MINUTES OF 329th MEETING OF REGISTRATION BOARD HELD ON 6th to 8th JUNE, 2023

Drug Regulatory Authority of Pakistan
T.F. Complex, Mauve Area, G-9/4
Islamabad.

329th meeting of Registration Board was held on 6th to 8th June, 2023 in the Committee Room, Drug Regulatory Authority of Pakistan, G-9/4, Islamabad.

The meeting was chaired by Dr. Muhammad Fakhruddin Aamir, Chairman, Registration Board, DRAP. The meeting started with recitation of the Holy Verses.

Following members attended the meeting:

1.	Lt. Gen.(R) Prof. Dr. Karamat A. Karmat, (HI-M, SI-M), Former Surgeon General Pakistan, Rawalpindi (On line)	Co-opted Member
2.	Mr. Muhammad Aslam, Additional Draftsman, M/o Law & Justice, Islamabad	Member
3.	Mr. Sartaj Khan, Drug Analyst. Rep of Director DTL, Govt. of KP	Member
4.	Mr. Muhammad Hafeez ur Rehman, DDC, Rep of Director DTL, Govt. of Punjab	Member
5.	Dr. Ali Jan, Director, DTL, Govt. of Baluchistan Quetta	Member
6.	Syed Adnan Rizvi, Director DTL. Govt. of Sindh. Karachi	Member
7.	Mr. Ajmal Sohail Asif, Director, QA&LT, DRAP, Islamabad.	Member
8.	Mr. Ahmad Din Ansari, Director, Division of BE&R	Member
9.	Ch. Zeeshan Nazir, Additional Director	Secretary
10.	Mr. Ghyour Ahmed, Assistant Director, Rep. of Director, MD&MC Division	Member
11.	Mr. Iftikhar A Chaudhary, Ex-Hospital Pharmacist, Lahore	Co-opted Member
12.	Dr. Qurban Ali, Ex-Director General, Veterinary Expert	Co-opted Member
13.	Dr. Khalid Ashfaque, Animal Husbandry Commissioner, M/o NFS	Co-opted Member

Mr. Nadeem Alamgir (Pharma Bureau), Mr. Jalal-ud-Din (PPMA) and Mr. Ziaulhaq & Mr. Amir Ilyas (PCDA) attended the meeting as observers.

Item No. I. Confirmation of Minutes of 326th meeting of Registration Board

326th meeting of Registration Board was held on 14th to 16th March, 2023. Accordingly, draft minutes of the meeting were prepared and circulated among the members through email on 03rd May, 2023 for their perusal / approval / comments (if any) by 08th May, 2023 (10 am). None of the members gave any comments. Hence minutes of 326th meeting of Registration Board stand approved.

Accordingly, fair minutes of 326th meeting of RB has been processed for perusal/approval of Chairman, Registration Board. After approval of Chairman, Registration Board, approved minutes of 326th meeting of Registration Board has been circulated among relevant Divisions / Sections for implementation / compliance of decisions.

Decision: Registration Board noted the information and unanimously confirmed the minutes of 326th meeting of Registration Board.

Item No. II. Confirmation of Minutes of 327th meeting of Registration Board

327th meeting of Registration Board was held on 13th April, 2023. Accordingly, draft minutes of the meeting were prepared and circulated among the members through email on 29th May, 2023 for their perusal / approval / comments (if any) by 01st June, 2023 (10 am). Mr. Ali Jan, Director, DTL, Baluchistan responded as ***"Agreed with the comments and decision of board for approval of minutes provided that all codal formalities are fulfilled"*** Rest of the members did not comment. Hence minutes of 327th meeting of Registration Board stand approved.

Accordingly, fair minutes of 327th meeting of RB has been processed for perusal/approval of Chairman, Registration Board. After approval of Chairman, Registration Board, approved minutes of 327th meeting of Registration Board has been circulated among relevant Divisions / Sections for implementation / compliance of decisions.

Decision: Registration Board noted the information and unanimously confirmed the minutes of 327th meeting of Registration Board.

Item No. III. Confirmation of Minutes of 328th meeting of Registration Board

328th meeting of Registration Board was held on 19th May, 2023. Accordingly, draft minutes of the meeting were prepared and circulated among the members through email on 19th May, 2023 for their perusal / approval / comments (if any) by 19th May, 2023 (1230 Hrs). Syed Adnan Rizvi, Director, DTL, Sindh through email responded as ***"Acknowledged. Agreed and endorsed the decision of policy board."*** Mr. Ajmal Sohail, Director, QA&LT Division, DRAP, Islamabad responded as ***"Agreed, please".*** Mr. Ali Jan, Director, DTL, Baluchistan responded as ***"Respected sir very appreciative step as inj- Heparin is out of stock in market since long. as it's emergency medicine has no alternative. I agree with Registration board's today's decision."*** Mr. Imranullah, Director, DTL, Peshawar responded as ***"Agreed with draft minutes."*** Hence minutes of 328th meeting of RB stand approved.

Accordingly, fair minutes of 328th meeting of RB has been processed for perusal/approval of Chairman, Registration Board. After approval of Chairman, Registration Board. Approved minutes of 328th meeting of Registration Board has been forwarded to Division of Biological Evaluation & Research for implementation / compliance of decisions.

Decision: Registration Board noted the information and unanimously confirmed the minutes of 328th meeting of Registration Board.

Item No. IV. Miscellaneous Agenda Items:

Case No. 1 Expert Working Group for the review of "Human Formulations of Pharmaceutical Drug Products":

Human Pharmaceutical Formulation Products are being registered on the basis of evidence of approval of the formulations by any of the reference regulatory authorities adopted by Registration Board in 275th meeting. PE& R division has come across cases wherein various reference regulatory authorities have declared varying particulars regarding, formulation, manufacturing method, dosage administration etc. Also there are formulations which had been previously authorized by the reference regulatory authorities but have been declared as "Discontinued" recently for which the reason has not been evident.

For the above referred reasons and other issues regarding the review of formulations it is proposed that an Expert Working Group for **"Human Formulations of Pharmaceutical Drug Products".**

Decision: Registration Board while acknowledging the above proposal from PE&R Division authorized its Chairman for the constitution of Expert Working Group for "Human Formulations of Pharmaceutical Drug Products".

Case No. 2 Review of Reference status of "Cephradine for suspension" 125mg/5ml":

Registration Board in its various meetings deferred the cases of **Cephradine for suspension" 125mg/5ml** due to discontinued status of the said product by USFDA and non-availability of evidence of approval in other reference regulatory authorities. The Discontinued status by US FDA has not been elaborated whether it was due to safety efficacy reason or on basis of commercial reasons.

Cephradine for suspension has been approved by MHRA of UK in strength of 250mg/ml while the 125mg/ml strength has also been previously registered in Pakistan.

The matter is placed before the Board for further deliberation please.

Decision: Registration Board referred the formulation of "Cephradine for suspension" 125mg/5ml" for review to Expert Working Group for "Human Formulations of Pharmaceutical Drug Products", constituted in instant meeting.

Case No. 3 Minutes of the meeting of working group for deliberation regarding semaglutide.

Registration Board in its 316th meeting decided to constitute a working group for deliberation regarding semaglutide. Accordingly, Chairman Registration Board constituted the working group.

The 1st meeting of working group for deliberation regarding semaglutide was conducted on 01-11-2022 at 10:00 AM in committee room of DRAP. The meeting was chaired by Ch. Zeeshan Nazir Bajar, Additional Director, PE&R Division. The meeting started with recitation of the Holy Verses.

The following attended the meeting:

1. Ch. Zeeshan Nazir Bajar, Additional Director, PE&R Division, DRAP.
2. Mr. Saadat Ali Khan, Assistant Director, BE&R Division, DRAP.
3. Dr. Muhammad Haseeb Tariq, Assistant Director PE&R Division, DRAP.
4. Mr. Nadeem Alamgir (Observer on behalf of Pharma Bureau)
5. Mr. Muhammad Imran Iqbal (Observer on behalf of Pharma Bureau)

No observer from PPMA attended the meeting and PPMA secretary general through its letter dated 29-October 2022 requested to delay the subject meeting for 10-15 days and informed that few technical members from South wish to join however they are travelling for CPHI. The meeting was therefore ended without any final conclusion.

The 2nd meeting of working group for deliberation regarding semaglutide was conducted on 03-05-2023 at 10:00 AM in committee room of DRAP. The meeting was chaired by Ch. Zeeshan Nazir Bajar, Additional Director, PE&R Division. The meeting started with recitation of the Holy Verses.

The following attended the meeting:

1. Ch. Zeeshan Nazir Bajar, Additional Director, PE&R Division, DRAP.
2. Mr. Muhammad Kashif, Deputy Director, BE&R Division, DRAP.
3. Dr. Muhammad Haseeb Tariq, Deputy Director PE&R Division, DRAP.
4. Mr. Nadeem Alamgir (Observer on behalf of Pharma Bureau)
5. Mr. Hasnain Ahmad (Observer on behalf of Pharma Bureau)
6. Mr. Siraj Mehmood (Observer on behalf of Pharma Bureau)
7. Mr. Jalal Uddin (Observer on behalf of PPMA)
8. Mr. Imtiaz (Observer on behalf of PPMA)
9. Mr. Shaharyar Khalid (Observer on behalf of PPMA)

Mr. Muhammad Kashif attended the meeting as a representative from Division of Biological Evaluation & Research in place of Dr. Muhammad Ahsan Hafiz, Deputy Director, BE&R Division, DRAP.

CONCLUSION & RECOMMENDATIONS OF THE COMMITTEE:

The committee thoroughly reviewed the matter, considered the point of view and documents submitted by PPMA and Pharma Bureau, and the recommendations from the representative from Division of Biological Evaluation & Research. The committee observed that following important points:

1. Semaglutide is a drug product produced using recombinant DNA technology in yeast (Saccharomyces cerevisiae) as evident from the assessment reports of European Medicine Agency as well as Food and Drug Administration.
2. The definition of Biologicals under Schedule-I of DRAP Act, 2012 which specifies that *biotechnology products which are primarily manufactured using recombinant DNA, recombinant RNA, hybridoma technology or other processes involving site specific genetic manipulation techniques*, does not support the stance of PPMA regarding the number of amino acids as per USFDA definition, for dealing semaglutide product as pharmaceuticals.
3. The innovator's product is manufactured in a dedicated facility for manufacturing of Biological products.
4. Manufacturing of Biological products requires dedicated and self-contained facilities as per clause
   5.2 of Schedule B-1 of the Drugs (Licensing, Registering & Advertising) Rules, 1976, under the Drugs Act, 1976.
5. For approval of Biological products, it is essential that similarity has been thoroughly investigated and backed up with sufficient data to make the bridging to the reference product acceptable.
6. Registration Board has already approved Semaglutide in Injectable and Tablet dosage form for the innovator product "Ozempic® Dual Dose" and "Rybelsus Tablet" of M/s Novo Nordisk A/S, Novo Alle, DK-2880 Bagsvaerd, Denmark in 293rd and 308th meeting as a biological drug product respectively.

Based upon the above stated points, the committee recommends that Semaglutide shall be considered as a biological drug product for local use as well as for export, and be dealt by the Division of Biological Evaluation & Research. The manufacturing of this product shall be performed in dedicated and self- contained facilities for Biological drugs as per clause 5.2 of Schedule B-1 of the Drugs (Licensing, Registering & Advertising) Rules, 1976.

Following cases have been received in Pharmaceutical Evaluation Cell.

Submitted for consideration by the Board, please.

Decision: Registration Board deferred the case for further deliberation.

Case No. 4 Monograph of Rifaximin Tablet in BP

Division of Quality Assurance and Lab Testing has referred the instant matter through e-office Dy. No. 348/2023-E/QALT. M/s Sami Pharma, Karachi vide its letter dated 05.09.2022 addressed to Director PE&R Division / Chairman Registration Board has submitted the following:

Dear Sir,

Sub.: Monograph of Rifaximin Tablets in BP 2022

Ref.: Our Product Nixaf 550mg Tablet & Nixaf 200mg Tablet bearing Registration Nos. 073700 and 076310 respectively

We would like to respectfully submit following facts for your kind consideration:

1. *BP 2022 has lately introduced monograph of Rifaximin tablets attached herewith as Annex - A*
2. *Since the introduction of its monograph in BP, we are bound to follow the same and modify our claim as per BP 2022*
3. *However, upon analyzing against BP 2022, we have come across with following observations:*

1. ***Standard preparation:*** *Standard of 0.02% w/v for dissolution test i.e. 20mg of Rifaximin EPCRS but reference standard does not dissolve completely even on vigorous sonication and stirring*
2. ***Reading on spectrophotometer:*** *It does not mention the cell path length and when we measure the absorbance of standard solution using 1cm quartz cell at 290 nm using dissolution medium as compensation solution, absorbance value found around 4 which is even more than the upper limit of instrument*
3. ***Dissolution:*** *Unfortunately neither competitor's nor ours comply with it (NLT 75%) (Q), on changing the method of standard preparation i.e. first dissolve the standard in little amount of methanol*

   Facing the above stated issues, we contacted BP Commission who graciously acknowledged our view point and agreed to forward it to their Advisory Group, whose meeting is due to be held in September 2022; copies of communication exchanged are attached as Annex - C1 and C2.

   In addition to the above, we are currently following the USFDA dissolution method, published in USFDA dissolution data base and our products comply with the criteria of NLT 75%(Q) after 90 minutes – Annex - D and E.

   We hope below table will fully explain the situation:

Condition	***BP 2022***	***USFDA***	
	For both 200 and 550mg Tablets	***200mg***	***550mg***
Apparatus	*II (Paddle)*	*II (Paddle)*	*II (Paddle)*
RPM	*50 Revolutions per minute*	*75 Revolutions per minute*	*75 Revolutions per minute*
Dissolution Medium	*Dissolve 13.6g of Sodium Acetate in 800ml water, add 6ml of Glacial Acetic Acid and dilute to 1000ml using water. Add 2g of Sodium Lauryl Sulfate and mix*	*0.1M Sodium Phosphate buffer pH 7.4 containing 0.45% Sodium Lauryl Sulfate*	*0.1M Sodium Phosphate buffer pH 7.4 containing 0.8% Sodium Lauryl Sulfate*
Time interval	*60 minutes*	*10, 20, 30, 45, 60, 90 and 120 minutes*	*10, 20, 30, 45, 60, 90 and 120 minutes*
Volume	*900ml*	*1000ml*	*1000ml*

From the above comparison, it is clear that USFDA dissolution medium is entirely different from that of BP 2022.
USFDA also recommends different concentration of sodium lauryl sulfate because this drug is classified in BCS class IV.

In light of above discussion, which we hope you would endorse too, we would like to continue to market the product on "Manufacturer's Specs." till such time the situation is clarified.

Later on the firm has submitted another request vide letter dated 03.04.2023 addressing Director QA&LT Division as well as Director PE&R Division / Chairman Registration Board. The firm has also submitted the following documents:

1. Correspondence of the firm M/s Sami Pharma, Karachi (through Muhammad Imtiaz; muhammad.imtiaz@samipharma.com.pk) with British Pharmacopoeia Secretariat (through Peter Crowley; peter.crowley@mhra.gov.pk). The first email was sent from Sami Pharma to BP on 26.03.2022 wherein the firm stated difficulty faced by them while testing their product rifaximin tablet as per BP 2022 monograph. The firm also mentioned that they have also performed this testing after amendments in certain parameters including standard preparation and cell path length. The email was responded by BP on 27.04.2022, wherein they inform that the already available dissolution method in BP monograph was based on conditions used in an academic study. They requested further data from the firm which demonstrates the suitability of their analytical amendments, and informed to place this data in the next meeting of BPs Antibiotics Expert Advisory Group. The firm submitted detailed data on 07.05.2022. Mr. Peter Crowley from BP informed the firm on 20.09.2022 that the expert advisory group confirmed that the analytical amendments proposed by the firm should be specified and that they will prepare a letter of intent for publication on the website and the revised monograph of rifaximin tablet will be published in BP 2024.
2. Specifications and analytical method for their product Nixaf (Rifaximin) 200mg and 550mg Tablet.

G:\EORWeb\Download?AttachmentId=9902929 BP published Notice of intent to revise BP monograph for rifaximin Tablet on 10.10.2022 (https://www.pharmacopoeia.com/file/Letter-of-intent_Rifaximin- Tablets_BP2023.pdf). The contents of the notice of intent are as under:

It has come to our attention that in the Dissolution test, Solution A should be adjusted to pH 5.0 with glacial acetic acid and that the test and standard solutions should be diluted to a concentration of 0.003% w/v of Rifaximin. The monograph will therefore be revised to reflect these changes in a future publication.

Please accept this as a notice of intent to amend the monograph on behalf of the British Pharmacopoeia Commission. This letter is for information only and does not represent a legally-enforceable standard. The revised monograph will be published in a future edition of the British Pharmacopoeia - the current target publication is the BP 2024, which will come into force on 1st January 2024.

If you have any questions concerning this letter, please do not hesitate to contact the British Pharmacopoeia Secretariat (BPCOM@mhra.gov.uk).

Submitted for consideration of the Board please.

Decision: After detailed celebration/discussion, the board decided to acceded to the request of firm to continue to market the product on "Manufacturer's Specs." till such time the situation is clarified and the division of QA/LT will directly communicate with BP for clarification.

Case No. 5 Cefoperazone Sodium & Sulbactam Sodium for Injection (JP Specifications)

PPMA has submitted a request dated 10th April 2023 regarding Cefoperazone Sodium & Sulbactam Sodium for Injection. The request of PPMA is as under:

With reference to the captioned subject, we would like to respectfully submit that the subject product, of standard quality, is being produced by several local pharmaceutical manufacturers since long; its monograph has been published in Japanese and Chinese Pharmacopoeias both.

DRAP is now insisting on manufacturing this product by following JP specifications; after a detailed study, attached herewith, we noted that:

1. M/s. Pfizer (the Innovator) is manufacturing this product in different regions via Dissolution Crystallization Method (meeting Chinese Pharmacopoeial specifications) as well as Unit Lyophilization (meeting Japanese Pharmacopoeial specifications)

2. Pfizer's product specification conforming to Chinese Pharmacopoeia is stringent as compared to the Japanese Pharmacopoeia specification

Below table summarizes key points of both specifications for kind consideration:

TABLE OF COMPARISON AND JUSTIFICATION

Description	Unit Lyophilized (JP)	Dissolution Crystallization Method (Ready to Fill Product)
Innovator / Originator	Pfizer	Pfizer
Availability in SRA Countries	Japan	Poland, Slovakia, Lithuania, Czech Republic, Italy, Bulgaria (See attached EMA list)
Availability in non-SRA countries	Not available	China, Pakistan, India, Bangladesh, Indonesia, Malaysia and Brunei
Finished product availability in Pharmacopeia	JP (Japanese Pharmacopeia)	ChP (Chinese Pharmacopeia)
Stability of product	Less stable due to the high hygroscopicity (Please see attached study of Zhuhai)	More stable (Please see attached stability results)
Impurities level	Specifications of impurities is higher than dissolution crystallization method (See comparison of JP, ChP and vendor specifications)	Specifications of impurities is lower than unit lyophilized product (See comparison of JP, ChP and vendor specifications)
Water Content	1% but not stabilizing the product than dissolution crystallization method	4% but not impacting the stability and also having low impurities level than unit lyophilization product (low water content)
Quality & Safety	Established in Japan and product is available in Japan since long	1. Established in EU and other countries (i.e. Malaysia etc.) and freely available throughout the world 2. Stability studies results also found satisfactory over its shelf life and presence of water content of 3-4 % has not impact
Degradation	Having higher degradation (See attached results)	Having lower degradation than unit lyophilized product
Market share	Only in Japan	Rest of the world

Based on aforementioned evaluation, it can easily be inferred that the product manufactured through Dissolution Crystallization Method is more stable and is being used more frequently than product manufactured through Unit Lyophilization product, which is registered and available in Japan only.

We hope that the above, along with enclosed documents, will be found in order and approval will so kindly be granted for which we submit our best thanks in advance.
With

profound

regards,

Sincerely

yours,

The letter also contains the following study report.

Scope: This justification is addressing the request of following In-house Specifications for Cefoperazone Sodium & Sulbactam Sodium for Injection, instead of JP specifications.

Justification: Said product is a combination of two APIs i.e., "Cefoperazone Sodium" & "Sulbactam Sodium". Individual monographs of both API's are available in USP.

JP monograph of "Cefoperazone Sodium & Sulbactam Sodium for Injection", claimed the test for Uniformity of Dosage Unit should comply the requirement of 'Mass Variation' when performed via <6.02>JP. Where, <6.02> JP clearly indicates that in case of a solid dosage form in single dose package, having multiple components (as the case of said injection), 'Mass Variation' test will be performed if the solution is freeze-dried in final container otherwise Content Uniformity test need to be performed.

This clearly shows that the product mentioned in JP monograph is a unit lyophilized (freeze-dried solution) product, while we are manufacturing a product by direct filling of powder aseptically into the final container and hence both are considered as different products, which can have different product specifications. Therefore, we are requesting for in-house specifications for the subject product based on following discussions.

API Manufacturing Process:

As per current industrial practices, Cefoperazone Sodium is mainly manufactured by either lyophilization method or dissolution crystallization method. The technical comparison of API manufactured via both methods is as follows:

S. No.	Parameter	Lyophilization Method	Dissolution Crystallization Method
1	Deployment / Utilization	Rarely used preparation method	Mostly used preparation method
2	Impurities Level	High	Low
3	API Stability	Relatively Poor	Relatively Good
4	Degradation Rate	Fast	Slow

Each of the above parameters are discussed in detail below:

1. Manufacturing Process Utilization

Following is the difference in manufacturing process of the two most commonly used preparation methods for Cefoperazone Sodium:

Parameters	Lyophilization Method	Dissolution Crystallization Method
Manufacturing Process	Reaction product of Cefoperazone acid and sodium alkaline compounds are directly placed into the lyophilizer	Dissolve the solute in water or other organic solvents, and then add the solvent that can reduce the solubility of the solute to the crystallization, (to promote rapid precipitation of solute)
Moisture Removal	Residual moisture is removed through vacuum lyophilization method	Residual moisture is removed through filtration and/or drying method
Water Content	≤1.0% Due to lyophilization method as it does not contain crystal water	3.0 to 4.0% Due to presence of one molecule of crystal water
Particle Shape	Obtains amorphous Cefoperazone Sodium powder	Mostly obtains needle shaped crystals
Quality	Quality of final substance is relatively poor	Better particle size and quality

Utilization	Employed by few API manufacturers	Mostly employed by API manufacturers

Based on above table, the most frequency used API preparation method is 'Dissolution Crystallization Method' due to its ability to generate better quality and stable product as compared to 'Lyophilization Method'

2. Impurity Level:

Following is the specification comparison of impurities in **Cefoperazone Sodium** (API) from different pharmacopoeia:

Parameters	**JP**	**Ph. Eur.**	**USP**	**CHP**
Water content	≤ 1.0%	≤ 5.0%	≤ 5.0%	≤ 5.0%
Related Substances	Impurity I ≤ 5.0%	Any other impurity ≤ 1.5%	N/A	Impurity A ≤ 3.0%
	Impurity II ≤ 1.5%			Any other impurity except impurity A ≤ 2.0%
	Total impurities ≤ 7.0%	Total impurities ≤ 4.5%		Total impurities except impurity A ≤ 3.0%

Above data clearly shows that the material specifications proposed by JP have higher impurity allowance levels as compared to the impurity limits defined by other pharmacopeia; showing that the API manufactured via lyophilization process to meet JP requirement has its intrinsic property for generation of higher level of impurities as compared to the manufacturing process via dissolution crystallization process.

In addition, following is the specification comparison of impurities in **Cefoperazone Sodium for Injection** (Finished Pharmaceutical Product) from different pharmacopoeia:

Parameters	**JP**	**CHP**
Water content	≤ 1.0%	≤ 5.0%
Related Substances	Impurity I ≤ 5.0%	Impurity A ≤ 3.0%
	Impurity II ≤ 1.5%	Any other impurity except impurity A ≤ 2.0%
	Total impurities ≤ 7.0%	Total impurities except impurity A ≤ 3.0%

The specifications of Cefoperazone for injection also contains similar picture as API; where JP using Lyophilized product, whereas ChP using the dissolution crystallized API and hence related substances specifications of JP are broader than ChP, which clearly indicates that JP material allows higher impurity level in final product in comparison to ChP material.

Similarly, following is the specification comparison of impurities for **said product** i.e., combination of '**Cefoperazone Sodium & Sulbactam Sodium**' from different pharmacopoeia

Parameters	**JP**	**CHP**	**API Manufacturer**
Water content	≤ 1.0%	≤ 4.0%	≤ 3.0%
Related substances	R. Substance I ≤ 7.0% R. Substance II ≤ 2.0% R. Substance III ≤ 2.0% Sulbactam Penicillamine ≤ 1.0%	Cefoperazone Impurity A ≤ 1.5% Cefoperazone Impurity C ≤ 0.5% Any other impurity ≤ 1.5% Total impurities except Cefoperazone impurity A & C ≤ 3.0 %	Cefoperazone Impurity A ≤ 1.5% Cefoperazone Impurity C ≤ 0.5% Any other impurity ≤ 1.5% Total impurities except Cefoperazone impurity A & C ≤ 3.0%

It is to be noted that Impurity C given in CHP and API Manufacturer's specs is equivalent to Related Substances I as per the proposed relative retention by JP. Furthermore, all the impurities mentioned in ChP specifications are stringent and/or comparable with JP requirements.

3. API Stability & Degradation Rate:

As already discussed above, product complying JP specification is manufactured via lyophilization method, and it does not contain crystal water.

Therefore, it has a low moisture profile (i.e. ≤ 1.0%) resulting in its strong hygroscopicity & high affinity towards rapid degradation due to accumulation / introduction of free water.

On the other hand, Cefoperazone Sodium produced by dissolution crystallization method contains one molecule of crystal water.

Therefore, the hygroscopicity of non-JP grade subject material is low, resulting in low affinity towards degradation.

Based on above scientific discussion, the stability of Cefoperazone Sodium manufactured via dissolution crystallization process (Complying non-JP Specs.) is better as compared to the API stability produced via lyophilization process (Complying JP Specs.)

Reference / Comparator Product:

Cefoperazone Sodium & Sulbactam Sodium Injection by dissolution crystallization method is the brand of M/S Pfizer and being manufactured & marketed in different countries as follows:

Brand Name	Manufacturer / Marketer	Country
Sulperazon for I.V. Injection	Pfizer Japan Inc.	Japan
Sulperazon 1g	Pfizer Polska Sp. Z O.O.	Poland
Sulperazon 2g	Pfizer Polska Sp. Z O.O.	Poland
Sulperazon	Pfizer Europe Ma Eeig	Slovakia
Sulperazon	Pfizer Europe Ma Eeig	Slovakia
Sulperazon	Pfizer Limited	Lithuania
Sulperazon IM/IV	Pfizer, Spol. S R.O.	Czech Republic
Sulperazone	Pfizer Italia S.R.L.	Italy
сулперазон	Pfizer Europe Ma Eeig	Bulgaria
Sulperazon	Pfizer Indonesia	Indonesia
Magnex / Magnex Forte	Pfizer India	India
Sulperazon	Pfizer USA	For Malaysia & Brunei

Cefoperazone Sodium & Sulbactam Sodium Injection is the brand of M/S Pfizer and being marketed in India, Nepal and Sri Lanka as well with the brand name of MAGNEX & MAGNEX FORTE. Similarly, Cefpran Injection of M/s. Ontech Corporation is a registered brand of said product in Pakistan. Samples of both products were tested and water content results were found within the range of 2 – 4% (as per ChP requirement), which is in line with the product manufactured using material via dissolution crystallization method.

In addition to it, Sulperazon Injection (M/s. Pfizer) available in different countries including Bulgaria, Indonesia, Malaysia & Thailand is filled in moulded glass vials and there are no cuts on the rubber stopper. It shows that the product is not manufactured by reference product manufacturer via unit lyophilization process as desired by JP. (Pictures are attached for reference).

Sulperazon Injection 2g (Cefoperazone Sodium & Sulbactam Sodium) of M/S Pfizer from Czech Republic, Europe also clearly indicates that the final product is not a lyophilized unit as molded glass vial is used without cuts in rubber stopper. Therefore, it is clear that the reference product is not following JP specifications in European region as well. (Pictures are attached for reference).

On the other hand, Cefoperazone Sodium & Sulbactam Sodium Injection from M/S Pfizer available in Japan is unit lyophilized, as desired by JP.

Secondly, innovator product having direct powder filling process (i.e., having API via dissolution crystallization method) is in line with the monograph already published in Chinese Pharmacopeia (CHP)

The above discussion clearly shows that the Reference & Comparator Products for the said API combination exist internationally in dosage forms addressing lyophilized form (i.e. JP Specifications) only in Japan, as well as dissolution crystallized form in rest of the world (i.e., non-JP or Chinese Pharmacopoeia Specifications).

Product (In-House Specs) Efficacy & Availability:

Cefoperazone Sodium & Sulbactam Sodium Injection range is 3rd generation Cephalosporin that is regularly used in hospitals for the eradication of respiratory tract, urinary tract as well as acquired bacterial Infections. Product is available in market for more than 20 years with remarkable quality, efficacy and stability.

Moreover, please note that based on the product development as well as review of satisfactory stability studies and all above facts, it can be concluded that in-house/ChP defined limit of water content do not have any critical quality impact on said product.

Product Availability for Public Health / Patient:

Current database shows that approximately 222 different brands of Cefeperazone Sodium & Sulbactam Sodium Injection Range are registered by DRAP and available since 2003. Out of which, more than 40 products are registered in last 05 years period showing the increase patient demand & requirement of the said product

In addition to it, strength wise data as per IMS of different brands of the said product is as follows:

Strength	MAT ~ 09/2022	MAT ~ 09/2021	MAT ~ 09/2020	MAT ~ 09/2019	MAT ~ 09/2018
2g	6,792,865	6,431,668	3,488,501	2,990,379	2,423,560
1g	3,688,955	3,287,367	2,083,691	1,938,962	1,625,299
500mg	1,347,140	855,093	600,177	575,429	474,375
Total	11,828,960	10,574,128	6,172,369	5,504,770	4,523,234

The above data shows that there is a high demand & continuous need of the said product in market due to its desired quality, efficacy as well as reliability and all of the identified brands in above data are complying with In-house specifications similar to that of reference product available in SRA countries

Only 01 SRA country (Japan) is following unit lyophilized dosage form of the product while 06 European Union countries (Poland, Slovakia, Czech Republic, Italy, Lithuania & Bulgaria) have the said product via dissolution crystallization material

Conclusion:

On the basis of above justification, we are summarizing the following:

1. JP demands product via unit lyophilization process
2. Raw Material produced by lyophilization process is less stable and has high level of impurities in comparison to the raw material manufactured by dissolution crystallization

method

3. The quality & efficacy of API and subsequent FPP is not effected due to availability of 3 – 4% water in it based on stability data and it also complies with the ChP (Chinese Pharmacopeia)
4. Internationally, the reference / comparator product from M/S Pfizer exist in both JP as well as non-JP specifications
5. Combination of Cefoperazone Sodium & Sulbactam Sodium is effective as well as in high demand in market
6. Innovator product available in European region is in line with the product monograph already published in Chinese Pharmacopeia (CHP)

Based on above justification, we humbly request to you kindly accept the said product with "Innovator's Specifications", where the API used in product manufacturing is complying with Chinese or equivalent pharmacopoeia.

DRAP Authority in its 157th meeting also considered the request of PPMA and decided as under: "*The authority notes that the technical forum to address this case in Registration Board therefore, PPMA is advised to approach the Registration Board along with scientific rationale and justification for in-house specifications versus specification in the Japanese pharmacopoeia for this particular combination*".
Submitted for consideration of the Board please.

Decision: Registration Board while considering the above presented information noted the fact that JP monograph of "Cefoperazoene+Sulbactam dry powder for injection" is particular for the drug product manufactured by way of "Freeze-dried (Lyophilized) from solutions in final container while the products being manufactured by using "ready to fill" powder may have different quality profile hence after thorough deliberation, Board decided as under:

i. **Registration applications of "Cefoperazoene+Sulbactam dry powder for injection" may be approved either with Innovator's specifications or Japanese Pharmacopoeia specifications, as per the submission of the applicant.**

ii. **Registration applications in instant meeting may also be decided accordingly.**

Case No. 6 Ciprofloxacin HCl Oral Dry Powder Suspension

PPMA has submitted a request dated 17th March 2023 regarding Cefoperazone Sodium & Sulbactam Sodium for Injection. The request of PPMA is as under:
Ciprofloxacin is an effective Fluoroquinolone which is available in different dosage forms viz. Tablets, Infusions and Oral Dry Powder Suspensions with its different salts viz. Hydrochloride, Lactate etc. as required.

Since 2007, over 100 million bottles have been prescribed in Pakistan by medical practitioners with full satisfaction; desired results were timely obtained and no adverse reaction has been reported till date; last 5 years' IMS data for 125 mg and 250 mg Oral Dry Powder Suspension for retail sales, excluding institutional sales, is attached for ready reference.

This drug is also being regularly procured and used in Government Institutions and renowned private hospitals / institutes viz. Agha Khan, Indus, NICH, PIMS, SIUT and Children's Hospital to name a few.

It may please be noted that Bayer's CIPRO Oral Suspension is a combo pack; one bottle contains taste masked granules while its diluent is packed in another bottle as shown in the picture below:

Cost of the diluent, if one succeeds to develop it, will be more than the cost of dry powder suspension being manufactured locally; accordingly, revised MRP of the newly developed product would be more than double of its approved MRP which, in present circumstances, few patients would be able to afford while majority would be deprived of this effective drug. Moreover said diluent is not a drug hence it's manufacturing in Pharmaceutical Plant is also required to be considered according to current guidelines

Most of the Registration holders of Ciprofloxacin Suspension do not have Liquid Section, hence it will be a big problem for them to get it manufactured from other Manufacturers on Toll basis as to how they will get these diluents registered on Toll manufacturing arrangement
It is worth mentioning that due to enormous cost of combo pack, Bayer has NOT applied for its registration either for local manufacturing or import in finished form.
In view of the above, it is earnestly requested that the august Board may so kindly suspend its earlier decision, inform it to all concerned so that local manufacturers may continue its production as per approved formulations of Ciprofloxacin HCL without any threat/ fear from Drug Inspectors and Laboratories who have started declaring the drugs as Misbranded/ Sub-standard.

With profound regards

Sincerely yours,

Dated: 16-03-2023

Regulatory history of Ciprofloxacin suspension considerations by Registration Board

290th meeting of Registration Board

Registration Board after through deliberation decided to approve the formulation of ciprofloxacin granules for oral suspension containing ciprofloxacin base. The Board authorized its Chairman to issue registration letters in approved cases where revision / correction of salt form and granules of the formulation is required after submission of requisite fee.

1. All registration holders of ciprofloxacin granules for oral suspension shall ensure the supply of ciprofloxacin granules along with the solvent / diluent having following composition as per the innovator product.
    1. Soya lecithin
    2. Medium chain triglycerides
    3. Flavor
    4. Sucrose
    5. Purified water.

Issue an advisory for compliance to PPMA, Pharma Bureau and PCDA and also upload a copy on DRAP"s website for information for all stakeholders and general public.

313th meeting of Registration Board

Registration Board deliberated the matter in detail and reiterated its decision taken in 290th meeting in which all registration holders of ciprofloxacin granules for oral suspension were advised to ensure the supply of ciprofloxacin granules along with the solvent / diluent having following composition as per the innovator drug product.

- o Soya lecithin
- o Medium chain triglycerides
- o Flavor
- o Sucrose
- o Purified water

The Board observed that all pharmaceutical manufacturers have not yet complied the decision of the Board taken in 290th meeting. Keeping in view the safety, efficacy and quality of the product, the Board decided as follow:

1. All registration holders of ciprofloxacin granules for oral suspension should comply the decision of 290th meeting within 3 months.
2. All registration holders of ciprofloxacin granules for oral suspension to whom registration has been granted with ciprofloxacin hydrochloride, should revise their formulation as per the innovator product and apply for correction in salt form in the relevant section of PE&R Division within 3 months.
3. The Board also directed PE&R Division to issue an advisory in this regard to PPMA, Pharma Bureau and PCDA for compliance and also upload on DRAP‟s website for information for all stakeholders.

The matter regarding formulation and salt form of ciprofloxacin injection and extended release tablet will be discussed in forthcoming of Registration Board.

Product status in other countries.

Ciprofloxacin suspension is supplied as ciprofloxacin base in Reference Regulatory Authorities as well as other European countries like Belgium etc.
In neighboring countries like India and Bangladesh Ciprofloxacin suspension is available both as powder / granules for suspension containing ciprofloxacin hydrochloride alone as well as ciprofloxacin granules along with diluent. However, the composition of diluent or the salt for of ciprofloxacin could not be verified from online databases.

Decision: Registration Board referred the formulation of "Ciprofloxacin HCl Oral Dry Powder Suspension", for review, to Expert Working Group for "Human Formulations of Pharmaceutical Drug Products", constituted in instant meeting.

Case No. 7 Stability data submitted for applications applied on Form 5/5D.

Registration Board in its 320th meeting considered the case of "Applications submitted on Form 5 / 5-D requiring submission of stability data" and decided as under:

"Registration Board deliberated the matter in detail and observed that these applications are pending for submission of stability data/product development data by the applicants since many years. Keeping in view the pendency, the Board deliberated the matter in detail and also took opinion of PPMA and then decided that the firms shall initiate the product development and stability studies of submitted applications and intimate to Pharmaceutical Evaluation Cell (PEC) regarding procurement of raw material, initiation of product development and initiation of stability studies, by 31st December 2022. For all those applications for which Pharmaceutical Evaluation Cell will not receive any intimation regarding initiation of product development and stability studies, will be placed before the Board for decision"

The above decision of the Board was notified vide letter No. No. 320-DRB/ 2022(PE&R) dated 17-10-2022.

Later, Pakistan Pharmaceutical Manufacturers' Association through its Chairman (North) vide its letter No. PPMNAM-03312022 dated 30-12-2022 requested for Extension in Time for Submission of Stability Data of Form 5/5D.

Registration Board in its 324th meeting considered the request of PPMA and decided as under:

"Registration Board while considering the above cited request of PPMA reiterated that that the numerous applications are pending for submission of stability data/product development data by the applicants since many years causing by an un due backlog for the PE&R Division. Board also discussed that previously, opinion of PPMA was also taken while giving an opportunity to the firms to submit an intimation regarding initiation of product development & stability studies had been given to firms for submission of any had already been given a time period till by 31st December 2022. Keeping in view the above deliberation Board decided to refer the case to Authority for seeking guidance regarding timelines for submission of Stability Data of Form 5 / Form 5-D Files."

The matter was placed before the Authority in its 161st meeting held on 5-6 April, 2023 and the Authority decided as follow:

"The Authority noted that the numerous applications are pending for submission of stability data/product development data by the applicants since many years resulting in an un due backlog for the PE&R & BE&R Division. The applicants had failed to submit the requisite data after lapse of agreed deadline. Accordingly, the Authority advised the Registration Board to dispose of the cases on merit."

As per available record, stability data of following products has been submitted till 31st December, 2022 which is yet to be processed:

Name and Address of Manufacturer	Brand Name	Generic Name	Date of submission of stability data (R&I)
M/s Scilife Pharma Pvt Ltd. Plot # FD-57/58-A2, Korangi Creek Industrial Park, Karachi	Glusimet XR 100/1000 mg Tablet	Sitagliptin Metformin Hcl	20210301

Submitted for consideration of the Board, please.

Decision: Registration Board discussed the decision of Authority in detail and after through deliberations decided in line with decision of the Authority to consider only those registration applications for which stability study data has been submitted till 31st December, 2022. Stability study data shall be processed as per its queue. Registration Board further decided that all those registration applications requiring stability study data (applied on Form5/Form 5D) for which the requite data has not been submitted till 31st December, 2022, shall be considered as disposed off and the applicant firms shall submit its product development and stability data on Form-5F which will be considered on its turn in queue of Form 5F.

Case no. 01 Registration applications of Form 5F (Human)

1.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Seraph Pharmaceutical Plot no. 210, Industrial Triangle Kahuta Road, Islamabad.**
	Name, address of Manufacturing site.	M/s Seraph Pharmaceutical Plot no. 210, Industrial Triangle Kahuta Road, Islamabad.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy.No 2628 dated 27-01-2022
	Details of fee submitted	Rs.30,000/- dated 21-12-2021
	The proposed proprietary name / brand name	**Cyloflex 5mg Tablet**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated tablet contains: Cyclobenzaprine Hydrochloride …….5mg
	Pharmaceutical form of applied drug	Yellow round unscored biconvex film coated tablets.
	Pharmacotherapeutic Group of (API)	Skeletal Muscle Relaxants
	Reference to Finished product specifications	USP
	Proposed Pack size	1×10’s
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	FLEXERIL Merck & Co. Inc., West Point, PA 19486, USA. McNeil Consumer & Specialty Pharmaceuticals, Fort Washington, PA 19034 FDA
	For generic drugs (me-too status)	Eumytic 5mg Tablet, Atco Laboratories, Reg. No. 067273
	GMP status of the Finished product manufacturer	GMP certificate issued on the basis of inspection conducted on 11/07/2019.
	Name and address of API manufacturer.	VASUDHA PHARMA CHEM LTD 78/A, Vengalrao Nagar, Hyderabad-38, Telangana-India.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical

		procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 6 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (T-001, T-002, T-003)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand leader that is FLEXERIL 5mg tablet by Merck & Co. Inc., West Point, PA 19486, USA, performing quality tests (Identification, Assay, Dissolution, Uniformity of dosage form). CDP has been performed against the same brand that is FLEXERIL 5mg tablet Tablet by Merck Pharma in Acid media (pH 1.2), Buffer pH 4.5 and Phosphate Buffer (pH 6.8). The values for f2 is in the acceptable range.
	Analytical method validation/verification of product	Method verification studies have submitted including accuracy, recovery, precision, specificity.

STABILITY STUDY DATA

Manufacturer of API	VASUDHA PHARMA CHEM LTD 78/A, Vengalrao Nagar, Hyderabad-38, Telangana-India		
API Lot No.	CBP/1911044		
Description of Pack (Container closure system)	1x10 tablets in alu-alu blisters packed in card board unit carton		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 24 months Accelerated: 6 months		
Frequency	Accelerated: 0, 2, 4, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	T-001	T-002	T-003
Batch Size	5000 tablets	5000 tablets	5000 tablets
Manufacturing Date	02-2020	02-2020	02-2020
Date of Initiation	05-02-2020	05-02-2020	05-02-2020
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.

2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. 73252/TS/2022 issued by DCA, Telangana valid till 04/03/2025.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	• Copy of letter No.65/2020/DRAP-AD-CD(I&E) dated 07/01/2020 is submitted. API Cyclobenzaprine HCl for the purpose of test/analysis and stability studies is granted.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator:

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

2.	Name, address of Applicant / Marketing Authorization Holder	**M/s Kaizen Pharmaceuticals (Pvt.) Ltd., E-127-129, North Western Industrial Zone, Bin Qasim, Karachi-75020, Pakistan.**
	Name, address of Manufacturing site.	Kaizen Pharmaceuticals (Pvt.) Ltd., E-127-129, North Western Industrial Zone, Bin Qasim, Karachi-75020, Pakistan.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☒New Drug Product (NDP) ☐Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No: 27277 dated :01.10.2021
	Details of fee submitted	Rs. 25,000/- dated 15/09/2021 Rs. 50000/- dated 04.05.2021
	The proposed proprietary name / brand name	**Tornil Mouthwash 0.25%**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each ml contains: 2.5mg of Flurbiprofen
	Pharmaceutical form of applied drug	Clear pale bluish colored, methanol flavored liquid
	Pharmacotherapeutic Group of (API)	NSAIDs (Non-steroidal anti-inflammatory drugs)
	Reference to Finished product specifications	Innovator's specs

	Proposed Pack size	100ml
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Froben Gola 0.25% by Abbot
	For generic drugs (me-too status)	N/A
	GMP status of the Finished product manufacturer	GMP certificate granted on 16.09.2020 valid till 27.08.2021
	Name and address of API manufacturer.	Hy-Gro Chemicals Pharmtek Pvt. Ltd Plot No. 174 Progressive Industrial Society IDA Bollaram Jinnaram Mandal Sanga Reddy District Telangana India.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of Flurbiprofen is present in USP. The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for impurity D, G & related substances (impurity A & unspecified), specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 24 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (FB-2016/04/39, FB-2016/04/40 , FB-2016/04/41)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand leader that is Froben Gola 0.25% by Mylan products Limited by performing quality tests (Identification, Assay, Dissolution, Uniformity of dosage form)..
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.
STABILITY STUDY DATA		

Manufacturer of API	Hy-Gro Chemicals Pharmtek Pvt. Ltd		
API Lot No.			
Description of Pack (Container closure system)	Pet bottle		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 18 months Accelerated: 6 months		
Frequency	Accelerated: 0, 2, 4, 6 (Months) Real Time: 0, 3, 6,9,12,18(Months)		
Batch No.	TF-03	TF-04	TF-05
Batch Size	1L	1L	1L
Manufacturing Date	Aug/2018	Aug/2018	Aug/2018
Date of Initiation	01.09.2018	01.09.2018	01.09.2018
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has referred to onsite inspection report of their product "Rofair 500mcg Tablet", which was conducted on 25th June, 2019, and was presented in 290th meeting of Registration Board. The report confirms: □ The HPLC software is 21CFR Compliant. □ Audit trail on testing reports is available □ Firm has adequate monitoring and controls for stability chambers. Chambers are controlled and monitored through software having alarm system for alerts as well
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. L.Dis.No:54409/TS/2021 issued by Drug Control Administration Telangana India valid till 16/02/2022.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	DHL No.XMLPI6.2/90-1604 dated 21/03/2017
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks:

Registration Board in its 324th was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.

3.2. S.4.4 Batch analysis of API by the FPP manufacturer for the batch used for manufacturing of finished product for stability testing.

3.2.S.4.5 CoA of reference standard.

3.2. P.2 Pharmaceutical equivalence studies needs to be submitted with reference product having details of brand name, batch No, manufacturer.
3.2. P.3 Batch size does not reflect the Pack size/ filled volume per pack. This needs to be clarified as the same is not mentioned in manufacturing process and not on the CoA of three batches placed on stability.
3.2. P.7 The quantity of the units produced needs to be justified w.r.t stability testing.
There CoAs submitted for API (Flurbiprofen) which indicates Mfg date of November 2018 however stability testing was initiated in Sep. 2018. This needs clarification.
Justification for not importing API with permission of DRAP. Further Copy of DHL does not reflect the date of import of API. Complete import documentation of API needs to be submitted.
Evidence of Approval of formulation in RRA.

	Query	**Response**
1.	3.2. S.4.4 Batch analysis of API by the FPP manufacturer for the batch used for manufacturing of finished product for stability testing.	The firm has submitted the Batch analysis of API indicating tests for description, solubility, Identification, M.P, LOD, residue on ignition and assay.
2.	3.2.S.4.5 CoA of reference standard.	The firm has submitted copy of COA of working standard having batch no: WS-FB-EP/JP/BP/USP/IP/KP-20-01
3.	Pharmaceutical equivalence studies needs to be submitted with reference product having details of brand name, batch No, manufacturer.	The firm has submitted pharmaceutical equivalence with Forben Gola 0.25% Mouthwash (batch No. 1082193).
4.	3.2. P.3 Batch size does not reflect the Pack size/ filled volume per pack. This needs to be clarified as the same is not mentioned in manufacturing process and not on the CoA of three batches placed on stability.	160 ml bottle is the pack size and 11 bottles per batch of 2L have been manufactured.
5.	3.2. P.7 The quantity of the units produced needs to be justified w.r.t stability testing.	The firm submitted that 3bottles per batch are used for accelerated testing and 8 bottles per batch are used for real time testing time points. However this needs justifivcation with reference to the applicable guid;eines of stability studies and product development.
6.	There CoAs submitted for API (Flurbiprofen) which indicates Mfg date of November 2018 however stability testing was initiated in Sep. 2018. This needs clarification.	COA of wrong source of API submitted by mistake. The old source does not exist anymore. We have manufactured trial batches from API purchased from Hygro Chemicals. The new baches are TF-06,07 and 08. The firm has submitted the stability data of new batches.
7.	Justification for not importing API with permission of DRAP. Further Copy of DHL does not reflect the date of import of API. Complete import documentation of API needs to be submitted.	Copy of Import License issued by DRAP Karachi dated 13.03.2019 has been submitted for import of API from M/s Hygro Chemicals Pharmtek Pvt Ltd, Telangana India.
8.	Evidence of Approval of formulation in RRA.	Firm has submitted copy of PIL for Froben Throat 250mg/100ml mouthwash indicating BGP Product Srl Rome Italy as MAH and AbbVie Srl-SR 148 Pontina Aprilia Italy as manufacturer/producer. Document was made available by AIFA on 26.01.2021.

Decision: Deferred for submission of following:

- **Scientific justification of the batch size of the trial batches against the number of units required for the performance of stability studies at both accelerated (6 months) & long term conditions (till**

	claimed shelf life) along with details of units consumed at each time point as per submitted drug product analytical procedure and stability protocol. • **Full fee of registration i.e., Rs. 75,000/- for pre-approval change in stability data as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.**	
3.	Name, address of Applicant / Marketing Authorization Holder	**M/s Pacific Pharmaceuticals Ltd. 30 Km Multan Road, Lahore**
	Name, address of Manufacturing site.	M/s Pacific Pharmaceuticals Ltd. 30 Km Multan Road, Lahore
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☒ New Drug Product (NDP) ☐ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy.No 30930 dated 11-11-2021
	Details of fee submitted	Rs.30,000/- dated 04-06-2021
	The proposed proprietary name / brand name	**Ritufen 1% cream**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	One gram of cream contains 10 mg Terbinafine hydrochloride equivalent to 8.89 mg of Terbinafine.
	Pharmaceutical form of applied drug	Topical Cream
	Pharmacotherapeutic Group of (API)	Allylamine antifungal ATC Code: D01BA02
	Reference to Finished product specifications	In-House specifications
	Proposed Pack size	10 gm
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Terbinafine 1 % Cream MHRA UK
	For generic drugs (me-too status)	Terbisil Cream 1% w/w Saffron Pharmaceuticals (Pvt) Ltd.
	GMP status of the Finished product manufacturer	GMP certificate issued on 01-11-2021
	Name and address of API manufacturer.	Zhejiang East-Asia Pharmaceutical Co. Ltd. Coastal Industrial City, Pubagang town, Sanmen county, Zhejiang, P.R. China
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers,

		description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies	Long-term stability studies were performed at a storage temperature of 30°C±2°C/65%±5% RH for 48 months. Accelerated stability studies were performed at a temperature of 40±2°C/75%±5% RH for 6 months.
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its validation studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence Studies against the reference product of "Lamisil cream" by Novartis Ltd.
	Analytical method validation/verification of product	Method validation studies have submitted including linearity, range, accuracy, precision, specificty.

	Evidence of manufacturing facility	Firm has submitted section approval letter no. F-1-9/89-Lic (Vol-IV) dated 22-02-2018 issued by Secretary CLB, wherein Tablet (Hormone) section has been approved as additional section.
	GMP status of the Finished product manufacturer	GMP certificate granted on basis of inspection conducted on 14-09-2021
	Name and address of API manufacturer.	M/s Azico pharmaceuticals Pvt. Ltd. Plot number 40/A, JN. Pharmacity, Parawada (Mandal), Visakhapatnam (Dist), AP,India
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Firm has submitted detailed drug substance data on CTD format related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications and analytical procedures, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies of Drug substance	Firm has submitted both real time (24 months) and accelerated (6 months) stability studies data from drug substance manufacturer as per refrigerating conditions.
	Module-III (Drug Product):	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacturing process and process control, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.

	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the reference product of Eltroxin 100mcg tablets of M/s Mercury Pharma Group Ltd approved by MHRA of UK. CDP has been performed against the same brand that is in Acid media (pH 1.2) , Acetate Buffer (pH 4.5) & Phosphate Buffer (pH 6.8) media with acceptable value of f2 factor.
	Analytical method validation/verification of product	Method validation studies have submitted including, Specificity, linearity, range, accuracy, precision Repeatability, Intermediate precision, Robustness, System Suitability.

STABILITY STUDY DATA

Manufacturer of API	M/s Azico pharmaceuticals Pvt. Ltd. Plot number 40/A, JN. Pharmacity, Parawada (Mandal), Visakhapatnam (Dist), AP,India		
API Lot No.	400I/3/010/18		
Description of Pack (Container closure system)	Alu-Alu. Blisters with aluminum foil having leaflet and packed in unit carton		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 18 months Accelerated: 06 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	IG0106Q	IG0206Q	IG0306Q
Batch Size	100000 Tablets	100000 Tablets	100000 Tablets
Manufacturing Date	06-2021	06-2021	06-2021
No. of Batches	03		

Documents submitted along with stability data

1.	Reference of previous approval of applications with stability study data of the firm (if any)	N/A
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	• **C**opy of License retention certificate valid till 04-03-2025Drug Control Administration, Andhra Pradesh, India
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Copy of commercial invoice attested by AD I&E DRAP, Lahore, has been submitted.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	N/A

Batch No.	**Invoice No.**	**Quantity Imported**	**Date of approval by DRAP**
400I/3/010/18	EXPPPL-05	200gm	09-07-2019

6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).	Digital data logger record has been submitted for temperature & humidity conditions of both accelerated and long-term stability chambers.

