotometry • Related Substances by HPLC
vii.	The local manufacturer shall manufacture three trial batches of the finished biological product to finalize the formulation and then perform the six months stability data on all the batches along with all the tests as detailed in Pharmacopoeial monograph of Enoxaparin Sodium Injection.	The stability study has been submitted for lowest 20mg, middle 60mg & highest 100mg vial (as per bracketing) 6-months real time stability study data at 25°C±2°C, 60%RH±5% RH & 6 months accelerated stability study at 40°C±2°C, 75%RH ±5% RH.
viii.	The local manufacturer shall perform suitable tests to evaluate the product and process related impurities both in their product and in Innovator product e.g. Total proteins, Individual proteins, Lipids and DNA content etc. The following techniques may be used: a. SDS-PAGE for individual proteins b. GC-MS for lipid impurities c. Threshold ® Total DNA Assay System for DNA content.	Related Substances by HPLC: Purity of LMW heparins by using Anion Exchange Chromatography based test. Sodium by Atomic Absorption Spectrophotometry
ix.	The firm shall provide the agreement with the source (of bulk concentrate/ready to fill) that if there shall be any critical change in manufacturing process, biological systems used to manufacture, etc. the firm shall inform DRAP immediately along with relevant documents.	Not submitted
x.	Regular monitoring through pharmacovigilance reporting system shall be observed through proper pharmacovigilance cell of the manufacturer and report will be forwarded to the National Pharmacovigilance Centre, Division of Pharmacy Services and Biological Division of DRAP. In case of any severe adverse event, immediate mandatory reporting procedure shall be followed.	Submitted
xi.	The firm shall inform DRAP if there shall be any adverse event or ADR reporting from the country of manufacture of concentrate/ready to fill bulk and finished product as required vide Rules 30 of Drug (LR&A) Rule.	Not submitted
xii.	If any of the conditions is not fulfilled or public health risk reported at any stage, the drug registration shall stand cancelled with immediate effect.	Not submitted

xiii.	All the provisions as contained in the Drugs Act, 1976 and rules made there under including provisions of Lot	Not submitted
	Release certification from National Control Laboratory for Biologicals shall be strictly adhered to.	

The case was deferred in 320th meeting of Registration Board & the firm has submitted reply which are tabulated below.

Decision of the Board	Response of the firm	Remarks
i. Evidence of availability of formulations in vials in Reference Regulatory Authorities.	With reference to your letter no. F.No.3-88/2015-DDC (BD) Para wise answers are given below, (i.) We would like to inform you that marketed formulation of our innovator brand i.e. Lovenox is available in vial in USA, see link provided below for the presence of Enoxaparin vial in USA; •https://www.accessdata.fda.gov/drugsatfda_docs/label/2017/020164s110lbl.pdf In number of countries Enoxaparin formulation is marketed in vial & ampoule i.e. in china and India. Web link is provided below: •http://www.baiyujituan.com/english.php?m=product&a=show&id=29 •https://integratedlaboratories.in/enoxaparin-injection-40mg-inoxa-40/	The submitted links were accessed **the products have not been found in vial in the applied concentration in the USFDA or any other reference regulatory authority.** Only available in cHina & India as per the link submitted by the firm.
ii. Valid legalized Free sale certificate/CoPP either from country of origin or by any reference regulatory authority as adopted by Registration Board of finished product as evidence that the final product has been manufactured by same concentrate/ready to fill bulk after submission of data to the concerned regulatory authority.	• The firm ha ssubmitted copy of CoPP issued by China. The firm has submitted that Finished dosage form of our API supplier HUBEI ENORAY BIOPHARMACEUTICAL is registered in country of origin (China) where market authorization holder is Tianjin Chase Sun Pharmaceutical Co.Ltd. Evidence of availability in Chinese market is mentioned in below; https://www.nmpa.gov.cn/datasearch/search-info.html?nmpa=aWQ9MTkxMzc5Jml0ZW1JZD1mZjgwODA4MTdjODMxMmM0MDE3YzliYmZjOGRlMDM2MA== • The firm has also submitted that HUBEI ENORAY BIOPHARMACEUTICAL Co .Ltd also exports Enoxaparin API to turkey region where it is registered with brand name AXEPARIN. Copy of Registration letter & GMP certificate of Turkish brand Axeparin is enclosed as hard copy. Copy cwerificate of Turkish	

	company purchasing API from our Chinese source is also submitted.	
iii. Agreement with the source manufacturer (bulk concentrate) that if there shall be any critical change in manufacturing process, biological systems used to manufacture, etc. the firm shall inform DRAP immediately along with relevant documents.		
iv. Referred the case to Licensing Division for confirmation of manufacturing section for production of Heparin Sodium.	**Comments of Licensing division is given on the previous case.**	
v. An undertaking that the firm shall inform DRAP if there shall be any adverse event or ADR reporting from the country of manufacture of concentrate/ready to fill bulk and finished product as required vide Rules 30 of Drug (LR&A) Rule.	**Submitted on stamp paper.**	
vi. An undertaking that if any of the conditions is not fulfilled or public health risk reported at any stage, the drug registration shall stand cancelled with immediate effect.	**Submitted on stamp paper.**	
vii. An undertaking that all the provisions as contained in the Drugs Act, 1976 and rules made there under including provisions of Lot Release certification from National Control Laboratory for Biologicals shall be strictly adhered to.	**Submitted on stamp paper.**	

Decision in 323rd meeting of Registration Board: Registration Board deferred the case for submission of following:

- *Section wise details of products of M/s Macter International Limited Karachi.*
- *Submission of compatibility, extractables, leachebles and other relevant studies of rubber stopper with the product.*

Evaluation by DBE&R:

Now the firm has following:

a. Product list of M/s Macter International Limited for biological section:

S.no	Reg.#	Product name	Strength	Dosage	Generic	Drug class

1.	091268	Momentum	25mg/mL	Lyophilized powder for injection	Etanercept	Immunosuppressant (tumor necrosis factor receptor)
2.	092610	Epocan	2000 IU	Solution for Injection	Recombinant Human erythropoietin Alfa	Hematopoietic agent
3.	092611	Epocan	4000 IU	Solution for Injection	Recombinant Human erythropoietin Alfa	Hematopoietic agent
4.	092612	Epocan	10,000 IU	Solution for Injection	Recombinant Human erythropoietin Alfa	Hematopoietic agent
5.	105601	Pegstim	6mg	Solution for Injection	Pegylated filgrastim	Anti-neoplastic & immune modulator

b. Firm has not submitted compatibility, extractables, leachebles and other relevant studies of rubber stopper with the product.

Decision: Registration Board deferred the case for the following:

- **For submission of rational/evidence from RRA by the firm for production of non rDNA product in rDNA manufacturing facility.**
- **The board also directed the division of BE&R to recheck/reverify the availaibility of formulation in vial dosageform in USFDA.**

Imported Veterinary Biological applied by M/s. Jovac Global-PAK, Lahore deferred in 326th meeting of Registration Board.

Following product of M/s. Jovac Global-PAK is deferred in 326th meeting of Registration Board as per following details:

22.	**Name and address of Importer**	**M/s. Jovac Global-PAK,** Plot No. 17, Block D, EME, DHA Phase 12, Lahore
	Detail of DSL	M/s. Jovac Global-PAK Address: 4th floor, Plot No.17, Block D, EME DHA, Phase 12 Lahore. Valid up to:15.06.2023
	Name and address of Manufacturer	M/s. Jordan Bio Industries Center (Jovac). Address: Amman, Yajouz road, near Yajouz Agriculture Nursery Amman, Jordan.
	Name of exporting country	Jordan
	Brand Name +Dosage Form + Strength	Jova Zeit 6 Plus vaccine. (Injectable oil emulsion)
	Diary No. Date of R& I & fee	Dy. No. 25502 R&I Dated 14-09-2022 Rs. 150,000/- (Slip No. 9269169953)
	Composition	Each dose contains: Inactivated Adenovirus Serotype 2,4 &8 at least…. $10^{6.5}$ $TCID_{50}$
	Pharmacological Group	Inactivated Vaccine
	Type of Form	Form-5A
	Finished Product Specification	Manufacturer's specifications

	Shelf Life	2 years (2^0C-8^0C)
	Document Details	a. Valid legalized free sale certificate is submitted by the firm however it does not confirm the availability of product in country of origin. b. Valid legalized GMP certificate issued to M/s. Jordan Bio Industries Center (Jovac) valid for three years from the date of inspection i.e. 01/12/2020.
	Pack size	300ml(1000doses)
	Reference Regulatory Authority Availability	N/A
	Products already registered in Pakistan	GPVAC Hydro TC Plus of Grand Pharma Each 0.3ml contains: Inactivated Avian Adenovirus 4…. ≥ $7\log_{10}$ EID_{50}/dose Inactivated Avian Adenovirus-8…. ≥ $7\log_{10}$ EID_{50}/dose
	Remarks of Evaluator	i. Free sale certificate does not confirm the free sale status of product in country of origin. ii. Locally registered product contains Adenovirus serotype 4 & 8 but not serotype 2.
	Decision in 326th RB meeting	Registration Board deferred the case for the following: • For submission of valid legalized Free Sale Certificate indicating product availability in country of origin. • For submission of evidence of locally registered product containing all serotypes.
	Evaluation by DBE&R	Now the firm has submitted following: • Valid legalized Free Sale Certificate (dated 29/03/2023) indicating product availability in country of origin. • The firm is unable to find locally registered product with serotype 2.
	Decision: Registration Board referred the case to Ministry of National Food Security & Research, Islamabad for comments regarding the need of vaccine, prevalence of disease and immunological relevance of the serotype 2 in Pakistan	

Imported Veterinary Biological applied by M/s UM Enterprises, Karachi deferred in 293rd meeting of Registration Board.

Following product of M/s UM Enterprises, Karachi was deferred in 293rd meeting of Registration Board as per following details:

23.	**Name of Importer**	**M/s UM Enterprises, Plot No. 12, Sector 15, Korangi Industrial Area, Karachi.**
	DSL details	DSL No. 2911 dated 11-07-2019 valid till 16-03-2021
	Name of Manufacturer	M/s ZoetisIndustria De ProdutosVeterinarios Ltda., RuaLuiz Fernando Rodriguez, 1701, Vila Boa Vista, Campinas, SP, Brazil
	Brand Name +Dosage Form + Strength	Poulvac Magniplex Live vaccine conjugated to antibodies against the Gumboro Disease

	Composition	Each dose of product contains: Suspension of the Gumboro V877 virus at minimum title on the release date…. 102.0DIE50 Suspension of the Gumboro V877 virus at minimum title on the expiration date…. $10^{1.3}DIE_{50}$ Antibody against the Gumboro Disease…….≥20U
	Finished product specifications	As per Innovator.
	Pharmacological Group	Veterinary Vaccine
	Shelf life	24 months (2^0C -8^0C)
	International availability	Philippines.
	Products already registered in Pakistan	CevacTransmune IBD Vaccine (Reg. No. 039910)
	Type of Form Dy No. & Date of application, Fee submitted	Form-5A Dy. No. 40446 & 14206 Dated 05-12-2018 & 05-08-2019 Rs. 100000/- Dated 05-12-2018
	Demanded Price / Pack size	2000 Doses/ De-controlled
	General documentation	• Legalized GMP Certificate dated 31-08-2017 issued by Ministry of Agriculture, Livestock and Food Supply-MAPA, Brazil. • Legalized FSC No. 1285164 dated 29-06-2017 issued by Ministry of Agriculture, livestock and Food Supply, Brazil.
	Decision of RB in 292nd meeting	*Registration Board deferred the case for submission, of stability studies guidelines for veterinary vaccines of country of origin by the firm.*

The firm has now submitted the stability study guidelines of country which indicates the following:

Test Frequency:

a. Long term stability (granting of definitive shelf life): 0,3,6,9,12,18 and 24 months, then yearly after the second year and until the declared expiration date.

b. Accompanying Stability test: One analysis at time zero must be performed, then every year, until declared expiration date.

The firm has also provided the online link of above guidelines which is not accessible.

Decision of 293rd Registration Board meeting:

Registration Board deferred the case for submission of scientific rationale of using time intervals of 0, 6, 12…. months instead of 0, 3, 6, 9, 12….. months in real time stability data.

Evaluation by DBE&R:

Now the firm has submitted real time stability studies data at 2-8ºC on 0, 3, 6, 9, 12….. 24 months for three batches of Poulvac Magniplex.

Decision: Keeping in view legalized certificate of Licensing and Inspection indicating product availability in country of origin, Registration Board approved the product subject to compliance of current Import Policy for finished drugs.

Imported Veterinary Biological applied by M/s Saadat International, Lahore deferred in 320th meeting of Registration Board.

Following product of M/s Saadat International, Lahore was deferred in 293rd meeting of Registration Board as per following details:

24.	**Name and address of Importer**	**M/s Saadat International, 117 Habitat Flat Shadman II, Jail Road, Lahore.**

	Detail of DSL	**M/s Saadat International:** Address: 117 Habitat Flat Shadman II, Jail Road, District Lahore Valid till: 12-Jun-2022
	Name and address of Manufacturer	**Marketing Authorization Holder:** M/s Boehringer Ingelheim Vetmedica GmbH Binger Strabe 173, 55216 Ingelheim am Rhein, Germany.
		Manufacturer of Drug: M/s Boehringer Ingelheim Animal Health Rue De L aviation, 69800 ST PRIEST -France
	Name of exporting country	France
	Brand Name +Dosage Form + Strength	**Gallimune H9+ND**
	Diary No. Date of R& I & fee	Dy. No. 19297 R&I Dated 09-07-2021 Rs. 150,000/- (Slip No. 07658493298)
	Composition	Each 0.3 ml dose contains: Inactivated Avian Influenza Virus, H9N2 (iraq)strain at least7log2HI.U. Inactivated Newcastle Disease Virus, Ulster 2C strain at least 16HI.Ufr
	Pharmacological Group	Vaccine
	Type of Form	Form-5A
	Finished Product Specification	Manufacturer's Specifications
	Shelf Life	24months----(2-8^{o}C) Stability studies for 27 months at 2-8 ^{o}C
	Document Details	**GMP certificate (Original Legalized):** Certificate No. 20/265668 Issued to: M/s Boehringer Ingelheim Animal Health Rue De L aviation, 69800 ST PRIEST-France (Manufacturer) Issued by: French agency for veterinary medicinal products. Validity: Three years from the date of inspection (conducted on February 17th 2020 to February 20th 2020). **Sole Agency Agreement:** **Boehringer Ingelheim Vetmedica GmbH** (the marketing authorization holder of the product), a company incorporated under the laws of Germany, with its principal office at Binger Strabe 173, 55216 Ingelheim am Rhein, Germany (BIV GmbH) herewith appoints; Saadat International 117 Habitat Flat Shadman II Jail Road Lahore our sole agent in Pakistan for Gallimune H9+ ND, the product is manufactured and supplied to Saadat International by BIV GmbH affiliated company: Boehringer Ingelheim Animal Health France. **COPP (Original Legalized):** Certificate No. 20-268470
	Pack size	300ml bottle
	Reference Regulatory Authority Availability	N/A

	Products already registered in Pakistan	Gallimune 208 ND+Flu H9 M.E. Emelsion for Injection. [Each Dose of Vaccine Contains: - Inactivated Avian Influenza Virus H9N2 Strain Minimum Titer Before Inactivation...108 EID_{50}. Inactivated Newcastle Disease Virus, Ulster 2c Strain Minimum Titer Before Inactivation 1068 EID_{50}].
	Remarks of Evaluator	In response to this division's letter dated 12th January 2022 applicant has submitted following documents: Field trial data. Finished Product Specifications: Manufacturer. Following justification regarding this statement on the COPP that product is not licensed to be placed in the market of country of origin is required. "Gallimune H9+ND is not licensed to be placed in the France market because avian influenza caused by H9N2 subtype is not present in poultry farms of this country. Therefore:
		No Free certificate could be obtained for any H9 vaccine. All the H9 vaccines manufactured in France are for exportation purpose only for the countries that have the H9 as endemic disease, so the authority can only provide certificate of origin and/or Certificate of Pharmaceutical product". Following documents are still required: Finished product specifications in light of 267th RB meeting.
	Previous Decision (M316)	Registration Board deferred the product for submission of evidence of availability of formulation in reference regulatory authorities.
	Evaluation by BE&R Division	*The firm has submitted that Gallimune H9+ND is not registered in reference regulatory authorities (same as all the vaccines contain H9N2 formulations) because avian influenza caused by the H9N2 subtype is not present in poultry farms of these countries.*
	Decision of Registration Board in its 320th meeting	Registration Board deferred the product for submission of evidence of availability of formulation in country of origin or in any other reference regulatory authorities.
	Evaluation of DBE&R	Firm has submitted following: The reason for its non-availability in the country of the origin and countries of the reference regulatory authorities is as under; 1. It is not registered in the country of origin or countries of the reference regulatory authorities because the low pathogenic the avian influenza LPAAI subtype H9N2 is not present in the poultry birds in these countries. 2. The isolates of H9N2 is derived mainly from Middle Eastern lineage not from European lineage which is mainly in the wild birds (no vaccination). 3. The Avian Influenza H9N2 lineage G1-h9.4.2 viruses are widely distributed and endemic poultry in Pakistan, Bangladesh, regions of India, Afghanistan, Nepal, Egypt, Saudi Arabia and Israel. Main Points to support the claim for the safety, quality & efficacy of the drug/vaccine:-

		• However, I would like highlight that the said product is a quality vaccine manufactured by M/S Boehringer Ingelheim, one of the leading animal health companies manufacturing vaccines and Pharmaceutical products at its sites in USA, France and Italy which are fully complying the USDA, EU GMP standards. The said product is manufactured at Boehringer Ingelheim's French site which is fully compliant with the EU and WHO GMP standards. • We have already submitted the GMP certificate and COPP which shows the full compliance status. • Kindly refer to the relevant parts of Quality; safety and efficacy of the Technical Dossier of the vaccine already submitted which shows the full compliance of the EU GMP standards during whole of its manufacturing process. • I would also like to add that one of our already registered vaccine Gallimune 208(Reg. No: 034559) since which has the same composition of Gallimune ND+H9 and has been used by the poultry farmers to control avian influenza H9 with its proven quality, efficacy and safety. • *The Gallimune ND+H9, the vaccine under registration has the same composition except that the subtype (strain) 0f the H9N2 has been upgraded to match the current epidemiological data/prevalence of the disease in our region.* • I would also like to bring to your attention that a number of vaccines with the same composition have already been granted registration which are produced in countries of non reference regulatory authorities such as China, Korea and Egypt.
	Decision: Registration Board referred the case to Ministry of National Food Security & Research, Islamabad for comments regarding the need of vaccine, prevalence of disease and immunological relevance of the applied strains in Pakistan	

Cases of DD-III (Mr. Hafiz Ahsan)

25. M/s Sanofi Aventis Pakistan Limited, Karachi - Extension in labelling exemption for Cerezyme Injection 400 IU (Reg. No. 107918)

M/s Sanofi Aventis Pakistan Limited, Karachi submitted that Cerezyme is indicated for a rare disease called Gaucher disease and required to be imported in a limited quantity. Therefore, it is not possible for manufacturer to follow the Packaging and labeling rules of every country at the time of export plus production, packaging, quality controls of this sterile and temperature sensitive product requires specialized methods and techniques of handling under highly controlled environment. The firm requested to extend the exemption of Urdu Text, Registration number and MRP on packs of Cerezyme (Imiglucerase) for a period of longer than one year. The firm has submitted the following documents:

i. Fee Challan of Rs. 7500/- via e-deposit slip No. 5316605027 and differential fee of Rs. 2500/- via e-deposit slip No. 0923589001 dated 14- 04-2023.
ii. Copy of local SOP for control of Overstamping Operations.
iii. An undertaking that to print the Registration Number and Maximum Retail Price (MRP) on each pack of above product at their Karachi site bearing DML No. 000007, before releasing the goods into the market.
iv. Copy of Registration letter dated 24-05-2021
v. Copy of DML & DSL
vi. Copy of permission of Extension in labeling exemption for Cerezyme (Reg. No. 107918) vide letter No. F.9-2/2022-AD(BD)(PRV) dated 06th April 2023.

