	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of Three batches of 6500 mL batch size production were tested: inverted and upright position. The accelerated stability study data is conducted at 25°C±2°C/60%±5% RH for 6 months. The real time stability study data is conducted at 2-8 °C for 24 months.

Evaluation by PEC:

S.no.	Observations/Deficiencies/ Short-comings	Response of the Firm
1.	Submit valid drug sale license of M/s. Hakimson Impex Pvt. Ltd, Karachi.	Firm submitted the valid DSL of applicant which is valid till 19/07/2028.

2.	Submit valid GMP certificate of Manufacturer Abroad ,since the submitted certificate was expired in 2021.	Firm submitted the GMP certificate which was based on inspection conducted on 22-03-2019,issue dated 29-03-2021 and validity was for three years.
3.	Submit legalized agreement letter between Meraki Global Pte Ltd. Singapore and product License holder i.e. M/s. ANAFARM HELLAS SA., Greece in which Meraki Global has given the marketing rights of applied product by the said product license holder.	Not submitted.
4.	Submit analytical method verification report of drug substance performed by drug product manufacturer, in accordance with the requirement mentioned in the CTD guidance document approved by Registration Board.	Firm submitted the method transfer for the analytical methods of assay determination, related substances determinations and residual solvents test of Caspofungin Acetate API which are to be transferred from TEVA Laboratories to Anfarm.
5.	Justify the stability conditions adopted for stability studies of drug substance in camparison of stability conditions recommended by innovator product for the drug substance.	Firm replied that they adopted the reference of innovator product approved in USFDA i.e. Cancidas Powder for concentrate for solution of infusion 50mg/vial. According to the review document of innovator brand storage condition of drug substance is -70°C.
6.	Scientific justification is required for an overfill of 9.2% of solution of infusion as evident from the submitted composition table in the requisite section.	Firm replied that the overfill is needed in order to ensure the labelled amount of active in the solution for infusion. Further, the proposed composition is similar to that of reference product i.e. Cancidas.
7.	Justify for not using the succinic acid as buffering agent in the developed formulation, since the review document of innovator product highlights the importance of succinic acid in the formulation in order to ensure stability during compounding and reconstitution, as well as suitable osmolarity for infusion. It also enables production of a satisfactory cake following lyophilisation	Firm clarified that the applied formulation is qualitatively similar to the innovator product Cancidas, in which sodium hydroxide or glacial acetic acid are used as pH adjusters and not succinic acid.
8.	Submit data of Pharmaceutical equivalence of the applied drug of strength 50mg with the innovator / reference/ comparator product of same strength and results of all the quality tests (mentioned in any official pharmacopoeia or section 3.2.P.5.1 of this application) of the developed formulation and the innovator / reference / comparator product	Firm submitted the comparative study report of applied product against the innovator product Cancidas of Merck Sharp & Dhome.

	shall be submitted and discussed".	
9.	Caspofungin acetate is highly soluble in aqueous media but sensitive to heat, oxygen and extremes of pH, the submitted manufacturing method did not include any of the precautionary measures to avoid the degradation of active substance due to the above said factors, clarification is required in this regard.	Firm submitted the forced degradation study report of drug product in response of this query.
10.	Justify for keeping the column temperature uptill 45°C by keeping in view the heat sensitivity of applied product.	Firm replied that "Kindly note that the keeping time of the drug product at the column temperature until 45°C is so fast that it is not significant as parameter for the heat sensitivity of the drug product".

Decision:Deferred for submission of legalized agreement letter between Meraki Global Pte Ltd. Singapore and product License holder i.e. M/s. ANAFARM HELLAS SA., Greece in which Marketing Authorization holder (MAH) will given the marketing rights of applied product to Meraki Global.

3.2.P.5.3.2 Analytical Method Validation Reports of Thymalfasin for Injection 1.6 mg

The exemplary validation reports of each test method for the drug product specification parameters examined with in-house test method are presented below.

Report title	Report No
Analytical Method Validation Report of Related substances in Thymalfasin for Injection 1.6 mg	14-TS(RD/P005)-R001/02-EN
Analytical Method Validation Report of Aggregates in Thymalfasin for Injection 1.6 mg	14-TS(RD/P005)-R003-EN
Analytical Method Validation Report of Bacterial Endotoxin in Thymalfasin for Injection 1.6 mg	07-TS(QD/R)-Y154-EN
Analytical Method Validation Report of Sterility in Thymalfasin for Injection 1.6 mg	07-TS(QD/R)-Y281-EN
Analytical Method Validation Report of Assay by HPLC in Thymalfasin for Injection 1.6 mg	14-TS(RD/P005)-R001/01-EN

Container closure system of the drug product

Strength	Pack	Description
1.6 mg	2 ml	Neutral borosilicate glass tubular injection vial stoppered with halogenated butyl rubber stopper and aluminium-plastic composite cap.

Sterile Water for Injection is packed in following packs.

Strength	Description
1 ml	Neutral borosilicate glass tubular injection stoppered with Teflon coated halogenated rubber stopper and aluminium-plastic composit

Stability study data of drug product, shelf life and storage conditions

Firm has submitted stability study data of 3 batches. The accelerated stability study data is conducted at: 25°C ± 2°C / 60% ± 5% RH for 6 months. The real time stability study data is conducted at 5°C ± 3°C / 60% ± 5 % RH for 36 months as per ICH guidelines.

Remarks of Evaluator:

S.no.	Observations/Deficiencies/ Short-comings	Response of the Firm
1.	Evidence of approval / registration / marketing status of the applied formulation in the same composition, salt form and dosage form in any one of the reference regulatory authority specified by Registration Board in its 275th meeting for further evaluation of your application.	Firm submitted the evidence of availability of applied formulation in Aifa Italy (Zadaxin Injection 1.6mg/ml)

Decision: Approved as per Policy for inspection of Manufacturer abroad and verification of local storage facility.

CASES OF EXPORT FACILITATION:

Deputy Director PRV/EFD vide its letter dated 22-01-2024 informed that in pursuance of decision of 133rd meeting of the Authority wherein it was decided that for each 100,000 USD worth of export during a fiscal year one molecule will be considered on priority basis. In compliance to this, M/s. Surge Laboratories (Pvt.) Ltd. has achieved the benchmark of more than 100,000 USD during the financial year 2020-2021. Accordingly, the firm has requested for priority consideration of the following molecule

930.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s. Surge Laboratories (Pvt.) Ltd. 10th KM, Faisalabad Road, Bikhi District, Sheikhupura.**

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Nabiqasim Industries (Pvt.) Ltd. has got the approval of the following products to be manufactured: Nixmetic Tablet 500mg Each tablet contains: Mebendazole.....500mg Reg. No.: 107702 Loptas Tablet 130mg Each tablet contains: Potassium Iodide...130mg Reg. No.: 108485 Descol EZ Tablet 10/40 Each film coated tablet contains: Ezetimibe.....10mg

		Atorvastatin Calcium Trihydrate eq. to Atorvastatin 40mg (As per Innovator's Specification) Reg. No.: 108621 Solbovir Tablet 400mg Each film coated tablet contains: Sofosbuvir.....400mg Reg. No.: 108620 Pavifir Tablet 200mg Each film coated tablet contains: Favipiravir.....200mg Reg. No.: 108899 Livent Tablet 0.5mg Each film coated tablet contains: Entecavir Monohydrate eq. to Entecavir.....0.5mg Reg. No.: 108959 Livent Tablet 1mg Each film coated tablet contains: Entecavir Monohydrate eq. to Entecavir.....1mg Reg. No.: 108960
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP/DML Certificate no. S-GMP/22113654 and valid till 03/11/2024
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record for product testing.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted certificate of 21 CFR compliance for the HPLC system along with audit trail report for product testing.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator:

S.no.	Observations/Deficiencies/ Short-comings	Response of the Firm
1.	Please specify the reference of dissolution medium adopted for dissolution test along with evidence of literature of innovator product, since the release profile of applied product is approximately similar in all three medias.	Firm replied that "The rationale for selecting the dissolution medium/method is as per the recommendation of USP general chapter and ICH guidance document for "Dissolution Testing of Immediate Release Solid Oral Dosage Forms.". Further, Rationale for selecting pH 6.8 media as Qc release media is that Levosulpiride is S-enantiomer of Sulpride. Levosulpiride has a pKa value of 8.5 approximately near to sulpride pKa value 9.12 and partition coefficient of sulpride is 0.42. Sulphide tablet monograph is officially available in JP compendia (enclosed for reference in Annexure-A). 2nd fluid is used as dissolution medium (pH 6.8 Buffer); however we will adapt the proposed dissolution medium (0.1N HCI) as QC release media for our applied product Levosulpiride tablet Range on the basis of PAR of Reference product."
2.	Justify for taking fine powder equivalent to 100mg for making sample solution of 50mg strength tablet	Firm replied that it is typo error and To prepare sample solution for 50 mg strength weigh sample according to average weight of one tablet (i.e. equivalent to 50mg of Levosulpiride) in 100 mL Volumetric flask and dilute the stock preparation by transferring

		5mL of stock solution into 25mL volumetric flask to obtain sample concentration of 0.1mg/ml.
3.	Justify for submitting analytical method validation report of 50mg&100mg strength for 25mg strength tablet, since the sample solution preparation of both strengths are different from each other.	Firm relied that "Since the sample preparation of 25mg strength is different from 50mg strength, we have done separate analytical method validation for Levosulpiride Tablet 25mg'strength, same is enclosed in Annexure-C. Previously, mistakenly validation report of 50mg strength was enclose in dossier of 25mg tablet strength".

