	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 24 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, verification of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted pharmaceutical equivalence their product against the clarinex Syrup of M/s. Merck & Co. Inc.
	Analytical method validation/verification of product	Firm has submitted analytical method verification study reports for drug substance as well as drug product.

STABILITY STUDY DATA			
Manufacturer of API	M/s. Morepen Laboratories Limited Village Masulkhana, Perwanoo Distt. Solan Perwanoo Himachal Pardesh, India.		
API Lot No.	DH-0106		
Description of Pack (Container closure system)	Amber color pet bottle with Aluminium Cap is packed in unit carton.		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6,9,12,18,24 (Months)		
Batch No.	T-01	T-02	T-03
Batch Size	100 bottles	100 bottles	100 bottles
Manufacturing Date	01-2023	01-2023	01-2023
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	N/A
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP Certificate (No. HFW-H (Drugs) 56/98 issued dated 10/01/2022 by

		Health & Family Welfare Department Himachal Pardesh and valid for two years.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm submitted commercial invoice without DRAP attestation.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record for product testing.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	N/A
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator:

S.no.	Section	Observations/Deficiencies/ Short-comings
1.	3.2.S.4.2	Drug substance analytical procedure shall be submitted from both drug substance manufacturer and drug product manufacturer.
2.	3.2. P.2	Formulation contain preservative, so preservative effectiveness studies to be performed as per recommendations of pharmacopoeia and shall be submit.
3.	3.2.P.2.2.1	In compliance of notification no. 14-1/2022-PEC dated 16th January,2023 issued by DRAP, submit the image/picture/snapshot of innovator /reference/comparator pack against which Pharmaceutical equivalence/Comparative dissolution profile studies have been performed.
4.	3.2.P.4	Submit the analysis report/COA of excipients propylene glycol and sorbitol which includes the results of impurity testing related to the presence of ethylene glycol and diethylene glycol, in compliance of notification issued by DRAP vide letter No. F.3-42/2023-QC dated 1st, December,2023.
5.	3.2.P.5.2	• Clarification required regarding the instrument used for assay of drug product either the assay has performed on HPLC or UV spectrophotometer. Since the assay method given in section 3.2.P.5.2 is on UV while validation report and stability data revealed that the assay has been performed on HPLC. • Provide detailed procedure of uniformity of dosage unit test and deliverable volume test.
6.	3.2.P.5.4	Provide results of impurity testing relevant to the presence of ethylene glycol and diethylene glycol contamination in the drug in compliance of notification issued by DRAP vide letter No. F.3-42/2023-QC dated 1st, December,2023.
7.	3.2.P.8	• Justify the batch size against the number of units to complete stability studies. • Documents confirming import of drug substance with approval from DRAP I&E Office, shall be submitted. • Submit Compliance Record of HPLC software 21CFR & audit trail reports on product testing.
8.	2.3.R.1.1	Provide Batch Manufacturing Record (BMR) of three stability batches.

Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings

	The proposed proprietary name / brand name	Iodopaque Injection 320mgI/ml
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	320mg Iodine/ml (100ml vial)
	Pharmaceutical form of applied drug	IV Injection
	Pharmacotherapeutic Group of (API)	Iodinated Contrasting Media
	Reference to Finished product specifications	USP
	Proposed Pack size	1x1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	USFDA (Iodixanol 350mgI/ml,100ml)
	For generic drugs (me-too status)	Visipaque 320mgI/ml (50ml as per available data)(Reg.no.043052) M/s. Bayer

	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure,general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities,specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Name, address of drug substance manufacturer	M/s. Jiangsu Hengrui Pharmaceuticals Co. Ltd. (Jinqiao Road Site) 22 Jinqiao Road, Dapu Industrial Park, Economic and Technological Development Zone, Lianyungang, Jiangsu 222002, China.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data for both sources related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, characterization, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of API at accelerated as well as real time conditions. The accelerated and real time stability data are conducted at (40±2ºC/75±5%RH) and (25±2ºC/60±5%RH) respectively. The stability study data is till 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, control of critical steps and intermediate products, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted pharmaceutical equivalence report against the reference listed drug Visipaque 320 NDA 020351 of M/s. GE Healthcare.
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	Iodixanol Injection 320mgI/ml is filled into 100ml colourless and translucent polypropylene bottle, sealed with a d=grey bromobutyl rubber stopper and secured with a colorless polypropylene cap (PP cap) with tamper-evident ring.
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of batches of volume sizes 50ml,100ml & 150ml. The accelerated stability study data is conducted at 40ºC ±2ºC / 20% ± 5% RH for 6 months. The real time stability study data is conducted at 30ºC ±2ºC /35 % ± 5% RH.

Evaluation by PEC:

S.no.	Section	Observations/Deficiencies/ Short-comings
1.	1.3.3	Submit valid, original and legalized Certificate of Pharmaceutical Product (CoPP) / Free Sale certificate issued by relevant regulatory authority of country of origin. Further, clarification is required either the drug product is import from China or United States of America, since you have submitted the copy of CoPP/ Free sale certificate in which the exporting country is United State of America, while the Manufacturer, manufacturing authorization holder and letter of authorization is M/s. Jiangsu Hengrui Pharmaceuticals Co. Ltd. China .

Decision: Deferred for submission of valid, original and legalized Certificate of Pharmaceutical Product (CoPP) / Free Sale certificate issued by relevant regulatory authority of country of origin. Further, clarification is required either the drug product is imported from China or United States of America, since you have submitted the copy of CoPP/ Free sale certificate in which the exporting country is United State of America, while the Manufacturer, manufacturing authorization holder and letter of authorization is from M/s. Jiangsu Hengrui Pharmaceuticals Co. Ltd. China .

Contract manufacturing applications as per decision of 173rd meeting of Authority:

Authority in its 173rd meeting has decided as under:

"The Authority, in order to further enhance the working efficiency and quick disposal of pending registration applications, approved to create a separate queue for registration applications for contract manufacturing submitted on Form-5F in the order of date of submission. This Queue will be updated after each meeting of Registration Board."

The name of importing country on CoPP is mentioned. Furthermore the CoPP was valid till 31-10-2021.
	Details of letter of authorization / sole agency agreement	Firm has submitted copy of letter of distribution certificate from Beijing Beilu Pharmaceutical Co., Ltd. The letter species that the manufacturer appoints M/s Grace Pharmaceuticals. To register their products in Pakistan. The authorization letter is valid till 30-04-2026.
	Status of the applicant	☐ Manufacturer ☒ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☒ New Drug Product (NDP) ☐ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	For imported products, specify one the these	☒ Finished Pharmaceutical product import ☐ Bulk import and local repackaging ☐ Bulk import and local repackaging for export purpose only
	Dy. No. and date of submission	Dy. No. 153 : 03-01-2022
	Details of fee submitted	PKR 75,000/-: vide slip no. 5548215985
	The proposed proprietary name / brand name	Intrapaque 50 mL : 16g I Injection
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each mL contains: Iodixanol …….50ml (50ml:16g I)
	Pharmaceutical form of applied drug	Injection.
	Pharmacotherapeutic Group of (API)	Medical Imaging Drug
	Reference to Finished product specifications	USP Specification
	Proposed Pack size	1 VIAL
	Proposed unit price	N/A
	The status in reference regulatory authorities	Visipaque® 320mg Iodine/ml GE Healthcare AS USFDA APPROVED

	For generic drugs (me-too status)	Visipaque 320mgI/ml (50ml as per available data)(Reg.no.043052) M/s. Bayer
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Name, address of drug substance manufacturer	GE Healthcare As Lindesnesveien208, N0-4551 Lindesnes, Norway
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance. Drug substance monograph is present in USP.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 three batches of IODIXANOL Injection instead of iodixanol API. The real time stability data is conducted at 30 ℃±2, RH 65%±5%.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, containerclosure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm submitted the comparative study on quality of iodixanol injection (50ml:16mg(I) between reference preparation and self-made preparation.
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	Medium borosilicate glass infusion bottle, strength: 50ml Bottle Pack: Halogenated butyl rubber stopper for injection (chlorinated), strength: 32mm Aluminum-plastic composite cover for infusion bottle, strength: 32mm
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches The accelerated stability study data is conducted at 40ºC ±2ºC / 75% ± 5% RH for 6 months. The real time stability study data is conducted at 30ºC ±2ºC / 65% ± 5% RH. Accelerated Stability batches: R200101, R200102, R200103 Real Time Stability Batches: R200102 (18 months) R200103 (36 months)
VISIPAQUE is indicated in for: 1.1 Intra-arterial Procedures Adult and pediatric patients 12 years of age and older • (270 and 320 mg Iodine/mL) intra-arterial digital subtraction angiography (IA-DSA). • (320 mg Iodine/mL) angiocardiography (left ventriculography and selective coronary arteriography), peripheral arteriography, visceral arteriography, and cerebral arteriography. Pediatric patients less than 12 years of age		

• (320 mg Iodine/mL) angiocardiography, cerebral arteriography, and visceral arteriography. 1.2 Intravenous Procedures Adult and pediatric patients 12 years of age and older
• (270 and 320 mg Iodine/mL) CT imaging of the head and body.
• (270 and 320 mg Iodine/mL) excretory urography.
• (270 mg Iodine/mL) peripheral venography.
• (320 mg Iodine/mL) coronary computed tomography angiography (CCTA) to assist in the diagnostic evaluation of patients with suspected coronary artery disease. Pediatric patients less than 12 years of age
• (270 mg Iodine/mL) CT imaging of the head and body.
• (270 mg Iodine/mL) excretory urography.
Evaluation by PEC:
Firm has to be submit requisite fee for imported product, since the Me-Too of 50ml is available in the record.

S.no.	Sections	Observations/Deficiencies/ Short-comings
1.	Submit valid original and legalized Certificate of Pharmaceutical Product (CoPP) / Free Sale certificate and GMP certificate of the Manufacturer issued by relevant regulatory authority in the country of origin and name of exporting country, since the submitted CoPP is invalid.	
2.	3.2.S.4.1-3.2.S.4.2	Submit copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required".
3.	3.2.S.4.3	Submit data of verification of analytical procedure of drug substance in section 3.2.S.4.3 as per the guidance document approved by Registration Board which specifies that *"Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted".*
4.	3.2.S.4.3	Submit batch analysis report of drug substance in section 3.2.S.4.4 as per the guidance document approved by Registration Board which specifies that *"Provide results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (CoA) of the same batch from Drug Substance / /Active Pharmaceutical Ingredient manufacture. A discussion and justification shall be provided for any incomplete analyses of the drug substance / API by Drug Product manufacturer (e.g. results not tested according to the proposed specification)".*
5.	3.2.S.5	Submit COA of reference standards in section 3.2.S.5 as per the guidance document approved by Registration Board which specifies that *"For testing of Pharmacopeial Drug Substance, the use of primary reference standard is recommended, however for non-pharmacopeial Drug Substance, a secondary reference standard provided by the Drug Substance manufacturer is acceptable. COA of primary / secondary reference standard including source and lot number shall be provided".*
6.	3.2.S.6	Submit details of container closure system of drug substance in section 3.2.S.6 as per the guidance document approved by Registration Board which specifies that "*Description of the container closure system(s) for the shipment and storage of the API including materials of construction of each primary packaging component. Other information on the container closure system(s) (e.g. suitability studies) may be submitted".*
7.	3.2.S.7	Submit data in section 3.2.S.7 as per the guidance document approved by Registration Board which specifies that "The protocols used and the results of the accelerated and long-term stability studies shall be summarized. Proposed storage conditions / statement and re-test period (or shelf-life, as appropriate) shall also be submitted". Since you have submitted the compatibility results of Iodixanol with excipient.

8.	3.2.P.2.2.1	Submit details regarding batch number, manufacturing and expiry date of your as well as the comparator product used in pharmaceutical equivalence studies.
9.	3.2.P.5.3	Submit data of verification of assay procedure of drug product in section 3.2.P.5.3 as per the guidance document approved by Registration Board which specifies that "*All the officially recognized compendial methods for assay, dissolution and impurities (as applicable) are required to be verified and verification shall include a demonstration of specificity, repeatability (method precision) and accuracy".*

Decision of 326th meeting of Registration Board:
Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.

Response of the Firm:

S.no.	Sections	Observations/Deficiencies/ Short-comings	Response of the Firm
1.	Submit valid original and legalized Certificate of Pharmaceutical Product (CoPP) / Free Sale certificate and GMP certificate of the Manufacturer issued by relevant regulatory authority in the country of origin and name of exporting country, since the submitted CoPP is invalid.		Firm submitted the copy of CoPP certificate no.20230045 issue dated 13-02-2023 by Biejing Municipal Medical Product Administration, which is valid till 12-02-2025.
2.	3.2.S.4.1-3.2.S.4.2	Submit copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required".	Firm submitted the specification and analytical procedure of drug substance by drug product manufacturer i.e. M/s. Beijing Beilu Pharmaceutical Co., Ltd, while drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by drug substance manufacturer i.e. M/s. GE Healthcare As. has not been submitted.
3.	3.2.S.4.3	Submit data of verification of analytical procedure of drug substance in section 3.2.S.4.3 asper the guidance document approved by Registration Board which specifies that *"Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted".*	Firm replied that "Bielu analyzes API according to USP compendial method. So Bielu Pharmaceuticals did not conduct methodological validation.
4.	3.2.S.4.3	Submit batch analysis report of drug substance in section 3.2.S.4.4 as per the guidance document approved by Registration Board which specifies that *"Provide results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product*	Firm submitted Batch analysis report of drug substance only by drug product manufacturer.

		development and stability studies, along with Certificate of Analysis (CoA) of the same batch from Drug Substance / /Active Pharmaceutical Ingredient manufacture. A discussion and justification shall be provided for any incomplete analyses of the drug substance / API by Drug Product manufacturer (e.g. results not tested according to the proposed specification)".		
5.	3.2.S.5	Submit COA of reference standards in section 3.2.S.5 as per the guidance document approved by Registration Board which specifies that *"For testing of Pharmacopeial Drug Substance, the use of primary reference standard is recommended, however for non-pharmacopeial Drug Substance, a secondary reference standard provided by the Drug Substance manufacturer is acceptable. COA of primary / secondary reference standard including source and lot number shall be provided".*	Firm has not submitted the COA of reference standard of iodixanol.	
6.	3.2.S.6	Submit details of container closure system of drug substance in section 3.2.S.6 as per the guidance document approved by Registration Board which specifies that "*Description of the container closure system(s) for the shipment and storage of the API including materials of construction of each primary packaging component. Other information on the container closure system(s) (e.g. suitability studies) may be submitted".*	Firm submitted the requisite details.	
7.	3.2.S.7	Submit data in section 3.2.S.7 as per the guidance document approved by Registration Board which specifies that "The protocols used and the results of the accelerated and long-term stability studies shall be summarized. Proposed storage conditions / statement and re-test period (or shelf-life, as appropriate) shall also be submitted". Since you have submitted the compatibility results of Iodixanol with excipient.	Firm submitted the stability data of drug substance submitted by drug product manufacturer (M/s. Biejing Bielu Pharmaceuticals Co. Ltd., China instead of M/s. GE Health care, Norway) till 18 months while the claimed shelf life mentioned on the document is 36 months.	
8.	3.2.P.2.2.1	Submit details regarding batch number, manufacturing and expiry date of your as well as the comparator product used in	Firm submitted the details of reference product i.e. Reference preparation Manufacturing: GE Healthcare As Expiry date: 36 months.	

		pharmaceutical equivalence studies.		
9.	3.2.P.5.3	Submit data of verification of assay procedure of drug product in section 3.2.P.5.3 as per the guidance document approved by Registration Board which specifies that "*All the officially recognized compendial methods for assay, dissolution and impurities (as applicable) are required to be verified and verification shall include a demonstration of specificity, repeatability (method precision) and accuracy".*	Firm submitted the analytical method validation report of assay procedure of drug product.	

Decision: Deferred for submission of following:

- **Submit specification and analytical procedure of drug substance used by drug substance manufacturer.**
- **Provide analytical method verification report of drug substance performed by drug product manufacturer.**
- **Submit Certificate of analysis of API from drug substance manufacturer.**
- **Submit complete stability data of drug substance conducted at both accelerated and long term condition till the claimed re-test date, performed by the drug substance manufacturer.**

	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description

		of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies of Drug Substance	Stability study conditions: Real time: 2-8°C for 18 months Accelerated: 25°C ± 2°C / 60% ± 5%RH for 6 months Batches: (18082701, 18090601, 18120702)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Stability studies of Drug Product	Stability study conditions: Real time: 2-8°C for 36 months Accelerated: 25°C ± 2°C / 60% ± 5%RH for 6 months Batches: (T190707, T190708, T190709)
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical equivalence performed against RMP Glycylpressin of M/s. Ferring Pharmaceuticals.
	Analytical method validation/verification of product	Firm has submitted verification studies of the drug substance and the drug product.

Remarks OF Evaluator:

S.no.	Sections	Observations/Deficiencies/ Short-comings
1.	1.3.3	• Submit valid original and legalized Certificate of Pharmaceutical Product (CoPP) / Free Sale certificate and GMP certificate of the Manufacturer issued by relevant regulatory authority in the country of origin and name of exporting country, since you have submitted the copy of CoPP/ Free sale certificate. • Further, submit letter of authorization/sole agent agreement from Product license holder i.e. M/s. ADOH B.V. Godfried Bomansstraat 31 6543 JA Nijmegen, The Netherland. Furthermore, clarify the route of shipment of applied product in Pakistan along with legalized requisite document.
2.	3.2.S.4.1	Justify for not adopting the BP specification for the analysis of drug substance when the monograph of drug substance is available in BP.
3.	3.2.S.4.2	Please clarify the analytical method used for analysis of amino acid, since the submitted procedures of amino acid analysis are not in accordance with the reference general chapter of amino acid i.e.2.2.56 as mentioned in BP monograph of terlipressin.
4.	3.2.S.4.4	Please submit the English translated copy of COA of drug substance by drug substance manufacturer.
5.	3.2.S.5	Provide certificate of analysis of reference standard /working standard used for testing of the drug substance.
6.	3.2.P.1	Scientific justification is required for using overage of active ingredient in the formulation along with overfilling of quantity per vial.
7.	3.2.P.2.2.1	Provide pharmaceutical equivalence report in which comparative quality analysis of both tested product and reference product should be presented in the tabulated form.
8.	2.3.R.1.1	Please clarify the fill volume range mentioned in BMR i.e. between 9.12g-9.30g with reference to the label claim of applied product which is 0.85mg Terlipressin (base free) contains in 8.5ml solution.

Decision of 331st meeting of Registration Board:
Registration Board deferred the case for submission of reply to the above cited shortcomings.

Response of the Firm:

S.no.	Sections	Short-comings	Response of the Firm

1.	1.3.3	Submit valid original and legalized Certificate of Pharmaceutical Product (CoPP) / Free Sale certificate and GMP certificate of the Manufacturer issued by relevant regulatory authority in the country of origin and name of exporting country, since you have submitted the copy of CoPP/ Free sale certificate.	Firm submit the original legalized CoPP (certificate no. 20230131) issue dated 25-10-2023 by Hainan Provincial Medical Products Administration and valid till 24-10-2025.	
2.	1.3.3	Further, submit letter of authorization/sole agent agreement from Product license holder i.e. M/s. ADOH B.V. Godfried Bomansstraat 31 6543 JA Nijmegen, The Netherland. Furthermore, clarify the route of shipment of applied product in Pakistan along with legalized requisite document.	Firm not submitted the reply of this query.	
3.	3.2.S.4.1	Justify for not adopting the BP specification for the analysis of drug substance when the monograph of drug substance is available in BP.	Firm replied that the proposed specification of drug substance is equivalent or stricter than BP monograph of Terlipressin.	
4.	3.2.S.4.2	Please clarify the analytical method used for analysis of amino acid, since the submitted procedures of amino acid analysis are not in accordance with the reference general chapter of amino acid i.e.2.2.56 as mentioned in BP monograph of terlipressin.	Firm replied that the specification and analytical procedure of analysis of amino acid is established as per the specification and analytical procedure listed in CEP of terlipressin, which has been approved by EMA. Since the analytical procedure listed in Ph. Eur. 2.2.56 are the general procedure which are not established for the specific product, so the proposed analytical procedure is not exactly same as the method in Ph. Eur. 2.2.56. The proposed method is specific for the Terlipressin manufactured by Chinese Peptide Company and also the proposed analytical procedure has been fully validated for the use.	
5.	3.2.S.4.4	Please submit the English translated copy of COA of drug substance by drug substance manufacturer.	Submitted	
6.	3.2.S.5	Provide certificate of analysis of reference standard /working standard used for testing of the drug substance.	Submitted	
7.	3.2.P.1	Scientific justification is required for using overage of active ingredient in the formulation along with overfilling of quantity per vial. Firm replied that there is no overage in the proposed drug product. The filling weight is determined on analysis on RMP and extractable study. Firstly, the analysis on RMP shows that the filling volume of RMP is about 9ml, so we firstly designed a filling volume of 9ml equivalent to 9.03g, to achieve the quantitative equivalence with the RMP. Secondly, according to USP <1151>, each container of an injection is filled with a volume in slight excess of the labelled size, a series of extractable quantity studies were performed. The study result demonstrated that when control the filling weight above 9.03g (i.e.9ml) the actual available extractable amount can satisfy the labelled amount (8.5ml, equal to 8.53g). The concentration of terlipressin in terlipressin solution for injection is 0.1mg/ml, thus the quantity of terlipressin in each vial should be 0.9mg(calculated on anhydrous, acetic acid free-base). Compared to label amount of 0.85mg, there is about 6% overfill.		

		However, the manufacturer should follow the general guidance of USP <1151> on the target volume i.e. 8.5 ml as per the label claim of drug product instead of targeting the filled volume of reference pack of RMP.		
8.	3.2.P.2.2.1	Provide pharmaceutical equivalence report in which comparative quality analysis of both tested product and reference product should be presented in the tabulated form.	Firm submitted the pharmaceutical equivalence report performed against the product GLYCYLPRESSIN (batch no. N00043C).	
9.	2.3.R.1.1	Please clarify the fill volume range mentioned in BMR i.e. between 9.12g-9.30g with reference to the label claim of applied product which is 0.85mg Terlipressin (base free) contains in 8.5ml solution.	Firm replied that in order to achieve the quantitative equivalence with the RMP and ensure the sufficient extractable quantity (i.e. 0.85mg terlipressin) of terlipressin solutionfor injection, the minimum filling weight is determined to be 9.03g I.e. the lower limit of action level is 9.03g.	

Decision: Deferred forollowing:

- **Clarification is required regarding the product license holder, since the earlier submitted documents revealed that the Product license holder is M/s. ADOH B.V. Godfried Bomansstraat 31 6543 JA Nijmegen, The Netherland and the recently submitted CoPP specified that the product license holder is Hainan poly pharma Co. Ltd., China.**
- **Submit letter of authorization/sole agent agreement from Product license holder. Furthermore, clarify the route of shipment of applied product in Pakistan along with legalized requisite document.**
- **Justify the target fill volume for applied product with reference to the label claim and allowable "Excess Volume in injections" as per USP General Chapter <1151>.**

	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches. Accelerated stability studies have been conducted at 40°C±2°C and 75%±5% RH for 6 months. Real time stability studies conducted at 30°C±2°C and 65% ± 5% for 36 months

Evaluation by PEC:

Sr.no.	Observations/Deficiencies/ Short-comings	Response of the Firm
1.	Submit valid certificate of Good Manufacturing Practices of drug product manufacturer, since the submitted document has been expired in 2021.	Firm submitted the GMP certificate no. DA/6-110/06/6751 dated 23rd March,2023 issued by Directorate General of Drug Administration, Dhaka, Bangladesh and valid for 2 years.
2.	Submit data of analytical Method verification studies under section 3.2.S.4 including specificity, accuracy and repeatability (method precision) since you have submitted validation studiesGC method for determination of residual solvent of Sunitinib Malate.	Firm submitted the analytical verification data of drug substance.
3.	Scientific justification is required that how your applied product be equivalent to innovator product as the sutent brand is the capsule filled with granules, while the applied product is the capsule filled with dry powder mixture of active material and excipient.	Firm replied that as per *GUIDELINE THE INVESTIGATION OF BIOEQUIVALENCE* (Doc. Ref.: CPMP/EWP /QWP/1 401/98 Rev. 1/ Corr**) (EMA guidelines) Medicinal products are pharmaceutically equivalent if they contain the same amount of the same active substance(s) in the

		same dosage forms that meet the same or comparable standards. We have manufactured Sunitix Capsule is identical as oral capsule dosage form as reference product (Sutent Capsule). Sunitix Capsulecontains Sunitinib Malate equivalent Sunitinib which is identical Sutent Capsule which contains Sunitinib Malate equivalent Sunitinib. An open label, balanced, randomized, two-treatment, two-sequence, two- period, crossover oral bioequivalence study of single dose of Sunitix Capsule (Each capsule contains Sunitinib Malate equivalent Sunitinib) of Beacon Pharmaceuticals Limited with Sutent Capsule (Each capsule contains Sunitinib Malate equivalent Sunitinib) of Pfizer Limited already performed. There was no serious adverse effect reported during study period & clinically safe as a single oral dose administration. Based on Pharmacokinetic Variables & statistical evaluation, it was observed that for both the test & reference product are bioequivalent.	
4.	*According to the FDA's Dissolution guidance document 2018 (same document has been referred for innovator product) the standard dissolution testing condition for sunitinib malate capsule should be "Paddle Method (USP apparatus 2) • Stirring rate = 50 RPM • 500 mL of 0.1N HCl in aqueous medium • No surfactant in medium • 37±0.5°C". While the dissolution medium specified by the drug product manufacturer under section 3.2.P.2 and 3.2.P.5.2 was different from the said FDA's guidance document in term of use of surfactant. Scientific justification is required for using different dissolution medium from that of innovator product approved in USFDA.* *Justify the dissolution specification NLT 70% of the labelled amount of sunitinib is dissolved in 60 minutes in light of FDA dissolution database and innovator product's review literature. Since the acceptance criteria as per the FDA dissolution database refer to FDA's dissolution guidance 2018 in which it is recommended that "for immediate release solid oral drug products containing a high solubility drug substance the dissolution criterion is Q=80% in 30 minutes", further, the innovator product approved in FDA also recommend Q at 30 minutes.* Firm submitted the revised dissolution with the claimed of in line to innovator product sutent capsule of USFDA along with revised CDP report.		
	Dissolution condition of applied product	Dissolution condition of Innovator's Formulation	
	Apparatus USP II (Paddle System) Dissolution medium: 0.1N HCl Volume: 900ml RPM: 50 Temperature: 37°C ± 0.5°C Dissolution Time: 30 minutes Acceptance Criteria: NLT 80% of thelabeled amount of sunitinib is dissolved in 30 minutes.	Apparatus USP II (Paddle System) Dissolution medium: 0.1M HCl Volume: 900ml Temperature: 37°C ± 0.5°C Dissolution acceptance criteria : NLT Q in 30 minutes.	
5.	All quality test which have been included in the finished product specification was not performed during pharmaceutical equivalence studies, clarification is required in this regard.	Firm submitted the revised pharmaceutical equivalence report in which all the quality test was included in line with drug product specification.	
6.	Assay limits mentioned in the pharmaceutical equivalence data is in percentage without the clarification that either it is the quantification of salt form or its base form. While the acceptance	Firm submitted the revised pharmaceutical equivalence report in which the assay limit is specified both in percentage and in mg.	

	criteria specified in the finished product specification was content of sunitinib per capsule i.e.45.0mg to 55.0m.Justification is required regarding the disparity in acceptance criteria of assay of drug product in various sections.		
7.	Detailed analytical method validation report is required mentioning the concentration of test solutions and their individual results along with the results of mean value.	Firm has submitted the revised analytical method validation for drug product.	
8.	Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product under section 2.3.R.1.1, for which stability studies data is provided in Module 3 section 3.2. P.8.	Submitted	

Decision: Deferred for submission of performance report of dissolution test in accordance with revised dissolution procedure and acceptance criteria.

	The proposed proprietary name / brand name	0.9% Sodium Chloride Injection 100ml.
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each 100ml contains: Each 100ml water contains Sodium Chloride …. 0.9g
	Pharmaceutical form of applied drug	Solution for injection
	Pharmacotherapeutic Group of (API)	API: Sodium Chloride Therapeutic classification: Electrolyte supplements (deficiency.) ATC code: B05XA03
	Reference to Finished product specifications	USP Specification
	Proposed Pack size	In one carton 80 bottles of 100ml
	Proposed unit price	Rs 70/- per single bottle
	The status in reference regulatory authorities	Normasil 0.9% (TGA Approved).
	For generic drugs (me-too status)	Not confirmed in 100ml.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Name, address of drug substance manufacturer	M/s Shandong Feicheng Refined Salt Plant Address of the manufacturer (s): No.002, Feicheng City, Shandong Province, China.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data for both sources related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of API at accelerated as well as real time conditions.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of

		specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has not submitted Pharmaceutical Equivalence studies report
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	Sodium Chloride Injection is supplied in Polypropylene infusion bottle
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches The accelerated stability study data is conducted at 40ºC ±2ºC / 75% ± 5% RH for 6 months. The real time stability study data is conducted at 30ºC ±2ºC / 65% ± 5% RH. The real time stability study data of 3 batches is for 36 months

Evaluation by PEC:

Section no.	Observation	Firm's response
3.2.S.4	Analytical method verification studies for the drug substance shall be submitted from the drug product manufacturer.	Firm submitted the analytical verification report of assay of drug substance performed by drug product manufacturer.
3.2.P.2.2.1	Pharmaceutical equivalence against the innovator drug product shall be submitted.	Firm has submitted the comparison table of critical quality attributes between self-developed formulation of M/s. Shandong Hualu Pharmaceutical Co. Ltd and Reference Listed Drug (name of manufacturer and batch detail is not mentioned). Equivalence report did notinclude the test of Iron, test of particulate matter in injection and Bacterial Endotoxin test as per USP monograph.

Decision of 330th meeting of Registration Board:
Deferred for submission of details of Reference Listed product including name, manufacturing date, expiry date etc. against which pharmaceutical equivalence is submitted

Response of the Firm:
Firm submitted the response that they performed pharmaceutical equivalence against the three batches of sodium chloride injection of M/s. Baxter Healthcare Co. Ltd. , Shanghai that are S1910133 (Mfg date :13-10-2019 Exp date: 12-10-2022),S1910134(Mfg date :13-10-2019 Exp date: 12-10-2022),,S1910135 (Mfg date :13-10-2019 Exp date: 12-10-2022).

Decision: Approved as per inspection policy for manufacturer abroad.

	For generic drugs (me-too status)	Not confirmed in the applied volume i.e.100ml
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.

	Name, address of drug substance manufacturer	Xi'an Wanlong Pharmaceutical Co. Ltd. No.2 Yongan Road, Yangling Agricultural Hi-tech Industrial Demonstration Zone Shaanxi China
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance. Drug substance monograph is present in USP.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 three batches of Tirofiban hydrochloride Injection instead of Tirofiban hydrochloride API.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, containerclosure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical equivalence study has been performed against the innovator product AGGRASTAT Injection (Batch no. C856260) which includes quality test (Appearance, pH , Assay, Citric Acid and sodium citrate content, sodium chloride content and related substance test.)
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	100ml- neutral borosilicate glass Infusion bottle
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 following batches The accelerated stability study data is conducted at 40ºC ±2ºC / 75% ± 5% RH for 6 months. The real time stability study data is conducted at 30ºC ±2ºC / 65% ± 5% RH. B171001,B171002,B171003

Evaluation by PEC:

S.no.	Sections	Observations/Deficiencies/ Short-comings
1.	1.3	Submit valid original and legalized Certificate of Pharmaceutical Product (CoPP) / Free Sale certificate and GMP certificate of the Manufacturer issued by relevant regulatory authority in the country of origin and name of exporting country, since the submitted documents are invalid.
2.	1.4	Submit valid drug sale license of VIZ Remedies Pakistan LLP ,since you have submitted the expired DSL.
3.	3.2.S.7	Submit stability data of three batches of drug substance performed at long term stability conditions till the claimed re-test date since you have submitted the data of only 12 months.
4.	3.2.P.3	Justify the use of activated carbon in the manufacturing procedure of sterile preparation to remove the bacterial endotoxin in the light of guidance documents of reference agencies.
5.	3.2.P.5.1	Justify how the labelled amount of tirofiban will be quantify, since the assay method given in section 3.2.P.5.2 calculate the quantity of tirofiban hydrochloride instead of labelled quantity of tirofiban without the salt factor.
6.	3.2.P.5.4	Justify for using the excipient sodium chloride in the product name along with tirofiban hydrochloride.

Decision of 326th meeting of Registration Board:
Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.

Response of the Firm:

S.no.	Observations/Deficiencies/ Short-comings	Response of the Firm
1.	Submit valid original and legalized Certificate of Pharmaceutical Product (CoPP) / Free Sale certificate and GMP certificate of the Manufacturer issued by relevant regulatory authority in the country of origin and name of exporting country, since the submitted documents are invalid.	Firm replied that they submitted original and legalized CoPP at the time of registration. However due to its expiration, renewed CoPP has been requested to the principal manufacturer.
2.	Submit valid drug sale license of VIZ Remedies Pakistan LLP ,since you have submitted the expired DSL.	Firm submitted the copy of DSL no. 0324 which is valid till 14/03/2028.
3.	Submit stability data of three batches of drug substance performed at long term stability conditions till the claimed re-test date since you have submitted the data of only 12 months.	Firm submitted the stability data of 36 months of three batches performed at long term conditions.
4.	Justify the use of activated carbon in the manufacturing procedure of sterile preparation to remove the bacterial endotoxin in the light of guidance documents of reference agencies.	Firm in their reply submitted a document, which only stated the quality parameters used for the analysis of activated charcoals INSTEAD of providing reference from international standard to rationalize the use of activated charcoal for sterilizing the injectable solution..
5.	Justify how the labelled amount of tirofiban will be quantify, since the assay method given in section 3.2.P.5.2 calculate the quantity of tirofiban hydrochloride instead of labelled quantity of tirofiban without the salt factor.	Firm clarify that they quantify the quantity of tirofiban by using external standard method, the obtained assay is for tirofiban hydrochloride, then the results will multiply by conversion coefficient (0.8899) to obtain labelled amount of Tirofiban.
6.	Justify for using the excipient sodium chloride in the product name along with tirofiban hydrochloride.	Firm replied that the role of sodium chloride in this formulation is as "Osmotic Pressure Modifier".

Decision: Deferred for submission of following shortcomings:

- **Submit valid original and legalized Certificate of Pharmaceutical Product (CoPP) / Free Sale certificate and GMP certificate of the Manufacturer issued by relevant regulatory authority in the country of origin and name of exporting country, since the submitted documents are invalid.**
- **Justify the use of activated carbon in the manufacturing procedure of sterile preparation to remove the bacterial endotoxin in the light of guidance documents of reference agencies.**

b. Cases of Locally Manufactured Product

443.	Oral liquid syrup section (general) is approved vide letter No. F. 1-25/2008-Lic dated 17-09-2021.	
	Name, address of Applicant / Marketing Authorization Holder	M/s. World Biz Pharmaceutical Company Plot No. 340, Multan Industrial Estate, Multan.
	Name, address of Manufacturing site.	M/S World Biz Pharmaceutical Company Plot No. 340, Multan Industrial Estate, Multan.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)

	Intended use of pharmaceutical product	☐Domestic sale ☐ Export sale ☒Domestic and Export sales
	Dy. No. and date of submission	Dy. No.706 : dated 09-01-2023.
	Details of fee submitted	PKR 30,000/- vide slip No. 67913763 dated 03-01-2023.
	The proposed proprietary name / brand name	SetBiz 5mg/5ml syrup.
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each 5ml contains; Cetirizine dihydrochloride 5mg (B.P Specifications)
	Pharmaceutical form of applied drug	Oral liquid.
	Pharmacotherapeutic Group of (API)	R06AE07 Antihistamine
	Reference to Finished product specifications	BP Specification
	Proposed Pack size	60ml,90ml,120ml,450ml
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	USFDA APPROVED
	For generic drugs (me-too status)	Citzin Syrup, NovaMed Pharmaceuticals, Reg. No. 063620.
	GMP status of the Finished product manufacturer	New license issued dated 14-09-2021 w.e.f. 13-09-2021.
	Name and address of API manufacturer.	Oral liquid syrup section (general) is approved vide letter No. F. 1-25/2008-Lic dated 17-09-2021.
	Module-II (Quality Overall Summary)	M/s Sreekara Organics India Plot No. 159/A, S.V. Co-op. Ind. Estate, IDA Bollaram, Jinnaram (M), Sangareddy Dist-502325, Telangana, India.
	Module III (Drug Substance)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Stability studies	Official monograph of Cetirizine Hydrochloride is present in B.P. Firm has submitted detail of nomenclature, structure, general properties, solubility, manufacturers, description of manufacturing process and controls, tests for impurities & related substances, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Module-III (Drug Product):	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions.

		The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65 ± 5% RH for 60 months. Batches:(CZ/V/00411,CZ/V/00511& CZ/V/00611)
	Pharmaceutical equivalence and comparative dissolution profile	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Analytical method validation/verification of product	Pharmaceutical Equivalence is established against the Citzin syrup manufactured by NovaMed pharmaceuticals Lahore by performing quality tests (Identification, filled volume, leakage teat, pH and Assay).Results of both the products are similar. CDP is not applicable.

STABILITY STUDY DATA			
Manufacturer of API	M/s Sreekara Organics India Plot No. 159/A, S.V. Co-op. Ind. Estate, IDA Bollaram, Jinnaram (M), Sangareddy Dist-502325, Telangana, India.		
API Lot No.	CTZ03521		
Description of Pack (Container closure system)	An amber glass bottle containing an-off white colored syrupy liquid with pleasant flavour, sealed with aluminum pp cap and packed in specific unitcarton.		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	RD-CS-001	RD-CS-001	RD-CS-001
Batch Size	500 bottles.	500 bottles.	500 bottles.
Manufacturing Date	09-2022	09-2022	09-2022
Date of Initiation	28-09-2022.	28-09-2022.	28-09-2022.
No. of Batches	03		

Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has submitted copy of approval of PolyBiz syrup in 322 minutes of meeting.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate #L.Dis.No:82408/TS/2022 issued by Drug Control Administration Government of Telangana issued on 15-03-2022and valid until 14-03-2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted that the cetirizine dihydrochloride material of quantity 500g was obtained via loan from British Pharmaceuticals Lahore. Copy of documentsalready submitted in DRAP on dated 14-02-2023. • Copy of Form 3, 5 ,7 from & invoice (invoice# ZHI-CI/5465/0621) dated: 26-06- 2021 cleared by DRAP Lahore office dated 12-07-2021

		specifying import 100Kg Cetirizine 2HCl(Batch# CTZ03521)
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	The firm has submitted Data of stability batches supported by attested respective documents like chromatograms, raw data sheets, COA, summarydata sheets etc
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	The firm has submitted Compliance Record of HPLC software 21CFR & audit trail reports on product testing.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	The firm has submitted Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).

Remarks OF Evaluator:

S.no.	Sections	Observations/Deficiencies/ Short-comings
1.	3.2.S.7	Justify for not including the test of pH determination and loss on drying test while performing the stability studies of drug substance.
2.	3.2.P.1	Formulation contain preservative, so preservative effectiveness studies to be performed as per recommendations of pharmacopoeia and shall be submit.
3.	3.2.P.2.2.1	Justify for performing the pharmaceutical equivalence against the comparator product instead of brand leader/ innovator / reference product.
4.	3.2. P.4	Submit the analysis report/COA of excipients propylene glycol and sorbitol, which includes the results of impurity testing related to the presence of ethylene glycol and diethylene glycol, in compliance of notification issued by DRAP vide No. F.6-30/2022-QA dated 21-10-2022.
5.	3.2.P.5.2	Justify for not adopting the assay procedure as recommended in BP monograph of Cetirizine Oral solution, since the conc. of sample and standard solution specified in the assay method is different from the concentrations of solution mentioned in BP. Further the validation studies were also performed keeping the conc. of sample and standard solution 0.1% while BP recommends 0.002% conc. for both solutions in assay testing, then justify how the method comply BP specification.
6.	3.2.P.8	• Submit the updated stability data of drug product, since you have submitted only three-month stability data. • Approval of API/ DML/ valid GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.

Decision of 327th meeting of Registration Board:
Registration Board deferred the case for submission of reply to the above cited shortcomings.

Reply of the Firm:

S.no.	Sections	Observations/Deficiencies/ Short-comings	Reply of the Firm
1.	3.2.S.7	Justify for not including the test of pH determination and loss on drying test while performing the stability studies of drug substance.	Firm replied that pH and Loss on Drying test is included in the specification and routine testing but by the manufacturer this test was skipped during stability studies of drug substance.
2.	3.2.P.1	Formulation contain preservative, so preservative effectiveness studies to be performed as per recommendations of pharmacopoeia and shall be submit.	Firm submitted preservative effectiveness test report.
3.	3.2.P.2.2.1	Justify for performing the pharmaceutical equivalence against the comparator product instead of	Firm replied that comparative product sample was available at that time of trial

			brand leader/ innovator / reference product.	batch manufacturing, so they use that sample for pharmaceutical equivalence.	
	4.	3.2. P.4	Submit the analysis report/COA of excipients propylene glycol and sorbitol, which includes the results of impurity testing related to the presence of ethylene glycol and diethylene glycol, in compliance of notification issued by DRAP vide No. F.6-30/2022-QA dated 21-10-2022.	COAs of propylene glycol and sorbitol in which results of impurity test of DEG and EG is included.	
	5.	3.2.P.5.2	Justify for not adopting the assay procedure as recommended in BP monograph of Cetirizine Oral solution, since the conc. of sample and standard solution specified in the assay method is different from the concentrations of solution mentioned in BP. Further the validation studies were also performed keeping the conc. of sample and standard solution 0.1% while BP recommends 0.002% conc. for both solutions in assay testing, then justify how the method comply BP specification.	Firm replied that "All chromatographic conditions as described in BP monograph was followed for the testing of product, sample and standard concentration was set for the easiness for the analyst and method was verified on the same concentration was set for the easiness for the analyst and method was verified on the same concentration as well.	
	6.	3.2.P.8	Submit the updated stability data of drug product, since you have submitted only three-month stability data.	Submitted	
	7.	Approval of API/ DML/ valid GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.		Firm submitted the copy of letter by DCA (Government of Telangana) in which it is certified that License No. 40/MD/AP/2012/B/G renewed 18/10/2022 and validity would get expired by 17/10/2027.	

Decision: Deferred for submission of following:

- **Scientific justification for not performing critical tests of pH determination and loss on drying during the stability studies.**
- **Justification for not performing the assay of drug product in accordance with BP monograph of Cetirizine Oral solution.**

M/s. Winbrains Research Laboratories Plot no.69/1 Block B, Phase I-II, Industrial Estate, Hattar
The Central Licensing Board in its 282nd meeting held on 31st August, 2021 has considered and approved the grant of additional section of "Dry Powder Inhaler Capsule section (General)" to M/s. Winbrains Research Laboratories Plot no.69/1 Block B, Phase I-II, Industrial Estate, Hattar.

Remarks of Evaluator:

S.no.	Sections	Observations/Deficiencies/ Short-comings
1.	1.5.6	Justify the finished product specifications as "Manufacturer's specifications" since the drug product monograph is available in USP. Revise your specifications along with submission of requisite fee.
2.	3.2.S.4.1-3.2.S.4.2	Submit data for both drug substance in section 3.2.S.4.1 and 3.2.S.4.2 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required", since you have only submitted analytical procedure by drug substance manufacturer which is also not in accordance with USP.
3.	3.2.S.4.3	Submit data for both drug substances in section 3.2.S.4.3 as per the guidance document approved by Registration Board which specifies that "Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted" Further specify how the testing of drug substance was carried out without performing verification studies.
4.	3.2.S.4.4 (Fluticasone)	Drug substance specifications shall include test of specific optical rotation as recommended by BP monograph. Evidence of availability of MALVERN mastersizer instrument by drug product manufacturer, since it was evident from the batch analysis report that you have performed Particle size test by Malvern.
5.	3.2.S.7.3 (Salmetrol Xinafoate)	Accelerated stability data of third batch was of Formetrol Fumarate Hydrate instead of Salmetrol Xinafoate, please submit the correct data.
6.	3.2.P.1	• Submitted details of accompanying device is for the multidose pre-filled dry powder inhaler instead of inhaler device required for DPI capsules. • Composition of drug product given in section 3.2.P.1 (d) is different from the composition of innovator brand approved in USFDA, according to the label of innovator brand Each blister on the strip contains a white powder mix of micronized fluticasone propionate (100, 250, or 500 mcg) and micronized salmeterol xinafoate salt (72.5 mcg, equivalent to 50 mcgof salmeterol base) in 12.5 mg of formulation containing lactose monohydrate (which contains milk proteins). • Provide the details regarding the metered amount and the mass of the drug delivered from the mouthpiece under defined test conditions (i.e., flow rate, duration).
7.	3.2.P.2.2.1	Pharmaceutical equivalence report against the innovator/reference product shall be submitted including results for batch release tests in accordance with USP for both applied and reference formulation. Submit Pharmaceutical equivalence report of strength 100/50mcg by performing all the quality test mentioned in USP.
8.	3.2.P.2.3	Manufacturing procedure submitted in section 3.2.P.2.3 and 3.2.P.3 reflect that particle size of powder is further reduced till 3µm, please provide details and evidence of availability of sheer mixer and the instrument/particle size analyzer used for the analysis of final particle size achieved.
9.	3.2.P.5.2	• Submit detailed analytical procedure used for testing of drug product in accordance with USP monograph. • Batch release specification did not include the performance test for inhalation powder i.e. Delivered Dose Uniformity & Aerodynamic Size Distribution test, clarification is required in this regard.
10	3.2.P.5.3	Provide analytical method verification report of drug product in compliance of USP monograph.

11	3.2.P.5.4	• Justify for not performing the test of microbial enumeration test and test for specified microorganism and foreign particulate matter test while batch release of drug product. • Further provide evidence of availability of Cascade impaction sampling apparatus for performance of Aerodynamic Size Distribution test and sampling apparatus used for the performance of Delivered Dose Uniformity.	
12	3.2.P.6	Provide certificate of analysis of reference standard /working standard used for testing of the product.	
13	3.2.P.8	• Justify for not performing the test Delivered Dose Uniformity, Aerodynamic Size Distribution test, test of microbial enumeration test and test for specified microorganism and foreign particulate matter while performing the stability study of drug product. • Submit compliance record of HPLC software 21CFR & audit trail reports on product testing for each analysis performed during the study. • Provide details that which lot number of drug substance has been used in manufacturing of each batch of drug product. Also provide documents confirming evidence of import of each lot of drug substance used in manufacturing of these batches of drug product. • Provide data of stability batches properly arranged and supported by respective documents including analytical report / COA, raw data sheet and respective chromatograms separately for each time point. • Provide Reference of previous approval of applications with stability study data of the firm (if any) • Provide Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).	
14	2.3 R.1.1	• Manufacturing procedure mentioned in BMR is different from the manufacturing procedure given in 3.2.P.3, justification is required in this regard. • Calculation of dispensed weight of active along with salt and factor adjustment was not given in the BMR,please provide the calculations.	

Decision of 323rd meeting of Registration Board:
Deferred for submission of reply of above-cited shortcomings within six month.

Response of the Firm:

S.no.	Observations/Deficiencies/ Short-comings	Response of the Firm
1.	Justify the finished product specifications as "Manufacturer's specifications" since the drug product monograph is available in USP. Revise your specifications along with submission of requisite fee.	Firm submitted the revised specification of drug product but microbial enumeration test ,test for specified microorganism, foreign particulate matter and Delivered Dose Uniformity test was not included in the finished product specification.
2.	Submit data for both drug substance in section 3.2.S.4.1 and 3.2.S.4.2 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required", since you have only	Firm only submitted the specification and analytical procedure of drug substance by drug substance manufacturer but did not submitted the specification and analytical procedure of drug substance adopted by drug product manufacturer.

		submitted analytical procedure by drug substance manufacturer which is also not in accordance with USP.		
	3.	Submit data for both drug substances in section 3.2.S.4.3 as per the guidance document approved by Registration Board which specifies that "Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted" Further specify how the testing of drug substance was carried out without performing verification studies.	Firm did not submit the response of this query.	
	4.	Drug substance specifications shall include test of specific optical rotation as recommended by BP monograph.	Firm only submitted the revised COAs of drug substance in which results of Optical rotation test included.	
	5.	Evidence of availability of MALVERN mastersizer instrument by drug product manufacturer, since it was evident from the batch analysis report that you have performed Particle size test by Malvern.	Firm did not submit the response of this query.	
	6.	Accelerated stability data of third batch was of Formetrol Fumarate Hydrate instead of Salmetrol Xinafoate, please submit the correct data.	Submitted	
	7.	Submitted details of accompanying device is for the multidose pre-filled dry powder inhaler instead of inhaler device required for DPI capsules.	Firm replied that their inhaler device is consist of three components included mouthpiece, rotacap chamber and base.	
	8.	Composition of drug product given in section 3.2.P.1 (d) is different from the composition of innovator brand approved in USFDA, according to the label of innovator brand Each blister on the strip contains a white powder mix of micronized fluticasone propionate (100, 250, or 500 mcg) and micronized salmeterol xinafoate salt (72.5 mcg, equivalent to 50 mcg of salmeterol base) in 12.5 mg of formulation containing lactose monohydrate (which contains milk proteins).	Firm submitted the revised composition of drug product in accordance with innovator product.	
	9.	Provide the details regarding the metered amount and the mass of the drug delivered from the mouthpiece under defined test conditions (i.e., flow rate, duration). Firm submitted the following table data in their reply:		

		<table><tr><td>API</td><td>Innovator Spec.</td><td>Winbrains spec.</td></tr><tr><td>Fluticasone propionate</td><td>92 micrograms/inhalation delivered</td><td>90 micrograms/inhalation delivered</td></tr><tr><td>Salmeterol Xinafoate</td><td>47 micrograms/inhalation delivered</td><td>46 micrograms/inhalation delivered</td></tr></table>			
	10.	Pharmaceutical equivalence report against the innovator/reference product shall be submitted including results for batch release tests in accordance with USP for both applied and reference formulation. Submit Pharmaceutical equivalence report of strength 100/50mcg by performing all the quality test mentioned in USP.	Firm submitted the pharmaceutical equivalence report against the Seretide Diskus 50/100mcg Powder for inhalation *(The inhalation powder is contained in blisters held on a formed PVC coated base, with a peelable foil laminate lid. The strip is contained in a moulded plastic device. The plastic devices are available in cardboard containers, which hold)* (Batch no.170930 Mfg date: 05-2021 and Expiry date: 04-2024), while firm in its report described the reference product as *white capsule orange body hard gelatin capsule shell no.3 filled with white to off white color powder.* Further, microbial enumeration test ,test for specified microorganism, foreign particulate matter and Delivered Dose Uniformity test was not included in the submitted report.	
	11.	Manufacturing procedure submitted in section 3.2.P.2.3 and 3.2.P.3 reflect that particle size of powder is further reduced till 3µm, please provide details and evidence of availability of sheer mixer and the instrument/particle size analyzer used for the analysis of final particle size achieved.	Not submitted the response of this query.		
	12.	Submit detailed analytical procedure used for testing of drug product in accordance with USP monograph.	Firm		
	13.	Batch release specification did not include the performance test for inhalation powder i.e. Delivered Dose Uniformity & Aerodynamic Size Distribution test, clarification is required in this regard.	Firm submitted the revised specification including the performance tests.		
	14.	Provide analytical method verification report of drug product in compliance of USP monograph.	Not submitted the reply of this query		
	15.	• Justify for not performing the test of microbial enumeration test and test for specified microorganism and foreign particulate matter	Not submitted the reply of this query		

		test while batch releaseof drug product. • Further provide evidence of availability of Cascade impaction sampling apparatus for performance of Aerodynamic Size Distribution test and sampling apparatus used for the performance of Delivered Dose Uniformity.		
	16.	Provide certificate of analysis of reference standard /working standard used for testing of the product.	Not submitted the reply of this query	
	17.	• Justify for not performing the test Delivered Dose Uniformity, Aerodynamic Size Distribution test, test of microbial enumeration test and test for specified microorganism and foreign particulate matter while performing the stability study of drug product. • Submit compliance record of HPLC software 21CFR & audit trail reports on product testing for each analysis performed during the study.	Not submitted the reply of this query	
	18.	Provide details that whichlot number of drug substance has been used in manufacturing of each batch of drug product. Also provide documents confirming evidence of import of each lot of drug substance used in manufacturing of these batches of drug product.	Firm submitted the copy of commercial invoice without attestation from DRAP.	
	19.	Provide data of stability batches properly arranged and supported by respective documents including analytical report / COA, raw data sheet and respective chromatograms separately for each time point.	Not submitted the reply of this query	

	20.	Provide Reference of previous approval of applications with stability study data of the firm (ifany)	Not submitted the reply of this query	
	21.	Provide Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).	Submitted	
	22.	• Manufacturing procedure mentioned in BMR is different from the manufacturing procedure given in 3.2.P.3, justification is required in this regard. • Calculation of dispensed weight of active along with salt and factor adjustment was not given in the BMR, please providethe calculations.	Not submitted the reply of this query	

Decision: Deferred for submission of reply to following shortcomings:

- **Microbial enumeration test, test for specified microorganism, foreign particulate matter and Delivered Dose Uniformity test was not included in the finished product specification.**
- **Submit Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by Drug Product manufacturer, since you have only submitted analytical procedure by drug substance manufacturer which is also not in accordance with USP.**
- **Submit data for "Analytical Method Verification studies" including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer.**
- **Evidence of availability of MALVERN mastersizer instrument by drug product manufacturer, since it was evident from the batch analysis report that you have performed Particle size test by Malvern.**
- **Submitted details of accompanying device is for the multidose pre-filled dry powder inhaler instead of inhaler device required for DPI capsules.**
- **Provided details regarding the mass of the drug delivered from the mouthpiece under defined test conditions (i.e., flow rate, duration) are different from that of innovator drug product.**
- **Microbial enumeration test, test for specified microorganism, foreign particulate matter and Delivered Dose Uniformity test was not included in the submitted Pharmaceutical equivalence report.**
- **Manufacturing procedure submitted in section 3.2.P.2.3 and 3.2.P.3 reflect that particle size of powder is further reduced till 3µm, please provide details and evidence of availability of sheer mixer and the instrument/particle size analyzer used for the analysis of final particle size achieved.**
- **Provide analytical method verification report of drug product in compliance of USP monograph.**
- **Justify for not performing the test of microbial enumeration test and test for specified microorganism and foreign particulate matter test while batch release of drug product.**
- **Provide evidence of availability of Cascade impaction sampling apparatus for performance of Aerodynamic Size Distribution test and sampling apparatus used for the performance of Delivered Dose Uniformity.**
- **Justify for not performing the test of microbial enumeration test and test for specified microorganism and foreign particulate matter test while batch release of drug product.**
- **Provide evidence of availability of Cascade impaction sampling apparatus for performance of Aerodynamic Size Distribution test and sampling apparatus used for the performance of Delivered Dose Uniformity.**

• **Provide certificate of analysis of reference standard /working standard used for testing of the product.** • **Justify for not performing the test Delivered Dose Uniformity, Aerodynamic Size Distribution test, test of microbial enumeration test and test for specified microorganism and foreign particulate matter while performing the stability study of drug product.** • **Submit compliance record of HPLC software 21CFR & audit trail reports on product testing for each analysis performed during the study.** • **Provide details that which lot number of drug substance has been used in manufacturing of each batch of drug product. Also provide documents confirming evidence of import of each lot of drug substance used in manufacturing of these batches of drug product.** • **Provide data of stability batches properly arranged and supported by respective documents including analytical report / COA, raw data sheet and respective chromatograms separately for each time point.** • **Manufacturing procedure mentioned in BMR is different from the manufacturing procedure given in 3.2.P.3, justification is required in this regard.** • **Calculation of dispensed weight of active along with salt and factor adjustment was not given in the BMR, please provide the calculations.**		
445.	Name, address of Applicant / Marketing Authorization Holder	M/s Winbrains Research Laboratories Plot No.69/1 Block B, Phase I-II, Industrial Estate, Hattar Pakistan
	Name, address of Manufacturing site.	M/s Winbrains Research Laboratories Plot No.69/1 Block B, Phase I-II, Industrial Estate, Hattar Pakistan
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 32465 dated 11/11/2022
	Details of fee submitted	PKR 30,000/-:dated 19/10/2022
	The proposed proprietary name / brand name	Flutimet 250/50mcg Rota Capsule
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Capsule Contains: Fluticasone Propionate……250mcg Salmeterol Xinafoate..... 50mcg
	Pharmaceutical form of applied drug	White to off white color powder filled in hard gelatin capsule shells
	Pharmacotherapeutic Group of (API)	Long Acting- Beta agonists Corticosteroids
	Reference to Finished product specifications	Innovator's Specification
	Proposed Pack size	3×10's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	USFDA Approved ADVAIR DISKUS 100/50
	For generic drugs (me-too status)	Seretide Diskus 250mcg + 50mcg GSK Pakistan. (Reg.no.074727)
	GMP status of the Finished product manufacturer	New section approval letter granted on 20/09/2021 (Dry Powder Inhaler and Nasal Drops) section approved.
	Name and address of API manufacturer.	M/s Vamsi Labs Ltd. Address: A-14/15, MIDC Area, Chincholi, Solapur, 413255Maharashtra, India

	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, Solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of both drug substances are present in BP. The firm as submitted detail of nomenclature, structure, general properties, Solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Fluticasone Propionate Stability study conditions: Real time: 30˚C ± 2˚C / 75% ± 5%RH for 60 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches:(FTP0010414,FTP-0020715,FTP-0010615) Salmeterol Xinafoate Stability study conditions: Real time: 30˚C ± 2˚C / 75% ± 5%RH for 60 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (SX-0020515,SX-0030515,SX-0040515)
	Module-III (Drug Product):	The firm has submitted description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical equivalence report has submitted against the brand leader seretide Rotacaps 250/50mcg of M/s. Glaxo Smith Kline B.no. R102 Exp date 11-2023 (Identification,assay)
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.
	Description of the delivery devices (Inhaler intended to be marketed along applied formulation)	Flutimet Turbo haler is an inspiratory flow driven,multidose powder inhaler.

STABILITY STUDY DATA	
Manufacturer of API	M/s Vamsi Labs Ltd. Address: A-14 & 15, MIDC Area, Chincholi, Solapur, Maharashtra 413255, India
API Lot No.	Firm has not mentioned the API lot no. of both drug substances.
Description of Pack (Container closure system)	Alu-Alu blister packed in unit carton (3×10's)
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH
Time Period	Real time: 6 months

	Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6, (Months)		
Batch No.	T-49	T-50	T-51
Batch Size	500 Capsule	500 Capsule	500 Capsule
Manufacturing Date	12-2021	12-2021	12-2021
Date of Initiation	25-12-2021	25-12-2021	25-12-2021
No. of Batches	03		

Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Not submitted
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not submitted
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not Submitted

Remarks of Evaluator:

S.no.	Sections	Observations/Deficiencies/ Short-comings
1.	1.5.6	Justify the finished product specifications as "Manufacturer's specifications" since the drug product monograph is available in USP. Revise your specifications along with submission of requisite fee.
2.	3.2.S.4.1-3.2.S.4.2	Submit data for both drug substance in section 3.2.S.4.1 and 3.2.S.4.2 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required", since you have only submitted analytical procedure by drug substance manufacturer which is also not in accordance with USP.
3.	3.2.S.4.3	Submit data for both drug substances in section 3.2.S.4.3 as per the guidance document approved by Registration Board which specifies that "Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted" Further specify how the testing of drug substance was carried out without performing verification studies.
4.	3.2.S.4.4 (Fluticasone)	Drug substance specifications shall include test of specific optical rotation as recommended by BP monograph. Evidence of availability of MALVERN mastersizer instrument by drug product manufacturer,since it was evident from the batch analysis report that you have performed Particle size test by Malvern.
5.	3.2.S.7.3 (Salmetrol Xinafoate)	Accelerated stability data of third batch was of Formetrol Fumarate Hydrate instead of Salmetrol Xinafoate, please submit the correct data.

6.	3.2.P.1	• Submitted details of accompanying device is for the multidose pre-filled dry powder inhaler instead of inhaler device required for DPI capsules. • Composition of drug product given in section 3.2.P.1 (d) is different from the composition of innovator brand approved in USFDA, according to the label of innovator brand Each blister on the strip contains a white powder mix of micronized fluticasone propionate (100, 250, or 500 mcg) and micronized salmeterol xinafoate salt (72.5 mcg, equivalent to 50 mcg of salmeterol base) in 12.5 mg of formulation containing lactose monohydrate (which contains milk proteins). • Provide the details regarding the metered amount and the mass of the drug delivered from the mouthpiece under defined test conditions (i.e., flow rate, duration).	
7.	3.2.P.2.2.1	Pharmaceutical equivalence report against the innovator/reference productshall be submitted including results for batch release tests in accordance with USP for both applied and reference formulation. Submit Pharmaceutical equivalence report of strength 100/50mcg by performing all the quality test mentioned in USP.	
8.	3.2.P.2.3	Manufacturing procedure submitted in section 3.2.P.2.3 and 3.2.P.3 reflect that particle size of powder is further reduced till 3µm, please provide details and evidence of availability of sheer mixer and the instrument/particle size analyzer used for the analysis of final particle size achieved.	
9.	3.2.P.5.2	• Submit detailed analytical procedure used for testing of drug product in accordance with USP monograph. • Batch release specification did not include the performance test for inhalation powder i.e. Delivered Dose Uniformity & Aerodynamic Size Distribution test, clarification is required in this regard.	
10.	3.2.P.5.3	Provide analytical method verification report of drug product in compliance of USP monograph.	
11.	3.2.P.5.4	• Justify for not performing the test of microbial enumeration test and test for specified microorganism and foreign particulate matter test while batch release of drug product. • Further provide evidence of availability of Cascade impaction sampling apparatus for performance of Aerodynamic Size Distribution test and sampling apparatus used for the performance of Delivered Dose Uniformity.	
12.	3.2.P.6	Provide certificate of analysis of reference standard /working standard used for testing of the product.	
13.	3.2.P.8	• Justify for not performing the test Delivered Dose Uniformity, Aerodynamic Size Distribution test, test of microbial enumeration test and test for specified microorganism and foreign particulate matter while performing the stability study of drug product. • Submit compliance record of HPLC software 21CFR & audit trail reports on product testing for each analysis performed during the study. • Provide details that which lot number of drug substance has been used in manufacturing of each batch of drug product. Also provide documents confirming evidence of import of each lot of drug substance used in manufacturing of these batches of drug product. • Provide data of stability batches properly arranged and supported by respective documents including analytical report / COA, raw data sheet and respective chromatograms separately for each time point. • Provide Reference of previous approval of applications with stability study data of the firm (if any) • Provide Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).	
14.	2.3 R.1.1	• Manufacturing procedure mentioned in BMR is different from the manufacturing procedure given in 3.2.P.3, justification is required in this regard. • Calculation of dispensed weight of active along with salt and factor adjustment was not given in the BMR,please provide the calculations.	

15.	Amendment in QOS (Module 2) for above points.	

Decision of 323rd meeting of Registration board:
Deferred for submission of reply of above-cited shortcomings within six month.

S.no.	Observations/Deficiencies/ Short-comings	Response of the Firm
1.	Justify the finished product specifications as "Manufacturer's specifications" since the drug product monograph is available in USP. Revise your specifications along with submission of requisite fee.	Firm submitted the revised specification of drug product but microbial enumeration test ,test for specified microorganism, foreign particulate matter and Delivered Dose Uniformity test was not included in the finished product specification.
2.	Submit data for both drug substance in section 3.2.S.4.1 and 3.2.S.4.2 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required", since you have only submitted analytical procedure by drug substance manufacturer which is also not in accordance with USP.	Firm only submitted the specification and analytical procedure of drug substance by drug substance manufacturer but did not submitted the specification and analytical procedure of drug substance adopted by drug product manufacturer.
3.	Submit data for both drug substances in section 3.2.S.4.3 as per the guidance document approved by Registration Board which specifies that "Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted" Further specify how the testing of drug substance was carried out without performing verification studies.	Firm did not submit the response of this query.
4.	Drug substance specifications shall include test of specific optical rotation as recommended by BP monograph.	Firm only submitted the revised COAs of drug substance in which results of Optical rotation test included.
5.	Evidence of availability of MALVERN mastersizer instrument by drug product manufacturer, since it was evident from the batch analysis	Firm did not submit the response of this query.

<table>

	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 48months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted pharmaceutical equivalence of their product against the generic product Penicillin V Suspension 125 mg manufactured by Elite Pharma.
	Analytical method validation/verification of product	Firm has submitted analytical method validation study reports for drug substance as well as drug product.

Manufacturing Date	04-2022	04-2022	04-2022
Date of Initiation	29-04-2022	29-04-2022	29-04-2022

No. of Batches		03
DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Flemicillin Capsule 250 mg (322th Meeting) Flemicillin Capsule 500 mg (322th Meeting) F-Amox Suspension 125mg/5mL (323rd Meeting) F-Amox Suspension 250 mg/5mL (323rd Meeting) Fletazo Injection 2.25 g (323rd Meeting) Fletazo Injection 4.50 g (323rd Meeting) Flementin Injection 1200 mg (324th Meeting) Flementin Injection 600 mg (324th Meeting)
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP Certificate (No. Yi 20180010) dated 23-09-2021 issued By Hebei Province Drug Administration China. The certificate specifies that the firm is operating at satisfactory level of GMP compliance.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice cleared on 27-01-2022 specifying 25.0 Kg of Phenoxymethyl penicillin Potassium. The invoice is cleared by AD (I&E) DRAP, Lahore.
4.	Data of stability batches will besupported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record for product testing.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted certificate of 21 CFR compliance for the HPLC system along with audit trail report for product testing.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator:

S.no.	Sections	Observations/Deficiencies/ Short-comings	
1.	3.2.P.1	Formulation contain preservative sodium benzoate, so preservative effectiveness studies to be performed as per recommendations of pharmacopoeia and shall be submit.	Firm submitted the Antimicrobial Effectiveness test report with theremarks that sodium Benzoate iseffective for use in oral product, while the antimicrobial effectiveness test should be performed specifically on the applied product.
2.	3.2.P.1	Provide information including type of diluent, its composition, quantity or volume which is to be provided along with the applied drug.	Firm replied that Diluent to be used for reconstitution is water. Direction for reconstitution is as: Add 30 mL water and shake well than add again 30 mL water to produce 100 mL solution.
3.	3.2.P.2.2 .1	Specify Product name and Registration number of reference product against which pharmaceutical equivalence has been established.Further,Justify why the pharmaceutical equivalence was studied against comparator product instead of using innovator / reference product.	Firm replied that Pharmaceutical Equivalence study is performed against comparator product penicillin V manufactured by Elite pharmaceutical with registration number 001852. However, the registration status of comparator product against which the pharmaceutical equivalence has established was not confirmed from the available registered data.

	4.	3.2.P.7	Please specify the volume size of ambered glass bottle used to fill the suspension since you have not mentioned the volume size in the requisite section.	Firm replied that Volume size of ambered glass bottle used to fill the suspension is 120 mL.	
	5.	3.2.P.8	Chromatograms and audit trail reports of phenoxymethyl penicillin tablets has been attached in the dossier of suspension. Clarification is required in this regard.	Firm replied that We started working simultaneous on both products i.e Flepicin Suspension (Phenoxymethylpenicillin Potassium) and Flepicin Tablets (Phenoxymethylpenicillin Potassium) and during binding of Flepicin Suspension dossier, chromatograms and audit trail reports of phenoxymethyl penicillin tablets were attached. Now we have attached Chromatograms and audit trail reports of phenoxymethyl penicillin Suspension with this letter	
	6.	3.2.P.8	In-use stability studies of reconstituted suspension is required along with proposed in-use storage statement and in-use shelf-life.	Firm replied that in-use stability study has already been conducted and data has been attached in ANNEX III. However, Annexure-III is not attached in the submitted reply.	

Decision of 330th meeting of Registration Board:

Deferred for submission of following shortcomings:

- Submit product specific preservative effectiveness studies performed in accordance with USP General Chapter <51>.
- In-use stability studies of reconstituted suspension is required along with proposed in-use storage statement and in-use shelf-life.

Response of the Firm:

- Submit product specific preservative effectiveness studies performed in accordance with USP General Chapter <51>.

Firm submitted the Antimicrobial Effectiveness report of drug product, performed in accordance with USP General Chapter <51>.

- In-use stability studies of reconstituted suspension are required along with proposed in-use storage statement and in-use shelf-life.

Firm submitted the in-use stability data of reconstituted suspension, performed at refrigerated condition and with the conclusion that "reconstituted suspension found to be stable for 14 days.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

447.	Name, address of Applicant / Marketing Authorization Holder	M/s Fleming Pharmaceuticals 23 km Sheikhupura road- Lahore Pakistan.
	Name, address of Manufacturing site.	M/s Fleming Pharmaceuticals 23 km Sheikhupura road- Lahore Pakistan.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	New DML granted on 13-09-2021.
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter of grant of section dated 14-09-2021 specifying oral dry powder for suspension

		(Penicillin),Capsule(Penicillin), Tablet (Penicillin), Dry powder injectable(Penicillin),Dry powder injectable(Carbapenem) sections.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy.no. 8957 dated 03-04-2023
	Details of fee submitted	PKR 30,000/- Dated 16-03-2023
	The proposed proprietary name / brand name	Flepicin 250 mg/5mL Suspension
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each 5mL contains: Phenoxy methyl penicillin potassium eq to Phenoxy methyl penicillin…… 250mg
	Pharmacotherapeutic Group of (API)	penicillin antibiotics
	Pharmaceutical form of applied drug	White to off white well homogenized powder free from extraneous matter filled in ambered glass bottle sealed with flip and pp cap neatly labelled and packed in a unit carton with insertion of a leaflet, plastic measuring cup 20 mL and plastic spoon 5 mL on reconstitution with 60 mL of water off white suspension with sweet taste is availed.
	Reference to Finished product specifications	BP
	Proposed Pack size	1’s
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Phenoxymethylpenicillin 250 mg Suspension (MHRA Approved)
	For generic drugs (me-too status)	Penicillin VK-DS Dry Suspension of M/s. Lisko Pakistan Pvt. Ltd. Karachi, Reg.no. 070542
	Name and address of API manufacturer.	Hebei North China Pharmaceutical Huaheng Pharmaceutical Co., Ltd. Xingwang Road,Biological Industry Zone, Nanbaishe Town, Zhao County, Shijiazhuang, China
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, generalproperties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.

	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 48 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted pharmaceutical equivalence of their product against the generic product Penicillin V Suspension 250 mg manufactured by Elite Pharma.
	Analytical method validation/verification of product	Firm has submitted analytical method validation study reports for drug substance as well as drug product.

STABILITY STUDY DATA			
Manufacturer of API	Hebei North China Pharmaceutical Huaheng Pharmaceutical Co., Ltd.

No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Flemicillin Capsule 250 mg (322th Meeting) Flemicillin Capsule 500 mg (322th Meeting) F-Amox Suspension 125mg/5mL (323rd Meeting) F-Amox Suspension 250 mg/5mL (323rd Meeting) Fletazo Injection 2.25 g (323rd Meeting) Fletazo Injection 4.50 g (323rd Meeting) Flementin Injection 1200 mg (324th Meeting) Flementin Injection 600 mg (324th Meeting)
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP Certificate (No. Yi 20180010) dated 23-09-2021 issued By Hebei Province Drug Administration China. The certificate specifies that the firm is operating at satisfactory level of GMP compliance.

3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice cleared on 27-01-2022 specifying 25.0 Kg of Phenoxymethyl penicillin Potassium. The invoice is cleared by AD (I&E) DRAP, Lahore.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record for product testing.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted certificate of 21 CFR compliance for the HPLC system along with audit trail report for product testing.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator:

S.no.	Sections	Observations/Deficiencies/ Short-comings	
1.	3.2.P.1	Formulation contain preservative sodium benzoate, so preservative effectiveness studies to be performed as per recommendations of pharmacopoeia and shall be submit.	Firm submitted the Antimicrobial Effectiveness test report with the remarks that sodium Benzoate is effective for use in oral product, while the antimicrobial effectiveness test should be performed specifically on the applied product.
2.	3.2.P.1	Provide information including type of diluent, its composition, quantity or volume which is to be provided along with the applied drug.	Firm replied that Diluent to be used for reconstitution is water. Direction for reconstitution is as: Add 30 mL water and shake well than add again 30 mL water to produce 100 mL solution.
3.	3.2.P.2.2.1	Specify Product name and Registration number of reference product against which pharmaceutical equivalence has been established.Further,Justify why the pharmaceutical equivalence was studied against comparator product instead of using innovator / reference product.	Firm replied that Pharmaceutical Equivalence study is performed against comparator product penicillin V manufactured by Elite pharmaceutical with registration number 001852. However, the registration status of comparator product against which the pharmaceutical equivalence has established was not confirmed from the available registered data.
4.	3.2.P.7	Please specify the volume size of ambered glass bottle used to fill the suspension since you have not mentioned the volume size in the requisite section.	Firm replied that Volume size of ambered glass bottle used to fill the suspension is 120 mL.
5.	3.2.P.8	Chromatograms and audit trail reports of phenoxymethyl penicillin tablets has been attached in the dossier of suspension. Clarification is required in this regard.	Firm replied that We started working simultaneous on both products i.e Flepicin Suspension (Phenoxymethylpenicillin Potassium) and Flepicin Tablets (Phenoxymethylpenicillin Potassium) and during binding of Flepicin Suspension dossier, chromatograms and audit trail reports of phenoxymethyl penicillin tablets were attached. Now we have attached Chromatograms and audit trail reports of phenoxymethyl penicillin Suspension with this letter
6.	3.2.P.8	In-use stability studies of reconstituted suspension is required along with proposed in-use storage statement and in-use shelf-life.	Firm replied that in-use stability study has already been conducted and data has been attached in ANNEX III. However, Annexure-III is not attached in the submitted reply.

Decision of 330th meeting of Registration Board:
Deferred for submission of following shortcomings:

- Submit product specific preservative effectiveness studies performed in accordance with USP General Chapter <51>.
- In-use stability studies of reconstituted suspension is required along with proposed in-use storage statement and in-use shelf-life.

Response of the Firm:

- Submit product specific preservative effectiveness studies performed in accordance with USP General Chapter <51>.

Firm submitted the Antimicrobial Effectiveness report of drug product, performed in accordance with USP General Chapter <51>.

- In-use stability studies of reconstituted suspension are required along with proposed in-use storage statement and in-use shelf-life.

Firm submitted the in-use stability data of reconstituted suspension, performed at refrigerated condition and with the conclusion that "reconstituted suspension found to be stable for 14 days.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Not submitted
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not submitted
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Sr.no.	Observations/Deficiencies/ Short-comings	Response of the Firm
1.	Submit Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by Drug Product manufacturer (M/s. Medicraft Pharmaceuticals (Pvt.) Ltd.)"	submitted
2.	Validation of analytical procedures Submit data of analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer. Batch Analysis Report	Submitted
3.	Provide results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (CoA) of the same batch from Drug Substance / /Active Pharmaceutical Ingredient manufacture.	Firm submitted the batch analysis report of drug substance by drug product manufacturer.

4.	Submit real time stability study data of three batches of the drug substance as per the conditions of zone IV-A since the submitted stability data of drug substance is conducted at 25°C ± 2°C/60% RH ±5%.	Not submitted	
5.	Submit data in section 3.2.P.2.1.2 as per the guidance document approved by Registration Board and available on DRAP website which specifies that "List of all components of the dosage form, and their amount on a per unit basis (including overages*, if any), the function of the components, and a reference to their quality standards (e.g. compendial monographs or manufacturer's specifications). *Overages are not acceptable unless fully justified* If the Drug product is formulated using an active moiety, then the composition for the active ingredient shall be clearly indicated (e.g. "1 mg of active ingredient base = 1.075 mg active ingredient hydrochloride").	Firm submitted the requisite details of section 3.2.P.2.1.2.	
6.	Provide information including type of diluent, its composition, quantity or volume, specifications (as applicable) and regulatory status in Pakistan (as applicable) for the diluent which is to be provided along with the applied drug.	Firm submitted the information related to the diluents.	
7.	Provide information specify the justification of formulation and method of manufacturing. It is important that critical quality attributes(CQAs) and Critical Process Parameters (CPP) shall also be discussed.	submitted	
8.	Justify the master formulation containing 1gm of sterile mixture of Meropenem and sodium carbonate for manufacturing of 1gm meropenem for injection, since the drug substance contains meropenem blended with 6.2% to 7.9% of sodium carbonate (as is basis).	submitted	
9.	Submit data of Pharmaceutical equivalence of the applied drug with the innovator / reference/ comparator product and results of all the quality tests (mentioned in any official pharmacopoeia or section 3.2.P.5.1 of this application) of the developed formulation and the innovator / reference / comparator product shall be submitted and discussed".	Firm submitted Pharmaceutical equivalence report performed against the product Meronem Injection of M/s. Pfizer Pharmaceuticals.	
10.	Compatibility studies for the dry powder for injections with its diluent shall be performed as per the instructions provided in individual label of the drug product.	Firm submitted the requisite details.	
11.	Submit data in section 3.2.P.2.2.1 as per the guidance document approved by Registration Board and available on DRAP website which specifies that "*The selection and optimization of the manufacturing process described in 3.2.P.3.3, in particular its critical aspects, shall be explained. Any specific manufacturing process development shall be provided e.g.,*	Submitted	

	sterilization shall be explained and justified. Where relevant, justification for the selection of aseptic processing or other sterilization methods over terminal sterilization shall be provided".		
12.	Justify the use of 10ml type-II glass vial for the applied drug product since as per the innovator's product Meropenem for injection is supplied in 20 mL and 30 mL injection vials containing sufficient meropenem to deliver 500 mg or 1 gram for intravenous administration, respectively.	Firm submitted the reply that 20ml glass vial is used for 500mg and 30ml is used for 100mg.	
13.	Provide the composition for the drug substance with clearly indicated the quantity of its base form and quantity of sodium carbonate along with the amount of sodium (as is basis).	Submitted	
14.	Justify the master formulation containing 1gm of sterile mixture of Meropenem and sodium carbonate for manufacturing of 1gm meropenem for injection, since the drug substance contains meropenem blended with 6.2% to 7.9% of sodium carbonate (as is basis).	Submitted the master formulation.	
15.	Provide control of critical steps and intermediates for the applied drug product in section 3.2.P.3.4, since the submitted document contains various variation in terms of weight and fill volume and does not cover all the critical steps involved in the manufacturing.	Submitted the requisite information of section 3.2.P.3.4.	
16.	• Variation has been observed regarding the sterilization process of vial in the process validation protocol. Clarification is required either the dry heat has been used for sterilization of vials or sterilized in autoclave. • The process validation protocols did not contain any steps to ensure the sterilization of vials and rubber stopper is adequately performed, further the time and temperature of sterilization cycle is also not validated. Justification is required in this regard. • The process validation protocols did not define any critical steps, justify how your process validation protocols can be considered acceptable. • In process validation protocol container description specified that Type-I 2ml clear glass vial has been used clarification is required regarding the variation of container closure system of the applied product. • According to the process validation data sheet bulk solution has been prepared after mixing in manufacturing tank while the manufacturing process given in previous sections revealed that ready to fill active material has been imported and only filling of active material in their respective container has been done by drug product manufacturer clarification is required	Firm submitted the revised process validation protocol.	

	regarding this variation of manufacturing procedure.		
17.	• Justify why the test of content of sodium and loss on drying is not mentioned in the specifications of the drug product • Justification is required for including volume variation test in the dry powder injectable product specification. • In section 1.5.6 applicant claimed USP specification for drug product while in - house specification has been claimed in section 3.2.P.5.2 clarification is required in this regard.	Firm submitted the revised specification of drug product in which test of content of sodium and loss on drying is included. Further claimed that they follow USP specification for drug product.	
18.	As per the submitted master formulation 1000mg per vial quantity has been filled while the weight variation limit specified is 1.445gm±3% per vial justification is required regarding the disparity in filled weight of active material.	Firm submitted the revised master formulation along with calculation of filled weight.	
19.	• As per the submitted procedure of assay, sample solution has been prepared in mobile phase in which 50mg of meropenem has been dissolved initially while according to the USP "*Constitute a container of Meropenem for Injection with a volume of water corresponding to the quantity of solvent specified in the labeling, and dilute with water".* Justify how your method could be considered as complying with USP monograph. • The USP monograph under the assay method specifies that sample should be hold for 1-2 hours at 25± 1°C before testing, while your method does not mention the same. Justify how your method could be considered as complying with USP monograph. • Provide the detailed procedure used for determination of content of sodium as per USP along with the evidence of availability of atomic absorption spectrophotometer. • Justify why the formula for calculation of assay contents of meropenem is different than that mentioned in USP monograph.	Firm submitted the revised analytical procedure in compliance of USP monograph of Meropenem Injection.	
20.	• Submit data of analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer. • Provide the data of verification studies along with the raw data sheet reflecting the sample, standard and placebo preparation procedure for performance of precision, specificity and accuracy parameters.	Submitted	
21.	Scientific justification for not performing the test of sodium content and loss on drying for the analysis of all three batches of drug product.	Firm submitted the batch analysis report	

22.	As per the batch analysis certificate manufacturing date of Batches MP01, MP02, MP03 are 03-2019,04-2019 and 05-2019 respectively while the section approval was granted on 14th October, 2020.Clarification is required regarding the manufacturing of batches prior section approval, further specify where the manufacturing of these batches was carried out.	Firm did not clarify the manufacturing dates of trial batches , since, initially the manufacturing date of trial batches of both 500mg and 1000mg was the year 2019, later firm submitted the revised stability data in which date of manufacturing of three trial batches were 03-2021.	
23.	Provide COA of primary / secondary reference standard including source and lot number.	submitted	
24.	Stability Following clarification is required regarding the date of manufacturing of batches for product development and stability studies: • As per the batch analysis certificate, manufacturing date of Batches MP01, MP02, MP03 are 03-2019,04-2019 and 05-2019 respectively while as per stability data sheets same batches has been manufactured on MP01: 03-2021, MP02:04-2021, MP03:05-2021.Clarification is required in this regard.	Firm clarified that the trial batches of 500mg is ME-01,ME-02,ME-03,while the trial batches of 1000mg is MP-01,MP-02,MP-03.	
25.	Justify why the test of content of sodium and loss on drying has not been performed during the stability studies of drug product.	Firm submitted the revised stability data in which both of these tests are included.	
26.	Provide details that which lot number of drug substance has been used in manufacturing of each batch of drug product. Also provide documents confirming evidence of import of each lot of drug substance used in manufacturing of these batches of drug product.	Not submitted	
27.	Provide data of stability batches properly arranged and supported by respective documents including analytical report / COA, raw data sheet and respective chromatograms separately for each time point.	Submitted	
28.	Provide Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted	
29.	Documents for the procurement of API with approval from DRAP (in case of import).	Not submitted	
30.	• Provide compliance Record of HPLC software 21CFR & audit trail reports on product testing. • Provide Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).	Submitted	
31.	Executed Production Documents Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2. P.8.	Submitted	
Decision of 331st meeting of Registration Board: Deferred for submission of following shortcomings:			

- Submit stability study data of three batches of the drug substance as per the zone IV-a conditions.
- Clarification regarding the manufacturing dates of trial batches, since initially year 2019 was mentioned on batch analysis certificates of all three trial batches later firm submitted the revised stability data in which date of manufacturing of three trial batches were 03-2021.
- Provide details that which lot number of drug substance has been used in manufacturing of each batch of drug product. Also provide documents confirming evidence of import of each lot of drug substance used in manufacturing of these batches of drug product.

Response of the Firm:

- Submit stability study data of three batches of the drug substance as per the zone IV-a conditions.

Firm submitted the stability data of three batches of the drug substance as per the zone IV-a conditions.

- Clarification regarding the manufacturing dates of trial batches, since initially year 2019 was mentioned on batch analysis certificates of all three trial batches later firm submitted the revised stability data in which date of manufacturing of three trial batches were 03-2021.

Firm replied that in 2019 their carbapenem section was ready for inspection but the inspection process of our section was under process and during this period we got the raw material on loan basis and processed our trial batches. Later, they were told that it will not be approved because they don't have a section approval letter and proof of import is also required, so they stopped the work on previous trial batches and initiated new studies after the section approval. After section approval we imported the raw material from Shenzhen Haibin Pharmaceuticals China, via DHL.

Further firm claimed that the old stability documents were withdrawn and previous working was nullified so they used the same batch number ME01,ME02,ME03 for 500mg of their new trial batches.

- Provide details that which lot number of drug substance has been used in manufacturing of each batch of drug product. Also provide documents confirming evidence of import of each lot of drug substance used in manufacturing of these batches of drug product.

Firm replied that the Batch no. 8MT2102165 is used in all three batches of finished product stability, which was imported from China via DHL and DHL invoice has been submitted by the Firm,

The DHL invoices submitted by the firm were not verifiable.

Decision: Deferred for evidence of procurement/import of drug substance with approval of DRAP I&E Office, since the submitted DHL courier receipt is not verifiable.

	Name, address of Manufacturing site.	MEDICRAFT PHARMACEUTICALS (PVT) Ltd. 126-B Industrial Estate Rd, Hayatabad, Peshawar
	Status of the applicant	☒ Manufacturer ☐ Importer ☒ Is involved in none of the above (contract giver)
	GMP status of the firm	The firm have submitted cGMP certificate issued on 13-05- 2022 based on inspection conducted on 10-05-2022.
	Evidence of approval of manufacturing facility	Firm submitted the copy of letter of Licensing Division regarding the grant of additional section of dry powder for Injection (Carbapenem) dated 14th October,2020.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Form-5 Dy. No 7654 dated 30-05-2019 Rs. 20,000/- dated 30-05-2019 Form-5F Dy. No 14521 dated 08-08-2019 Form-5F Dy.No 32155 dated 24-11-2021

	Details of fee submitted	PKR 20,000/-: dated 30-05-2019
	The proposed proprietary name / brand name	Medipenem 1000mg injection
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial contains: Meropenem (as trihydrate) ……1000mg (blended with sodium carbonate)
	Pharmaceutical form of applied drug	Dry Powder for Injection
	Pharmacotherapeutic Group of (API)	Carbapenem antibiotic
	Reference to Finished product specifications	USP
	Proposed Pack size	As per SRO
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Approved in FDA (MERREM 1000mg Injection M/s. AstraZeneca USA) Approved in EMA (MERONEM 1000mg Injection M/s. Pfizer UK)
	For generic drugs (me-too status)	PENRO IV 1000mg Injection M/s, Bosch Pharma
	Name and address of API manufacturer.	Shenzhen Haibin Pharmaceutical Co., Ltd. Manufacturing Site*:* No. 2003, Shenyan Road, Yantian Distric, Shenzhen City, Guangdong Province, People's Republic of China.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for both drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40^{o}C ± 2^{o}C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30^{o}C ± 2^{o}C / 65% ± 5% RH for 60 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for the quality tests for their product against the product Meronem Injection 500mg of M/s. Pfizer Pharma.

	Analytical method validation/verification of product	Firm has submitted report of verification of analytical method for the drug substance. Firm has submitted report of verification of analytical method for the drug product.