In this context, it is submitted that the last request of the firm for exemption of labeling text for Cerezyme Injection 400 IU (Reg. No. 107918) was approved by Registration Board in its 323rd meeting for one year from the date of expiry of previous permission i.e., 23-05-2022.

The firm has submitted import and consumption record of the product in last three years as follows:

Product	No of Units / Packs Imported			No of Units / Packs Sold		
Cerezyme Injection	2021	2022	2023	2021	2022	2023
	50	90	-	-	106	12

Decision: Registration Board decided as follows:

- **Acceded to the request of the firm and extended the permission, for one year from the date of expiry of previous permission i.e. 22-05-2023, to import Cerezyme 400 U (1's, 5's & 25's) (Reg. No. 107918) in Standard Export Packs and to locally print MRP and registration number along with urdu text and other parameters as per Drugs (Labelling & Packing) Rules, 1986 before sale of drug at M/s Sanofi Aventis, Plot 23, sector 22, Korangi Industrial Area, Karachi to comply with the requirements of Drugs (Labelling & Packing) Rules, 1986.**

Imported Human Biological product from Reference countries / WHO PQ:

26.	Name, address of Applicant / Importer	M/s Amson Vaccines & Pharma (Pvt.) Ltd., Plot No. 115, Industrial Triangle, Kahuta Road, Islamabad.
	Details of Drug Sale License of importer	License No: 920-ICT/2013 Address Plot No. 115, Industrial Triangle, Kahuta Road, Islamabad. Validity: 01-08-2022

	Details of fee submitted	Rs: 150,000/- Dated: 11-11-2021 Deposit Slip No. 1882973539
	Proposed proprietary name / brand name	BARYCELA Injection
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Powder Vial: Each vial contains: Live attenuated varicella virus (strain: MAV/06, cell line: MRC-5)……..….≥3800PFU Solvent Vial: Each vial contains: Sterile Water for Injection…….0.7ml
	Dosage form of applied drug	Powder & Solvent for Intramuscular Injection
	Pharmacotherapeutic Group of (API)	Varicella Vaccine
	Finished product specifications	WHO specifications
	Proposed Pack size	1's Vial (Powder) + 1's Vial (Solvent) 10's Vials (Powder) + 10's Vials (Solvent)
	Proposed unit price	As per SRO
	Shelf Life	24 months
	Storage Conditions	2°C -8°C
	Reference Regulatory Authorities	WHO Pre-qualified vaccine

	For generic drugs (me-too status)	Varicella vaccine with this strain is not registered.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per ICH guidelines. Firm has summarized information related to general properties, manufacturers, description of manufacturing process and controls, characterization, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product. The firm has also submitted the non-clinical and clinical overviews and summaries.
	Name, address of drug substance manufacturer	M/s Green Cross Corp., 586, Gwahaksaneop 2-ro, Ochang-eup, Cheongwon-gu, Cheongju-si, Chungcheongbuk-do, South Korea.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of Varicella vaccine bulk at real time conditions. The real time stability data is conducted at -80 ± 10˚C for 18 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Analytical method Validation / verification of the product	Firm has submitted the details of analytical method validation.
	Container closure system of the drug product	Powder Vial: • Borosilicate (Type I) Glass Vial • Butyl Rubber Stopper • Aluminum cap Solvent Vial: • Borosilicate (EP Type I) Glass Vial • Chlorobutyl Rubber Stopper • Aluminum cap
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches of Barycela Inj. at accelerated and real time conditions. The real time stability data is conducted at 5°C ± 3°C for 24 months and accelerated stability is conducted at 25°C ±2°C for 06 months. Firm has submitted stability study data of 3 batches of Diluent at real time conditions. The real time stability data is conducted at 5°C ± 3°C for 36 months.
	Module-IV Non-Clinical	Primary Pharmacodynamics

		• Immune response comparison study by animal species (rabbit, rat, and guinea pig) • Efficacy comparison study in rabbits and guinea pigs • Efficacy comparison study with commercial vaccines in rabbits and guinea pigs • Preliminary local tolerance and efficacy study in rabbits Repeat-dose Toxicity • Repeated Subcutaneous Dose Toxicity Study of VZV Vaccine (MG1111) with a Recovery Period in Rabbits. Other Toxicity Study • A Neurovirulence Test of Attenuated Varicella-Zoster Virus (VZV) in Male Cynomolgus Monkeys
	Module-V Clinical	• A Single-center, Dose Block-randomized, Single-blind, Active-controlled, Dose Escalation Phase 1 Clinical Trial to Evaluate the Safety and Efficacy (Immunogenicity) of MG1111 in Healthy Adults • A Phase II/III, Single-blind (Stage 1), Double-blinded (Stage 2), Randomized, Active-controlled, Dose-escalation (Stage 1), Non-inferiority (Stage 2) Study to Evaluate Immunogenicity and Safety of MG1111 in Healthy Children
	Remarks of Evaluator	i. The submitted legalized FSC issued on 24-03-2022 specifies that the product is permitted to be freely sold in country of origin, however, legalized CoPP issued on 12-04-2022 indicates that the product is not actually available in the market in country of origin. ii. RRA status submitted by the firm is of OKA strain while the instant product has a different strain. iii. The instant strain is not registered in Pakistan. iv. pH is not tested in real time stability studies for which the firm has submitted that initially pH was not included in the studies and later Ministry of Food and Drug Safety, Korea (MFDS) advised them to include. The revised stability studies are not yet complete. v. Limits of virus concentration is different in Specifications (3800-38000PFU) and stability data (2530-25298PFU) for which the firm submitted that clinical trial was conducted with target virus concentration of 8000PFU but at the time of review by MFDS, the target virus concentration was 12000PFU, therefore, the final virus concentration limit is also changed from 2530-25298 PFU to 3800-38000PFU.

Decision:

Registration Board deferred the product for submission of following by the firm:

i. Clarification regarding non-availability of product in country of origin as per submitted CoPP.

ii. Evidence of availability of Varicella vaccine with MAV/06 strain in Reference Regulatory Authorities.

iii. Immunological relevance of MAV/06 strain with circulating strains of Pakistan.

iv. Real time stability data including all parameters as per finished product specifications.

The firm has submitted following Documents and clarification:

i. New CoPP submitted by the firm shows the availability of the product in country of origin.

ii. The firm has submitted 28 days stress stability data of finished product with statement that after 02-03-2020.

iii. Regarding Immunological relevance of MAV/06 strain with circulating strains of Pakistan the firm has submitted

"*Report on the Results of Immunogenic Cross-Reactivity Assessment on Attenuated Vaccine Strain and Wild-Type Varicella Viruses in the Serum of Children Administered Varicella Vaccines"*
Conclusion of the study:
"-The serum samples of the MG1111 vaccination group did not show any statistically significant difference in the antibody titers analyzed with the FAMA antigens of 6 VZV strains regardless of clades or attenuation.
- *The serum samples of the Varivax vaccination group showed a statistically significant difference in the antibody titers analyzed with the FAMA antigens of 6 VZV strains. Specifically, when MAV06 and Jena 26 were used as antigens, the antibody titer was statistically significantly lower than the values measured using Varivax_Oka or YC03 as antigens.*
- *When FAMA analysis was performed with the same strain for 6 FAMA antigen strains, there was no difference in antibody titers between the MG1111 and Varivax vaccination groups.*

iv. Evidence of availability of Varicella vaccine with MAV/06 strain in Reference Regulatory Authorities is not provided.

Previous Decision: The Board deferred the case for clarification from EPI regarding immunological relevance and need of applied strains in Pakistan **(M-321).**

Evaluation by BE&R: The firm submitted that the product acquired WHO Pre-qualification status on 14th February, 2023. The product status is checked on 29-05-2023 @ https://extranet.who.int/pqweb/content/barycela-inj .

As per WHO assessment, Barycela (MAV/06 strain) vaccine is comparable to Varivax (Oka Strain) vaccine (International Brand) in immunogenicity and safety profile from clinical point of view, Varivax has the oka strain, the same strain of other varicella vaccine registered in Pakistan (Varilrix, Varivac, Okavax, Vaxapox).

Decision: Keeping in view the WHO PQ status and legalized FSC indicating product availability in the country of origin and GMP status of the firm, Registration Board approved the product subject to compliance of current Import Policy for finished drugs

	The proposed proprietary name / brand name	**Lunsumio**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	**API**: Mosunetuzumab **Strength** : **1 mg** Concentration per vial: 1mg/1ml
	Dosage form of applied drug	Intravenous Use
	Pharmacotherapeutic Group of (API)	Monoclonal Antibodies (ATC code: L01XC)
	Reference to Finished product specifications	Innovator's specifications
	Proposed pack size	1's vial
	Proposed unit price	As per SRO
	Shelf life	24 months
	Storage conditions	2°C - 8°C
	The status in reference regulatory authorities	Lunsumio 1mg concentrate for solution for infusion glass vial (EMA Approved)
	For generic drugs (me-too status)	N/A
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per ICH guidelines. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product. The firm has also submitted the non-clinical and clinical overviews and summaries.
	Name, address of drug substance manufacturer	Genentech, Inc.1 DNA Way South San Francisco, California 94080 USA.

	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	• 48 months real time stability data at -20°C of 03 batches • 06 month accelerated stability data 5°C of 03 batches
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	2 mL, USP/Ph. Eur./JP Type I glass, borosilicate, colorless
	Stability study data of drug product, shelf life and storage conditions	• 24 months real time stability data at 5°C of 03 batches • 06 month accelerated stability data 25°C of 03 batches
	Module-IV Non-Clinical	**4.2.1 Pharmacology** **4.2.1.1 Primary Pharmacodynamics** • 22-0083: In Vitro Biological Characterization of Mosunetuzumab for Human C1q Binding Activity • In Vitro Comparison of BTCT4465A Produced from E. coli and CHO Cells in B-Cell Killing, T-Cell Activation, and Cytokine Production With Human PBMCs • In Vitro Evaluation of BTCT4465A for Human Fc Gamma Receptor Binding Activities • Characterization of Anti-CD20/CD3 TDB Antibody Mechanism of Action and Efficacy • Comparison of Biological Activity (B-Cell Killing, T-Cell Activation, and Cytokine Production) of POC Anti-CD20/CD3 TDB Antibody and BTCT4465A with Human and Cyno Peripheral Blood Mononuclear Cells • In Vitro Pharmacologic Activity of Anti-CD20/CD3 TDB Antibody in the Presence of High Concentration of Rituximab-DANA • In Vitro Pharmacologic Activity of Anti-CD20/CD3 TDB Antibody in the Presence of High Concentration of

		Dexamethasone • In Vitro Evaluation of BTCT4465A (Anti-CD20/CD3 TDB) v0.1 and BTCT4465A v0.2 for Binding Activity to Human and Cynomolgus Monkey B Cells and T Cells • A Single-Dose Efficacy Study of Anti-CD20/CD3 T-Cell-Dependent Bispecific (TDB) Antibody and Non-CD20-Binding TDB Antibody in Human CD20/CD3 Double-Transgenic Mice • Dose Titration of Anti-CD20/CD3 T-Cell--Dependent Bispecific (TDB) Antibody in Depleting Endogenous B Cells in Human CD20/CD3 Double-Transgenic (TG) Mice • A Single Dose, Time-Course Efficacy Study with Anti-CD20/CD3 T-Cell--Dependent Bispecific (TDB) Antibody in huCD20/CD3 Double Transgenic Mice • A Repeat-Dose Efficacy Study of Anti-CD20/CD3 T-Cell-Dependent Bispecific (TDB) Antibody in Humanized NSG Mice **4.2.2 Pharmacokinetics** **4.2.2.1 Analytical Methods and Validation Reports** (if separate reports are available) • The Validation History of an ELISA Method for the Quantitation of BTCT4465A (Mosunetuzumab) in Cynomolgus Monkey Serum • The Validation History of an Immunoassay Method for Detection of Antibodies to BTCT4465A (Anti-CD20/CD3 TDB) in Cynomolgus Monkey Serum **4.2.2.7 Other Pharmacokinetic Studies** • Pharmacokinetics and Pharmacodynamics of E. coli- or CHO-Produced Anti-CD20/CD3 TDB Antibody in huCD20/huCD3 Transgenic Mice • A Single Dose Pharmacokinetic and Pharmacodynamic Study of BTCT4465A Administered by Intravenous Injection to Male Cynomolgus Monkeys • A Single Dose Pharmacokinetic Comparability Study of BTCT4465A via Intravenous Administration to Male • Cynomolgus Monkeys with a 11-Day Observation Period **4.2.3 Toxicology** **4.2.3.1 Single-Dose Toxicity (in order by species, by route)** • A Single Dose Toxicokinetic, Pharmacodynamic, and Toxicology Study of Anti-CD20/CD3 T-cell Dependent Bispecific Antibody via Intravenous Administration in Male Cynomolgus Monkeys

		• A Single Dose Toxicokinetic, Pharmacodynamic, and Toxicology Study of Anti-CD20/CD3 T-cell Directed Bispecific Antibody via Intravenous Administration in Male Cynomolgus Monkeys • A Single Dose Toxicokinetic, Pharmacodynamic, and Toxicology Study of BTCT4465A via Intravenous Infusion or Subcutaneous Administration in Cynomolgus Monkeys with a 7-week Recovery Period **4.2.3.2 Repeat-Dose Toxicity (in order by species, by route, by duration, including supportive toxicokinetics evaluations)** • A Multiple Dose Toxicokinetic, Pharmacodynamic, and Toxicology Study of anti-CD3/CD20 T-cell Dependent Bispecific Antibody Administered by Intravenous Injection to Cynomolgus Monkeys**.** • A Multiple Dose Toxicokinetic, Pharmacodynamic, and Toxicology Study of anti-CD3/CD20 with or without steroid or Rituximab pretreatment via Intravenous or Subcutaneous Administration in Male Cynomolgus Monkeys • Pilot 28-Day Repeat Dose Intravenous Study of Anti-CD20/CD3 T-cell Dependent Bispecific Antibody using Magnetic Resonance Imaging in the Cynomolgus Monkey • BTCT4465A: 25 Day Intravenous (Infusion) Administration Pilot Toxicity Study in the Monkey • BTCT4465A: 26 Week Multiple Dose Intravenous (Infusion) Administration Toxicity and Toxicokinetic Study in the Cynomolgus Monkey **4.2.3.5 Reproductive and Developmental Toxicity (including range-finding studies and supportive toxicokinetics evaluation) (If modified study designs are used, the following subheadings should be modified accordingly.)** **4.2.3.5.2 Embryo-fetal development** • The Weight-of-Evidence Assessment of Developmental Effects for Mosunetuzumab - for nonUS submission. **4.2.3.7 Other Toxicity Studies (if available)** **4.2.3.7.7 Other** • Tissue Cross-reactivity of BTCT4465A with Human and Select Cynomolgus Monkey Tissues • In Vitro Characterization of the Biological Activities of BTCT4465A in Human PBMCs and the Impact of Low Percentage of Anti-CD3 Homodimers on BTCT4465A Activity
	Module-V Clinical	**Study Design: GO29781**

		• An open Label, Multicenter, Phase I/II dose escalation study and expansion study evaluating the Safety, efficacy and tolerability study and Pharmacokinetics of mosunetuzumab as a single agent (and in combination with Tecentriq) in patients with Relapsed or Refractory B Cell Non-Hodgkin's Lymphoma and Chronic Lymphocytic Leukemia. • 447 enrolled into mosunetuzumab IV montherap cohorts (Group A and Group B escalation + expansion).