Decision: Approved. Firm shall submit the fee of Rs. 7,500 for correction/pre-approval change/ in product specifications, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021, before issuance of registration letter.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

S.no.	Observations/Deficiencies/ Short-comings	Response of the Firm
1.	Please specify the reference of dissolution medium adopted for dissolution test along with evidence of literature of innovator product, since the release profile of applied	Firm replied that "The rationale for selecting the dissolution medium/method is as per the recommendation of USP general chapter and ICH guidance document for "Dissolution

	product is approximately similar in all three medias.	Testing of Immediate Release Solid Oral Dosage Forms.". Further, Rationale for selecting pH 6.8 media as Qc release media is that Levosulpiride is S-enantiomer of Sulpride. Levosulpiride has a pKa value of 8.5 approximately near io sulpride pkA value 9.12 and partition coefficienJ of sulpride is 0.42. Sulpride tablet monograph is bfficially available in JP compendia (enclosed for reference in Annexure-A). 2nd fluid is used as dissolution medium (pH 6.8 Buffer); however we will adapt the proposed dissolution medium (0.1N HCI) as QC release media for our applied product Levosulpiride tablet Range on the basis of PAR of Reference product."
2.	Justify for taking fine powder equivalent to 100mg for making sample solution of 50mg strength tablet	Firm replied that it is typoerror and To prepare sample solution for 50 mg strength weigh sample according to average weight of one tablet (i.e. equivalent to 50mg of Levosulpiride) in 100 mL Volumetric flask and dilute the stock preparation by transferring 5mL of stock solution into 25mL volumetric flask to obtain sample concentration of 0.1mg/ml.
3.	Justify for submitting analytical method validation report of 50mg&100mg strength for 25mg strength tablet, since the sample solution preparation of both strengths are different from each other.	Firm relied that "Since the sample preparation of 25mg strength is different from 50mg strength, we have done separate analytical method validation for Levosulpiride Tablet 25mg'strength, same is enclosed in Annexure-C. Previously, mistakenly validation report of 50mg strength was enclose in dossier of 25mg tablet strength".

Decision: Approved. Firm shall submit the fee of Rs. 7,500 for correction/pre-approval change/ in product specifications, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021, before issuance of registration letter.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	NA
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP Certificate (No. 83/2020-DRAP (K) dated 23-06-2020 valid for 2 years.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	NA
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted Raw data sheets, COA, summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator:

S.no.	Sections	Observations/Deficiencies/ Short-comings

1.	3.2.S.4.2	Submit Analytical procedure and specification of drug substance by drug product manufacturer, since you have only submitted the analytical procedure by drug substance manufacturer.
2.	3.2.S.4.3	Submit analytical method verification report of drug substance performed by drug product manufacturer.
3.	3.2. S.5	Reference Standards or Materials Provide certificate of analysis of reference standard /working standard used for testing of the drug substance.
4.	3.2.S.7	The stability study data of drug substance submitted in section 3.2.S.7.3 is tested on completely different specifications as provided in section 3.2. S.4. Justification is required in this regard how this stability study data represents the same drug substance for which the data in module 3.2.S is submitted. Further, justify for not performing the test of pH, water determination test ,chloride and sulphate test during the stability studies.
5.	3.2.P.2.2.1	Justify, why the pharmaceutical equivalence and comparative dissolution profile was studied against comparator product instead of using innovator product/brand leader.
6.	3.2.P.5.4	Provide batch analysis report of the stability batches in section 3.2.P.5.4.
7.	2.3.R.1.1	Please provide complete calculation of dispensed weight of drug substance per tablet considering the water content and salt factor of active material.

Decision of 330th meeting of Registration Board:
Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.

Response of the Firm:

S.no.	Observations/Deficiencies/ Short-comings	Reply of the Firm
1.	Submit Analytical procedure and specification of drug substance by drug product manufacturer, since you have only submitted the analytical procedure by drug substance manufacturer.	Submitted
2.	Submit analytical method verification report of drug substance performed by drug product manufacturer.	Submitted
3.	Reference Standards or Materials Provide certificate of analysis of reference standard /working standard used for testing of the drug substance.	Firm submitted the COA of working standard by M/s. SAAKH Pharma (Pvt.) Ltd. Karachi.
4.	The stability study data of drug substance submitted in section 3.2.S.7.3 is tested on completely different specifications as provided in section 3.2. S.4. Justification is required in this regard how this stability study data represents the same drug substance for which the data in module 3.2.S is submitted. Further, justify for not performing the test of pH, water determination test ,chloride and sulphate test during the stability studies.	Firm replied that we have requested the drug substance manufacturer (SAAKH Pharma) to provide us the DMF after correction till now we did not get DMF, but on telephonic conversation with representative of SAAKH Pharma they told them that the point highlighted is typographic mistake, further, on their request the API Manufacturer performed the test of pH, water determination test, chloride and sulphate test in stability study as per monograph requirement. Firm submitted the stability data of only six month of drug substance
5.	Provide batch analysis report of the stability batches in section 3.2.P.5.4.	Submitted
6.	Please provide complete calculation of dispensed weight of drug substance per tablet	Firm replied that without considering the water content (LOD factor) they dispensed

	considering the water content and salt factor of active material.	the batches, in future they will consider the water content when dispensing the batches.

Decision: Deferred for submission /clarification of following:

- **Submit stability data of drug substance performed at Zone-IVa condition till the claimed re-test date.**
- **Clarify for not considering the water content of drug substance while calculation of dispensed weight of drug substance per tablet.**

Remarks of Evaluator:

S.no.	Section	Observations/Deficiencies/ Short-comings
1.	3.2.S.4.2	Drug substance analytical procedure shall be submitted from both drug substance manufacturer and drug product manufacturer.
2.	3.2. P.2	Formulation contain preservative, so preservative effectiveness studies to be performed as per recommendations of pharmacopoeia and shall be submit.
3.	3.2.P.2.2.1	In compliance of notification no. 14-1/2022-PEC dated 16th January,2023 issued by DRAP, submit the image/picture/snapshot of innovator /reference/comparator pack against which Pharmaceutical equivalence/Comparative dissolution profile studies have been performed.
4.	3.2.P.4	Submit the analysis report/COA of excipients propylene glycol and sorbitol which includes the results of impurity testing related to the presence of ethylene glycol and diethylene glycol, in compliance of notification issued by DRAP vide letter No. F.3-42/2023-QC dated 1st, December,2023.
5.	3.2.P.5.2	Clarification required regarding the instrument used for assay of drug product either the assay has performed on HPLC or UV spectrophotometer. Since the assay method given in section 3.2.P.5.2 is on UV while validation report and stability data revealed that the assay has been performed on HPLC. Provide detailed procedure of uniformity of dosage unit test and deliverable volume test.
6.	3.2.P.5.4	Provide results of impurity testing relevant to the presence of ethylene glycol and diethylene glycol contamination in the drug in compliance of notification issued by DRAP vide letter No. F.3-42/2023-QC dated 1st, December,2023.
7.	3.2.P.8	Justify the batch size against the number of units to complete stability studies. Documents confirming import of drug substance with approval from DRAP I&E Office, shall be submitted. Submit Compliance Record of HPLC software 21CFR & audit trail reports on product testing.
8.	2.3.R.1.1	Provide Batch Manufacturing Record (BMR) of three stability batches.

Decision of 333rd meeting of Registration Board:
Registration Board deferred the case for submission of reply to the above cited shortcomings.

Response of the Firm:

S.no.	Observations/Deficiencies/ Short-comings	Response of the Firm
1.	Drug substance analytical procedure shall be submitted from both drug substance manufacturer and drug product manufacturer.	Firm submitted the analytical procedure of drug substance from drug product manufacturer and drug substance manufacturer. However, the assay procedure used for analysis of drug substance by drug product manufacturer is different from the assay method recommended by drug substance manufacturer.

2.	Formulation contain preservative, so preservative effectiveness studies to be performed as per recommendations of pharmacopoeia and shall be submit.	Not submitted
3.	In compliance of notification no. 14-1/2022-PEC dated 16th January,2023 issued by DRAP, submit the image/picture/snapshot of innovator /reference/comparator pack against which Pharmaceutical equivalence/Comparative dissolution profile studies have been performed.	Submitted
4.	Submit the analysis report/COA of excipients propylene glycol and sorbitol which includes the results of impurity testing related to the presence of ethylene glycol and diethylene glycol, in compliance of notification issued by DRAP vide letter No. F.3-42/2023-QC dated 1st, December,2023.	Firm replied that they have submitted samples of Glycerine and sorbitol 70% for impurity testing Diethylene Glycol(DEG) and Ethylene Glycol (EG) to CDL Karachi. Evidence of receipt of submission is submitted by the firm.
5.	Clarification required regarding the instrument used for assay of drug product either the assay has performed on HPLC or UV spectrophotometer. Since the assay method given in section 3.2.P.5.2 is on UV while validation report and stability data revealed that the assay has been performed on HPLC.	Reply not submitted by the Firm.
6.	Provide detailed procedure of uniformity of dosage unit test and deliverable volume test.	Reply not submitted by the Firm.
7.	Provide results of impurity testing relevant to the presence of ethylene glycol and diethylene glycol contamination in the drug in compliance of notification issued by DRAP vide letter No. F.3-42/2023-QC dated 1st, December,2023.	Firm replied that they have submitted samples of Glycerine and sorbitol 70% for impurity testing Diethylene Glycol(DEG) and Ethylene Glycol (EG) to CDL Karachi. Evidence of receipt of submission is submitted by the firm.
8.	Justify the batch size against the number of units to complete stability studies.	Firm replied that batch size is enough for stability study as 10 bottles are required for each level of accelerated and long term stability which are 80 bottles required.
9.	Documents confirming import of drug substance with approval from DRAP I&E Office, shall be submitted.	Firm replied that raw materials are directly delivered to factory. Air way bills are attached. However the airway bills are not attached in the reply.
10	Submit Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	Firm replied that HPLC record is maintained manually.
11	Provide Batch Manufacturing Record (BMR) of three stability batches.	Submitted.