STABILITY STUDY DATA			
Manufacturer of API	M/s. Shenzhen Haibin Pharmaceutical Co., Ltd. Manufacturing Site*:* No. 2003, Shenyan Road, Yantian Distric, Shenzhen City, Guangdong Province, People's Republic of China.		
API Lot No.	8MT2102165		
Description of Pack (Container closure system)	Type I glass vial of 20ml packed inunit carton		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	MP01	MP02	MP03
Batch Size	2000 vials	2000 vials	2000 vials
Manufacturing Date	03-2021	03-2021	03-2021
Date of Initiation	24-03-2021	24-03-2021	24-03-2021
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Not submitted
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not submitted
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Sr.no.	Observations/Deficiencies/ Short-comings	Response of the Firm	
1.	Submit Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by Drug Product manufacturer (M/s. Medicraft Pharmaceuticals (Pvt.) Ltd.)"	submitted	

2.	Validation of analytical procedures Submit data of analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer. Batch Analysis Report	Submitted	
3.	Provide results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (CoA) of the same batch from Drug Substance / /Active Pharmaceutical Ingredient manufacture.	Firm submitted the batch analysis report of drug substance by drug product manufacturer.	
4.	Submit real time stability study data of three batches of the drug substance as per the conditions of zone IV-A since the submitted stability data of drug substance is conducted at 25°C ± 2°C/60% RH ±5%.	Not submitted	
5.	Submit data in section 3.2.P.2.1.2 as per the guidance document approved by Registration Board and available on DRAP website which specifies that "List of all components of the dosage form, and their amount on a per unit basis (including overages*, if any), the function of the components, and a reference to their quality standards (e.g. compendial monographs or manufacturer's specifications). *Overages are not acceptable unless fully justified* If the Drug product is formulated using an active moiety, then the composition for the active ingredient shall be clearly indicated (e.g. "1 mg of active ingredient base = 1.075 mg active ingredient hydrochloride").	Firm submitted the requisite details of section 3.2.P.2.1.2.	
6.	Provide information including type of diluent, its composition, quantity or volume, specifications (as applicable) and regulatory status in Pakistan (as applicable) for the diluent which is to be provided along with the applied drug.	Firm submitted the information related to the diluents.	
7.	Provide information specify the justification of formulation and method of manufacturing. It is important that critical quality attributes(CQAs) and Critical Process Parameters (CPP) shall also be discussed.	submitted	
8.	Justify the master formulation containing 1gm of sterile mixture of Meropenem and sodium carbonate for manufacturing of 1gm meropenem for injection, since the drug substance contains meropenem blended with 6.2% to 7.9% of sodium carbonate (as is basis).	submitted	
9.	Submit data of Pharmaceutical equivalence of the applied drug with the innovator / reference/ comparator product and results of all the quality tests (mentioned in any official pharmacopoeia or section 3.2.P.5.1 of this application) of the developed formulation and	Firm submitted Pharmaceutical equivalence report performed against the product Meronem Injection of M/s. Pfizer Pharmaceuticals.	

	the innovator / reference / comparator product shall be submitted and discussed".		
10.	Compatibility studies for the dry powder for injections with its diluent shall be performed as per the instructions provided in individual label of the drug product.	Firm submitted the requisite details.	
11.	Submit data in section 3.2.P.2.2.1 as per the guidance document approved by Registration Board and available on DRAP website which specifies that "*The selection and optimization of the manufacturing process described in 3.2.P.3.3, in particular its critical aspects, shall be explained. Any specific manufacturing process development shall be provided e.g., sterilization shall be explained and justified. Where relevant, justification for the selection of aseptic processing or other sterilization methods over terminal sterilization shall be provided".*	Submitted	
12.	Justify the use of 10ml type-II glass vial for the applied drug product since as per the innovator's product Meropenem for injection is supplied in 20 mL and 30 mL injection vials containing sufficient meropenem to deliver 500 mg or 1 gram for intravenous administration, respectively.	Firm submitted the reply that 20ml glass vial is used for 500mg and 30ml is used for 100mg.	
13.	Provide the composition for the drug substance with clearly indicated the quantity of its base form and quantity of sodium carbonate along with the amount of sodium (as is basis).	Submitted	
14.	Justify the master formulation containing 1gm of sterile mixture of Meropenem and sodium carbonate for manufacturing of 1gm meropenem for injection, since the drug substance contains meropenem blended with 6.2% to 7.9% of sodium carbonate (as is basis).	Submitted the master formulation.	
15.	Provide control of critical steps and intermediates for the applied drug product in section 3.2.P.3.4, since the submitted document contains various variation in terms of weight and fill volume and does not cover all the critical steps involved in the manufacturing.	Submitted the requisite information of section 3.2.P.3.4.	
16.	• Variation has been observed regarding the sterilization process of vial in the process validation protocol. Clarification is required either the dry heat has been used for sterilization of vials or sterilized in autoclave. • The process validation protocols did not contain any steps to ensure the sterilization of vials and rubber stopper is adequately performed, further the time and temperature of sterilization cycle is also not validated. Justification is required in this regard. • The process validation protocols did not define any critical steps, justify how your	Firm submitted the revised process validation protocol.	

	process validation protocols can be considered acceptable. • In process validation protocol container description specified that Type-I 2ml clear glass vial has been used clarification is required regarding the variation of container closure system of the applied product. • According to the process validation data sheet bulk solution has been prepared after mixing in manufacturing tank while the manufacturing process given in previous sections revealed that ready to fill active material has been imported and only filling of active material in their respective container has been done by drug product manufacturer clarification is required regarding this variation of manufacturing procedure.		
17.	• Justify why the test of content of sodium and loss on drying is not mentioned in the specifications of the drug product • Justification is required for including volume variation test in the dry powder injectable product specification. • In section 1.5.6 applicant claimed USP specification for drug product while in - house specification has been claimed in section 3.2.P.5.2 clarification is required in this regard.	Firm submitted the revised specification of drug product in which test of content of sodium and loss on drying is included. Further claimed that they follow USP specification for drug product.	
18.	As per the submitted master formulation 1000mg per vial quantity has been filled while the weight variation limit specified is 1.445gm±3% per vial justification is required regarding the disparity in filled weight of active material.	Firm submitted the revised master formulation along with calculation of filled weight.	
19.	• As per the submitted procedure of assay, sample solution has been prepared in mobile phase in which 50mg of meropenem has been dissolved initially while according to the USP "*Constitute a container of Meropenem for Injection with a volume of water corresponding to the quantity of solvent specified in the labeling, and dilute with water".* Justify how your method could be considered as complying with USP monograph. • The USP monograph under the assay method specifies that sample should be hold for 1-2 hours at 25± 1°C before testing, while your method does not mention the same. Justify how your method could be considered as complying with USP monograph. • Provide the detailed procedure used for determination of content of sodium as per USP along with the evidence of availability of atomic absorption spectrophotometer.	Firm submitted the revised analytical procedure in compliance of USP monograph of Meropenem Injection.	

	• Justify why the formula for calculation of assay contents of meropenem is different than that mentioned in USP monograph.		
20.	• Submit data of analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer. • Provide the data of verification studies along with the raw data sheet reflecting the sample, standard and placebo preparation procedure for performance of precision, specificity and accuracy parameters.	Submitted	
21.	Scientific justification for not performing the test of sodium content and loss on drying for the analysis of all three batches of drug product.	Firm submitted the batch analysis report	
22.	As per the batch analysis certificate manufacturing date of Batches MP01, MP02, MP03 are 03-2019,04-2019 and 05-2019 respectively while the section approval was granted on 14th October, 2020.Clarification is required regarding the manufacturing of batches prior section approval, further specify where the manufacturing of these batches was carried out.	Firm did not clarify the manufacturing dates of trial batches , since, initially the manufacturing date of trial batches of both 500mg and 1000mg was the year 2019, later firm submitted the revised stability data in which date of manufacturing of three trial batches were 03-2021.	
23.	Provide COA of primary / secondary reference standard including source and lot number.	submitted	
24.	Stability Following clarification is required regarding the date of manufacturing of batches for product development and stability studies: • As per the batch analysis certificate, manufacturing date of Batches MP01, MP02, MP03 are 03-2019,04-2019 and 05-2019 respectively while as per stability data sheets same batches has been manufactured on MP01: 03-2021, MP02:04-2021, MP03:05-2021.Clarification is required in this regard.	Firm clarified that the trial batches of 500mg is ME-01,ME-02,ME-03,while the trial batches of 1000mg is MP-01,MP-02,MP-03.	
25.	Justify why the test of content of sodium and loss on drying has not been performed during the stability studies of drug product.	Firm submitted the revised stability data in which both of these tests are included.	
26.	Provide details that which lot number of drug substance has been used in manufacturing of each batch of drug product. Also provide documents confirming evidence of import of each lot of drug substance used in manufacturing of these batches of drug product.	Not submitted	
27.	Provide data of stability batches properly arranged and supported by respective documents including analytical report / COA, raw data sheet and respective chromatograms separately for each time point.	Submitted	
28.	Provide Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted	

29.	Documents for the procurement of API with approval from DRAP (in case of import).	Not submitted	
30.	• Provide compliance Record of HPLC software 21CFR & audit trail reports on product testing. • Provide Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).	Submitted	
31.	Executed Production Documents Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2. P.8.	Submitted	

Decision of 331st meeting of Registration Board:
Deferred for submission of following shortcomings:

- Submit stability study data of three batches of the drug substance as per the zone IV-a conditions.
- Clarification regarding the manufacturing dates of trial batches, since initially year 2019 was mentioned on batch analysis certificates of all three trial batches later firm submitted the revised stability data in which date of manufacturing of three trial batches were 03-2021.
- Provide details that which lot number of drug substance has been used in manufacturing of each batch of drug product. Also provide documents confirming evidence of import of each lot of drug substance used in manufacturing of these batches of drug product.

Response of the Firm:

- Submit stability study data of three batches of the drug substance as per the zone IV-a conditions.

Firm submitted the stability data of three batches of the drug substance as per the zone IV-a conditions.

- Clarification regarding the manufacturing dates of trial batches, since initially year 2019 was mentioned on batch analysis certificates of all three trial batches later firm submitted the revised stability data in which date of manufacturing of three trial batches were 03-2021.

Firm replied that in 2019 their carbapenem section was ready for inspection but the inspection process of our section was under process and during this period we got the raw material on loan basis and processed our trial batches. Later, they were told that it will not be approved because they don't have a section approval letter and proof of import is also required, so they stopped the work on previous trial batches and initiated new studies after the section approval. After section approval we imported the raw material from Shenzhen Haibin Pharmaceuticals China, via DHL.
Further firm claimed that the old stability documents were withdrawn and previous working was nullified so they used the same batch number MP01, MP02, MP03 for 1000mg of their new trial batches.

- Provide details that which lot number of drug substance has been used in manufacturing of each batch of drug product. Also provide documents confirming evidence of import of each lot of drug substance used in manufacturing of these batches of drug product.

Firm replied that the Batch no. 8MT2102165 is used in all three batches of finished product stability, which was imported from China via DHL and DHL invoice has been submitted by the Firm.

The invoices submitted by the firm were not verifiable.

Decision: Deferred for evidence of procurement/import of drug substance with approval of DRAP I&E Office, since the submitted DHL courier receipt is not verifiable.

	Dy. No. and date of submission	Dy.no. 13179 dated 29-05-2023
	Details of fee submitted	PKR 30,000/- Dated 23-05-2023
	The proposed proprietary name / brand name	OMI 20mg Capsules
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Capsule contains: Omeprazole enteric coated pellets eq. to Omeprazole……20mg
	Pharmacotherapeutic Group of (API)	Proton pump inhibitor
	Pharmaceutical form of applied drug	Capsules
	Reference to Finished product specifications	USP specifications
	Proposed Pack size	14's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Omeprazole 20mg Capsule of M/s Sandoz Ltd UK (USFDA approved)
	For generic drugs (me-too status)	Risek 20 mg Capsule of M/s GETZ Pharma (Reg # 019364)
	Name and address of API manufacturer.	M/s Vision pharmaceuticals (pvt) Ltd., Plot no. 22-23, Industrial Triangle, Kahuta Road, Islamabad
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time

		stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence and CDP of test formulation with comparator product Losec 20 mg Capsule (B # YEVA, Mfg Date: 09-2021, Exp Date 08-2024) of M/s Astrazeneca (Manufactured by M/s. Astrazeneca and Imported by M/s. Barrett & Hodgson, Pakistan. The results of the tests of both products were found to be within the specifications and are comparable.
	Analytical method validation/verification of product	Firm has submitted analytical method validation study reports for drug substance as well as drug product.

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	NA.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	The firm has submitted copy of GMP Certificate for M/s Vision pharma pvt Ltd, Lahore issued by DRAP Lahore. It is valid till 10-02-2022.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	The firm has submitted copy of invoice for the purchase of omeprazole EC pellets from M/s vision pharma dated 14-07-2022.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted

5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator:

S.no.	Sections	Observations/Deficiencies/ Short-comings	Response of the Firm
1.	3.2.S.4.1 - 3.2.S.4.2	• Submit copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required".	Firm submit the specification and analytical of drug substance by drug product manufacturer only. Specification and Analytical Procedure of drug substance by drug substance manufacturer is not submitted by the firm.
2.	3.2.S.4.2	Further, justify the performance of dissolution testing on UV spectrophotometer by the drug substance manufacturer since the USP recommends test of dissolution on HPLC.	Firm replied that the drug substance manufacturer uses UV method for analysis of drug substance but they use HPLC method for both drug substance and drug product.
3.	3.2.S.4.3	Submit data of verification of analytical procedure of drug substance in section 3.2.S.4.3 as per the guidance document approved by Registration Board which specifies that *"Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted".*	Firm submitted the analytical method verification report in which the target concentration 0.3 mg/ml instead of 0.2mg/ml as per the submitted analytical procedure.
4.	3.2.S.4.3	Submit batch analysis report of drug substance in section 3.2.S.4.4 as per the guidance document approved by Registration Board which specifies that *"Provide results of analysis of relevant batch(es) of Drug Substance*	Firm submitted the Batch analysis report of drug substance.

			performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (CoA) of the same batch from Drug Substance / /Active Pharmaceutical Ingredient manufacture. A discussion and justification shall be provided for any incomplete analyses of the drugsubstance / API by Drug Product manufacturer (e.g.results not tested according to the proposed specification)".		
	5.	3.2.P.2.2 .1	• Calculations of comparative dissolution profile is not in accordance with guidelines approved in 293rd meeting of Registration Board with reference to following points: • For f2 calculations a minimum of three time points (excluding point zero) must be used; mentioned the time point which were considered for the calculation of f2 value.	Firm replied that 3 time points were used during Comparative dissolution profile for buffer media at pH 6.8, the reading of 3rd time point are more than 85%, therefore no further reading required.	
	6.		Provide complete calculations of f2 value in all three physiological mediums.	Firm did not submit the reply of this query. Later Firm submit the F2 value calculations in all three physiological mediums.	
	7.	3.2.P.2.2 .1	Submit data of Pharmaceutical equivalenceof the applied drug with the innovator / reference/ comparator product and results of all the quality tests (mentioned in any official pharmacopoeia or section 3.2.P.5.1 of this application) of the developed formulation and the innovator / reference / comparator product shall be submitted and discussed".	Firm did not submit the reply of this query.	
	8.	3.2.P.5.3	Justify for performing the verification studies of assay procedure different from the method recommended in USP monograph of "Omeprazole delayed release capsule". Analytical method of drug product specifies that concentration of standard and sample preparation is 0.2mg/ml while you have performed verification studies	Firm replied that the Higher conc. Was taken to minimize errors in readings and graphs and for better resolution.	

			keeping the target concentration 0.4mg/ml. Justify how these studies represent your analytical method which is in complies with USP monograph.		
	9.	3.2.P.8	• Justify for keeping the run time around 4.5-5mins as evident from the submitted chromatogram, since the USP monograph recommends HPLC system of gradient elution over run time of 25minutes. • Justify how can the retention time, peak area, peak height, area% as well as height % of sample solutions on all the provided chromatograms of both strengths were same upto three digits.	Firm replied that we perform tests and present the data as we received during the test and analysis and respectively calculate the values according to received data.	
	10.	3.2.P.8	• Submit raw data sheets and chromatograms of dissolution test since you have only submitted the chromatograms of assay. • Submit Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	Firm replied that our HPLC Logs are recorded manually and we can share pages of our log book for your consideration.	

Decision of 330th meeting of Registration Board:
Deferred for submission of following:

- Specification and analytical procedure of drug substance by drug substance manufacturer.
- Analytical verification report of drug substance performed in accordance with analytical procedure given in section 3.2. S.4.2.
- Data of Pharmaceutical equivalence of the applied drug with the innovator / reference/ comparator product and results of all the quality tests should be submitted.
- Analytical Verification report of drug product performed in accordance with USP monograph of "Omeprazole Capsule".
- Justification for keeping the run time around 4.5-5mins as evident from the submitted chromatogram, while the USP monograph recommends HPLC system of gradient elution over run time of 25minutes.
- Justify how can the retention time, peak area, peak height, area% as well as height % of sample solutions on all the provided chromatograms of both strengths were same upto three digits.

Response of the Firm:

Sr.no.	Decision of Registration Board	Response of the Firm
1.	Specification and analytical procedure of drug substance by drug substance manufacturer.	Firm submitted the specification and analytical procedure of drug substance
2.	Analytical verification report of drug substance performed in accordance with analytical procedure given in section 3.2. S.4.2.	Firm submitted the analytical verification report of drug substance by keeping the target concentration of sample solution 0.3mg/ml, while assay method given in section 3.2.S.4.2 specified that the final concentration of sample solution should be 0.2mg/ml.

	3.	Data of Pharmaceutical equivalence ofthe applied drug with the innovator / reference/ comparator product and results of all the quality tests should be submitted.	Firm submitted the Pharmaceutical equivalence report of esomeprazole capsule instead of omeprazole capsule.	
	4.	Analytical Verification report of drug product performed in accordance with USP monograph of "Omeprazole Capsule".	Firm submitted the analytical verification report of drug product which is not in accordance with USP monograph of "Omeprazole Capsule".	
	5.	Justification for keeping the run time around 4.5-5mins as evident from the submitted chromatogram, while the USP monograph recommends HPLC system of gradient elution over run time of 25minutes.	Firm has submitted chromatograms as per USP monograph	
	6.	Justify how can the retention time, peak area, peak height, area% as well as height % of sample solutions on all the provided chromatograms of both strengths were same up to three digits.		

Decision: Deferred for submission of following shortcomings:

- **Confirmation of validity of Drug Manufacturing License from Licensing Division.**
- **Analytical method verification report of drug substance performed in accordance with analytical procedure given in section 3.2.S.4.2.**
- **Data of Pharmaceutical equivalence of the applied drug with the innovator / reference/ comparator product and results of all the quality tests should be submitted.**
- **Analytical method Verification report of drug product performed in accordance with USP monograph of "Omeprazole Capsule".**

451.	Name, address of Applicant / Marketing Authorization Holder	M/s Wahabsons pharmaceuticals (Pvt) Ltd, 4 km Bunner Road, Barikot,Swat
	Name, address of Manufacturing site.	M/s Wahabsons pharmaceuticals (Pvt) Ltd, 4 km Bunner Road, Barikot,Swat
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	Renewal of DML with the regularization of following sections dated 29th April,2022: Capsule Section, Oral Liquid Section. Licensing status needs to be confirmed from the Licensing Division.
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter of grant of Renewal of DML with the following sections dated 29th April, 2022 specifying Capsule Section, Oral Liquid Section.
	Status of application	☒ Generic Drug Product (GDP) ☐ New Drug Product (NDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy.no. 13180 dated 29-05-2023
	Details of fee submitted	PKR 30,000/- Dated 23-05-2023
	The proposed proprietary name / brand name	OMI 40mg Capsules

	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Capsule contains: Omeprazole enteric coated pellets eq. to Omeprazole……40mg
	Pharmacotherapeutic Group of (API)	Proton pump inhibitor
	Pharmaceutical form of applied drug	Capsules
	Reference to Finished product specifications	USP specifications
	Proposed Pack size	14's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Omeprazole 40mg Capsule of M/s Sandoz Ltd UK (USFDA approved)
	For generic drugs (me-too status)	Risek 40 mg Capsule of M/s GETZ Pharma (Reg # 022109)
	Name and address of API manufacturer.	M/s Vision pharmaceuticals (pvt) Ltd., Plot no. 22-23, Industrial Triangle, Kahuta Road, Islamabad
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence and CDP of test formulation with comparator product Risek 40 mg Capsule (B# 004067, Mfg Date: 04-2022, Exp Date 04-2025) of M/s. Getz Pharma,Karachi. The results of the tests of both products were found to be within the specifications and are comparable.

	Analytical method validation/verification of product	Firm has submitted analytical method validation study reports for drug substance as well as drug product.

STABILITY STUDY DATA			
Manufacturer of API	M/s Vision Pharmaceuticals, Plot No. 22-23, Industrial Triangle, Kahuta Road, Islamabad.		
API Lot No.	OMP1158		
Description of Pack (Container closure system)	14's blisters packed in unit carton		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0,3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	Tr-004	Tr-005	Tr-006
Batch Size	2000 caps	2000 caps	2000 caps
Manufacturing Date	08-2022	08-2022	08-2022
Date of Initiation	17-08-2022	17-08-2022	17-08-2022
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	NA.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	The firm has submitted copy of GMP Certificate for M/s Vision pharma pvt Ltd, Lahore issued by DRAP Lahore. It is valid till 10-02-2022.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	The firm has submitted copy of invoice for the purchase of omeprazole EC pellets from M/s vision pharma dated 14-07-2022.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator:

S.no.	Sections	Observations/Deficiencies/ Short-comings	Response of the Firm
1.	3.2.S.4.1 - 3.2.S.4.2	• Submit copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical	Firm submit the specification and analytical of drug substance by drug product manufacturer only. Specification and Analytical Procedure of drug substance by drug substance manufacturer is not submitted by the firm.

			procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required".		
	2.	3.2.S.4.2	Further, justify the performance of dissolution testing on UV spectrophotometer by the drug substance manufacturer since the USP recommends test of dissolution on HPLC.	Firm replied that the drug substance manufacturer uses UV method for analysis of drug substance but they use HPLC method for both drug substance and drug product.	
	3.	3.2.S.4.3	Submit data of verification of analytical procedure of drug substance in section 3.2.S.4.3 as per the guidance document approved by Registration Board which specifies that *"Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturerfor both compendial as well as non-compendial drug substance(s) shall be submitted".*	Firm submitted the analytical method verification report in which the target concentration 0.3 mg/ml instead of 0.2mg/ml as per the submitted analytical procedure.	
	4.	3.2.S.4.3	Submit batch analysis report of drug substance in section 3.2.S.4.4 as per the guidance document approved by Registration Board which specifies that *"Provide results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (CoA) of the same batch from Drug Substance / /Active Pharmaceutical Ingredient manufacture. A discussion and justification shall be provided for any incomplete analyses of the drug substance / API by Drug Product manufacturer (e.g. results not tested according to the proposed specification)".*	Firm submitted the Batch analysis report of drug substance.	
	5.	3.2.P.2.2 .1	• Calculations of comparative dissolution profile is not in accordance with guidelines approved in 293rd meetingof Registration Board with	Firm replied that 3 time points were used during Comparative dissolution profile for buffer media at pH 6.8, the reading of 3rd time point are more than 85%, therefore no further reading required.	

			reference to following points: • For f2 calculations a minimum of three time points (excluding point zero) must be used; mentioned the time point which were considered for the calculation of f2 value.		
	6.		Provide complete calculations of f2 value in all three physiological mediums.	Firm did not submit the reply of this query	
	7.	3.2.P.2.2.1	Submit data of Pharmaceutical equivalence of the applied drug with the innovator / reference/ comparator product and results of all the quality tests (mentioned in any official pharmacopoeia or section 3.2.P.5.1 of this application) of the developed formulation and the innovator / reference / comparator product shall be submitted and discussed".	Firm did not submit the reply of this query.	
	8.	3.2.P.5.3	Justify for performing the verification studies of assay procedure different from the method recommended in USP monograph of "Omeprazole delayed release capsule". Analytical method of drug product specifies that concentration of standard and sample preparation is 0.2mg/ml while you have performed verification studies keeping the target concentration 0.4mg/ml. Justify how these studies represent your analytical method which is in complies with USP monograph.	Firm replied that the Higher conc. Was taken to minimize errors in readings and graphs and for better resolution.	
	9.	3.2.P.8	• Justify for keeping the run time around 4.5-5mins as evident from the submitted chromatogram, since the USP monograph recommends HPLC system of gradient elution over run time of 25minutes. • Justify how can the retention time, peak area, peak height, area% as well as height % of sample solutions on all the provided chromatograms of both strengths were same upto three digits.	Firm replied that we perform tests and present the data as we received during the test and analysis and respectively calculate the values according to received data.	

	10.	3.2.P.8	• Submit raw data sheets and chromatograms of dissolution test since you have only submitted the chromatograms of assay. • Submit Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	Firm replied that our HPLC Logs are recorded manually and we can share pages of our log book for your consideration.	

Decision of 331st meeting of Registration Board:

Deferred for submission of following:

- Specification and analytical procedure of drug substance by drug substance manufacturer.
- Analytical verification report of drug substance performed in accordance with analytical procedure given in section 3.2.S.4.2.
- Data of Pharmaceutical equivalence of the applied drug with the innovator / reference/ comparator product and results of all the quality tests should be submitted.
- Analytical Verification report of drug product performed in accordance with USP monograph of "Omeprazole Capsule".
- Justification for keeping the run time around 4.5-5mins as evident from the submitted chromatogram, while the USP monograph recommends HPLC system of gradient elution over run time of 25minutes.
- Justify how can the retention time, peak area, peak height, area% as well as height % of sample solutions on all the provided chromatograms of both strengths were same upto three digits.

Response of the Firm:

Sr.no.	Decision of Registration Board	Response of the Firm
1.	Specification and analytical procedure of drug substance by drug substance manufacturer.	Firm submitted the specification and analytical procedure of drug substance
2.	Analytical verification report of drug substance performed in accordance with analytical procedure given in section 3.2. S.4.2.	Firm submitted the analytical verification report of drug substance by keeping the target concentration of sample solution 0.3mg/ml, while assay method given in section 3.2.S.4.2 specified that the final concentration of sample solution should be 0.2mg/ml.
3.	Data of Pharmaceutical equivalence ofthe applied drug with the innovator / reference/ comparator product and results of all the quality tests should be submitted.	Firm submitted the Pharmaceutical equivalence report of esomeprazole capsule instead of omeprazole capsule.
4.	Analytical Verification report of drug product performed in accordance with USP monograph of "Omeprazole Capsule".	Firm submitted the analytical verification report of drug product which is not in accordance with USP monograph of "Omeprazole Capsule".
5.	Justification for keeping the run time around 4.5-5mins as evident from the submitted chromatogram, while the USP monograph recommends HPLC system of gradient elution over run time of 25minutes.	Firm has submitted chromatograms as per USP monograph
6.	Justify how can the retention time, peak area, peak height, area% as well as height % of sample solutions on all the provided chromatograms of both strengths were same up to three digits.	

Decision: Deferred for submission of following shortcomings:

- **Confirmation of validity of Drug Manufacturing License from Licensing Division.**

- **Analytical method verification report of drug substance performed in accordance with analytical procedure given in section 3.2.S.4.2.**
- **Data of Pharmaceutical equivalence of the applied drug with the innovator / reference/ comparator product and results of all the quality tests should be submitted.**
- **Analytical method Verification report of drug product performed in accordance with USP monograph of "Omeprazole Capsule".**

Remarks OF Evaluator:

S.no.	Observations/Deficiencies/ Short-comings
1.	Provide analytical Method verification studies including specificity, accuracy and repeatability parameter of drug substance performed by the Drug Product manufacturer.
2.	Provide COA of drug substance by drug substance manufacturer.

3.	Submit COA of reference/working standard which was used by drug product manufacturer for analysis of API.	
4.	Formulation contain preservative sodium benzoate, so preservative effectiveness studies to be performed as per recommendations of pharmacopoeia and shall be submit.	
5.	Justify the use of saccharin in the syrup formulation, since the review document of reference product approve in EMA clearly mentioned that *saccharin was not found acceptable from peadriatic point of view.*	
6.	Submit data of Pharmaceutical equivalence of the applied drug shall be established with the innovator / reference/ comparator product and results of all the quality tests (mentioned in any official pharmacopoeia or section 3.2.P.5.1 of this application) of the developed formulation and the innovator / reference / comparator product shall be submitted and discussed	
7.	Submit the analysis report/COA of excipients propylene glycol, sorbitol and glycerine, which includes the results of impurity testing related to the presence of ethylene glycol and diethylene glycol, in compliance of notification issued by DRAP vide No. F.6-30/2022-QA dated 21-10-2022.	
8.	According to the review literature of reference product approved in Ema stability of active substance is demonstrated to be optimal in a solution with a pH between 5 and 6, Justify for keeping the pH acceptance limit between 4-5.5 when the stability of drug substance is optimized in the solution with a pH between 5 and 6.	
9.	Justify for not including the test of extractable volume and microbial content test in the finished product specification , since these tests are recommended by the pharmacopeia in their general chapter for oral solution preparation.	
10.	Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product under section 2.3.R.1.1, for which stability studies data is provided in Module 3 section 3.2. P.8.	

Decision of 326th meeting of Registration Board:
Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.

Response of the Firm:

S.no.	Observations/Deficiencies/ Short-comings	Reply of the Firm
1.	Provide analytical Method verification studies including specificity, accuracy and repeatability parameter of drug substance performed by the Drug Product manufacturer.	Submitted
2.	Provide COA of drug substance by drug substance manufacturer.	Submitted
3.	Submit COA of reference/working standard which was used by drug product manufacturer for analysis of API.	Submitted
4.	Formulation contain preservative sodium benzoate, so preservative effectiveness studies to be performed as per recommendations of pharmacopoeia and shall be submit.	Firm submitted the preservative efficacy report of sodium benzoate instead of drug product containing sodium benzoate as recommended in pharmacopeia.
5.	Justify the use of saccharin in the syrup formulation, since the review document of reference product approve in EMA clearly mentioned that *saccharin was not found acceptable from peadriatic point of view.*	Firm replied that "Saccharin is not used in trial batches as evidence in master formulation and MOA in the submitted BMRs with stability studies. It is a typographical error in the formulation provided in 3.2.P.1 of the dossier and we apologize for that mistake. Revised 3.2.P.1 is enclosed for your kind consideration.
6.	Submit data of Pharmaceutical equivalence of the applied drug shall be established with the innovator / reference/ comparator product	Firm submitted Pharmaceutical Equivalence report against the comparator product Jardin –D 0.5mg/ml

		and results of all the quality tests (mentioned in any official pharmacopoeia or section 3.2.P.5.1 of this application) of the developed formulation and the innovator / reference / comparator product shall be submitted and discussed	Syrup of M/s. High-Q Pharmaceuticals Korangi Industrial Area Karachi.	
	7.	Submit the analysis report/COA of excipients propylene glycol, sorbitol and glycerine, which includes the results of impurity testing related to the presence of ethylene glycol and diethylene glycol, in compliance of notification issued by DRAP vide No. F.6-30/2022-QA dated 21-10-2022.	Firm submitted the certificate of test or analysis on Form-6 for propylene glycol and sorbitol.	
	8.	According to the review literature of reference product approved in Ema stability of active substance is demonstrated to be optimal in a solution with a pH between 5 and 6, Justify for keeping the pH acceptance limit between 4-5.5 when the stability of drug substance is optimized in the solution with a pH between 5 and 6.	Firm replied that the result of both product (test and reference) are within acceptable limits of innovator Product as evident from the submitted pharmaceutical equivalence report. Further firm claimed that pH of their product is stable during stability studies of product (but the pH adjusted for all trial batches were below 5 as evidentfrom the submitted BMR). To comply with the specification of innovator product, the specification of the product are revised as per innovator product to implement on commercial batches.	
	9.	Justify for not including the test of extractable volume and microbial content test in the finished product specification , since these tests are recommended by the pharmacopeia in their general chapter for oral solution preparation.	Firm replied that the test of extractable volume and microbial test are included in the finished product specification and revised finished product specification is submitted.	
	10.	Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product under section 2.3.R.1.1, for which stability studies data is provided in Module 3 section 3.2. P.8.	Submitted	

Decision of 331st meeting of Registration Board:
Deferred for submission of following:

- Preservative effectiveness studies performed in accordance with USP general chapter <51> Antimicrobial Effectiveness testing.
- Justification for adjusting the final pH of oral solution below value 5 as evident from the submitted of Batch Manufacturing Record (BMR) of trial batches.

Response of the Firm:

- Preservative effectiveness studies performed in accordance with USP general chapter <51> Antimicrobial Effectiveness testing.

Firm submitted the preservative efficacy test performed on drug product in accordance with USP general chapter <51> Antimicrobial Effectiveness testing.

- Justification for adjusting the final pH of oral solution below value 5 as evident from the submitted of Batch Manufacturing Record (BMR) of trial batches.

Firm replied that initially the innovator's pH specification was not available and they have no idea of the pH range of the innovator product. They prepared and set the pH of the trial batches according to research data that falls near to the innovator's pH range. Further, for commercial batches, firm commit that they will shift to innovator's specification to comply the innovator's specification as a reference i.e. pH range 5.0-6.0.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**

Registration Application Withdrawal Request by M/s. Citi Pharma Pvt. Ltd., Kasur:

M/s. Citi Pharma Pvt. Ltd. requested for withdrawal of registration application of following products vide letter no. CP/FOM/2023/019 dated 11-12-2023, which were defer in 330th meeting of Registration Board for *verification of DRAP attested documents related to the procurement of API*. In their letter firm stated that "we citi Pharma Pvt. Ltd. writing to inform you about a situation regarding the misalignment of documents related to a product that was submitted to DRAP Pakistan. Due to this issue, I would like to formally request the withdrawal of the product from the system.
The detail of the products are as follows:

1. Cef-slub 1g Injection (sterile powder Cefoperazone Sodium JP eq. to Cefoperazone …500mg +Sulbactam Sodium eq. to Sulbactam….500mg)
2. Cef-slub 2g Injection (sterile powder Cefoperazone Sodium JP eq. to Cefoperazone …1g +Sulbactam Sodium eq. to Sulbactam….1g)

Detail of the case of above-mentioned products presented in 330th meeting of Registration Board is as under:

454.	**Name, / Marketing Authorization Holder address of Applicant**	**M/s Citi Pharma Private Limited**
	Name, address of Manufacturing site.	M/s Citi Pharma Private Limited Factory: 3 K.M, Head Balloki Road, Phool Nagar, Distt. Kasur
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy.No 9107 dated 11-04-2022
	Details of fee submitted	Rs.30,000/- dated 28-03-2022
	The proposed proprietary name / brand name	Cef-Sulb Injection 1gm
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Sterile Powder Cefoperazone sodium MS equivalent to Cefoperazone…..... 500mg Sterile Powder Sulbactam sodium MS equivalent to Sulbactam 500mg
	Pharmaceutical form of applied drug	Intra-venous / Intra-muscular Injection
	Pharmacotherapeutic Group of (API)	Broad-spectrum cephalosporin antibiotic
	Reference to Finished product specifications	Manufacturer's Specifications
	Proposed Pack size	1×1's
	Proposed unit price	As per SRO

	The status in reference regulatory authorities	Sulperazone Injection 1gm by M/s Pfizer Ltd. USA, USFDA Approved.
	For generic drugs (me-too status)	Toxirid Injection 1gm by Global Pharmaceuticals, Reg. No. 042552
	GMP status of the Finished product manufacturer	New license granted on 21/09/2021 Cephalosporin section approved.
	Name and address of API manufacturer.	M/s Shandong Luoxin Pharmaceutical Co.,Ltd China
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of Cefoperazone sodium /Sulbactam sodium eq to Cefoperazone /Sulbactam not present in any pharmacopeia. The firm has submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls,specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 6 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: (T-CSP001, T-CSP002, T-CSP003)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand leader that is Toxirid Injection 1gm by Global Pharmaceuticals Pakistan performing quality tests (Identification, Assay, Constituted Solution, Uniformity of dosage form).
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.

STABILITY STUDY DATA			
Manufacturer of API	M/s Shandong Luoxin Pharmaceutical Co.,Ltd China

Manufacturing Date	09-2021	09-2021	09-2021
Date of Initiation	26-09-2021	26-09-2021	26-09-2021
No. of Batches	03		
Administrative Portion			
1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.	
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. SD20191025 issued by CFDA valid till 10/12/2024.	
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Letter No. 11160/2021/DRAP Dated: 27-07-2021 B/L No. 176-6445-291 dated: 31-07-2021	
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted	
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted	
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted	

Remarks OF Evaluator:

Deficiencies/ Short-comings

Shortcomings communicated to the Firm:

- You have mentioned USP specification in section 1.5.6 in module 1, while the drug product monograph is not available in USP, but present in JP. Revise the specifications along with submission of requisite fee.
- The drug substance manufacturer has claimed both USP and in-house standards for the drug substance, provide scientific justification in this regard.
- Justify, how you have claimed USP specification for drug substance cefoperazone sodium+Sulbactum30-May-22 sodium, when the monograph has not been present in USP.
- Submit data in section 3.2.S.4.1 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance manufacturers."
- Submit data in section 3.2.S.4.3 as per the decision of 293rd meeting of Registration Board, which states that "Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted". Further justify how the analysis of drug substance was conducted without performing verification studies of the analytical method of drug substance.
- Stability study data of 3 batches of drug substances till the assigned shelf life needs to be submitted, since stability data of 3 months has submitted despite the batch had been manufactured in 2017.
- Submit data in section 3.2.P.1 (c) as per the decision of 293rd meeting of Registration Board, which states that "Provide information including type of diluent, its composition, quantity or volume, specifications (as applicable) and regulatory status in Pakistan (as applicable) for the diluent which is to be provided along with the applied drug".
- Justify the use of 4ml printed glass vial for packaging of drug product with reference to the volume of diluent used for reconstitution of dry powder for injection as per innovator product.
- Justify how you have performed pharmaceutical equivalence studies using the reference product of different strength.

- Submit data in section 3.2.P.2.3 (Manufacturing process development) as per the decision of 293rd meeting of Registration Board, which states that "The selection and optimization of the manufacturing process described in 3.2.P.3.3, in particular its critical aspects, shall be explained. Any specific manufacturing process development shall be provided e.g., sterilization shall be explained and justified. Where relevant, justification for the selection of aseptic processing or other sterilization methods over terminal sterilization shall be provided".
- Submit the data of compatibility studies in section 3.2.P.2.6 as per the decision of 293rd meeting of Registration Board, which states that "*Compatibility studies for the dry powder for injections and dry powder for suspension should be performed as per the instructions provided in individual label of the drug product*"
- Batch formula mentioned in section 3.2.P.3.1 evident that only the active ingredient is the part of batch formula, while manufacturing procedure specified in section 3.2.P.3.3 stated that "solution has been prepared in 50-liter pyrogen free water by dissolving the 1.5kg Citi-Taxime 250mg IM and later add propylene glycol, sodium chloride and sodium hydroxide. Clarification is required either the applied product is dry powder for injection or a solution for injection as evident from the detail manufacturing procedure given in section 3.2. P.3.3.
- Justify the weight variation limit of filled vial from1107-1152mg with reference to the claimed potency of both actives.
- Provide the Pharmacopeial reference of finished product specifications, since USP specs are mentioned in module 1, and USP does not contain any monograph for Cefoperazone Sodium and Sulbactam Sodium for Injection. However, monograph for Cefoperazone Sodium and Sulbactam Sodium for Injection is present in Japanese Pharmacopeia.
- Provide COA of primary / secondary reference standard including source and lot number in section 3.2. P.6.
- According to the document submitted in section 3.2.P.8 batch no. T-CSP-002 and T-CSP-003 has been manufactured on 02-2021, while stability study data sheet submitted in section 3.2.P.8.3 stated these batches were manufactured in sep-2021. Clarification required in this regard.
- Specify the batch size of all three stability batches.
- Justify the pH acceptance criteria (6.0-8.0) and water content acceptance limit (8.0-11%) set for drug product with the acceptance criteria mentioned on COA of drug substance by drug substance manufacturer i.e. 4.5-6.5 and NMT 3.0%. Elevation of pH and water content of drug product without any further processing of formulation needs to be justify with the pharmacopeial reference and innovator product.
- Assay content of both active should be separately calculated and mentioned as per pharmacopeial reference and innovator product.
- As per release specification of drug product acceptance criteria of assay is 90-110% while the stability data sheet represents that assay content should be between 90-115%. Justification is required regarding the variation in acceptance limit of assay content in various section of module-III.
- Justify why the sterility test is not included in the stability studies of the product.
- Provide details that which lot number of drug substance has been used in manufacturing of each batch of drug product. Also provide documents confirming evidence of import of each lot of drug substance used in manufacturing of these batches of drug product.
- Provide data of stability batches properly arranged and supported by respective documents including analytical report / COA, raw data sheet and respective chromatograms separately for each time point.
- Provide Reference of previous approval of applications with stability study data of the firm (if any)
- Documents for the procurement of API with approval from DRAP (in case of import).
- Provide compliance Record of HPLC software 21CFR & audit trail reports on product testing.
- Provide Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).
- In-use stability studies of reconstituted suspension is required along with proposed in-use storage statement and in-use shelf-life.

Remarks of the Evaluator:
In response of above shortcomings, firm has submitted a complete new CTD dossier with fee of Rs.7500/- in which drug substance was imported from a new source and accordingly data of trial batches of drug product manufactured from new source of drug substance has submitted. Newly submitted dossier has again evaluated and presented below before the Board for its consideration.

455.	Name, / Marketing Authorization Holder address of Applicant	M/s Citi Pharma Private Limited

Remarks OF Evaluator:

Sr.no.	Section	Shortcomings/Observations
1.	3.2. S.4.1	Acceptance criteria of assay mentioned in specification of drug was not in accordance with JP monograph. Assay limit mentioned in COA and specification of drug substance by both drug substance manufacturer "JP drug product manufacturer was than on anhydrous basis cefoperazone ≥43.5% and sulbactam on anhydrous basis ≥44.5%. Assay acceptance criteria in accordance with monograph is It contains not less than 90.0% and not more and 110.0% of the labeled potency of Cefoperazone (C25H27N9O8S2: 645.67), and not less than 95.0% and not more than 110.0% of the labeled potency of sulbactam (C8H11NO5S: 233.24)".
2.	3.2. S.4.3	Firm has not submitted the analytical method verification report of drug substance performed by drug product manufacturer.
3.	3.2. S.5	Firm has not submitted the COA of primary / secondary reference standard including source and lot number used for testing of drug substance.
4.	3.2. S.7	Firm has submitted only 6 months long term stability data of all three batches of drug substance.
5.	3.2P.2.1(a)(b)	Firm has not provided any details related to weight of powder filled per vial keeping in view the sodium content of both active substances.
6.	3.2.P.2.1(C)	Firm has not provided any details regarding the type of diluent, its composition, quantity or volume, specifications (as applicable) in which drug product has to be reconstitute before administration.
7.	3.2. P.2.2.1	Firm has submitted the pharmaceutical equivalence report in which the acceptance criteria of all the quality test was not in accordance with JP monograph: Acceptance criteria in pharmaceutical equivalence report / Acceptance criteria in JP monograph pH (6.0-8.8) / pH (4.5-6.5) Assay (90%-110%) / Assay (It contains not less than 90.0 and not more than 110.0% of the labeled potency of cefoperazone (C25H27N9O8S2: 645.67), and not less than 95.0% and not more than 110.0% of the labeled potency of sulbactam (C8H11NO5S: 233.24).) Bacterial Endotoxin Test (NMT 0.2 USP Endotoxin unit per mg) / Bacterial Endotoxin Test (Less than 0.060 EU/mg (potency).) Further firm has not performed water content test and clarity and color of solution test which are also included in JP monograph.
8.	3.2. P.5.2	Firm has not submitted the analytical procedure used for testing of drug product.
9.	3.2.P.5.3	Analytical method verification report reflects that the assay has performed on UV method while the JP monograph recommends the HPLC method for assay of drug product.
10.	3.2.P.6	Firm has not submitted the COA of primary / secondary reference standard including source and lot number used for testing of drug product.
11.	3.2.P.8	Firm has not submitted following documents to support the stability data of drug product: • Reference of previous approval of applications with stability study data of the firm (if any)

		• Documents for the procurement of API with approval from DRAP (in case of import). • Details that which lot number of drug substance has been used in manufacturing of each batch of drug product. Also provide documents confirming evidence of import of each lot of drug substance used in manufacturing of these batches of drug product. • Valid Good Manufacturing Practice (GMP) certificate of the Drug Substance manufacturer issued by relevant regulatory authority of country of origin. • Firm submitted the invoice of import of drug substance according to which, supplier of the drug substance was M/s. Shandong Luoxin Pharmaceutical Co., Ltd China and quantity of 5kg has been imported and clearance granted on 27-12-2021 vide dy.no.11160/2021 DRAP. While the firm has also submitted Form-6 along with the invoice in which license to import drug from Qilu Antibiotics Pharmaceuticals Co. Ltd. China has given on 27-12-2021 vide Dy.no. 11160/2021 DRAP.	
12.	3.2.R	Firm has not submitted the copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2. P.8.3.	

Decision of 321st meeting of Registration Board:

- Submit analytical method verification studies including results of specificity and accuracy parameters as per requirement of section 3.2.S.4.3 of Form-5F.
- Justification for adopting the acceptance criteria of assay of drug substance different from that specified in JP monograph.
- COA of primary / secondary reference standard including source and lot number used for testing of drug substance.
- Submit long term stability data of drug substance till the claimed shelf life.
- Submit weight of powder filled per vial keeping in view the sodium content of both active substances, under section 3.2.P.2.1.
- Submit pharmaceutical equivalence report, in which all the quality test should performed in compliance with JP monograph.
- Submit analytical procedure used for testing of drug product under section 3.2.P.5.2.
- Submit analytical method verification report of assay testing performed on HPLC in compliance with JP monograph.
- COA of primary / secondary reference standard including source and lot number used for testing of drug product.
- Details that which lot number of drug substance has been used in manufacturing of each batch of drug product. Also provide documents confirming evidence of import of each lot of drug substance used in manufacturing of these batches of drug product.
- Valid Good Manufacturing Practice (GMP) certificate of the Drug Substance manufacturer issued by relevant regulatory authority of country of origin.
- Copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2. P.8.3.
- Full fee of Rs. 30,000 for revision of stability data as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.

Reply of the Firm:

Sr.no.	Decision	Response of the Firm
1.	Submit analytical method verification studies including results of specificity and accuracy parameters as per requirement of section 3.2.S.4.3 of Form-5F.	Firm replied that "Ask the supplier about analytical method verification ,will be dispatched soon".
2.	Justification for adopting the acceptance criteria of assay of drug substance different from that specified in JP monograph.	Firm replied that "By mistake it was attached, actual criteria of drug substance as per JP monograph".

3.	COA of primary / secondary reference standard including source and lot number used for testing of drug substance.	Firm submitted the COA of USP primary reference standard
4.	Submit long term stability data of drug substance till the claimed shelf life.	Firm replied that " Ask to supplier for long term stability, will be dispatched soon."
5.	Submit weight of powder filled per vial keeping in view the sodium content of both active substances, under section 3.2.P.2.1.	Firm submitted the formulation table in which only the material has been listed with the information that the API (cefoperazone sodium plus sulbactum sodium) was used 3% in excess, while the calculation of dispense quantity of API per vial was not submitted by the firm.
6.	Submit pharmaceutical equivalence report, in which all the quality test should performed in compliance with JP monograph.	Firm submitted the pharmaceutical equivalence report in which all the quality test has been performed.
7.	Submit analytical procedure used for testing of drug product under section 3.2.P.5.2.	Submitted
8.	Submit analytical method verification report of assay testing performed on HPLC in compliance with JP monograph.	Submitted
9.	COA of primary / secondary reference standard including source and lot number used for testing of drug product.	Not submitted
10.	Details that which lot number of drug substance has been used in manufacturing of each batch of drug product. Also provide documents confirming evidence of import of each lot of drug substance used in manufacturing of these batches of drug product.	Firm submitted the invoice of import of drug substance according to which, supplier of the drug substance was M/s. Shandong Luoxin Pharmaceutical Co., Ltd China and quantity of 5kg has been imported and clearance granted on 27-12-2021 vide dy.no.11160/2021 DRAP. While the firm has also submitted Form-6 along with the invoice in which license to import drug from Qilu Antibiotics Pharmaceuticals Co. Ltd. China has given on 27-12-2021 vide Dy.no. 11160/2021 DRAP.
11.	Valid Good Manufacturing Practice (GMP) certificate of the Drug Substance manufacturer issued by relevant regulatory authority of country of origin.	Not submitted
12.	Copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2. P.8.3.	Not submitted
13.	Full fee of Rs. 30,000 for revision of stability data as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.	Firm submitted the fee of Rs.30,000/- vide slip no. 057382167110 dated 04-11-2022

Decision of 323rd meeting of Registration Board:
Deferred for submission of following:

- Submit analytical method verification studies including results of specificity and accuracy parameters by drug product manufacturer as per requirement of section 3.2.S.4.3 of Form-5F.
- COA of primary / secondary reference standard including source and lot number used for testing of drug substance.
- Submit weight of powder filled per vial keeping in view the sodium content of both active substances, under section 3.2.P.2.1.
- Valid Good Manufacturing Practice (GMP) certificate of the Drug Substance manufacturer issued by relevant regulatory authority of country of origin.
- Copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2. P.8.3.

Response of the Firm:
Submit analytical method verification studies including results of specificity and accuracy parameters by drug product manufacturer as per requirement of section 3.2.S.4.3 of Form-5F.

Firm submit the analytical verification report including results of specificity and accuracy parameters by drug product manufacturer as per requirement of section 3.2.S.4.3 of Form-5F. COA of primary / secondary reference standard including source and lot number used for testing of drug substance. Firm submit the copy of COA of primary reference standard of USP of both active substances, while the claimed specification of premixed powder of both API is JP specification. Submit weight of powder filled per vial keeping in view the sodium content of both active substances, under section 3.2.P.2.1. In their reply firm only submitted the composition table mentioning the quantity of both active per vial i.e. Cefoperazone sodium+ Sulbactam sodium 2gm per vial, instead of giving complete calculation of weight of powder filled per vial keeping in view the sodium content of both active substances. Valid Good Manufacturing Practice (GMP) certificate of the Drug Substance manufacturer issued by relevant regulatory authority of country of origin. Firm submit the valid GMP certificate of the Drug Substance manufacturer, which is valid till 13-12-2023. Previously firm submitted the invoice of import of drug substance according to which, supplier of the drug substance was M/s. Shandong Luoxin Pharmaceutical Co., Ltd China and quantity of 5kg has been imported and clearance granted on 27-12-2021 vide dy.no.11160/2021 DRAP. Now the firm again submitted a new invoice, in which the Beneficiary is Qilu Pharmaceuticals Co. Ltd, China while the Manufacturer is M/s. The United Laboratories (Inner Mongolia), China quantity of 10kg is imported dated 21-06-2021, attested by DRAP vide dy.no.11160/2021 DRAP dated 27-12-2021. While the firm has also submitted Form-6 along with the invoice in which license to import drug from Qilu Antibiotics Pharmaceuticals Co. Ltd. China has given on 27-12-2021 vide Dy.no. 11160/2021 DRAP.		
Decision of 330th meeting of Registration Board: Deferred for verification of DRAP attested documents related to the procurement of API.		
456.	Name, / Marketing Authorization Holder address of Applicant	M/s Citi Pharma Private Limited
	Name, address of Manufacturing site.	M/s Citi Pharma Private Limited Factory: 3 K.M, Head Balloki Road, Phool Nagar, Distt. Kasur
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Dru g Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy.No 9108 dated 11-04-2022
	Details of fee submitted	PKR 30,000/-: dated 28/03/2022
	The proposed proprietary name / brand name	Cef-Slub Injection 2gm IV/IM
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Sterile Powder of Cefoperazone sodium MS equivalent to Cefoperazone 1g Sterile Powder of Sulbactam sodium MS equivalent to Sulbactam 1g
	Pharmaceutical form of applied drug	Intra-venous / Intra-muscular Injection
	Pharmacotherapeutic Group of (API)	Broad-spectrum cephalosporin antibiotic

	Reference to Finished product specifications	Manufacturer's Specifications
	Proposed Pack size	1×1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Sulperazone Injection 2gm by M/s Pfizer Ltd. USA, USFDA Approved.
	For generic drugs (me-too status)	Toxirid Injection 2gm by Global Pharmaceuticals, Reg. No. 042555
	GMP status of the Finished product manufacturer	New license granted on 21/09/2021 Cephalosporin section approved.
	Name and address of API manufacturer.	M/s Shandong Luoxin Pharmaceutical Co.,Ltd China
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of Cefoperazone sodium /Sulbactam sodium eq to Cefoperazone /Sulbactam is present not present in any pharmacopeia. The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls,specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 6 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (T-CSP001, T-CSP002, T-CSP003)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand leader that is Toxirid Injection 2gm by Global Pharmaceuticals Pakistan performing quality tests (Identification, Assay, Constituted Solution, Uniformity of dosage form).
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.

STABILITY STUDY DATA	
Manufacturer of API	M/s Shandong Luoxin Pharmaceutical Co.,Ltd China

6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted		

Remarks OF Evaluator:

Deficiencies/ Short-comings

Shortcomings communicated to the Firm:

- You have mentioned USP specification in section 1.5.6 in module 1, while the drug product monograph is not available in USP, but present in JP. Revise the specifications along with submission of requisite fee.
- The drug substance manufacturer has claimed both USP and in-house standards for the drug substance, provide scientific justification in this regard.
- Justify, how you have claimed USP specification for drug substance cefoperazone sodium+Sulbactum30-May-22 sodium, when the monograph has not been present in USP.
- Submit data in section 3.2.S.4.1 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance manufacturers."
- Submit data in section 3.2.S.4.3 as per the decision of 293rd meeting of Registration Board, which states that "Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted". Further justify how the analysis of drug substance was conducted without performing verification studies of the analytical method of drug substance.
- Stability study data of 3 batches of drug substances till the assigned shelf life needs to be submitted, since stability data of 3 months has submitted despite the batch had been manufactured in 2017.

- Submit data in section 3.2.P.1 (c) as per the decision of 293rd meeting of Registration Board, which states that "Provide information including type of diluent, its composition, quantity or volume, specifications (as applicable) and regulatory status in Pakistan (as applicable) for the diluent which is to be provided along with the applied drug".
- Justify the use of 4ml printed glass vial for packaging of drug product with reference to the volume of diluent used for reconstitution of dry powder for injection as per innovator product.
- Justify how you have performed pharmaceutical equivalence studies using the reference product of different strength.
- Submit data in section 3.2.P.2.3 (Manufacturing process development) as per the decision of 293rd meeting of Registration Board, which states that "The selection and optimization of the manufacturing process described in 3.2.P.3.3, in particular its critical aspects, shall be explained. Any specific manufacturing process development shall be provided e.g., sterilization shall be explained and justified. Where relevant, justification for the selection of aseptic processing or other sterilization methods over terminal sterilization shall be provided".
- Submit the data of compatibility studies in section 3.2.P.2.6 as per the decision of 293rd meeting of Registration Board, which states that "*Compatibility studies for the dry powder for injections and dry powder for suspension should be performed as per the instructions provided in individual label of the drug product*"
- Batch formula mentioned in section 3.2.P.3.1 evident that only the active ingredient is the part of batch formula, while manufacturing procedure specified in section 3.2.P.3.3 stated that "solution has been prepared in 50-liter pyrogen free water by dissolving the 1.5kg Citi-Taxime 250mg IM and later add propylene glycol, sodium chloride and sodium hydroxide. Clarification is required either the applied product is dry powder for injection or a solution for injection as evident from the detail manufacturing procedure given in section 3.2. P.3.3.
- Justify the weight variation limit of filled vial from1107-1152mg with reference to the claimed potency of both actives.
- Provide the Pharmacopeial reference of finished product specifications, since USP specs are mentioned in module 1, and USP does not contain any monograph for Cefoperazone Sodium and Sulbactam Sodium for Injection. However, monograph for Cefoperazone Sodium and Sulbactam Sodium for Injection is present in Japanese Pharmacopeia.
- Provide COA of primary / secondary reference standard including source and lot number in section 3.2. P.6.
- According to the document submitted in section 3.2.P.8 batch no. T-CSP-002 and T-CSP-003 has been manufactured on 02-2021, while stability study data sheet submitted in section 3.2.P.8.3 stated these batches were manufactured in sep-2021. Clarification required in this regard.
- Specify the batch size of all three stability batches.
- Justify the pH acceptance criteria (6.0-8.0) and water content acceptance limit (8.0-11%) set for drug product with the acceptance criteria mentioned on COA of drug substance by drug substance manufacturer i.e. 4.5-6.5 and NMT 3.0%. Elevation of pH and water content of drug product without any further processing of formulation needs to be justify with the pharmacopeial reference and innovator product.
- Assay content of both active should be separately calculated and mentioned as per pharmacopeial reference and innovator product.
- As per release specification of drug product acceptance criteria of assay is 90-110% while the stability data sheet represents that assay content should be between 90-115%. Justification is required regarding the variation in acceptance limit of assay content in various section of module-III.
- Justify why the sterility test is not included in the stability studies of the product.
- Provide details that which lot number of drug substance has been used in manufacturing of each batch of drug product. Also provide documents confirming evidence of import of each lot of drug substance used in manufacturing of these batches of drug product.
- Provide data of stability batches properly arranged and supported by respective documents including analytical report / COA, raw data sheet and respective chromatograms separately for each time point.
- Provide Reference of previous approval of applications with stability study data of the firm (if any)
- Documents for the procurement of API with approval from DRAP (in case of import).
- Provide compliance Record of HPLC software 21CFR & audit trail reports on product testing.
- Provide Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).

	• In-use stability studies of reconstituted suspension is required along with proposed in-use storage statement and in-use shelf-life.	
Remarks of the Evaluator: In response of above shortcomings, firm has submitted a complete new CTD dossier with fee of Rs.7500/- in which drug substance was imported from a new source and accordingly data of trial batches of drug product manufactured from new source of drug substance has submitted. Newly submitted dossier has again evaluated and presented below before the Board for its consideration.

8.	3.2. P.5.2	Firm has not submitted the analytical procedure used for testing of drug product.
9.	3.2.P.5.3	Analytical method verification report reflects that the assay has performed on UV method while the JP monograph recommends the HPLC method for assay of drug product.
10.	3.2.P.6	Firm has not submitted the COA of primary / secondary reference standard including source and lot number used for testing of drug product.
11.	3.2.P.8	Firm has not submitted following documents to support the stability data of drug product: • Reference of previous approval of applications with stability study data of the firm (if any) • Documents for the procurement of API with approval from DRAP (in case of import). • Details that which lot number of drug substance has been used in manufacturing of each batch of drug product. Also provide documents confirming evidence of import of each lot of drug substance used in manufacturing of these batches of drug product. • Valid Good Manufacturing Practice (GMP) certificate of the Drug Substance manufacturer issued by relevant regulatory authority of country of origin. • Firm submitted the invoice of import of drug substance according to which, supplier of the drug substance was M/s. Shandong Luoxin Pharmaceutical Co., Ltd China and quantity of 5kg has been imported and clearance granted on 27-12-2021 vide dy.no.11160/2021 DRAP. While the firm has also submitted Form-6 along with the invoice in which license to import drug from Qilu Antibiotics Pharmaceuticals Co. Ltd. China has given on 27-12-2021 vide Dy.no. 11160/2021 DRAP.
12.	3.2.R	Firm has not submitted the copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2. P.8.3.

Decision of 321st meeting of Registration Board:

- Submit analytical method verification studies including results of specificity and accuracy parameters as per requirement of section 3.2.S.4.3 of Form-5F.
- Justification for adopting the acceptance criteria of assay of drug substance different from that specified in JP monograph.
- COA of primary / secondary reference standard including source and lot number used for testing of drug substance.
- Submit long term stability data of drug substance till the claimed shelf life.
- Submit weight of powder filled per vial keeping in view the sodium content of both active substances, under section 3.2.P.2.1.
- Submit pharmaceutical equivalence report, in which all the quality test should performed in compliance with JP monograph.
- Submit analytical procedure used for testing of drug product under section 3.2.P.5.2.
- Submit analytical method verification report of assay testing performed on HPLC in compliance with JP monograph.
- COA of primary / secondary reference standard including source and lot number used for testing of drug product.
- Details that which lot number of drug substance has been used in manufacturing of each batch of drug product. Also provide documents confirming evidence of import of each lot of drug substance used in manufacturing of these batches of drug product.
- Valid Good Manufacturing Practice (GMP) certificate of the Drug Substance manufacturer issued by relevant regulatory authority of country of origin.
- Copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2. P.8.3.
- Full fee of Rs. 30,000 for revision of stability data as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.

Reply of the Firm:

Sr.no.	Decision	Response of the Firm

1.	Submit analytical method verification studies including results of specificity and accuracy parameters as per requirement of section 3.2.S.4.3 of Form-5F.	Firm replied that "Ask the supplier about analytical method verification ,will be dispatched soon".	
2.	Justification for adopting the acceptance criteria of assay of drug substance different from that specified in JP monograph.	Firm replied that "By mistake it was attached, actual criteria of drug substance as per JP monograph".	
3.	COA of primary / secondary reference standard including source and lot number used for testing of drug substance.	Firm submitted the COA of USP primary reference standard	
4.	Submit long term stability data of drug substance till the claimed shelf life.	Firm replied that " Ask to supplier for long term stability, will be dispatched soon."	
5.	Submit weight of powder filled per vial keeping in view the sodium content of both active substances, under section 3.2.P.2.1.	Firm submitted the formulation table in which only the material has been listed with the information that the API (cefoperazone sodium plus sulbactum sodium) was used 3% in excess, while the calculation of dispense quantity of API per vial was not submitted by the firm.	
6.	Submit pharmaceutical equivalence report, in which all the quality test should performed in compliance with JP monograph.	Firm submitted the pharmaceutical equivalence report in which all the quality test has been performed.	
7.	Submit analytical procedure used for testing of drug product under section 3.2.P.5.2.	Submitted	
8.	Submit analytical method verification report of assay testing performed on HPLC in compliance with JP monograph.	Submitted	
9.	COA of primary / secondary reference standard including source and lot number used for testing of drug product.	Not submitted	
10.	Details that which lot number of drug substance has been used in manufacturing of each batch of drug product. Also provide documents confirming evidence of import of each lot of drug substance used in manufacturing of these batches of drug product.	Firm submitted the invoice of import of drug substance according to which, supplier of the drug substance was M/s. Shandong Luoxin Pharmaceutical Co., Ltd China and quantity of 5kg has been imported and clearance granted on 27-12-2021 vide dy.no.11160/2021 DRAP. While the firm has also submitted Form-6 along with the invoice in which license to import drug from Qilu Antibiotics Pharmaceuticals Co. Ltd. China has given on 27-12-2021 vide Dy.no. 11160/2021 DRAP.	
11.	Valid Good Manufacturing Practice (GMP) certificate of the Drug Substance manufacturer issued by relevant regulatory authority of country of origin.	Not submitted	
12.	Copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2. P.8.3.	Not submitted	
13.	Full fee of Rs. 30,000 for revision of stability data as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.	Firm submitted the fee of Rs.30,000/- vide slip no. 057382167110 dated 04-11-2022	

Decision of 323rd meeting of Registration Board:
Deferred for submission of following:

- Submit analytical method verification studies including results of specificity and accuracy parameters by drug product manufacturer as per requirement of section 3.2.S.4.3 of Form-5F.
- COA of primary / secondary reference standard including source and lot number used for testing of drug substance.
- Submit weight of powder filled per vial keeping in view the sodium content of both active substances, under section 3.2.P.2.1.
- Valid Good Manufacturing Practice (GMP) certificate of the Drug Substance manufacturer issued by relevant regulatory authority of country of origin.
- Copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2. P.8.3.

Response of the Firm:
Submit analytical method verification studies including results of specificity and accuracy parameters by drug product manufacturer as per requirement of section 3.2.S.4.3 of Form-5F.
Firm submit the analytical verification report including results of specificity and accuracy parameters by drug product manufacturer as per requirement of section 3.2.S.4.3 of Form-5F.

COA of primary / secondary reference standard including source and lot number used for testing of drug substance.
Firm submit the copy of COA of primary reference standard of USP of both active substances, while the claimed specification of premixed powder of both API is JP specification.

Submit weight of powder filled per vial keeping in view the sodium content of both active substances, under section 3.2.P.2.1.
In their reply firm only submitted the composition table mentioning the quantity of both active per vial i.e. Cefoperazone sodium+ Sulbactam sodium 2gm per vial, instead of giving complete calculation of weight of powder filled per vial keeping in view the sodium content of both active substances.

Valid Good Manufacturing Practice (GMP) certificate of the Drug Substance manufacturer issued by relevant regulatory authority of country of origin.
Firm submit the valid GMP certificate of the Drug Substance manufacturer, which is valid till 13-12-2023.

Previously firm submitted the invoice of import of drug substance according to which, supplier of the drug substance was M/s. Shandong Luoxin Pharmaceutical Co., Ltd China and quantity of 5kg has been imported and clearance granted on 27-12-2021 vide dy.no.11160/2021 DRAP. Now the firm again submitted a new invoice, in which the Beneficiary is Qilu Pharmaceuticals Co. Ltd, China while the Manufacturer is M/s. The United Laboratories (Inner Mongolia), China quantity of 10kg is imported dated 21-06-2021, attested by DRAP vide dy.no.11160/2021 DRAP dated 27-12-2021.

While the firm has also submitted Form-6 along with the invoice in which license to import drug from Qilu Antibiotics Pharmaceuticals Co. Ltd. China has given on 27-12-2021 vide Dy.no. 11160/2021 DRAP.

Decision of 330th meeting of Registration Board:
Deferred for verification of DRAP attested documents related to the procurement of API.

Decision: Registration Board aceeded to the request of M/s Citi Pharma Private Limited Factory: 3 K.M, Head Balloki Road, Phool Nagar, Distt. Kasur for withdrawal of their above mentioned applications and declared them as disposed off.

Agenda of Evaluator PEC-XX

Case No. 01 Registration applications of newly granted DML or New section (Human)

New DML

a) M/s Qadir Pharmaceuticals, Veerum Fateh Garh Sahuwala Road, Sialkot

CLB in its 282nd meeting held on 31st August, 2021 has considered and approved the grant of DML by way of Formulation with following 3 sections:

- Tablet (General)
- Capsule Section (General)
- Oral Liquid (General)
- Capsule (Cephalosporin)
- Liquid injectable –vial &ampoule (General)
- Oral Dry powder suspension (Cephalosporin)
- Dry powder injectable (Cephalosporin)

458.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Qadir Pharmaceuticals, Veerum Fateh Garh Sahuwala Road, Sialkot.**
	Name, address of Manufacturing site.	M/s Qadir Pharmaceuticals, Veerum Fateh Garh Sahuwala Road, Sialkot**.**
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	Not provided
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter for issuance of DML dated 17-09-2021 specifying Capsule (General) section..
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No 16126 dated 26-06-2023
	Details of fee submitted	PKR 30,000/- Dated 07/06/2023
	The proposed proprietary name / brand name	**Azdir 500mg Tablet**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated tablet contains: Azithromycin dihydrate eq to Azithromycin…..500mg
	Pharmacotherapeutic Group of (API)	Macrolide
	Pharmaceutical form of applied drug	Tablet
	Reference to Finished product specifications	USP
	Proposed Pack size	6’s
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Azithromycin 500mg tablet USFDA approved
	For generic drugs (me-too status)	Azomax 500mg tablet by M/s AGP pharma Reg No 112798
	Name and address of API manufacturer.	M/s Citi Pharma Ltd. 3 Km Head Balloki Road, Phool Nagar, Kasur-55050 Punjab, Pakistan.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related

		to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Not Provided
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical equivalence was performed against **Azomax 500mg tablet** by **AGP (Batch No T8760, Exp date 12-2024).** Quality parameters such as appearance, average weight, dissolution, content uniformity, Disintegration, hardness and assay against Test product. Firm has submitted CDP results of **Azithromycin 250mg capsule (instead of 500mg tablet)** against the **Azomax 250mg capsule (Batch No T8838)** in Acid media (pH 1.0-1.2) acetate buffer (pH 4.5) & Phosphate Buffer (pH 6.8). The values for f1 and f2 are in the acceptable range.
	Analytical method verification of product	Firm has submitted analytical method verification study reports for drug product.

STABILITY STUDY DATA	
Manufacturer of API	M/s Citi Pharma Ltd. 3 Km Head Balloki Road, Phool Nagar, Kasur-55050 Punjab, Pakistan.
API Lot No..Batch number	AZM2208004
Description of Pack (Container closure system)	Alu-Alu blister with unit carton
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH

Time Period	Real time: 3 months Accelerated: 3 months		
Frequency	Accelerated: 0, 3 (Months) Real Time: 0, 3 (Months)		
Batch No.	TTR025	TTR026	TTR027
Batch Size	600 tab	600 tab	600 tab
Manufacturing Date	12/22	12/22	12/22
Date of Initiation	16/12/22	16/12/22	16/12/22
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not applicable
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Not provided
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not provided
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Provided
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Provided

Remarks of Assessor:

Sr.#	Observations	Reply	Remarks
1.	Provide updated GMP status of finished product manufacturer	*New DML was granted dated 17-09-2021, we are in the process of product registration so we have not applied for GMP yet.*	
2.	Provide valid Good Manufacturing Practice (GMP) certificate of the Drug Substance / API manufacturer issued by DRAP.	Firm has provided copy of GMP certificate based on inspection dated 03-03-2023 issued by DRAP Pakistan	Complied
3.	**2.3.R.1.1** Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3	Provided	Complied

	4.	**3.2.S.4** Analytical method verification study of Drug Substance to be performed by Drug Product manufacturer.	Analytical Method Verification studies of Drug substance performed by the Drug Substance manufacturer is submitted	Analytical Method Verification studies of Drug substance performed by the Drug Product manufacturer yet to be provided	
	5.	**3.2.S.5** COA of primary / secondary reference standard including source and lot number to be provided.	Provided	Complied	
	6.	**3.2.S.7** Provide stability data of Drug Substance (both Accelerated and Real time) of 3 batches.	Stability data of 3 batches: AZM2101001 AZM2101002 AZM2101003 As per zone IV-A conditions Real time for 9 months Accelerated for 6 months	Complied	
	7.	**3.2.P.2.2.1** Perform CDP of applied product (azithromycin 500mg tablet). CDP results of **Azithromycin 250mg capsule** (Batch No T8760) have been submitted (against the Azomax 250mg capsule Batch No T8838).	CDP report against **Azomax 500mg Tablet by AGP Ltd** Batch No T8760, Exp date 12/2024 is provided.	Complied	
	8.	**3.2.P.5** Assay method is not as per USP 2023 (chromatographic conditions, quantity of diluents/mobile phase etc) adopt assay as per USP 2023 and submit accordingly.	Assay method as per USP 2023 has been submitted		
	9.	**3.2.P.8** Provide procurement document/commercial invoice wherein quantity, batch no and date of purchase should be mentioned**.**	Purchase invoice No CP22-11024 dated 08 Dec 2022 is provided wherein Azithromycin Batch No AZM2208004 is mentioned	Complied	
	10.	**3.2.P.8** Provide stability data of Drug Product (both Accelerated and Real time) for 6th month and onward all 3 batches.	Only summary data sheet is provided for 6th month data (both Accelerated and Real time)	CoA and chromatograms to be provided.	

Decision: Deferred the request for submission of following documents:

a) **Analytical Method Verification studies of Drug substance performed by the Drug Product manufacturer.**
b) **CoA and chromatograms of stability data of all 3 batches of Drug Product (both Accelerated and Real time) for 6th month.**

459.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Qadir Pharmaceuticals, Veerum Fateh Garh Sahuwala Road, Sialkot.**
	Name, address of Manufacturing site.	M/s Qadir Pharmaceuticals, Veerum Fateh Garh Sahuwala Road, Sialkot**.**
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not applicable
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has provided copy of GMP certificate based on inspection dated 18-11-2022 issued by DRAP Pakistan
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has provided commercial invoice No 1597 dated 07.01.2023 wherein Lot No 002230/22-12/009 was mentioned confirming purchase of 1 kg Cefadroxil (micronized)
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Provided
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Provided

Remarks of Assessor:

Sr.#	Observations
1.	Provide updated GMP status of finished product manufacturer
2.	**2.3.R.1.1** Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3
3.	**3.2.S.4** Analytical Method Verification studies of Drug substance performed by the Drug Product manufacturer to be provided.
4.	**3.2.P.2** Quantity of API mentioned in Batch formula i.e 1575mg per unit ml to be justified
5.	**3.2.P.2** Specify type of glass bottle and provide suitability testing/quality testing (as per pharmacopeia) of container closure system
6.	**3.2.P.2** Provide details regarding volume of diluent to be used for reconstitution to achieve label claim 125mg/5ml along with weight/ml calculation with reference to innovator's product

	7.	**3.2.P.5** Justify assay limit mentioned i.e 95-102% w/w instead of 90-120% (as mentioned in USP.
	8.	**3.2.P.2.2.1** CDP has been performed against **Duricef 125mg capsule** instead of **Cefadroxil 125mg/5ml Dry suspension.** Perform CDP against Duricef 125mg/5ml suspension and submit report accordingly.
	9.	**3.2.P.8** In use stability data (reconstituted form) to be provided as per guidance document by EMA. (https://www.ema.europa.eu/en/documents/scientific-guideline/note-guidance-use-stability-testing-human-medicinal-products en.pdf)

Firm has submitted reply as follows:

Sr.#	Reply
1.	*New DML has been granted dated 17-09-2021, we are in the process of product registration so we have not applied for GMP yet.*
2.	Batch Manufacturing Record (BMR) for all the batches of drug product (for which stability studies data is provided) has been provided
3.	Analytical Method Verification studies of Drug substance performed by the Drug Product manufacturer yet to be provided.
4.	Quantity of API mentioned in Batch formula i.e 1575mg has been justified (per unit bottle).
5.	Type of glass bottle is specified as "soda lime" however suitability testing/quality testing (as per pharmacopeia) of container closure system are not provided.
6.	Details regarding volume of diluent to be used for reconstitution to achieve label claim is provided as 40ml (2 scoops of 20ml) water and weight/ml of applied formulation is 1.095g/ml while weight of content per ml of Duricef 125mg/5ml is 1.160g/ml
7.	The assay limit mentioned in dossier i.e 95-102% w/w was typographic erroe while actual assay limit is 90-120% (as mentioned in USP).
8.	CDP has been performed against **Duricef 125mg/5ml suspension** and report is submitted accordingly. **Batch No: SV5H** **Mfg date: 02/2023**
9.	In use stability data (reconstituted form) is provided for the period of 14 days (at both room temp and refrigerator)

Decision: Approved. Firm will provide following before issuance of registration letter.

i. **Analytical Method Verification studies of Drug substance performed by the Drug Product manufacturer.**
ii. **Suitability testing/quality testing (as per pharmacopeia) of container closure system (soda lime glass bottle) to be provided before issuance of registration letter**

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Date of Initiation	26/11/22	26/11/22	26/11/22
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not applicable
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate has been provided dated 06.05.2021 based on inspection dated 05.05.2021 (valid till three years) Manufacturing facility for pelletization of Dexlansoprazole pellets is mentioned.

3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not provided
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Provided
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Provided

Remarks of Assessor:

Dissolution testing performed by finished product manufacturer on DDR pellets were as follows:

Dissolution parameters	**Specification**
Acid stage (Stage I)	
Apparatus	**USP I**
Medium	0.1N HCl
Volume	500ml
RPM	**100**
Sample interval	120 minutes
Limit	NMT 10%
Buffer stage (Stage I)	
Apparatus	**USP I**
Medium	**pH 5.5**
Volume	**900ml**
RPM	**100**
Sample interval	60 minutes
Limit	22.5%-40%
Buffer stage (Stage II)	
Apparatus	**USP I**
Medium	**pH 7.0**
Volume	900ml
RPM	**100**
Sample interval	40 min, 60 min, 105 min and 120 min
Limit	30-60% 40-70% NLT 60% NLT 75%

Dissolution parameters of innovator product (Dexilant) are as follows:

Sr.#	**Observations**
1.	Provide updated GMP status of finished product manufacturer
2.	**2.3.R.1.1** Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3
3.	**3.2.S.4** Justification to be provided for selection of dissolution parameters i.e dissolution medium, volume of dissolution medium and rpm etc

4.	**3.2.S.7** Provide real time stability data of pellets up to shelf life. Already submitted data is for the period of **6 months only.**
5.	**3.2.P.8** Provided invoice/ document for procurement of API wherein date and batch no of API should be mentioned.

Reply:

Sr.#	**Reply**
1.	*New DML has been granted dated 17-09-2021, we are in the process of product registration so we have not applied for GMP yet.*
2.	Batch Manufacturing Record (BMR) for all the batches of drug product (for which stability studies data is provided) has been provided
3.	Dissolution parameters i.e dissolution medium, volume of dissolution medium and rpm etc have been adopted as provided by Pellet manufacturer in DMF, moreover same parameters have been mentioned in "Draft guidance on Dexlansoprazole (USFDA)"
4.	Real time stability data of pellets up to 24 months has been provided for following three batches: DEX 005 DEX 006 DEX 007
5.	Invoice for procurement of Dexlansoprazole dated 06.10.2022 and batch no (DLP-045/2022) is provided.

Remarks: Dissolution parameters such as dissolution medium, volume of dissolution medium and rpm etc are in accordance to parameters approved by Registration Board in 277th meeting (held on 27th -29th December, 2017).

Decision: Approved as per innovators sepecifications.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Sr.#	Observations
1.	Provide updated GMP status of finished product manufacturer
2.	**2.3.R.1.1** Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3
3.	**3.2.S.4** Justification to be provided for selection of dissolution parameters i.e dissolution medium, volume of dissolution medium and rpm etc
4.	**3.2.S.7** Provide real time stability data of pellets up to shelf life. Already submitted data is for the period of **6 months only.**
5.	**3.2.P.8** Provided invoice/ document for procurement of API wherein date and batch no of API should be mentioned.

Sr.#	Reply
1.	*New DML has been granted dated 17-09-2021, we are in the process of product registration so we have not applied for GMP yet.*
2.	Batch Manufacturing Record (BMR) for all the batches of drug product (for which stability studies data is provided) has been provided
3.	Dissolution parameters i.e dissolution medium, volume of dissolution medium and rpm etc have been adopted as provided by Pellet manufacturer in DMF, moreover same parameters have been mentioned in "Draft guidance on Dexlansoprazole (USFDA)"
4.	Real time stability data of pellets up to 24 months has been provided for following three batches: DEX 005 DEX 006 DEX 007
5.	Invoice for procurement of Dexlansoprazole dated 06.10.2022 and batch no (DLP-045/2022) is provided.

Remarks: Dissolution parameters such as dissolution medium, volume of dissolution medium and rpm etc are in accordance to parameters approved by Registration Board in 277th meeting (held on 27th -29th December, 2017).

Decision: approved As per innovator specification.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

465.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Qadir Pharmaceuticals, Veerum Fateh Garh Sahuwala Road, Sialkot.**
	Name, address of Manufacturing site.	M/s Qadir Pharmaceuticals, Veerum Fateh Garh Sahuwala Road, Sialkot**.**

Date of Initiation	17/01/23	17/01/23	17/01/23
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not applicable
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	GMP certificate dated 04.07.2019 issued by DRAP is provided. Based on inspection dated 03.07.2019.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Provided copy of invoice (Invoice# 23010247-SG) dated 06-01-2023, with received quantity i.e. 2kg) for the purchase of Diclofenac sodium SR pellets 32% (Batch No DFS-32-SR-009) from M/s Surge Laboratories, Pakistan.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Provided
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Provided

Remarks of Assessor:

Sr.#	Observations
1.	Provide updated GMP status of finished product manufacturer
2.	Provide valid Good Manufacturing Practice (GMP) certificate of the Drug Substance / API manufacturer issued by DRAP. Moreover, approval for manufacturing **Diclofenac sodium SR pellets** to be provided.
3.	**2.3.R.1.1** Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3
4.	**3.2.S.4** Under shelf life specification of pellets the dissolution /release profile in phosphate buffer medium (pH 6.8) is mentioned as:

		• **30-65%** of labelled amount of Diclofenac sodium pellets should be released after 3 hours • NLT 70% of labelled amount of Diclofenac sodium pellets should be released after 8 hours While content of enteric coated pellets as mentioned in reference formulation is 25% (25mg in the form of enteric coated release pellets and 75mg in the form of sustained release pellets)
	5.	**3.2.P.2** The excipients used by pellet manufacturer such as Disodium Hydrogen Phosphate and HPMC have not been found in innovator/reference product. Drug-excipients compatibility study is required. Moreover, excipients such as Microcrystalline cellulose, Methacrylic acid copolymer, colloidal anhydrous silica, propylene glycol, sodium hydroxide and Triethylcitrate have been used in reference product but not found in applied formulation. Clarify implication of not using said ingredients.
	6.	**3.2.P.2** The label claim / formulation of reference product is as follows: Difene 100 mg Dual Release Capsule/modified release capsule Each capsule contains: Diclofenac sodium 100mg in a modified release formulation (25mg in the form of enteric coated release pellets and 75mg in the form of sustained release pellets) Justify applied formulation in light of above mentioned reference formulation. Moreover, also prove that comparator (generic version) against which pharmaceutical equivalence/CDP was performed is dual release capsule.
	7.	**3.2.P.5** Finished product specification mentioned on Form5F as BP while specifications mentioned under section 3.2.P.5 as USP 43. However, modified release/dual delayed release capsule of Diclofenac sodium are not found in any official monograph. Provide correct reference of finished product specification accordingly.
	8.	**3.2.S.5** COA of primary / secondary reference standard including source and lot number to be provided.

Reply:

Sr.#	Reply
1.	*New DML has been granted dated 17-09-2021, we are in the process of product registration so we have not applied for GMP yet.*
2.	Valid Good Manufacturing Practice (GMP) certificate of Pellet manufacturer based on inspection dated 25.08.2022 issued by DRAP. Wherein approval for manufacturing **Diclofenac sodium SR pellets** and **Diclofenac sodium enteric coated pellets** is provided.
3.	Batch Manufacturing Record (BMR) for all the batches of drug product (for which stability studies data is provided) has been provided.
4.	*This is because our product complies with BP specification of Diclofenac sodium Prolong Release capsules***.** *The reference product and our pellets both are enteric coated and sustained release in nature and complying to BP.*
5.	Drug-excipients compatibility study is provided by Binary method. There is no significant change occurs during compatibility studies.
6.	*The applied formulation is in light of Diclofenac Prolong Release capsule of BP monograph and the comparator product against which CDP/Pharmaceutical equivalence was performed is diclofenac SR pellets in accordance to BP*

	7.	*Finished product specification mentioned on Form5F as BP because Diclofenac Prolong release capsule is available in official monograph of BP 2023. while specifications mentioned under section 3.2.P.5 as USP 43 is writing mistake.* *Qadir Pharmaceutical Label claim is "Diclofenac Sustained Release or Prolong release" as mentioned in monograph of BP 2023.*	
	8.	COA of primary / secondary reference standard including source and lot number is provided.	

Remarks:

- The label claim / formulation of RRA (HPRA) approved formulation is as follows:

Difene 100 mg Dual Release Capsule/modified release capsule

Each capsule contains:

Diclofenac sodium 100mg in a modified release formulation (25mg in the form of enteric coated release pellets and 75mg in the form of sustained release pellets)

While firm claimed to comply BP specification. However, in BP available formulation is "Diclofenac Sustained Release capsule" Hence clarification regarding applied specification is required.

- The above mentioned RRA approved formulation contains both type of pellets 25mg in the form of enteric coated release pellets and 75mg in the form of sustained release pellets) while manufacturing process flow diagram provided by firm revealed that Placebo pellets were firstly coated by Drug Loading solution followed by seal coating (HPMC). Seal coated pellets are further coated by Enteric Dispersion followed by drying and packaging.

Hence it is evident that contrary to RRA approved formulation whole proportion of Drug was formulated to be sustained releae and delayed release (by way of enteric coating) simultaneously. Hence applied formulation need to be justified in light of RRA approved formulation. Furthermore, following drug release pattern need to be justified accordingly:

Acid medium (0.1 M HCl)

- NMT 10% 0.1 M HCl after 120 min

Buffer medium (pH 6.8)

- **30-65%** of labelled amount of Diclofenac sodium pellets should be released after 3 hours
- NLT 70% of labelled amount of Diclofenac sodium pellets should be released after 8 hours

Decision: Registration Board deferred the case for clarification regarding applied formulation whether Modified release capsule (as approved in HJPRA Irland) or Prolong Release Capsule (as provided in BP) and accordingly the applied specification.

	Evidence of approval of manufacturing facility	Firm has submitted copy of letter for issuance of DML dated 17-09-2021 specifying "Oral Liquid (General) section".
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No 16127 dated 28-06-2023
	Details of fee submitted	PKR 30,000/- dated 08/05/2023
	The proposed proprietary name / brand name	**Qad-fen 100mg/5ml suspension**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each 5ml suspension contains: Ibuprofen…..... 100mg
	Pharmacotherapeutic Group of (API)	NSAID
	Pharmaceutical form of applied drug	Oral Suspension
	Reference to Finished product specifications	USP
	Proposed Pack size	90ml and 120ml
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Brufen 100mg/5ml by Mylan MHRA approved
	For generic drugs (me-too status)	Brufen 100mg/5ml by M/s Abbott Laboratories Pakistan Ltd. Reg No 004595
	Name and address of API manufacturer.	M/s Citi Pharma Ltd. 3 Km Head Balloki Road, Phool Nagar, Kasur-55050 Punjab, Pakistan.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD

		template. Firm has summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 36 months **Batches:** IBP1806001, IBP1806002, IBP1806003
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical Equivalence has been established against the brand leader that is **Brufen 100mg/5ml suspension** by M/s Abbott Laboratories Pakistan (**Batch No 4823738Q, Mfg date 01-2023)** performing quality tests (Identification, Assay, Dissolution, deliverable volume, pH, water content and Uniformity of dosage form). CDP has been performed against same product **Brufen 100mg/5ml suspension** by M/s Abbott Laboratories Pakistan in pH 1.2, pH 4.5 & Phosphate Buffer pH 6.8. The values for f1 and f2 are in the acceptable range.
	Analytical method verification of product	Firm has submitted analytical method verification study reports for drug product.
STABILITY STUDY DATA		
Manufacturer of API	M/s Citi Pharma Ltd. 3 Km Head Balloki Road, Phool Nagar, Kasur-55050 Punjab, Pakistan.	