Remarks of Evaluator:

Sr. No.	Observations	Response by the Firm
1.	Observer blind, Phase-III clinical study data are required since submitted clinical trial is an open label, Phase I/II study design. Justification is required.	The firm has submitted that the application for registration of new drug, Lunsumio (mosunetuzumab) 1mg and 30mg concentrate for solution for infusion, is applied on the basis of phase I/II GO29781 study, and same is the basis of approval for this product in the reference regulatory authorities such as USFDA, EMA and Swissmedic. We would like to add that the phase III (CELESTIMO study) trials for this drug are in process as informed by our principal, F. Hoffmann-La Roche Ltd., Basel, Switzerland.
2.	Relationship of product license holder with Basel, Switzerland.	Product Specific Authorization letter has been issued by M/s. F. Hoffmann-La Roche Ltd., Grenzacherstrasse 124, CH-4070 Basel Switzerland & the marketing authorization holder is Roche Registration GmbH Emil-Barell-Strasse 1, 79639 Grenzach- Wyhlen, Germany. For this purpose , the firm has submitted a copy of letter indicating relationships among Roch Group of Companies, wherein it has been mentioned M/s F.Hoffmann-La Roche Ltd., Basel Switzerland is the operational headquarter of the Roche Group.

Previous Decision: Registration Board after due discussion decided to defer the case for further deliberation in the next meeting **(M-326)**.

Evaluation by BE&R:

The firm submitted that Lunsumio is a cancer medicine used to treat adults with Follicular lymphoma that does not respond to (refractory) or has come back (relapsed) after at least two previous treatments. ***Follicular lymphoma is a rare disease, and Lunsumio was considered as an 'orphan medicine' (a medicine used in rare diseases) on 16 November 2021 by EMA. Lunsumio is currently approved in US (Dec 2022), EU (June 2022), UK (Oct 2022) and Switzerland (Feb 2023).***

Further submitted that we are enclosing the justification letter received from our principal, F.Hoffman-La Roche Ltd, Basel, Switzerland, to justify the approval of Lunsumio on technical grounds, in the reference regulatory authorities, based on phase I and II clinical trials.

The approval by the SRAs is based on their respective accelerated approval programs where a product is approved after the phase I and II clinical trials. From a public health perspective, Mosunetuzumab represents a chemotherapy-free option with a novel mechanism of action and a favorable benefit-risk profile, and is readily available for treatment. Mosunetuzumab provides meaningful ***Overall Response Rate, Complete Response, Duration of Response,*** while having a ***clinically manageable safety Profile.*** All this is highly welcomed in a patient population that needs new therapies with improved efficacy and safety profile.

Particularly in the US, ***the FDA has introduced expedited programs which are intended to facilitate and expedite development and review of new drugs to address unmet need in the treatment of a serious or Iife threatening condition.*** These programs include fast back designation, breakthrough therapy designation, accelerated approval, and priority review designation. These programs are intended to help ensure that

therapies for serious conditions are approved and available to patients as soon as it can be concluded that the therapies' benefits justify their risks. According to part 312, subpart E (21 CFR part 312): *"The regulations call for earlier attention to drugs that how promise in treating such conditions, including early consultation with FDA for sponsors of such products and efficient trial design, potentially* ***relying on well-controlled phase 2 studies*** *for evidence of effectiveness. "*		
Evaluation by BE&R: The case was presented in 327th meeting of Registration Board wherein the Board decided as under: ***"Keeping in view EMA eCPP and product approval in USFDA, EMA and Swissmedic, Registration Board approved the product subject to compliance to the current Import Policy for finished drugs."*** However, during compilation of minutes of 327th Board meeting, the case could not be incorporated in the final minutes, hence it is again placed for consideration and endorsement by the Board.		
Decision: The Board deliberated the case in the light of decision of 327th meeting of Registration Board and decided to process the issuance of the Registration letter to the firm before formal approval of minutes of this meeting.

	Module-III Drug Substance:	Firm has submitted detailed drug substance data for both sources related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Gennova Biopharmaceuticals limited do not intend to store the API manufactured. It is immediately transfer for fill finish activities. Hence formal stability study for Pegaspargase Bulk is not intended as there is no change in the composition of Bulk and Finished product. Its only containerization process. Hence, we have carried out hold time study for bulk and finished product stability study is reflective for API stability

		as well.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted data of Pharmaceutical Equivalence: Hamsyl 3750 IU /5ml Injection and reference product Oncaspar by Sigma Tau Corporation, USA.
	Analytical method validation / verification of product	The firm has submitted relevant data including analytical method validation for the drug product including the impurities.
	Container closure system of the drug product	Pegaspargase Injection is filled in USP Type I Glass vial. One such labelled vial is placed in Plastic Tray and which is packed in Monocarton along with leaflet. Primary packaging materials conform to specifications.
	Stability study data of drug product, shelf life and storage conditions	Real time stability (Long term) studies have been conducted at 5°C ± 3°C for 24 months of 3 batches. Accelerated stability studies is conducted at 25 °C ± 2 °C / 60% ± 5% RH for 6 months of 3 batches. 431401H01 431402H02 431403H03
	Non-Clinical (Module IV)	**Single dose toxicity** Acute Intravenous toxicity study in Swiss Albino mice Acute Intravenous toxicity study in Sprague Dawley rat **Multiple Dose** Subchronic intravenous toxicity study in the Swiss Albino Mouse Subchronic intra venous toxicity study in the Sprague Dawley Rat
	Module V	• A prospective, open label, randomized, active control, parallel design, comparative pharmacokinetics study of intramuscular pegaspargase (Hamsyl) of M/s Gennova Biopharmaceuticals Ltd versus intramuscular Oncaspar in pediatric patients with **relapsed cases** of Acute Lymphoblastic Leukemia (ALL). **Twenty-four** (24) Pediatric patients diagnosed with Acute Lymphoblastic Leukemia (ALL) in relapsed stage enrolled in 1:1 ratio in two arms randomly. • To demonstrate the pharmacokinetic comparability of Hamsyl® (Pegaspargase) compared to Oncaspar® (Pegaspargase) given intramuscularly during induction in patients with ALL therapy. • To compare the immunogenicity and toxicity of Hamsyl® (Pegaspargase) compared to Oncaspar® (Pegaspargase).
Remarks of Evaluator: The submitted original CoPP is not legalized however, the firm has submitted undertaking that we will submit legalized original copy of CoPP after attestation. Meanwhile, we request you to please include our product in DRB meeting.		
Evaluation by BE&R:		

Sr. No.	Decision of 324th meeting	Response by the firm
1.	Submission of Phase I, II, III clinical study data for the proposed indication since already submitted study is a pharmacokinetic comparison of applied product with reference product.	Hamsyl is a pegylated version of native-asparaginase. Hamsyl was approved as an 'Orphan drug' in India in the second line of treatment of relapsed Acute Lymphoblastic Leukemia (ALL). This approval was based on a bioequivalency study (PK) against the reference product (Oncaspar) in patients with ALL in India. The serum asparaginase activity (> 100 IU/L) has been considered as a surrogate marker for efficacy1 and has been used for the approval of asparaginase formulations worldwide. For instance, *Erwinia asparaginase* US-FDA approval was based on the nadir serum asparaginase activity >100 IU/L. Hamsyl was found to be 'Bioequivalent' to Oncaspar. Importantly, both drugs maintained a nadir serum L-asparaginase activity> 100 IU/L. The secondary endpoints of the study included comparison of the L• asparaginase antibodies response profile and changes in L-asparagine and glutamine amino acids levels. No statistically significant differences were observed in the secondary endpoints. Based on these results, Hamsyl was approved and Phase III study was waived off. Hamsyl has been available in India for therapeutic use since 2014. Various independent investigators have published their experience of treatment with Hamsyl as retrospective studies with no new significant concerns.
2.	Details of pharmaceutical comparison with reference product Oncaspar Injection 3750 IU / 5ml.	The firm has submitted comparability evaluation report of Oncaspar (ON3066X2) and Hamsyl injection (3750 IU/vial) for the identified critical quality attributes.
3.	Legalization of CoPP	**CoPP**: Firm has submitted original Legalized CoPP certificate (CoPP/CERT/PD/1108776/2022/11/41643/ 204858) dated 02-07-2015 issued by Food & Drug Administration, M.S. Bandra-Kurla Complex, Bandra (E), Mumbai – 400 051, Maharashtra, India. The applied product is available for free sale in the market of exporting country. The facilities and operations conform to WHO-GMP. The CoPP is valid till 09-07-2025.

Decision: Registration Board decided to refer the case to Pharmacy Services Division for opinion on firm's justification for exemption of Phase III clinical study data.

30.	Name, address of Applicant / Marketing Authorization Holder / Importer	M/s Genetics Pharmaceuticals Pvt. Ltd., 522 Sundar Industrial Estate, Raiwind Road, District Lahore.

	Name and address of API manufacturer.	**API:** Botulinum Toxin Type A **Name**: M/s Lanzhou Biotechnique Development Co., Limited.,

		Address: 888 Yanchang Road, Lanzhou, Gansu, People's Republic of China.
	Module-II (Quality Overall Summary)	The firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubility's, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The firm has submitted detail of nomenclature, structure, general properties, solubility's, physical form, manufacturers, description of manufacturing process and controls, tests for impurity D, G & related substances (impurity A & unspecified), specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance (Botulinum Toxin type A).
	Stability studies of Drug Substance	Stability study conditions: This study was conducted to investigate the stability of bulk at 2 ~ 8°C on Day 0, 15, 25, 30, 35, 40 and 50. Three batches of bulk were under studied. Tests performed include toxicity, purity and A260/A280. According to the result showed in section 3.2.S.7.3, the toxicity of bulk - active ingredient of BTXA was stable for at least 45 days at 2 ~ 8°C. The shelf life of bulk is then considered for 45 days at 2 ~ 8°C. Batches: (B-20141007, B-20141001, and B-20141002)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Analytical method validation/verification of product	Method validation studies have submitted including sterility, moisture, identity, potency, endotoxin and pH.
	Description of Pack (Container closure system)	The primary packaging material in contact with product of BTXA is 2mL glass vial and butyl rubber stopper. The packaging materials, which are not in contact with the product, are Aluminum-plastic combined cap, inner label, inner plastic box, package insert and paper box.
	Stability Storage Condition	Three consecutive batches of finished product of botulinum toxin type A 50U were selected for the tests. All finished products are kept in the final packaging material. Numbers of batches under examination are: 50U: 20101202, 20110305, 20110503 **Long term test conditions:** Temperature: 2°C－8°C Testing frequency: 3, 6, 12, 18, 24, 36 months **Accelerated test conditions:** Temperature: 25°C ± 2°C Humidity: 60%RH ± 5%RH

		Testing frequency: Initial, 3, 6 months **High temperature test conditions:** Temperature: 35°C ± 2°C Testing frequency: 15 days **Test conditions after reconstitution:** Temperature: 2°C ─ 8°C Testing frequency: Initial and 4 hours after product reconstitution with normal saline
Non-Clinical and Clinical data		
Module IV		The firm has submitted the Non-Clinical Studies of BTXA (Botulinum Toxin Type A). -Toxicity test on Animal model (monkey) experiments indicated that the LD_{50} of monkey was close to 50 LD_{50} (mouse)/Kg. -Toxicity Test: 0.2 LD_{50} (mouse) Kg was effective for making an artificial antagonistic extraocular muscle in proper order and time. An amount of toxin 10 LD_{50} (mouse) Kg, was given to monkeys, they were still healthy and did not occur any systemic symptom of botulism. So, it could be concluded that the products were good in quality, if a suitable amount were applied under control, they should be very effective preparation for treating some diseases of muscular spasm in human.
Module V		Clinical study including bio-similarity, toxicity and safety in human use, bioavailability study, results of clinical trials and literature references has been submitted. A Double-blind, Randomized, Crossover Study of Prosigne (BTXA) Versus Botox in Patients with Blepharospasm and Hemifacial Spasm. **BTXA which has been produced since 1988 by Lanzhou Biological Products Institute, was approved in 1996 for commercial use in China, It was registered in Brazil in 2003, and is provided through the Brazilian High-Cost Drugs Dispensing Program. Treatment of CD burdens the public health system with considerable expenses, and therefore the comparison of the efficacy and safety of the drugs available is of utmost importance.** Phase I, II and III Clinical Study of Treatment of Strabismus, Entropion, Blepharospasm and Hemi-facial Spasm with BTXA (Botulinum Toxin Type A) for Injection has been performed. **<u>Phase I Study:</u>** Phase I Clinical Study for Treatment of Strabismus, Entropion, Blepharospasm and Hemi-facial Spasm with BTXA (Botulinum Toxin Type A) for Injection **<u>i. Strabismus:</u>** **Efficacy result** This evaluation of efficacy was performed in 10 study subjects, who were injected the study drug, within the guideline set in the protocol, and were observed to elicit correction of eye ball positions. According to efficacy assessment criteria, the total efficacy is 100%. **Safety result** No general side effect was observed.

	Ophthalmic side effects were spontaneously normalized after 1 week. ii**. Entropion:** **Efficacy result** This evaluation of efficacy was performed in 2 study subjects, who were injected the study drug, within the guideline set in the protocol, and were observed to elicit correction of eye lid positions. According to efficacy assessment criteria, the total efficacy is 100%. **Safety result** No any local or general side effect was observed. iii. **Blepharospasm and Hemi-facial Spasm:** **Efficacy result** This evaluation of efficacy was performed in 21 study subjects, who were injected the study drug, within the guideline set in the protocol, and were observed to elicit relief of spasm. According to efficacy assessment criteria, the total efficacy is 100%. **Safety result** No serious general side effect was observed. Mild side effects occur at eyes and faces in 4 cases but spontaneously normalized within 1 to 3 weeks. **Phase II Study:** The Study of evaluation of the efficacy and safety of BTXA (Botulinum Toxin Type A) injection therapy in patients with strabismus, entropion, blepharospasm and hemifacial spasm. i. **Strabismus:** **Efficacy result** This evaluation of efficacy was performed in 27 study subjects, who were injected the study drug, within the guideline set in the protocol, and were observed to elicit correction of eye ball positions. According to efficacy assessment criteria, the total efficacy is 100%. **Safety result** No general side effect was observed. Ophthalmic side effects were spontaneously normalized after 4-8 weeks. ii. **Entropion:** **Efficacy result**: This evaluation of efficacy was performed in 30 study subjects, who were injected the study drug, within the guideline set in the protocol, and were observed to elicit correction of eye lid positions. According to efficacy assessment criteria, the total efficacy is 100%. **Safety result** No general side effect was observed. Ophthalmic side effects were spontaneously normalized after 1-3 weeks. iii. **Blepharospasm and Hemi-facial Spasm:** **Efficacy result** This evaluation of efficacy was performed in 112 study subjects, who were injected the study drug, within the guideline set in the protocol, and were observed to elicit relief of spasm. According to efficacy assessment criteria, the total efficacy is 100%. **Safety result** No serious general side effect was observed. Mild side effects occur at eyes and faces in 4 cases but spontaneously normalized within 2 to 8 weeks. **Phase III Study:** Clinical Study of Treatment of Blepharospasm, Hemi-facial Spasm and Strabismus with BTXA (Botulinum

	Toxin Type A) for Injection. **i. Strabismus:** **Efficacy result** This evaluation of efficacy was performed in 35 study subjects, who were injected the study drug, within the guideline set in the protocol, and were observed to elicit correction of eye ball positions. According to efficacy assessment criteria, the total efficacy is 97.14**%.** **Safety result** No general side effect was observed. Ophthalmic side effects were spontaneously normalized within 2-4 weeks. **ii. Blepharospasm and Hemi-facial Spasm:** **Efficacy result** This evaluation of efficacy was performed in **465 study subjects,** who were injected the study drug, within the guideline set in the protocol, and were observed to elicit relief of spasm. According to efficacy assessment criteria, the total efficacy is 100%. **Safety result** No serious general side effect was observed. Mild side effects occur at eyes and faces in 314 cases but spontaneously normalized within 2 or 3 weeks.

Remarks of Evaluator:

The firm has submitted termination of distribution agreement with Sante Distribution (Pvt) Limited as Follows:
"We, Lanzhou Biotechnique Development Co., Ltd, the manufacturer of BTXA (Botulinum Toxin Type A for Injection), hereby declare to terminate any distribution agreements signed with Sante Distribution (Pvt) Limited. Sante Distribution (Pvt) Limited is no longer authorized to import, sell, market and follow up registration of BTXA (Botulinum Toxin Type A for Injection) in Pakistan."
The evaluation of deficiencies is as under:

Sr. No.	Deficiencies / Short-comings	Reply to Deficiencies / Short-comings
i.	Justify how applied product is similar to innovator product (Botox) which is Onabotulinum approved by USFDA.	• BTXA contains Clostridium Botulinum Toxin Type A. • Clostridium Botulinum Toxin Type A is manufactured by Lanzhou Institute of Technology, China. (3rd in the world after UK & USA manufacturing Therapeutic Botulinum Toxin A i.e. Onabotulinum Toxin A. • Clostridium Toxin Type A (Onabotulinum Toxin A) manufactured by Lanzhou China has similar nomenclature as of Botox manufactured by Allergen Inc, Ireland. • Different comparison of Lanzhou's Clostridium Toxin Type A and Allergen's "Botox" with respect to Similarity, Efficacy and Safety is Available Internationally *(References Attached).*
ii.	Valid Legalized CoPP or Valid legalized FSC + GMP Certificate	**CoPP:** The firm has submitted valid legalized CoPP (No. Gansu 20220041) issued on 29-09-2022. The CoPP confirms free sale status of the product in the country of origin. GMP Certificate is Valid till: 25-07-2023 DML Validity: 10-06-2023
iii.	Valid Drug Sale License (DSL)	**License No.:** 05-352-0065-03297D **Address of go-down:** 522 Sundar Industrial Estate, Lahore Pakistan **Validity:** 12-Dec-2023

iv.	Incorrect information against point "Proposed label (outer(secondary) & inner (Primary) & color scheme in accordance with Drug (Labelling & Packing Rules, 1986 along with specimens" as per Section 1.5.7 of Form 5-F.	Labelling and Packing of BTXA 50IU in accordance with Drug (Labelling & Packing Rules, 1986 along with specimens" as per Section 1.5.7 of Form 5-F.