Decision: Deffered for submission of following:

- **Justify for adopting the different assay method of drug substance by drug product manufacturer from the assay method recommended by drug substance manufacturer.**
- **Formulation contain preservative, so preservative effectiveness studies to be performed as per recommendations of pharmacopoeia and shall be submit.**
- **Clarification required regarding the instrument used for assay of drug product either the assay has performed on HPLC or UV spectrophotometer. Since the assay method given in section 3.2.P.5.2 is on UV while validation report and stability data revealed that the assay has been performed on HPLC.**
- **Provide detailed procedure of uniformity of dosage unit test and deliverable volume test.**
- **Documents confirming import of drug substance with approval from DRAP I&E Office, shall be submitted.**

Batch Size	1000 vials	1000 vials	1000 vials
Manufacturing Date	09-2020	01-2021	01-2021
Date of Initiation	10-09-2020	10-01-2021	10-01-2021
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted

2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (No. GD20190944) issued by CFDA China. The certificate was valid till 31-01-2024.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not submitted
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Not submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not submitted

Evaluation by PEC:

Sr. No	Shortcomings communicated
1.	Submit specifications and analytical procedures of the drug substance from both API manufacturer as well as drug product manufacturer in section 3.2.S.4.1 and 3.2.S.4.2
2.	Submit verification studies of the analytical method of drug substance performed by drug product manufacturer in section 3.2.S.4.3.
3.	The assay limit specified by drug substance manufacturer is ≥900 ug/ml while you have defined the assay limit as 98.5% to 101.5%. Justify how drug product manufacturer can change the assay limits.
4.	Submit API stability study data till the shelf life since real time stability data is submitted till 9 months only.
5.	Provide drug-excipient compatibility studies since the qualitative composition is different from the innovator's product.
6.	Justify why pharmaceutical equivalence is performed against a comparator product instead of innovator / reference product.
7.	Provide preservative effectiveness studies.
8.	Justify why the product specifications do not include a test for the assay of preservative contents.
9.	Justify why the assay calculation formula is different from that specified in USP monograph.
10.	Provide complete report of validation studies of the analytical method of drug product since you have submitted raw results. Further clarify why the concentration of precision studies and 100% of accuracy study is not as per the target concentration specified in analytical method.
11.	Provide stability study data sheets of all the three batches in section 3.2.P.8.3 as per the format specified in CTD guidance document since your data sheets does not specify batch size, API lot number and various other required information.
12.	Justify the performance of stability studies at condition specified for impermeable containers while your container closure system is a semi permeable container.
13.	Submit stability study data as per 6 points checklist provided in CTD guidance document in section 3.2.P.8.3 with proper tagging and data of each batch and time point shall be properly segregated along with its relevant raw data sheet and chromatograms so that its evaluation could be carried out, since you have submitted data without following checklist and the submitted data is without any sequence or tagging.
14.	Submit evidence of procurement of drug substance including ADC attested invoice / clearance certificate.

Decision of 331st meeting of Registration Board:
Registration Board deferred the case for submission of reply to the above cited shortcomings.

Response of the Firm:

Sr. No	**Shortcomings communicated**	**Response by the firm**

1.	Submit specifications and analytical procedures of the drug substance from both API manufacturer as well as drug product manufacturer in section 3.2.S.4.1 and 3.2.S.4.2	Submitted analytical procedure of drug substance by drug product manufacturer is not in accordance with USP monograph of Tobramycin.
2.	Submit verification studies of the analytical method of drug substance performed by drug product manufacturer in section 3.2.S.4.3.	Not submitted
3.	The assay limit specified by drug substance manufacturer is ≥900 ug/ml while you have defined the assay limit as 98.5% to 101.5%. Justify how drug product manufacturer can change the assay limits.	Not submitted
4.	Submit API stability study data till the shelf life since real time stability data is submitted till 9 months only.	Submitted stability data of drug substance is not as per zone IV-A conditions.
5.	Provide drug-excipient compatibility studies since the qualitative composition is different from the innovator's product.	Firm replied that they have made 3 lab scale batches of applied product, results of finished product and stability studies are satisfactory.
6.	Justify why pharmaceutical equivalence is performed against a comparator product instead of innovator / reference product.	Due to non-availability of innovator product firm has performed pharmaceutical equivalence against a comparator product.
7.	Provide preservative effectiveness studies.	Submitted
8.	Justify why the assay calculation formula is different from that specified in USP monograph.	Revised assay procedure has been submitted by the firm.
9.	Provide complete report of validation studies of the analytical method of drug product since you have submitted raw results. Further clarify why the concentration of precision studies and 100% of accuracy study is not as per the target concentration specified in analytical method.	Assay procedure on which verification studies has performed, is different from that specified in USP monograph.
10.	Provide stability study data sheets of all the three batches in section 3.2.P.8.3 as per the format specified in CTD guidance document since your data sheets does not specify batch size, API lot number and various other required information.	Submitted
11.	Justify the performance of stability studies at condition specified for impermeable containers while your container closure system is a semi permeable container.	Firm replied that new stability chamber for semi permeable container is to be purchase. Further, firm has also not performed the water loss study while performing the stability studies of drug product.
12.	Submit stability study data as per 6 points checklist provided in CTD guidance document in section 3.2.P.8.3 with proper tagging and data of each batch and time point shall be properly segregated along with its relevant raw data sheet and chromatograms so that its evaluation could be carried out, since you have submitted data without following checklist and the submitted data is without any sequence or tagging.	submitted
13.	Submit evidence of procurement of drug substance including ADC attested invoice / clearance certificate.	Submitted

Decision: Deferred for submission of following:

- **Justify for not adopting the same assay procedure of drug substance as recommended in the USP monograph of "Tobramycin".**
- **Submit verification studies of the analytical method of drug substance performed by drug product manufacturer in section 3.2. S.4.3.**
- **The assay limit specified by drug substance manufacturer is ≥900 ug/ml while you have defined the assay limit as 98.5% to 101.5%. Justify how drug product manufacturer can change the assay limits.**
- **Submit stability data of drug substance is as per zone IV-A conditions till the claimed re-test date.**
- **Justify for performing the verification studies on assay procedure different from assay method recommnended by USP.**
- **Justify the performance of stability studies at condition specified for impermeable containers while your container closure system is a semi permeable container.**

4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator:

S.no.	Observations/Deficiencies/ Short-comings	Response of the Firm
	Provide specification and detailed analytical procedures used for the testing of drug substance by drug product manufacturer.	Submitted
	Provide analytical Method verification studies of drug substance performed by the drug product manufacturer.	Submitted
	Justify for keeping the high RPM speed while performing the CDP comparing the dissolution procedure specified in section 3.2.P.5.2 with the RPM speed of 50. Further, justify the quantity of surfactant used in each media while performing the comparative dissolution profiling of drug product, referring to the concentration of Sodium dodecyl sulphate mentioned in the dissolution procedure of drug product in section 3.2. P.5.2.	Firm replied that "The drug showed poor dissolution in all the mediums as drug has poor solubility (BCS class II drug), therefore, in order to improve dissolution rate high RPM speed is considered while performing CDP. However, fresh CDP report with satisfactory results is also being submitted which is conducted with 50 RPM speed. Further, sodium dodecyl sulphate used as surfactant with low concentration to enhance discriminatory power of the test i.e., 1 %".
	Results of comparative dissolution profile mentioned the salt form of active ingredient i.e. racecadotril as besylate, clarify the salt form of API used in the manufacturing of drug product.	Firm replied that "The salt form of API used in the manufacturing of drug product is Racecadotril. API COA also attached for reference. Further, corrected report for CDP also attached with API Racecadotril".
	Scientific justification is required for using different method of dissolution	Firm replied that Slight modification has been done in testing procedure of Dissolution

<table>
<tr><td></td><td>testing from that specified by the drug substance manufacturer i.e. M/s. Athena in section 3.2.S.4.2. Similarly, assay procedure used by drug product manufacturer is different from assay procedure specified by the bulk manufacturer, justification is required in this regard.</td><td>and Assay in comparison with procedure specified by drug substance manufacturer i.e., M/s Athena including decrease in quantity of salt Potassium dihydrogen phosphate and mobile phase ratio. However, modified method has been validated and found in compliance with all the requirements.
Following variation has been observed in analytical method of drug substance and drug product despite the applicant imported ready to fill granules of racecadotril.
<table>
<tr><th>Analytical method of drug substance adopted by drug substance Manufacturer</th><th>Analytical method of drug product adopted by drug product Manufacturer</th></tr>
<tr><td>Assay:
Mobile phase ratio:
45 volumes of phosphate buffer solution pH 2.5 and 55 volumes of Acetonitrile.
Diluent:
25 volumes of phosphate buffer solution pH 2.5 and 75 volumes of Methanol.</td><td>Assay:
Mobile phase ratio:
40 volumes of phosphate buffer solution pH 2.5 and 60 volumes of Acetonitrile.
Diluent:
Same as of mobile phase.</td></tr>
<tr><td>Dissolution:

</table></td></tr>
<tr><td></td><td>Justify for not including the test of loss on drying and microbial limit test in the specification of finished product since these tests are the part of specification of racecadotril granules manufactured by M/s. Athena DDS Pvt. Ltd.</td><td>Revised specification has submitted by the Firm in which both tests are included.</td></tr>
<tr><td></td><td>Justify for not including the test of loss on drying and microbial limit test while performing the stability studies of finished product since these tests are the part of stability data of racecadotril granules manufactured by M/s. Athena DDS Pvt. Ltd</td><td>Firm replied that “Both test including Loss on drying and Microbial limit test are performed while testing and release of drug substance. Additionally, loss on drying test also performed during in-process testing. Further, as per our internal Stability Studies SOP, microbial limit test will be performed at the end of shelf-life studies i.e., 24 months. However, both tests have been included in revised finished product specification and performed on long-term stability samples for which results found satisfactory. Batch-wise</td></tr>
</table>

		Stability summary report with incorporation of both tests results attached as well.

Decision of 331st meeting of Registration Board:
Deferred for justification of using different method of assay and dissolution testing from that specified by the drug substance manufacturer, since firm has imported ready to fill granules with the defined specifications and analytical procedure by drug substance manufacturer.

Response of the Firm:
Firm replied that they adopted the assay method in accordance with the assay procedure of drug substance manufacturer and accordingly submitted the amended analytical procedure of drug product.