API Lot No..Batch number	IBP2211030		
Description of Pack (Container closure system)	90ml and 120ml PET bottle amber colour in unit carton 1x1's		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	LS010	LS011	LS012
Batch Size	50 bottles	50 bottles	50 bottles
Manufacturing Date	12/22	12/22	12/22
Date of Initiation	21-12-2022	21-12-2022	21-12-2022
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not applicable
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has provided copy of GMP certificate based on inspection dated 14-07-2016 issued by DRAP Pakistan
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not provided
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Provided
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Provided

Remarks of Assessor:

Sr.#	Observations	Reply	Remarks
1.	Provide updated GMP status of finished product manufacturer	*New DML was granted dated 17-09-2021, we are in the process of product registration so we have not applied for GMP yet.*	
2.	Provide valid Good Manufacturing Practice (GMP) certificate of the Drug Substance / APImanufacturer issued by concerned regulatory authority of country of origin to be provided.	Firm has provided copy of GMP certificate based on inspection dated 03-03-2023 issued by DRAP Pakistan	Complied
3.	**2.3.R.1.1** Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is	Provided	Complied

		provided in Module 3 section 3.2.P.8.3			
	4.	**3.2.S.4** Analytical Method Verification studies of Drug substance performed by the Drug Product manufacturer tobe provided.	Analytical Method Verification studies of Drug substance performed by the Drug Substance manufacturer is submitted	Analytical Method Verification studies of Drug substance performed by the Drug Product manufacture yet to be provided	
	5.	**3.2.P.2** Provide suitability testing/quality testing (as per pharmacopeia) of container closure system (PET bottle)	Not provided	Quality testing method is submitted as per USP however test result /performance report yet to be submitted.	
	6.	**3.2.P.5** Justify chromatographic conditions adopted in assay since chromatographic conditions mentioned in USP as: Detector: UV 254 nm. Flow rate: 1.0 mL/min While chromatographic conditions adopted by firm as: Detector: UV 220 nm Flow rate: 2 mL/min	Firm has provided reference of USP38-NF33 wherein chromatographic conditions mentioned were as follows: Detector: UV 220 nm Flow rate: 2 mL/min	chromatographic conditions to be adopted as per latest version of monograph USP 2023 as follows: Detector: UV 254 nm. Flow rate: 1.0 mL/min	
	7.	**3.2.P.8** Chromatograms of dissolution study has not been provided.	Provided	Complied	
	8.	**3.2.P.8** Provide commercial invoice wherein Lot No IBP2210030 and quantity of API to be mentioned.	Commercial invoice dated 08.12.2022 is provided wherein Lot No IBP2211030 and quantity of API (3 KG)	Complied	
	9.	**3.2.P.8** Stability data including summary data sheet, COA, raw data sheet and chromatograms for 6th month and onward (both accelerated and real time) to be provided.	Stability data including summary data sheet, COA, raw data sheet and chromatograms for 6th month and onward (both accelerated and real time) is provided.	Complied	

Decision: Approved. Registration letter will be issued upon submission of following:

i. **Analytical Method Verification studies of Drug substance performed by the Drug Product manufacturer.**
ii. **Suitability testing/quality testing (as per pharmacopeia) of container closure system (PET bottle).**

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**

• **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Date of Initiation	16/01/23	17/01/23	17/01/23
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not applicable
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	GMP certificate dated 04.07.2019 issued by DRAP is provided. Based on inspection dated 03.07.2019.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Provided copy of invoice (Invoice# 23010247-SG) dated 06-01-2023, with received quantity i.e. 2Kg) for the purchase of Mebeverine Pellets 80% (Batch No MBV-80-SR-066) from M/s Surge Laboratories, Pakistan.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Provided
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Provided

Remarks of Assessor:

Sr.#	Observations
1.	Provide updated GMP status of finished product manufacturer
2.	Provide valid Good Manufacturing Practice (GMP) certificate of the **Mebeverine SR pellets** manufacturer issued by DRAP. Moreover, approval for manufacturing **Mebeverine SR pellets** to be mentioned.
3.	**2.3.R.1.1** Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3
4.	**3.2.S.4** Justify acceptance criteria/ selection of chromatographic parameters including wavelength since 263nm is mentioned in BP for tablet dosage form while pellet manufacturer adjusted wavelength at 216nm. Moreover acceptance criteria for assay is mentioned as 95-105% in BP while firm adopted 90-110% .
5.	**3.2.P.2** The excipients used by pellet manufacturer such as Eudragit, Triethylcitrate and acetone have not been found in innovator/reference product. Drug-excipients compatibility study is required. Moreover, excipients such as Magnesium stearate polyacrylate dispersion 30%, hypromellose, methacrylic acid – ethyl acrylate copolymer (1:1) dispersion 30%, glycerol triacetate have been used in reference product (Colofac MR capsule) but not found in applied formulation. Clarify implication of not using said ingredients.
6.	**3.2.P.5** Finished product specification mentioned on Form5F as BP while specifications mentioned under section 3.2.P.5 as USP 43. However, modified release capsule of Mebeverine are not found in any official monograph. Provide correct reference of finished product specification accordingly.

	7.	**3.2.P.5** The specification includes tests for appearance, identity, average fill weight, uniformity of fill weight, uniformity of dosage units, water content, dissolution, related substances, assay, residual solvents and microbial quality https://www.geneesmiddeleninformatiebank.nl/pars/h123532.pdf Tests like uniformity of fill weight, uniformity of dosage units, water content, residual solvents and microbial quality has not performed by finished product manufacturer	

Reply:

Sr.#	Observations
1.	*New DML was granted dated 17-09-2021, we are in the process of product registration so we have not applied for GMP yet.*
2.	Provide valid Good Manufacturing Practice (GMP) certificate of the **Mebeverine SR pellets** manufacturer based on inspection dated 25.08.2022 issued by DRAP (valid till 2 years) wherein approval for manufacturing **Mebeverine SR pellets** has been mentioned.
3.	Batch Manufacturing Record (BMR) for manufacturing all 3 batches of drug product has been provided.
4.	Analytical method has been revised as per BP 2023 wherein acceptance criteria of assay and chromatographic conditions have been mentioned as per BP. (90-110% and 263nm).
5.	Drug-excipients compatibility study has been provided (binary method). There is no significant change occurs during compatibility study.
6.	*Finished product specification mentioned on Form5F as BP because* **Mebeverine SR *capsule*** *is available in official monograph of BP 2023. while specifications mentioned under section 3.2.P.5 as USP 43 is writing mistake.*
7.	Tests like uniformity of fill weight and water content, have been performed by finished product manufacturer. Morever quality tests will be performed as per BP 2023

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

SBL/SRD/ROS/19/19/036, SBL/SRD/ROS/19/19/037 SBL/SRD/ROS/19/19/038 The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time

		stability data is conducted at 25°C ± 2°C / 60% ± 5% RH for 12 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturingprocess and process control, process validationprotocols, control of excipients, control of drug product, specifications, analytical procedures,validation of analytical procedures, batch analysis,justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical equivalence was determined against **Rovista 5mg tablet** by **Getz Pharma, Karachi.** Quality parameters such as appearance, average weight, disintegration time, dissolution content uniformity and assay against Test product. Firm has submitted CDP results of their product against the same comparator product **Rovista 5mg tablet (Batch No F05016, Exp date 05/26)** by **Getz Pharma, Karachi** in Acid media (pH 1.0-1.2) in Acetate Buffer (pH 4.5) & Citrate Buffer (pH 6.6). The values for f1 and f2 are in the acceptable range.
	Analytical method verification of product	Firm has submitted analytical method verification study reports for drug product.

STABILITY STUDY DATA

Manufacturer of API	M/s Sumar Biotech LLP Plot No 112,113,114 GIDC Estate Gozaria, Tal and Dist Mehsana 382 825, Gujrat, India.		
API Lot No..Batch number	SBL/SRD/ROS/19/19/045		
Description of Pack (Container closure system)	Alu-Alu blister with unit carton		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	TTR028	TTR029	TTR030
Batch Size	400 tab	400 tab	400 tab
Manufacturing Date	02/23	02/23	02/23
Date of Initiation	06/02/23	06/02/23	06/02/23
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not applicable
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate No S-GMP&GLP/22103626 issued by Food and Drug Control Administration. The certificate is valid till 17 October 2024.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Provided copy of commercial invoice (Invoice# PI/030/22-23 dated 20-12-2022, with received quantity i.e. 200g) for the purchase of Rosuvastatin calcium USP (Batch No SBL/SRD/ROS/19/19/045) from M/s Sumar Biotech LLP Gujrat, India.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Provided
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Provided

Remarks of Assessor:

Sr.#	Observations	Reply	Remarks
1.	Provide updated GMP status of finished product manufacturer	*New DML was granted dated 17-09-2021, we are in the process of product registration so we have not applied for GMP yet*.	
2.	**2.3.R.1.1** Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3	Batch Manufacturing Record (BMR) for all the 3 stability batches of drug product has been provided	Complied
3.	**3.2.S.4** Analytical Method Verification studies of Drug substance performed by the Drug Product manufacturer to be provided.	Analytical Method Verification studies of Drug substance from Drug substance manufacturer is submitted	Analytical Method Verification studies from Drug Product manufacturer is required.
4.	**3.2.S.5** COA of primary / secondary reference standard including source and lot number to be provided.	Certificate of primary standard (USP) is provided (USP Lot No R148P0)	Complied
5.	**3.2.S.7** Submit real time stability data conducted as per Zone IV-A conditions i.e. 30°C ± 2°C / 65% ± 5% RH.	Real time stability data conducted as per Zone IV-A conditions i.e. 30°C ± 2°C / 65% ± 5% RH for 24 months. Batches: SBL/SRD/ROS/19/19/036 SBL/SRD/ROS/19/19/037 SBL/SRD/ROS/19/19/038	Complied

	6.	**3.2.P.2.2.1** Provide rationale for using citrate buffer instead of Phosphate buffer (pH 6.8) under CDP.	Dissolution/CDP was performed using Citrate buffer (pH 6.6) as mentioned in USP monograph (2023)	Justified.	
	7.	**3.2.P.8** Documents for the procurement of API, cleared by I&E, DRAP to be submitted	Provided copy of commercial invoice (Invoice# PI/030/22-23 dated 20-12-2022, with received quantity i.e. 200g) for the purchase of Rosuvastatin calcium USP (Batch No SBL/SRD/ROS/19/19/045) from M/s Sumar Biotech LLP Gujrat, India. Cleared by DRAP (I&E) Lahore dated 30 Jan 2023	Complied	

Decision: Approved. Registration letter will be issued after submission of Analytical Method Verification studies of Drug substance performed by the Drug Product manufacturer.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

472.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Qadir Pharmaceuticals, Veerum Fateh Garh Sahuwala Road, Sialkot.**

4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	N/A
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator [VII]:

Sr. No.	Section #.	Deficiencies	Reply
1.	***3.2.P.2***	How much overage is added in the formulation? Justify the percentage of overage added in the formulation	30% overage is added
2.	***3.2.P.8***	Justify the selection of limit of assay test as "90 – 150 %" while	For the case of Vitamin preparations normally and

			the official limit of vitamin preparations is 120%.	most of the cases followed Compendial limits are 90-130%. In our nivitex inj 500mcg we have added 30% of overage in the batch formula. Unit contains 30% of overage of API, So considering the addition of 30% of overage, assay limits are set as 90-150%. We have now revised the specs and make it more stringent after complete stability data and market feedback, so the revised limits are now set as 90-130%.	
	3.	***3.2.P.8***	Justify how UV method was adopted for the testing of drug product, since the testing method of drug substance manufacturer for assay of mecobalamin was based on HPLC	M/s Bio-labs have the registration of our product Mine injection as per manufacture specification and UV-VIS Spectrophotometer method is DRAP approved method. Since stability data is proved at old batches of 2018 so the applied method is UV-VIS Spectrophotometer which has been updated now. Validation of the applied testing method has been provided in terms of all the parameters as per validation guidelines.	
	4.	***3.2.P.8***	Justify the effective date on stability data sheet is 01-01-2020 but the stability starts at 29-08-2018	Effective data on stability data sheet is 01-01-2020 because old data has been provided on the new formats. Formats for interpretations of stability results are new and revised with old stability data for presentation.	
	5.	***3.2.P.8***	Justify the results of assay as all the batches just showed minor decrease in assay results less than which is usually observed in vitamin preparations. Scientific justification / clarification is required in this regard.	Results of assay showed normal decrease in assay results, which is well withinthe trend as of vitamins preparation. In the stabilitydata provided, assay results decrease gradually e.g. in batch number A-431 assay results decreases from 122…62% to 109-93% (stability sheet for real time analysis provided), in batch number A-433 assay results decreased from 121.21% to 107-23% and in batch number A-456 results	

				decreased from 121.2% to 106-83%.	

Decision of 316: Deferred for the following
Justify how UV method was adopted for the testing of drug product, since the testing method of drug substance manufacturer for assay of mecobalamin was based on HPLC
Justification for the results of assay
Justification of the percentage of overage added in the formulation

Remarks of evaluator PEC [VII]

S. No.	Deficiency in 316th Meeting	Documents Attached
1.	Deferred for: • Justification of applying UV Spectrophotometric method for the assay test of drug product, since the testing method of drug substance manufacturer for assay of mecobalamin was based on HPLC.	Bio-Labs has registration of mecobalamine injection as per manufacturer specifications. Since stability data has been provided of old batches so applied testing method along with method validation was submitted. However, the testing method of the mecobalamine injection has been updated to HPLC. The method validation of the new method is attached herewith. Both the methods (UV-spectrophotometric and HPLC) are validated in all aspects of ICH guidelines.
	• Justification for declining trend of assay results.	As the mecobalamin is light sensitive product and gradually degrades with the time, due to this reason there is declining trend in the analysis of assay. In order to achieve patient compliance and provision of complete dose, overage has been added so that the contents of API remain within claim limit during product shelf life.
	• Justification of the percentage of overage added in the formulation.	As the mecobalamine is light sensitive product and gradually degrades with the time, due to this reason there is declining trend in the analysis of assay. In order to achieve patient compliance and provision of complete dose, overage has been added so that the contents of API remain within claim limit during product shelf life.

Decision 321st meeting : Registration Board noted the fact that the %age overage used in the applied formulation was above the general permissible limits of overage hence the Board deferred the case for submission of new 6 month stability studies data of drug product at accelerated and long term conditions of Zone IVA, with revised formulation excluding overage, drug product specifications and drug product analytical procedure based upon HPLC Assay method.

Updated status:

- Batch formula is provided wherein no overage is mentioned however quantity of API will be adjusted as per assay of actual lot used in manufacturing.
- Firm has submitted finished product specifications with assay limit 95-115%
- Analytical testing method is submitted wherein assay will be performed by HPLC method
- Trial batches manufacturing record is provided.

- Stability data is submitted as follows**:**

Batch No	A-018	A-019	A-020
Batch size	1000 Ampoules	1000 Ampoules	1000 ampoules
Mfg date	04-2023	04-2023	04-2023
Exp date	03-2025	03-2025	02-2025
Date of initiation of stability study	05.04.2023		
API lot No	M210909A		

Shortcomings:

- Since API Lot used in formulation development and stability studies have been changed hence CoA of relevant lot No (M210909A) to be provided from both Drug substance as well as Drug product manufacturer.
- Documents for procurement of relevant batch of API, approved by I&E DRAP to be submitted**.**

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

	Evidence of approval of manufacturing facility	Firm has submitted copy of DML renewal inspection report dated 27-09-2021 specifying Ophthalmic ointment/cream section
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 8514 dated 01/04/2022
	Details of fee submitted	PKR 30,000/- dated 03/02/2022
	The proposed proprietary name / brand name	**FLUCOVET CREAM**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each gm contains: Fluticasone Propionate … 0.5mg
	Pharmacotherapeutic Group of (API)	Corticosteroid
	Pharmaceutical form of applied drug	Topical cream

	Reference to Finished product specifications	USP specification
	Proposed Pack size	15gm
	Proposed unit price	Not mentioned
	The status in reference regulatory authorities	Fluticasone Propionate Cream Fougera Pharms USA USFDA approved
	For generic drugs (me-too status)	Cutivate Cream GSK Reg No 058448
	Name and address of API manufacturer.	FARMABIOS Via Pavia, 1 27027 Gropello Cairoli(PV) Italy
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 72 months. Batches No : 0010715, 0010730, 0021008 (accelerated), 0010830 (real time)
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Not provided
	Analytical method validation/verification of product	Method verification studies have been submitted including accuracy and precision
STABILITY STUDY DATA		
Manufacturer of API	FARMABIOS

API Lot No.	Not provided		
Description of Pack (Container closure system)	Aluminium tube (15g)		
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 24 months Accelerated: 6 months		
Frequency	Accelerated: 0, 1, 2, 3, 6 (Months) Real Time: 0, 3, 6, 9, 12, 18, 24 (Months)		
Batch No.	TB-101	TB-102	TB-103
Batch Size			
Manufacturing Date	January 2019	January 2019	January 2019
Date of Initiation	04.01.2019	04.01.2019	04.01.2019
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not provided
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Not provided
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not provided
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted documents related to stability data i.e Chromatograms, Raw data sheets, summary data sheets
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Complied
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Complied .

Remarks of Assessor:

S.No	Observations
1.	Whether applied formulation is dermatologic or ophthalmic preparation since reference product/generic version is not meant for ophthalmic use. While firm intends to manufacture applied formulation in Ophthalmic ointment/cream section. Clarify the intended use.
2.	Provide valid Good Manufacturing Practice (GMP) certificate of the Drug Substance / API manufacturer issued by concerned regulatory authority of country of origin to be provided.
3.	2.3.S.5 COA of primary / secondary reference standard including source and lot number to be provided
4.	3.2.S.4 Analytical Method Verification studies of Drug Substance performed by the Drug Product manufacturer to be provided
5.	3.2.S.4 Method used for analysis of API from Finished Product Manufacturer to be provided along with analytical method validation studies.
6.	3.2.S.4 Provide certificate of analysis of relevant batch(es) of Drug Substance(s) used in product development by both Drug Substance and Drug Product manufacturer.

7.	3.2.S.4: Assay limit of drug substance is different from USP (98-100.5% instead of 90-101%) clarify it.	
8.	3.2.P.2 Provide Drug excipients compatibility study report for stearic acid, Polysorbate 80, glyceryl mono stearate, and Benzyl alcohol, being qualitatively different from innovator product.	
9.	3.2.P.2.2.1 Provide Pharmaceutical Equivalence against reference/comparator product wherein all quality parameters (as per USP) should be compared. Also provide image/snapshot/picture of Innovator Pack against which pharmaceutical equivalence study was performed. It should reveal, brand name, manufacturer, batch no. and expiry date	
10.	3.2.P.5: Assay limit is different from USP (90-115% instead of 90-110%) clarify it Moreover, microbial enumeration test has not been performed as per USP	
11.	3.2.P.5 Analytical testing method is different from USP method.	
12.	3.2.P.5 Analytical Method Verification studies of Drug Product including specificity (against sample, standard, placebo and blank) performed by the Drug Product manufacturer to be provided	
13.	3.2.P.8 Documents for the procurement of API, cleared by I&E, DRAP.	
14.	3.2.P.8 Microbial enumeration test and Ph have not been performed during stability studies.	
15.	3.2.P.8 Data of Accelerated stability study has not been provided. Moreover CoA at each time point and Batch size of stability batches to be provided.	
16.	3.2.P.8 Provide Compliance Record of HPLC software 21CFR & audit trail reports on product testing. Provide Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).	
17.	2.3.R.1.1 Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3	

Decision 331st meeting: Registration Board deferred the case for submission of reply to the above cited shortcomings.

Reply:

S.No	Observations	Reply	Remarks
1.	Whether applied formulation is dermatologic or ophthalmic preparation since reference product/generic versionis not meant for ophthalmic use. While firm intends to manufacture applied formulation in Ophthalmic ointment/cream section. Clarify the intended use.	Firm clarified that applied formulation is "topical cream"	Manufacturing facility/section for "topical cream" to be provided. Since already provided evidence for section approval specified "Ophthalmic ointment/cream section"
2.	Provide valid Good Manufacturing Practice (GMP) certificate of the Drug Substance / API manufacturer issued by concerned regulatory authority of country of origin to be provided.	GMP certificate (No IT-API/167/H/2022) based on inspection dated 01/10/2021 issued by AIFA, provided valid till three years from the date of inspection.	Complied
3.	2.3.S.5 COA of primary / secondary reference standard including source and lot number to be provided	Provided	Complied
4.	3.2.S.4 Analytical Method Verification studies of Drug Substance performed by the Drug Product manufacturer to be provided	Provided	Complied

5.	3.2.S.4 Method used for analysis of API from Finished Product Manufacturer to be provided along with analytical method validation studies.	Provided	Chromatographic conditions mentioned in USP under assay as: Injection volume:50UL Flow rate: 1.0 mL/min While chromatographic conditions adopted by firm as: Injection volume:20UL Flow rate: 1.5 mL/min Need to be justified.
6.	3.2.S.4 Provide certificate of analysis of relevant batch(es) of Drug Substance(s) used in product development by both Drug Substance and Drug Product manufacturer.	CoA from Finished product manufacturer is provided for lot No R-1506 while CoA from Drug substance manufacturer is provided for Lot No FP21406	CoA of relevant batch is required from both Drug Substance and Drug Product manufacturer.
7.	3.2.S.4: Assay limit of drug substance is different from USP (98-100.5% instead of 90-101%) clarify it.	Assay limit of drug substance is 98-102% as per USP as provided in analytical method and CoA.	Verified
8.	3.2.P.2 Provide Drug excipients compatibility study report for stearic acid, Polysorbate 80, glyceryl mono stearate, and Benzyl alcohol, being qualitatively different from innovator product.	Drug excipients compatibility study report (binary study) is provided wherein all excipients used were found compatible with API	Complied
9.	3.2.P.2.2.1 Provide Pharmaceutical Equivalence against reference/comparator product whereinall quality parameters (as per USP) should be compared. Also provide image/snapshot/picture of Innovator Pack against which pharmaceutical equivalence study was performed. It should reveal, brand name, manufacturer, batch no. and expiry date	Pharmaceutical Equivalence study was performed against **Fluticasone Propionate Cream by Fougera Pharms USA** (Batch No RTY568, Exp date 10/2020) Quality parameters studied are appearance, identification, Ph, fill weight, assay and microbial enumeration test.	Complied
10.	3.2.P.5: Assay limit is different from USP (90-115% instead of 90-110%) clarify it Moreover, microbial enumeration test has not been performed as per USP	The Assay limit of product is as per USP monograph i.e 90-110%, assay limit 90-115% was mentioned mistakenly. The Assay	

		limit mentioned in stability section (3.2.P.8) is also 90-110%	
11.	3.2.P.5 Analytical testing method is different from USP method.	Analytical testing method of Drug product is submitted as per USP	Complied
12.	3.2.P.5 Analytical Method Verification studies of Drug Product including specificity (against sample, standard, placebo and blank) performed by the Drug Product manufacturer to be provided	Provided	Complied
13.	3.2.P.8 Documents for the procurement of API, cleared by I&E, DRAP.	Good receiving note dated 27.11.2018 is provided wherein 11.8 Kg fluticasone propionate received from FARMABIOS Italy has been mentioned	Commercial invoice and approval from I&E DRAP to be provided
14.	3.2.P.8 Microbial enumeration test and Ph have not been performed during stability studies.	Microbial enumeration test and Ph tests results are provided in stability data sheet	Complied
15.	3.2.P.8 Data of Accelerated stability study has not been provided. Moreover CoA at each time point and Batch size of stability batches to be provided.	Data of Accelerated stability study has been provided against each time point Batch size provided as 7.5kg (500 units)	Complied
16.	3.2.P.8 Provide Compliance Record of HPLC software 21CFR & audit trail reports on product testing. Provide Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).	Provided	Complied
17.	2.3.R.1.1 Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3	Provided	Complied

Remarks: Manufacturing facility/section of **"Sterile eye ointment/Topical cream"** has been found approved as mentioned in letter dated 07.06.2022 regarding DML renewal by CLB (286th meeting) issued by secretary CLB.

Decision: Deferred for submission of following:

- **Chromatographic conditions (injection volume and flow rate) in analytical method of Drug Substance is not as per USP. Clarify it.**
- **CoA of relevant batch of Drug Substance(s) used in product development from both Drug Substance and Drug Product manufacturer.**
- **Documents for the procurement of API, cleared by I&E, DRAP.**

- **Dry Powder Inhaler Capsule (General) section in place of Sachet (General)-New.**

Remarks of Assessor (DD PEC$^{XX)}$:

1) Label claim of RRA approved formulation (Symbicort® Turbohaler® 200 micrograms/6 micrograms/ powder for inhalation) is as follows:

Each delivered dose (the dose that leaves the mouthpiece) contains: budesonide 160 micrograms/inhalation and formoterol fumarate dihydrate 4.5 micrograms/inhalation.

Each metered dose contains: budesonide 200 micrograms/inhalation and formoterol fumarate dihydrate 6 micrograms/inhalation.
Firm has not provided information regarding ***delivered dose***

2) **3.2.P.2** In reference product quantity of Lactose monohydrate used is 730microgram while in applied formulation the quantity of Lactose monohydrate used was 50mg. justify it

3) **3.2.P.2** In reference product Lactose monohydrate is the only excipient been used while firm used other excipients as well such as Talcum powder, Macragol 100, Povidone, Aerosil 200 . justify it, also provide Drug-Excepient compatibility studies of said excipients.
4) **3.2.P.2** The container closure system of reference product, is an inspiratory flow-driven, multidose powder inhaler containing metered doses which is made of different plastic materials, while the applied formulation is primarily pre-dispensed in unit dose hard capsules. Justification shall be submitted for pharmaceutical equivalence of the applied product against the reference product with respect to change in primary container closure system, compatibility of applied formulation with the hard gelatin capsule.
5) **3.2.P.5** Specification of Dug Product did not include water content test which is critical quality parameters for DPI.
6) **3.2.P.2** Pharmaceutical equivalence study to be performed including all quality parameters, Moreover, name batch no and manufacturer of both Test product and Reference product to be provided.
7) **3.2.P.2** Batch formula for proposed commercial batch size should be provided that includes a list of all components of the drug product to be used in the manufacturing process, their amounts on a per batch basis, and a reference to their quality standards.
8) **3.2.P.2** Potency adjustment (salt factor) calculation was not provided for Formoterol fumarate dihydrate in Batch formula.
9) **3.2.P.2** Detailed Analytical testing method of Drug Product to be provided.
10) **3.2.P.2** Description of Packaging (Container closure system) is to be provided, also provide details of metered dose inhalation device (name, model, manufacturer and shelf life) provided in pack.
11) **3.2.P.8** Documents for the procurement of API to be submitted.
12) **3.2.P.8** Compliance Record of HPLC software 21CFR & audit trail reports and record of Digital data logger for temperature and humidity monitoring is not submitted.
13) **3.2.S.4** Detailed analytical procedures for the testing of drug substance to be provided by Drug product manufacturer
14) **3.2.S.4** Provide results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (COA) of the same batch from Drug Substance / API manufacture.
15) **3.2.S.4** Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer to be provided
16) **3.2.S.4** CoA of Drug Substance Formoterol fumarate dihydrate particle size distribution test was not performed which is critical quality attribute in applied formulation i.e DPI.

Decision 326th meeting: Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.
Registration Board further advised to submit the registration status of previously registered products for "Sachet (general) section

	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	Firm has submitted copy of inspection report conducted on 13-01-2022 for renewal of DML. Wherein panel recommended grant of renewal of DML.
	Evidence of approval of manufacturing facility	Firm has submitted copy of section approval letter dated 26.01.2011 Wherein Tablet (Psychotropic) section was approved.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No 20928 dated 26-07-2022
	Details of fee submitted	PKR 30,000/- Dated 15-02-2022
	The proposed proprietary name / brand name	Zolim 10mg Tablet
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film-coated tablet contains: Zolpidem Tartrate 10mg
	Pharmacotherapeutic Group of (API)	Sedative-Hypnotic agent
	Pharmaceutical form of applied drug	Film coated tablet
	Reference to Finished product specifications	USP specification
	Proposed Pack size	2 x 10's
	Proposed unit price	As per SRO

	The status in reference regulatory authorities	MHRA approved By Bristol Laboratories Ltd
	For generic drugs (me-too status)	Zolp 10mg Tablet Adamjee Pharmaceutical Reg No 029523
	Name and address of API manufacturer.	Centaur Pharmaceutical Pvt Ltd Address: Plot No. 75, 76 &76/1, Chikhloli MIDC, Ambernath (W), Dist Thane-421 501. Maharashtra, India
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Stability study conditions: Accelerated study: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: (1802510P, 1802511P & 1802512P). Long term study: 30°C ± 2°C / 75% ± 5%RH for 60 months Batches: (20112502P, 20112501P, & 201402501P).
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted pharmaceutical equivalence of their product against the comparator product Zolp 10 mg Tablets manufactured by Adamjee Pharmaceutical Pakistan Limited Quality Parameter compared were DT, Weight variation, hardness, Dissolution and assay. Firm has submitted CDP results of their product against the same comparator product Zolp 10 mg

		Tablet in 3 dissolution medias. (pH 1.2, pH 4.5, pH 6.8) The values for f1 and f2 are in the acceptable range.
	Analytical method validation/verification of product	Method validation studies have been submitted including linearity, range, accuracy, precision, specificity..

Manufacturing Date	08-2021	08-2021	08-2021
Date of Initiation	24-08-2021	27-08-2021	31-08-2021
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP Certificate (No. New-WHO-GMP/CERT/KD/85796/2019/11/29756) valid until 10-10-2022 issued by Food & Drugs Administration, Maharashtra, India
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not provided
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted all documents related to stability data i.e Chromatograms, Raw data sheets, COA, summary data sheets
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not provided
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not provided

Remarks of Assessor (DD PEC XX):

S.No	Observations

	1.	Provide valid Good Manufacturing Practice (GMP) certificate of the Drug Substance / API manufacturer issued by concerned regulatory authority of country of origin to be provided.	
	2.	3.2.S.4 Analytical Method Verification studies of Drug Substance performed by the Drug Product manufacturer to be provided	
	3.	3.2.S.4 Method used for analysis of API from Finished Product Manufacturer to be provided along with analytical method validation studies.	
	4.	3.2.S.4 Provide certificate of analysis of relevant batch(es) of Drug Substance(s) used in product development by both Drug Substance and Drug Product manufacturer.	
	5.	3.2.P.2.2.1 Provide justification for selection of comparator product i.e Zolp 10 mg Tablets manufactured by Adamjee Pharmaceutical Pakistan Limited instead of innovator product (Stilnox 10mg tablet by Snofi Aventis, TGA approved) Reg No 021111. Also provide image/snapshot/picture of Innovator Pack against which pharmaceutical equivalence study was performed. It should reveal, brand name, manufacturer, batch no. and expiry date	
	6.	3.2.P.5 Analytical Method Verification studies of Drug Product including specificity (against sample, standard, placebo and blank) performed by the Drug Product manufacturer to be provided	
	7.	3.2.P.8 Documents for the procurement of API, cleared by I&E, DRAP.	
	8.	3.2.P.8 Provide Compliance Record of HPLC software 21CFR & audit trail reports on product testing. Provide Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).	
	9.	2.3.R.1.1 Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3	

Decision 331st meeting: Registration Board deferred the case for submission of reply to the above cited Shortcomings.

Reply:

S.No	Observations	Reply	Remarks
1.	Provide valid Good Manufacturing Practice (GMP) certificate of the Drug Substance / API manufacturer issued by concerned regulatory	Firm has submitted copy of GMP Certificate (No. New-WHO-GMP/CERT/KD/85796/2019/11/29756) valid until **10-10-2022** issued by Food & Drugs Administration, Maharashtra, India	Valid copy of GMP certificate yet to be submitted.

		authority of country of origin to be provided.			
	2.	3.2.S.4 Analytical Method Verification studies of Drug Substance performed by the Drug Product manufacturer to be provided	Analytical Method Verification studies of Drug Substance by Drug Product manufacturer has been submitted	Complied	
	3.	3.2.S.4 Method used for analysis of API from Finished Product Manufacturer to be provided along with analytical method validation studies.	Method used for analysis of API from Drug Product manufacturer has been submitted	Complied	
	4.	3.2.S.4 Provide certificate of analysis of relevant batch(es) of Drug Substance(s) used in product development by both Drug Substance and Drug Product manufacturer.	CoA of relevant batch (No 2102506P) has been provided by Drug substance manufacturer.	CoA of relevant batch (No 2102506P) yet to be provided by Drug Product manufacturer.	
	5.	3.2.P.2.2.1 Provide justification for selection of comparator product i.e Zolp 10 mg Tablets manufactured by Adamjee Pharmaceutical Pakistan Limited instead of innovator product (Stilnox 10mg tablet by Snofi Aventis, TGA approved) Reg No 021111. Also provide image/snapshot/picture of Innovator Pack against which pharmaceutical equivalence study was performed. It should reveal, brand name, manufacturer, batch no. and expiry date	Zolp 10 mg Tablet manufactured by Adamjee Pharmaceutical Pakistan Limited was used as comparator product Batch No 62 Exp date 10/2023 Reason for selection of said brand was Zolp 10mg tablet was easily available while stilnox was not available in the market.		

	6.	3.2.P.5 Analytical Method Verification studies of Drug Product including specificity (against sample, standard, placebo and blank) performed by the Drug Product manufacturer to be provided	Analytical Method Verification studies of Drug Product including specificity (against sample, standard, placebo and blank) performed by the Drug Product manufacturer has been provided	Complied	
	7.	3.2.P.8 Documents for the procurement of API, cleared by I&E, DRAP.	Firm has provided copy of commercial invoice No cp/exp/c/182/21-22 dated 07/07/2021 wherein Zolpidem Tartrate BP Batch No 2102506P (0.340Kg) is mentioned. Approved by I&E DRAP, Peshawar dated 07.04.2021	Complied	
	8.	3.2.P.8 Provide Compliance Record of HPLC software 21CFR & audit trail reports on product testing. Provide Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) is provided.		
	9.	2.3.R.1.1 Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3	Batch Manufacturing Record (BMR) for all 3 batches is provided.	Complied	

Decision: Approved. Registration letter will be issued upon submission of following:

i. **Valid Good Manufacturing Practice (GMP) certificate of the Drug Substance / API manufacturer issued by concerned regulatory authority of country of origin.**
ii. **CoA of relevant batch (No 2102506P) of drug substance by Drug Product manufacturer.**

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Last product specific inspection of firm was conducted for "Rofair 500mcg Tablet", which was conducted on 25th June, 2019, and was presented in 290th meeting of Registration Board. The report confirms following points: The HPLC software is 21CFR Compliant. Firm has demonstrated Audit trail reports of testing.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (No.IT-API/161/H/2021) dated 15-07-2021 issued by Alfa Italian Medicines Agency, the certificate specifies that the firm is operating at satisfactory level of GMP compliance. Valid for three years from date of inspection.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of form-6 no. 0359/20-DRAP(K) issued on 27-01-2020 specifying 0.250Kg of minodronic Acid Hemihydrate. Cleared by DRAP (I&E) Karachi
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Assessor:

Sr.#	Observations	Reply	Remarks
1.	Provide results of analysis of relevant batch(es) of Drug Substance (0000300533) performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (COA) of the same batch from Drug Substance / API manufacture.	Provided	Complied
2.	Method used for analysis of API from Finished Product Manufacturer to be provided along with analytical method validation studies from product manufacturer.	Method used foranalysis of API along with analytical method validation studies from product manufacturer has been provided.	Complied
3.	In CDP results were monitored for two time points only i.e 0 min and 15 min and values were calculated accordingly.	As Minodronic acid is highly soluble material in aqueous solution. the dissolution above 95% was achieved in 15min, consequently, analyst didn't run the chromatograms after 15 min, because it would become useless to perform the dissolution	%age drug release within 15 min has been verified from CDP report i.e above 95%

			after achieving 95% dissolution in 15 min.		
	4.	Provide image/snapshot/picture of Innovator Pack against which pharmaceutical equivalence study was performed. It should reveal,brand name, manufacturer, batch no. and expiry date	Provided	Manufacturer, batch no. and expiry date could not be identified due to language difference (Japanese) *Later on firm had provided translated version wherein name of manufacturer and product name was identified.*	
	5.	Results of specificity (blank, standard and placebo) has not been provided under analytical method verification study of Drug Product	Chromatograms regarding specificity parameter (blank, standard and placebo) are provided	Complied	
	6.	Assay of Drug substance was performed using UV detector wherein wavelength was adjusted at 225nm while Drug product manufacturer performed assay of product using UV detector with adjusted wavelength 218nm. Justify it	Wavelength in the assay of API was 225nm in both API and product manufacturer's analytical procedure. However, during analysis of product, analyst first performed assay on PDA detector and found that better peak was observed at 218nm instead of 225nm. The slight variation in wavelength was due to interaction of different EPI .	Justified	
	7.	Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3	Provided	Complied	
	8.	Applied formulation is "Minodronic Acid hydrate" same salt form has been present in innovator product/reference product as well. While Drug substance procured (as per Form 6) was Minodronic Acid hemihydrate. Clarify it	In all documents (CoA, manufacturing and testing documents) Drug substance was mentioned as Minodronic acid hydrate instead of hemihydrate Hence Minodronic Acid hemihydrate mentioned on Form -6 may be considered as typographic error.	Firm has submitted commercial invoice no. 322000041 dated 21.01.2020 wherein Drug substance mentioned as Minodronic Acid hydrate Batch No: 0000300533 Quantity: 0.25Kg Cleared by AD (I&E) Karachi dated 27.01.2020	

Decision 331st meeting: Deferred for clarification as CDP results were monitored for two time points only i.e 0 min and 15 min and more than 95% drug release within 15 min as per CDP performed by the firm.

Reply:

In this context, we would like to notify you that our analyst initially conducted the CDP test at various time intervals. The findings revealed a dissolution percentage exceeding 85% (approximately 95%) after the 15-minute sampling point in all three recommended mediums. Subsequently, the analyst repeated the dissolution at 5- and 10-minute intervals to adhere to the CDP condition, which mandates testing at a minimum of three time points. Despite performing the dissolution at three time points, the results were only reported for the 15-minute interval. However, records of tests conducted at all three time points are documented in our records. We are providing comprehensive data, including raw data, for your assessment and kindly urge you to consider the information.

Remarks: Results for CDP performed at 5min, 10 min and 15 min in all three recommended mediums have been submitted however more than 90% drug release within 15 min in all three mediums as per CDP report submitted by the firm.

Firm has submitted reference regarding composition of innovator/reference product wherein said ingredients croscarmellose sodium,microcrystalline cellulose and mannitol were used. https://www.kegg.jp/medicus-bin/japic_med_product?id=00059758	Verified
5.	In CDP, results were monitored for two time points only i.e 0 min and 15 min and values were calculated accordingly.	As Minodronic acid is highly soluble material in aqueous solution. the dissolution above 95% was achieved in 15min, consequently, analystdidn't run the chromatograms after 15 min, because it would become useless to perform the dissolution after achieving 95% dissolution in 15 min.	%age drug release within 15 min has been verified from CDP report i.e above 95%

6.	Provide image/snapshot/picture of Innovator Pack against which pharmaceutical equivalence study was performed. It should reveal, brand name, manufacturer, batch no. and expiry date	Provided	Manufacturer, batch no. and expiry date could not be identified due to language difference (Japanese) *Later on firm had provided translated version wherein name ofmanufacturer and product name was identified.*
7.	Assay of Drug substance was performed using UV detector wherein wavelength was adjusted at 225nm while Drug product manufacturer performed assay of product using UV detector with adjusted wavelength 218nm. Justify it	Wavelength in the assay of API was 225nm in both API and product manufacturer's analytical procedure. However, during analysis of product, analyst first performed assay on PDA detector and found that better peak was observed at 218nm instead of 225nm. The slight variation in wavelength was due to interaction of different EPI .	
8.	Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3	Provided	Complied
9.	Applied formulation is "Minodronic Acid hydrate" same salt form has been present in innovator product/reference product as well. While Drug substance procured (as per Form 6) was Minodronic Acid hemihydrate. Clarify it	In all documents (CoA, manufacturing and testingdocuments) Drug substance was mentioned as Minodronic acid hydrate instead of hemihydrate HenceMinodronic Acid hemihydrate mentioned on Form -6 may be considered as typographic error.	Firm has submitted commercial invoice no. 322000041 dated 21.01.2020 wherein Drug substance mentioned as Minodronic Acid hydrate Batch No: 0000300533 Quantity: 0.25Kg Cleared by AD (I&E) Karachi dated 27.01.2020

Decision 331st meeting: Deferred for clarification as CDP results were monitored for two time points only i.e 0 min and 15 min and more than 95% drug release within 15 min as per CDP performed by the firm.

Reply:

In this context, we would like to notify you that our analyst initially conducted the CDP test at various time intervals. The findings revealed a dissolution percentage exceeding 85% (approximately 95%) after the 15-minute sampling point in all three recommended mediums. Subsequently, the analyst repeated the dissolution at 5- and 10-minute intervals to adhere to the CDP condition, which mandates testing at a minimum of three time points. Despite performing the dissolution at three time points, the results were only reported for the 15-minute interval. However, records of tests conducted at all three time points are documented in our records. We are providing comprehensive data, including raw data, for your assessment and kindly urge you to consider the information.

Remarks: Results for CDP performed at 5min, 10 min and 15 min in all three recommended mediums have been submitted however more than 90% drug release within 15 min in all three mediums as per CDP report submitted by the firm.
Decision: Registration Board approved the applications of Minodron 50mg Tablet and Minodron 1mg Tablet • **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.** • **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Agenda of Evaluator PEC-XXIII

Case no. 01 Registration applications for local manufacturing of (Human) drugs

a. Deferred cases

483.	Name and address of manufacturer / Applicant	M/s Linta Pharmaceuticals Plot No. 3, St No. S-5, National Industrial Zone, Rawat, Islamabad (DML No. 000810) Tablet section (General)
	Brand Name +Dosage Form + Strength	U-TAC 6.4mg tablet
	Composition	Each film coated tablet contains: Glyceryl trinitrate…… 6.4mg
	Diary No. Date of R& I & fee	Dy No. 14581 dated 07-03-2019 Fee paid PKR 20,000/-vide Deposit Slip No. 0789184 dated 07-03-2019
	Pharmacological Group	Vasodilators used in cardiac diseases ATC Code C01DA02
	Type of Form	Form 5
	Finished Product Specification	Innovator's Specifications, as claimed by the applicant
	Pack size & Demanded Price	As per SRO
	Approval status of product in Reference Regulatory Authorities.	Not found in film coating
	Me-too status	Not found
	GMP status	Last GMP inspection conducted on 10-07-2019
	Previous remarks of the Evaluator[xxiii].	• Latest GMP inspection report conducted within a period of last three years. • Firm has applied for film coated tablet. In reference regulatory authority (MHRA), approved product is prolonged release oral tablet. Change in dosage form from film-coated tablet to prolonged release tablet along with prescribed fee (PKR 30,000) is required. • It is not clear whether applied product is oral or sub lingual tablet. • Evidence of applied formulation/drug already approved by DRAP (generic / me-too status) along with registration number, brand name and name of firm is required.
	Decision of 326th meeting of RB	**Registration Board deferred the case for submission of reply to the above cited shortcomings within three months.**
	Reply of Applicant	Reply of applicant was submitted vide letter No. LP/DRAP-083/2023 dated 11-10-2023 and No. LP/DRAP-026/2023 dated 13-04-23, stating the following: • Inspection of the facility was conducted in 02-2021wherein the panel had recommended renewal of following five sections: Tablet (General)

		Capsule (General) Cream/Ointment/Gel (General) Capsule (Cephalosporin) Dry Suspension (Cephalosporin) • Dosage form revised from film-coated tablet to • prolonged release along with PKR30,000 fee (Deposit Slip No.7905775438). • Applied product is oral tablet. • Me-too is Cardnit Tablet 6.4mg of M/s Atco Laboratories Limited, Karachi (Reg. No. 030299)
	Remarks of the Evaluator[xxiii].	
	Decision: Approved as per following label claim with Innovator's Specifications. **Each prolonged release oral tablet contains:** **Glyceryl trinitrate…… 6.4mg**	
484.	Name and address of manufacturer / Applicant	M/s Linta Pharmaceuticals Plot No. 3, St No. S-5, National Industrial Zone, Rawat, Islamabad (DML No. 000810) Tablet section (General)
	Brand Name +Dosage Form + Strength	OLAM tablet 20/5mg
	Composition	Each film coated tablet contains: Amlodipine…….20mg Olmesartan Medoxomil ……5mg
	Diary No. Date of R& I & fee	Dy No. 14588 dated 07-03-2019 Fee paid PKR 20,000/- vide Deposit Slip No. 0789191 dated 07-03-2019.
	Pharmacological Group	Angiotensin II receptor blockers (ARBs) and calcium channel blockers ATC Code C09DB02
	Type of Form	Form 5
	Finished Product Specification	Not mentioned by applicant
	Pack size & Demanded Price	As per SRO
	Approval status of product in Reference Regulatory Authorities.	Not provided
	Me-too status	Not found
	GMP status	Last GMP inspection conducted on 10-07-2019
	Previous remarks of the Evaluator[xxiii].	• Latest GMP inspection report conducted within a period of last three years is required. • Finished product specifications are required. • Evidence of approval of applied product in reference regulatory authority is required. • Evidence of applied formulation/drug already approved by DRAP (generic / me-too status) along with registration number, brand name and name of firm is required.
	Decision of 327th meeting of RB	**Deferred for following:** • **Evidence of approval of applied formulation in reference regulatory authorities/agencies (which were adopted by Registration Board in its 275th meeting) or change in formulation as available in reference regulatory authority, along with prescribed fee as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.** • **Latest GMP inspection report conducted within last three years.** • **Submission of finished product specifications.** • **Evidence of applied formulation/drug already approved by DRAP (generic / me-too status) along with registration number, brand name and name of firm.**

	Reply of Applicant	Reply of applicant was submitted vide letter No. LP/RA-081/2023 dated 07-07-2023, stating the following: • Inspection of the facility was conducted in 02-2021 wherein the panel had recommended renewal of following five sections: Tablet (General) Capsule (General) Cream/Ointment/Gel (General) Capsule (Cephalosporin) Dry Suspension (Cephalosporin) • Finished product complies Manufacturer's Specifications. Label claim revised as follows: • Each film coated tablet contains: Amlodipine (as besylate) .....10mg Olmesartan Medoxomil .....20mg along with PKR7500 fee (Deposit Slip No. 41609851642 dated 10-10-23) • Omsana AM Tablet 10/20mg (Me-too)
	Remarks of the Evaluator[xxiii].	Change of Manufacturer's Specifications to USP Specifications AND Revision of label claim for the complete salt as follows: "Each film coated tablet contains: Amlodipine (as besylate) .....10mg Olmesartan Medoxomil .....20mg" Along with submission of Rs.22,500/- differential fee for pre-registration change for equivalency and adjustment of weight as per salt factor.
	Decision: Approved with following label claim with USP sepcifications: "Each film coated tablet contains: Amlodipine (as besylate).....10mg Olmesartan Medoxomil .....20mg" Applicant shall submit Rs.22,500/- differential fee for pre-registration change for equivalency and adjustment of weight as per salt factor, before issuance of registration letter.	
485.	Name and address of manufacturer / Applicant	M/s Linta Pharmaceuticals Plot No. 3, St No. S-5, National Industrial Zone, Rawat, Islamabad (DML No. 000810) Tablet section (General)
	Brand Name +Dosage Form + Strength	DESVEN tablet 50mg
	Composition	Each film coated tablet contains: Desvenlafaxine…..... 50mg
	Diary No. Date of R& I & fee	Dy No. 14608 dated 07-03-2019 Fee paid PKR 20,000/- vide Deposit Slip No. 0792399 dated 06-03-2019.
	Pharmacological Group	Other antidepressants ATC Code N06AX23
	Type of Form	Form 5
	Finished Product Specification	Not provided
	Pack size & Demanded Price	As per SRO
	Approval status of product in Reference Regulatory Authorities.	Extended release tablet (DIN 02535106) is Health Canada approved.
	Me-too status	Desven XR 50mg Tablet (For extended release tablet) Pharmevo (Pvt) Ltd
	GMP status	Last GMP inspection conducted on 10-07-2019
	Previous remarks of the Evaluator[xxiii].	• Latest GMP inspection report conducted within a period of last three years is required. • Finished product specifications are not provided. • Applied product is film coated tablet. Formulation approved in reference regulatory authority (Health

		Canada) and in Pakistan is extended release tablet. Change in formulation from film coated to extended release tablet along with relevant fee is required.
	Decision of 327th meeting of RB	**Deferred for following:** • **Latest GMP inspection report conducted within last three years.** • **Provision of finished product specifications.** • **Change in formulation from film coated to extended release tablet as available in reference regulatory authority, along with prescribed fee as per notification No.F.7-11/2012- B&A/DRAP dated 13-07-2021.**
	Reply of Applicant	Reply of applicant was submitted vide letter No. LP/RA-081-B/2023 dated 07-07-2023, stating the following: • Inspection of the facility was conducted in 02-2021 wherein the panel had recommended renewal of following five sections: Tablet (General) Capsule (General) Cream/Ointment/Gel (General) Capsule (Cephalosporin) Dry Suspension (Cephalosporin) • Finished product complies Manufacturer's Specifications. • Formulation changed from film coated to extended release tablet as available in reference regulatory authority along with Rs.7500/- fee vide DS No. 05302223173.
	Remarks of the Evaluator[xxiii].	Differential fee (PKR 22,500/-) shall be submitted by applicant as prescribed vide SRO 496(I)/2023 dated 17.04.2023 for pre-registration correction of composition.
	Decision: Approved with following label claim with Manufcaturer's sepcifications: **"Each film coated tablet contains:** **Desvenlafaxine.....50mg."** **Applicant shall submit Rs. 22,500/- differential fee for pre-registration correction of composition, before issuance of registration letter.**	
486.	Name and address of manufacturer / Applicant	M/s Linta Pharmaceuticals Plot No. 3, St No. S-5, National Industrial Zone, Rawat, Islamabad (DML No. 000810) Tablet section (General)
	Brand Name +Dosage Form + Strength	D-FEN SR tablet 100mg
	Composition	Each delayed release tablet contains: Diclofenac Sodium ……100mg
	Diary No. Date of R& I & fee	Dy No. 14568 dated 07-03-2019 Fee paid PKR 20,000/- vide Deposit Slip No. 0789171 dated 07-03-2019.
	Pharmacological Group	Anti-inflammatory and anti-rheumatic products, non-steroids ATC Code M01AB05
	Type of Form	Form 5
	Finished Product Specification	USP
	Pack size & Demanded Price	As per SRO
	Approval status of product in Reference Regulatory Authorities.	Not available as 100mg delayed release oral tablet
	Me-too status	Not available as 100mg delayed release oral tablet
	GMP status	Last GMP inspection conducted on 10-07-2019
	Previous remarks of the Evaluator[xxiii].	• Latest GMP inspection report conducted within a period of last three years.

		• Evidence of approval of applied formulation in reference regulatory authorities/agencies which were declared/approved by the Registration Board in its 275th meeting is required. • Evidence of applied formulation/drug already approved by DRAP (generic / me-too status) along with registration number, brand name and name of firm is required.
	Decision of 327th meeting of RB	**Deferred for following:** • **Evidence of approval of applied formulation in reference regulatory authorities/agencies (which were adopted by Registration Board in its 275th meeting) or change in formulation as available in reference regulatory authority, along with prescribed fee as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.** • **Latest GMP inspection report conducted within last three years.** • **Evidence of applied formulation/drug already approved by DRAP (generic / me-too status) along with registration number, brand name and name of firm.**
	Reply of Applicant	Reply of applicant was submitted vide letter No. LP/RA-081-B/2023 dated 07-07-2023 and No. LP/DRAP-081-C/2023 dated 11-10-2023 , stating the following: • Inspection of the facility was conducted in 02-2021 wherein the panel had recommended renewal of following five sections: Tablet (General) Capsule (General) Cream/Ointment/Gel (General) Capsule (Cephalosporin) Dry Suspension (Cephalosporin) • Formulation changed from delayed release to extended release tablet as available in reference regulatory authority (USFDA) and according to the submitted me-too product. • Me-too: Dicloran SR 100 Tablet by M/s Sami Pharmaceuticals (Reg. No. 009743).
	Remarks of the Evaluator[xxiii].	Full fee (PKR 30,000/-) shall be submitted by applicant as prescribed vide SRO 496(I)/2023 dated 17.04.2023 for pre-registration variation.
	Decision: Approved as extended release tablet. Applicant shall submit PKR 30,000/- as prescribed vide SRO 496(I)/2023 dated 17.04.2023 for pre-registration variation, before issuance of registration letter.	
487.	Name and address of manufacturer / Applicant	M/s Linta Pharmaceuticals Plot No. 3, St No. S-5, National Industrial Zone, Rawat, Islamabad (DML No. 000810) Cream/Ointment/Gel section (General)
	Brand Name +Dosage Form + Strength	Skinton 20% Cream
	Composition	Each gram of cream contains: Azelaic acid..... 0.2gm/gm
	Diary No. Date of R& I & fee	Dy No. 16724 dated 07-03-2019 Fee paid PKR 20,000/-vide Deposit Slip No. 0804196 dated 07-03-2019

	Dy. No. and date of submission	Dy. No 16837 dated 06-07-2023
	Details of fee submitted	PKR 30,000/- Dated 27-06-2023
	The proposed proprietary name / brand name	**ESSOGM 20mg Capsule**
	Strength / concentration of drug of Active	Each Capsule Contains:

	Pharmaceutical ingredient (API) per unit	Enteric Coated Pellets of Esomeprazole Magnesium Trihydrate Equivalent to Esomeprazole…20mg
	Pharmacotherapeutic Group of (API)	Proton pump inhibitor
	Pharmaceutical form of applied drug	White to off white enteric coated pellets filled in hard gel capsules
	Reference to Finished product specifications	USP Specifications
	Proposed Pack size	1x10's, 2x7's, 100's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Nexium 20mg capsule (USFDA Approved)
	For generic drugs (me-too status)	Nexum 20mg capsule of M/s Getz Pharma Pakistan (Pvt) Ltd, Karachi (Reg.No. 033890)
	Name and address of API manufacturer.	M/s Vision Pharmaceuticals (Pvt) Ltd, Plot No. 22-23, Industrial Triangle, Kahuta Road, Islamabad. (DML No. 000806) (Semi-basic)
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, specifications, analytical procedures and its verification, batch analysis and justification of specification, working standard, container closure system and stability studies of drug substance. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturer, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, working standard, container closure system and stability studies of drug product.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, specifications, analytical procedures and its verification, batch analysis and justification of specification, working standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of drug product, specifications,

		analytical procedures, verification of analytical procedures, batch analysis, justification of specifications, working standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted pharmaceutical equivalence of their product against the comparator product Nexum 20mg capsule manufactured by M/s Getz Pharma Pakistan (Pvt) Ltd, Karachi. Firm has submitted CDP results of their product against the comparator product Nexum 20mg capsule in 3 dissolution media. The value for similarity factor is in the acceptable range
	Analytical method validation/verification of product	Firm has submitted analytical method verification study reports for drug substance as well as drug product.

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Following five products were approved in 330th meeting of RB: Cetec 10 mg Tablet AG-Zole 40mg Capsule AG-Zole 20mg Capsule Pirogm 20mg Capsule Ag-CIP 250mg Tablet
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of DML of API manufacturer issued by Drug Regulatory Authority of Pakistan renewed w.e.f 02-12-2019 and copy of GMP Certificate (No. F. 3-26/2019-Addl. Dir. (QA & LT-I)-56 dated 22-08-2022 issued on the basis of inspection conducted on 14-06-2022. The certificate specifies that the firm is operating at satisfactory level of GMP compliance.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice dated 14-06-2022 specifying purchase of Esomeprazole Magnesium EC Pellets 8.5%.

4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record for product testing.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted certificate of 21 CFR compliance for the HPLC system along with audit trail report for product testing.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator[xxiii]:

Sr. No.	Sections	Observations/Deficiencies/ Short-comings	Reply of applicant
1.	**1.3.5**	GMP certificate/ GMP report issued by DRAP within the last three years of drug product manufacturer shall be submitted.	AGM Pharmaceuticals is a newly established unit and we are currently in the registration phase. We have successfully obtained approval for five products in the 330th RB meeting held on July 24th-26th, 2023**. *Our commercial production has not commenced as of now.*** Once production begins, we plan to pursue GMP certification.
2.	**2.3.R.1.1**	Pellets used in stability batches of Essogm 20mg have an assay value of 102.24% as given in CoA and BMRs. The dispensed weight/fill weight per capsule is given as 237.05mg in BMRs. Justify with complete calculations.	Justified with complete calculations.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

1.	**3.2.S.5 & 3.2.P.6**	Justify the use of working standard from M/s Vision Pharmaceuticals (Pvt) Ltd which is neither the drug substance manufacturer nor manufacturer of pharmacopoeial reference standards.	Since the reference standard of M/s Pharmazone was expired and alternate was not available at that time from M/s Pharmazone so we arranged from M/s Vision Pharmaceuticals of same Pharmacopoeial grade. *Applicant has committed to using reference standard from relevant API manufacturer for quality testing of commercial batches.*
2.	**3.2.P.2.2.1**	Complete pharmaceutical equivalence report shall be submitted stating all parameters present in the finished product specifications (USP) as the report does not include the results of content uniformity test.	We have considered content uniformity as in-process test we have not performed in Finished Product testing stage. But We have now revised our finished Product specifications (attached) Our Product is expired now details as below: Mfg Date: 11-2021 Exp Date: 10-2023 We hereby commit that we will perform the content uniformity test in 1st commercial batch and will submit the complete data.
3.	**2.3.R.1.1**	Provide copies of BMRs of all three stability batches of drug product as the attached documents are blank BMRs.	BMRs are submitted

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Remarks of Evaluator[xxiii]:

Sr. No.	Sections	Observations/Deficiencies/ Short-comings	Reply of applicant
1.	**2.3.R.1.1**	Provide copies of BMRs of all three stability batches of drug product as the attached documents are blank BMRs.	Submitted
2.	**2.3.S.6 & 2.3.P.5.4**	Manufacturing date of stability batches of Ag-pime 500mg is 17-10-22 whereas the manufacturing date of stability batches of Ag-pime 1g is 19-10-22. Same batch ofdrug substance supplied in 10kg packing isused for both strengths. Justify how thesterility of the drug substance wasmaintained in an open container for two days.	We have received Cefepime in two containers of 2 x 5kg from Himedic as loan. We have used 1 x 5kg container for the trial batches of 500mg injection (IM/IV) and 1 x 5kg container use in 1g injection (IM/IV)
3.	**3.2.P.1**	Details of diluent including brand name, manufacturer's name, specifications, pack size, container closure system and registration number shall be submitted.	Details of diluent are as follows: For 500mg Injection:- Brand Name: Mini WFI 5ml Manufacturer Name: Frontier Dextrose Ltd, Haripur Specification: BP Pack Size: 1 x 5ml Container Closure: 5ml plastic Ampule Reg. Number: 076881

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**

• **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**		
495.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s AGM Pharmaceuticals, Eminabad Road, GT Road, Gujranwala.**
	Name, address of Manufacturing site.	M/s AGM Pharmaceuticals, Eminabad Road, GT Road, Gujranwala.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	New DML issued on 10-11-2021 on the basis of inspection conducted on 25-08-2021.
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter of grant of section dated 11-11-2021 specifying Tablet (General) section, Capsule (general) section and Dry Powder Injection (Cephalosporin) section.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No 25422 dated 19-10-2023
	Details of fee submitted	PKR 30,000/- Dated Nil
	The proposed proprietary name / brand name	**AG-PIME 1g IM/IV Injection**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial contains: Sterile powder of Cefepime HCl with L-Arginine Equivalent to Cefepime…1gm
	Pharmacotherapeutic Group of (API)	Fourth generation cephalosporin
	Pharmaceutical form of applied drug	Dry powder for injection
	Reference to Finished product specifications	USP
	Proposed Pack size	1 x 1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Maxipime for injection 500mg, 1g, 2g (USFDA Approved)
	For generic drugs (me-too status)	Avepime Injection 1g of M/s Aventek Pharmaceuticals, Lahore (Reg. No. 059585)
	Name and address of API manufacturer.	Sterile India Pvt Ltd, Plot No. 100 & 118G, Phase IV, Sector-56, HSIIDC, Kundi Haryana India.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturer, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers,

		description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturer, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted pharmaceutical equivalence of their product against the comparator product Cefstar 1g IV/IM Injection manufactured by Barret Hodgson Pvt Ltd. Since the applied product is a parenteral hence CDP is not applicable.
	Analytical method validation/verification of product	Firm has submitted analytical method verification study reports for drug substance as well as drug product.

Remarks of Evaluator[xxiii]:

Sr. No.	Sections	Observations/Deficiencies/ Short-comings	Reply of applicant
1.	**2.3.S.5 & 3.2.S.5**	Justify the use of working standard from M/s Mahima Life Sciences which is neither the drug substance manufacturer nor manufacturer of pharmacopoeial reference standards.	We have used the working standard of Mahima Life Sciences for stability data analysis and we have provided its Certificate of analysis. At initial, the received working standard with material was expired so we arranged another one from Mahima Life Sciences for analytical purpose as of same pharmacopeia grade.
2.	**2.3.S.5 & 3.2.S.5**	CoA of reference standard should include source and lot number.	CoA of used working standard is submitted with source and lot no. information. *However, the CoA submitted is of secondary reference standard and does not include details of traceability to primary reference standard.*
3.	**3.2.S.4**	Drug product manufacturer shall submit complete batch analysis results (as per pharmacopeia) of the relevant batch of drug substance along with supporting data since in	Revised Certificate of analysis of used material with all test results as per pharmacopeia is provided.

		the submitted CoA, test results of related substances are not stated.	
4.	**3.2.P.2.2.1**	Results of content uniformity testing of applied and comparator product shall be submitted in pharmaceutical equivalence report along with supporting data/evidence since the content uniformity is part of JP monograph of finished product.	We have revised the finished product specification as per JP Monograph. Our Product is expired now, details as below: Mfg Date:11-2021 Exp Date: 10-2023 We commit that we will perform the content uniformity test in 1st commercial batch and will submit the complete data with evidence.
5.	**3.2.P.5.1 & 3.2.P.5.2**	Revise the finished product specifications and analytical procedures as per JP monograph.	We have revised the finished product specification as per JP Monograph.
6.	**3.2.P.5.4**	Results of content uniformity testing of stability batches shall be submitted along with supporting data/evidence since the content uniformity is part of JP monograph of finished product.	We have performed the uniformity of content by way of weight variation test but now we have revised the finished of product specification as per JP Monograph. Our Product is expired now details as below: Mfg Date:11-2021 Exp Date: 10-2023 We commit that we will perform the content uniformity test in 1st commercial batch and will submit the complete data with evidence.
7.	**2.3.R.1.1**	Provide copies of filled BMRs of all three stability batches of drug product.	BMRs are submitted

Decision: Approved. Firm shall submit fee of Rs. 7,500/- prescribed vide SRO 496(I)/2023 dated 17-04-2023 for change of drug product specifications before issuance of registration letter.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

498.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s AGM Pharmaceuticals, Eminabad Road, GT Road, Gujranwala.**

	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 24 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures,

		verification of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure systemand stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted pharmaceutical equivalence of their product against the comparator product Pepcidine Tablet 40mg manufactured by Aspin Pharma. Firm has submitted CDP results of their product against the comparator product Pepcidine Tablet 40mg in 3 dissolution media.
	Analytical method validation/verification of product	Firm has submitted analytical method verification study reports for drug substance as well as drug product.

STABILITY STUDY DATA

Manufacturer of API	Vaasavaa Pharmaceuticals, Plot No. C-216 MIDC Chincholi, Solapur, India.		
API Lot No.	FAM0321060		
Description of Pack (Container closure system)	Alu-PVC Blister		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	TRT-010	TRT-011	TRT-012
Batch Size	1500 Tablet	1500 Tablet	1500 Tablet
Manufacturing Date	12-2021	12-2021	12-2021
Date of Initiation	07-12-2021	07-12-2021	07-12-2021
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Following five products were approved in 330th meeting of RB: Cetec 10 mg Tablet AG-Zole 40mg Capsule AG-Zole 20mg Capsule Pirogm 20mg Capsule Ag-CIP 250mg Tablet
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Not submitted.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted loan letter from M/s Batala Pharmaceuticals, Gujranwala dated 23-11-2021 specifying 250gram loan of Famotidine. Firm has also submitted clearance certificate dated 27-05-2021 specifying import of Famotidine. The clearance certificate is issued by AD (I&E) DRAP, Lahore.
4.	Data of stability batches will be supported by attested respective documents like	Firm has submitted analytical record for product testing.

	chromatograms, Raw data sheets, COA, summary data sheets etc.	
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted certificate of 21 CFR compliance for the HPLC system along with audit trail report for product testing.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator[xxiii]:

Sr. No.	Sections	Observations/Deficiencies/ Short-comings	Response of the applicant
1.	**2.3.R.1.2**	The attached blank master production document/BMR is of Pantoprazole instead of Famotidine.	Submitted.
2.	**3.2.S.4 & 3.2.P.4**	ICH guidelines recommend that Analytical method verification studies assess accuracy by covering the specified concentration range with a minimum of three concentrations with at least nine determinations. However, you have assessed two replicates of five different concentrations. Justify.	Revised Analytical method verification reort submitted.
3.	**3.2.S.4**	Analytical method verification report is not signed. Submit signed report.	Signed report submitted.
4.	**3.2.P.3.2**	Product approved in USFDA contains the following inactive ingredients: hydroxypropyl cellulose, hydroxypropyl methylcellulose, iron oxides, magnesium stearate, microcrystalline cellulose, corn starch, talc, and titanium dioxide whereas the applied product contains the following excipients: Starch, lactose, primojel, magnesium stearate and croscarmellose sodium. Clarify and also submit drug-excipient and excipient-excipient compatibility studies.	Aplicant has submitted drug-excipient and excipient-excipient compatibility studies.
5.	**3.2.P.8**	Submit legible copy of commercial invoice for the import of API since the quantity imported cannot be read from the attached copy.	Submitted.
6.	**3.2.P.8**	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin shall be submitted.	Submitted.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

499.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s AGM Pharmaceuticals, Eminabad Road, GT Road, Gujranwala.**

	Me-too status	Submitted for 250mg/ml strength
	GMP status	Not applicable, New License
	Previous remarks of the Evaluator[xxiii].	Name of applied product on cover letter and fee challan is Tilasim-30 Oral liquid. However, composition given on Form 5 is stated above (250mg/ml). This strength has already been applied vide Dy.No 14686 dated 12-06-2023; firm may be advised to submit revised/correct composition of the applied product (300mg/ml) on complete Form 5 along with full fee of registration (Rs.30,000)
	Decision of 330th meeting of RB	Deferred for clarification regarding applied strength since name of applied product on cover letter and fee challan is Tilasim-30 Oral liquid whereas composition given on Form 5 is of Tilasim-25 Oral liquid (250mg/ml) which has already been applied vide Dy. No 14686 dated 12-06-2023. The Board further decided that the applicant shall submit the response within 1 month of publication of the minutes.
	Reply of Applicant	The label claim of Tilasim-25 Oral liquid applied vide Dy. No 14686 dated 12-06-2023 is as follows: Each ml Contains: Tilmicosin Phosphate …250mg/ml Whereas the label claim of instant product is as follows: Each ml Contains: Tilmicosin Phosphate *Eq. to Tilmicosin*…250mg So both formulations are different. Me-too of the instant product is Tilbar Oral Liquid of M/s Baariq Pharmaceuticals, Lahore (reg. No. 089818).
	Remarks of the Evaluator[xxiii].	
	Decision: Approved.	

Case no. 05 Miscellaneous

Following one application was approved in 331st meeting of the Registration Board held on 31st October -02nd November, 2023. The strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit was inadvertently mentioned as follows during drafting of minutes:

"Each capsule contains:
Dexlansoprazole dual delayed release pellets 22.5% equivalent to Dexlansoprazole…….30mg"

Whereas the strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit in the submitted application dossier was as follows:

"Each capsule contains:
Dexlansoprazole dual delayed release pellets 22.5% equivalent to Dexlansoprazole…….60mg".

Submitted for consideration by the Board.

504.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Pharmedic Laboratories (Pvt) Ltd, 16km Multan Road, Lahore.**
	Name, address of Manufacturing site.	M/s Pharmedic Laboratories (Pvt) Ltd, 16km Multan Road, Lahore.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	Valid GMP certificate is not submitted.
	Evidence of approval of manufacturing facility	Firm has submitted cGMP compliance inspection report dated 04-02-2020 wherein it was stated that Capsule (non-antibiotic) section was available.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No 20637 dated 21-07-2022
	Details of fee submitted	PKR 30,000/- Deposit Slip No. 824074451387
	The proposed proprietary name / brand name	**Dexlanz 60mg Capsule**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each capsule contains: Dexlansoprazole dual delayed release pellets 22.5% equivalent to Dexlansoprazole…….30mg
	Pharmacotherapeutic Group of (API)	Proton pump inhibitor
	Pharmaceutical form of applied drug	Hard gelatin capsules filled with enteric coated pellets
	Reference to Finished product specifications	In-house Specifications
	Proposed Pack size	2x7's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Dexilant Capsule (USFDA Approved)
	For generic drugs (me-too status)	Delanzo DDR Capsule of M/s Sami Pharmaceuticals Pvt Ltd (Reg.No. 89146)
	Name and address of API manufacturer.	M/s Vision Pharmaceuticals (Pvt) Ltd, Plot No. 22-23, Industrial Triangle, Kahuta Road. (DML No. 000806) (Semi-basic)
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturer, specifications, analytical procedures and its verification, batch analysis and justification of specification, working standard, container closure system and stability studies of drug substance. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturer, description of manufacturing process and controls, specifications,

		analytical procedures and its verification, batch analysis and justification of specification, working standard, container closure system and stability studies of drug product.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, working standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of drug product, specifications, analytical procedures, verification of analytical procedures, batch analysis, justification of specifications, working standard, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted pharmaceutical equivalence of their product against the innovator/comparator product Delanzo 60mg Capsule manufactured by M/s Sami Pharmaceuticals Pvt Ltd. Firm has submitted CDP results of their product against the comparator product Delanzo 60mg Capsule manufactured by M/s Sami Pharmaceuticals Pvt Ltd in three dissolution media. The similarity factor is in the acceptable range.
	Analytical method validation/verification of product	Firm has submitted analytical method verification study reports for drug substance as well as drug product.

STABILITY STUDY DATA

Manufacturer of API	M/s Vision Pharmaceuticals (Pvt) Ltd, Plot No. 22-23, Industrial Triangle, Kahuta Road. (DML No. 000806) (Semi-basic)		
API Lot No.	DLP597		
Description of Pack (Container closure system)	Alu-Alu Blister		
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 12 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6, 9,12 (Months)		
Batch No.	DX60-TR001	DX60-TR002	DX60-TR003
Batch Size	1000 Capsule	1000 Capsule	1000 Capsule

Manufacturing Date		04-2021	04-2021	04-2021
Date of Initiation		24-05-2021	27-05-2021	28-05-2021
No. of Batches		03		
DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA				
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not provided.		
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of DML of API manufacturer issued by Drug Regulatory Authority of Pakistan renewed w.e.f 02-12-2019 and copy of GMP Certificate (No. F. 3-26/2019-Addl. Dir. (QA & LT-I)-22 dated 25-03-2022. The certificate specifies that the firm was operating at satisfactory level of GMP compliance till 09-05-2022.		
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not applicable as the API is procured locally.		
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record for product testing.		
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted certificate of 21 CFR compliance for the HPLC system. Audit trail report for product testing is submitted.		
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.		

Remarks of Evaluator[xxiii]:

Sr. No.	Sections	Observations/Deficiencies/ Short-comings	Reply of applicant
1.	**1.3.5**	GMP inspection report/ GMP certificate of the manufacturing unit issued within the last three years shall be submitted.	Firm has applied for new GMP certificate in DRAP field office vide letter No. PH/LHR/REG/655 dated 01-02-2022 and submitted reminders dated 22-03-22, 20-03-2023 and 26-03-2023.
2.	**3.2.S.4.4**	Dissolution testing and Impurity testing of drug substance shall be done by Drug Product manufacturer.	CoA by Drug Product manufacturer stating results of Dissolution testing and Impurity testing of drug substance is submitted.
3.	**3.2.P.2.2.1**	Applicant has submitted results of pharmaceutical equivalence of three parameters only. Complete pharmaceutical equivalence shall be submitted which includes all parameters of finished product given in 3.2.P.5.1 i.e description, weight variation, identification, and tests for impurities/related substances.	Updated pharmaceutical equivalence report submitted.
4.	**3.2.P.8**	Stability studies were initiated more than 20 days after the manufacturing of the batch. Justify.	The stated gap between the manufacturing date and of stability starting date was due to time and availability

				constraint in testing, blistering and packaging processes. Applicant has submitted undertaking that they shall continue stability studies for two years from the date of initiation.	

Decision: Approved with Innovator's Specifications.

- **Applicant shall submit PKR 7500/- pre-registration variation fee prescribed vide S.R.O 496 (I)/2023 dated 17-04-2023 for change in specifications from In-house to innovator's specifications,**
- **Applicant shall submit GMP inspection report/ GMP certificate of the manufacturing unit issued by DRAP within the last three years at the time of issuance of registration letter.**
- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Decision of 333rd meeting: - The Board decided to rectify the minutes of 331st meeting of the Registration Board held on 31st October -02nd November, 2023 and consider the strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit as follows in the instant case:

"Each capsule contains:
Dexlansoprazole dual delayed release pellets 22.5% equivalent to Dexlansoprazole…….60mg".

Agenda of Evaluator PEC-XIII.

Case No. 01; Registration applications of locally manufactured Human cases of new License/new sections on form 5F.

CLB in its 278th meeting held on 10th and 11th December 2020 has considered and approved the grant of Drug Manufacturing License by way of formulation with following five (05) sections to M/s Fortune Pharma Private Limited		
505.	Name, address of Applicant / Marketing Authorization Holder	**Fortune Pharmaceuticals, Plot No. K/201 S.I.T.E., Super Highway, Phase II Karachi.**
	Name, address of Manufacturing site.	Fortune Pharmaceuticals, Plot No. K/201 S.I.T.E., Super Highway, Phase II Karachi.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	New license issued on 10-06-2021 w.e.f. 22-02-2021.
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter No. F. 2-3/2016-Lic dated 14/06/2021 specifying Tablet (General) section.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales

	Dy. No. and date of submission	Dy. No. 23986, dated 02/10/2023.
	Details of fee submitted	PKR 30,000/- vide slip No. 401648091719 dated: 12/09/2023.
	The proposed proprietary name / brand name	**Levocin 250mg Tablet.**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated tablet contains: Levofloxacin hemihydrate eq. to levofloxacin ..… 250mg
	Pharmacotherapeutic Group of (API)	J01MA Fluoroquinolones.
	Pharmaceutical form of applied drug	Film Coated Tablet
	Reference to Finished product specifications	USP specification.
	Proposed Pack size	As per SRO.
	Proposed unit price	As per SRO.
	The status in reference regulatory authorities	Levofloxacin 250 mg film-coated tablets, MHRA Approved.
	For generic drugs (me-too status)	Lovenox Tablets 250mg, Don Valley, Reg. No. 069370.
	Name and address of API manufacturer.	M/s Zhejiang East-Asia Pharmaceutical Co., Ltd. Address: Coastal Industrial City, Pubagang town, Sanmen county, Zhejiang, P.R. China.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Firm has submitted details of the drug substance including its nomenclature, structure, general properties, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis (B. No. DC-004-2007009, Mfg. date 11-07-2020) and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies (Conditions & duration of Stability studies)	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH 48 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: DC-004-1512001, DC-004-1512002 & DC-004-1512003.
	Module-III (Drug Product):	Firm has submitted details of the drug product including its description, composition, pharmaceutical development, manufacture, batch formula, manufacturing process and process control, process validation protocols, control of drug product, specifications, analytical procedures, verification of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.

	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence is established against the Innovator brand i.e. Levaquin 250mg tablets by performing quality tests identification, weight variation, uniformity of dosage unit, Dissolution & Assay. Comparative Dissolution is also performed against the same brand that is Levaquin 250mg tablets in Acid media (pH 1.2), Acetate buffer (pH 4.5) & Phosphate Buffer (pH 6.8). values of F_2 are within the acceptable range.
	Analytical method validation/verification of product	Method verification studies are submitted including , specificity, accuracy & precision.

STABILITY STUDY DATA			
Manufacturer of API	M/s Zhejiang East-Asia Pharmaceutical Co., Ltd. Address: Coastal Industrial City, Pubagang town, Sanmen county, Zhejiang, P.R. China.		
API Lot No.	Not submitted.		
Description of Pack (Container closure system)	Alu-Alu Blister with leaflet packed in a unit Carton.		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0,3,6 (Months)		
Batch No.	T-004	T-005	T-006
Batch Size	1500 Tablets	1500 Tablets	1500 Tablets
Manufacturing Date	12-2021	12-2021	12-2021
Date of Initiation	13-12-2021	14-12-2021	15-12-2021
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	N/A
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP Certificate (No. AH20150265) dated 23-12-2020 issued by China Foods & drugs Administration. The certificate specifies that the firm complies with the requirements of Chinese Good Manufacturing Practices for pharmaceutical products. Valid till 22-12-2025. Online verification confirms the validity till 22-12-2020 and the status is "Expired".
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice No. TSN0882021 dated 26-10-2021 mentioning 4kg of levofloxacin hemihydrate USP with B. No. DC-004-2007009, Mfg. date 11-07-2020 attested Assistant Director (I&E) DRAP, Karachi dated 18-11-2021. Firm has also submitted copy of Form 6 attested by Assistant Director (I&E) DRAP, Karachi dated 09-11-2021.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted

5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of evaluator:

Sr. No.	Section	Observation	Reply by the firm
1.	1.1	Name and address on the submitted challan is Fortune pharma (Pvt.) Ltd., Plot 20/K SITE, Super High Way Phase II Karachi While the name and address mentioned on DML is M/s Fortune Pharmaceuticals, Plot No. K/201, S.ITE., Super High Way Phase II Karachi. Justification shall be submitted.	
2.	1.5.4	Proposed pack size for the applied formulation shall be mentioned.	
3.	1.6.5	Justification shall be submitted regarding the submitted GMP certificate for drug substance manufacturer as online database of NMPA shows it for M/s Anhui Fengyuan Likang Pharmaceutical Co., Ltd., Bengbu High-tech Development Zone, China instead of M/s Zhejiang East-Asia Pharmaceutical Co., Ltd., China. Valid copy of GMP certificate for the drug substance manufacturer issued by relevant/concerned authority shall be submitted as the submitted GMP certificate is expired and validity is till 22-12-2020 in the online database of NMPA.	
4.	2.3.	Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3.	
5.		Analytical method verification studies of the drug substance performed by the drug product manufacturer shall be submitted.	
6.	3.2.S.7	Accelerated stability studies for batch No. DC-004-1512001 of the drug substance shall be submitted.	
7.	3.2.P.2.2	• Pictorial evidence of the innovator product with clear information of batch number, manufacturing date, expiry date etc. shall be submitted. • Details of the innovator product including name of the manufacturer, batch number, manufacturing date, expiry date etc. shall be submitted. • Justification shall be submitted regarding the submitted results of CDP for Levaquin 500mg and Levaquin 250mg as they are completely same in pH 1.2 and 4.5 mediums.	
8.	3.2.P.8	• Stability data sheets as per decision of the Registration Board with inclusion of API lot number shall be submitted. • Submitted chromatograms does not reflect any applied wavelength. Justification shall be submitted. • Compliance Record of HPLC software 21CFR & audit trail reports on product testing shall be submitted.	

Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings.

506.	Name, address of Applicant / Marketing Authorization Holder	**Fortune Pharmaceuticals, Plot No. K/201 S.I.T.E., Super Highway, Phase II Karachi.**

	GMP status of the firm	New license issued on 10-06-2021 w.e.f. 22-02-2021.
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter No. F. 2-3/2016-Lic dated 14/06/2021 specifying Capsule (General) section.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No.26382, dated 01/11/2023.
	Details of fee submitted	PKR 30,000/- vide slip No. 60305514498 dated: 27/10/2023.
	The proposed proprietary name / brand name	**Itrazole 100mg Capsule.**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each capsule contains: Itraconazole as IR pellets..... 100mg
	Pharmacotherapeutic Group of (API)	Antimycotics for systemic use.
	Pharmaceutical form of applied drug	Oral capsule.
	Reference to Finished product specifications	USP specification.
	Proposed Pack size	4's or As per SRO.
	Proposed unit price	As per SRO.
	The status in reference regulatory authorities	Sporanox 100mg capsule, MHRA approved.
	For generic drugs (me-too status)	Rolac 100mg Capsules, Sami Pharmaceuticals, Reg. No. 024491.
	Name and address of API manufacturer.	M/s Surge Laboratories (Pvt.) Ltd., 10th Km Faisalabad Road, Bikhi, District Sheikhupura – Pakistan.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Firm has submitted details of the drug substance including its nomenclature, structure, general properties, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis (B. No. ITV-22-001, Mfg. date 10-2020) and justification of specification, reference

		standard, container closure system and stability studies of drug substance.
	Stability studies (Conditions & duration of Stability studies)	Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH Batches: ITC-22-IR-051, ITC-22-IR-053 & ITC-22-IR-054.
	Module-III (Drug Product):	Firm has submitted details of the drug product including its description, composition, pharmaceutical development, manufacture, batch formula, manufacturing process and process control, process validation protocols, control of drug product, specifications, analytical procedures, verification of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence is established against the brand that is Sporanox Capsule by performing quality tests identification, weight variation, uniformity of dosage units, Dissolution & Assay. Comparative Dissolution is also performed against the same brand that is Sporanox Capsule in Acid media (pH 1.2), Acetate buffer (pH 4.5) & Phosphate Buffer (pH 6.8). F_2 values calculated are in acceptable renge.
	Analytical method validation/verification of product	Method validation studies are submitted including , specificity, accuracy & precision.

STABILITY STUDY DATA

Manufacturer of API	M/s Surge Laboratories (Pvt.) Ltd., 10th Km Faisalabad Road, Bikhi, District Sheikhupura – Pakistan.		
API Lot No.	Not submitted.		
Description of Pack (Container closure system)	White to off-white spherical IR pellets filled in hard gelatin capsule, blistered in Alu-Alu and further packed in bleach card units.		
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0,3,6 (Months)		
Batch No.	T001	T002	T003
Batch Size	1500 Capsules	1500 Capsules	1500 Capsules
Manufacturing Date	01/2022	01/2022	01/2022
Date of Initiation	15/01/2022	16/01/2022	17/01/2022
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	N/A
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. 182/2019-DRAP (AD-823166-158) dated 04-07-2019 issued on the basis of inspection conducted on 03-07-2019 is submitted by the firm.

3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice No. EX/RU/031/21-22 dated 25-10-2021mentioning 1.5kg of Pregabalin with B. No. PG213041, Mfg. date 10-2021 attested by Assistant Director I&E, DRAP, Karachi dated 22-11-2021.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of evaluator:

Sr. No.	Section	Observation	Reply by the firm
1.	1.1	Name and address on the submitted challan is Fortune pharma (Pvt.) Ltd., Plot 20/K SITE, Super High Way Phase II Karachi While the name and address mentioned on DML is M/s Fortune Pharmaceuticals, Plot No. K/201, S.ITE., Super High Way Phase II Karachi. Justification shall be submitted.	
2.	1.6.5	Valid copy of GMP certificate of the drug substance manufacturer shall be submitted.	
3.	3.2.S.7	Stability studies of the drug substance from drug substance manufacturer shall be submitted.	
4.	2.3	Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3.	
5.	3.2.P.2.2	• Pictorial evidence of the innovator product with clear information of batch number, manufacturing date, expiry date etc. shall be submitted. • Details of the innovator product including name of the manufacturer, batch number, manufacturing date, expiry date etc. shall be submitted.	
6.	3.2.P.8	• Stability data sheets as per decision of the Registration Board with inclusion of API lot number shall be submitted. • Documents for the procurement of API with approval from DRAP (in case of import) shall be submitted. • Submitted chromatograms does not reflect any applied wavelength. Justification shall be submitted. • Compliance Record of HPLC software 21CFR & audit trail reports on product testing	

Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings.

6.	Record of Digital data logger for temperature and humidity monitoring of	Submitted

	stability chambers (real time and accelerated)	

Remarks of evaluator:

Sr. No.	Section	Observation	Reply by the firm
1.	1.1	Name and address on the submitted challan is Fortune pharma (Pvt.) Ltd., Plot 20/K SITE, Super High Way Phase II Karachi While the name and address mentioned on DML is M/s Fortune Pharmaceuticals, Plot No. K/201, S.ITE., Super High Way Phase II Karachi. Justification shall be submitted.	
2.	1.5.4	Proposed pack size for the applied formulation shall be mentioned.	
3.	2.3.	Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3.	
4.	3.2.S.4.1	Specifications of the drug substance from drug substance manufacturer shall be submitted.	
5.	3.2.S.4.2	Justification shall be submitted regarding the analytical method from drug substance manufacturer as all the parameters including flow rate, injection volume, wave length diluent, standard preparation, sample preparation etc. are completely different from USP monograph.	
6.	3.2.S.4.4	Analytical method verification studies of the drug substance performed by the drug product manufacturer shall be submitted.	
7.	3.2.P.2.2	Calculations and values of F_2 for all the three mediums shall be submitted.	
8.	3.2.P.8	Clear and readable documents for the procurement of API with approval from DRAP (in case of import) shall be submitted. Compliance Record of HPLC software 21CFR & audit trail reports on product testing shall be submitted.	

Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings.

511.	Name, address of Applicant / Marketing Authorization Holder	**Fortune Pharmaceuticals, Plot No. K/201 S.I.T.E., Super Highway, Phase II Karachi.**
	Name, address of Manufacturing site.	Fortune Pharmaceuticals, Plot No. K/201 S.I.T.E., Super Highway, Phase II Karachi.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	New license issued on 10-06-2021 w.e.f. 22-02-2021.
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter No. F. 2-3/2016-Lic dated 14/06/2021 specifying Capsule (General) section.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No.18307, dated 20/07/2023.
	Details of fee submitted	PKR 30,000/- vide slip No. 773720227775 dated: 04/07/2023.
	The proposed proprietary name / brand name	**Newgab capsule 50mg.**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each hard gelatin capsule contains: Pregabalin… 50mg

	Pharmacotherapeutic Group of (API)	Anticonvulsant.
	Pharmaceutical form of applied drug	Oral capsule.
	Reference to Finished product specifications	BP specification.
	Proposed Pack size	As per SRO.
	Proposed unit price	As per SRO.
	The status in reference regulatory authorities	Lyrica 50mg capsule, USFDA approved.
	For generic drugs (me-too status)	Medirica 50mg Capsule, Mediate Pharmaceutical, Reg. No. 074971.
	Name and address of API manufacturer.	M/s CTX Lifesciences (Pvt.) Ltd., Block No. 251/ P, 252/ P, 253 to 255, 256/ P, 258/ P, 276/ P, 277, 278/ P, 279 to 282, 293/ P, 284/ P GIDC, City – Sachin Distt. Surat, Gujrat State, India. Copy of GMP certificate No. 22063346 in the name of M/s CTX Lifesciences (Pvt.) Ltd., issued by Food & Drugs Control Administration, Gujrat State, India valid till 29-05-2025 is submitted.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Firm has submitted details of the drug substance including its nomenclature, structure, general properties, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis (B. No. PG213041, Mfg. date 10-2021) and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies (Conditions & duration of Stability studies)	Stability study conditions: Real time: Accelerated: 40°C / 75% RH for 6 months Batches: PG120001, PG120002 & PG120003.
	Module-III (Drug Product):	Firm has submitted details of the drug product including its description, composition, pharmaceutical development, manufacture, batch formula, manufacturing process and process control, process validation protocols, control of drug product, specifications, analytical procedures, verification of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence is established against the brand that is Lyrica 50 mg with batch No. LR12547, expiry date 11-2024 manufactured by M/s Pfizer by performing quality tests average weight, content uniformity, Dissolution & Assay. Comparative Dissolution is also performed against the same brand that is Lyrica 50 mg with batch No. LC1254,

		expiry date 11-2023 manufactured by M/s Pfizer in Acid media (pH 1.2), Acetate buffer (pH 4.5) & Phosphate Buffer (pH 6.8). in all the three mediums both reference and applied formulations have shown more than 85% release within 15 minutes.		
	Analytical method validation/verification of product	Method validation studies are submitted including , specificity, accuracy & precision.