Remarks of Evaluator[II]:

Observations	Firm's response
Submit the requisite information / documents, according to the "Guidance document for submission of application on form 5-F (CTD) for registration of pharmaceutical drug products for Human use", available on DRAP's official website	Firm has submitted the re-arranged copy of the application as per the Guidance document for submission of application on form 5-F (CTD) for registration of pharmaceutical drug products for Human use

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Case no. 02 Registration Applications against Export facilitation

5.	**Name and address of manufacturer / Applicant**	**M/s Pharmevo Private Limited., Plot # A-29, North Western Industrial Zone, Port Qasim, Karachi**
	Brand Name +Dosage Form + Strength	Erlin-M 2.5+500mg Tablet
	Composition	Each film coated tablet contains: Ertugliflozin L-Pyroglutamic acid eq. to Ertugliflozin…….2.5mg Metformin HCl…….500mg
	Diary No. Date of R& I & fee	Dy.No 10090 dated 04-03-2019 Rs.50,000/- dated 04-03-2019
	Pharmacological Group	Sodium-glucose co-transporter 2 (SGLT2) inhibitors A10BK04 + Biguanide
	Type of Form	Form-5D
	Finished product Specifications	Innovator's Specification
	Pack size & Demanded Price	7's, 10's, 14's, 20's, 28's, 30's & As per PRC
	Approval status of product in Reference Regulatory Authorities	SEGLUROMET of USFDA Approved, USFDA Approved.
	Me-too status (with strength and dosage form)	Ertuvia-M Tablet by Ferozsons (Reg. No.112542)
	GMP status	GMP inspection conducted on 22-June-2022, GMP certificate grant on 22-August 2022. Tablet (General) section approved.
	Remarks of the Evaluator :	
	Now the firm has submitted stability data detailed as under:	
STABILITY STUDY DATA		
Drug		Erlin-M 2.5+500mg Tablet
Name of Manufacturer		M/s Pharmevo Private Limited., Plot # A-29, North Western Industrial Zone, Port Qasim, Karachi.
Manufacturer of API		Ertugliflozin: M/s Shangai Pharma Group Changzhou Kony Pharmaceutical Co., Ltd., Daixi Street, Louyang Town, Wujin District, Changzhou, Jiangsu 213105, China. Metformin HCl: Smruthi Organics Limited A-27, MIDC Chincholi, Tal-Mohol, Solapur 413255 Maharashtra State, India.
API Lot No.		Ertugliflozin- LPGA: ETG20190101

		Metformin HCl:MET-559/19		
Description of Pack (Container closure system)		Alu-Alu Blister		
Stability Storage Condition		Real time : 30°C ± 2° C / 75% ± 5% RH Accelerated: 40°C ± 2°C / 75% ± 5% RH		
Time Period		Real time: 6 months Accelerated: 6 months		
Frequency		Accelerated:0,1,2,3,4,6 (month) Real Time: 0,3,6, (month)		
Batch No.		19PD-3038-02-T	19PD-3039-03-T	19PD-3040-04-T
Batch Size		2500 tab	2500 tab	2500 tab
Manufacturing Date		11-2019	11-2019	11-2019
Date of Initiation		23-12-2019	23-12-2019	23-12-2019
No. of Batches		03		
DOCUMENTS / DATA PROVIDED BY THE APPLICANT				
Documents To Be Provided		**Status**		
1	Reference of previous approval of applications with stability study data of the firm	Firm has referred to onsite inspection report of their product Erli Plus XR Tablet 5/1000mg, 10/1000mg, 12.5/1000mg & 25/1000mg (Empagliflozin + Metformin HCl XR) which was conducted on 05th December, 2019 and were presented in 293rd meeting of Registration Board held on 6th -8th Jan, 2020. According to the report following points were confirmed. • Firm has 21 CFR compliant HPLC software. • Firm has audit trail reports available. • Firm possesses stability chambers with digital data loggers.		
2	Certificate of Analysis of API from both API Manufacturer and Finished Product manufacturer.	Copy of COA of Ertugliflozin: (Batch# ETG20190101) from M/s. Shangai Pharma Group Changzhou Kony Pharmaceutical Co., Ltd. Copy of COA (Batch# RV-698/19) from M/s PharmEvo (private) Limited is submitted. Copy of COA of Metformin HCl: (Batch# MET-559/19) from M/s. Smruthi Organics Limited. Copy of COA (Batch# RV-1835) from M/s PharmEvo (private) Limited is submitted.		
3	Method used for analysis of API from both API Manufacturer and Finished Product manufacturer	Yes		
4	Stability study data of API from API manufacturer	Stability study conditions: Ertugliflozin: Real time: 30°C ± 2°C / 65% ± 5%RH for 36 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: (ETG20170101, ETG20161202, ETG20161201) Metformin HCl: Real time: 30°C ± 2°C / 65% ± 5%RH for 60 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: (A-71411106004, A-71411106005, A-71411106006)		
5	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Ertugliflozin- LPGA:** Real time: 30°C ± 2°C / 65% ± 5%RH for 36 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: (ETG20170101, ETG20161202, ETG20161201) **Metformin HCl:** Real time: 30°C ± 2°C / 65% ± 5%RH for 60 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: (A-71411106004, A-71411106005, A-71411106006)		
6	Documents for the procurement of API with approval from DRAP (in case of import).	**Ertugliflozin- LPGA:** Copy of Drug manufacturing license (License no. JS20180935) for M/s Shangai Pharma Group Changzhou Kony Pharmaceutical Co.,		

		Ltd., China issued by China Food and Drug Administration of the People's Republic of China is submitted, valid up to 26-11-2023. **Metformin HCl:** Copy of Drug manufacturing license (License no. NEW-WHO-GMP/CERT/PD/86368/2019/11/30111) for Smruthi Organics Limited. A-27, MIDC Chincholi, Tal-Mohol, Solapur 413255 Maharashtra State, India is submitted, valid up to 13-Nov-2022
7	Protocols followed for conduction of stability study	Yes
8	Method used for analysis of FPP	Yes
9	Drug-excipients compatibility studies (where applicable)	Same excipients used as used by innovator.
10	Complete batch manufacturing record of three stability batches.	The firm has submitted copy of Trial batch manufacturing record. Details are as under: **Batch no.** / **Batch Size** / **Mfg. Started** 19PD-3038-02-T / 2500 / 11-2019 19PD-3039-03-T / 2500 / 11-2019 19PD-3040-04-T / 2500 / 11-2019
11	Record of comparative dissolution data (where applicable)	Firm has submitted Comparative dissolution study of their product with innovator Brand SEGLUROMET 2.5+500mg Tablet manufactured by Merck & Co. Inc. (USA) The details are as follows: **Feature** / **Reference Product** / **Product of PharmEvo** Brand Name / SEGLUROMET 2.5+500mg Tablet / Erlin-M 2.5+500mg Tablet Batch No. / U016206 / 19PD-3038-02-T Comparative dissolution studies have been performed in following mediums: 1. pH 1.2 HCl buffer 2. pH 4.5 Acetate buffer 3. pH 6.8 Phosphate buffer
12	Data of 03 batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Yes
13	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	Firm has submitted audit trail reports of stability studies of applied formulation.
14	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Yes
6.	**Name and address of manufacturer / Applicant**	**M/s Pharmevo Private Limited., Plot # A-29, North Western Industrial Zone, Port Qasim, Karachi**
	Brand Name +Dosage Form + Strength	Erlin-M 2.5+1000mg Tablet
	Composition	Each film coated tablet contains: Ertugliflozin L-Pyroglutamic acid eq. to Ertugliflozin…….2.5mg Metformin HCl…….1000mg
	Diary No. Date of R& I & fee	Dy.No 10091 dated 04-03-2019 Rs.50,000/- dated 04-03-2019

	Pharmacological Group	Sodium-glucose co-transporter 2 (SGLT2) inhibitors A10BK04 + Biguanide		
	Type of Form	Form-5D		
	Finished product Specifications	Innovator's Specification		
	Pack size & Demanded Price	7's, 10's, 14's, 20's, 28's, 30's & As per PRC		
	Approval status of product in Reference Regulatory Authorities	SEGLUROMET of USFDA Approved, USFDA Approved.		
	Me-too status (with strength and dosage form)	Ertuvia-M Tablet by Ferozsons		
	GMP status	GMP inspection conducted on 22-June-2022, GMP certificate grant on 22-August 2022. Tablet (General) section approved.		
	Remarks of the Evaluator :			
	Now the firm has submitted stability data detailed as under:			
STABILITY STUDY DATA				
Drug		Erlin-M 2.5+1000mg Tablet

DOCUMENTS / DATA PROVIDED BY THE APPLICANT				
Documents To Be Provided		**Status**		
1	Reference of previous approval of applications with stability study data of the firm	Firm has referred to onsite inspection report of their product Erli Plus XR Tablet 5/1000mg, 10/1000mg, 12.5/1000mg & 25/1000mg (Empagliflozin + Metformin HCl XR) which was conducted on 05th December, 2019 and were presented in 293rd meeting of Registration Board held on 6th -8th Jan, 2020. According to the report following points were confirmed. • Firm has 21 CFR compliant HPLC software. • Firm has audit trail reports available. • Firm possesses stability chambers with digital data loggers.		
2	Certificate of Analysis of API from both API Manufacturer and Finished Product manufacturer.	• Copy of COA of Ertugliflozin: (Batch# ETG20190101) from M/s. Shangai Pharma Group Changzhou Kony Pharmaceutical Co., Ltd. Copy of COA (Batch# RV-698/19) from M/s PharmEvo (private) Limited is submitted.		

		• Copy of COA of Metformin HCl: (Batch# MET-559/19) from M/s. Smruthi Organics Limited. Copy of COA (Batch# RV-1835) from M/s PharmEvo (private) Limited is submitted.
3	Method used for analysis of API from both API Manufacturer and Finished Product manufacturer	Submitted
4	Stability study data of API from API manufacturer	**Ertugliflozin- LPGA:** Real time: 30°C ± 2°C / 65% ± 5%RH for 36 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: (ETG20170101, ETG20161202, ETG20161201) **Metformin HCl:** Real time: 30°C ± 2°C / 65% ± 5%RH for 60 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: (A-71411106004, A-71411106005, A-71411106006)
5	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Ertugliflozin- LPGA:** Copy of Drug manufacturing license (License no. JS20180935) for M/s Shangai Pharma Group Changzhou Kony Pharmaceutical Co., Ltd., China issued by China Food and Drug Administration of the People's Republic of China is submitted, valid up to 26-11-2023. **Metformin HCl:** Copy of Drug manufacturing license (License no. NEW-WHO-GMP/CERT/PD/86368/2019/11/30111) for Smruthi Organics Limited. A-27, MIDC Chincholi, Tal-Mohol, Solapur 413255 Maharashtra State, India is submitted, valid up to 13-Nov-2022
6	Documents for the procurement of API with approval from DRAP (in case of import).	**Ertugliflozin- LPGA:** Copy of Form 6, & Commercial Invoice No: PSPW-190116-1 Dated: 16-01-2019 from M/s Shangai Pansopharm Technology Co. Ltd. is submitted attested by AD I&E (Karachi) dated ; 1-02-2019 for Ertugliflozin L-pyroglutamic acid eq to Ertugliflozin L-Pyroglutamic acid quantity 1.2Kg **Metformin HCl:** Copy of Commercial Invoice No: E-009 Dt.17.04.2019 Dated: 17-04-2019 from Smruthi Organics Limited is submitted attested by AD I&E (Karachi) dated; 29-04-2019 for Metformin HCl.
7	Protocols followed for conduction of stability study	Submitted
8	Method used for analysis of FPP	Submitted
9	Drug-excipients compatibility studies (where applicable)	Same excipients used as used by innovator.
10	Complete batch manufacturing record of three stability batches.	The firm has submitted copy of Trial batch manufacturing record. Details are as under: **Batch no.** / **Batch Size** / **Mfg. Started** 20PD-3091-03-T / 2500 / 1-2020 20PD-3092-04-T / 2500 / 1-2020 20PD-3093-05-T / 2500 / 1-2020
11	Record of comparative dissolution data (where applicable)	Firm has submitted Comparative dissolution study of their product with innovator Brand SEGLUROMET 2.5+1000mg Tablet manufactured by Merck & Co. Inc. (USA) The details are as follows: **Feature** / **Reference Product** / **Product of PharmEvo**

		Brand Name: SEGLUROMET 2.5+1000mg Tablet / Erlin-M 2.5+1000mg Tablet Batch No.: T042906 / 20PD-3091-03-T Comparative dissolution studies have been performed in following mediums: 1. pH 1.2 HCl buffer 2. pH 4.5 Acetate buffer 3. pH 6.8 Phosphate buffer
12	Data of 03 batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
13	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	Firm has submitted audit trail reports of stability studies of applied formulation.
14	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator:

Sr.#	Observations	Firm's response
1.	Submit valid GMP certificate/DML for manufacturer of Metformin HCl i.e., M/s Smruthi Organics Limited.	Firm has submitted copy of GMP certificate No. NEW-WHOGMP/ CERT/PD/86368/2019/11/30111issued by Food & Drug Administration India.

Decision: Registration Board approved the applications of Erlin-M 2.5+500mg Tablet & Erlin-M 2.5+1000mg Tablet with Innovator's specifications. The firm shall submit fee of Rs. 7500/- for each strength for correction/pre-approval change in product specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021 before issuance of registration letters.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months.**

Case no. 03 Deferred cases

7.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Daneen Pharma Private Limited 27-Sundar Industrial Estate, Sundar Raiwind Road, Lahore**
	Name, address of Manufacturing site.	M/s Genix Pharma Private Limited 44-45B Korangi creek road Karachi
	Status of the applicant	☐ Manufacturer ☐ Importer ☒ **Is involved in none of the above (contract giver)**
	Status of application	☐ **New Drug Product (NDP)** ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ **Domestic and Export sales**
	Evidence of manufacturing facility	Section approval letter declaring grant of Beta-Lactam (penem) section

	Dy. No. and date of submission	Dy.No 27307 dated 04-10-2021
	Details of fee submitted	Rs.75,000/- dated 29-09-2021
	The proposed proprietary name / brand name	**ERTAP 1gm Injection**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Vial contains: Ertapenem sodium equivalent to Ertapenem ……. 1gm
	Pharmaceutical form of applied drug	White to light yellow powder
	Pharmacotherapeutic Group of (API)	Anti-bacterial
	Reference to Finished product specifications	As per innovator's specifications
	Proposed Pack size	1's
	Proposed unit price	As per PRC
	The status in reference regulatory authorities	**Invanz Injection** by Merck & CO.,INC , FDA Approved.
	For generic drugs (me-too status)	Ernem Injection by M/s Genix Pharma Reg no: 081179
	GMP status of the Finished product manufacturer	GMP granted on 07/10/2021 Capsule section approved.
	Name and address of API manufacturer.	**SAVIOR LIFETEC CORPORATION,** 29, Ke-Jhong Rd., Chunan Chen, Miaoli, County 35053, Taiwan, R.O.C.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, , specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 36 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand leader that is **Invanz Injection**

	Analytical method validation/verification of product	Method verification studies have been submitted including justification of system suitability, specificity, linearity, accuracy, precision-repeatability.

f	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator[II]:

Section#	Observation	Firm's response
1.6.5	Valid GMP certificate of drug substance manufacturer shall be submitted.	Firm has submitted copy of GMP issued by Ministry of Health & Welfare, Taiwan, valid till 23/01/2024
3.2.S.5	• Justification shall be submitted for using Ertapenem sodium lyophilized powder as working standard instead of the pure Ertapenem sodium. • Submitted drug substance analytical procedure mandates use of Ertapenem as working standard whereas submitted COA is of Ertapenem sodium lyophilized powder.	We received working standard Ertapenem sodium as lyophilized powder from supplier. Saviour Lifetech Corporation here by confirmed that Ertapenem sodium lyophilized powder is more suitable as working standard than Ertapenem sodium due to its longer retest period. 24 m. In this case, Ertapenem sodium lyophilized powder can be used in a more reliable way. The actual assay can be calibrated by method calculation. The Ertapenem sodium lyophilized powder is preferable as working standard by our expert's perspective. Therefore, the submitted COA of Ertapenem sodium lyophilized powder was provide din 3.2.S.5.
3.2.S.7.3	Justification shall be submitted for conducting drug substance stability studies at refrigerating conditions.	As Ertapenem sodium lyophilized powder will be directly filled in to vial, the quality of Ertapenem sodium lyophilized powder is very critical and should be preserved in conservative way at lower temperature. Therefore based on this concept we chose to conduct the stability studies of drug substance in storage conditions of 5 $\pm$3ºC to ensure quality.
3.2.P.1	• Justification shall be submitted for proposed fill weight per vial of Ertapenem sodium considering the actual content of sodium declared in the drug substance analysis and content of sodium bicarbonate in the drug substance. • Details of accompanying reconstitution diluent shall be submitted.	• The justification is as under: 1gmof Ertapenem for injection (Bulk sterile) will contain following: Ertapenem monosodium ….. 809.60mg Sodium bicarbonate …….. 135.40mg NaOH…….. 55.0mg Total……. 1000.0mg Factor = Ertapenem sodium/Ertapenem = 497.50/475.5 = 1.046 Then, 1000.0mg x 1.046 1046.00mg appx. 1050mg. The filled weight of 1340mg against the determined potency of 78.20% of drug substance is justified as per above referred calculations.

		• Diluent is not the part of finished pack.
3.2.P.2.2.1	• Submit justification of not performing tests of pH, sterility, water content, endotoxins and particulate matter in Pharmaceutical equivalence studies.	Due to insufficient qanity of innovator sample, we performed appearance, identification and Assay. As per requirements from DRAp, we performed all test on new innovator sample "Invanz injection".
3.2.P.2.6	• Compatibility studies with the reconstitution diluent shall be submitted.	Submitted with 0.9% sodium chloride solution.
3.2.P.5	• Justification shall be submitted for not including tests of completeness and clarity of solution, pH, & water content in the drug product specifications, as recommended by the Innovator product.	The material Ertapenem sodium is lyophilized sterile powder and ready to fill material, we performed these test during API testing.
3.2.P.6	• Justification shall be submitted for using Ertapenem sodium lyophilized powder as working standard instead of the pure Ertapenem sodium.	Same as above in section 3.2.S.6
3.2.P.8	• Justification shall be submitted for not performing tests of completeness and clarity of solution, pH, & water content during stability studies. • Complete batch manufacturing record shall be submitted for the three stability batches. • Microbial reports shall be submitted for the sterility testing during stability studies. • Documents confirming import of drug substance with approval form DRAP shall be submitted.	• The material Ertapenem sodium is lyophilized sterile powder and ready to fill material, we performed these test during API testing in order to reduce the test on finished product testing and on basis of supplier stability studies of real time as well as accelerated. It is concluded that the API is stable throughout the shelf life. • BMRs have been submitted.

Decision of 323rd meeting: Deferred for scientific justification for:

- Use of Ertapenem sodium lyophilized powder as working standard instead of the pure Ertapenem sodium since submitted drug substance analytical procedure mandates use of Ertapenem as working standard whereas submitted COA is of Ertapenem sodium lyophilized powder.
- Not including tests of tests of completeness and clarity of solution, pH, & water content in drug product specifications and stability studies.

Firm's response:

- Drug substance manufacturer has used Ertapenem sodium lyophilized powder in analysis, therefore we have used and submitted the same COA. Response from supplier is as follows:
  "We, Savior Lifetec Corporation hereby confirmed that Ertapenem sodium \due to its longer retest period. In this case Ertapenem sodium lyophilized powder (bulk) can be used in a more reliable way. The actual assay and purity value of pure Ertapenem sodium can be used in a more reliable way. The actual assay and purity value of Ertapenem sodium can be calibrated by method calculation. Thus Ertapenem sodium lyophilized powder is preferable as working standard by our expert's perspective. We hereby provide chromatogram data of HPLC and FTIR as the qualification documents for working standard Ertapenem sodium lyophilized powder from reference standard Ertapenem sodium.

• Firm has submitted revised test method including tests of completeness and clarity of solution, pH, & water content.		
Decision: Approved. The firm shall submit fee of Rs. 7500/- for correction/pre-approval change in product specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021 before issuance of registration letter. • **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.** • **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has submitted reference of last onsite panel inspection for instant dosage form conducted during last two years i.e. EMPOLI (Empagliflozin) 10mg & 25mg Tablets which was presented in 290th meeting of the registration board & hence approved & registered by registration board Date of inspection: 13th June 2019. The inspection report confirms following points • The HPLC software is 21CFR Compliant. • Audit trail on the testing reports is available. • Adequate monitoring and control are available for stability chamber. Chambers are controlled and	

		monitored through software having alarm system for alerts as well.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. HE20180054 issued by Hebei CHINA FOOD AND DRUG ADMINISTRATION valid till 08/07/2023
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Copy of commercial invoice (Invoice# 1708ZP03 dated 19th October 2017 with received quantity i.e. 5000 kgs) for the purchase of Paracetamol from M/s Hebei Jiheng Shenzhou Pharmaceutical Co., Ltd. China with attestation of DRAP dated 01-11-2017
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted audit trail record of product testing of HPLC for all test intervals.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator[II]:

- Regarding justification of specifications of drug product, firm has submitted as under:
  "The dissolution parameters and testing procedure is as per USP Pharmacopeia but as the Paracetamol is rapidly dissolving drug and falls in BCS Class I, we stringent the dissolution specifications from 30 minutes to 10 minutes
  The selection of specified time for Dissolution is based on the BCS classification of API, as the drug is independent over physiological pH range (i-e from 1.2 to 6.8) and ·as per USP General chapter <1092>, the dissolution of rapidly dissolving product is achieved within 15 minutes therefore we established our dissolution time within 10minutes."

- Firm has submitted following comparison between the applied formulation and conventional paracetamol tablet already available in market:

Parameters	**PROVAS Novo 500mg Tablet**	**Paracetamol 500mg Tablet**
Dosage Form	Tablet	Tablet
Dosage Design	Immediate release film coated tablet	Immediate release uncoated tablet
Route of Administration	Oral	Oral
Dosage Strength	500mg	500mg
Pharmacokinetics	The special technology allows **PROVAS Novo 500mg Tablet** to begin dissolving in 5 minutes and start to relieve pain within 15 minutes	Paracetamol is readily absorbed from the gastrointestinal tract with peak plasma concentrations occurring about 30 minutes to 2 hours after ingestion
Patient's Acceptance & Compliance	• Capsular shape makes it easy to swallow • Bitter taste of Paracetamol is masked through film coating • Quick & Effective Pain Relief Stomach Friendly	• Round shape makes it difficult to swallow • Bitter Taste Delayed Pain Relief
Technology Used	**PROVAS Novo 500mg Tablet** is a Paracetamol formulation that contains an advance technology to rapid the onset of action	**Paracetamol 500mg Tablet** formulated using a conventional wet granulation process

Key Features	• It has unique delivery system as **PROVAS Novo 500mg Tablet** is a Paracetamol formulation that contains a rapid dispersion and dissolution technology which breakdown Paracetamol tablets in the stomach so that the drug is absorbed fast and pain relief can start within 15 minutes after ingestion • The technology contains three main ingredients viz.: o **Alginic Acid** draws fluid from the stomach into the tablet causing it to swell and break apart o **Calcium Carbonate** works together with Alginic Acid to boost disintegration of the tablet o **Crospovidone** acts as a super-disintegrant due to its ability to dissolve well in water • The absorption of Paracetamol occurs in the small intestine and as such is dependent on the rate of emptying of stomach contents into the small intestine and is therefore not associated with gastric irritation. The technology used in **PROVAS Novo 500 mg** Tablet increases gastric emptying time of the drug. • **PROVAS Novo 500mg Tablet** with this advance technology disperses up to five times faster than standard paracetamol tablets Suitable for all such patients requiring low sodium content in their diet	Onset of action is slow, as peak plasma concentrations occurring about 30 minutes to 2 hours after ingestion

Section#	Observations	Firm's response
3.2.P.5.1	• Limits for disintegration test i.e., NMT 30 minutes are inconsistent with the limits of dissolution test i.e., NLT 80% (Q) in 10 minutes.	We set disintegration specification according to USP general monograph for Disintegration <701> which specifies NMT 30minutes for film coated tablets. Our product is fast dissoving with a dissolution specs of NLT 80% (Q) in 10 minutes and disintegration time of our product is also found within 01 minute which co relates with dissolution. We have revised the specification of DT from NMT 30 minmutes to NMT 10 minutes.
3.2.P.6	• Submitted COA of working standard declares the "Valid till" date as January 2021, whereas trial batches have been manufactured and analyzed subsequent to this date. • Submitted COA of working standard is of BP grade, whereas drug product specifications have been	Firm has submitted new COA of working standard, which had been standardized in January 2021 having validity date as of Jan, 2022. Firm has submitted that the working standard complies with both & USP monograph of Paracetamol, since both the monographs are harmonized.

claimed as per USP monograph.	

Decision of 320th meeting: The Board was apprised that the firm has applied for two products with the similar formulation that is Paracetamol, film coated tablet with slight difference in method of manufacturing and qualitative composition. The Board after due deliberation decided to defer the case for clarification whether an applicant can apply for registration of more than two products having same composition or otherwise.

Firm's response:

PANADOL Conventional Tablets	**PANADOL ADVANCE & PROVAS NOVO 500 mg Tablet**
1) Marketing Authorization Status:	
Panadol 500mg is marketed by GlaxoSmithKline Consumer Healthcare (UK) Trading Limited bearing **Marketing authorization number(s)** PL 44673/0081 **Reference attached** https://www.medicines.org.uk/emc/product/6474/smpc#gref	Panadol advance 500mg is marketed by GlaxoSmithKline Consumer Healthcare (UK) Trading Limited bearing **Marketing authorization number(s)** PL 44673/0080 **Reference attached** https://www.medicines.org.uk/emc/product/6512/smpc#gref
2) Pharmacokinetics	
-	• Human scintigraphy data demonstrate that Panadol Advance 500 mg Tablets generally start to disintegrate by 5 minutes post dose in the stomach • 37% faster compared to standard paracetamol tablets • It dissolves in 5 minutes and start to relieve pain within 15 minutes **Reference attached** https://www.medicines.org.uk/emc/product/6512/smpc#gref
3) Disintegration time	
Disintegration Time: within 15minutes	**Disintegration Time:** within 10minutes
Dissolution	
Dissolution Test: NLT 80% (Q) in 30minutes	**Dissolution Test: NLT 80% (Q)** in 10minutes
4) Technology/Formulation	
Standard Paracetamol tablet formulated using conventional wet granulation process	Optizorb technology is used to provide rapid onset of action and allows it to dissolve in 5minutes and start to relive pain with in 15minutes
5) Excipients	
-	• Contain a unique disintegrant system which consist on following three excipients: ▪ **Alginic acid** which draws fluid from the stomach into the tablet causing it to swell and break apart ▪ **Calcium Carbonate** works together with Alginic Acid to boost disintegration of the tablet

Crospovidone acts as a super-disintegrate due to its ability to dissolve well in water

Decision of 321st meeting: The Board discussed that the applicant already have the registration of formulation containing Paracetamol 500mg as immediate release tablet whereas the firm has applied for the same formulation having different excipients and there is no change in strength, dosage form, salt form, drug delivery system etc. Considering the fact that different excipients are used in the applied product and already approved formulation, the Board deferred the case for clarification from applicant and then further deliberation.

Firm's response:

- Keeping in line with the International developments for new & innovative drug therapies in Pain Management, and as per DRAP's Vision to ensure access to safe, quality assured and efficacious therapeutic drugs in line with the national laws and international best practices, we have developed this formulation

- Paracetamol is considered as a safe and efficacious drug from the time of its first introduction in 1950. Since then, in order to improve over its limitations while providing innovative therapies to healthcare professionals as well as the patients, the innovator / Research Company, M/s. GSK introduced a new and improved formulation under the name of PANADOL ADVANCE (with Optizorb Formulation)

  Panadol Optizorb 500 mg tablet (new formula) is a fast-dissolving paracetamol tablet which has been formulated to have an improved tablet dissolution rate compared to standard paracetamol tablets. It contains a disintegrant system which improves early drug absorption compared to a standard paracetamol tablet, as demonstrated start to disintegrate by 5 minutes post dose and early expose to paracetamol have been detected on plasma by 10 minutes in fasted and fed states.
  (Reference enclosed: European Union Member State Public Assessment Report 2014)

  This formulation, besides Conventional Paracetamol, is available in many countries worldwide as detailed below:

Reference Regulatory Authority (RRA) /PICs Member States	**Conventional formulation**	**Advance formulation**
EMA	Yes	Yes
United Kingdom	Yes	Yes
Australia	Yes	Yes
Ireland	Yes	Yes
Belgium	Yes	Yes
Malaysia	Yes	Yes
United Arab Emirates	Yes	Yes

Reference pages from respective RRA are enclosed

- Comparison of various parameters between "Conventional Paracetamol Tablets" viz. a viz. newly applied ADVANCE formulation is mentioned as under; our applied formulation is comparable with the Innovator brand – PANADOL ADVANCE

Parameters	**Conventional Panadol / Provas Tablets**	**PANADOL ADVANCE / PROVAS NOVO**
Disintegration	Within 15 minutes	Within 10 minutes

Absorption	Paracetamol is poorly absorbed in the stomach but well absorbed in the small intestine due to the greater surface area and absorptive capacity. Conventional Paracetamol tablets have no such ingredient(s) to increase the rate of absorption	Human scintigraphy data demonstrates that the tablets generally start to disintegrate by 5 minutes post dose in the stomach The advanced technology disperses up to five times faster than standard paracetamol tablets
Dissolution	NLT 80% (Q) in 30 minutes	NLT 80% (Q) in 10 minutes
Gastric safety	-	The absorption of Paracetamol occurs in the small intestine and as such is dependent on the rate of emptying of stomach contents into the small intestine and is therefore not associated with gastric irritation. The technology used in PROVAS NOVO 500mg Tablets increases gastric emptying time of the drug
Onset of action	Onset of action is slow, as peak plasma concentrations occur about 30 minutes to 2 hours after ingestion	**The unique disintegrant system is used to provide rapid onset of action and allows it to dissolve in 5 minutes and start to relieve pain within 15 minutes**. Human pharmacokinetic data demonstrate that the time taken to reach plasma paracetamol therapeutic threshold is at least 37% faster as compared to standard paracetamol tablets
Other attributes	Round conventional shape Uncoated tablets and hence a bitter taste	Capsular shape makes it easy to swallow Bitter taste of Paracetamol is masked through film coating Stomach friendly
Formulation detail	Each tablet contains: Paracetamol Maize starch Povidone Potassium sorbate Soluble starch Purified talc Stearic acid	Each film coated tablet contains : Paracetamol Pregelatinized Starch Polyvinylpyrrolidone K-30 Calcium Carbonate Alginic Acid Crospovidone Type A Silicon Dioxide Fumed Magnesium Stearate Hydroxypropylmethyl cellulose ES Polyethylene Glycol 6000 Titanium dioxide Polysorbate 80

Above references taken from SmPC & Official website of PANADOL ADVANCE are enclosed

- Conventional Paracetamol Tablet is available in Pharmacopeia, whereas under applied PROVAS NOVO having different specifications which is more stringent than the Pharmacopeal specifications, for which we have already submitted our revised Finished Product specifications, vide our letter dated 22-08-2022, complying with that of the Innovator brand

• While considering the difference in various parameters between the two formulations i.e. Conventional Paracetamol & PROVAS NOVO Tablets and its availability in many RRA countries besides conventional Paracetamol Tablets, we hope you will find the above explanation in order and grant us registration of this novel formulation		
Decision of 329th meeting: Registration Board deferred the case for further dliberation.

Remarks OF Evaluator-I:

Sr. No.	Observations	Response
1	As per Section 1.6.5 the drug substance manufacturer is M/s Suzhou Homesun Pharmaceutical Co., Ltd., while as per Module II and III and as per the submitted documents the manufacturer is M/s Fleming Laboratories Limited, India, Please clarify. Moreover, provide GMP certificate of drug substance manufacturer along with the correct name and address of drug substance manufacturer in-lined with the name and address mentioned in GMP certificate.	The manufacturer of API is M/s Suzhou Homesun Pharmaceutical Co., Ltd., No. 12 West Xiexin road, Taicang Port Development Zone, Taicang City, Jiangsu Province China. The firm has provided relevant documents including GMP certificate. Stability study of API is submitted already with the initial application. Copy of GMP certificate no. JS20170699 valid till 03/09/2022 issued by Jiangsu Food and Drug Administration
2	Please provide detail of specifications of the drug substance along with the submission of detail of analytical procedures.	Submitted.
3	Please provide detail of reference standard along with the COAs in relevant section since the information is not provide din the submitted dossier.	Submitted. Batch number: 20201105
4	Provide analytical method verification studies including accuracy, specificity and precision for drug substance performed by drug product manufacturer.	The firm has submitted analytical method verification studies including specificity, accuracy and precision from drug product manufacturer long with the protocol.

5	Detail of container closure system for the drug substance.	Submitted.
5	Provide Pharmaceutical Equivalence studies against reference / innovator's product by performing all the quality tests.	The firm has submitted pharmaceutical equivalence against Zatofen Syrup 60mL Mfg by M/s Novarits by performing quality tests. Batch number: JLRAAH
6	Provide COA of relevant batch used for the product development of the applied product from drug substance as well as from the drug product manufacturer.	COA is submitted from drug product manufacturer and drug substance manufacturer. Batch number: 20201005
7	The excipients used in the applied formulation are different from the excipients used by the innovator, therefore, you are required to submit compatibility studies of excipients with the drug substance.	Drug-excipient compatibility studies have been submitted.
8	UV method has been developed for analysis of the drug product instead of HPLC method, please justify.	*The product is developed according to In-House specifications. At the time of product development phase, we have developed the analytical method of Ketis Syrup on UV spectrophotometer for performance of assay test along with the performance of analytical method validation studies.*
9	Please provide detail of reference standard along with the relevant COAs.	Submitted.
10	Stability summary sheets for batch number T002 for 3rd month time point of accelerated stability studies are not provided.	The firm has submitted stability summary sheets for batch number T002 for 3rd month time point of accelerated stability studies.
11	Provide documents for the procurement of API with approval from DRAP (in case of import).	Copy of invoice number 01005SLT2012401-2 dated 08/01/2021 cleared vide diary number 1439/2021-DRAP dated 26/01/2021.
12	Provide complete batch manufacturing record.	Submitted.
13	Justification is required since the trial batches have been manufactured before the grant of "Oral Liquid Section (General)'.	*Please be informed that all trial batches are developed in R&D lab.*

Decision of 323rd meeting: Registration Board deferred the case for submission of complete testing including Assay test using HPLC method on the next time point of long term stability studies along with analytical method validation studies.

Firm's response: Firm has submitted long term stability studies data at next time point for Trial 001 (24th month), Trial 002 (24th month) & Trial 003 (18th month) wherein Assay testing has been performed as per HPLC method. Firm has submitted relevant HPLC chromatograms and raw data sheets along with analytical method validation studies for the HPLC method.
Fee shall be submitted for revision of drug product analytical procedure.

Decision: Registration Board while considering the case noted the fact that firm has manufactured the trial batches without formal approval of the manufacturing facility and even before the panel inspection for the approval of "Oral Liquid Section (General)", hence Board decided that the submitted stability data of these trial batches could not be considered.
Registration Board further decided that firm shall formulate new trial batches and submit its stability data for both accelerated and long term conditions along with full fee of registration i.e., Rs. 30,000/- for correction/pre-approval change in stability data as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.
The Board further advised PE&R Division to prepare guidance document on the matter.

10.	**Name and address of manufacturer / Applicant**	**M/s Pacific Pharmaceuticals Limited 30 Km, Multan road Lahore**
	Brand Name +Dosage Form + Strength	Dexlan 30mg Capsule

	Composition	Each Capsules contains: Dexlansoprazol delayed release pellets eq t Dexlanzoprazol.....…30mg
	Diary No. Date of R& I & fee	Dy. No 36634 dated 06-11-2018 Rs.20,000 /- Dated 06-11-2018
	Pharmacological Group	Proton Pump inhibitor
	Type of Form	Form 5
	Finished product Specifications	Manufacturer specifications
	Pack size & Demanded Price	2 x 7's, 4 x 7's :As per SRO
	Approval status of product in Reference Regulator Authorities	Dexilant Delayed Release Capsule 30mg of USFDA approved
	Me-too status	Lansodex Capsule 30mg of M/S Getz Pharma
	GMP status	Last inspection conducted on 22/02/2018 and concludes that "In the light of the inspection conducted by the panel and based on the people met, documents reviewed and findings during inspection, M/s pacific pharma ltd Multan road Lahore, was considered to be operating at good level of GMP compliance at the time of inspection. Therefore, the panel of inspectors recommends considering the firm for grant of GMP certificate for export purposes." "GMP Certificate Issued on 05-03-2018."

DOCUMENTS / DATA PROVIDED BY THE APPLICANT

Sr. No.	Documents To Be Provided	Status

1.	Reference of previous approval of applications with stability study data of the firm.	• Not submitted
2.	Certificate of Analysis of API from both API Manufacturer and Finished Product manufacturer.	**Copy of COA of Dex-Lansoprazole DDR pellets 22.5% (Batch# PDLB19003, PDLB19002 & PDLB19001) from M/S Al Wajar Pharmaceuticals Industry LLC is submitted.** Copy of COA [Batch# DLP 376)from M/S Vision Pharmaceuticals (Pvt) Ltd is submitted. Copy of COA (Batch# DLP 376) from M/S Pacific Pharmaceuticals is submitted.
3.	Method used for analysis of API from both API Manufacturer and Finished Product manufacturer	Yes
4.	Stability study data of API from API manufacturer	Yes
5.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Certificate of Good manufacturing practice Based on inspection conducted on 11-02-2019
6.	Documents for the procurement of API with approval from DRAP (in case of import).	Not valid
7.	Protocols followed for conduction of stability study	Yes
8.	Method used for analysis of FPP	No
9.	Drug-excipients compatibility studies (where applicable)	Not valid
10.	Complete batch manufacturing record of three stability batches.	No
11.	Record of comparative dissolution data.	No
12.	Data of 03 batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	No
13.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	Yes
14.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Yes

Remarks of Evaluator

S.No	Shortcomings Communicated	Reply
1.	Data has not been provided as per guidelines approved by registration board in 293rd meeting nor arranged in order.	Submitted
2.	Stability data of 30mg and 60mg shall be submitted separately.	Submitted
3.	Submit differential fee of RS: 80000/- in case of imported pellets.	**Now source mentioned is vision pharmaceuticals**

4.	Submit Certificate of Analysis of API from Finished Product manufacturer	Submitted
5.	Submit Method used for analysis of API from both API Manufacturer and Finished Product manufacturer	Submitted
6.	Submit Stability study data of API from API manufacturer	Submitted
7.	Submit Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin	Submitted
8.	Submit AD attested invoice of pellets.	Not valid
9.	Protocols followed for conduction of stability study prepared after initiation of stability studies. Clarify	Submitted
10.	Data of 03 batches will be supported by attested respective documents like, Raw data sheets, COA, summary data sheets etc.	Not Submitted
2nd letter 24th November 2021		
1.	In initial submitted data source of pellets was M/S Al-Wajar Pharmaceuticals Industry LLC while in reply source of pellets is changed to vision Pharmaceuticals. Clarification is required in this regard.	• The Vision Pharmaceuticals has provided complete data, while no supporting documents are provided by M/s Al Wajar Pharmaceuticals, That's why, pallets are locally purchased and source is changed to Vision Pharmaceuticals. • Firm has also submitted copy of commercial invoice from M.s Vision Pharmaceuticals for the Dexlansoprazole pellets dated 28-12-2018.
2.	Method used for analysis of FPP.	Firm has submitted drug product analytical procedure.
3.	Reference of previous approval of applications with stability study data of the firm.	Firm has referred to previous onsite inspection report of their product Esmelin tablet 15mg dated 10-08-2020 on the basis of which Registration Board in its 313th meeting decided to approve the registration of Esmelin 15mg tablet. The report shows that: • The HPLC software is 21 CFR compliant and Log of data was available in the HPLCs. The data was also checked through hard copies of chromatograms. • Adequate monitoring and control were available for stability chamber. The firm was advised to improve the alarm system.
4.	Record of comparative dissolution data.	Firm has submitted comparative dissolution profile studies against the Delanzo 30mg capsule of M/s Sami Pharmaceutical with acceptable value of f2 value.
5.	Complete batch manufacturing record of three stability batches.	Firm has submitted BMR of three trial batches.
6.	Data of 03 batches will be supported by attested respective documents like, Raw data sheets, COA, summary data sheets etc.	Submitted.
Decision of 324th meeting: Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.		

Firm's response:

Remarks of Evaluator[II]:

Section#	Observations	Firm's response
1.5.3	Submit the strength/concentration of applied formulation as per innovator product in terms of mg/ml and considering the equivalency factor for hydrogen malate along with submission of fee for correction/pre-approval change in label claim as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.	Firm has submitted revised label claim: "Each 5ml contains: Pizotifen as hydrogen malate ……. 0.25mg"
3.2. S.4.3	Drug Substance Analytical Method Verification Studies shall include performance of specificity and accuracy parameter.	Submitted.
3.2.P.1	Justify the prosed quantity of Pizotifen malate per unit considering equivalency factor for hydrogen malate	Firm has submitted justification based upon the theoretical factor for the malate salt form calculated on basis of molecular weight.
3.2.P.5.2	Submit drug product analytical procedure.	Submitted.
3.2.P.5.4	Submit signed batch analysis certificates for the trial batches.	Submitted.
3.2.P.5.6	Justification/reference shall be submitted for the limits of test of pH and viscosity.	It is submitted that during the product development phase, we have developed the testing specifications of PD-Fen (Pizotifen) Syrup by comparing it with Competitor product (Mosegor (Pizotifen) Syrup), manufactured by Novartis Pharmaceuticals. The test limits of pH and viscosity are established by keeping in view the nature of the excipients and also with respect to the competitor product, available in the market. The pharmaceutical equivalence is submitted.
3.2.P.8	• Submitted invoice is of different batch no. of drug substance from that submitted in section 3.2. S.4.4. • Submit batch manufacturing record for stability batches. • Justification shall be submitted for applying UV spectrophotometric method for the performance of Assay test. • Justification shall be submitted for the production of trial batches before the grant of "Oral liquid section."	• Firm has submitted commercial invoice of relevant batch#20201026 attested by AD I&E DRAP Lahore dated 26-01-2021. • Firm has submitted trial batch manufacturing record for three stability batches. • It is submitted that the product is developed on In-house specifications. At the time of product development phase, we have developed the analytical method of PD-Fen Syrup 0.25mg/5ml on UV spectrophotometer for the performance of assay test. The compliance of this method is ensured through analytical method validation (provided with the dossier). The developed method has been validated

statistically for their specificity, linearity, accuracy and precision as per guidelines.
- Please be informed that all trial batches are developed in R&D Lab (Batch size: 2.40 Liters).

Decision of 323rd meeting: Deferred for following:

- Revision of drug product analytical procedure for assay test on basis of HPLC method and submission of performance of next time point of long term stability studies as per revised HPLC method along with analytical method validation studies.
- Evidence of approval of R&D lab from CLB.

Firm's response:

Observations	Firm's response
Revision of drug product analytical procedure for assay test on basis of HPLC method and submission of performance of next time point of long term stability studies as per revised HPLC method along with analytical method validation studies.	Firm has submitted revised drug product analytical method for Assay test based on HPLC method along with method validation studies and long term stability studies of next time point with Assay test as per HPLC method.
Evidence of approval of R&D lab from CLB.	It is submitted that our syrup section was ready for inspection in October 2019 as intimated by us to I Licensing Division vide letter no. PDHL/D&RA/19/0828 (copy attached) while the final approval was granted in July 2022 (Copy attached). Since we had the requisite manufacturing equipment available in our newly developed section so we developed R&D trial batches in said facility in November 2021 to avoid delay in product development and stability studies.

Decision: Registration Board while considering the case noted the fact that firm has manufactured the trial batches without formal approval of the manufacturing facility and even before the panel inspection for the approval of "Oral Liquid Section (General)", hence Board decided that the submitted stability data of these trial batches could not be considered.

Registration Board further decided that firm shall formulate new trial batches and submit its stability data for both accelerated and long term conditions along with full fee of registration i.e., Rs. 30,000/- for correction/pre-approval change in stability data as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.

	Remarks of the Evaluator.	• Confirmation of availability of RI detector.
	Decision of 272nd meeting: Deferred for confirmation of availability of RI detector.	
	Firm's response: Firm has submitted IQ & OQ reports of the HPLC equipped with RI Detector along with commercial invoice for the RI detector.	
	Decision: Approved with Innovator's specifications. The firm shall submit fee of Rs. 7,500/- for correction/pre-approval change in product specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021, before issuance of registration letter.	

Case no. 04 Registration Applications of priority on basis of NCE:

22.	**Name, address of Applicant / Importer**	**M/s AJM Pharma (Pvt.) Ltd., 1st Floor, Shafi Court, Merewether Road, Civil Lines, Karachi. Pakistan.**
	Details of Drug Sale License of importer	**License No: 064** **Address:** 1st Floor, Shafi Court, Civil Lines, Merewether Road, Karachi, Pakistan. **Address of Godown:** Plot No.44, Sector27, orangei Industrial Area, Karachi

		Validity: 23.02.2023. **Status:** License to sell drugs as distributor **Renewal:**
	Name and address of marketing authorization holder (abroad)	Chia Tai Tianqing Pharmaceutical Group Co., Ltd. No. 369 South Yuzhou Road, Haizhou District, Lianyungang,Jiangsu Province, China,
	Name, address of manufacturer(s)	Chia Tai Tianqing Pharmaceutical Group Co., Ltd. No. 369 South Yuzhou Road, Haizhou District, Lianyungang,Jiangsu Province, China,
	Name of exporting country	China
	Detail of certificates attached (CoPP, Freesale certificate, GMP certificate)	**CoPP:** Firm has submitted original, legalized CoPP certificate (No.JS20220116) valid up to 31-03-2024 issued by Jiangsu Drug Administration, China the Applied product is available for free sale in exporting country. The facilities and operations conform WHO-GMP as per CoPP as well as GMP status of the manufacturing site through periodic inspection every year.
	Details of letter of authorization / sole agency agreement	Copy of Letter of Authorization is attached. Chia Tai Tianqing Pharmaceutical Group Co., Ltd. No. 369 South Yuzhou Road, Haizhou District, Lianyungang,Jiangsu Province China, authorizes M/s AJM Pharma (Pvt) Ltd., 1st Floor Shafi Court, Merewether Road , Civil Lines Karachi to register, Import & Distribute Fosaprepitant Dimeglumine 150mg Injection. The authorization letter is valid till 19,2027.
	Status of the applicant	☐ Manufacturer ☒ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☒ New Drug Product (NDP) ☐ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	For imported products, specify one the these	☒ Finished Pharmaceutical product import ☐ Buk import and local repackaging ☐ Buk import and local repackaging for export purpose only
	Dy. No. and date of submission	Dy.No 13563 dated 03-06-2022
	Details of fee submitted	PKR 75,000/-: 23-05-2022
	The proposed proprietary name / brand name	**FOSATANT 150mg Powder for Solution For Infusion**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial contains: Fosaprepitant as Dimeglumine ……. 150 mg
	Pharmaceutical form of applied drug	Powder for solution for infusion
	Pharmacotherapeutic Group of (API)	Anti-emetics and antinauseants Pharmacological Class: P/neurokinin 1 (NK1) receptor antagonist.
	Reference to Finished product specifications	As per In-house Specs.
	Proposed Pack size	**1 Vial / Unit Pack**

	Proposed unit price	As Per Current SRO
	The status in reference regulatory authorities	IVEMEND® with marketing authorization holder of Merck Sharp & Dohme Ltd, United Kingdom, the marketing authorization was granted on 11 January, 2008 in EU with an MA (EU) Number of EU/1/07/437/003.
	For generic drugs (me-too status)	NA
	Module-II (Quality Overall Summary)	Submitted
	Name, address of drug substance manufacturer	M Lianyungang Runzhong Pharmaceutical Co., Ltd.. No. 16 Jinqiao Road, Dapu Industrial Park, Lianyungang, Jiangsu 222069, China
	Module-III Drug Substance:	Firm has submitted detailed drug substance data for both sources related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of API at accelerated as well as real time conditions. The real time stability data is conducted at -20 °C ± 5 °C. The stability study data is till 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical Equivalence performed against RMP (IVEMEND®, Lot: M036007) by Merck Sharp & Dohme Ltd.
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	Injection vials made of neutral borosilicate glass tubing Transparent, Rubber closures, Caps made of aluminum-plastic combination.
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches The accelerated stability study data is conducted at 25°C±2°C /60%RH±5%RH for 6 months. The real time stability study data is conducted at 5°C±3°C. The real time stability study data of 3 batches is for 36 months.
Evaluation by PEC[II]: Firm has submitted label claim is not as per reference product wherein the declared strength is in terms of the base whereas section 3.2.P.1 and COPP declares the strength as per Innovator product i.e. Each vial contains Fosaprepitant Dimeglumine eq. to Fosaprepitant ……. 150 mg		
Decision: Approved with Innovator's specifications as per policy of inspections of manufacturer abroad. The firm shall submit fee of Rs. 7,500/- for correction/pre-approval change in product specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021, before issuance of registration letter.		

Case no. 05 Registration Applications of New DML (Human):

CLB in its 282nd meeting held on 31st August 2021 has considered and approved the grant of Drug Manufacturing License by way of formulation with following six (06) sections to M/s Swera Pharmaceuticals Plot 27, Street S-4, Industrial Area Rawat Islamabad

1	Tablet(General)	4	Cream/ Gel (General)
2	Capsule (General)	5	Lotion Section (General)
3	Sachet (General)	6	Dry Powder Injection (General)

23.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Swera Pharmaceuticals Plot 27, Street S-4, Industrial Area Rawat Islamabad**
	Name, address of Manufacturing site.	M/s Swera Pharmaceuticals Plot 27, Street S-4, Industrial Area Rawat Islamabad
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)

	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 6022 dated 03/03/2023
	Details of fee submitted	PKR 30,000/-: dated 03/03/2023
	The proposed proprietary name / brand name	**Swedol 500mg Tablets**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Tablet contains: Paracetamol …….500mg
	Pharmaceutical form of applied drug	White to off white rounded compressed tablets packed in PVC blister
	Pharmacotherapeutic Group of (API)	NSAID
	Reference to Finished product specifications	BP specs
	Proposed Pack size	1×100's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Name of the drug; **Paracetamol 500mg Tablets** approved by MHRA of UK
	For generic drugs (me-too status)	Mylenol 500mg Tablets by M/s Dr Raza Pharma 44-C industrial state Hayat Abad Peshawar
	GMP status of the Finished product manufacturer	New license granted on 14/09/2021 Tablet (General) section approved.
	Name and address of API manufacturer.	**Pharmagen Limited** Kot Nabi, Bukswala, 34km Ferozepur Road Lahore Pakistan www.pharmagen.com.pk
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of

		specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The firm has submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 72 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches:(LE00510911/001/2016, LE00510911/002/2016, LE00510911/003/2016)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the Innovator that is Panadol 500mg Tablets by GlaxoSmithKline by performing quality tests (Identification, Assay, Dissolution, Uniformity of dosage form). CDP has been performed against the same innovator that is Panadol 500mg Tablets by GlaxoSmithKline in pH 1.2, 4.5 and 6.8 media The values for f1 and f2 are in the acceptable range.
	Analytical method validation/verification of product	Method verification studies have submitted including accuracy, precision, specificity.

<tr><td colspan="3">Decision of 317th meeting: Deferred for review as firm has changes the ingredients in subsequent application.</td></tr>
<tr><td colspan="3">Firm’s reply: Firm has submitted that on basis of not finding the approval status of product in requested to reconsider for approval of the product with changed composition.</td></tr>
<tr><td colspan="3">Decision of 323rd meeting of Registration Board:</td></tr>
</table>

Registration Board did not accede for change of active ingredient in the applied formulation and deferred for following:

- Evidence of applied formulation/drug already approved by DRAP (generic / me-too status) alongwith registration number, brand name and name of firm.
- Evidence of approval of applied formulation in reference regulatory authorities/agencies which were declared/approved by the Registration Board in its 275th meeting.

Response by the firm:

Firm has again requested to consider their previosu request in which they have applied for revision of the formulation as per the reference regulatory authorities, since the applied formulation is not approved by any reference regulatory authority. Firm has referred to their already submitted reply as under:

Reply of the firm vide dairy No. 1018 (PEC DRAP) dated 13-05-2022 along with pre-registration fee of 30,000 vide challan No.78017563568 dated 13-05-2022 and submitted revised form -5 mentioning revised label claim and composition for standardization of formulation as under:

Composition	Each Film Coated Tablet Contains: Paracetamol……325 mg Tramadol HCl…….37.5mg
Pharmacological Group	Anti-Pyretic/Analgesic
Finished Product specification	Innovators specification
Pack size & Demanded Price	10's, As per SRO
Approval status of product in Reference Regulatory Authorities	Ultracet Tablet by M/s Janssen Ortho, (USFDA approved)
Me-too status	Forgesil Tablet by M/s Genome Pharmaceutical (Reg No:080874

Firm has also provided reference of their another application in which they have revised the formulation and the same case was also approved by the Board in its 320th meeting. The details of the initial applied formulation, revised formulation and decision of Board is placed below:

Initially applied formulation	**Revised formulation**	**Decision of 320th meeting of RB**
Each Tablet Contains: Paracetamol…….500 mg Pseudoephedrine HCl……60 mg Chlorpheniramine Maleate……4 mg	Each Tablet Contains: Paracetamol……500 mg	Approved. Registration Board further decided that registration letter will be issued after submission of applicable fee that is Rs. 30,000/- for revision of formulation as per reference product as per notification No.F.7-11/2021-B&A/DRAP dated 07-05-2021.