Decision: Approved. Firm shall submit the fee of Rs. 7,500 for correction/pre-approval change/ in product specifications, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021, before issuance of registration letter.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Remarks OF Evaluator:

S.no.	Observations/Deficiencies/ Short-comings	Reply of the Firm
1.	3.2.S.4.2: Analytical procedures Provide detailed analytical procedures for the testing of drug substance by drug product manufacturer. 3.2.S.4.3: Validation of analytical procedures Provide analytical Method validation studies performed by the Drug Product manufacturer.	Firm submitted the analytical procedure and analytical verification report of drug substance by drug product manufacturer.
2.	Justify the use of a different analytical method for assay testing of drug product in	Firm submitted the analysis sheet in which the sample preparation method is in accordance

	terms of concentration of sample solution and standard solution from that specified in USP monograph.	with USP monograph of montelukast chewable tablet

Decision of 322nd meeting of Registration Board:
Deferred for justification of using Montelukast sodium as reference standard in analytical procedures instead of Montelukast dicyclohexylamine as specified by USP monograph.

Response of the Firm:
Firm replied initially dated 21-08-2023 that they have arranged Montelukast Dicyclohexamine working standard and the COA of working standard is submitted as an evidence. Late, submitted the performance report of assay and dissolution testing performed at 24month time point of stability study of all three trial batches using the working standard Montelukast Dicyclohexamine.

Decision of 331st meeting of Registration Board:
Deferred for justification of using working standard of Montelukast Dicyclohexamine purchased from M/s. Dhanuka Laboratories Ltd., India instead of using primary/secondary reference standard supplied from API manufacturer of applied formulation i.e. M/s. Zhejiang Tianyu Pharmaceutical Co., Ltd.

Response of the Firm:
Firm replied that they import Montelukast Sodium for R&D purpose from M/s. Zhejiang Tianyu Pharmaceuticals Co. Ltd and they provided them Montelukast sodium working standard with that shipment, later when they submitted the dossier then the case was deferred in 322nd meeting of Registration Board for not using Montelukast Dicyclohexylamine as working standard. They demand Dicyclohexylamine working standard from M/s. Zhejiang Tianyu Pharmaceuticals Co. Ld. But it was not available and due to COVID situation the import from China was very difficult then we arrange the working standard from M/s. Dhanuka Laboratories India because they want to clarify the shortcomings on immediate basis.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

S.no.	Observations/Deficiencies/ Short-comings	Reply of the Firm

	3.2.S.4.2: Analytical procedures Provide detailed analytical procedures for the testing of drug substance by drug product manufacturer. 3.2.S.4.3: Validation of analytical procedures Provide analytical Method validation studies performed by the Drug Product manufacturer.	Firm submitted the analytical procedure and verification report of drug substance by drug product manufacturer.

Decision of 322nd meeting of Registration Board:
Deferred for justification of using Montelukast sodium as reference standard in analytical procedures instead of Montelukast dicyclohexylamine as specified by USP monograph.

Response of the Firm:
Firm replied initially dated 21-08-2023 that they have arranged Montelukast Dicyclohexamine working standard of M/s. Dhanuka Laboratories Ltd., India and the COA of working standard is submitted as an evidence. Late, submitted the performance report of assay and dissolution testing performed at 24month time point of stability study of all three trial batches using the working standard Montelukast Dicyclohexamine.

Decision of 331st meeting of Registration Board:
Deferred for justification of using working standard of Montelukast Dicyclohexamine purchased from M/s. Dhanuka Laboratories Ltd., India instead of using primary/secondary reference standard supplied from API manufacturer of applied formulation i.e. M/s. Zhejiang Tianyu Pharmaceutical Co., Ltd.

Response of the Firm:
Firm replied that they import Montelukast Sodium for R&D purpose from M/s. Zhejiang Tianyu Pharmaceuticals Co. Ltd and they provided them Montelukast sodium working standard with that shipment, later when they submitted the dossier then the case was deferred in 322nd meeting of Registration Board fir not using Montelukast Dicyclohexylamine as working standard. They demand Dicyclohexylamine working standard from M/s. Zhejiang Tianyu Pharmaceuticals Co. Ld. But it was not available and due to COVID situation the import from China was very difficult then we arrange the working standard from M/s. Dhanuka Laboratories India because they want to clarify the shortcomings on immediate basis.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

M/s. Winbrains Research Laboratories Plot no.69/1 Block B, Phase I-II, Industrial Estate, Hattar
The Central Licensing Board in its 282nd meeting held on 31st August, 2021 has considered and approved the grant of additional section of "Dry Powder Inhaler Capsule section (General)" to M/s. Winbrains Research Laboratories Plot no.69/1 Block B, Phase I-II, Industrial Estate, Hattar.

938.	Name, address of Applicant / Marketing Authorization Holder	M/s Winbrains Research Laboratories Plot No.69/1 Block B, Phase I-II, Industrial Estate, Hattar Pakistan
	Name, address of Manufacturing site.	M/s Winbrains Research Laboratories Plot No.69/1 Block B, Phase I-II, Industrial Estate, Hattar Pakistan
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 32464 dated 11/11/2022

	Details of fee submitted	PKR 30,000/-:dated 19/10/2022
	The proposed proprietary name / brand name	Flutimet 100/50mcg RotaCapsule
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Capsule Contains: Fluticasone Propionate……100mcg Salmeterol Xinafoate ……50mcg
	Pharmaceutical form of applied drug	White to off white color powder filled in hard gelatin capsule shells
	Pharmacotherapeutic Group of (API)	Long Acting- Beta agonists Corticosteroids
	Reference to Finished product specifications	Innovator's Specification
	Proposed Pack size	3×10's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	USFDA Approved ADVAIR DISKUS 100/50
	For generic drugs (me-too status)	Seretide Diskus 100mcg + 50Mcg GSK Pakistan. (Reg.no.074726)
	GMP status of the Finished product manufacturer	New section approval letter granted on 20/09/2021 (Dry Powder Inhaler and Nasal Drops) section approved.
	Name and address of API manufacturer.	M/s Vamsi Labs Ltd. Address: A-14/15, MIDC Area, Chincholi, Solapur, 413255Maharashtra, India
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, Solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of both drug substances are present in BP. The firm as submitted detail of nomenclature, structure, general properties, Solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Fluticasone Propionate Stability study conditions: Real time: 30°C ± 2°C / 75% ± 5%RH for 60 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches:(FTP0010414,FTP-0020715,FTP-0010615) Salmeterol Xinafoate Stability study conditions: Real time: 30°C ± 2°C / 75% ± 5%RH for 60 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: (SX-0020515,SX-0030515,SX-0040515)
	Module-III (Drug Product):	The firm has submitted description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at

		acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.		
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical equivalence report has not submitted by the firm.		
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.		
	Description of the delivery devices (Inhaler intended to be marketed along applied formulation)	Flutimet Turbo haler is an inspiratory flow driven,multidose powder inhaler.		
STABILITY STUDY DATA				
Manufacturer of API		M/s Vamsi Labs Ltd. Address: A-14 & 15, MIDC Area, Chincholi, Solapur, Maharashtra 413255, India		
API Lot No.		Firm has not mentioned the API lot no. of both drug substances.		
Description of Pack (Container closure system)		Alu-Alu blister packed in unit carton (3×10's)		
Stability Storage Condition		Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period		Real time: 6 months Accelerated: 6 months		
Frequency		Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6, (Months)		
Batch No.		T-46	T-47	T-48
Batch Size		500 Capsule	500 Capsule	500 Capsule
Manufacturing Date		12-2021	12-2021	12-2021
Date of Initiation		25-12-2021	25-12-2021	25-12-2021
No. of Batches		03		
Administrative Portion				
1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.		
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Not submitted		
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not submitted		
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted		
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not Submitted		

6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not Submitted

Remarks of Evaluator:

S.no.	Sections	Observations/Deficiencies/ Short-comings
1.	1.5.6	Justify the finished product specifications as "Manufacturer's specifications" since the drug product monograph is available in USP. Revise your specifications along with submission of requisite fee.
2.	3.2.S.4.1-3.2.S.4.2	Submit data for both drug substance in section 3.2.S.4.1 and 3.2.S.4.2 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required", since you have only submitted analytical procedure by drug substance manufacturer which is also not in accordance with USP.
3.	3.2.S.4.3	Submit data for both drug substances in section 3.2.S.4.3 as per the guidance document approved by Registration Board which specifies that "Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted" Further specify how the testing of drug substance was carried out without performing verification studies.
4.	3.2.S.4.4 (Fluticasone)	Drug substance specifications shall include test of specific optical rotation as recommended by BP monograph. Evidence of availability of MALVERN mastersizer instrument by drug product manufacturer, since it was evident from the batch analysis report that you have performed Particle size test by Malvern.
5.	3.2.S.7.3 (Salmetrol Xinafoate)	Accelerated stability data of third batch was of Formetrol Fumarate Hydrate instead of Salmetrol Xinafoate, please submit the correct data.
6.	3.2.P.1	Submitted details of accompanying device is for the multidose pre-filled dry powder inhaler instead of inhaler device required for DPI capsules. Composition of drug product given in section 3.2.P.1 (d) is different from the composition of innovator brand approved in USFDA, according to the label of innovator brand Each blister on the strip contains a white powder mix of micronized fluticasone propionate (100, 250, or 500 mcg) and micronized salmeterol xinafoate salt (72.5 mcg, equivalent to 50 mcg of salmeterol base) in 12.5 mg of formulation containing lactose monohydrate (which contains milk proteins). Provide the details regarding the metered amount and the mass of the drug delivered from the mouthpiece under defined test conditions (i.e., flow rate, duration).
7.	3.2.P.2.2.1	Pharmaceutical equivalence report against the innovator/reference product shall be submitted including results for batch release tests in accordance with USP for both applied and reference formulation. Submit Pharmaceutical equivalence report of strength 100/50mcg by performing all the quality test mentioned in USP.
8.	3.2.P.2.3	Manufacturing procedure submitted in section 3.2.P.2.3 and 3.2.P.3 reflect that particle size of powder is further reduced till 3µm, please provide details and evidence of availability of sheer mixer and the instrument/particle size analyzer used for the analysis of final particle size achieved.
9.	3.2.P.5.2	Submit detailed analytical procedure used for testing of drug product in accordance with USP monograph. Batch release specification did not include the performance test for inhalation powder i.e. Delivered Dose Uniformity & Aerodynamic Size Distribution test, clarification is required in this regard.