	Details of fee submitted	PKR 30,000/- vide slip No. 228659180716 dated: 12/09/2023.

	The proposed proprietary name / brand name	**Ternafine 250mg Tablet.**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Tablet contains: Terbinafine as Hydrochloride 250mg
	Pharmacotherapeutic Group of (API)	Antifungal
	Pharmaceutical form of applied drug	Oral, Uncoated Tablet
	Reference to Finished product specifications	USP specification.
	Proposed Pack size	10's or As per SRO.
	Proposed unit price	As per SRO.
	The status in reference regulatory authorities	Lamisil 250mg tablet, TGA Australia Approved.
	For generic drugs (me-too status)	Brandit 250mg tablet, High-Q Pharmaceutical, Reg. No. 090823.
	Name and address of API manufacturer.	M/s Saptagir Laboratories (Pvt.) Ltd., Sy. No. Parts of 27, 46 and 50 to 56, Ananthasagar Village, Chegunta Mandal, Medak District, Telangana State, India.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Firm has submitted details of the drug substance including its nomenclature, structure, general properties, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis (B. No. TER04422, Mfg. date 10-2021) and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies (Conditions & duration of Stability studies)	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH 60 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: TH0131216, TH0141216 & TH0151216.
	Module-III (Drug Product):	Firm has submitted details of the drug product including its description, composition, pharmaceutical development, manufacture, batch formula, manufacturing process and process control, process validation protocols, control of drug product, specifications, analytical procedures, verification of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence is established against the Innovator brand i.e. Lamisil 250mg tablets by performing quality tests identification, weight variation, uniformity of dosage unit, Dissolution & Assay. Comparative Dissolution is also performed against the same brand that is Lamisil 250mg tablets in Acid media (pH

		1.2), Acetate buffer (pH 4.5) & Phosphate Buffer (pH 6.8). values of F_2 are within the acceptable range.		
	Analytical method validation/verification of product	Method validation studies are submitted including , specificity, accuracy & precision.		
STABILITY STUDY DATA				
Manufacturer of API		M/s Saptagir Laboratories (Pvt.) Ltd., Sy. No. Parts of 27, 46 and 50 to 56, Ananthasagar Village, Chegunta Mandal, Medak District, Telangana State, India.		
API Lot No.		Not submitted.		
Description of Pack (Container closure system)		Alu-Alu Blister with leaflet packed in a unit Carton.		
Stability Storage Condition		Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period		Real time: 6 months Accelerated: 6 months		
Frequency		Accelerated: 0, 3, 6 (Months) Real Time: 0,3,6 (Months)		
Batch No.		TR004	TR005	TR006
Batch Size		1500 Tablets	1500 Tablets	1500 Tablets
Manufacturing Date		11-2021	11-2021	11-2021
Date of Initiation		28-11-2021	29-11-2021	30-11-2021
No. of Batches		03		
DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA				
1.	Reference of previous approval of applications with stability study data of the firm (if any)	N/A		
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP Certificate (No. 82079/TS/2022) dated 22-09-2022 issued by Drug Control Administration, Telangana, India. The certificate specifies that the firm is following Good manufacturing practices as stipulated under the provision of Schedule "M" of the Drugs and cosmetics Rules, 1945. Certificate is valid till 22-09-2023.		
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice No. EX/RU/031/21-22 dated 25-10-2021 specifying 2.0Kg of Terbinafine Hydrochloride attested by Assistant Director (I&E) DRAP, Karachi dated 22-11-2021. Firm has also submitted copy of form 6 attested by Assistant Director (I&E) DRAP, Karachi dated 22-11-2021.		
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted		
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not Submitted		
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted		

Remarks of evaluator:

Sr. No.	Section	Observation	Reply by the firm
1.	1.1	Name and address on the submitted challan is Fortune pharma (Pvt.) Ltd., Plot 20/K SITE, Super High Way Phase II Karachi While the name and address mentioned on DML is M/s Fortune Pharmaceuticals, Plot No. K/201, S.ITE., Super High Way Phase II Karachi. Justification shall be submitted.	
2.	1.6.5	Valid copy of GMP certificate for the drug substance manufacturer issued by relevant/concerned authority shall be submitted.	
3.	2.3.	Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3.	
4.	3.2.S.5	COA and details of the working standard used in the trial batches shall be submitted.	
5.	3.2.P.2.2	• Details of the innovator product used in pharmaceutical equivalence and CDP including manufacturer name, batch number & manufacturing and expiry date shall be submitted. • Pictorial evidence of the innovator pack with visible details shall also be submitted.	
6.	3.2.P.6	COA and details of the working standard used in the trial batches shall be submitted.	
7.	3.2.P.8	• Stability data sheets as per decision of the Registration Board with inclusion of API lot number shall be submitted. • Submitted chromatograms does not reflect any applied wavelength. Justification shall be submitted. • Compliance Record of HPLC software 21CFR & audit trail reports on product testing shall be submitted.	

Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings.

515.	Name, address of Applicant / Marketing Authorization Holder	**Fortune Pharmaceuticals, Plot No. K/201 S.I.T.E., Super Highway, Phase II Karachi.**

CLB in its 282nd meeting held on 31st August 2021, has considered and approved the grant of DML by way of Formulation with following 3 sections:
Tablet Section (General)
Capsule Section (General)
Cream/ointment section (General)

518.	Name, address of Applicant / Marketing Authorization Holder	**M/s Akhsah Pharmaceuticals (Pvt.) Ltd., Plot No. 47, Street No. S-10, RCCI Industrial Estate, Rawat.**
	Name, address of Manufacturing site.	M/s Akhsah Pharmaceuticals (Pvt.) Ltd., Plot No. 47, Street No. S-10, RCCI Industrial Estate, Rawat.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	New License issued on 14-09-2021.
	Evidence of approval of manufacturing facility	Cream/Ointment section (general) approved vide No. F 1-7/2012-Lic dated 14-09-2021.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)

	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 19213; dated 02/08/2023.
	Details of fee submitted	PKR 30,000/-: vide slip No. 705807296314 dated 07/07/2023.
	The proposed proprietary name / brand name	**Axafine 1% w/w cream.**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Gram Contains: Terbinafine HCl..... 10mg
	Pharmaceutical form of applied drug	Topical Cream.
	Pharmacotherapeutic Group of (API)	Antifungal for topical use.
	Reference to Finished product specifications	JP specifications.
	Proposed Pack size	10gm.
	Proposed unit price	As per SRO.
	The status in reference regulatory authorities	LAMISIL 1% w/w Cream, MHRA approved.
	For generic drugs (me-too status)	Lamisil 1% cream by GSK OTC, Reg. No. 013210.
	Name and address of API manufacturer.	M/s Shandong Boyuan Pharmaceutical Co. Ltd., Qiangjin Street, Jibei Economic Development Zone, Jinan, Shandong, China.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubility's, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Firm has submitted detailed data of the drug substance related to its nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis (B. No. 220203TA, mfg. date, 23-02-2022) and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies (Drug substance.)	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 24 months. Accelerated: 40˚C±2˚C / 75% ± 5% RH for 6 months. Batches: (150401TH, 150402TH & 150403TH)

	Module-III (Drug Product):	Firm has submitted detail of the drug product including its description, composition, manufacturer, description of manufacturing process and controls, process validation protocol, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence is established against the brand that is Lamisil Cream manufactured by GSK Pakistan by performing quality tests for minimum fill, microbial limit & assay.
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.

STABILITY STUDY DATA

Manufacturer of API	M/s Envee Drugs (Pvt.) Ltd., N. H. No. 8, Dumral-387 355, Ta. Nadiad, Dist; Kheda, Gujrat, India.		
API Lot No.	210617WS.		
Description of Pack (Container closure system)	Aluminum tube packed in unit carton with leaflet.		
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 06 months Accelerated: 06 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	CR-01	CR-02	CR-03
Batch Size	100 tubes	100 tubes	100 tubes
Manufacturing Date	12-2022	12-2022	12-2022
Date of Initiation	12-2022	12-2022	12-2022
No. of Batches	03		

REQUEST OF EXEMPTION FROM ON SITE INSPECTION

The firm has requested for Exemption from On-site Investigation of their submitted stability data and provided the following documents in conjunction with the checklist approved by the Registration Board.

Administrative Portion

7.	Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted.
8.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Not submitted.
9.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of form 6 No. K-400580286971 mentioning 600 grams of Terbinafine HCl USP attested by Assistant Director I&E, DRAP, Islamabad dated 30-04-2022. Firm has also submitted copy of commercial invoice No. 0109SLT2202801-2 dated 22-02-2022 mentioning 600 grams of Terbinafine HCl USP with Batch No. 211005TA & manufacturing date of 28-08-2021. ***However, submitted batch number is not present inbatch analysis and stability data sheets. Also the invoice***

		is from M/s Zhejiang Top Hankook Biopharm Co. Ltd., Hangzhou China.
10.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
11.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not Submitted
12.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks by the Evaluator:

Sr. No.	Section	Observation	Reply by the firm
1.	1.1	Covering letter has mentioned label claim of Terbinafine as HCl 10mg. justification shall be submitted.	Firm has submitted that covering letter contain brand name along with generic name in bracket (Terbinafine HCL) But in next place it is written wrongly, in dossier and fee deposit slip it is correctly written Terbinafine HCl 1%.
2.	1.6.5	Complete information in this section shall be submitted.	Firm has submitted complete details of this section including the names, addresses and vendor qualification of both the drug substances.
3.	1.6.5	Valid copy of GMP certificate of the drug substance manufacturer shall be submitted.	Firm has submitted copy of GMP certificate No. SD20160496 26-08-2016 in the name of M/s Shandong Boyuan Pharmaceutical Co. Ltd., China issued by CFDA valid till 25-08-2021. Firm has also submitted copy of License No. 20160312 valid till 25-04-2026.
4.	2.3.	Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3.	Submitted.
5.	3.2.S.4.1	Specifications submitted by the drug product manufacturer for drug substance has mentioned assay limits of 98% - 102% with reference of EP and JP. While both EP and JP have assay limits of 99% - 101%. Justification shall be submitted.	Firm has submitted that it was written by mistake and further submitted that results were within the limits of 99% - 101%. They also submitted new corrected COA with limits of 99% - 101%. ***However, fee for pre-registration variation is not submitted.***
6.	3.2.S.4.2	Signed analytical procedures for the drug substance from the drug product manufacturer shall be submitted.	Submitted.
7.	3.2.S.4.3	In analytical method verification report, actual concentration correspondent to different	Submitted.

			percentages used in different parameters shall be mentioned and submitted accordingly.		
	8.	3.2.S.4.4	COAs submitted by both drug substance manufacturer and drug product manufacturer have specification as per USP monograph while verification studies provided by the drug product manufacturer are as per JP monograph. Justification shall be submitted.	Firm has submitted that Pharmacopoeia referred is corrected, next we will fellow USP for API if advised by board. Furthermore both compendial parameter/limits are exactly same and verification study result comply both compendia (pharmacopoeia).	
	9.	3.2.P.1	Justify the quantity of Terbinafine HCl i.e. 11.25 mg per gram.	Firm has submitted that this happened due to interchange of row in table 11.25 mg/gm is isopropyl myristate while Terbinafine HCl is 10 mg (1%) but during putting in tabulated template both the adjacent row pasted in reverse order. They also submitted corrected formulation and submitted that further verification can be observed from dispensing sheet of BMR.	
	10.	3.2.P.2	Pharmaceutical development has mentioned 2% of Terbinafine HCl. Clarification shall be submitted.	Firm has submitted that it is 1% instead of 2%. Same Pharmaceuticals development template is used as that of other cream strength. Sometime after changing the word/line remain unsaved and become undo automatically. Same case happened here. We feel regret for it.	
	11.	3.2.P.2.2	Details of the product against which pharmaceutical equivalence is performed including batch number and manufacturing date etc. shall be submitted.	Firm has submitted picture of Lamisil cream, B. No. DJ8D, mfg. date of 08-2022 manufactured by GSK Pakistan.	
	12.	3.2.P.3	This section has mentioned Pearl pharma as manufacturer. Clarification shall be submitted.	Firm has submitted that they generally share or download general/ blank template from google in order to present their data in more precise way, e.g. product development template, then put our details and data in these template. Sometime after changing the word/line remain unsaved and become undo automatically. Same case happened here, and we feel regret for it. correction is made.	
	13.	3.2.P.8	• Pack size of the tube in which stability studies are conducted shall also be mentioned. • Documents for the procurement of API used in the development of trial batches with approval from DRAP (in case of import) shall be submitted.	Firm has submitted that 10gm of tube is used in stability testing. Firm has submitted clearance certificate No. E-1091780282981 dated 13-05-2022 mentioning 600gm of Terbinafine HCl, B. No. 211005TA attested by Assistant Director I&E, DRAP, Islamabad.	

				However, the batch No. in 3.2.S.4.4 is 220203TA while in stability data it is 210617WS.
			• Justification shall be submitted regarding the batch number and manufacturing date of the drug substance as in 3.2.S.4.4 batch number is 220203TA while in stability data it is 210617WS while in commercial invoice it is 211005TA.	Firm has submitted a picture of container for Terbinafine HCl with B. No. 220203TA, mfg. date of 23-02-2022. They further submitted that this container shows the same batch number as that on the COA. The different batch number on the invoice i.e. 211005TAis probably due to indenter/supplier/exporter typographic mistake. ***However, clearance certificate No. E-1091780282981 dated 13-05-2022 mentioning 600gm of Terbinafine HCl, has also mentioned B. No. 211005TA.***
			• Raw data sheets for calculation of assay test at each time point for both accelerated as well as real time shall be submitted.	Submitted.
			• Justification shall be submitted for not performing system suitability studies.	Firm has submitted that %RSD has been calculated at each test interval. However, Specific system suitability test standard solution containing internal standard has been prepared and used at 09th month interval. Chromatograms are submitted.
			• Compliance Record of HPLC software 21CFR & audit trail reports on product testing shall be submitted.	Firm has submitted that we are new DML so it is not applicable.

Decision: Deferred for following;

- **Submission of fee of 30,000/- for pre-approval correction/change in registration application as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.**
- **Clarification regarding the API lot number shall be submitted as in section 3.2.S.4.4 it is 220203TA, while in stability data sheets of the product it is 210617WS and in the clearance certificate of drug substance it is 211005TA.**

REQUEST OF EXEMPTION FROM ON SITE INSPECTION			
The firm has requested for Exemption from On-site Investigation of their submitted stability data and provided the following documents in conjunction with the checklist approved by the Registration Board.			
Administrative Portion			

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Not submitted.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	**Fusidic Acid:** Firm has submitted copy of Form-6 N0. K-54180289532 mentioning 500 grams of Fusidic Acid EP attested by Assistant Director I&E, DRAP, Islamabad dated 12-04-2022. Firm has also submitted copy of commercial invoice No. WD202201040 dated 03-01-2022 mentioning 500 grams of Fusidic Acid EP with B. No. 21120901, mfg. date, 09-12-2021. However, invoice is not attested by DRAP. **Hydrocortisone acetate:** Firm has submitted copy of Form-6 N0. K-32480284268 mentioning 130 grams of Hydrocortisone acetate USP attested by Assistant Director I&E, DRAP, Islamabad dated 07-02-2022. Firm has also submitted copy of commercial invoice No. 22HA-009 dated 24-01-2022 mentioning 130 grams of Hydrocortisone acetate USP with B. No. HD0088, mfg. date, 16-10-2021. However, invoice is not attested by DRAP.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks by the Evaluator:

Sr. No.	Section	Observation	Reply by the firm
1.	1.6.5	Complete information in this section shall be submitted.	Firm has submitted complete details of this section including the names, addresses and vendor qualification of both the drug substances.
2.	1.6.5	Valid copy of GMP certificate of both the drug substance manufacturers shall be submitted.	**Hydrocortisone acetate:** Firm has submitted copy of GMP certificate No. TJ20180174 issued to M/s Tianjin Jinjin Pharmaceutical Co., Ltd., issued by CFDA dated 24-12-2018 valid till 23-12-2023. Firm has also submitted copy of Lic. No. Jin 20150040 valid till 23-11-2025. **Fusidic Acid:** Firm has submitted copy of License no. 20190399 valid till 31-12-2025.
3.	2.3.R	Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug	Submitted.

		product for which stability studies data is provided in Module 3 section 3.2.P.8.3.	
4.	3.2.S.4.2	Signed analytical procedures for both the drug substances from the drug product manufacturer shall be submitted.	Submitted.
5.	3.2.S.4.3	In analytical method verification report of both the drug substances, actual concentration correspondent to different percentages used in different parameters shall be mentioned and submitted accordingly.	Submitted.
6.	3.2.S.5	Details and COA of the reference standard/working standard used for both the drug substances shall be submitted.	Firm has submitted COAs of the working standards for both the drug substances.
7.	3.2.S.7	Justification shall be submitted for over writing the real time stability conditions in the submitted stability data sheets of Fusidic acid.	Firm has submitted new stability data sheets from manufacturer for the 03 batches of the drug substance both at real time and accelerated condition.
8.	3.2.P.2.2	• Details of the product against which pharmaceutical equivalence is performed including batch number and manufacturing date etc. shall be submitted. • Justification shall be submitted for not performing pharmaceutical equivalence against the same formulation as it is performed against Fucidin cream. • Assay results of the pharmaceutical equivalence is for one drug substance and that one substance is also not mentioned. Justification shall be submitted.	Firm has submitted new pharmaceutical equivalence against Melas H cream, Batch No. MS005H, mfg. date 09-2022 manufactured by Atco laboratories by performing quality tests (identification, minimum fill weight, assay & microbial count). Firm has submitted that pharmaceuticals equivalence against same formulation (Fucidin H) was performed mentioning both the API in assay limit but due to 5 times return of these dossier from screening desk, we have make frequent changes by opening the whole dossier, it may have happened that in place of Fucidin H cream formulation, simple Fucidin Cream containing page inserted may be placed in the dossier by mistake. Correction is made.
9.	3.2.P.5.1	Specifications has mentioned pH "where applicable". Justification shall be submitted for not providing any specification i.e. value for pH of the formulation.	Firm has submitted that since it is a non-compendial product, we searched for the innovator product. However, pH limits could not be found in innovator/reference product.
10.	3.2.P.5.3	Complete method verification studies for drug product with actual concentration correspondent to different percentages used in different parameters shall be mentioned and submitted accordingly.	Submitted.
11.	3.2.P.5.6	Justification of specifications has mentioned BP specifications. Clarification shall be submitted.	Firm has submitted that it was a typographic error. They also provided new justifications for specifications.
12.	3.2.P.6	Details and COA of the reference standard/working standard used for both the drug substances shall be submitted.	Submitted.
13.	3.2.P.8	• Stability data sheets as per decision of the Registration Board with inclusion of API lot number, batch quantity and starting date shall be submitted.	Firm has submitted new stability data sheets mentioning API lot numbers for Hydrocortisone acetate (HD0088) & Fusidic acid (21120901) and batch size of 200 tubes.

		• Pack size of the tube in which stability studies are conducted shall also be mentioned. • Documents for the procurement of API used in the development of trial batches with approval from DRAP (in case of import) shall be submitted. • Justify the value of hydrocortisone acetate in the submitted raw data sheets for calculation of assay with respect to the submitted analytical procedures. • Compliance Record of HPLC software 21CFR & audit trail reports on product testing shall be submitted. • Reference of previous approval of applications with stability study data of the firm (if any) shall be submitted.	Firm has submitted that 15gm of tube is used in stability testing. Firm has submitted copy of Form 6 No. K-32480284268 dated 07-02-2022 mentioning 130gm of Hydrocortisone acetate attested by Assistant Director, I&E, DRAP, Islamabad. Firm has also submitted copy of Form 6 No. K-54180289532 dated 12-04-2022 mentioning 500gm of Fusidic acid attested by Assistant Director, I&E, DRAP, Islamabad. Firm has also submitted clearance certificate No. E-877780288753 mentioning 500gm of Fusidic acid, B. No. 21120901 attested by Assistant Director, I&E, DRAP, Islamabad. Firm has submitted that in analytical procedures it was mistakenly written as 0.2mg/ml. Actually it is 0.1mg/ml and method verification also contains 0.1mg/ml. they further also provided calculation sheets. ***However, fee for pre-registration variation is not submitted by the firm*** Submitted. Firm has submitted that we are new DML so it is not applicable.

Decision: Approved. Registration letter will be issued after submission of fee of 30,000/- for pre-approval correction/change in registration application as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubility's, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of Fusidic acid present in BP. Firm has submitted detailed data of the drug substance related to its nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis (B. No. 21120901, mfg. date, 09-12-2021) and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies (Drug substance.)	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 24 months. Accelerated: 40˚C ± 2˚C / 75% ± 5% RH for 6 months. Batches: (20181001, 20181016 & 20181101)
	Module-III (Drug Product):	Official monograph of the applied formulation is present in USP. Firm has submitted detail of the drug product including its description, composition, manufacturer, description of manufacturing process and controls, process validation protocol, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.

	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence is established against the brand that is Fucidin Cream manufactured by LEO by performing quality tests (identification, pH, minimum fill weight, assay & microbial count).
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.

STABILITY STUDY DATA			
Manufacturer of API	Anhui Haikang Pharmaceutical Co., Ltd., No. 21 Huancheng West Road Anquing Anhui China.		
API Lot No.	Not submitted.		
Description of Pack (Container closure system)	Aluminum tube packed in unit carton with leaflet.		
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 06 months Accelerated: 06 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	CR-01	CR-02	CR-03
Batch Size	200 tubes	200 tubes	200 tubes
Manufacturing Date	08-2022	08-2022	08-2022
Date of Initiation			
No. of Batches	03		

REQUEST OF EXEMPTION FROM ON SITE INSPECTION		
The firm has requested for Exemption from On-site Investigation of their submitted stability data and provided the following documents in conjunction with the checklist approved by the Registration Board.		
Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Not submitted.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of Form-6 N0. K-54180289532 mentioning 500 grams of Fusidic Acid EP attested by Assistant Director I&E, DRAP, Islamabad dated 12-04-2022. Firm has also submitted copy of commercial invoice No. WD202201040 dated 03-01-2022 mentioning 500 grams of Fusidic Acid EP with B. No. 21120901, mfg. date, 09-12-2021. However, invoice is not attested by DRAP.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not Submitted

6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks by the Evaluator:

Sr. No.	Section	Observation	Reply by the firm
1.	1.1	Fee slip submitted has mentioned Fusidic acid 10mg while the application is for 20mg. justification shall be submitted.	Firm has submitted that 10mg is written wrongly by accountant and on covering letter and dossier it is correctly written as 20mg or 2%.
2.	1.6.5	Complete information in this section shall be submitted.	Firm has submitted complete details of this section including the names, addresses and vendor qualification of both the drug substances.
3.	1.6.5	Valid copy of GMP certificate of the drug substance manufacturer shall be submitted.	Firm has submitted copy of License no. 20190399 valid till 31-12-2025.
4.	2.3.R	Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3.	Submitted.
5.	3.2.S.4.2	Signed analytical procedures for the drug substance from the drug product manufacturer shall be submitted.	Submitted.
6.	3.2.S.4.3	In analytical method verification report, actual concentration correspondent to different percentages used in different parameters shall be mentioned and submitted accordingly.	Submitted.
7.	3.2.S.5	• Details and COA of the reference standard/working standard used shall be submitted.	Submitted.
8.	3.2.S.7	• Justification shall be submitted for over writing the real time stability conditions in the submitted stability data sheets.	Firm has submitted new stability data sheets from manufacturer for the 03 batches of the drug substance both at real time and accelerated condition.
9.	3.2.P.2.2	Details of the product against which pharmaceutical equivalence is performed including batch number and manufacturing date etc. shall besubmitted.	Firm has submitted new pharmaceutical equivalence against Melas cream, Batch No. MS005H, mfg. date 09-2022 manufactured by Atco laboratories by performing quality tests (identification, minimum fill weight, assay & microbial count).
10.	3.2.P.5.2	Signed analytical procedures for the drug substance from the drug product manufacturer shall be submitted.	Submitted.
11.	3.2.P.5.2	Complete method verification studies for drug product with actual concentration correspondent to different percentages used in different parameters shall be mentioned and submitted accordingly.	Submitted.
12.	3.2.P.6	• Details and COA of the reference standard/working standard used shall be submitted.	Submitted.
13.	3.2.P.8	• Stability data sheets as per decision of the Registration Board with inclusion of	Firm has submitted new stability data sheets mentioning API lot numbers for Fusidic acid (21120901) and batch size of 200 tubes.

		API lot number, batch quantity and starting date shall be submitted. • Pack size of the tube in which stability studies are conducted shall also be mentioned. • Documents for the procurement of API used in the development of trial batches with approval from DRAP (in case of import) shall be submitted. • Raw data sheets for calculation of assay test at each time point for both accelerated as well as real time shall be submitted as per USP monograph. • Compliance Record of HPLC software 21CFR & audit trail reports on product testing shall be submitted. • Reference of previous approval of applications with stability study data of the firm (if any) shall be submitted.	Firm has submitted that 15gm of tube is used in stability testing. Firm has submitted copy of Form 6 No. K-54180289532 dated 12-04-2022 mentioning 500gm of Fusidic acid attested by Assistant Director, I&E, DRAP, Islamabad. They have also submitted clearance certificate No. E-877780288753 dated 18-04-2023. Submitted. Submitted. Firm has submitted that we are new DML so it is not applicable.

Decision: Approved. Registration letter will be issued after submission of fee of 30,000/- for pre-approval correction/change in the applied formulation i.e. 20mg instead of 10mg as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

521.	Name, address of Applicant / Marketing Authorization Holder	**M/s Akhsah Pharmaceuticals (Pvt.) Ltd., Plot No. 47, Street No. S-10, RCCI Industrial Estate, Rawat.**
	Name, address of Manufacturing site.	M/s Akhsah Pharmaceuticals (Pvt.) Ltd., Plot No. 47, Street No. S-10, RCCI Industrial Estate, Rawat.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	New License issued on 14-09-2021.
	Evidence of approval of manufacturing facility	Cream/Ointment section (general) approved vide No. F 1-7/2012-Lic dated 14-09-2021.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 19991; dated 11/08/2023.
	Details of fee submitted	PKR 30,000/-: vide slip No. 20518713 dated 09/08/2023.
	The proposed proprietary name / brand name	**Visone 0.1% Cream.**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Gram Contains: Betamethasone as valerate..... 1mg
	Pharmaceutical form of applied drug	Topical Cream.

	Pharmacotherapeutic Group of (API)	Corticosteroid.
	Reference to Finished product specifications	USP specifications.
	Proposed Pack size	5gm and 15gm.
	Proposed unit price	As per SRO.
	The status in reference regulatory authorities	Betamethasone valerate eq. to 0.1% base, USFDA approved.
	For generic drugs (me-too status)	Betnovate cream, GSK Pakistan, Reg. No. 000256.
	Name and address of API manufacturer.	M/s Envee Drugs (Pvt.) Ltd., N. H. No. 8, Dumral-387 355, Ta. Nadiad, Dist; Kheda, Gujrat, India.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubility's, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of Betamethasone valerate is present in USP. Firm has submitted detailed data of the drug substance related to its nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis (B. No. EV/BV-439/21, mfg. date, 23-02-2022) and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies (Drug substance.)	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 48 months. Accelerated: 40˚C±2˚C / 75% ± 5% RH for 6 months. Batches: (EV/00808, EV/06308 & EV/10507)
	Module-III (Drug Product):	Official monograph of the applied formulation is present in USP. Firm has submitted detail of the drug product including its description, composition, manufacturer, description of manufacturing process and controls, process validation protocol, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence is established against the brand that is Betnovate Cream manufactured by GSK Pakistan by performing quality tests for assay only.
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.

REQUEST OF EXEMPTION FROM ON SITE INSPECTION

The firm has requested for Exemption from On-site Investigation of their submitted stability data and provided the following documents in conjunction with the checklist approved by the Registration Board.

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Not submitted.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of clearance certificate No. E-535080283149 mentioning 35 grams of Betamethasone Valerate USP with Batch No. EV/BV-257/21, manufacturing date of 06-11-2021 attested by Assistant Director I&E, DRAP, Islamabad dated 31-03-2021. ***However, in 3.2.S.4.4 batch number of the drug substance mentioned is B. No. EV/BV-439/21, mfg. date, 23-02-2022.***
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks by the Evaluator:

Sr. No.	Section	Observation	Reply by the firm
1.	1.6.5	Complete information in this section shall be submitted.	Firm has submitted complete details of this section including the names, addresses and vendor qualification of the drug substance.
2.	1.6.5	Valid copy of GMP certificate of the drug substance manufacturer shall be submitted.	Firm has submitted copy of GMP certificate No. S-GMP & GLP/21072790 valid from 07-07-2021 to 06-07-2023.

			Firm has also submitted copy of renewal of license to manufacture till 25-02-2023. ***Both GMP certificate and License are not valid.***
3.	2.3.R	Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3.	Submitted.
4.	3.2.S.4.2	Signed analytical procedures for the drug substance from the drug product manufacturer shall be submitted.	Submitted.
5.	3.2.S.4.3	• In analytical method verificationreport, actual concentration correspondent to different percentagesused in different parameters shall be mentioned and submitted accordingly. • Analytical method verification report for both drug substance and drug product have same results. Analytical record for both the drug substance and drug product shall be submitted.	Submitted.
6.	3.2.P.2.2	• Details of the product against which pharmaceutical equivalence is performed including batch number and manufacturing date etc. shall be submitted. • Justification shall be submitted for performing only assay test in pharmaceutical equivalence studies.	Firm has submitted that complete testing of pharmaceutical equivalence was submitted in Module 2 by mistake. They now once again submitted PE studies against Betnovate Cream, Batch No. 4F3G, mfg. date 06-2023 manufactured by M/s GSK Pakistan by performing description, identification, assay, microbial count etc.
7.	3.2.P.5.2	Signed analytical procedures for the drug substance from the drug product manufacturer shall be submitted.	Submitted.
8.	3.2.P.8	• Stability data sheets as per decision of the Registration Board with inclusion of API lot number, batch quantity and starting date shall be submitted. • Pack size of the tube in which stability studies are conducted shall also be mentioned. • Documents for the procurement of API used in the development of trial batches with approval from DRAP (in case of import) shall be submitted. • Submitted chromatograms does not reflect any wave length. Justification shall be submitted. • Submitted chromatograms have also mentioned 1% cream. Justification shall be submitted. • Justification shall be submitted regarding the injection volume as USP has mentioned 100µl while the	Firm has submitted new stability data sheets mentioning API lot numbers for Betamethasone (EV/BV-439/21) and batch size of 200 tubes. Firm has submitted that 10gm of tube is used in stability testing. Firm has submitted copy of For-6 No. K-217880286824 dated 18-03-2022 mentioning betamethasone valerate USP from Envee Drugs pvt. Ltd., India attested by Assistant Director I&E, DRAP, Islamabad. Firm has submitted that they perform studies on Perkin elmer HPLC Software which by default did not print the given wavelength. Now we have changed it to water HPLC (Empower software) and also submitted one time chromatograms. Firm has submitted that we named the folder 1% that is why 1% also appears in the chromatograms. They further submitted that chromatograms also mentioned visone cream 0.1% several times. Firm has submitted that we followed USP 29 which mentioned inj. Volume of 10µl.

		submitted chromatograms have used 10 µl. • Raw data sheets for calculation of assay test at each time point for both accelerated as well as real time shall be submitted as per USP monograph. • Justification shall be submitted for not performing system suitability studies. • Compliance Record of HPLC software 21CFR & audit trail reports on product testing shall be submitted.	Submitted. Firm has submitted that they followed USP 29 monograph, where system suitability is not mentioned. But still they have performed %RSD which can be seen in the calculation sheets. They further submitted that now they perform SST according to USP 43 and in all the remaining time points they will perform analysis as per USP43. Firm has submitted that we are new DML so it is not applicable.
Decision: Deferred for following; • **Submission of valid copy of GMP certificate of the drug substance manufacturer issued by relevant/concerned regulatory authority.** • **Clarification regarding the API lot number shall be submitted as in section 3.2.S.4.4 and 3.2.P.8 (Stability data sheets) it is B. No. EV/BV-439/21, mfg. date, 23-02-2022, while in the clearance certificate of drug substance it is EV/BV-257/21 with manufacturing date of 06-11-2021.**		

Case No. 02; Registration applications of locally manufactured Human cases of contract manufacturing on form 5F.

522.	Name, address of Applicant / Marketing Authorization Holder	**M/s Onyx Pharmaceuticals, 30-A, Industrial Estate, Mansehra.**

	Evidence of approval of manufacturing facility	Copy of letter No. F. 1-12/89-Lic (Vol-II) dated 23-07-2012 mentioning ampoule (general) section is submitted by the firm.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 1731; dated 18-01-2023.
	Details of fee submitted	PKR 75,000/-: vide slip No. 0288763521 dated 15-11-2022.
	The proposed proprietary name / brand name	**Ketonex 30mg Injection.**

	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each ampoule contains: Ketorolac Tromethamine 30mg
	Pharmacotherapeutic Group of (API)	NSAID
	Pharmaceutical form of applied drug	Clear colorless liquid filled in glass ampoule
	Reference to Finished product specifications	USP specifications.
	Proposed Pack size	1ml x 5's.
	Proposed unit price	As per SRO.
	The status in reference regulatory authorities	US FDA approved.
	For generic drugs (me-too status)	Tekac 30mg/ml Injection, Sami Pharmaceuticals, Reg. No. 092855.
	Name and address of API manufacturer.	M/s. Saurav Chemicals Limited 370 Industrial Area, Phase II Panchkula, Haryana, 134109 – India. **Manufacturing site address:** M/s. Saurav Chemicals Limited, Bhagwanpura, Derabassi – Barwala Road, Mohali District Punjab India.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance. The firm has summarized information of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation/verification of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Module III (Drug Substance)	Firm has submitted detailed data for drug substance related to its nomenclature, structure, general properties, solubility, physical form, manufacturer, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis (B. No. KTM180021, Mfg. date 15-08-18) and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies (Drug substance)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40 ^{O} ± 2 ^{O} C /75% ± 5% RH for 6 months. The real time stability data is conducted at 30^{O}C ± 2 ^{O} C / 65% ± 5% RH for 60 months. (Batch No. KTM06130016, KTM06130017 & KTM06130018)
	Module-III (Drug Product):	Firm has submitted detail of the drug product including its description and composition, pharmaceutical

		development, manufacturer, description of manufacturing process and controls, specifications, analytical procedure, verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.		
	Pharmaceutical equivalence and comparative dissolution profile	Firm has performed pharmaceutical equivalence against the product Toradol Ampoule 30mg, B. No. C2436, Mfg. date 01, 2020 by Barrett Hodgson by performing quality tests (Description, Identification, pH, Assay, Sterility, Bacterial endotoxin.)		
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.		
STABILITY STUDY DATA				
Manufacturer of API		M/s. Saurav Chemicals Limited 370 Industrial Area, Phase II Panchkula, Haryana, 134109 – India. Manufacturing site address: M/s. Saurav Chemicals Limited, Bhagwanpura, Derabassi – Barwala Road, Mohali District Punjab India.		
API Lot No.		KTM180021.		
Description of Pack (Container closure system)		Multi-colour unit carton having ALU/PVC tray containing 5 Glass ampoules filled with almost colorless to slight yellow sterile solution.

Date of Initiation		26-10-2019	26-10-2019	26-10-2019
No. of Batches		03		
Administrative Portion				
1.	Reference of previous approval of applications with stability study data of the firm (if any)	NA		
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. Drugs (3) Pb. 2021/3124 dated 25-06-2021 for M/s. Saurav Chemicals Limited, Bhagwanpura, Derabassi – Barwala Road, Mohali District Punjab India issued by Food & Drugs Administration, Punjab is submitted by the firm. GMP certificate is valid till 25-06-2023.		
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of invoice No. SCL/2019-20/087 dated 25-07-2019 mentioning 15kg of ketorolac Tromethamine USP with B. No. KTM180021 attested by Assistant Director I&E, DRAP, Islamabad dated 02-08-2019.		

4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not submitted.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted.

Remarks of Evaluator:

Sr. No.	Section Number	Observations	Firm's Response by the firm
1.	1.4.3	• Valid copy of GMP certificate of the contract acceptor shall be submitted. • Valid copy of GMP certificate/last inspection report and DML of the applicant shall be submitted as submitted DML is from 15-06-2011.	
2.	1.6.5	Valid GMP certificate of API manufacturer issued by regulatory body of country shall be submitted.	
3.	2.3	Table for literature references has mentioned USP for drug substance. Revised table for literature references with correct information regarding the drug substance with applicable fee shall be submitted.	
4.	3.2.S.4.3	Analytical method validation studies performed by the drug substance manufacturer for assay test on HPLC has mentioned run time of 40 minutes. While the submitted chromatograms by the drug product manufacturer for method verification has run time of 12.5 minutes only. Justification shall be submitted.	
5.	3.2.P.1	Qualitative composition of the applied formulation is different from the innovator product. Innovator has used Ethanol while the applied formulation has no ethanol. Applied formulation has used Citric acid anhydrous as preservative while the innovator has no citric acid. Justification shall be submitted.	
6.	3.2. P.2.3	Justification of not performing terminal sterilization of the drug product shall be submitted.	
7.	3.2.P.5.2	Analytical procedures submitted by the firm has mentioned 0.06mg/ml ketorolac Tromethamine concentration for both standard and sample preparation. While USP has mentioned 0.05mg/ml ketorolac Tromethamine concentration for both standard and sample preparation. Justification shall be submitted.	
8.	3.2.P.8	• Analytical procedures submitted by the finished product manufacturer as well as USP has mentioned injection volume of 100µl while the submitted chromatograms for the stability data reflects 20µl injection volume. • Compliance Record of HPLC software 21CFR & audit trail reports on product testing shall be submitted.	

Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings within six months.

		justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies (Drug substance.)	Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 24 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: (140901, 141001 & 141101)
	Module-III (Drug Product):	The firm has submitted detail of the drug product including its description and composition, formulation development, manufacturer, description of manufacturing process and controls, batch formula, specifications, analytical procedure and its validation studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence is established against Anplag 90mg tablets, Batch No. 0N118, Mfg. date 12-2020 manufactured by PharmEvo by performing quality tests (Identification, Assay, Dissolution). CDP is performed in four BCS media across the physiological pH range i.e. 0.1 N HCl, pH 4.5 Acetate buffer, pH 6.8 Phosphate buffer and Tween 80 in water. The values are in the acceptable range.
	Analytical method validation/verification of product	Method Validation studies have submitted including linearity, range, accuracy, precision, specificity.

STABILITY STUDY DATA			
Manufacturer of API	Nantong Chanyoo Pharmatech Co. Ltd., No. 2 Tonghai Si Road, Rudong Coastal Economic Development Zone, Nantong, Jiangsu Province China.		
API Lot No.	RD-TG-201911211.		
Description of Pack (Container closure system)	Alu-Alu blister of 2 x 10's further packed in a bleech card unit carton along with leaflet.		
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 06 months Accelerated: 06 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	T-01	T-02	T-03
Batch Size	1200 tablets	1200 tablets	1200 tablets
Manufacturing Date	04-2021	04-2021	04-2021
Date of Initiation	21-04-2021	21-04-2021	21-04-2021
No. of Batches	03		

REQUEST OF EXEMPTION FROM ON SITE INSPECTION		
The firm has requested for Exemption from On-site Investigation of their submitted stability data and provided the following documents in conjunction with the checklist approved by the Registration Board.		
Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted

2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate for M/s Nantong Chanyoo Pharmatech Co., Ltd., issued by Nantong chemical and Medical industry association valid till 05-05-2022.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice number CY121078 dated 04-03-2021 mentioning 0.5kg quantity of ticagrelor, Batch No. RD-TG-202101041 attested by Assistant Director DRAP, Peshawar vide No. 812/12-03-2021 dated 12-03-2021.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks OF Evaluator:

Sr. No.	Section	Observations.	Response by the firm.
1.	1.1	Form 5F shall be from the applicant instead of the contract acceptor with complete address of the applicant.	
2.	1.3.4	• Valid copies of DML of both the applicant as well as the contract acceptor shall be submitted. • Valid copies of GMP certificate/last inspection reports conducted within last three years of both the applicant as well as the contract acceptor shall be submitted.	
3.	1.5.5	Revise Pharmacotherapeutic Group to Platelet aggregation inhibitors excl. heparin as per WHO ATC code with submission of applicable fee.	
4.	1.5.6	This section has mentioned innovator specifications while the official monograph is available in BP. Clarification is required.	
5.	1.6.5	Valid copy of GMP certificate of the drug substance manufacturer issued by the relevant regulatory authority shall be submitted.	
6.	2..3	Table for literature references has not mentioned any pharmacopoeia neither for the drug substance nor for the drug product while the official monograph for both the drug substance as well as drug product is available in BP. Justification shall be submitted.	
7.	3.2.S.2 & 3.2.S.3	Clear and readable copy of the information related to the drug substance shall be submitted. From section 3.2.S.2.2 to 3.2.S.3 as provided one is not in readable form.	
8.	3.2.S.4.1	• Specification of the drug substance by the finished product manufacturer shall be submitted. • Specifications provided by the drug substance manufacturer for the drug substance has assay limit of 98% - 102% while BP has mentioned 97.5% - 102%. Clarification shall be submitted.	
9.	3.2.S.4.2	Analytical procedures for the drug substance from both the drug substance manufacturer and finished product manufacturer shall be submitted.	
10.	3.2.S.4.4	The reference product literature specifies polymorphic form II for ticagrelor tablets whereas no such declaration has been made in the COA of drug substance.	
11.	3.2.S.4.5	Justification of specifications shall be submitted drug substance.	

	12.	3.2.S.5	CoA of primary / secondary reference standard including source and lot number shall be submitted.		
	13.	3.2.P.2.2	• Justification for not performing CDP against the innovator product. • Justification shall be submitted for not performing content uniformity test in the pharmaceutical equivalence studies. • In pharmaceutical equivalence dissolution studies of the finished trial batch shall be submitted instead of giving the results of CDP.		
	14.	3.2.P.5.1	• This section has mentioned in-house specifications while the official monograph of the applied formulation is available in BP. • Dissolution limits provided by the drug product manufacturer (NLT 75% after 75 minutes) are different from official monograph (Q = 70% after 45 minutes). Justification shall be submitted.		
	15.	3.2.P.5.2	Analytical procedures for the finished product shall be submitted.		
	16.		• Stability data sheets as per decision of 293rd meeting of Registration Board with inclusion of API lot number shall be submitted. • Chromatograms submitted does not depicts any wavelength applied. Justification shall be submitted. • Documents for the procurement of API with approval from DRAP (in case of import) shall be submitted. • Reference of previous approval of applications with stability study data shall be submitted. • Compliance Record of HPLC software 21CFR & audit trail reports on product testing shall be submitted. • Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) shall be submitted.		
Decision: Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.					

Case No. 03; Registration applications of locally manufactured Human deferred cases on form 5F.

524.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Fynk Pharmaceuticals (Pvt.) Ltd., 19 km, G.T. Road, Kalashah Kaku, Tehsil Ferozwala, District Sheikhupura.**
	Name, address of Manufacturing site.	M/s Fynk Pharmaceuticals (Pvt.) Ltd., 19 km, G.T. Road, Kalashah Kaku, Tehsil Ferozwala, District Sheikhupura.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	Firm has submitted copy of GMP certificate No. 198/2022-DRAP (AD-9405944056-789) dated 17-11-2022 issued on the basis of inspection 14/11/2022.
	Evidence of approval of manufacturing facility	Dry powder injectable (Carbapenem). – New section approved vide letter No. F. 1-63/84-Lic (Vol III) dated 27-12-2021 is submitted.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)

	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No 7691 dated 17-03-2023.
	Details of fee submitted	PKR 30,000/- vide slip No. 5617000971 Dated 21-02-2023.
	The proposed proprietary name / brand name	**Morefen 500mg Dry Powder injection.**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Vial contains: Meropenem as trihydrate 500mg
	Pharmacotherapeutic Group of (API)	Carbapenem.
	Pharmaceutical form of applied drug	Powder for injection.
	Reference to Finished product specifications	USP specifications.
	Proposed Pack size	1's (one vial packed with 10ml of WFI).
	Proposed unit price	As per SRO.
	The status in reference regulatory authorities	Merrem 500mg & 1gm injection by Pfizer Injectable, USFDA approved.
	For generic drugs (me-too status)	Meronem IV 500mg Injection, Pfizer Pakistan, Reg. No. 096203.
	Name and address of API manufacturer.	Vartika Chemicals & Pharmaceuticals Pvt. Ltd., G1-567, RIICO Industrial Area, Khushkhera, Bhiwadi – 301019 Dist. Bhiwadi (Rajasthan), India.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detail of the drug substance including its nomenclature, structure, general properties, solubility, manufacturers, description of manufacturing process and controls, tests for impurity & related substances, specifications, analytical procedures and its verification, batch analysis (MRPS-0422032) and justification of specification, working standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 48 months. Batch No. MRPS-0218002, MRPS-0218003 & MRPS-0218004.

	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted pharmaceutical equivalence of their product against the Meroget 500mg injection, batch No. 9210407003, mfg. date 04-2021manufactured by Getz pharma by performing quality test pH, Loss on Drying, Assay of Meropenem, assay of sodium content and sterility.
	Analytical method validation/verification of product	Firm has submitted analytical method validation study reports for drug substance as well as drug product.

STABILITY STUDY DATA

Manufacturer of API	Vartika Chemicals & Pharmaceuticals Pvt. Ltd., G1-567, RIICO Industrial Area, Khushkhera, Bhiwadi – 301019 Dist. Bhiwadi (Rajasthan), India.

No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP Certificate No. DC/A-I/2020/1517 dated 09-09-2020 issued by Drug Control Organization, Rajasthan, Jaipur. Valid till 11-04-2022.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not readable.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not submitted.

6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not submitted.

Remarks of Evaluator:

Sr. No.	Section	Observation	Reply by the firm
1.		First page of Form 5F is not provided.	Submitted.
2.	1.6.5	Valid copy of GMP certificate of drug substance manufacturer issued by the concerned/relevant regulatory authority shall be submitted.	Firm has submitted copy of GMP certificate No. DC/A-4/GMP/2022/2804 dated 07-09-2022 issued by Food Safety and Drugs Control Commissionerate (Drugs Control Wing) Rajasthan, India valid till 08-09-2023.
3.	2.3	• Revised table for literature references with correct information regarding the drug substance and finished product with applicable fee shall be submitted. • Justify the actual quantity/vial against mentioned in executed BMR's the potency of drug substance.	Firm has provided corrected information with submission of 7500/- fee vide slip No. 01832409787 dated 10-07-2023. Firm has submitted that actual weight per vial was calculated after adjustment of assay and factor. Factor = 1.140 Potency = 83.56% 500 x 1.140/83.56 x 100 = 682.14
4.	3.2.S.4.1	Specification of the drug substance submitted by the drug substance manufacturer are for Ampicillin sodium instead of Meropenem. Justification shall be submitted.	Firm has submitted that during compilation of dossier, specifications for ampicillin were attached instead of Meropenem. They also submitted new specification for Meropenem.
5.	3.2.S.4.5	Justification of specification for the drug substance is for Doxycycline USP. Justify?	Firm has submitted that it was typo error and they also attached justification of specifications for Meropenem.
6.	3.2.S.7	• Clear and readable copies of the stability data sheets for drug substance shall be submitted. • Stability study data for the drug substance submitted is for Meropenem USP only. Justification shall be submitted. • Stability data sheets for the drug substance has also not mentioned sodium content. Justify. • Real time stability data is only for 09 months. Complete real time stability data shall be submitted.	Submitted. Firm has submitted that stability for drug substance is Meropenem trihydrate blended with sodium carbonate as evident from the specifications. Drug substance manufacturer writes product name as per USP monograph i.e. Meropenem USP Sterile. Real time stability study data for 48 months is submitted by the firm.
7.	3.2.P.1	Justify the proposed quantity/vial against the potency limit of drug substance declared in 3.2.S.4.1.	Firm has submitted that actual weight per vial was calculated after adjustment of assay and factor. Factor = 1.140 Potency = 83.56% 500 x 1.140/83.56 x 100 = 682.14
8.	3.2.P.2.2	• Justification shall be submitted for not performing pharmaceutical equivalence against the innovator product.	Firm has submitted that they have also performed pharmaceutical equillance studies against the Meronem injection ofM/s Pfizer Pakistan limited.

			• Content uniformity test and particulate matter tests are not performed in the pharmaceutical equivalence studies. Justify?	They also provided the new pharmaceutical equivalence studies of their product against the Meronem 500mg injection with batch No. 5B22H31, mfg. date 04-2022 by performing quality tests including pH, water content, uniformity of dosage unit, particulate matter, Assay of Meropenem, assay of sodium content and sterility.
	9.	3.2.P.8	• Evidence of availability of atomic absorption spectroscopy shall be submitted. • Clear and readable copy of the clearance certificate for import of API shall be submitted. • Raw data sheets for calculation of assay of Meropenem and sodium content at each time interval with calculation formula shall be submitted. • Reference of previous approval of applications with stability study data of the firm (if any) shall be submitted. • Compliance Record of HPLC software 21CFR & audit trail reports on product testing shall be submitted. • Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) shall be submitted.	Firm has submitted that they have attached commercial invoice for atomic absorption. However, no such invoice is attached. Firm has submitted copy of clearance certificate No. E-1393520227361 dated 07-06-2022 mentioning 0.50 grams of Meropenem with batch number of MRPS-0422032, mfg. date 30-Apr-2022. Firm has submitted that in DRB 323rd meeting their two products i.e. Faxcil 250mg & 500. Submitted. Submitted.

Decision of 330th meeting of Registration Board: Deferred for following;

- Evidence of availability of atomic absorption spectroscopy shall be submitted.
- Raw data sheets for calculation of assay of Meropenem and sodium content at each time interval with calculation formula shall be submitted.
- Justification shall be submitted regarding the quantity of drug substance imported i.e 0.5grams vide clearance certificate No. E-1393520227361 dated 07-06-2022 against the manufactured six trial batches of two different strengths of 500mg and 1gm with each trial of 300 vials.

Reply submitted by the firm:

Sr. No.	Reason for deferment	Reply submitted by the firm
1.	Evidence of availability of atomic absorption spectroscopy shall be submitted.	Firm has submitted copy of invoice No. 11/772 dated 03-11-2021 for purchase of Atomic Absorption thermos model ICE-3300.
2.	Raw data sheets for calculation of assay of Meropenem and sodium content at each time interval with calculation formula shall be submitted.	Firm has submitted raw data sheets for calculations of assay and sodium content.
3.	Justification shall be submitted regarding the quantity of drug substance imported i.e 0.5grams vide clearance certificate No. E-1393520227361 dated 07-06-2022 against	Firm has submitted a loan letter from M/s Stallion pharma wherein they have taken following API on loan for development purpose;

		the manufactured six trial batches of two different strengths of 500mg and 1gm with each trial of 300 vials.	Meropenem Trihydrate, Imipenem and Cilastatin and Potassium Clavulanate with Syloid (1:1) Firm has also submitted copy of clearance certificate No. E-686642824781 mentioning 100kg of Meropenem Sodium Carbonate Sterile (USP Specification) with batch No. UIMRPS21065, mfg.date 01-Feb-2022.	

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Remarks of Evaluator:

Sr. No.	Section	Observation	Reply by the firm
1.		First page of Form 5F is not provided.	Submitted.
2.	1.6.5	Valid copy of GMP certificate of drug substance manufacturer issued by the concerned/relevant regulatory authority shall be submitted.	Firm has submitted copy of GMP certificate No. DC/A-4/GMP/2022/2804 dated 07-09-2022 issued by Food Safety and Drugs Control Commissionerate (Drugs Control Wing) Rajasthan, India valid till 08-09-2023.
3.	2.3	• Revised table for literature references with correct information regarding the drug substance and finished product with applicable fee shall be submitted. • Justify the actual quantity/vial against mentioned in executed	Firm has provided corrected information with submission of 7500/- fee vide slip No. 01832409787 dated 10-07-2023. Firm has submitted that actual weight per vial was calculated after adjustment of assay and factor.

			BMR's the potency of drug substance.	Factor = 1.140 Potency = 83.56% 1000 x 1.140/83.56 x 100 = 1364.29	
	4.	3.2.S.4.1	Specification of the drug substance submitted by the drug substance manufacturer are for Ampicillin sodium instead of Meropenem. Justification shall be submitted.	Firm has submitted that during compilation of dossier, specifications for ampicillin were attached instead of Meropenem. They also submitted new specification for Meropenem.	
	5.	3.2.S.4.5	Justification of specification for the drug substance is for Doxycycline USP. Justify?	Firm has submitted that it was typo error and they also attached justification of specifications for Meropenem.	
	6.	3.2.S.7	• Clear and readable copies of the stability data sheets for drug substance shall be submitted. • Stability study data for the drug substance submitted is for Meropenem USP only. Justification shall be submitted. • Stability data sheets for the drug substance has also not mentioned sodium content. Justify. • Real time stability data is only for 09 months. Complete real time stability data shall be submitted.	Submitted. Firm has submitted that stability for drug substance is Meropenem trihydrate blended with sodium carbonate as evident from the specifications. Drug substance manufacturer writes product name as per USP monograph i.e. Meropenem USP Sterile. Real time stability study data for 48 months is submitted by the firm.	
	7.	3.2.P.1	Justify the proposed quantity/vial against the potency limit of drug substance declared in 3.2.S.4.1.	Firm has submitted that actual weight per vial was calculated after adjustment of assay and factor. Factor = 1.140 Potency = 83.56% 1000 x 1.140/83.56 x 100 = 1364.29	
	8.	3.2.P.2.2	• Justification shall be submitted for not performing pharmaceutical equivalence against the innovator product. • Content uniformity test and particulate matter tests are not performed in the pharmaceutical equivalence studies. Justify?	Firm has submitted that they have also performed pharmaceutical equillance studies against the Meronem injection of M/s Pfizer Pakistan limited. They also provided the new pharmaceutical equivalence studies of their product against the Meronem 500mg injection with batch No. 5B22H31, mfg. date 04-2022 by performing quality tests including pH, water content, uniformity of dosage unit, particulate matter, Assay of Meropenem, assay of sodium content and sterility.	
	9.	3.2.P.8	• Evidence of availability of atomic absorption spectroscopy shall be submitted. • Clear and readable copy of the clearance certificate for import of API shall be submitted.	Firm has submitted that they have attached commercial invoice for atomic absorption. However, no such invoice is attached. Firm has submitted copy of clearance certificate No. E-1393520227361 dated 07-06-2022 mentioning 0.50 grams of Meropenem with batch	

			• Raw data sheets for calculation of assay of Meropenem and sodium content at each time interval with calculation formula shall be submitted. • Reference of previous approval of applications with stability study data of the firm (if any) shall be submitted. • Compliance Record of HPLC software 21CFR & audit trail reports on product testing shall be submitted. • Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) shall be submitted.	number of MRPS-0422032, mfg. date 30-Apr-2022. However, the actual quantity used in three trial batches is much more than the imported. Not submitted. Firm has submitted that in DRB 323rd meeting their two products i.e. Faxcil 250mg & 500. Submitted. Submitted.	

Decision of 330th meeting of Registration Board: Deferred for following;

- Evidence of availability of atomic absorption spectroscopy shall be submitted.
- Raw data sheets for calculation of assay of Meropenem and sodium content at each time interval with calculation formula shall be submitted.
- Justification shall be submitted regarding the quantity of drug substance imported i.e 0.5grams vide clearance certificate No. E-1393520227361 dated 07-06-2022 against the manufactured six trial batches of two different strengths of 500mg and 1gm with each trial of 300 vials.

Reply submitted by the firm:

Sr. No.	Reason for deferment	Reply submitted by the firm
1.	Evidence of availability of atomic absorption spectroscopy shall be submitted.	Firm has submitted copy of invoice No. 11/772 dated 03-11-2021 for purchase of Atomic Absorption thermos model ICE-3300.
2.	Raw data sheets for calculation of assay of Meropenem and sodium content at each time interval with calculation formula shall be submitted.	Firm has submitted raw data sheets for calculations of assay and sodium content.
3.	Justification shall be submitted regarding the quantity of drug substance imported i.e 0.5grams vide clearance certificate No. E-1393520227361 dated 07-06-2022 against the manufactured six trial batches of two different strengths of 500mg and 1gm with each trial of 300 vials.	Firm has submitted a loan letter from M/s Stallion pharma wherein they have taken following API on loan for development purpose; Meropenem Trihydrate, Imipenem and Cilastatin and Potassium Clavulanate with Syloid (1:1) Firm has also submitted copy of clearance certificate No. E-686642824781 mentioning 100kg of Meropenem Sodium Carbonate Sterile (USP Specification) with batch No. UIMRPS21065, mfg. date 01-Feb-2022.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

526.	Name, address of Applicant / Marketing Authorization Holder	**M/s Fynk Pharmaceuticals (Pvt.) Ltd., 19 km, G.T. Road, Kalashah Kaku, Tehsil Ferozwala, District Sheikhupura.**

	Name, address of Manufacturing site.	M/s Fynk Pharmaceuticals (Pvt.) Ltd., 19 km, G.T. Road, Kalashah Kaku, Tehsil Ferozwala, District Sheikhupura.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	Firm has submitted copy of GMP certificate No. 198/2022-DRAP (AD-9405944056-789) dated 17-11-2022 issued on the basis of inspection 14/11/2022.
	Evidence of approval of manufacturing facility	Capsule (Penicillin) – New section approved vide letter No. F. 1-63/84-Lic (Vol III) dated 27-12-2021 is submitted.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No 5263 dated 23-02-2023.
	Details of fee submitted	PKR 30,000/- vide slip No. 915463761131 Dated 06-01-2023.
	The proposed proprietary name / brand name	**Ampiwell 250mg Capsule.**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Capsule contains: Ampicillin as trihydrate 250mg
	Pharmacotherapeutic Group of (API)	Beta-Lactam Antibacterial, Penicillin.
	Pharmaceutical form of applied drug	Oral capsule.
	Reference to Finished product specifications	BP specifications.
	Proposed Pack size	20 capsules.
	Proposed unit price	As per SRO.
	The status in reference regulatory authorities	Ampicillin Capsules BP 250 mg, Crescent Pharma Limited, MHRA approved.
	For generic drugs (me-too status)	Penbritin 250mg Capsule, GSK Pakistan, Reg. No. 000188.
	Name and address of API manufacturer.	M/s Pharmagen Limited, Kot Nabi buksh wala, 34 K.M. Ferozpur Road, Lahore. Copy of GMP certificate No. 06/2019-DRAP (AD/607409-530) dated 11-01-2019 on the basis of inspection conducted on 08-01-2019 is submitted.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detail of the drug substance including its nomenclature, structure, general properties, solubility, manufacturers, description of manufacturing process and

		controls, specifications, analytical procedures and its verification, batch analysis (B. No. 00003/093/2021, mfg. date 11-2021) and justification of specification, working standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability data sheets for the drug substance. However, the stability data sheets are not in readable form. B. No. 00003/001/2018, 00003/002/2018 & 00003/003/2018,
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted comparative dissolution of their applied formulation with Penbritin 250mg capsule with B. No. IPBAB in three different mediums of pH 1.2, 4.5 & 6.8. values of the F2 are in acceptable range. Firm has submitted pharmaceutical equivalence of their product against the Penbritin 250mg capsule by performing quality tests od identification, average filled weight, dissolution and assay.
	Analytical method validation/verification of product	Firm has submitted analytical method validation study reports for drug substance as well as drug product.

STABILITY STUDY DATA			
Manufacturer of API	M/s Pharmagen Limited, Kot Nabi buksh wala, 34 K.M. Ferozpur Road, Lahore.		
API Lot No.	00003/093/2021.		
Description of Pack (Container closure system)	Almost white granular powder filled in purple and white capsule packed in printed Alu - Alu blister of 20 capsules further packed in unit carton.		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	A	B	C
Batch Size	800 Capsules	800 Capsules	800 Capsules
Manufacturing Date	09-2022	09-2022	09-2022
Date of Initiation	09-02-2022	09-02-2022	09-02-2022
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted.

2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. 06/2019-DRAP (AD/607409-530) dated 11-01-2019 on the basis of inspection conducted on 08-01-2019 is submitted.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of Proforma invoice No. PL/P-INV/HO/866 dated 03-01-2022 wherein they have purchased 1kg of Ampicillin trihydrate from M/s Pharmagen Limited. However, the invoice has not mentioned any batch number and manufacturing date of the drug substance.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted.

Remarks of Evaluator:

Sr. No.	Section	Observation	Response by the firm
1.	1.6.5	Valid copy of GMP certificate of the drug substance manufacturer shall be submitted.	Firm has submitted copy of GMP certificate No. 129/2020-DRAP (AD/1998630-530) dated 02-09-2020 issued on the basis of inspection conducted on 22-06-2020. GMP certificate is not within last three years.
2.	2.3	Table for literature references with correct information with applicable fee shall be submitted.	Firm has provided corrected information with submission of 7500/- fee vide slip No. 7428934818 dated 10-07-2023.
3.	3.2.S.7	Readable copies of the drug substance stability data sheets shall be submitted.	Not submitted.
4.	3.2.P.2.2	• Dissolution time is not mentioned in the pharmaceutical equivalence. Justification shall be submitted. • CDP sheets have mentioned Ampicillin sodium as drug substance. Justification shall be submitted.	Firm has submitted that dissolution time is mentioned in specifications and CDP. Firm has submitted that it was typo error and they attached updated CDP sheets. *However, in the updated CDP sheets no dissolution medium is mentioned. Furthermore, the values at different time points are completely different from that of the originally submitted.*
5.	3.2.P.5.1	Justification shall be submitted for adopting all the specifications for the finished product from BP while only dissolution test is adopted from USP.	Firm has submitted that in BP monograph of ampicillin capsule, dissolution test has not been given, so they adopted dissolution test from USP.
6.	3.2.P.8	• Proforma invoice provided by the firm has not mentioned any batch number and mfg. date. Clarify. • Reference of previous approval of applications with stability study data of the firm (if any) shall be submitted.	Firm has submitted new invoice wherein they have added batch number of the material used in trial batches. *However, the batch number mentioned in COAs and stability data sheet is (B. No. 00003/093/2021) while the new submitted*

			invoice has mentioned B. No. 00003-11/093/2021.	

Decision of 330th meeting of Registration Board: Deferred for following;

- Valid copy of GMP certificate/inspection report conducted within last three years of the drug substance manufacturer shall be submitted.
- Readable copies of the drug substance stability data sheets shall be submitted.
- Firm will perform Comparative Dissolution of their applied product with innovator product with complete details of the mediums, time points and details of the innovator product.
- Clarification regarding the API lot number as it is different in COAs, stability data sheets and submitted invoice.

Reply submitted by the firm:

Sr. No.	Reason for deferment	Reply submitted by the firm
1.	Valid copy of GMP certificate/inspection report conducted within last three years of the drug substance manufacturer shall be submitted.	Firm has submitted copy of GMP certificate No. 204/2022-DRAP (AD/159531263130-530) dated 22-11-2022 issued on the basis of inspection conducted on 18-11-2022.
2.	Readable copies of the drug substance stability data sheets shall be submitted.	Firm has submitted stability data sheets for the drug substance in readable form. B. No. 00003/001/2015, 00003/002/2015 & 00003/003/2015.
3.	Firm will perform Comparative Dissolution of their applied product with innovator product with complete details of the mediums, time points and details of the innovator product.	Firm has submitted CDP results of their applied formulation against the brand i.e. Penbritin 250mg capsules, Batch No. B. WV7H manufactured by M/s GSK Pakistan in three mediums of pH 1.2, pH 4.5 & pH 6.8. values of F_2 are in acceptable ranges.
4.	Clarification regarding the API lot number as it is different in COAs, stability data sheets and submitted invoice.	Firm has submitted a document from M/s Pharmagen pharma wherein they certified that they have supplied material with Ampicillin trihydrate, B. No. 00003-11/093/2021 to M/s Fynk Pharma. They also they also submitted copy of invoice No. 1583 mentioning the same material with batch number.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Not submitted.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not submitted.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not submitted.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not submitted.

Remarks of evaluator:

Sr. No.	Section	Observation	Reply by the firm

	1.	1.3.4	Valid copy of DML of the applicant shall be submitted.		
	2.	1.3.5	Evidence of approval of manufacturing facility/section approval from licensing authority shall be submitted.		
	3.	1.6.5	Detailed information of section 1.6.5 shall be submitted with name of the drug substance manufacturer, GMP certificate vendor qualification etc.		
	4.	2.3	• Table for literature references with correct information regarding both the drug substance and drug product with applicable fee shall be submitted. • Copies of executed BMR's shall be submitted.		
	5.	3.2.S.2 & 3.2.S.3	Detailed information of these sections shall be submitted.		
	6.	3.2.S.4.1	• Specifications of the drug substance by the drug substance manufacturer shall be submitted. • USP monograph has mentioned limits for Nitrate while the specifications provided by the drug product manufacturer has no limits for nitrate. Clarification shall be submitted.		
	7.	3.2.S.4.2	Analytical procedures for the drug substance from both drug substance manufacturer and drug product manufacturer shall be submitted.		
	8.	3.2.S.4.3	• Analytical method verification of the drug substance performed by the drug product manufacturer shall be submitted. • Clarification shall be submitted regarding the exact results of the analytical method verification studies submitted by the drug product manufacturer as that of the drug substance manufacturer.		
	9.	3.2.S.4.4	• COA of the drug substance from drug product manufacturer with complete details i.e. batch number, manufacturing date, Expiry date etc. shall be submitted. • Analytical record of the drug substance shall be submitted. • Clarification shall be submitted for the COA of the drug substance provided by the drug product manufacturer as it has mentioned test date of 12-1-2018.		
	10.	3.2.P.2.2	• Pharmaceutical equivalence of the applied formulation with reference product with all the tests included in the official monograph shall be submitted. • Details of the product including name of manufacturer, manufacturing date, expiry date etc. against which PE is performed shall be submitted.		
	11.	3.2.P.5.2	• Wavelength is not mentioned in the chromatographic condition of the assay test in analytical procedure. • Calculation formula used for assay test in the analytical procedures shall be submitted.		
	12.	3.2.P.5.3	Analytical method verification studies of the finished product along with analytical record shall be submitted.		
	13.	3.2.P.8	• Stability data sheets as per decision of 293rd meeting of Registration Board with inclusion of batch size, date of initiation, API lot number shall be submitted. • Justify the standard preparation and sample preparation with respect to the submitted analytical procedure as the final concentration of both standard and sample preparation are completely different. • Justification shall be submitted regarding the submitted chromatograms as no information is available on them neither any wavelength is mentioned on them. • Stability data sheets has 35% RH in real time stability. Clarification shall be submitted. • Reference of previous approval of applications with stability study data of the firm (if any) shall be submitted.		

			• Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin shall be submitted. • Documents for the procurement of API with approval from DRAP (in case of import) shall be submitted. • Compliance Record of HPLC software 21CFR & audit trail reports on product testing shall be submitted. • Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) shall be submitted.		

Decision of 331st meeting of Registration Board:
Registration Board deferred the case for submission of reply to the above cited shortcomings.

Reply submitted by the firm:

Sr. No.	Reason for deferment.	Reply by the firm
1.	Valid copy of DML of the applicant shall be submitted.	Firm has submitted copy of DML No. 000488 with renewal date from 05-05-2021.
2.	Evidence of approval of manufacturing facility/section approval from licensing authority shall be submitted.	Firm has submitted copy of letter No. F. 2-4/98-Lic(Pt-I) dated 07-06-2022 mentioning Sterile eye ointment/Topical cream (General).
3.	Detailed information of section 1.6.5 shall be submitted with name of the drug substance manufacturer, GMP certificate vendor qualification etc.	Submitted.
4.	• Table for literature references with correct information regarding both the drug substance and drug product with applicable fee shall be submitted. • Copies of executed BMR's shall be submitted.	Firm has submitted revised table for literature references. ***However, information is not corrected in the table. Furthermore, no fee is submitted by the firm.*** Submitted.
5.	Detailed information of these sections shall be submitted.	Submitted.
6.	• Specifications of the drug substance by the drug substance manufacturer shall be submitted. • USP monograph has mentioned limits for Nitrate while the specifications provided by the drug product manufacturer has no limits for nitrate. Clarification shall be submitted.	Submitted. Firm has submitted that drug substance manufacturer has revised specifications as per USP. Therefore, it is requested to go through the CTD application process, may kindly be approval in our favor at the earliest convenience. ***No clarification is submitted by the firm regarding nitrate limits.***
7.	Analytical procedures for the drug substance from both drug substance manufacturer and drug product manufacturer shall be submitted.	Firm has submitted analytical procedures from both the drug substance manufacturer and drug product manufacturer. ***However, the analytical procedures from drug product manufacturer is different from both the USP monograph and drug substance manufacturer as the assay method used by the USP monograph and drug substance manufacturer is by HPLC while the assay method provided by the drug product manufacturer is by titration.***
8.	• Analytical method verification of the drug substance performed by the drug product manufacturer shall be submitted.	Firm has submitted updated analytical method verification studies for the drug product. ***Analytical method verification studies for drug substance not provided.*** ***No clarification is submitted by the firm against this point.***

	• Clarification shall be submitted regarding the exact results of the analytical method verification studies submitted by the drug product manufacturer as that of the drug substance manufacturer.		
9.	• COA of the drug substance from drug product manufacturer with complete details i.e. batch number, manufacturing date, Expiry date etc. shall be submitted. • Analytical record of the drug substance shall be submitted. • Clarification shall be submitted for the COA of the drug substance provided by the drug product manufacturer as it has mentioned test date of 12-1-2018.	Firm has submitted COA of the drug substance with batch number 214001015, mfg. date August 2018 and retest date of July 2023. ***Not submitted.*** Firm has submitted that date on the COA of the drug substance had been printed wrong.	
10.	• Pharmaceutical equivalence of the applied formulation with reference product with all the tests included in the official monograph shall be submitted. • Details of the product including name of manufacturer, manufacturing date, expiry date etc. against which PE is performed shall be submitted.	Firm has submitted new studies of pharmaceutical equivalence against Quench cream, batch No. 15-08-2018 manufactured by Ferozsons Laboratories Limited by performing quality tests of identification, pH, weight fill comparison and drug release.	
11.	• Wavelength is not mentioned in the chromatographic condition of the assay test in analytical procedure. • Calculation formula used for assay test in the analytical procedures shall be submitted.	Firm has submitted new analytical procedures in line with USP monograph.	
12.	Analytical method verification studies of the finished product along with analytical record shall be submitted.	Submitted.	
13.	• Stability data sheets as per decision of 293rd meeting of Registration Board with inclusion of batch size, date of initiation, API lot number shall be submitted. • Justify the standard preparation and sample preparation with respect to the submitted analytical procedure as the final concentration of both standard and sample preparation are completely different. • Justification shall be submitted regardingthe submitted chromatograms as no information is available on them neither anywavelength is mentioned on them. • Stability data sheets has 35% RH in real time stability. Clarification shall be submitted. • • Reference of previous approval of applications with stability study data of the firm (if any) shall be submitted. • Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin shall be submitted.	Firm has submitted new stability data sheetswherein they have mentioned 1kg of batch size and 214001015 as API lot number. Firm has submitted that preparation of standard and sample solution has been revised to an easy format for clear and easy understanding. ***However, no justification is submitted. In the initially submitted data both the standard solution and sample solution were completely different from each other.*** Firm has submitted that in old version of HPLC software system this information was not added in chromatograms. As per regulatory requirements, the software has been updated. The stability data after upgradation is reprinted for regulatory convenience. Firm has submitted that stability of the product had been conducted at 65% ± 5% RH. By mistake the results of the stability were compiled on the stability sheets of eye drops. ***Not submitted.*** Firm has submitted copy of GMP certificate No. 6107596 dated 01-07-2022 issued by Food & Drug Administration Maharashtra State India valid till 30-06-2023.	

		• Documents for the procurement of API with approval from DRAP (in case of import) shall be submitted. • Compliance Record of HPLC software 21CFR & audit trail reports on product testing shall be submitted. • Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) shall be submitted.	***GMP certificate is not valid.*** ***Not submitted.*** ***Not submitted.*** Submitted.	

Decision: Deferred for following:

- **Firm will submit full fee of 30,000/- for pre-approval changes/corrections in registration application as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.**
- **Table for literature references with correct information regarding both the drug substance and drug product with applicable fee shall be submitted.**
- **Justification shall be submitted regarding the analytical procedures as the assay method used by the USP monograph and drug substance manufacturer is by HPLC while the assay method provided by the drug product manufacturer is by titration.**
- **Analytical method verification of the drug substance performed by the drug product manufacturer shall be submitted.**
- **Clarification shall be submitted regarding the exact results of the analytical method verification studies submitted by the drug product manufacturer as that of the drug substance manufacturer.**
- **Analytical record of the drug substance shall be submitted.**
- **Approval of API/ DML/GMP certificate (Valid) of API manufacturer issued by concerned regulatory authority of country of origin shall be submitted.**
- **Documents for the procurement of API with approval from DRAP (in case of import) shall be submitted.**
- **Compliance Record of HPLC software 21CFR & audit trail reports on product testing shall be submitted.**

528.	Name, address of Applicant / Marketing Authorization Holder	**M/s Ophth Pharma (Pvt.) Ltd., Plot No. 241, Sector 24, Korangi Industrial Area, Karachi.**
	Name, address of Manufacturing site.	M/s Ophth Pharma (Pvt.) Ltd., Plot No. 241, Sector 24, Korangi Industrial Area, Karachi.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	Copy of GMP certificate No. 45/2021-DRAP (K) dated 29-09-2021 on the basis of inspection conducted on 27-09-2021 is submitted.
	Evidence of approval of manufacturing facility	Not submitted.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐Domestic sale ☐ Export sale ☒Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 9835, dated 18/04/2022.
	Details of fee submitted	PKR 30,000/- vide slip No. 13582877112 dated: 03/02/2022.
	The proposed proprietary name / brand name	Cerucil Sterile Ear Drops.

	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each ml contains: Ciprofloxacin as HCl..... 3mg
	Pharmacotherapeutic Group of (API)	Fluoroquinolone antibiotic.
	Pharmaceutical form of applied drug	Otic drops.
	Reference to Finished product specifications	USP specification.
	Proposed Pack size	10ml.
	Proposed unit price	Ear drops 10ml RS; 118.66.
	The status in reference regulatory authorities	Could not be confirmed.
	For generic drugs (me-too status)	Cipotic Ear Drops, Barrett Hodgson, Reg. No. 032485.
	Name and address of API manufacturer.	Shangyu Jingxin Pharmaceutical Co., Ltd., No. 31 Weisan Road, Hangzhou Bay Shangyu Economic and technological development area, Shangyu, Zhejiang Province, China.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Firm has submitted details of the drug substance including its nomenclature, structure, general properties, physical form, manufacturers, description of manufacturing process and controls, tests for impurity & related substances, specifications, analytical procedures and its verification, batch analysis (DK15-2111042a, Mfg. date 11-2021) and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies (Conditions & duration of Stability studies)	Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 36 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: 0701192, 0701193 & 0701194.
	Module-III (Drug Product):	Firm has submitted details of the drug product including its description, composition, pharmaceutical development, manufacture, batch formula, manufacturing process and process control, process validation protocols, control ofdrug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical equivalence and comparative dissolution profile	Firm has submitted pharmaceutical equivalence studies of their product against Cipotec by performing identification, pH, fill volume and drug release. However, drug release has mentioned limit of 75% - 133% and no details of the comparator product are submitted.
	Analytical method validation/verification of product	Not submitted.
STABILITY STUDY DATA		

Manufacturer of API	Shangyu Jingxin Pharmaceutical Co., Ltd., No. 31 Weisan Road, Hangzhou Bay Shangyu Economic and technological development area, Shangyu, Zhejiang Province, China.		
API Lot No.	Not mentioned.		
Description of Pack (Container closure system)	Plastic bottle with cap and nozzle packed in carton along with leaflet.		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 35% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 24 months. Accelerated: 06 months.		
Frequency	Real Time: 0,3,6, 9, 12, 18 & 24 (Months) Accelerated: 0, 03 & 06 (Months).		
Batch No.	TB-101	TB-102	TB-103
Batch Size			
Manufacturing Date	05-2019	05-2019	05-2019
Date of Initiation			
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Not submitted.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not submitted.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not submitted.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not submitted.

Remarks of evaluator:

Sr. No.	Section	Observation	Reply by the firm
1.	1.3.4	Valid copy of DML of the applicant shall be submitted.	
2.	1.3.5	Evidence of approval of manufacturing facility/section approval from licensing authority shall be submitted.	
3.	1.5.4	In some sections 5ml pack size is mentioned while in some 10 ml is mentioned. Clarification and exact pack size shall be mentioned.	
4.	1.5.6	This section has mentioned USP specifications. However, official monograph for ciprofloxacin HCl is not available in USP. Clarification shall be submitted.	
5.	1.5.9	Evidence of approval of applied formulation in reference regulatory authorities as approved by Registration Board in its 275th meeting shall be submitted.	

	6.	1.6.5	Detailed information of section 1.6.5 shall be submitted with name of the drug substance manufacturer, GMP certificate vendor qualification etc.		
	7.	2.3	• Table for literature references with correct information regarding both the drug substance and drug product with applicable fee shall be submitted. • Copies of executed BMR's shall be submitted.		
	8.	3.2.S.2 & 3.2.S.3	Detailed information of these sections shall be submitted.		
	9.	3.2.S.4.1	Specifications of the drug substance from both drug substance and drug product manufacturer shall be submitted.		
	10.	3.2.S.4.2	Analytical procedures of the drug substance from both drug substance and drug product manufacturer shall be submitted.		
	11.	3.2.S.4.3	• Analytical method verification of the drug substance performed by the drug product manufacturer shall be submitted. • Clarification shall be submitted regarding the exact results of the analytical method verification studies submitted by the drug product manufacturer as that of the drug substance manufacturer.		
	12.	3.2.S.4.4	• COA of the drug substance from drug product manufacturer with complete details i.e. batch number, manufacturing date, Expiry date etc. shall be submitted. • Analytical record of the drug substance shall be submitted. • Clarification shall be submitted for the COA of the drug substance provided by the drug substance manufacturer as it has mentioned mfg. date of 04-11-2021 while trial batches are manufactured in May, 2019.		
	13.	3.2.S.5	Details and COA of the working standard used shall be submitted.		
	14.	3.2.S.7	Justification shall be submitted for not including most of the test in the stability of the drug substance.		
	15.	3.2.P.2.2	• Pharmaceutical equivalence of the applied formulation with reference product with all the tests included in the official monograph shall be submitted. • Details of the product including name of manufacturer, manufacturing date, expiry date etc. against which PE is performed shall be submitted.		
	16.	3.2.P.5.1	• Reference to the finished product specification shall be submitted. • Specifications has mentioned Assay limit of 90-110% while BP monograph for Ciprofloxacin Ear drops has mentioned 95-110%. Clarification shall be submitted. • Specifications has mentioned pH limit of 3.5 to 5.5 while BP monograph for Ciprofloxacin Ear drops has mentioned 4 to 5. Clarification shall be submitted		
	17.	3.2.P.5.2	Justification shall be submitted for the analytical procedures as they are completely different from the official monograph of BP.		
	18.	3.2.P.5.3	Analytical method verification studies of the finished product along with analytical record shall be submitted.		
	19.	3.2.P.5.6	Justification of specifications has mentioned Manufacturer specifications while section 1.5.6 has mentioned USP specification. Official monograph for ciprofloxacin Ear drops is available in BP. Justification shall be submitted.		
	20.	3.2.P.8	• Stability data sheets as per decision of 293rd meeting of Registration Board with inclusion of batch size, date of initiation, API lot number shall be submitted. • Justify the standard preparation and sample preparation with respect to the submitted analytical procedure as the final concentration of both standard and sample preparation are completely different. • Justification shall be submitted for using UV method for the analysis of the assay test in stability studies. • Stability data sheets has 35% RH in real time stability. Clarification shall be submitted.		

			• Reference of previous approval of applications with stability study data of the firm (if any) shall be submitted. • Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin shall be submitted. • Documents for the procurement of API with approval from DRAP (in case of import) shall be submitted. • Compliance Record of HPLC software 21CFR & audit trail reports on product testing shall be submitted. • Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) shall be submitted.		

Decision of 331st meeting of Registration Board:
Registration Board deferred the case for submission of reply to the above cited shortcomings.

Reply submitted by the firm:

Sr. No.	Reason for deferment.	Reply by the firm
1.	Valid copy of DML of the applicant shall be submitted.	Firm has submitted copy of DML No. 000488 with renewal date from 05-05-2021.
2.	Evidence of approval of manufacturing facility/section approval from licensing authority shall be submitted.	Firm has submitted copy of letter No. F. 2-4/98-Lic(Pt-I) dated 07-06-2022 mentioning Eye/ear drops.
3.	In some sections 5ml pack size is mentioned while in some 10 ml is mentioned. Clarification and exact pack size shall be mentioned.	Firm has submitted that by typing mistake 10ml is printed instead of 5ml. the actual pack size of 5ml is corrected.
4.	This section has mentioned USP specifications. However, official monograph for ciprofloxacin HCl is not available in USP. Clarification shall be submitted.	***No clarification is submitted by the firm. However, they submitted Ciprofloxacin Ear drops monograph from BP.*** ***Firm has also submitted new information wherein they have changed their specifications from USP to BP without submission of any fee.***
5.	Evidence of approval of applied formulation in reference regulatory authorities as approved by Registration Board in its 275th meeting shall be submitted.	Firm has submitted Ciloquin 3mg/ml ear drops as evidence of RRA. Ciloquin 3mg/ml ear drops approved by TGA Australia.
6.	Detailed information of section 1.6.5 shall be submitted with name of the drug substance manufacturer, GMP certificate vendor qualification etc.	Firm has submitted copy of GMP certificate No. SY 31052018 dated 25-05-2016 issued by CFDA valid till 05-24-2021. ***Validity is expired.***
7.	• Table for literature references with correct information regarding both the drug substance and drug product with applicable fee shall be submitted. • Copies of executed BMR's shall be submitted.	***Firm has submitted table for literature references with incorrect information of the drug product.*** ***Not submitted.***
8.	Detailed information of these sections shall be submitted.	Submitted.
9.	Specifications of the drug substance from both drug substance and drug product manufacturer shall be submitted.	Submitted.
10.	Analytical procedures of the drug substance from both drug substance and drug product manufacturer shall be submitted.	Submitted.
11.	• Analytical method verification of the drug substance performed by the drug product manufacturer shall be submitted. • Clarification shall be submitted regarding the exact results of the analytical method verification studies submitted by the drug	Submitted.

		product manufacturer as that of the drug substance manufacturer.	
	12.	• COA of the drug substance from drug product manufacturer with complete details i.e. batch number, manufacturing date, Expiry date etc. shall be submitted. • Analytical record of the drug substance shall be submitted. • Clarification shall be submitted for the COA of the drug substance provided by the drug substance manufacturer as it has mentioned mfg. date of 04-11-2021 while trial batches are manufactured in May, 2019.	Firm has submitted COA of the drug substance however, no details are submitted regarding batch number, Mfg. date and Exp. date etc. ***Submitted. However, in the submitted analytical record concentration of the test solution and concentration of the reference solution are completely different from each other's.*** Firm has submitted that ciprofloxacin HCl is used in the manufacturing of product "Ophth Cipro" by the drug product manufacturer. During compilation of the dossier file mistakenly the assistant had enclosed copy of new consignment of the material instead of the old one.
	13.	Details and COA of the working standard used shall be submitted.	*Submitted.*
	14.	Justification shall be submitted for not including most of the test in the stability of the drug substance.	Firm has submitted new stability data sheets for the drug substance from drug substance manufacturer.
	15.	• Pharmaceutical equivalence of the applied formulation with reference product with all the tests included in the official monograph shall be submitted. • Details of the product including name of manufacturer, manufacturing date, expiry date etc. against which PE is performed shall be submitted.	Firm has submitted pharmaceutical equivalence studies of their applied formulation against the Ciloquin 3mg/ml ear drops, batch No. FDT258, manufacturing date of 02-2019 manufactured by M/s Novartis pharma Australia by performing identification, fill volume, pH, assay and sterility. ***However, no pictorial evidence is submitted by the firm for innovator product.*** ***Firm has also submitted purchase invoice for the Ciloquin Ear drops from Time Medico Karachi.*** ***However, in the available data of registered products, there is no registration for the same product.***
	16.	• Reference to the finished product specification shall be submitted. • • Specifications has mentioned Assay limit of 90-110% while BP monograph for Ciprofloxacin Ear drops has mentioned 95-110%. Clarification shall be submitted. • Specifications has mentioned pH limit of 3.5 to 5.5 while BP monograph for Ciprofloxacin Ear drops has mentioned 4 to 5. Clarification shall be submitted	Firm has submitted that specifications of the product have been updated according to BP monograph. ***No justification is submitted by the firm.*** Firm has submitted that pH limit of the product has been updated as per BP monograph in the dossier that is 4 – 5.
	17.	Justification shall be submitted for theanalytical procedures as they are completelydifferent from the official monograph of BP.	Firm has submitted that specifications of the product have been updated according to BP monograph. ***However, in the initially submitted dossier all the submitted data was as per previous specifications and analytical procedures.***
	18.	Analytical method verification studies of the finished product along with analytical record shall be submitted.	Submitted.
	19.	Justification of specifications has mentioned Manufacturer specifications while section 1.5.6 has mentioned USP specification. Official	Firm has submitted that specifications of the product have been updated according to BP monograph.

	monograph for ciprofloxacin Ear drops is available in BP. Justification shall be submitted.		
20.	• Stability data sheets as per decision of 293rd meeting of Registration Board with inclusion of batch size, date of initiation, API lot number shall be submitted. • Justify the standard preparation and sample preparation with respect to the submitted analytical procedure as the final concentration of both standard and sample preparation are completely different. • Justification shall be submitted for using UV method for the analysis of the assay test in stability studies. • Stability data sheets has 35% RH in real time stability. Clarification shall be submitted. • Reference of previous approval of applications with stability study data of the firm (if any) shall be submitted. • Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin shall be submitted. • Documents for the procurement of API with approval from DRAP (in case of import) shall be submitted. • Compliance Record of HPLC software 21CFR & audit trail reports on product testing shall be submitted. • Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) shall be submitted.	Firm has submitted new stability data sheets with batch size of 1 liter and API lot No. DK0701192. ***However, the batch analysis provided in 3.2.S.4.4 has batch No. DK15-2111042a, Mfg. date 11-2021 and is changed from the submitted one.*** Firm has submitted that concentration of standard and sample solution has been updated. Standard and sample final concentration in the old testing method was same but it was different from the recent monograph. Firm has submitted that they have performed stability assay test on both techniques UV and HPLC. By mistake the record of HPLC testing could not be attached. We are sending you data on HPLC. Firm has submitted that as per stability guidelines of ICH Q1 A (R2), if a product is packed in a semipermeable container, the stability condition should be 35% ± 5% RH. ***Not submitted.*** Firm has submitted copy of GMP certificate No. SY 31052018 dated 25-05-2016 issued by CFDA valid till 05-24-2021. ***Validity is expired.*** ***Not submitted.*** ***Not submitted.*** Submitted.	