Evaluation by BE&R:

Sr. No.	Decision of 324th meeting	Response by the firm
1.	Approval status of applied product in reference regulatory authorities adopted by Registration Board in its 275th meeting.	The firm has submitted approval of formulation in MHRA. **Botox 50 Allergen units – powder for solution for Injection.**
2.	Whether applied drug falls in Biological or Medical Device Division in the light of DRAP Act, 2012.	BTXA is therapeutically classified as a neuromuscular paralyzing agent. BTXA falls under the **Biological Section** in the light of DRAP Act.
3.	Indications proposed for the applied product.	BTXA is indicated in the treatment of symptom of disease such as: • Blepharospasm, hemifacial spasm in adults, strabismus which cannot be corrected through operation in the patients 12 years of age and above and strabismus caused by endocrine myopathy. • Pediatric Cerebral Palsy • Chronic migraine (injections may help reduce headache frequency). • Bladder dysfunction (BTXA injections can also help reduce urinary incontinence caused by an overactive bladder). • Eye twitching (BTXA injections may help relieve contracture or twitching of muscles around the eye). • Pediatric upper limb spasticity. • Adult spasticity. • Also indicated in spasmodic torticollis, cervical dystonia, spasticity, cerebral paralysis, muscular rehabilitation, hyperkinetic facial lines, and hyperhidrosis in adults. • In the Treatment of Cervical Dystonia (painful condition, in which neck muscles contract involuntarily causing head to twist or turn into an uncomfortable position), typically may include injection of BTXA into the sternocleidomastoid, levator scapulae, scalene, splenius capitis, and trapezius muscle.

Decision: The Board after thorough deliberation decided to defer the case for approval of applied product from same manufacturer in stringent regulatory authorities adopted by Registration Board in its 275th meeting and also for further deliberation.

According to efficacy assessment criteria, the total efficacy is 97.14**%.** **Safety result** No general side effect was observed. Ophthalmic side effects were spontaneously normalized

	within 2-4 weeks. **ii. Blepharospasm and Hemi-facial Spasm:** **Efficacy result** This evaluation of efficacy was performed in 465 study subjects, who were injected the study drug, within the guideline set in the protocol, and were observed to elicit relief of spasm. According to efficacy assessment criteria, the total efficacy is 100%. **Safety result:** No serious general side effect was observed. Mild side effects occur at eyes and faces in 314 cases but spontaneously normalized within 2 or 3 weeks.

Remarks of Evaluator:

The firm has submitted termination of distribution agreement with Sante Distribution (Pvt) Limited as Follows:
"We, Lanzhou Biotechnique Development Co., Ltd, the manufacturer of BTXA (Botulinum Toxin Type A for Injection), hereby declare to terminate any distribution agreements signed with Sante Distribution (Pvt) Limited. Sante Distribution (Pvt) Limited is no longer authorized to import, sell, market and follow up registration of BTXA (Botulinum Toxin Type A for Injection) in Pakistan."

The evaluation of deficiencies is as under:

Sr. No.	Deficiencies / Short-comings	Reply to Deficiencies / Short-comings
i.	Justify how applied product is similar to innovator product (Botox) which is Onabotulinum approved by USFDA.	• BTXA contains Clostridium Botulinum Toxin Type A. • Clostridium Botulinum Toxin Type A is manufactured by Lanzhou Institute of Technology, China. (3rd in the world after UK & USA manufacturing Therapeutic Botulinum Toxin A i.e. Onabotulinum Toxin A. • Clostridium Toxin Type A (Onabotulinum Toxin A) manufactured by Lanzhou China has similar nomenclature as of Botox manufactured by Allergen Inc, Ireland. • Different comparison of Lanzhou's Clostridium Toxin Type A and Allergen's "Botox" with respect to Similarity, Efficacy and Safety is Available Internationally *(References Attached).*
ii.	Valid Legalized CoPP or Valid legalized FSC + GMP Certificate	**CoPP:** The firm has submitted valid legalized CoPP (No. Gansu 20220041) issued on 29-09-2022. The CoPP confirms free sale status of the product in the country of origin. GMP Certificate is Valid till: 25-07-2023 DML Validity: 10-06-2023
iii.	Valid Drug Sale License (DSL)	**License No.:** 05-352-0065-03297D **Address of go-down:** 522 Sundar Industrial Estate, Lahore Pakistan **Validity:** 12-Dec-2023
iv.	Incorrect information against point "Proposed label (outer(secondary) & inner (Primary) & color scheme in accordance with Drug (Labelling & Packing Rules, 1986 along with specimens" as per Section 1.5.7 of Form 5-F.	Labelling and Packing of BTXA 50IU in accordance with Drug (Labelling & Packing Rules, 1986 along with specimens" as per Section 1.5.7 of Form 5-F.

Evaluation by BE&R:

Sr. No.	Decision of 324th meeting	Response by the firm
1.	Approval status of applied product in reference regulatory authorities adopted by Registration Board in its 275th meeting.	The firm has submitted approval of formulation in MHRA. **Botox 50 Allergen units – powder for solution for Injection.**
2.	Whether applied drug falls in Biological or Medical Device Division in the light of DRAP Act, 2012.	BTXA is therapeutically classified as a neuromuscular paralyzing agent. BTXA falls under the **Biological Section** in the light of DRAP Act.
3.	Indications proposed for the applied product.	BTXA is indicated in the treatment of symptom of disease such as: • Blepharospasm, hemifacial spasm in adults, strabismus which cannot be corrected through operation in the patients 12 years of age and above and strabismus caused by endocrine myopathy. • Pediatric Cerebral Palsy • Chronic migraine (injections may help reduce headache frequency). • Bladder dysfunction (BTXA injections can also help reduce urinary incontinence caused by an overactive bladder). • Eye twitching (BTXA injections may help relieve contracture or twitching of muscles around the eye). • Pediatric upper limb spasticity. • Adult spasticity. • Also indicated in spasmodic torticollis, cervical dystonia, spasticity, cerebral paralysis, muscular rehabilitation, hyperkinetic facial lines, and hyperhidrosis in adults. • In the Treatment of Cervical Dystonia (painful condition, in which neck muscles contract involuntarily causing head to twist or turn into an uncomfortable position), typically may include injection of BTXA into the sternocleidomastoid, levator scapulae, scalene, splenius capitis, and trapezius muscle.

Decision: The Board after thorough deliberation decided to defer the case for approval of applied product from same manufacturer in stringent regulatory authorities adopted by Registration Board in its 275th meeting and also for further deliberation.

Cases of Local manufacturing of Human Biological Product

Application of Contract manufacturing by M/s The Searle company limited, Karachi.

DRAP Authority in its 133rd meeting held on 13th April 2022, decided to grant registration on priority basis i.e one molecule for each 100,000 USD worth of export of medicines (to a maximum of 15 such molecules) during a fiscal year. In compliance to the aforementioned decision of the authority, the following firm have achieved the benchmark of more than **100,000 USD** during the **fiscal Year 2021-2022** and submitted their applications for priority consideration in lieu of export facilitation for Registration Board, please.

	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD. Firm has summarized information related to nomenclature, structure, general properties, physical form, manufacturers, description of manufacturing process and controls, Characterization (Elucidation of Structure and Other Characteristics), impurities, specifications, analytical procedures, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Name, address of drug substance manufacturer	Name: Hisun Biopharmaceutical Co., Ltd. Address: 8 Haizheng Road, Xukou Town, Fuyang District, Hangzhou City, Zhejiang Province, China.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis an justification of specification, reference standard, container closure system and stability studies of drug substance.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Data as per guidelines of 297th meeting of Registration Board; **i) For Bulk Concentrate Import, Local formulation Filling:**	
	The firm shall provide legalized GMP certificate of biological drug substance manufacturer abroad (who will provide concentrate / ready to fill bulk of biological drug to Pakistani manufacturers for further processing) as an evidence that the manufacturer is an authorized manufacturer of biological drug in the country of origin.	Firm has submitted original legalized GMP Certificate No. (ZJ20190146) issued by National Medical products administration. The certificate is valid till 29.11.2024.
	The firms shall provide legalized free sale certificate/CoPP either from country of origin or by any reference regulatory authority as adopted by Registration Board of finished product as evidence that the final product has been manufactured by same concentrate/ready to fill bulk after submission of data to the concerned regulatory authority.	Firm has submitted original legalized CoPP certificate (No.20220061) valid till 12.04.2024 issued by Zhejiang Medical Products Administration for Adalimumab Solution for Injection 40mg/0.8ml. The CoPP specifies that the product is licensed to be placed for use in the exporting country as well as the product is actually in the market of exporting country. The CoPP confirms the GMP status of the manufacturing site through periodic inspection.
	The firm shall provide the lot release certificate of the finished product manufactured by same	Not Applicable

	bulk concentrate/ ready to fill from country of export (If applicable).	
	The firm shall provide the 6 months accelerated and real time stability studies for drug substance.	Firm has submitted stability study data of concentrated bulk drug substance at accelerated and real time conditions. The accelerated stability data is conducted at 5°C ± 3°C for 6 months, and the real time stability data is conducted Under ≤-70°C for 24 months. Batch No: 0201617004 Batch No: 0201617005 Batch No: 0201617006
	The firm shall provide the agreement with the source (of bulk concentrate/ready to fill) that if there shall be any critical change in manufacturing process, biological systems used to manufacture, etc. the firm shall inform DRAP immediately along with relevant documents.	**Submitted**
	Regular monitoring through pharmacovigilance reporting system shall be observed through proper pharmacovigilance cell of the manufacturer and report will be forwarded to the National Pharmacovigilance Centre, Division of Pharmacy Services and Biological Division of DRAP. In case of any severe adverse event, immediate mandatory reporting procedure shall be followed.	Firm have submitted undertaking & SOP as detailed in 278th meeting of Registration Board by the local manufacturer.
	The firm shall inform DRAP if there shall be any adverse event or ADR reporting from the country of manufacture of concentrate/ready to fill bulk and finished product as required vide Rules 30 of Drug (LR&A) Rule.	Firm have submitted undertakings as detailed in 297th meeting of Registration Board by the local manufacturer.
	If any of the conditions is not fulfilled or public health risk reported at any stage, the drug registration shall stand cancelled with immediate effect.	Firm have submitted undertakings as detailed in 297th meeting of Registration Board by the local manufacturer.
	All the provisions as contained in the Drugs Act, 1976 and rules made there under including provisions of Lot Release certification from National Control Laboratory for Biologicals shall be strictly adhered to.	Firm have submitted undertaking as detailed in 297th meeting of Registration Board by the local manufacturer.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted bio-similarity studies with innovator product.
	Analytical method validation/verification of product	Firm has submitted details of analytical method validation.
	Container closure system of the drug product	Packed and sealed in pre-fillable 1ml syringe USP Type-I, in UV Laminated board unit carton along with leaflet and plastic plunger.
	Documents for the procurement of API with approval from DRAP	The firm has submitted copy of invoice specifying the import of 36 g of Adalimumab cleared by AD (I&E) DRAP Karachi.
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 03 batches. The accelerated stability study data is conducted at 25°C ± 2°C, 60% ± 5% RH for 6 months. The real

		time stability study data is conducted at 5°C±3°C for 6 months. Batch No. / Batch Size / Manufacturing date TADM-001 / 250 PFS / 20-04-2022 TADM-002 / 250 PFS / 20-04-2022 TADM-003 / 250 PFS / 20-04-2022
	Module IV	Detailed in Biosimilarity data mentioned below
	Module V	Detailed in Biosimilarity data mentioned below
	The firm has submitted Bio-similarity data as per following details:	

WHO Biosimilarity	**Data Submitted**
Quality Comparison 1. Physicochemical Characterization	Adalimumab from Hisun Biopharmaceutical Co., Ltd. has been compared with Humira Reference Listed Drug (RLD) The quality attributes of Adalimumab were studied in terms of structural, physicochemical and functional properties.

Primary Structure	**Comparison with RLD**
N-terminal Amino Acid Sequence (Edman)	Consistent with Humira® and theoretical value
C-terminal Amino Acid Sequence (LC-MS/MS)	Consistent with Humira® and theoretical value
Molecular Weight (LC-MS)	Consistent with Humira® and theoretical value
Post-Translational Modifications (LC-MS/MS)	Comparable to Humira®
Reduced Peptide Mapping (LC-MS/MS)	Comparable to Humira®
Non-reduced Peptide Mapping (LC-MS/MS)	Comparable to Humira®
Peptide Coverage (LC-MS/MS)	Comparable to Humira®
Isoelectric point (icIEF)	8.6
Higher-order Structure	**Higher order structure:**
Circular Dichroism	Comparable to Humira®
FT-IR Spectroscopy	Comparable to Humira®
Thermal Stability (DSC)	Comparable to Humira®
Disulfide Bonds (LC-MS/MS	Consistent with Humira® and theoretical value
Free Sulfhydryl Content (Ellman)	HS016: 0.03-0.04 mol/mol Humira®: 0.01-0.03 mol/mol
Glycosylation	**Glycosylation:**

	Glycosylation Site	HS016: Heavy Chain Asn301 Humira®: Heavy Chain Asn301
	Identification of N-Glycan (LC-MS) (HPLC)	Similar to Humira®
	Total Afucosylation (HPLC,%)	HS016:14.39-17.80 Humira®:11.14-12.12 HS016 slight trend toward higher level
	Afucosylation (HPLC,%)	HS016:2.39-2.92 Humira®:1.45-1.86 HS016 slight trend toward higher level
	High Mannose (HPLC,%)	HS016:11.83-15.41 Humira®:9.26-10.08 HS016 slight trend toward higher level
	Galactosylation (HPLC,%)	HS016:11.83-15.41 Humira®:9.26-10.08 HS016 slight trend toward higher level
	Sialylation (HPLC,%)	HS016:13.66-16.04 Humira®:15.05-16.53 HS016 slight trend toward lower level.
Biological Activity	The results of biological activity show that the ADCC activity and CDC activity of HS016 are comparable to that of Humira®, and FcγRIIIa affinities (158V, 158F) and C1q affinity of HS016 are highly similar to that of Humira® (see 8.13, 8.14 and 8.15 for details). It is concluded that the slight differences in N-glycan ratios have no effect on the ADCC activity and CDC activity of HS016. In addition, ADCC activity and CDC activity are not the critical MOA for the proposed indication of HS016, so the risk of affecting clinical efficacy is low.	
	Biological Activity	**Comparison with Reference**
	sTNFα Binding Activity (ELISA, %)	HS016:89-109 Humira®:83-104
	Cell Death Inhibition Activity (L929) (x10^5 AU/mg)	HS016:2.59-3.24 Humira®:2.38-3.36
	Apoptosis Inhibition Activity (U937) (%)	HS016:82.5-111.9 Humira®:88.0-123.0
	Inhibition Activity of TNFα-induced IL-8 (%)	HS016:88.0-114.3 Humira®:85.2-118.5
	tmTNFα Binding Activity (ELISA, %)	HS016:96.3-105.2 Humira®:83.6-100.7
	ADCC (%)	HS016:85.9-116.5 Humira®:79.6-109.7
	CDC (%)	HS016:78.8-110.9 Humira®:85.0-109.7
	Binding Specificity of TNFα	Similar to Humira®
	TNFα Binding Site	Similar to Humira®
	Biological activity and safety of HS016, and is considered as no clinically meaningful differences, and the data submitted support a demonstration that HS016 is highly similar to Humira®.	

Immunochemical properties

TNFα and TNFβ are members of the TNF family. The study determines the binding specificity of human TNFα.

FcγRIIIa is CD16a, which is a kind of transmembrane protein and widely expressed in the activated monocytes, macrophage, NK cells and T cells. FcγRIIIa is a Fc receptor with high affinity to IgG and mainly binds to Fc region of IgG1, IgG3 and IgG4. The 158 locus of FcγRIIIa is polymorphic (F/F, V/V and F/V).

Immunochemical Properties	**Comparison with Reference**
sTNFα Affinity (SPR, pM)	HS016:30.61-50.62 Humira®:36.38-47.23
FcRn Affinity (BLI, nM)	HS016:39-78 Humira®:58-110
FcγRI Affinity (BLI, nM)	HS016:3.4-3.7 Humira®:3.9-5.0
FcγRIIa (H131) Affinity (BLI, nM)	HS016: 6.2-8.0 Humira®5.9-12.0
FcγRIIa (R131) Affinity (BLI, nM)	HS016:5.7-7.9 Humira®:6.3-7.6
FcγRIIIa (158V) Affinity (BLI, nM)	HS016:0.56-1.30 Humira®:0.60-1.10
FcγRIIIa (158F) Affinity (BLI, nM)	HS016:6.4-8.5 Humira®:6.7-11.0
C1q Binding Activity (ELISA, %)	HS016:101-129 Humira®:78-102

The similarity results of immunochemical properties and their correlation with clinical outcomes suggested that HS016 (Adalimumab of Hisun) and Humira have similar immunochemical properties.