10	3.2.P.5.3	Provide analytical method verification report of drug product in compliance of USP monograph.
11	3.2.P.5.4	Justify for not performing the test of microbial enumeration test and test for specified microorganism and foreign particulate matter test while batch release of drug product. Further provide evidence of availability of Cascade impaction sampling apparatus for performance of Aerodynamic Size Distribution test and sampling apparatus used for the performance of Delivered Dose Uniformity.
12	3.2.P.6	Provide certificate of analysis of reference standard /working standard used for testing of the product.
13	3.2.P.8	Justify for not performing the test Delivered Dose Uniformity, Aerodynamic Size Distribution test, test of microbial enumeration test and test for specified microorganism and foreign particulate matter while performing the stability study of drug product. Submit compliance record of HPLC software 21CFR & audit trail reports on product testing for each analysis performed during the study. Provide details that which lot number of drug substance has been used in manufacturing of each batch of drug product. Also provide documents confirming evidence of import of each lot of drug substance used in manufacturing of these batches of drug product. Provide data of stability batches properly arranged and supported by respective documents including analytical report / COA, raw data sheet and respective chromatograms separately for each time point. Provide Reference of previous approval of applications with stability study data of the firm (if any) Provide Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).
14	2.3 R.1.1	Manufacturing procedure mentioned in BMR is different from the manufacturing procedure given in 3.2.P.3, justification is required in this regard. Calculation of dispensed weight of active along with salt and factor adjustment was not given in the BMR,please provide the calculations.

Decision of 323rd meeting of Registration Board:
Deferred for submission of reply of above-cited shortcomings within six month.

Response of the Firm:

S.no.	Observations/Deficiencies/ Short-comings	Response of the Firm
1.	Justify the finished product specifications as "Manufacturer's specifications" since the drug product monograph is available in USP. Revise your specifications along with submission of requisite fee.	Firm submitted the revised specification of drug product but microbial enumeration test ,test for specified microorganism, foreign particulate matter and Delivered Dose Uniformity test was not included in the finished product specification.
2.	Submit data for both drug substance in section 3.2.S.4.1 and 3.2.S.4.2 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is	Firm only submitted the specification and analytical procedure of drug substance by drug substance manufacturer but did not submitted the specification and analytical procedure of drug substance adopted by drug product manufacturer.

	required", since you have only submitted analytical procedure by drug substance manufacturer which is also not in accordance with USP.	
3.	Submit data for both drug substances in section 3.2.S.4.3 as per the guidance document approved by Registration Board which specifies that "Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted" Further specify how the testing of drug substance was carried out without performing verification studies.	Firm did not submit the response of this query.
4.	Drug substance specifications shall include test of specific optical rotation as recommended by BP monograph.	Firm only submitted the revised COAs of drug substance in which results of Optical rotation test included.
5.	Evidence of availability of MALVERN mastersizer instrument by drug product manufacturer, since it was evident from the batch analysis report that you have performed Particle size test by Malvern.	Firm did not submit the response of this query.
6.	Accelerated stability data of third batch was of Formetrol Fumarate Hydrate instead of Salmetrol Xinafoate, please submit the correct data.	Submitted
7.	Submitted details of accompanying device is for the multidose pre-filled dry powder inhaler instead of inhaler device required for DPI capsules.	Firm replied that their inhaler device is consist of three components included mouthpiece, rotacap chamber and base.
8.	Composition of drug product given in section 3.2.P.1 (d) is different from the composition of innovator brand approved in USFDA, according to the label of innovator brand Each blister on the strip contains a white powder mix of micronized fluticasone propionate (100, 250, or 500 mcg) and micronized salmeterol xinafoate salt (72.5 mcg, equivalent to 50 mcg of salmeterol base) in 12.5 mg of formulation containing lactose monohydrate (which contains milk proteins).	Firm submitted the revised composition of drug product in accordance with innovator product.

<table>
<tr><td>9.</td><td colspan="2">Provide the details regarding the metered amount and the mass of the drug delivered from the mouthpiece under defined test conditions (i.e., flow rate, duration).
Firm submitted the following table data in their reply:
<table>
<tr><th>API</th><th>Innovator Spec.</th><th>Winbrains spec.</th></tr>
<tr><td>Fluticasone propionate</td><td>92 micrograms/inhalation delivered</td><td>90 micrograms/inhalation delivered</td></tr>
<tr><td>Salmeterol Xinafoate</td><td>47 micrograms/inhalation delivered</td><td>46 micrograms/inhalation delivered</td></tr>
</table></td></tr>
<tr><td>10.</td><td>Pharmaceutical equivalence report against the innovator/reference product shall be submitted including results for batch release tests in accordance with USP for both applied and reference formulation.
Submit Pharmaceutical equivalence report of strength 100/50mcg by performing all the quality test mentioned in USP.</td><td>Firm submitted the pharmaceutical equivalence report against the Seretide Diskus 50/100mcg Powder for inhalation (The inhalation powder is contained in blisters held on a formed PVC coated base, with a peelable foil laminate lid. The strip is contained in a moulded plastic device. The plastic devices are available in cardboard containers, which hold) (Batch no.170930 Mfg date: 05-2021 and Expiry date: 04-2024), while firm in its report described the reference product as white capsule orange body hard gelatin capsule shell no.3 filled with white to off white color powder.
Further, microbial enumeration test ,test for specified microorganism, foreign particulate matter and Delivered Dose Uniformity test was not included in the submitted report.</td></tr>
<tr><td>11.</td><td>Manufacturing procedure submitted in section 3.2.P.2.3 and 3.2.P.3 reflect that particle size of powder is further reduced till 3µm, please provide details and evidence of availability of sheer mixer and the instrument/particle size analyzer used for the analysis of final particle size achieved.</td><td>Not submitted the response of this query.</td></tr>

- Calculation of dispensed weight of active along with salt and factor adjustment was not given in the BMR, please provide the calculations.

Response of the Firm:

Sr.no.	Decision of 333rd meeting of RB	Response of the Firm
1.	Microbial enumeration test, test for specified microorganism, foreign particulate matter and Delivered Dose Uniformity test was not included in the finished product specification.	Firm submitted the revised specification of finished product.
2.	Submit Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by Drug Product manufacturer, since you have only submitted analytical procedure by drug substance manufacturer which is also not in accordance with USP.	Firm submitted the specification of both drug substance different from the specification of drug substance recommended by drug substance manufacturer.
3.	Submit data for "Analytical Method Verification studies" including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer.	Firm submitted an incomplete verification report of drug substance by drug product manufacturer.
4.	Evidence of availability of MALVERN mastersizer instrument by drug product manufacturer, since it was evident from the batch analysis report that you have performed Particle size test by Malvern.	Reply not submitted by the firm.
5.	Submitted details of accompanying device is for the multidose pre-filled dry powder inhaler instead of inhaler device required for DPI capsules.	Reply not submitted by the firm.
6.	Microbial enumeration test, test for specified microorganism, foreign particulate matter and Delivered Dose Uniformity test was not included in the submitted Pharmaceutical equivalence report.	Firm submitted pharmaceutical equivalence report which again not contain the results of foreign particulate matter and Delivered Dose Uniformity test.

7.	Manufacturing procedure submitted in section 3.2.P.2.3 and 3.2.P.3 reflect that particle size of powder is further reduced till 3µm, please provide details and evidence of availability of sheer mixer and the instrument/particle size analyzer used for the analysis of final particle size achieved.	Reply not submitted by the firm.
8.	Provide analytical method verification report of drug product in compliance of USP monograph.	Firm submitted an incomplete verification report of drug product by drug product manufacturer.
9.	Justify for not performing the test of microbial enumeration test and test for specified microorganism and foreign particulate matter test while batch release of drug product.	Firm submitted the revised batch analysis report in which the numerical results of test of microbial enumeration test and test for specified microorganism and foreign particulate matter test is not given instead the statement of nil and complies is mentioned.
10.	Provide evidence of availability of Cascade impaction sampling apparatus for performance of Aerodynamic Size Distribution test and sampling apparatus used for the performance of Delivered Dose Uniformity.	Reply not submitted by the firm.
11.	Justify for not performing the test of microbial enumeration test and test for specified microorganism and foreign particulate matter test while batch release of drug product.	Firm submitted only the revised stability data sheets without any performance report/raw data sheets of these tests.
12.	Submit compliance record of HPLC software 21CFR & audit trail reports on product testing for each analysis performed during the study.	Submitted
13.	Provide certificate of analysis of reference standard /working standard used for testing of the product.	Submitted
14.	Provide details that which lot number of drug substance has been used in manufacturing of each batch of drug product. Also provide documents confirming evidence of import of each lot of drug substance used in manufacturing of these batches of drug product.	Firm submitted Form-6 attested by DRAP office without mentioning the lot number of drug substance has been used in manufacturing of each batch of drug product.
15.	Manufacturing procedure mentioned in BMR is different from the manufacturing procedure given in 3.2.P.3, justification is required in this regard.	Submitted the same BMR which is different from the manufacturing procedure given in 3.2.P.3, justification is required in this regard.
16.	Calculation of dispensed weight of active along with salt and factor adjustment was not given in the BMR, please provide the calculations.	Reply not submitted by the firm.

Decision: Deferred for submission of following:

- **Submit data for "Analytical Method Verification studies" including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer.**
- **Evidence of availability of MALVERN mastersizer instrument by drug product manufacturer, since it was evident from the batch analysis report that you have performed Particle size test by Malvern.**
- **Submitted details of accompanying device is for the multidose pre-filled dry powder inhaler instead of inhaler device required for DPI capsules.**

- **Submit pharmaceutical equivalence report including the result of all the test mentioned in the specification of drug product.**
- **Manufacturing procedure submitted in section 3.2.P.2.3 and 3.2.P.3 reflect that particle size of powder is further reduced till 3µm, please provide details and evidence of availability of sheer mixer and the instrument/particle size analyzer used for the analysis of final particle size achieved.**
- **Provide analytical method verification report of drug product in compliance of USP monograph.**
- **Provide details that which lot number of drug substance has been used in manufacturing of each batch of drug product. Also provide documents confirming evidence of import of each lot of drug substance used in manufacturing of these batches of drug product.**
- **Manufacturing procedure mentioned in BMR is different from the manufacturing procedure given in 3.2.P.3, justification is required in this regard.**
- **Calculation of dispensed weight of active along with salt and factor adjustment was not given in the BMR, please provide the calculations.**

	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical equivalence report has submitted against the brand leader seretide Rotacaps 250/50mcg of M/s. Glaxo Smith Kline B.no. R102 Exp date 11-2023 (Identification,assay)
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.
	Description of the delivery devices (Inhaler intended to be marketed along applied formulation)	Flutimet Turbo haler is an inspiratory flow driven,multidose powder inhaler.