Decision: Registration Board acceded to the request of the firm and decided to approved the application as per following revised label claim with USP specifications:

"Each Film Coated Tablet Contains:

Paracetamol……325 mg

320.	Name and address of manufacturer / Applicant	M/s Hoover Pharmaceuticals (Pvt) Ltd. Plot#16, Zain Park Industrial Area, Saggian bypass Road, Lahore.
	Brand Name +Dosage Form+ Strength	Enemax Enema, Rectal Solution
	Composition	Each ml contains: Monobasic Sodium Phosphate…….161mg Dibasic Sodium Phosphate…….59.3mg
	Diary No. Date of R& I & fee	Dy. No.7209, 29-06-2017; Rs.20,000/- (29-06-2017)
	Pharmacological Group	Laxative
	Type of Form	Form-5
	Finished product Specification	Manufacturer's specifications
	Pack size & Demanded Price	135ml / As per SRO
	Approval status of product in Reference Regulatory Authorities.	Fleet Ready-To-Use Enema (reformulation) bottle by M/s Care Pharmaceuticals Pty Ltd (TGA Approved)
	Me-too status	Kleen Enema by Nabi Qasim (Reg#006715)
	GMP status	12-02-2018 Inspection for Grant of GMP certificate. Firm has maintained fair level of GMP.
	Previous remarks of the Evaluator.	International availability and me-too status are not confirmed.
	Previous decision(s) 274th Meeting of Registration Board held on 21-23rd September, 2017	Deferred for submission of evidence of approval in reference regulatory authorities and me-too status. Deferred for confirmation of manufacturing facility for applied formulation (M-285).
	Evaluation by PEC	Submitted evidence of approval in RRA: Fleet Ready-To-Use Enema (reformulation) bottle by M/s Care Pharmaceuticals Pty Ltd (TGA Approved) Firm has submitted evidence of me-too status: Kleen Enema by Nabi Qasim (Reg#006715) Firm has submitted fee of Rs.5000/-. Challan#0748683 dated 29-08-2018. The firm has submitted section approval letter No. F.1-22/2000-Lic which shows that firm has following sections: Oral Dry powder Suspension Section (General) Oral liquid section (General) External Liquid Section (General) Sachet Section (General)
	Decision of 297th meeting: Deferred for further deliberation of manufacturing facility / section of applied formulation.	
	Firm's response: "As per best of our Knowledge the product "Enema" is being manufactured bythe other companies in External Liquid Section and as such no dedicated section has advised by DRAP for the preparation of Enema. Howver as we have the facility of oral liquid as well as External Liquid approved sections, the same will be manufactured in the sections as directed by the Board."	
	Decision of 312th meeting of Registration Board: Deferred to review/discuss the manufacturing requirements of Enema including manufacturing facility of already registered products.	
	Response by the firm: Firm has submitted that as per best of our information DRAP has not specified the dedicated section for enema, beside this it would be manufactured either in internal solution or external solution. As	

	wel have approved facility for both i.e. internal as well as external solution and will be manufactured as per direction of DRB. Firm has also submitted copy of letter for grant of amendments / additional section approval dated 11-04-2017 specifying Oral liquid section (General) and External Liquid section (General).	
	Decision: Registration Board after thorough deliberation decided to approve the product for manufacturing in External Liquid section (General) section.	

Case No. 02 Registration applications of CTD cases

a. New cases of local manufacturing

321.	Name, address of Applicant / Marketing Authorization Holder	**M/s Carer Pharmaceutical Industries. Plot No. 27 Main Road, Rawat Industrial Estate, Rawat, Pakistan**
	Name, address of Manufacturing site.	M/s Seraph Pharmaceuticals Plot # 210, Industrial Triangle Kahuta Road Islamabad.
	Status of the applicant	☐ Manufacturer ☐ Importer ☒ Is involved in none of the above (contract giver) (Contract manufacturing agreement between both firms dated 25-08-2020 is provided)
	GMP status of the firm	**Seraph Pharmaceuticals:** Firm has submitted copy of GMP certificate dated 11-11-2022 issued on the basis of inspection dated 11-10-2022.
	Evidence of approval of manufacturing facility	Firm (M/s Seraph Pharmaceuticals) has submitted copy of Issuance of DML letter dated 12-06-2017 specifying Dry Vial Cephalosporin section.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No 4540 dated 17-02-2022
	Details of fee submitted	PKR 75,000/- Dated 13-01-2022
	The proposed proprietary name / brand name	**CEFCAR 1gm IM/IV Injection**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Vial Contains: Cefoperazone as Sodium…500mg Sulbactam as Sodium…500mg
	Pharmaceutical form of applied drug	Sterile white to almost white powder filled in transparent glass vials
	Pharmacotherapeutic Group of (API)	Cephalosporin antibiotic
	Reference to Finished product specifications	JP specs
	Proposed Pack size	As per SRO
	Proposed unit price	As per SRO

	The status in reference regulatory authorities	Sulperazone Intravenous Injection 1g (PMDA Japan Approved)
	For generic drugs (me-too status)	Cefbac injection by Seraph Pharmaceuticals
	Name and address of API manufacturer.	Qilu Antibiotics Pharmaceutical Co Ltd. No. 849, Dongia Town Licheng District Jinan City, Shandong Province China.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65 ± 5% RH for 24 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for their product against Cebac Injection of Bosch Pharm.
	Analytical method validation/verification of product	Firm has submitted report of verification studies of analytical method for the drug substance and product.

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has referred to following product specific inspection reports • Dexpro (Dexlansoprazole) 30 and 60mg Capsule. PSI was conducted on 11-09-2018 and the product was approved in 285th meeting of Registration Board. • Neovel 800mg Tablet. Its PSI was conducted on 14-12-2018 and the product was approved in 288th meeting of Registration Board. • Serbica 20mg Capsule. Its PSI was conducted on 29-10-2018 and the product was approved in 290th meeting of Registration Board. Firm has further submitted that their product Neogene 2g Injection was approved in 293rd meeting of Registration Board. That product was applied by AGP and contract manufactured by Seraph and was submitted on Form 5F (CTD) along with complete data.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted Copy of GMP certificate (No. SD20190876) issued by CFDA China is submitted by the firm. The certificate is valid till 21-04-2024. Firm has also submitted copy of DML of the firm (No. Lu 20160006) issued by CFDA China. The license is valid till 03-11-2025.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	• Firm has submitted copy of letter of loan and memorandum of understanding with M/s Swiss Pharma for getting 10Kg loan of Cefoperazone sodium and sulbactam sodium. • Firm has submitted copy of invoice specifying import of 40Kg Cefoperazone sodium and sulbactam sodium by M/s Swiss Pharma. The

		invoice is cleared by AD (I&E) DRAP dated 11-08-2021.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted that since the stability study of this product was initiated 2 years ago, at that time our HPLC (Schimadzu) was not 21 CFR compliant. However now we have 21 CFR compliant (Perkin Elmer) HPLC system. We undertake that in future we will use 21 CFR compliant HPLC system for stability testing.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

The same formulation of cefoperazone sulbactam manufactured by M/s Seraph Pharmaceuticals have been approved by Registration Board in its 326th meeting. The details of the product approval in 326th meeting is as under:

Applicant firm	AGP Limited, B-23-C, S.I.T.E., Karachi, Pakistan
Manufacturer firm	Seraph Pharmaceuticals Plot # 210, Industrial Triangle Kahuta Road Islamabad.
Brand Name	CEBACTUM 1gm Injection
Batch No. of drug product	T001 (1000 Vials), T002 (1000 Vials), T003 (1000 Vials)
Case No.	30
Page number	91-94
Registration Board meeting	326th meeting of Registration Board.

Decision: Approved.

- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	No inspection for verification of stability study data has been conducted
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (No. DCD/SPL.CL-1/CR-1510/2020-21) issued by Drugs Control Department Government of Karnataka India dated 06-02-2021. The GMP certificate is valid for one year from the date of issue.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice specifying import of 5Kg Ondansetron hydrochloride dated 18-10-2018. The invoice is cleared by AD (I&E) DRAP.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted that their HPLC system is not 21 CFR compliant.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC(III)::

The same formulation of cefoperazone sulbactam manufactured by M/s Bio-Mark Pharmaceuticals Plot No. 527, Sundar Industrial Estate, Lahore.have been approved by Registration Board in its 317th meeting. The details of the product approval in 317th meeting is as under:

Applicant firm	M/s Horizon Healthcare (Pvt) Ltd. Plot No. 35-A, Small Industrial Estate, Taxila.
Manufacturer firm	Bio-Mark Pharmaceuticals Plot No. 527, Sundar Industrial Estate, Lahore.
Brand Name	ONDATRO Syrup 4mg/5ml

	Batch No. of drug product	19A202 (10,000 bottles), 19E216 (10,000 bottles), 19M244 (10,000 bottles)
	Case No.	7
	Page number	315-318
	Registration Board meeting	317th meeting of Registration Board.

Decision: Approved.

- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

b. Deferred cases of local manufacturing

324.	Name, address of Applicant / Marketing Authorization Holder	**M/s Sami Pharmaceuticals, F-95, SITE, Karachi.**
	Name, address of Manufacturing site.	M/s Sami Pharmaceuticals, F-95, SITE, Karachi.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☒ New Drug Product (NDP) ☐Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 8323 dated 15-03-2021
	Details of fee submitted	PKR 50,000/-: dated 08.01.2021
	The proposed proprietary name / brand name	**D-Tres oral 400 IU Drops**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each drop contains: Cholecalciferol (Vitamin D3) Ph. Eur….400 IU (10µg) Innovator Specs
	Pharmaceutical form of applied drug	Oral drops
	Pharmacotherapeutic Group of (API)	Vitamin D ATC code: A11CC05
	Reference to Finished product specifications	Innovator Specs
	Proposed Pack size	10ml, 15 ml, 20 ml
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	SAPVIT D3 Oral Drops Solution
	For generic drugs (me-too status)	NA
	GMP status of the Finished product manufacturer	GMP Certificate issued date 11-08-2020
	Name and address of API manufacturer.	FERMENTA BIOTECH LIMITED Plot No. Z-109 B & C, SEEZ II, Dahej Taluka – Vagra, Distt. Bharuch 392 130 Gujarat, India
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template.

		Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of Cholecalciferol is present in Ph. Eur. The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for impurity & related substances and specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 5 ± 3°C for 36 months Accelerated: 25°C ± 2°C / 60% ± 5%RH for 6 months
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure and its validation studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical equivalence not performed due to the unavailability of the innovator sample, CDP is not applicable
	Analytical method validation/verification of product	Method validation studies have submitted including linearity, accuracy, precision, specificity.

6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks OF Evaluator:

	Shortcomings	Reply of the firm
2.3.S.4.3	The drug product manufacturer has performed impurity and residual solvent testing in the drug substance. The firm did not perform the method validation/verification for the same	We performed assay method validation of the drug substance as per CTD requirement. Validation of Impurity and residual solvent testing is performed by drug substance manufacturer.
3.2.P.1	Justification/scientific rationale is required for addition of 20% overage along with submission of stability assay report of the latest time point	Some active pharmaceutical ingredients including several vitamins in certain dosage forms or packaging condition may be susceptible to degrade or deteriorate and may not remain their native form over the shelf life of product. Degradation or deterioration of vitamins is one of the major factors that lead manufacturer to require excess amount of vitamins in their products, to ensure the amount of the drug substance meets the requirement of 100% of the label claim amount throughout the shelf life of the product. (**Referred ANNEXURE –I** Pharmacopeial Forum Vol.42.42 (3) [May-June 2016], Stimuli to the Revision Process, Factors to Consider in Setting Adequate Overages of Vitamins and Minerals in Dietary Supplements). Outside the U.S., many jurisdictions recognize the minimum value as 80-90% of label claim. For example, the Danish and Korean authorities allow a shelf-life minimum of 80% of label claim for added vitamins and minerals, and the United Kingdom allows -50% for water soluble vitamins

<table>
<tr><td></td><td></td><td>and minerals, and -30% for oil soluble vitamins. U.S.-designed products with inputs typically 10-50% higher than the label claim to meet 100% minimum requirement at end of shelf life can exceed upper specifications limits for non-U.S. countries with maximum overage limits. (Referred ANNEXURE –II Council for Responsible Nutrition-Docket No.FDA-2012-N-1210; Food labelling: Revision of the Nutrition and Supplement Facts Labels, Page No.27).
For development of our product i.e. D-Tres 400 IU/Drop, 20% overage of cholecalciferol (vitamin D_3) was taken to compensate initial process loss followed by the expected loss in assay during stability studies. The initial test results and stability trending of our product shows about 3% initial process loss and 3 to 4% loss in assay under accelerated condition as well as in long term condition.
Moreover, 20% overage was not fixed, as mentioned above, it is a global practice to take overages for vitamins during development studies. However, after evaluation of the stability data and stability study report of the latest time period i.e. 18 months it is observed that our product is stable and no further loss in assay observed after 18 month. (Referred ANNEXURE –III Stability trending of our product i.e. D-Tres 400 IU/Drop).
Therefore, based on the above data and stability trend analysis of our product, we recommend to reduce the overage of cholecalciferol (vitamin D_3) from 20% to 5%. However, this 5% overage will not effect safety and efficacy of product, because this 5% overage is well within the tolerable upper intake levels recommend for Vitamin D (Referred ANNEXURE –IV National Institutes of Health).</td></tr>
<tr><td>3.2.P.2.1</td><td>The theoretical dispensed weight of cholecalciferol is 12,000 IU per ml (without overages), while it is 14,400 IU per ml in the reference product. Justification is required</td><td>We have developed our product D-Tres 400 IU/Drop against the reference listed drug (RLD) i.e. Sapvit-D3 14,400 IU/ml Oral Drops, Solution (400 IU/ Drop marketed by M/s. Fresenius Kabi Limited UK.
The literate data of RLD shows that one ml of RLD is equivalent to 36 drops. 1 drop of RLD is equivalent to 400 IU (10 µg) cholecalciferol (vitamin D_3). As 0.025 µg Cholecalciferol is equivalent to 1 IU Cholecalciferol so, 360 µg is equivalent to 14,400 IU cholecalciferol (vitamin D_3) for 36 drops which is equivalent to one ml
Furthermore, please note that One ml of our product contains 30 drops. However, the label claim of Cholecalciferol per drop is same as of the RLD i.e. One drop of our product is equivalent to 400 IU (10 µg) cholecalciferol (vitamin D_3). As 0.025 µg Cholecalciferol is equivalent to 1 IU Cholecalciferol so, 300 µg is equivalent to 12,000 IU cholecalciferol (vitamin D_3) for 30 drops which is equivalent to one ml. (Referred ANNEXURE –V Package leaflet: Information for the user, Sapvit-D3 14,400 IU/ml Oral Drops, Solution (400 IU/ Drop), page no.5)
The comparative analysis of D-Tres 400 IU/Drop against Sapvit-D3 14,400 IU/ml Oral Drops, Solution (400 IU/ Drop) is mention below
<table>
<tr><th>SAMI's Product
D-Tres 400IU/Drop</th><th>RLD
Sapvit-D3 14,400 IU/ml Oral Drops, Solution (400 IU/ Drop)</th></tr>
<tr><td>1ml contains 30 drops</td><td>1ml contains 36 drops</td></tr>
<tr><td>1drop contains 400 IU (10 µg) cholecalciferol (vitamin D_3)</td><td>1drop contains 400 IU (10 µg) cholecalciferol (vitamin D_3)</td></tr>
<tr><td>30 drops =12,000 IU (300 µg)</td><td>36 drops =14,400 IU (360 µg)</td></tr>
</table>
</td></tr>
</table>

<table>
<tr><td></td><td></td><td>Based on the above details we can conclude that our product contain the same labelled amount of cholecalciferol as of the reference listed drug (RLD) i.e. 400 IU (10 µg) cholecalciferol (vitamin D_3) per drop</td></tr>
<tr><td>3.2.P.2.2.1</td><td>You have not performed pharmaceutical equivalence. Justification is required</td><td>The reference product is not available in Pakistan. We have tried to arrange it from the country of origin but unfortunately not succeeded.
Please note that the dosage form is oral solution for which BE studies also exempted (See reference guideline of FDA “Guidance for Industry, Bioavailability and Bioequivalence Studies Submitted in NDAs or INDs”,
Solutions and Other Solubilized Dosage Forms
“For oral solutions, elixirs, syrups, tinctures, or other solubilized forms, in vivo BA and/or BE are generally self-evident and a requirement of in vivo data for a product may be waived (21 CFR 320.22(b)(3)). In such instances, the applicant would be deemed to have complied with and fulfilled any requirement for in vivo data. Although a comparative study is not necessary, characterization of the pharmacokinetics of the drug is required (21 CFR 314.50(d)(3)). In addition, in vivo BE studies that compare different solution formulations are waived based on the assumptions that release of drug substance from the drug product is self-evident and that the solutions do not contain any excipients that significantly affect drug absorption. However, there are certain excipients that may alter the BA (e.g., sorbitol may reduce the BA of drugs, and vitamin E may enhance the BA) in amounts sometimes used in oral liquid dosage forms. In this case, evaluation of in vivo BA and/or BE may be required”.
Please also note that our formulation is similar to the innovator in the following,
1. API: Same as that of Reference listed drug.
2. Dosage form: Same as that of Reference listed drug.
3. Indication: Same as that of Reference listed drug.
4. Excipients: Same as that of Reference listed drug .
5. Label claim: Same as that of Reference listed drug.
However, for assay and other chemical / microbiological attributes, we have tested the product according to the general monograph of pharmacopeia and complied.</td></tr>
<tr><td>3.2.P.4.1</td><td>The coconut oil is available in pharmacopeia. The drug product manufacturer has claimed in-house specifications; and did not perform the chromium test. Justification is required</td><td>Yes, it is available in BP and testing was done according to the BP specifications. As per our procedure for excipients, we do not mention the material reference on the specifications.
The missing Chromium test performed and incorporated in our specifications.</td></tr>
<tr><td>3.2.P.5.1</td><td>Pharmacopeial monograph for the Cholecalciferol solution has the different vehicle / solvent from the innovator and our formulation is based</td><td>Pharmacopeial monograph for the Cholecalciferol solution has the different vehicle / solvent from the innovator and our formulation is based on reference listed drug (RLD), which using only API and medium chain triglyceride (coconut oil). Therefore we cannot claim it Pharmacopeial and claim it as Innovator specifications.
Please see below the difference of the formulations
<table>
<tr><th>Pharmacopeia</th><th>Innovator</th><th>SAMI</th></tr>
</table>
</td></tr>
</table>

	on reference listed drug (RLD), which using only API and medium chain triglyceride (coconut oil). Therefore we cannot claim it Pharmacopeial and claim it as Innovator specifications.	edible vegetable oil	Medium chai triglyceride (Fractionated coconut oil)	Medium chai triglyceride (Fractionated coconut oil)
		Polysorbate 80 or	-	-
		Propylene Glycol	-	-
3.2.P.5.1	Filled volume/weight variation test has not been performed	We have already performed filled volume test but not submitted to you as this is the part of our in-process testing. Please find attached the in-process report for your ready reference		
3.2.P.5.2	The applied drug product is available in pharmacopeia. The drug product manufacturer has validated their own testing method for the assay. Justification is required	As already mentioned in 3.2.P.5.1, the product available in pharmacopeia has different vehicle / solvent from the innovator. Our formulation is based on innovator. Therefore, we use the in-house developed, validated method.		
3.2.P.5.6	The drug product manufacturer has performed additional tests (other than those mentioned in the pharmacopeia). The specifications for such tests shall be justified	Pharmacopoeia tests are the minimum requirement. As per general pharmacopoeial monograph, additional tests can be performed according to the nature of substance and considering the formulation.		
3.2.P.8.3	You shall clarify whether the stability was conducted placing the bottles upright or inverted	The product is placed in inverted position.		

Decision of 316th meeting of Registration Board:

Deferred for following:

- Pharmaceutical equivalence studies of the applied product along with innovator / reference product.
- Evidence of approval of applied formulation as a pharmaceutical drug product in reference regulatory authorities / agencies which were adopted by the Registration Board in its 275th meeting.
- Scientific justification that the applied formulation is equivalent to the innovator's product in terms of cholecalciferol contents per ml as well as per drop.

Response by the firm:

Sr. No	Reason for deferment	Response by the firm
1.	Pharmaceutical equivalence studies of the applied product along with innovator / reference product.	We have developed our product D-Tres 400 IU/Drop against the reference listed drug (RLD) i.e. Sapvit-D3 Oral Drops solution (400 IU/ Drop) marketed by M/s. Fresenius Kabi Limited UK. However, due to unavailability of the reference product, pharmaceutical Equivalence has been performed against Baby Ddrops 400IU per drop - which is similar to our formulation

		Reference Document attached https://health-products.canada.ca/lnhpd-bdpsnh/index-eng.jsp
2.	Evidence of approval of applied formulation as a pharmaceutical drug product in reference regulatory authorities / agencies which were adopted by the Registration Board in its 275th meeting.	**Sapvit-D3 400 IU/drop oral drops, solution** **Qualitative and Quantitative Composition** One ml (= 36 drops) contains: 14,400 IU (360 microgram) cholecalciferol (vitamin D3) One drop = 400 IU (10 microgram) cholecalciferol (vitamin D3) **Health Products Regulatory Authority (HPRA) Ireland**
3.	Scientific justification that the applied formulation is equivalent to the innovator's product in terms of cholecalciferol contents per ml as well as per drop.	SmPC of the Innovator product clearly mentions that 1 drop is equivalent to 400IU The Leaflet & SmPC of the Innovator product SAPVIT D3 mentions the following dosage guidelines: **The Method of administration mentions that the best way to take** Sapvit-D3 oral drops is to add them drop by drop into the mouth or, if necessary, administer with a spoon and some liquid. **Prevention of vitamin D deficiency:** The usual daily dose is: For newborns, infants and children from the second week of life to the age of 3 years: between 1-2 drops For children aged 4 years and above and adolescents: between 1-3 drops For adults aged 19 to 70 years: between 1-4 drops For elderly people aged above 70 years: between 2-4 drops **Treatment of rickets** The total amount of required vitamin D depends on the severity of the disease. In existing rickets, treatment is started with a preparation with a higher concentration of vitamin D for the initial treatment. Subsequently, the usual dose is between 2 to 12 drops of Sapvit-D3 daily. **Treatment of vitamin D deficiency** The usual daily dose is: For children and adolescents: 5 drops daily for 6 weeks, then between 1-3 drops daily For adults aged 19 to 70 years and elderly people aged above 70 years: 15 drops daily for 8 weeks, then between 3-5 drops daily **Adjunct to osteoporosis treatment of patients who are at risk of vitamin D deficiency** The usual daily dose is: For adults aged 19 years and above: between 2-4 drops daily or between 14-26 drops weekly. **Based on the dosage guidelines for multiple conditions as mentioned above, SAPVIT D3 is available in 12.5 ml (corresponding to 450 drops) or 25 ml (corresponding to 900 drops), whereas our product D-Tres Oral Drops applied pack size is 10ml.**

		The literate data of RLD shows that one ml of RLD is equivalent to 36 drops. 1 drop of RLD is equivalent to 400 IU (10 µg) cholecalciferol (vitamin D_3). As 0.025 µg Cholecalciferol is equivalent to 1 IU Cholecalciferol so, 360 µg is equivalent to 14,400 IU cholecalciferol (vitamin D_3) for 36 drops which is equivalent to one ml. Furthermore, please note that One ml of our product contains 30 drops. However, the label claim of Cholecalciferol per drop is same as of the RLD i.e. One drop of our product is equivalent to 400 IU (10 µg) cholecalciferol (vitamin D_3). As 0.025 µg Cholecalciferol is equivalent to 1 IU Cholecalciferol so, 300 µg is equivalent to 12,000 IU cholecalciferol (vitamin D_3) for 30 drops which is equivalent to one ml. Finally, the firm summarized that their per drop content is same as that of the reference product.

Decision of 320th meeting of Registration Board:

Deferred for following points:

- Clarification since the concentration of Cholecaliferole per mL of the innovator's product is 360ug (Eq. to 14,440IU) while the applied product contains 30ug (12,000IU) per mL.
- Confirmation of RDA value for Cholecalciferole.

Response by the firm:

The firm vide its letter dated 24-05-2023 has submitted that they have again developed their product as per the reference product and conducted its stability studies. The new formulation comparison with the reference product is given below:

Formulation of our product D-Tres 400 IU/Drop has been developed as per Innovator's product viz. Sapvit-D3 14,400 IU/ml Oral Drops, Solution (400 IU/ Drop); details are appended below:

Parameters	SAPVIT-D3 Solution (400 IU/ Drop)/14,400 IU/ml Oral Drops	D-Tres 400 IU/Drop
Contents per Drops Cholecalciferol (Vitamin D3)	1 drop contains 400IU (10 µg)	1 drop contains 400IU (10 µg)
Number of drops per ml	36 drops	36 drops
Contents per ml (Cholecalciferol)	14,400 IU (360 µg)	14,400 IU (360 µg)
Filled Volume (pack size)	12.5ml and 25ml	10.0ml

The new product development and stability data submitted by the firm is as under:

STABILITY STUDY DATA	
Manufacturer of API	Fermenta Biotech Limited, Plot No. Z-109B & C, SEZ-II, Dehaj, Taluka Vagara District Bharuch Gujrat India.

	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of

		specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for the quality tests for their product against the comparator product Delanzo capsule of Sami Pharmaceuticals. Firm has submitted results of CDP for their product against the comparator product Delanzo capsule of Sami Pharmaceuticals.
	Analytical method validation/verification of product	Firm has submitted report of verification of analytical method for the drug substance. Firm has submitted report of verification of analytical method for the drug product.

STABILITY STUDY DATA	
Manufacturer of API	Vision Pharmaceuticals (Pvt) Ltd Plot No. 22-23 Industrial Traingle Kahuta Road, Islamabad.
API Lot No.	DSL825
Description of Pack (Container closure system)	Alu-alu blister
Stability Storage Condition	Real time : 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH
Time Period	Real time: 6 months Accelerated: 6 months
Frequency	Accelerated: 0, 1, 2, 3, 6 (Months) Real Time: 0, 3, 6 (Months)

Batch No.	CP-01/D30	CP-02/D30	CP-03/D30
Batch Size	5000 Capsule	5000 Capsule	5000 Capsule
Manufacturing Date	12-2021	12-2021	12-2021
Date of Initiation	21-01-2022	21-01-2022	21-01-2022
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not applicable since it is a newly established license.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate issued on 31-07-2019 based on the inspection dated 11-02-2019.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice dated 29-11-2021 specifying purchase of 7Kg 22.5% dexlansoprazole DDR pellets.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted stability study data of 3 batches along with water loss test at each time point. Firm has submitted analytical report at each stability testing interval.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted certificate of compliance of 21 CFR.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Sr. No	Shortcomings communicated	Response by the firm
1.	Submit data in section 3.2.S.4.1 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required."	Submission of data in section 3.2.S.4.1 as per DRAP guideline which specifies that copies of drug substance specification and analytical procedure used for routine testing of drug substance by both drug substance and drug product manufacturer is provided.
2.	Provide verification studies of drug substance from drug product manufacturer.	As we have used ready to fill pellets and has same specification of raw material and filled capsule and we have performed verification in product stage so please consider it as verification.
3.	Provide COA of relevant batch of drug substance from both API manufacturer as well as drug product manufacturer which is used in the manufacturing of batches of drug product.	Firm has submitted COA of batch number DSL825 from both API manufacturer as well as drug product manufacturer
4.	Justify why pharmaceutical equivalence studies does not include dissolution test.	In pharmaceutical equivalence study we have performed dissolution but mistakenly not include in the report, now the firm has submitted the report.
5.	Provide detailed results of Comparative Dissolution Profile (CDP) since you have only provided average results at	We performed detail result of comparative dissolution profile according to FDA next time and revised our method as per DRAP guideline. As we mention only

	each time point instead of providing result of individual tablet release.	the similarity factor of reference product and sample product in our CDP. **Firm has not submitted complete results of CDP studies.**
6.	The innovator product is available as dual delayed release pellets in HPMC capsule shells while your product is in hard gelatin capsule shells. Justification is required in this regard.	The innovator product is available as delay released pellets in HPMC capsule shell while our product is in hard gelatin capsule shell we have performed stability studies there is no effect of capsule shell in stability study
7.	The drug substance manufacturer specifies that dissolution testing in buffer stage is to be carried out at 284nm, while you have specified dissolution testing in buffer at 292nm. Justification is required in this regard.	According to drug substance manufacturer the wavelength of dissolution of dexlansoprazole in buffer stage at about 284nm we revised our SAP as per drug substance manufacturer and set wavelength about 292nm in our revised SAP but next time we change our revised SAP about 284nm. **Firm has not submitted revised analytical method or relevant analytical record.**
8.	You have used a different HPLC column for assay testing of the drug product from that recommended by drug substance manufacturer. Justification is required in this regard.	We performed the assay of Densa 30mg Capsule by HPLC according to **USP monograph**, and our column was expired so that is why we change the old with new one having same specifications i.e dimension, length and pore size. **USP monograph for the applied product does not exist, moreover no analytical record is submitted which shows that the HPLc column have been changed. Moreover the verification studies are performed at old column.**
9.	Provide stability data sheets for accelerated and real time stability studies results for the three batches, since your results sheets are not properly arranged.	Firm has submitted stability data sheets for accelerated and real time stability studies results for the three batches
10.	Justify the assay testing of drug product using UV method, since the innovator product as well as drug substance manufacturer specifies HPLC method for assay testing.	We performed the assay on UV method according to drug substance manufacturer UV method. Drug substance manufacturer specifies HPLC method as well as UV method for assay which is already provided.
11.	Submit evidence of procurement of drug substance incuding copy of commercial invoice.	Firm has submitted copy of commercial invoice dated 29-11-2021 specifying purchase of 7Kg 22.5% dexlansoprazole DDR pellets.

Decision of 321st meeting of Registration Board:

Deferred for following:

- Submission of stability study data of the drug product at next time on revised specifications and analytical method in which assay test is performed using HPLC method since applied poduct is non pharmacopoeial and drug substance manufacturer has applied HPLC method for the Assay test of Dexlansoprazole pellets.
- Submission of 7500/- fee for revision of specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.

Response by the firm:

- Firm has submitted Fee PKE 7,500/- dated 05-04-2023 for change in specifications.
- Firm has submitted revised specifications in which the assay method has been shifted to HPLC method. Firm has also submitted results of assay test at 9th month time point of stability studies in which product testing has been conducted at 28-10-2022. Firm has also submitted HPLC chromatograms, raw data sheets and record of digital data logger.

Decision: Approved with Innovator's specifications.

• **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.** • **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

The invoice declare purchase of 10Kg Sodium lactate.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted stability study data of 3 batches
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	NA
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Sr. No	Shortcomings communicated	Response by the firm
1.	Revise your label claim as per the innovator's product along with submission of full fee since innovator product specifies clalcium chloride dihydrate 0.027g/100ml while you have mentioned calcium chloride 0.027g/100ml.	*Applied formulation contains calcium chloride dihydrate as per BP innovator product also contains calcium chloride dihydrate. In master formulation typographic error found. New master formulation has been submitted.* **Firm has not revised the label claim nor submitted any fee.**
2.	Evidence of me-too status of the applied product since the submitted me-too contains sodium lactate 0.31g while your applied formulation contains 0.32g sodium lactate.	*our main competitor is FRONTIER DEXTROSE LIMITED PHARMA HATTAR having formulation sodium lactate 0.32g/100 ml which is same as our formulation 0.32g/100 ml.* **The available data base shows that Sterifluid RL Infusion (Reg # 052739) of M/s Frontier Dextrose Ltd contains Sodium Lactate 0.31gm**
3.	Provide reference of finished product specifications in module 1 along with submission of fee for revision of specifications.	*Typographic error found. Our product is BP Specifications.* **Firm has not submitted any fee**

4.	Submit verification studies of the Calcium chloride drug substance in section 3.2.S.4.3	**Firm has not submitted verification studies for the drug substance.**
5.	Provide actual signed data sheets for three batches of the calcium chloride drug substance in which accelerated and real time stability study is conducted as per zone IV-A conditions, since you have submitted unsigned data sheets on which stamp of Ashrafsons Pharmaceuticals is placed instead of being signed and stamped by drug substance manufacturer. Furthermore, the submitted stabilility sheets does not specify any batch number, manufacturing or expiry date etc.	**Firm has not submitted stability study data sheets for API from API manufacturer.**
6.	Submit verification studies of the Potassium chloride drug substance in section 3.2.S.4.3	**Firm has not submitted verification studies for the drug substance.**
7.	Submit verification studies of the Sodium chloride drug substance in section 3.2.S.4.3	**Firm has not submitted verification studies for the drug substance.**
8.	Provide actual signed data sheets for three batches of the Sodium chloride drug substance in which accelerated and real time stability study is conducted as per zone IV-A conditions, since you have submitted unsigned data sheets on which stamp of Ashrafsons Pharmaceuticals is placed instead of being signed and stamped by drug substance manufacturer.	**Firm has not submitted stability study data sheets for API from API manufacturer.**
9.	Submit verification studies of the sodium lactate drug substance in section 3.2.S.4.3	**Firm has not submitted verification studies for the drug substance.**
10.	Provide actual signed data sheets for three batches of the Sodium lactate drug substance in which accelerated and real time stability study is conducted as per zone IV-A conditions, since you have submitted unsigned data sheets on which stamp of Ashrafsons Pharmaceuticals is placed instead of being signed and stamped by drug substance manufacturer.	**Firm has not submitted stability study data sheets for API from API manufacturer.**
11.	The innovator's product is using 0.027g/100ml of clalcium chloride dihydrate while your formulation contains 0.027g/100ml of calcium chloride. Justify how your formulation is similar to that of innovator's product.	*Our formulation is similar to that of innovators product that is 0.027g/100ml of clacium chloride dihydrate.* **The submitted formulation as well as BMR shows that firm is using 0.027g/100ml of calcium chloride.**
12.	Justify why pharmaceutical equivalence is conducted against a comparator product instead of performing against the innovator's product.	*Because they have the same active ingredients, the same dosage form and are identical in strength, quality, purity, and identity as the brand-name product.* **Firm has not submitted any relevant response.**
13.	Justify why complete tests as mentioned in BP monograph is not performed in pharmaceutical equivalence studies.	*Skip testing is the performance of specified tests at release on pre-selected batches and / or at predetermined intervals, rather than on a batch-to-batch basis with the understanding that those*

		batches not being tested still must meet all acceptance criteria established for that product. This represents a less than full schedule of testing and should therefore be justified and presented to and approved by the regulatory authority prior to implementation. **Firm has not submitted any relevant response.**
14.	Justify how you can perform pharmaceutical equivalence against a product which have different quantitative composition as compared to your product.	*We cannot perform pharmaceutical equivalence against a product which has different quantitative composition to our product.* **Firm has not submitted any relevant response.**
15.	Provide microbiological attributes of the drug product in section 3.2.P.2.5.	*Our product is compatible with drug container made of polypropylene of pharmaceutical grade and heat resistant and we can easily sterilize our product at 121°C for 30 minutes to make our product properly sterile.* **Firm has not submitted any relevant response.**
16.	Provide details how terminal sterilization method was validated for PP bottles.	***Terminal sterilization method was validated for PP bottles was validated from external agency.***
17.	Justify why the drug product specifications does not contain test of particulate matter.	*Product specification concentrate on quality of product till expiry with 100% efficiency .detail is given by literature support.* **Firm has not submitted any relevant response.**
18.	Justify why the acceptance criteria of all assay tests in pharmaceutical equivalence is not as per BP monograph.	*All the test acceptance criteria of all assay tests in pharmaceutical complies BP 2022.* **The acceptance criteria of all tests is not as per the BP monograph.**
19.	Justify why the test for sodium content in the drug product is different from that mentioned in BP monograph in terms of concentration of standard solution and specification parameters of atomic emission spectrophotometry.	*All the test acceptance criteria of all assay tests in pharmaceutical complies BP 2022.* **The tests is not as per the BP monograph in terms of concentration of standard solution and specification parameters of atomic emission spectrophotometry.**
20.	Justify why the test for potassium content in the drug product is different from that mentioned in BP monograph in terms of concentration of standard solution and specification parameters of atomic emission spectrophotometry.	*Potassium test is according to BP 2022.* **The tests is not as per the BP monograph in terms of concentration of standard solution and specification parameters of atomic emission spectrophotometry.**
21.	Justify why the test for lactate content in the drug product is different from that mentioned in BP monograph, since HPLC test is specified in BP monograph while you have specified titration method.	*The method of sodium lactate is HPLC method in BP 2022. We give the HPLC print is attached with the file.* **Firm has used titration method as submitted in the application.**
22.	Provide verification studies of the analytical method of drug product in section 3.2.P.5.3 instead of providing process validation report.	*We have submitted verification studies.* **Firm has submitted process validation report instead of analytical method verification.**
23.	Provide details of the container closure system of the applied product.	*Our sterile product is filled in polypropylene container properly sealed and sterilized. Polypropylene plastic is of pharmaceutical grade and provide strength to the container and .polypropylene is heat resistant and we can easily*

		sterilize our product at 121c. to make our product sterile
24.	Describe your container closure system in detail whether it contains Eurocap or not along with evidence of this facility (if applicable).	*Firm has both facility of manufacturing the simple cap & Eurocap.*
25.	Specify whether the bottles placed in stability chambers were with Europcap or not.	*At present we are using simple cap to reduce cost of our product but we have the facility of Eurocap machine facility.*
26.	Provide total capacity of each stability chamber and details of number of bottles of each product placed in the stability chambers. Also provide details how many bottles of the applied product are placed in real time and accelerated stability chamber.	*40 bottles in real stabilty chamber.* *60 bottles in accelerated stabilty chamber.*
27.	Justify why the stability studies have been performed using method and acceptance criteria which is completely different from that specified in BP monograph.	*All the test acceptance criteria of all assay tests in pharmaceutical complies BP 2022.* **The acceptance criteria of all tests is not as per the BP monograph.**
28.	Justify the performance of stability studies at 30°C ± 2°C / 65% ± 5%RH and 40°C ± 2°C / 75% ± 5%RH being a product packed in PP (semi permeable) container, while ICH guidelines recommend performing stability studies at 30°C ± 2°C / 35% ± 5%RH and 40°C ± 2°C / NMT 25% RH for products packed in semi permeable containers.	*We have submitted the stability studies at 30°C ± 2°C / 65% ± 5%RH and 40°C ± 2°C / 75% ± 5%RH being a product packed in PP (semi permeable) container.* **Firm has not submitted any relevant response.**
29.	Justify why you have not perfoemed test of water loss during the stability studies.	**Firm has not submitted any response.**
30.	The analytical method in section 3.2.P.5.2 specifies titration method for analysis of lactate while in stability studies you have provided single HPLC chromatogram for analysis in which the UV wavelength is also different from that specified in BP monograph.	*we have sumbitted the sodium lactate method on hplc according to BP2022.* **Firm has not submitted any relevant response.**
31.	Justify how a single chromatogram of HPLC run at 210nm UV wavelength be used to determine assay of lactate for the applied product.	**Firm has not submitted any response.**
32.	Provide details of the HPLC system, model along with details of the software available in your QC lab and status of its 21 CFR compliance.	*Our HPLC is LAB SOLUTION 21CFR software in our labortaory.*
33.	Provide evidence of atomic emission spectroscopy required for analysis of drug product as per BP monograph.	**Firm has not submitted any response.**
34.	Provide analysis report for all the testing performed through atomic emission spectroscopy.	**Firm has not submitted any response.**

Decision of 323rd meeting of Registration Board:
Deferred for following submissions:

- Revision of label claim of the applied product as per the innovator's product along with submission of full fee of registration.
- Evidence of me-too status of the applied product since the submitted me-too contains sodium lactate 0.31g while your applied formulation contains 0.32g sodium lactate.
- Report of verification studies of the Calcium chloride drug substance.
- Submission of actual signed data sheets for three batches of the calcium chloride drug substance in which accelerated and real time stability study is conducted as per zone IV-A conditions.
- Report of verification studies of the Potassium chloride drug substance.
- Report of verification studies of the Sodium chloride drug substance.
- Submission of actual signed data sheets for three batches of the Sodium chloride drug substance in which accelerated and real time stability study is conducted as per zone IV-A conditions.
- Report of verification studies of the sodium lactate drug substance.
- Submission of actual signed data sheets for three batches of the Sodium lactate drug substance in which accelerated and real time stability study is conducted as per zone IV-A conditions.
- Scientific justification for having the formulation containing 0.027g/100ml of calcium chloride while the innovator's product is using 0.027g/100ml of clalcium chloride dihydrate.
- Pharmaceutical equivalence studies against the innovator's product.
- Submission of microbiological attributes of the drug product in section 3.2.P.2.5.
- Scientific justification for performing validation studies of terminal sterilization procedure from external agency only.
- Scientific justification for the drug product specifications which does not contain test of particulate matter.
- Scientific justification for having different acceptance criteria of all assay tests in specifications as compared to that specified in BP monograph.
- Scientific justification why the test for sodium content in the drug product is different from that mentioned in BP monograph in terms of concentration of standard solution and specification parameters of atomic emission spectrophotometry.
- Scientific justification why the test for potassium content in the drug product is different from that mentioned in BP monograph in terms of concentration of standard solution and specification parameters of atomic emission spectrophotometry.
- Scientific justification why the test for lactate content in the drug product is different from that mentioned in BP monograph, since HPLC test is specified in BP monograph while you have specified titration method.
- Report of verification studies of the analytical method of drug product.
- Scientific justification why the test of water loss is not performed during the stability studies.
- Scientific justification how a single chromatogram of HPLC run at 210nm UV wavelength be used to determine assay of lactate for the applied product.
- Evidence of atomic absorption and atomic emission spectroscopy required for analysis of drug product as per BP monograph along with IQ, OQ and PQ of both equipments.
- Submission of analysis report and raw data sheets for all the testing performed through atomic emission spectroscopy.
- Batch size of drug product stability batches in terms of no. of units.

Response by the firm:

Sr. No	Reason for deferment	Response by the firm
1.	Revision of label claim of the applied product as per the innovator's product along with submission of full fee of registration.	Firm has revised the label claim as per innovator's product
2.	Evidence of me-too status of the applied product since the submitted me-too contains sodium lactate 0.31g	Our me-too competitor is FDL which have 0.32g/100ml

	while your applied formulation contains 0.32g sodium lactate.	
3.	Report of verification studies of the Calcium chloride drug substance.	Not submitted
4.	Submission of actual signed data sheets for three batches of the calcium chloride drug substance in which accelerated and real time stability study is conducted as per zone IV-A conditions.	Firm has initially submitted data sheets without any sign and stamp of the API manufacturer, later the firm submitted signed data sheets.
5.	Report of verification studies of the Potassium chloride drug substance.	Not submitted
6.	Submission of actual signed data sheets for three batches of the Sodium chloride drug substance in which accelerated and real time stability study is conducted as per zone IV-A conditions.	Firm has initially submitted data sheets without any sign and stamp of the API manufacturer, later the firm submitted signed data sheets.
7.	Report of verification studies of the sodium lactate drug substance.	Not submitted
8.	Submission of actual signed data sheets for three batches of the Sodium lactate drug substance in which accelerated and real time stability study is conducted as per zone IV-A conditions.	Firm has initially submitted data sheets without any sign and stamp of the API manufacturer, later the firm submitted signed data sheets.
9.	Scientific justification for having the formulation containing 0.027g/100ml of calcium chloride while the innovator's product is using 0.027g/100ml of clalcium chloride dihydrate.	Our formulation is similar to that of innovator's product
10.	Pharmaceutical equivalence studies against the innovator's product.	Not submitted againt the innovator's product
11.	Submission of microbiological attributes of the drug product in section 3.2.P.2.5.	Not submitted.
12.	Scientific justification for performing validation studies of terminal sterilization procedure from external agency only.	No justification is submitted by the firm.
13.	Scientific justification for the drug product specifications which does not contain test of particulate matter.	Not submitted.
14.	Scientific justification for having different acceptance criteria of all assay tests in specifications as compared to that specified in BP monograph.	No justification is submitted.
15.	Scientific justification why the test for sodium content in the drug product is different from that mentioned in BP monograph in terms of concentration of standard solution and specification	No justification submitted.

	parameters of atomic emission spectrophotometry.	
16.	Scientific justification why the test for potassium content in the drug product is different from that mentioned in BP monograph in terms of concentration of standard solution and specification parameters of atomic emission spectrophotometry.	No justification submitted.
17.	Scientific justification why the test for lactate content in the drug product is different from that mentioned in BP monograph, since HPLC test is specified in BP monograph while you have specified titration method.	No justification submitted.
18.	Report of verification studies of the analytical method of drug product.	Not submitted.
19.	Scientific justification why the test of water loss is not performed during the stability studies.	Submitted by the firm.
20.	Scientific justification how a single chromatogram of HPLC run at 210nm UV wavelength be used to determine assay of lactate for the applied product.	No justification submitted.
21.	Evidence of atomic absorption and atomic emission spectroscopy required for analysis of drug product as per BP monograph along with IQ, OQ and PQ of both equipments.	Not submitted.
22.	Submission of analysis report and raw data sheets for all the testing performed through atomic emission spectroscopy.	Not submitted.
23.	Batch size of drug product stability batches in terms of no. of units.	100 bottles

Decision of 326th meeting of Registration Board:

Deferred for following submissions:

- Revision of label claim of the applied product as per the innovator's product and labelling requirements of BP monograph along with submission of full fee of registration.
- Protocol and report of verification studies of the Calcium chloride drug substance as per the ICH Q2 Guidelines.
- Scientific justification for initial submission of stability study data of the calcium chloride drug substance without signatures of responsible personnel, later the same data was presented as signed data sheets but without any details of the batches on which stability was performed.
- Protocol and report of verification studies of the Potassium chloride drug substance as per the ICH Q2 Guidelines.
- Protocol and report of verification studies of the Sodium chloride drug substance as per the ICH Q2 Guidelines.
- Scientific justification for initial submission of stability study data of the sodium chloride drug substance without signatures of responsible personnel, later the same data was presented as signed data sheets but without any details of the batches on which stability was performed.
- Protocol and report of verification studies of the sodium lactate drug substance as per the ICH Q2 Guidelines.

- Scientific justification for initial submission of stability study data of the Sodium lactate drug substance without signatures of responsible personnel, later the same data was presented as signed data sheets but without any details of the batches on which stability was performed.
- Scientific justification for having the formulation containing 0.027g/100ml of calcium chloride while the innovator's product is using 0.027g/100ml of clalcium chloride dihydrate.
- Submission of picture / image of the innovator's product against which Pharmaceutical equivalence studies have been performed.
- Submission of microbiological attributes of the drug product in section 3.2.P.2.5.
- Scientific justification for performing validation studies of terminal sterilization procedure from external agency only.
- Scientific justification for the drug product specifications which does not contain test of particulate matter.
- Scientific justification for having different acceptance criteria of all assay tests in specifications as compared to that specified in BP monograph.
- Scientific justification why the test for sodium content in the drug product is different from that mentioned in BP monograph in terms of concentration of standard solution and specification parameters of atomic emission spectrophotometry.
- Scientific justification why the test for potassium content in the drug product is different from that mentioned in BP monograph in terms of concentration of standard solution and specification parameters of atomic emission spectrophotometry.
- Scientific justification why the test for lactate content in the drug product is different from that mentioned in BP monograph, since HPLC test is specified in BP monograph while you have specified titration method.
- Protocol and report of verification studies of the analytical method of drug product as per the ICH Q2 Guidelines.
- Scientific justification how a single chromatogram of HPLC run at 210nm UV wavelength be used to determine assay of lactate for the applied product.
- Evidence of atomic absorption and atomic emission spectroscopy required for analysis of drug product as per BP monograph along with IQ, OQ and PQ of both equipments.
- Submission of analysis report and raw data sheets for all the testing performed through atomic emission spectroscopy.

Response by the firm:
Firm vide its reply dated 16-05-2023 submitted revised data of newly manufactured batches in which product testing has been conducted as per BP monograph. The details of newly manufactured batches is as under:

STABILITY STUDY DATA

Manufacturer of API	**Sodium Chloride:** M/s Hebei Huachen Pharmaceutical Co. Ltd. Huanghua Economic Development Zone, Hebei PR China. **Calcium chloride** M/s Hebei Huachen Pharmaceutical Co. Ltd. Huanghua Economic Development Zone, Hebei PR China. **Potassium chloride** M/s Hebei Huachen Pharmaceutical Co. Ltd. Huanghua Economic Development Zone, Hebei PR China. **Sodium lactate** Luoyang Longmen Pharmaceutical Co. Ltd. County Industrial Zone Luoning Henan Province P.R. China.
API Lot No.	**Sodium Chloride:** 210909 **Calcium chloride:** 210806 **Potassium chloride:** 211204 **Sodium lactate:** B-2108-517
Description of Pack	Polypropylene

(Container closure system)			
Stability Storage Condition	Real time : 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 1, 2, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	Trial # 1	Trial # 2	Trial # 3
Batch Size	500 Bottles	500 Bottles	500 Bottles
Manufacturing Date	11-2022	11-2022	11-2022
Date of Initiation	15-11-2022	16-11-2022	17-11-2022
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not applicable since it is a newly established license.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Sodium Chloride:** Firm has submitted copy of GMP certificate (No. HE20180030) issued by China Food and Drug Administration. The certificate is valid till 22-04-2023. **Calcium chloride:** Firm has submitted copy of GMP certificate (No. HE20180030) issued by China Food and Drug Administration. The certificate is valid till 22-04-2023. **Potassium chloride:** Firm has submitted copy of GMP certificate (No. HE20180030) issued by China Food and Drug Administration. The certificate is valid till 22-04-2023. **Sodium lactate:** Firm has submitted copy of GMP certificate (No. HA20190099) issued by China Food and Drug Administration. The certificate is valid till 29-11-2024.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	**Sodium Chloride:** Firm has submitted copy of commercial invoice cleared by AD (I&E) DRAP dated 04-01-2022. The invoice declare purchase of 25Kg sodium chloride (Batch No. 210909). **Calcium chloride:** Firm has submitted copy of commercial invoice cleared by AD (I&E) DRAP dated 04-01-2022. The invoice declare purchase of 5Kg calcium chloride. **Potassium chloride:** Firm has submitted copy of commercial invoice cleared by AD (I&E) DRAP dated 04-01-2022. The invoice declare purchase of 5Kg potassium chloride. **Sodium lactate:** Firm has submitted copy of commercial invoice cleared by AD (I&E) DRAP dated 04-01-2022. The invoice declare purchase of 10Kg Sodium lactate.
4.	Data of stability batches will be supported by attested respective documents like	Firm has submitted stability study data of 3 batches

	chromatograms, Raw data sheets, COA, summary data sheets etc.	
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	NA
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Firm has submitted following documents

- Pharmaceutical equivalence study report against Ringolact Infusion of Otsuka Pakistan Ltd.
- Complete Module 3
- Process validation protocols
- Revised pecifications as per BP monograph and verification studies of the analytical method.
- Complete stability studies till 6 months time point.

Decision: Approved with Innovator's specifications.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **The firm shall submit fee of Rs. 30,000/- for correction/pre-approval change in product label claim and submission of stability study data of newly manufactured batches as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021, before issuance of registration letter.**

328.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Ashrafsons Pharmaceuticals (Pvt) Ltd. Plot No. 40, Road R-2, Industrial Estate, Gadoon Amazai District Swabi.**
	Name, address of Manufacturing site.	M/s Ashrafsons Pharmaceuticals (Pvt) Ltd. Plot No. 40, Road R-2, Industrial Estate, Gadoon Amazai District Swabi.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	Firm has submitted copy of letter of issuance of Drug Manufacturing License (DML No. 000947) dated 11-11-2021.
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter of issuance of Drug Manufacturing License (DML No. 000947) dated 11-11-2021. The letter specifies following section: 1. Liquid Injectable Infusion (SVP) LDPE (General) 2. Liquid Injectable Infusion (LVP) LDPE (General)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 12295: 20-05-2022
	Details of fee submitted	PKR 30,000/- : 20-05-2022

	The proposed proprietary name / brand name	**SAFESOL-RL IV Infusion 1000ml**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each 100ml contains: Calcium chloride ……0.027g Potassium chloride……0.04g Sodium chloride…… 0.60g Sodium lactate….. ..0.32g
	Pharmaceutical form of applied drug	Clear, odorless and colorless solution filled in PP bottle
	Pharmacotherapeutic Group of (API)	Electrolytes
	Reference to Finished product specifications	BP
	Proposed Pack size	1000ml
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	**MHRA Approved**
	For generic drugs (me-too status)	Could not be confirmed
	Name and address of API manufacturer.	**Sodium Chloride:** M/s Hebei Huachen Pharmaceutical Co. Ltd. Huanghua Economic Development Zone, Hebei PR China. **Calcium chloride** M/s Hebei Huachen Pharmaceutical Co. Ltd. Huanghua Economic Development Zone, Hebei PR China. **Potassium chloride** M/s Hebei Huachen Pharmaceutical Co. Ltd. Huanghua Economic Development Zone, Hebei PR China. **Sodium lactate** Luoyang Longmen Pharmaceutical Co. Ltd. County Industrial Zone Luoning Henan Province P.R. China.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	**Sodium Chloride:** Not submitted. **Calcium chloride:** Not submitted. **Potassium chloride:** Firm has submitted stability data of 3 batches of API as per zone IV-A conditions.