Decision: Deferred for following:

- **Firm will submit full fee of 30,000/- for pre-approval changes/corrections in registration application as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.**
- **Table for literature references with correct information regarding both the drug substance and drug product with applicable fee shall be submitted.**
- **Copies of executed BMR's shall be submitted.**
- **Justification shall be submitted regarding the newly submitted analytical record for the drug substance wherein the concentration of the test solution and concentration of the reference solution are completely different from each other's.**
- **Pictorial evidence of the innovator product with visible details of batch number, manufacturing date, expiry date etc. shall be submitted.**
- **Justification shall be submitted regarding registration status of the reference product against which Pharmaceutical equivalence studies have bene performed.**
- **Justification shall be submitted regarding the previously submitted analytical record wherein the analytical procedures were completely different from the official monograph of BP.**
- **Justification shall be submitted regarding the API lot number in the stability data sheet as it is changed from the *batch analysis provided in 3.2.S.4.4. i.e. DK15-2111042a, Mfg. date 11-2021.***

• **Approval of API/ DML/GMP certificate (Valid) of API manufacturer issued by concerned regulatory authority of country of origin shall be submitted.** • **Documents for the procurement of API with approval from DRAP (in case of import) shall be submitted.** • **Compliance Record of HPLC software 21CFR & audit trail reports on product testing shall be submitted.**
Decision:

Case No. 04; Registration applications of locally manufactured Human deferred cases on form 5.

529.	Name and address of manufacturer/ Applicant	M/s Demont Research Laboratories, 20km, Lahore-Sharikpur Road, Sheikhupura, Pakistan.
	Brand Name + Dosage Form + Strength	Aspril 75/75mg Tablet.
	Composition	Each film- coated tablet contains: Clopidogrel as hydrogen sulphate (core enteric coated) ……..…75mg Aspirin (outer immediate core)..... 75mg
	Diary No. Date of R & I & fee	Dy.No.41393 dated 07-12-2018; Rs.20,000/- Dated 07-12-2018
	Pharmacological Group	Anti- thrombotic.
	Type of Form.	Form- 5.
	Finished product Specification.	Manufacturers.
	Pack size & Demanded Price	As per SRO.
	Approval status of product in Reference Regulatory Authorities.	TGA; Australia Approved.
	Me-too status.	Clopido Plus 75 Tablet of M/s Platinum Pharma, Karachi 055740
	GMP status.	Last GMP inspection was conducted on 26-02-2018 satisfactory and the report concludes satisfactory level of GMP compliance.
	Remarks of the Evaluator.	In EMA, the product has been developed as film-coated bilayer tablets containing two active substances while the firm has applied only film- coated tablets.
	Decision of 297th meeting of Registration Board.	Deferred for correction of formulation along with fee and evidence requisite bilayer machine.
	Submission by the firm:	Firm has submitted that they have dual core compression machine (ZP-33) and already have a registered bilayer product Mastador 75mg/200mcg tablets, Reg. No. 109304 which was registered after online stability data verification where the same machine was also the part of inspection. Firm has also provided registration letter of Mastador 75mg/200mcg tablets.
	Remarks of the Evaluator PEC-XIII	• Firm neither changed their label claim nor submitted any fee for change of label claim. • Latest GMP could not be confirmed.
	Decision of 316th meeting of Registration Board.	Deferred for revision of formulation to bi-layer tablet as per the innovator product along with submission of full fee.
	Submission by the firm:	Firm has submitted revised label claim for the applied formulation with submission of 30,000/- fee vide slip No. 93390802015 dated 01-11-2023. Firm has also submitted copy of GMP certificate No. 134/2023-DRAP (AD-265535911-876) dated 07-08-2023 on the basis of inspection conducted on 23-05-2023.

		Revised label claim is as under; **Each film- coated bilayer tablet contains:** **Clopidogrel as hydrogen Sulphate (core enteric coated) ……..…75mg** **Aspirin (outer immediate core).....75mg**
	Remarks of the Evaluator PEC-XIII	•
	Decision: Approved with following label claim; **Each film- coated bilayer tablet contains:** **Clopidogrel as hydrogen Sulphate (core enteric coated) ..... 75mg** **Aspirin (outer immediate core)..... 75mg** **Registration letter will be issued after submission of evidence of bilayer tablet machine.**	

Agenda of Evaluator PEC-XXI

Agenda Item No. 01:

Priority Applications of Human Drugs Locally Manufactured (New DML) applied on Form - 5F.

530.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Pine Pharmaceuticals, Plot No. 40, Street No. S-4, RCCI, Industrial Estate, Rawat.**
	Name, address of Manufacturing site.	M/s Pine Pharmaceuticals, Plot No. 40, Street No. S-4, RCCI, Industrial Estate, Rawat.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	New DML (No. 000955) issued w.e.f. 28-04-2022.
	Evidence of approval of manufacturing facility	Copy of letter for Issuance of DML vide No. F. 1-8/2019-Lic dated 29th April, 2022 contains section approval for: - i. Tablet (General) Section. **ii. Capsule (General) Section.** iii. Cream / Ointment (General) Section.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 22156 dated 08 SEP 2023
	Details of fee submitted	PKR 30,000/- Dated 31-08-2023 (Challan / Receipt # 37041984691)
	The proposed proprietary name / brand name	**GABEK 25mg Capsule**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each capsule contains: Pregabalin … 25mg (BP Specifications)
	Pharmacotherapeutic Group of (API)	N02BF02, Gabapentinoids / antiepileptic agents.

	Pharmaceutical form of applied drug	White to off-white powder filled in Hard Gelatin Capsule Shell.
	Reference to Finished product specifications	BP Specification
	Proposed Pack size	As per SRO
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	LYRICA 25mg Capsules of UPJOHN (USFDA Approved).
	For generic drugs (me-too status)	GABICA 25mg Capsules by M/s. Getz Pharma (Pvt.) Ltd.
	Name and address of API manufacturer.	M/s Progress Life Sciences Pvt. Ltd. Platinum Techno Park haware, Bhagwan Mahaveer Road, Sector 30, Vashi, Navi Mumbai, Maharashtra 400703, India.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 Months. The real time stability data is conducted at 25°C ± 2°C / 60% ± 5% RH for 24 Months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted pharmaceutical equivalence of their product against GABICA 25mg Capsule manufactured by M/s Getz Pharma (Pvt.) Ltd. by performing quality tests (Identification, Assay, Dissolution, and Uniformity of dosage unit). Firm has submitted CDP results of their product against GABICA 25mg Capsule manufactured by M/s Getz Pharma (Pvt.) Ltd. in 03 dissolution media.
	Analytical method validation/verification of product	Method verification studies have been submitted for drug substance as well as drug product.

STABILITY STUDY DATA			
Manufacturer of API	M/s Progress Life Sciences Pvt. Ltd., India.

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	NA
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Not provided.**
3.	Documents for the procurement of API with approval from DRAP (in case of import).	**Documents regarding Loan of API have not been submitted.** Copy of commercial invoice attested by AD I&E DRAP, Islamabad has been submitted for Pregabalin USP Batch No. PPR/21010 for M/s Panacea Pharma, Islamabad.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record for product testing.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	**Firm has not submitted certificate of 21 CFR compliance for the HPLC system.**
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator:
The following deficiencies / shortcomings have been communicated to the firm:

Deficiencies / Observations	Response of the Firm
i. The submitted Real Time Stability Study Data of Drug Substance has been conducted at 25°C ± 2°C / 60% ± 5% RH	Firm has submitted that they will submit 01 Year Real Time Stability Data with Degradation Studies in the

	for 24 Months. The Registration Board in its 290th Meeting had decided as follows: • ***In case where the real time stability data of drug substance is conducted at 25°C ± 2°C/60% RH ± 5% RH, the firm shall submit the record of data logger for the storage conditions throughout the transportation.*** • ***Moreover, in case of use of ingredients whose stability testing has not been done as per Zone IVA, then the manufacturer of finished pharmaceutical product, shall submit real term stability studies data of the product for atleast 1 year along with degradation studies in the finished pharmaceutical product.*** No such data as required in light of above decision of Registration Board has been submitted. Please clarify.	Finished Pharmaceutical Product upon completion of 01 Year.	
	ii. Please provide approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**The submitted GMP Certificate was valid till 02-11-2023.**	
	iii. Please provide Letter and agreement of loan of API, specifying the quantity of borrowed API.	Submitted.	
	iv. 2.3.S.3.1 a) The graphical representation submitted under characterization studies mentions "Escitalopram oxalate". Please clarify.	**Typographical Mistake.**	
	v. The dissolution specifications of FPP have been mentioned as "Not less than 80% (Q) in 30minutes", "NLT 75% in 40 minutes" and "NLT 80% (Q) in 45 minutes" on different instances within the application dossier. Please justify.	**Typographical Mistake.**	
	vi. 3.2.P.6 It has been mentioned that Working Standard has been used for analytical testing. Please provide evidence / traceability of the mentioned Working Standard against the Reference Standard.	COA of Working Standard referred against USP Ref. Lot. No. F048W0 has been submitted.	
	vii. Please provide Certificate of 21 CFR compliance for the HPLC system.	Copy of Certificate of Compliance for LabSolutions DB version 6, dated 26 March 2015 has been submitted.	
	viii. Please justify (with supporting evidence) the manufacturing of a		

	Total of 18 Batches (03 Trials of each strength) on a single day (i.e. 02-02-2023), as mentioned in your application dossiers. ix. Please provide evidence of Reference / Innovator's Packs used for Pharmaceutical Equivalence and CDP Studies for each strength.	**The Firm has submitted that their Capsule filling machine capacity is 10,000 capsules per hour. Blister machine capacity is 1200-1500 strokes and each stroke contains 03 blisters or 3600 blisters/hour. Machine cleaning process is also limited due to same API used in the manufactured batches. 18 batches become 27000 capsules and 3857 blisters.** Gabica 25mg Capsule, Batch No. 000850.	

Decision: Registration Board deferred the case for submission of:

- **Requisite fee for pre-registration correction for each Typographical Mistake.**
- **Real Time Stability Data with Degradation Studies in the Finished Pharmaceutical Product.**
- **Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.**
- **Rationale for manufacturing of a Total of 18 Batches (03 Trials of each strength) on a single day (i.e. 02-02-2023) and their placing in Stability Chambers.**

Registration Board further decided to proceed for onsite investigation to confirm genuineness / authenticity of stability data, related documents, import of API, quality, specification, test analysis, facilities etc., once the above mentioned shortcomings have been submitted.

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	NA
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Not provided.**
3.	Documents for the procurement of API with approval from DRAP (in case of import).	**Documents regarding Loan of API have not been submitted.** Copy of commercial invoice attested by AD I&E DRAP, Islamabad has been submitted for Pregabalin USP Batch No. PPR/21010 for M/s Panacea Pharma, Islamabad.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record for product testing.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	**Firm has not submitted certificate of 21 CFR compliance for the HPLC system.**
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator:
The following deficiencies / shortcomings have been communicated to the firm:

	Deficiencies / Observations	Response of the Firm
i.	The submitted Real Time Stability Study Data of Drug Substance has been conducted at 25°C ± 2°C / 60% ± 5% RH for 24 Months. The Registration Board in its 290th Meeting had decided as follows: • ***In case where the real time stability data of drug substance is conducted at 25°C ± 2°C/60% RH ± 5% RH, the firm shall submit the record of data logger for the storage conditions throughout the transportation.*** • ***Moreover, in case of use of ingredients whose stability testing has not been done as per Zone IVA, then the manufacturer of finished pharmaceutical product, shall submit real term stability studies data of the product for atleast 1 year along with degradation studies in the finished pharmaceutical product.*** No such data as required in light of above decision of Registration Board has been submitted. Please clarify.	Firm has submitted that they will submit 01 Year Real Time Stability Data with Degradation Studies in the Finished Pharmaceutical Product upon completion of 01 Year.
ii.	Please provide approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**The submitted GMP Certificate was valid till 02-11-2023.**
iii.	Please provide Letter and agreement of loan of API, specifying the quantity of borrowed API.	Submitted.
iv.	2.3.S.3.1 a) The graphical representation submitted under characterization studies mentions "Escitalopram oxalate". Please clarify.	**Typographical Mistake.**
v.	The dissolution specifications of FPP have been mentioned as "Not less than 80% (Q) in 30minutes", "NLT 75% in 40 minutes" and "NLT 80% (Q) in 45 minutes" on different instances within the application dossier. Please justify.	**Typographical Mistake.**
vi.	3.2.P.6 It has been mentioned that Working Standard has been used for analytical testing. Please provide evidence / traceability of the	COA of Working Standard referred against USP Ref. Lot. No. F048W0 has been submitted.

	mentioned Working Standard against the Reference Standard.	
vii.	Please provide Certificate of 21 CFR compliance for the HPLC system.	Copy of Certificate of Compliance for LabSolutions DB version 6, dated 26 March2015 has been submitted.
viii.	Please justify (with supporting evidence) the manufacturing of a Total of 18 Batches (03 Trials of each strength) on a single day (i.e. 02-02-2023), as mentioned in your application dossiers.	**The Firm has submitted that their Capsule filling machine capacity is 10,000 capsules per hour. Blister machine capacity is 1200-1500 strokes and each stroke contains 03 blisters or 3600 blisters/hour. Machine cleaning process is also limited due to same API used in the manufactured batches. 18 batches become 27000 capsules and 3857 blisters.** Gabica 50mg Capsule, Batch No. 0001050
ix.	Please provide evidence of Reference / Innovator's Packs used for Pharmaceutical Equivalence and CDP Studies for each strength.	

Decision: Registration Board deferred the case for submission of:

- **Requisite fee for pre-registration correction for each Typographical Mistake.**
- **Real Time Stability Data with Degradation Studies in the Finished Pharmaceutical Product.**
- **Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.**
- **Rationale for manufacturing of a Total of 18 Batches (03 Trials of each strength) on a single day (i.e. 02-02-2023) and their placing in Stability Chambers.**

Registration Board further decided to proceed for onsite investigation to confirm genuineness / authenticity of stability data, related documents, import of API, quality, specification, test analysis, facilities etc., once the above mentioned shortcomings have been submitted.

- **Real Time Stability Data with Degradation Studies in the Finished Pharmaceutical Product.**
- **Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.**
- **Rationale for manufacturing of a Total of 18 Batches (03 Trials of each strength) on a single day (i.e. 02-02-2023) and their placing in Stability Chambers.**

Registration Board further decided to proceed for onsite investigation to confirm genuineness / authenticity of stability data, related documents, import of API, quality, specification, test analysis, facilities etc., once the above mentioned shortcomings have been submitted.

	Dy. No. and date of submission	Dy. No. 22160 dated 08 SEP 2023
	Details of fee submitted	PKR 30,000/- Dated 30-08-2023 (Challan / Receipt # 80393461730)
	The proposed proprietary name / brand name	**GABEK 150mg Capsule**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each capsule contains: Pregabalin … 150mg (BP Specifications)
	Pharmacotherapeutic Group of (API)	N02BF02, Gabapentinoids / antiepileptic agents.
	Pharmaceutical form of applied drug	White to off-white powder filled in Hard Gelatin Capsule Shell.
	Reference to Finished product specifications	BP Specification
	Proposed Pack size	As per SRO
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	LYRICA 150mg Capsules of UPJOHN (USFDA Approved).
	For generic drugs (me-too status)	GABICA 150mg Capsules by M/s. Getz Pharma (Pvt.) Ltd.
	Name and address of API manufacturer.	M/s Progress Life Sciences Pvt. Ltd. Platinum Techno Park haware, Bhagwan Mahaveer Road, Sector 30, Vashi, Navi Mumbai, Maharashtra 400703, India.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.

	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 Months. The real time stability data is conducted at 25°C ± 2°C / 60% ± 5% RH for 24 Months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted pharmaceutical equivalence of their product against GABICA 150mg Capsule manufactured by M/s Getz Pharma (Pvt.) Ltd. by performing quality tests (Identification, Assay, Dissolution, and Uniformity of dosage unit). Firm has submitted CDP results of their product against GABICA 150mg Capsule manufactured by M/s Getz Pharma (Pvt.) Ltd. in 03 dissolution media.
	Analytical method validation/verification of product	Method verification studies have been submitted for drug substance as well as drug product.

STABILITY STUDY DATA

Time Period	Real time: 6 Months Accelerated: 6 Months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	T001	T002	T003
Batch Size	1,500 Capsules	1,500 Capsules	1,500 Capsules
Manufacturing Date	02-2023	02-2023	02-2023
Date of Initiation	03-02-2023	03-02-2023	03-02-2023
No. of Batches	03		
DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA			

1.	Reference of previous approval of applications with stability study data of the firm (if any)	NA
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Not provided.**
3.	Documents for the procurement of API with approval from DRAP (in case of import).	**Documents regarding Loan of API have not been submitted.** Copy of commercial invoice attested by AD I&E DRAP, Islamabad has been submitted for Pregabalin USP Batch No. PPR/21010 for M/s Panacea Pharma, Islamabad.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record for product testing.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	**Firm has not submitted certificate of 21 CFR compliance for the HPLC system.**
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator:
The following deficiencies / shortcomings have been communicated to the firm:

Deficiencies / Observations	Response of the Firm
i. The submitted Real Time Stability Study Data of Drug Substance has been conducted at 25°C ± 2°C / 60% ± 5% RH for 24 Months. The Registration Board in its 290th Meeting had decided as follows: • ***In case where the real time stability data of drug substance is conducted at 25°C ± 2°C/60% RH ± 5% RH, the firm shall submit the record of data logger for the storage conditions throughout the transportation.*** • ***Moreover, in case of use of ingredients whose stability testing has not been done as per Zone IVA, then the manufacturer of finished pharmaceutical product, shall submit real term stability studies data of the product for atleast 1 year along with degradation studies in the finished pharmaceutical product.*** No such data as required in light of above decision of Registration Board has been submitted. Please clarify.	Firm has submitted that they will submit 01 Year Real Time Stability Data with Degradation Studies in the Finished Pharmaceutical Product upon completion of 01 Year.

ii.	Please provide approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**The submitted GMP Certificate was valid till 02-11-2023.**
iii.	Please provide Letter and agreement of loan of API, specifying the quantity of borrowed API.	Submitted.
iv.	2.3.S.3.1 a) The graphical representation submitted under characterization studies mentions "Escitalopram oxalate". Please clarify.	**Typographical Mistake.**
v.	The dissolution specifications of FPP have been mentioned as "Not less than 80% (Q) in 30minutes", "NLT 75% in 40 minutes" and "NLT 80% (Q) in 45 minutes" on different instances within the application dossier. Please justify.	**Typographical Mistake.**
vi.	3.2.P.6 It has been mentioned that Working Standard has been used for analytical testing. Please provide evidence / traceability of the mentioned Working Standard against the Reference Standard.	COA of Working Standard referred against USP Ref. Lot. No. F048W0 has been submitted.
vii.	Please provide Certificate of 21 CFR compliance for the HPLC system.	Copy of Certificate of Compliance for LabSolutions DB version 6, dated 26 March2015 has been submitted.
viii.	Please justify (with supporting evidence) the manufacturing of a Total of 18 Batches (03 Trials of each strength) on a single day (i.e. 02-02-2023), as mentioned in your application dossiers.	**The Firm has submitted that their Capsule filling machine capacity is 10,000 capsules per hour. Blister machine capacity is 1200-1500 strokes and each stroke contains 03 blisters or 3600 blisters/hour. Machine cleaning process is also limited due to same API used in the manufactured batches. 18 batches become 27000 capsules and 3857 blisters.**
ix.	Please provide evidence of Reference / Innovator's Packs used for Pharmaceutical Equivalence and CDP Studies for each strength.	Gabica 150mg Capsule, Batch No. 000134.

Decision: Registration Board deferred the case for submission of:

- **Requisite fee for pre-registration correction for each Typographical Mistake.**
- **Real Time Stability Data with Degradation Studies in the Finished Pharmaceutical Product.**
- **Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.**
- **Rationale for manufacturing of a Total of 18 Batches (03 Trials of each strength) on a single day (i.e. 02-02-2023) and their placing in Stability Chambers.**

Registration Board further decided to proceed for onsite investigation to confirm genuineness / authenticity of stability data, related documents, import of API, quality, specification, test analysis, facilities etc., once the above mentioned shortcomings have been submitted.

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	NA
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Not provided.**
3.	Documents for the procurement of API with approval from DRAP (in case of import).	**Documents regarding Loan of API have not been submitted.** Copy of Clearance (vide No. 3607-I&E dated 22 DEC 2020) by AD I&E DRAP, Islamabad has been submitted for Paroxetine HCl Batch No. 5820070208 for M/s Panacea Pharma, Islamabad has been submitted. **However, the same had been issued conditionally with "Utilization Restriction" till submission of valid GMP.**
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record for product testing.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	**The Firm has submitted that their HPLC system is not 21 CFR compliant.**
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator:
The following deficiencies / shortcomings have been communicated to the firm:

Deficiencies / Observations	**Response of the Firm**
i. In the applied formulation, please justify the use of Methanol along with Isopropyl alcohol, Talcum and Lactose with supporting evidence. As the same has not been mentioned ininnovator / reference product formulation therefore, please submit compatibility studies of the same as excipients in the appliedformulation.	The firm has referred to the Hand Book of Pharmaceutical Excipients and their Stability Study Data Results.
ii. Please provide approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin has not been submitted.** Submitted.

iii. Please provide Letter and agreement of loan of API, specifying the quantity of borrowed API.	**No response has been submitted.**
iv. Copy of Clearance (vide No. 3607-I&E dated 22 DEC 2020) by AD I&E DRAP, Islamabad has been submitted for Paroxetine HCl Batch No. 5820070208 for M/s Panacea Pharma, Islamabad. However, the same had been issued conditionally with "Utilization Restriction" till submission of valid GMP. Please provide evidence of removal of condition / utilization approval for the same.	
v. 2.3.P.6 It has been mentioned that Working Standard has been used for analytical testing. Please provide evidence / traceability of the mentioned Working Standard against the Reference Standard.	COA of Working Standard referred against USP Reference Batch No. 5817060201 has been submitted.
vi. 2.3.P.8.2 The Container closure system has been mentioned as "Alu-PVC Blister", whereas the same has been mentioned as "Alu-Alu Blister" on separate instances in the same application, please clarify.	**Typographical Mistake.**
vii. Please provide evidence of Reference / Innovator's Pack used for Pharmaceutical Equivalence and CDP Studies.	Seroxat 20mg Tablet, Batch No. 140331

Decision: Registration Board deferred the case for submission of:

- **Requisite fee for pre-registration correction for each Typographical Mistake.**
- **Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.**
- **Copy of Clearance (vide No. 3607-I&E dated 22 DEC 2020) by AD I&E DRAP, Islamabad has been submitted for Paroxetine HCl Batch No. 5820070208 for M/s Panacea Pharma, Islamabad. However, the same had been issued conditionally with "Utilization Restriction" till submission of valid GMP. Please provide evidence of removal of condition / utilization approval for the same.**

Registration Board further decided to proceed for onsite investigation to confirm genuineness / authenticity of stability data, related documents, import of API, quality, specification, test analysis, facilities etc., once the above mentioned shortcomings have been submitted.

	Details of fee submitted	PKR 30,000/- Dated 07-06-2023 (Challan / Receipt # 2237392214)
	The proposed proprietary name / brand name	**PAROXEPINE 12.5mg CR Tablet**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each enteric film coated controlled release tablet contains Paroxetine (as hydrochloride hemihydrate) … 12.5mg (USP Specifications)
	Pharmacotherapeutic Group of (API)	N06AB05, Selective serotonin reuptake inhibitors
	Pharmaceutical form of applied drug	White to off-white, round, unscored, biconvex, enteric film coated controlled release tablet.
	Reference to Finished product specifications	USP Specification
	Proposed Pack size	As per SRO
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	PAXIL 12.5mg CR Tablets, USFDA Approved.
	For generic drugs (me-too status)	SEROXAT 12.5mg CR Tablets of GSK Pakistan Ltd.
	Name and address of API manufacturer.	M/s Zhejiang Haisen Pharmaceutical Co. Ltd. Liushi Street, Dongyang City, Zhejiang Province, China.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance	Firm has submitted stability study data of 3 batches of drug

	(Conditions & duration of Stability studies)	substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 Months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 24 Months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted pharmaceutical equivalence of their product against SEROXAT 12.5mg CR Tablets of GSK Pakistan Ltd. by performing quality tests (Identification, Assay, Dissolution, and Uniformity of dosage unit). Firm has submitted CDP results of their product against SEROXAT 12.5mg CR Tablets of GSK Pakistan Ltd. in 03 dissolution media.
	Analytical method validation/verification of product	Method verification studies have been submitted for drug substance as well as drug product.

STABILITY STUDY DATA

Manufacturer of API	M/s Zhejiang Haisen Pharmaceutical Co. Ltd. Liushi Street, Dongyang City, Zhejiang Province, China.		
API Lot No.	5820070208		
Description of Pack (Container closure system)	Alu-Alu Blister		
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 6 Months Accelerated: 6 Months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	T001	T002	T003
Batch Size	1,500 Tablets	1,500 Tablets	1,500 Tablets
Manufacturing Date	10-2022	10-2022	10-2022
Date of Initiation	10-10-2022	10-10-2022	10-10-2022
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	NA
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Not provided.**

3.	Documents for the procurement of API with approval from DRAP (in case of import).	**Documents regarding Loan of API have not been submitted.** Copy of Clearance (vide No. 3607-I&E dated 22 DEC 2020) by AD I&E DRAP, Islamabad has been submitted for Paroxetine HCl Batch No. 5820070208 for M/s Panacea Pharma, Islamabad has been submitted. **However, the same had been issued conditionally with "Utilization Restriction" till submission of valid GMP.**
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record for product testing.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	**The Firm has submitted that their HPLC system is not 21 CFR compliant.**
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator:
The following deficiencies / shortcomings have been communicated to the firm:

	Deficiencies / Observations	Response of the Firm
i.	In the applied formulation, please justify the use of Methanol along with Castor Oil, Titanium dioxide, Isopropyl alcohol and Polyethylene Glycol with supporting evidence. As the same has not been mentioned in innovator / reference product formulation therefore, please submit compatibility studies of the same as excipients in the applied formulation.	The firm has referred to the Hand Book of Pharmaceutical Excipients and their Stability Study Data Results.
ii.	Please provide approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin has not been submitted.**
iii.	Please provide Letter and agreement of loan of API, specifying the quantity of borrowed API.	Submitted.
iv.	Copy of Clearance (vide No. 3607-I&E dated 22 DEC 2020) by AD I&E DRAP, Islamabad has been submitted for Paroxetine HCl Batch No. 5820070208 for M/s Panacea Pharma, Islamabad. However, the same had been issued conditionally with "Utilization Restriction" till submission of valid GMP. Please provide evidence of removal of condition / utilization approval for the same.	**No response has been submitted.**
v.	2.3.P.6 It has been mentioned that Working Standard has been used for analytical testing.	

	Please provide evidence / traceability of the mentioned Working Standard against the Reference Standard.	COA of Working Standard referred against USP Reference Batch No. 5817060201 has been submitted.
vi.	2.3.P.8.2 The Container closure system has been mentioned as "Alu-PVC Blister", whereas the same has been mentioned as "Alu-Alu Blister" on separate instances in the same application, please clarify.	**Typographical Mistake.**
vii.	2.3.R.2 The Column Specifications have been mentioned as "4.6mm × 2.5cm: 5-µm packing L13" whereas the USP specifies the same as "4.6-mm × 25-cm; 5-µm packing L13". Please clarify.	**Typographical Mistake.**
viii.	Please provide evidence of Reference / Innovator's Packs (along with Batch details) used for Pharmaceutical Equivalence and CDP Studies for each strength	Seroxat 12.5mg CR Tablet

Decision: Registration Board deferred the case for submission of:

- **Requisite fee for pre-registration correction for each Typographical Mistake.**
- **Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.**
- **Copy of Clearance (vide No. 3607-I&E dated 22 DEC 2020) by AD I&E DRAP, Islamabad has been submitted for Paroxetine HCl Batch No. 5820070208 for M/s Panacea Pharma, Islamabad. However, the same had been issued conditionally with "Utilization Restriction" till submission of valid GMP. Please provide evidence of removal of condition / utilization approval for the same.**

Registration Board further decided to proceed for onsite investigation to confirm genuineness / authenticity of stability data, related documents, import of API, quality, specification, test analysis, facilities etc., once the above mentioned shortcomings have been submitted.

538.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Pine Pharmaceuticals, Plot No. 40, Street No. S-4, RCCI, Industrial Estate, Rawat.**

Date of Initiation	15-12-2022	15-12-2022	15-12-2022
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	NA
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Not provided.**
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Copy of Invoice No. 802848 dated 03-Jun-22 (for local purchase) of API from Vision Pharma, Islamabad has been submitted.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record for product testing.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	**Firm has not submitted certificate of 21 CFR compliance for the HPLC system.**
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator:
The following deficiencies / shortcomings have been communicated to the firm:

Deficiencies / Observations	Response of the Firm

i.	Please provide approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Submitted.
ii.	2.3.S.3.1 a) The graphical representation submitted under characterization studies mentions "Escitalopram oxalate". Please clarify.	**Typographical Mistake**
iii.	2.3.P.5.5 In Characterization of Impurities it has been mentioned that *"All impurities specified in the USP monograph of the latest edition of pharmacopeia are included in the finished products specifications",* however, no such test on impurities has been performed in submitted finished product testing. Please justify.	**FPP Manufacturer have not performed Impurity Studies on Finished Product.**
iv.	3.2.P.6 It has been mentioned that Working Standard has been used for analytical testing. Please provide evidence / traceability of the mentioned Working Standard against the Reference Standard.	COA of Working Standard against USP Ref. Lot. No. R065NO has been submitted.
v.	3.2.P.5.6 Enclosed Analytical Report of Working Standard states its Manufacturer as "Surge Laboratories", please clarify.	**Clarification Not submitted.**
vi.	3.2.P.8.3 In submitted Stability Study Summary Sheets (Real Time) for Batch No. T002 of Gisek 20mg Capsules, the Assay result for '0 Month' time interval is mentioned as "90.0% - 110.0%". Please justify.	**Typographical Mistake.** **Correct results are 101.51%.**
vii.	Please provide Certificate of 21 CFR compliance for the HPLC system.	Copy of Certificate of Compliance for LabSolutions DB version 6, dated 26 March 2015 has been submitted.
viii.	Please provide evidence of Reference / Innovator's Packs used for Pharmaceutical Equivalence and CDP Studies for each strength.	Risek 20mg Capsule, Batch No. C03038

Decision: Registration Board deferred the case for submission of:

- **Requisite fee for pre-registration correction for each Typographical Mistake.**
- **Scientific Rationale for not performing Impurity Studies on Finished Product by FPP Manufacturer.**
- **3.2.P.5.6 Enclosed Analytical Report of Working Standard states its Manufacturer as "Surge Laboratories", please clarify.**

Registration Board further decided to proceed for onsite investigation to confirm genuineness / authenticity of stability data, related documents, import of API, quality, specification, test analysis, facilities etc., once the above mentioned shortcomings have been submitted.

No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	NA
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Not provided.**
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Copy of Invoice No. 802848 dated 03-Jun-22 (for local purchase) of API from Vision Pharma, Islamabad has been submitted.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record for product testing.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	**Firm has not submitted certificate of 21 CFR compliance for the HPLC system.**
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator:
The following deficiencies / shortcomings have been communicated to the firm:

Deficiencies / Observations	Response of the Firm
i. Please provide approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Submitted.
ii. 2.3.S.3.1 a) The graphical representation submitted under characterization studies mentions "Escitalopram oxalate". Please clarify.	**Typographical Mistake**
iii. 2.3.P.5.5 In Characterization of Impurities it has been mentioned that *"All impurities specified in the USP monograph of the latest edition of pharmacopeia are included in the finished products specifications",* however, no such test on impurities has been performed in submitted finished product testing. Please justify.	**FPP Manufacturer have not performed Impurity Studies on Finished Product.**
iv. 3.2.P.6 It has been mentioned that Working Standard has been used for analytical testing. Please provide evidence / traceability of the mentioned Working Standard against the Reference Standard.	COA of Working Standard against USP Ref. Lot. No. R065NO has been submitted.

v.	3.2.P.5.6 Enclosed Analytical Report of Working Standard states its Manufacturer as "Surge Laboratories", please clarify.	**Clarification Not submitted.**
vi.	Please provide Certificate of 21 CFR compliance for the HPLC system.	Copy of Certificate of Compliance for LabSolutions DB version 6, dated 26 March 2015 has been submitted.
vii.	Please provide evidence of Reference / Innovator's Packs used for Pharmaceutical Equivalence and CDP Studies for each strength.	Risek 40mg Capsule, Batch No. C04023.

Decision: Registration Board deferred the case for submission of:

- **Requisite fee for pre-registration correction for each Typographical Mistake.**
- **Scientific Rationale for not performing Impurity Studies on Finished Product by FPP Manufacturer.**
- **3.2.P.5.6 Enclosed Analytical Report of Working Standard states its Manufacturer as "Surge Laboratories", please clarify.**

Registration Board further decided to proceed for onsite investigation to confirm genuineness / authenticity of stability data, related documents, import of API, quality, specification, test analysis, facilities etc., once the above mentioned shortcomings have been submitted.

541.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Pine Pharmaceuticals, Plot No. 40, Street No. S-4, RCCI, Industrial Estate, Rawat.**
	Name, address of Manufacturing site.	M/s Pine Pharmaceuticals, Plot No. 40, Street No. S-4, RCCI, Industrial Estate, Rawat.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	New DML (No. 000955) issued w.e.f. 28-04-2022.
	Evidence of approval of manufacturing facility	Copy of letter for Issuance of DML vide No. F. 1-8/2019-Lic dated 29th April, 2022 contains section approval for: - **i. Tablet (General) Section.** **ii.** Capsule (General) Section. **iii.** Cream / Ointment (General) Section.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 23764 dated 21 NOV 2023
	Details of fee submitted	PKR 30,000/- Dated 14-11-2023 (Challan / Receipt # 108659222551)
	The proposed proprietary name / brand name	**SULPIN 25mg Tablet**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each un-coated tablet contains Levosulpiride … 25mg (Innovator's Specifications)

	Pharmacotherapeutic Group of (API)	N05AL07, Antipsychotics, Benzamides.
	Pharmaceutical form of applied drug	Light green colored round biconvex core tablet
	Reference to Finished product specifications	Innovator's Specifications
	Proposed Pack size	As per SRO
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	ARISTO 25mg Tablets (Levosulpiride), AIFA Italy Approved.
	For generic drugs (me-too status)	SULVORID 25mg Tablets of M/s High-Q Pharma.
	Name and address of API manufacturer.	M/s Varahi International opp: Naroda Rly Station, N.H. No. 8, Naroda City, Ahmedabad – 382 330, Gujarat State, India.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 Months. The real time stability data is conducted at 25°C ± 2°C / 60% ± 5% RH for 24 Months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted pharmaceutical equivalence of their product against SULVORID 25mg Tablets of M/s High-Q Pharma by performing quality tests (Identification, Assay, Dissolution, and Uniformity of dosage unit). Firm has submitted CDP results of their product against SULVORID 25mg Tablets of M/s High-Q Pharma in 03 dissolution media.
	Analytical method validation/verification of product	Method verification studies have been submitted for drug substance as well as drug product.

Manufacturing Date	04-2023	04-2023	04-2023
Date of Initiation	24-04-2023	24-04-2023	24-04-2023
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	NA
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Not provided.**
3.	Documents for the procurement of API with approval from DRAP (in case of import).	**Documents regarding Loan of API have not been submitted.** Copy of Commercial Invoice No. TM/144/21-22 dated 27-07-2021 signed by AD I&E DRAP, Islamabad has been submitted for Levosulpiride Batch No. 31L01Z2122-12 for M/s Panacea Pharma, Islamabad has been submitted.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record for product testing.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	**The Firm has submitted that their HPLC system is not 21 CFR compliant.**
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator:
The following deficiencies / shortcomings have been communicated to the firm:

Deficiencies / Observations	Response of the Firm

i.	Please provide undertakings / commitments as required in sections **1.5.15 − 1.5.20**. The submitted document is without signatures.	Submitted.
ii.	Information submitted in 2.3.S.7.1 a) statesthat the Real Time Stability Study of Drug Substance has been conducted at 25°C ± 2°C / 60% ± 5% RH for 24 Months. The Registration Board in its 290th Meeting had decided as follows: • ***In case where the real time stability data of drug substance is conducted at 25°C ± 2°C/60% RH ± 5% RH, the firm shall submit the record of data logger for the storage conditions throughout the transportation.*** • ***Moreover, in case of use of ingredients whose stability testing has not been done as per Zone IVA, then the manufacturer of finished pharmaceutical product, shall submit real term stability studies data of the product for atleast 1 year along with degradation studies in the finished pharmaceutical product.*** No such data as required in light of above decision of Registration Board has been submitted. Please clarify.	Firm has submitted that they will submit 01 Year Real Time Stability Data with Degradation Studies in the Finished Pharmaceutical Product upon completion of 01 Year.
iii.	Information provided in 2.3.P.5.4 Batch Analysis a) Description of Batches specifies Date of manufacturing of Batch Nos. T001, T002 and T003 as *"03-2025"*. Please justify.	**Typographical Mistake**
iv.	Please provide approval of API/ DML of API manufacturer issued by concerned regulatory authority of country of origin.	Approval of API/ DML of API manufacturer issued by concerned regulatory authority of country of origin **has not been submitted.**
v.	Finished Product Specifications have been claimed as that of "Innovator's Specifications", however, in section 3.2.P.5.1 the same have been claimed as "In-House". Please justify.	**Typographical Mistake.**
vi.	Please provide Letter and agreement of loan of API, specifying the quantity of borrowed API.	Submitted.
vii.	2.3.P.6 It has been mentioned that Working Standard has been used for analytical testing. Please provide evidence / traceability of the	Firm has submitted that they had used Secondary Working Standard provided by the supplier and

mentioned Working Standard against the Reference Standard.	claimed there was no availability of Primary Working Standard.
viii. Please provide evidence of Reference / Innovator's Pack used for Pharmaceutical Equivalence and CDP Studies for each strength.	SULVORID 25mg Tablet, Batch No. 2SV263.

Decision: Registration Board deferred the case for submission of:

- **Requisite fee for pre-registration correction for each Typographical Mistake.**
- **Real Time Stability Data with Degradation Studies in the Finished Pharmaceutical Product.**
- **Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.**

Registration Board further decided to proceed for onsite investigation to confirm genuineness / authenticity of stability data, related documents, import of API, quality, specification, test analysis, facilities etc., once the above mentioned shortcomings have been submitted.

Time Period	Real time: 6 Months

	Accelerated: 6 Months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	T001	T002	T003
Batch Size	2,000 Capsules	2,000 Capsules	2,000 Capsules
Manufacturing Date	12-2022	12-2022	12-2022
Date of Initiation	05-12-2022	05-12-2022	05-12-2022
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	NA
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Not provided.**
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Copy of Invoice No. 802677 dated 16-May-22 (for local purchase) of API from Vision Pharma, Islamabad has been submitted.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record for product testing.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	**Firm has not submitted certificate of 21 CFR compliance for the HPLC system.**
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator:

The following deficiencies / shortcomings have been communicated to the firm:

	Deficiencies / Observations	Response of the Firm
i.	Please provide approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Submitted.
ii.	2.3.S.3.1 a) The graphical representation submitted under characterization studies mentions "Escitalopram oxalate". Please clarify.	**Typographical Mistake.**
iii.	2.3.S.4.5 Justification of Specifications has been provided for "Fluconazole". Please justify.	**Typographical Mistake.**

	iv. 2.3.S.5 Specifications of primary / secondary reference standard has been provided for "Fluconazole". Please justify.	
	v. 2.3.P.5.5 In Characterization of Impurities it has been mentioned that *"All impurities specified in the USP monograph of the latest edition of pharmacopeia are included in the finished products specifications"*, however, no such test on impurities has been performed in submitted finished product testing. Please justify.	**The Firm has submitted that they have not performed Impurity Testing on Finished Pharmaceutical Product.**
	vi. 3.2.P.6 It has been mentioned that Working Standard has been used for analytical testing. Please provide evidence / traceability of the mentioned Working Standard against the Reference Standard.	**COA of Working Standard OMP/2202022 from Surge Laboratories has been submitted.**
	vii. Please provide Certificate of 21 CFR compliance for the HPLC system.	Copy of Certificate of Compliance for LabSolutions DB version 6, dated 26 March 2015 has been submitted.
	viii. Please provide evidence ofReference / Innovator's Packs used for Pharmaceutical Equivalence and CDP Studies for each strength.	Nexum 20mg Capsule, Batch No. 000860.

Decision: Registration Board deferred the case for submission of:

- **Requisite fee for pre-registration correction for each Typographical Mistake.**
- **Scientific Rationale for not performing Impurity Testing on Finished Pharmaceutical Product by FPP Manufacturer.**
- **Scientific Rationale for using Working Standard from Surge Laboratories – a third party.**

Registration Board further decided to proceed for onsite investigation to confirm genuineness / authenticity of stability data, related documents, import of API, quality, specification, test analysis, facilities etc., once the above mentioned shortcomings have been submitted.

544.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Pine Pharmaceuticals, Plot No. 40, Street No. S-4, RCCI, Industrial Estate, Rawat.**
	Name, address of Manufacturing site.	M/s Pine Pharmaceuticals, Plot No. 40, Street No. S-4, RCCI, Industrial Estate, Rawat.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	New DML (No. 000955) issued w.e.f. 28-04-2022.

	Evidence of approval of manufacturing facility	Copy of letter for Issuance of DML vide No. F. 1-8/2019-Lic dated 29th April, 2022 contains section approval for: - i. Tablet (General) Section. **ii. Capsule (General) Section.** iii. Cream / Ointment (General) Section.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 16136 dated 26 JUN 2023
	Details of fee submitted	PKR 30,000/- Dated 21-06-2023 (Challan / Receipt # 7411633221)
	The proposed proprietary name / brand name	**ESSOP 40mg Capsule**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each capsule contains: Enteric coated pellets of esomeprazole magnesium trihydrate equivalent to esomeprazole … 40mg (USP Specifications)
	Pharmacotherapeutic Group of (API)	A02BC05, Proton pump inhibitors
	Pharmaceutical form of applied drug	White to off-white colored pellets filled in Blue/blue Hard Gelatin Capsule Shell.
	Reference to Finished product specifications	(USP Specifications)
	Proposed Pack size	As per SRO
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	NEXIUM 20mg & 40mg delayed release capsules, USFDA Approved.
	For generic drugs (me-too status)	NEXUM 40mg Capsule, Getz Pharma, Reg. No. 033891.
	Name and address of API manufacturer.	Vision Pharmaceuticals Plot No. 22-23, Industrial Triangle, Kahuta Road, Islamabad.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.

	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 Months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 36 Months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted pharmaceutical equivalence of their product against NEXUM 40mg Capsule manufactured by M/s Getz Pharma (Pvt.) Ltd. by performing quality tests (Identification, Assay, Dissolution, and Uniformity of dosage unit). Firm has submitted CDP results of their product against NEXUM 40mg Capsule manufactured by M/s Getz Pharma (Pvt.) Ltd. in 03 dissolution media.
	Analytical method validation/verification of product	Method verification studies have been submitted for drug substance as well as drug product.

STABILITY STUDY DATA

Date of Initiation	05-12-2022	05-12-2022	05-12-2022
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	NA
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Not provided.**

3.	Documents for the procurement of API with approval from DRAP (in case of import).	Copy of Invoice No. 802677 dated 16-May-22 (for local purchase) of API from Vision Pharma, Islamabad has been submitted.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record for product testing.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	**Firm has not submitted certificate of 21 CFR compliance for the HPLC system.**
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator:

The following deficiencies / shortcomings have been communicated to the firm:

Deficiencies / Observations	Response of the Firm
i. Please provide approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Submitted.
ii. 2.3.S.3.1 a) The graphical representation submitted under characterization studies mentions "Escitalopram oxalate". Please clarify.	**Typographical Mistake.**
iii. 2.3.S.4.5 Justification of Specifications has been provided for "Fluconazole". Please justify.	**Typographical Mistake.**
iv. 2.3.S.5 Specifications of primary / secondary reference standard has been provided for "Fluconazole". Please justify.	**Typographical Mistake.**
v. 2.3.P.5.5 In Characterization of Impurities it has been mentioned that *"All impurities specified in the USP monograph of the latest edition of pharmacopeia areincluded in the finished products specifications",* however, no such test on impurities has been performed in submitted finished product testing. Please justify.	**The Firm has submitted that they have not performed Impurity Testing on Finished Pharmaceutical Product.**
vi. 3.2.P.6 It has been mentioned that Working Standard has been used for analytical testing. Please provide evidence / traceability of the mentioned Working Standard against the Reference Standard.	**COA of Working Standard OMP/2202022 from Surge Laboratories has been submitted.**

vii.	Please provide Certificate of 21 CFR compliance for the HPLC system.	Copy of Certificate of Compliance for LabSolutions DB version 6, dated 26 March 2015 has been submitted. Nexum 40mg Capsule, Batch No. C01850.
viii.	Please provide evidence of Reference / Innovator's Packs used for Pharmaceutical Equivalence and CDP Studies for each strength.	

Decision: Registration Board deferred the case for submission of:

- **Requisite fee for pre-registration correction for each Typographical Mistake.**
- **Scientific Rationale for not performing Impurity Testing on Finished Pharmaceutical Product by FPP Manufacturer.**
- **Scientific Rationale for using Working Standard from Surge Laboratories – a third party.**

Registration Board further decided to proceed for onsite investigation to confirm genuineness / authenticity of stability data, related documents, import of API, quality, specification, test analysis, facilities etc., once the above mentioned shortcomings have been submitted.

Manufacturing Date	06-2023	06-2023	06-2023
Date of Initiation	22-06-2023	22-06-2023	22-06-2023
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	NA
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Not provided.**
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Copy of Invoice No. 903020 dated 14-Jun-23 (for local purchase) of API from Vision Pharma, Islamabad has been submitted.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record for product testing.

5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	**Firm has not submitted certificate of 21 CFR compliance for the HPLC system.**
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator:

The following deficiencies / shortcomings have been communicated to the firm:

Deficiencies / Observations	Response of the Firm
i. Please provide approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Submitted.
ii. 2.3.S.3.1 a) The graphical representation submitted under characterization studies mentions "Escitalopram oxalate". Please clarify.	**Typographical Mistake**
iii. 2.3.R.2 In Analytical Procedures and Validation Information for Drug Product, Analytical Method for Testing of "Esomeprazole Capsule" has been submitted. Please justify.	**Typographical Mistake**
iv. 3.2.S.7.1 In Stability Summary and Conclusion, it has been mentioned that the drug substance is *"found stable under long term conditions temperature 25C + 2C and humidity 60 +5%) for a period of 3 years".* Please justify.	**Typographical Mistake**
v. Please provide stability results observed forthe Accelerated and Long-term studies of 03 stability batches, supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc. for 06th Month Time Interval for each strength.	**Not submitted. 6th Month Stability Study Schedule Date is 31/12/2023.**
vi. 3.2.P.6 It has been mentioned that Working Standard has been used for analytical testing. Please provide evidence / traceability of the mentioned Working Standard against the Reference Standard.	COA of Working Standard against USP Ref. Lot. No. R043X0 has been submitted.
vii. Please provide Certificate of 21 CFR compliance for the HPLC system.	Copy of Certificate of Compliance for LabSolutions DB version 6, dated 26 March 2015 has been submitted.

	viii. Please provide evidence of Reference / Innovator's Packs used for Pharmaceutical Equivalence and CDP Studies for each strength.	Lyta 60mg Capsule, Batch No. 025C35	
	ix. Please provide Commitments / Undertakings as required in Sections 1.5.15 – 1.5.20. The submitted document is without signatures.	Submitted.	

Decision: Registration Board deferred the case for submission of:

- **Requisite fee for pre-registration correction for each Typographical Mistake.**
- **Stability results observed for the Accelerated and Long-term studies of 03 stability batches, supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc. for 06th Month Time Interval.**

Registration Board further decided to proceed for onsite investigation to confirm genuineness authenticity of stability data, related documents, import of API, quality, specification, test analysis, facilities etc., once the above mentioned shortcomings have been submitted.

548.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Pasteur & Fleming Pharma, Plot No. P-70-A, Phase-3, Road No. 4, Industrial Estate, Hattar.**
	Name, address of Manufacturing site.	M/s Pasteur & Fleming Pharma, Plot No. P-70-A, Phase-3, Road No. 4, Industrial Estate, Hattar.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	New DML (No. 000945) issued w.e.f. 10-11-2021.
	Evidence of approval of manufacturing facility	Copy of letter for Issuance of DML vide No. F. 3-1/2017-Lic dated 11th November, 2021 contains section approval for: - i. Tablet (Hormone) Section **ii. Tablet (General) Section.** iii. Capsule (General) Section. iv. Dry Powder Suspension (General) Section v. Cream / Ointment (General) Section.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 23148 dated 20 SEP 2023
	Details of fee submitted	PKR 30,000/- Dated 15-09-2022 (Challan / Receipt # 9767511751)
	The proposed proprietary name / brand name	**PASTELO 10mg Tablet**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated tablet contains: Escitalopram as oxalate (USP) … 10mg (USP Specifications)

	Pharmacotherapeutic Group of (API)	N06AB10, Selective serotonin reuptake inhibitors
	Pharmaceutical form of applied drug	White round film coated tablets
	Reference to Finished product specifications	USP Specification
	Proposed Pack size	As per SRO
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	CIPRALEX 10mg Tablet by M/s Lundbeck Limited, MHRA Approved.
	For generic drugs (me-too status)	CIPRALEX 10mg Tablet by M/s Lundbeck Pakistan, Reg. No. 028467.
	Name and address of API manufacturer.	M/s Shodana Laboratories Private Limited Plot No. 24,25,26, Phase 1, Jeedimetla, Hyderabad-50055 Telangana India.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 Months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 24 Months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted pharmaceutical equivalence of their product against CIPRALEX 10mg Tablet by M/s Lundbeck Pakistan, Reg. No. 028467 by performing quality tests (Identification, Assay, Dissolution, and Uniformity of dosage unit). Firm has submitted CDP results of their product against CIPRALEX 10mg Tablet by M/s Lundbeck Pakistan, Reg. No. 028467 in 03 dissolution media.

	Analytical method validation/verification of product	Method verification studies have been submitted for drug substance and drug product.

Date of Initiation	11-2022	11-2022	11-2022
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	NA
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Not provided.**
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Copy of letter from M/s Legacy Pharmaceuticals, Peshawar regarding Loan of 100gms of API (Escitalopram Oxalate) has been submitted along with copy of Commercial Invoice No. EP/21-22/219 dated 16-08-2021 for Import of 10Kgs of Escitalopram Oxalate USP, Batch No. EO-092/21. **However, import approval from DRAP has not been submitted.**
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record for product testing.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	**Not provided.**
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	**Not provided.**

Remarks of Evaluator:
The following deficiencies / shortcomings have been communicated to the firm:

Deficiencies / Observations	Response of the Firm

	i. Both the applied strengths i.e.PASTELO 10mg Tablets & PASTELO 20mg Tablets have the same description – *"White round film coated tablets"*. Please justify the same (with supporting evidence) as how to differentiate between the two strengths.	Firm has submitted that they will use a different color in future commercial production batches for differentiation between the two strengths.	
	ii. 2.3.S.4.1 API Specifications of the FPP manufacturer have been claimed as USP whereas in 2.3.S.4.5 Justification of the API Specifications, the same has been referred to Ph. Eur. Please justify.	**Typographical Mistake.** **API Specifications as per USP.**	
	iii. Information submitted in 2.3.S.7.3 a) Summary of the stability results observed for the accelerated and long-term studies does not match with the actual stability results provided in *Module 3* section 3.2.S.7.3. Please justify.	**Revised 2.3.S.7.3 a) Summary of the stability results.**	
	iv. 2.3.P.3.4 The Dissolution specifications have been mentioned as *NLT 85% in 30min*, whereas the same has been mentioned as *NLT 80% in 30min* and *NLT 80%*, on separate instances within the application dossier. Please justify.	**Typographical Mistake.**	
	v. Information provided in 2.3.P.8.3 (a) Conclusion of the stability studies does not match with the actual stability results provided in Module 3 section 3.2.P.8.3. Please justify.	**Revised 2.3.P.8.3 (a) Conclusion of the stability studies.**	
	vi. In 2.3.R.2 Analytical Procedures and Validation Information for Drug Product, it has been mentioned that *"the Method of Testing (Assay Method) is taken from BP 2017".* However, the Finished Product Specifications have been claimed as per USP. Please justify.	**Typographical Mistake.** **Finished Product Specifications have been claimed as per USP.**	
	vii. In Submitted Stability Study Data (Accelerated as well as Real Time) for Batch No. T-02, Significant Change (>5%) in Assay Results from its initial value has been observed at 6th Month Testing. Please justify.	**Typographical Mistake. Revised Assay Results of 0 Month Time Point to "101.97%".**	
	viii. 3.2.P.2.2.3 In submitted Comparative Dissolution Studies, dissolution results have been obtained >100% (up to 110%)	**The firm has submitted that they had used non calibrated volumetric**	

	on multiple instances, which is an indication that either there's a problem with the dissolution of the product or the uniformity of dosage units or both. Please justify with supporting evidences.	**cylinder having low tolerance thereby resulting in high test results.**	
	ix. API Lot No. is mentioned as "CPH2110109" in Stability Data Sheet. However, the same has neither been imported nor mentioned in any submitted supporting documents for Drug Substance. Please clarify.	**Typographical Mistake.** **API Lot No. is EO-092/21.**	
	x. Please provide approval of API/ DML of API manufacturer issued by concerned regulatory authority of country of origin.	Submitted GMP Certificate was valid till 16/06/2022. Approval of API/ DML of API manufacturer issued by concerned regulatory authority of country of origin **has not been submitted.**	
	xi. Please provide approval of DRAP regarding Commercial Invoice No. EP/21-22/219 dated 16-08-2021 for Import of 10Kgs of Escitalopram Oxalate USP, Batch No. EO-092/21.	Submitted Certificate No. 10-88/2021-DRAP/3369 dated 02-09-2021 by AD I&E (Peshawar).	
	xii. Please provide Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	**Not Available**	
	xiii. Please provide Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).	**Not Available**	

Decision: Registration Board deferred the case for submission of:

- **Requisite fee for pre-registration correction for each Typographical Mistake / Revision of Information.**
- **Scientific Rationale for obtaining dissolution results >100% (up to 110%) on multiple instances.**
- **Approval of API/ DML/ valid GMP of API manufacturer issued by concerned regulatory authority of country of origin.**

Registration Board further decided to proceed for onsite investigation to confirm genuineness authenticity of stability data, related documents, import of API, quality, specification, test analysis, facilities etc., once the above mentioned shortcomings have been submitted.

549.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Pasteur & Fleming Pharma, Plot No. P-70-A, Phase-3, Road No. 4, Industrial Estate, Hattar.**
	Name, address of Manufacturing site.	M/s Pasteur & Fleming Pharma, Plot No. P-70-A, Phase-3, Road No. 4, Industrial Estate, Hattar.

Agenda of Evaluator PEC-IV

Case no. 01 Registration applications of newly granted DML or New section (Human)

a. New DML

M/s Medevo (Private) Ltd. . **(New DML)**
CLB in its 288th meeting held on 18th October 2022 has considered and approved the grant of Drug Manufacturing License by way of formulation with following Two (02) sections to M/s Medevo (Private) Ltd.

1) Eye Drops (General)
2) Eye Ointment (General)

Eye Drops (General)		
550.	Name, address of Applicant / Marketing Authorization Holder	M/s Medevo (Private) Ltd. Plot No # 94 sundar industrial Estate Raiwind Lahore.
	Name, address of Manufacturing site.	M/s Medevo (Private) Ltd. Plot No # 94 sundar industrial Estate Raiwind Lahore
	Status of the applicant	☒Manufacturer

		☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	New DML issued dated: 08-11-2022
	Evidence of approval of manufacturing facility	Firm has submitted copy of Issuance of DML letter dated 08-11-2022 specifying EYE Drops (General) Section
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy No. 23152 dated 20-09-2023
	Details of fee submitted	Rs.30,000/- Deposit slip # 10783694194
	The proposed proprietary name / brand name	Surgilot Eye Drops (0.5% Ophthalmic Suspension)
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each ml contains: Loteprednol Etabonate……5mg
	Pharmaceutical form of applied drug	Milky white Ophthalmic Suspension
	Pharmacotherapeutic Group of (API)	Steroid
	Reference to Finished product specifications	Manufacturer specs
	Proposed Pack size	5ml
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	LOTEMAX ophthalmic suspension/drops; of USFDA Approved
	For generic drugs (me-too status)	Lotepred forte Ophthalmic suspension of M/s of Sante private limited Reg# 0674458
	Name and address of API manufacturer.	M/s Flax Laboratories B-29/1, MIDC Mahad, birvadi village, Dist, raigad, Maharashtra, India.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6

		months. The real time stability data is conducted at 30°C ± 2°C / 65 ± 5% RH for 24 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical Equivalence have been established against the Lotepred Forte of M/s Sante Pharmaceuticals by performing quality tests Identification, pH, Assay, and Sterility Test,).
	Analytical method validation/verification of product

Batch Size	5L (1000 Packs)	5L (1000 Packs)	5L (1000 Packs)
Manufacturing Date	11-2022	11-2022	11-2022
Date of Initiation	03-12-2022	03-12-2022	03-12-2022
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (No. 6111950) issued by Food and Drugs Administration Maharashtra state, dated 14-03-2023 and valid till 13-03-2024
3.	Documents for the procurement of API with approval from DRAP (in case of import).	An agreement of API's Loan between Medevo (Pvt) Limited and Innovotek pharmaceuticals submitted. Firm has submitted copy of Drugs import License # K-987059032758, dated; 29-09-2022 specifying Loteprednol Etabonate.(Innovotek pharmaceuticals)
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.

5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

S.No	Section	Shortcoming
1.	3.2.S.4.1	Copies of the Drug substance specifications by Drug Product manufacturer is required.
2.	3.2.S.4.2	Detailed analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by Drug Product manufacturer is required.
3.	3.2.S.4.3	Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer drug substance(s) shall be submitted.
4.	3.2.S.4.4	COA of drug substance by drug product mentioned BP specification complies while drug substance is not available in BP Pharmacopeia.
5.	3.2.P.1	Innovator product add Hydrochloric acid/ or Sodium hydroxide to adjust pH while in your formulation these are not included than how pH is adjusted.
6.	3.2.P.2.5	Preservative effectiveness studies to be performed as per recommendations of pharmacopoeia) shall be provided.
7.	3.2.P.3.5	Composition in 3.2.P.1 and process validation is different. Clarify.
8.	3.2.P.5.1	• Specification mentioned are USP. While it is not available in USP Pharmacopeia • Innovator product pH range is 5.3 – 5.6 while your pH is 5.5 – 7.0. Clarify.
9.	3.2.P.5.3	Analytical method validation protocol and report for drug product shall be performed.
10.	3.2.P.5.4	The copies of complete analysis of at least two batches shall be provided.
11.	3.2.P.8	• Stability studies are conducted at Real time : 30˚C ± 2˚C / 65% ± 5%RH and Accelerated: 40˚C ± 2˚C / 75% ± 5%RH but water loss test calculation is not done as per ICH guidelines. • Water loss test submitted for only 3 months. Clarify. • Submitted raw data and analytical testing method of assay does not match with each other. • Raw data of stability studies submitted only of 6th month. • Compliance Record of HPLC software 21CFR & audit trail reports on product testing

Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings.

	Dy. No. and date of submission	Dy No. 23154 dated 20-09-2023
	Details of fee submitted	Rs.30,000/- Deposit slip # 087533119
	The proposed proprietary name / brand name	**Surgipad DS Eye Drop (0.2% Ophthalmic Solution)**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each ml contains: Olopatadine Hcl eq. to Olopatadine…….2mg
	Pharmaceutical form of applied drug	Antiallergics
	Pharmacotherapeutic Group of (API)	Ophthalmic Clear solution
	Reference to Finished product specifications	USP
	Proposed Pack size	5 ml
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	PATADAY (USFDA Approved)
	For generic drugs (me-too status)	Olotek-DS Eye Drop manufactured by Innovotek Pharmaceuticals.
	Name and address of API manufacturer.	M/s Precise chemipharma private limited India. Address: C-384 TTC Industrial Area MiDC, Pawane Village, Navi Mumbai, India.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65 ± 5% RH for 60 months.

	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical Equivalence have been established against the Olotek-DS Eye Drop manufactured by Innovotek Pharmaceuticals. by performing quality tests Identification, Description/Appearance, pH, Assay, and Sterility Test,).
	Analytical method validation/verification of product

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (No. 6109110) issued by Food & Adminstration Maharashtra state India, (for Precise Biopharma Pvt Ltd) dated 19-09-2022 and valid till 15-09-2023 (Firm submitted Decleration from drug substance manufacturer that their company name change from Precise chemipharm Pvt Ltd to Precise Biopharma pvt Ltd.)
3.	Documents for the procurement of API with approval from DRAP (in case of import).	An agreement of API's Loan between Medevo (Pvt) Limited and Innovotek pharmaceuticals submitted. Firm has submitted copy of form 5 and Clearance certificate specifying Invoice #EXPI/00055/20-21, dated; 08-07-2020 specifying Olopatadine Hcl Batch #.055008062020 (Innovotek pharmaceuticals)

4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

S.No	Section	Shortcoming
1.	1.6.5	Valid Drug Manufacturing License or Valid Good Manufacturing Practice (GMP) certificate of the Drug Substance manufacturer issued by relevant regulatory authority of country of origin
2.	3.2.S.4.3	Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer both drug substance(s) shall be submitted.
3.	3.2.P.1	Innovator product add Hydrochloric acid/ or Sodium hydroxide to adjust pH while in your formulation these are not included than how pH is adjusted.
4.	3.2.P.2.5	Preservative effectiveness studies to be performed as per recommendations of pharmacopoeia) shall be provided.
5.	3.2.P.5.3	Analytical method validation protocol and report for drug product shall be performed.
6.	3.2.P.6	COA of primary / secondary reference standard including source and lot number shall be provided.
7.	3.2.P.8	• Stability studies are conducted at Real time : 30˚C ± 2˚C / 65% ± 5%RH and Accelerated: 40˚C ± 2˚C / 75% ± 5%RH but water loss test calculation is not done as per ICH guidelines. • Water loss test submitted for only 3 months. Clarify. • Submitted raw data does not match with analytical testing method of assay and USP monograph. Clarify. • Initial testing raw data of 3 batches not submitted. • Compliance Record of HPLC software 21CFR & audit trail reports on product testing. • Submit clearance certificate in readable form.

Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings.

	Pharmacotherapeutic Group of (API)	Clear, colourless transparent solution filled in Clear glass ampoule USP type 1
	Reference to Finished product specifications	USP
	Proposed Pack size	2mlx5's, 2mlx10's, 2mlx100's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Gentamicin 40mg/ml Injection (2ml) of MHRA Approved
	For generic drugs (me-too status)	Genticyn injection 80mg/2ml of M/s Ray pharma, (Reg. No. 000500)
	Name and address of API manufacturer.	Fuan pharmaceutical group Yantai Justaware Pharmaceutical Co,. Limited No.1 Yanfu Road, Zhifu District, Shandong Province, China
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubility's, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6

		months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 60 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted pharmaceutical equivalence of their product against the Genticyn injection manufactured by Ray pharma by performing quality tests Identification, Description/Appearance, pH, Assay, and Sterility Test,).
	Analytical method validation/verification of product	

STABILITY STUDY DATA

Manufacturer of API	Fuan pharmaceutical group Yantai Justaware Pharmaceutical Co,. Limited No.1 Yanfu Road, Zhifu District, Shandong Province, China		
API Lot No.	201909005		
Description of Pack (Container closure system)	2ml x 100's Ampoules		
Stability Storage Condition	Real time : 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	GT-001	GT-002	GT-003
Batch Size	500 Ampoules	500 Ampoules	500 Ampoules
Manufacturing Date	03-2023	03-2023	03-2023
Date of Initiation	19-03-2023	19-03-2023	19-03-2023
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP Certificate (No. SD20190963) dated 17-07-2019 issued by China Food and Drug Administration. The certificate is valid till 16-07-2024
3.	Documents for the procurement of API with approval from DRAP (in case of import).	An agreement of API's Loan between M/s DS pharma and M/s NS pharma submitted. Firm has submitted copy of form 5 and Commercial Invoice #VET19100802, dated; 08-10-2019 cleared by DRAP (Lahore) dated: 16-10-2019 specifying. Gentamicin sulphate Batch # 201909005 (M/s NS pharma)

4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	NA
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

S.No	Section	Shortcoming
1.	3.2.S.4.2	• Provide standard and sample preparation in detail instead of mentioning suitable quantity. • USP Microbial assay specify 5 standard concentration (S_{1-} $S_{5)}$ while you are using 3 standard concentrations. Clarify.
2.	3.2.S.4.3	Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer drug substance(s) in accordance to USP microbial assay shall be submitted.
3.	3.2.P.1	• Propylene Glycol is not used by reference product while you are using . Justify. • In reference product Sulphuric acid (2.5N) & Sodium hydroxide are used for pH adjustment while in your product these are not added than pH adjustment is done.
4.	3.2.P.5.1	Innovator specifications are mentioned while in section 1.5.6 USP specifications are applied. Clarify.
5.	3.2.P.5.2	• Provide standard and sample preparation in detail instead of mentioning suitable quantity. • USP Microbial assay specify 5 standard concentration (S_{1-} $S_{5)}$ while you are using 3 standard concentrations. Clarify. • Calculations details for microbial assay not submitted.
6.	3.2.P.5.3	Assay is performed by microbial assay while analytical method verification submitted by HPLC method. Justify.
7.	3.2.P.6	COA of primary / secondary reference standard including source and lot number shall be provided
8.	3.2.P.7	Submit details of primary Container Closure System.
9.	3.2.P.8	• Raw data for microbial Assay not submitted. • Submit 6th month stability studies data.

Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings.

1.	Reference of previous approval of applications with stability study data of the firm (if any)	
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	
3.	Documents for the procurement of API with approval from DRAP (in case of import).	**Sitagliptin Phosphate Monohydrate:** Letter for API's Loan from M/s Seraph Pharmaceuticals submitted. Firm has submitted copy of Clearance certificate # E-5186186525926, dated; 04-05-2023 specifying Invoice No # HN230314S-E dated: 22-03-2022 Sitagliptin Phosphate Monohydrate batch #. L-D06-CP11422014 (Seraph Pharmaceuticals). **Metformin Hydrochloride:** Letter for API's Loan from M/s Seraph Pharmaceuticals submitted. Firm has submitted copy of Clearance certificate # E-1760286526132, dated; 01-07-2022 specifying Invoice No # EXP/602/22-23 dated: 26-05-2022 Metformin Hydrochloride batch # MEF/12030815 (Seraph Pharmaceuticals)
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Our HPLC system is not 21 CFR compliant.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

S.No	Section	Shortcoming
1.	1.5.5	Submit Correct pharmacological group with submission of requisite fee.
2.	1.6.5	Valid Drug Manufacturing License or Valid Good Manufacturing Practice (GMP) certificate of the Drug Substance manufacturer for Sitagliptin phosphate & Metformin hydrochloride issued by relevant regulatory authority of country of origin
3.	2.3.R.1.1	Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3
4.	3.2.S.4.1	BP Specification are claimed for Metformin HCl however, Certificate of analysis provided as per USP monograph by drug product manufacturer.

5.	3.2.S.4.2	Assay method for Metformin HCl by drug product manufacturer is not as specified in the BP monograph. Clarification is required.
6.	3.2.S.4.3	Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer drug substance (Metformin HCl) shall be submitted
7.	3.2.S.4.4	• Drug substance manufacturer of Metformin HCl claimed BPSpecifications but you have submitted Certificate of analysis as per USP Specifications. Clarification is required. • Assay limits of Metformin HCl are not mentioned in COA by drug product manufacturer.
8.	3.2.S.5	COA of primary / secondary reference standard including source and lot number for Metformin HCl shall be provided
9.	3.2.P.2.1.1	Compatibility studies of the Drug Substance(s) with excipients shall be provided as the qualitative composition of the formulation is not similar to innovator / reference product i.e Lactose monohydrate and Primojel.
10.	3.2.P.2.2.1	Time points in Comparative dissolution method are 05, 15, and 30minutes while in data time points are 10, 15, 20, and 30 minutes. Clarification is required for difference in time points.
11.	3.2.P.6	COA of primary / secondary reference standard including source and lot number for both Sitagliptin phosphate and Metformin HCl shall be provided
12.	3.2.P.8	Manufacturing of stability batches conducted in March 2023 while approval of Metformin HCL from DRAP in May 2023. Clarification is required.

Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings.

566.	Name, address of Applicant / Marketing Authorization Holder	Pasteur and Fleming pharma Plot No. P.70-A, Phase 3, Road No. 04, Industrial Area Hattar
	Name, address of Manufacturing site.	Pasteur and Fleming pharma Plot No. P.70-A, Phase 3, Road No. 04, Industrial Area Hattar

	The proposed proprietary name / brand name	PASMIT 50/1000MG TABLET
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated tablet contains: Sitagliptin as phosphate monohydrate……50mg Metformin hydrochloride..... 1000mg
	Pharmaceutical form of applied drug	Antidiabetic
	Pharmacotherapeutic Group of (API)	Film coated tablet
	Reference to Finished product specifications	Innovator's specifications
	Proposed Pack size	As per SRO

	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Janumet Tablet 50/1000 by Merck Sharp & Dohme Corp, USA of (USFDA Approved)
	For generic drugs (me-too status)	Treviamet Tablet of M/s Getz Pharma.
	Name and address of API manufacturer.	**Sitagliptin Phosphate Monohydrate:** M/s Fuxin Long Rui Pharmaceutical CO.,Ltd. Fluoride Industrial Park, Fumeng County(Yi Ma Tu), Fuxin City, Liaoning Province -123000, China **Metformin Hydrochloride:** M/s. Aarti Drugs Limited. Plot No. 211 - 213, Road No.2, G.I.D.C., Sarigam, Dist.: Valsad, Gujarat . INDIA.396155
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubility's, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	**Sitagliptin Phosphate Monohydrate:** Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40˚C ± 2˚C / 75% ± 5%RH RH for 6 months. The real time stability data is conducted at 30˚C ± 2˚C / 65% ± 5%RH for 24 months. **Metformin Hydrochloride:** Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40˚C ± 2˚C / 75% ± 5%RH RH for 6 months. The real time stability data is conducted at 30˚C ± 2˚C / 65% ± 5%RH for 60 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted pharmaceutical equivalence of their product against the product Janumet by performing quality tests Identification, Weight

		variation, Disintegration Time, Uniformity of dosage unit , Dissolution, Assay. CDP has been performed against the 'Janumet Tablets in Acidic media (pH 1.2), Acetate Buffer (pH 4.5) & Phosphate Buffer (pH 6.8). The f2 values are in the acceptable range.
	Analytical method validation/verification of product	Firm has submitted analytical method verification study reports for as drug product.

10.	3.2.P.5.2	In analytical testing method of assay, in sample solution preparation how 500mg Metformin HCl makes 1mg/ml of concentration.
11.	3.2.P.6	COA of primary / secondary reference standard including source and lot number for both Sitagliptin phosphate and Metformin HCl shall be provided
12.	3.2.P.8	• Manufacturing of stability batches conducted in March 2023 while approval of Metformin HCL from DRAP in May 2023. Clarification is required. • In raw data of both Accelerated and Real time stability studies at all time points concentration of Metformin HCl used is 0.5mg/ml while in analytical testing method Concentration of Metformin HCl mentioned is 1.0mg/ml. Clarification is required.

Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings.

b. New/Additional section(s)

Deferred case

M/s British Pharmaceuticals. 23-Km Sheikhupura Road, Lahore

CLB in its 273rd meeting held on 15th January 2020, has approved the following 3 additional sections of M/s British Pharmaceuticals

1.Capsule Section (General)
2.Dry Powder Section (General)
3.Tablet Section (General)

567.	Name, address of Applicant / Marketing Authorization Holder	M/s British Pharmaceuticals. 23-Km Sheikhupura Road, Lahore
	Name, address of Manufacturing site.	M/s British Pharmaceuticals. 23-Km Sheikhupura Road, Lahore
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 20289 dated 18-07-2022
	Details of fee submitted	PKR 30,000/-: Deposit slip # 86328899583
	The proposed proprietary name / brand name	Bricit 10mg Tablet
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Film Coated Tablet Contains:- Cetirizine Dihydrochloride ……10mg
	Pharmaceutical form of applied drug	White oblong shape film coated tablet
	Pharmacotherapeutic Group of (API)	Histamine Receptor Antagonist
	Reference to Finished product specifications	USP
	Proposed Pack size	1x10's, 2x10's, 10x10's, Blister
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Cetirizine film coated tablets of MHRA Approved
	For generic drugs (me-too status)	Histex 10mg Tablet M/s Pharmatec Pakistan, Reg. No. 020342
	GMP status of the Finished product manufacturer	Renewal of DML granted dated 12-01-2022.
	Name and address of API manufacturer.	M/s Sreekara Organics Plot No. 159/A, S.V. Co-op. Ind. Estate India
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubility's, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of Cetirizine Dihydrochloride is present in USP. The firm as submitted detail of nomenclature, structure, general properties, solubility's, physical form, manufacturers, description of manufacturing process and controls, tests for impurity, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 60 months

		Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: CZ/V/00611, CZ/V/00511, CZ/V/00411)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence has been established against the brand leader that is Rigix 10mg tablet by AGP Pharma. by performing quality tests (Identification, Assay, Dissolution, Uniformity of dosage form). CDP has been performed against the same brand that is Bricit 10mg tablet by British Pharma in Acid media (pH 1.0-1.2) Acetate buffer (pH 4.5)& Phosphate Buffer (pH 6.8). The values for f1 and f2 are in the acceptable range.
	Analytical method validation/verification of product	Method verification studies have submitted including accuracy, precision, specificity.

Manufacturing Date	26-08-2021	26-08-2021	26-08-2021
Date of Initiation	27-08-2021	27-08-2021	27-08-2021
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate # L.Dis.No:82408/TS/2022 issued by Drug Control Administration Governament of Telangana issued on 15-03-2022 and valid until 14-03-2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of Form 3, 5 ,7 from & invoice (invoice# ZHI-CI/5465/0621) dated: 26-06-2021 cleared by DRAP Lahore office dated 12-07-2021 specifying import 100Kg Cetirizine 2HCl (Batch# CTZ03521

4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	The firm has submitted Data of stability batches supported by attested respective documents like chromatograms, raw data sheets, COA, summary data sheets etc.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	The firm has submitted Compliance Record of HPLC software 21CFR & audit trail reports on product testing.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	The firm has submitted Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).

Remarks of Evaluator:

S.No	Section	Shortcomings Communicated	Reply
1.	1.6.5	Valid Drug Manufacturing License Or Valid Good Manufacturing Practice (GMP) certificate of the Drug Substance manufacturer issued by relevant regulatory authority of country of origin.	Valid Good Manufacturing Practice (GMP) certificate of the Drug Substance manufacturer issued by relevant regulatory authority of country of origin submitted.
2.	2.3.R.1.1	In manufacturing of stability batches production Overage of Cetirizine 2HCl is Used. Clarification is required.	Overage was not used in stability batches. There was a calculation error observed in the manufacturing order. Revised document is attached.
3.	3.2.S.4.3	Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the British Pharmaceuticals for drug substance(s) instead of drug product shall be submitted.	Analytical Method Verification studies including accuracy and repeatability performed by theBritish Pharmaceuticals for drug substance(s) are submitted. But specificity not submitted.
4.	3.2.S.4.4	In COA of drug substance by drug product manufacturer Residue on ignition and loss on drying are mentioned as complies and ok. Clarify.	Revised COA is attached with values of Residue on ignition and loss on drying.
5.	3.2.P.5.2	The manufacturer shall mention dissolution test No as per requirement of USP monograph.	Dissolution Test 1 was used for testing of the product.
6.	3.2.P.5.3	Performance of accuracy & precision parameter during analytical method verification studies has not been conducted as per recommendations of ICH Q2 (R1) guidelines. Specificity is not done for drug product	**No reply submitted.**

Previous Decision (M-326): Deferred for submission of following**:**

- Performance of Specificity parameter in the analytical method verification studies of drug substance by drug product manufacturer.
- Analytical method verification studies of drug product .

S.No	Reason of deferment	Reply
1.	Performance of Specificity parameter in the analytical method verification studies of drug substance by drug product manufacturer.	Specificity parameter in the analytical method verification studies of drug substance by drug product manufacturer performed and submitted.
2.	Analytical method verification studies of drug product.	Analytical method verification studies of drug product Submitted.

Decision: Approved with USP specifications.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

M/s PDH Laboratories Pvt Ltd. **(New Section)**
CLB in its 285th meeting held on 17th & 18th March 2022, has approved the following 01 additional sections of M/s PDH Laboratories Pvt Ltd.

1.Oral liquid Section (General) Additional

568.	Name, address of Applicant / Marketing Authorization Holder	M/s PDH Laboratories Pvt Ltd. 9.5 km, Sheikhupura Road, Lahore, Pakistan
	Name, address of Manufacturing site.	M/s PDH Laboratories Pvt Ltd. 9.5 km, Sheikhupura Road, Lahore, Pakistan
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 3222 dated 03-02-2023
	Details of fee submitted	PKR 30,000/-: Deposit slip # 708047908
	The proposed proprietary name / brand name	Temol Suspension 120mg/5ml
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each 5ml Contains: Paracetamol…….120mg
	Pharmaceutical form of applied drug	Clear, viscous liquid light orange to orange colour
	Pharmacotherapeutic Group of (API)	Analgesic and Antipyretic
	Reference to Finished product specifications	USP
	Proposed Pack size	1's x 60ml
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Paracetamol 120 mg/5 ml Oral Suspension by Pinewood Laboratories Limited, Ireland of MHRA approved.
	For generic drugs (me-too status)	Calpol Pediatric Suspension of M/s GlaxosmithKline Pakistan. No.000354
	GMP status of the Finished product manufacturer	Copy of cGMP certificate on the basis of Evaluation conducted on 04-01-2022 and valid for two years.

	Name and address of API manufacturer.	M/s Saakh Pharma (Pvt) Ltd Address: C-7/1, Nwiz, Port Qasim Karachi.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubility's, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of Paracetamol(Actaminophen) is present in USP. The firm as submitted detail of nomenclature, structure, general properties, solubility's, physical form, manufacturers, description of manufacturing process and controls, tests for impurity, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 18 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (21GN60001, 21GN60002, 21GN60003)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence is established against the brand that is Calpol Suspension by M/s GSK Batch # 372R by performing quality tests (description, Identification, pH, Deliverable Volume, Viscosity, Microbial Enumeration, Assay)
	Analytical method validation/verification of product	Method verification studies have submitted including accuracy, precision, specificity.

STABILITY STUDY DATA

Manufacturer of API	M/s Saakh Pharma (Pvt) Ltd Address: C-7/1, Nwiz, Port Qasim Karachi.
API Lot No.	21GN60187
Description of Pack (Container closure system)	Clear, viscous liquid light orange to orange colour sweet in taste filled in ambered glass bottle of USP type III sealed with Aluminium cap, neatly labelled and packed in a unit carton with insertion of a leaflet
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH
Time Period	Real time: 6 months Accelerated: 6 months
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6, 9, 12 (Months)

Batch No.	T-006	T-007	T-008
Batch Size	40 bottles	40 bottles	40 bottles
Manufacturing Date	11-2021	11-2021	11-2021
Date of Initiation	10-12-2021	10-12-2021	10-12-2021
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of cGMP certificate on the basis of evaluation conducted on 07-10-2022 and valid for 02 years.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not submitted
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	The firm has submitted Data of stability batches supported by attested respective documents like chromatograms, raw data sheets, COA, summary data sheets etc.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	The firm has submitted Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).

Remarks of Evaluator:

S.No	Section	Shortcomings Communicated
1.	3.2.S.4.3	In Drug substance Precision parameter of Analytical method verification is not conducted as per ICH Q2(R1) guidelines. Which states "a minimum of 9 determinations covering the specified range for the procedure (e.g., 3 concentrations/3replicates each) while you have used 6 determinations (3 concentrations /2 replicates each).
2.	3.2.P.2.2.1	In Pharmaceutical Equivalence Test product is tested on USP specifications while GSK product (Reference/Comparator) tested on BP Specifications. Clarify why different specifications are used.
3.	3.2.P.5.2	In Assay final concentrations is 0.01mg/ml while 96 mg of paracetamol from oral suspension taken. Clarify how from 96mg 0.01mg/ml concentration prepared.
4.	3.2.P.5.3	In Drug Product Precision parameter of Analytical method verification is not conducted as per ICH Q2(R1) guidelines. Which states "a minimum of 9 determinations covering the specified range for the procedure (e.g., 3 concentrations/3replicates each) while you have used 6 determinations (3 concentrations /2 replicates each).
5.	3.2.P.8	Purchase Documents for Paracetamol. Compliance Record of HPLC software 21CFR & audit trail reports on product testing

Previous Decision (M-327): Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.

Evaluation:

	3.2.S.4.3	In Drug substance Precision parameter of Analytical method verification is not conducted as per ICH Q2(R1) guidelines. Which states "a minimum of 9 determinations covering the specified range for the procedure (e.g., 3	The revised precision parameter of analytical method verification of drug substance is attached.

		concentrations/3 replicates each) while you have used 6 determinations (3 concentrations /2 replicates each).	
	3.2.P.2.2.1	In Pharmaceutical Equivalence Test product is tested on USP specifications while GSK product (Reference/Comparator) tested on BP Specifications. Clarify why different specifications are used.	The testing of reference product was performed as per claimed product specifications (BP Specs). Temol suspension was built on USP specifications during the product development phase. However revised pharmaceutical equivalence according USP specifications is submitted.
	3.2.P.5.2	In Assay final concentrations is 0.01mg/ml while 96 mg of paracetamol from oral suspension taken. Clarify how from 96mg 0.01mg/ml concentration prepared.	It was typo error .The revised analytical method is submitted. 100mg of paracetamol from oral suspension taken.
	3.2.P.5.3	In Drug Product Precision parameter of Analytical method verification is not conducted as per ICH Q2(R1) guidelines. Which states "a minimum of 9 determinations covering the specified range for the procedure (e.g., 3 concentrations/3 replicates each) while you have used 6 determinations (3 concentrations /2 replicates each).	The revised precision parameter of analytical method verification of drug product is submitted.
	3.2.P.8	• Purchase Documents for Paracetamol. • Compliance Record of HPLC software 21CFR & audit trail reports on product testing	• The API was locally purchased. Purchased documents of paracetamol are attached.(Invoice #PRT/2021/0185 dated: 29-07-2021) • Compliance record of HPLC software 21 CFR & audit trail reports on product testing

Previous Decision (M-330): Deferred for following clarifications:

- Manufacturing facility along with details of equipment's wherein the trial batches have been manufactured along with evidence of approval of required manufacturing facility from CLB.
- Scientific rationale for selecting the batch size of 40 bottles for manufacturing of trial batches, along with the submission of complete record of no. of bottles used in analytical testing of trial batches of finished product at different time points of stability studies.

- Equipment list along with Syrup Section approval from CLB submitted.
- Firm submitted stability data of 03 new batches.

Batch No.	T-10	T-11	T-12
Batch Size	10 Liters	10 Liters	10 Liters
Manufacturing Date	January 2023	January 2023	January 2023
Date of Initiation	07-01-2023	07-01-2023	07-01-2023

Evaluation by PEC:

- Registration Board in its 330th meeting held on 24th July to 26th July 2023 deferred your product for following
- "Scientific rationale for selecting the batch size of 40 bottles for manufacturing of trial batches, along with the submission of complete record of no. of bottles used in analytical testing of trial batches of finished product at different time points of stability studies." However, no clarification/justification of above has been provided.
- 330th meeting of Registration Board was held on 24th July to 26th July 2023 wherein, above Clarification/justification was asked, however, you have manufactured new batches in January-2023. Justification is required.
- Details of equipment's along with their capacity wherein new trial batches have been
- Manufactured.

• Submit details of drug substance used for manufacturing of new stability batches, including batch Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided. • Compliance Record of HPLC software 21CFR & audit trail reports on new batches of product testing..		
Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings.

Remarks of Evaluator:

S.No	Section	Shortcoming
1.	1.6.5	Valid Drug Manufacturing License or Valid Good Manufacturing Practice (GMP) certificate of the Drug Substance manufacturer issued by relevant regulatory authority of country of origin.
2.	2.3.R.1.1	Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3
3.	3.2.S.4.1	Copies of the Drug substance specifications /Active Pharmaceutical Ingredient by Drug Product manufacturer is required.
4.	3.2.S.4.2	Analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required.
5.	3.2.S.4.3	Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance(s) shall be submitted.
6.	3.2.P.2.6	Compatibility studies for the dry powder for injections shall be performed as per the instructions provided in individual label of the drug product
7.	3.2.P.5.2	• What is Standard concentration S_3 and how it is prepared. • Justify your sample preparation for assay in Analytical testing method with reference to USP monograph. • Medium used is different than medium used in USP monograph for bioassay. Clarify.
8.	3.2.P.8	Documents for the procurement Of drug substance show different batch No than submitted COA.

Previous Decision (M-331): Registration Board deferred the case for submission of reply to the above cited shortcomings and evaluation by PE&R Division.

S.No	Section	Shortcoming	
1.	1.6.5	Valid Drug Manufacturing License or Valid Good Manufacturing Practice (GMP) certificate of the Drug Substance manufacturer issued by relevant regulatory authority of country of origin.	Copy of DMLNo. 20160089 issued by NMPA of china valid till 21/9/2025.
2.	2.3.R.1.1	Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3	Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3 submitted.
3.	3.2.S.4.1	Copies of the Drug substance specifications /Active Pharmaceutical Ingredient by Drug Product manufacturer is required.	Copies of the Drug substance specifications /Active Pharmaceutical Ingredient by Drug Product manufacturer are submitted.
4.	3.2.S.4.2	Analytical procedures used for routine testing of the Drug	Analytical procedures used for routine testing of the Drug substance /Active

		substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required.	Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer are submitted.
5.	3.2.S.4.3	Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance(s) shall be submitted.	As the colistime Injection is a sterile Dry powder for injection. In the manufacturing of the Colistime Injection the sterile bulk is received from the manufacturer and then filled aseptically in the selected container closure system. There is no addition of any excipient in the finished product so the AMV performed for the colistime Injection is also applicable for the Colistimethate Sodium.
6.	3.2.P.2.6	Compatibility studies for the dry powder for injections shall be performed as per the instructions provided in individual label of the drug product	Compatibility studies with WFI submitted.
7.	3.2.P.5.2	• What is Standard concentration S_3 and how it is prepared. • Justify your sample preparation for assay in Analytical testing method with reference to USP monograph. • Medium used is different than medium used in USP monograph for bioassay. Clarify.	• Weigh Accurately Colistimethate Sodium working standard equal to 100mg of Colistimethate base in a 10ml volumetric flask. Add 5ml distilled water sonicate for 15 minutes. Then make up volume with water. Take 5ml from 1st dilution in a 50ml volumetric flask make up volume with phosphate buffer pH 6.00. Take 1ml from 2nd dilution in a 100ml volumetric flask make up volume with phosphate buffer pH 6.00. Take 15.7ml from 3rd dilution in a 100ml volumetric flask make up volume with phosphate buffer pH 6.00. Prepare from stock solution four standard dilution the successive solution increases stepwise in concentration usually in a ratio of 1:1.25 • Constitute Colistimethate for injection with 2ml of sterile water for injection (40mg/ml). take 1.25ml from reconstituted injection in 50ml volumetric flask and mak up volume with phosphate buffer of pH 6.0 (1st Dilution)(1mg/ml). Then take 0.1 ml from 1st dilution in 100ml volumetric flask and make up volume with phosphate buffer pH 6.0 (1µg/ml) , U_3 Median concentration. • Mueller-Hinton agar is commonly used for Bio-assay. It has been recommended by the CLSI (Clinical and Laboratories standards institute) as the ideal medium for antibiotics susceptibility testing. It shows good reproducibility from batch to batch.