STABILITY STUDY DATA	
Manufacturer of API	M/s Vamsi Labs Ltd. Address: A-14 & 15, MIDC Area, Chincholi, Solapur, Maharashtra 413255, India
API Lot No.	Firm has not mentioned the API lot no. of both drug substances.
Description of Pack (Container closure system)	Alu-Alu blister packed in unit carton (3×10's)
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH
Time Period	Real time: 6 months

	Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6, (Months)		
Batch No.	T-49	T-50	T-51
Batch Size	500 Capsule	500 Capsule	500 Capsule
Manufacturing Date	12-2021	12-2021	12-2021
Date of Initiation	25-12-2021	25-12-2021	25-12-2021
No. of Batches	03		

Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Not submitted
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not submitted
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not Submitted

Remarks of Evaluator:

S.no.	Sections	Observations/Deficiencies/ Short-comings
1.	1.5.6	Justify the finished product specifications as "Manufacturer's specifications" since the drug product monograph is available in USP. Revise your specifications along with submission of requisite fee.
2.	3.2.S.4.1-3.2.S.4.2	Submit data for both drug substance in section 3.2.S.4.1 and 3.2.S.4.2 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required", since you have only submitted analytical procedure by drug substance manufacturer which is also not in accordance with USP.
3.	3.2.S.4.3	Submit data for both drug substances in section 3.2.S.4.3 as per the guidance document approved by Registration Board which specifies that "Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted" Further specify how the testing of drug substance was carried out without performing verification studies.
4.	3.2.S.4.4 (Fluticasone)	Drug substance specifications shall include test of specific optical rotation as recommended by BP monograph. Evidence of availability of MALVERN mastersizer instrument by drug product manufacturer,since it was evident from the batch analysis report that you have performed Particle size test by Malvern.

5.	3.2.S.7.3 (Salmetrol Xinafoate)	Accelerated stability data of third batch was of Formetrol Fumarate Hydrate instead of Salmetrol Xinafoate, please submit the correct data.
6.	3.2.P.1	Submitted details of accompanying device is for the multidose pre-filled dry powder inhaler instead of inhaler device required for DPI capsules. Composition of drug product given in section 3.2.P.1 (d) is different from the composition of innovator brand approved in USFDA, according to the label of innovator brand Each blister on the strip contains a white powder mix of micronized fluticasone propionate (100, 250, or 500 mcg) and micronized salmeterol xinafoate salt (72.5 mcg, equivalent to 50 mcg of salmeterol base) in 12.5 mg of formulation containing lactose monohydrate (which contains milk proteins). Provide the details regarding the metered amount and the mass of the drug delivered from the mouthpiece under defined test conditions (i.e., flow rate, duration).
7.	3.2.P.2.2.1	Pharmaceutical equivalence report against the innovator/reference product shall be submitted including results for batch release tests in accordance with USP for both applied and reference formulation. Submit Pharmaceutical equivalence report of strength 100/50mcg by performing all the quality test mentioned in USP.
8.	3.2.P.2.3	Manufacturing procedure submitted in section 3.2.P.2.3 and 3.2.P.3 reflect that particle size of powder is further reduced till 3µm, please provide details and evidence of availability of sheer mixer and the instrument/particle size analyzer used for the analysis of final particle size achieved.
9.	3.2.P.5.2	Submit detailed analytical procedure used for testing of drug product in accordance with USP monograph. Batch release specification did not include the performance test for inhalation powder i.e. Delivered Dose Uniformity & Aerodynamic Size Distribution test, clarification is required in this regard.
10.	3.2.P.5.3	Provide analytical method verification report of drug product in compliance of USP monograph.
11.	3.2.P.5.4	Justify for not performing the test of microbial enumeration test and test for specified microorganism and foreign particulate matter test while batch release of drug product. Further provide evidence of availability of Cascade impaction sampling apparatus for performance of Aerodynamic Size Distribution test and sampling apparatus used for the performance of Delivered Dose Uniformity.
12.	3.2.P.6	Provide certificate of analysis of reference standard /working standard used for testing of the product.
13.	3.2.P.8	Justify for not performing the test Delivered Dose Uniformity, Aerodynamic Size Distribution test, test of microbial enumeration test and test for specified microorganism and foreign particulate matter while performing the stability study of drug product. Submit compliance record of HPLC software 21CFR & audit trail reports on product testing for each analysis performed during the study. Provide details that which lot number of drug substance has been used in manufacturing of each batch of drug product. Also provide documents confirming evidence of import of each lot of drug substance used in manufacturing of these batches of drug product. Provide data of stability batches properly arranged and supported by respective documents including analytical report / COA, raw data sheet and respective chromatograms separately for each time point. Provide Reference of previous approval of applications with stability study data of the firm (if any) Provide Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).

14.	2.3 R.1.1	Manufacturing procedure mentioned in BMR is different from the manufacturing procedure given in 3.2.P.3, justification is required in this regard. Calculation of dispensed weight of active along with salt and factor adjustment was not given in the BMR,please provide the calculations.
15.	Amendment in QOS (Module 2) for above points.	

Decision of 323rd meeting of Registration board:
Deferred for submission of reply of above-cited shortcomings within six month.

S.no.	Observations/Deficiencies/ Short-comings	Response of the Firm
1.	Justify the finished product specifications as "Manufacturer's specifications" since the drug product monograph is available in USP. Revise your specifications along with submission of requisite fee.	Firm submitted the revised specification of drug product but microbial enumeration test ,test for specified microorganism, foreign particulate matter and Delivered Dose Uniformity test was not included in the finished product specification.
2.	Submit data for both drug substance in section 3.2.S.4.1 and 3.2.S.4.2 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required", since you have only submitted analytical procedure by drug substance manufacturer which is also not in accordance with USP.	Firm only submitted the specification and analytical procedure of drug substance by drug substance manufacturer but did not submitted the specification and analytical procedure of drug substance adopted by drug product manufacturer.
3.	Submit data for both drug substances in section 3.2.S.4.3 as per the guidance document approved by Registration Board which specifies that "Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted" Further specify how the testing of drug substance was carried out without performing verification studies.	Firm did not submit the response of this query.
4.	Drug substance specifications shall include test of specific optical rotation as	Firm only submitted the revised COAs of drug substance in which results of Optical rotation test included.

<table>

	for each analysis performed during the study.	
18.	Provide details that which lot number of drug substance has been used in manufacturing of each batch of drug product. Also provide documents confirming evidence of import of each lot of drug substance used in manufacturing of these batches of drug product.	Firm submitted the copy of commercial invoice without attestation from DRAP.
19.	Provide data of stability batches properly arranged and supported by respective documents including analytical report / COA, raw data sheet and respective chromatograms separately for each time point.	Not submitted the reply of this query
20.	Provide Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted the reply of this query
21.	Provide Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).	Submitted
22.	Manufacturing procedure mentioned in BMR is different from the manufacturing procedure given in 3.2.P.3, justification is required in this regard. Calculation of dispensed weight of active along with salt and factor adjustment was not given in the BMR, please provide the calculations.	Not submitted the reply of this query

Decision of 333rd meeting of Registration Board:

Deferred for submission of reply to following shortcomings:

- Microbial enumeration test, test for specified microorganism, foreign particulate matter and Delivered Dose Uniformity test was not included in the finished product specification.
- Submit Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by Drug Product manufacturer, since you have only submitted analytical procedure by drug substance manufacturer which is also not in accordance with USP.
- Submit data for "Analytical Method Verification studies" including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer.
- Evidence of availability of MALVERN mastersizer instrument by drug product manufacturer, since it was evident from the batch analysis report that you have performed Particle size test by Malvern.
- Submitted details of accompanying device is for the multidose pre-filled dry powder inhaler instead of inhaler device required for DPI capsules.
- Provided details regarding the mass of the drug delivered from the mouthpiece under defined test conditions (i.e., flow rate, duration) are different from that of innovator drug product.

- Microbial enumeration test, test for specified microorganism, foreign particulate matter and Delivered Dose Uniformity test was not included in the submitted Pharmaceutical equivalence report.
- Manufacturing procedure submitted in section 3.2.P.2.3 and 3.2.P.3 reflect that particle size of powder is further reduced till 3µm, please provide details and evidence of availability of sheer mixer and the instrument/particle size analyzer used for the analysis of final particle size achieved.
- Provide analytical method verification report of drug product in compliance of USP monograph.
- Justify for not performing the test of microbial enumeration test and test for specified microorganism and foreign particulate matter test while batch release of drug product.
- Provide evidence of availability of Cascade impaction sampling apparatus for performance of Aerodynamic Size Distribution test and sampling apparatus used for the performance of Delivered Dose Uniformity.
- Justify for not performing the test of microbial enumeration test and test for specified microorganism and foreign particulate matter test while batch release of drug product.
- Provide evidence of availability of Cascade impaction sampling apparatus for performance of Aerodynamic Size Distribution test and sampling apparatus used for the performance of Delivered Dose Uniformity.
- Provide certificate of analysis of reference standard /working standard used for testing of the product.
- Justify for not performing the test Delivered Dose Uniformity, Aerodynamic Size Distribution test, test of microbial enumeration test and test for specified microorganism and foreign particulate matter while performing the stability study of drug product.
- Submit compliance record of HPLC software 21CFR & audit trail reports on product testing for each analysis performed during the study.
- Provide details that which lot number of drug substance has been used in manufacturing of each batch of drug product. Also provide documents confirming evidence of import of each lot of drug substance used in manufacturing of these batches of drug product.
- Provide data of stability batches properly arranged and supported by respective documents including analytical report / COA, raw data sheet and respective chromatograms separately for each time point.
- Manufacturing procedure mentioned in BMR is different from the manufacturing procedure given in 3.2.P.3, justification is required in this regard.
- Calculation of dispensed weight of active along with salt and factor adjustment was not given in the BMR, please provide the calculations.