Impurities

Product-related Impurities	**Comparison with Reference**
SEC-HPLC	
Purity (%)	HS016:99.5-100.0 Humira®:99.4-99.7
Aggregation (%)	HS016:0.0-0.5 Humira®:0.3-0.5
rCE-SDS	
LC+HC (%)	HS016:98.1-98.8 Humira®: 96.6-98.8
NGHC (%)	HS016:0.9-1.5 Humira®:1.0-1.5
nrCE-SDS	
Purity (%)	HS016:92.6-95.1 Humira®:93.0-97.7
LMW (%)	HS016:4.9-7.4 Humira®:2.3-7.0
RP-HPLC	
Bebofre Major Peak (%)	HS016:1.57-2.03 Humira®:1.76-2.34
Major Peak (%)	HS016:87.88-89.69 Humira®:87.68-89.56
After Major Peak (%)	HS016:9.32-10.04 Humira®:8.49-9.86
Charged Variants (IEC-HPLC)	HS016:78.5-82.8 Humira®:76.8-81.2
Main Peak (%)	HS016:15.0-19.2 Humira®:15.6-18.9
Acidic Peak (%)	HS016: (1.7-2.5) Humira®:2.7-4.3

	Basic Peak (%) Lysine Variants (IEC-HPLC, %) **<u>Process-related Impurities</u>** Host-cell-derived Protein (%) Residual Protein A (%) Residual DNA (pg/40mg)	 HS016:85.5-89.3 Humira®:83.0-85.6 HS016:0.0000364-0.00012 Humira®:0.000100-0.000437 HS016:less than LOQ Humira®:less than LOQ HS016:less than LOQ Humira®:less than LOQ
	The non-reducing CE-SDS chromatogram of HS016 is consistent with that of Humira®. The non-reducing CE-SDS purity and low molecular weight impurities content of HS016 are consistent with that of Humira®. According to the quality range method (Mean±3SD), all HS016 batches have the same quality range in major peak purity, impurities content before major peak and impurities content after major peak as Humira® batches. It is concluded that the major peak purity, impurities content before major peak and impurities content after major peak of HS016 are highly similar to that of Humira®.	
Stability Studies	The firm has submitted stability studies.	
Non-clinical Comparison I. *In-vitro* Studies II. *In-vivo* Studies a) Biological / Pharmacodynamic activity b) Non- clinical Studies	Pharmacology Pharmacokinetics Acute toxicity Repeated-dose toxicity	The Non clinical studies results showed that the affinity with TNF-α, binding specificity with human TNF-α, Inhibition of TNF-α binding to its receptor and Neutralization of TNF- α mediated cytotoxicity, and Preventing Tg 197 mice from inflammation developing model of HS016 were similar to Humira. The PK results showed that compared with HS016 intermediate dose group by single subcutaneous injection, the difference in AUC(0-1008h), CL, Vss, Cmax, $t_{1/2}$ and MRT, was no statistically significant (P>0.05). It was concluded that HS016 appeared similar pharmacokinetic behavior to Humira® in cynomolgus monkeys. The SD rat acute toxicity studies results showed the maximal tolerance dose (MTD) of SD rat should be not less than 1000mg/kg when administered HS016 by subcutaneous injection. Administered 178~400mg/kg HS016 by subcutaneous injection in cynomolgus monkeys, the NOAEL was 267mg/kg. The main toxic reactions were heart rate decreasing, WBC fluctuation and atrophy of thymus. The target organs of the toxic reaction were mainly hematological system (peripheral blood) and immune system (thymus), which was consistent with that reported on Humira in related literature. The repeated-dose toxicity studies results showed that the toxic action and toxic characters of HS016 were similar to the same dose Humira®. HS016 has the similar toxicokinetics characteristics to Humira®. No obvious irritation was observed when administered 10.0~200.0mg/kg HS016 by subcutaneous injection in cynomolgus monkeys. The immunogenicity and toxic action of immune system from HS016 and Humira on cynomolgus monkeys were observed, mainly the generation of specific antibody, increasing of IgG and

		the atrophy of thymus and spleen white pulp, the toxicity was reversible. It was suggested that close attention should be paid in clinical trial.
Clinical Studies	A randomized, double-blind, parallel-controlled **phase I** clinical trial report on pharmacokinetic and safety similarity of single subcutaneous injection of recombinant anti-TNF-α fully human monoclonal antibody injection and Humira® in healthy male subjects. A total of **795 subjects** were screened in this trial, and 661 subjects failed the screening. Among them, 660 subjects failed the screening for not meeting the inclusion and exclusion criteria, and one subject for other reasons (not showing up for screening due to temporary engagement). The subjects 01-177 and 01-192, although not meeting the inclusion and exclusion criteria, were actually administered with drug, so a total of 136 subjects were randomized, with 68 subjects each in HS016 group and Humira® group. All randomized subjects completed the trial. All randomized subjects entered the full analysis set, the pharmacokinetic analysis set, and the safety analysis set. Subjects entered the full analysis set according to randomized group. Since subject 01-046 was randomly assigned to HS016 group but misused Humira®, and subject 01-042 was randomly assigned to Humira® group but misused HS016, they entered the pharmacokinetic analysis set and the safety analysis set according to actually administered drug group. In the single-dose PK contrast test of HS016 and Humira® in healthy male subjects, bioequivalence and pharmacokinetic profile in AUC0-t, AUC0-∞ and Cmax were similar, and safety and immunogenicity were similar in overall. A multicenter, randomized, double-blinded, parallel, active control **Phase III** clinical study to evaluate the efficacy and safety of domestic recombinant anti-tumor necrosis factor-α fully human monoclonal antibody injection (HS016) vs originator drug Humira® subcutaneous injection in active ankylosing spondylitis. A total of 1068 subjects were screened in this study, of which 419 subjects failed, and 649 subjects were randomized. A total of **648 subjects** (99.85%) were treated, of which 416 were in HS016 group and 232 in Humira® group. 570 subjects (87.83%) completed the study, of which 362 (87.02%) were in HS016 group and 208 (89.27%) in Humira® group. 79 subjects prematurely discontinued (including the subject untreated), of which 54 (12.98%) were in HS016 group and 25 (10.73%) in Humira® group. The primary reason for discontinuation was occurrence of adverse event. 30 subjects (7.21%) in HS016 group and 13 subjects (5.58%) in Humira® group discontinued due to adverse event. The efficacy, safety, PK and immunogenicity results supported high comparability between HS016 and originator control drug Humira® for clinical profile, efficacy, safety and immunogenicity in active ankylosing spondylitis.
Remarks	The firm has submitted Declaration letter regarding English name of Manufacturer on GMP certificate: "*We M/s Hisun Biopharmaceutical Co., Ltd located at 8 Haizheng Road, Xukou Town, Fuyang District, Hangzhou City, Zhejiang Province, China hereby declare that the English name "Haizheng Biopharmaceutical Co., Ltd on GMP certification is based on pronunciation of Chinese name. Both Hisun and Haizheng have the same effect in this certification.*"
Decision: Keeping in view the Biosimilarity data submitted by the firm in light of guidelines of 297th meeting, Registration Board approved the registration of Adalib Solution for injection 40mg/0.8ml (Pre-filled Syringe).		

Application of Ready to Fill Bulk Import, Local filling by M/s Macter International Limited, Karachi.

DRAP Authority in its 133rd meeting held on 13th April 2022, decided to grant registration on priority basis i.e one molecule for each 100,000 USD worth of export of medicines (to a maximum of 15 such molecules) during a fiscal year. In compliance to the aforementioned decision of the authority, the following firm have achieved the benchmark of more than **100,000 USD** during the **fiscal Year 2021-2022** and submitted their applications for priority consideration in lieu of export facilitation for Registration Board, please.

Firm has summarized information related to nomenclature, structure, general properties, physical form, manufacturers, description of manufacturing process and controls, Characterization (Elucidation of Structure and Other Characteristics), impurities, specifications, analytical procedures, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Name, address of drug substance manufacturer	Livzon New North River Pharmaceutical Co., Ltd. Renmin One Road, Qingyuan City, Guangdong Province, China.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis an justification of specification, reference standard, container closure system and stability studies of drug substance.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Data as per guidelines of 278th meeting of Registration Board; **ii) For Bulk Concentrate Import, Local formulation Filling:**	
	The firm shall provide legalized GMP certificate of biological drug substance manufacturer abroad (who will provide concentrate / ready to fill bulk of biological drug to Pakistani manufacturers for further processing) as an evidence that the manufacturer is an authorized manufacturer of biological drug in the country of origin.	GMP Issue Date : June-02-2022 GMP Valid Date : June-01-2024 Firm has submitted the GMP issued by People's Republic of China, Qingyoun City Qingcheng District ShijiaoTow .
	The firms shall provide legalized free sale certificate/CoPP either from country of origin or by any reference regulatory authority as adopted by Registration Board of finished product as evidence that the final product has been manufactured by same concentrate/ready to fill bulk after submission of data to the concerned regulatory authority.	Firm has submitted that Issuance of FSC / COPP is not required by country of origin as it is an API, hence COPP/FSC not applicable. Semaglutide has been exported by DS Manufacturer to different countries such as Pakistan, Bangladesh, Vietnam, South Korea, Slovenia etc.
	The firm shall provide the lot release certificate of the finished product manufactured by same bulk	Not Applicable

	concentrate/ ready to fill from country of export (If applicable).	
	The firm shall provide the 6 months accelerated and real time stability studies for drug substance.	Firm has submitted stability study data of concentrated bulk drug substance at accelerated and real time conditions. The accelerated stability data is conducted at 5°C ± 3°C for 6 months, and the real time stability data is conducted Under -20°C ± 5°C for 24 months. Batch No: SM-2101002 Batch No: SM-2101003 Batch No: SM-2103004
	The firm shall provide the agreement with the source (of bulk concentrate/ready to fill) that if there shall be any critical change in manufacturing process, biological systems used to manufacture, etc. the firm shall inform DRAP immediately along with relevant documents.	**Submitted**
	Regular monitoring through pharmacovigilance reporting system shall be observed through proper pharmacovigilance cell of the manufacturer and report will be forwarded to the National Pharmacovigilance Centre, Division of Pharmacy Services and Biological Division of DRAP. In case of any severe adverse event, immediate mandatory reporting procedure shall be followed.	Firm have submitted undertaking & SOP as detailed in 278th meeting of Registration Board by the local manufacturer.
	The firm shall inform DRAP if there shall be any adverse event or ADR reporting from the country of manufacture of concentrate/ready to fill bulk and finished product as required vide Rules 30 of Drug (LR&A) Rule.	Firm have submitted undertakings as detailed in 278th meeting of Registration Board by the local manufacturer.
	If any of the conditions is not fulfilled or public health risk reported at any stage, the drug registration shall stand cancelled with immediate effect.	Firm have submitted undertakings as detailed in 278th meeting of Registration Board by the local manufacturer.
	All the provisions as contained in the Drugs Act, 1976 and rules made there under including provisions of Lot Release certification from National Control Laboratory for Biologicals shall be strictly adhered to.	Firm have submitted undertaking as detailed in 278th meeting of Registration Board by the local manufacturer.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted Pharmaceutical Equivalence and sameness evaluation studies with innovator product.
	Analytical method validation/verification of product	Firm has submitted details of analytical method validation.
	Container closure system of the drug product	3 ml USP type 1 clear glass vials accompanied with 13 mm slit less siliconized butyl grey rubber stoppers and aluminum flip off seal.
	Documents for the procurement of API with approval from DRAP	The firm has submitted copy of GD, form 6 & invoice specifying the import of 10gram of semaglutide.
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 03 batches. The accelerated stability study data is conducted at 25±2°C, 60%±5% RH for 6 months. The real time

2. Physicochemical Characterization</td><td>Seglutide Injection has been compared with Ozempic inj Reference Listed Drug (RLD)
The quality attributes characterize biological products in terms of structural, physicochemical and functional properties.
A. Primary sequence and physicochemical properties
B. Secondary structure
C. Oligomer/aggregation states
D. Biological activities (by in vitro or animal studies)
Sameness studies
1. Structural comparison
Following robust characterization of drug substance and drug product proves the sameness of Seglutide with RLD.
<u>Primary Structure</u>:
• Complete peptide sequence analysis by mass spectrometry
• Peptide mapping
• Peptide coverage map
• N terminal sequence analysis
• Molecular weight by high resolution mass spectrometry
<u>Secondary Structure</u>:
• IR Spectrum
• UV absorption
See Annex 6.7
2. Quality:
• Chiral analysis
• Elemental analysis
• Capillary isoelectric focusing
• Physiochemical properties
• Hygroscopicity
• <u>Comparative testing of Seglutide with RLD</u>
• Identification by RP HPLC
• Related Substances by RP HPLC
• Identification and molecular weight determination bybTris Tricine SDS – Page
• Protein content & Binding assay by ELISA
• Determination of HMW proteins by Size Exclusion Chromatography
• Determination of Specific activity</td></tr>

Stability Studies	The firm has submitted stability studies.
Non-Clinical studies	Not submitted
Clinical Studies	Not submitted

Evaluation by BE&R:

Sr. No.	Deficiencies	Response by the firm
1.	The submitted commercial invoice for the import of Semaglutide is not cleared by assistant director (I & E) of respective field office.	System generated Form 6 and Good Declaration Certificate attached.
2.	Provide result of all quality parameter in comparative analysis of developed formulation with innovator product as the submitted report comprises of reduced testing.	The firm has submitted comparative analysis of test product with innovator Ozempic (Batch# MP5A069) has been carried out on following parameters and all satisfactory results indicate that our product resemble to Innovator product. The parameters include Dosage form, Strength, Route of administration, Physical Appearance, pH, Particulate Matter, Identification by HPLC, Molecular Wight (SDS PAGE), Assay by RP HPLC, Specific Activity by Biological Assay, Protein content by ELISA, Phenol Content, Impurities (Hydrophilic Impurities, Hydrophobic Impurities, Total impurities), Aggregates (high molecular weight proteins), Sterility test, Endotoxin test.
3.	Justify container closure system of USP type I clear glass vial while innovator product Ozempic is packaged in multi dose cartridge single patient pen injector.	Product contact parts in both cases are same i.e. Class 1 clear glass in cartridge used in RLS and same class 1 glass vial is used in Seglutide. Stability studies indicate no interaction of primary packing with product.
4.	Submit legalized GMP certificate of biological drug substance manufacturer abroad (who will provide concentrate /ready to fill bulk of biological drug to Pakistani manufacturer for further processing) as an evidence that the manufacturer is an authorized manufacturer of biological drug in the country of origin.	Direct link of GMP inspection report of national regulatory authority of exporting country is provided of the drug substance manufacturer.
5.	Submit legalized free sale certificate/CoPP either from country of origin or by any reference regulatory authority as adopted by Registration Board of finished product as evidence that the final product has been manufactured by same concentrate/ready to fill bulk after submission of data to concerned authority.	Issuance of FSC / COPP is not required by country of origin as it is an API, hence COPP/FSC not applicable. Semaglutide has been exported by DS Manufacturer to different countries such as Pakistan, Bangladesh, Vietnam, South Korea, Slovenia etc.
6.	Submit the complete Bio-similarity studies of the finished product of same source (bulk concentrate or ready to fill) manufactured either from country of origin or by any reference regulatory authority as adopted by Registration Board to demonstrate the bio-similarity	Following criteria of sameness evaluation has been used. Detailed report is attached. A. Primary sequence and physicochemical properties B. Secondary structure C. Oligomer/aggregation states D. Biological activities (by in vitro or animal studies <u>Semaglutide is not a protein by the definition of USFDA. It is a peptide.</u>

		Bio-similarity applies to large complex biomolecules owing to the size and complexity of molecules which has primary, secondary/ tertiary and quaternary structures which cannot be fully elucidated by analytical means that's why clinical evidences are required to prove the efficacy and safety. Biosimilarity applies mostly to protein based therapeutics. 21 CFR 600.3(h)(6) defines a protein is any alpha amino acid polymer with a specific, defined sequence that is greater than 40 amino acids in size. (Annex 5. page 2, para 2) <u>Semaglutide is peptide which is included in complex APIs & complex product</u> Semaglutide which is comprised of 31 amino acids (less than 40) is not a protein is categorized as complex API and due to complex active and drug product containing small peptide is defined ad complex product. (Formal Meetings Between FDA and ANDA Applicants of Complex Products Under GDUFA, Guidance for Industry issued in October 2022). (see Annex 7, page 3 para 2). <u>Waiver of *In-vivo* bioequivalence by **USFDA** product specific guideline</u> Product Specific Guideline on Semaglutide (annex 6.1) has described the conditions to qualify for submitting an waiver of in vivo bioequivalence (BE) study on the basis that BE is self-evident under 21 CFR 320.22(b (annex 6.2)), a generic Semaglutide subcutaneous solution for injection product should qualitatively (Q1) and quantitatively (Q2) be the same as the Reference Listed Drug (RLD).
7.	Provide the lot release certificate of the finished product manufactured by same bulk concentrate/ ready to fill from country of export	Not applicable.
8.	Submit justification for not performing all test mentioned on Certificate of analysis	Complete analysis has been performed on following parameters. **Comparative COA is attached**
9.	Provide the agreement with the source (of bulk concentrate/ready to fill) that if there shall be any critical change in manufacturing process, biological systems used to manufacture, etc. the firm shall inform DRAP immediately along with relevant documents.	Agreement with DS manufacturer has been attached

Decision: Registration Board after thorough deliberation decided to deffer for the documents/information as under:

• **The firm shall submit evidence (legalized FSC/CoPP/Registration certificate) of finished product manufactured by same concentrate/ready to fill bulk. either from country of origin or by any reference regulatory authority as adopted by Registration Board**

The case was deferred in 264th meeting of Registration Board & the board decided as under;

Deferred for evaluation by Dr. Qurban Ali, Member Registration Board.

Now the expert opinion of Dr. Qurban Ali, member Registration Board has been received on **17-08-2022** to the Director Biological Drugs via email which is reproduced as under;

Infectious bursal disease (IBD), also known as Gumboro disease is a highly contagious, immunosuppressive disease of young chickens and is responsible for major economic losses in the poultry industry worldwide. IBD virus (IBDV) is a double-stranded RNA virus, having two serotypes (1 and 2) with only serotype 1 causing the disease in young chickens. The virus infects the bursa of Fabricius causing immunosuppression that enhances the susceptibility of chicken to other infections and interferes with vaccination against other diseases.

The IBDV is highly resistant virus and tends to persist in the farm environment despite strict hygiene measures. Therefore immunization is considered the most important measure to control IBD; where protective immunity in birds depends on inducement of both humoral and cell-mediated immune responses; however, rampant usage of live vaccines worldwide has resulted in the evolution of new strains antigenic variants and very virulent strains (vvIBDV) resulting into significant losses and high mortality in chicken, and virus continuously evolving in the field with changes in antigenicity and virulence necessitating the development and use of newer vaccines with improved efficacy.