	3.2.P.8	Documents for the procurement Of drug substance show different batch No than submitted COA.	Firm submitted COA of drug substance batch No# CMS1803004 by both drug substance manufacturer and drug product manufacturer in accordance to import documents as in BMR's batch No# CMS1803004 was used.	

Firm submitted fee of Rs: 67500/- Deposit slip # 1073304864 and Rs: 7500/- Deposit slip # 55652644 for change of name from ICI Pakistan Limited to Lucky Core Industries Limited.

Decision: Approved with USP specifications.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **The registration letter will be issued in the light of procedure approved in this meeting for capacity assessment of the contract accepter**

	Name, address of drug substance manufacturer	M/s Shanghai Jinhe Bio-Pharmaceutical Co., Ltd., No. 508, Maodian road, Liantang, Qingpu dostrict Shaghai 201716, China.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	12 months real time stability data at 30˚C ± 2˚C / 60% ± 5%RH of 03 batches • 06 month accelerated stability data 40˚C ± 2˚C / 75% ± 5%RH of 03 batches

	Module-III Drug Product:	Submitted. Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, verification of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical equivalence is submitted against Paclitaxel Ebewe 30mg/5ml by Ebewe Pharma GmbH KG Austria.
	Analytical method validation/verification of product	Analytical methd verification studies are submitted.
	Container closure system of the drug product	Glass vial with rubber stopper and aluminium caps. Packed in unit carton.
	Stability study data of drug product, shelf life and storage conditions	• months real time stability data at 30˚C ± 2˚C / 65% ± 5%RH of 03 batches • 06 month accelerated stability data 40˚C ± 2˚C / 75% ± 5%RH of 03 batches

Evaluation by PEC-I:

Shortcomings	Response by the firm
Pharmaceutical equivalence of the applied drug shall be established with the innovator / reference / comparator product and results of all the quality tests of the developed formulation and the innovator / reference / comparator product shall be submitted	Pharmaceutical equivalence is submitted against Paclitaxel Ebewe 30mg/5ml by Ebewe Pharma GmbH KG Austria.
A detail of the container closure systems, description of the primary container closure systems, including materials of construction, unit count or fill size, container size or volume shall be provided in section 3.2.P.7 under Container closure system.	Submitted.
Notarized product specific sole agency agreement is required.	Submitted.
Analytical Method Verification studies for Drug Substance performed by the Drug Product manufacturer	The firm has submitted method verification studies for drug substance including specificity, accuracy and repeatability (method precision) performed by drug product manufacturer.
Form-5F is from manufacturer/MAH abroad while it should be from the applicant holding the Drug Sale License.	The firm has submitted form 5F.
Real/long term stability data at 30˚C ± 2˚C / 60% ± 5%RH of 03 batches till shelf life of the applied product is required along with 06 months accelerated stability data at 40˚C ± 2˚C / 75% ± 5%RH in section 3.2.P.8 of module 3 including supporting documents (chromatograms, raw data sheets etc) and summary of the same in section 2.3.P.7 of module 2.	The firm has stated that the applied product is unstable when it is stored at 30ºC while the product is stable below 25ºC during full shelf life.
Scientific justification for selection of ascetic filling instead of terminal sterilization	The firm has stated that: The product is manufactured hermetically sealed insulator, with regular monitoring and all operations including filtration is carried out under ascetic conditions in insulators. (membrane filtes used with a pore size of 0.22um).

		The integrity of filter is check before and after filtration by diffusion flow method using Palltronic Flowstar IV device. Moreover, bioburden in each batch is monitored. The obtained results of validation test on retention capacity of the filter, filter integrity, tests during filtration correspond to the declared sterilizing level. The effectiveness of membrane filters was established by validating retention capacity of the sterilizing filter.	

Previous Decision (M-308): Deferred for submission of long term stability studies conducted according to the zone IV-A till shelf life

Firm submitted Accelerated stability studies for 6 month 40˚C ± 2˚C / 75% ± 5%RH and Real time stability studies data of 2 years at 30˚C ± 2˚C / 65% ± 5%RH of 03 batches.
070614, 181115, 010416

Decision: Approved with USP specifications as per Policy for inspection of Manufacturer abroad.

572.	Name, address of Applicant / Importer	M/s Genome Pharma, House no. 166-A St. # 9, Chaklala Scheme III, Rawalpindi.
	Details of Drug Sale License of importer	DSL No.: 01-374-0176-035673D Address: Genome Pharma, House no. 166-A St. # 9, Chaklala Scheme III, Rawalpindi. Godown: C-19, main commercial, access road, R RCCI Industrial estat rawat, Rawalpindi. Validity: 28/08/2022 Status: license to sell drugs as a Distributor

Agenda of Evaluator PEC-III

Case No. 01 Registration applications of cases of PINSTECH

DRAP Authority in its **161st meeting** held on April 5 and 6, 2023 while considering the request of PINSTECH decided to grant 6 months relaxation under SRO 713(I)/2018 from Form 5F (CTD) for following 8 applications.

The decision of Authority was communicated vide letter F. No. 1-2/2022-DMC on 12th June 2023.

Furthermore, DRAP Authority in its 177th meeting decided as under:

"In order to ensure the availability of rediopharmaceutical therapies in the country, decided to consider requests of registration of following molecules through registration board on priority/ out of queue.

1. **PINSCAN-MAG-3**
2. **PINSCAN-MDP**
3. **PINSCAN Pyrophosphate**
4. **PINSCAN DTPA**
5. **PINSCAN MIBI**
6. **ADENOSINE**
7. **PAKGEN TC-99M Generator**
8. **IODINE-131"**

Accordingly, the following applications have been received and evaluated and presented before the Board for consideration.

573.	Name and address of manufacturer / Applicant	M/s Pakistan Institute of Nuclear Science & Technology, Nilore Islamabad.
	Brand Name +Dosage Form + Strength	PINSCAN MAG-3 Lyophilized powder for injection
	Composition	Each vial contains: Betiatide……1mg
	Diary No. Date of R& I & fee	Dy. No 28494: 11-12-2023 PKR. 75,000/-: 11-12-2023
	Pharmacological Group	For dynamic renal scan study

	Type of Form	Form 5D
	Finished Product Specification	European pharmacopoeia
	Pack size & demanded price	Rs. 1500 / Vial, 5's
	Approval status of product in Reference Regulatory Authorities.	**TGA Australia** (Technescan MAG 3 Kit for preparation of Technitium 99m Tc mertiatide powder for injection multidose vial
	Me-too status	NA
	GMP status	Inspection report of the firm dated 17-05-2017 wherein the panel recommended renewal of DML was presented by the firm.
	Clinical indications of Reference product	For use in the preparation of Technetium TC99m mertiatide for use as a renal imaging agent and for estimating split renal function. INDICATIONS AS AT 19 JULY 2001: Technetium Tc 99m mertiatide is a renal imaging agent for use in the diagnosis of congenital and acquired abnormalities, renal failure, urinary tract obstruction, and calculi in adults and pediatric patients. (See Pediatric Use.) It is a diagnostic aid in providing renal function, split function, renal angiograms, and renogram curves for whole kidney and renal cortex.
	Remarks of the Evaluator[3].	• GMP inspection report conducted within a period of last three years.
	Decision: Approved. **Firm will submit following documents and the Board Authorized its Chairman for issuance of registration letter.** • **Updated GMP certificate / inspection report of the firm conducted within a period of last three years.**	
574.	Name and address of manufacturer / Applicant	M/s Pakistan Institute of Nuclear Science & Technology, Nilore Islamabad.
	Brand Name +Dosage Form + Strength	PINSCAN MDP Lyophilized powder for injection
	Composition	Each vial contains: Medronic acid……10mg
	Diary No. Date of R& I & fee	Dy. No 28495: 11-12-2023 PKR. 75,000/-: 11-12-2023
	Pharmacological Group	Bone imaging agent
	Type of Form	Form 5D
	Finished Product Specification	European pharmacopoeia
	Pack size & demanded price	Rs. 1500 / Vial
	Approval status of product in Reference Regulatory Authorities.	**TGA Australia** RADPHARM MDP kit for the production of Technetium (99mTc) medronate powder for injection multidose vial

	Me-too status	NA
	GMP status	Inspection report of the firm dated 17-05-2017 wherein the panel recommended renewal of DML was presented by the firm.
	Clinical indications of Reference product	INDICATIONS AS AT 25 SEPTEMBER 1996: Technetium (99mTc) medronate may be used as a skeletal imaging pharmaceutical.
	Remarks of the Evaluator[3].	• GMP inspection report conducted within a period of last three years.
	Decision: Approved. **Firm will submit following documents and the Board Authorized its Chairman for issuance of registration letter.** • **Updated GMP certificate / inspection report of the firm conducted within a period of last three years.**	
575.	Name and address of manufacturer / Applicant	M/s Pakistan Institute of Nuclear Science & Technology, Nilore Islamabad.
	Brand Name +Dosage Form + Strength	PINSCAN Pyrophosphate Lyophilized powder for injection
	Composition	Each vial contains: Sodium pyrophosphate……12mg
	Diary No. Date of R& I & fee	Dy. No 28496: 11-12-2023 PKR. 75,000/-: 11-12-2023
	Pharmacological Group	Blood pool imaging agent, cardiac and skeletal imaging agent.
	Type of Form	Form 5D
	Finished Product Specification	European pharmacopoeia
	Pack size & demanded price	Rs. 1500 / Vial
	Approval status of product in Reference Regulatory Authorities.	CIS-PYRO TECHNETIUM TC-99M PYROPHOSPHATE KIT **(USFDA Approved)**
	Me-too status	NA
	GMP status	Inspection report of the firm dated 17-05-2017 wherein the panel recommended renewal of DML was presented by the firm.
	Clinical indications of Reference product	Bone imaging agent used to demonstrate areas of altered osteogenic and a cardiac imaging agent used as an adjunct in the diagnosis of acute myocardial infarction
	Remarks of the Evaluator[3].	• GMP inspection report conducted within a period of last three years.
	Decision: Approved. **Firm will submit following documents and the Board Authorized its Chairman for issuance of registration letter.** • **Updated GMP certificate / inspection report of the firm conducted within a period of last three years.**	

576.	Name and address of manufacturer / Applicant	M/s Pakistan Institute of Nuclear Science & Technology, Nilore Islamabad.
	Brand Name +Dosage Form + Strength	PINSCAN DTPA Lyophilized powder for injection
	Composition	Each vial contains: Pentetic acid……10mg
	Diary No. Date of R& I & fee	Dy. No 28497: 11-12-2023 PKR. 75,000/-: 11-12-2023
	Pharmacological Group	For dynamic renal scan and brain study
	Type of Form	Form 5D
	Finished Product Specification	European pharmacopoeia
	Pack size & demanded price	Rs. 1500 / Vial
	Approval status of product in Reference Regulatory Authorities.	**TGA Australia** PENTASTAN Kit for preparation of Technetium(99mTc) pentetate powder for injection
	Me-too status	NA
	GMP status	Inspection report of the firm dated 17-05-2017 wherein the panel recommended renewal of DML was presented by the firm.
	Clinical indications of Reference product	99mTc-Pentastan may be used to perform kidney-imaging, brain imaging, to assess renal perfusion and estimate glomeruler filtration rate
	Remarks of the Evaluator[3].	• GMP inspection report conducted within a period of last three years.
	Decision: Approved. **Firm will submit following documents and the Board Authorized its Chairman for issuance of registration letter.** • **Updated GMP certificate / inspection report of the firm conducted within a period of last three years.**	
577.	Name and address of manufacturer / Applicant	M/s Pakistan Institute of Nuclear Science & Technology, Nilore Islamabad.
	Brand Name +Dosage Form + Strength	PINSCAN MIBI Lyophilized powder for injection
	Composition	Each vial contains: Tetrakis(2-methoxyisobutylisonitrile) copper(1) tetrafluoroborate……1mg
	Diary No. Date of R& I & fee	Dy. No 28498: 11-12-2023 PKR. 75,000/-: 11-12-2023
	Pharmacological Group	As adjunct in the diagnosis of ischemic heart disease
	Type of Form	Form 5D

	Finished Product Specification	European pharmacopoeia
	Pack size & demanded price	Rs. 6000 / Vial
	Approval status of product in Reference Regulatory Authorities.	**TGA Australia** TECHNESCAN SESTAMIBI kit for the preparation of technetium [99m Tc] sestamibi injection
	Me-too status	NA
	GMP status	Inspection report of the firm dated 17-05-2017 wherein the panel recommended renewal of DML was presented by the firm.
	Clinical indications of Reference product	Technetium [99m Tc] Sestamibi is indicated for use in conjunction with stress testing as an adjunct in the diagnosis of ischaemic heart disease. In these patients additional information about ventricular function may be derived by using the first pass technique. Technetium [99m Tc]Sestamibi is indicated as a second line diagnostic aid to assistin the evaluation of patients for whom mammography is inconclusive.
	Remarks of the Evaluator[3].	• GMP inspection report conducted within a period of last three years.
	Decision: Approved. **Firm will submit following documents and the Board Authorized its Chairman for issuance of registration letter.** • **Updated GMP certificate / inspection report of the firm conducted within a period of last three years.**	
578.	Name and address of manufacturer / Applicant	M/s Pakistan Institute of Nuclear Science & Technology, Nilore Islamabad.
	Brand Name +Dosage Form + Strength	PINSCAN Adenosine 30mg/10ml Sterile solution for injection
	Composition	Each 10ml vial contains: Adenosine……30mg (3.0mg/ml)
	Diary No. Date of R& I & fee	Dy. No 28499: 11-12-2023 PKR. 75,000/-: 11-12-2023
	Pharmacological Group	Coronary vasodilator for intravenous use
	Type of Form	Form 5D
	Finished Product Specification	European pharmacopoeia
	Pack size & demanded price	Rs. 2500 / Vial
	Approval status of product in Reference Regulatory Authorities.	**TGA Australia** ADENOVIEW adenosine 30 mg/10 mL solution for injection vial
	Me-too status	NA
	GMP status	Inspection report of the firm dated 17-05-2017 wherein the panel recommended renewal of DML was presented by the firm.

	Clinical indications of Reference product	ADENOVIEW is a coronary vasodilator for intravenous use in conjunction with radionuclide myocardial perfusion imaging, in patients unable to exercise adequately.
	Remarks of the Evaluator[3].	• GMP inspection report conducted within a period of last three years.
	Decision: Approved. **Firm will submit following documents and the Board Authorized its Chairman for issuance of registration letter.** • **Updated GMP certificate / inspection report of the firm conducted within a period of last three years.**	
579.	Name and address of manufacturer / Applicant	M/s Pakistan Institute of Nuclear Science & Technology, Nilore Islamabad.
	Brand Name +Dosage Form + Strength	PAKGEN^{99} Mo/^{99}m Tc Generator Injectable (Elute from Tc-99m generator with 0.9% Saline and labeled with freeze dried cold kit)
	Composition	Sodium pertechnetate [^{99m}Tc], 18.5 GBq to 37 GBq
	Diary No. Date of R& I & fee	Dy. No 28500: 11-12-2023 PKR. 75,000/-: 11-12-2023
	Pharmacological Group	Diagnostic radiopharmaceutical
	Type of Form	Form 5D
	Finished Product Specification	European pharmacopoeia
	Pack size & demanded price	37MBQ (1mCi): Rs 400 per mCi
	Approval status of product in Reference Regulatory Authorities.	**TGA Australia** TECHNELITE Molybdenum(99Mo)/Technetium(99mTc) sterile Generator for production of Sodium pertechnetate(99mTc) injection multidose vial
	Me-too status	NA
	GMP status	Inspection report of the firm dated 17-05-2017 wherein the panel recommended renewal of DML was presented by the firm.
	Clinical indications of Reference product	Technetium [99mTc] generator is used for the preparation of Sodium Pertechnetate 99m Tc injection. SodiumPertechnetate 99mTc is used as an agent for: Brain Imaging, Thyroid Imaging, Salivary Gland Imaging, Blood Pool Imaging..
	Remarks of the Evaluator[3]. • GMP inspection report conducted within a period of last three years. • The reference product is approved as under:

11 DESCRIPTION

Sodium Iodide I 131 (Na I-131) Solution Therapeutic is supplied for oral administration as a stabilized aqueous solution. The solution is available in vials that contain from 185 to 5550 MBq (5 to 150 mCi) iodine-131 at the time of calibration. Sodium Iodide I 131 Solution Therapeutic is packaged in shielded, screw-cap 15 mL vials.

The solution contains 0.1% sodium bisulfite and 0.2% edetate disodium as stabilizers, 0.5% sodium phosphate anhydrous as a buffer and sodium iodide I-131 at concentrations of 185 or 925 MBq (5 or 25 mCi) per milliliter. The pH has been adjusted to between 7.5 and 9. The iodine-131 utilized in the preparation of the solution contains not less than 99% iodine-131 at the time of calibration. The expiration date is not later than one month after the calibration date. The calibration date and the expiration date are stated on the label.

Decision: Approved with the following claim

Sodium Iodide ($Na^{131}I$)

Firm will submit following documents and the Board Authorized its Chairman for issuance of registration letter.

- **Updated GMP certificate / inspection report of the firm conducted within a period of last three years.**

Case No. 02 Registration applications of Form 5 or Form 5-D submitted along with stability study data submitted before 31st December, 2022 as per decision of Authority.

DOCUMENTS / DATA PROVIDED BY THE APPLICANT		
1.	Reference of previous approval of applications with stability study data of the firm	Last PSI was conducted for Eflozin Tablet, for which the inspection was conducted on 27-09-2019 and the report was presented in 292nd meeting of Registration Board. The report confirms following points: • The HPLC software is not 21CFR compliant. • Yes audit trail can be seen from the software and were shown by the firm on screen
2.	Certificate of Analysis of API from both API Manufacturer and Finished Product manufacturer.	Firm has submitted copy of COA of the drug substance from both API Manufacturer and Finished Product manufacturer.
3.	Method used for analysis of API from both API Manufacturer and Finished Product manufacturer	Firm has submitted copy of method used for analysis of API from both API Manufacturer and Finished Product manufacturer
4.	Stability study data of API from API manufacturer	**Empagliflozin:** Firm has submitted stability study data of 3 batches of drug substance as per zone II conditions **Metformin:** Firm has submitted stability study data of 3 batches of drug substance as per zone IV-B conditions
5.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Empagliflozin:** Firm has submitted copy of DML issued by CFDA China valid till 20-12-2022. **Metformin:** Firm has submitted copy of GMP certificate issued by CFDA China valid till 22-11-2021
6.	Documents for the procurement of API with approval from DRAP (in case of import).	**Empagliflozin:** Firm has submitted copy of commercial invoice cleared dated 30-01-2020 specifying 10Kg Empagliflozin. The invoice is cleared by AD (I&E) DRAP. **Metformin:** Firm has submitted copy of commercial invoice cleared dated 16-06-2020 specifying 3000Kg Metformin. The invoice is cleared by AD (I&E) DRAP.
7.	Protocols followed for conduction of stability study	Firm has submitted protocols followed for conduction of stability study

8.	Method used for analysis of FPP	Firm has provided detailed method for analysis of FPP
9.	Drug-excipients compatibility studies (where applicable)	Firm has used same excipients as that of the innovator's product therefore compatibility studies are not required
10.	Complete batch manufacturing record of three stability batches.	Firm has provided Batch Manufacturing Record for all the batches
11.	Record of comparative dissolution data (where applicable)	Firm has submitted CDP results of their product against Xenglu-Met tablet of Hilton Pharma
12.	Data of 03 batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted documents like chromatograms, raw data sheets, COA, summary data sheets for the stability studies
13.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	Submitted
14.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Evaluation by PEC:

- Submit stability study data of empagliflozin API as per zone IV-A conditions.

Decision: Deferred for following submissions:

- **Stability study data of empagliflozin API as per zone IV-A conditions.**
- **Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.**

STABILITY STUDY DATA

Manufacturer of API	Shijiazhuang Lonzeal Pharmaceutical Co Ltd. Industrial Zone Shenze (No. 16 West Ring Road) China

API Lot No.	1900016091		
Description of Pack (Container closure system)	Alu-Alu blister foil with unit carton		
Stability Storage Condition	Accelerated: 40˚C ± 2˚C / 75% ± 5%RH Real Time: 30˚C ± 2˚C / 65% ± 5%RH		
Time Period	Accelerated: 6 Months Real Time: 6 Months		
Frequency	Real Time: 0,3 & 6 (months) Accelerated: 0,3, 6 (months)		
Batch No.	TNJ-PB-025001	TNJ-PB-025002	TNJ-PB-025003
Batch Size	1000 Tablet	1000 Tablet	1000 Tablet
Manufacturing Date	04-2020	04-2020	04-2020
Date of Initiation	28-04-2020	28-04-2020	28-04-2020
No. of Batches	03		

DOCUMENTS / DATA PROVIDED BY THE APPLICANT

1.	Reference of previous approval of applications with stability study data of the firm	Last PSI was conducted for Lansodex Capsule, for which the inspection was conducted on 10-12-2018 and the report was presented in 287th meeting of Registration Board. The report confirms following points: • The HPLC software is not 21CFR compliant. • Yes audit trail can be seen from the software and were shown by the firm on screen
2.	Certificate of Analysis of API from both API Manufacturer and Finished Product manufacturer.	Firm has submitted copy of COA of the drug substance from both API Manufacturer and Finished Product manufacturer.
3.	Method used for analysis of API from both API Manufacturer and Finished Product manufacturer	Firm has submitted copy of method used for analysis of API from both API Manufacturer and Finished Product manufacturer
4.	Stability study data of API from API manufacturer	Firm has submitted stability study data of 3 batches of drug substance as per refrigerating conditions
5.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate issued by CFDA China valid till 19-09-2024

6.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice cleared dated 20-03-2020 specifying 122g API. The invoice is cleared by AD (I&E) DRAP.
7.	Protocols followed for conduction of stability study	Firm has submitted protocols followed for conduction of stability study
8.	Method used for analysis of FPP	Firm has provided detailed method for analysis of FPP
9.	Drug-excipients compatibility studies (where applicable)	Firm has used same excipients as that of the innovator's product therefore compatibility studies are not required
10.	Complete batch manufacturing record of three stability batches.	Firm has provided Batch Manufacturing Record for all the batches
11.	Record of comparative dissolution data (where applicable)	Not submitted
12.	Data of 03 batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted documents like chromatograms, raw data sheets, COA, summary data sheets for the stability studies
13.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	Submitted
14.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Evaluation by PEC:

- CDP studies are not provided by the firm

Decision: Deferred for submission of comparative dissolution profile (CDP) studies with innovator / reference product.

Sr. No.	Name & Address of Manufacturer / Applicant	Brand Name (Proprietary Name + Dosage Form + Strength), Composition, Pharmacological Group, Finished Product Specification	Type of Form, Initial Diary & Date, Fee (including differential fee), Demanded Price / Pack size	International Availability GMP Inspection Report Date & Remarks
587.	M/s Jenner Pharmaceuticals Pvt Ltd. 26-km, Lahore Sharaqpur Road, Sheikhupura	Ertujen 5mg Tablet Each Film Coated Tablet Contains: Ertugliflozin As L Pyroglutamic Acid…5mg (Anti-diabetic) In-house specifications	Form 5D Dy No. 16130 07-03-2019 PKR. 50,000/- 06-03-2019 As per SRO	Approved by USFDA Firm has submitted copy of last inspection report conducted on 04-06-2022 for grant of GMP certificate wherein it was concluded that the firm

				has maintained a good level of GMP compliance

Date of submission of stability study data: 26-04-2021

DOCUMENTS / DATA PROVIDED BY THE APPLICANT

1.	Reference of previous approval of applications with stability study data of the firm	Last PSI was conducted for Lansodex Capsule, for which the inspection was conducted on 10-12-2018 and the report was presented in 287th meeting of Registration Board. The report confirms following points: • The HPLC software is not 21CFR compliant. • Yes audit trail can be seen from the software and were shown by the firm on screen
2.	Certificate of Analysis of API from both API Manufacturer and Finished Product manufacturer.	Firm has submitted copy of COA of the drug substance from both API Manufacturer and Finished Product manufacturer.

3.	Method used for analysis of API from both API Manufacturer and Finished Product manufacturer	Firm has submitted copy of method used for analysis of API from both API Manufacturer and Finished Product manufacturer
4.	Stability study data of API from API manufacturer	**Empagliflozin:** Firm has submitted stability study data of 3 batches of drug substance as per zone IV-A conditions **Metformin:** Firm has submitted stability study data of 3 batches of drug substance as per zone IV-A conditions
5.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Empagliflozin:** Firm has submitted copy of GMP certificate issued by CFDA China dated 28/12/2020. **Metformin:** Firm has submitted copy of GMP certificate issued by Food and Drugs Control Administration, Gujrat State India dated 20-03-2020
6.	Documents for the procurement of API with approval from DRAP (in case of import).	**Empagliflozin:** Firm has submitted copy of commercial invoice cleared dated 08-11-2019 specifying 290g Empagliflozin. The invoice is cleared by AD (I&E) DRAP. **Metformin:** Firm has submitted copy of commercial invoice cleared dated 22-02-2019 specifying 200Kg Metformin. The invoice is cleared by AD (I&E) DRAP.
7.	Protocols followed for conduction of stability study	Firm has submitted protocols followed for conduction of stability study
8.	Method used for analysis of FPP	Firm has provided detailed method for analysis of FPP
9.	Drug-excipients compatibility studies (where applicable)	Firm has used same excipients as that of the innovator's product therefore compatibility studies are not required
10.	Complete batch manufacturing record of three stability batches.	Firm has provided Batch Manufacturing Record for all the batches
11.	Record of comparative dissolution data (where applicable)	Firm has submitted CDP results of their product against Diampa-M tablet of Getz Pharma
12.	Data of 03 batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted documents like chromatograms, raw data sheets, COA, summary data sheets for the stability studies
13.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	Submitted
14.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted
Evaluation by PEC:		
•		
Decision: Approved with Innovator's specifications. • **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.** • **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.** • **Firm shall submit 7,500/- fee for revision of specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.**

Evaluation by PEC:

- Duplicate dossier was submitted which was sent to R&I for verification, R&I section has submitted that "The application for Paineze Tablet was received in R&I section of DRAP on 10-02-2015. Representative of the pharma has also produced the original receiving. However, staff has made the entry of R&I register vide Dy No 839 on same date but company name was mentioned "Wilson" instead of "Werrick" Extract taken from R&I section is attached for ready reference"
- Firm has submitted copy of 20,000 fee, while the application was submitted on Form 5D.

Decision: Approved with Innovator's specifications.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Firm shall submit balance fee since the application was submitted on Form 5D and the fee of 20,000 was submitted.**
- **Firm shall submit 7,500/- fee for revision of specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.**

DOCUMENTS / DATA PROVIDED BY THE APPLICANT

1.	Reference of previous approval of applications with stability study data of the firm	Firm has referred to onsite inspection report of their product "Dascot Tablet", which was conducted on 26-01-2018, and was presented in 278th meeting of Registration Board. The report confirms: • The HPLC software is 21CFR Compliant. • Audit trail on testing reports is available
2.	Certificate of Analysis of API from both API Manufacturer and Finished Product manufacturer.	Firm has submitted copy of COA of the drug substance from both API Manufacturer and Finished Product manufacturer.

3.	Method used for analysis of API from both API Manufacturer and Finished Product manufacturer	Firm has submitted copy of method used for analysis of API from both API Manufacturer and Finished Product manufacturer
4.	Stability study data of API from API manufacturer	Firm has submitted stability study data of 3 batches of drug substance as per zone IV-A conditions.
5.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted Copy of GMP Certificate issued by FDA (Maharashtra State) dated 28-01-2020.
6.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice cleared dated 19-02-2018 specifying 10g API. The invoice is cleared by AD (I&E) DRAP.
7.	Protocols followed for conduction of stability study	Firm has submitted protocols followed for conduction of stability study
8.	Method used for analysis of FPP	Firm has provided detailed method for analysis of FPP
9.	Drug-excipients compatibility studies (where applicable)	Firm has used same excipients as that of theinnovator's product therefore compatibility studies arenot required
10.	Complete batch manufacturing record of three stability batches.	Firm has provided Batch Manufacturing Record for all the batches
11.	Record of comparative dissolution data (where applicable)	Firm has submitted CDP results of their product against the innovator's product Daliresp
12.	Data of 03 batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
13.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	Submitted
14.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Date of Initiation	06-09-2019	06-09-2019	06-09-2019
No. of Batches	03		

DOCUMENTS / DATA PROVIDED BY THE APPLICANT		
1.	Reference of previous approval of applications with stability study data of the firm	No PSI inspection of the firm has been conducted
2.	Certificate of Analysis of API from both API Manufacturer and Finished Product manufacturer.	Firm has submitted copy of COA of the drug substance from both API Manufacturer and Finished Product manufacturer.
3.	Method used for analysis of API from both API Manufacturer and Finished Product manufacturer	Firm has submitted copy of method used for analysis of API from both API Manufacturer and Finished Product manufacturer
4.	Stability study data of API from API manufacturer	Firm has submitted stability study data of 3 batches of drug substance as per zone IV-A conditions
5.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of DML (No. 20170622) dated 20-12-2022 issued by Food and Drugs Administration China.

6.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice cleared dated 20-06-2019 specifying 8.42Kg API.The invoice is cleared by AD (I&E) DRAP.
7.	Protocols followed for conduction of stability study	Firm has submitted protocols followed for conduction of stability study
8.	Method used for analysis of FPP	Firm has provided detailed method for analysis of FPP
9.	Drug-excipients compatibility studies (where applicable)	Firm has used same excipients as that of the innovator's product therefore compatibility studies are not required
10.	Complete batch manufacturing record of three stability batches.	Firm has provided Batch Manufacturing Record for all the batches
11.	Record of comparative dissolution data (where applicable)	Firm has submitted CDP results of their product against Myhep Tablet of Mylan Laboratories
12.	Data of 03 batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted documents like chromatograms, raw data sheets, COA, summary data sheets for the stability studies
13.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	Submitted
14.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

DOCUMENTS / DATA PROVIDED BY THE APPLICANT		
1.	Reference of previous approval of applications with stability study data of the firm	No PSI inspection of the firm has been conducted
2.	Certificate of Analysis of API from both API Manufacturer and Finished Product manufacturer.	Firm has submitted copy of COA of the drug substance from both API Manufacturer and Finished Product manufacturer.
3.	Method used for analysis of API from both API Manufacturer and Finished Product manufacturer	Firm has submitted copy of method used for analysis of API from both API Manufacturer and Finished Product manufacturer
4.	Stability study data of API from API manufacturer	Firm has submitted stability study data of 3 batches of drug substance as per zone IV-A conditions
5.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate issued by FDA Gujrat India dated 04-03-2020
6.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice cleared dated 07-02-2020 specifying 7kg API. The invoice is cleared by AD (I&E) DRAP.
7.	Protocols followed for conduction of stability study	Firm has submitted protocols followed for conduction of stability study
8.	Method used for analysis of FPP	Firm has provided detailed method for analysis of FPP
9.	Drug-excipients compatibility studies (where applicable)	Firm has used same excipients as that of the innovator's product therefore compatibility studies are not required
10.	Complete batch manufacturing record of three stability batches.	Firm has provided Batch Manufacturing Record for all the batches
11.	Record of comparative dissolution data (where applicable)	Firm has submitted CDP results of their product against Renvela Tablet
12.	Data of 03 batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted documents like chromatograms, raw data sheets, COA, summary data sheets for the stability studies
13.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	Submitted
14.	Record of Digital data logger for temperature and humidity monitoring of stability chambers	Submitted

	(real time and accelerated)	

Decision: Approved with Innovator's specifications.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Firm shall submit 7,500/- fee for revision of specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.**

610.	Name and address of manufacture / Applicant	M/s Pharmasol (Pvt) Ltd. Plot No. 549, Sundar Industrial Estate, Raiwind Road, Lahore.
	Brand Name + Dosage Form and Strength	Canazin 300mg Tablet
	Composition	Each Film Coated Tablet Contains: Canagliflozin as Hemihydrate…300mg
	Dairy No. date of R &I fee	Form-5 Dy.No 40654 dated 06-12-2018 Rs.20,000/- Dated 06-12-2018
	Pharmacological Group	Sodium-glucose co-transporter 2 (SGLT2) inhibitors A10BK02
	Type of form	Form 5
	Finished product specifications	Manufacturer specification.
	Pack size and Demand Price	7's,14's,28's, As per SRO.
	Approval status of product in Reference Regulatory Authorities	INVOKANA (canagliflozin) tablets USFDA Approved with box warning.
	Me-too-status	NA
	GMP Status	08-07-2019 & 25-07-2019 Recommendations: The firm M/s Pharmasol Pvt Ltd was evaluated for facilities like building, flow, HVAC, Water treatment, personnel, and Quality Control/QA and production operations. Keeping in view the observations made on the day of inspection and after going through the documentation and overall assessment, the panel is of the opinion that the firm M/s Pharmasol Lahore was operating at satisfactory level of GMP compliance.
	Remark of the Evaluator	• It is a new molecule/subsequent generic, hence stability study data as per the guidelines provided in 278th meeting of Registration Board is required.

Decision of 295th meeting of Registration Board: Deferred for submission of stability study data of applied formulation as per guidelines approved in 251st& later amended in 278th meeting of Registration Board, as the applied formulation is subsequent drug generic version.

Date of Initiation	30-12-2019	17-12-2019	30-12-2019
No. of Batches	03		

DOCUMENTS / DATA PROVIDED BY THE APPLICANT		
1.	Reference of previous approval of applications with stability study data of the firm	Firm has referred to onsite inspection report of their product "Rofair 500mcg Tablet", which was conducted on 25th June, 2019, and was presented in 290th meeting of Registration Board. The report confirms: • The HPLC software is 21CFR Compliant. • Audit trail on testing reports is available • Firm has adequate monitoring and controls for stability chambers. Chambers are controlled and monitored through software having alarm system for alerts as well
2.	Certificate of Analysis of API from both API Manufacturer and Finished Product manufacturer.	Firm has submitted copy of COA of the drug substance from both API Manufacturer and Finished Product manufacturer.
3.	Method used for analysis of API from both API Manufacturer and Finished Product manufacturer	Firm has submitted copy of method used for analysis of API from both API Manufacturer and Finished Product manufacturer
4.	Stability study data of API from API manufacturer	Firm has submitted stability study data of 3 batches of drug substance as per zone IV-A conditions.

5.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm as submitted Copy of GMP Certificate (No.6092154) dated 16-01-2020 issued by Food & Drug Administration (Maharashtra State) India
6.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice cleared dated 28-11-2018 specifying 300g Teriflunomide. The invoice is cleared by AD (I&E) DRAP.
7.	Protocols followed for conduction of stability study	Firm has submitted protocols followed for conduction of stability study
8.	Method used for analysis of FPP	Firm has provided detailed method for analysis of FPP
9.	Drug-excipients compatibility studies (where applicable)	Firm has used same excipients as that of the innovator's product therefore compatibility studies are not required
10.	Complete batch manufacturing record of three stability batches.	Firm has provided Batch Manufacturing Record for all the batches
11.	Record of comparative dissolution data (where applicable)	Firm has submitted CDP results of their product against the innovator's product Aubagio tablet
12.	Data of 03 batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted documents like chromatograms, raw data sheets, COA, summary data sheets for the stability studies
13.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	Firm has submitted certificate of 21 CFR compliance for the HPLC system along with audit trail report for product testing.
14.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

- Firm has submitted Form 5D however balance fee is not submitted.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Firm shall submit balance fee since the application is submitted on Form 5D and fee of 20,000 is submitted.**

9.	Drug-excipients compatibility studies (where applicable)	Firm has used same excipients as that of the innovator's product therefore compatibility studies are not required	
10.	Complete batch manufacturing record of three stability batches.	Firm has provided Batch Manufacturing Record for all the batches	
11.	Record of comparative dissolution data (where applicable)	Firm has submitted CDP results of their product against the innovator's product Brintellix tablet	

12.	Data of 03 batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted documents like chromatograms, raw data sheets, COA, summary data sheets for the stability studies
13.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	Submitted
14.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Evaluation by PEC:

Sr. No	Observation	Response from the firm
1.	Label claim is not as per the reference product	This is with reference to the label claim of applied product as detailed below: Jexma Tablet 20mg Each film coated tablet contains: Vortioxetine …… 20mg 12.71 mg of Vortioxetine hydrobromide is equivalent to 10mg of Vortioxetine. Kindly note that **20mg** Vortioxetine is the required dose which is used in the formulation as mentioned in our Batch Manufacturing Record. However, Each film-coated tablet contains Vortioxetine hydrobromide is equivalent to 20mg vortioxetine as per the Innovator Reference of Brintellix attached in the following pages.

Decision: Approved with Innovator's specifications.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Firm shall submit 7,500/- fee for revision of specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.**

621.	Name and address of manufacture / Applicant	M/s Nabiqasim Industries Pvt Ltd. 17/24, Korangi Industrial Area, Karachi, Pakistan

	Brand Name + Dosage Form and Strength	Glitab Tablet 5mg/500mg
	Composition	Each Film Coated Tablet Contains: Dapagliflozin Popanediol Monohydrate eq to Dapagliflozins .....5mg Metformin HCl..... 500mg
	Dairy No. date of R &I fee	Form-5 Dy.No 11407 dated 05-03-2019 Rs.20,000/- dated 05-03-2019
	Pharmacological Group	Combinations of oral blood glucose lowering drugs
	Type of form	Form 5
	Finished product specifications	Innovator's specifications
	Pack size and Demand Price	10's, 14's, 28's; As per SRO
	Approval status of product in Reference Regulatory Authorities	XIGDUO XR (2.5mg/1000mg, 5mg/500mg, 5mg/1000mg, 10mg/500mg, 10mg/1000mg) USFDA Approved
	Me-too-status	
	GMP Status	The firm was inspected on 05-08-2019 and conclusion of inspection was: Based on the areas inspected, the people met and the documents reviewed, and considering the findings of the inspection M/s Nabi Qasim Karachi is considered to be operating at an acceptable level of compliance of GMP requirements.
	Remark of the Evaluator [XI]	• Provide evidence of applied formulation/drug already approved by DRAP (generic / me-too status) along with registration number, brand name and name of firm OR submit application on requisite form 5D, stability studies data of three batches as per the guidelines approved in 293rd meeting of Registration Board, along with submission of differential fee. • The reference formulation is film coated extended release tablets and contain immediate release dapagliflozine and extended release metformin hydrochloride drug substance. Revise your formulation and manufacturing outline as per reference formulation along with submission of applicable fee.

Decision of 322nd meeting of Registration Board: Deferred for evaluation of stability study data on its turn

Response by the firm:

Firm has submitted following in the response:

- Application on Form 5-D along with balance fee 55000 dated 12-11-2021
- Revised the formulation label claim as per innovator's product as follows:
  Each film coated bilayer tablet contains:
  Dapagliflozin (as propanediol monohydrate)…….5mg

Metformin HCl (extended release layer).....500mg

- Stability study data of 3 batches

Date of submission of stability study data: Dy.# 31947 dated 22-11-2021

3.	Method used for analysis of API from both API Manufacturer and Finished Product manufacturer	Firm has submitted copy of method used for analysis of API from both API Manufacturer and Finished Product manufacturer
4.	Stability study data of API from API manufacturer	Firm has submitted stability study data of 3 batches of drug substance as per zone IV-B conditions

5.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of Drug Manufacturing License No. GAN 20160125 valid till 26-11-2025.
6.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice cleared dated 17-07-2018 specifying 1Kg. Theinvoice is cleared by AD (I&E) DRAP.
7.	Protocols followed for conduction of stability study	Firm has submitted protocols followed for conduction of stability study
8.	Method used for analysis of FPP	Firm has provided detailed method for analysis of FPP
9.	Drug-excipients compatibility studies (where applicable)	Firm has submitted drug excipient compatibility studies
10.	Complete batch manufacturing record of three stability batches.	Firm has provided Batch Manufacturing Record for all the batches
11.	Record of comparative dissolution data (where applicable)	Firm has submitted CDP results of their product against Myrbetric tablet
12.	Data of 03 batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted documents like chromatograms, raw data sheets, COA, summary data sheets for the stability studies
13.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	Submitted
14.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Decision: Approved with Innovator's specifications.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Firm shall submit 7,500/- fee for revision of specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.**

634.	Name and address of manufacturer/ Applicant	M/s Hudson Pharma (Pvt.) Ltd., D-93, North Western Industrial Zone, Port Qasim Authority, Karachi (Eye/Ear & Nasal drops general section (revised).
	Brand Name + Dosage Form + Strength	Brimson S 0.1% Eye Drops.
	Composition	Each ml Contains: Brimonidine Tartrate 1mg
	Diary No. Date of R & I & fee	Dy. No 10114 dated 04-03-2019; Rs.50,000/- 04-03-2019.
	Pharmacological Group	Antiglaucoma Preparations and Miotic.
	Type of Form.	Form-5D.
	Finished product Specification.	Manufacturer specifications.
	Pack size & Demanded Price	5ml, 15ml & as per SRO.
	Approval status of product in Reference Regulatory Authorities.	ALPHAGAN® P (brimonidine tartrate ophthalmic solution) 0.1%, USFDA approved.
	Me-too status.	Could not be confirmed.
	GMP status.	Same as above.
	Remarks of the Evaluator PEC-XIII	• Master formulation is not provided. • Complete method of manufacturing along with sterilization procedure is required. • Stability study data as per the guidelines provided in 293rd meeting of Registration Board is required.

Decision of 307th meeting of Registration Board: Deferred for following:

- Master formulation.
- Complete method of manufacturing along with sterilization procedure.
- Stability study data as per the guidelines provided in 293rd meeting of Registration Board.

Response by the firm:

Firm has only submitted stability study data of 3 batches of the product on 27-04-2021. However, following are still deficient

- Master formulation
- Complete method of manufacturing along with sterilization procedure.
- Submit stability study data as per the 14 points checklist approved by Registration Board in its 293rd meeting, since the submitted data is scattered and does not contain the information as required in the checklist of 293rd meeting of Registration Board.

Decision: Deferred for following submissions:

- **Complete Master formulation**
- **Complete method of manufacturing along with sterilization procedure.**
- **Submission of stability study data as per the 14 points checklist approved by Registration Board in its 293rd meeting.**

Case No. 03 Registration applications of CTD cases

a. Contract manufacturing applications as per Decision of 173rd meeting of Authority

637.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Ameer & Adnan Pharmaceutical Pvt Ltd. Plot No.47, Sundar Industrial Estate, Lahore**
	Name, address of Manufacturing site.	M/s Shawan Pharmaceuticals. Plot No. 37, Road: Ns-01, National Industrial Zone, Rawat, Rawalpindi
	Status of the applicant	☐ Manufacturer ☐ Importer ☒ Is involved in none of the above (contract giver)
	GMP status of the firm	Firm has submitted copy of GMP certificate of M/s Shawan Pharma issued on the basis of inspection dated 24-04-2019.
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter of renewal of Drug Manufacturing License of M/s Shawan pharma dated 03-09-2019 specifying Dry powder injection (Cephalosporin) section.
	Status of application	☒ New Drug Product (NDP) ☐ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 8329: 27-03-2023
	Details of fee submitted	PKR 75,000/-: 28-11-2022
	The proposed proprietary name / brand name	**Axon 500mg Injection**

	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Vial Contains: Ceftriaxone as Sodium…500mg
	Pharmaceutical form of applied drug	Almost white to off white colored powder filled in glass vial.
	Pharmacotherapeutic Group of (API)	Antibiotic
	Reference to Finished product specifications	USP
	Proposed Pack size	1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	MHRA approved
	For generic drugs (me-too status)	Oxidil Injection by Sami
	Name and address of API manufacturer.	Sinopharm Weiqida Pharmaceutical Co. Ltd. First Medical Zone, Economic and Technological Development Zone, Datong Shanxi. China
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for both drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification

		of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted pharmaceutical equivalence against Rovitrox Injection by Valor Pharma.
	Analytical method validation/verification of product	Firm has submitted report of verification of analytical method for the drug product.

STABILITY STUDY DATA

Manufacturer of API	Sinopharm Weiqida Pharmaceutical Co. Ltd. First Medical Zone, Economic and Technological Development Zone, Datong Shanxi. China		
API Lot No.			
Description of Pack (Container closure system)	Glass vials		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 35% RH Accelerated: 40˚C ± 2˚C / 25% RH		
Time Period	Real time: 6 Months Accelerated: 6 Months		
Frequency	Real Time: 0, 1, 3, 6 (Months) Accelerated: 0, 1, 3, 6 (Months)

Batch Size	10100 Vials	10100 Vials	10100 Vials
Manufacturing Date	02-2016	02-2016	02-2016
Date of Initiation	10-03-2016	07-03-2016	13-03-2016
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	NA
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate (No. SX20180229) issued by CFDA China is submitted by the firm. The certificate is valid till 05-06-2023..
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice cleared dated 09-02-2021 specifying import of 20Kg ceftriaxone. The invoice is cleared by AD (I&E) DRAP.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record of stability testing of 3 batches.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not applicable

6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted by the firm

Evaluation by PEC:

Sr. No	Shortcomings communicated	Response by the firm
1.	Submit specifications and analytical procedures of the drug substance from both API manufacturer as well as drug product manufacturer in section 3.2.S.4.1 and 3.2.S.4.2	
2.	Submit verification studies of the analytical method of drug substance in section 3.2.S.4.3.	
3.	Submit COA of relevant batch of API from the API manufacturer.	
4.	Justify the use of 5ml WFI as diluent since the innovator's product has recommended different volume of diluent.	
5.	Justify why pharmaceutical equivalence studies are not conducted against the innovator / reference product.	
6.	Submit compatibility studies with the recommended diluent.	
7.	Submit complete analytical method of the drug product	
8.	Submit complete report of verification studies of the analytical method of drug product instead of submitting a 1 page summary without any protocols and results.	
9.	Submit in-use stability studies report	
10.	Submit stability study data as per 6 points checklist provided in CTD guidance document in section 3.2.P.8.3 with proper tagging and data	
11.	Clarify regarding the stability initiation date of each batch since different date is mentioned in stability summary sheet and raw data sheets	
12.	Submit approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	

13.	Documents for the procurement of API with approval from DRAP (in case of import).	

Decision: Registration Board was apprised that the same formulation manufactured by M/s Shawan Pharmaceuticals, Rawalpindi was considered by the Board in its 331st meeting and was deferred for above cited observations. The manufacturer firm has replied to those shortcomings and those cases are also presented in the instant meeting.

Therefore, based on the response of the firm in deferred case, the Board decided to approve the product.

The registration letter will be issued in the light of procedure approved in this meeting for capacity assessment of the contract accepter and the submission of following;

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Firm shall select one route of administration whether IM or IV.**
- **Firm shall submit pharmaceutical equivalence against the innovator / reference product before issuance of Registraton letter.**

Evaluation by PEC:

Sr. No	Shortcomings communicated	Response by the firm
1.	Submit specifications and analytical procedures of the drug substance from both API manufacturer as well as drug product manufacturer in section 3.2.S.4.1 and 3.2.S.4.2	
2.	Submit verification studies of the analytical method of drug substance in section 3.2.S.4.3.	
3.	Submit COA of relevant batch of API from the API manufacturer.	
4.	Justify the use of 5ml WFI as diluent since the innovator's product has recommended different volume of diluent.	
5.	Justify why pharmaceutical equivalence studies are not conducted against the innovator / reference product.	
6.	Submit compatibility studies with the recommended diluent.	
7.	Submit complete analytical method of the drug product	
8.	Submit complete report of verification studies of the analytical method of drug product instead of submitting a 1 page summary without any protocols and results.	
9.	Submit in-use stability studies report	
10.	Submit stability study data as per 6 points checklist provided in CTD guidance document in section 3.2.P.8.3 with proper tagging and data	
11.	Clarify regarding the stability initiation date of each batch since different date is mentioned in stability summary sheet and raw data sheets	

12.	Submit approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	
13.	Documents for the procurement of API with approval from DRAP (in case of import).	

Decision: Registration Board was apprised that the same formulation manufactured by M/s Shawan Pharmaceuticals, Rawalpindi was considered by the Board in its 331st meeting and was deferred for above cited observations. The manufacturer firm has replied to those shortcomings and those cases are also presented in the instant meeting.

Therefore, based on the response of the firm in deferred case, the Board decided to approve the product.

The registration letter will be issued in the light of procedure approved in this meeting for capacity assessment of the contract accepter and the submission of following;

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Firm shall select one route of administration whether IM or IV.**
- **Firm shall submit pharmaceutical equivalence against the innovator / reference product before issuance of Registraton letter.**

639.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Cortex Pharmaceuticals. Plot # 16-A, SS-4, RCCI, Rawat, Rawalpindi**
	Name, address of Manufacturing site.	M/s Shawan Pharmaceuticals. Plot No. 37, Road: Ns-01, National Industrial Zone, Rawat, Rawalpindi
	Status of the applicant	☐ Manufacturer ☐ Importer ☒ Is involved in none of the above (contract giver)
	GMP status of the firm	Firm has submitted copy of GMP certificate of M/s Shawan Pharma issued on the basis of inspection dated 24-04-2019.
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter of renewal of Drug Manufacturing License of M/s Shawan pharma dated 03-09-2019 specifying Dry powder injection (Cephalosporin) section.
	Status of application	☒ New Drug Product (NDP) ☐ Generic Drug Product (GDP)

	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 7693: 17-03-2023
	Details of fee submitted	PKR 75,000/-: 02-12-2021
	The proposed proprietary name / brand name	**Efodux 1000mg Injection**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Vial Contains: Ceftriaxone as Sodium…..1g
	Pharmaceutical form of applied drug	Almost white to off white colored powder filled in glass vial.
	Pharmacotherapeutic Group of (API)	Antibiotic
	Reference to Finished product specifications	USP
	Proposed Pack size	1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	MHRA approved
	For generic drugs (me-too status)	Oxidil Injection by Sami
	Name and address of API manufacturer.	Sinopharm Weiqida Pharmaceutical Co. Ltd. First Medical Zone, Economic and Technological Development Zone, Datong Shanxi. China
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for both drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.

	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted pharmaceutical equivalence against Rovitrox Injection by Valor Pharma.
	Analytical method validation/verification of product	Firm has submitted report of verification of analytical method for the drug product.

Date of Initiation	28-05-2018	06-02-2019	24-05-2019
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice dated 10-01-2020 specifying import of 0.05Kg nalbuphine hydrochloride. The invoice is **not** attested by AD (I&E) DRAP Field office. Firm has also submitted copy of Form 3 and form 7.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	NA
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

The product development and stability study data of the contract manufacturer was considered by Registration Board in its 323rd meeting and deferred for submission of following documents:

- Submit contract manufacturing agreement between contract giver and contract acceptor.
- Submit data in section 3.2.S.4.1 and 3.2.S.4.2 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required."
- Submit data of verification of analytical procedure of drug substance in section 3.2.S.4.3 as per the guidance document approved by Registration Board which specifies that *"Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted".*
- Submit data of batch analysis of drug substance in section 3.2.S.4.4 as per the guidance document approved by Registration Board which specifies that *"Provide results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (CoA) of the same batch from Drug Substance / /Active Pharmaceutical Ingredient manufacture"* since the submitted COA is for

the batch manufactured in December 2020 while the drug product batches were manufactured in 2018 and 2019.

- Provide COA of reference standard which is actually used in the analysis of drug substance in section 3.2.S.5.
- Justify your master formulation without any solvent / diluent, further justify how you are using sodium chloride as solvent.
- Justify your master formulation which is significantly different from the innovator product in terms of quantitative composition where you have used sodium citrate, sodium chloride and citric acid anhydrous in 29.71%, 6.34% and 36.03% respectively, since the innovator product specifies sodium citrate, sodium chloride and citric acid anhydrous in 0.94%, 0.2% and 1.26% respectively.
- Justify why pharmaceutical equivalence was performed against the comparator product instead of innovator / reference product.
- Justify why the pharmaceutical equivalence study does not include complete testing of the drug product and the comparator product including the tests recommended by innovator product as well as the tests recommended in general monographs of official pharmacopoeia.
- Justify how you are not performing terminal sterilization for your product.
- Specify the container closure system whether available in amber color glass ampoule or otherwise.
- Justify why the specifications of the drug product (section 3.2.P.5.1) does not contain complete tests as recommended by innovator product as well as the tests recommended in general monographs of official pharmacopoeia.
- Justify the pH of your product between 3 to 4.5 since the pH of the innovator product is 3.5 to 3.7. Revise your specifications along with submission of requisite fee.
- Justify your analytical method for assay testing of the drug product which is based on UV analysis, since the analytical method of drug substance manufacturer as well as innovator / reference product is based on HPLC method.
- Justify your validation studies of the drug product in the light of ICH guidelines, since your analysis and reporting of the results is not exactly in line with the ICH recommendations.
- Justify why the stability study data of three different batches is submitted from those for which batch analysis is provided in section 3.2.P.5.4.
- You have submitted that the drug substance manufacturer is Mallinckrodt Pharmaceuticals SpecGx LLC 3600 North Second Street St. Louis, Missouri, but the drug substance used in the manufacturing of 3 batches of drug product is from any other source. Justification is required in this regard.
- Justify significant difference in the batch size of your products ranging from 15,000 to 50,000 ampoules. Justify your response in the light of the minimum and maximum capacity of your manufacturing equipments.
- Justify the pH of batch A-608 where the pH value exceed 3.70 to 3.78 during stability studies, since the maximum pH limit defined by innovator product is 3.70.
- Provide raw data sheets to justify the calculation of results for assay testing at each time point during the stability testing of each batch. Submit complete data with proper separators and in a sequence along with raw data sheets.
- Submit reference of previous approval of applications with stability study data of the firm instead of mentioning not applicable.
- Submit valid GMP certificate of the drug substance manufacturer.
- Submit documents for the procurement of API with approval from DRAP for the relevant batch of API which is used in the manufacturing of stability batches.
- Submit Batch Manufacturing Record of three batches for which stability study data is submitted.
- Submit copy of batch manufacturing record of 3 stability batches.

Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings.

Date of Initiation	18-02-2022	18-02-2022	18-02-2022
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	NA
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate issued by Additional Director DRAP, dated 02-09-2020. The GMP certificate was granted based on inspection dated 22-06-2020.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not submitted
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted stability study data of 3 batches
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:		
• Submit data in section 3.2.S.4.1 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required." You have only submitted the specifications of API from the drug product manufacturer. • Provide verification studies of drug substance from drug product manufacturer. • Specify whether the drug substance used is in compacted form or micronized. • Provide results of comparative dissolution profile (CDP) in three dissolution medium since only a single table result is provided. • Submit evidence of automatic analyzer equipped with spectrophotometer having analysis capability at 480 nm. • Provide COA of reference standard / working standard actually used in the analysis of drug product. • Provide description of container closure system whether Alu-Alu blister or otherwise. • USP monograph specifies Iodometric Assay specified in USP general chapter <425> while in stability studies and analytical method verification you have used HPLC method for assay testing. Clarification is required in this regard. • Justify how the dissolution testing performed in stability studies is according to the method specified in USP monograph. • Submit copy of invoice for procurement of drug substance from Pharmagen. • Provide Compliance Record of HPLC software 21CFR & audit trail reports on product testing. • Provide Record of Digital data logger for temperature and humidity monitoring of both stability chambers.		
Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings.		
643.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Welwrd Pharmaceuticals. Plot # 3, Block A, Phase I-II, Industrial Estate Hattar, KPK**
	Name, address of Manufacturing site	M/s Wallace Pharma Evolutions, Kalalwala Stop, 20-Km, Lahore Jaranwala Road Lahore.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)

Date of Initiation	06-01-2020	06-01-2020	06-01-2020
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	N/A
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (No.JS20180935) issued by CFDA China. The certificate is valid till 26-11-2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice cleared on 02-10-2018 specifying 500.2g of Ertugliflozin L-Pyroglutamic acid. The invoice is cleared by AD (I&E) DRAP, Karachi.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record for product testing.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted certificate of 21 CFR compliance for the HPLC system along with audit trail report for product testing.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator:

Decision: Approved in the light of legal opinion of the member registration board representing the Division of Law and Justice, Government of Pakistan
Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.

Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application

	Name, address of Manufacturing site.	M/s Genix Pharma (Pvt.) Ltd. Pakistan 44, 45b, Korangi Creek Road, Karachi. Pakistan.
	Status of the applicant	☐ Manufacturer ☐ Importer ☒ Is involved in none of the above (contract giver)
	GMP status of the firm	Firm has submitted copy of GMP certificate issued on the basis of inspection dated 28-10-2019.
	Evidence of approval of manufacturing facility	Firm has submitted copy of GMP certificate dated 30-10-2019 which specifies Tablet (General) section.
	Status of application	☒ New Drug Product (NDP) ☐ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy No. 23856 dated 31-08-2021
	Details of fee submitted	PKR 75,000/- Dated 10-08-2021
	The proposed proprietary name / brand name	**Erglif 15mg Tablet**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated tablet contains: Ertugliflozin L-Pyroglutamic acid is eq. to Ertugliflozin…. 15mg
	Pharmacotherapeutic Group of (API)	Anti-Diabetic
	Pharmaceutical form of applied drug	Red color, oblong, film coated tablet, engraved "GENIX" on one side and score line on other side.
	Reference to Finished product specifications	Innovator's

	Proposed Pack size	7's, 10's, 14's, 20's, 28's, & 30's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	STEGLATRO (Merck & Co. Inc, USA) approved by USFDA.
	For generic drugs (me-too status)	N/A
	Name and address of API manufacturer.	M/s Shanghai Pharma Group Changzhou Kony Pharmaceutical Co., Ltd Address: Daixi Street, Luoyang Town, Wujin District, Changzhou, Jiangsu, 213105, China
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubility, physical form, manufacturers specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis,

		justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted pharmaceutical equivalence of their product against the innovator's product Steglatro Tablet 15mg manufactured by Merck sharp & Dohme (MSD). Firm has submitted CDP results of their product against the innovator's product Steglatro Tablet 15mg in 3 dissolution medias.
	Analytical method validation/verification of product	Firm has submitted analytical method validation study reports for drug substance as well as drug product.

STABILITY STUDY DATA

Manufacturer of API	M/s Shanghai Pharma Group Changzhou Kony Pharmaceutical Co., Ltd Address: Daixi Street, Luoyang Town, Wujin District, Changzhou, Jiangsu, 213105, China		
API Lot No.	ETG20180901		
Description of Pack (Container closure system)	Alu-alu Blister		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	19SB-241-01	19SB-242-02	19SB-243-03
Batch Size	1500 Tablet	1500 Tablet	1500 Tablet
Manufacturing Date	12-2019	12-2019	12-2019
Date of Initiation	07-01-2020	07-01-2020	07-01-2020

No. of Batches		03
DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	N/A
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (No.JS20180935) issued by CFDA China. The certificate is valid till 26-11-2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice cleared on 02-10-2018 specifying 500.2g of Ertugliflozin L-Pyroglutamic acid. The invoice is cleared by AD (I&E) DRAP, Karachi.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record for product testing.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted certificate of 21 CFR compliance for the HPLC system along with audit trail report for product testing.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.
Remarks of Evaluator:		
Decision: Approved in the light of legal opinion of the member registration board representing the Division of Law and Justice, Government of Pakistan. **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.** **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**		

648.	Name, address of Applicant / Marketing Authorization Holder	**M/s Winlet Pharmaceuticals. 30-km, Lahore Sargodha Road, Lahore**
	Name, address of Manufacturing site.	M/s Nicholas Pharmaceuticals, plot # 34, St # SS-02 National industrial Zone Rawat Islamabad.
	Status of the applicant	☐ Manufacturer ☐ Importer

		☒ Is involved in none of the above (contract giver)
	GMP status of the firm	cGMP certificate of M/s Nicholas Pharmaceuticals on the basis of inspection conducted on 28-01-2020
	Evidence of approval of manufacturing facility	cGMP certificate of M/s Nicholas Pharmaceuticals on the basis of inspection conducted on 28-01-2020 specifying Dry Vial Injection section (Cephalosporin).
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No 24630 dated 31-08-2022
	Details of fee submitted	PKR 75,000/- Dated 06-06-2022
	The proposed proprietary name / brand name	**Wincef 1gm Injection**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Vial Contains: Cefoperazone as Sodium…500mg Sulbactam as Sodium…500mg
	Pharmaceutical form of applied drug	Sterile white to almost white powder filled in transparent glass vials
	Pharmacotherapeutic Group of (API)	Cephalosporin antibiotic
	Reference to Finished product specifications	Innovator's specs
	Proposed Pack size	As per SRO
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	(PMDA Japan Approved)
	For generic drugs (me-too status)	Cefbac injection by Seraph Pharmaceuticals
	Name and address of API manufacturer.	Qilu Antibiotics Pharmaceutical Co Ltd. No. 849, Dongia Town Licheng District Jinan City, Shandong Province China.

	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65 ± 5% RH for 48 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for their product against Sulzone injection of Biocare
	Analytical method validation/verification of product	Firm has submitted report of verification studies of analytical method for the drug substance and product.

3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of clearance certificate specifying import of 200Kg Cefoperazone sodium-Sulbactam sodium dated 11-08-2022.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Evaluation by PEC:

- Firm has initially submitted application for contract manufacturing from M/s Cure Laboratories Islamabad, however later on the firm vide its letter dated 30-11-2023 has request to change the contract manufacturer to M/s Nicholas Pharmaceuticals, Islamabad. Firm has also submitted data from the new contract manufacturer along with submission of 75000 fee for change of contract manufacturer.

Decision: Approved with Innovator's specifications in the light of legal opinion of the member registration board representing the Division of Law and Justice, Government of Pakistan.
Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application
Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months.

No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	NA
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate (No. SX20180229) issued by CFDA China is submitted by the firm. The certificate is valid till 05-06-2023..
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice cleared dated 09-02-2021 specifying import of 20Kg ceftriaxone. The invoice is cleared by AD (I&E) DRAP.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record of stability testing of 3 batches.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not applicable
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted by the firm

Evaluation by PEC:

Sr. No	Shortcomings communicated	Response by the firm
1.	Submit specifications and analytical procedures of the drug substance from both API manufacturer as well as drug product manufacturer in section 3.2.S.4.1 and 3.2.S.4.2	
2.	Submit verification studies of the analytical method of drug substance in section 3.2.S.4.3.	
3.	Submit COA of relevant batch of API from the API manufacturer.	
4.	Justify the use of 5ml WFI as diluent since the innovator's product has recommended different volume of diluent.	
5.	Justify why pharmaceutical equivalence studies are not conducted against the innovator / reference product.	
6.	Submit compatibility studies with the recommended diluent.	
7.	Submit complete analytical method of the drug product	
8.	Submit complete report of verification studies of the analytical method of drug product instead of submitting a 1 page summary without any protocols and results.	
9.	Submit in-use stability studies report	
10.	Submit stability study data as per 6 points checklist provided in CTD guidance document in section 3.2.P.8.3 with proper tagging and data	
11.	Clarify regarding the stability initiation date of each batch since different date is mentioned in stability summary sheet and raw data sheets	
12.	Submit approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	
13.	Documents for the procurement of API with approval from DRAP (in case of import).	

Decision of 331st meeting of Registration Board:

Registration Board deferred the case for submission of reply to the above cited shortcomings.

Response by the firm:

Sr. No	Shortcomings communicated	Response by the firm
1.	Submit specifications and analytical procedures of the drug substance from both API manufacturer as well as drug product manufacturer in section 3.2.S.4.1 and 3.2.S.4.2	Submittd by the firm
2.	Submit verification studies of the analytical method of drug substance in section 3.2.S.4.3.	Submittd by the firm
3.	Submit COA of relevant batch of API from the API manufacturer.	COA for Lot No. 011507041 is submitted
4.	Justify the use of 5ml WFI as diluent since the innovator's product has recommended different volume of diluent.	Quantity of WFI is corrected as per innovator's product
5.	Justify why pharmaceutical equivalence studies are not conducted against the innovator / reference product.	Firm has submitted pharmaceutical equivalence against rovitrox injection of valor pharma
6.	Submit compatibility studies with the recommended diluent.	Submittd by the firm
7.	Submit complete analytical method of the drug product	Submittd by the firm
8.	Submit complete report of verification studies of the analytical method of drug product instead of submitting a 1 page summary without any protocols and results.	Submittd by the firm
9.	Submit in-use stability studies report	Submittd by the firm
10.	Submit stability study data as per 6 points checklist provided in CTD guidance document in section 3.2.P.8.3 with proper tagging and data	Submittd by the firm
11.	Clarify regarding the stability initiation date of each batch since different date is mentioned in stability summary sheet and raw data sheets	Submittd by the firm
12.	Submit approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Submittd by the firm
13.	Documents for the procurement of API with approval from DRAP (in case of import).	Submittd by the firm

Decision: Approved in the light of legal opinion of the member registration board representing the Division of Law and Justice, Government of Pakistan

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

The registration letter will be issued in the light of procedure approved in this meeting for capacity assessment of the contract accepter and the submission of following documents;

- **Firm shall select one route of administration whether IM or IV.**
- **Firm shall submit pharmaceutical equivalence against the innovator / reference product before issuance of Registraton letter.**

	For generic drugs (me-too status)	Oxidil Injection by Sami
	Name and address of API manufacturer.	Sinopharm Weiqida Pharmaceutical Co. Ltd. First Medical Zone, Economic and Technological Development Zone, Datong Shanxi. China
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for both drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted pharmaceutical equivalence against Rovitrox Injection by Valor Pharma.

	Analytical method validation/verification of product	Firm has submitted report of verification of analytical method for the drug product.

STABILITY STUDY DATA

Manufacturer of API	Sinopharm Weiqida Pharmaceutical Co. Ltd. First Medical Zone, Economic and Technological Development Zone, Datong Shanxi. China		
API Lot No.			
Description of Pack (Container closure system)	Glass vials		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 35% RH Accelerated: 40˚C ± 2˚C / 25% RH		
Time Period	Real time: 6 Months Accelerated: 6 Months		
Frequency	Real Time: 0, 1, 3, 6 (Months) Accelerated: 0, 1, 3, 6 (Months)		
Batch No.	136	137	138
Batch Size	10100 Vials	10100 Vials	10100 Vials
Manufacturing Date	02-2016	02-2016	02-2016
Date of Initiation	10-03-2016	07-03-2016	13-03-2016
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	NA
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate (No. SX20180229) issued by CFDA China is submitted by the firm. The certificate is valid till 05-06-2023..
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice cleared dated 09-02-2021 specifying import of 20Kg ceftriaxone. The invoice is cleared by AD (I&E) DRAP.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record of stability testing of 3 batches.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not applicable
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted by the firm

Evaluation by PEC:

Sr. No	Shortcomings communicated	Response by the firm
1.	Submit specifications and analytical procedures of the drug substance from both API manufacturer as well as drug product manufacturer in section 3.2.S.4.1 and 3.2.S.4.2	
2.	Submit verification studies of the analytical method of drug substance in section 3.2.S.4.3.	
3.	Submit COA of relevant batch of API from the API manufacturer.	
4.	Justify the use of 5ml WFI as diluent since the innovator's product has recommended different volume of diluent.	
5.	Justify why pharmaceutical equivalence studiesare not conducted against the innovator / reference product.	
6.	Submit compatibility studies with the recommended diluent.	
7.	Submit complete analytical method of the drug product	
8.	Submit complete report of verification studies of the analytical method of drug product instead of submitting a 1 page summary without any protocols and results.	
9.	Submit in-use stability studies report	
10.	Submit stability study data as per 6 points checklist provided in CTD guidance document in section 3.2.P.8.3 with proper tagging and data	
11.	Clarify regarding the stability initiation date of each batch since different date is mentioned in stability summary sheet and raw data sheets	
12.	Submit approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	
13.	Documents for the procurement of API with approval from DRAP (in case of import).	

Decision of 331st meeting of Registration Board:

Registration Board deferred the case for submission of reply to the above cited shortcomings.

Response by the firm:

Sr. No	Shortcomings communicated	Response by the firm
1.	Submit specifications and analytical procedures of the drug substance from both API manufacturer as well as drug product manufacturer in section 3.2.S.4.1 and 3.2.S.4.2	Submittd by the firm
2.	Submit verification studies of the analytical method of drug substance in section 3.2.S.4.3.	Submittd by the firm
3.	Submit COA of relevant batch of API from the API manufacturer.	COA for Lot No. 011507041 is submitted
4.	Justify the use of 5ml WFI as diluent since the innovator's product has recommended different volume of diluent.	Quantity of WFI is corrected as per innovator's product
5.	Justify why pharmaceutical equivalence studies are not conducted against the innovator / reference product.	Firm has submitted pharmaceutical equivalence against rovitrox injection of valor pharma
6.	Submit compatibility studies with the recommended diluent.	Submittd by the firm
7.	Submit complete analytical method of the drug product	Submittd by the firm
8.	Submit complete report of verification studies of the analytical method of drug product instead of submitting a 1 page summary without any protocols and results.	Submittd by the firm
9.	Submit in-use stability studies report	Submittd by the firm
10.	Submit stability study data as per 6 points checklist provided in CTD guidance document in section 3.2.P.8.3 with proper tagging and data	Submittd by the firm
11.	Clarify regarding the stability initiation date of each batch since different date is mentioned in stability summary sheet and raw data sheets	Submittd by the firm
12.	Submit approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Submittd by the firm

13.	Documents for the procurement of API with approval from DRAP (in case of import).	Submittd by the firm

Decision: Approved in the light of legal opinion of the member registration board representing the Division of Law and Justice, Government of Pakistan

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

The registration letter will be issued in the light of procedure approved in this meeting for capacity assessment of the contract accepter and the submission of following documents;

- **Firm shall select one route of administration whether IM or IV.**
- **Firm shall submit pharmaceutical equivalence against the innovator / reference product before issuance of Registraton letter.**

652.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Nagarsons Pharmaceuticals. Plot No. 34, St. No. NS-2, National Industrial Zone, Rawat, Islamabad**
	Name, address of Manufacturing site.	M/s EG Pharmaceuticals, 13/A Industrial Triangle Kahuta Road, Islamabad.
	Status of the applicant	☐ Manufacturer ☐ Importer ☒ Is involved in none of the above (contract giver) Firm has submitted copy of contract manufacturing agreement with applicant firm dated 24-02-2021.
	GMP status of the firm	Firm has submitted copy of inspection report of M/s EG Pharmaceuticals dated 13-02-2019 recommending the renewal of DML.
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter of issuance of DML (No. 000752) dated 29-08-2012 specifying dry powder injection (cephalosporin) section.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 20656: 29-07-2021
	Details of fee submitted	PKR 50,000/-: 02-03-2021
	The proposed proprietary name / brand name	**NAGZONE 250mg Injection IM**

	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Vial Contains: Ceftriaxone (as sodium)……250mg
	Pharmaceutical form of applied drug	Sterile white to off white powder filled in transparent glass vials
	Pharmacotherapeutic Group of (API)	Cephalosporin antibiotic
	Reference to Finished product specifications	USP
	Proposed Pack size	1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Ceftriaxone sodium Injection **(MHRA** Approved)
	For generic drugs (me-too status)	Aczon injection by Vision Pharma
	Name and address of API manufacturer.	Sinopharm Weiqida Pharmaceutical Co. Ltd. First Medical Zone, Economic and Technological Development Zone, Datong Shanxi. China
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for both drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.

	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for the quality tests for their product against the comparator i.e. Oxidil 250mg Injection IM.
	Analytical method validation/verification of product	Firm has submitted report of verification of analytical method for the drug substance. Firm has submitted report of verification of analytical method for the drug product.

STABILITY STUDY DATA

Manufacturer of API	Sinopharm Weiqida Pharmaceutical Co. Ltd. First Medical Zone, Economic and Technological Development Zone, Datong Shanxi. China		
API Lot No.	Q011910019		
Description of Pack (Container closure system)	Glass vials		
Stability Storage Condition	Real time : 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	402	463	821
Batch Size	5,000 vials	6,000 vials	5,000 vials
Manufacturing Date	02-2020	03-2020	10-2018
Date of Initiation	05-02-2020	12-03-2020	25-10-2018
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	No previous product specific inspection of the firm has been conducted.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Not submitted
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not submitted
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Not submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not submitted

Evaluation by PEC:	
Shortcomings communicated	**Response by the firm**
Submit differential fee for the registration of applied product, since the notification for revision of fee vide SRO No. F.7-11/2012-B&A/DRA was published on 7th May 2021 while this application was received in R&I section of DRAP after 7th May 2021.	Firm has not submitted any differential fee.
Specify whether your application is for IV or IM use.	The application is for IM use
Submit data in section 3.2.S.4.1 and 3.2.S.4.2 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required."	Firm has submitted specifications of drug substance from EG Pharmaceuticals. **However, the specifications are different from that of USP monograph.**
Justify your analytical method verification studies for the drug substance in which chromatographic conditions including column specifications, injection volume and flow rate is different from that specified in USP monograph.	Firm has submitted analytical method verification studies. **However the method verification studies are not as per ICH and USP recommendations and the analytical method in verification studies is different from that mentioned in section 3.2.S.4.2.**
Submit COA of relevant batch of drug substance in section 3.2.S.4.4 which is actually used for manufacturing of three stability batches since the lot number of drug substance specified in BMRs are 0220-657R, 1018-232R, 1119-574R.	Firm has submitted COA of batch number Q011910019. **As per the submitted COA the manufacturing date of the drug substance is October 2019. While Batch No. 821 was manufactured on 25-10-2018.**
Submit COA of reference standard / working standard actually used in the analysis of drug substance and drug product.	**Not submitted by the firm**
Specify the batch number, expiry date and manufacturer of Rocephin 250mg injection against which pharmaceutical equivalence studies are performed since this product is not registered in Pakistan.	Firm has now submitted Oxidil 250mg IM Injection Batch No. 047G mfg date 12/2020
Justify the compatibility study of your product, since the reconstitution diluent is lignocaine while in section 3.2.P.2.6 you have specified water for injection.	Reconstitution diluent Lidocaine HCl is fully compatible in FPP. Diluent is same as recommended by innovator. **However the reconstitution studies data is not provided.**

Justify why the specifications of drug product submitted in section 3.2.P.5.1 does not include complete tests as specified in USP monograph.	Firm has submitted specifications of drug product **which are still not as per USP in assay test.**
Justify why the analytical procedures of the drug product is different from that of USP monograph.	**No justification submitted by the firm**
Justify how three commercial batches were released in the market without performing complete tests as per USP monograph.	Firm has submitted batch release report of three batches **in which complete tests as per USP monograph are still not performed.**
Justify why sterility test and water determination is not performed during stability studies.	We performed these tests after one year from batch manufacturing.
Justify how only 1 HPLC chromatogram of standard solution and 1 chromatogram of sample solution is used to determine assay of the commercial batch of the drug product.	**No justification submitted by the firm**
Submit data in section 3.2.P.8.3 as per the checklist provided in CTD guidance document approved by the Registration Board so that further evaluation could be carried out.	Only stability data sheets is provided **complete data as per 6 point checklist is still not submitted.**

Decision of 316th meeting: Deferred for following:

- Submission of differential fee of Rs. 25,000, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.
- Scientific justification for having the drug substance specification different from that of USP monograph.
- Scientific justification for manufacturing of Batch No. 821 on 25-10-2018 using drug substance batch number Q011910019 which is manufactured in October 2019.
- Submission of COA of reference standard / working standard actually used in the analysis of drug substance and drug product.
- Submission of compatibility studies of the drug product with the recommended diluent.
- Scientific justification for having drug product specifications different from that of USP monograph.
- Scientific justification why the analytical procedures of the drug product is different from that of USP monograph.
- Scientific justification how three commercial batches were released in the market without performing complete tests as per USP monograph.
- Scientific justification how only 1 HPLC chromatogram of standard solution and 1 chromatogram of sample solution is used to determine assay of the commercial batch of the drug product.
- Submission of complete data in section 3.2.P.8.3 as per the 6-points checklist provided in Form 5-F guidance document (PE&R/GL/AF/004) approved by the Registration Board.

Firm's reply: Firm has submitted following:

- Drug substance specifications as per USP monograph.
- COA of drug substance from M/s Sinopharm Weqeida of batch no. 2081704066 declaring that previous COA was submitted inadvertently.
- COA of working standard form M/s Sinopharm Weqeida.
- Revised drug product specifications and analytical procedure as per USP monograph of "Ceftriaxone for injection" without requisite fee for pre-approval change/correction in drug product specifications.

• Firm has referred to the performance of system suitability for the use of 1 standard and sample solution value for Assay calculation solution. • Stability studies data as per 6 points of guidance document (PE&R/GL/AF/004) approved by the Registration Board.		
Decision: Approved • **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.** • **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

	Status of the applicant	☐ Manufacturer ☐ Importer ☒ Is involved in none of the above (contract giver) Firm has submitted copy of contract manufacturing agreement with applicant firm dated 24-02-2021.
	GMP status of the firm	Firm has submitted copy of inspection report of M/s EG Pharmaceuticals dated 13-02-2019 recommending the renewal of DML.
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter of issuance of DML (No. 000752) dated 29-08-2012 specifying dry powder injection (cephalosporin) section.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 20658: 29-07-2021
	Details of fee submitted	PKR 50,000/-: 02-03-2021
	The proposed proprietary name / brand name	**NAGZONE 1g Injection IV**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Vial Contains: Ceftriaxone (as sodium)……1g

	Pharmaceutical form of applied drug	Sterile white to off white powder filled in transparent glass vials
	Pharmacotherapeutic Group of (API)	Cephalosporin antibiotic
	Reference to Finished product specifications	USP
	Proposed Pack size	1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Ceftriaxone sodium Injection **(MHRA** Approved)
	For generic drugs (me-too status)	Aczon injection by Vision Pharma
	Name and address of API manufacturer.	Sinopharm Weiqida Pharmaceutical Co. Ltd. First Medical Zone, Economic and Technological Development Zone, Datong Shanxi. China
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for both drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for the quality tests for their product against the comparator i.e. Rocephin 1g Injection.

	Analytical method validation/verification of product	Firm has submitted report of verification of analytical method for the drug substance. Firm has submitted report of verification of analytical method for the drug product.

STABILITY STUDY DATA

Manufacturer of API	Sinopharm Weiqida Pharmaceutical Co. Ltd. First Medical Zone, Economic and Technological Development Zone, Datong Shanxi. China		
API Lot No.	Q011910019		
Description of Pack (Container closure system)	Glass vials		
Stability Storage Condition	Real time : 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	386	290	504
Batch Size	7,000 vials	4,000 vials	7,000 vials
Manufacturing Date	10-2020	10-2019	04-2020
Date of Initiation	23-01-2020	31-10-2019	07-04-2020
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	No previous product specific inspection of the firm has been conducted.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Not submitted
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not submitted
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Not submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not submitted

Evaluation by PEC:

Shortcomings communicated	Response by the firm
Submit differential fee for the registration of applied product, since the notification for revision of fee vide SRO No. F.7-11/2012-B&A/DRA was published on 7th May 2021 while this application was received in R&I section of DRAP after 7th May 2021.	Firm has not submitted any differential fee.
Specify whether your application is for IV or IM use.	The application is for IV use
Submit data in section 3.2.S.4.1 and 3.2.S.4.2 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required."	Firm has submitted specifications of drug substance from EG Pharmaceuticals. **However, the specifications are different from that of USP monograph.**
Justify your analytical method verification studies for the drug substance in which chromatographic conditions including column specifications, injection volume and flow rate is different from that specified in USP monograph.	Firm has submitted analytical method verification studies. **However the method verification studies are not as per ICH and SP recommendations and the analytical method in verification studies is different from that mentioned in section 3.2.S.4.2.**
Submit COA of relevant batch of drug substance in section 3.2.S.4.4 which is actually used for manufacturing of three stability batches since the lot number of drug substance specified in BMRs are 0220-657R, 1018-232R, 1119-574R.	Firm has submitted COA of batch number Q011910019.
Submit COA of reference standard / working standard actually used in the analysis of drug substance and drug product.	**Not submitted by the firm**
Specify the batch number, expiry date and manufacturer of Rocephin 250mg injection against which pharmaceutical equivalence studies are performed since this product is not registered in Pakistan.	Firm has now submitted Rocephin 1g IV Injection Batch No. B0784 mfg date 06/2020
Justify the compatibility study of your product, since the reconstitution diluent is lignocaine while in section 3.2.P.2.6 you have specified water for injection.	Reconstitution diluent WFI is fully compatible in FPP. Diluent is same as recommended by innovator. **However the reconstitution studies data is not provided.**
Justify why the specifications of drug product submitted in section 3.2.P.5.1 does not include complete tests as specified in USP monograph.	Firm has submitted specifications of drug product **which are still not as per USP in assay test.**

Justify why the analytical procedures of the drug product is different from that of USP monograph.	**No justification submitted by the firm**
Justify how three commercial batches were released in the market without performing complete tests as per USP monograph.	Firm has submitted batch release report of three batches **in which complete tests as per USP monograph are still not performed.**
Justify why sterility test and water determination is not performed during stability studies.	We performed these tests after one year from batch manufacturing.
Justify how only 1 HPLC chromatogram of standard solution and 1 chromatogram of sample solution is used to determine assay of the commercial batch of the drug product.	**No justification submitted by the firm**
Submit data in section 3.2.P.8.3 as per the checklist provided in CTD guidance document approved by the Registration Board so that further evaluation could be carried out.	Only stability data sheets is provided **complete data as per 6 point checklist is still not submitted.**

Decision: Deferred for following:

- Submission of differential fee of Rs. 25,000, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.
- Scientific justification for having the drug substance specification different from that of USP monograph.
- Submission of COA of reference standard / working standard actually used in the analysis of drug substance and drug product.
- Submission of compatibility studies of the drug product with the recommended diluent.
- Scientific justification for having drug product specifications different from that of USP monograph.
- Scientific justification why the analytical procedures of the drug product is different from that of USP monograph.
- Scientific justification how three commercial batches were released in the market without performing complete tests as per USP monograph.
- Scientific justification how only 1 HPLC chromatogram of standard solution and 1 chromatogram of sample solution is used to determine assay of the commercial batch of the drug product.
- Submission of complete data in section 3.2.P.8.3 as per the 6-points checklist provided in Form 5-F guidance document (PE&R/GL/AF/004) approved by the Registration Board.

Firm's reply: Firm has submitted following:

- Drug substance specifications as per USP monograph.
- COA of drug substance from M/s Sinopharm Weqeida of batch no. 2081704066 declaring that previous COA was submitted inadvertently.
- COA of working standard form M/s Sinopharm Weqeida.
- Revised drug product specifications and analytical procedure as per USP monograph of "Ceftriaxone for injection" without requisite fee for pre-approval change/correction in drug product specifications.
- Firm has referred to the performance of system suitability for the use of 1 standard and sample solution value for Assay calculation solution.
- Stability studies data as per 6 points of guidance document (PE&R/GL/AF/004) approved by the Registration Board.

Decision: Approved.

• **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.** • **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Loteprednol:** **Tobramycin:** Firm has submitted copy of GMP certificate (No. GD20190944) issued by CFDA China. The certificate was valid till 31-01-2024.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	

Evaluation by PEC:

Sr. No	Shortcomings communicated	Response by the firm
1.	You have applied for ophthalmic solution while the applied product is approved as ophthalmic suspension in USFDA. Correct the applied formulation along with submission of full fee of registration.	
2.	Submit specifications and analytical procedures of the Tobramycin drug substance from both API manufacturer	

	as well as drug product manufacturer in section 3.2.S.4.1 and 3.2.S.4.2	
3.	Submit verification studies of the analytical method of Tobramycin drug substance performed by drug product manufacturer in section 3.2.S.4.3.	
4.	The assay limit of Tobramycin specified by drug substance manufacturer is ≥900 ug/ml while you have defined the assay limit as 98.5% to 101.5%. Justify how drug product manufacturer can change the assay limits.	
5.	Submit Tobramycin API stability study data till the shelf life since real time stability data is submitted till 9 months only.	
6.	Submit specifications and analytical procedures of the Loteprednol drug substance from both API manufacturer as well as drug product manufacturer in section 3.2.S.4.1 and 3.2.S.4.2	
7.	Submit verification studies of the analytical method of Loteprednol drug substance performed by drug product manufacturer in section 3.2.S.4.3.	
8.	Submit COA of relevant batch of Loteprednol API from both API manufacturer as well as drug product manufacturer.	
9.	Provide drug-excipient compatibility studies since the qualitative composition is different from the innovator's product.	
10.	Justify why pharmaceutical equivalence is performed against a comparator product instead of innovator / reference product.	
11.	Provide preservative effectiveness studies.	
12.	Justify why the product specifications do not include a test for the assay of preservative contents.	
13.	Provide analytical method of drug product in section 3.2.P.5.2	
14.	Provide complete report of validation studies of the analytical method of drug product since you have submitted raw results. Further clarify why the concentration of precision studies and 100% of accuracy study is not as per the target concentration specified in analytical method.	
15.	Provide stability study data sheets of all the three batches in section 3.2.P.8.3 as per the format specified in CTD guidance document since your data sheets does not	

	specify batch size, API lot number and various other required information.	
16.	Justify the performance of stability studies at condition specified for impermeable containers while your container closure system is a semi permeable container.	
17.	Submit stability study data as per 6 points checklist provided in CTD guidance document in section 3.2.P.8.3 with proper tagging and data of each batch and time point shall be properly segregated alsong with its relevant raw data sheet and chromatograms so that its evaluation could be carried out, since you have submitted data without following checklist and the submitted data is without any sequence or tagging.	
18.	Submit GMP certificate and evidence of procurement of drug substance including ADC attested invoice / clearane certificate.	

Decision of 331st meeting of Registration Board:

Registration Board deferred the case for submission of reply to the above cited shortcomings.