		Sodium lactate: Not submitted.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for the quality tests for their product against the comparator product 'Sterifluid-RL Infusion by M/s FDL Pharma."
	Analytical method validation/verification of product	Firm has submitted report of verification of analytical method for the drug substance. Firm has submitted report of verification of analytical method for the drug product.

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA			

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not applicable since it is a newly established license.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Sodium Chloride:** Firm has submitted copy of GMP certificate (No. HE20180030) issued by China Food and Drug Administration. The certificate is valid till 22-04-2023. **Calcium chloride:** Firm has submitted copy of GMP certificate (No. HE20180030) issued by China Food and Drug Administration. The certificate is valid till 22-04-2023. **Potassium chloride:** Firm has submitted copy of GMP certificate (No. HE20180030) issued by China Food and Drug Administration. The certificate is valid till 22-04-2023. **Sodium lactate:** Firm has submitted copy of GMP certificate (No. HA20190099) issued by China Food and Drug Administration. The certificate is valid till 29-11-2024.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	**Sodium Chloride:** Firm has submitted copy of commercial invoice cleared by AD (I&E) DRAP dated 04-01-2022. The invoice declare purchase of 25Kg sodium chloride (Batch No. 210909). **Calcium chloride:** Firm has submitted copy of commercial invoice cleared by AD (I&E) DRAP dated 04-01-2022. The invoice declare purchase of 5Kg calcium chloride. **Potassium chloride:** Firm has submitted copy of commercial invoice cleared by AD (I&E) DRAP dated 04-01-2022. The invoice declare purchase of 5Kg potassium chloride. **Sodium lactate:** Firm has submitted copy of commercial invoice cleared by AD (I&E) DRAP dated 04-01-2022. The invoice declare purchase of 10Kg Sodium lactate.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted stability study data of 3 batches
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	NA
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Sr. No	Shortcomings communicated	Response by the firm
1.	Revise your label claim as per the innovator's product along with submission of full fee since innovator product specifies clalcium chloride dihydrate 0.027g/100ml while you have mentioned calcium chloride 0.027g/100ml.	*Applied formulation contains calcium chloride dihydrate as per BP innovator product also contains calcium chloride dihydrate. In master formulation typographic error found. New master formulation has been submitted.*

		Firm has not revised the label claim nor submitted any fee.
2.	Evidence of me-too status of the applied product since the submitted me-too contains sodium lactate 0.31g while your applied formulation contains 0.32g sodium lactate.	*our main competitor is FRONTIER DEXTROSE LIMITED PHARMA HATTAR having formulation sodium lactate 0.32g/100 ml which is same as our formulation 0.32g/100 ml.* **The available data base shows that Sterifluid RL Infusion (Reg # 052739) of M/s Frontier Dextrose Ltd contains Sodium Lactate 0.31gm**
3.	Provide reference of finished product specifications in module 1 along with submission of fee for revision of specifications.	*Typographic error found. Our product is BP Specifications.* **Firm has not submitted any fee**
4.	Submit verification studies of the Calcium chloride drug substance in section 3.2.S.4.3	**Firm has not submitted verification studies for the drug substance.**
5.	Provide actual signed data sheets for three batches of the calcium chloride drug substance in which accelerated and real time stability study is conducted as per zone IV-A conditions, since you have submitted unsigned data sheets on which stamp of Ashrafsons Pharmaceuticals is placed instead of being signed and stamped by drug substance manufacturer. Furthermore, the submitted stabilility sheets does not specify any batch number, manufacturing or expiry date etc.	**Firm has not submitted stability study data sheets for API from API manufacturer.**
6.	Submit verification studies of the Potassium chloride drug substance in section 3.2.S.4.3	**Firm has not submitted verification studies for the drug substance.**
7.	Submit verification studies of the Sodium chloride drug substance in section 3.2.S.4.3	**Firm has not submitted verification studies for the drug substance.**
8.	Provide actual signed data sheets for three batches of the Sodium chloride drug substance in which accelerated and real time stability study is conducted as per zone IV-A conditions, since you have submitted unsigned data sheets on which stamp of Ashrafsons Pharmaceuticals is placed instead of being signed and stamped by drug substance manufacturer.	**Firm has not submitted stability study data sheets for API from API manufacturer.**
9.	Submit verification studies of the sodium lactate drug substance in section 3.2.S.4.3	**Firm has not submitted verification studies for the drug substance.**
10.	Provide actual signed data sheets for three batches of the Sodium chloride drug substance in which accelerated and real time stability study is conducted as per zone IV-A conditions, since you have submitted unsigned data sheets on which stamp of Ashrafsons Pharmaceuticals is placed instead of being signed and stamped by drug substance manufacturer.	**Firm has not submitted stability study data sheets for API from API manufacturer.**

11.	The innovator's product is using 0.027g/100ml of clalcium chloride dihydrate while your formulation contains 0.027g/100ml of calcium chloride. Justify how your formulation is similar to that of innovator's product.	*Our formulation is similar to that of innovators product that is 0.027g/100ml of clacium chloride dihydrate.* **The submitted formulation as well as BMR shows that firm is using 0.027g/100ml of calcium chloride.**
12.	Justify why pharmaceutical equivalence is conducted against a comparator product instead of performing against the innovator's product.	*Because they have the same active ingredients, the same dosage form and are identical in strength, quality, purity, and identity as the brand-name product.* **Firm has not submitted any relevant response.**
13.	Justify why complete tests as mentioned in BP monograph is not performed in pharmaceutical equivalence studies.	*Skip testing is the performance of specified tests at release on pre-selected batches and / or at predetermined intervals, rather than on a batch-to-batch basis with the understanding that those batches not being tested still must meet all acceptance criteria established for that product. This represents a less than full schedule of testing and should therefore be justified and presented to and approved by the regulatory authority prior to implementation.* **Firm has not submitted any relevant response.**
14.	Justify how you can perform pharmaceutical equivalence against a product which have different quantitative composition as compared to your product.	*We cannot perform pharmaceutical equivalence against a product which has different quantitative composition to our product.* **Firm has not submitted any relevant response.**
15.	Provide microbiological attributes of the drug product in section 3.2.P.2.5.	*Our product is compatible with drug container made of polypropylene of pharmaceutical grade and heat resistant and we can easily sterilize our product at 121°C for 30 minutes to make our product properly sterile.* **Firm has not submitted any relevant response.**
16.	Provide details how terminal sterilization method was validated for PP bottles.	***Terminal sterilization method was validated for PP bottles was validated from external agency.***
17.	Justify why the drug product specifications does not contain test of particulate matter.	*Product specification concentrate on quality of product till expiry with 100% efficiency .detail is given by literature support.* **Firm has not submitted any relevant response.**
18.	Justify why the acceptance criteria of all assay tests in pharmaceutical equivalence is not as per BP monograph.	*All the test acceptance criteria of all assay tests in pharmaceutical complies BP 2022.* **The acceptance criteria of all tests is not as per the BP monograph.**
19.	Justify why the test for sodium content in the drug product is different from that mentioned in BP monograph in terms of concentration of standard solution and specification parameters of atomic emission spectrophotometry.	*All the test acceptance criteria of all assay tests in pharmaceutical complies BP 2022.* **The tests is not as per the BP monograph in terms of concentration of standard solution and specification parameters of atomic emission spectrophotometry.**
20.	Justify why the test for potassium content in the drug product is different from that mentioned in BP monograph in terms of concentration of standard solution and	*Potassium test is according to BP 2022.* **The tests is not as per the BP monograph in terms of concentration of standard solution and specification parameters of atomic emission spectrophotometry.**

	specification parameters of atomic emission spectrophotometry.	
21.	Justify why the test for lactate content in the drug product is different from that mentioned in BP monograph, since HPLC test is specified in BP monograph while you have specified titration method.	*The method of sodium lactate is HPLC method in BP 2022. We give the HPLC print is attached with the file.* **Firm has used titration method as submitted in the application.**
22.	Provide verification studies of the analytical method of drug product in section 3.2.P.5.3 instead of providing process validation report.	*We have submitted verification studies.* **Firm has submitted process validation report instead of analytical method verification.**
23.	Provide details of the container closure system of the applied product.	*Our sterile product is filled in polypropylene container properly sealed and sterilized. Polypropylene plastic is of pharmaceutical grade and provide strength to the container and .polypropylene is heat resistant and we can easily sterilize our product at 121c. to make our product sterile*
24.	Describe your container closure system in detail whether it contains Eurocap or not along with evidence of this facility (if applicable).	*Firm has both facility of manufacturing the simple cap & Eurocap.*
25.	Specify whether the bottles placed in stability chambers were with Europcap or not.	*At present we are using simple cap to reduce cost of our product but we have the facility of Eurocap machine facility.*
26.	Provide total capacity of each stability chamber and details of number of bottles of each product placed in the stability chambers. Also provide details how many bottles of the applied product are placed in real time and accelerated stability chamber.	*40 bottles in real stabilty chamber.* *60 bottles in accelerated stabilty chamber.*
27.	Justify why the stability studies have been performed using method and acceptance criteria which is completely different from that specified in BP monograph.	*All the test acceptance criteria of all assay tests in pharmaceutical complies BP 2022.* **The acceptance criteria of all tests is not as per the BP monograph.**
28.	Justify the performance of stability studies at 30°C ± 2°C / 65% ± 5%RH and 40°C ± 2°C / 75% ± 5%RH being a product packed in PP (semi permeable) container, while ICH guidelines recommend performing stability studies at 30°C ± 2°C / 35% ± 5%RH and 40°C ± 2°C / NMT 25% RH for products packed in semi permeable containers.	*We have submitted the stability studies at 30°C ± 2°C / 65% ± 5%RH and 40°C ± 2°C / 75% ± 5%RH being a product packed in PP (semi permeable) container.* **Firm has not submitted any relevant response.**
29.	Justify why you have not perfoemed test of water loss during the stability studies.	**Firm has not submitted any response.**
30.	The analytical method in section 3.2.P.5.2 specifies titration method for analysis of lactate while in stability studies you have provided single HPLC chromatogram for analysis in which the UV wavelength is also different from that specified in BP monograph.	*we have sumbitted the sodium lactate method on hplc according to BP2022.* **Firm has not submitted any relevant response.**

31.	Justify how a single chromatogram of HPLC run at 210nm UV wavelength be used to determine assay of lactate for the applied product.	**Firm has not submitted any response.**
32.	Provide details of the HPLC system, model along with details of the software available in your QC lab and status of its 21 CFR compliance.	*Our HPLC is LAB SOLUTION 21CFR software in our labortaory.*
33.	Provide evidence of atomic emission spectroscopy required for analysis of drug product as per BP monograph.	**Firm has not submitted any response.**
34.	Provide analysis report for all the testing performed through atomic emission spectroscopy.	**Firm has not submitted any response.**

Decision of 323rd meeting of Registration Board:

Deferred for following submissions:

- Revision of label claim of the applied product as per the innovator's product along with submission of full fee of registration.
- Evidence of me-too status of the applied product since the submitted me-too contains sodium lactate 0.31g while your applied formulation contains 0.32g sodium lactate.
- Report of verification studies of the Calcium chloride drug substance.
- Submission of actual signed data sheets for three batches of the calcium chloride drug substance in which accelerated and real time stability study is conducted as per zone IV-A conditions.
- Report of verification studies of the Potassium chloride drug substance.
- Report of verification studies of the Sodium chloride drug substance.
- Submission of actual signed data sheets for three batches of the Sodium chloride drug substance in which accelerated and real time stability study is conducted as per zone IV-A conditions.
- Report of verification studies of the sodium lactate drug substance.
- Submission of actual signed data sheets for three batches of the Sodium lactate drug substance in which accelerated and real time stability study is conducted as per zone IV-A conditions.
- Scientific justification for having the formulation containing 0.027g/100ml of calcium chloride while the innovator's product is using 0.027g/100ml of clalcium chloride dihydrate.
- Pharmaceutical equivalence studies against the innovator's product.
- Submission of microbiological attributes of the drug product in section 3.2.P.2.5.
- Scientific justification for performing validation studies of terminal sterilization procedure from external agency only.
- Scientific justification for the drug product specifications which does not contain test of particulate matter.
- Scientific justification for having different acceptance criteria of all assay tests in specifications as compared to that specified in BP monograph.
- Scientific justification why the test for sodium content in the drug product is different from that mentioned in BP monograph in terms of concentration of standard solution and specification parameters of atomic emission spectrophotometry.
- Scientific justification why the test for potassium content in the drug product is different from that mentioned in BP monograph in terms of concentration of standard solution and specification parameters of atomic emission spectrophotometry.
- Scientific justification why the test for lactate content in the drug product is different from that mentioned in BP monograph, since HPLC test is specified in BP monograph while you have specified titration method.
- Report of verification studies of the analytical method of drug product.
- Scientific justification why the test of water loss is not performed during the stability studies.

- Scientific justification how a single chromatogram of HPLC run at 210nm UV wavelength be used to determine assay of lactate for the applied product.
- Evidence of atomic absorption and atomic emission spectroscopy required for analysis of drug product as per BP monograph along with IQ, OQ and PQ of both equipments.
- Submission of analysis report and raw data sheets for all the testing performed through atomic emission spectroscopy.
- Batch size of drug product stability batches in terms of no. of units.

Response by the firm:

Sr. No	Reason for deferment	Response by the firm
1.	Revision of label claim of the applied product as per the innovator's product along with submission of full fee of registration.	Firm has revised the label claim as per innovator's product
2.	Evidence of me-too status of the applied product since the submitted me-too contains sodium lactate 0.31g while your applied formulation contains 0.32g sodium lactate.	Our me-too competitor is FDL which have 0.32g/100ml
3.	Report of verification studies of the Calcium chloride drug substance.	Not submitted
4.	Submission of actual signed data sheets for three batches of the calcium chloride drug substance in which accelerated and real time stability study is conducted as per zone IV-A conditions.	Firm has initially submitted data sheets without any sign and stamp of the API manufacturer, later the firm submitted signed data sheets.
5.	Report of verification studies of the Potassium chloride drug substance.	Not submitted
6.	Submission of actual signed data sheets for three batches of the Sodium chloride drug substance in which accelerated and real time stability study is conducted as per zone IV-A conditions.	Firm has initially submitted data sheets without any sign and stamp of the API manufacturer, later the firm submitted signed data sheets.
7.	Report of verification studies of the sodium lactate drug substance.	Not submitted
8.	Submission of actual signed data sheets for three batches of the Sodium lactate drug substance in which accelerated and real time stability study is conducted as per zone IV-A conditions.	Firm has initially submitted data sheets without any sign and stamp of the API manufacturer, later the firm submitted signed data sheets.
9.	Scientific justification for having the formulation containing 0.027g/100ml of calcium chloride while the innovator's product is using 0.027g/100ml of clalcium chloride dihydrate.	Our formulation is similar to that of innovator's product
10.	Pharmaceutical equivalence studies against the innovator's product.	Not submitted againt the innovator's product
11.	Submission of microbiological attributes of the drug product in section 3.2.P.2.5.	Not submitted.

12.	Scientific justification for performing validation studies of terminal sterilization procedure from external agency only.	No justification is submitted by the firm.
13.	Scientific justification for the drug product specifications which does not contain test of particulate matter.	Not submitted.
14.	Scientific justification for having different acceptance criteria of all assay tests in specifications as compared to that specified in BP monograph.	No justification is submitted.
15.	Scientific justification why the test for sodium content in the drug product is different from that mentioned in BP monograph in terms of concentration of standard solution and specification parameters of atomic emission spectrophotometry.	No justification submitted.
16.	Scientific justification why the test for potassium content in the drug product is different from that mentioned in BP monograph in terms of concentration of standard solution and specification parameters of atomic emission spectrophotometry.	No justification submitted.
17.	Scientific justification why the test for lactate content in the drug product is different from that mentioned in BP monograph, since HPLC test is specified in BP monograph while you have specified titration method.	No justification submitted.
18.	Report of verification studies of the analytical method of drug product.	Not submitted.
19.	Scientific justification why the test of water loss is not performed during the stability studies.	Submitted by the firm.
20.	Scientific justification how a single chromatogram of HPLC run at 210nm UV wavelength be used to determine assay of lactate for the applied product.	No justification submitted.
21.	Evidence of atomic absorption and atomic emission spectroscopy required for analysis of drug product as per BP monograph along with IQ, OQ and PQ of both equipments.	Not submitted.
22.	Submission of analysis report and raw data sheets for all the testing performed through atomic emission spectroscopy.	Not submitted.
23.	Batch size of drug product stability batches in terms of no. of units.	100 bottles

Decision of 326th meeting of Registration Board:
Deferred for following submissions:

- Revision of label claim of the applied product as per the innovator's product and labelling requirements of BP monograph along with submission of full fee of registration.
- Protocol and report of verification studies of the Calcium chloride drug substance as per the ICH Q2 Guidelines.
- Scientific justification for initial submission of stability study data of the calcium chloride drug substance without signatures of responsible personnel, later the same data was presented as signed data sheets but without any details of the batches on which stability was performed.
- Protocol and report of verification studies of the Potassium chloride drug substance as per the ICH Q2 Guidelines.
- Protocol and report of verification studies of the Sodium chloride drug substance as per the ICH Q2 Guidelines.
- Scientific justification for initial submission of stability study data of the sodium chloride drug substance without signatures of responsible personnel, later the same data was presented as signed data sheets but without any details of the batches on which stability was performed.
- Protocol and report of verification studies of the sodium lactate drug substance as per the ICH Q2 Guidelines.
- Scientific justification for initial submission of stability study data of the Sodium lactate drug substance without signatures of responsible personnel, later the same data was presented as signed data sheets but without any details of the batches on which stability was performed.
- Scientific justification for having the formulation containing 0.027g/100ml of calcium chloride while the innovator's product is using 0.027g/100ml of clalcium chloride dihydrate.
- Submission of picture / image of the innovator's product against which Pharmaceutical equivalence studies have been performed.
- Submission of microbiological attributes of the drug product in section 3.2.P.2.5.
- Scientific justification for performing validation studies of terminal sterilization procedure from external agency only.
- Scientific justification for the drug product specifications which does not contain test of particulate matter.
- Scientific justification for having different acceptance criteria of all assay tests in specifications as compared to that specified in BP monograph.
- Scientific justification why the test for sodium content in the drug product is different from that mentioned in BP monograph in terms of concentration of standard solution and specification parameters of atomic emission spectrophotometry.
- Scientific justification why the test for potassium content in the drug product is different from that mentioned in BP monograph in terms of concentration of standard solution and specification parameters of atomic emission spectrophotometry.
- Scientific justification why the test for lactate content in the drug product is different from that mentioned in BP monograph, since HPLC test is specified in BP monograph while you have specified titration method.
- Protocol and report of verification studies of the analytical method of drug product as per the ICH Q2 Guidelines.
- Scientific justification how a single chromatogram of HPLC run at 210nm UV wavelength be used to determine assay of lactate for the applied product.
- Evidence of atomic absorption and atomic emission spectroscopy required for analysis of drug product as per BP monograph along with IQ, OQ and PQ of both equipments.
- Submission of analysis report and raw data sheets for all the testing performed through atomic emission spectroscopy.

Response by the firm:

Firm vide its reply dated 16-05-2023 submitted revised data of newly manufactured batches in which product testing has been conducted as per BP monograph. The details of newly manufactured batches is as under:

STABILITY STUDY DATA

Manufacturer of API	**Sodium Chloride:** M/s Hebei Huachen Pharmaceutical Co. Ltd. Huanghua Economic Development Zone, Hebei PR China. **Calcium chloride** M/s Hebei Huachen Pharmaceutical Co. Ltd. Huanghua Economic Development Zone, Hebei PR China. **Potassium chloride** M/s Hebei Huachen Pharmaceutical Co. Ltd. Huanghua Economic Development Zone, Hebei PR China. **Sodium lactate** Luoyang Longmen Pharmaceutical Co. Ltd. County Industrial Zone Luoning Henan Province P.R. China.		
API Lot No.	**Sodium Chloride:** 210909 **Calcium chloride:** 210806 **Potassium chloride:** 211204 **Sodium lactate:** B-2108-517		
Description of Pack (Container closure system)	Polypropylene		
Stability Storage Condition	Real time : 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 1, 2, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	Trial # 4	Trial # 5	Trial # 6
Batch Size	500 Bottles	500 Bottles	500 Bottles
Manufacturing Date	11-2022	11-2022	11-2022
Date of Initiation	15-11-2022	16-11-2022	17-11-2022
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not applicable since it is a newly established license.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Sodium Chloride:** Firm has submitted copy of GMP certificate (No. HE20180030) issued by China Food and Drug Administration. The certificate is valid till 22-04-2023. **Calcium chloride:** Firm has submitted copy of GMP certificate (No. HE20180030) issued by China Food and Drug Administration. The certificate is valid till 22-04-2023. **Potassium chloride:** Firm has submitted copy of GMP certificate (No. HE20180030) issued by China Food and Drug Administration. The certificate is valid till 22-04-2023. **Sodium lactate:** Firm has submitted copy of GMP certificate (No. HA20190099) issued by China Food and Drug Administration. The certificate is valid till 29-11-2024.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	**Sodium Chloride:** Firm has submitted copy of commercial invoice cleared by AD (I&E) DRAP

		dated 04-01-2022. The invoice declare purchase of 25Kg sodium chloride (Batch No. 210909). **Calcium chloride:** Firm has submitted copy of commercial invoice cleared by AD (I&E) DRAP dated 04-01-2022. The invoice declare purchase of 5Kg calcium chloride. **Potassium chloride:** Firm has submitted copy of commercial invoice cleared by AD (I&E) DRAP dated 04-01-2022. The invoice declare purchase of 5Kg potassium chloride. **Sodium lactate:** Firm has submitted copy of commercial invoice cleared by AD (I&E) DRAP dated 04-01-2022. The invoice declare purchase of 10Kg Sodium lactate.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted stability study data of 3 batches
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	NA
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Firm has submitted following documents

- Pharmaceutical equivalence study report against Ringolact Infusion of Otsuka Pakistan Ltd.
- Complete Module 3
- Process validation protocols
- Revised pecifications as per BP monograph and verification studies of the analytical method.
- Complete stability studies till 6 months time point.

Decision: Approved with Innovator's specifications.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **The firm shall submit fee of Rs. 30,000/- for correction/pre-approval change in product label claim and submission of stability study data of newly manufactured batches as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021, before issuance of registration letter.**

329.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Don Valley Pharmaceuticals (Pvt.) Ltd 31-Km, Ferozepur Road, Lahore.**
	Name, address of Manufacturing site.	M/s Don Valley Pharmaceuticals (Pvt) Ltd 31-Km, Ferozepur Road, Lahore.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	The firm has submitted copy of inspection report dated 13-02-2020 confirming good compliance to GMP.

	Evidence of approval of manufacturing facility	Firm has submitted copy of GMP certificate dated 23-08-2019 issued on the basis of inspection dated 06-08-2019 which specifies Tablet (General) section.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 2254: 24-01-2023
	Details of fee submitted	PKR 30,000/-: 18-01-2023
	The proposed proprietary name / brand name	**EMPADON 25mg Tablet**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated tablet contains: Empagliflozin…25mg
	Pharmaceutical form of applied drug	Pink colored, round biconvex coated tablet plain on both sides
	Pharmacotherapeutic Group of (API)	Antidiabetic
	Reference to Finished product specifications	In house specs
	Proposed Pack size	14's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	**(USFDA** Approved)
	For generic drugs (me-too status)	Xelglu Tablet by Hilton
	Name and address of API manufacturer.	Fuxin Long Rui Pharmaceutical Co. Ltd. Fluoride Industrial Park, Fumeng County Fuxin City Liaoning Province China.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65 ±

		5% RH for 24 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for all the quality tests for their product against Jardiance Tablet Firm has submitted results of CDP for their product against Jardiance Tablet.
	Analytical method validation/verification of product	Firm has submitted verification studies of the drug substance and analytical method validation of the drug product.

STABILITY STUDY DATA

Manufacturer of API	Fuxin Long Rui Pharmaceutical Co. Ltd. Fluoride Industrial Park, Fumeng County Fuxin City Liaoning Province China.		
API Lot No.	L-E-20211130-D06-E06-02		
Description of Pack (Container closure system)	Alu-alu blister pack		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	T-IY-22-01	T-IY-22-02	T-IY-22-03
Batch Size	5000 Tablet	5000 Tablet	5000 Tablet
Manufacturing Date	05-2022	05-2022	05-2022
Date of Initiation	27-05-2022	27-05-2022	27-05-2022
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted by the firm
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of DML certificate No. Liao20150233, dated: 21/12/2017 valid till 20/12/2022, issued by Food & Drug Administration of Liaoning Province- China is submitted.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of clearance certificate specifying import of 0.25Kg Empagliflozin. The clearance certificate is issued on 20-04-2022.
4.	Data of stability batches will be supported by attested respective documents like	Firm has submitted complete record of testing of all batches along with raw data sheets, COA and

	chromatograms, Raw data sheets, COA, summary data sheets etc.	summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted audit trail reports
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

- Submit data in section 3.2.S.4.1 and 3.2.S.4.2 for Nirmatrelvir drug substance as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required."
- Justify the verification studies of analytical procedure of drug substance from drug product manufacturer, since the drug product manufacturer has adopted a different analytical method in terms of column size, column temperature, standard solution and sample solution.
- The result of sample 3 at 80% concentration in repeatability test gives 60% result. Justify how you passed this test since the test does not qualify the acceptance criteria.
- The HPLC chromatograms of verification studies depict that the date acquired for all analysis of linearity and range is 1-May -22: 10:07AM which is not practically possible. Justify how multiple HPLC chromatograms having different peak areas were acquired on same date and same time.
- The analytical method provided in verification studies specifies 20µL injection volume while all chromatograms specify 10µL injection volume.
- HPLC chromatogram for sample 1 of 120% specify the height as 544.73 while the scale of chromatogram is till 480. Justify how the height could be 544 while the chromatogram is below 480 as per vertifcal scale.
- Three chromatograms submitted after sample 3 of 140% concentration with sample name 0, date acquired 1-May-22 10:07AM and date processed 1-May-22 12:59 PM show retention time 2.59 with exactly same peak as in other chromtaograms but the area and height is 0. Clarify how the peak area and height is 0 with the clear peak in the print.
- Justify why the qualitative composition of your formulation is different from the innovator's product.
- Provide information regarding batch number, expiry date and manufacturer of the innovator product against which pharmaceutical equivalence and CDP studies were conducted.
- Justify the adaptation of dissolution parameters, since they are different from that recommended by the innovator's product in terms of RPM. You have selected 100RPM while the innovator's product has specified 75 RPM.
- Justify the dissolution acceptance criteria NLT 75%(Q) in 45 minutes, while the innovator's product acceptance criteria is NLT (Q) in 15 minutes. Justify your dissolution criteria in the light of decision of Registration Board taken in its 293rd meeting which specifies that "*For rapidly dissolving as well as immediate release drug products, wherein the stability batches will be manufactured after 01-06-2020, variation from innovator / reference product with reference to dissolution specification will not be acceptable"*
- Justify why content uniformity test is not included in the drug product specifications.
- Analytical method of drug product specifies that concentration of standard and sample preparation is 0.025mg/ml while you have performed verification studies keeping the target concentration 0.1mg/ml. Justify how these studies represent your analytical method.
- USFDA review documents reveals that the innovator's drug product shows more than 85% release in 15 minutes, while your stability results indicate that the product disintegration time is greater than 15 minutes. Justify how your product could be considered equivalent to the innovator's product.
- Submit valid GMP certificate / Drug manufacturing license of API manufacturer issued by relevant regulatory authority of country of origin, since the submitted GMP is not issued by relevant regulatory authority of China.

- The submitted audit trail report shows different time of acquisition of HPLC chromatograms than that mentioned on the relevant chromatograms. Clarification is required in this regard.
- Submit BMR of three executed stability batches.

Decision of 326th meeting of Registration Board:
Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.

Response by the firm:

Sr #	Deficiencies	Response by the firm
1.	Justify the verification studies of analytical procedure of drug substance from drug product manufacturer, since the drug product manufacturer has adopted a different analytical method in terms of column size, column temperature, standard solution and sample solution.	Analytical procedure for quantification/Validation of drug substance has been selected on the basis of research articles and all parameters have been validated as per ICH/USP guidelines. Guidelines has been attached for your reference. Please read page no 10, clause 5, sub clause 5.1.
2.	The result of sample 3 at 80% concentration in repeatability test gives 60% result. Justify how you passed this test since the test does not qualify the acceptance criteria.	As per ICH guidelines Precision Repeatability minimum of 9 determination should be covered we have prepared 60%, 80%, 100%, 120%. 80% sample was in actual is 60% of sample prepared, which results was also shows 60% Results. Report have typo error, updated report is shared.
3.	The HPLC chromatograms of verification studies depict that the date acquired for all analysis of linearity and range is 1-May -22:10:07AM which is not practically possible. Justify how multiple HPLC chromatograms having different peak areas were acquired on same date and same time.	Date acquired in report template is saved as time of sequence submission and all injections have been fed in the sequence at the same time. Date acquired reflects the time of sequence submission. That is why multiple injections have same acquired time. Date processed depicts the time of injection starting of every injections.
4.	The analytical method provided in verification studies specifies 20µL injection volume while all chromatograms specify 10µL Injection volume.	All the analysis have been carried out at 10µL. Testing procedure have typo error. Test method has been revised and attached for your reference.
5.	HPLC chromatogram for sample 1 of 120% specify the height as 544. 73 while the scale of chromatogram is till 480. Justify how the height could be 544 while the Chromatogram is below 480 as per vertical scale.	Report template and chromatogram depict same data but unit of measurement of signal in peak table is different from chromatogram. Vendor have been called for the proper setting of report template to remove the ambiguity in this regard. Moreover our main concern to carry out calculations is with Area under curve. That's why in all compendia monograph like USP/BP/JP Peak Area is used for calculations.
6.	Three chromatograms submitted after sample 3 of 140% concentration with sample name 0, date acquired 1-May-22 10:07AM and date processed 1-May-22 12:59 PM show retention time 2.59 with exactly same peak as in other chromatograms but the area and height is 0. Clarify how the peak area and height is 0 with the clear peak in the print.	In Our HPL software After every analysis Report template has to be selected for any product. Mistakenly None saved templated was selected due to which its shows these type of error. These Chromatogram is basically for 160% to check the slope criteria. We already have successfully performed the Linearity and Range parameters till Max.140%. These are Chromatogram are not used in our calculations.

7.	Provide information regarding batch number, expiry date and manufacturer of the innovator product against which pharmaceutical equivalence and CDP studies were conducted.	Innovator samples pictures has been attached and sent for your reference.
8.	Justify the adaptation of dissolution parameters, since they are different from that recommended by the innovator's product in terms of RPM. You have selected 100RPM while the innovator's product has specified 75 RPM.	All submitted data has been performed as per innovator specifications. Test method has been updated with right specifications and attached.
9.	Justify the dissolution acceptance criteria NLT 75%(0) in 45 minutes, while the innovator's product acceptance criteria is NLT (Q) in 15 minutes. Justify your dissolution criteria in the light of decision of Registration Board taken in its 293rd meeting which specifies that "For rapidly dissolving as well as immediate release drug products, wherein the stability batches will be manufactured after 01-06-2020, variation from innovator / reference product with reference to dissolution specification will not be acceptable"	As per Refer to FDA's Dissolution Guidance, 2018, Dissolution acceptance criteria is NLT80% in 30 minute, As in stability study and at 0 time Our Products shows more than 90% of dissolution. We have revised the test method 75% in 15 minute for our drug product. And all testing will be conducted accordingly. Also in our CDP study at pH 6.8 buffer our drug Product shows more than 90% results after 10 minutes.
10.	Justify why content uniformity test is not included in the drug product specifications.	Content uniformity have been performed at finished stage and also included in pharmaceutical equivalence. Testing procedure and specifications have been updated accordingly.
11.	Analytical method of drug product specifies that concentration of standard and sample preparation is 0.025mg/ml while you have performed verification studies keeping the target concentration 0.1 mg/ml. Justify how these studies represent your analytical method.	Concentrations adjustment is made for output of HPLC chromatogram to get peak behavior and accuracy in results. If we go down or go up for concertation. Analytical method sample concentrations during analysis, we have made as per article based method. That's why this sample was prepared by 0.1mg/mL. Moreover as we already have validated method with this concentrations and also verified by testing same time competitor sample. After validation with different parameters will not affect the dilution concentrations
12.	USFDA review documents reveals that the innovator's drug product shows more than 85% release in 15 minutes, while your stability results indicate that the product disintegration time is greater than 15 minutes. Justify how your product could be considered equivalent to the innovator's product.	Disintegration and dissolution both are different test and different mechanism of actions. Disintegrations release mechanism by erosion. Dissolution release mechanism is different. As our product falls in acceptance criteria is pharmaceutically equal. Disintegration is a physical performance test. Whereas Dissolution is Chemical performance test and shows better study for bioavailability of product.

13.	The submitted audit trail report shows different time of acquisition of HPLC chromatograms than that mentioned on the relevant chromatograms. Clarification is required in this regard.	All the audit trails reports are generated by our HPLC Software, which practically not possible to shows different date and time. May be our File compilation officer have attached or placed in different place.

Decision: Approved with Innovator's specifications.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

330.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Welmark Pharmaceuticals Plot # 122 Block-B, Phase-V, Industrial Estate Hattar.**
	Name, address of Manufacturing site.	M/s Welmark Pharmaceuticals Plot # 122 Block-B, Phase-V, Industrial Estate Hattar.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	Firm has submitted copy of GMP certificate dated 23-11-2021 issued based on inspection dated 11-11-2021.
	Evidence of approval of manufacturing facility	Firm has submitted copy of GMP certificate dated 23-11-2021 issued based on inspection dated 11-11-2021. The certificate specifies Tablet (General) Section.
	Status of application	☒ New Drug Product (NDP) ☐ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales

	Details of fee submitted	PKR 75,000/- Dated 24-02-2022
	The proposed proprietary name / brand name	**ZILTAN 80mg Tablet**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each tablet contains: Azilsartan medoxomil potassium eq to Azilsartan medoxomil…… 80mg
	Pharmacotherapeutic Group of (API)	Angiotensin Receptor Blocker
	Pharmaceutical form of applied drug	White to off white colored uncoated round shape core tablet plain from both sides
	Reference to Finished product specifications	Innovator's
	Proposed Pack size	4 x 7's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Edarbi Tablet (**USFDA** Approved)
	For generic drugs (me-too status)	NA

	Name and address of API manufacturer.	CTX Lifesciences Pvt Ltd. Block No. 251-252, Sachin Magdalla Road G.I.D.C, Sachin Surat Gujrat India
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 25°C ± 2°C / 60% ± 5% RH for 6 months. The real time stability data is conducted at 5°C ± 3°C for 24 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted pharmaceutical equivalence of their product against the innovator's product Edarbi Tablet 80mg manufactured by Takeda Ireland Ltd.. Firm has submitted CDP results of their product against the innovator's product Edarbi Tablet 80mg in 3 dissolution medias.
	Analytical method validation/verification of product	Firm has submitted analytical method validation study reports for drug substance as well as drug product.

STABILITY STUDY DATA

Manufacturer of API	CTX Lifesciences Pvt Ltd. Block No. 251-252, Sachin Magdalla Road G.I.D.C, Sachin Surat Gujrat India

Manufacturing Date	03-2021	03-2021	03-2021
Date of Initiation	22-03-2021	24-03-2021	25-03-2021
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Last PSI was conducted for Dapzin Tablet, for which the inspection was conducted on 27-04-2021 and the report was presented in 307th meeting of Registration Board. The report confirms following points: • The HPLC software is 21CFR compliant. • Firm has demonstrated audit trail reports of testing.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of Retention of License (No. G/25/1723) dated 29-01-2021 issued by Food and Drugs Control Administration Gujrat State India. The certificate specifies that the license to manufacture has been retained from 24/01/2021 to 23/01/2026.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice cleared dated 16-052-2019 specifying 0.540Kg Azilsartan medoxomil potassium. The invoice is cleared by AD (I&E) DRAP.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record for product testing.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted certificate of 21 CFR compliance for the HPLC system
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Sr. No	Shortcomings communicated	Response by the firm
1.	The label claim of innovator's product specifies that each tablet contains 80mg of Azilsartan medoxomil as potassium salt, while your label claim specifies that each tablet contains 80mg of Azilsartan medoxomil potassium. Revise your label claim as per the innovator's product.	That was a typographic mistake that we have corrected the label claim that is Each tablet contains: Azilsartan Medoxomil as potassium …..80mg (Innovators spec) Firm has **not** submitted any fee

2.	Analytical method for assay testing of drug substance specifies a gradient elution system with a run time upto 40 minutes, while the drug product manufacturer has specified isocratic elution with run time upto 10 minutes. Clarification is required how drug product manufacturer can use a different analytical method of the drug substance from that recommended by the drug substance manufacturer.	We have used gradient method of analysis for drug substance provided by the drug substances manufacturer with a run time upto 40 minutes. Although we have used isocratic method of analysis for drug product with run time of upto 10 minutes.
3.	Justify the performance of specificity test under verification studies of drug substance in the light of ICH guidelines, since you have specified that the test was performed by spiking blank sample with test sample and excipients. Justify what was the blank and test sample and how excipients were spiked in drug substance testing.	We have performed specificity test under verification studies of drug substance in the light of ICH guidelines. We run blank sample and standard dilution sample dilution and impurity standard but excipients are spiked during product method validation We use diluent as blank sample
4.	Specify the exact concentration of each solution studied at 80%, 100% and 120% in accuracy and recovery studies. Further specify the formula used to calculate accuracy and recovery results.	The exact concentration of 80% is 0.2mg/ml, 100% is 0.25mg/ml and 120 % is 0.3mg/ml. Accuracy should be assessed using a minimum of 9 determinations over a minimum of 3 concentration levels covering the specified range (e.g., 3 concentrations/3 replicates each of the total analytical procedure), Accuracy should be reported as percent recovery by the assay of known added amount of analyte in the sample or as the difference between the mean and the accepted true value together with the confidence intervals.
5.	Analysis of the drug substance lot number 19AK00006 was performed on 24-12-2020 while API verification studies were performed on 26-12-2020. Justify how the testing of drug substance was carried prior to verification studies.	We have retested the drug substance and verification studied according to ICH guideline lot number 19AK00006 was performed on March 2020. Again we have retested and reverification study performed. Intra- day precision was performed on next day
6.	The COA of API lot number 19AK00006 specifies the retest date as March 2020 while you have performed API testing on 24-12-2020 (almost 9 months after the API retest period). Justify how you have used an API which have exceeded its limit of use as specified by its manufacturer.	We have retested the drug substance lot number 19AK00006 was performed on March 2020. According to API stability study provided by manufacturer. This salt is stable for 2 year on basis of stability study. We have again retested the drug substance in December 2020 before manufacturing trial batches of Ziltan 40 and 80 mg tablet
7.	As per the product review documents issued by USFDA, the drug product is practically insoluble in acidic and neutral aqueous solutions and is unstable in aqueous solution between pH 1 and pH 7. Data from other	We have reviewed comparative dissolution profile. Azilsartan is unstable in 0.1 HCL solution and 4.5 acetate buffer the result in 0.1 N HCL solution 32 to 35% of both Welmark and innovator product and result were found 35 to 40% in 4.5 acetate buffer in 45 minutes

	manufacturers as well as innovator's product shows very less drug release in 0.1 N HCl as well as 4.5 phosphate acetate buffer. Justify your results showing more than 60% results at 10 minutes in both of these medias.	
8.	Justify the dissolution specifications NLT 75% in 45 minutes without specifying the value of Q as well as adopting 45 minutes for dissolution test contrary to that recommended by USFDA for the innovator's product.	FDA has approved up to 45 minutes for dissolution but our product is dissolved before 30 min. We have reviewed time limit for dissolution. Our specification is the valu of (Q) NLT 75% in 30 minutes.
9.	Your sample and standard solution concentration is 0.25mg/ml, while in detection limit and quantitation limit test your results are 90% - 110% which does not specify result of this test, furthermore justify the performance of this test as per ICH guidelines including interpretation of results of this test.	The limit of detection (LOD) and limit of quantitation (LOQ) is 0.0155% and 0.0062% respectively
10.	Justify why the peak for fumaric acid is not observed during the stability studies since fumaric acid is included in the formulation.	We have used fumaric acid in very small quantity in formulation and very small peak observed in 3 minutes
11.	Azilsartan base is identified as an impurity in azilsartan medoxomil and the peak for azilsartan is also observed in HPLC analysis. Clarify why azilsartan base is not observed in any analysis during stability studies.	Azilsaratan base impurity is shown in our chromatogram and it lies with in the limits.
12.	Justify the dispensing of 85.360mg API in each tablet since each tablet is claimed to contain 80mg Azilsartan medoxomil.	Azilsartan Medoxomil as potassium …..80mg (Innovators spec) documents of formulation and calculation of potassium factor are submitted.

Decision of 326th meeting of Registration Board:

Deferred for following submissions:

- Submission of full fee of registration for pre-approval change in label claim/ master formula as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.
- Scientific justification for adapting isocratic elution with run time upto 10 minutes for analysis of drug substance, since the drug substance manufacturer has specified a gradient elution system with a run time upto 40 minutes.
- Justify the analysis of drug substance prior to the performance of verification studies of analytical method of drug substance.
- Scientific justification for the use of an API which have exceeded its limit of use as specified by its manufacturer, since you have used API lot number 19AK00006 on 24-12-2020, while the drug substance manufacturer has specified the retest date as March 2020.
- Scientific justification for the dissolution specifications NLT 75% in 45 minutes without specifying the value of Q as well as adopting 45 minutes for dissolution test contrary to that recommended by USFDA for the innovator's product.

Response by the firm:

Sr. No	Reason for deferment	Response by the firm

1.	Submission of full fee of registration for pre-approval change in label claim/ master formula as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.	Firm has submitted full fee of registration for pre-approval change in label claim/ master formula
2.	Scientific justification for adapting isocratic elution with run time upto 10 minutes for analysis of drug substance, since the drug substance manufacturer has specified a gradient elution system with a run time upto 40 minutes.	We have used the gradient method of analysis for drug substance provided by the drug substances manufacturer with a run time upto 40 minutes. Firm has also submitted copy of the specifications along with chromatograms for analysis of drug substance.
3.	Justify the analysis of drug substance prior to the performance of verification studies of analytical method of drug substance.	API verification studies were performed on 23-12-2020. However the report was signed on 26-12-2020, the actual analysis and verification studies have been performed on 23-12-2020, the firm has also submitted chromatograms of verification studies conducted on 23-12-2020.
4.	Scientific justification for the use of an API which have exceeded its limit of use as specified by its manufacturer, since you have used API lot number 19AK00006 on 24-12-2020, while the drug substance manufacturer has specified the retest date as March 2020.	We received azilsartan raw material sample on 10-07-2019 and tested it on 17-07-2019 and again we retested the drug substance in December 2020 before manufacturing of trial batches of Azilsartan 40mg and 80mg. The drug substance is stable for 2 years as evident from the stability studies.
5.	Scientific justification for the dissolution specifications NLT 75% in 45 minutes without specifying the value of Q as well as adopting 45 minutes for dissolution test contrary to that recommended by USFDA for the innovator's product.	The firm has now revised the dissolution specifications to NLT 75% (Q) in 30 minutes. Firm has also submittedresults of dissolution test for their batches at 24th month time point in which the results complied the acceptance criteria.

Decision: Deferred for clarification from the drug substance manufacturer whether the drug substance can be used after the lapse of 1 month from the retest date.

Sr. No.	Name & Address of Manufacturer / Applicant	Brand Name (Proprietary Name + Dosage Form + Strength), Composition, Pharmacological Group, Finished Product Specification	Type of Form, Initial Diary & Date, Fee (including differential fee), Demanded Price / Pack size	International Availability GMP Inspection Report Date & Remarks

4.	Scientific justification for the use of an API which have exceeded its limit of use as specified by its manufacturer, since you have used API lot number 19AK00006 on 24-12-2020, while the drug substance manufacturer has specified the retest date as March 2020.	We received azilsartan raw material sample on 10-07-2019 and tested it on 17-07-2019 and again we retested the drug substance in December 2020 before manufacturing of trial batches of Azilsartan 40mg and 80mg. The drug substance is stable for 2 years as evident from the stability studies.
5.	Scientific justification for the dissolution specifications NLT 75% in 45 minutes without specifying the value of Q as well as adopting 45 minutes for dissolution test contrary to that recommended by USFDA for the innovator's product.	The firm has now revised the dissolution specifications to NLT 75% (Q) in 30 minutes. Firm has also submittedresults of dissolution test for their batches at 24th month time point in which the results complied the acceptance criteria.

Decision: Deferred for clarification from the drug substance manufacturer whether the drug substance can be used after the lapse of 1 month from the retest date.

332.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Nagarsons Pharmaceuticals. Plot No. 34, St. No. NS-2, National Industrial Zone, Rawat, Islamabad**
	Name, address of Manufacturing site.	M/s EG Pharmaceuticals, 13/A Industrial Triangle Kahuta Road, Islamabad.
	Status of the applicant	☐ Manufacturer ☐ Importer ☒ Is involved in none of the above (contract giver) Firm has submitted copy of contract manufacturing agreement with applicant firm dated 24-02-2021.
	GMP status of the firm	Firm has submitted copy of inspection report of M/s EG Pharmaceuticals dated 13-02-2019 recommending the renewal of DML.
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter of issuance of DML (No. 000752) dated 29-08-2012 specifying capsule (cephalosporin) section.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 23181: 25-08-2021
	Details of fee submitted	PKR 75,000/-: 21-06-2021
	The proposed proprietary name / brand name	**CEFINAG 400mg Capsule**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each capsule Contains: Cefixime (as trihydrate)……400mg
	Pharmaceutical form of applied drug	Sterile clear and colourless oily solution filled in glass ampoules
	Pharmacotherapeutic Group of (API)	Cephalosporin Antibiotic
	Reference to Finished product specifications	JP specification
	Proposed Pack size	As per SRO
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Cefixime 400mg capsule **(MHRA** Approved)
	For generic drugs (me-too status)	Cefim Capsule by Hilton
	Name and address of API manufacturer.	Saakh Pharma (Pvt) Ltd. C-7/1, North Western Industrial Zone, Port Qasim, Karchi.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.

	Module-III Drug Substance:	Firm has submitted detailed data for both drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	
	Module-III Drug Product:	
	Pharmaceutical Equivalence and Comparative Dissolution Profile	
	Analytical method validation/verification of product

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	
3.	Documents for the procurement of API with approval from DRAP (in case of import).	
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	

6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	

Evaluation by PEC:

- The application for contract manufacturing from M/s EG Pharmaceuticals Islamabad is not submitted as per the guidance document approved by Registration Board. The submitted application is in variation to the guidance document in module 1 and various sections of module 3. The submitted COA of drug substance, batch analysis report of drug product and stability study data of drug product is not in line with the recommendations of Registration Board and as per the guidance document.
- The drug product testing has been carried out using specifications which are not in line with the specifications of cefixime capsule approved by Registration Board, furthermore the firm has carried out dissolution testing using UV method and the assay test during stability studies are also carried out using a single chromatogram of standard and sample.
- Therefore, you are advised to resubmit your application compiled in the light of the guidance document approved by Registration Board in which product development and stability studies has been conducted as per the monograph approved by Registration Board and notified vide No.F.14-1/2022-PEC dated 14-03-2022 along with submission of requisite fee so that further evaluation of your application could be carried out.

Decision of 323rd meeting of Registration Board:
Registration Board deferred the case for submission of reply to the above cited shortcomings within six months.

Response by the firm: Firm has submitted data as per Guidance document, the detail of which is as under

Name and address of API manufacturer.	Saakh Pharma (Pvt) Ltd. C-7/1, North Western Industrial Zone, Port Qasim, Karchi.
Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
Module-III Drug Substance:	Firm has submitted detailed data for both drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability data of 3 batches of API at accelerated and real time conditions
Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.

Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has also submitted results of comparative dissolution profile of their product with Fixval Capsule of M/s GSK. Firm has performed CDP in 0.1 N HCl, buffer pH 4.5 and phosphate buffer pH 6.8. Firm also calculated factor f2 which was above 50. The firm has submitted results and comparison of Fixval Capsule, manufactured by M/s GSK and Ficx Capsule of M/s EG. Test results of this study found satisfactory, comparable and within specifications.
Analytical method validation/verification of product	Firm has submitted analytical method validation data.

1.	Reference of previous approval of applications with stability study data of the firm (if any)	NA
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate 039/2019-DRAP (K) issued by the DRAP has been submitted. Which is valid up to 03-01-2020
3.	Documents for the procurement of API with approval from DRAP (in case of import).	N/A As API Purchased from Saakh Pharma (Pvt)Ltd C-7/1,NWIZ, Port Qasim Karachi
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Yes
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	NA
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Yes

Evaluation by PEC:

The same formulation of cefixime 400mg capsule manufactured by M/s EG Pharmaceuticals have been approved by Registration Board in its 296th meeting as a case of "*Request for Change in Registration Status of Product from M/s Swat Pharmaceuticals to M/s Wahabsons Pharma (Pvt) Ltd. Swat Through Contract Manufacturing at M/s EG Pharmaceuticals, Islamabad*".

Applicant firm	M/s Wahab sons pharma Pvt Ltd 4km Buner Road Barikot Swat
Manufacturer firm	EG Pharmaceuticals 13A Industrial Triangle, Kahuta road Islamabad
Brand Name	Soxime Capsules 400mg
Batch No. of drug product	961 (3500 Packs), 990 (4370 Packs), 933 (4000 Packs)
Case No.	1
Page number	2461-2463
Registration Board meeting	296th meeting of Registration Board.

Decision: Approved.
Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.

Case No. 03 Registration applications of imported products applied on Form-5A

Remarks of Evaluator:

S.No	Section	Shortcomings Communicated	Reply
1.	3.2.S.1	Specify the exact crystal form of the drug substance / API used in the stability study, since the innovator product have revealed that this drug substance have 5 crystal forms with different stability and Solubility	The drug substance was used in pharmaceutical manufacturing having crystalline form I.
2.	3.2.P.5.2	Scientific justification for dissolution parameters including type of apparatus, speed and dissolution medium is required.	The dissolution parameters were selected by taking into account of USP chapter <1092> "The dissolution Procedure: Development and validation" for immediate release tablet i.e., 1. Apparatus II (Paddle) 2. Speed 75 RPM as per USP" For immediate-releasecapsule or tablet formulations, Apparatus 1 (baskets) at 50-100 rpm or Apparatus2 (paddles) at 50 or

			75 rpm are used commonly". 3. 0.1 Hydrochloric acid is used as medium

Decision: Approved with innovator's specification.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 5389 dated 25-02-2022
	Details of fee submitted	PKR 75,000/-: Deposit slip # 9337069664
	The proposed proprietary name / brand name	Orinin 25mg Tablet
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Film Coated Tablet Contains: Omarigliptin…….25mg
	Pharmaceutical form of applied drug	Film coated Tablet
	Pharmacotherapeutic Group of (API)	Dipeptidyl-Peptidase IV Inhibitors (Antidiabetic)
	Reference to Finished product specifications	Innovator specification
	Proposed Pack size	As per SRO
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Marizev 25mg Tablet by M/s MSD K.K, PMDA Approved.
	For generic drugs (me-too status)	OMARIL 25mg Tablet by M/s Genix Pharma Pvt. .Ltd**., Registration Letter not issued**
	GMP status of the Finished product manufacturer	cGMP certificate on the basis of Evaluation conducted on 18-06-2022 and valid for two (02) years
	Name and address of API manufacturer.	M/s Chifeng Arker Pharmaceutical Technology Co., Ltd. No.8 Mysun street, hongshan Economic development Zone, chifeng, Inner Mongolia, China
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubility's, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of

		specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of Omarigliptin is not present in any pharmacopeia. The firm as submitted detail of nomenclature, structure, general properties, solubility's, physical form, manufacturers, description of manufacturing process and controls, tests for impurity, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 24 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: (OMG20160101, OMG20160102, OMG20160201)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand leader that is Marizev 25mg tablets by MSD company limited Tokyo Japan, by performing quality tests (Physical Appearance, identification, Average weight, Disintegration Time, Assay). CDP has been performed against the same brand that is Marizev 12.5mg tablets by MSD company limited Tokyo Japan, in Acid media (pH 1.0-1.2) Acetate Buffer (pH 4.5) & Phosphate Buffer (pH 6.8). The values for f1 and f2 are in the acceptable range.
	Analytical method validation/verification of product	Method verification studies have submitted including accuracy, precision, specificity.