Most commercially available conventional live IBDV vaccines are based on classical virulent strains. Those classified as mild, intermediate and ''intermediate plus (or hot) vaccines. IBD-K7 was isolated in 2007 from Seonghwan, Chungnam, Korea, which was later fully characterized, sequenced, patented and deposited in 2013 with the accession number KCTC 12376BP to the Gene Bank of Korea Biotechnology Institute (Yeoseong-gu, Daejeon, Korea) as an international depositing institution. The virus was taken as vaccine candidate and translated into live intermediate IBD Vaccine fulfilling all requirements of production and

testing. Studies found IBD K7 as a novel recombinant virus compared to existing viruses with some of the virogenic viral antigen properties, besides showing better immunogenicity than the mid-dose vaccine D-78 and no significant difference from the mid-dose plus vaccine of Winterfield strain. The product is lyophilized, dispensed with adjuvant, stabilizers, preservatives and diluent for use. The product can be administered as injection (i/m or s/c) or use in drinking water/ spray vaccination from at day one; where virus strain used has low virulence and higher immunogenicity than intermediate IBD vaccines.

*From afore going, vaccine **from IBD K7 strain is recommended for registration** to enhance repertoire of veterinarians for control of a difficult disease of IBD.*

Remarks of Evaluator: Free Sale certificate is expired on 30-09-2019 which was valid at the time of submission.

Previous Decision: Registration Board referred the case to Animal Husbandry Commissioner for comments regarding immunological relevance and need of applied strain in Pakistan **(M-320)**.

Evaluation by BE&R: Ministry of National Food Security and Research has conveyed vide letter F.No.3-1/84-D&V dated 19th April, 2023 that this Ministry recommends import of **Pro-Vac IBD Plus (K7 Strain $10^{2.5}$ EID_{50})** from Komipharm International Co., Ltd South Korea to cater the national needs subject to fulfillment of all codal formalities.

Decision: On the recommendations of Ministry of National Food Security and Research vide its letter F.No.3-1/84-D&V dated 19th April, 2023, the Registration Board after discussion approved the registration of Pro-Vac IBD Plus (K7 Strain $10^{2.5}$ EID_{50}) from Komipharm International Co., Ltd South Korea .

Transfer of Registration from M/s Eli Lilly Pakistan (Pvt) Limited Karachi to M/s Golden Harvest, Karachi

M/s Golden harvest, Karachi applied for registration of following veterinary biologicals in their name from M/s Eli Lilly Pakistan (Pvt.) Ltd., Karachi:

36.	**Name, address of applicant / Importer**	**M/s Golden Harvest,** Address: Plot No. 49-C, 24th Commercial Street Phase-II Extt: DHA, Karachi.
	DSL details	License to sell drug as distributor No. 054 valid till 26-02-2023
	Name of Manufacturer	**Lohmann Animal Health** Heinz-Lohmann-StraBe 4, 27472 Cuxhaven, Germany
	Name of exporting country	Germany.
	Brand Name +Dosage Form + Strength	Avipro Salmonella DUO
	Diary No. Date of R& I & fee	Dy. No. 2542 (R&I); Dated 21-01-2021 Rs.100,000 (Slip No.0711592)
	Composition	Composition per dose: 1 dose contains Each dose contains: Live Salmonella Enteritidis bacteria, strain Sm24/Rif12/Ssq, At least 1 x 10^8.0 CFU* Live Salmonella Typhimurium bacteria, strain Nal2/Rif9/Rtt, At least 1 x 10^8.0 CFU* *CFU = Colony Forming Units
	Pharmacological Group	Live Freeze dried bacterial veterinary vaccine
	Type of Form	Form-5A
	Finished Product Specification	Ph. Eur. Specification
	Shelf Life	18 months (2°C-8°C)
	Pack size and demanded price	10 × 2000 dose vial / Decontrolled
	International availability	Germany, EU, UK.

Products already registered in Pakistan	Avipro Salmonella DUO is already registered in Pakistan as an innovative product with Reg no**. 083177**.
Stability data of finished product	The firm has submitted stability study data of 26 months conducted at 2°C to 8°C for three consecutive batches as below: 200308-1C 200312-2C 200401-3C
Document Details	• Legalized Free Sale Certificate No. 048/LAH/2020.issued by State Office for Consumer Protection and Food Safety, Germany (Niedersächsisches Landesamt für Verbraucherschutz und Lebensmittelsicherheit) Dated: 10/08/2020 • Legalized GMP Certificate No.075/LAH/2018 Dated: 23 Feb 2018.

Remarks of Evaluator
Valid copy of Drug sale license is required to be submitted.

Sr. No.	**Decision of 317th meeting of RB**	**Response by the firm**
1.	Original termination letter from manufacturer abroad for previous importer.	Original Letter of Termination dated 11/03/22 submitted by Firm
2.	Valid legalized approval of 21 months shelf life issued by regulatory authority of country of origin.	The firm has submitted revised Form 5A with correct shelf life for 18 months' shelf life which can be verified from online database of Germany.
3.	Real time stability data for both products including all the parameters as mentioned in finished product specifications. Only test for bacterial counts and residual moisture (%) have been provided. While as per CoA four tests are performed, i.e. identification of active substance, viable testing, purity test and residual moisture.	The firm has submitted an Explanation Letter regarding the vaccine AviPro Salmonella DUO: According to our previous explanation in the stability justification letter on March 12, 2022, the provisions that are taken in the account regarding veterinary vaccines in the European Union (EU), Germany, are the ones defined in monograph no. 62 of the European Pharmacopoeia (EP), section 2-2-3-Stability. *"For a live freeze-dried bacterial veterinary vaccine like the one we are dealing with, the bacterial counts and residual moisture testing are the parameters to be studied, and both have been tested in the provided stability trial.* *Monitoring all the parameters defined in batch release (CoA) is not a common practice as per se it has not added value. Only monitoring the parameters that may change and therefore influence on the quality and shelf-life of a veterinary vaccine are the ones to be controlled."* Having said that, regarding the 4 parameters mentioned by the Board: identification of active substance viable testing

			purity test residual moisture Viable testing (which are the bacterial count test) and residual parameters were assayed in the stability trial. In relation to the identification of the active substance, this a bivalent live bacterial vaccine composed by *Salmonella* Enteritidis and *Salmonella* Tiphymurium. *The full identification profile was done at batch release.* The characteristics to identify these 2 *Salmonella* serotypes do not change over time. Chemically-defined substances may change over time, but, for bacteria, if grown during shelf-life (confirmed by the viable bacterial count), they do not change its identity and therefore it does not need to be reconfirmed. In relation to purity, this test was also carried out at batch release. Once purity is confirmed, the vaccine is already manufactured, so filled in, freeze-dried and sealed. The vial is no longer manipulated and therefore it cannot be (re-contaminated). This is why purity is another parameter that does not need to be reconfirmed. To summarize, we would like to highlight that the 4 parameters the 2 critical ones (already mentioned in the EP) were carried out in the trial, and the 2 other ones were duly checked at batch release, are not susceptible to change over time and cannot influence shelf-life."
	Previous Decision: Registration Board decided to provide the opportunity of personal hearing to M/s Eli Lilly Pakistan (Pvt) Limited Karachi under section 42 of the Drugs Act, 1976 of schedule VI of DRAP Act 2012 for cancellation of Registration of Avipro Salmonella DUO of M/s Eli Lilly Pakistan (Pvt) Limited Karachi and as per NOC of M/s Eli Lilly Pakistan (Pvt) Limited Karachi, the case shall also be considered for grant of registration of said product to M/s Golden Harvest, Karachi after personal hearing **(M-326)**.		
	Decision: Mr. Muhammad Zubair Sr. Manager RA appeared before the Board on behalf of M/s Eli Lilly Pakistan Pvt. Ltd, Karachi for personal hearing. After being heard the authorized person of M/s Eli Lilly Pakistan Pvt. Ltd, Karachi, the Registration Board acceded to the request of the firm for cancellation of registration of Avipro Salmonella DUO of M/s Eli Lilly Pakistan Pvt. Ltd, Karachi and grant the registration of the same product in the name of M/s Golden Harvest, Karachi.		

Transfer of Registration from M/s Eros Pharmaceutical Pvt Limited, Karachi to M/s JOVAC Global Pak, Lahore

M/s JOVAC Global Pak, Lahore applied for registration of following veterinary biological in their name from M/s Eros Pharmaceutical Pvt Limited, Karachi:

37.	**Name, address of applicant / Importer**	**M/s JOVAC Global Pak,** Address: 4th Floor, Plot No. 17, Block-D, EME DHA, Phase 12, Lahore.
	DSL details	License to sell drug as distributor No. 05-352-0066-072607D valid till 15-06-2023.
	Name of Manufacturer	M/s. Jordan Bio Industries Center (Jovac). Address: Amman, Yajouz road, near Yajouz Agriculture Nursery Amman, Jordan.
	Name of exporting country	Jordan

	Brand Name +Dosage Form + Strength	Gallovac 9R vaccine with Diluent Live attenuated freeze dried pellet for injection
	Diary No. Date of R& I & fee	Dy. No. 13028 (R&I); Dated 28-05-2022 Rs.150,000 (Slip No.5532950674)
	Composition	Each dose of vaccine contains: Viable organisms of *Salmonella gallinarum* strain 9R……..at least 2.0×10^7
	Pharmacological Group	Live Freeze dried veterinary vaccine
	Type of Form	Form-5A
	Finished Product Specification	Innovator's Specification
	Shelf Life	18 months (2°C-8°C)
	Pack size and demanded price	1000 doses / 1's vial ; Decontrolled
	Products already registered in Pakistan	Gallovac 9R vaccine with Diluent of M/s Eros pharma (Reg # 091373).
	Stability data of finished product	The firm has submitted stability study data of 24 months conducted at 2°C to 8°C for three consecutive batches as below: 9R0217-01 9R0218-01 9R0219-01
	Document Details	c. Valid legalized free sale certificate issued by the Ministry of Agriculture and Animal Health Directorate confirm free sale status of the product. The certificate is valid till 22-04-2025. d. Valid legalized GMP certificate issued to M/s. Jordan Bio Industries Center (Jovac) valid for three years from the date of inspection i.e. 01/12/2020.
	The firm has submitted following: Copy of Registration letter and last renewal status Termination/change of Distribution letter from manufacturer NOC from the existing registration holder (M/s Eros Pharmaceutical Pvt. Ltd, Karachi).	
	Decision: Registration Board was apprised that NAB Karachi has sent freezing order for M/s Eros Medicose, Dadu. Therefore, the Board decided todefer the cade and consider the same again after clarification from NAB Karachi whether both business entities i.e Erose Modicose, Dadub and Erose Pharmacuticals, Pvt. Ltd. Karachi are the same or otherwise.	

Imported Veterinary Biologicals from Reference countries:

38.	**Name, address of applicant / Importer**	**M/s Inouko Animal Health (Private) Limited.,** Address: 3rd Floor, Plaza No. 3 D-Block, DHA Phase 5 Cantt, District Lahore.
	DSL details	License to sell drug as distributor No. 05-352-0058-043305D valid till 18-07-2023.
	Name of Manufacturer	M/s. Biomune Company, 8906, Rosehill Road Lenexa KS 66215, US
	Name of exporting country	United States
	Brand Name +Dosage Form + Strength	Ultifend IBD ND
	Diary No. Date of R& I & fee	Dy. No. 3017 (R&I); Dated 27-02-2020 Rs.100,000 (Slip No.2044728) dated 27-02-2020
	Composition	Each dose of vaccine contains: Bursal disease-Marek's Disease-Newcastle Disease virus …… min 2818 pfu's through expiration
	Pharmacological Group	Live freeze dried veterinary vaccine
	Type of Form	Form-5A
	Finished Product Specification	Innovator's specification
	Shelf Life	24 months in liquid nitrogen gas

	Pack size and demanded price	4000 doses in glass ampoule ; Decontrolled
	International availability	Approved in United states, Peru, Venezuela, Mexico
	Stability data of finished product	The firm has submitted stability study data of 27 months for three commercial scale batches that were stored under stringent conditions (Liquid nitrogen): 376-001 376-002 376-003
	Document Details	The firm has submitted original legalized **certificate of licensing and inspection** (License No. 368) issued by U.S. Department of Agriculture, Animal and Plant Health Inspection Service, Center for Veterinary Biologics dated 20-03-2018. The certificate confirm that the biological veterinary product is freely marketed in the country of origin and authorize the manufacturer to manufacture, package and sell immunological veterinary medicinal products. Product specific sole agency agreement with Ceva Sante Animale S.A., 10 avenue de la Ballastiere, 33500 Libourne, France.
	Remarks	The firm has submitted declaration that Ceva headquarter located in France is parent company of all Ceva subsidiaries, offices, manufacturing sites and secondary packaging sites. Biomune Company, 8906 Rosehill Road, Kansas 66215. US is the Ceva Manufacturing site located in US.
	Decision: Keeping in view the legalized CLI indicating product availability in the country of origin, Registration Board approved the product subject to compliance to the current import policy for finished drugs.	

39. Inspection report of M/s Brand Station, 69 Wocland Villas, Near Raiwind Road, Lahore

Following product of M/s Brand Station, Lahore was approved in 321st meeting of Registration Board with following details:

Manufacturer	**Brand name and composition**	**Document details**	**Decision of RB**
M/s. Yebio Bioengineering Co., Ltd Adress: No.260 Heyuan Road Hongdao, Qingdao, China	Yevac ND vaccine 500ml Each dose (0.5ml) contains: Newcastle Disease Virus Strain Lasota $\geq 10^{8.1}$ EID_{50} before inactivation.	24 months (2°C -8°C) 500 ml Decontrolled Original legalized FSC Original legalized GMP	Keeping in view legalized GMP and Free Sale Certificate indicating product availability in country of origin; Registration Board approved the product subject to compliance of current Import Policy for finished drugs & submission of valid Sole agency agreement/authorization letter.

Accordingly, inspection of the manufacturing site i.e., M/s Yebio Bioengineering Co. Ltd. Address: No. 260 Heyuan Road, Hongdao, Qingdao, China was carried out on 12.12.2022 & 21.12.2022, by Zafar Mahmood Minhas (Director, National Control Laboratory for Biologicals), and Saadia Mahwish (Federal

Inspector of Drugs, DRAP, Islamabad) for the product YEVAC ND Vaccine 500ml. The panel of inspection concluded as below:

The proceedings of the virtual inspection were adversely influenced by a slew of factors summarized below:

1. Lack of provision for appropriate tools like cameras, borescopes, fiberoscopes etc. by the manufacturer to carry out virtual inspection.
2. Lack of provision of internet inside the production facility due to which production area could not be inspected.
3. The videos of production area provided by the manufacturer were devoid of description, voiceovers, step by step explanation of manufacturing process as well as the visuals of machinery in operation.
4. Lack of readily available documents for review in English language with notarization or Embassy verification.
5. Inadequacy of provided documents & videos as discussed in detail above.
6. Non availability of key documents in English language like veterinary Chinese Pharmacopoeia & Chinese GMP guidelines from an independent source.
7. Non-compliance of sterile area monitoring practices & their frequencies in accordance with Internationally accepted Guidelines.
8. Lack of clarification regarding the equivalence of Chinese GMP standards with International Guidelines & of Chinese Veterinary Pharmacopoeia with official books (BP, USP etc.) as mentioned in the Drugs Act, 1976 & DRAP Act, 2012.

Considering the facts mentioned above, the areas inspected, the people met and the documents reviewed, and considering the findings of the inspection, the panel reached the conclusion that since manufacturing/ production facility of the firm could not be viewed combined with deficiencies in the provided documents, it is not possible to ascertain basic vaccine manufacturing system or its compliance with GMP. It is therefore, strongly recommended that on-site inspection of the firm should be carried out before grant of registration of applied product i.e. Yevac ND vaccine and the firm should be compelled/ obligated to maintain & keep an English translation of relevant documents readily available for review on request.
Decision: The case has already been taken up by the Registration Board in its 327th meeting.

Agenda Item No.VII. Division of Quality Assurance & Laboratory Testing

S. No.	Case title
AGENDA ITEM NO. 01 - PERSONAL HEARING CASES	
01	MANUFACTURE & SALE OF ADULTERATED & SUB-STANDARD STERILE WATER FOR INJECTION REG. NO. 030217, BATCH NO. 799 MANUFACTURED BY M/S. ZAFA PHARMACEUTICAL LABORATORIES (PVT.) LTD., KARACHI
02	MANUFACTURE & SALE OF SUB-STANDARD STERILE WATER FOR INJECTION BATCH NO. W-20017 & W-20024, MANUFACTURED BY M/S. MEDIATE PHARMACEUTICAL (PVT.) LTD., KARACHI.
AGENDA ITEM NO. 02- OOS INVESTIGATION	
03	MANUFACTURE & SALE OF SUB-STANDARD STERILE WATER FOR INJECTION REG. NO. 030217, BATCH NO. 826 MANUFACTURED BY M/S. ZAFA PHARMACEUTICAL LABORATORIES (PVT.) LTD., KARACHI.
04	MANUFACTURE & SALE OF SUB-STANDARD DRUG (TEMPRIN SUSPENSION) BATCH NO. TM070 MANUFACTURED BY M/S. KOHS PHARMACEUTICALS (PVT) LTD., P/8 S.I.T.E HYDERABAD.
05	MANUFACTURE & SALE OF SUB-STANDARD OPHTH-CARB STERILE INTRAOCULAR SOLUTION BATCH NO. OP154 MANUFACTURED BY M/S OPHTH PHARMA (PVT) LTD., KARACHI
06	MANUFACTURE & SALE OF SUBSTANDARD LETIRIX SYRUP, BATCH NO. L2033, MANUFACTURED BY M/S. ALLIANCE PHARMACEUTICALS (PVT) LIMITED, PESHAWAR.
07	MANUFACTURING AND SALE OF SUB-STANDARD ALCAZAR INJECTION, BATCH NO.37, MANUFACTURED BY M/S PHARMEDIC LABORTORIES,16-KM MULTAN ROAD, LAHORE.