Response of the Firm:

Sr.no.	Decision of 333rd meeting of RB	Response of the Firm
1.	Microbial enumeration test, test for specified microorganism, foreign particulate matter and Delivered Dose Uniformity test was not included in the finished product specification.	Firm submitted the revised specification of finished product.
2.	Submit Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by Drug Product manufacturer, since you have only submitted analytical procedure by drug substance manufacturer which is also not in accordance with USP.	Firm submitted the specification of both drug substance different from the specification of drug substance recommended by drug substance manufacturer.
3.	Submit data for "Analytical Method Verification studies" including specificity, accuracy and repeatability	Firm submitted an incomplete verification report of drug substance by drug product manufacturer.

	(method precision) performed by the Drug Product manufacturer.	
4.	Evidence of availability of MALVERN mastersizer instrument by drug product manufacturer, since it was evident from the batch analysis report that you have performed Particle size test by Malvern.	Reply not submitted by the firm.
5.	Submitted details of accompanying device is for the multidose pre-filled dry powder inhaler instead of inhaler device required for DPI capsules.	Reply not submitted by the firm.
6.	Microbial enumeration test, test for specified microorganism, foreign particulate matter and Delivered Dose Uniformity test was not included in the submitted Pharmaceutical equivalence report.	Firm submitted pharmaceutical equivalence report which again not contain the results of foreign particulate matter and Delivered Dose Uniformity test.
7.	Manufacturing procedure submitted in section 3.2.P.2.3 and 3.2.P.3 reflect that particle size of powder is further reduced till 3µm, please provide details and evidence of availability of sheer mixer and the instrument/particle size analyzer used for the analysis of final particle size achieved.	Reply not submitted by the firm.
8.	Provide analytical method verification report of drug product in compliance of USP monograph.	Firm submitted an incomplete verification report of drug product by drug product manufacturer.
9.	Justify for not performing the test of microbial enumeration test and test for specified microorganism and foreign particulate matter test while batch release of drug product.	Firm submitted the revised batch analysis report in which the numerical results of test of microbial enumeration test and test for specified microorganism and foreign particulate matter test is not given instead the statement of nil and complies is mentioned.
10.	Provide evidence of availability of Cascade impaction sampling apparatus for performance of Aerodynamic Size Distribution test and sampling apparatus used for the performance of Delivered Dose Uniformity.	Reply not submitted by the firm.
11.	Justify for not performing the test of microbial enumeration test and test for specified microorganism and foreign particulate matter test while batch release of drug product.	Firm submitted only the revised stability data sheets without any performance report/raw data sheets of these tests.
12.	Submit compliance record of HPLC software 21CFR & audit trail reports on product testing for each analysis performed during the study.	Submitted
13.	Provide certificate of analysis of reference standard /working standard used for testing of the product.	Submitted
14.	Provide details that which lot number of drug substance has been used in manufacturing of each batch of drug product. Also provide documents confirming evidence of import of each lot of drug substance used in	Firm submitted Form-6 attested by DRAP office without mentioning the lot number of drug substance has been used in manufacturing of each batch of drug product.

	manufacturing of these batches of drug product.	
15.	Manufacturing procedure mentioned in BMR is different from the manufacturing procedure given in 3.2.P.3, justification is required in this regard.	Submitted the same BMR which is different from the manufacturing procedure given in 3.2.P.3, justification is required in this regard.
16.	Calculation of dispensed weight of active along with salt and factor adjustment was not given in the BMR, please provide the calculations.	Reply not submitted by the firm.

Decision: Deferred for submission of following:

- **Submit data for "Analytical Method Verification studies" including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer.**
- **Evidence of availability of MALVERN mastersizer instrument by drug product manufacturer, since it was evident from the batch analysis report that you have performed Particle size test by Malvern.**
- **Submitted details of accompanying device is for the multidose pre-filled dry powder inhaler instead of inhaler device required for DPI capsules.**
- **Submit pharmaceutical equivalence report including the result of all the test mentioned in the specification of drug product.**
- **Manufacturing procedure submitted in section 3.2.P.2.3 and 3.2.P.3 reflect that particle size of powder is further reduced till 3µm, please provide details and evidence of availability of sheer mixer and the instrument/particle size analyzer used for the analysis of final particle size achieved.**
- **Provide analytical method verification report of drug product in compliance of USP monograph.**
- **Provide details that which lot number of drug substance has been used in manufacturing of each batch of drug product. Also provide documents confirming evidence of import of each lot of drug substance used in manufacturing of these batches of drug product.**
- **Manufacturing procedure mentioned in BMR is different from the manufacturing procedure given in 3.2.P.3, justification is required in this regard.**
- **Calculation of dispensed weight of active along with salt and factor adjustment was not given in the BMR, please provide the calculations.**

Remarks OF Evaluator:

Sr.no.	Section	Observations/Shortcomings	Reply of the Firm
1.	1.5.7	In section 1.5.7, you have claimed USP specification for drug product while in section 3.2.P.5.2 JP monograph for cefixime capsule has been attached which revealed that product is comply with JP specification. Clarify, how 200mg potency capsule comply dissolution acceptance criteria of JP monograph, since it is applicable for 50mg and 100mg.	Firm replied that We have to revised the specification of drug product as approved by DRAP, but firm has not submitted the fee for change of specification.

		Revised the specification of drug product along with requisite fee as per the monograph of cefixime capsule approved by DRAP dated 22nd March,2022 copy of monograph available on DRAP official website.	
2.	3.2.S.4.3	Submit data in section 3.2.S.4.3 as per the guidance document approved by Registration Board which specifies that "Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted."	Firm submitted the reply in which it is stated that "As mentioned in section 4.2 the analytical methods applied in course of release testing of Cefixime are based on the monograph of Cefixime of USP 42. These methods are followed without any deviation".
3.	3.2. S.4.4	Submit data in section 3.2.S.4.4 as per the guidance document approved by Registration Board which specifies that "Provide results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (CoA) of the same batch from Drug Substance /Active Pharmaceutical Ingredient manufacture, since the submitted COA of three batches of API are of different batches than that used in the manufacturing of stability batches.	Firm submitted the COA of three batches of API.
4.	3.2.S.5	Submit COA of reference standard actually used in the analysis of drug substance in section 3.2. S.5.	Firm has submitted the requisite information.
5.	3.2.S.7	The manufacturing date of API batches was feb,2016 while the approval of cefixime API was granted on 24th July, 2018 by DRAP as evident from the submitted approval letter. Clarify the manufacturing of cefixime API prior grant of approval from DRAP.	In the reply Firm submitted the stability data of different batches of drug substance which were manufactured in October,2018 and having batch no. (CFM1602001, CFM1602002, CFM1602003)
6.	3.2.P.2.2.1	Conclusion of comparative dissolution profile of cefixime capsule specified the f2 values of paracetamol and caffeine, clarification is required in this regard.	Firm in their reply stated that "it was typographic error and rectified," but not submitted the correct CDP report.
7.	3.2.P.5.1	Scientific justification is required for using different assay method from that specified in JP monograph with reference to the	Firm replied that they have now switches over to the monograph of cefixime capsule approved by DRAP. However, the specifications of drug

		chromatographic condition and preparation of standard and sample solutions. According to JP monograph the assay limit should be not less than 90.0% and not more than 105.0% of the labelled potency of cefixime, justify, for keeping the wider acceptance criteria for assay of drug product than JP specifications i.e. 90% to 110%.	product given in the reply was not comply with the said monograph of cefixime capsule
8.	3.2.P.5.2	Firm again submitted the copy of monograph of JP instead of submitting the analytical procedure in accordance with DRAP approved monograph of cefixime capsule.	
9.	3.2.P.5.3	Analytical method validation report submitted in the reply was also not complying the claim pharmacopeial reference of drug product i.e. DRAP's approved monograph of cefixime capsule.	
10.	3.2.P.5.4	Firm submitted the batch analysis report which evident that the specifications of quality test were not in accordance claimed pharmacopeial. Further the results of dissolution test were also included in batch analysis report.	
11.	3.2.P.8	Provide details that which lot number of drug substance has been used in manufacturing of each batch of drug product. Also provide documents confirming evidence of import of each lot of drug substance used in manufacturing of these batches of drug product.	Firm has not submitted the requisite information.
12.	3.2P.8	Provide data of stability batches properly arranged and supported by respective documents including analytical report / COA, raw data sheet and respective chromatograms separately for each time point.	Firm submitted the supportive documents of different stability batches of drug product. Stability summary data sheets were of batch no. (TRA-001,TRA-002,TRA-003),while supportive documents (chromatogram, raw data sheets& COA) were of TRC-001,TRC-002,TRC-003.
13.	3.2.p.8	Documents for the procurement of API with approval from DRAP (in case of import). Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2. P.8.3. Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has not submitted these documents.

Decision of 321st meeting of Registration Board:
Deferred for submission of following:

- Fee of Rs. 7,500 for revision of specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.
- Analytical method verification report of drug substance performed by drug product manufacturer.
- Revised CDP report of drug product, performed against the innovator product.

- Complete analytical procedure used for routine testing of applied drug product in section 3.2. P.5.2 according to the monograph approved by DRAP.
- Analytical method validation report of assay testing of drug product.
- Batch analysis report of all three trial batches of drug, in which all the quality test should be included that are the part of approved monograph of cefixime capsule.
- Clarification regarding the trial batches which were actually manufactured for the stability study of applied product and provide the supporting document of same batches.
- Details that which lot number of drug substance has been used in manufacturing of each batch of drug product. Also provide documents confirming evidence of import of each lot of drug substance used in manufacturing of these batches of drug product.
- Copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2. P.8.3.
- Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.