Response by the firm:

Sr. No	Shortcomings communicated	Response by the firm
1.	You have applied for ophthalmic solution while the applied product is approved as ophthalmic suspension in USFDA. Correct the applied formulation along with submission of full fee of registration.	Revised form 5F is submitted
2.	Submit specifications and analytical procedures of the Tobramycin drug substance from both API manufacturer as well as drug product manufacturer in section 3.2.S.4.1 and 3.2.S.4.2	Submitted
3.	Submit verification studies of the analytical method of Tobramycin drug substance performed by drug product manufacturer in section 3.2.S.4.3.	Submitted
4.	The assay limit of Tobramycin specified by drug substance manufacturer is ≥900 ug/ml while you have defined the assay limit as 98.5% to 101.5%. Justify how drug product manufacturer can change the assay limits.	Revised specifications submitted
5.	Submit Tobramycin API stability study data till the shelf life since real time stability data is submitted till 9 months only.	Submitted

6.	Submit specifications and analytical procedures of the Loteprednol drug substance from both API manufacturer as well as drug product manufacturer in section 3.2.S.4.1 and 3.2.S.4.2	Submitted
7.	Submit verification studies of the analytical method of Loteprednol drug substance performed by drug product manufacturer in section 3.2.S.4.3.	Submitted
8.	Submit COA of relevant batch of Loteprednol API from both API manufacturer as well as drug product manufacturer.	Submitted
9.	Provide drug-excipient compatibility studies since the qualitative composition is different from the innovator's product.	Submitted
10.	Justify why pharmaceutical equivalence is performed against a comparator product instead of innovator / reference product.	Due to non availability of innovator product we have performed PE studies with brand leader
11.	Provide preservative effectiveness studies.	Submitted
12.	Justify why the product specifications do not include a test for the assay of preservative contents.	Revised specifications submitted
13.	Provide analytical method of drug product in section 3.2.P.5.2	Submitted
14.	Provide complete report of validation studies of the analytical method of drug product since you have submitted raw results. Further clarify why the concentration of precision studies and 100% of accuracy study is not as per the target concentration specified in analytical method.	Submitted
15.	Provide stability study data sheets of all the three batches in section 3.2.P.8.3 as per the format specified in CTD guidance document since your data sheets does not specify batch size, API lot number and various other required information.	Submitted
16.	Justify the performance of stability studies at condition specified for impermeable containers while your container closure system is a semi permeable container.	New stability chamber for semi permeable container is to be purchased
17.	Submit stability study data as per 6 points checklist provided in CTD guidance document in section 3.2.P.8.3 with proper tagging and data of each batch and time point shall be properly segregated alsong with its relevant raw data sheet	Submitted

	and chromatograms so that its evaluation could be carried out, since you have submitted data without following checklist and the submitted data is without any sequence or tagging.	
18.	Submit GMP certificate and evidence of procurement of drug substance including ADC attested invoice / clearane certificate.	Submitted

Decision: Approved with following label claim:

Each ml of ophthalmic suspension Contains:

Tobramycin……3mg

Loteprednol Etabonate…….5mg

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **The firm shall submit fee of Rs. 30,000/- for correction/pre-approval change in product label claim as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021, before issuance of registration letter.**

The registration letter will be issued in the light of procedure approved in this meeting for capacity assessment of the contract accepter

Sr. No	Shortcomings communicated	Response by the firm
1.	Submit specifications and analytical procedures of the Tobramycin drug substance from both API manufacturer as well as drug product manufacturer in section 3.2.S.4.1 and 3.2.S.4.2	
2.	Submit verification studies of the analytical method of Tobramycin drug substance performed by drug product manufacturer in section 3.2.S.4.3.	
3.	The assay limit of Tobramycin specified by drug substance manufacturer is ≥900 ug/ml while you have defined the assay limit as 98.5% to 101.5%. Justify how drug product manufacturer can change the assay limits.	
4.	Submit Tobramycin API stability study data till the shelf life since real time stability data is submitted till 9 months only.	
5.	Submit specifications and analytical procedures of the Dexamethasone drug substance from both API manufacturer as well as drug product manufacturer in section 3.2.S.4.1 and 3.2.S.4.2	
6.	Submit verification studies of the analytical method of Dexamethasone drug substance performed by drug product manufacturer in section 3.2.S.4.3.	
7.	Submit COA of relevant batch of Dexamethasone APi from both API manufacturer as well as drug product manufacturer.	
8.	Submit Dexamthasone API stability study data till the shelf life since real time stability data is submitted till 9 months only.	
9.	Provide drug-excipient compatibility studies since the qualitative composition is different from the innovator's product.	

10.	Justify why pharmaceutical equivalence is performed against a comparator product instead of innovator / reference product.	
11.	Provide preservative effectiveness studies.	
12.	Justify why the product specifications do not include a test for the assay of preservative contents.	
13.	Justify why the assay method is different from that specified in USP monograph in terms of column specifications and calculation formula.	
14.	Provide complete report of validation studies of the analytical method of drug product since you have submitted raw results. Further clarify why the concentration of precision studies and 100% of accuracy study is not as per the target concentration specified in analytical method.	
15.	Provide stability study data sheets of all the three batches in section 3.2.P.8.3 as per the format specified in CTD guidance document since your data sheets does not specify batch size, API lot number and various other required information.	
16.	Justify the performance of stability studies at condition specified for impermeable containers while your container closure system is a semi permeable container.	
17.	Submit stability study data as per 6 points checklist provided in CTD guidance document in section 3.2.P.8.3 with proper tagging and data of each batch and time point shall be properly segregated alsong with its relevant raw data sheet and chromatograms so that its evaluation could be carried out, since you have submitted data without following checklist and the submitted data is without any sequence or tagging.	
18.	Submit GMP certificate and evidence of procurement of drug substance including ADC attested invoice / clearane certificate.	

Decision of 331st meeting of Registration Board: Registration Board deferred the case for submission of reply to the above cited shortcomings.

Response by the firm:

Sr. No	Shortcomings communicated	Response by the firm
1.	Submit specifications and analytical procedures of the Tobramycin drug substance from both API manufacturer	Submitted

	as well as drug product manufacturer in section 3.2.S.4.1 and 3.2.S.4.2	
2.	Submit verification studies of the analytical method of Tobramycin drug substance performed by drug product manufacturer in section 3.2.S.4.3.	Submitted
3.	The assay limit of Tobramycin specified by drug substance manufacturer is ≥900 ug/ml while you have defined the assay limit as 98.5% to 101.5%. Justify how drug product manufacturer can change the assay limits.	Revised specifications submitted
4.	Submit Tobramycin API stability study data till the shelf life since real time stability data is submitted till 9 months only.	Submitted
5.	Submit specifications and analytical procedures of the Dexamethasone drug substance from both API manufacturer as well as drug product manufacturer in section 3.2.S.4.1 and 3.2.S.4.2	Submitted
6.	Submit verification studies of the analytical method of Dexamethasone drug substance performed by drug product manufacturer in section 3.2.S.4.3.	Submitted
7.	Submit COA of relevant batch of Dexamethasone APi from both API manufacturer as well as drug product manufacturer.	Submitted
8.	Submit Dexamthasone API stability study data till the shelf life since real time stability data is submitted till 9 months only.	Submitted
9.	Provide drug-excipient compatibility studies since the qualitative composition is different from the innovator's product.	Submitted
10.	Justify why pharmaceutical equivalence is performed against a comparator product instead of innovator / reference product.	Due to non availability of reference product PE studies was conducted with brand leader
11.	Provide preservative effectiveness studies.	Submitted
12.	Justify why the product specifications do not include a test for the assay of preservative contents.	Revised specifications submitted
13.	Justify why the assay method is different from that specified in USP monograph in terms of column specifications and calculation formula.	Revised specifications submitted
14.	Provide complete report of validation studies of the analytical method of drug product since you have submitted raw results. Further clarify why the concentration of precision studies and 100% of accuracy	Submitted

	study is not as per the target concentration specified in analytical method.	
15.	Provide stability study data sheets of all the three batches in section 3.2.P.8.3 as per the format specified in CTD guidance document since your data sheets does not specify batch size, API lot number and various other required information.	Submitted
16.	Justify the performance of stability studies at condition specified for impermeable containers while your container closure system is a semi permeable container.	New stability chamber for semi permeable is to be purchased
17.	Submit stability study data as per 6 points checklist provided in CTD guidance document in section 3.2.P.8.3 with proper tagging and data of each batch and time point shall be properly segregated alsong with its relevant raw data sheet and chromatograms so that its evaluation could be carried out, since you have submitted data without following checklist and the submitted data is without any sequence or tagging.	Submitted
18.	Submit GMP certificate and evidence of procurement of drug substance including ADC attested invoice / clearane certificate.	Submitted

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

The registration letter will be issued in the light of procedure approved in this meeting for capacity assessment of the contract accepter

657.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Palpex Pharmaceuticals Pvt Ltd. FD-46-A8, ST-1, Sector 38, Korangi Creek Industrial Park, Karachi**
	Name, address of Manufacturing site.	M/s Winthrox Laboratories (Pvt) Ltd. Plot No. K-219/A, Phase-II SITE Super Highway Karachi.
	Status of the applicant	☐ Manufacturer ☐ Importer ☒ Is involved in none of the above (contract giver)
	GMP status of the firm	Firm has submitted copy of GMP certificate of M/s Winthrox Laboratories dated 17-12-2020 based on the inspection dated 19-11-2020.

	Evidence of approval of manufacturing facility	Firm has submitted copy of letter of renewal of Drug Manufacturing License of M/s Winthrox Laboratories dated 08-06-2021. The letter specifies sterile eye drop (General) section.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 29102: 13-10-2022
	Details of fee submitted	PKR 75,000/-: 03-10-2022
	The proposed proprietary name / brand name	**Nepton 1mg Eye Drops**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each ml of suspension Contains: Nepafenac…..1mg
	Pharmaceutical form of applied drug	Yellowish green slightly viscous suspension filled in LDPE bottle.
	Pharmacotherapeutic Group of (API)	NSAID
	Reference to Finished product specifications	Innovator's
	Proposed Pack size	As per SRO
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Nevanac ophthalmic suspension USFDA Approved)
	For generic drugs (me-too status)	Nepanac Ophathalmic Suspension by Remington Pharma
	Name and address of API manufacturer.	Flax Laboratories, Plot No. B-29/1, MIDC Mahad Village Birwadi Mahad District Raigad Maharashtra India.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its

		validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for both drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 24 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for the quality tests for their product against the comparator i.e. Nepanac eye drops of Remington pharma
	Analytical method validation/verification of product	Firm has submitted report of verification of analytical method for the drug substance. Firm has submitted report of verification of analytical method for the drug product.

STABILITY STUDY DATA	
Manufacturer of API	Flax Laboratories, Plot No. B-29/1, MIDC Mahad Village Birwadi Mahad District Raigad Maharashtra India.

Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	232E	233E	238E
Batch Size			
Manufacturing Date	12-2020	12-2020	01-2021
Date of Initiation	07-01-2021	09-2020	01-2021
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (No. 6097475) issued by FDA Maharashtra State India. The certificate was valid till 12-01-2022.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice cleared dated 26-02-2020 specifying import of 500g Nepafenac micronized and sterilized. The invoice is cleared by AD (I&E) DRAP.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	

Evaluation by PEC:

Sr. No	Shortcomings communicated	Response by the firm
1.	As per submitted Form 5-F, the name of applicant is Winthrox Laboratories and the name of manufacturer is Welmed Pharmaceutical. Correct the Form 5-F along with submission of requisite fee.	
2.	Submit specifications and analytical procedures of the drug substance from both API manufacturer as well as drug product manufacturer in section 3.2.S.4.1 and 3.2.S.4.2	
3.	Submit verification studies of the analytical method of drug substance performed by drug product manufacturer in section 3.2.S.4.3.	
4.	Submit COA of relevant batch of API from both drug substance as well as drug product manufacturer.	
5.	Justify why pharmaceutical equivalence is performed against a comparator product instead of innovator / reference product.	
6.	Provide preservative effectiveness studies.	
7.	The analytical method for pharmaceutical equivalence specifies UV method while analytical record of HPLC testing is submitted. Clarify.	
8.	Provide specifications of drug product in section 3.2.P.5.1	
9.	Justify why the product specifications do not include a test for the assay of preservative contents.	
10.	Provide analytical method of drug product in section 3.2.P.5.2	
11.	Provide complete report of validation studies of the analytical method of drug product since you have submitted raw results. Further clarify why the concentration of precision studies and 100% of accuracy study is not as per the target concentration specified in analytical method.	
12.	Justify the broad and assymetric peaks in validation studies. Furthermore, you have not determined peak parameters like theoretical plates and tailing factor.	
13	Justify the adaptation of a wide pH range i.e. 6.7 – 7.6 since the desired pH value is 7.4 and results of all batches is also above 7.4.	
14.	Provide stability study data sheets of all the three batches in section 3.2.P.8.3 as per the format specified in CTD	

	guidance document since your data sheets does not specify batch size, API lot number and various other required information.		
15.	Justify the performance of stability studies at condition specified for impermeable containers while your container closure system is a semi permeable container.		
16.	Submit stability study data as per 6 points checklist provided in CTD guidance document in section 3.2.P.8.3 with proper tagging and data of each batch and time point shall be properly segregated alsong with its relevant raw data sheet and chromatograms so that its evaluation could be carried out, since you have submitted data without following checklist and the submitted data is without any sequence or tagging.		
15.	Justify the consistent peak tailing in your stability chromatograms.		
16.	Submit valid GMP certificate of the drug substance manufacturer, since the submitted certificate was valid till 12-01-2022.		

Decision of 331st meeting of Registration Board: Registration Board deferred the case for submission of reply to the above cited shortcomings.

Response by the firm:

Sr. No	Shortcomings communicated	Response by the firm
1.	As per submitted Form 5-F, the name of applicant is Winthrox Laboratories and the name of manufacturer is Welmed Pharmaceutical. Correct the Form 5-F along with submission of requisite fee.	Revised Form 5F has been submitted
2.	Submit specifications and analytical procedures of the drug substance from both API manufacturer as well as drug product manufacturer in section 3.2.S.4.1 and 3.2.S.4.2	Submitted
3.	Submit verification studies of the analytical method of drug substance performed by drug product manufacturer in section 3.2.S.4.3.	Submitted
4.	Submit COA of relevant batch of API from both drug substance as well as drug product manufacturer.	Submitted
5.	Justify why pharmaceutical equivalence is performed against a comparator product instead of innovator / reference product.	Due to non availability of reference product we have performed PE studies against brand leader
6.	Provide preservative effectiveness studies.	Submitted

7.	The analytical method for pharmaceutical equivalence specifies UV method while analytical record of HPLC testing is submitted. Clarify.	Revised method and studies are submitted
8.	Provide specifications of drug product in section 3.2.P.5.1	Submitted
9.	Justify why the product specifications do not include a test for the assay of preservative contents.	Revised specifications submitted
10.	Provide analytical method of drug product in section 3.2.P.5.2	Submitted
11.	Provide complete report of validation studies of the analytical method of drug product since you have submitted raw results. Further clarify why the concentration of precision studies and 100% of accuracy study is not as per the target concentration specified in analytical method.	Revised report with correction is submitted
12.	Justify the broad and assymetric peaks in validation studies. Furthermore, you have not determined peak parameters like theoretical plates and tailing factor.	Revised validation report is submitted
13	Justify the adaptation of a wide pH range i.e. 6.7 – 7.6 since the desired pH value is 7.4 and results of all batches is also above 7.4.	pH limit has been revised
14.	Provide stability study data sheets of all the three batches in section 3.2.P.8.3 as per the format specified in CTD guidance document since your data sheets does not specify batch size, API lot number and various other required information.	Submitted
15.	Justify the performance of stability studies at condition specified for impermeable containers while your container closure system is a semi permeable container.	New stability chamber for semi permeable container is to be purchased
16.	Submit stability study data as per 6 points checklist provided in CTD guidance document in section 3.2.P.8.3 with proper tagging and data of each batch and time point shall be properly segregated alsong with its relevant raw data sheet and chromatograms so that its evaluation could be carried out, since you have submitted data without following checklist and the submitted data is without any sequence or tagging.	Submitted
15.	Justify the consistent peak tailing in your stability chromatograms.	Tailing factor is less than 2 that's why our peaks are consistent.

16.	Submit valid GMP certificate of the drug substance manufacturer, since the submitted certificate was valid till 12-01-2022.	Submitted.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **The firm shall submit fee of Rs. 30,000/- for correction in the name and address of applicant firm as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021, before issuance of registration letter.**

The registration letter will be issued in the light of procedure approved in this meeting for capacity assessment of the contract accepter

Decision: Approved with following label claim:

Each ml of ophthalmic suspension Contains:

Tobramycin……3mg

Loteprednol Etabonate…….5mg

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **The firm shall submit fee of Rs. 30,000/- for correction/pre-approval change in product label claim as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021, before issuance of registration letter.**

The registration letter will be issued in the light of procedure approved in this meeting for capacity assessment of the contract accepter

659.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Welmed Pharmaceutical Industries (Pvt) Ltd. 108-R-2, Industrial Estate, Gadoon Swabi.**
	Name, address of Manufacturing site.	M/s Winthrox Laboratories (Pvt) Ltd. Plot No. K-219/A, Phase-II SITE Super Highway Karachi.
	Status of the applicant	☐ Manufacturer ☐ Importer ☒ Is involved in none of the above (contract giver)

	GMP status of the firm	Firm has submitted copy of GMP certificate of M/s Winthrox Laboratories dated 17-12-2020 based on the inspection dated 19-11-2020.
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter of renewal of Drug Manufacturing License of M/s Winthrox Laboratories dated 08-06-2021. The letter specifies sterile eye drop (General) section.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 12638: 24-05-2022
	Details of fee submitted	PKR 75,000/-: 14-12-2021
	The proposed proprietary name / brand name	**TYCIN-D 1mg+3mg Ophthalmic Suspension**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each ml of Suspension Contains: Tobramycin……3mg Dexamethasone…….1mg
	Pharmaceutical form of applied drug	Ophthalmic Suspension
	Pharmacotherapeutic Group of (API)	Antibiotic and steroid
	Reference to Finished product specifications	USP
	Proposed Pack size	As per SRO
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Tobradex ophthalmic suspension (**USFDA** Approved)
	For generic drugs (me-too status)	Bracin-D Ophthalmic Suspension by Atco Lab
	Name and address of API manufacturer.	**Dexamethasone:** Zhejiang Xianju Pharmaceutical Co. Ltd No. 1, Xian Yao Road Xianju, Zhejiang China. **Tobramycin:** Livzon Group Fuzhou Fuxing Pharmaceutical Co. Ltd. No. 8 Nangang Road,

		Jiangyin Industrial Concentration Zone, Fuqing, Fuzhou City, Fujian Province China.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for both drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	**Dexamethasone:** Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 9 months. **Tobramycin:** Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 9 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for the quality tests for their product against the comparator i.e. Bracin-D eye drops of Atco Lab

	Analytical method validation/verification of product	Firm has submitted report of verification of analytical method for the drug substance. Firm has submitted report of verification of analytical method for the drug product.

STABILITY STUDY DATA			
Manufacturer of API	**Dexamethasone:** Zhejiang Xianju Pharmaceutical Co. Ltd No. 1, Xian Yao Road Xianju, Zhejiang China. **Tobramycin:** Livzon Group Fuzhou Fuxing Pharmaceutical Co. Ltd. No. 8 Nangang Road, Jiangyin Industrial Concentration Zone, Fuqing, Fuzhou City, Fujian Province China.		
API Lot No.	**Dexamethasone:** **Tobramycin:** TB2007011		
Description of Pack (Container closure system)	LDPE Bottle		
Stability Storage Condition	Real time : 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	228E	229E	250E
Batch Size			
Manufacturing Date	12-2020	12-2020	03-2021
Date of Initiation	10-12-2020	14-12-2020	30-04-2021
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted

2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Dexamethasone:** **Tobramycin:** Firm has submitted copy of GMP certificate (No. GD20190944) issued by CFDA China. The certificate was valid till 31-01-2024.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	

Evaluation by PEC:

Sr. No	Shortcomings communicated	Response by the firm
1.	Submit specifications and analytical procedures of the Tobramycin drug substance from both API manufacturer as well as drug product manufacturer in section 3.2.S.4.1 and 3.2.S.4.2	
2.	Submit verification studies of the analytical method of Tobramycin drug substance performed by drug product manufacturer in section 3.2.S.4.3.	
3.	The assay limit of Tobramycin specified by drug substance manufacturer is ≥900 ug/ml while you have defined the assay limit as 98.5% to 101.5%. Justify how drug product manufacturer can change the assay limits.	
4.	Submit Tobramycin API stability study data till the shelf life since real time stability data is submitted till 9 months only.	
5.	Submit specifications and analytical procedures of the Dexamethasone drug substance from both API manufacturer as well as drug product manufacturer in section 3.2.S.4.1 and 3.2.S.4.2	
6.	Submit verification studies of the analytical method of Dexamethasone drug substance performed by drug product manufacturer in section 3.2.S.4.3.	

7.	Submit COA of relevant batch of Dexamethasone APi from both API manufacturer as well as drug product manufacturer.	
8.	Submit Dexamthasone API stability study data till the shelf life since real time stability data is submitted till 9 months only.	
9.	Provide drug-excipient compatibility studies since the qualitative composition is different from the innovator's product.	
10.	Justify why pharmaceutical equivalence is performed against a comparator product instead of innovator / reference product.	
11.	Provide preservative effectiveness studies.	
12.	Justify why the product specifications do not include a test for the assay of preservative contents.	
13.	Justify why the assay method is different from that specified in USP monograph in terms of column specifications and calculation formula.	
14.	Provide complete report of validation studies of the analytical method of drug product since you have submitted raw results. Further clarify why the concentration of precision studies and 100% of accuracy study is not as per the target concentration specified in analytical method.	
15.	Provide stability study data sheets of all the three batches in section 3.2.P.8.3 as per the format specified in CTD guidance document since your data sheets does not specify batch size, API lot number and various other required information.	
16.	Justify the performance of stability studies at condition specified for impermeable containers while your container closure system is a semi permeable container.	
17.	Submit stability study data as per 6 points checklist provided in CTD guidance document in section 3.2.P.8.3 with proper tagging and data of each batch and time point shall be properly segregated alsong with its relevant raw data sheet and chromatograms so that its evaluation could be carried out, since you have submitted data without following checklist and the submitted data is without any sequence or tagging.	

18.	Submit GMP certificate and evidence of procurement of drug substance including ADC attested invoice / clearane certificate.	

Decision of 331st meeting of Registration Board:

Registration Board deferred the case for submission of reply to the above cited shortcomings.

Response by the firm:

Sr. No	Shortcomings communicated	Response by the firm
1.	Submit specifications and analytical procedures of the Tobramycin drug substance from both API manufacturer as well as drug product manufacturer in section 3.2.S.4.1 and 3.2.S.4.2	Submitted
2.	Submit verification studies of the analytical method of Tobramycin drug substance performed by drug product manufacturer in section 3.2.S.4.3.	Submitted
3.	The assay limit of Tobramycin specified by drug substance manufacturer is ≥900 ug/ml while you have defined the assay limit as 98.5% to 101.5%. Justify how drug product manufacturer can change the assay limits.	Revised specifications submitted
4.	Submit Tobramycin API stability study data till the shelf life since real time stability data is submitted till 9 months only.	Submitted
5.	Submit specifications and analytical procedures of the Dexamethasone drug substance from both API manufacturer as well as drug product manufacturer in section 3.2.S.4.1 and 3.2.S.4.2	Submitted
6.	Submit verification studies of the analytical method of Dexamethasone drug substance performed by drug product manufacturer in section 3.2.S.4.3.	Submitted
7.	Submit COA of relevant batch of Dexamethasone APi from both API manufacturer as well as drug product manufacturer.	Submitted
8.	Submit Dexamthasone API stability study data till the shelf life since real time stability data is submitted till 9 months only.	Submitted
9.	Provide drug-excipient compatibility studies since the qualitative composition is different from the innovator's product.	Submitted

10.	Justify why pharmaceutical equivalence is performed against a comparator product instead of innovator / reference product.	Due to non availability of reference product we have performed PE studies with brand leader
11.	Provide preservative effectiveness studies.	Submitted
12.	Justify why the product specifications do not include a test for the assay of preservative contents.	Revised specifications submitted
13.	Justify why the assay method is different from that specified in USP monograph in terms of column specifications and calculation formula.	Revised assay method has been submitted
14.	Provide complete report of validation studies of the analytical method of drug product since you have submitted raw results. Further clarify why the concentration of precision studies and 100% of accuracy study is not as per the target concentration specified in analytical method.	Submitted
15.	Provide stability study data sheets of all the three batches in section 3.2.P.8.3 as per the format specified in CTD guidance document since your data sheets does not specify batch size, API lot number and various other required information.	Submitted
16.	Justify the performance of stability studies at condition specified for impermeable containers while your container closure system is a semi permeable container.	New stability chamber for semi permeable is to be purchased
17.	Submit stability study data as per 6 points checklist provided in CTD guidance document in section 3.2.P.8.3 with proper tagging and data of each batch and time point shall be properly segregated alsong with its relevant raw data sheet and chromatograms so that its evaluation could be carried out, since you have submitted data without following checklist and the submitted data is without any sequence or tagging.	Submitted
18.	Submit GMP certificate and evidence of procurement of drug substance including ADC attested invoice / clearane certificate.	Submitted

Decision: Approved

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

The registration letter will be issued in the light of procedure approved in this meeting for capacity assessment of the contract accepter

Evaluation by PEC:

Sr. No	Shortcomings communicated	Response by the firm
1.	As per submitted Form 5-F, the name of applicant is Winthrox Laboratories and the name of manufacturer is Welmed Pharmaceutical. Correct the Form 5-F along with submission of requisite fee.	
2.	Submit specifications and analytical procedures of the drug substance from both API manufacturer as well as drug product manufacturer in section 3.2.S.4.1 and 3.2.S.4.2	
3.	Submit verification studies of the analytical method of drug substance performed by drug product manufacturer in section 3.2.S.4.3.	
4.	Submit COA of relevant batch of API from both drug substance as well as drug product manufacturer.	
5.	Justify why pharmaceutical equivalence is performed against a comparator product instead of innovator / reference product.	
6.	Provide preservative effectiveness studies.	
7.	The analytical method for pharmaceutical equivalence specifies UV method while analytical record of HPLC testing is submitted. Clarify.	
8.	Provide specifications of drug product in section 3.2.P.5.1	
9.	Justify why the product specifications do not include a test for the assay of preservative contents.	
10.	Provide analytical method of drug product in section 3.2.P.5.2	
11.	Provide complete report of validation studies of the analytical method of drug product since you have	

	submitted raw results. Further clarify why the concentration of precision studies and 100% of accuracy study is not as per the target concentration specified in analytical method.	
12.	Justify the broad and assymetric peaks in validation studies. Furthermore, you have not determined peak parameters like theoretical plates and tailing factor.	
13	Justify the adaptation of a wide pH range i.e. 6.7 – 7.6 since the desired pH value is 7.4 and results of all batches is also above 7.4.	
14.	Provide stability study data sheets of all the three batches in section 3.2.P.8.3 as per the format specified in CTD guidance document since your data sheets does not specify batch size, API lot number and various other required information.	
15.	Justify the performance of stability studies at condition specified for impermeable containers while your container closure system is a semi permeable container.	
16.	Submit stability study data as per 6 points checklist provided in CTD guidance document in section 3.2.P.8.3 with proper tagging and data of each batch and time point shall be properly segregated alsong with its relevant raw data sheet and chromatograms so that its evaluation could be carried out, since you have submitted data without following checklist and the submitted data is without any sequence or tagging.	
15.	Justify the consistent peak tailing in your stability chromatograms.	
16.	Submit valid GMP certificate of the drug substance manufacturer, since the submitted certificate was valid till 12-01-2022.	

Decision of 331st meeting of Registration Board: Registration Board deferred the case for submission of reply to the above cited shortcomings.

Response by the firm:

Sr. No	Shortcomings communicated	Response by the firm
1.	As per submitted Form 5-F, the name of applicant is Winthrox Laboratories and the name of manufacturer is Welmed Pharmaceutical. Correct the Form 5-F along with submission of requisite fee.	Revised Form 5F has been submitted
2.	Submit specifications and analytical procedures of the drug substance from both API manufacturer as well as	Submitted

	drug product manufacturer in section 3.2.S.4.1 and 3.2.S.4.2	
3.	Submit verification studies of the analytical method of drug substance performed by drug product manufacturer in section 3.2.S.4.3.	Submitted
4.	Submit COA of relevant batch of API from both drug substance as well as drug product manufacturer.	Submitted
5.	Justify why pharmaceutical equivalence is performed against a comparator product instead of innovator / reference product.	Due to non availability of reference product we have performed PE studies against brand leader
6.	Provide preservative effectiveness studies.	Submitted
7.	The analytical method for pharmaceutical equivalence specifies UV method while analytical record of HPLC testing is submitted. Clarify.	Revised method and studies are submitted
8.	Provide specifications of drug product in section 3.2.P.5.1	Submitted
9.	Justify why the product specifications do not include a test for the assay of preservative contents.	Revised specifications submitted
10.	Provide analytical method of drug product in section 3.2.P.5.2	Submitted
11.	Provide complete report of validation studies of the analytical method of drug product since you have submitted raw results. Further clarify why the concentration of precision studies and 100% of accuracy study is not as per the target concentration specified in analytical method.	Revised report with correction is submitted
12.	Justify the broad and assymetric peaks in validation studies. Furthermore, you have not determined peak parameters like theoretical plates and tailing factor.	Revised validation report is submitted
13	Justify the adaptation of a wide pH range i.e. 6.7 – 7.6 since the desired pH value is 7.4 and results of all batches is also above 7.4.	pH limit has been revised
14.	Provide stability study data sheets of all the three batches in section 3.2.P.8.3 as per the format specified in CTD guidance document since your data sheets does not specify batch size, API lot number and various other required information.	Submitted
15.	Justify the performance of stability studies at condition specified for impermeable containers while your container closure system is a semi permeable container.	New stability chamber for semi permeable container is to be purchased

16.	Submit stability study data as per 6 points checklist provided in CTD guidance document in section 3.2.P.8.3 with proper tagging and data of each batch and time point shall be properly segregated alsong with its relevant raw data sheet and chromatograms so that its evaluation could be carried out, since you have submitted data without following checklist and the submitted data is without any sequence or tagging.	Submitted
15.	Justify the consistent peak tailing in your stability chromatograms.	Tailing factor is less than 2 that's why our peaks are consistent.
16.	Submit valid GMP certificate of the drug substance manufacturer, since the submitted certificate was valid till 12-01-2022.	Submitted.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **The firm shall submit fee of Rs. 30,000/- for correction in the name and address of applicant firm as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021, before issuance of registration letter.**

The registration letter will be issued in the light of procedure approved in this meeting for capacity assessment of the contract accepter

	For generic drugs (me-too status)	Hyalgan PFS of M.s Matrix Pharma Reg.# 031340
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Name, address of drug substance manufacturer	M/s Shin Poong Pharmaceutical Co., Ltd. 7, Wonsi-ro, Danwon-gu, Ansan-si, Gyeonggi-do, Republic of Korea
	Module-III Drug Substance:	Firm has submitted detailed drug substance data for both sources related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of API at accelerated as well as real time conditions. The real time stability data is conducted at 30 ℃±2. The stability study data is till 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted pharmaceutical equivalence Euflexxa
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	Pre-filled syringe
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches The accelerated stability study data is conducted at

		25ºC ±2ºC / 60% ± 5% RH for 6 months. The real time stability study data is conducted at5ºC ±3ºC / 65% ± 5% RH. The real time stability study data for 3 batches is for 36 months only.

Evaluation by PEC:

- The submitted COPP does not clarify the description of applied product whether pre-filled syringe or otherwise. Also the strength is mentioned only as Each ml contains Sodium hyaluronate …. 10mg
- Valid authorisation letter from manufacturer s required since submitted NOC was valid till 09-11-2022.
- Firm has submitted legalized **GMP** certificate (No. 2020-D1-3554) dated 23-10-2020 issued by Ministry of Food and Drug Safety, South Korea in name of M/s Shin Poong Pharmaceutical Co., Ltd. 7, Wonsi-ro, Danwon-gu, Ansan-si, Gyeonggi-do, Republic of Korea wherein pre-filled syringe dosage form has not been mentioned.
- Justification shall be submitted for performing stability studies as per refrigerating conditions since the reference product Hyalgan approved by ANSM of France recommends storage condition of store below 25ºC.

Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings.

Case No.1. Request for Change in Registration Status of Products from M/s OBS Pakistan (Pvt.) Ltd., Karachi to M/s Aspin Pharma (Pvt.) Ltd., Karachi

Registration Board in its 307th meeting, 317th meeting and 321st meeting deferred the request of M/s. Aspin Pharma (Pvt.) Ltd; Plot No. 10 & 25, Sector 20, Korangi Industrial Area Karachi-74900 for change of registration status of following products from M/s. OBS Pakistan (Pvt.) Ltd; Karachi to their name as per following details:

Proceedings of M-307:

The cases were referred to Pharmaceutical Evaluation Cell/ QMS for scrutinization/evaluation. Detail of submitted documents remarks of evaluators have been mentioned as under:

Administrative Documents in the light of SOP approved by the Registration Board in its 283rd meeting
i. Copy of last GMP inspection report dated 01-06-2020 (**Good** Level of Compliance).
ii. Panel Inspection report for renewal of DML dated 26-01-2021.
iii. Section approval of M/s Aspin verified from Licensing Division's letter for renewal of DML (dated 09th June, 2016) confirming following sections; ➢ Tablet (General) ➢ Capsule (General) ➢ Liquid Syrup ➢ Ointment/ Cream.
iv. NOC from M/s. OBS Pakistan (Pvt.) Ltd; Karachi dated 10-12-2020, 07-01-2021 & 16-03-2021.
v. Relevant undertakings & commitments.

[Evaluator: Mr.Abdul Mughees Mudassir (AD to CEO)]

Decision of M-307:

Deferred the request with respect to following products due to reasons mentioned alongside each:

S. No.	***Reg. No.***	***Product Name***	***Reasons***
i.	*081780*	*Anvol 2.5mg Tablet*	*Deferred for submission of CDP.*
ii.	*081069*	*Anvol 5mg Tablet*	*Deferred for submission of CDP.*

Proceedings of M-317:

The firm has submitted the CDP for above mentioned product as per following details:

i. Anvol 5 mg Tablet:-

Comparative Dissolution Profile

The comparative dissolution profile was performed for Anvol Tablet 5 mg against the Nebilet Tablet 5 mg (Manufactured by Menarini International Operations Luxembourg). Comparison was performed in HCl buffer (pH 1.2), Acetate buffer (pH 4.5) and phosphate buffer solution (pH 6.8) using 12 samples at 10, 15,20, 30, and 45, minutes.

Sr	Buffer	Time interval	Anvol Tablet 5 mg	Nebilet Tablet 5 mg
i	HCl buffer (pH 1.2)	10 min	104.724 %	90.304 %
		15 min	101.786 %	97.594%

			20 min	102.171%	100.401%
			30 min	101.004%	99.198%
			45 min	98.560%	97.826%
			f1 = 4.334 f2= 59.787		
	ii	Acetate buffer (pH 4.5)	10 min	14.989%	16.591%
			15 min	20.345%	24.168%
			20 min	25.247%	29.447%
			30 min	33.378%	37.338%
			45 min	40.299%	45.062%
			f1 = 11.357 f2= 69.297		
	iii	phosphate buffer (pH 6.8)	10 min	16.903%	27.300%
			15 min	25.203%	25.738%
			20 min	30.454%	31.536%
			30 min	41.340%	45.225%
			45 min	52.297%	61.029%
			f1 = 12.790 f2= 58.200		

Calculation of value revealed that dissimilarity factor f1 and similarity factor f2 fall under acceptable criteria at pH 1.2 and pH 4.5, and pH 6.8.

ii. <u>Anvol 2.5 mg Tablets:-</u>

Comparative Dissolution Profile
The comparative dissolution profile was performed for Anvol Tablet 2.5 mg against the Bystolic Tablet 2.5 mg (Manufactured by Allergan). Comparison was performed in HCl buffer (pH 1.2), Acetate buffer (pH 4.5) and phosphate buffer solution (pH 6.8) using 12 samples at 10, 15,20, 30, and 45, minutes.

Sr	Buffer	Time interval	Anvol Tablet 5 mg	Bystolic Tablet 5 mg
i	HCl buffer (pH 1.2)	10 min	104.776 %	108.433 %
		15 min	102.862 %	101.536%
		20 min	102.170%	101.593%
		30 min	97.618%	105.785%
		45 min	99.772%	97.935%
		f1 = 3.574 f2= 65.351		
ii	Acetate buffer (pH 4.5)	10 min	94.045%	96.498%
		15 min	96.004%	94.615%
		20 min	88.317%	96.279%
		30 min	92.572%	97.499%
		45 min	94.698%	100.328%
		f1 = 7.056 f2= 55.804		
ii	phosphate buffer (pH 6.8)	10 min	97.181%	102.384%
		15 min	97.334%	105.562%
		20 min	97.511%	97.951%
		30 min	88.666%	103.244%
		45 min	103.745%	101.560%
		f1 = 5.767 f2= 56.268		

Calculation of value revealed that dissimilarity factor f1 and similarity factor f2 fall under acceptable criteria at pH 1.2 and pH 4.5, and pH 6.8.

Decision of M-317:

Registration Board deferred the case for submission of justification regarding un-even trends of dissolution profile of both the products i.e., Anvol Tablet 5mg & 2.5mg.

Proceedings of M-321:

Now the firm has submitted their reply vide Diary Number 21691 dated 01 August 2022. The firm has submitted as below:

> *"In this regard, it is stated that; As per Dissolution profile guidelines of US FDA (enclosed herewith, pls. refer to Page 11, Section V), for comparison of dissolution, Dissimilarity factor (f1) and Similarity factor (f2) are calculated for different buffers at different time points and the f1 should be less than 15 while f2 should be greater than 50."*
>
> *"In CDP of our products both f1 and f2 are within limits of US FDA guidelines and hence considered comparable for dissolution of Anvol 2.5mg & 5mg in comparison with its innovator product."*

Decision of M-321:

Registration Board deferred the case for further deliberation.

Current Submission:

The firm has submitted the CDP for above mentioned product as per following details:

i. Anvol 5 mg Tablet:-

<table>

ii. <u>Anvol 2.5 mg Tablets:-</u>

Comparative Dissolution Profile	
Pharmaceutical Equivalence and Comparative Dissolution Profile	The comparative dissolution profile was performed for Anvol Tablet 2.5 mg against the Nebil Tablet 2.5 mg (Manufactured by Getz Pharma). Comparison was performed in HCl buffer (pH 1.2), Acetate buffer (pH 4.5) and phosphate buffer solution (pH 6.8) using 12 samples at 10, 15,20, 30, 45, 60 minutes.

Sr	Buffer	Time interval	Anvol Tablet 5 mg	Bystolic Tablet 5 mg
	HCl buffer (pH 1.2)	10 min	93.595%	100.296%
		15 min	96.281%	106.131%
		20 min	96.564%	103.846%
		30 min	95.849%	105.538%
		45 min	97.582%	104.513%
		60 min	95.090%	107.256%
		f1 = 8.384 f2= 52.179

		15 min	91.052%	91.339%
		20 min	95.387%	95.863%
		30 min	94.434%	95.317%
		45 min	93.575%	94.370%
		60 min	88.519%	86.598%
		f1 = 0.876 f2= 92.791		
iii.	phosphate buffer (pH 6.8)	10 min	71.169%	67.924%
		15 min	76.533%	70.577%
		20 min	77.835%	72.408%
		30 min	81.386%	77.277%
		45 min	83.114%	81.454%
		60 min	80.832%	81.513%
		f1 = 4.672 f2= 69.285		

Calculation of value revealed that dissimilarity factor f1 and similarity factor f2 fall under acceptable criteria at pH 1.2 and pH 4.5, and pH 6.8.

Remarks	The firm has also submitted following documents: 1. Copy of last GMP inspection report dated 09-02-2022. 2. Approval letter for change in title of registration holder from OBS Pakistan (Pvt) Ltd., Karachi to Searle Pakistan Limited, Karachi dated 25-04-2022. 3. Request dated 30-10-2023 regarding withdrawal of Anvol Tablets 2.5mg & 5mg by existing Registration holder. 4. Fresh NOC dated 30-10-2023, issued by M/s Searle Pakistan Limited, Karachi.

Decision: Registration Board decided as under:

i. Cancelled registration of following product from the name of M/s Searle Pakistan Limited (Formerly: M/s OBS Pakistan Pvt. Ltd.), C-14, S.I.T.E, Karachi (DML No.000012).

S. No.	Reg. No.	Product Name & Composition
1.	081780	Anvol 2.5mg Tablet Each tablet contains: Nebivolol (as HCl)..... 2.5mg (As per Innovator's Specifications)
2.	081069	Anvol 5mg Tablet Each tablet contains: Nebivolol (as HCl) …..5mg (As per Innovator's Specifications)

ii. Approved registration of following product in the name of M/s. Aspin Pharma (Pvt.) Ltd., Plot No.10 & 25 Sector 20, Korangi Industrial Area, Karachi (DML No.000045).

a) Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.

b) Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.

c) Registration letter will be issued after submission of fee of Rs.7500/- for correction in finished product specifications to "As per Innovator's Specifications" in line with the notification No. F.7-11/2012-B&A/DRAP dated 07-05-2021.

S. No.	Product Name & Composition
i.	Anvol 2.5mg Tablet Each tablet contains: Nebivolol (as Hydrochloride)..... 2.5mg
ii.	Anvol 5mg Tablet Each tablet contains: Nebivolol (as Hydrochloride)..... 5mg

iii. Reference will be sent to Costing and Pricing Division for confirmation of maximum retail price (MRP).

Case No.2. Requirement of Reciprocating Cylinder for Dissolution Testing of U-Progest Softgel Capsules 100mg & 200mg

M/s. Aspin Pharma (Pvt.) Ltd; Plot No. 10 & 25, Sector 20, Korangi Industrial Area Karachi-74900 was issued registrations of "U-Progest Softgel Capsules 100mg & 200mg" by way of contract manufacturing at M/s OBS Pakistan Pvt. Ltd.) C-14, S.I.T.E, Karachi (Currently titled as M/s. Searle Pakistan Ltd.,) vide letter dated 17-08-2021.

In continuation and keeping in view the dissolution method and apparatus adopted by the manufacturer of reference product (i.e., approved by USFDA), the contract manufacturer was directed (vide letter dated 20-08-2021 and reminder dated 04-04-2022) to purchase "Dissolution Apparatus III (Reciprocating Cylinder)" and perform installation, operational and performance qualifications including dissolution test (using a validated analytical method) and submit report within 3 months.

However, despite of the commitment submitted by the registration holder vide letter dated 29-06-2021, the firm neither purchased reciprocating cylinder nor performed quantitative rupture test on U-Progest Soft Gelatin Capsule 100mg and 200mg citing reasons mentioned in column II of below table which have been reviewed and commented vide column III of below table:

I	II	III
S/N	**Information/ Documents Submitted by the Firm**	**Comments/ Remarks of Evaluator/ Reg-I Section**
Rupture Testing as per USFDA:		
1.	Soft gelatin (softgel) capsules can be a means of achieving bioavailability of highly lipophilic drugs that are practically water insoluble. The API is generally dissolve in edible oil. For softgel capsules containing lipophilic drugs, the Division of Bioequivalence (DBE), in the office of Generic Drugs, Center for Drug Evaluation and Research, USFDA, requires from applicants to submit a "quantitative rupture" *in-vitro* drug release test tomeasure the drug released in the dissolutionmedium after the capsule shell ruptures [Dissolution Testing for Generic Drugs: AnFDA Perspective - PMC (nih.gov)].	First reference provided by the firm i.e., Dissolution Testing for Generic Drugs: An FDA Perspective -PMC (nih.gov) is merely an article published online dated 09-04-2011, summarizing how dissolution testing is used for the approval of safe and effectivegeneric drug products in the United States. Regarding rupture test, the article states as under: *"For liquid-filled capsules containing lipophilic drugs, the DBE (Division of Bioequivalence) asks applicants to develop a "quantitative rupture" in vitro drug release test; where, after the rupture of the capsule shell the drug is released and measured in the medium. The DBE believes that this method provides an accurate assessment of the rate at which a capsule shell ruptures by quantifying the amount of active pharmaceutical ingredient (API) dispersed in the surrounding medium. DBE recognizes that developing "quantitative rupture" drug release test for capsules containing lipophilic drugs formulated in oils may be a challenge. Therefore, the DBE encourages the firms to develop an appropriate method using a USP apparatus. Generally, a suitable surfactant in an appropriate concentration can be used in the aqueous medium for these formulations."*
2.	As per USFDA quantitative rupture testing and dissolution testing are the same thing for softgel capsules. Besides this USFDA describes on their website [Dissolution Methods (fda.gov)] for progesterone soft gelatin capsule dissolution methods that "Develop a quantitative rupture test".	Dissolution Methods (fda.gov) is a database developed by USFDA, consisting of FDA recommended dissolution methods for different products. For progesterone capsule, the database states to "develop a quantitative rupture test" (last updated 08-04-2010). In this context, the firm was further advised to submit complete detail/report of quantitative rupture

<table>
<tr><td></td><td>In light of above references Rupture Testing for U-Progest is appropriate to determine dissolution of the product.</td><td>test being performed on aforementioned products along-with method validation report. However, as evident from the report submitted by the firm, instead of developing a quantitative rupture test, the firm has developed, validated and performed the rupture test to determine only the time taken by the capsule to get ruptured, regardless of quantitative analysis of the released content.</td></tr>
<tr><td colspan="3">Orphan Drug:</td></tr>
<tr><td>1.</td><td>i. Only three preparations of progesterone soft gel capsules are available in the local market, two of them being imported in finished form (which are not available regularly due to recurrent shortages) and only one is manufactured locally by OBS Pakistan (Pvt.) Ltd.
ii. OBS is manufacturing these products since November 2014 (using validated testing method including rupture test) and ensuring its availability all the times.

iii. Since its launch, the product has neither declared sub-standard nor any complaint received from Health Care Professional or end user.</td><td>As directed, the firm was verbally communicated to provide quarterly manufacturing record for evaluation.
In response, the firm has submitted copies of batch release certificates for last three batches. Information extracted from the attached certificates is summarized as under:

<table>
<tr><th>Product Name</th><th>Batch No.</th><th>Quantity (Packs)</th><th>Date of Release</th></tr>
<tr><td rowspan="3">U-Progest 100mg Softgel Capsule</td><td>DRD008</td><td>2469</td><td>29-07-2022</td></tr>
<tr><td>DRD009</td><td>2384</td><td>29-07-2022</td></tr>
<tr><td>DRD010</td><td>2464</td><td>30-07-2022</td></tr>

</table>
</td></tr>
</table>

2.	i. Advice of the Authority for purchasing Dissolution Apparatus III is an additional requisite and financial burden on the firm as it involves huge investment for a producthaving very thin margins. While, Aspin considers producing this product as an obligation to the nation by ensuring uninterrupted availability of an Orphan product. ii. The firm will continue to test the finished product by their validated method which is being used since 2014. Furthermore, the firm hopes that DRAP understands their point of view and will not contend for purchase of an additional and high cost equipment i.e. Dissolution Apparatus III (Reciprocating Cylinder).	Keeping in view the above references and current submission of the firm, it can be concluded that the firm has neither purchased nor intends to purchase Dissolution Apparatus III (Reciprocating Cylinder) regarding which the firm was advised vide letter dated 20-08-2021 reminded vide letter dated 04-04-2022 in the light of *"bioequivalence reviews of Progesterone Capsule"* available on official website of USFDA Progesterone (fda.gov).

Decision: Keeping in view the Dissolution Database available at Dissolution Methods (fda.gov), wherein it has been recommended to develop a quantitative rupture test for 'Progesterone Capsule', Registration Board decided that the firm will be directed to develop, validate, perform and submit quantitative rupture test report of U-Progest Capsule 100mg (R.No.108910) & U-Progest Capsule 200mg (R.No.108911).

Case No. 3. Delegation of Functions to Chairman Registration Board.

Registration Board, in its various meetings (262,276,277,284,288,290,292,295,296 and 297) authorized its Chairman certain functions, under Rule 24(10) of Drugs (Licensing, Registering & Advertising) Rules, 1976, in order to facilitate timely disposal of various cases / post-registration variation cases/ contravention of various provisions of the Drugs Act, 1976.

Later, in its 307th meeting held on 08th - 10th June, 2021, the Board endorsed continuity of delegation of below functions to Chairman Registration Board on behalf of Registration Board.

Sr. No.	Functions
1.	Relaxation / exemption in urdu version only for drugs imported for critical ailments like AIDS, cancer, vaccines, sera etc subject to the condition that same shall be printed at any licensed premises prior to marketing.
2.	Export Registration of finished drugs for following categories except Narcotic, Psychotropic drugs and precursor chemicals. • Generic version / me too drugs of already registered formulations. • Formulations which have already been registered for export purposes. • Formulations which are approved by reference regulatory authorities (as approved by Registration Board) and yet not registered for local sale.

3.	Change of name of the manufacturer of imported drug(s).
4.	Increase/ decrease in shelf life of registered drug.
5.	Grant of additional packing of already registered same drugs/medicines except injectables. (For Veterinary Drugs only)
6.	Action initiated on safety of drugs.
7.	Change of packing from: • PVC to Alu-Alu and vice-versa • strip to blister and vice-versa • strip/blister to bottle and vice-versa • glass bottle to PET/HDPE bottle and vice-versa • PET bottle to HDPE bottle and vice-versa • Vial to ampoule and vice-versa • Glass vial/ampoule to plastic ampoule and vice-versa • Glass vial/ampoule to pre-filled syringe and vice-versa
8.	Change in labeled storage conditions of imported product
9.	Change of source/grant of additional source of half-finished products like pellets, bulk liquid and granules etc. of registered drugs.
10.	Constitution of panel of inspector for product specific inspection, verification of stability data, GMP inspection and dosage form specific inspection of manufacturer abroad etc.
11.	Correction of typographic errors in recording minutes and registration letters like composition, brand names, demanded price, pack size, address (as per DML/DSL) etc or other typing mistakes.
12.	Change in the packing design/packaging components/ change in label, carton/change in shape, colour of Capsule, Tablets and shape of blister/ aluminum foil.
13.	Change of brand names of registered drug(s).
14.	To grant approval of exemption from inspection of manufacturer abroad as per Import Policy for inspection of finished drugs.
15.	To grant approval for issuance of registration letter(s) on recommendation of inspection panel nominated for inspection of manufacturer abroad.
16.	Correction in formulation in accordance with standard formulations approved by reference regulatory authorities i.e. change from uncoated to film/ sugar/enteric coated tablet or vice versa and correction in base / salt / ester / form of API.
17.	Grant of registration of diluents as combo packs for already registered/approved drugs provided that such diluents shall be provided free of cost.
18.	Issuance of registration letters in approved cases of ciprofloxacin granules for oral suspension containing ciprofloxacin base where revision / correction of salt form and granules of the formulation is required after submission of requisite fee. All registration holders of ciprofloxacin granules for oral suspension shall ensure the supply of ciprofloxacin granules along with the solvent / diluent having following composition as per the innovator product. • Soya lecithin • Medium chain triglycerides

	• Flavor • Sucrose • Purified water.
19.	**Approval of change of registration status from old title/name of the firm to the new title/name of the firm (If site remains the same)**
20.	Approval of change/correction of finished product specifications in different scenarios mentioned as under: i. Products registered with manufacturer specifications but formulation exist in official monograph (as decided by Registration Board in 267th meeting) ii. Products registered with any pharmacopoeial specification (e.g. USP) but formulation do not exist in that particular pharmacopeia but another pharmacopeia (e.g. BP). iii. Correction in specification while issuance of registration letters in accordance with decisions taken in 264th, 266th & 267th meetings of Registration Board. iv. Product approved/registered with any pharmacopoeial specification but formulation do not exist in any official monograph. v. Change of specifications from one official pharmacopeia to another official pharmacopeia. vi. Manufacturer/innovator specifications for a product are more stringent than official pharmacopoeial specifications.
21.	Grant of renewal of registration (locally Manufactured) which have been received within time as required under Rule 27 of Drug (LR&A) Rules 1976.
22.	Grant of extension in cases of contract manufacturing of already registered products if these are on same terms and conditions.
23.	Change of contract manufacturer/ manufacturing site of already registered products.
24.	Issuance of show cause notice for cancellation of registration after termination of agency authorization by Manufacturer / Product License Holder.
25.	Issuance of show cause notice for cancellation of registration after cancellation of DML

With respect to S.No. 19 of the above-mentioned functions, the Chairman has been authorized for "Approval of change of **registration status** from old title/name of the firm to the new title/name of the firm (If site remains the same)".

However, as per existing practice, if name/ title of the applicant is changed before issuance of registration letter (i.e., during the process of evaluation or during processing for issuance of registration letter after approval by the RB), the case is processed at Division level with full fee of registration.

Accordingly, instant case is submitted for endorsement by the Registration Board regarding approvals for change of title/ name of the applicant before issuance of registration letter.

Decision: **Registration Board endorsed the delegation of following function to Chairman Registration Board on behalf of Registration Board:**

"Approval of pre-registration variation in title/name of the firm (If manufacturing site remains the same)"

Case No. 4. Verification of Duplicate fee challans.

Registration Board in its 264th meeting held on 28th -29th December, 2016 decided to adopt following procedure for verification of fee challan:

a. Respective section shall report non-traceability of application from record and receipt of application will be verified / confirmed from R&I section, DRAP.
b. For verification of deposited fee, copy of bank challan / deposit slip shall be forwarded to Budget & Account Division for verification from record. In case of non-traceability by aforementioned Division, applicant will get verification of challan from National Bank of Pakistan / Allied Bank. In both cases, applicant will submit an undertaking that these challans have not been and shall not be used for any purpose/ processing of case(s), other than the registration of applied drug.
c. For all those cases whose challans are neither verified by Budget & Account Division nor by National Bank of Pakistan / Allied Bank, and in order to resolve this issue, it is advisable that applicant may deposit fee for missing challan to avoid any financial non-compliance and consideration of registration application at same position as confirmed by R&I section, DRAP.
d. If Registration Board has already approved application subject to verification of fee, then Chairman is authorized for issuance of registration letters after verification of fee challan / submission of fee as recorded above.

Later on, in its 285th meeting held on 03rd – 4th October, 2018, Registration Board decided as under:

> "**The Board decided and directed also to accept original yellow challan slips as evidence / confirmation of fee submission."**

However, in a number of cases (especially those of differential fee), the applicants only submitted copies of fee challan. When such cases were referred (in line with the decision of 264th meeting) for verification of fee from Budget and Accounts Division, DRAP, the said Division responded as under:

> **"You are requested to provide original deposit slip/ challan for verification because as per SOP, verification can only be done on original (Pink color/ Drap copy) deposit slip/ challan. If not possible, please proceed in the light of decision made in 264th meeting of Registration Board."**

In order to dispose of such cases, the applicants were directed to submit original MOH/ DRAP's acknowledged receipts of their application having endorsement of fee by the statistical officer and registration letters were issued accordingly.

Instant case is placed before the Registration Board for endorsement of above-mentioned practice of considering original MOH/ DRAP's (R&I) acknowledged receipts of applications having endorsement of fee by the statistical officer.

Decision: Registration Board decided that in future for all those cases where the applicant only holds photocopy of fee deposit slip/ challan, reference shall be forwarded to DDO/Deputy Director, Budget & Accounts Division, DRAP for verification of photocopy fee deposit slip/ challan.

Case No. 5. Deferred Applications of M/s Apex Pharmaceuticals (Pvt) Ltd., Karachi

Registration Board in its 277th meeting held on 27th - 29th December, 2017 deferred the following registration applications of M/s Apex Pharmaceuticals (Pvt) Ltd., Plot No. D-21-A/1, S.I.T.E., Super Highway, Karachi (DML No.000746) for submission of source of pellets and requisite documents and fee.

S. No.	Name of drug(s) & Composition	Proposed Pack size	Proposed Price	Date of application, Diary No. Form

				& Fee
1.	Esopex 20mg Capsule Each capsule contains: Esomeprazole……20 mg (Proton pump inhibitor)	As per PRC	As per PRC	16-04-2012 Dy.No.715 Rs.8000/- Rs. 12,000/- Form-5
2.	Esopex Capsule Each capsule contains: Esomeprazole……40 mg (Proton pump inhibitor)	14's	As per PRC	16-04-2012 Dy.No.685 Rs.8000/- Rs. 12,000/- Form-5
3.	Lowcid 20mg Capsule Each capsule contains: Omeprazole… .....20 mg (Antipeptic / Ulcerant)	As per PRC	As per PRC	16-04-2012 Dy.No.714 Rs.8000/-+ 12,000/- Form-5

The applicant has now submitted following information/ details in line with the decision of decision of M-277 of Registration Board

Sr.No	Name of drug(s) & Composition	Fees Details
1.	Esopex 20mg Capsule Each capsule contains: Enteric Coated Pellets of Esomeprazole Eq. to Esomeprazole…..... 20mg **Source of Pellets:** **Vision Pharmaceuticals**	• Rs.30,000/-(Slip # 726025932433) for correction in label claim. • Rs.10,000/-(Slip# 1778637613) for differential Registration Fee.
2.	Esopex 40mg Capsule Each capsule contains: Enteric Coated Pellets of Esomeprazole Eq. to Esomeprazole…..... 40mg **Vision Pharmaceuticals**	• Rs.30,000/-(Slip # 00402717) for correction in label claim. • Rs.10,000/-(Slip# 9785271533) for differential Registration Fee.
3.	Lowcid 20mg Capsule Each capsule contains:	• Rs.30,000/-(Slip # 09656776580) for correction in label claim. • Rs.10,000/-(Slip# 70459688308) for differential Registration Fee.

	Enteric Coated Pellets of Omeprazole Eq. to Omeprazole…..... 20mg **Vision Pharmaceuticals**	

i. Capsule (General) Section Approval confirmed from Licensing Division's letter dated 20-09-2021.
ii. Last GMP inspection dated 20-04-2023 (status rated as "Good")
iii. DML renewed w.e.f. 27-08-2017

Decision: Registration Board approved the grant of registration for below-mentioned products of M/s Apex Pharmaceuticals, Pharmaceuticals (Pvt) Ltd., Plot No. D-21-A/1, S.I.T.E., Super Highway, Karachi (DML No.000746):

Sr.No	Name of drug(s) & Composition
1.	Esopex 20mg Capsule Each capsule contains: Enteric Coated Pellets of Esomeprazole Eq. to Esomeprazole…..... 20mg **Source of Pellets:** Vision Pharmaceuticals, Islamabad
2.	Esopex 40mg Capsule Each capsule contains: Enteric Coated Pellets of Esomeprazole Eq. to Esomeprazole…..... 40mg **Source of Pellets:** Vision Pharmaceuticals, Islamabad
3.	Lowcid 20mg Capsule Each capsule contains: Enteric Coated Pellets of Omeprazole Eq. to Omeprazole…..... 20mg **Source of Pellets:** Vision Pharmaceuticals, Islamabad

Case No. 6. Request of M/s Akhai Pharmaceuticals (Pvt) Ltd., Balochistan for Consumption of Imported Controlled Drug Substance 'Ketamine Hydrochloride'

Registration Board in its 323rd meeting held on 06th-08th December, 2022 considered the subject mentioned request of M/s Akhai Pharmaceuticals (Pvt) Ltd., A-248 & A-256 to A-259, Hub Industrial Trading Estate Lasbella Balochistan wherein the firm informed that they have been granted registration of Ketlar (Ketamine) Injection; Reg. No.014966 (valid till 30th June, 2025) by way of contract manufacturing at

M/s. Neutro Pharma (Pvt) Ltd. 9.5 KM, Sheikhupra Road, Lahore. The registration was granted for contract manufacturing well before classification of Ketamine under controlled drug substances

Furthermore, M/s Neutro Pharma had imported 50kg of Ketamine Hydrochloride on their behalf and for the exclusive manufacturing of their above stated product. Primary and secondary packaging materials are also available with them. **In this context, the firm requested for permission to consume the available quantity of Ketamine Hydrochloride**.

However, Ketamine and its salts have been declared as "Psychotropic substances" vide SRO Number 1350(I)/2021 dated 15th October, 2021. Furthermore, as per existing contract manufacturing policy, notified vide SRO 1347(I)/2021, dated 15.10.2021, Rule 20 A 2(c) states that:

> ***"Contract manufacturing of controlled drugs (narcotic drug or psychotropic substances or precursor chemicals) shall not be allowed;"***

In this context, following comments were also received:

Comments Received from Controlled Drugs Division:

The Committee for Allocation of Quota of Controlled Substances allocates the quota to those firms having valid drug manufacturing license and valid drug registration as per SOP.

Comments Received from QA&LT Division:

Consumption of any API is linked primarily to valid license to manufacture a drug and secondarily to valid registration of that drug. If as a consequence of any change in some rule/regulation or policy the status of both these prerequisite (DML and MA) for any drug becomes void/invalid, the consumption of respective APIs could not be allowed for that particular drug.

Foregoing in view, Registration Board decided as under:

"Keeping in view the classification of "Ketamine and its salts" under psychotropic substances (vide SRO 1350(I)/2021 dated 15th October, 2021) and Rule 20A(2)(c) of Drugs (L, R & A), Rules, 1976, Registration Board decided as follows:

- *Decided to issue show cause notice to the firm under Section 7 (11)(d) of the Drug Act, 1976 that why the registration of their product "Ketlar Injection (Reg. No. 014966)" may not be cancelled. Management of the firm shall also be given the opportunity of personal hearing in the forthcoming meeting of the Board under section 42 of the Drugs Act, 1976.*
- *Recommended QA&LT Division to decided case for already imported material as per Drug (I&E) Rules, 1976."*

Accordingly, show cause and personal hearing notice was issued dated 18-07-2023 andQA&LT Division was communicated the above-mentioned decision, in response to which, Deputy Director (QA/LT) Division has stated as under:

> *"It is pertained to mention that Division of QA & LT is helpless to implement and comply the above decision of Board as Drugs (Import & Export) rules 1976 are silent regarding disposal of this API Ketamine Hcl being Psychotropic material. The import, export, trans-shipment and disposal/destruction of Narcotic/Psychotropic material is governed under Control of Narcotic Substances Act, 1997 in collaboration with Controlled Drug Division of DRAP. It is therefore requested to reconsider the decision and matter may be referred to concerned division for implementation."*

In this context, it is submitted that the field force is under the administrative control of QA&LT Division and regulatory actions could not be carried out without the filed force. Furthermore, Assistant Director (I&E) is also under the administrative control of QA&LT, which is working as Licensing Authority on behalf of CEO, DRAP after delegation of power. Therefore, the fate of imported controlled drug substance "Ketamine" may be decided by QA&LT Division in consultation with Controlled Drugs Division, DRAP and Ministry of Narcotics Control.

Keeping in view the above-mentioned stance of PE&R and QA & LT Division, the case was referred for collective wisdom of the Authority on the matter, please.

DRAP's Authority in its 173rd meeting held on 10th October, 2023 considered and decided the case as under:

> ***"The request of M/s Akhai Pharmaceuticals was not acceded to as the Drugs (Licensing, Registering & Advertising) Rules, 1976 does not contain the enabling provision to allow contract manufacturing of controlled substance."***

Furthermore, with respect to the show-cause along-with personal hearing notice issued to the firm to appear before the Registration Board on 25th July, 2023 at 2.00 P.M., the case was considered by the Board in its 330th meeting held on 24th-26th July, 2023 wherein no one appeared on behalf of the firm. Accordingly, the Board decided as under:

> ***"Registration Board decided that the firm shall be provided one final opportunity of personal hearing in the next meeting."***

In line with the above-mentioned decision, the firm has been called for personal hearing on 20th December, 2023 at 3:00 P.M.

Proceedings of 333rd Meeting of Registration Board:

While, the meeting was in process, M/s Akhai Pharmaceuticals (vide letter dated 19-12-2023) informed that on 19th December, 2023, they came to know that the case regarding Ketlar Injection has been included in agenda of 333rd meeting. They did not receive the notice of personal hearing yet and no flight is available from Karachi to Islamabad on 20-12-2023. Accordingly, the firm requested to give time for hearing in the next meeting of Registration Board.

Furthermore, Mr. Haroon Dugal, Advocate Supreme Court, as counsel for M/s Akhai Pharmaceuticals also submitted an application for adjournment (received on 20-12-2023) stating that the counsel is representing petitioner in the titled case for which no personal hearing notice has been duly received so far. Furthermore, petitioner's daughter wedding has been scheduled for the same date as the hearing. Accordingly, the petitioner is unable to travel to attend the hearing scheduled on 20-12-2023 as no flight is available from Karachi to Islamabad on the afore mentioned date. Due to the foregoing circumstances, the petitioner will be unable to appear before this Honourable Court. Hence, it is respectfully requested that the case may kindly be adjourned to a date convenient to this Honourable Court in the interest of justice, equity and fair play.

Decision: Registration Board decided that the firm shall be provided one final opportunity of personal hearing in the next meeting of Registration Board.

Case No. 7. Request of M/s Wnsfeild Pharmaceuticals, Hattar Regarding Withdrawal of Tamoxi Tablet Approved in 323rd Meeting of Registration Board

Following product of M/s Wnsfeild Pharmaceuticals, Plot No.122, Block-A, Phase-V, Industrial Estate Hattar was approved by the Registration Board in its 323rd meeting held on 06th-08th December, 2022 as per following detail:

Name and address of manufacturer/ Applicant	M/s WnsFeild Pharmaceuticals, Plot No.122, Block-A, Phase-V, Industrial Estate Hattar.
Brand Name + Dosage Form + Strength	TAMOXI 20mg tablet
Composition	Each film-coated tablet contains: - Tamoxifen (As Citrate) 20mg

Diary No. Date of R & I & fee	Dy. No. 287 dated 25-11-11, Rs. /- 8000/- Dy. No. dated Differential fee Rs. 12,000/- vide challan No. 0548767 dated 14-10-2015. (Duplicate dossier, R & I record of initial and differential fee submission along with fee challans required) R&I verified
Pharmacological Group	Selective estrogen-receptor modulator
Type of Form	Form 5
Finished product Specification	USP specifications
Pack size & Demanded Price	As per SRO
Approval status of product in Reference Regulatory Authorities	USFDA approved (NOLVADEX 10mg & 20mg, uncoated tablet) **Federal Register determination that product was not discontinued or withdrawn for safety or effectiveness reasons**, Also MHRA approved
Me-too status	Tamoxidex 20mg Tablet of Pacific pharma, Lahore. Registration No. 098134
GMP status	Not provided
Remarks of the Evaluator (PEC-XVII)	• Revise label claim as per reference product as: Each tablet contains: Tamoxifen (As Citrate) .....20mg, along with revision of master formulation and manufacturing outlines accordingly. • For above revision, submit applicable fee as per notifications 7-11/2012-B&A/DRAP dated 07-05-2021 & 13-07-2021.
Decision: Approved as per following label claim: **Each tablet contains:** **Tamoxifen (as Citrate)..... 20mg** • **Firm shall submit fee of Rs. 7,500 for correction/pre-approval change in composition (correction/change of formulation from film coated to uncoated tablet), as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021 along with copy of latest GMP inspection report conducted within last three years.** • **Registration Board further decided to verify fee challan as per decision of 285th meeting of Registration Board.**	

Later on, in 329th meeting of Registration Board held on 06th-08th June, 2023, separate application of "Tamoxifen 20mg Tablet" was approved in favour of M/s Wnsfeild, Hattar:

Name and address of manufacturer / Applicant	M/s Wnsfeild Pharmaceuticals Plot No. 122, Block A, Phase- V, Industrial Estate Hattar, Pakistan. (DML No. 000610) Tablet section (General)
Brand Name +Dosage Form + Strength	TAXOFIN tablet 20mg

Composition	Each film coated tablet contains: Tamoxifen as Citrate Salt (USP)…..20mg
Diary No. Date of R& I & fee	Dy No. 14531 dated 07-03-2019 Fee paid PKR 20,000/- vide Deposit Slip No. 1900626 dated 05-03-2019.
Pharmacological Group	Hormone antagonists and related agents Anti-estrogens ATC Code L02BA01
Type of Form	Form 5
Finished Product Specification	USP
Pack size & Demanded Price	As per SRO
Approval status of product in Reference Regulatory Authorities.	Tamoxifen 20mg film-coated Tablets MHRA Approved PL 00142/0272
Me-too status	Shamoxifen Tablet 20mg M/s Shaheen Pharmaceuticals, Swat Reg. No. 97089
GMP status	Last GMP inspection conducted on 10-12-2020 on the basis of which Certificate No. F.11-195/2021-DRAP-32 dated 06-05-2021 was issued.
Remarks of the Evaluator[xxiii].	Form-5 and annexures are signed by Qualified personnel (Production Incharge and Quality Control Incharge) but not signed by applicant. ***Later on, the firm rectified the shortcomings vide Letter No. Nil dt 01-06-2023 (Dy No. 13787 dated 02-06-2023) and the Board was apprised of the same during the meeting.***
Decision: Approved. The firm shall submit fee of Rs. 7,500/- for correction/pre-approval change in Form 5, as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021, before issuance of registration letter.	

Now, the firm has requested (vide application dated for withdrawal of registration application of "Tamoxifen Tablet" approved in 323rd meeting of Registration Board.

Decision: Registration Board acceded to the above-mentioned request of M/s WnsfeildPharmaceuticals, Plot No.122, Block-A, Phase-V, Industrial Estate Hattar forwithdrawal of registration application of "Tamoxifen Tablet" (Dy. No. 287 dated 25-11-11), approved in 323rd meeting of Registration Board.

Case No.8. Request for Change in Registration Status of Ikodil 10mg and 20mg Tablets from M/s Searle Pakistan Limited, (Formerly M/s OBS Pakistan Pvt Ltd.) C-14, S.I.T.E, Karachito M/s Aspin Pharma Pvt Pharma Pvt Ltd., Korangi Industrial Area Karachi, throughcontract manufacturing.

M/s. Aspin Pharma Pvt Pharma Pvt Ltd., Korangi Industrial Area Karachi has requested to change the product registration status of Ikodil 10mg and 20mg Tablets from M/s Searle Pakistan Limited, (Formerly M/s OBS Pakistan Pvt Ltd.) C-14, S.I.T.E, Karachi to their name. However, the product will continue to manufacture at the same manufacturing site i.e. M/s Searle Pakistan Limited, (Formerly M/s OBS Pakistan Pvt Ltd.) C-14, S.I.T.E, Karachi through contract manufacturing.

The detail of cases is as following:

Administrative Documents Submitted in the light of SOP approved by the Registration Board in its 283rd meeting
i. Copy of DML of M/s OBS Pakistan Pvt Ltd., (DML # 000012) renewed w.e.f. 26-10-2020 and M/s Aspin Pharma Pvt Ltd, (DML# 000045) renewed w.e.f 31-03-2020.
ii. Copy of DML (000045) of M/s Aspin Pharma (Pvt) Ltd, Karachi. Plot No. 10&25 Korangi Industrial Area, Karachi-Pakistan renewed w.e.f 31-03-2020.
iii. Copy of GMP certificate of M/s Searle Pakistan Ltd (Formerly OBS Pakistan Ltd.) dated 15-02-2022 on the basis of inspection conducted on 08-10-2021. Copy of last GMP inspection report dated 09-02-2022.
iv. Copy of renewal of DML letter dated 26-10-2020 confirming "Tablet (General) Section of M/s Searle Pakistan Ltd (Formerly OBS Pakistan Ltd.), and same on the GMP Certificate dated 15th Feb, 2022. v. Copy of DRAP's letter dated 16th June, 2021 for renewal of DML of M/s Aspin Pharma Pvt Ltd, mentioning Tablet (General) among sections
vi. Copy of DRAP's letter dated 16th June, 2021 for renewal of DML of M/s Aspin Pharma Pvt Ltd, mentioning Tablet (General) among sections
vii. Approval letter for change in title of registration holder from OBS Pakistan (Pvt) Ltd., Karachi to Searle Pakistan Limited, Karachi dated 25-04-2022.
viii. NOC from M/s. The Searle Company Ltd; Karachi for transfer of Ikodil 10mg and 20mg Tablets on the name of M/s. Aspin Pharma Pvt Pharma Pvt Ltd., Korangi Industrial Area, Karachi issued on 31-10-2022. Fresh NOC dated 30-10-2023, issued by M/s Searle Pakistan Limited, Karachi.
ix. Request dated 30-10-2023 regarding withdrawal of Anvol Tablets 2.5mg & 5mg by existing Registration holder.
x. Contract Agreement between M/s Aspin Pharma Pvt Ltd, and M/s Searle Pakistan Ltd (Formerly OBS Pakistan Ltd).
xi. Relevant undertakings & commitments.

The cases were referred to Pharmaceutical Evaluation Cell / QMS for scrutiny/evaluation. Detail of submitted documents and remarks of evaluators have been mentioned as under:

[Evaluator: Mr. Asadullah (DD-QMS)]

	Name and address of API manufacturer.	M/s RPG Life Sciences Limited, MIDC Land, Thane Belapur Road, Navi Mumbai, India
	1.5.11-Proposed Label	Submitted.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Drug Substance Nicorandil was synthesis at manufacturing site of M/s RPG Life Sciences India, who has provided information summaries related to structure, properties, solubility, characterization, and impurities. DS specification was assigned as per BP monograph and accordingly analytical method was developed and verified. CoA of DS used in stability studies was provided from both DS and DP manufacturer. Working standard characterized against BP reference standard was used by M/s RPG. Stability studies were conducted for accelerated and long-term conditions. Applicant M/s OBS Pharma provided summaries of information related to description of finished dosage form, composition, manufacturing process flow and critical steps and intermediates, batch formula, Specification were assigned as per BP monograph, analytical procedure and its verification, CoA of raw DS, batch analysis, working standard, container closure system and stability studies of drug product. Information summaries for analytical method procedures and validation were provided. The finished product is recommended to store below 30^{O}C with a

		shelf life of 18 months.
	Module-III Drug Substance:	Firm has submitted data for drug substance related to nomenclature, structure, general properties, solubility and other physio chemical properties, physical form, manufacturers and their roles. Synthesis process flow of Nicorandil and a brief on manufacturing process was provided. Characterization of DS and related impurities using IR, UV and Spectroscopy. The acceptable limits for each type of impurities were assigned and analytical results of three batches were DS shown conformance to these limits. Elemental impurities, Genotoxicity and Nitrosamine impurities were also analysed and DS was within acceptable limits, non-mutagenic and free from nitrosamine impurities respectively. DS specifications and analytical method was developed as per BP monograph. Analytical method for assay and related substance was verified by HPLC. Method for excipients specifications, CoAs and Standard testing procedures. Certificate of analysis of working standard was provided. Container closure system comprises white polyethylene bags in a HDPE Drums, with a storage condition f 2-8^{o}C in tightly closed container for 36 months. Specifications and testing methods of packaging material was provided. Three batches were subjected to stability studies for long term and accelerated conditions.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches (Mfg Date: 05-2013) of drug substance at both accelerated as well as real time conditions. The accelerated stability data was conducted at 25^{o}C ± 2^{o}C / 60% ± 5% RH for 6 months. The DS was not stable at accelerated condition as significant changes were observed. **The real time stability data is conducted at 5^{o}C ± 3^{o}C for 72 months and the DS remained stable for 72 months.** The DS was placed in transparent inner and outer polyethylene bags in aHDPE Container.
	Module-III Drug Product:	Firm has submitted data of drug product including its composition, formulation, justification of excipients, and batch formula, manufacturing procedure, critical parameters of manufacturing process was provided. Dry mixing and compression method was used for tablet manufacturing. Pharmaceutical equivalence and comparative dissolution were studied against the

<table>
<tr><td></td><td></td><td>reference product. CDP was comparable with the reference product. Manufacturing process, process control and validation protocol was provided. Control of excipients, specifications, analytical procedures were provided. Information for control of drug product, analytical procedure, Dissolution method as per BP, and verification of analytical method was provided. Batch analysis, justification of specifications, working standard, container closure system and stability studies were provided.</td></tr>
<tr><td></td><td>Pharmaceutical Equivalence and Comparative Dissolution Profile</td><td>The comparative dissolution profile was performed against the Ikorel 10mg Tablets manufactured by Sanofi, UK. The comparison was performed in three dissolution mediums at pH 1.2, pH 4.5 and pH 6.8 using 12 samples at 10, 15, 30 and 45 minutes. The results revealed are as under:-

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate issued to M/s RPG Life Science, issued by the Drug Control Administration, Government of Telangana, India. Validity upto 24-06-2024. This certificate mentioned Nicorandil in approved products list.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice specifying purchase of 20 Kg Nicorandil by M/S OBS Pakistan, cleared from DRAP Karachi office dated Jan-2019
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted that their HPLC system is 21 CFR compliant.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Proceedings of M-333:

Registration Board was apprised that significant change was reported at 6th month of accelerated study conducted at 25ºC ± 2ºC / 60% ± 5% RH. While, real-time stability data was collected at 5ºC ± 3ºC for 72 months and the drug substance remained stable for 72 months. In this context, ICH Q1A(R2) guidelines states as under:

"If significant change occurs between 3 and 6 months' testing at the accelerated storage condition, the proposed re-test period should be based on the real time data available at the long term storage condition."

Decision: Registration Board decided as under:

i. **Cancelled registration of following products from the name of M/s Searle Pakistan Limited (Formerly: M/s OBS Pakistan Pvt. Ltd.), C-14, S.I.T.E, Karachi (DML No.000012).**

S. No.	Reg. No.	Product Name & Composition
1.	058053	**Ikodil 10mg Tablets** **Each tablet contains: -** **Nicorandil..... 10mg** **(BP Specification)**
2.	058054	**Ikodil 20mg Tablets** **Each tablet contains: -** **Nicorandil..... 20mg** **(BP Specification)**

ii. **Approved registration of following products in the name of M/s. Aspin Pharma (Pvt.) Ltd., Plot No.10 & 25 Sector 20, Korangi Industrial Area, Karachi (DML No.000045) by way of contract manufacturing at M/s Searle Pakistan Limited (Formerly: M/s OBS Pakistan Pvt. Ltd.), C-14, S.I.T.E, Karachi (DML No.000012).**
   a) **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
   b) **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

S. No.	Product Name & Composition
i.	**Ikodil Tablet 10mg** **Each tablet contains: -** **Nicorandil..... 10mg** **(BP Specifications)**
ii.	**Ikodil Tablet 20mg** **Each tablet contains: -** **Nicorandil..... 20mg** **(BP Specifications)**

iii. **Reference will be sent to Costing and Pricing Division for confirmation of maximum retail price (MRP).**

M/s. Zafa Pharmaceutical Laboratories (Pvt) Ltd, A-46, S.I.T.E, North Karachi					
1.	023941	Famila 28F Tablets Each tablet contains: Levonorgestrel…0.15mg Ehtinylestradiol…0.03mg Each Tablet contains: Ferrous Fumarate BP 75.0mg equivalent to 24.37mg of Ferrous Iron	Famila 28F Tablets Each tablet contains: Levonorgestrel B.P…0.15mg Ehtinylestradiol B.P…0.03mg Each film coated Tablet contains: Ferrous Fumarate BP 75.0mg equivalent to 24.37mg of Ferrous Iron **(BP Specification)**	06-02-2002 20-10-2021	Fee Rs 10,000/- deposited dated 23-02-2023 R&I Dy. No. 5693 dated 28-02-2023

Remarks:-

The firm has submitted the reference of FDA which contains levonorgestrel 0.3mg, Ethinyl Estradiol 0.03mg and Ferrous Fumarate 75 mg, While the product Famila 28F tablet contains levonorgestrel 0.15mg, Ethinyl Estradiol 0.03mg and Ferrous Fumarate 75 mg.

The firm has also submitted the reference of WHO PQ product having same formulation, but the tablet is sugar coated**.**

Decision of 104th PRVC:-

The Chairman Registration Board on recommendation of committee deferred the cases for submission of evidence of film coated tablet formulation from RRAs.

Reply of Firm

M/s. Zafa Pharmaceutical Laboratories (Pvt) Ltd, A-46, S.I.T.E, North Karachi vide Dy. No. 21458 dated 30-08-2023 has referred to this office Letter No. F-104-PRVC/2023 (PR-I) dated 16-08-2023 regarding their Application No.5693 dated 28-02-2023 on subject "Change in Specification of Registered Drug namely Famila 28 F Tablets, Reg. No. 023941". The firm has provided the following details: -

1. **Registration of Drug Product:**

   The Drugs Registration Board granted registration of drug namely Famila 28 F Tablets via Letter No. F.6-33/94-Reg.-II (M-168) dated 06-02-2002. The Registration Number of Famila 28 F Tablet is 023941.

2. **Registered Packing of Drug Product:**

The Drug Product Famila 28 F has composite packing of 21+7 Tablets. The 21 Tablet are hormone and used for birth control while the 7 Tablets are Iron Supplement.

3. Registered Composition of Drug Product:

Hormone Tablet (Active Medicine w.r.t. Birth Control)	Iron Supplement Tablet (In-active Medicine w.r.t. Birth Control)
Each Tablet Contains: Levonorgesgestrel 0.150 mg and Ethinylestradiol 0.030 mg	Each Tablet contains: Ferrous Fumarate 75 mg equivalent to 24.37 mg of elemental Iron

4. Pharmaceutical Form:

Hormone Tablet (Active Medicine w.r.t. Birth Control)	Iron Supplement Tablet (In-active Medicine w.r.t. Birth Control)
Uncoated Tablets	Film Coated Tablets

Undertakings that the applied product is exclusively for export purpose and the proposed names/ label/ colour do	Provided (Pages. 240/C)

not resemble with already registered brands in importing country.	

Detail of the products is given below:

Sr.#	Name of Drug(s) with composition	Generic/RRA Status	Dy.No.(EFD)/Fee with date
I	II	III	IV
102.	Restat 20mg Tablet Each film coated tablet contains: Atorvastatin (as atorvastatin calcium trihydrate) 20mg	Winstor tablet by M/s Sanofi	Dy. No. 1300/23 (14.11.2023) Rs.30,000/- (30.10.2023)
103.	Restat 10mg Tablet Each film coated tablet contains: Atorvastatin (as atorvastatin calcium trihydrate) 10mg	Winstor tablet by M/s Sanofi	Dy. No. 1301/23 (14.11.2023) Rs.30,000/- (30.10.2023)

The applied names resemble with already registered brand names Crestat (Rosuvastatin) of M/s CCL Pharmaceuticals, Lahore.

Decision of 108th PRVC:

"The Chairman Registration Board on recommendation of Committee considered the case and acceded to request of the firm for registration of products at sr. no. 102-103 for Export Purpose Only subject to submission of more brand names (which do not resemble with already registered drugs)."

UPDATED STATUS

Firm has state that their subject product has been approved by Philippines FDA and they have been granted Certificate of Product Registration (CPR) with the brand name of "RESTAT" in Philippines.

That, brand name "RESTAT" is their registered product in Philippines -FDA. They have submitted the copy of Certificate of Product Registration (CPR) for reference.

Decision: Approved, as the same brand has been approved by Philippines FDA and the Certificate of Product Registration (CPR) with the brand name of "RESTAT" in Philippines has been submitted

Case No. 01: Registration of Drugs under the Drugs Act, 1976-Virtual Inspection Report of Manufacturer Abroad.

Following imported product approved in 297th meeting of Registration Board subject to inspection of manufacturer abroad as per import policy.

S. No.	Name of Importer/ Manufacturer & meeting number	Name of Drug/ Composition/	Panel of Inspector(s)/ Date of inspection
1.	M/s. HealthBee ProjectsPvt. Ltd. 65-S Quaid-e- Azam Industrial Estate, Kot Lakhpat, Lahore./ M/s. Shandong Luoxin Pharmaceutical Group Stock Co., Ltd Luoqi Road, High & New Technology Industries Development Zone Linyi City, Shandong Province, PR China.	Gemcitabee for injection 0.2g Each vial contains:- Gemcitabine as Hydrochloride 0.2g	(i) Mr. Abdullah Abro, Deputy Director (MD&MC), Drug Regulatory Authority of Pakistan, Islamabad. (ii) Malik Muhammad Asad, Deputy Director (Pharmacy Services), Drug Regulatory Authority of Pakistan, Islamabad.

Accordingly, inspection was carried out by inspection panel dated 01st& 10th March, 2023 and final remarks of the panel are as under:-

FINAL REMARKS:

Based on the proceedings of virtual inspection, documents reviewed and videos of the unit seen, the panel has reached to the conclusion that the firm has basic systems to manufacture drugs and appeared to comply the GMP requirements. Hence, the panel recommends that the Registration Board may grant the registration of applied product namely Injection Gemcitabine 0.2g (Gemcitabine as Hydrochloride) of M/s. HealthBee Projects Pvt. Ltd. 65-S Quaid-e-Azam Industrial Estate, Kot Lakhpat, Lahore.

Panel further strongly recommends on-site inspection in order to verify/ascertain the Good Manufacturing Practices (GMP) of the firm within one year as virtual inspection can never replace physical/in-person inspection.

Registration Board in its 330th meeting deliberated the matter and decided to remand back the case to inspecting panel for clear and candid recommendation regarding the grant of registration as per law.

Accordingly letter issued to the panel members to remand back the case to inspecting panel for clear and candid recommendation regarding the grant of registration as per law. In response the panel members inform that;

Panel reply is as under:

Reference to Circular No. letter No.F.3-2/2005-Reg-I/Vol-II dated 27th September, 2022 regarding virtual inspection of manufacturers abroad for registration of finished drugs and biologicals guidelines, which reads as:

(a) DRAP will conduct remote virtual inspections for verification of GMP compliances by overseas manufacturing facilities. This Remote Virtual Inspection (RVI) program will utilize a risk based

approach based on the complexity of each product. The applicants will ensure adequate communication tools both for desktop review of information and video inspection at the site including video scopes, inspection cameras, borescope, fiberscope etc. depending on the operations of the manufacturing site. However, in order to avoid and potential series threat to the public health where the manufacturing sites cannot basis remotely, hybrid inspection approach or and on-site inspection will be considered.

(b) In the light of facts mentioned herein above, it is submitted that the inspection of the said premises was carried out virtually and the compliance to GMP standards was assessed, however, keeping in view the sensitivity of the products and the risks associated, the panel is of the opinion that the firm may be inspected physically before grant of registration.

Decision: Registration Board deliberated the matter in details and decided to refer the recommendations of the panel to the Authority for guidance.

Case No. 02:- Request of M/s. A&S Animal Health, 61-A Westwood Colony Thokar Niaz Baig Lahore/ Registration of Drugs under the Drugs Act, 1976.

M/s. A&S Animal Health, 61-A Westwood Colony Thokar Niaz Baig Lahore request for registration of imported veterinary drug from the name of previous importer M/s. Forward Solutions, 80-A, Judicial Colony, Thokar Niaz Baig, Lahore to their name. The details are as under:-

S. No.	Regn. No.	Name of Drug (s)/ Composition as per initial registration letters.	Manufacturer as per initial registration letter	Manufacturer/ Product License Holder as per CoPP & Shelf Life	Approved pack size as per initial registration letter	Initial date of registration/ renewal status
1.	078290	Lincomicina 150 Ganadexil Oral Powder Each gram contains:- Lincomycin (as HCL)… 150mg	Manufactured by M/s. Industrial Veterinaria, S.A.-Invesa Esmeralda, 19, E-08950 Esplugues De Llobregat (Barcelona) Spain.	Market Authorization Holder &Manufacturer:- M/s. Industrial Veterinaria, S.A. Esmeralda, 19 08950 Esplugues De Llobregat (Barcelona) Spain). 03 years	100g 1 Kg 5 Kg	22-05-2014 13-03-2019

M/s. A&S Animal Health, 61-A Westwood Colony Thokar Niaz Baig Lahore has deposited required fee of Rs.150,000/- and submitted the following documents:-

(i) No Objection Certificates from M/s. Forward Solutions, 80-A, Judicial Colony, Thokar Niaz Baig, Lahore

Registration Board in its 330th meeting deliberated the matter and decided to defer for submission of cancellation application of Lincomicina 150 (Reg. No. 078290) from M/s. Forward Solutions, 80-A, Judicial Colony, Thokar Niaz Baig, Lahore so that new registration may be granted to M/s. A&S Animal Health, 61-A Westwood Colony Thokar Niaz Baig, Lahore.