AGENDA ITEM NO. 01 - PERSONAL HEARING CASES

CASE NO. 01: MANUFACTURE & SALE OF ADULTERATED & SUB-STANDARD STERILE WATER FOR INJECTION REG. NO. 030217, BATCH NO. 799 MANUFACTURED BY M/S. ZAFA PHARMACEUTICAL LABORATORIES (PVT.) LTD., KARACHI.

The Federal Inspector of Drug-III / Assistant Director-XII, DRAP, Karachi inspected the premises of M/s. National Institute of Child Health (NICH) Rafeeqi Shaheed Road Karachi. on 28-05-2021 wherein the sample of drug along with other drugs were taken for the purpose of test/analysis on prescribed Form-3.

The Federal Government Analyst, Central Drugs Laboratory, Karachi declared the above said sample as "Adulterated and Sub-Standard" quality vide their test report No.KQ.134/2021 (Initial) dated 11th June 2021 and test report No. KQ.134/2021 (Final) dated 30th, July 2021.

S. No.	Name of Drug	Reg; No	Batch No.	Mfg. Date	Exp. Date	Mfg.by	Result of CDL	Basis of Result
01	Zafixime 500mg Injection	027228	440	01-2021	01-2023	M/s. Zafa Pharmaceutical Laboratories (Pvt) Limited, Karachi.	Standard	-
-	Sterile Water for Injection 5ml Ampoule	030217	799	12-2020	12-2025	---do---	Adulterated & Substandard	**Containing white fibers visible to**

								the naked eye.

In the light of above test reports of Federal Government Analyst, Central Drug Laboratory, Karachi an explanation letter of even number dated 11th June 2021 and 02nd, August 2021 issued by FID to M/s. Zafa Pharmaceutical Laboratories (Pvt) Limited, Plot No. B-10, Block-B, S.I.T.E. North Karachi, for explaining their position in the matter of manufacturing/selling of above mentioned Adulterated and Sub-Standard drug.

M/s. Zafa Pharmaceutical Laboratories (Pvt) Limited, Plot No. L-1/B, block 22, Federal "B", Area Karachi, 75950 vide their letter No. Nil dated 23th August,2021 requesting for retesting of Drug Zafixime 500mg Injection Batch No. 440, from NIH Islamabad. under section 22(5) of the drug Act 1976 for testing.

FID submitted the request of firm for retesting dated 25-08-2021.

M/s. Zafa Pharmaceutical Laboratories (Pvt) Limited, again requested for Appellate testing dated 07-10-2021.

Proceedings and Decision of 313th Meeting of Registration Board.

The Board after thorough deliberations and considering the facts of the case decided to ask/request Federal Government Analyst, Karachi to provide OOS investigation and complete testing record on which the product is declared as of Adulterated and Substandard quality.
The decision of Board has been communicated dated 16-12-2022 after approval of minutes.

M/s. Zafa Laboratories replied dated 11-01-2022, the conclusion of firm is reproduced as:

> *"In light of above investigation, product Water for Injection 5ml, Batch no. 799 was found as per specification. Therefore, OOS is not required against complaint."*

Response received from Central Drugs Laboratory, Karachi received through WhatsApp dated 14-03-2022 wherein the remarks of OOS Investigation Form are reproduced as:

> "Containing white fibers (WFI) visible to the naked eyes. The sample is of adulterated and substandard quality.

Technical Evaluation of the case:

- Water for injection was declared adulterated and substandard, containing white fibers visible to the naked eyes.
- Defects may not be equally distributed over the batch that's why it is not necessary for a Board or retention portion to be defective. Allowing retesting may result in false negative results and pose the risk to patient which can be avoided otherwise.
- Moreover, the remarks of CDL may be considered for further investigation of quality defect considering the statistical validity of sample size.

Proceedings and Decision of 316th Meeting of Registration Board.
The Board after thorough deliberations and considering the facts of the case decided:

i. To issue show cause notice for suspension/cancellation/ prosecution in Drug Court of the subject cited drug to M/s. Zafa Pharmaceutical Laboratories (Pvt.) Ltd., Karachi and called them for personal hearing before Registration Board.

Mr. Adnan Rizvi, Member of Board has recorded his note of dissent i.e. the sample should be sent to NIH for appellate testing.

Decision of 316th meeting of Registration Board has been communicated vide letter No. F.03-11/2022-QC (316-RB) dated 27-05-2022.

Firm has replied vide letter Nil dated 02-06-2022 wherein they again requested to send sample for appellate testing to NIH for physical testing.

Firm has been called for personal hearing.

Procedings and Decision of 320th Meeting of Registration Board.

M/s. Zafa Pharmaceutical Laboratories (Pvt) Limited, Karachi submitted vide Ref No. Nil dated 29-08-2022 that the concerned technical person was not available to attend the hearing due to unavoidable circumstances (rain and flood). They further requested for personal hearing in next meeting.

Decision: *"The Board after considering the facts of the case, request of the firm to grant another opportunity of personal hearing and after thorough deliberations acceded the request and provide them another opportunity of personal hearing."*

In view of decision of 320th meeting, they have been called for personal hearing.

Procedings and Decision of 321st Meeting of Registration Board.

Mr. Aquil Ahmed Rizvi, QA Manager and Mr. Ikram Habib, Manager Regulatory appeared before the Board. They inform that they have tested the retained sample of product and found it satisfactory and request to send the Board's portion for Appellate testing.

Registration Board after detailed discussion and considering the facts of the case decided:

"Sample of Sterile Water for Injection Batch No. 799 manufactured by M/s. Zafa Pharmaceutical Laboratories (Pvt) Limited, Plot No. B-10, Block-B, S.I.T.E. North Karachi will be sent to appellate lab for testing of visible particulate matter, on which the sample was declared as Adulterated and Substandard by CDL, Karachi."

Sample has been sent to NIH, Islamabad for appellate testing. The sample of sterile water for injection was declared as substandard by NIH. A show cause notice was served to Ms. Zafa Pharmaceutical Laboratories (Pvt) Limited, Karachi dated 10-03-2023. They have submitted their reply and request for personal hearing. ***It is also worth to mention here that another batch of same product i.e. water for injection Reg. no. 030217 batch No. 826 has again been declared substandard on the basis of sterility and bacterial endotoxin tests (Placed as next agenda item).***

Firm has been called for personal hearing vide office letter F.No. 3-26/2023-QC (329-RB) dated 30-05-2023.

Procedings and Decision of 329th Meeting of Registration Board.

No one appeared before the Board, however, M/s. Zafa Pharmaceutical Laboratories (Pvt) Limited, Karachi submitted their reply vide letter no nil dated 31-05-2023 that their authorized representative was unable to appear in the meeting due to personal leaves. They further requested to adjourn the case for next meeting.

Registration Board after considering the facts of the case along with another similar case of substandard sterile water for injection batch no. 826 of M/s. Zafa Pharmaceutical Laboratories (Pvt) Limited, Karachi (case no. 03). Further, two samples (Batch no. 739 and 751) took by Provincial inspector of drugs were also declared as adulterated and substandard. These batches were failed on Sterility test. Board after detailed discussion decided to club case no 1 and 3 and issue show cause notice with personal hearing under section 42 of Drug Act 1976 read with rule 24(17) of Drug (Licensing, Registering & Advertising) rules 1976, to the firm.

Case No. 02: MANUFACTURE & SALE OF SUB-STANDARD STERILE WATER FOR INJECTION BATCH NO. W-20017 & W-20024, MANUFACTURED BY M/S. MEDIATE PHARMACEUTICAL (PVT.) LTD., KARACHI.

The Federal Inspector of Drug, DRAP, Karachi visited the premises of M/s Mediate Pharmaceutical (Pvt.) Ltd., Karachi on 14-04-2021 wherein following samples along with other drugs were taken for the purpose of test/analysis on prescribed Form-3. Details are:

Name of Product	**Manufactured by**	**Reg. no.**	**Batch no.**	**Mfg. Date**	**Exp. Date**	**CDL remarks**
Hitaxime 1gm Injection (vial) Cefotaxime	Mediate Pharmaceutical (Pvt.) Ltd., Karachi	044109	V-20059	11-2020	11-2022	Standard.
Sterile water for injection (ampoule)	Mediate Pharmaceutical (Pvt.) Ltd., Karachi	053244	W-20017	07-2020	07-2023	Substandard on the basis of Bacterial endotoxin.
Hilixophin 500mg Injection (vial) Ceftriaxone	Mediate Pharmaceutical (Pvt.) Ltd., Karachi	044105	V-20085	12-2020	12-2022	Standard.
Sterile water for injection (ampoule)	Mediate Pharmaceutical (Pvt.) Ltd., Karachi	053244	W-20024	12-2020	12-2023	Substandard on the basis of Bacterial endotoxin.

02. Results of CDL on the basis of which sample under reference has been declared as Substandard are reproduced as under:-

i. Reports No. KQ.91/2021:

(STERILE WATER FOR INJECTION)

S.No.	**Test**	**Acceptance Criteria**	**Result**	**Reference**
1.	Description	Clear sterile water, free from visible particles, preserved in single dose glass or plastic container.	Complies.	USP 43
2.	Bacterial Sterility	Must be sterile.	Complies.	USP 43
3.	**Bacterial Endotoxin**	**Less than 0.25 EU per ml.**	**Does not comply.**	**USP 43**

(HITAXIME 1GM INJECTION)

S.No.	**Test**	**Acceptance Criteria**	**Result**	**Reference**
1.	Description	Offwhite powder in clear glass vial	Complies.	Mfg. Specs.
2	Identification	The identification test must identify Cefotaxime Sodium.	Complies.	USP 43
3.	pH	4.5 to 6.5	Complies.	USP 43
4.	Bacterial Sterility	Must be sterile.	Complies.	USP 43
5.	Bacterial Endotoxin	Not more than 0.20 EU per mg.	Complies.	USP 43
6.	Assay Cefotaxime (label claim 1gm/vial)	90.0% to 115.0%	105.0% complies	USP 43

NOTE: **Initial report has been released for the purpose to facilitate prompt regulatory action in larger public interest. Final report will be released after completion of further relevant tests.**

Remarks: *The sample is of **"Sub-Standard"** quality under the Drugs Act, 1976.*

ii. Reports No. KQ.92/2021:

(STERILE WATER FOR INJECTION)

S.No.	Test	Acceptance Criteria	Result	Reference
1.	Description	Clear sterile water, free from visible particles, preserved in single dose glass or plastic container.	Complies.	USP 43

(HILIXOPHIN 500MG INJECTION)

S.No.	Test	Acceptance Criteria	Result	Reference
1.	Description	Off white powder in clear glass vial.	Complies.	Mfg. Specs.
2	Identification	The identification test must identify Ceftriaxone Sodium.	Complies.	USP 43
3.	pH	6.0 to 8.0	Complies.	USP 43
2.	Bacterial Sterility	Must be sterile.	Complies.	USP 43
3.	Bacterial Endotoxin	Not more than 0.20 EU per mg.	Complies.	USP 43
6.	Assay Ceftriaxone. (label claim 500mg/vial)	90.0% to 115.0%	100.3% complies	USP 43

NOTE: **Initial report has been released for the purpose to facilitate prompt regulatory action in larger public interest. Final report will be released after completion of further relevant tests.**

Remarks: *The sample is of **"Sub-Standard"** quality under the Drugs Act, 1976.*

03. FID, DRAP, Karachi informed that the firm has requested for retesting. The firm stated that:

"[…] we are requesting you to retest Bacterial Endotoxin test of both WFI injections, for this purpose we retest samples in our QC Dept. with three different kits and find results as given below:

Test performed	***Bioendo***	***Lonza***	***Cape-Cod***
Bulk sample	*Fail*	*Pass*	*Pass*
Sample after autoclave	*Fail*	*Pass*	*Pass*
W-20017	*Fail*	*Pass*	*Pass*
GSK WFI SPW9/1 (02-2018)	*Fail*	*Pass*	*Pass*

04. As per decision of 313th meeting of Registration Board regarding appellate testing, firm and Federal Government Analyst, CDL Karachi has been asked to submit OOS investigation dated 26-01-2022.

05. M/s. Mediate Pharmaceutical Pvt Ltd., Karachi replied they conducted investigation but found no fail results. Firm has mentioned that they cross checked the recalled product and QC retention samples and

performed bacterial endotoxin test by using three different kits out of which results of Bioendo endotoxin kit were not satisfactory. Details are:

S.no	Reagent used	Results
Lonza Endotoxin Kit		
1	Lysate reagent	Satisfactory
2	Control standard endotoxin	Satisfactory
3	Lal reagent water	Satisfactory
Cape code Endotoxin Kit		
4	Lysate reagent	Satisfactory
5	Control standard endotoxin	Satisfactory
6	Lal reagent water	Satisfactory
Bioendo Endotoxin Kit		
7	Lysate reagent	Un-satisfactory
8	Control standard endotoxin	Un-satisfactory
9	Lal reagent water	Un-satisfactory

06. While CDL, Karachi submitted OOS investigation, the result was OOS is confirmed.

Technical Evaluation of the case:

- The product was declared sub-standard on the basis of results of Bacterial endotoxin.
- Endotoxin test performed by Gel Clot method both by firm and CDL as given in USP 43.
- The method is based on visual inspection of the sample after incubation for presence of gel or otherwise.

Procedings and Decision of 326th Meeting of Registration Board.

Out of Specification (OOS) investigations and testing records submitted by M/s. Mediate Pharmaceutical (Pvt.) Ltd., Karachi and CDL, DRAP Karachi was presented before Registration Board.

After Through discussion about (OOS) Investigation report submitted by the firm and deliberation the case in detail and decided

1. not to accede the firm's request for appellate testing of this product and
2. to issue show cause notice under Section 42 of the Drugs Act, 1976 and rules framed thereunder, for suspension / cancellation of product Sterile water for injection (ampoule) Registration # 053244 manufactured by M/s. Mediate Pharmaceutical (Pvt.) Ltd., Karachi and called for personal hearing before Registration Board in this instant case.

In view of Board's decision, they have been called for personal hearing.

Procedings and Decision of 329th Meeting of Registration Board.

Mr. Muzammil Mehmood Khan, Quality Control Manager of M/s. Mediate Pharmaceutical (Pvt.) Ltd., Karachi was appeared before the Board. He submitted the same stance mentioned in their OOS report. Board asked about non satisfactory results of OOS performed by firm, self-audit report and water system qualification for which he did not provide any justifiable reply.

Registration Board after thorough discussion and considering the facts of the case along with another similar case of decided:

- *Suspension of the Registration of Sterile Water for injection, Registration No. 053244 under section 42 of the Drugs Act, 1976 read with rule 24(17) of Drug (Licensing, Registering & Advertising) rules 1976, for six months or till verification of Root Cause Analysis (RCA) and Corrective and Preventive Action (CAPA) by a panel with satisfactory report; whichever is later.*
- *Submission of RCA and CAPA by the firm.*
- *Product Specific Inspection including verification of RCA and CAPA by panel of inspectors/experts to be nominated by Director QA/LT.*

AGENDA ITEM NO. 02- OOS INVESTIGATION

CASE NO. 03: **MANUFACTURE & SALE OF SUB-STANDARD STERILE WATER FOR INJECTION REG. NO. 030217, BATCH NO. 826 MANUFACTURED BY M/S. ZAFA PHARMACEUTICAL LABORATORIES (PVT.) LTD., KARACHI.**

The Federal Inspector of Drug-III / Assistant Director-XII, DRAP, Karachi inspected the premises of M/s. National Institute of Child Health (NICH) Rafeeqi Shaheed Road Karachi. on 03-02-2022 wherein the sample of drug along with other drugs were taken for the purpose of test/analysis on prescribed Form-3.

02. The Federal Government Analyst, Central Drugs Laboratory, Karachi declared the above said sample as "Sub-Standard" quality vide their test report No.KQ-2-22-000042 (Initial) dated 21st March 2022 and test report No. KQ-2-22-000041 (Final) dated 07th April 2022.

S. No.	Name of Drug	Reg; No	Batch No.	Mfg. Date	Exp. Date	Mfg.by	Result of CDL	Basis of Result
01	Zafixime 500mg Injection	027228	440	01-2021	01-2023	M/s. Zafa Pharmaceutical Laboratories (Pvt) Limited, Karachi.	Standard	-
-	Strile Water for Injection 5ml Ampoule	030217	826	08-2021	08-226	---do---	Substandard	**Sterility and bacterial endotoxin.**

03. FID, DRAP, Karachi informed that the firm has requested for retesting. The firm stated that:

i. "We have analyzed the sample of above batch in our QC laboratory and found to be standard quality, complying all the specifications of USP both physical and chemical.

ii. In this regard we again checked the Bacterial Endotoxin test in the laboratory with the specified specification (less than 0.25USP EU/ml) and the results complies the specification of USP. The sterility is under test because it takes 14 days to complete."

04. As per decision of 313th meeting of Registration Board regarding appellate testing, firm and Federal Government Analyst, CDL Karachi has been asked to submit OOS investigation dated 01-09-2022

05. Ms. Zafa Pharma, Karachi submitted testing method and test report. Federal Government Analyst, CDL Karachi submitted that OOS is valid.

06. Firm has submitted recall log as per prescribed formats. Area FID was requested to inspect the premises to reconcile/verify the quantities of stock.

Technical evaluation of OOS investigation:

- Firm has not submitted performance testing results of Bacterial Endotoxin test, moreover the sterility testing method is just refered to USP 43, however complete performance record including growth promotion test results as required under USP general chapter <71> for performance of sterility testing are not submitted.

- Further, submitted sterility testing data mentioned incubation results for 12 days whereas the required incubation period is 14 days' sterility observation period for growth of bacterial colonies.
- ***In addition, another sample of Water for Injection Batch No 799 has been declared substandard from CDL and NIH both***.