STABILITY STUDY DATA	
Manufacturer of API	M/s Chifeng Arker Pharmaceutical Technology Co., Ltd. No.8 Mysun street, hongshan Economic development Zone, chifeng, Inner Mongolia, China
API Lot No.	D85-200401
Description of Pack (Container closure system)	Alu-Alu blister packed in unit carton (2×10's)
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH
Time Period	Real time: 6 months Accelerated: 6 months

Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)	
Batch No.	OPH-001	OPH-002
Batch Size	5000 Tablets	5000 Tablets
Manufacturing Date	07-2020	07-2020
Date of Initiation	31-07-2020	31-07-2020
No. of Batches	03	

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of Drug Manufacturing License no. 20160053 issued by Inner Mongolia Drug Administration valid till 28-12-2025
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of, invoice (invoice# PSPW-200401) dated 16-04-2020 cleared by DRAP Islamabad office dated 23-04-2020 specifying import of Omarigliptin 0.450Kg (Batch# D85-200401)
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	The firm has submitted Data of stability batches supported by attested respective documents like chromatograms, raw data sheets, COA, summary data sheets etc.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	The firm has submitted Compliance Record of HPLC software 21CFR & audit trail reports on product testing.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	The firm has submitted Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).

Remarks of Evaluator:

S.No	Section	Shortcomings Communicated	Reply
1.	3.2.S.1	Specify the exact crystal form of the drug substance / API used in the stability study, since the innovator product have revealed that this drug substance have 5 crystal forms with different stability and Solubility	The drug substance was used in pharmaceutical manufacturing having crystalline form I.
2.	3.2.P.5.2	Scientific justification for dissolution parameters including type of apparatus, speed and dissolution medium is required.	The dissolution parameters were selected by taking into account of USP chapter <1092> "The dissolution Procedure: Development and validation" for immediate release tablet i.e., 1. Apparatus II (Paddle) 2. Speed 75 RPM as per USP" For immediate-releasecapsule or tablet formulations, Apparatus 1 (baskets) at 50-100 rpm or Apparatus2 (paddles) at 50 or 75 rpm are used commonly". 3. 0.1 Hydrochloric acid is used as medium

Decision: Approved with innovator's specification.

Remarks of Evaluator: Firm submitted Fee of Rs:30000/- Deposit slip # 43288059475 For change of Title of Firm from M/s ICI Pakistan Limited to M/s Lucky Core Industries Limited.

S.No	Section	Shortcomings Communicated	Reply
1.	1.6.5	Valid Drug Manufacturing License or Valid Good Manufacturing Practice (GMP) certificate of the Drug Substance manufacturer issued by relevant regulatory authority of country of origin	Valid Good Manufacturing Practice (GMP) certificate of the Drug Substance manufacturer issued by relevant regulatory authority of country of origin is submitted.
2.	2.3.R.1.1	Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3	Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3 are attached.

3.	3.2.P.2.2.1	• 6 units of each of both test and reference product are used for CDP. Clarification is required in the light of FDA guidance for industry and EMA guidelines of comparative dissolution. • One measurement should be considered after 85% dissolution of both the products according to FDA guidance for industry and EMA guidelines of Comparative dissolution. Provide reference of time points selected. • For f2 calculations as per EMA guidelines A minimum of three time points (zero excluded) than how you have calculated f2 with two (02) time points.	• Comparative Dissolution Profiling (CDP) were performed on Dissolution Apparatus having six vessels only, thus the study was performed using six units of Test & Reference Product at the time of Development. However, dissolution apparatus having 12 vessels has been acquired and fresh study will be submitted after completion within a week time. *Now firm submitted CDP data performed using 12 units Dissolution apparatus.* • The rationale for selecting time points of sampling is as per FDA TGA & EMA guidelines and is also in compliance with 293rd minutes of DRB meeting. The guidelines suggest that for rapidly dissolving products, time interval with 5 or 10-minutes may be chosen to adequately characterize the dissolution profiles. In our case, initial sampling time point as 10minutes was chosen after a preliminary study conducted both on test & reference product and likewise, after acquiring 85% dissolution results, one measurement has been considered only, i.e., 15 minutes. • Agreed with the statement in question, the f2 cannot be calculated with two time points. According to EMA and FDA guidelines, where more than 85% of the drug is dissolved for both test and reference products within 15 min, dissolution profiles may be accepted as similar without further mathematical evaluation. However, in this case, f2 factor was not required.
4.	3.2.P.5.1	Specify which from USP monograph which dissolution test is used.	USP Dissolution Test 2 has been used.
5.	3.2.P.8	Documents for the procurement of API with approval from DRAP	Sample of Ropinirole was Free of Cost however invoice and DHL tracking is attached .

Decision: Approved with USP specifications.

1.	Reference of previous approval of applications with stability study data of the firm (if any)	
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No# 19061427 issued by Food and Drug Control Administration Gandhinagar, Gujrat state India. issued on 18-06-2019 and valid until 17-06-2022.

3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of, invoice (invoice# 6205/SR/ROW/20-21) dated 22-03-2021 specifying import of Ropinirole HCl 50g (Batch# 802002827)
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	The firm has submitted Data of stability batches supported by attested respective documents like chromatograms, raw data sheets, COA, summary data sheets etc.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	The firm has submitted Compliance Record of HPLC software 21CFR & audit trail reports on product testing.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	The firm has submitted Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).

Remarks of Evaluator: Firm submitted Fee of Rs:30000/- Deposit slip # 28085172935 For change of Title of Firm from M/s ICI Pakistan Limited To M/s Lucky Core Industries Limited.

S.No	Section	Shortcomings Communicated	Reply
1.	1.6.5	Valid Drug Manufacturing License or Valid Good Manufacturing Practice (GMP) certificate of the Drug Substance manufacturer issued by relevant regulatory authority of country of origin	Valid Good Manufacturing Practice (GMP) certificate of the Drug Substance manufacturer issued by relevant regulatory authority of country of origin is submitted.
2.	2.3.R.1.1	Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3	Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3 are attached.
3.	3.2.P.2.2.1	• 6 units of each of both test and reference product are used for CDP. Clarification is required in the light of FDA guidance for industry and EMA guidelines of comparative dissolution. • One measurement should be considered after 85% dissolution of both the products according to FDA guidance for industry and EMA guidelines of Comparative dissolution. Provide reference of time points selected. • For f2 calculations as per EMA guidelines A minimum of three time points (zero excluded) than how you have calculated f2 with two (02) time points.	• Comparative Dissolution Profiling (CDP) were performed on Dissolution Apparatus having six vessels only, thus the study was performed using six units of Test & Reference Product at the time of Development. However, dissolution apparatus having 12 vessel has been acquired and fresh study will be submitted after completion within a week time. *Now firm submitted CDP data performed using 12 units Dissolution apparatus .* • The rationale for selecting time points of sampling is as per FDA TGA & EMA guidelines and is also in compliance with 293rd minutes of DRB meeting. The guidelines suggest that for rapidly dissolving products, time interval with 5 or 10-minutes may be chosen to adequately characterize the dissolution profiles. In our case, initial sampling time point as 10minutes was chosen after a preliminary study conducted both on test & reference product and likewise, after acquiring 85% dissolution results, one measurement has been considered only, i.e., 15 minutes.

			• Agreed with the statement in question, the f2 cannot be calculated with two time points. According to EMA and FDA guidelines, where more than 85% of the drug is dissolved for both test and reference products within 15 min, dissolution profiles may be accepted as similar without further mathematical evaluation. However, in this case, f2 factor was not required.
4.	3.2.P.5.1	Specify which from USP monograph which dissolution test is used.	USP Dissolution Test 2 has been used.
5.	3.2.P.8	Documents for the procurement of API with approval from DRAP	Sample of Ropinirole was Free of Cost however invoice and DHL tracking is attached .

Decision: Approved with USP specifications.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Case no. 02 Registration applications of newly granted DML or New section (Human)

a. New DML

M/s Pharman Pharmaceuticals **. (New DML)**
CLB in its 286th meeting held on 11th May 2022 has considered and approved the grant of Drug Manufacturing License by way of formulation with following three (03) sections to M/s Pharman Pharmaceuticals

1.	Tablet (General)
2.	Capsule (General)
3.	Oral Liquid Section (General)

Accordingly, firm has applied for following products for consideration by Drug Registration Board

Tablet (General)
03 Molecules/ 04 Products

350.	Name, address of Applicant / Marketing Authorization Holder	M/s Pharman Pharmaceuticals 6-km Bohmaan Baath Road, Kalasky Gujranwala, Pakistan
	Name, address of Manufacturing site.	M/s Pharman Pharmaceuticals 6-km Bohmaan Baath Road, Kalasky Gujranwala, Pakistan
	Status of the applicant	☒ Manufacturer ☐ Importer

		☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 2395 dated 25-01-2023
	Details of fee submitted	PKR 30,000/-: Deposit slip # 3839876908
	The proposed proprietary name / brand name	CIPHARM 250mg tablet
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated tablet contains: Ciprofloxacin HCl…250mg
	Pharmaceutical form of applied drug	Tablet
	Pharmacotherapeutic Group of (API)	Antibiotic (fluoroquinolone)
	Reference to Finished product specifications	USP
	Proposed Pack size	1×10's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Ciprofloxacin 250mg film coated tablet. Manufactured M/s Aurobindo Phrma-Milpharm Ltd. MHRA Approved.
	For generic drugs (me-too status)	NOVIDAT 250mg tab by M/s Sami Pharma #011836
	GMP status of the Finished product manufacturer	New DML issued on 30/05/2022
	Name and address of API manufacturer.	Citi Pharma (Pvt.) Ltd. 3.5 Kilometer, Head Balloki Road, Phool Nagar, Kasur -55050 Punjab, Pakistan.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubility's, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of Ciprofloxacin Hydrochloride is present in USP . The firm as submitted detail of nomenclature, structure, general properties, solubility's, physical form, manufacturers, description of manufacturing process and controls, tests for impurity, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 24 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (CPH1402007, CPH1402008, CPH1402009)

	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand leader that is Novidat 250mg tablet BY SAMI Pharma by performing quality tests (Identification, Assay, Dissolution, Uniformity of dosage form). CDP has been performed against the same brand that is Ciprofloxacin 250mg tablet Tablet by SAMI Pharma in Acid media (pH 1.0-1.2) & Phosphate Buffer (pH 6.8). The values for f1 and f2 are in the acceptable range.
	Analytical method validation/verification of product	Method verification studies have submitted including accuracy, precision, specificity.

Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate issued by DRAP on the basis of Evaluation conducted on 17-12-2020 and valid for 2 years.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	The firm has submitted Data of stability batches supported by attested respective documents like chromatograms, raw data sheets, COA, summary data sheets etc.

5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	The firm has submitted Compliance Record of HPLC software 21CFR & audit trail reports on product testing.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	The firm has submitted Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).

Remarks of Evaluator: Dissolution value in all the sheets for accelerated and Real for 3 batches same i.e 98%, 98.5%, 97%

S.No	Section	Shortcomings Communicated
1.	2.3.R.1.1	Overage is used in manufacturing of stability batches without any scientific justification.
2.	3.2.S.4.1	Copies of the Drug substance specifications by Drug Product manufacturer is required.
3.	3.2.S.4.2	Analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by Drug Product manufacturer is required.
4.	3.2.S.4.3	Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance(s) shall be submitted.
5.	3.2.P.1	Overage of drug substance in manufacturing of drug product without any scientific justification.
6.	3.2.S.2.2.1	Submit correct F2 calculation.
7.	3.2.P.5.4	COA's of three different batches having same values of Assay and dissolution
8.	3.2.P.6	Submit COA of reference standard Ciprofloxacin Ethylenediamine Analoge.
9.	3.2.P.8	• Purchase documents for Ciprofloxacin HCl • COA's of all time points does not match with stability summary sheets and raw data. Clarification is required. • In batch# CP22-00 and CP22-003 how value of Assay at 0 month for Real time stability studies and Accelerated stability studies are changed. Clarification is required. • Submit complete raw data for dissolution. • Raw data sheets for dissolution shows dissolution limits NLT 75% while USP states NLT 80% (Q). Clarification is required.

Firm Response:
It is submitted that we want to withdraw our product development & stability data only as the said data was mistakenly not properly arranged in order & in some cases was mixed up.
It is requested to hold the above submitted data & we will re-submit properly arranged.

Decision:

- **Registration Board acceded the firm's request of withdrawal and declared the instant application as disposed off.**
- **Registration Board decided that firm shall formulate new trial batches and submit its stability data for both accelerated and long term conditions along with full fee of registration i.e., Rs. 30,000/- for correction/pre-approval change in stability data as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.**
- **Registration Board further noted that firm's quota of priority consideration against the new DML will also be deducted in leiu of the consideration of instant application.**

	Details of fee submitted	PKR 30,000/-: Deposit slip # 14485162419
	The proposed proprietary name / brand name	Omeprazole 20mg capsules
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each hard gelatin capsule contains: Enteric coated pellets containing Omeprazole ..20mg
	Pharmaceutical form of applied drug	capsule
	Pharmacotherapeutic Group of (API)	Proton Pump Inhibitors
	Reference to Finished product specifications	USP
	Proposed Pack size	2×7's & 10 x 10's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Omeprazole 20mg capsules Manufactured Vision Pharma FDA Approved.
	For generic drugs (me-too status)	Faast 20mg Capsule by M/s by CCL pharmaceuticals
	GMP status of the Finished product manufacturer	New DML issued on 30/05/2022
	Name and address of API manufacturer.	Vision Pharmaceuticals (Pvt) Ltd Plot No. 22-23, Industrial Triangle, Kahuta Road, Islamabad
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubility's, physical form, manufacturers,

		description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of Omeprazole is present in USP . The firm as submitted detail of nomenclature, structure, general properties, solubility's, physical form, manufacturers, description of manufacturing process and controls, tests for impurity, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 36 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: (OMP883, OMP514, OMP671)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand leader that is FAAST **20mg Capsule** BY CCL Laboratories by performing quality tests (Description, Identification, Assay, Uniformity of dosage form).
	Analytical method validation/verification of product	Method verification studies have submitted including accuracy, precision, specificity.

STABILITY STUDY DATA

Manufacturer of API	Vision Pharmaceuticals (Pvt) Ltd Plot No. 22-23, Industrial Triangle, Kahuta Road, Islamabad		
API Lot No.	OMP1147		
Description of Pack (Container closure system)	Alu-Alu blister packed in unit carton (2×10's)		
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	OM22-001	OM22-002	OM22-003
Batch Size	2000	2000	2000
Manufacturing Date	11-05-22	11-05-22	11-05-22
Date of Initiation	08-05-22	08-05-22	08-05-22
No. of Batches	03		

Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP Certificate on the basis of evaluation conducted on 14-06-2022 and valid for 02 years.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	The firm has submitted Compliance Record of HPLC software 21CFR & audit trail reports on product testing.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	The firm has submitted Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).

Remarks of Evaluator: Dissolution value in all the sheets for accelerated and Real for 3 batches same i.e 98%, 98.5%, 97%

S.No	Section	Shortcomings Communicated
1.	2.3.R.1.1	Calculation for fill weight with respect to assay of pellets by drug product manufacturer is not done
2.	3.2.S.4.1	Copies of the Omeprazole Pellets specifications by Drug Product manufacturer is required.
3.	3.2.S.4.2	Analytical procedures used for routine testing of the Omeprazole Pellets by substance Drug Product manufacturer is required.
4.	3.2.S.4.3	Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for Omeprazole Pellets shall be submitted.
5.	3.2.S.4.4	Dissolution testing for pellets not done by drug product manufacturer
6.	3.2.P.2.2.1	In CDP in pH 1.2 time points are up to 60 minutes while USP pharmacopeia specify 2 hour in acidic medium.
7.	3.2.P.5.1	Submit Complete specifications as per USP monograph
8.	3.2.P.5.4	• COA's of three different batches having same values of Assay and dissolution • Dissolution specifications in COA's are different than USP.
9.	3.2.P.8	• Purchase documents for Omeprazol pellets • COA's of all time points does not match with stability summary sheets and raw data. Clarification is required. • In stability summary sheets in all the three batches how value of Assay at 0 month for Real time stability studies and Accelerated stability studies are changed. Clarification is required. • Dissolution values in 6 sheets are same. • Raw data for dissolution not submitted.

Firm Response:
It is submitted that we want to withdraw our product development & stability data only as the said data was mistakenly not properly arranged in order & in some cases was mixed up.
It is requested to hold the above submitted data & we will re-submit properly arranged.

Decision:

- **Registration Board acceded the firm's request of withdrawal and declared the instant application as disposed off.**

• **Registration Board decided that firm shall formulate new trial batches and submit its stability data for both accelerated and long term conditions along with full fee of registration i.e., Rs. 30,000/- for correction/pre-approval change in stability data as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.** • **Registration Board further noted that firm's quota of priority consideration against the new DML will also be deducted in leiu of the consideration of instant application.**

Decision:

- **Registration Board acceded the firm's request of withdrawal and declared the instant application as disposed off.**
- **Registration Board decided that firm shall formulate new trial batches and submit its stability data for both accelerated and long term conditions along with full fee of registration i.e., Rs. 30,000/- for correction/pre-approval change in stability data as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.**
- **Registration Board further noted that firm's quota of priority consideration against the new DML will also be deducted in leiu of the instant application.**

M/s Variant Pharmaceuticals (Pvt) Ltd **. (New DML)**
CLB in its 273rd meeting held on 15th January 2020 has considered and approved the grant of Drug Manufacturing License by way of formulation with following four (04) sections to M/S Variant Pharmaceuticals (Pvt.) Ltd

1. Tablet (General)
2. Capsule (General)
3. Sachet Section (General)
4. General Dry Powder Injection Section (Pre-Lyophilized) Vial

Sr. No	Section	Molecules for consideration in 329th meeting	Products for consideration in 329th meeting
1	Capsule (General)	01	01

358.	Name, address of Applicant / Marketing Authorization Holder	M/s Variant Pharmaceuticals (Pvt.) Ltd Plot # 5, M-2, Pharmazone, 26 Km Main Sharaqpur Road District Sheikhupura.Pakistan
	Name, address of Manufacturing site.	M/s Variant Pharmaceuticals (Pvt.) Ltd Plot # 5, M-2, Pharmazone, 26 Km Main Sharaqpur Road District Sheikhupura.Pakistan
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 6362 dated 06-03-2023
	Details of fee submitted	PKR 30,000/-: Deposit slip # 255565603
	The proposed proprietary name / brand name	THIOVAR 4mg Capsule
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Capsule Contains: Thiocolchicoside ……4mg
	Pharmaceutical form of applied drug	Hard gelatin capsule
	Pharmacotherapeutic Group of (API)	Analgesic and Anti-inflammatory
	Reference to Finished product specifications	As per innovator's specifications
	Proposed Pack size	As per SRO
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	MIOREL 4mg CAPSULES by Laboratotio FARMACEUTICO SIT SRL. ANSM France Approved.
	For generic drugs (me-too status)	Muscoril 4 mg cap by M/s Sanofi-aventis Pakistan Ltd..., Reg. No. 015502
	GMP status of the Finished product manufacturer	Last inspection conducted on 01-06-2021 for grant of additional section and report concludes that overall Evaluation of inspection is Good.
	Name and address of API manufacturer.	SARV BioLabs (Pvt.) Ltd. Plot No.2, Trilokpur Road

		(Behind IITT College of Engg.) Kala Amb-173 030 Himachal Pradesh, India
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubility's, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of Thiocolchicoside is not present in any pharmacopeia.. The firm as submitted detail of nomenclature, structure, general properties, solubility's, physical form, manufacturers, description of manufacturing process and controls, tests for impurity, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 18 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: (7000-P-11001, 7000-P-11002, 7000-P-11003)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence is established against the the brand leader that is MUSCORIL 4mg Capsule by M/s Sanofi-aventis Pakistan Ltd..., Reg. No. 015502 ,by performing quality tests (description, Disintegration Assay, Dissolution). CDP has been performed against the same brand that is MUSCORIL 4mg Capsule by M/s Sanofi-aventis Pakistan Ltd , in Acid media (pH 1.2), Acetate buffer (pH 4.5) & Phosphate Buffer (pH 6.8).
	Analytical method validation/verification of product	Method validation studies have submitted including accuracy, precision, specificity.

STABILITY STUDY DATA	
Manufacturer of API	SARV BioLabs (Pvt.) Ltd. Plot No.2, Trilokpur Road (Behind IITT College of Engg.) Kala Amb-173 030 Himachal Pradesh, India
API Lot No.	7000-B-20046
Description of Pack (Container closure system)	Alu-Alu Blisters.
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH

	Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6, 9 (Months)

Batch Size	2000	2000	2000
Manufacturing Date	03-2022	03-2022	03-2022
Date of Initiation	09-03-2022	14-03-2022	14-03-2022
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of cGMP certificate # HFW-H(Drugs)47/08 issued by Health & Family Welfare Department Himachel pradesh and valid until 16-06-2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of Form 6 and invoice (invoice# Ex/20077) dated: 04-08-2021 attested by DRAP Lahore dated: 07-10-2021 specifying import 0.030Kg of Thiocolchicoside (Batch# 7000-B-20046)
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	The firm has submitted Data of stability batches supported by attested respective documents like chromatograms, raw data sheets, COA, summary data sheets etc.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	The firm has submitted Compliance Record of HPLC software 21CFR & audit trail reports on product testing.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	The firm has submitted Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).

Remarks of Evaluator:

S.No	Section	Shortcomings Communicated	Reply
1.	3.2.S.4.1	Copies of the Drug substance specifications by Drug Product manufacturer is required.	Copies of the Drug substance specifications by Drug Product manufacturer are submitted.
2.	3.2.S.4.2	Analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by Drug Product manufacturer is required.	Analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by Drug Product manufacturer are submitted.
3.	3.2.P.2.2.1	• One measurement should be considered after 85% dissolution of both the products according to FDA guidance for industry and EMA guidelines of Comparative dissolution. Provide reference of time points selected. • f2 calculations not submitted.	• The drug release at 30 minutes in all three dissolution media is already above than 85% as evident in the provided data therefore, we did not take further time points. • f2 calculations submitted.

4.	3.2.P.5.1	You have not performed uniformity of dosage unit by content uniformity, as recommended by USP General Chapter <905>. Justification shall be submitted in this regard.	Performance of content uniformity test submitted.

Decision: Approved with innovator's specification.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

a. New/Additional section(s)

M/s Titlis Pharma (Pvt) Limited . **(New Section)**
CLB in its 287th meeting held on 24th June 2022, has approved the following 03 additional sections of M/s Titlis Pharma (Pvt) Limited .

1) Tablet Section II (General)
2) Dry Powder Suspension Section
3) Dry Powder Sachet Section (General)

Remarks of Evaluator:

S.No	Section	Shortcomings Communicated	Reply
1.	1.6.5	Valid Drug Manufacturing License or Valid Good Manufacturing Practice (GMP) certificate of the Drug Substance Ivabradine HCl manufacturer issued by relevant regulatory authority of country of origin	*Copy of DML No# Kat 20170317 issued by National Medical products Adminstration China for. Jijlan Huikang Pharmaceuticals Co., Ltd valid until 08-11-2027* Beijing Lianben Pharma-Co has informed us that they are now manufacturing their Ivabradine HCl from their group company i.e Jilin Huikang Pharmaceutical., Co Ltd; and the Valid Drug Manufacturing License of Jilin Huikang Pharmaceutical., Co Ltd along with duly signed/stamped agreement by both companies is attached herewith.

2.	3.2.S.4.1	• Copies of the Drug substance .(Metoprolol Tartrate**)** specifications by both drug substance manufacturer and Drug Product manufacturer is required. • Copies of the Drug substance (Ivabradine HCl) specifications Drug Product manufacturer is required.	• Copies of the Drug substance .(Metoprolol Tartrate**)** specifications by both drug substance manufacturer and Drug Product manufacturer are submitted. • Copies of the Drug substance (Ivabradine HCl) specifications Drug Product manufacturer are submitted.
3.	3.2.S.4.2	• Analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient (Metoprolol Tartrate**)** by both drug substance manufacturer and Drug Product manufacturer is required. • Analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient (Ivabradine HCl) by Drug Product manufacturer is required.	• Analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient (Metoprolol Tartrate**)** by both drug substance manufacturer and Drug Product manufacturer are submitted. • Analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient (Ivabradine HCl) by Drug Product manufacturer are submitted.
4.	3.2.S.4.3	Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) (Metoprolol Tartrate and Ivabradine HCl) shall be submitted.	Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both drug substance(s) (Metoprolol Tartrate and Ivabradine HCl) are submitted.
5.	3.2.P.8	• Documents for the procurement of API (Metoprolol Tartrate) with approval from DRAP. • As per reference product public assessment report "During storage an increase in the specified degradation products from Ivabradine is observed, under all storage conditions(PVC/PVDC blisters and in HDPE bottles), all staying within specification up to 18 months under long term conditions." You have conducted stability studies for 24th month and not conducted degradation products from Ivabradine. Clarify.	• Documents for the procurement of API (Metoprolol Tartrate) with approval from DRAP submitted. • We conducted Accelerated and Long Run Studies of Ivaset-M 50mg/5mg Tablet covering all sampling and testing points at • Accelerated:0, 3,6 • Long Run: 0,3,6,9,12,18 & 24 • Utilizing validated analytical method, our assay limits are with in limits at all said testing points. • We have performed stability studies (Long Run) on our Ivaset-M 50mg/5mg Tablet sample at the 36th month mark. The results indicate that the level of impurities is well within the limits (i.e. individual impurity NMT 0.5% and total impurities NMT 1.0%). This demonstrates that the degradation of Ivabradine in our product remains well within the acceptable limits even at the 36th month of storage at 30°C ± 2°C, 65% RH ± 5% RH.

			Based on the result, it is claimed that Ivaset-M 50mg/5mg Tablet is stable even for 36 months at 30°C and 65% humidity provided the product is kept in undamaged original packing. (Reports and chromatographs are attached

Decision: Registeration Bard deferred the case following

- **Registration Board decided that firm shall formulate new trial batches and submit its stability data for both accelerated and long term conditions with new souce of drug substance (Ivabradine Hcl) along with full fee of registration i.e., Rs. 30,000/- for correction/pre-approval change in stability data as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021OR Submit Valid Drug Manufacturing License or Valid Good Manufacturing Practice (GMP) certificate of the Drug Substance Ivabradine HCl manufacturer issued by relevant regulatory authority of country of origin**
- **In case of new data Registration Board further noted that firm's quota of priority consideration against the new sections will also be deducted keeping the fact of the consideration of instant application.**

Case no. 05 Registration applications of categories to be considered on priority

a. Export facilitation

Export Facilitation: Applications was received through letter No.F.1-6/2019-PR-I (EFD)
"M/s AGP Limited.B-23, S.I.T.E. Karachi have achieved benchmark OF USD 1,549.120.69 as defined in the Board's decision during fiscal year 2021-2022. In this regard, please find the (1 molecule) 03 products applications submitted by the firm."

DOCUMENTS / DATA PROVIDED BY THE APPLICANT

Sr. No.	Documents To Be Provided	Status
1.	Reference of previous approval of applications with stability study data of the firm (if available)	Firm has referred to onsite inspection report of their product for "Daplazole 30mg and 60mg (Dexlansoprazole) Capsules on 19-03-2020. Further, the said panel inspection report was discussed in 295th Drug Registration Board meeting held on 8-11 June, 2020. The case was approved and the inspection report confirms following points: • The HPLC software is 21CFR Compliant as per record available with the firm. • Audit trail on the testing reports is available. • Adequate monitoring and control are available for stability chamber. Chambers are controlled and monitored through software having alarm system for alerts as well.
2.	Certificate of Analysis of API from both API Manufacturer and Finished Product manufacturer.	Copies of COAs (Batch#200605) of API from M/s M/s Shandong Qidu Pharmaceuticals C0., LTd. No.17 Hongda Road, Linzi District, Zibo City, Shandong, China.China and M/s AGP Limited Karachi are submitted.
3.	Method used for analysis of API from both API Manufacturer and Finished Product manufacturer	Methods used for analysis of API from both API Manufacturer and Finished Product Manufacturer are provided by the firm
4.	Stability study data of API from API manufacturer	The firm has submitted copy of **accelerated, 06 Months** (40°C ± 2°C & 75±5%RH) & **long term, 24 Months** (25°C ± 2°C & 60±5%RH) stability study reports of 03 batches. Batches: (140401, 140501, 140502)
5.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	The firm has submitted copy of GMP certificate (SD20180700) of M/s Shandong Qidu Pharmaceuticals C0., LTd. No.17 Hongda Road, Linzi District, Zibo City, Shandong, China.

14.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

REMARKS OF EVALUATOR

S.NO	Shortcomings communicated	Reply
1.	Reference of previous approval of applications with stability study data of the firm.	Daplazole 30mg and 60mg (Dexlansoprazole) Capsules submitted.
2.	Method used for analysis of API from Finished Product manufacturer	Method used for analysis of API from Finished product manufacturer is submitted.
3.	Real time Stability study data of API from API manufacturer as per Zone IV of 3 batches is required.	Real time Stability study data of API performed on 25ºC±2C/60%±5% RH by manufacturer. Therefore, record of data logger of API for the storage conditions throughout the transportation attached. As per Decision of 297th DRB, we have conducted degradation studies during stability program of finished product. The organic impurities were analyzed at initial stage, 6 months (Accelerated Conditions) and 24 months on long term condition. Data is attached.
4.	Protocols followed for conduction of stability study	Protocols followed for conduction of stability study.
5.	Method used for analysis of FPP	Method used for analysis of FPP
6.	Submit details of product against which CDP conducted with procurement documents.	Details of product with pack image, against which CDP is conducted are attached. Hidrasec® 10mg" Sachet Batch # SXN757 Manufactured:1/2022 EXP :12/2023 Manufactured by Abbott Laboratories

Decision: Approved with Innovator's specifications. Firm shall submit the fee of Rs. 7,500 for correction/pre-approval change/ in product specifications, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.

- **Manufacturer will place first three production batches of the product on long term stability studies throughout proposed shelf life and on accelerated studies for six months.**

361.	Name and address of manufacturer / Applicant	M/s AGP Limited.B-23, S.I.T.E. Karachi
	Brand Name +Dosage Form + Strength	Dotril 30mg Sachet
	Composition	Each sachet contains: Racecadotril……..30mg
	Diary No. Date of R& I & fee	Dy No. 15146: 24.04.2018 PKR 50,000 +10,000/-: 23.04.2018 (For Dotril 10mg Sachet + Dotril 30mg Sachet + Dotril 100mg Capsule)
	Pharmacological Group	Other antidiarrheals
	Type of Form	Form 5
	Finished product Specifications	The firm has claimed manufacturer's specifications
	Pack size & Demanded Price	16's; Rs. 875
	Approval status of product in Reference Regulator Authorities	TIORFAN 30 mg CHILDREN, oral powder in sachet-dose. ANSM Approved HIDRASEC CHILDREN 30 mg, Granules for oral

		suspension. MHRA approved (the pharmaceutical form is Granules for oral suspension White powder with characteristic apricot smell)
	Me-too status	Could not be confirmed.
	GMP status	GMP granted on the basis of inspection dated 16.10.2018
	Remarks of the Evaluator.	Provide complete finished product specifications in line with general chapters (list of tests, reference to analytical procedures, and proposed acceptance criteria), including tests for granules
	Previous Decision: Deferred for submission and evaluation of Stability study data **. (M-289)**	

STABILITY STUDY DATA

Drug	Dotril 30mg Sachet		
Name of Manufacturer	M/s AGP Limited.B-23, S.I.T.E. Karachi		
Manufacturer of API	M/s Shandong Qidu Pharmaceuticals C0., LTd. No.17 Hongda Road, Linzi District, Zibo City, Shandong, China.		
API Lot No.	200605		
Description of Pack (Container closure system)	Alu-Alu blister packed in unit carton along with leaflet.		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 75% ± 5% RH Accelerated: 40 °C ± 2 °C / 75% ± 5%		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (months) Real Time: 0, 3, 6, 9, 12 (months)

Manufacturing Date	03-2022	03-2022	03-2022
Date of Initiation	09-05-2022	09-05-2022	09-05-2022
No. of Batches	03		
Date of Submission	30-12-2022 (39563)		

DOCUMENTS / DATA PROVIDED BY THE APPLICANT

Sr. No.	Documents To Be Provided	Status
1.	Reference of previous approval of applications with stability study data of the firm (if available)	Firm has referred to onsite inspection report of their product for "Daplazole 30mg and 60mg (Dexlansoprazole) Capsules on 19-03-2020. Further, the said panel inspection report was discussed in 295th Drug Registration Board meeting held on 8-11 June, 2020. The case was approved and the inspection report confirms following points: • The HPLC software is 21CFR Compliant as per record available with the firm. • Audit trail on the testing reports is available. • Adequate monitoring and control are available for stability chamber. Chambers are controlled and monitored through software having alarm system for alerts as well.
2.	Certificate of Analysis of API from both API Manufacturer and Finished Product manufacturer.	Copies of COAs (Batch#200605) of API from M/s M/s Shandong Qidu Pharmaceuticals C0., LTd. No.17 Hongda Road, Linzi District, Zibo City, Shandong, China.China and M/s AGP Limited Karachi are submitted.

	The proposed proprietary name / brand name	**CARBOLAB 150mg/15ml**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each ml contains: Carboplatin BP……... 10 mg
	Pharmaceutical form of applied drug	Injection
	Pharmacotherapeutic Group of (API)	Pyrimidine analogue ATC Code : L01XA02 carboplatin Injection is indicated for the initial treatment of advanced ovarian carcinoma in established combination with other approved chemotherapeutic agents)
	Reference to Finished product specifications	BP
	Proposed Pack size	1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	PARAPLATIN of USFDA approved
	For generic drugs (me-too status)	Brand Name CARBOPLATINO 150MG INJECTION Generic Name: CARBOPLATIN 150MG Importer Name: GHAZALI BROTHERS Registration Number: 043036
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubility's, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance..
	Name, address of drug substance manufacturer	Sun pharmaceutical industries ltd., A-7/A-8, M.I.D.C., Industrial Area, Ahmednagar – 414 111, Maharashtra, India.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data for both sources related to nomenclature, structure, general properties, solubility's, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted long term stability study data of 3 batches of drug substance at 25°C ± 2°C / 60 ± 5% RH for 72 months. The accelerated stability data is conducted at 40°C ± 2°C / 75 ± 5% RH for 6 months

		Batches: (AH-8-41169, AH-8-41168, AH-3-08249, AH-3-08247) And at 30°C ± 2°C / 65 ± 5% RH for 72 months Batches: (AH-5-18252, AH-5-18253, AH-5-18254)
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	20ml Amber colour Type-I Glass vial with grey bromo butyl rubber stopper with aluminium
	Stability study data of drug product, shelf life and storage conditions	

Remarks of Evaluator: On COPP 5ml, 15ml and 45 ml mentioned.

S.No	Section	Shortcomings Communicated	Reply
1.	3.2.P.2.2.1	• Pharmaceutical equivalence of the applied drug of same strength/fill volume shall be established with same strength of the innovator / reference / comparator product and results of all the quality tests (mentioned in any official pharmacopoeia or section 3.2.P.5.1 of this application) of the developed formulation and the innovator / reference / comparator product shall be submitted and discussed. • Details and origin of Reference product against which Pharmaceutical Equivalence was established and.	We, Naprod Life Sciences Pvt Ltd hereby declare that Pharmaceutical Equivalenc of Carboplatin 150mg/15ml is same as Carboplatin Injection 450mg/45ml and the basic strength of product is 10mg/ml. the change is only in the fill volume, which is as follows. The fill volume for 150mg/15ml is 15.5ml ±0.1 ml The fill volume for 450mg/45ml is 45.5ml ±0.1 ml The product development was performed on higher strength & therefore are requested to consider the same.
2.	3.2.P.5.4	Specifications of applied filled volume as extractable volume of 45ml mentioned.	Revised specifications submitted.
3.	3.2.P.5.4	Certificate of analysis of applied fill volume is required.	Certificate of analysis of applied fill volume is submitted.
4.	3.2.P.8	Submit stability studies of applied fill volume.	We, Naprod life sciences Pvt. Ltd, hereby declare that the carboplatin injection 150mg/15ml & carboplatin injection 450mg/45ml, the bulk solution is of uniform concentration where in each ml contains 10mg of active ingredient, i.e. 10mg/ml.

			The change is only in the fill volume, which is as follows: The fill volume for 150mg/15ml is 15.5ml± 0.1ml The fill volume for 450mg/45ml is 45.5ml ± 0.1ml The stability studies are performed on higher strength, only filled volume is different.

Registration Board was apprised regarding an e. mail received to Director PE&R Division from M/s Miles International India (authorized exclusive representative for the export of products manufactured by Naprod Life Sciences for the Pakistan region), wherein firm has requested to not consider any product registration applications made by any other party other than LDS as they will not be able to supply these products in the future.

Previous Decision (M-324): Deferred for submission of following:

- Stability studies (both accelerated and long term) as per Zone IVa conditions for the applied strength and fill volume.
- Pharmaceutical equivalence studies against the innovator/reference product of relevant strength and fill volume as applied.
- Afresh notarized "Sole Agency Agreement" between M/s Lab Diagnostic System & M/s Naprod Life Sciences Pvt. Ltd before issuance of registration letter

Evaluation by PEC:

S.No	Reason of deferment	Reply
1.	Stability studies (both accelerated and long term) as per Zone IVa conditions for the applied strength and fill volume.	Firm has submitted stability study data of 3 batches. Accelerated stability studies have been conducted at 40°C±2°C and 75%±5% RH for 6 months. Real time stability studies conducted at 30°C±2°C and 75% ± 5% for 24months. Batches: NN3046, NN4146, NN1082
2.	Pharmaceutical equivalence studies against the innovator/reference product of relevant strength and fill volume as applied.	Pharmaceutical Equivalence have been established against Platamine 10mg/ml (Carboplatin Injection) manufactured by Pfizer Laboratories with 10mg/ml of Carbolatin Injection of Naprod Life Sciences by performing quality tests (Description, pH, Particulate matter Assay, Related substances ,).
3.	Afresh notarized "Sole Agency Agreement" between M/s Lab Diagnostic System & M/s Naprod Life Sciences Pvt. Ltd before issuance of registration letter	Firm has submitted notarized "Sole Agency Agreement" or letter of authorization certificate from NAPROD LIFE SCIENCES PVT. LTD. (304, Town Center-1 Andheri Kurla Road, Andheri , Mumbai appoint, M/s Lab Diagnostic Systems (SMC) Pvt Ltd and M/s Miles International to register their product (Carboplatin Injection 150mg/15ml) in Pakistan . Issued on : 13-03-2023

Decision: Approved with BP specifications as per Policy for inspection of Manufacturer abroad.

	The proposed proprietary name / brand name	DOWPENEM INJECTION 2g IV
	Strength / concentration of drug of Active	**Each vial contains:**

	Pharmaceutical ingredient (API) per unit	Meropenem trihydrate 2280mg equivalent to Meropenem…….2000mg (with sodium carbonate)
	Pharmaceutical form of applied drug	Powder for Solution for Infusion
	Pharmacotherapeutic Group of (API)	Carbapenem Antibiotic
	Reference to Finished product specifications	As per Innovator
	Proposed Pack size	1's
	Proposed unit price	As per DPC
	The status in reference regulatory authorities	Meropenem 2g Powder for Solution for Infusion of VILLERTON INVEST S.A of (MHRA Approved).
	For generic drugs (me-too status)	
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Name, address of drug substance manufacturer	ACS DOBFAR SpA 2: Addetta Site, Viale Addetta, 2a/12-3/5 20067 Tribiano, Milano - Italy
	Module-III Drug Substance:	Firm has submitted detailed drug substance data for both sources related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of API. Stability study conditions: Real time: 25oC ± 2oC and 60% RH for 24 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Accelerated Batches: (330772 023 0, 330772 025 0, 330772 027 0) Real time Batches: (330772 8001 8, 330772 8001 0, 330772 8038 1)
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation report, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.

	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted Pharmaceutical Equivalence against the product MEROPENEM DR. EBERTH 2g by Dr. Friedrich Eberth Arzneimittel GmbH, Am Bahnhof 2, 92289 Ursensollen, Germany Batch no # 22E340
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	Colourless glass Vial type III sealed with rubber stopper and aluminium cap with Plastic flip-off seal
	Stability study data of drug product, shelf life and storage conditions	Accelerated stability studies have been conducted at 40ºC ±2ºC / 75%±5% RH for 06 months. Real time stability studies conducted at 30 ºC±2ºC / 65% ± 5% RH for three batch for 24 months Batches of stability studies : [20A293 (20B158), 20A303 (20B159), 20A304 (20B160)]

Evaluation by PEC: Fee submitted on DML

S.No	Shortcomings communicated	Reply
1.	Product is available in USP pharmacopeia while applied formulation is claimed in house specifications.	Kindly refer to attachment herewith, where you may find the comparison between the specifications mentioned in the USP monograph and the specifications set by Anfarm, both at release and during shelf life. It should be noted that based on the comparison, it is evident that: - The limit for Assay set by Anfarm is stricter to the one set by USP. - The limit for Impurities set by Anfarm is in accordance to USP monograph at shelf life and stricter at the release. - The limits for Bacterial endotoxins, Loss on drying, pH, Sterility test, Particulate contamination, and Uniformity of dosage units set by Anfarm are in accordance to the USP monograph. Anfarm Hellas S.A has set extra specifications for the finished product which include “Time of reconstitution” and “Container / closure integrity’’ which shows that the overall specifications of Anfarm are stringent than U Kindly refer to attachment herewith, where you may find the comparison between the specifications mentioned in the USP monograph and the specifications set by Anfarm, both at release and during shelf life. It should be noted that based on the comparison, it is evident that: - The limit for Assay set by Anfarm is stricter to the one set by USP. - The limit for Impurities set by Anfarm is in accordance to USP monograph at shelf life and stricter at the release. - The limits for Bacterial endotoxins, Loss on drying, pH, Sterility test, Particulate contamination, and Uniformity of dosage units set by Anfarm are in accordance to the USP monograph. Anfarm Hellas S.A has set extra specifications for the finished product which include "Time of reconstitution" and "Container / closure integrity'' which shows that the overall specifications of Anfarm are stringent than USP.
Firm claimed that in-house specifications are more stringent than USP specifications.

Controls	**USP monograph of Meropenem Injection**	**Anafarm's Release specification**
Assay	90%-120%	95%-105%
Content of sodium	80%-120%	…
Sodium carbonate content	….	14.7%-16.1%
Bacterial Endotoxin	NMT 0.12 EU/mg	NMT 0.12 EU/mg

		Loss on Drying	9.0%-12.0%	9.0%-12.0%
		pH	7.3-8.3	7.3-8.3
		Sterility test	Sterile	Sterile
		Particulate contaminants	Meets the requirements for SVP injections	Meets the requirements for SVP injections
		Uniformity of dosage unit	Meets the requirement	Meets the requirement
2.	Justification of not performing test of Sodium content test by M/s Anfarm as recommended by USP monograph.	Kindly note that Anfarm Hellas S.A. has performed test for Sodium Carbonate Content, instead of Sodium Content. However, the following should be taken into account: As per the finished product composition, the % content of sodium carbonate is calculated to be equal to 15.4%; i.e. equal to 6.7% (w/w) sodium. ➢ USP limit of Sodium content = 80-120%; i.e. 80-120% of 6.7% sodium = (5.3-8.0%) w/w ➢ Anfarm's Limit of 14.7-16.1% of Sodium carbonate corresponds to sodium (6.4-7.0%) w/w. Thus, Anfarm's limit of sodium content is 6.4-7.0%, which is stricter to USP limit 5.3-8.0%.	
3.	Submit Analytical method verification studies of drug substance performed by M/s Anfarm.	The analytical methods for Assay, Related substances, Sodium carbonate content, Sterility and Bacterial Endotoxins have been validated, confirming their suitability for its intended purpose. The validation studies were performed at the manufacturing site of Anfarm Hellas. Also, please note that the validation studies are the same for the Drug Substance (Meropenem Sterile Bulk) and the Final Product (Meropenem Sterile Vials), as the limit is the same and the final product is the active substance (Meropenem Sterile Bulk) filled in vials.		
4.	Details of Diluent is not submitted.	According to MERREM FDA approved label, the concentration of solution for IV infusion ranges from 1mg/ml to 20mg/ml and there is limited safety data available to support use of a 40mg/kg (maximum of 2g) **bolus dose.** Therefore, for 2g Meropenem, at least 100ml of solution for IV infusion (0.9% NS or 5% Dextrose) should be used and drug should be administered by IV infusion over a period of 15-30 minutes. The Summary of Product Characteristics of MHRA Approved product Meropenem 2g powder for solution for infusion (Attached herewith) also claims that "***There is limited safety data available to support the administration of a 2g dose in adults as an intravenous bolus injection."*** Considering that Meropenem Injection 2g is not recommended to be given as bolus dose, hence it can only be administered in In-Patient/Hospital Setups. So, the diluent is not required to be provided along with the product.		

5.	Submit details and origin of product against which Pharmaceutical equivalence have been established.	The Pharmaceutical equivalence have been established against the Reference Product **MEROPENEM DR. EBERTH 2g** by **Dr. Friedrich Eberth Arzneimittel GmbH, Am Bahnhof 2, 92289 Ursensollen, Germany** (Approved by Federal Institute for Drugs and Medical Devices, Germany).

Previous Decision (M-324): Registration Board deferred the application for further deliberation regarding pharmaceutical and clinical features of the innovator product approved by the reference regulatory authorities adopted by Registration Board in its 275th meeting along with clarification of "Manufacturing Authorization in country of origin i.e., Greece" for Export only purpose.

Evaluation:

S.No	Reason o deferment	Reply
1.	Pharmaceutical and clinical features of the innovator product approved by the reference regulatory authorities adopted by Registration Board in its 275th meeting.	The innovator product available on FDA is Merrem by Pfizer holding NDA no. 050706. This NDA has been approved on the basis of extensive clinical and non-clinical studies conducted by the MA holder. These studies revealed that Meropenem is indicated in the following conditions: • Complicated skin and skin structure infections (adult patients and pediatric patients 3 months of age and older only). • Complicated intra-abdominal infections (adult and pediatric patients). • Bacterial meningitis (pediatric patients 3 months of age and older only). Moreover, the data of Merrem available on FDA also proposes a dosing schedule for pediatric patients 3 months of age and older with Normal renal functions, which shows that Meropenem is recommended for Meningitis up to 2g every 8 hours, which reflects the safety and efficacy of Meropenem in 2g doses. The complete label of Merrem approved by FDA is also attached as Annexure 1.1 for your reference

Recommended MERREM IV Dosage Schedule for Pediatric Patients 3 Months of Age and Older with Normal Renal Function (2.3)

Type of Infection	Dose (mg/kg)	Up to a Maximum Dose	Dosing Interval
Complicated skin and skin structure*	10	500 mg	Every 8 hours
Intra-abdominal	20	1 gram	Every 8 hours
Meningitis	40	2 gram	Every 8 hours

- Intravenous infusion is to be given over approximately 15 minutes to 30 minutes.
- Intravenous bolus injection (5 mL to 20 mL) is to be given over approximately 3 minutes-5 minutes.
- There is no experience in pediatric patients with renal impairment.

*20 mg/kg (or 1 gram for pediatric patients weighing over 50 kg) every 8 hours is recommended when treating complicated skin and skin structure

The above-mentioned data establishes the clinical features of the innovator product which show that Meropenem molecule is safe and efficacious when given in doses of 2g.

Based on the above, following 8 reference products are available from the reference regulatory authorities adopted by Registration Board in its 275th meeting held on 25-27th October, 2017 as the evidence of approval / registration / marketing status of the applied formulation in the same composition, salt form and dosage form

Evaluation by PEC: Fee submitted on DML

Sr.no.	Obseravtions/Shortcoming	Reply of the Firm
1.	Letter of Authorization by ANFARM HELLAS S.A does not mentioned that label vials will be imported.	Firm replied that the letter for Authorization provided in the submitted dossier states that Martin Dow Limited has expreseed its willingness to import the products Dowpenem Injection 500mg &1g in full compliance with the relevant local and international guidelines and cGMP standards which actually corresponds to the labelled vials. We, hereby clarify that we are importing the product in the form of labelled vials and final packaging along with diluents will be done by Global Pharmaceuticals.
2.	Product is available in USP pharmacopeia while applied formulation is claimed in house specifications. Clarify. Firm claimed that in-house specifications are more stringent than USP specifications.	

Controls	**USP monograph of Meropenem Injection**	**Anafarm's Release specification**
Assay	90%-120%	95%-105%
Content of sodium	80%-120%	…
Sodium carbonate content	….	14.7%-16.1%
Bacterial Endotoxin	NMT 0.12 EU/mg	NMT 0.12 EU/mg
Loss on Drying	9.0%-12.0%	9.0%-12.0%
pH	7.3-8.3	7.3-8.3
Sterility test	Sterile	Sterile
Particulate contaminants	Meets the requirements for SVP injections	Meets the requirements for SVP injections
Uniformity of dosage unit	Meets the requirement	Meets the requirement

Further firm stated that Anafarm do not test sodium content ,however the percentage of sodium carbonate is calculated to be equal to 15.4% i.e. equal to 6.7% (w/w) sodium, so the limits are between 6.7-7.0%.

3.	Certificate of analysis by both drug substance manufacturer and drug product manufacturer not submitted.	Firm submitted a declaration letter from ANFARM HELLAS S.A in which it is stated that we,Anafarm S.A. receives Meropenem sterile bulk and not the API Meropenem trihydrate.Thus no analysis on the API is performed and thus no method verification is performed.
4.	Manufacturing process does not show blending of Sodium carbonate with meropenem trihydrate neither by API manufacturer nor by ANFARM HELLAS S.A	Firm submitted the reply in which it is stated that the mixing of the excipient Sodium carbonate lyophilized sterile with the API meropenem trihydrate sterile is considered as the first step of the manufacturing process of the sterile bulk.

5.	Data of compatibility studies has been submitted with ANFARM HELLAS S.A diluent while in this case diluent will be locally purchased and no compatibility studies conducted. Justify.	Firm submit commitment that they perform compatibility studies of the product with the locally purchased diluent before marketing of the product.
6.	Stability studies provided by drug product manufacturer ANFARM HELLAS S.A while product will be imported as labelled vials and final packaging will be done by Global Pharmaceuticals. Justify.	Firm submit commitment that stability studies for the final product packaged by Global Pharmaceuticals will be performed for the first three consecutive batches of commercial scale.
7.	Please specify final quality control release site.	Firm claimed that final quality release site will be Global Pharmaceuticals and the finished product specification are according to USP.
8.	Steps of packaging not mentioned performed in the global pharmaceuticals.	Submitted

Previous Decision (M-322): Deferred for following:

- Justification of not performing test of Sodium content test by M/s Anfarm as recommended by USP monograph.
- Analytical method verification studies of drug substance performed by M/s Anfarm.
- Details regarding Packaging, Quality control analysis and batch release activities to be conducted by M/s Global pharmaceuticals**.**

S.No	Reason of deferment	Reply
1.	Justification of not performing test of Sodium content test by M/s Anfarm as recommended by USP monograph.	Kindly refer to table attached herewith, where you may find the comparison between the specifications mentioned in the USP monograph and the specifications set by Anfarm, both at release and during shelf life. Based on the provided table, please take into account the following: Anfarm has performed test for Sodium Carbonate Content instead of Sodium Content for which equivalency is provided below: As per the finished product composition, the % content of sodium carbonate is calculated to be equal to 15.4% i.e., equal to 6.7% (w/w) sodium. • USP limit of Sodium Content = 80-120%; i.e., 80-120% of 6.7% sodium = (5.3-8.0%) w/w. • Anfarm's Limit of 14.7-16.1% of Sodium carbonate corresponds to sodium (6.4-7.0%) w/w. Thus, Anfarm's limit of sodium content is **6.4-7.0%** which is stringent than USP limit **5.3-8.0%.**
2.	Analytical method verification studies of drug substance performed by M/s Anfarm	The analytical methods for Assay, Related substances, Sodium carbonate content, Sterility and Bacterial Endotoxins have been validated, confirming their suitability for its intended purpose. The validation studies were performed at the manufacturing site of Anfarm Hellas. Also, please note that the validation studies are the same for the Drug Substance (Meropenem Sterile Bulk) and the Final Product (Meropenem Sterile Vials), as the limit

		is the same and the final product is the active substance (Meropenem Sterile Bulk) filled in vials. For reference, Analytical Method Validation is attached.
3.	Details regarding Packaging, Quality control analysis and batch release activities to be conducted by M/s Global pharmaceuticals.	Please note that Quality Control Analysis and Batch Release activities of products **Dowpenem Injection 500mg and 1g** will be conducted by **M/s Global Pharmaceuticals (Pvt.) Ltd.** on the basis of specifications given by the manufacturer "Anfarm Hellas" for which Undertaking from M/s Global Pharmaceuticals (Pvt.) Ltd. is attached herewith. Also please find attached herewith, the steps of packaging and handling performed by M/s Global Pharmaceuticals (Pvt.) Ltd.

Previous Decision (M-324): Deferred for following

- Submission of stability data including performance of test for "Sodium content" as recommended by USP monograph for applied formulation .
- Details of the manufacturing steps (including packaging and batch analysis) to be conducted at the site of M/s Global Pharmaceuticals (Pvt.) Ltd. Islamabad.