In response the firm has submit of cancellation application of Lincomicina 150 (Reg. No. 078290) from M/s. Forward Solutions, 80-A, Judicial Colony, Thokar Niaz Baig, Lahore.

Decision: Registration Board deliberated the matter and decided as under:

i. **Approved the registration in the name of M/s. A&S Animal Health, 61-A Westwood Colony Thokar Niaz Baig Lahore.**
ii. **Cancellation the registration in the name of M/s. Forward Solutions, 80-A, Judicial Colony, Thokar Niaz Baig, Lahore.**

Import & Vet-II SECTION

Case No. 03: M/s. sanofi-aventis Pakistan limited request for Inkjet Printing on Secondary Packaging (Printed Cartons) of OreloxPaediatric Suspension 40mg/5ml – Reg No. 015709

M/s sanofi-aventis Pakistan limited, Plot No. 23, Sector No. 22, Korangi Industrial Area, Karachi has requested to allow inkjet printing of the following text (both in English and Urdu) on in-transit stock of OreloxPaediatric Suspension. This is being done for better understanding on reconstitution of OreloxPaediatric Suspension by the consumers and to increase patient compliance.

Instructions for reconstitution/use:

- **Add previously boiled cool water, half way up to the bottle marking.**
- **Shake vigorously, add more water up to the engraved marking and shake again.**
- **Use the calibrated syringe for administration.**

ہوا ٹھنڈا پانی ڈال کر اچھی طرح ہونل کو ہلائیں۔ دیئے گئے نشان تک ہلائے سے ابال ہونل پر

میں موجود کیلیبریٹڈ سرنج کا استعمال کریں۔ خوراک کے لئے ڈبے

Stock details are as follows:

Product Name	Batch No	Quantity (Packs)
OreloxPaediatric Suspension Cefpodoxime 40mg/5ml	3N57A	35,532

The firm has submitted the following documents:

- Fee of Rs. **7,500/-** (Seven Thousand and Five Hundred Rupees only) via e-deposit slip No. **370459960100** along with Differential fee of **Rs. 2,500/-** (Two Thousand and Five Hundred Rupees only**)** via e-deposit No. **1064681649** dated **31-10-2023** – (original e-deposit slips attached)
- Copy of registration,and last renewal letter
- Valid Drug Manufacturing License
- Drug Sales License renewal application with acknowledgement receipt

The firm has requested to allow inkjet printing on in-transit stock of OreloxPaediatric Suspension at their licensed premises i.e., M/s sanofi-aventis Pakistan limited, Plot No. 23, Sector No. 22, Korangi Industrial Area, Karachi, Pakistan (Drug Manufacturing License No.000007).

Decision:

Registration Board acceded to the request for inkjet printing on in-transit stock of Orelox Paediatric Suspension (Reg No. 015709) at their licensed premises i.e., M/s sanofi-aventis Pakistan limited, Plot No. 23, Sector No. 22, Korangi Industrial Area, Karachi, Pakistan (Drug Manufacturing License No.000007). The Board advised the firm to locally print following text both in English and Urdu:

Instructions for reconstitution/use:

- **Add previously boiled cool water, half way up to the bottle marking.**
- **Shake vigorously, add more water up to the engraved marking and shake again.**
- **Use the given calibrated syringe for administration.**

کو ہلائیں۔ ٹھنڈا پانی ڈال کر اچھی طرح بوتل پہلے سے ابال ہوا نشان تک بوتل ہر دیئے گئے

استعمال کریں۔ موجود سرنج کا لیے ڈبے میں خوراک کے

This permission shall be valid for given stock on Secondary Packaging (Printed Cartons) of Orelox Paediatric Suspension.

Additional agenda

Case 1. Registration of drug under drug act 1976

Registration Board in 312th meeting considered & approved the following product of M/s Lab Diagnostic Systems (SMC) Pvt Ltd, Taxila Rawalpindi as per following details:

Name of Importer/Manufacturer	Product Name & Composition	Decision

M/sLab Diagnostic Systems (SMC) Pvt. Ltd. 111B, Hali Road, Westridge 1, Rawalpindi Cantt., Pakistan **Manufacturer & Product License Holder:** M/s Jiangsu Hengrui Pharmaceuticals Co., Ltd. No. 38, Huanghe road, Economic and technological Development Zone, Lianyungang	EthiodizedPoppyseed Oil Injection Each vial contains: EthiodizedPoppyseed Oil Injection **10ml** (contains Iodine 480mg/ml)	Approved with innovator's specifications as per import policy for inspection of Manufacturer abroad and verification of local storage facility for shelf life of 6months with storage condition below 30 °C

ii. As the product contains Ethiodized Poppyseed Oil Injection, the case was forwarded to the Controlled Drugs Division for their opinion on whether the NOC (No Objection Certificate) from the Ministry of Narcotics Control is required or not.

iii. The Controlled Drugs Division attached a letter from the Ministry of Narcotics Control, which states that "all parts of the poppy plant are restricted except for its seeds. However, any preparations containing more than 0.2% of Morphine or Diacetylmorphine are prohibited."

iv. The importer was asked to submit a reply in light of the letter from the Ministry of Narcotics Control.

v. Now, they have submitted a letter from the manufacturer abroad, which shows that their product does not contain Morphine or Diacetylmorphine.

Decision: Registration Board keeping in view the comments and letter forwarded by the Division of Controlled Drugs, DRAP and the reply of the firm, endorsed the approval granted in 312th meeting with innovator's specifications as per import policy for inspection of Manufacturer abroad

RRR Section

Case No. 1 Renewal applications submitted by M/s. Theramed Pharmaceuticals (Pvt) Ltd.,45-Km Multan Road Lahore.

M/s Theramed Pharmaceuticals (Pvt) Ltd.,45-Km Multan Road Lahore has submitted renewal applications of their following registered drugs after the due date but within sixty days. Accordingly under Rule 27 of Drug (Licensing, Registering & Advertising) Rules 1976, the firm has submitted the differential fee on 30.10.2023 mentioned in the table. The decision is recorded below against each case:

Sr.No.	Reg. No.	Brand Name & Composition	Initial date of Registration PRV (If any)	Date of application (R&I) Fee submitted	Decision

06	SUBSTANDARD MENTIN FORTE TABLET MANUFACTURED BY M/S. UNEXO LABS LAHORE – QCB ISLAMABAD CASE.

Case No. 01: <u>MANUFACTURE & SALE OF ADULTERATED & SUB-STANDARD PHENERZINE ELIXIR, BATCH NO. 037, MANUFACTURED BY M/S EPOCH PHARMACEUTICALS (PVT) LTD., KARACHI.</u>

The Assistant Director, DRAP Karachi took sample from export consignment of Ms. Taqwa Pharma & Surgical, Karachi on 28-05-2022 for purpose of test/analysis on Form-3. The Federal Government Analyst has declared following samples of Phenerzine Elixir as of **"Adulterated & Substandard quality"**.

Name of Product	Manufactured by	Reg. no.	Batch no.	Mfg. Date	Exp. Date	Report No. & Date
Phenerzine Elixir	M/s Epoch Pharmaceuticals (Pvt) Ltd., Karachi	009751	037	03-2022	03-2024	No.KQ-6-22-000141 dated 14-07-2022

02. Results of CDL on the basis of which sample under reference has been declared as Sub-Standard quality are reproduced as under:-

S.No.	Test	Specification	Result	Reference
1	**Description**	Slightly orange color liquid	Slightly orange color liquid containing numerous black particles visible with naked eye. Black particles also recovered on filter paper. **Does not comply.**	Mfg. Specs
2	**Identification**	The identification test must identify Promethazine HCL.	Complies	Mfg. Specs
3	**pH**	4.2 to 5.5	4.51-complies	Mfg. Specs
4	**Assay** Promethazine HCL (Label claim 5mg/5ml)	90.0% to 110.0%	97.06% Complies.	Mfg. Specs

Remarks: The sample is **"Adulterated & Sub-Standard"** quality under the Drugs Act, 1976.

03. M/s. Epoch Pharma, Karachi replied to AD and requested for retesting to Appellate Lab NIH Islamabad.

04. As per decision of 313th meeting of Registration Board regarding appellate testing, firm and Federal Government Analyst, CDL Karachi has been asked to submit OOS investigation dated 02-09-2023.

05. M/s. Epoch Pharma, Karachi provided scientific justification for sugar particles:

"The sugar is made of Hydrogen, Carbon and Oxygen atoms, when sugar burns completely, then the product of the reaction are carbon dioxide and water. however, in reality sugar tends not to burn completely and a black mass of products of incomplete oxidation of sugar result and black particles are formed."

06. Federal Government Analyst, CDL, Karachi submitted the reply about OOS investigation stated that:

"Sample was declared substandard and adulterated on the basis of description. therefore, OOS investigation does not apply."

07. Technical Evaluation of the case:

- The product was declared adulterated and sub-standard on the basis of description i.e. Slightly orange color liquid containing numerous black particles visible with naked eye. Black particles also recovered on filter paper.
- Justification given by the firm is not scientific, this phenomenon occurs only when sugar is burnt in absence of water, first its own water of crystallization is evaporated dissolving some of the crystals (caramelization) and ultimately removed, and in next step it is completely burnt/combusted leaving black carbon, but this case is the manufacturing of syrup, sugar in water.
- FGA, CDL Karachi submitted that sample was declared substandard and adulterated on the basis of description. Therefore, OOS investigation does not apply

Proceedings and Decision of 333rd Meeting of Registration Board.

- Out of Specification (OOS) investigations and testing records submitted by M/s. Epoch Pharma, Karachi and CDL, DRAP Karachi were presented before Registration Board. The Board deliberated on the OOS investigation and did not agreed with the OOS investigation submitted by the firm M/s Epoch Pharma, Karachi.
- The Board did not accede to the firm's request for appellate testing and decided to issue show cause notice to M/s. Epoch Pharma, Karachi under Section 42 of the Drugs Act, 1976 and called them for personal hearing before Registration Board in its forthcoming meeting.

CASE NO. 02 MANUFACTURE & SALE OF SUB-STANDARD FENTOS TABLETS, BATCH NO. 599 MANUFACTURED BY M/S. HISUN PHARMACEUTICAL INDUSTRIES, GADOON-PAKISTAN

The Federal Inspector of Drugs, Peshawar took sample of Fentos Tablets from the premises of Ms. Hisun Pharmaceutical Industries, Swabi for purpose of test/analysis on Form-3. The Federal Government Analyst has declared following samples of Fentos Tablets as of **"Substandard quality"**. Details are:

Name of Product	Manufactured by	Reg. no.	Batch no.	Mfg. Date	Exp. Date	Report No. & Date
Fentos tablets	M/s. Hisun Pharmaceutical Industries, Gadoon-Pakistan.	047810	599	09-21	09-23	No. IP-6-22-000112 dated 09-09-2022

02. Results of CDL on the basis of which sample under reference has been declared as Adulterated & Substandard are reproduced as under:-

S.No.	Test	Acceptance Criteria	Result	Reference
1.	Identification	The identification test must identify Diclofenac Potassium.	Complies.	USP 43
2.	Dissolution (Acid Stage)	Each unit is not less than 75% (Q).	**Does not comply.**	USP 43
3.	**Assay** Diclofenac Potassium. (Label Claim 50mg/tablet)	90.0% to 110.0%	100.01% Complies.	USP 43

Remarks: 1) *The sample is of **"Sub-Standard"** quality under the Drugs Act, 1976.*

2) The sample could not be tested in the initial sixty days due to non-reproducibility of the testing results. Request for additional period (As required under section 22(2) of the Drugs Act 1976) was made to the concerned quarter vide letter No.5-3 (P)/2022-CDL/S-937 (A) dated 22-08-2022.

03. M/s. Hisun Pharmaceutical Industries, Gadoon-Pakistan requested for retesting to Appellate Lab NIH Islamabad.

04. As per decision of 313th meeting of Registration Board regarding appellate testing, firm and Federal Government Analyst, CDL Karachi has been asked to submit OOS investigation dated 30-11-2022.

05. M/s. Hisun Pharmaceutical Industries, Gadoon-Pakistan submitted that they investigated the matter again by conducting dissolution test on their retained sample of Batch no 599 and the result complies with USP specifications.

06. Federal Government Analyst, CDL, Karachi submitted the OOS investigation form. Remarks of Lab manager are:

"Product tested till stage 2 and it does not complies to specification of stage 2 as well as stage 3 criteria, hence dissolution test results declared as out of specification test."

07. Technical Evaluation of the case:

- The product was declared sub-standard on the basis of dissolution test.
- Ms. Hisun Pharmaceutical Industries, Gadoon-Pakistan submitted test reports.
- Final decision of OOS investigation is "OOS is valid" received from CDL, Karachi.

Procedings and Decision of 333rd Meeting of Registration Board.

- Out of Specification (OOS) investigations and testing records submitted by M/s. HisunPharmaceutical Industries, Gadoon-Pakistan and CDL, DRAP Karachi were presented before Registration Board. The Board deliberated on the OOS investigation and did not agreed with the OOSinvestigation submitted by the firm M/s. Hisun Pharmaceutical Industries, Gadoon-Pakistan.
- The Board did not accede to the firm's request for appellate testing and decided to issue show cause notice to M/s. Hisun Pharmaceutical Industries, Gadoon-Pakistan under Section 42 of the Drugs Act, 1976 and called them for personal hearing before Registration Board in its forthcoming meeting.

CASE NO. 03: MANUFACTURE & SALE OF SUBSTANDARD PARAPALS INFUSION, BATCH NO. LI-100, LI-101 & LI-102, MANUFACTURED BY M/S INVENTOR PHARMA, KARACHI.

The Federal Inspector of Drugs, DRAP inspected the premises of M/s. Sindh Government Hospital, UP Mor, New Karachi on 22-10-2020 wherein, following samples of drugs with apparent discoloration in the solution of Parapals Infusion were taken on Form-3 for the purpose of test/analysis and remaining stock ordered Not to Dispose of on Form-1 under Section 18(1) of the Drugs Act, 1976.

S. No.	Name of Drug	Reg. No.	Batch No.	Mfg. Date	Exp. Date	Mfg. By	Reason of Adulterated and Sub-Standard Product (Initial Report)	Reason of Adulterated and Sub-Standard Product (Final Report)

03	-do-	-do-	**LI-102**	-do-	-do-	-do-	-do-	-Deep brown colored solution- Does not comply. -Bacterial sterility- Does not Comply.

02. FID served a number of explanation letters but no reply from the firm is received yet.

03. FID submitted that M/s. Inventor Pharma, Karachi has violated the Section 23(1) (a) (iv) and 23(1) (a) (v) of Drugs Act, 1976 in view of non-positive attitude of the firm towards GMP compliances and product failure ratio. FID recommended that:

i. Registration of the product **Parapals Infusion Reg. No. 088360** may kindly be suspended/cancelled for a certain period being a non-safer drug and all other drugs being manufactured at their premises may kindly be reviewed after detailed panel GMP inspection by the panel.

ii. The names of technical persons may be obtained from Licensing Division, DRAP, Islamabad as firm did not provided the names despite of several letters.

04. A show cause notice has been issued vide office letter of even number dated 05-10-2021 to the firm. No reply has been received so far.

05. Registration Board in its 316th meeting of Registration Board heard the firm's representative and after deliberated the facts of the case in detail decided:

i. Suspension of the Registration of Parapals Infusion (Registration No. 088360) for six months or submission of product development data, root cause analysis along with CAPA; which is later.

ii. Product Specific Inspection shall be conducted by following panel:

a. Mr. Rafeeq Alam
b. Mr. Affan Ali

06. Panel has been revised vide office letter of even number dated 25-11-2023, PSI was conducted dated 10-01-2023. Conclusion of the report reproduced as:

"Based on the above stated facts the panel concluded that failure was because of the improper Nitrogen Gas supply during filling operations which could have caused oxidation resulting blackish of solution. The firm has taken CAPA and manufactured more three trial batches of said product and found satisfactory results of ongoing stability studies thus recommended the resumption of production of Parapals Infusion 1000mg/100ml Registration Number 088360 after taking fresh sample from 1st commercial batch for test/analysis by CDL Karachi on the expense of manufacturer and then firm will sell the product after standard CDL report."

Comments of QA&LT Division:

07. Though the panel recommended the resumption of registration of Parapal Infusion relying upon the RCA & CAPA submitted by the firm. However, it is noted that in RCA the firm only focused on adulteration and did not address the failure of product on the basis of pH and bacterial sterility test. Similarly, CAPA for these two failures were not conducted.

08. Moreover, it is pertinent to mention that in addition to above mentioned 03 batches, other 09 batches (cases are in process) were also drawn from FIDs on different occasions and declared as adulterated and substandard. Following are the details:

S. No.	Name of Drug	Batch No.	Mfg. Date	Exp. Date	Mfg. By	Report No. and date	Remarks of CDL & basis of

Proceedings and Decision of 326th Meeting of Registration Board.

"The Board after considering the facts of the case and after thorough deliberations decided:

i. Suspension of the Registration of Parapals Infusion, Registration No. 088360 of M/s. Inventor Pharma, Karachi for six months or till verification of Root Cause Analysis (RCA) and Corrective and Preventive Action (CAPA) by panel with satisfactory report; whichever is later.

ii. Resubmission of RCA and CAPA by the firm regarding all quality attributes of product which are declared non-compliant in CDL reports.

iii. To conduct Product Specific Inspection, including but not limited to following TORs, by panel of inspectors/experts to be nominated by Director QA/LT.

(a) To verify the all aspect of RCA and CAPA submitted by firm in the light of test /analysis report of CDL regarding all quality attributes of product which are declared non-compliant.

(b) To verify manufacturing and compliance of sterile product manufacturing in light of Schedule BI and BII of Drugs(L.R.&A.) rules 1976.

Decision letter has been communicated after formal approval of minute of the meeting dated 26th May 2023.

Panel has inspected Ms Inventor Pharma, Karachi, as per 326th RB decision. Panel mentioned the RCA and CAPA conducted by firm as:

"**Brief Overview of the Case:-**

The firm voluntarily taken CAPA after declaration of three batches of substandard and adulterated Parapals Infusion and manufactured more than 250 batches of said product till suspension of the Parapals infusion and found satisfactory results of all ongoing stability batches and market surveillance.

Root Cause Analysis:

The firm has carried out detailed RCA of the failure as per SOP o. QNSOP/015 against the information about Parapals inf. 1000 mg/ 100 ml which was declared as " Adulterated and Substandard " by CDL Karachi in December, 2020 and found following route cause of failure of product.

- Chances of Oxidation in filled vials might be due to improper Nitrogen purging and that had caused change in Physical appearance and in pH of filled vials.

- Chances of adulteration which might be to mal-functioning and improper monitoring of HVAC System at the time of filling.
- Failure on Sterility might be due to improper terminal sterilization process during manufacturing of said batches of Parapals Infusion.

The panel was further briefed about the Risk Assessment studies carried out by them after failure and showed detailed mitigation plan to address such failures in future.

Corrective Action Preventive Action:

It was briefed that they had taken following Correction and Preventive Measures after carrying out RCA & Risk Assessment & mitigation plans.

- Performed Risk Identification, Risk Evaluation, Risk Mitigation calculation and Risk Action Plan.
- Stopped the sale of suspected Batches and recalled from market.
- Replacement and re-calibration of monitoring gauges of nitrogen Gas supply line for purging during filling
- Installed low flow switches to stop the filling operations automatically, when supply pressure drops below 25 PSI.
- Nitrogen gas purging continued into bulk WFI before manufacturing and after filling of solution into the vials.
- The results of stability studies showing stable color & pH during accelerated stability studies and in real time stability studies of Parapals Trail batch# PPV-TR-01 and PPVTR-02 and commercial batches PPV-02, PPV-03 and PPV-04.
- The firm has replaced the older one equipment and installed another terminal Sterilizer and performed thermal mapping scientifically.
- Re-validated entire HVAC system, with changed terminally located HEPA in clean rooms areas.
- Performed DOP/POA test of HEPA Filters.
- Maintained online monitoring of area accordingly i) Particle count, ii) settle plates method.

Panel further mentioned that:

- They also verified the compliance level of GMP in sterile product manufacturing facility, and found satisfactory.
- The panel also verified the testing facility including TOC/ Liquid Particle counter and microbiological testing lab and production capacity of SVP (liquid) vials. The panel reviewed relevant documentation including relevant SOPs, records and found satisfactory as per compliance requirement.
- After in depth evaluation of the above mentioned documents, Risk Assessment, Actions, Post Risk Assessment, interviews of the technical staff, onsite working of the staff and implementation of changes made in response of product failure, the panel concluded that failure in appearance, pH and failure of Bacterial Sterility test found was due to improper nitrogen gas purging during filling operations and efficiency of HV AC System and terminal sterilizer.
- The panel witnessed all changes have been implemented properly they mentioned in attached risk assessment plan and CAP
  A.
- Based on the stated facts and under the given TORs, their RCA, CAPA, GMP and associated Risk Assessment activities have satisfactorily been verified by the panel.

Proceedings and Decision of 333rd Meeting of Registration Board.

The Board after considering the facts of the case and after thorough deliberations decided:

iii. FID will take samples of 1st, 3rd and 5th commercial batches of Parapals Infusion (100 ml), Reg. No. 088360 of M/s. Inventor Pharma, Karachi for the purpose of test /analysis by CDL, Karachi. The permission for commercial sale is subject to submission of "standard quality" test reports by CDL, Karachi of 1st commercial batch.

iv. Permission of resumption shall be allowed after submission of report in QA&LTDivision by the Additional Director, Karachi.

Case No. 04: IMPORT OF REGISTERED PRODUCTS THROUGH FAKE/FORGED INVOICES BY M/S. BIOCURE PHARMACEUTICALS, LAHORE.

01. Assistant Director (I&E), Lahore vide letter No.5247/2019/DRAP(AD-CD) (I&E) dated 15-04-2019 informed that Assistant Collector-II, Model Customs Collectorate of Appraisement-West, Karachi has asked for the verification of genuineness of following ADC invoices;

Sr. No	Invoice No. & Date	Diary No. & date	Dispatch No. & Date
1	SBF/EXP/23-2019, dated 21-02-2019	4699/2019 DRAP dated 15-03-2019	3769/2019-DRAP, dated 19-03-2019
2	SBF/EXP/24-2018, dated 15-03-2018	4569 dated 26-03-2018	4451/2018-DRAP, dated 29-03-2018
3	SBF/EXP/28-2017, dated 29-03-2017	5982 dated 27-04-2017	5647/2017-DRAP, dated 28-04-2017
4	SBF/EXP/127-2015, dated 28-10-2015	13579 dated 23-11-2015	18835/2015-DRAP, dated 26-11-2015
5	SBF/EXP/128-2016, dated 27-12-2016	1524 dated 26-01-2017	1396/2017-DRAP, dated 27-01-2017

02. AD (I&E), DRAP, Lahore further informed that the genuineness of the endorsement of said invoices is not verified from the office record. In response to the submission of AD (I&E), DRAP, Lahore the division of QA&LT directed the Area FID vide letter F. No.13-125/2019-(QC) dated 16-05-2019 to investigate the matter and after completing all the legal formalities, submit a comprehensive report including all the requisite documents, if any, on priority basis for consideration of the Board.

03. Area Federal Inspector of Drugs Lahore vide letter No.7011/2021-DRAP (L-IV) dated 07-05-2021 submitted the complete investigation report and the reply of accused as under:

S.No.	Invoice No & Date	Diary No. & date	Dispatch No, & Date
1	SBF/EXP/23-2019, dated 21-02-2019	4699/2019 DRAP dated 15-03-2019	3769/2019-DRAP, dated 19-03-2019
2	SBF/EXP/24-2018, dated 15-03-2018	4569 dated 26-03-2018	4451/2018-DRAP, dated 29-03-2018
3	SBF/EXP/28-2017, dated 29-03-2017	5982 dated 27-04-2017	5647/2017-DRAP, dated 28-04-2017
4	SBF/EXP/127-2015, dated 28-10-2015	13579 dated 23-11-2015	18835/2015-DRAP, dated 26-11-2015
5	SBF/EXP/128-2016, dated 27-12-2016	1524 dated 26-01-2017	1396/2017-DRAP, dated 27-01-2017

2 Letter No. 12040/2019-DRAP (L-VI) dated, 17-09-2019, was sent from this office to M/s. Biocure Pharmaceuticals, to explain their position in this regard (copy attached annex-9).

3 Reply received from M/s. Biocure Pharmaceuticals, Jail Road, Lahore vide letter No. Nil, dated Nil received office on 02-10-2019 (copy attached annex-10), wherein they have informed that after coming to know of the above they launched FIR against the clearing agent, whom they had hired some time ago .The CEO of the firm further informed that he was shaken after knowing about this matter which caused severe tension, heart attack and cardiogenic shock. He has further requested that he may be granted relief on humanitarian basis. Previous import history of the firm as per this office record showing clearance certificates obtained from this office previously is also. But as per available record of this office the above said invoices were not cleared by this office.

4 The available data of this office reveals that the firm did not get prior clearance to import their products Eridoksin Registration No. 059185 and Roxine 25% Registration No. 059186 which is the violation of the Drugs Act 1976/DRAP Act 2012, so, it is recommended that the registration of the drugs / product in question may be suspended or cancelled or any other action may be taken as deemed fit by the Competent Authorities.

Submitted for information and further necessary action please."

04. Area FID Lahore in the above-mentioned report has recommended the cancellation/suspension of registration of products namely Eridoksin powder containing Erythromycin 40mg and Doxycycline 20mg (Reg. No. 059185) and Roxine 25% oral solution containing Enrofloxacin 250g (Reg. No. 059186) or any other action as may deem fit by the Board.

05. The Board in its 312th meeting decided to issue show cause notice to firm for cancellation/suspension of their registered product.

06. In compliance to the decision of 312th meeting of the Registration Board, the firm was issued show cause notice vide F.No.03-33/2021-QC (312-RB) dated 28-10-2021. Till date no reply has been received from the firm.

07. The representatives of the firm are called before the Board for personal hearing.

Proceedings and Decision of 313th meeting:

08. Jawad Ahmed (CEO) of M/s. Biocure Pharmaceuticals, Suite No. 211, 2nd Floor Khaleej Town, 38-A, Jail Road Lahore appeared before the Board and informed the Board that he had hired a clearing agent namely Muhammad Sadiq S/o Abdul Aziz R/o House No. 49-A, Street No. 139-C, Ittefaq street, Ghulam road, Ichhra Lahore who was responsible for submitting fake invoices to the custom authorities. Moreover, Mr. Jawad Ahmed also informed the Board that he was unaware of these illegal activities being carried out by his clearing agent and he also had lodged FIR against that clearing agent in Litton road Police Station Lahore.

09. The Board after thorugh deliberations, considering the facts of the case and submission of CEO of M/s. Biocure Pharmceuticals Lahore decided as under:

i. Suspend the Registration of the products namely Eridoksin Powder (Reg. No. 059185) and Roxine 25% oral solution (Reg. No. 059186) for (06) months.
ii. The division of QA&LT will conduct a detailed investigation of the matter and submit a comprehensive report before the Board within (02) months.

10. In the light of the decision of Registration Board, the accused were issued a letter for suspension of their products vide letter F. No. 03-43/2021-QC (313-RB) dated 16-12-2021. Moreover, brief facts of the case are given as under:

1) Assistant Director (I&E), Lahore vide letter No.5247/2019/DRAP(AD-CD)(I&E) dated 15-04-2019 informed that Assistant Collector-II, Model Customs Collectorate of Appraisement-West, Karachi has asked for the verification of genuineness of ADC invoices as mentioned in table of para 01.
2) The division of QA&LT directed the Area FID vide letter F. No.13-125/2019-(QC) dated 16-05-2019 to investigate the matter and submit a comprehensive report of the matter.
3) Area FID Lahore informed that the invoices provided by the Assistant Collector-II, Model Customs Collectorate of Appraisement-West, Karachi are forged and the firm did not get prior clearance to import their products and recommended that the registration of the drugs / product in question may be suspended or cancelled.
4) The Registration Board in its 312th meeting decided to issue Show cause notice and personal hearing to the management of M/s. Biocure Pharmaceuticals Lahore.
5) Jawad Ahmed (CEO) of M/s. Biocure Pharmaceuticals of the firm appeared before the Board in its 312th meeting and submitted that he had hired a clearing agent namely Muhammad Sadiq S/o Abdul Aziz R/o House No. 49-A, Street No. 139-C, Ittefaq street, Ghulam road, Ichhra Lahore and the fake invoices were submitted by him. The said person is not traceable and Jawad Ahmad (CRO) of M/s. Biocure Pharmaceuticals Lahore had lodged FIR against that person in Litton road Police Station Lahore. A Copy of FIR is also submitted by the CEO of M/s. Biocure Pharmaceuticals Lahore.
6) The invoices provided by Assistant Collector-II, Model Customs Collectorate of Appraisement-West, Karachi are dated 26-11-2015, 27-01-2017, 28-04-2017, 29-03-2018 and 19-03-2019 in her letter dated 15-04-2019 whereas the accused had lodged the FIR against his clearing agent on 22-06-2019.

10. The case has been deferred due to paucity of time in 320th meeting.

11. The Registration Board deferred the case in 321st meeting for further deliberation in next meeting.

Proceedings and Decision of 324th Meeting of Registration Board:

12. Registration Board after discussion, considering the facts of the case decided as:

"Case is forwarded to legal division for opinion in said case."

13. In the light of decision of 324th meeting of the Registration Board, the matter was forwarded to the division of Legal Affairs DRAP Islamabad for their opinion in the subject matter. Reply of the division is given as under:

"Reference to the preparas and facts submitted on the file, this Division is opined that if the authority letter had given to the clearing agent and he submitted all invoices, whether fake or forged, under agency agreement by representing the principle then the vicarious liability will also be on the owner of the firm. Moreover, as per available facts, owner of the firm never presented his agency agreement or Authority letter with DRAP and he merely lodged FIR against the agent in order to avoid prosecution by DRAP. Therefore, FIR/prosecution may be lodged against the owner of the firm immediately."

Proceedings and Decision of 333rd Meeting of Registration Board:

- Response of the Division of Legal Affairs DRAP was placed before the Board and was deliberated in depth. The Board was apprised that the firm was served Showcause notice No. F.No.03-33/2021-QC (312-RB) dated 28-10-202 under Section 42 of the Drugs Act, 1976. The firm was offered personal hearing in 313th meeting of Registration Board.

- Representative of Ministry of Law & Justice, Islamabad opined that permission to lodge FIR/Prosecution on the basis of submission of documents to the customs for clearance of stocks does not fall under the jurisdiction of the Registration Board.

- Board keeping in view legal opinion of Member from Ministry of Law & Justice, investigation report and recommendations of area Federal Inspector of Drugs Lahore and stance of division of QA&LT DRAP decided to cancel registration of following drugs registered in the name of M/s. Biocure Pharmaceuticals, Jail Road, Lahore:
  i. Eridoksin powder (Erythromycin 40mg and Doxycycline 20mg) Registration No. 059185.
  ii. Roxine 25% oral solution (Enrofloxacin 250g) Registration No. 059186.

- A reference shall be sent to Import & Vet Section & RRR Section for record.

Case No. 05: SUBSTANDARD GENTAMYCIN EAR DROPS MANUFACTURED BY M/S. AMROS PHARMA KARACHI – QCB ISLAMABAD CASE.

01. Secretary Quality Control Board Islamabad vide letter vide F. No. 18(1)-QCB/ICT/2012/723 dated 22-02-2022 forwarded the case of manufacturing of Substandard Gentamycin 10ml Ear Drops Manufactured by M/s. Amros Pharmaceuticals Karachi. Brief facts of the case as under:

i. Inspector of Drugs Islamabad, during inspection of main store of DHO Office Islamabad drew samples of Gentamycin 10ml Ear drops B. No. EAM-011 manufactured by M/s. Amros Pharmaceuticals Karachi for the purpose of test/analysis.
ii. DTL Rawalpindi declared the said batch of Gentamycin Ear drops as "Substandard" on the basis of pH.
iii. M/s. Amros Pharmaceuticals Karachi requested to challenge the results of DTL test report in NIH Islamabad. The appellate laboratory, NIH Islamabad also declared the Gentamycin 10ml ear drops as of "substandard" quality on the basis of pH and volume.

02. In view of above-stated facts, Quality Control Board Islamabad in its 50th meeting held on 30-12-2021 decided as under:

> *"The Board was briefed about the facts of the case as per record by Secretary. The Board was also informed that the nominated accused did not appear. The Board considered the facts available on record and after discussion decided to refer the case to Drug Registration Board for cancellation of drug registration of i.e. Ear Drops Gentamycin manufactured by M/s. Amros Pharmaceuticals Karachi after fulfilment of all legal/codal formalities in this regard."*

03. Secretary, Quality Control Board Islamabad in above-mentioned decision has requested the Registration Board for cancellation of Gentamycin 10ml Ear Drops, Reg. No. 019368 manufactured by M/s. Amros pharmaceuticals Karachi.

Proceedings and Decision of 320th meeting:

04. The case has been deferred due to paucity of time.

Proceedings and Decision of 321st Meeting of Registration Board.

05. Registration Board after discussion, considering the facts of the case decided:

"To issue show cause notice to M/s. Amros pharmaceuticals Karachi for manufacturing and sale of substandard "Gentamycin 10ml Ear drops B. No. EAM-011" under clause (c) and (d) of sub section 11 of section 7 of the Drugs Act 1976 for suspension/cancellation/ prosecution in Drug Court of the subject cited drug and called them for personal hearing before Registration."

06. In the light of decision of decision of Board, the accused were issued show cause notice vide letter F. No. 03-45/2022-QC(321-RB) dated 15-11-2022 with subsequent reminders on 06-01-2023 and 13-11-2023. Till date no reply has been received from the firm.

Proceedings and Decision of 333rd Meeting of Registration Board:

07. The matter was deliberated in depth and Board showed grave concerns regarding attitude of firm towards the matter at hand and decided as under:

i. Suspension of the Registration of Gentamycin Ear Drops (Registration No. 019368) manufactured by M/s. Amros Pharmaceuticals Karachi for six months and submission of product development data, root cause analysis along with CAPA.
ii. Product Specific Inspection shall be conducted by panel recommended by the Director QA&LT.
iii. The Board further decided to direct the DRAP office Karachi to not to accede with the request(s) of M/s. Amros Pharmaceuticals Karachi for clearance of Gentamycin API during the suspension period.

Case No. 06: SUBSTANDARD MENTIN FORTE TABLET MANUFACTURED BY M/S. UNEXO LABS LAHORE – QCB ISLAMABAD CASE.

01. Secretary Quality Control Board Islamabad vide letter vide F. No. 18(1)-QCB/ICT/2012/722 dated 22-02-2022 forwarded the case of manufacturing of Substandard Mentin Forte Tablet Batch No. MT80 Manufactured by M/s. Unexo Labs (Pvt.) Ltd., Lahore. Brief facts of the case as under:

i. Inspector of Drugs Islamabad, during inspection of District Population Welfare Office G-9 markaz Islamabad drew samples of Mentin Forte 625mg tablet Batch No. MT80 manufactured by M/s. Unexo Labs Lahore for the purpose of test/analysis.
ii. DTL Rawalpindi declared the said batch of Mentin forte tablet as "Substandard" on the basis of assay.
iii. The accused were called before Quality Control Board Islamabad in its 50th meeting but no one appeared before the Board.

02. In view of above-stated facts, Quality Control Board Islamabad in its 50th meeting held on 30-12-2021 decided as under:

> *"The nominated accused did not appear before the Board. The Board considered the facts available on record and decided to refer the case to the Drug Registration Board for cancellation of registration of drug i.e. Tab Mentin Forte (Co Amoxiclav) of M/s Unexolabs, Lahore after fulfillment of all legal formalities in this regard."*

03. Secretary, Quality Control Board Islamabad in above-mentioned decision has requested the Registration Board for cancellation of tablet Mentin Forte, Reg. No. 023923 manufactured by M/s. Unexolabs Lahore.

Proceedings and Decision of 320th meeting:

04. The case has been deferred due to paucity of time.

Proceedings and Decision of 321st Meeting of Registration Board.

05. Registration Board after discussion, considering the facts of the case decided:

"To issue show cause notice to M/s. Unexolabs Lahore for manufacturing and sale of Substandard product "Mentin Forte Tablet Batch No. MT80" under clause (c) and (d) of sub section 11 of section 7 of the Drugs Act 1976for suspension/cancellation/ prosecution in Drug Court of the subject cited drug and called them for personal hearing before Registration."

06. In the light of decision of decision of Board, the accused were issued showcause notice vide letter F. No. 03-45/2022-QC(321-RB) dated 15-11-2022. In response to said showcause, M/s. Unexo Laboratories Lahore vide letter Ref. UL/Mentin Forte/MT80 dated 29-11-2022 replied as under:

> *"Dear Sir,*
> *With reference to your letter no.* ***F. No. 3-45/2022-QC (321-RB),*** *dated 15th November 2022 and subject matter. We would like to bring to your kind attention the following points.*
> *1. The Inspector of Drugs ICT, Islamabad sampled the product* ***Tab. Mentin Forte (Batch MT80)*** *from the Main Stores District Population Welfare office, Islamabad, on* ***24.07.2017*** *for the purpose of test and analysis.*
> *The sample was received by DTL, Rawalpindi on* ***26th July 2017.***
> *The reporting date on the* ***DTL Report No.TRA. 01-07001941/DTL is 22nd November 2017.*** *This is a period of* ***4 months*** *from receipt of sample by DTL and its analysis. Drug Act 1976 stipulates a time of* ***60 days*** *within which the DTL has to report the results of the sample analysis. This makes the DTL Report* ***No.TRA. 01-07001941/DTL time barred.***
> *2. For the sake of argument if we consider the letter No.* ***SMR49/DTL/RWP/2017, dated 16.08.2017*** *sent to us by* ***DTL, Rawalpindi,*** *intimating to send the method of analysis of Mentin forte Tablet.*
> *We sent the required information to DTL, Rawalpindi via letter No.* ***UL/786/2017/Mentin****, dated* ***25.08.2017*** *by courier.*
> *The maximum time a letter sent by courier takes* ***4 days*** *to reach the destination. So assuming the letter reached DTL by* ***30.08.2017.***

*The DTL, Rawalpindi should had conducted the test at the maximum by **29th October 2017**. But in this case the DTL Report No. **TRA. 01-07001941/DTL** is dated **22nd November 2017**. That is also outside the stipulated time limit of 60 days as required by Drug Act 1976, making the DTL Report No. **TRA. 01-07001941/DTL time barred.***

3. We were not given the opportunity to request for retesting for our product Mentin Forte Tablet (Batch No. MT-80) from appellate laboratory, as per Drugs Act 1976 and the law/rules framed thereunder. Reason being that we were not furnished with the required documentation to completely scrutinize the case before requesting for retest. We were furnished with the required documentation in parts by the Drug Inspector ICT, Islamabad after our repeated requests.

Still to date we have not been furnished with the copy of invoice/warranty from the store keeper of main store, District Population Welfare office, Islamabad as proof of purchase.

*4. We repeatedly informed the Inspector of Drugs, ICT, Islamabad, that **M/S. Mediwise Pharma is not our authorized distributor**, who supplied the Mentin Forte (Batch MT-80) to District Population Welfare Office.*

*The storage conditions of the said Distributor **M/S. Mediwise** are not known, as well as the storage conditions of District Population Welfare office, Islamabad, Improper storage affects the stability of the product.*

Subsequently, we cannot be held responsible for the condition of the product supplied by an unauthorized distributor with unknown credentials and storage conditions.

In the light of the above facts, it is kindly requested for a considerate look at this case and to dismiss it.

That our such request is in line with our rights of fair defense and in the interest of justice as well as to ensure the adherence and compliance with the legal mandates and stipulations.

Kindly find attached the copies of correspondence with Inspector of Drugs ICT, Islamabad and DTL, Rawalpindi."

07. Reply of the firm was communicated to Secretary QCB Islamabad vide letter F. No. 03-14/2022-QC dated 13-01-2023. Secretary QCB Islamabad vide letter F. No. 18(1)-QCB/ICT/2012 dated 27-11-2023 responded to the queries raised by firm as under:

"[…] 2. It is pertinent to mention here that the Tab. Mentin Forte Batch No. MT80 manufactured by M/s Unexo Labs (Pvt) Ltd, was declared Sub-standard by the DTL. Furthermore, the sample was drawn from main stores/warehouse of District Population Welfare Office, Islamabad.

3. The response of queries is written as;

i. DTL had requested for time extension for testing of samples, that was issued accordingly by the Quality Control Board, Islamabad.

ii. No such request regarding appellate testing was ever received by this office or Quality Control Board;

iii. Copy of invoice from District Population Welfare Office is attached.

iv. The complete supply chain evidence of Mentin Forte Tablet, Batch No. MT80 is attached herewith."

Proceedings and Decision of 333rd Meeting of Registration Board:

08. The matter was presented before and was thoroughly deliberated by the Board. Keeping in view the stance submitted by firm and reply of Secretary QCB Islamabad the Board decided as under:

i. Call the firm before the Board for a chance of personal hearing.

ii. Invite the Secretary QCB Islamabad in forthcoming meeting of the Board to provide assistance to Board in the matter at hand.

Item No. IV. Additional Agenda

Agenda of Evaluator PEC-II

Case No.01 Registration applications as per decision of Authority regarding Isoflurane and Sevoflurane products.

- **Registration applications of Finished Drug Product Import**

1.	**Name, address of Applicant / Importer**	**M/s RA Health Care (SMC-Pvt.) Ltd.**
	Details of Drug Sale License of importer	**License No:0312** **Address:** 2nd floor Building No. 50 Mir Arcade Mini Commercial Phase 7, Bahria Town Rawalpindi **Validity:** 11-01-2022 **Status:** License to sell drugs as a Distributor Firm has also submitted receipt of application of renewal of DSL applied to Directorate of Drugs Control Punjab (Reference no. 374-19674461-2022)
	Name and address of marketing authorization holder (abroad)	M/s Baxter Healthcare Corporation, Route 3-Km144.2, Guayama, Puerto, Rico 00784 (USA)
	Name, address of manufacturer(s)	M/s Baxter Healthcare Corporation, 1 Baxter Parkway, Deerfield, IL 60015 United Sates of America.
	Name of exporting country	China
	Detail of certificates attached (CoPP, Freesale certificate, GMP certificate)	**CoPP:** Firm has submitted original, legalized **copy** of CoPP certificate (No. EUDP-C5PJ) valid till 21-02-2023 issued by US FDA for Sevoflurane Inhalant 250ml. The CoPP confirms free sale status of the product in exporting country as well as GMP status of the manufacturing site. **The name of importing country on CoPP is mentioned as Pakistan.** Applicant of COPP is M/s Baxter Healthcare Corporation, 25212 W II Route 120, Round Lake IL 60073 , USA.
	Details of letter of authorization / sole agency agreement	Firm has submitted legalized letter of authorisation from M/s Shandong New Time Pharmaceutical Co., Ltd., No.1, North Outer Ring Road, Feixian County, Shandong Province, China. The authorization letter is issued dated 10-01-2023
	Status of the applicant	☐ Manufacturer ☒ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale

		☐ Domestic and Export sales
	For imported products, specify one the these	☒ Finished Pharmaceutical product import ☐ Buk import and local repackaging ☐ Buk import and local repackaging for export purpose only
	Tracking ID and date of submission	Dy. No. 23134 dated 16-08-2022
	Details of fee submitted	PKR 150000/- 20-07-2022
	The proposed proprietary name / brand name	**Sevoflurane**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Sevoflurane …. 250ml (1ml/ml)
	Pharmaceutical form of applied drug	Liquid for inhalation
	Pharmacotherapeutic Group of (API)	Inhalation Anaesthesia
	Reference to Finished product specifications	USP
	Proposed Pack size	250ml
	Proposed unit price	--
	The status in reference regulatory authorities	**USFDA** Approved.
	For generic drugs (me-too status)	Sevof liquid for inhalation 250ml of M/s Getz (Reg.# 103781)
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Name, address of drug substance manufacturer	1. M/s Baxter Healthcare Corporation, Route 3-Km144.2, Guayama, Puerto, Rico 00784 (USA). 2. M/s Halocarbon Products Corp. 1100 Dittman Court North Augusta, SC 29841 USA
	Module-III Drug Substance:	Firm has submitted detailed drug substance data for both sources related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has comparative studies against Ultane liquid for Inhalation of M/s Abbvie Inc.

	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	Aluminium Bottle
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches The accelerated stability study data is conducted at 40ºC ±2ºC / 75% ± 5% RH for 6 months. The real time stability study data is conducted at 30ºC ±2ºC / 65% ± 5% The real time stability study data for 3 batches is for 60 months only.
Evaluation by PEC: • Firm has not submitted process validation protocol, declaring that since the manufacturing process for Sevoflurane drug product consists only of packaging of the drug substance, process validation is not applicable.		
Decision: Approved as per policy of inspection of manufacturer anbroad.		
2.	**Name, address of Applicant / Importer**	**M/s IBL Health Care Ltd.**
	Details of Drug Sale License of importer	**License No:0312** **Address:** Section-A, 2nd Floor, Plot No 01, Block 7 & 8 Dehli Merchantile Cooperative Housing Society (DMCHS Tipu Sultan Road, Off Shahrah-e-Faisal, Karachi **Address of Godown:** House 27, Street 4-A Sanda Bhatian Wala Gulshan Ravi, Lahore, **Validity:** 07-04-2024 **Status:** License to sell drugs by way of Wholesale
	Name and address of marketing authorization holder (abroad)	M/s Shandong New Time Pharmaceutical Co., Ltd., No.1, North Outer Ring Road, Feixian County, Shandong Province, China
	Name, address of manufacturer(s)	M/s Shandong New Time Pharmaceutical Co., Ltd., No.1, North Outer Ring Road, Feixian County, Shandong Province, China
	Name of exporting country	China
	Detail of certificates attached (CoPP, Freesale certificate, GMP certificate)	**CoPP:** Firm has submitted original, legalized **copy** of CoPP certificate (No. 20235057) valid till 13-14-2025 issued by Shandong Provincial Drug Administration. The CoPP confirms free sale status of the product in exporting country as well as GMP status of the manufacturing site through periodic inspection of once a year. **The name of importing countries on CoPP include Pakistan.**
	Details of letter of authorization / sole agency agreement	Firm has submitted legalized letter of authorisation from M/s Shandong New Time Pharmaceutical Co., Ltd., No.1, North Outer Ring Road, Feixian County, Shandong Province, China. The letter authorises **M/s IBL Health Care Ltd.** ne IBL Centre, 2nd Floor, Plot No 01, Block 7 & 8 Dehli Merchantile Cooperative Housing Society (DMCHS Tipu Sultan Road, Off Shahrah-e-Faisal, Karachi to submit application to DRAp for registration approval in Pakistan. The authorization letter is issued dated 10-01-2023
	Status of the applicant	☐ Manufacturer ☒ Importer ☐ Is involved in none of the above (contract giver)

	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	For imported products, specify one the these	☒ Finished Pharmaceutical product import ☐ Buk import and local repackaging ☐ Buk import and local repackaging for export purpose only
	Tracking ID and date of submission	PP6-RH5-T19P dated 29-11-2023
	Details of fee submitted	PKR 150000/- 01-11-2023
	The proposed proprietary name / brand name	**SEVOLIFE 250ml for Inhalation**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each 250ml bottle contains: Sevoflurane ….. 100%.
	Pharmaceutical form of applied drug	Liquid for inhalation
	Pharmacotherapeutic Group of (API)	General Anaesthesia
	Reference to Finished product specifications	USP
	Proposed Pack size	250ml
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	**MHRA** Approved.
	For generic drugs (me-too status)	Sevof liquid for inhalation 250ml of M/s Getz (Reg.# 103781)
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Name, address of drug substance manufacturer	M/s Shandong New Time Pharmaceutical Co., Ltd., No.1, North Outer Ring Road, Feixian County, Shandong Province, China
	Module-III Drug Substance:	Firm has submitted detailed drug substance data for both sources related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of

		specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has comparative studies against Ultane liquid for Inhalation of M/s Abbvie Inc.
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	Type III amber glass bottle
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches The accelerated stability study data is conducted at 40ºC ±2ºC / 75% ± 5% RH for 6 months. The real time stability study data is conducted at 30ºC ±2ºC / 75% ± 5% The real time stability study data for 3 batches is for 36 months only.

Evaluation by PEC:

Section no.	Observations	Firm's response
3.2.P.8.3	• Justification shall be submitted for Not performing test of all the Organic Impurities, as recommended by USP monograph during drug product stability studies.	

Decision: Deferred for submission of reply to the above cited shortcoming.

- **Applications of Local Manufacturing.**

3.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Allmed (Pvt.) Ltd. Plot # 590, Sunder Industrial Estate, Lahore-Pakistan**

Batch No.	RD-081	RD-082	RD-083
Batch Size	160 bottles	160 bottles	160 bottles
Manufacturing Date	06-2022	06-2022	06-2022
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	• N/A
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of DML (Certificate No. Lu 20160193) valid up to 03-12-2025 issued by Shandong Province Drug Administration, China
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not submitted
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record for product testing.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator:

Section no.	Observation	Firm's response
3.2.S.3	IR absorption spectra of Isoflurane, performed by M/s Allmed Pvt. Ltd. shall be submitted.	
3.2.S.4	• Drug substance specifications submitted form M.s Allmed Pvt. Ltd. shall be signed and stamped. • Submitted drug substance specifications form M/s Allmed does not include test of "Organic Impurities" as recommended by USP monograph of "Isoflurane". Justification shall be submitted in this regard. • As per USP monograph of Isoflurane the percentage of Isoflurane in the sample Assay has to be calculated Using the results from the test for *Organic Impurities*. Justification shall be submitted how the Assay resultscould be inferred without performance of test of Organic impurities as per recommendations of USP Monograph. • Reference shall be submitted for the submitted analytical procedure for Assay test. • Analytical method verification studies for the Test of Organic Impurities shall be submitted.	
3.2.S.5	COA of reference/working standard used by M/s Allmed for the drug substance analysis shall be submitted.	

	3.2.S.7	Drug substance stability data shall be submitted as per Zone IVA.		
	3.2.P.2.2.1	Justification shall be submitted for not performing test of organic Impurities in the Pharmaceutical Equivalence studies since as per USP monograph it is required for inferring the Assay results. Details of procurement of the reference product shall be submitted.		
	3.2.P.2.2.3	• Justification shall be submitted for the proposed Assay limits of 98% - 102%. • Details of protective measures adopted for the Occupational Hazards during processing and handling of the drug product shall be submitted.		
	3.2.P.5	➢ Justification shall be submitted forfollowing: • Proposed Assay limits of 98% - 102%. • Not including test of Organic Impurities, Non-volatile residue, Chlorides & Aciditiy or Alkalinity as recommended by USP monograph. ➢ As per USP monograph of Isoflurane the percentage of Isoflurane in the sample Assay has to be calculated Using the results from the test for *Organic Impurities*. Justification shall be submitted how the Assay results could be inferred without performance of test of Organic impurities as per recommendations of USP Monograph. ➢ Reference shall be submitted for the proposed analytical procedure for Assay test.		
	3.2.S.6	COA of reference/working standard used by M/s Allmed for the drug product analysis shall be submitted.		
	3.2.P.8.3	➢ Documents for the procurement of API with approval from DRAP shall be submitted. ➢ Justification shall be submitted for Not performing test of Organic Impurities, Non-volatile residue, Chlorides & Aciditiy or Alkalinity as recommended by USP monograph during drug product stability studies.		
	2.3.R.1.1	➢ As per submitted batch manufacturing record, the filling and sealing of drug product bottles was done manually. Justification shall be submitted for the manual operations of filling and sealing considering the occupational Hazards associated with the applied formulation.		
	--	Details shall be submitted for the systems and equipments installed in the "Liquid Solution for inhalation (General) section" for the processing and handling of applied drug product.		
Decision: Deferred for submission of reply to the above cited shortcoming.				

Agenda of Evaluator PEC-III

	Name of exporting country	China.
	Detail of certificates attached (CoPP, Freesale certificate, GMP certificate)	**CoPP:** Firm has submitted CoPP (20230010) dated 24-08-2023 for Bio-Fol MCT/LCT 1% Injection 200mg/20ml. The certificate confirmsthe free sale status of the product along with GMP status of the manufacturer.
	Details of letter of authorization / sole agency agreement	Firm has submitted Contract of Agency between Ningbo Voice Biochemic Co Ltd, Xi'an Libang Pharmaceutical Co and Mehran International dated 20-09-2023.
	Status of the applicant	☐ Manufacturer ☒ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	For imported products, specify one the these	☒ Finished Pharmaceutical product import ☐ Buk import and local repackaging ☐ Buk import and local repackaging for export purpose only
	Tracking ID and date of submission	HHN-DVP-GJYA: 13-12-2023
	Details of fee submitted	PKR 150,000/-: 03-11-2023
	The proposed proprietary name / brand name	**BIO-FOL MCT/LCT 1% Injection 200mg/20ml**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each 20ml ampoule contains: Propofol 200mg
	Pharmaceutical form of applied drug	White, aqueous and isotonic emulsion in glass ampoule
	Pharmacotherapeutic Group of (API)	Anaesthetic
	Reference to Finished product specifications	USP

	Proposed Pack size	5 ampoules / tray, 5 trays / box
	Proposed unit price	No submitted by the firm
	The status in reference regulatory authorities	DIPRIVAN® (propofol injectable emulsion), for intravenous use 10mg/ml **(USFDA** Approved).
	For generic drugs (me-too status)	Could not be confirmed
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Name, address of drug substance manufacturer	Xi`an Libang Pharmaceutical Co., Ltd. Baoji API Plant West-door outside, Guo Town, Chencang District, Baoji city, China
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of API at accelerated as well as real time conditions. The real time stability data is conducted at 30ºC / 65% RH. The stability study data is till 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted pharmaceutical equivalence against Propofol 10 mg/ml of M/s Abbott Laboratories
	Analytical method validation/verification of product	Firm has submitted analytical method verification studies for the applied product.
	Container closure system of the drug product	Glass ampoule
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted long term stability data of 3 batches for 36 months at 30±2°C, 65±5%RH and 6 months at 40°C±75%RH for three batches.
Evaluation by PEC:		

Sr. No	Observations communicated	Response by the firm
1.	Evidence of me-too status in 20ml ampoule form.	We are mentioning below the evidence of Me-Too Status in 20ml Form 01) DIPRIVAN 1% BY ICI PAKISTAN LIMITED 5AMPX20ML 02) FRESOFOL 1% BY MEDIPAK 5AMPX20ML 03) POFOL 1% BY AKHAI 1AMPX20ML
Decision: Approved as per policy of inspection of manufacturer abroad.

Evaluation by PEC:

Sr. No	Shortcomings communicated	Response by the firm
1.	Evidence of me-too status, since you hve selected the product status as generic product and also submitted 30,000 fee as a generic product.	
2.	Submit data in section 3.2.S.4.1 and 3.2.S.4.2 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required."	
3.	Submit COA of the relevant batch of API used in the development for three stability batches in section 3.2.S.4.4.	
4.	Specify why module 3.2.S and DMF are separately submitted as different documents	
5.	Specify details including the expiry date and manufacturer of the product against which pharmaceutical studies are conducted	
6.	Justify why in vitro binding and dissolution studies are not conducted under the product development, since both these studies are recommended in the public assessment reports	
7.	Submit clearance certificate as evidence of import of API	

Decision: Deferred for submission of reply to the above cited shortcoming.

	Module-III Drug Substance:	Firm has submitted detailed drug substance data for both sources related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of API **At accelerated** 40ºC ± 2°C / RH 75% ± 5% for 06 months. **Real time:** 25ºC ± 2°C / RH 65% ± 5% for 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	**Name:** Sevofurane Solution for inhalation **Manufacturer**: Maruishi Pharmaceutical Co. Ltd. Japan.

	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	Brown Soda Lime glass bottle with aluminum cap lined with LDPE.
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches **Accelerated Storage Conditions:** **Duration:** 06 months **Temperature:** 40ºC ±2ºC **Relative Humidity:** 75% ± 5%. **Long term Storage Conditions:** **Duration:** 09 months **Temperature:** 30ºC ±2ºC **Relative Humidity:** 65% ± 5%. **Long term Storage Conditions:** **Duration:** 24 months **Temperature:** 25ºC ±2ºC **Relative Humidity:** 65% ± 5%.

Evaluation by PEC:

During initial scrutiny, following observations / shortcomings were observed:

Section	Observations
1.3.4	• Please submit legalized GMP certificate and Certificate of Pharmaceutical product. • Please submit letter of authorization issued by Manufacturer abroad declaring Highsea Pharmaceutica Lahore as a sole distributor for the drug products mentioned in it.
3.2.P.8	• Please submit complete stability data for long term storage conditions as per climatic conditions of Pakistan for the claimed shelf life of drug product.

Decision: Deferred for submission of reply to the above cited shortcoming.

	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Name, address of drug substance manufacturer	**M/S HETERO LABS LIMITED UNIT-I** SY. NO.10, I.D.A., GADDAPOTHARAM VILLAGE, JINNARAM MANDAL, SANGAREDDY DISTRICT, TELANGANA, India.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data for both sources related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of API **At accelerated** 40ºC ± 2°C /RH ± 75°C for 06 months. **Real time:** 25 ± 2°C / RH 60°C for 60 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	**Name:** Tarceva® 100mg Tablet **Manufacturer**: Roche Germany
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	Blister of a two layer PVC film laminated with Aclar (Polychlorotrifluoroethylene, PCTFE) film on the inner side and a backing of aluminum foil with heat seal lacquer.
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches **Accelerated Storage Conditions:** **Duration:** 06 months **Temperature:** 40ºC ±2ºC **Relative Humidity:** 75% ± 5%. **Long term Storage Conditions:** **Duration:** 24 months **Temperature:** 30ºC ±2ºC **Relative Humidity:** 75% ± 5%.

	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Name, address of drug substance manufacturer	M/s Shanghai Jinhe Bio-Pharmaceutical Co. Ltd. No. 508, Maodian Road, Qingpu District Shanghai, China.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubility, appearance, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis (DXT201904027, DXT201906036, DXT201906037, DXT201907038) and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches for drug substance at accelerated as well as real time conditions. The stability conditions with time durations are; 40±2 ℃ 75%±5 RH: 6 months (Accelerated) 25 ºC±2℃ 65%±5% RH: 6 months (Real time) Batch No. DCA201411002, DCA201411003, DCA201411004
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis (NN0058,NN0059, NN0060.)
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted Pharmaceutical Equivalence for the applied product against the reference product i.e.

		Docetaxel Injection 20mg/ml Batch No. 6F286A manufactured by Sanofi exp_date:_, by performing following tests; pH, Assay, Particulate matter.
	Analytical method validation/verification of product	Firm has submitted analytical method verification studies for the applied product.
	Container closure system of the drug product	Type-I glass vials with rubber stopper, aluminium and plastic flip-off seals.
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches of drug product. **The real time stability study data is conducted at 30°C ± 2°C, 75% ± 5% for 12 months**. Accelerated at 40±2°C/75±5%RH for 6 months. Batch No. NN0058, NN0059, NN0060. NN1195-A,
	Therapeutic indications in USFDA.	Docetaxel Injection is a microtubule inhibitor indicated for: • **Breast Cancer (BC):** single agent for locally advanced or metastatic BC after chemotherapy failure; and with doxorubicin and cyclophosphamide as adjuvant treatment of operable node-positive BC (1.1) • **Non-Small Cell Lung Cancer (NSCLC):** single agent for locally advanced or metastatic NSCLC after platinum therapy failure; and with cisplatin for unresectable, locally advanced or metastatic untreated NSCLC (1.2) • **Hormone Refractory Prostate Cancer (HRPC):** with prednisone in androgen independent (hormone refractory) metastatic prostate cancer (1.3) • **Gastric Adenocarcinoma (GC):** with cisplatin and fluorouracil for untreated, advanced GC, including the gastroesophageal junction (1.4) • **Squamous Cell Carcinoma of the Head and Neck Cancer (SCCHN):** with cisplatin and fluorouracil for induction treatment of locally

Evaluation by PEC:

Sr. No.	Section	Observation
1.	-	Notarized Letter of Authorization is required.
2.	3.2.P.2	In pharmaceutical equivalence only pH, Assay & Particulate matter tests are done for comparison. Why all pharmacopoeial tests are not performed for establishing pharmaceutical equivalence. The Reference product specifications mentioned are IP, why comparison is not done with a product having USP specifications as your product are as per USP specifications. Further address of manufacturer and expiry date of reference product are also required.
3.	3.2.P.8	Stability studies data for full shelf life claimed is required.
4.	3.2.P.8	Supporting data [Chromatograms(assay run, system suitability, standard run, impurities etc), HPLC log, evidence of CFR-21 compliance, spectra etc] of testing of Trial batches is required.

Decision: Deferred for submission of reply to above cited shortcomings.

	For imported products, specify one the these	☒ Finished Pharmaceutical product import ☐ Buk import and local repackaging ☐ Buk import and local repackaging for export purpose only
	Dy. No. and date of submission	Dy. No. 13161 dated 29.05.2023.
	Details of fee submitted	PKR 150,000/- vide slip No. 6438456057 Dated: 30.09.2022
	The proposed proprietary name / brand name	**DOCESOLE 120mg/6ml concentrate for infusion**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each 6ml vial contains: Docetaxel……120mg.
	Pharmaceutical form of applied drug	Clear colourless to pale yellow solution, concentrate for IV infusion.
	Pharmacotherapeutic Group of (API)	Taxanes ATC Code: L01CD02
	Reference to Finished product specifications	**USP Specifications.**
	Proposed Pack size	1's.
	Proposed unit price	As per SRO.
	The status in reference regulatory authorities	DOCETAXEL 120MG/6ML KABI MHRA Approved.
	For generic drugs (me-too status)	Doxetal 120mg/6ml Inj Reg. No. 092154 M/s Rotex Pharma
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Name, address of drug substance manufacturer	M/s Shanghai Jinhe Bio-Pharmaceutical Co. Ltd. No. 508, Maodian Road, Qingpu District Shanghai, China.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubility, appearance, manufacturers, description of

		manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis (DXT201904027, DXT201906036, DXT201906037, DXT201907038) and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches for drug substance at accelerated as well as real time conditions. The stability conditions with time durations are; 40±2 ℃ 75%±5 RH: 6 months (Accelerated) 25 ºC±2℃ 65%±5% RH: 24 months (Real time) Batch No. DCA201411002, DCA201411003, DCA201411004
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis (NN0064,NN0065, NN0066.)
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted Pharmaceutical Equivalence for the applied product against the reference product i.e. Docetaxel Injection 20mg/ml Batch No. 6F286A manufactured by Sanofi exp_date:_, by performing following tests; pH, Assay, Particulate matter.
	Analytical method validation/verification of product	Firm has submitted analytical method verification studies for the applied product.
	Container closure system of the drug product	Type-I glass vials with rubber stopper, aluminium and plastic flip-off seals.
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches of drug product. **The real time stability study data is conducted at 30℃ ± 2℃, 75% ± 5% for 12 months**. Accelerated at 40±2℃/75±5%RH for 6 months. Batch No. NN0064, NN0065, NN0066.
	Therapeutic indications in USFDA.	Docetaxel Injection is a microtubule inhibitor indicated for: • **Breast Cancer (BC):** single agent for locally advanced or metastatic BC after chemotherapy failure; and with doxorubicin and cyclophosphamide as adjuvant treatment of operable node-positive BC (1.1) • **Non-Small Cell Lung Cancer (NSCLC):** single agent for locally advanced or metastatic NSCLC after platinum therapy failure; and with cisplatin for unresectable, locally advanced or metastatic untreated NSCLC (1.2) • **Hormone Refractory Prostate Cancer (HRPC):** with prednisone in androgen independent (hormone refractory) metastatic prostate cancer (1.3) • **Gastric Adenocarcinoma (GC):** with cisplatin and fluorouracil for untreated, advanced GC, including the gastroesophageal junction (1.4)

		• **Squamous Cell Carcinoma of the Head and Neck Cancer (SCCHN):** with cisplatin and fluorouracil for induction treatment of locally

Evaluation by PEC:

Sr. No.	Section	Observation
1.	-	Notarized Letter of Authorization is required.
2.	3.2.P.2	Pharmaceutical equivalence of product having strength 20mg/ml is submitted. Same is submitted in dossier of product having strength of 20mg/1ml. Proper pharmaceutical equivalence studies are required.
3.	3.2.P.8	Stability studies data for full shelf life claimed is required.
4.	3.2.P.8	Supporting data [Chromatograms(assay run, system suitability, standard run, impurities etc), HPLC log, evidence of CFR-21 compliance, spectra etc] of testing of Trial batches is required.

Decision: Deferred for submission of reply to above cited shortcomings.

Case 2: The Authority in its 165th meeting held on 20th July 2023, approved out-of-queue consideration of Form 5-Fapplications of following molecules received till 31st December, 2023, keeping in view of their repeated shortage/ non-availability reports in the market and to ensure timely access of these drugs to public:

1. Labetalol Injection
2. Calcium gluconate Injection
3. Digoxin Injection
4. Propofol Injection
5. Cholestyramine powder/ Sachet
6. Lithium Carbonate Tablet
7. Pilocarpine Eye Drops
8. Heparin Injection
9. Divalproex sodium Tablet and Injection
10. Anti-D injection
11. Streptokinase Injection
12. Octreotide acetate Injection
13. Carbamazepine Tablet
14. Penicillin-G Benzathine Injection
15. Fucidic acid cream
16. Calcitonin Injection
17. Potassium chloride Tablet
18. **Contrast media**
19. Protamine Sulphate Injection

	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubility, appearance, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis (5569) (MGM-001/17, MGM-002/17, MGM-003/17) and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches for drug substance at accelerated as well as real time conditions. The stability conditions with time durations are; 40±2 ℃ 75%±5 RH: 6 months (Accelerated) 25 ºC±2℃ 60%±5% RH: 48 months (Real time) Batch No. 3.883, 3.884, 3.885 Batch No. 4326, 4327, 4328 Maglumine: MGM-001/14, MGM-002/14, MGM-003/14, Long term for 36 months, at 30℃± 2℃, 65% ±5% RH.

	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis (0223H2301, 0223H2302.)
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted Pharmaceutical Equivalence for the applied product against the reference product i.e. Trazograf 76% Batch No. I0Z23031. EXP 06.2026 mfg 07,2023 manufactured by **Unique Pharmaceutical labs**, by performing following tests; Physical appearance, identification, particulate matter, extractable volume, pH, sterility, BET, free aromatic amine, Iodine and iodide content, Assay. Pictorial evidence is submitted.
	Analytical method validation/verification of product	Firm has submitted analytical method verification studies for the applied product.
	Container closure system of the drug product	Diatrizoate meglumine and diatrizoate sodium injection USP in colorless 20 ml USP type I vial with 20 mm bromobutyl rubber stopper and 20 mm aluminium flip off hook seal of navy blue color labeled in unit carton.
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches of drug product. The real time stability study data is conducted at 30°C ± 2°C, 75% ± 5% for 36 months. Accelerated at 40±2°C/75±5%RH for 6 months. Batch No. 0223C1801, 0223C1901, 0223B2001,
	Therapeutic indications in USFDA.	Diatrizoate Meglumine and Diatrizoate Sodium Solution is indicated for radiographic examination of segments of the gastrointestinal tract (esophagus, stomach, proximal small intestine, and colon). The preparation is particularly indicated when a more viscous agent such as barium sulfate, which is not water-soluble, is not feasible or is potentially dangerous. Diatrizoate Meglumine and Diatrizoate Sodium Solution may also be used as an adjunct to contrast enhancement is computed tomography of the torso (body imaging); the preparation is indicated, in conjunction with intravenous administration of a radiopaque contrast agent, when unenhanced imaging may not provide sufficient definition in distinguishing normal loops of bowel from adjacent organs or areas of suspected pathology

	The proposed proprietary name / brand name	Tasso Tablet 80mg
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Film coated tablet contains: Osimertinib (as mesylate)…..80mg
	Pharmaceutical form of applied drug	Tablet
	Pharmacotherapeutic Group of (API)	Antineoplastic agents, protein kinase inhibitors (L01EB04)
	Reference to Finished product specifications	In house
	Proposed Pack size	As per SRO
	Proposed unit price	As per current pricing policy of DRAP
	The status in reference regulatory authorities	Tagrisso 80mg Tablet (USFDA Approved)
	For generic drugs (me-too status)	NA
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Name, address of drug substance manufacturer	ShengDa Pharmaceutical Co., Limited.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data for both sources related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted long term stability study data of 3 batches of drug substance at 25°C ± 2°C / 60 ± 5% RH for 3 months. The accelerated stability data is conducted at 40°C ± 2°C / 75 ± 5% RH for 3 months
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.

	Pharmaceutical Equivalence and Comparative Dissolution Profile	Comparative analysis Studies against the reference product Tagrisso 80mg Tablet (M/s. AstraZeneca) has been submitted.
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	HDPE bottle
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches. Accelerated stability studies have been conducted at 40°C±2°C and 75%±5% RH for 6 months. Real time stability studies conducted at 30°C±2°C and 65% ± 5% for 24 months

Evaluation by PEC:

Therapeutic indications TAGRISSO as monotherapy is indicated for:

- the adjuvant treatment after complete tumour resection in adult patients with stage IB-IIIA non-small cell lung cancer (NSCLC) whose tumours have epidermal growth factor receptor (EGFR) exon 19 deletions or exon 21 (L858R) substitution mutations.
- the first-line treatment of adult patients with locally advanced or metastatic NSCLC with activating EGFR mutations.
- the treatment of adult patients with locally advanced or metastatic EGFR T790M mutation-positive NSCLC.

S.no.	Section	Observations/Deficiencies/ Short-comings
1.	1.3.4	Submit product specific letter of authorization from the Product License Holder, since the submitted authorization letter was not specified the product.
2.	1.3.5	The applied product is in L01 group i.e. cytotoxic drug and as per decision of Registration Board in its 282nd meeting, "*The manufacturing of cytotoxic drug shall be carried out in a dedicated or self-contained facilities and manufacturer shall provide safety and protective measures for workers and personnel which remain in direct contact or are involved in close handling of these drug*" Accordingly evidence of self-contained or dedicated facility of manufacturer abroad shall be submitted.
3.	3.2.S.2.1	Provide the complete manufacturing address of drug substance manufacturer, since you have only specified the title of drug substance manufacturer.
4.	3.2.S.4.1-3.2.S.4.2	Submit the specification and detailed analytical procedure of drug substance by drug product manufacturer.
5.	3.2.S.4.3	Provide analytical method validation report performed by drug product manufacturer.
6.	3.2.S.4.4	Provide batch analysis report of drug substance by the drug product manufacturer.
7.	3.2.S.5	Provide certificate of analysis of reference standard /working standard used for testing of the product.
8.	3.2.S.7	Submit stability data of drug substance performed both at accelerated and long term conditions till the claimed re-test period, since you have only submitted the data of 2 time points i.e. 1st and 3rd month.
9.	3.2.P.2.6	Innovator product claimed that tablets are formulated to be dispersible, when dosing of whole tablets is not possible, tablets may be administered as an aqueous dispersion. Reference to the innovator claim, did the applied formulation also dispersed in the similar manner as of innovator product. Further, did you performed the study for Use of Tablet Dispersion and impact of dispersion preparation on physiochemical properties of the final dosage form were assessed while formulation development.
10.	Conclusion of CDP report stated that test/applied formulation is the product of M/s. Beacon Pharmaceuticals, (Faridpur,sreepur,gazipur) Bangladesh, validation protocol claims that the Tasso tablet i.e. the applied product is of M/s. Julphar Bangladesh Ltd.(Gazipur,Sreepur) while the product license holder is M/s. Jenphar Bangladesh Ltd. (Vill-Faridpur, PS-Sreepur Dis-Gazipur).Clarification is required regarding the disparity observed related to the manufacturer of drug product in different section of CTD dossier, further, submitted the complete address of drug product manufacturer, since all three mentioned manufacturer have same address.	
11.	3.2.P.5.1	Justify the dissolution acceptance limit i.e. NLT 80% (Q) within 45 minutes adopted for the applied product comparing the acceptance limit of innovator product i.e. NLT (Q) within 30minutes.

12.	3.2.P.5.4	Submitted analytical method validation report is of Osimertinib 80mg Tablet of M/s. Julphar Bangladesh Ltd. while the applied product is Tasso 80 mg Tablet of M/s. Jenphar Bangladesh Ltd., clarification is required in this regard.	
13.	2.3.R.1.1	Provide copy of Batch Manufacturing Record (BMR) of all the batches of drug product for which stability studies data is provided in Module 3 section 3.2. P.8.	
Decision: Deferred for submission of reply to above cited shortcomings.

	The proposed proprietary name / brand name	**Palbonix 100mg Capsule**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Capsule Contains: Palbociclib…….100mg
	Pharmaceutical form of applied drug	Injection
	Pharmacotherapeutic Group of (API)	Anticancer
	Reference to Finished product specifications	Innovator specifications
	Proposed Pack size	1 × 21's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	IBRANCE (Capsule) of USFDA approved
	For generic drugs (me-too status)	IBRANCE 100mg Capsule of M/s Pfizer Reg# 103787
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubility's, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance..
	Name, address of drug substance manufacturer	Shandong Boyuan Pharmaceuticals Co., Ltd Address: Qiangjin Street, Jibei Economic Development Zone Jiyang County, Jinan City, Shandong China.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data for both sources related to nomenclature, structure, general properties, solubility's, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted long term stability study data of 3 batches of drug substance at 25°C ± 2°C / 60 ± 5% RH for 24 months. The accelerated stability data is conducted at 40°C ± 2°C / 75 ± 5% RH for 6 months Batches: (180801GS, 180802GS, 180803GS)
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical Equivalence have been established against Ibrance 100mg manufactured by Pfizer. UK by performing quality tests (Appearance, Assay, Microbial limit test. Impurities). The firm has submitted CDP with of Ibrance 100mg manufactured by Pfizer. UK in water, Acid media (pH 1.2),

		Acetate Buffer (pH 4.5) & Phosphate Buffer (pH 6.8). The values for f1 and f2 are in the acceptable range.
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	HDPE bottle
	Stability study data of drug product, shelf life and storage conditions	• 24 months real time stability data at 30˚C ± 2˚C / 65% ± 5%RH of 03 batches • 06 month accelerated stability data 40˚C ± 2˚C / 75% ± 5%RH of 03 batches Batches: 3430001, 3430002, 3430003,

Remarks of Evaluator:

S.No	Section	Shortcomings Communicated	Reply
1.	1.3.5	Submitted GMP certificate of manufacturer does not specify that capsule section for anticancer is dedicated or otherwise.	Same GMP certificate submitted in which Dosage form Hard gelatin Capsule, controlled/Sustained Capsule in which all the categories are mentioned. Antiulcerants, Analgesics & Antipyretics, Antifungal, Vitamins & Minerals , Antivirals, Antiretroviral, Drug used in Anemia & other blood disorder, Antihypertensive & Cardiprotective, Antiplasmodics,Anti-infective, Anti-infective, Antiemetics, Anticonvulsants, Antiseizure, Immunosuppressant & Antirheumatic, Anticancer, Mucolytics & Expotorant, Dietry Supplements, Chelating Agent.
2.	3.2.S.4.3	Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance(s) shall be submitted.	Summary reports for validation are submitted however no method and protocols are submitted.
3.	3.2.P.5.1	Innovator product dissolution limits are Q=80% in 30 minutes while your dissolution limits are NLT 75% in 45 minutes. Clarification is required regarding.	Firm refer their dissolution method to dissolution database of USFDA in which 45 minutes time pint is mentioned.
4.	3.2.P.5.2	Submit complete method for assay in analytical testing method of drug product.	complete method for assay in analytical testing method of drug product is submitted.

Decision: Approved as per policy of inspection of manufacturer abroad.
Registration letter will be issued upon submission of GMP certificate of drug product manufacturer wherein availability of dedicated Capsule (Anti-cancer/Oncology) section could be confirmed.

CBPI00618C	Sep. 2018
CBPI00718C	Sep. 2018

Remarks of Evaluator:
The following deficiencies / shortcomings have been communicated to the firm: -

i. The Firm has submitted **Scanned Copy** of legalized & notarized CoPP Certificate No. 4429584/TS/2023 dated 08-08-2023 issued by Drugs Control Administration, Telangana State for Carboplatin Concentrate for Solution for Infusion BP 450mg/45ml (CARBO SPAL-L 450), valid up to 05/10/2025. **Please provide Original legalized & notarized document for the same.**

ii. Finished product specifications have been claimed as "BP" whereas in section 3.2.P.2.1 Specifications No. FPIN018-S-02, Effective 30-04-2021, Reference for Identification, Assay and Related Substances by HPLC has been claimed as "In-House". Please justify.

iii. Firm has submitted **Photocopy** of notarized 'Authorization Letter' issued by M/s SP Accure Labs Private Limited. **Please provide Original notarized document for the same.**

iv. **"Annex 1"** claimed to be enclosed with above 'Authorization Letter' has not been submitted in application dossier.

v. The name of firm as mentioned on 'Authorization Letter' and information provided by FPP Manufacturer throughout the application dossier states its name as "**M/s SP Accure Labs Private Limited".** However, the name of FPP Manufacturer as evident from documents issued by Regulatory Authority of country of origin specifies it as **M/s SPAL Private Limited.** Please justify / provide supporting documents for change of name to 'M/s SP Accure Labs Private Limited' issued by concerned authorities.

vi. The label claim has been mentioned throughout the application dossier as "Each **ml Vial** contains…", whereas the proposed pack size is **45ml Vial**. Please justify.

Decision: Deferred for submission of reply to above cited shortcomings.

Agenda of Evaluator PEC-XXI

22.	Name, address of Applicant / Importer	**M/s Wellociti Healthcare (Pvt.) Ltd., Office No. 209, 2nd Floor, Thair Plaza, Near City Court, Karachi.**
	Details of Drug Sale License of importer	DSL No. DHODSK(Drugs)/-809. Status: Drug License by way of whole sale. Address: M/s Wellociti Healthcare (Pvt.) Ltd., Office No. 209, 2nd Floor, Thair Plaza, Near City Court, Karachi. Valid up to 08-12-2027.

Firm has summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance. The firm has summarized information of drug product including its description, composition, pharmaceutical development, manufacturer, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Name, address of drug substance manufacturer	M/s Sun pharmaceutical Industries Limited, A-7/A-8, M.I.D.C., Industrial Area, Ahmednagar – Maharashtra, India. Copy of GMP certificate No. NEW-WHO-GMP/CERT/NKD/72512/2018/11/24746 dated 30-08-2018 issued by Food & Drugs Administration M.S. Bandra - Mumbai valid till 29-08-2021 is submitted.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	• 72 months' real time stability data at 25°± 2°C / 60% RH ± 5% RH of 03 batches (AH-3-08013, AH-3-08014 & AH-3-08015). • 06 month accelerated stability data 40°C ± 2°C / 75% RH ± 5% RH of 03 batches (AH-3-08013, AH-3-08014 & AH-3-08015).
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.

	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical equivalence has been established against product i.e. Cisplatin NeoCorp 1mg/ml, Lot No. JG5128 MAH Hexal AG Industries by performing the following tests; Description, Identification, pH, Assay & Related substances.
	Analytical method validation/verification of product	Submitted.
	Container closure system of the drug product	10ml amber 20mm collar vials (flat bottoms) with 20mm 4432/50 gray fluorotec B2 coating westarrs serum stopper and sealed with 20mm easy to open C/L Alu. Seals with matt finish plastic purple.
	Stability study data of drug product, shelf life and storage conditions	• 36-month real time stability data at 30°C ± 2°C / 75% ± 5% RH of 03 batches (CISI00118C (I), CISI00118C (U) & CISI00218C (I)). • 06 month accelerated stability data 40°C ± 2°C / 75% ± 5% RH of 03 batches (CISI00118C (I), CISI00118C (U) & CISI00218C (I)).

Evaluation by PEC:

Sr. No.	**Section**	Observations	Reply by the firm.
1.	•	• Notarized agreement shall be submitted. • Address of the marketing authorization holder mentioned in 1.4 and that mentioned in sole distribution agreement are different. Clarification shall be submitted.	
2.		Valid, notarized and legalized copy of GMP certificate of the manufacturer shall be submitted.	
3.	•	• Notarized and legalized copy of CoPP certificate shall be submitted. • Submitted CoPP has mentioned M/s SPAL Pvt. Ltd., India as product license holder while the agreement of the M/s Wellociti is with M/s Zydus Healthcare Limited. Clarification shall be submitted.	
4.	1.4.1	Section 1.4.1 has mentioned domestic and export sales while the sole distribution agreement has mentioned in Pakistan only. Clarification shall be submitted.	
5.	3.2.S.4.2	BP monograph has mentioned injection volume of 20µl while the specifications submitted by both the drug substance and drug product manufacturer has mentioned 10µl. clarification shall be submitted.	
6.	3.2.P.1	Qualitative composition of the applied formulation is different from innovator with respect to mannitol. Clarification shall be submitted.	
7.	3.2.P.2.2	Justification shall be submitted for not performing uniformity of content, sterility and bacterial endotoxin test in PE studies.	

Decision: Deferred for submission of reply to above cited shortcomings.

Import & Vet-II Section

Case 1. Registration of drug under DRAP Act 2012

Registration Board in 312th meeting considered & approved the following product of M/s Lab Diagnostic Systems (SMC) Pvt Ltd, Taxila Rawalpindi as per following details:

Name of Importer/Manufacturer	Product Name & Composition	Decision
M/s Lab Diagnostic Systems (SMC) Pvt. Ltd. 111B, Hali Road, Westridge 1, Rawalpindi Cantt., Pakistan **Manufacturer & Product License Holder:** M/s Jiangsu Hengrui Pharmaceuticals Co., Ltd. No. 38, Huanghe road, Economic and technological Development Zone, Lianyungang	Ethiodized Poppyseed Oil Injection Each vial contains: Ethiodized Poppyseed Oil Injection 10**ml** (contains Iodine 480mg/ml)	Approved with innovator's specifications as per import policy for inspection of Manufacturer abroad and verification of local storage facility for shelf life of 6months with storage condition below 30 °C

ii. As the product contains Ethiodized Poppyseed Oil Injection, the case was forwarded to the Controlled Drugs Division for their opinion on whether the NOC (No Objection Certificate) from the Ministry of Narcotics Control is required or not.

iii. The Controlled Drugs Division attached a letter from the Ministry of Narcotics Control, which states that "all parts of the poppy plant are restricted except for its seeds. However, any preparations containing more than 0.2% of Morphine or Diacetylmorphine are prohibited."

iv. The importer was asked to submit a reply in light of the letter from the Ministry of Narcotics Control.

v. Now, they have submitted a letter from the manufacturer abroad, which shows that their product does not contain Morphine or Diacetylmorphine.

Decision of 333rd meeting: The Board endorsed the decision of approval granted in 312th meeting of Registration Board for the following product formulation keeping in view the comments from Division of Controlled Drug, DRAP and reply of the firm.

Ethiodized Poppyseed Oil Injection
Each vial contains:
Ethiodized Poppyseed Oil Injection 10ml (contains Iodine 480mg/ml)

Export Facilitation Desk

Case No.01: Registration of Drug (s) of M/s Mallard Pharmaceuticals (Pvt.) Ltd., 23-Km, Lahore Road, Multan, for export purposes only.

Firm has applied for registration of drug(s) only for export purpose as per following details:

Requirements As Per SOP	Submitted Documents
Application on Form-5/ Form 5-D with required fee as per relevant SRO.	Form5;
Copy of DML (Renewal status) along with approval of relevant sections verified by licensing Division or inspection report for renewal of DML.	Copy of DML provided Approval of relevant section verified from letter No. F 1-14/2004-Lic (Vol-II) dated26-10-2020
GMP Status. Copy of Inspection report/GMP certificate.	GMP status verified from GMP certificate based / on inspection dated 13-08-2020
Undertakings that the applied product is exclusively for export purpose and the proposed names/ label/ colour do not resemble with already registered brands in importing country.	Provided (Pages. 1255/C)

Detail of the products is given below:

Sr.#	Name of Drug(s) with composition	Generic/RRA Status	Dy.No.(EFD)/Fee with date

I	II	III	IV
1.	Omnirox Injection Each 1 ml contains: Naproxen Sodium 50mg	Export Order Required.	Dy. No. 1485/22 (19.12.2023) Rs.30,000/- (21.11.2023) Rs.45,000/- (15.12.2023)

Decision: Registration Board deliberated that although the aforementioned formulation is neither me too formulation nor available in any RRA. However, the said formulation does not require special manufacturing conditions. Hence, to increase the export revenue of the country, Registration Board approved above product exclusively for export purpose only.

Agenda for the procedure for capacity assessment of the contract accepter

1. Inspection of contract accepter for manufacturing / testing capacity assessment shall be conducted for all those contract manufacturers, who has not been inspected for such purpose with in the last 3 years. The panel shall verify capacity assessment of all those sections, which are approved by the Licensing Division.

2. Capacity assessment of newly applied facility (Section) shall not be carried out, if any section of that manufacturing facility has already been assessed within last three years.

3. Following shall be prerequisites for submission of application for contract manufacturing under Rule 20 (A) of Contract Manufacturing Policy.

    a. Affidavit on stamp paper (Showing name, designation, CNIC Number of contract giver) stating installed capacity of the contract accepter for contract manufacturing. This affidavit shall only be signed by the CEO / MD of the firm. i.e. contract accepter.
    b. Copy of DML of both firms. i.e. contract giver and contract accepter along with Section (s) approval from Licensing Division.
    c. Valid GMP certificate or GMP inspection report of the contract accepter, conducted within last three years.
    d. Copy of legalized contract between contract giver and contract accepter on stamp paper presenting the capacities of the contract accepter for the manufacturing sections for whom the products have been applied, and

4. Affidavits submitted by the contract accepter, showing manufacturing / testing capacity, will be verified in the subsequent inspections conducted for GMP / renewal of DML and will be reported accordingly. Chairman, Registration Board may constitute panel of experts to verify capacity assessment, if required.
5. The capacity verification report will be valid for 3 years.

Agenda regarding the submission of duplicate dossiers of Form 5

The Registration Board discussed the submission of duplicate dossiers (Duplicate copy of already submitted dossier with requisite fee and duly verified by the DRAP) on Form-5 or Form-5D with complete stability study data submitted in PE&R Division till 31st December, 2023.

The Board after thorough deliberations recommended that said duplicate dossiers may be submitted till 31st March, 2024 for consideration of Registration Board. The Board also directed PEC Section to issue a circular to PPMA and Pharma Bureau for compliance of aforesaid decision by the relevant applicants after approval from the authority.

The PE&R division was also directed to forward the agenda/recommendation of the board for the approval of Authority without waiting the finalization of minutes.

The Board recommended the above for the approval of Authority, please.