Procedings and Decision of 329th Meeting of Registration Board.

Registration Board after considering the facts of the case along with another similar case of substandard sterile water for injection batch no. 799 of M/s. Zafa Pharmaceutical Laboratories (Pvt) Limited, Karachi (case no. 01). Further, two samples (Batch no. 739 and 751) took by Provincial inspector of drugs were also declared as adulterated and substandard. These batches were failed on Sterility test. Board after detailed discussion decided not to accede the firm's request of retesting and further directed to club case no 1 and 3 and issue show cause notice with personal hearing under section 42 of Drug Act 1976 read with rule 24(17) of Drug (Licensing, Registering & Advertising) rules 1976, to the firm.

CASE NO. 04: MANUFACTURE & SALE OF SUB-STANDARD DRUG (TEMPRIN SUSPENSION) BATCH NO. TM070 MANUFACTURED BY M/S. KOHS PHARMACEUTICALS (PVT) LTD., P/8 S.I.T.E HYDERABAD.

The Federal Inspector of Drug, Karachi inspected the premises of M/s. KOHS Pharmaceuticals Pvt Ltd., Karachi. on 07-12-2022 wherein the sample of drug along with other drugs were taken for the purpose of test/analysis on prescribed Form-3.

Name of Product	Manufactured by	Reg. no.	Batch no.	Mfg. Date	Exp. Date	Remarks of CDL
Temprin suspension	Ms. KOHS Parmaceuticals (Pvt.) Ltd., Hyderabad.	061763	TM070	Dec 22	Nov24	Substandard on the basis of Assay test

02. The Federal Government Analyst, Central Drugs Laboratory, Karachi declared the above said sample as "Sub-Standard" quality vide their test report No.KQ-12-22-000248 dated 07-03-2023.

03. Results of CDL on the basis of which sample under reference has been declared as Sub-Standard quality are reproduced as under:-

S.No.	Test	Aceptance creteria	Result	Reference
1	Description	Pink coloured suspension	Pink coloured suspension containing while lumps with a hard cake of powder settled at the bottom of the bottle which cannot be re-dispersed on vigorous shaking. **Does not comply.**	Mfg. Specs.
2	Identification	The identification test must identify Paracetamol	Complies	BP 2022
3	Assay Paracetamol (Label claim 120mg/ 5ml)	95.0% to 105.0%	69.38%- **Does not complies**	BP 2022

Remarks:- 1) The sample is of **"Sub-Standard"** quality under the Drugs Act, 1976.

04. FID, DRAP, Karachi informed that the firm has requested for retesting. The firm stated that: they retested the QC sample and found as per specification i.e. 98.4%. they further added:

> "The physical condition of our suspension is clear and results are within the limits. May be your sample is not miscible and not shake well due to cold season and temperature so the percentage is decrease."

05. As per decision of 313th meeting of Registration Board regarding appellate testing, Firm and Federal Government Analyst, CDL Karachi has been asked to submit OOS investigation dated 19-04-2022

06. Ms. KOHS Pharmaceuticals (Pvt.) Ltd., Hyderabad submitted dated 02-03-2023 that they rechecked their sample which comply and it was standard. (Paracetamol 98.1%).

07. Firm has been directed to submit recall details as per Recall guidelines, reply awaited.

Technical Evaluation of OOS Investigation:

i. The product was declared as sub-standard on the basis Physical description and Assay test.
ii. There may be issues during formulation development, manufacturing processes, quality of API, and instability of product.
iii. Firm has requested for retesting of the product through Appellate Laboratory however, did not provide method of testing and OOS report, while CDL concluded that OOS is valid.

Proceedings and Decision of 329th Meeting of Registration Board.

Out of Specification (OOS) investigations and testing records submitted by M/s. KOHS Pharmaceuticals (Pvt.) Ltd., Hyderabad and CDL, DRAP Karachi was presented before Registration Board.

The Board deliberated the case in detail and decided not to accede the firm's request for appellate testing and to issue show cause notice under section 42 of Drug Act 1976 read with rule 24(17) of Drug (Licensing, Registering & Advertising) rules 1976, for suspension/cancellation/ prosecution in Drug Court of the subject cited drug to M/s. KOHS Pharmaceuticals (Pvt.) Ltd., Hyderabad and called them for personal hearing before Registration Board.

CASE NO. 05: MANUFACTURE & SALE OF SUB-STANDARD OPHTH-CARB STERILE INTRAOCULAR SOLUTION BATCH NO. OP154 MANUFACTURED BY M/S OPHTH PHARMA (PVT) LTD., KARACHI

The Federal Inspector of Drug, Karachi inspected the pharmacy of Ms. Aga Khan University Hospital, Karachi on 27-02-2023 on their complaint that the drug causes redness/irritation of eyes when used and their own lab also finds some bacterial rods/contamination upon microbial examination. FID took the sample of drug for the purpose of test/analysis on prescribed Form-3. Details are:

Name of Product	Manufactured by	Reg. no.	Batch no.	Mfg. Date	Exp. Date	Remarks of CDL
Ophth-Carb Sterile Intraocular solution	Ms. Ophth Pharma (Pvt.) Ltd., Karachi	026964	OP154	12-2022	11-2024	Sub-Standard on the basis of sterility test.

02. The Federal Government Analyst, Central Drugs Laboratory, Karachi declared the above said sample as "Sub-Standard" quality vide their test report No.KQ-2-23-000033 dated 08-03-2023.

03. Results of CDL on the basis of which sample under reference has been declared as Sub-Standard quality are reproduced as under:-

S.No.	Test	Aceptance creteria	Result	Reference
1	**Sterility**	Must be sterile	Does not comply	USPNF 2022

Remarks: 1) The Federal Inspector of Drugs concerned has referred the sample with remarks The sample is taken from Aga Khan University Hospital, Stadium Road, Karachi pharmacy on their complaint that the drug causes redness/irritation of eyes when used and their own lab also finds some bacterial rods/contamination upon microbial examination. Hence, sterility and other microbial bio-burden tests may kindly be carried out on priority". Therefore, sterility test has been performed only,

2)The sample is of "**Sub-Standard**" quality under the Drugs Act. 1976..

04. FID, DRAP, Karachi informed that the firm has requested for retesting. The firm stated following points:

i. "Before marketing of the product we had tested the sterility of the batch, it found satisfactory.
ii. On the basis of the sterility test report the batch has been dispatched.
iii. Furthermore, we had performed third party testing of sterility of the said batch.
iv. We haven't received any complaint from any other side regarding this batch.
v. We have repeatedly tested our product and the result also complies with USP standard (documents attached for your reference), we are confident that our product, OPHTH-CARB batch No. 154 complies to 100% United State Pharmacopeia.
vi. Ophth Pharma is producing Ophth Carb from early 2002 and serving institutes since about last 16 years. We take all the precautions at each and every processing step. All the raw material and distilled water used in production are subjected to LAL test prior to production.
vii. Storage condition at the end of the product purchaser is very important. Improper storage condition particular hot weather can alter the chemical nature of the product."

05. As per decision of 313th meeting of Registration Board regarding appellate testing, Firm and Federal Government Analyst, CDL Karachi has been asked to submit OOS investigation dated 19-04-2022

06. Ms. Ophth Pharma (Pvt.) Ltd., Karachi submitted OOS investigation and complete testing record. The conclusion of OOS investigation reports is reproduced as:

> "There are no significant risk factors detected in sterile manufacturing, and in quality control processes according to the joint inquiry, overall area qualification checks and manufacturing process assessments. The sterility reports' third-party confirmation is also convincing and backs up our internal investigation. For the sake of OOS inquiry, manufacturing processes and facility qualifications such as sterile area qualifications and terminal sterilization were thoroughly inspected and their conclusions were recorded. The retention samples evaluated by a third party were also reported to pass the appropriate sterility test of the product, which is strong evidence of good cGMP protocols. The total inquiry concluded that no substantial infractions were discovered."

07. OOS investigation from FGA, CDL Karachi has been received; final decision was OOS is valid. Remarks of Laboratory manager reproduced as:

> "Since the sample failed in repeat test with respect to sterility. It is of substandard quality."

08. Firm has been directed to submit recall details as per Recall guidelines.

Technical Evaluation of OOS Investigation:

i. Sterility report of CDL, Karachi showed that sample was failed on Day 6th of sterility test. While reports attached by firm showed the results were as per specification.
ii. Sample has been taken by FID, Karachi on a complaint received from Ms. Aga Khan Hospital, Karachi that the drug causes redness/irritation of eyes when used and their own lab also finds some bacterial rods/contamination upon microbial examination.

Proceedings and Decision of 329th Meeting of Registration Board.

Out of Specification (OOS) investigations and testing records submitted by M/s. Ophth Pharma (Pvt.) Ltd., Karachi and CDL, DRAP Karachi was presented before Registration Board.

The Board deliberated the case in detail and decided not to accede the firm's request for appellate testing and to issue show cause notice under section 42 of Drug Act 1976 read with rule 24(17) of Drug (Licensing, Registering & Advertising) rules 1976 for suspension/cancellation/ prosecution in Drug Court of the subject

cited drug to M/s. Ophth Pharma (Pvt.) Ltd., Karachi and called them for personal hearing before Registration Board.

CASE No. 06: <u>MANUFACTURE & SALE OF SUBSTANDARD LETIRIX SYRUP, BATCH NO. L2033, MANUFACTURED BY M/S. ALLIANCE PHARMACEUTICALS (PVT) LIMITED, PESHAWAR.</u>

Federal Inspector of Drug, DRAP, Peshawar visited the premises of M/s Alliance Pharmaceuticals (Pvt) Limited, 112-A, Hayatabad Industrial Estate, Peshawar on 16-10-2020 wherein the sample of Letirix Syrup, Batch No. L-0233, Manufactured by M/s. Alliance Pharmaceuticals (Pvt) Limited, Peshawar was drawn under Schedule-V (1) (C) of DRAP Act, 2012 read with section 18 (1) (C) of the Drugs Act, 1976 for the purpose of test/analysis. Details are as under;

S. N0.	Name of Drug	Reg. No.	Batch No.	Mfg. Date	Exp. Date	Mfg. By	Basis of Sub-Standard
01	Letirix Syrup	068438	L2033	10-020	09-022	M/s. Alliance Pharmaceuticals (Pvt) Limited, Peshawar	Assay does not comply

02. Federal Government Analyst, CDL, Karachi vide their test report No.IP.130/2020 dated 04-01-2021 declared the above said sample as of substandard quality. Test results of the CDL, Karachi are reproduced as under:

S.No.	Test	Specification	Result	Reference
01.	Description	Clear, colourless syrup which is free from black particles.	Complies.	Mfg. Specs.
02.	Identification	The identification test must identify Levocetrizine Hydrochloride.	Complies	Mfg. Specs.
03.	pH	3.0 to 5.0	3.90-Complies	Mfg. Specs.
04.	**<u>Assay</u>** **Levocetrizine 2HCl Label claim 2.5mg/5ml)**	90.0% to 110.0%	**69.5%** **<u>Does not comply.</u>**	Mfg. Specs.

Remarks: *<u>The sample is **"Sub-Standard"** under the Drugs Act, 1976.</u>*

03. The firm didn't agree to the results of CDL, Karachi and requested for retesting under Section 22(4) of the Drugs Act, 1976 and rules framed there under.

04. In light of Supreme court judgement of "C.P.1692-L/2020, C.P.1792-L/2020 and C.P.5-L/2021" and firm's request for appellate testing, the case was discussed in 307th meeting of Registration Board. Board decided:

"To direct the firm to submit justification/scientific grounds for Appellate testing within 7 days."

05. The decision has been communicated to the firm vide office letter of even number dated 29-09-2021.

06. M/s. Alliance Pharmaceuticals (Pvt) Ltd, Peshawar vide Ref. No. AL/QC/021/014 dated 07-09-2021 in response to the decision letter of 307th meeting of Registration Board dated 03-09-2021. The stance of the firm is as follows:

"With reference to your letter No.F.03-15/2021-QC (307-RB) dated 3rd Sep, 2021, in which we M/S Alliance Pharmaceuticals (Pvt) Ltd are directed to submit justification/scientific ground for Appellate testing by the Drugs Registration Board.

The Assay performed by Central Drugs Testing Laboratory of the cited above syrup on HPLC method while we M/S Alliance Pharmaceuticals (Pvt) Ltd adopted an extraction followed by UV/Visible Spectroscopic method, which is a valid method. (Method validation report attached).

Alter CDL Karachi Report we M/S Alliance Pharmaceuticals (pvt) Ltd retested the retain sample and market return of the same batch cited above on both HPLC and Extraction followed by UV and we observed interference in the retention time of API by an excipient on HPLC method.

As our product is of internal specifications and not included in any pharmacopeia, so we adopted Extraction followed by UV method. It is kindly requested to please consider our request for Appellate testing and perform the Assay of the batch cited above through extraction followed by UV method (Method and its results attached)."

07. Case was discussed in 313th Meeting of Registration Board, Board after thorough deliberations and considering the facts of the case decided to ask/request Federal Government Analyst, Karachi to provide OOS investigation and complete testing record on which the product is declared as of Substandard quality.

08. Decision was communicated vide office letter of even numbers dated 16-12-2021 with subsequent reminders dated 31-01-2022, 01-04-2022, 13-04-2022, 01-07-2022 and 25-10-2022. Response is still awaited. It is also important to mention that the sample has been expired.

Proceedings and Decision of 329th Meeting of Registration Board.

The Board deliberated the case in detail and decided not to accede the firm's request for appellate testing and to issue show cause notice under section 42 of Drug Act 1976 read with rule 24(17) of Drug (Licensing, Registering & Advertising) rules 1976 to M/s Alliance Pharmaceuticals (Pvt) Limited, Peshawar for suspension/cancellation/ prosecution in Drug Court of the subject cited drug and called Firm for personal hearing before Registration Board.

CASE No. 07: MANUFACTURING AND SALE OF SUB-STANDARD ALCAZAR INJECTION, BATCH NO.37, MANUFACTURED BY M/S PHARMEDIC LABORTORIES,16-KM MULTAN ROAD, LAHORE

01. Assistant Director (Import & Export), DRAP, Lahore, took the sample of product namely Alcazar Injection containing Diclofenac Sodium, Batch No.37, Mfg. Date 02-2021, Expiry date 02-2023 from the export consignment of the M/s Pharmedic Laboratories (Pvt). Ltd, 16-Km Multan road Lahore and send to CDL, Karachi for test /analysis purposes.

2. CDL vide their test/analysis report EXP-7-22-000007 dated 16-10-2022 declared, as of sub-standard quality on the basis of PH non-compliance with submitted reference manufacturers specification. Details of CDL report are given as under:

S. No.	Test	Acceptance Criteria	Result	Reference
1.	Description	A clear, almost colorless liquid filled in 3ml printed	Complies	Mfg. Specs

		ambered glass ampoule		
1.	Identification	The identification test must identify Diclofenac Sodium	Complies	Mfg. Specs
2.	pH	3.3 to 4.0	**8.10 Doesn't Complies**	Mfg. Specs
4.	Sterility	Must be sterile	Complies	USP 43
5.	Visible Particle Matter	Meet the requirements	Complies	USP 43
6.	Assay. Diclofenac Sodium (Label Claim 75mg/3ml)	90.0% to 110.0%	101.93% Complies	Mfg. Specs
7.	Endotoxin	Not more than 14.0 EU/mg of Diclofenac Sodium	Complies	Mfg. Specs

REMARKS: - The sample is of **Sub-Standard** quality under the Drug Act 1976.

3. A medical product alert for recall of substandard product from market and for uploading on DRAP website for information of general public was issued accordingly.

4. Assistant Director conveyed report of CDL to firm vide letter No. 11-02-2022 to the firm and inquired status of export consignment and also required names of management and technical staff for the firm and asked firm to explain their position in this regard.

5. Firm submitted their reply dated 31-10-2022 and intimated that consignment of 5237 packs is exported to Afghanistan and is consumed and no complaints received from importer, moreover they claim that they have followed Mfg specs and submitted their method of Analysis along with manufacturing product specifications PH range 7.8-8.8.

6. AD submitted the case to division of QA/LT vide letter No. 11731/2022 dated 15-12-2022 under section 19(7) of Drugs Act 1976 and schedule V of DRAP Act 2012 for action in respect of contraventions against M/s Pharmedic Labortories (Pvt) Ltd,16-Km Multan road, Lahore along with name of management of firm involved as under,

1. Waqar Ahmad Sheikh (CNIC No 35202-9152354-3) Director,
2. Shoaib Iftikhar Baig,(CNIC No. 35202-2797305-5) Production Incharge
3. Muhammad Numan Ahmad(CNIC No. 35202-2745122-9) Quality Control Incharge

7. Accordingly, CDL was asked to provide attested copy of MOA submitted by firm mentioning the range of p.H of manufacturing specification. CDL vide letter No.1-1/13, DRAP (CDL)/SRK dated 01-03-2023 submitted copy of MOA of Inj Alcazar, where in the pH range is mentioned as 3.3- 4.3.

8. Means while firm has submitted a corrigendum dated 07-04-2023 stating that the MOA which was submitted to CDL, Khi has typographical error/ overlook by analyst, regarding pH range specification of Inj. Alcazar as 3.3 – 4.0 and their actual manufacturer specification of Inj Alcazar is 7.8 – 8.8.As Injection Diclofenac Sodium is yet non compendial formulation therefore firm has manufacturing specification and firm has also submitted testing results of market available product of Inj. Diclofenac Sodium having pH. range of 7.8 – 8.8.

Proceedings and Decision of 329th Meeting of Registration Board.

The Board deliberated the case in detail and decided to issue show cause notice under section 42 of Drug Act 1976 read with rule 24(17) of Drug (Licensing, Registering & Advertising) rules 1976 for suspension/cancellation/ prosecution in Drug Court of the subject cited drug to M/s Pharmedic Laboratories (Pvt). Ltd., Lahore and called them for personal hearing in the forth coming meeting of Registration Board.