Evaluation

<table>
<tr><th>S. NO</th><th>Reason of deferment</th><th>Reply</th></tr>
<tr><td>1.</td><td>Submission of stability data including performance of test for "Sodium content" as recommended by USP monograph for applied formulation</td><td>we would like to inform the authority that the manufacturer has performed all the quality tests as per the in-house specifications which are more stringent than that of USP. The comparison of manufacturer's specifications with that of USP is given below:
<table>
<tr><th colspan="4">FINISHED PRODUCT SPECIFICATIONS</th></tr>
<tr><th>Controls</th><th>USP monograph Meropenem for Injection</th><th>Anfarm's Release specifications</th><th>Remarks</th></tr>
<tr><td>Assay</td><td>90%-120%</td><td>95.0% - 105.0%</td><td>The limit for Assay set by Anfarm is stricter to this set by USP.

More Stringent</td></tr>
<tr><td>Content of Sodium *</td><td>80%-120% of the labelled amount of sodium</td><td>-</td><td rowspan="2">*Anfarm tests Sodium Carbonate Content, not Sodium Content.
However please consider the following:
As per the finished product composition, the % content of sodium carbonate is calculated to be
equal to 15.4%; i.e. equal to 6.7% (w/w) sodium.

➢ USP limit of Sodium content =80-120%; i.e. 80-120% of 6.7% sodium = (5.3-8.0%) w/w
➢ Anfarm's Limit of 14.7-16.1% of Sodium carbonate corresponds to sodium (6.4-7.0%)
w/w.</td></tr>
<tr><td>Sodium carbonate Content *</td><td>-</td><td>14.7% - 16.1%</td></tr>
</table></td></tr>
</table>

						Thus, Anfarm's limit of sodium content is 6.4-7.0%, which is stricter to USP limit 5.3-8.0%. **More Stringent**
		Related substances:

		Container /	-	Tight after immers	**Additional test**	

		closure integrity		ion for 300 sec at 160mm Hg in 1% methyl ene blue		

In light of the above, it is evident that Anfarm's specifications are more stringent than USP specifications, and as per DRAP's notification No. F.3 -512020-l &V II (M-297) dated 26th July 2021, paragraph ii. ***"The manufacturers/ importers having stringent/ equivalent product specifications for all parameters than official pharmacopeial specifications, shall apply to registration board for its approval"***, we hereby request the authority to approve manufacturer's specifications for our applied products.

Moreover, we would like to add here that based on the stricter limits set by the products' manufacturer i.e., Anfarm, our products already comply with USP, however if the authority still requires us to submit the stability data with test of "Sodium content" as recommended by USP, then the manufacturer will first have to file a post-registration variation with their respective authority and wait for approval, which might take 3-6 months. After which, the manufacturer will have to produce new batches and charge on stability studies which might take further 3-6 months depending on their production plan and wait for completion of 2 years of stability data, resulting in an overall delay of approximately 2.5 to 3 years.

Considering the above-mentioned foreseeable delay and that our products already comply within USP specifications, kindly consider our products for approval on manufacturer's specifications

2.	Details of the manufacturing steps (including packaging and batch analysis) to be conducted at the site of M/s Global Pharmaceuticals (Pvt.) Ltd. Islamabad.	Details of manufacturing steps (including packaging and batch release) to be conducted at the site of M/s Global Pharmaceuticals (Pvt.) Ltd. Islamabad are attached.

Decision: Registertion Board deferred the case for following:

- **Submission of specification with sodium content test as recommended by USP.**
- **Submission of stability data including performance of test for "Sodium content" as recommended by USP monograph for applied formulation .**
- **Evidence of atomic absoption spectrophotometer.**

	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Name, address of drug substance manufacturer	ACS DOBFAR SpA 2: Addetta Site, Viale Addetta, 2a/12-3/5 20067 Tribiano, Milano - Italy
	Module-III Drug Substance:	Firm has submitted detailed drug substance data for both sources related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of API. Stability study conditions: Real time: 25oC ± 2oC and 60% RH for 24 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Accelerated Batches: (330772 023 0, 330772 025 0, 330772 027 0) Real time Batches: (330772 8001 8, 330772 8001 0, 330772 8038 1)
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation report, control of excipients, control of drug product, specifications, analytical procedures,

		validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted Pharmaceutical Equivalence against the innovator product Meronem 500mg by AstraZeneca Batch no # 14047 C. Firm submitted justification "The manufacturer of Meropenem injection 500mg and 1g ha performed the pharmaceutical Equivalence on the same Powder of Merpenem trihydrate that is filled in the vials of both 500mg and 1g. Hence, Pharmaceutical equivalence of one strength (500mg) with the Innovator brand shall be considered as as pharmaceutical equivalence of the other strength (1g) That is why the manufacturer has covered the same pharmaceutical equivalence under the heading of both strengths. Moreover, the parameters covering in pharmaceutical equivalence of Meropenm injection 500mg are general and can be used for bulk powder testing. Hence confirming the point of equivalence for meropenem injection"
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	Colourless glass Vial type III sealed with rubber stopper and aluminium cap with Plastic flip-off seal
	Stability study data of drug product, shelf life and storage conditions	Accelerated stability studies have been conducted at 40oC ±2oC / 75%±5% RH for 06 months. Real time stability studies conducted at 30 oC±2oC / 65% ± 5% RH for one batch for 36 months (317121) and two batches 24 months (31523, 31813) Batches of stability studies : (317121, 31523, 31813)

Evaluation by PEC: Fee submitted on DML

Sr.no.	Obseravtions/Shortcoming	Reply of the Firm
1.	Letter of Authorization by ANFARM HELLAS S.A does not mentioned that label vials will be imported.	Firm replied that the letter for Authorization provided in the submitted dossier states that Martin Dow Limited has expreseed its willingness to import the products Dowpenem Injection 500mg &1g in full compliance with the relevant local and international guidelines and cGMP standards which actually corresponds to the labelled vials. We, hereby clarify that we are importing the product in the form of labelled vials and final packaging along with diluents will be done by Global Pharmaceuticals.
2.	Product is available in USP pharmacopeia while applied formulation is claimed in house specifications. Clarify. Firm claimed that in-house specifications are more stringent than USP specifications.	

Controls	USP monograph of Meropenem Injection	Anafarm's Release specification
Assay	90%-120%	95%-105%
Content of sodium	80%-120%	…
Sodium carbonate content	….	14.7%-16.1%
Bacterial Endotoxin	NMT 0.12 EU/mg	NMT 0.12 EU/mg
Loss on Drying	9.0%-12.0%	9.0%-12.0%

	pH	7.3-8.3	7.3-8.3
	Sterility test	Sterile	Sterile
	Particulate contaminants	Meets the requirements for SVP injections	Meets the requirements for SVP injections
	Uniformity of dosage unit	Meets the requirement	Meets the requirement
	Further firm stated that Anafarm do not test sodium content ,however the percentage of sodium carbonate is calculated to be equal to 15.4% i.e. equal to 6.7% (w/w) sodium, so the limits are between 6.7-7.0%.		
3.	Certificate of analysis by both drug substance manufacturer and drug product manufacturer not submitted.	Firm submitted a declaration letter from ANFARM HELLAS S.A in which it is stated that we,Anafarm S.A. receives Meropenem sterile bulk and not the API Meropenem trihydrate.Thus no analysis on the API is performed and thus no method verification is performed.	
4.	Manufacturing process does not show blending of Sodium carbonate with meropenem trihydrate neither by API manufacturer nor by ANFARM HELLAS S.A	Firm submitted the reply in which it is stated that the mixing of the excipient Sodium carbonate lyophilized sterile with the API meropenem trihydrate sterile is considered as the first step of the manufacturing process of the sterile bulk.	
5.	Data of compatibility studies has been submitted with ANFARM HELLAS S.A diluent while in this case diluent will be locally purchased and no compatibility studies conducted. Justify.	Firm submit commitment that they perform compatibility studies of the product with the locally purchased diluent before marketing of the product.	
6.	Stability studies provided by drug product manufacturer ANFARM HELLAS S.A while product will be imported as labelled vials and final packaging will be done by Global Pharmaceuticals. Justify.	Firm submit commitment that stability studies for the final product packaged by Global Pharmaceuticals will be performed for the first three consecutive batches of commercial scale.	
7.	Please specify final quality control release site.	Firm claimed that final quality release site will be Global Pharmaceuticals and the finished product specification are according to USP.	
8.	Steps of packaging not mentioned performed in the global pharmaceuticals.	Submitted	

Previous Decision (M-322): Deferred for following:

- Justification of not performing test of Sodium content test by M/s Anfarm as recommended by USP monograph.
- Analytical method verification studies of drug substance performed by M/s Anfarm.
- Details regarding Packaging, Quality control analysis and batch release activities to be conducted by M/s Global pharmaceuticals**.**

S.No	Reason of deferment	Reply
1.	Justification of not performing test of Sodium content test by M/s Anfarm as recommended by USP monograph.	Kindly refer to table attached herewith, where you may find the comparison between the specifications mentioned in the USP monograph and the specifications set by Anfarm, both at release and during shelf life. Based on the provided table, please take into account the following: Anfarm has performed test for Sodium Carbonate Content instead of Sodium Content for which equivalency is provided below:

		As per the finished product composition, the % content of sodium carbonate is calculated to be equal to 15.4% i.e., equal to 6.7% (w/w) sodium. • USP limit of Sodium Content = 80-120%; i.e., 80-120% of 6.7% sodium = (5.3-8.0%) w/w. • Anfarm's Limit of 14.7-16.1% of Sodium carbonate corresponds to sodium (6.4-7.0%) w/w. Thus, Anfarm's limit of sodium content is **6.4-7.0%** which is stringent than USP limit **5.3-8.0%.**
2.	Analytical method verification studies of drug substance performed by M/s Anfarm	The analytical methods for Assay, Related substances, Sodium carbonate content, Sterility and Bacterial Endotoxins have been validated, confirming their suitability for its intended purpose. The validation studies were performed at the manufacturing site of Anfarm Hellas. Also, please note that the validation studies are the same for the Drug Substance (Meropenem Sterile Bulk) and the Final Product (Meropenem Sterile Vials), as the limit is the same and the final product is the active substance (Meropenem Sterile Bulk) filled in vials. For reference, Analytical Method Validation is attached.
3.	Details regarding Packaging, Quality control analysis and batch release activities to be conducted by M/s Global pharmaceuticals.	Please note that Quality Control Analysis and Batch Release activities of products **Dowpenem Injection 500mg and 1g** will be conducted by **M/s Global Pharmaceuticals (Pvt.) Ltd.** on the basis of specifications given by the manufacturer "Anfarm Hellas" for which Undertaking from M/s Global Pharmaceuticals (Pvt.) Ltd. is attached herewith. Also please find attached herewith, the steps of packaging and handling performed by M/s Global Pharmaceuticals (Pvt.) Ltd.

Decision: Deferred for the submission of stability data including performance of test for "Sodium content" as recommended by USP monograph for applied formuation .

Previous Decision (M-324): Deferred for following

- Submission of stability data including performance of test for "Sodium content" as recommended by USP monograph for applied formulation .
- Details of the manufacturing steps (including packaging and batch analysis) to be conducted at the site of M/s Global Pharmaceuticals (Pvt.) Ltd. Islamabad.

Evaluation

<table>
<tr><th>S. NO</th><th>Reason of deferment</th><th>Reply</th></tr>
<tr><td>3.</td><td>Submission of stability data including performance of test for "Sodium content" as recommended by USP monograph for applied formulation</td><td>we would like to inform the authority that the manufacturer has performed all the quality tests as per the in-house specifications which are more stringent than that of USP. The comparison of manufacturer's specifications with that of USP is given below:
<table>
<tr><th colspan="4">FINISHED PRODUCT SPECIFICATIONS</th></tr>
<tr><th>Controls</th><th>USP monograph Meropenem for Injection</th><th>Anfarm's Release specifications</th><th>Remarks</th></tr>
<tr><td>Assay</td><td>90%-120%</td><td>95.0% - 105.0%</td><td>The limit for Assay set by Anfarm is stricter to this set by USP.</td></tr>
</table>
</td></tr>
</table>

					More Stringent
		Content of Sodium*	80%-120% of the labelled amount of sodium	-	*Anfarm tests Sodium Carbonate Content, not Sodium Content. However please consider the following: As **per the finished product composition, the % content of sodium carbonate is calculated to be equal to 15.4%; i.e. equal to 6.7% (w/w) sodium.** **➢ USP limit of Sodium content =80-120%; i.e. 80-120% of 6.7% sodium = (5.3-8.0%) w/w** **➢ Anfarm's Limit of 14.7-16.1% of Sodium carbonate corresponds to sodium (6.4-7.0%) w/w.** **Thus, Anfarm's limit of sodium content is 6.4-7.0%, which is stricter to USP limit 5.3-8.0%.** **More Stringent**
		Sodium carbonate Content*	-	14.7% - 16.1%	
		Related substances :			
		- UK - 1	Meropenem Impurity I: NMT 0.8%	UK – 1 (USP Meropenem Impurity I): NMT 0.5%	**More Stringent**
		- UK - 2	Meropenem Impurity II: NMT 0.6%	UK – 2 (USP Meropenem Impurity II): NMT 0.5%	**More Stringent**
		- Single unspecified impurity	NMT 0.10%	NMT 0.10%	**Complied**
		- Total impurities	NMT 2.0%	NMT 1.3%	**More Stringent**
		Bacterial endotoxins	NMT 0.125 EU/mg	NMT 0.125 EU/mg	**Complied**
		Loss on drying	9.0% - 12.0%	9.0% - 12.0%	**Complied**
		pH	7.3 – 8.3	7.3 – 8.3	**Complied**
		Sterility test	Sterile	Sterile	**Complied**
		Particulate contamination	Meets the requirements for	Complies	**Complied**

			small volume injections		
		Uniformity of dosage units	Meets the requirements	Complies	**Complied**
		Time of reconstitution	-	NMT 2 min	**Additional test**
		Container / closure integrity	-	Tight after immersion for 300 sec at 160mmHg in 1% methylene blue	**Additional test**

In light of the above, it is evident that Anfarm's specifications are more stringent than USP specifications, and as per DRAP's notification No. F.3 - 512020-l &V II (M-297) dated 26th July 2021, paragraph ii. ***"The manufacturers/ importers having stringent/ equivalent product specifications for all parameters than official pharmacopeial specifications, shall apply to registration board for its approval"***, we hereby request the authority to approve manufacturer's specifications for our applied products.

Moreover, we would like to add here that based on the stricter limits set by the products' manufacturer i.e., Anfarm, our products already comply with USP, however if the authority still requires us to submit the stability data with test of "Sodium content" as recommended by USP, then the manufacturer will first have to file a post-registration variation with their respective authority and wait for approval, which might take 3-6 months. After which, the manufacturer will have to produce new batches and charge on stability studies which might take further 3-6 months depending on their production plan and wait for completion of 2 years of stability data, resulting in an overall delay of approximately 2.5 to 3 years.

Considering the above-mentioned foreseeable delay and that our products already comply within USP specifications, kindly consider our products for approval on manufacturer's specifications

4.	Details of the manufacturing steps (including packaging and batch analysis) to be conducted at the site of M/s Global Pharmaceuticals (Pvt.) Ltd. Islamabad.	Details of manufacturing steps (including packaging and batch release) to be conducted at the site of M/s Global Pharmaceuticals (Pvt.) Ltd. Islamabad are attached.

Decision: Registertion Board deferred the case for following:

- **Submission of specification with sodium content test as recommended by USP.**
- **Submission of stability data including performance of test for "Sodium content" as recommended by USP monograph for applied formulation.**
- **Evidence of atomic absoption spectrophotometer.**

Remarks of Evaluator:

S. No	Sections	Observations/Deficiencies/ Short-comings	Reply
1.	1.3.5.	Evidence of approval of relevant section from Licensing Authority is required as you have provided approval of master layout plan.	Firm has provided grant of additional/revised section Tablet (General) – Revised letter dated 30 Sep 2021.
2.	2.3.S.6	The container closure system mentions material of construction as food grade quality material ,clarification is required.	Firm has used food grade LDPE as primary packing material for drug substance.
3.	2.3.P.2.2.1	Provide Summary of the results of comparative dissolution profile.	The summary of CDP is of Carlep 400mg.
4.	2.3.P.3.2	Provide List of all components of the Drug Product to be used in the manufacturing process and their amounts per proposed commercial batch as	First trail batch of 1000 tablets were manufactured and parameters found unsatisfactory. In order to obtain best and optimized product formulation was designed with change in quantitative composition that is Trail 2 in which all physical and chemical parameters were found satisfactory.

		provided data is of Trial batch. Moreover, the batch size mentioned in this section is 1000 tablets and BMR mentions batch size of 1500 Tablets. The quantity of individual components per tablet mentioned in Trail batch formula is different than stability batch formula.	As per CTD guidelines three stability batch sizes 1500 Tablet as mentioned in BMR with same formulation were manufactured as that of passed trail 2.
5.	2.3.P.5.6	Provide justification of specifications for all the tests specified in section 2.3.P.5.1.	Justification for specification not provided only inhouse has been mentioned.
6.	2.3.R.1.2	Provide blank master production document / batch manufacturing record to be used during the commercial manufacturing of the applied product.	BMR has not been signed.
7.	3.2.S.4.4	A discussion and justification shall be provided for any incomplete analyses of the drug substance / API by Drug Product manufacturer like residual solvents.	**Firms Response** We follow suppliers COA for residual solvents.
8.	3.2.P.3.3	The maximum holding time for bulk product prior to final packaging shall be stated.	Firm has submitted the SOP for withholding time.
9.	3.2.P.5.1	The innovator proposes two point dissolution according to chemistry review.	**Firms Response** We have set our specification single point in 15 minutes.
10.	3.2.P.5.2	Dissolution testing conducted by test 1 or test 2 of USP monograph by Drug product manufacturer.	**Firms Response** USP Type II Paddle apparatus are used.
11.	3.2.P.8.3	The formulation was previously applied on Form 5 D which was rejected in 289th meeting wherein 7kg API was imported vide invoice dated 27-04-2017 and 3kg vide invoice dated 24-02-2017 for manufacturing of trial batches of Carlep 200mg, 400mg and 800mg. Approximately, 6.4 kg was consumed in manufacturing of trial batches. Now, you have applied same formulation on Form 5 F wherein the submitted commercial invoice is same dated 27-04-2017. Please justify/clarify the quantity of API in manufacturing of	**Firms Response** **Provided at the end of 800mg strength.**

		current trial batches of **Carlep 200mg, 400mg and 800mg** applied on Form-5F.

"We request Evaluation cell to consider our product Carlep Tablet Range in Registration Board once we submit additional data of the product in support of already submitted data to registration board."
Evaluation by PEC
Since 30-12-2021 firm has not submitted any additional data in order to support already submitted data .The Registration Board may decide accordingly.

Previous Decision of 322nd meeting: Deferred for the reconciliation record of the quantity drug substance imported against the quantity required for the manufacturing of stability batches of each strength.

Firms Response:
Regarding Submission of additional data for below mentioned products, deferred in 322 DRB for the reconciliation record of the quantity drug substance imported against the quantity required for the manufacturing of stability batches of each strength, we would like to inform that we have imported new quantity of drug substance and fresh batches were manufactured, accordingly this data is submitted in DRAP for consideration. We hereby request to ignore previously submitted data and consider the recent one for your kind perusal.

	Proposed unit price	As per SRO
	The status in reference regulatory authorities	APTIOM tablets 200mg by Sunovion Pharmaceuticals Inc. USFDA Approved.
	For generic drugs (me-too status)	Not available
	GMP status of the Finished product manufacturer	**GMP inspection : 28/10/2019** Tablet (General & Psychotropic) section approved.
	Name and address of API manufacturer.	Ami Lifesciences Pvt. Limited Plot No. 8218, ECP channel Road At & post Karakhadi, Dist. Vadodara -391 450 State Gujarat, INDIA Phone: +9 | -2662-27 3 40 | I 27 33 12 Fax: * 9l-2662-273401
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubility's, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The firm as submitted detail of nomenclature, structure, general properties, solubility's, physical form, manufacturers, description of manufacturing process and controls, tests for impurity & related substances, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 72 months Batches: (ECA/50030515, ECA/50040515, ECA/50050515) Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (ECA/50020111, ECA/50030111 ECA/50040111)

		……..
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand leader that is Aptiom 200mg tablet by Sunovion Pharmaceuticals Inc.by performing quality tests (Appearance, Identification, DT ,Assay, Dissolution). CDP has been performed against the same brand that is Aptiom 200mg tablet by Sunovion Pharmaceuticals Inc in 0.1N HCL, Acetate buffer 4.5 and Buffer (pH 6.8). The values for f2 are in the acceptable range.
	Analytical method validation/verification of product	Method verification studies have submitted including linearity & Range, robustness, accuracy, precision, specificity.

STABILITY STUDY DATA

Manufacturer of API	Ami Lifesciences Pr,t. Limited Plot No. 8218, ECP channel Road At & post Karakhadi, Dist. Vadodara -391 450 State Gujarat, INDIA		
API Lot No.	ESA/30011221		
Description of Pack (Container closure system)	Alu-Alu blister packed in unit carton (10's, 20's & 30's)		
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 1,2,3,4 & 6 (months) Real Time: 0, 3, 6 (Months)		
Batch No.	22SB-208-01	22SB-209-02	22SB-210-03
Batch Size	1000 tab	1000 tab	1000 tab
Manufacturing Date	06-2022	06-2022	06-2022
Date of Initiation	21-06-2022	21-06-2022	21-06-2022
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	A Panel Inspection for the verification of authenticity of Stability Data of product on Form-5D "Wymly Tablet 25mg" for Tablet Section has been conducted on 06 April, 2018. Inspection Report included in the 281th DRB meeting held on 11-13th April, 2018.. The firm has 21CFR compliant system and adequate monitoring and control for stability chamber.

2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. 22043267 issued by FOOD AND DRUG CONTROL ADMINISTRATION valid till 17/04/2025.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	• Invoice No & Date: EXP/I/21-22/0880 dated 29/01/2022. • Batch No:ESA/30011221 • QTY=10KG
4.	Data of stability batches will be supported by attested respective documents like chromatograms,Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator:

Decision: Approved with innovator's specifications.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Agenda of Evaluator PEC-IX

370.	Name and address of manufacturer/ Applicant	M/s. Panacea Pharmaceuticals, Plot No. 4, Street No. S-6, National Industrial Zone, Rawat, Islamabad (DML No.000600) Section Approval not provided.
	Brand Name + Dosage Form + Strength	Lacosa Tablet 200mg
	Composition	Each film-coated tablet contains: Lacosamide……200mg
	Diary No. Date of R & I & fee	Dy. No. 13691 dated 07.03.2019. Fee paid Rs. 20,000/- vide Slip No. 1901273 dated 07-03-2019, endorsed on 07.03.2019.
	Pharmacological Group	N03AX18 Other antiepileptics
	Type of Form	Form-5
	Finished product Specification	**As per Innovator (found in BP, USP)**
	Pack size & Demanded Price	As per SRO.

	Approval status of product in Reference Regulatory Authorities	MHRA Approved
	Me-too status	Lacolep tablet by Hilton
	GMP status	Report of 2018 is submitted.
	Remarks of the Evaluator	• Latest GMP inspection report/ certificate is required. • Section Approval is required.
	Decision: Approved with USP specifications. The firm shall submit fee of Rs. 7,500/- for correction/pre-approval change in product specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021 along with latest GMP inspectrion report conuducted within last three years, before issuance of registration letter.	
371.	Name and address of manufacturer/ Applicant	M/s. Panacea Pharmaceuticals, Plot No. 4, Street No. S-6, National Industrial Zone, Rawat, Islamabad (DML No.000600) Section Approval not provided.
	Brand Name + Dosage Form + Strength	Dexole Capsule 30mg
	Composition	Each hard gelatin capsule contains: Dexlansoprazole (Dual Delayed Release Pellets) eq. to Dexlansoprazole……30mg
	Diary No. Date of R & I & fee	Dy. No. 13701 dated 07.03.2019. Fee paid Rs. 20,000/- vide Slip No. 1901284 dated 07-03-2019, endorsed on 07.03.2019.
	Pharmacological Group	A02BC06 Proton pump inhibitors
	Type of Form	Form-5
	Finished product Specification	**As per Innovator's**
	Pack size & Demanded Price	As per SRO.
	Approval status of product in Reference Regulatory Authorities	DEXILANT (dexlansoprazole) delayed-release capsules, for oral use Delayed-release capsules: 30 mg and 60 mg MHRA Approved.
	Me-too status	Daplazole DDR Capsule 30 mg Reg. No. 104251 M/s AGP Ltd. Karachi.
	GMP status	Report of 2018 is submitted.
	Remarks of the Evaluator	• Latest GMP inspection report/ certificate is required. • Section Approval is required. • Source of pellets is required to be defined along with submission of required fee. • Stability study data as per guidelines provided in 293rd meeting of Registration Board is required.
	Decision: Registration Board decided to reject the application since the firm has not submitted stability study data of 3 batches of the drug product before the lapse of deadline decided by DRAP Authority i.e. till 31st December 2022.	
372.	Name and address of manufacturer/ Applicant	M/s. Panacea Pharmaceuticals, Plot No. 4, Street No. S-6, National Industrial Zone, Rawat, Islamabad (DML No.000600) Section Approval not provided.
	Brand Name + Dosage Form + Strength	Dexole Capsule 60mg
	Composition	Each hard gelatin capsule contains: Dexlansoprazole (Dual Delayed Release Pellets) eq. to Dexlansoprazole……60mg
	Diary No. Date of R & I & fee	Dy. No. 13702 dated 07.03.2019. Fee paid Rs. 20,000/- vide Slip No. 1901285 dated 07-03-2019, endorsed on 07.03.2019.
	Pharmacological Group	A02BC06 Proton pump inhibitors
	Type of Form	Form-5
	Finished product Specification	**As per Innovator's**
	Pack size & Demanded Price	As per SRO.
	Approval status of product in Reference Regulatory Authorities	DEXILANT (dexlansoprazole) delayed-release capsules, for oral use

		Delayed-release capsules: 30 mg and 60 mg MHRA Approved.
	Me-too status	Remit DR Capsules 60 mg Reg. No. 090301 M/s Scotmann Pharmaceuticals Plot No. 5-D, Sector I-10/3 Islamabad.
	GMP status	Report of 2018 is submitted.
	Remarks of the Evaluator	• Latest GMP inspection report/ certificate is required. • Section Approval is required. • Source of pellets is required to be defined along with submission of required fee. • Stability study data as per guidelines provided in 293rd meeting of Registration Board is required.
	Decision: Registration Board decided to reject the application since the firm has not submitted stability study data of 3 batches of the drug product before the lapse of deadline decided by DRAP Authority i.e. till 31st December 2022.	
373.	Name and address of manufacturer/ Applicant	M/s. Panacea Pharmaceuticals, Plot No. 4, Street No. S-6, National Industrial Zone, Rawat, Islamabad (DML No.000600) Section Approval not provided.
	Brand Name + Dosage Form + Strength	Maven MR Capsule 200mg
	Composition	Each hard gelatin capsule contains: Mebeverine HCl (as Modified Release Pellets 50%w/w) eq. to Mebeverine HCl…….……200mg
	Diary No. Date of R & I & fee	Dy. No. 13697 dated 07.03.2019. Fee paid Rs. 20,000/- vide Slip No. 1901280 dated 07-03-2019, endorsed on 07.03.2019.
	Pharmacological Group	A03AA04 Synthetic anticholinergics, esters with tertiary amino group
	Type of Form	Form-5
	Finished product Specification	**As per Innovator's**
	Pack size & Demanded Price	As per SRO.
	Approval status of product in Reference Regulatory Authorities	Mebeverine 200 mg modified release capsules (mebeverine hydrochloride) - PL 35533/0095 MHRA Approved.
	Me-too status	Mebever MR 200mg Capsule Reg. No. 050747 M/s Getz Pharma Karachi.
	GMP status	Report of 2018 is submitted.
	Remarks of the Evaluator	• Latest GMP inspection report/ certificate is required. • Section Approval is required. • Source of pellets is required to be defined along with submission of required fee.
	Decision: Approved. Firm shall submit source of pellets along with COA, stability study data of 3 batches of pellets, GMP certificate of pellets manufacturer and differential fee (in case of imported pellets) and latest GMP inspection report conducted within last three years, before issuance of registration letter.	
374.	Name and address of manufacturer/ Applicant	M/s. Panacea Pharmaceuticals, Plot No. 4, Street No. S-6, National Industrial Zone, Rawat, Islamabad (DML No.000600) Section Approval not provided.
	Brand Name + Dosage Form + Strength	Clorisone Cream
	Composition	Each gram contains: Hydrocortisone Acetate eq. to Hydrocortisone…….……10mg Clotrimazole……..10mg
	Diary No. Date of R & I & fee	Dy. No. 13698 dated 07.03.2019. Fee paid Rs. 20,000/- vide Slip No. 1901281 dated 07-03-2019, endorsed on 07.03.2019.
	Pharmacological Group	Antifungal preparations with corticosteroids are classified in

		D01A
	Type of Form	Form-5
	Finished product Specification	**BP Specs**
	Pack size & Demanded Price	As per SRO.
	Approval status of product in Reference Regulatory Authorities	Canesten HC Cream of UK-MHRA
	Me-too status	Hydrozole Cream of GSK Health
	GMP status	Report of 2018 is submitted.
	Remarks of the Evaluator	• Latest GMP inspection report/ certificate is required.
	Decision: Approved. Firm shall submit latest GMP inspection report conducted within last three years before issuance of registration letter.	
375.	Name and address of manufacturer/ Applicant	M/s. Panacea Pharmaceuticals, Plot No. 4, Street No. S-6, National Industrial Zone, Rawat, Islamabad (DML No.000600) Section Approval not provided.
	Brand Name + Dosage Form + Strength	Tobrin-D Eye Drops
	Composition	Each ml ophthalmic suspension contains: Tobramycin……3mg Dexamethasone……..1mg
	Diary No. Date of R & I & fee	Dy. No. 13803 dated 07.03.2019. Fee paid Rs. 20,000/- vide Slip No. 1900296 dated 07-03-2019, endorsed on 07.03.2019.
	Pharmacological Group	D07CB04 Corticosteroids, moderately potent, combinations with antibiotics
	Type of Form	Form-5
	Finished product Specification	**USP Specs**
	Pack size & Demanded Price	As per SRO.
	Approval status of product in Reference Regulatory Authorities	TOBRAMYCIN + DEXAMETHASONE (3 MG/ML + 1 MG/ML) EYE DROPS, SUSPENSION - PL 31103/0010 MHRA Approved.
	Me-too status	Tobradex Suspension Reg. No. 017040 M/s Novartis Pharma Karachi.
	GMP status	Report of 2018 is submitted.
	Remarks of the Evaluator	• Latest GMP inspection report/ certificate is required.
	Decision: Approved. Firm shall submit latest GMP inspection report conducted within last three years before issuance of registration letter.	
376.	Name and address of manufacturer/ Applicant	M/s. Panacea Pharmaceuticals, Plot No. 4, Street No. S-6, National Industrial Zone, Rawat, Islamabad (DML No.000600) Section Approval not provided.
	Brand Name + Dosage Form + Strength	Flora Cream 13.9%
	Composition	Each gram contains: Eflornithine Hydrochloride Monohydrate eq. to. Eflornithine Hydrochloride……..139mg
	Diary No. Date of R & I & fee	Dy. No. 13699 dated 07.03.2019. Fee paid Rs. 20,000/- vide Slip No. 1900282 dated 07-03-2019, endorsed on 07.03.2019.
	Pharmacological Group	D11AX16 Other dermatologicals
	Type of Form	Form-5
	Finished product Specification	**In-house Specs**
	Pack size & Demanded Price	As per SRO.

	Remarks of Evaluator VI	Firm was asked why they did not perform terminal sterilization. Firm has revised the procedure and submitted that now they have performed terminal sterilization via autoclaving. But they did not submit fee for correction.
	Decision of RB in 316th Meeting: *Deferred for scientific rationale of performing terminal sterilization with reference to innovator product.*	
Remarks: The Firm has submitted that Terminal sterilization process is superior to filtration process as filtration is not a substitute for terminal sterilization. Product is heat stable this is the basis of performing terminal sterilization. Moreover, the firm has submitted fee challan of Rs. 7500/- for change in manufacturing method. In this context, it is submitted that the **Innovator does not perform terminal sterilization of its formulation**.		
Decision: Deferred for scientific justification of using Terminal sterilization with reference to Innovator product being heat labile.		
551.	Name and address of manufacturer / Applicant	M/s Welmed Pharmaceuticals Industries (Pvt) Ltd. Plot # 108, R-2, Industrial Estate Gadoon, Swabi
	Brand Name +Dosage Form + Strength	Onised 8mg Tablet
	Composition	Each Film Coated Tablet Contains: Ondansetron as HCl dihydrate…8mg

	Diary No. Date of R& I & fee	Dy. No.12357 dated 06.03.2019 Rs. 20,000/- dated 04.03.2019
	Pharmacological Group	Serotonin (5HT3) antagonists
	Type of Form	Form 5
	Finished Product Specification	The firm has claimed USP specifications.
	Pack size & Demanded Price	As per SRO
	Approval status of product in Reference Regulatory Authorities.	Ondansetron 8 mg Film-coated Tablets. **MHRA** approved
	Me-too status	Ondan Tablet film-coated 8mg. Reg No. 82657
	GMP status	Firm has submitted copy of inspection report dated 17-09-2020 which confirms fair level of compliance with GMP guidelines. The firm should rectify all observations mentioned in the report.
	Remarks of the Evaluator.	• The drug product specifications have not been evaluated.
		• Revised the pharmacological group from selective Serotonin (5HT3) receptor antagonists to Serotonin (5HT3) antagonists. • Already adjusted the weight of the API in master formulation. But did not revise Ondansetron as HCl dihydrate to Ondansetron HCl dihydrate in master formulation. • Submitted Rs. 7500/- fee, challan- 15513550
	Decision of 317th RB: *Deferred for:* • *Revision of Ondansetron as HCl dihydrate to Ondansetron HCl dihydrate in master formulation.* • *Updated satisfactory GMP inspection status from QA&LT Division.*	
Remarks of Evaluator: The firm has submitted revised master formulation indicating Ondansetron HCl dihydrate. The firm has also submitted copy of GMP inspection report dated 29-06-2022.		
Decision: Approved.		
552.	Name and address of manufacturer / Applicant	M/s Wahabsons Pharmaceuticals, 4km Buner Road, Barikot, Swat (DML No. 000533) Dry Powder Suspension (General) Section.

567.		Advanced-C Chewable Tablet 500mg Each tablet contains: Ascorbic Acid…500mg	Dy. No. 9578 dated 30/04/2020 Rs. 20,000/- 30-04-2020 Form 5	As per SRO	GMP status not confirmed. Reference formulation is chewable tablet while applied formulation is plain tablet.	*Deferred for submission of evidence of approval of applied formulation as "uncoated tablets" in reference regulatory authorities/agencies which were adopted by the Registration Board in its 275th meeting or else the formulation may be revised in accordance with reference product along with*

						submission of requisite fee. The Board also referred the case to QA & LT Division for updated status of GMP.

Remarks of Evaluator:

Now, the firm has submitted copy of DML renewal inspection dated 16-11-2022. The firm has not submitted evidence of availability of plain Vitamin C tablet in RRAs for product at sr. no. 566. Moreover, the firm has already indicated chewable word in brand name for product at sr. no. 567 but same is not indicated in composition and the firm has submitted that their composition is for chewable tablet.

Decision: Registration Board decided as follows:

- **Rejected product at sr. no. 566 as the formulation is not available in RRAs.**
- **Approved the product at sr. no. 567 with following label:**
  Each chewable tablet contains:

Ascorbic Acid…500mg

Registration letter shall be issued after submission of fee of Rs. 7500/- as per SRO 496(I)/2023 dated 17.04.2023. by the firm.

Agenda of Evaluator PEC-X

Case no. 01 Registration applications for local manufacturing of (veterinary) drugs

a. New cases

568.	Name and address of manufacturer / Applicant	M/s Vetz Pharmaceutical (Pvt) Ltd. Plot # Q-1, S.I.T.E, Kotri, Sindh

	GMP status	The firm was inspected on 31-5-2021 with the following conclusion: Based on the above observation their current GMP compliance level is rated as good.
	Remarks of the Evaluator [x]	• **Sterile Liquid Injection (Veterinary) Section** confirmed from panel inspection report conducted on 11-04-2015 for grant of DML.
	Decision: Approved. The firm shall submit fee of Rs. 7500/- for correction/pre-approval change in finished product specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021 before issuance of registration letter.	
581.	Name and address of manufacturer / Applicant	M/s Leads Pharma Pvt Ltd. 81-A, Street # 6, I-10/3, Islamabad
	Brand Name +Dosage Form + Strength	Oxy KP Injection
	Composition	Each ml contains: Oxytetracycline HCl…200mg **Ketoprofen**…30mg
	Diary No. Date of R& I & fee	Dy.No 2828 dated 25-01-2021 Rs.20,000/- dated 22-01-2021
	Pharmacological Group	Antibacterial/NSAID
	Type of Form	Form 5
	Finished product Specification	Manufacturer's specifications
	Pack size & Demanded Price	10ml, 20ml, 30ml, 50ml, 100ml; Decontrolled
	Me-too status	Oxyfen LA Injection **(10ml, 20ml, 30ml, 50ml, 100ml)** of M/s Selmore Pharmaceutical (Pvt) Ltd., Lahore. (Reg. No. 071091)
	GMP status	Panel unanimously recommends the grant of additional sections based on inspection dated 17-02-2022

	Remarks of the Evaluator [X]	Approval of **Liquid Injection Section (General-Veterinary)** confirmed vide panel inspection report dated 29-11-18 and 01-01-2019, for issuance of GMP certificate. **Shortcomings:** • The firm has applied for Oxytetracycline HCl…200mg and Ketoprofen…30mg, while the referred generic product contains **Each ml contains:-** **Oxytetracycline (as HCl) ….200mg** **Ketoprofen …….……..……..30mg** Submit evidence of approval of applied formulation in reference regulatory authorities/agencies which were declared/approved by the Registration Board; or revise formulation in line with reference product. • Separate registration is granted to separate pack size/fill volume of injectable dosage form. However, multiple pack sizes of injectable dosage form are demanded in a single application. So clarification is required for which pack size/ fill volume you want to apply this dossier. • Latest GMP inspection report conducted within the period of last three years.
	Decision: Referred to EWG on veterinary drugs to review therapeutic requirement keeping in view safety, efficacy and quality parameters.

	Decision: Approved with following label claim: **Each gram contains:** **Amprolium HCl…600mg**	

Case no. 03 Registration applications of categories to be considered on priority

b. Export facilitation (Veterinary)

Deputy Director PRV/EFD vide letter No.1-6/2019-PR-I (EFD) dated 28-02-2023 has informed that DRAP Authority in its 133rd meeting held on 13th April 2022, decided to grant registration on priority basis to the pharmaceutical i.e one molecule for each 100,000 USD worth of export of medicines (to a maximum of 15 such molecules) during a fiscal year. In compliance to the aforementioned decision, **M/s Star Laboratories Pvt Ltd., 23-km, Multan Road, Lahore** has submitted following applications for priority consideration/ evaluation in lieu of export facilitation, submitted before the Board for its consideration please:

808.	Name and address of manufacturer / Applicant	M/s Star Laboratories Pvt Ltd., 23-km, Multan Road, Lahore.
	Brand Name +Dosage Form + Strength	Pro-Up Sterile Solution for Injection
	Composition	Each ml contains: Progesterone…50mg
	Diary No. Date of R& I & fee	Dy.No 16355 dated 14-06-2021 Rs.30,000/- dated 08-06-2021
	Pharmacological Group	Steroid Hormone
	Type of Form	**Form 5D**
	Finished product Specification	USP specifications
	Pack size & Demanded Price	50ml: Decontrolled
	Me-too status	**Could not be confirmed**
	GMP status	cGMP certificate dated 20-07-2020 based on inspection dated 24-01-2020
	Remarks of the Evaluator [X]	**Shortcomings:** • Latest GMP inspection report (conducted within the period of last three years). • Approval of section/manufacturing facility by the Central Licensing Board. However, you may submit panel inspection report for renewal of DML verifying the section/manufacturing facility. • Evidence of approval of applied formulation in reference regulatory authorities/agencies which were declared/approved by the Registration Board. • Stability studies data as per requirement of the Registration Board
	Decision: Registration Board decided to reject the application since the firm has not submitted stability study data of 3 batches of the drug product before the lapse of deadline decided by DRAP Authority i.e. till 31st December 2022.	

b. Deputy Director PRV/EFD vide letter No.1-6/2019-PR-I (EFD) dated 28-02-2023 has informed that DRAP Authority in its 133rd meeting held on 13th April 2022, decided to grant registration on priority basis to the pharmaceutical i.e one molecule for each 100,000 USD worth of export of medicines (to a maximum of 15 such molecules) during a fiscal year. In compliance to the aforementioned decision, **M/s Selmore Pharmaceuticals Pvt Ltd., 36-Km, Multan Road Lahore** has achieved the benchmark of **134105.00 USD** during the fiscal Year **2019-2020** and **329260.00 USD** during the fiscal year **2020-2021.** Following applications submitted by the firm for priority consideration/ evaluation in lieu of export facilitation are submitted before the Board for its consideration please:

809.	Name and address of manufacturer / Applicant	M/s Selmore Pharmaceuticals Pvt Ltd., 36-Km, Multan Road Lahore.
	Brand Name +Dosage Form + Strength	Enersel Injection 50ml
	Composition	Each ml Contains: L-Arginine HCl...1.42mg

		L-Cysteine HCl...0.02mg Monosodium Glutamate...0.08mg L-Histidine HCl...0.02mg L-Isoleucine HCl...0.525mg L-Leucine.....0.6mg L-Lysine HCl...0.525mg DL-Methionine...0.525mg L-Threonine.....0.35mg L-Tryptophan...0.175mg L-Phenylalnine...0.35mg L-Valine.....0.525mg Thiamine HCl...0.1mg Riboflavin...0.05mg Pyridoxine HCl...0.1mg Nicotinamide.....3mg Dextrose...50mg Calcium Chloride...2mg Potassium Chloride...2mg Magnesium Sulphate...2mg Sodium Acetate...7.5mg D-Pantothenol...0.1mg
	Diary No. Date of R& I & fee	Dy.No 703 dated 09-01-2023 Rs.30,000/- dated 06-12-2022
	Pharmacological Group	Vitamins, amino acids & mineral supplements
	Type of Form	Form 5
	Finished product Specification	As per innovator's specifications
	Pack size & Demanded Price	50ml: Decontrolled
	Me-too status	**Could not be confirmed in the applied pack size**
	GMP status	cGMP certificate dated 27-02-2023 based on inspection dated 24-01-2023 & 25-01-2023
	Remarks of the Evaluator [X]	• **Liquid Injectable Vial-I General (Veterinary) and Liquid Injectable Vial-II General (Veterinary) section** confirmed vide panel inspection report for grant of additional sections based on inspection dated 14-03-2022. **Shortcomings:** • Evidence of applied formulation/drug already approved by DRAP (generic / me-too status) alongwith registration number, brand name and name of firm.
	Decision: Deferred for evidence of applied formulation/drug already approved by DRAP (generic / me-too status) alongwith registration number, brand name and name of firm. **The Board further decided that the applicant shall submit the response within 1 month after publication of the minutes, otherwise the application shall be placed in the upcoming meeting of the Board for final decision.**	

Case no. 04 Registration applications of import cases

a. New Cases (Veterinary)

810.	Name and address of Applicant	M/s Better Traders International, 23-Z, Saifullah Shaheed Road, Madina Town, Faisalabad, Pakistan

	Detail of certificates attached	➢ Original legalized Certificate of Pharmaceutical Product Certificate No. 000030 Issued on 23-05-2019, Certified by *Federal Agency for medicines and health products – famhp, Eurostation II, Victor Hortaplein 40/40, 1060 Brussels, Belgium*. The CoPP confirms free sale status of the product in exporting country ➢ Originally legalized copy of GMP certificate No. NL/V/17/0021 dated **05-10-2017** issued by the state Secretary of Economic Affairs, Head of the Veterinary Medicinal Products Unit, The Netherlands. ➢ Originally legalized sole agency certificate dated 26-09-2019 from PLH.
	Remarks of the Evaluator [X]	6 months accelerated and 24 months long term stability studies data has been submitted as per zone-IV-A conditions. **Shortcomings:** • The already submitted GMP is **expired now but valid upon submission,** Provide legalized valid original GMP certificate. • Choice of one pack size. • Submit label in accordance with The Drugs (Labeling and Packing) Rules, 1986.
	Decision of 326th Meeting: Deferred for submission of following • copy of valid DSL • original legalized valid GMP certificate • demanded pack size • Label in accordance with The Drugs (Labeling and Packing) Rules, 1986. **Updated status:** • The firm has provided copy of DSL (Form No.7) valid till **22-10-2024.**	

	• Originally legalized GMP certificate No. NL/V/20/0007 dated 06-05-2020 issued by the state The Minister of Agriculture, Nature and Food Quality, Head of the Veterinary Medicinal Products Unit, The Netherlands. • Demanded pack sizes: **250ml** • Proposed Product label **does not have" URDU "Inscription** as required under the drugs (labelling and packaging) rules.
	Decision: Approved with 250ml pack size. The firm shall submit label in accordance with The Drugs (Labeling and Packing) Rules, 1986 before issuance of registration letter.

Agenda of Evaluator PEC-XI

Case No. 01: Routine Registration application of Human Drugs on Form 5F (Local)

842.	Name, address of Applicant / Marketing Authorization Holder	M/s Axis Pharmaceuticals., 3-B Value Additional City, 1.5 Km Khurrianwala – Sahianwala Road, Faisalabad – Pakistan
	Name, address of Manufacturing site.	M/s Axis Pharmaceuticals., 3-B Value Additional City, 1.5 Km Khurrianwala – Sahianwala Road, Faisalabad – Pakistan
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the Finished product manufacturer	Firm has submitted cGMP certificate issued on 06-07-2020 based on inspection conducted on 09-06-2020.
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter No. F. 1-20/2006-Lic (Vol-II) dated 30-06-2020 which specifies Tablet section (General)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 3187, dated; 02.02.2022
	Details of fee submitted	PKR 30,000/-: 04-01-2022 (deposit slip # 014147644702)
	The proposed proprietary name / brand name	**Trubax 125mg tablet**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each tablet contains: Terbinafine (as HCl)……..125mg
	Pharmaceutical form of applied drug	Immediate Release Tablet
	Pharmacotherapeutic Group of (API)	Antifungals for systemic use
	Reference to Finished product specifications	USP specification
	Proposed Pack size	10’s
	Proposed unit price	As per SRO

	The status in reference regulatory authorities	LAMISIL terbinafine 125mg (as hydrochloride) tablet blister pack, TGA approved
	For generic drugs (me-too status)	Lamisil 125mg Tablet by M/s Novartis Pharma (Reg#13208)
	Name and address of API manufacturer	Shandong Boyuan Pharmaceutical Co., Ltd., Qiangjin Street, Jibei Economic Development Zone, Jinan City China
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, specifications, analytical procedures and its verification,, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module III (Drug Substance)	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40 º ± 2 º C /75% ± 5% RH for 6 months. The real time stability data is conducted at 30 ºC ± 2 º C / 65% ± 5% RH for 36 months. (Batch No. 150401TH, 150402TH & 150403TH)
	Module-III (Drug Product):	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of drug product, specifications, analytical procedures, validation / verification of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability study.
	Pharmaceutical equivalence and comparative dissolution profile	Firm has submitted results of pharmaceutical equivalence for their product against Lamisil tablet 125mg by M/s GSK OTC Pvt. Ltd (mfgr) / Novartis Pharma (MAH) by performing quality tests (Friability, Hardness test, moisture content, disintegration time, dissolution time, assay) CDP has been performed against the same brand that is Lamisil tablet 125mg by M/s GSK OTC Pvt. Ltd (mfgr) / Novartis Pharma (MAH), in Acid media (pH 1.2), acetate buffer (pH 4.5) & Phosphate Buffer (pH 6.8) and citrate buffer pH 3 (USP Medium). The values for f2 are in the acceptable range.

	Analytical method validation/verification of product	Firm has submitted method verification studies including specificity, accuracy, precision and system suitability	
STABILITY STUDY DATA			
Manufacturer of API	Shandong Boyuan Pharmaceutical Co., Ltd., Qiangjin Street, Jibei Economic Development Zone, Jinan City China		
API Lot No.	210105T		
Description of Pack (Container closure system)	Alu – PVC Blister		
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 3 months Accelerated: 3 months		
Frequency	Accelerated: 0, 3 (Months) Real Time: 0, 3, (Months)		
Batch No.	T-005	T-006	T-007
Batch Size	5000 tablets	5000 tablets	5000 tablets
Manufacturing Date	07 – 2021	07 – 2021	07 – 2021
Date of Initiation	03-08-2021	03-08-2021	03-08-2021
No. of Batches	03		
Administrative Portion			
7.	Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted	
8.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	The firm has submitted copy of GMP Certificate of M/s Shandong Boyuan Pharmaceutical Co., Ltd., Qiangjin Street, Jibei Economic Development Zone, Jinan City China issued by Shandong Food and Drug Administration valid upto 25-08-2021	
9.	Documents for the procurement of API with approval from DRAP (in case of import).	The firm has submitted copy of invoice No. BY210222 dated 22-02-2021 for import of 4.7Kg of Terbinafine HCl in name of M/s Axis Pharmaceuticals attested by AD (I&E) DRAP Lahore dated 25-02-2021.	
10.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted copy of data of stability batches supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	
11.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not submitted	
12.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not submitted	

Remarks of Evaluator [XI]:

Section	Observations	Response
1.3.1	Clarification is required as application is submitted by Axis Pharmaceuticals while name	The firm submitted that there was a Typographic error, which was later corrected. Correct copy of DML is submitted

	mentioned on DML is Axis Pharmaceuticals (Pvt) Ltd.	
1.6.5	• Valid GMP certificate / DML of drug substance manufacturer issued by relevant regulatory authority of country of origin is required	The firm has submitted copy of GMP Certificate of M/s Shandong Boyuan Pharmaceutical Co., Ltd., Qiangjin Street, Jibei Economic Development Zone, Jinan City China issued by Shandong Food and Drug Administration valid upto 27-05-2025 *However the submitted cGMP certificate could not be verified from NMPA website*
3.2.S.4	• Clarification is required as Drug substance manufacturer has claimed EP specification while drug product manufacturer has claimed BP • Clarification is required as drug substance manufacturer has claimed assay of drug substance by HPLC instead of titration as recommended by EP. • Drug substance manufacturer has set limit of assay as 98-102% instead of 99-101% as recommended by EP • The drug product manufacturer has performed assay by simple titration instead of potentiometric titration as recommended by BP. • Copies of the Drug substance analytical procedures used for routine testing of the Drug substance by Drug substance manufacturer is required.	• Both Ph.Eur. & BP specifications as well as analytical procedure are same. Moreover, a comparison is provided herewith.

Parameter	**Ph.Eur.**	**BP**	**USP**	**Results Axis**	**Mfgr.**
Appearance	White or almost white powder.	White or almost white powder.	White or almost white powder.	Complies	Complies
Solubility	Very slightly or slightly soluble in water. Freely soluble in ethanol & methanol. Slightly soluble in acetone.	Very slightly or slightly soluble in water. Freely soluble in ethanol & methanol. Slightly soluble in acetone.	Very slightly or slightly soluble in water. Freely soluble in ethanol & methanol. Slightly soluble in acetone.	Complies	Complies
Identification	IR	IR	IR	Complies	Complies
Loss on Drying	NMT 0.5%	NMT 0.5%	NMT 0.5%	0.1%	0.08%
Sulphated Ash	NMT 0.1%	NMT 0.1%	NMT 0.1%	0.05%	0.04%
Content	99.0 – 101.0 %	99.0 – 101.0 %	98.0 – 102.0 %	99.60 %	99.60 %

Copy of monographs & CoA by drug substance manufacturer and drug product manufacturer are submitted.

		• Specification & analytical procedure by drug substance manufacturer as provided in DMF is as per USP. However, the material provided by the DS manufacture also complies Ph.Eur./BP specification as well USP specifications. It is important to note that we have implemented **more stringent specification.** • Both the techniques follow similar principle & yield comparable/equivalent results as can be seen from the table below. **Parameter** / **Direct Titration** / **Potentiometric Titration** Assay / 99.60 % / 99.58 % Therefore, direct titration method was adopted using freshly prepared reagents, analytical method of drug substance was appropriately validated & complies acceptance criteria. • Copy of revised specification & analytical procedure is submitted.
3.2.P.1	• Justification is required for using colloidal silicon dioxide in formulation which is not used by innovator product	The firm submitted that it is compatible with Terbinafine and stated that the said ingredients are not novel & routinely used in tablet product development. Therefore, to harmonize both strengths of drug product the said ingredients were incorporated in formulation. Terbinafine tends to stick during compression therefore colloidal silicon dioxide was used as a glidant to facilitate powder flow.
3.2.P.2	• Justification is required for not performing uniformity of dosage units test in pharmaceutical equivalence as recommended by USP	The firm submitted that the quantity of Terbinafine is more than 25mg and greater than 25% in drug product. Therefore, uniformity of dosage unit was performed by weight variation as per USP <905> Uniformity of dosage unit.
3.2.P.5	• Justification is required as drug substance follow EP/BP specifications while drug product follows USP specifications • Justification is required for using different chromatographic conditions i.e. ratio of mobile phase, injection volume and column specifications in assay (Buffer pH3:ACN, 40;60), (20ul), (C8, (4.6x250mm), 5um) than that recommended by USP(ACN: Buffer, 2;3) (5ul) (3.9x15cm), 5um packing L7)	• The firm submitted that Drug substance complies Ph.Eur./BP specification and also USP specification but drug product complies USP specification based on stringent specification & analytical procedure which was appropriately verified. Moreover, drug substance specification will be aligned from next lot upon commercialization with drug product specification i.e. USP. • Analytical method was adopted form USP and it was verified as per actual practice. Moreover, the changes made were in accordance with USP <621> Chromatography and system suitability parameters were evaluated during method validation that complies the acceptance criteria.
3.2.P.6	• The firm has submitted COA of reference standard which follow EP specification and COA from drug product manufacturer which follow BP specification while finished	Drug substance complies Ph.Eur./BP specification as well as USP specification. Dug product complies USP specification based on stringent specification & analytical procedure which was appropriately verified. Moreover, drug substance specification will be aligned from next lot upon commercialization with drug product specification i.e. USP.

	product follow USP specifications, clarify	
3.2.P.8	• Submit 6th month time point stability data of the applied product • The applied product is tablet while in description of pack in stability summary sheet collapsible Alu-tube, packed in carton is written, clarify • Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) is required	• Firm has submitted stability data of applied product at 6th month time point • The firm submitted that there was Typographic error, tablets are packed in Alu-PVC blisters as can be seen from Stability Protocol and Stability Data • Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) is submitted

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

	Stability studies	Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 36 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 06 months Batches: (TH0131216, TH0141216, TH0151216,)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Firm has submitted results of pharmaceutical equivalence for their product against Lamisil tablet 125mg by M/s Novartis Pharma Pakistan by performing quality tests (Identification, uniformity of dosage units, dissolution time, assay) CDP has been performed against the same brand that is Lamisil tablet 125mg by M/s Novartis Pharma Pakistan in Acid media (pH 1.2), acetate buffer (pH 4.5), Phosphate Buffer (pH 6.8). The values for f2 are in the acceptable range.
	Analytical method validation/verification of product	Firm have submitted Method verification studies including accuracy, precision, specificity.
STABILITY STUDY DATA		
Manufacturer of API	M/s Saptagir Laboratories Pvt. Ltd., Sy.No. Parts of 27, 46 & 50 to 56, Ananthasagar (Vill), Chegunta (Mandal), Medak (Dist.), Telangana India.	

API Lot No.	TH0180421		
Description of Pack (Container closure system)	Alu-Alu blister packed in unit carton		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 3 months Accelerated: 3 months		
Frequency	Accelerated: 0, 3 (Months) Real Time: 0, 3 (Months)		
Batch No.	T004	T005	T006
Batch Size	500 tab	500 tab	500 tab
Manufacturing Date	08-2021	08-2021	08-2021
Date of Initiation	11-08-2021	11-08-2021	11-08-2021
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has referred to previous inspection for authenticity of stability data of their product by the panel on the basis of which Registration Board in 308th meeting dated 21-22nd June 2021 decided to approve registration of Dexcal (Dexlansoprazole) 30mg & 60mg capsule. Inspection date: 01st June, 2021 (Morning) The report shows that: • The HPLC software is 21 CFR compliant as per record available with the firm. • The firm showed the audit trail reports on API and product testing • Continuous power supply and monitoring are available for stability chambers
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	The firm has submitted copy of GMP certificate in name of M/s Saptagir Laboratories Pvt. Ltd., Sy.No. Parts of 27, 46 & 50 to 56, Ananthasagar (Vill), Chegunta (Mandal), Medak (Dist.), Telangana India issued by Drugs Control Administration Telangana State India valid upto 01-03-2022.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted commercial invoice No#2122/SL/032 dated 21/07/2021 in the name of M/s Caliph Pharmaceuticals for import of 1.00Kg Terbinafine HCL (Batch No#TH0180421) attested by AD (I&E) DRAP Peshawar on 08/07/2021.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Data of stability batches supported by attested respective documents like chromatograms, Raw data sheets, summary data sheets is submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) is submitted

Remarks of Evaluator [XI]:

Section	Observations	Response
1.3.4	• Submit valid DML as the submitted DML expires on 12-08-2022	The firm submitted that we have applied for renewal of DML on 10-08-2022 and our DML renewal is under process in Licensing Division. We are attaching copy of our application for renewal of DML**.**
1.6.5	• Valid GMP certificate / DML of drug substance manufacturer issued by relevant regulatory authority of country of origin is required	The firm has submitted copy of GMP certificate in name of M/s Saptagir Laboratories Pvt. Ltd., Sy.No. Parts of 27, 46 & 50 to 56, Ananthasagar Village, Chegunta Mandal, Medak (Dist.), Telangana state India issued by Drugs Control Administration Telangana State India valid upto one year from date of issue (date of issue; 21/02/2023).
2.3.R.1	• Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3>	Firm has submitted copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3>
3.2.P.1	• Justification is required for using sodium starch glycolate instead of Croscarmellose Sodium in formulation which is not used by referenced product	• The reference product containing terbinafine hydrochloride 125mg or 250mg in tablet dosage form approved in UK (MHRA) and Australia (TGA) also contains sodium starch glycolate as disintegrant. • Sodium starch glycolate as well as croscarmellose sodium both are used as tablet disintegrant. Handbook of pharmaceutical excipient defines that the incompatibility of croscarmellose sodium is strong acids or with soluble salts of iron and some other metals such as aluminum, mercury, and zinc. While the incompatibility of sodium starch glycolate is only ascorbic acid. Since sodium starch glycolate is incompatible with ascorbic acid only, which is not used in our formulation therefore our formulation is considered to be compatible. • The results of product development as well as stability studies also indicate that the formulation is compatible and stable. • The documents including product literature SmPC of MHRA and TGA as well as handbook of pharmaceutical excipient is submitted**.**
3.2.P.5	• Justify the specificity test in analytical method verification study without analyzing the standard solution	We have performed the evaluation of standard solution in method validation studies and its results were reported under in accuracy studies. As per ICH and other method validation guidelines, for assay of finished products like Tablets, specificity test is studied for blank/diluent, placebo, impurity and degradation product (forced degradation) to check whether the analytical method has the ability to quantify the analyte in the presence of these components.

		Since impurity testing and degradation products were not determined in the drug product therefore the specificity test was studied for following components: • Blank / Diluent • Placebo (to check interference of excipients) In this case the mobile phase and buffer solution was considered as blank / diluent as per the analytical method. Placebo included all excipients but without API. The acceptance criteria for both includes no interference from any of these components for the analysis of the analyte.
3.2.P.8	• Justify the batch size against the number of units required for complete stability study	Total batch size: 500 Tablets Total tablets yield: 490 Tablets Tablets placed in accelerated stability chamber: 90 Tablets placed in real-time stability study chamber: 220 Tablets used in product development studies: 60 Total tablets required till 24 months: 370 Remaining Tablets for performing any additional study: 120 Hence our batch size was sufficient to complete the stability studies of the product.
	• Submit UV spectra / absorbance of samples analysed in dissolution study during stability study. Furthermore, justify single absorbance value of sample and standard solution in dissolution studies.	As per our previous practice we have performed dissolution testing through USP method which includes UV analysis. Our UV spectroscopy equipment does not have connectivity with the computer and only gives results which are displayed on its built in screen. We have recorded all the UV values and noted in the raw data sheets developed in Excel software which are already shared in the original CTD. As per our previous practice we are performing dissolution test using a single UV reading of sample for each tablet. However, we will change our practice and will take 3 readings for sample and standard solution in future.
	• COA of all batches during the stability study at both real time and accelerated conditions at 3rd month time point is not submitted	For stability studies we are developing raw data sheets for each stability time point while COA is generated only at batch release. Our same practice has been accepted by the Drug Registration Board for our various CTD applications considered in previous meetings. We therefore request that as per previous practice our raw data sheets may be considered along with stability summary sheets since they also contain the similar information as well.
	• Submit 6th month time point stability study data of the applied product	Firm has submitted 6th month time point stability study data of the applied product

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**

• **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	N/A
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted Copy of GMP certificate in name of Biofer S.p.A. Legal headquarters and manufacturing site: Via Canina, 2 - 41036 MEDOLLA (MO), Italy issued by Italian Medicines Agency valid upto three years from the date of inspection (date of inspection 28/06/2019)
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not submitted
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted data of stability batches supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) for three months is submitted

THERAPEUTIC INDICATIONS

FERROSIG is indicated for the treatment of iron deficiency anaemia in the following circumstances:

- When oral therapy is contraindicated.
- When enteric absorption of iron is defective.
- When patient non-compliance or persistent gastrointestinal intolerance makes oral therapy impractical.

Remarks of Evaluator [XI]:

Section	Observations	Response
1.3.5	• GMP inspection report/ GMP certificate of the manufacturing unit issued within the last three years shall be submitted	• Firm has submitted copy of panel inspection report of the applicant for renewal of DML dated 08-02-2021 & 27-10-2021 wherein panel recommends the grant of renewal of DML by way of formulation to M/s Daneen Pharma (Pvt.) Ltd., 27-Sundar Industrial Estate, Sundar Raiwand RD Lahore • *GMP inspection report/ GMP certificate of the manufacturing unit is not submitted*
1.5.5	• Submit correct Pharmacological class of the drug substance with proper reference	• Parenteral iron preparations. Anti-anaemic
1.6.5	• Valid GMP certificate / DML of drug substance manufacturer issued by relevant regulatory authority of country of origin is required	The firm submitted clarification from AIFA Italy stating that due to restrictions caused by covid-19, the period of validity of the GMP certificate is automatically extended until the end of 2023. Onsite inspections will resume as soon as there

		is a consensus that the period of public health crisis has passed
3.2.S.4	• Copies of the Drug substance analytical procedures used for routine testing of the Drug substance by Drug substance manufacturer is required.	• Not submitted
3.2.S.5	• COA of primary / secondary reference standard including source and lot number shall be provided.	According to Biofer MOA no working standard are required for release analysis of the API Ferric Hydroxide Polymaltose Complex so, we cannot provide any CoA.
3.2.S.7	• Results of Assay test for iron is not submitted in stability study of drug substance, clarify	Firm submitted revised stability study data of drug substance wherein Assay test for iron has been performed. Stability study conditions: Real time: 30 ± 2°C / 65 ± 5% RH) for 60 months Accelerated: 40 ± 2°C / 75 ± 5% RH for 6 months Batches: (FPJ 001 FV 17, FPJ 005 FV 16, FPJ 006 FP 15)
3.2.P.1	• Justification is required for not using hydrochloric acid or sodium hydroxide for pH adjustment in formulation	• In development of Genfer Injection 100mg/2ml, the active substance (Ferric Hydroxide Polymaltose Complex Inj.Grade) is dissolved in water for injection and mix until homogenization of solution will be formed. Then Check the pH of the solution. pH limit = 5.2 – 6.50. • The pH of the solution observed in the range as described above therefore no need to the addition of HCl or NaOH for pH adjustment in the formulation. • The product kept on stability and no changes observed in pH of the formulation and any other physical and chemical parameters. • Stability studies also demonstrated that the formulation is stable without the addition of pH adjusting agents.
3.2.P.2	• Submit details of country of origin of reference product against which pharmaceutical equivalence studies have been performed. • Justification is required for not performing test for bacterial endotoxin and particulate matter in pharmaceutical equivalence as submitted in finished product specifications	• The firm submitted details of country of origin: UNI-PHARMA KLEON TSETIS Pharmaceutical Laboratory S.A 14Km National Road 1, GR-145 64K, Kifissia GREECE. • The firm submitted that we have also conducted pharmaceutical equivalence against Ferrosig 100mg/2ml injection by M/s Sigma Company Limited Rowville, VIC, 3176 Australia by performing quality test (Appearance, Identification, pH, Assay, BET, Particulate matter) • The firm has submitted revised pharmaceutical equivalence report wherein results of test for bacterial endotoxin and particulate matter has been submitted
3.2.P.5.2	• You have applied for innovator specifications in module 1 section 1.5.6 while in-house specification in this section, justify?	The firm submitted that this is typographic error and submitted revise specification stating innovator specifications

3.2.P.6 3.2.P.8	• COA of primary / secondary reference standard including source and lot number shall be provided. • You have written liraglutide on initial page of summary sheet while applied product is ferric hydroxide polymaltose complex, clarify? • Compliance Record of HPLC software 21CFR & audit trail reports on product testing is required • Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) upto 6th months is required • Submit documents for the procurement of API with approval from DRAP (in case of import). • Submit 6th month stability data of applied product	The firm submitted that we have conducted assay of Iron by complexometric titration, in this method working standard is not required. • The firm submitted that this is typographic error and submitted corrected summary reports. • Audit trial is not applicable as product testing is carried out via titration method • Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) is submitted • Firm has submitted copy of invoice for import of 01Kg of Ferric Hydroxide Polymaltose Complex (Batch No# FPJ014FV20) in name of M/s Genix Pharma (Pvt.) Ltd., attested by AD (I&E) DRAP Karachi dated 26-04-2021. • Firm has also submitted copy of form 6 for import of 01Kg of Ferric Hydroxide Polymaltose Complex in name of M/s Genix Pharma (Pvt.) Ltd., attested by AD (I&E) DRAP Karachi dated 26-04-2021. • 6th month stability data of applied product is submitted
Decision: Deferred for submission of following: • **Copies of the Drug substance analytical procedures used for routine testing of the Drug substance by Drug substance manufacturer.** • **GMP inspection report/ GMP certificate of the manufacturing unit issued within the last three years** • **Fee of Rs. 7,500/- for correction/pre-approval change in product specifications, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.**		

Case No. 02; Registration application of Human drugs on Form 5-F on export facilitation

Assistant director PR-I/EFD vide letter No.F.1-6/2019-PR-I (EFD) dated 28-02-2023 has informed that DRAP Authority in its 133rd meeting held on 13th April 2022, decided to grant registration on priority basis to the *pharmaceutical* i.e one molecule for each 100,000 USD worth of export of medicines (to a maximum of 15 such molecules) during a fiscal year. In compliance to the aforementioned decision of the authority, the following firm have achieved the benchmark of more than **100,000 USD** during the **fiscal Year 2020-2021** and submitted their applications for priority consideration in lieu of export facilitation for Registration Board please.,

847.	Name, address of Applicant / Marketing Authorization Holder	M/s Nabiqasim Industries (Pvt.) Ltd., 17 / 24, Korangi Industrial Area, Karachi – Pakistan.
	Name, address of Manufacturing site.	M/s Nabiqasim Industries (Pvt.) Ltd., 17 / 24, Korangi Industrial Area, Karachi – Pakistan.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the Finished product manufacturer	Firm has submitted copy of cGMP certificate issued on 28-05-2022 based on inspection conducted on 27-05-2022.
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter No. F. 2-20/85-Lic (Vol-V) dated 27-04-2020 which specifies Tablet (General) section

	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Form-5F Dy No. 603 dated 06/01/2023
	Details of fee submitted	PKR 30,000/-: dated 13/12/2022 (Deposit silp#2655263793)
	The proposed proprietary name / brand name	GLEMPA-M XR Tablet 5mg/1000mg
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film-coated tablet contains: Empagliflozin ……5mg Metformin HCl USP (extended release)…1000mg
	Pharmaceutical form of applied drug	Film coated tablet for oral use
	Pharmacotherapeutic Group of (API)	Type 2 Diabetes Mellitus, antidiabetic agent
	Reference to Finished product specifications	Innovator's Specifications
	Proposed Pack size	14's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	SYNJARDY XR Tablet (5mg/1000mg, 10mg/1000mg, 12.5mg/1000mg, 25mg/1000mg) USFDA Approved.
	For generic drugs (me-too status)	Xenglu-Met XR Tablet 5mg/1000mg by M/s Hilton Pharma, (Reg#105268)
	Name and address of API manufacturer.	**Empagliflozin:** Zhejiang Hongyuan Pharmaceuticals Co., Ltd., Chem & API's Industrial Zone, Linhai, Zhejiang Province, China. **Metformin Hydrochloride:** Aarti Drugs Limited., Plot No. 211-213, Road No. 2, G.I.D.C., Sarigam, Dist; Valsad Gujarat , India
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	**Empagliflozin:** The firm has submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance. **Metformin:**

		The firm as submitted details of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	**Empagliflozin:** Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 24 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: (Z1215-170601, Z1215-170602, Z1215-170603) **Metformin HCl:** Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 60 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: (MEF/1410027, MEF/1410028, MEF/1410029)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, specifications, analytical procedure and its validation studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Firm has submitted Pharmaceutical Equivalence studies against XENGLU-MET XR Tablet 5mg/1000mg by M/s Hilton Pharma, by performing quality tests (Description, Identification, Dissolution and Assay). CDP has been performed against the same brand that is XENGLU-MET XR Tablet 5mg/1000mg by M/s Hilton Pharma, in Acid media (0.1N) (pH 1.2), Acetate Buffer (4.5) & Phosphate Buffer (6.8). The values f2 are in the acceptable range.
	Analytical method validation/verification of product	Firm has submitted method validation studies including linearity, range, accuracy, precision, specificity, LOD, LOQ, system suitability, robustness and forced degradation studies.

STABILITY STUDY DATA	
Manufacturer of API	**Empagliflozin:** Zhejiang Hongyuan Pharmaceuticals Co., Ltd., Chem & API's Industrial Zone, Linhai, Zhejiang Province, China. **Metformin Hydrochloride:** Aarti Drugs Limited., Plot No. 211-213, Road No. 2, G.I.D.C., Sarigam, Dist; Valsad Gujarat , India
API Lot No.	**Empagliflozin:** EPG20211101 **Metformin HCl:** MEF/11113625
Description of Pack	Alu-Alu blister packed in unit carton.

(Container closure system)			
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 3 months Accelerated: 3 months		
Frequency	Accelerated: 0, 3 (Months) Real Time: 0, 3 (Months)		
Batch No.	583DS01	583DS02	
Batch Size	5000 tablets	5000 tablets	
Manufacturing Date	14-07-2022	15-07-2022	
Date of Initiation	05-08-2022	05-08-2022	
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	N/A
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Empagliflozin:** The firm has submitted copy of GMP certificate of M/s Zhejiang Hongyuan Pharmaceuticals Co., Ltd., Chem & API's Industrial Zone, Linhai, Zhejiang P.R. China issued by Linhai Medical and Chemical Industry Administration valid upto 29th December 2023. Firm has submitted copy of DML (Zhe20090508) in name of Zhejiang Hongyuan Pharmaceuticals Co., Ltd., Chem & API's Industrial Zone, Linhai, Zhejiang, China issued by Zhejiang Food and Drug Administration valid upto 13th January 2024 **Metformin HCl:** Firm has submitted Copy of GMP certificate in name of Aarti Drugs Limited (Unit-II)., Plot No. 211-213, Road No. 2, G.I.D.C., at & post Sarigam, Dist; Valsad, Gujarat state , India issued by Commissioner Food & Drugs control Administration, Gandhinagar India valid upto 19-03-2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	**Empagliflozin:** Firm has submitted copy of invoice for import of 30kg Empagliflozin attested by AD (I&E) DRAP Karachi office dated 24-12-2021 Firm has submitted copy of form 6 for import of Empagliflozin attested by AD (I&E) DRAP Karachi office dated 17-12-2021 **Metformin HCl:** Firm has submitted copy of invoice EXP/2810/21-22 Dated: 10-12-2021 for import of 3000kg Metformin HCL USP attested by AD (I&E) DRAP Karachi office dated 03-11-2022
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted data of stability batches supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.

5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator [XI]:

Section	Observations	Response
1.6.5	• Valid GMP certificate of drug substance manufacturer (empagliflozin & metformin) issued by relevant regulatory authority of country of origin is required • The address mentioned in submitted GMP certificate of M/s Zhejiang Hongyuan Pharmaceuticals Co., Ltd is different than that available on NMPA website, clarify	• The firm submitted that at the time of dossier submission previously submitted GMP certificate of Metformin HCl API, manufacturer: AARTI Drugs Limited was valid till 19-03-2023. *However, renewal application of GMP certificate dated 27-01-2023 received from manufacturer is submitted.* • Firm has not submitted copy of GMP certificate of drug substance manufacturer for empagliflozin issued by relevant regulatory authority of country of origin • The firm submitted that address mentioned on Manufacturing License is same as mentioned on NMPA website (Chem & API's Industrial Zone, Linhai, Zhejiang, China), whereas on NMPA website the complete and detailed address has been given, furthermore, the office name, city and province are exactly same on both credentials. However, the addresses are different. **Name and address mentioned on DML:** Zhejiang Hongyuan Pharmaceuticals Co., Ltd., Chem & API's Industrial Zone, Linhai, Zhejiang, China **Name and address mentioned on NMPA website:** Zhejiang Hongyuan Pharmaceutical Co., Ltd., No. 6, Donghai Fourth Avenue, Toumen Port Economic Development Zone, Zhejiang Province, Linhai City, Taizhou City. Later the firm has submitted a Notice of change from the drug substance manufacturer declaring that description of the company's address has been changed from "Chem & API's Industrial Zone, Linhai, Zhejiang, China" to "No. 6, Donghai Fourth Avenue, Zheijiang Toumengang Economic Development Zone, Linhai City, Taizhou, Zhejiang, P.R of China." The notice further states that location of manufacturing site has not been changed and remains same with before. The GMP certificate and DML of the drug substance manufacturer verified from the NMPA website reveals that the description of the address has been changed.
3.2.S.4	Drug substance specifications for Empagliflozin shall be submitted from drug substance, manufacturer.	Drug substance specifications for Empagliflozin from drug substance manufacturer is submitted

3.2.P.2	Justification shall be submitted for not performing Pharmaceutical equivalence and CDP studies against the innovator product.	The firm submitted that Reference to CTD guidance document pharmaceutical equivalence and CDP studies can be performed against reference / comparator samples
3.2.P.5	• Justification shall be submitted that how the "specificity" of the applied method has been inferred without the performance of "Peak Purity Test (e.g., using diode array detector) to establish that analyte chromatographic peak is not attributable to more than one component". • Submitted analytical method validation report declares the details for "Empagliflozin/Linagliptin/Metformin tablet.	• Specificity of the applied method was conducted on PDA detector to establish analyte peaks are not attributable. Chromatograms representing peak purity of Metformin and Empagliflozin are submitted • We acknowledge that previously submitted analytical method validation report is of "Empagliflozin/Metformin extended release tablet". • As mentioned by you that report declares the details of "Empagliflozin / Linagliptin / Metformin HCl". It is due to the typographical error, while compiling report, mention in system suitability parameter of Metformin HCl on pahe No. 15. Corrected method validation report is submitted.
3.2.P.6	COA of primary / secondary reference standard including source and lot number used for the analysis for trial batches shall be submitted shall be provided.	• COA of reference standards used in testing are submitted **Metformin Certified Reference Material** Source: Supelco LOT No: LRAC3162 **Empagliflozin** **Till 3rd month stability studies:** Source: Zhejiang Hongyuan Pharmaceutical Co., Ltd., China Batch No. EPG211202WS **For Onward Studies** Batch No. EPG220703WS
3.2.P.8	• The commercial invoice for Metformin HCl submitted by firm has been attested by AD I&E Karachi, dated 03-11-2022, whereas trial batches have been manufactured in July 2022. Justification shall be submitted for manufacturing of trial batches prior to the release of drug substance by AD I&E. • Stability studies data for 6th month time point shall be submitted.	• The firm has submitted copy of commercial invoice of Metformin HCl attested by AD *I&E mentioning comments that previously signed date by AD I&E (03-11-2022) was a writing error, Month is mentioned as November instead of January 2022.* • The firm has also submitted copy of goods declaration • Firm has submitted 6th month time point stability study data of applied product
2.3.R	• **Justification shall be submitted for dispensed quantity of Empagliflozin & alongwith 20% overage for formulation of trial batches alongwith the performance based evidence for the referred process loss.** The firm submitted that 20% excess quantity is taken to cover for process losses as mentioned below: 1. Coating process done in R&D having R&D solid dosage unity Dr. Pharm that is equipped with three interchangeable perforated coating pans that are suitable for coating 0.8kg-10kg tablets a. Process loss occurs during spray volume setting b. Process losses occur from exhaust as also the coating pan is perforated c. Process losses occur as some of the coating material stick to the coating pan during coating process d. Process losses occur as some of the coating material remains in the hoses and pipes of spray equipment and vessel after completion of coating process	

2. Due to above losses it is a general practice to include 20% excess at coating stage. Weight gain is monitored during the process and coating process is stopped when the desired weight gain is achieved

- **Justification shall be submitted for proceeding for the Seal coating upon the Metformin HCl core tablet without establishing the extended release dissolution profile of Metformin HCl core tablet at in process stage.**
- The firm submitted that we have manufactured trial batches of the Empagliflozin/Metformin HCl XR tablet range. Trial batch testing was conducted at each stage and results were found satisfactory.
- On the basis of above reason testing of stability batches were conducted on final product only.
- Justification letter is enclose in Annexure-I along with test results of trial batches of Empagliflozin/Metformin HCl XR Tablet range for dissolution profile of Metformin HCl.
- The firm submitted justification stating that dissolution testing on Metformin HCl core tablet was done on below mentioned trial batches before proceeding to seal coating stage.
  1. Empagliflozin/Metformin HCl XR Tablet 5mg/1000mg Tablet, Batch No.:583DT01, Batch Size: 1.420kg
  2. Empagliflozin/Metformin HCl XR Tablet 10mg/1000mg Tablet, Batch No.:584DT01, Batch Size: 1.420kg
  3. Empagliflozin/Metformin HCl XR Tablet 12.5mg/1000mg Tablet, Batch No.:585DT01, Batch Size: 1.420kg
  4. Empagliflozin/Metformin HCl XR Tablet 25mg/1000mg Tablet, Batch No.:586DT01, Batch Size: 1.420kg
- Based on the satisfactory dissolution testing results of Metformin HCl core tablets of above mentioned trial batches (report submitted) and the experience with our recently registered product Empagliflozin/Linagliptin/Metformin XR Tablet range 5mg/2.5mg/1000mg, 10mg / 5mg / 1000mg, 12.5mg / 2.5mg / 1000mg, 25mg / 5mg / 1000mg which also have the same formulation as of Metformin HCl core tablet as of Metformin HCl core tablet formulation in Empagliflozin Metformin XR Tablet Range.
- Therefore, stability batches of subjected product were proceeded to seal coating stage without dissolution testing on Metformin core tablet
- **Justification shall be submitted for proceeding for the final film coating step without establishing the content of Empagliflozin at in process stage of active coating.**
- Empagliflozin API content testing was done after API coating on trial batches of Empagliflozin/Metformin HCl XR tablets range.(Justification letter and results of content of Empagliflozin are enclose in Annexure-J)
- Satisfactory results of trial batches obtained give us confidence to test the stability batches directly on finished product.
- However we commit to conduct testing the product at each stage for QC release batches.
- The firm submitted justification stating Empagliflozin content testing on Empagliflozin coated Metformin HCl XR tablet was done on below mentioned trial batches before proceeding to final coating stage.
  1. Empagliflozin/Metformin HCl XR Tablet 5mg/1000mg Tablet, Batch No.:583DT01, Batch Size: 1.420kg
  2. Empagliflozin/Metformin HCl XR Tablet 10mg/1000mg Tablet, Batch No.:584DT01, Batch Size: 1.420kg
  3. Empagliflozin/Metformin HCl XR Tablet 12.5mg/1000mg Tablet, Batch No.:585DT01, Batch Size: 1.420kg
  4. Empagliflozin/Metformin HCl XR Tablet 25mg/1000mg Tablet, Batch No.:586DT01, Batch Size: 1.420kg
- Based on the satisfactory Empagliflozin content testing results of Empagliflozin coated Metformin HCl XR tablet of above mentioned trial batches (report submitted) and on the experience with our recently registered product Empagliflozin / Linagliptin / Metformin XR Tablet range 5mg/2.5mg/1000mg, 10mg / 5mg / 1000mg, 12.5mg / 2.5mg / 1000mg,

25mg / 5mg / 1000mg which also have the same formulation as of Empagliflozin coating formulation in Empagliflozin Metformin XR Tablet Range.

- Therefore, stability batches of subjected product were proceeded for final film coating step without establishing the content for Empagliflozin at in process stage of active coating.
- **Clarification shall be submitted for the test applied to confirm that desired content for Empagliflozin has been achieved via active coating since submitted trial batch manufacturing record does not include any in process testing.**
- The firm has submitted results of trial batches at coated stage showing that desired content for Empagliflozin has been achieved
- **Minimum handling capacity of the equipment used in the manufacturing of trial batches shall be submitted.**
- The firm stated the manufacturing process is done in state of Art Nabiqasim R&D facility having R&D Solid Dosage Unity Dr. Pharm which is an integrated system having below processing units and also submitted brochure.

1. High Shear Mixer, three interchangeable bowls below:
   a. Capacity; 1.0kg-2.0kg
   b. Capacity; 2.0kg-5.0kg
   c. Capacity; 5.0kg-10.0kg
2. Fluid Bed dryer
3. Dry Mill
4. Cone Blender, three interchangeable blenders below:
   a. Capacity; 1.0kg-2.0kg
   b. Capacity; 2.0kg-5.0kg
   c. Capacity; 5.0kg-10.0kg
5. Tablet Coating Pan, three interchangeable coating pans as below:
   a. Capacity; 1.0kg-2.0kg
   b. Capacity; 2.0kg-5.0kg
   c. Capacity; 5.0kg-10.0kg

Decision: Approved with innovator's specifications.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Firm has submitted copy of DML (Zhe20090508) in name of Zhejiang Hongyuan Pharmaceuticals Co., Ltd., Chem & API's Industrial Zone, Linhai, Zhejiang, China issued by Zhejiang Food and Drug Administration valid upto 13th January 2024 **Metformin HCl:** Firm has submitted Copy of GMP certificate in name of Aarti Drugs Limited (Unit-II)., Plot No. 211-213, Road No. 2, G.I.D.C., at & post Sarigam, Dist; Valsad, Gujarat state , India issued by Commissioner Food & Drugs control Administration, Gandhinagar India valid upto 19-03-2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	**Empagliflozin:** Firm has submitted copy of invoice for import of 30kg Empagliflozin attested by AD (I&E) DRAP Karachi office dated 24-12-2021 Firm has submitted copy of form 6 for import of Empagliflozin attested by AD (I&E) DRAP Karachi office dated 17-12-2021 **Metformin HCl:** Firm has submitted copy of invoice EXP/2810/21/22 Dated: 10-12-2021 for import of 3000kg Metformin HCL USP attested by AD (I&E) DRAP Karachi office dated 03-11-2022
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted data of stability batches supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of	Submitted

	stability chambers (real time and accelerated)	

Remarks of Evaluator [XI]:

Section	Observations	Response
1.6.5	• Valid GMP certificate of drug substance manufacturer (empagliflozin & metformin) issued by relevant regulatory authority of country of origin is required	• The firm submitted that at the time of dossier submission previously submitted GMP certificate of Metformin HCl API, manufacturer: AARTI Drugs Limited was valid till 19-03-2023. *However, renewal application of GMP certificate dated 27-01-2023 received from manufacturer is submitted.*
	• The address mentioned in submitted GMP certificate of M/s Zhejiang Hongyuan Pharmaceuticals Co., Ltd is different than that available on NMPA website, clarify	• Firm has not submitted copy of GMP certificate of drug substance manufacturer for empagliflozin issued by relevant regulatory authority of country of origin • The firm submitted that address mentioned on Manufacturing License is same as mentioned on NMPA website (Chem & API's Industrial Zone, Linhai, Zhejiang, China), whereas on NMPA website the complete and detailed address has been given, furthermore, the office name, city and province are exactly same on both credentials. However, the addresses are different. **Name and address mentioned on DML:** Zhejiang Hongyuan Pharmaceuticals Co., Ltd., Chem & API's Industrial Zone, Linhai, Zhejiang, China **Name and address mentioned on NMPA website:** Zhejiang Hongyuan Pharmaceutical Co., Ltd., No. 6, Donghai Fourth Avenue, Toumen Port Economic Development Zone, Zhejiang Province, Linhai City, Taizhou City. Later the firm has submitted a Notice of change from the drug substance manufacturer declaring that description of the company's address has been changed from "Chem & API's Industrial Zone, Linhai, Zhejiang, China" to "No. 6, Donghai Fourth Avenue, Zheijiang Toumengang Economic Development Zone, Linhai City, Taizhou, Zhejiang, P.R of China." The notice further states that location of manufacturing site has not been changed and remains same with before. The GMP certificate and DML of the drug substance manufacturer verified from the NMPA website reveals that the description of the address has been changed.
3.2.S.4	Drug substance specifications for Empagliflozin shall be submitted from drug substance, manufacturer.	Drug substance specifications for Empagliflozin from drug substance manufacturer is submitted
3.2.P.2	Justification shall be submitted for not performing Pharmaceutical equivalence and CDP studies against the innovator product.	The firm submitted that Reference to CTD guidance document pharmaceutical equivalence and CDP studies can be performed against reference / comparator samples
3.2.P.5	• Justification shall be submitted that how the "specificity" of the applied method has been inferred	• Specificity of the applied method was conducted on PDA detector to establish analyte peaks are not attributable. Chromatograms representing peak

	without the performance of "Peak Purity Test (e.g., using diode array detector) to establish that analyte chromatographic peak is not attributable to more than one component". • Submitted analytical method validation report declares the details for "Empagliflozin/Linagliptin/Metformin tablet.	purity of Metformin and Empagliflozin are submitted • We acknowledge that previously submitted analytical method validation report is of "Empagliflozin/Metformin extended release tablet". • As mentioned by you that report declares the details of "Empagliflozin / Linagliptin / Metformin HCl". It is due to the typographical error, while compiling report, mention in system suitability parameter of Metformin HCl on pahe No. 15. Corrected method validation report is submitted.
3.2.P.6	COA of primary / secondary reference standard including source and lot number used for the analysis for trial batches shall be submitted shall be provided.	• COA of reference standards used in testing are submitted **Metformin Certified Reference Material** Source: Supelco LOT No: LRAC3162 **Empagliflozin** **Till 3rd month stability studies:** Source: Zhejiang Hongyuan Pharmaceutical Co., Ltd., China Batch No. EPG211202WS **For Onward Studies** Batch No. EPG220703WS
3.2.P.8	• The commercial invoice for Metformin HCl submitted by firm has been attested by AD I&E Karachi, dated 03-11-2022, whereas trial batches have been manufactured in July 2022. Justification shall be submitted for manufacturing of trial batches prior to the release of drug substance by AD I&E. • Stability studies data for 6th month time point shall be submitted.	• The firm has submitted copy of commercial invoice of Metformin HCl attested by AD *I&E mentioning comments that previously signed date by AD I&E (03-11-2022) was a writing error, Month is mentioned as November instead of January 2022.* • The firm has also submitted copy of goods declaration • Firm has submitted 6th month time point stability study data of applied product
2.3.R	• **Justification shall be submitted for dispensed quantity of Empagliflozin & alongwith 20% overage for formulation of trial batches alongwith the performance based evidence for the referred process loss.** The firm submitted that 20% excess quantity is taken to cover for process losses as mentioned below: 3. Coating process done in R&D having R&D solid dosage unity Dr. Pharm that is equipped with three interchangeable perforated coating pans that are suitable for coating 0.8kg-10kg tablets e. Process loss occurs during spray volume setting f. Process losses occur from exhaust as also the coating pan is perforated g. Process losses occur as some of the coating material stick to the coating pan during coating process h. Process losses occur as some of the coating material remains in the hoses and pipes of spray equipment and vessel after completion of coating process 4. Due to above losses it is a general practice to include 20% excess at coating stage. Weight gain is monitored during the process and coating process is stopped when the desired weight gain is achieved • **Justification shall be submitted for proceeding for the Seal coating upon the Metformin HCl core tablet without establishing the extended release dissolution profile of Metformin HCl core tablet at in process stage.**	

- The firm submitted that we have manufactured trial batches of the Empagliflozin/Metformin HCl XR tablet range. Trial batch testing was conducted at each stage and results were found satisfactory.
- On the basis of above reason testing of stability batches were conducted on final product only.
- Justification letter is enclose in Annexure-I along with test results of trial batches of Empagliflozin/Metformin HCl XR Tablet range for dissolution profile of Metformin HCl.
- The firm submitted justification stating that dissolution testing on Metformin HCl core tablet was done on below mentioned trial batches before proceeding to seal coating stage.
  5. Empagliflozin/Metformin HCl XR Tablet 5mg/1000mg Tablet, Batch No.:583DT01, Batch Size: 1.420kg
  6. Empagliflozin/Metformin HCl XR Tablet 10mg/1000mg Tablet, Batch No.:584DT01, Batch Size: 1.420kg
  7. Empagliflozin/Metformin HCl XR Tablet 12.5mg/1000mg Tablet, Batch No.:585DT01, Batch Size: 1.420kg
  8. Empagliflozin/Metformin HCl XR Tablet 25mg/1000mg Tablet, Batch No.:586DT01, Batch Size: 1.420kg
- Based on the satisfactory dissolution testing results of Metformin HCl core tablets of above mentioned trial batches (report submitted) and the experience with our recently registered product Empagliflozin/Linagliptin/Metformin XR Tablet range 5mg/2.5mg/1000mg, 10mg / 5mg / 1000mg, 12.5mg / 2.5mg / 1000mg, 25mg / 5mg / 1000mg which also have the same formulation as of Metformin HCl core tablet as of Metformin HCl core tablet formulation in Empagliflozin Metformin XR Tablet Range.
- Therefore, stability batches of subjected product were proceeded to seal coating stage without dissolution testing on Metformin core tablet
- **Justification shall be submitted for proceeding for the final film coating step without establishing the content of Empagliflozin at in process stage of active coating.**
- Empagliflozin API content testing was done after API coating on trial batches of Empagliflozin/Metformin HCl XR tablets range.(Justification letter and results of content of Empagliflozin are enclose in Annexure-J)
- Satisfactory results of trial batches obtained give us confidence to test the stability batches directly on finished product.
- However we commit to conduct testing the product at each stage for QC release batches.
- The firm submitted justification stating Empagliflozin content testing on Empagliflozin coated Metformin HCl XR tablet was done on below mentioned trial batches before proceeding to final coating stage.
  5. Empagliflozin/Metformin HCl XR Tablet 5mg/1000mg Tablet, Batch No.:583DT01, Batch Size: 1.420kg
  6. Empagliflozin/Metformin HCl XR Tablet 10mg/1000mg Tablet, Batch No.:584DT01, Batch Size: 1.420kg
  7. Empagliflozin/Metformin HCl XR Tablet 12.5mg/1000mg Tablet, Batch No.:585DT01, Batch Size: 1.420kg
  8. Empagliflozin/Metformin HCl XR Tablet 25mg/1000mg Tablet, Batch No.:586DT01, Batch Size: 1.420kg
- Based on the satisfactory Empagliflozin content testing results of Empagliflozin coated Metformin HCl XR tablet of above mentioned trial batches (report submitted) and on the experience with our recently registered product Empagliflozin / Linagliptin / Metformin XR Tablet range 5mg/2.5mg/1000mg, 10mg / 5mg / 1000mg, 12.5mg / 2.5mg / 1000mg, 25mg / 5mg / 1000mg which also have the same formulation as of Empagliflozin coating formulation in Empagliflozin Metformin XR Tablet Range.
- Therefore, stability batches of subjected product were proceeded for final film coating step without establishing the content for Empagliflozin at in process stage of active coating.
- **Clarification shall be submitted for the test applied to confirm that desired content for Empagliflozin has been achieved via active coating since submitted trial batch manufacturing record does not include any in process testing.**

	• The firm has submitted results of trial batches at coated stage showing that desired content for Empagliflozin has been achieved • **Minimum handling capacity of the equipment used in the manufacturing of trial batches shall be submitted.** • The firm stated the manufacturing process is done in state of Art Nabiqasim R&D facility having R&D Solid Dosage Unity Dr. Pharm which is an integrated system having below processing units and also submitted brochure. 1. High Shear Mixer, three interchangeable bowls below: a. Capacity; 1.0kg-2.0kg b. Capacity; 2.0kg-5.0kg c. Capacity; 5.0kg-10.0kg 2. Fluid Bed dryer 3. Dry Mill 4. Cone Blender, three interchangeable blenders below: a. Capacity; 1.0kg-2.0kg b. Capacity; 2.0kg-5.0kg c. Capacity; 5.0kg-10.0kg 5. Tablet Coating Pan, three interchangeable coating pans as below: a. Capacity; 1.0kg-2.0kg b. Capacity; 2.0kg-5.0kg c. Capacity; 5.0kg-10.0kg	
Decision: Approved with innovator's specifications. • **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.** • **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

	Details of fee submitted	PKR 30,000/-: dated 13/12/2022 (Deposit silp#476276141644)

	The proposed proprietary name / brand name	GLEMPA-M XR Tablet 12.5mg/1000mg
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film-coated tablet contains: Empagliflozin ……..12.5mg Metformin HCl USP (extended release)….1000mg
	Pharmaceutical form of applied drug	Film coated tablet for oral use
	Pharmacotherapeutic Group of (API)	Type 2 Diabetes Mellitus, antidiabetic agent
	Reference to Finished product specifications	Innovator's Specifications
	Proposed Pack size	14's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	SYNJARDY XR Tablet (5mg/1000mg, 10mg/1000mg, 12.5mg/1000mg, 25mg/1000mg) USFDA Approved.
	For generic drugs (me-too status)	Xenglu-Met XR Tablet 12.5mg/1000mg by M/s Hilton Pharma, (Reg#105270)
	Name and address of API manufacturer.	**Empagliflozin:** Zhejiang Hongyuan Pharmaceuticals Co., Ltd., Chem & API's Industrial Zone, Linhai, Zhejiang Province, China. **Metformin Hydrochloride:** Aarti Drugs Limited., Plot No. 211-213, Road No. 2, G.I.D.C., Sarigam, Dist; Valsad Gujarat , India
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	**Empagliflozin:** The firm has submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance. **Metformin:** The firm as submitted details of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance	**Empagliflozin:** Stability study conditions:

	(Conditions & duration of Stability studies)	Real time: 30˚C ± 2˚C / 65% ± 5%RH for 24 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (Z1215-170601, Z1215-170602, Z1215-170603) **Metformin HCl:** Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 60 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (MEF/1410027, MEF/1410028, MEF/1410029)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, specifications, analytical procedure and its validation studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Firm has submitted Pharmaceutical Equivalence studies against XENGLU-MET XR Tablet 12.5mg/1000mg by M/s Hilton Pharma, by performing quality tests (Description, Identification, Dissolution and Assay). CDP has been performed against the same brand that is XENGLU-MET XR Tablet 12.5mg/1000mg by M/s Hilton Pharma, in Acid media (0.1N) (pH 1.2), Acetate Buffer (4.5) & Phosphate Buffer (6.8). The values f2 are in the acceptable range.
	Analytical method validation/verification of product	Firm has submitted method validation studies including linearity, range, accuracy, precision, specificity, LOD, LOQ, system suitability, robustness and forced degradation studies.

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	N/A
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Empagliflozin:** The firm has submitted copy of GMP certificate of M/s Zhejiang Hongyuan Pharmaceuticals Co., Ltd., Chem & API's Industrial Zone, Linhai, Zhejiang P.R. China issued by Linhai Medical and Chemical Industry Administration valid upto 29th December 2023. Firm has submitted copy of DML (Zhe20090508) in name of Zhejiang Hongyuan Pharmaceuticals Co., Ltd., Chem & API's Industrial Zone, Linhai, Zhejiang, China issued by Zhejiang Food and Drug Administration valid upto 13th January 2024 **Metformin HCl:** Firm has submitted Copy of GMP certificate in name of Aarti Drugs Limited (Unit-II)., Plot No. 211-213, Road No. 2, G.I.D.C., at & post Sarigam, Dist; Valsad, Gujarat state , India issued by Commissioner Food & Drugs control Administration, Gandhinagar India valid upto 19-03-2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	**Empagliflozin:** Firm has submitted copy of invoice for import of 30kg Empagliflozin attested by AD (I&E) DRAP Karachi office dated 24-12-2021 Firm has submitted copy of form 6 for import of Empagliflozin attested by AD (I&E) DRAP Karachi office dated 17-12-2021 **Metformin HCl:** Firm has submitted copy of invoice EXP/2810/21/22 Dated: 10-12-2021 for import of 3000kg Metformin HCL USP attested by AD (I&E) DRAP Karachi office dated 03-11-2022
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted data of stability batches supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator [XI]:

Section	Observations	Response
1.6.5	• Valid GMP certificate of drug substance manufacturer (empagliflozin & metformin) issued by relevant regulatory	• The firm submitted that at the time of dossier submission previously submitted GMP certificate of Metformin HCl API, manufacturer: AARTI Drugs Limited was valid till 19-03-2023. *However,*

	authority of country of origin is required • The address mentioned in submitted GMP certificate of M/s Zhejiang Hongyuan Pharmaceuticals Co., Ltd is different than that available on NMPA website, clarify	*renewal application of GMP certificate dated 27-01-2023 received from manufacturer is submitted.* • Firm has not submitted copy of GMP certificate of drug substance manufacturer for empagliflozin issued by relevant regulatory authority of country of origin • The firm submitted that address mentioned on Manufacturing License is same as mentioned on NMPA website (Chem & API's Industrial Zone, Linhai, Zhejiang, China), whereas on NMPA website the complete and detailed address has been given, furthermore, the office name, city and province are exactly same on both credentials. However, the addresses are different. **Name and address mentioned on DML:** Zhejiang Hongyuan Pharmaceuticals Co., Ltd., Chem & API's Industrial Zone, Linhai, Zhejiang, China **Name and address mentioned on NMPA website:** Zhejiang Hongyuan Pharmaceutical Co., Ltd., No. 6, Donghai Fourth Avenue, Toumen Port Economic Development Zone, Zhejiang Province, Linhai City, Taizhou City. Later the firm has submitted a Notice of change from the drug substance manufacturer declaring that description of the company's address has been changed from "Chem & API's Industrial Zone, Linhai, Zhejiang, China" to "No. 6, Donghai Fourth Avenue, Zheijiang Toumengang Economic Development Zone, Linhai City, Taizhou, Zhejiang, P.R of China." The notice further states that location of manufacturing site has not been changed and remains same with before. The GMP certificate and DML of the drug substance manufacturer verified from the NMPA website reveals that the description of the address has been changed.
3.2.S.4	Drug substance specifications for Empagliflozin shall be submitted from drug substance, manufacturer.	Drug substance specifications for Empagliflozin from drug substance manufacturer is submitted
3.2.P.2	Justification shall be submitted for not performing Pharmaceutical equivalence and CDP studies against the innovator product.	The firm submitted that Reference to CTD guidance document pharmaceutical equivalence and CDP studies can be performed against reference / comparator samples
3.2.P.5	• Justification shall be submitted that how the "specificity" of the applied method has been inferred without the performance of "Peak Purity Test (e.g., using diode array detector) to establish that analyte chromatographic peak is not attributable to more than one component". • Submitted analytical method validation report declares the	• Specificity of the applied method was conducted on PDA detector to establish analyte peaks are not attributable. Chromatograms representing peak purity of Metformin and Empagliflozin are submitted • We acknowledge that previously submitted analytical method validation report is of "Empagliflozin/Metformin extended release tablet". • As mentioned by you that report declares the details of "Empagliflozin / Linagliptin / Metformin

	details for "Empagliflozin/Linagliptin/Metformin tablet.	HCl". It is due to the typographical error, while compiling report, mention in system suitability parameter of Metformin HCl on pahe No. 15. Corrected method validation report is submitted.
3.2.P.6	COA of primary / secondary reference standard including source and lot number used for the analysis for trial batches shall be submitted shall be provided.	• COA of reference standards used in testing are submitted **Metformin Certified Reference Material** Source: Supelco LOT No: LRAC3162 **Empagliflozin** **Till 3rd month stability studies:** Source: Zhejiang Hongyuan Pharmaceutical Co., Ltd., China Batch No. EPG211202WS **For Onward Studies** Batch No. EPG220703WS
3.2.P.8	• The commercial invoice for Metformin HCl submitted by firm has been attested by AD I&E Karachi, dated 03-11-2022, whereas trial batches have been manufactured in July 2022. Justification shall be submitted for manufacturing of trial batches prior to the release of drug substance by AD I&E. • Stability studies data for 6th month time point shall be submitted.	• The firm has submitted copy of commercial invoice of Metformin HCl attested by AD *I&E mentioning comments that previously signed date by AD I&E (03-11-2022) was a writing error, Month is mentioned as November instead of January 2022.* • The firm has also submitted copy of goods declaration • Firm has submitted 6th month time point stability study data of applied product
2.3.R	• **Justification shall be submitted for dispensed quantity of Empagliflozin & alongwith 20% overage for formulation of trial batches alongwith the performance based evidence for the referred process loss.** The firm submitted that 20% excess quantity is taken to cover for process losses as mentioned below: 5. Coating process done in R&D having R&D solid dosage unity Dr. Pharm that is equipped with three interchangeable perforated coating pans that are suitable for coating 0.8kg-10kg tablets i. Process loss occurs during spray volume setting j. Process losses occur from exhaust as also the coating pan is perforated k. Process losses occur as some of the coating material stick to the coating pan during coating process l. Process losses occur as some of the coating material remains in the hoses and pipes of spray equipment and vessel after completion of coating process 6. Due to above losses it is a general practice to include 20% excess at coating stage. Weight gain is monitored during the process and coating process is stopped when the desired weight gain is achieved • **Justification shall be submitted for proceeding for the Seal coating upon the Metformin HCl core tablet without establishing the extended release dissolution profile of Metformin HCl core tablet at in process stage.** • The firm submitted that we have manufactured trial batches of the Empagliflozin/Metformin HCl XR tablet range. Trial batch testing was conducted at each stage and results were found satisfactory. • On the basis of above reason testing of stability batches were conducted on final product only. • Justification letter is enclose in Annexure-I along with test results of trial batches of Empagliflozin/Metformin HCl XR Tablet range for dissolution profile of Metformin HCl. • The firm submitted justification stating that dissolution testing on Metformin HCl core tablet was done on below mentioned trial batches before proceeding to seal coating stage.	

9. Empagliflozin/Metformin HCl XR Tablet 5mg/1000mg Tablet, Batch No.:583DT01, Batch Size: 1.420kg
10. Empagliflozin/Metformin HCl XR Tablet 10mg/1000mg Tablet, Batch No.:584DT01, Batch Size: 1.420kg
11. Empagliflozin/Metformin HCl XR Tablet 12.5mg/1000mg Tablet, Batch No.:585DT01, Batch Size: 1.420kg
12. Empagliflozin/Metformin HCl XR Tablet 25mg/1000mg Tablet, Batch No.:586DT01, Batch Size: 1.420kg

- Based on the satisfactory dissolution testing results of Metformin HCl core tablets of above mentioned trial batches (report submitted) and the experience with our recently registered product Empagliflozin/Linagliptin/Metformin XR Tablet range 5mg/2.5mg/1000mg, 10mg / 5mg / 1000mg, 12.5mg / 2.5mg / 1000mg, 25mg / 5mg / 1000mg which also have the same formulation as of Metformin HCl core tablet as of Metformin HCl core tablet formulation in Empagliflozin Metformin XR Tablet Range.
- Therefore, stability batches of subjected product were proceeded to seal coating stage without dissolution testing on Metformin core tablet
- **Justification shall be submitted for proceeding for the final film coating step without establishing the content of Empagliflozin at in process stage of active coating.**
- Empagliflozin API content testing was done after API coating on trial batches of Empagliflozin/Metformin HCl XR tablets range.(Justification letter and results of content of Empagliflozin are enclose in Annexure-J)
- Satisfactory results of trial batches obtained give us confidence to test the stability batches directly on finished product.
- However we commit to conduct testing the product at each stage for QC release batches.
- The firm submitted justification stating Empagliflozin content testing on Empagliflozin coated Metformin HCl XR tablet was done on below mentioned trial batches before proceeding to final coating stage.

9. Empagliflozin/Metformin HCl XR Tablet 5mg/1000mg Tablet, Batch No.:583DT01, Batch Size: 1.420kg
10. Empagliflozin/Metformin HCl XR Tablet 10mg/1000mg Tablet, Batch No.:584DT01, Batch Size: 1.420kg
11. Empagliflozin/Metformin HCl XR Tablet 12.5mg/1000mg Tablet, Batch No.:585DT01, Batch Size: 1.420kg
12. Empagliflozin/Metformin HCl XR Tablet 25mg/1000mg Tablet, Batch No.:586DT01, Batch Size: 1.420kg

- Based on the satisfactory Empagliflozin content testing results of Empagliflozin coated Metformin HCl XR tablet of above mentioned trial batches (report submitted) and on the experience with our recently registered product Empagliflozin / Linagliptin / Metformin XR Tablet range 5mg/2.5mg/1000mg, 10mg / 5mg / 1000mg, 12.5mg / 2.5mg / 1000mg, 25mg / 5mg / 1000mg which also have the same formulation as of Empagliflozin coating formulation in Empagliflozin Metformin XR Tablet Range.
- Therefore, stability batches of subjected product were proceeded for final film coating step without establishing the content for Empagliflozin at in process stage of active coating.
- **Clarification shall be submitted for the test applied to confirm that desired content for Empagliflozin has been achieved via active coating since submitted trial batch manufacturing record does not include any in process testing.**
- The firm has submitted results of trial batches at coated stage showing that desired content for Empagliflozin has been achieved
- **Minimum handling capacity of the equipment used in the manufacturing of trial batches shall be submitted.**
- The firm stated the manufacturing process is done in state of Art Nabiqasim R&D facility having R&D Solid Dosage Unity Dr. Pharm which is an integrated system having below processing units and also submitted brochure.

1. High Shear Mixer, three interchangeable bowls below:

	a. Capacity; 1.0kg-2.0kg b. Capacity; 2.0kg-5.0kg c. Capacity; 5.0kg-10.0kg 2. Fluid Bed dryer 3. Dry Mill 4. Cone Blender, three interchangeable blenders below: a. Capacity; 1.0kg-2.0kg b. Capacity; 2.0kg-5.0kg c. Capacity; 5.0kg-10.0kg 5. Tablet Coating Pan, three interchangeable coating pans as below: a. Capacity; 1.0kg-2.0kg b. Capacity; 2.0kg-5.0kg c. Capacity; 5.0kg-10.0kg	
Decision: Approved with innovator's specifications. • **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.** • **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**		
850.	Name, address of Applicant / Marketing Authorization Holder	M/s Nabiqasim Industries (Pvt.) Ltd., 17 / 24, Korangi Industrial Area, Karachi – Pakistan.
	Name, address of Manufacturing site.	M/s Nabiqasim Industries (Pvt.) Ltd., 17 / 24, Korangi Industrial Area, Karachi – Pakistan.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the Finished product manufacturer	Firm has submitted copy of cGMP certificate issued on 28-05-2022 based on inspection conducted on 27-05-2022.
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter No. F. 2-20/85-Lic (Vol-V) dated 27-04-2020 which specifies Tablet (General) section
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Form-5F Dy No. 4041 dated 13/02/2023
	Details of fee submitted	PKR 30,000/-: dated 13/12/2022 (Deposit silp#7016823815)
	The proposed proprietary name / brand name	GLEMPA-M XR Tablet 25mg/1000mg
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film-coated tablet contains: Empagliflozin ……25mg Metformin HCl USP (extended release)….1000mg
	Pharmaceutical form of applied drug	Film coated tablet for oral use
	Pharmacotherapeutic Group of (API)	Type 2 Diabetes Mellitus, antidiabetic agent

	Reference to Finished product specifications	Innovator's Specifications
	Proposed Pack size	14's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	SYNJARDY XR Tablet (5mg/1000mg, 10mg/1000mg, 12.5mg/1000mg, 25mg/1000mg) USFDA Approved.
	For generic drugs (me-too status)	Xenglu-Met XR Tablet 25mg/1000mg by M/s Hilton Pharma, (Reg#105271)
	Name and address of API manufacturer.	**Empagliflozin:** Zhejiang Hongyuan Pharmaceuticals Co., Ltd., Chem & API's Industrial Zone, Linhai, Zhejiang Province, China. **Metformin Hydrochloride:** Aarti Drugs Limited., Plot No. 211-213, Road No. 2, G.I.D.C., Sarigam, Dist; Valsad Gujarat , India
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	**Empagliflozin:** The firm has submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance. **Metformin:** The firm as submitted details of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	**Empagliflozin:** Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 24 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: (Z1215-170601, Z1215-170602, Z1215-170603) **Metformin HCl:** Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 60 months

		Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (MEF/1410027, MEF/1410028, MEF/1410029)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, specifications, analytical procedure and its validation studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Firm has submitted Pharmaceutical Equivalence studies against XENGLU-MET XR Tablet 25mg/1000mg by M/s Hilton Pharma, by performing quality tests (Description, Identification, Dissolution and Assay). CDP has been performed against the same brand that is XENGLU-MET XR Tablet 25mg/1000mg by M/s Hilton Pharma, in Acid media (0.1N) (pH 1.2), Acetate Buffer (4.5) & Phosphate Buffer (6.8). The values f2 are in the acceptable range.
	Analytical method validation/verification of product	Firm has submitted method validation studies including linearity, range, accuracy, precision, specificity, LOD, LOQ, system suitability, robustness and forced degradation studies.

STABILITY STUDY DATA			
Manufacturer of API	**Empagliflozin:** Zhejiang Hongyuan Pharmaceuticals Co., Ltd., Chem & API's Industrial Zone, Linhai, Zhejiang Province, China. **Metformin Hydrochloride:** Aarti Drugs Limited., Plot No. 211-213, Road No. 2, G.I.D.C., Sarigam, Dist; Valsad Gujarat , India		
API Lot No.	**Empagliflozin:** EPG20211101 **Metformin HCl:** MEF/11113625		
Description of Pack (Container closure system)	Alu-Alu blister packed in unit carton.		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 3 months Accelerated: 3 months		
Frequency	Accelerated: 0, 3 (Months) Real Time: 0, 3 (Months)		
Batch No.	586DS01	586DS02	
Batch Size	5000 tablets	5000 tablets	
Manufacturing Date	07-2022	07-2022	
Date of Initiation	15-08-2022	15-08-2022	
No. of Batches	03		
DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA			

1.	Reference of previous approval of applications with stability study data of the firm (if any)	N/A
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Empagliflozin:** The firm has submitted copy of GMP certificate of M/s Zhejiang Hongyuan Pharmaceuticals Co., Ltd., Chem & API's Industrial Zone, Linhai, Zhejiang P.R. China issued by Linhai Medical and Chemical Industry Administration valid upto 29th December 2023. Firm has submitted copy of DML (Zhe20090508) in name of Zhejiang Hongyuan Pharmaceuticals Co., Ltd., Chem & API's Industrial Zone, Linhai, Zhejiang, China issued by Zhejiang Food and Drug Administration valid upto 13th January 2024 **Metformin HCl:** Firm has submitted Copy of GMP certificate in name of Aarti Drugs Limited (Unit-II)., Plot No. 211-213, Road No. 2, G.I.D.C., at & post Sarigam, Dist; Valsad, Gujarat state , India issued by Commissioner Food & Drugs control Administration, Gandhinagar India valid upto 19-03-2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	**Empagliflozin:** Firm has submitted copy of invoice for import of 30kg Empagliflozin attested by AD (I&E) DRAP Karachi office dated 24-12-2021 Firm has submitted copy of form 6 for import of Empagliflozin attested by AD (I&E) DRAP Karachi office dated 17-12-2021 **Metformin HCl:** Firm has submitted copy of invoice EXP/2810/21-22 Dated: 10-12-2021 for import of 3000kg Metformin HCL USP attested by AD (I&E) DRAP Karachi office dated 03-11-2022
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted data of stability batches supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator [XI]:

Section	Observations	Response
1.6.5	• Valid GMP certificate of drug substance manufacturer (empagliflozin & metformin) issued by relevant regulatory authority of country of origin is required • The address mentioned in submitted GMP certificate of M/s Zhejiang Hongyuan	• The firm submitted that at the time of dossier submission previously submitted GMP certificate of Metformin HCl API, manufacturer: AARTI Drugs Limited was valid till 19-03-2023. *However, renewal application of GMP certificate dated 27-01-2023 received from manufacturer is submitted.* • Firm has not submitted copy of GMP certificate of drug substance manufacturer for empagliflozin

	Pharmaceuticals Co., Ltd is different than that available on NMPA website, clarify	issued by relevant regulatory authority of country of origin • The firm submitted that address mentioned on Manufacturing License is same as mentioned on NMPA website (Chem & API's Industrial Zone, Linhai, Zhejiang, China), whereas on NMPA website the complete and detailed address has been given, furthermore, the office name, city and province are exactly same on both credentials. However, the addresses are different. **Name and address mentioned on DML:** Zhejiang Hongyuan Pharmaceuticals Co., Ltd., Chem & API's Industrial Zone, Linhai, Zhejiang, China **Name and address mentioned on NMPA website:** Zhejiang Hongyuan Pharmaceutical Co., Ltd., No. 6, Donghai Fourth Avenue, Toumen Port Economic Development Zone, Zhejiang Province, Linhai City, Taizhou City. Later the firm has submitted a Notice of change from the drug substance manufacturer declaring that description of the company's address has been changed from "Chem & API's Industrial Zone, Linhai, Zhejiang, China" to "No. 6, Donghai Fourth Avenue, Zheijiang Toumengang Economic Development Zone, Linhai City, Taizhou, Zhejiang, P.R of China." The notice further states that location of manufacturing site has not been changed and remains same with before. The GMP certificate and DML of the drug substance manufacturer verified from the NMPA website reveals that the description of the address has been changed.
3.2.S.4	Drug substance specifications for Empagliflozin shall be submitted from drug substance, manufacturer.	Drug substance specifications for Empagliflozin from drug substance manufacturer is submitted
3.2.P.2	Justification shall be submitted for not performing Pharmaceutical equivalence and CDP studies against the innovator product.	The firm submitted that Reference to CTD guidance document pharmaceutical equivalence and CDP studies can be performed against reference / comparator samples
3.2.P.5	• Justification shall be submitted that how the "specificity" of the applied method has been inferred without the performance of "Peak Purity Test (e.g., using diode array detector) to establish that analyte chromatographic peak is not attributable to more than one component". • Submitted analytical method validation report declares the details for "Empagliflozin/Linagliptin/Metformin tablet.	• Specificity of the applied method was conducted on PDA detector to establish analyte peaks are not attributable. Chromatograms representing peak purity of Metformin and Empagliflozin are submitted • We acknowledge that previously submitted analytical method validation report is of "Empagliflozin/Metformin extended release tablet". • As mentioned by you that report declares the details of "Empagliflozin / Linagliptin / Metformin HCl". It is due to the typographical error, while compiling report, mention in system suitability parameter of Metformin HCl on pahe

		No. 15. Corrected method validation report is submitted.
3.2.P.6	COA of primary / secondary reference standard including source and lot number used for the analysis for trial batches shall be submitted shall be provided.	• COA of reference standards used in testing are submitted **Metformin Certified Reference Material** Source: Supelco LOT No: LRAC3162 **Empagliflozin** **Till 3rd month stability studies:** Source: Zhejiang Hongyuan Pharmaceutical Co., Ltd., China Batch No. EPG211202WS **For Onward Studies** Batch No. EPG220703WS
3.2.P.8	• The commercial invoice for Metformin HCl submitted by firm has been attested by AD I&E Karachi, dated 03-11-2022, whereas trial batches have been manufactured in July 2022. Justification shall be submitted for manufacturing of trial batches prior to the release of drug substance by AD I&E. • Stability studies data for 6th month time point shall be submitted.	• The firm has submitted copy of commercial invoice of Metformin HCl attested by AD *I&E mentioning comments that previously signed date by AD I&E (03-11-2022) was a writing error, Month is mentioned as November instead of January 2022.* • The firm has also submitted copy of goods declaration • Firm has submitted 6th month time point stability study data of applied product
2.3.R	• **Justification shall be submitted for dispensed quantity of Empagliflozin & alongwith 20% overage for formulation of trial batches alongwith the performance based evidence for the referred process loss.** The firm submitted that 20% excess quantity is taken to cover for process losses as mentioned below: 7. Coating process done in R&D having R&D solid dosage unity Dr. Pharm that is equipped with three interchangeable perforated coating pans that are suitable for coating 0.8kg-10kg tablets m. Process loss occurs during spray volume setting n. Process losses occur from exhaust as also the coating pan is perforated o. Process losses occur as some of the coating material stick to the coating pan during coating process p. Process losses occur as some of the coating material remains in the hoses and pipes of spray equipment and vessel after completion of coating process 8. Due to above losses it is a general practice to include 20% excess at coating stage. Weight gain is monitored during the process and coating process is stopped when the desired weight gain is achieved • **Justification shall be submitted for proceeding for the Seal coating upon the Metformin HCl core tablet without establishing the extended release dissolution profile of Metformin HCl core tablet at in process stage.** • The firm submitted that we have manufactured trial batches of the Empagliflozin/Metformin HCl XR tablet range. Trial batch testing was conducted at each stage and results were found satisfactory. • On the basis of above reason testing of stability batches were conducted on final product only. • Justification letter is enclose in Annexure-I along with test results of trial batches of Empagliflozin/Metformin HCl XR Tablet range for dissolution profile of Metformin HCl. • The firm submitted justification stating that dissolution testing on Metformin HCl core tablet was done on below mentioned trial batches before proceeding to seal coating stage. 13. Empagliflozin/Metformin HCl XR Tablet 5mg/1000mg Tablet, Batch No.:583DT01, Batch Size: 1.420kg	

14. Empagliflozin/Metformin HCl XR Tablet 10mg/1000mg Tablet, Batch No.:584DT01, Batch Size: 1.420kg
15. Empagliflozin/Metformin HCl XR Tablet 12.5mg/1000mg Tablet, Batch No.:585DT01, Batch Size: 1.420kg
16. Empagliflozin/Metformin HCl XR Tablet 25mg/1000mg Tablet, Batch No.:586DT01, Batch Size: 1.420kg

- Based on the satisfactory dissolution testing results of Metformin HCl core tablets of above mentioned trial batches (report submitted) and the experience with our recently registered product Empagliflozin/Linagliptin/Metformin XR Tablet range 5mg/2.5mg/1000mg, 10mg / 5mg / 1000mg, 12.5mg / 2.5mg / 1000mg, 25mg / 5mg / 1000mg which also have the same formulation as of Metformin HCl core tablet as of Metformin HCl core tablet formulation in Empagliflozin Metformin XR Tablet Range.
- Therefore, stability batches of subjected product were proceeded to seal coating stage without dissolution testing on Metformin core tablet
- **Justification shall be submitted for proceeding for the final film coating step without establishing the content of Empagliflozin at in process stage of active coating.**
- Empagliflozin API content testing was done after API coating on trial batches of Empagliflozin/Metformin HCl XR tablets range.(Justification letter and results of content of Empagliflozin are enclose in Annexure-J)
- Satisfactory results of trial batches obtained give us confidence to test the stability batches directly on finished product.
- However we commit to conduct testing the product at each stage for QC release batches.
- The firm submitted justification stating Empagliflozin content testing on Empagliflozin coated Metformin HCl XR tablet was done on below mentioned trial batches before proceeding to final coating stage.

13. Empagliflozin/Metformin HCl XR Tablet 5mg/1000mg Tablet, Batch No.:583DT01, Batch Size: 1.420kg
14. Empagliflozin/Metformin HCl XR Tablet 10mg/1000mg Tablet, Batch No.:584DT01, Batch Size: 1.420kg
15. Empagliflozin/Metformin HCl XR Tablet 12.5mg/1000mg Tablet, Batch No.:585DT01, Batch Size: 1.420kg
16. Empagliflozin/Metformin HCl XR Tablet 25mg/1000mg Tablet, Batch No.:586DT01, Batch Size: 1.420kg

- Based on the satisfactory Empagliflozin content testing results of Empagliflozin coated Metformin HCl XR tablet of above mentioned trial batches (report submitted) and on the experience with our recently registered product Empagliflozin / Linagliptin / Metformin XR Tablet range 5mg/2.5mg/1000mg, 10mg / 5mg / 1000mg, 12.5mg / 2.5mg / 1000mg, 25mg / 5mg / 1000mg which also have the same formulation as of Empagliflozin coating formulation in Empagliflozin Metformin XR Tablet Range.
- Therefore, stability batches of subjected product were proceeded for final film coating step without establishing the content for Empagliflozin at in process stage of active coating.
- **Clarification shall be submitted for the test applied to confirm that desired content for Empagliflozin has been achieved via active coating since submitted trial batch manufacturing record does not include any in process testing.**
- The firm has submitted results of trial batches at coated stage showing that desired content for Empagliflozin has been achieved
- **Minimum handling capacity of the equipment used in the manufacturing of trial batches shall be submitted.**
- The firm stated the manufacturing process is done in state of Art Nabiqasim R&D facility having R&D Solid Dosage Unity Dr. Pharm which is an integrated system having below processing units and also submitted brochure.

1. High Shear Mixer, three interchangeable bowls below:
   a. Capacity; 1.0kg-2.0kg
   b. Capacity; 2.0kg-5.0kg

c. Capacity; 5.0kg-10.0kg 2. Fluid Bed dryer 3. Dry Mill 4. Cone Blender, three interchangeable blenders below: a. Capacity; 1.0kg-2.0kg b. Capacity; 2.0kg-5.0kg c. Capacity; 5.0kg-10.0kg 5. Tablet Coating Pan, three interchangeable coating pans as below: a. Capacity; 1.0kg-2.0kg b. Capacity; 2.0kg-5.0kg c. Capacity; 5.0kg-10.0kg
Decision: Approved with innovator's specifications. • **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.** • **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Case No. 03; Deferred registration application of Human drugs on Form 5-F on export facilitation
Assistant director PR-I/EFD vide letter No.F.1-6/2019-PR-I (EFD) dated 29-12-2022 has informed that DRAP Authority in its 133rd meeting held on 13th April 2022, decided to grant registration on priority basis to the *pharmaceutical* i.e one molecule for each 100,000 USD worth of export of medicines (to a maximum of 15 such molecules) during a fiscal year. In compliance to the aforementioned decision of the authority, the following firm have achieved the benchmark of more than **100,000 USD** during the **fiscal Year 2021-2022** and submitted their applications for priority consideration in lieu of export facilitation for Registration Board please.,

851.	Name, address of Applicant / Marketing Authorization Holder	Highnoon Laboratories Limited., 17.5km, Multan Road, Lahore

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA			

1.	Reference of previous approval of applications with stability study data of the firm (if any)	N/A
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Dapagliflozin:** Firm has submitted copy of GMP certificate in the name of M/s Fuxin Long Rui Pharmaceutical CO., Ltd., issued by Fuxin Food and Drug administration, valid upto 16-11-2024 Firm has submitted copy of DML (Certificate# Liao20150233) in the name of M/s Fuxin Long Rui Pharmaceutical CO., Ltd., issued by Liaoning Medical Products Administration, valid upto 20-12-2022 **Metformin HCl:** Firm has submitted copy of GMP certificate in the name of M/s Ipca Laboratories Limited., India., issued by Food and Drug administration, Maharashtra State India, valid upto 27-04-2024
3.	Documents for the procurement of API with approval from DRAP (in case of import).	**Dapagliflozin:** The firm has submitted a copy of invoice # HN210922-D) Dated 22-10-2021 for import of 15Kg of Dapagliflozin propanediol monohydrate (Batch# L-DG-20210805-D02-DG06-01) in name of M/s Highnoon Laboratories Ltd attested by AD (I&E) DRAP Lahore dated 12/11/2021. **Metformin HCl:** Firm has submitted copy of invoice# MEG2122/1630495 Dated 10-05-2021 for import of 6000Kg of Metformin HCl (Batch# 21023ML2AJMI, 21027ML2AJMI, 21116ML2AJMI, 21117ML2AJMI) in name of M/s Highnoon Laboratories Ltd attested by AD (I&E) DRAP Lahore 21-05-2021
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted data of stability batches supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Compliance Record of HPLC software 21CFR & audit trail reports on product testing upto 03 months is submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) is submitted

Remarks of Evaluator [XI]:

Section	Observations
1.1	• Fee challan for applied product is not submitted. Submit original fee challan submitted for applied product
1.3.5	• GMP inspection report/ GMP certificate of the manufacturing unit issued within the last three years shall be submitted
1.5.2 / 3.2.P.1	• Label claim of the applied formulation with reference to the innovator product shall be submitted along with submission of applicable fee
1.5.6	• Clarification is required as you have applied for Manufacturer's Specifications / Innovator specifications?

3.2.S.4	• Justification is required for not including the test for propylene glycol content in drug substance specifications (dapagliflozin) by drug substance manufacturer and drug product manufacturer as recommended by innovator product review document
3.2.P.2	• Justification is required for using 5% (0.307mg) overage in case of dapagliflozin propanediol monohydrated in applied formulation
3.2.P.5	• Justification is required for not performing the identification test in batch analysis as recommended by innovator product review document • Specify the mesh size used with USP type-I apparatus used in dissolution studies
3.2.P.8	• Submit stability study data of applied product at 6th month time point • Compliance Record of HPLC software 21CFR & audit trail reports on product testing upto 06 months is not submitted

Previous Decision (M-326DRB): Registration Board deferred the case for submission of reply to the above cited shortcomings within six months.

Firm's response:

Section	Observations	Response
1.1	• Fee challan for applied product is not submitted. Submit original fee challan submitted for applied product	• Firm has submitted copy of fee challan No#4026653104 dated 20-04-2023 for Daplozmet XR 5/500mg Tablet. The firm submitted that previously submitted fee challan have typographical error in strength.
1.3.5	• GMP inspection report/ GMP certificate of the manufacturing unit issued within the last three years shall be submitted	• Firm has submitted cGMP certificate issued on 19-01-2022 based on inspection conducted on 11-11-2021.
1.5.2 / 3.2.P.1	• Label claim of the applied formulation with reference to the innovator product shall be submitted along with submission of applicable fee	• The firm submitted that our formulation is same as the reference product formulation and requested to consider the below label claim without submission of fee. Each bi-layered film coated tablet contains: Dapagliflozin (as propanediol monohydrate) (immediate release) …….5mg Metformin HCl (Extended release) …..…500mg
1.5.6	• Clarification is required as you have applied for Manufacturer's Specifications / Innovator specifications?	• The firm submitted that as the applied product is not available in any Pharmacopoeia, so it is Innovator's Specification.
3.2.S.4	• Justification is required for not including the test for propylene glycol content in drug substance specifications (dapagliflozin) by drug substance manufacturer and drug product manufacturer as recommended by innovator product review document	• The firm submitted that Propylene Glycol is also named as 1,2-Propane diol. 1,2-Propane diol is used as a reactant in the drug substance manufacturing, and it has been identified as impurity in DMF of drug substance i.e. section 3.2.S.3.2.1 of the submitted DMF. • This impurity along with other impurities is controlled collectively under the test of "Related substances" which has been reported in the COA of drug substance manufacturer as well as drug product manufacturer. Limits for both "individual impurity" and "Total impurity" are also mentioned in CoA. Extract of the DMF and COA are submitted
3.2.P.2	• Justification is required for using 5% (0.307mg) overage in case of dapagliflozin propanediol monohydrated in applied formulation	• The firm submitted that overage is used to compensate the process loss. We will ensure to not use the overage in commercial batches.

3.2.P.5	• Justification is required for not performing the identification test in batch analysis as recommended by innovator product review document • Specify the mesh size used with USP type-I apparatus used in dissolution studies	• The firm submitted that Identification test for drug product is performed and submitted revised COA's • The firm submitted that USP Type 1 basket of 40 mesh screens with wire openings of 0.36 - 0.44 mm as per USP Dissolution chapter <711> is used in dissolution studies. *However innovator product review document recommends use of USP Type 1 basket with 20 mesh.*
3.2.P.8	• Submit stability study data of applied product at 6th month time point • Compliance Record of HPLC software 21CFR & audit trail reports on product testing upto 06 months is not submitted	• The firm has submitted 6th month time point stability data • Compliance Record of HPLC software 21CFR & audit trail reports on product testing is submitted

Decision: Deferred for submission of following:

- **Scientific justification for using overage in case of Dapagliflozin propanediol monohydrated in applied formulation**
- **Fee of Rs. 7,500/- for correction/pre-approval change in label claim, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.**

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	N/A
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Dapagliflozin:** Firm has submitted copy of GMP certificate in the name of M/s Fuxin Long Rui Pharmaceutical CO., Ltd., issued by Fuxin Food and Drug administration, valid upto 16-11-2024 Firm has submitted copy of DML (Certificate# Liao20150233) in the name of M/s Fuxin Long Rui

		Pharmaceutical CO., Ltd., issued by Liaoning Medical Products Administration, valid upto 20-12-2022 **Metformin HCl:** Firm has submitted copy of GMP certificate in the name of M/s Ipca Laboratories Limited., India., issued by Food and Drug administration, Maharashtra State India, valid upto 27-04-2024
3.	Documents for the procurement of API with approval from DRAP (in case of import).	**Dapagliflozin:** The firm has submitted a copy of invoice # HN210922-D Dated 22-10-2021 for import of 15Kg of Dapagliflozin propanediol monohydrate (Batch# L-DG-20210805-D02-DG06-01) in name of M/s Highnoon Laboratories Ltd attested by AD (I&E) DRAP Lahore dated 12/11/2021. **Metformin HCl:** Firm has submitted copy of invoice# MEG2122/1630495 Dated 10-05-2021 for import of 6000Kg of Metformin HCl (Batch# 21023ML2AJMI, 21027ML2AJMI, 21116ML2AJMI, 21117ML2AJMI) in name of M/s Highnoon Laboratories Ltd attested by AD (I&E) DRAP Lahore 21-05-2021
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted data of stability batches supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Compliance Record of HPLC software 21CFR & audit trail reports on product testing is submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) is submitted

Remarks of Evaluator [XI]:

Section	Observations
1.1	• Fee challan for applied product is not submitted. Submit original fee challan submitted for applied product
1.3.5	• GMP inspection report/ GMP certificate of the manufacturing unit issued within the last three years shall be submitted
1.5.2 / 3.2.P.1	• Label claim of the applied formulation with reference to the innovator product shall be submitted along with submission of applicable fee
1.5.6	• Clarification is required as you have claimed Manufacturer's Specifications / Innovator specifications?
3.2.S.4	• Justification is required for not including the test for propylene glycol content in drug substance specifications (dapagliflozin) by drug substance manufacturer and drug product manufacturer as recommended by innovator product review document
3.2.P.2	• Justification is required for using 5% (0.307mg) overage in case of dapagliflozin propanediol monohydrated in applied formulation
3.2.P.5	• Justification is required for not performing the identification test in batch analysis as recommended by innovator product review document • Specify the mesh size used with USP type-I apparatus used in dissolution studies
3.2.P.8	• Justification is required since submitted chromatograms show that content uniformity test for dapagliflozin and weight variation test for metformin is performed (22-11-2021) subsequent to the initiation of stability study (6-11-2021) for all batches

Previous Decision (M-326DRB): Registration Board deferred the case for submission of reply to the above cited shortcomings within six months.

Firm's response:

Section	Observations	Response
1.1	• Fee challan for applied product is not submitted. Submit original fee challan submitted for applied product	• Firm has submitted copy of fee challan No#570830147709 dated 23/06/2022 submitted for Daplozmet XR 5/1000mg Tablet
1.3.5	• GMP inspection report/ GMP certificate of the manufacturing unit issued within the last three years shall be submitted	• Firm has submitted cGMP certificate issued on 19-01-2022 based on inspection conducted on 11-11-2021.
1.5.2 / 3.2.P.1	• Label claim of the applied formulation with reference to the innovator product shall be submitted along with submission of applicable fee	• The firm submitted that our formulation is same as the reference product formulation and requested to consider the below label claim without submission of fee. Each bi-layered film coated tablet contains: Dapagliflozin (as propanediol monohydrate) (immediate release) …….5mg Metformin HCl (Extended release) ….1000mg
1.5.6	• Clarification is required as you have applied for Manufacturer's Specifications / Innovator specifications?	• The firm submitted that as the applied product is not available in any Pharmacopoeia, so it is Innovator's Specification.
3.2.S.4	• Justification is required for not including the test for propylene glycol content in drug substance specifications (dapagliflozin) by drug substance manufacturer and drug product manufacturer as recommended by innovator product review document	• The firm submitted that Propylene Glycol is also named as 1,2-Propane diol. 1,2-Propane diol is used as a reactant in the drug substance manufacturing, and it has been identified as impurity in DMF of drug substance i.e. section 3.2.S.3.2.1 of the submitted DMF. • This impurity along with other impurities is controlled collectively under the test of "Related substances" which has been reported in the COA of drug substance manufacturer as well as drug product manufacturer. Limits for both "individual impurity" and "Total impurity" are also mentioned in CoA. Extract of the DMF and COA are submitted
3.2.P.2	• Justification is required for using 5% (0.307mg) overage in case of dapagliflozin propanediol monohydrated in applied formulation	• The firm submitted that overage is used to compensate the process loss. We will ensure to not use the overage in commercial batches.
3.2.P.5	• Justification is required for not performing the identification test in batch analysis as recommended by innovator product review document • Specify the mesh size used with USP type-I apparatus used in dissolution studies	• The firm submitted that Identification test for drug product is performed and submitted revised COA's • The firm submitted that USP Type 1 basket of 40 mesh screens with wire openings of 0.36 - 0.44 mm as per USP Dissolution chapter <711> is used in dissolution studies. *However innovator product review document recommends use of USP Type 1 basket with 20 mesh.*
3.2.P.8	• Justification is required since submitted chromatograms show that content uniformity test for dapagliflozin and weight variation test	• The firm submitted that content uniformity test is performed at the time of release batches that's why it is included at the initial time point. While content uniformity test is not stability

	for metformin is performed (22-11-2021) subsequent to the initiation of stability study (6-11-2021) for all batches	indicating that's why it is not included in the latter's time point of stability studies.

Decision: Deferred for submission of following:

- **Scientific justification for using overage in case of Dapagliflozin propanediol monohydrated in applied formulation**
- **Justification as submitted chromatograms show that content uniformity test for dapagliflozin and weight variation test for metformin is performed subsequent to the initiation of stability study for all batches**
- **Fee of Rs. 7,500/- for correction/pre-approval change in label claim, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.**

Section	Observations
1.5.2 / 3.2.P.1	• Label claim of the applied formulation with reference to the innovator product shall be submitted along with submission of applicable fee
1.5.6	• Clarification is required as you have applied for Manufacturer's Specifications / Innovator specifications?
3.2.S.4	• Justification is required for not including the test for propylene glycol content in drug substance specifications (dapagliflozin) by drug substance manufacturer and drug product manufacturer as recommended by innovator product review document
3.2.P.2	• Justification is required for using 5% (0.615mg) overage in case of dapagliflozin propanediol monohydrated in applied formulation
3.2.P.5	• Justification is required for not performing the identification test in batch analysis as recommended by innovator product review document • Specify the mesh size used with USP type-I apparatus used in dissolution studies
3.2.P.8	• Submit stability study data of applied product at 6th month time point • Compliance Record of HPLC software 21CFR & audit trail reports on product testing upto 06 months is not submitted

Previous Decision (M-326DRB): Registration Board deferred the case for submission of reply to the above cited shortcomings within six months.

Firm's response:

Section	Observations	Response
1.5.2 / 3.2.P.1	• Label claim of the applied formulation with reference to the innovator product shall be submitted along with submission of applicable fee	• The firm submitted that our formulation is same as the reference product formulation and requested to consider the below label claim without submission of fee. Each bi-layered film coated tablet contains:

		Dapagliflozin (as propanediol monohydrate) (immediate release) …….10mg Metformin HCl (Extended release) ……500mg
1.5.6	• Clarification is required as you have applied for Manufacturer's Specifications / Innovator specifications?	• The firm submitted that as the applied product is not available in any Pharmacopoeia, so it is Innovator's Specification.
3.2.S.4	• Justification is required for not including the test for propylene glycol content in drug substance specifications (dapagliflozin) by drug substance manufacturer and drug product manufacturer as recommended by innovator product review document	• The firm submitted that Propylene Glycol is also named as 1,2-Propane diol. 1,2-Propane diol is used as a reactant in the drug substance manufacturing, and it has been identified as impurity in DMF of drug substance i.e. section 3.2.S.3.2.1 of the submitted DMF. • This impurity along with other impurities is controlled collectively under the test of "Related substances" which has been reported in the COA of drug substance manufacturer as well as drug product manufacturer. Limits for both "individual impurity" and "Total impurity" are also mentioned in CoA. Extract of the DMF and COA are submitted
3.2.P.2	• Justification is required for using 5% (0.615mg) overage in case of dapagliflozin propanediol monohydrated in applied formulation	• The firm submitted that overage is used to compensate the process loss. We will ensure to not use the overage in commercial batches.
3.2.P.5	• Justification is required for not performing the identification test in batch analysis as recommended by innovator product review document • Specify the mesh size used with USP type-I apparatus used in dissolution studies	• The firm submitted that Identification test for drug product is performed and submitted revised COA's • The firm submitted that USP Type 1 basket of 40 mesh screens with wire openings of 0.36 - 0.44 mm as per USP Dissolution chapter <711> is used in dissolution studies. *However innovator product review document recommends use of USP Type 1 basket with 20 mesh.*
3.2.P.8	• Submit stability study data of applied product at 6th month time point • Compliance Record of HPLC software 21CFR & audit trail reports on product testing upto 06 months is not submitted	• The firm has submitted 6th month time point stability data • Compliance Record of HPLC software 21CFR & audit trail reports on product testing is submitted
Decision: Deferred for submission of following: • **Scientific justification for using overage in case of Dapagliflozin propanediol monohydrated in applied formulation** • **Fee of Rs. 7,500/- for correction/pre-approval change in label claim, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.**

	Name, address of Manufacturing site.	Highnoon Laboratories Limited., 17.5km, Multan Road, Lahore
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the Finished product manufacturer	Firm has submitted cGMP certificate issued on 19-01-2022 based on inspection conducted on 11-11-2021.

	Evidence of approval of manufacturing facility	Firm has submitted copy of letter No. F. 1-30/92-Lic (Vol-VII) dated 04-01-2022 which specifies Tablet (General) Section
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 20202 dated: 15/06/2022
	Details of fee submitted	Rs. 30,000/- dated 23-06-2022 (Deposit silp#8069049838)
	The proposed proprietary name / brand name	Daplozmet XR 10/1000mg Tablet
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Dapagliflozin (as propanediol monohydrate) (immediate release) …….10mg Metformin hydrochloride (Extended release) ……1000mg
	Pharmaceutical form of applied drug	Film coated tablet.
	Pharmacotherapeutic Group of (API)	Drugs used in type 2 diabetes mellitus as an adjunct to diet and exercise.
	Reference to Finished product specifications	Manufacturer's Specs/ Innovator
	Proposed Pack size	5's, 7's, 10's, 14's, 20's, 28's, 30's, 50's, 60's, 100's, 120's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	XIGDUO XR 10/1000mg film coated Tablets, USFDA Approved.
	For generic drugs (me-too status)	Xiga-Met 10/1000mg XR Tablet by M/s CCL Pharmaceuticals (Reg#110627)
	Name and address of API manufacturer.	**Dapagliflozin:** Fuxin Long Rui Pharmaceutical CO., Ltd., Fluoride Industrial Park, Fumeng County (Yi Ma Tu), Fuxin City, Liaoning Province -123000, China. **Metformin HCl:** Ipca Laboratories Limited., H-4, M.I.D.C., Waluj Aurangabad (Maharashtra) Pin: 431136, India
	Module-II (Quality Overall Summary)	The firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	**Dapagliflozin:** Firm has submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process

		and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance. **Metformin:** The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Stability study conditions: **Dapagliflozin:** Real time: 30˚C ± 2˚C / 65% ± 5%RH for 24 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (160108, 160124, 160220) **Metformin HCl:** Real time: 30˚C ± 2˚C / 65% ± 5%RH for 60 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (9002ML2RMI, 9003ML2RMI, 9004ML2RMI)
	Module-III (Drug Product):	The firm has submitted detail of composition, description of manufacturing process and controls, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence has been established against the innovator brand that is XIGDUO XR 10/1000mg Tablets by M/s Astra Zeneca USA by performing quality test (Identification, average weight, dissolution, assay) CDP has been performed against the same brand that is XIGDUO XR 10/1000mg Tablets by M/s Astra Zeneca USA in Acid media (pH 1.2), Acetate Buffer (pH 4.5) & Phosphate Buffer (pH 6.8). The values of f2 factor are in acceptable range
	Analytical method validation/verification of product	Firm has submitted method validation studies including Specificity, Linearity, range, accuracy, precision, LOD, LOQ, Robustness, solution stability, System Suitability.

STABILITY STUDY DATA	
Manufacturer of API	**Dapagliflozin:** Fuxin Long Rui Pharmaceutical CO., Ltd. Fluoride Industrial Park, Fumeng County (Yi Ma Tu), Fuxin City, Liaoning Province -123000, China. **Metformin HCl:** Ipca Laboratories Limited., H-4, M.I.D.C., Waluj Aurangabad (Maharashtra) Pin: 431136, India
API Lot No.	**Dapagliflozin:** L-DG-20210805-D02-DG06-01 **Metformin HCl:** 21023ML2AJMI
Description of Pack (Container closure system)	Alu-Alu blister packed in unit carton

Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)

Batch Size	4000 Tablets	4000 Tablets	4000 Tablets
Manufacturing Date	08-2021	09-2021	10-2021
Date of Initiation	06-11-2021	06-11-2021	06-11-2021
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	N/A
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Dapagliflozin:** Firm has submitted copy of GMP certificate in the name of M/s Fuxin Long Rui Pharmaceutical CO., Ltd., issued by Fuxin Food and Drug administration, valid upto 16-11-2024 Firm has submitted copy of DML (Certificate# Liao20150233) in the name of M/s Fuxin Long Rui Pharmaceutical CO., Ltd., issued by Liaoning Medical Products Administration, valid upto 20-12-2022 **Metformin HCl:** Firm has submitted copy of GMP certificate in the name of M/s Ipca Laboratories Limited., India., issued by Food and Drug administration, Maharashtra State India, valid upto 27-04-2024
3.	Documents for the procurement of API with approval from DRAP (in case of import).	**Dapagliflozin:** The firm has submitted a copy of invoice # HN210922-D) Dated 20-10-2021 for import of 15Kg of Dapagliflozin propanediol monohydrate (Batch# L-DG-20210805-D02-DG06-01) in name of M/s Highnoon Laboratories Ltd attested by AD (I&E) DRAP Lahore dated 12/11/2021. **Metformin HCl:** Firm has submitted copy of invoice# MEG2122/1630495 Dated 10-05-2021 for import of 6000Kg of Metformin HCl (Batch# 21023ML2AJMI, 21027ML2AJMI, 21116ML2AJMI, 21117ML2AJMI) in name of M/s Highnoon Laboratories Ltd attested by AD (I&E) DRAP Lahore 21-05-2021
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted data of stability batches supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Compliance Record of HPLC software 21CFR & audit trail reports on product testing is submitted

6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) is submitted

Remarks of Evaluator [XI]:

Section	Observations
1.5.2 / 3.2.P.1	• Label claim of the applied formulation with reference to the innovator product shall be submitted along with submission of applicable fee
1.5.6	• Clarification is required as you have applied for Manufacturer's Specifications / Innovator specifications?
3.2.S.4	• Justification is required for not including the test for propylene glycol content in drug substance specifications (dapagliflozin) by drug substance manufacturer and drug product manufacturer as recommended by innovator product review document
3.2.P.2	• Justification is required for using 5% (0.615mg) overage in case of dapagliflozin propanediol monohydrated in applied formulation
3.2.P.5	• Justification is required for not performing the identification test in batch analysis as recommended by innovator product review document • Specify the mesh size used with USP type-I apparatus used in dissolution studies
3.2.P.8	• Justification is required since submitted chromatograms show that content uniformity test for dapagliflozin and weight variation test for metformin is performed (22-11-2021) subsequent to the initiation of stability study (6-11-2021) for all batches

Previous Decision (M-326DRB): Registration Board deferred the case for submission of reply to the above cited shortcomings within six months.

Firms' s response:

Section	Observations	Response
1.5.2 / 3.2.P.1	• Label claim of the applied formulation with reference to the innovator product shall be submitted along with submission of applicable fee	• The firm submitted that our formulation is same as the reference product formulation and requested to consider the below label claim without submission of fee. Each bi-layered film coated tablet contains: Dapagliflozin (as propanediol monohydrate) (immediate release) …….10mg Metformin HCl (Extended release)…….1000mg
1.5.6	• Clarification is required as you have applied for Manufacturer's Specifications / Innovator specifications?	• The firm submitted that as the applied product is not available in any Pharmacopoeia, so it is Innovator's Specification.
3.2.S.4	• Justification is required for not including the test for propylene glycol content in drug substance specifications (dapagliflozin) by drug substance manufacturer and drug product manufacturer as recommended by innovator product review document	• The firm submitted that Propylene Glycol is also named as 1,2-Propane diol. 1,2-Propane diol is used as a reactant in the drug substance manufacturing, and it has been identified as impurity in DMF of drug substance i.e. section 3.2.S.3.2.1 of the submitted DMF. • This impurity along with other impurities is controlled collectively under the test of "Related substances" which has been reported in the COA of drug substance manufacturer as well as drug product manufacturer. Limits for both "individual impurity" and "Total impurity" are also mentioned in CoA. Extract of the DMF and COA are submitted
3.2.P.2	• Justification is required for using 5% (0.615mg) overage in case of dapagliflozin propanediol monohydrated in applied formulation	• The firm submitted that overage is used to compensate the process loss. We will ensure to not use the overage in commercial batches.

3.2.P.5	• Justification is required for not performing the identification test in batch analysis as recommended by innovator product review document • Specify the mesh size used with USP type-I apparatus used in dissolution studies	• The firm submitted that Identification test for drug product is performed and submitted revised COA's • The firm submitted that USP Type 1 basket of 40 mesh screens with wire openings of 0.36 - 0.44 mm as per USP Dissolution chapter <711> is used in dissolution studies. *However innovator product review document recommends use of USP Type 1 basket with 20 mesh.*
3.2.P.8	• Justification is required since submitted chromatograms show that content uniformity test for dapagliflozin and weight variation test for metformin is performed (22-11-2021) subsequent to the initiation of stability study (6-11-2021) for all batches	• The firm submitted that content uniformity test is performed at the time of release batches that's why it is included at the initial time point. While content uniformity test is not stability indicating that's why it is not included in the latter's time point of stability studies.
Decision: Deferred for submission of following: • **Scientific justification for using overage in case of Dapagliflozin propanediol monohydrated in applied formulation** • **Justification as submitted chromatograms show that content uniformity test for dapagliflozin and weight variation test for metformin is performed subsequent to the initiation of stability study for all batches** • **Fee of Rs. 7,500/- for correction/pre-approval change in label claim, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.**

	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Form-5F Dy. No 16112 dated 10-06-2021
	Details of fee submitted	Rs.20,000/- dated 03-05-2021
	Proposed proprietary name/brand name	Gludap 5mg Tablet
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Film Coated Tablet Contains: Dapagliflozin as Propanediol Monohydrate…5mg
	Pharmaceutical form of applied drug	Tablet
	Pharmacotherapeutic Group of (API)	Sodium-glucose co-transporter 2 (SGLT2) inhibitors
	Reference to Finished product specifications	In house

	Proposed Pack size	14's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	FARXIGA (5mg, 10mg) film coated tablets USFDA Approved
	For generic drugs (me-too status)	Xiga 5mg Tablets by M/s CCL Pharmaceuticals (Reg#090504)
	GMP status of the Finished product manufacturer	GMP certificate issued to firm on 21st May 2019, based on inspection conducted on 23-04-2019 & valid upto 22-4-20222
	Name and address of API manufacturer.	Jiangsu yongan Pharmaceutical Co. Ltd., No. 18, 237 provincial road economic development zone, huaian Jiangsu China.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance. The firm has submitted summarized information of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, control of excipients, control of drug product, specifications, analytical procedures, validation/verification of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Module III (Drug Substance)	The firm has submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, tests for impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability study is conducted at $40^{O} \pm 2^{O}C$ /75% ± 5% RH for 6 months. The real time stability study is conducted at $30^{O}C \pm 2^{O}$ C / 65% ± 5% RH for 36 months. (Batch No. 130401, 130402 & 130501)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures and its verification studies, batch analysis, justification of specifications, reference standard or materials, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence has been performed against innovator product Forxiga 5mg tablet.

		CDP has been performed against innovator product Forxiga 5mg tablet in Acid media (pH 1.2), acetate buffer pH 4.5 & Phosphate Buffer (pH 6.8). The values for f2 are in the acceptable range.
	Analytical method validation/verification of product	Method validation studies is submitted including linearity, range, accuracy, precision, specificity.

STABILITY STUDY DATA

Manufacturer of API	Jiangsu yongan Pharmaceutical Co. Ltd., No. 18, 237 provincial road economic development zone, huaian Jiangsu China.		
API Lot No.	DGF-201902001

Manufacturing Date	01-2020	01-2020	01-2020
Date of Initiation	08-01-2020	08-01-2020	08-01-2020
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm submitted copy of minutes of 296th meeting of registration board dated 8th, 9th & 10th September, 2020 in which their product Empaglif 10mg and 25mg applied on form 5F has been approved based on the inspection conducted by the panel for authenticity of stability data
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	The firm submitted copy of GMP certificate of Jiangsu Yongan Pharmaceutical Co., Ltd China valid up to 03-03-2021
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted clearance certificate and form 6 attested by Assistant Director (I&E) DRAP Islamabad dated 01-04-2019 for the import of 200gm Dapagliflozin Propanediol Monohydrate and 5mg impurity A and 5mg Impurity B. However, the firm has not submitted invoice for import of said materials.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted audit trail reports on product testing
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator [XI]:

Section	Observations	Response
1.3.4	Submit Valid copy of Drug Manufacturing License	The firm have submitted valid Drug Manufacturing License
1.6.5	Submit valid GMP certificate of the Drug Substance manufacturer issued by relevant regulatory authority of country of origin.	The firm submitted valid GMP certificate
3.2.S.4.1. - 3.2.S.4.2	Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by Drug Product manufacturer is required.	Firm have submitted Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by Drug Product manufacturer. However, the chromatographic test conditions were different as compared with drug substance manufacturer. For example, the chromatographic conditions used by the **drug substance manufacturer are:** **Related substances:** Mobile phase; Water R (0.01M NaH2PO4); Acetonitrile R (50;50v/v) DetectIion; 225nm Injection; 20ul Flow rate; 1ml/min **Drug product manufacturer;** **Related substances:** Mobile phase; Methanol:Water (70;30 v/v) Detectio; 223nm Injection; 20ul Flow rate; 1.5ml/min Temperature; 40ºC **Drug substance manufacturer:** **Assay:** Mobile phase; Water R (0.01M NaH2PO4); Acetonitrile R (50;5 v/v) Detection; 225nm Injection; 20ul Flow rate; 1ml/min Temperature: 25ºC **Drug product manufacturer;** **Assay:** Mobile phase; Methanol:Water (70;30 v/v) Detection; 223nm Injection; 20ul Flow rate; 1.5ml/min Temperature; 40ºC
3.2.S.4.3	• Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance(s) shall be submitted.	The firm have submitted Analytical Method validation studies performed by the Drug Product manufacturer for drug substance(s)
3.2.S.4.4	• In batch analysis of drug substance performed by drug product manufacturer, in test for	• The firm submitted that during analysis Dapagliflozin was identified. *However due to typo-graphical error Empagliflozin was written*

	identification you have submitted that it is positive for empagliflozin while the applied product is dapagliflozin, clarify? • Justification shall be provided for any incomplete analyses of the drug substance / API by Drug Product manufacturer (propanediol, residue on ignition, heavy metals, related substances, residual solvents, particle size)	*instead of dapagliflozin in COA. The rectified COA with supportive documents is submitted*. • No justification provided for incomplete analysis
3.2.P.1	• You have used lactose monohydrate in your formulation while innovator product has used lactose anhydrous. Justify that the applied product is equivalent to innovator product.	The firm submitted that we designed formulation qualitatively similar to innovator (Forxiga tablet). *We actually used lactose anhydrous and was mistakenly written as lactose monohydrate. The firm have submitted revised BMR.*
3.2.P.4	• In control of excipients you have given specifications for croscarmellose while you have not used croscarmellose in formulation, clarify? Moreover, you have used lactose monohydrate while you have not provided specifications of lactose monohydrate?	The firm submitted that it was mistakenly written, specifications for lactose anhydrous is submitted
3.2.P.8.1	• Stability data of drug product at initial time point is not submitted • You have mentioned in house specifications in module I section 1.5.6 while innovators specifications in stability summary sheets, clarify?	• Stability data of drug product at initial time point is submitted • The firm submitted that they have designed their product on innovator's specifications and updated the specifications at section 1.5.6. as innovator's specifications without submission of applicable fee. The firm also submitted revised form 5F
	• Submit invoice for the imported raw materials. • Submit Compliance Record of HPLC software 21CFR • Provide complete calculation for determining the quantity of dispensed drug substance keeping in view water content	• The firm have not submitted invoice for the imported raw material • The firm submitted A General Compliance certificate of HPLC software 21CFR • The firm have submitted calculation for determining the quantity of dispensed drug substance on theoretical basis. *The water content was not kept in mind while making calculation for dispensing drug substance*

Previous Decision (M-316-DRB) : Deferred for following:

- Justification for incomplete analyses of the drug substance / API by Drug Product manufacturer
- Justification for using different chromatographic conditions for analysis of related substances and assay test by the drug product manufacturer than those applied by drug substance manufacturer.
- Clarification for not considering the water content while making calculation for dispensing of drug substance
- Submission of the fee of Rs. 7,500 for correction/pre-approval change in product specifications, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.

Evaluation by PEC:

Deferment reasons	**Response**

• Justification for incomplete analyses of the drug substance / API by Drug Product manufacturer	The firm submitted that testing of propanediol contents were not performed due to unavailability of GC. In future testing will be done through 3rd party i.e. M/s Rotex Pharmaceuticals and submitted copy of agreement for contract testing of raw materials
• Justification for using different chromatographic conditions for analysis of related substances and assay test by the drug product manufacturer than those applied by drug substance manufacturer.	The firm has submitted revised DMF of drug substance manufacturer from drug substance manufacturer and chromatographic conditions of drug substance manufacturer and drug product manufacturer are same. The firm further stated that this source of API have been used for the manufacturing of product for stability batches. The previous DMF has been mistakenly submitted in the dossier
• Clarification for not considering the water content while making calculation for dispensing of drug substance	The firm submitted that Water contents are already calculated in factor calculation
• Submission of the fee of Rs. 7,500 for correction/pre-approval change in product specifications, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.	Firm has submitted fee Rs. 7500/- on deposit slip# 09840920132 for correction/pre-approval change in product specifications, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.

Decision: Deferred for submission of following:

- **Clarification regarding legal provision of outsourcing testing of drug substance from M/s Rotex Pharmaceuticals since applied application is of self-manufacturing.**
- **Clarification from the drug substance manufacturer regarding revised DMF along with trail of revision of drug substance analytical procedure.**

	The status in reference regulatory authorities	FARXIGA (5mg, 10mg) film coated tablets USFDA Approved
	For generic drugs (me-too status)	Dapa 10mg Tablet by M/s Hilton Pharma (Reg#089368)
	GMP status of the Finished product manufacturer	GMP certificate issued to firm on 21st May 2019, based on inspection conducted on 23-04-2019 and valid upto 22-04-20222
	Name and address of API manufacturer.	Jiangsu yongan Pharmaceutical Co. Ltd., No. 18, 237 provincial road economic development zone, huaian Jiangsu China.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance. The firm has submitted summarized information of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, control of excipients, control of drug product, specifications, analytical procedures, validation/verification of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Module III (Drug Substance)	The firm has submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, tests for impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability study is conducted at $40^{O} \pm 2^{O}C$ /75% ± 5% RH for 6 months. The real time stability study is conducted at $30^{O}C \pm 2^{O}$ C / 65% ± 5% RH for 36 months. (Batch No. 130401, 130402 & 130501)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures and its verification studies, batch analysis, justification of specifications, reference

		standard or materials, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence has been performed against innovator product Forxiga 10mg tablet. CDP has been performed against innovator product Forxiga 10mg tablet in Acid media (pH 1.2), acetate buffer pH 4.5 & Phosphate Buffer (pH 6.8). The values for f2 are in the acceptable range.
	Analytical method validation/verification of product	Method validation studies is submitted including linearity, range, accuracy, precision, specificity.

STABILITY STUDY DATA				
Manufacturer of API		Jiangsu yongan Pharmaceutical Co. Ltd., No. 18, 237 provincial road economic development zone, huaian Jiangsu China.		
API Lot No.		DGF-201902001		
Description of Pack (Container closure system)		Alu/Alu Blister Packing		
Stability Storage Condition		Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period		Real time: 24 months Accelerated: 6 months		
Frequency		Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6, 9, 12, 18, 24 (Months)		
Batch No.		DPT-004	DPT-005	DPT-006
Batch Size		1500 tab	1500 tab	1500 tab
Manufacturing Date		01-2020	01-2020	01-2020
Date of Initiation		13-01-2020	13-01-2020	13-01-2020
No. of Batches		03		
Administrative Portion				
1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm submitted copy of minutes of 296th meeting of registration board dated 8th, 9th & 10th September, 2020 in which their product Empaglif 10mg and 25mg applied on form 5F has been approved based on the inspection conducted by the panel for authenticity of stability data		
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	The firm submitted copy of GMP certificate of Jiangsu Yongan Pharmaceutical Co., Ltd China valid up to 03-03-2021		
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted clearance certificate and form 6 attested by Assistant Director (I&E) DRAP Islamabad dated 01-04-2019 for the import of 200gm Dapagliflozin Propanediol Monohydrate and 5mg impurity A and 5mg Impurity B. However, the firm has not submitted invoice for import of said materials.		

4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted audit trail reports on product testing
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator [XI]:

Section	Observations	Response
1.3.4	Submit Valid copy of Drug Manufacturing License	The firm have submitted valid Drug Manufacturing License
1.6.5	Submit valid GMP certificate of the Drug Substance manufacturer issued by relevant regulatory authority of country of origin.	The firm submitted valid GMP certificate