Response of the Firm:

Sr.no.	Decision of Registration Board	Response of the Firm
1.	Fee of Rs. 7,500 for revision of specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.	Not Submitted
2.	Analytical method verification report of drug substance performed by drug product manufacturer.	Firm submitted the Analytical method verification report of drug substance performed by drug product manufacturer.
3.	Revised CDP report of drug product, performed against the innovator product.	Firm submitted the CDP report performed against the Cefim capsule 200mg of M/s. Hilton Pharma.
4.	Complete analytical procedure used for routine testing of applied drug product in section 3.2. P.5.2 according to the monograph approved by DRAP.	Submitted in accordance with the monograph approved by DRAP.
5.	Analytical method validation report of assay testing of drug product.	Firm submitted Analytical method validation report of assay testing of drug product.
6.	Batch analysis report of all three trial batches of drug, in which all the quality test should be included that are the part of approved monograph of cefixime capsule.	Firm submitted the batch analysis report of trial batches no. TRC-001, TRC-002, TRC-003.
7.	Clarification regarding the trial batches which were actually manufactured for the stability study of applied product and provide the supporting document of same batches.	Firm submitted the stability data sheet and chromatograms along raw sheets of trial batches TRC-001, TRC-002, TRC-003. However the audit trial reports also reflects the data of TRS-004,TRS-005 AND TRS-006 and submitted audit trail reports was not in coherence with the chromatograms.
8.	Details that which lot number of drug substance has been used in manufacturing of each batch of drug product. Also provide documents confirming evidence of import of each lot of drug substance used in	Firm submitted the sale tax invoice document of lot number CFM1602001,CFM1602002 AND CFM1602003.

	manufacturing of these batches of drug product.	
9.	Copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2. P.8.3.	Submitted
10.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Submitted.

Decision of 333rd meeting of Registration Board:
Deferred for clarification regarding the trial batches which were actually manufactured for the stability study of applied product and provide the supporting document of same batches, since the submitted chromatograms of all three trial batches are not aligned with the audit trail reports.

Response of the Firm:
Firm replied that the "stability batches of cefask 200mg capsules are TRC-001, TRC-002, TRC-003 and the trial batches of Cefask 200mg/5ml suspension are TRS-004, TRS-005, TRS-006. There is a mistake done by the analyst at "0" Month testing. He run both Suspension and capsule stability batches on same method that's why you are seeing both suspension and capsule Trial together in one Audit trail. Later on it's been corrected on "3rd" Month Testing "6th" Month Testing and so on.
Correct Audit trail report along with aligned chromatograms are submitted by the firm.

Decision: Approved. Firm shall submit the fee of Rs. 7,500 for correction/pre-approval change/ in product specifications, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021, before issuance of registration letter.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Remarks OF Evaluator:

Sr.no.	Section	Observations/Shortcomings	Reply of the Firm
1.	3.2.S.4.3	Submit data in section 3.2.S.4.3 as per the guidance document approved by Registration Board which specifies that "Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted."	Firm submitted the reply in which it is stated that "As mentioned in section 1.4.2 the analytical methods applied in course of release testing of Cefixime are based on the monograph of Cefixime of USP 42. These methods are followed without any deviation".
2.	3.2. S.4.4	Submit data in section 3.2.S.4.4 as per the guidance document	Firm submitted the COA of three batches of API.

		approved by Registration Board which specifies that "Provide results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (CoA) of the same batch from Drug Substance /Active Pharmaceutical Ingredient manufacture, since the submitted COA of three batches of API are of different batches than that used in the manufacturing of stability batches.	
3.	3.2.S.5	Submit COA of reference standard actually used in the analysis of drug substance in section 3.2. S.5.	Firm has submitted the requisite information.
4.	3.2.S.7	The manufacturing date of API batches was feb,2016 while the approval of cefixime API was granted on 24th July, 2018 by DRAP as evident from the submitted approval letter. Clarify the manufacturing of cefixime API prior grant of approval from DRAP.	In the reply Firm submitted the stability data of different batches of drug substance which were manufactured in October,2018 and having batch no. (CFM1602001, CFM1602002, CFM1602003)
5.	3.2. P.3.1	The bottle fill weight mentioned in section 3.2.P.3.1 is 1266mg while the objective weight per bottle mentioned in process validation report is 6.56mg. Justification is required in this regard.	Firm clarified that 1266mg of suspension powder filled per bottle.
6.	3.2. P.5.1	Justify why weight variation test, test of uniformity of dosage unit and deliverable volume were not included in the specification of drug product.	Firm submitted the specification of drug product in which again not including the weight variation test, test of uniformity of dosage unit and deliverable volume test neither submitted justification.
7.	3.2. P.5.2	Provide complete analytical procedure used for routine testing of drug product, submitting the copy of USP monograph did not fulfil the requirement of section 3.2. P.5.2.	Firm has submitted the copy of USP monograph of cefixime drug substance in section 3.2.P.5.2 instead detailed analytical procedure of cefixime suspension in compliance of USP monograph of cefixime for oral suspension.
8.	3.2. P.5.3	Following observations have been found in the analytical method verification report, clarification is required in this regard: Assay method which has been verified is not in line with USP monograph, justify how the drug product comply with USP specification. How the verification report of cefixime capsule be applied on	Firm did not submit any reply in response of this query.

		cefixime suspension, since the submitted analytical method verification report is of cefixime capsule.	
9.	3.2.P.5.4	Batch analysis report in section 3.2. P.5.4. reflect that filled weight was 65.6 mg ±5% while the COA of drug product on page 263 specified that average weight should be 17.5g±2.5%, justification is required in this regard.	Firm submitted the batch analysis report of three trail batches in which the weight of filled powder varied between 211mg to 213mg, while the average filled weight of powder per bottle in accordance with data given in section 3.2.P.3.1.should be 1266mg.
10.	3.2.P.8	Clarification is required either the dissolution testing is included in the specification of drug product, since the result of dissolution testing was included in the stability data sheets of all three trial batches. Justify for changing the assay limits in the long-term stability data of drug product.	Firm has not submitted any clarification/justification regarding these queries and submitted the new stability data sheet along with supportive documents of trail batches (TRS-004, TRS-005, TRS-006).
11.	3.2.P.8	Provide data of stability batches properly arranged and supported by respective documents including analytical report / COA, raw data sheet and respective chromatograms separately for each time point. Provide compliance Record of HPLC software 21CFR & audit trail reports on product testing. Provide Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).	Firm submitted the requisite documents.
12.	3.2.P.8	Documents for the procurement of API with approval from DRAP (in case of import). Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2. P.8.3. Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has not submitted these documents.

Decision of 321st meeting of Registration Board:

Deferred for submission of following:

- Fee of Rs. 7,500 for revision of specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.
- Analytical method verification report of drug substance performed by drug product manufacturer.
- Revised CDP report of drug product, performed against the innovator product.

- Complete analytical procedure used for routine testing of applied drug product in section 3.2. P.5.2 according to the USP monograph.
- Analytical method verification report of assay testing of drug product according to the USP monograph of cefixime suspension.
- Clarification regarding the disparity observed in the bottle fill weight both in section 3.2. P.3.1. and 3.2. P.5.4.
- Clarification regarding the trial batches which were actually manufactured for the stability study of applied product and provide the supporting document of same trial batches.
- Details that which lot number of drug substance has been used in manufacturing of each batch of drug product. Also provide documents confirming evidence of import of each lot of drug substance used in manufacturing of these batches of drug product.
- Copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2. P.8.3.
- Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.

Sr.no.	Decision of Registration Board	Response of the Firm
1.	Fee of Rs. 7,500 for revision of specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.	Not Submitted
2.	Analytical method verification report of drug substance performed by drug product manufacturer.	Firm submitted the Analytical method verification report of drug substance performed by drug product manufacturer.
3.	Revised CDP report of drug product, performed against the innovator product.	Firm submitted the CDP report performed against the product cefspan suspension 200mg/5ml of M/s. Barrett Hodgson.
4.	Complete analytical procedure used for routine testing of applied drug product in section 3.2. P.5.2 according to the monograph approved by DRAP.	Submitted in accordance with the monograph approved by DRAP.
5.	Analytical method validation report of assay testing of drug product.	Firm submitted Analytical method validation report of assay testing of drug product.
6.	Clarification regarding the disparity observed in the bottle fill weight both in section 3.2. P.3.1. and 3.2. P.5.4.	Not submitted the reply of this query.
7.	Batch analysis report of all three trial batches of drug, in which all the quality test should be included that are the part of approved monograph of cefixime capsule.	Firm submitted the batch analysis report of trial batches no. TRS-004, TRS-005, TRS-006.
8.	Clarification regarding the trial batches which were actually manufactured for the stability study of applied product and provide the supporting document of same batches.	Firm submitted the stability data sheet and chromatograms along raw sheets of trial batches TRS-004, TRS-005, TRS-006. However the audit trial reports also reflects the data of TRC-001,TRS-002 AND TRC-003 and submitted audit trail reports was not in coherence with the chromatograms.
9.	Details that which lot number of drug substance has been used in manufacturing of each batch of drug product. Also provide	Firm submitted the sale tax invoice document of lot number CFM1602001,CFM1602002 AND CFM1602003.

	documents confirming evidence of import of each lot of drug substance used in manufacturing of these batches of drug product.	
10.	Copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2. P.8.3.	Submitted
11.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Submitted.

Decision of 333rd meeting of Registration Board:
Deferred for clarification regarding the trial batches which were actually manufactured for the stability study of applied product and provide the supporting document of same batches, since the submitted chromatograms of all three trial batches are not aligned with the audit trail reports.

Response of the Firm:
Firm replied that the "stability batches of cefask 200mg capsules are TRC-001, TRC-002, TRC-003 and the trial batches of Cefask 200mg/5ml suspension are TRS-004, TRS-005, TRS-006. There is a mistake done by the analyst at "0" Month testing. He run both Suspension and capsule stability batches on same method that's why you are seeing both suspension and capsule Trial together in one Audit trail. Later on it's been corrected on "3rd" Month Testing "6th" Month Testing and so on.
Correct Audit trail report along with aligned chromatograms are submitted by the firm.

Decision: Approved. Firm shall submit the fee of Rs. 7,500 for correction/pre-approval change/ in product specifications, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021, before issuance of registration letter.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Date of Initiation	09-2020	09-2020	09-2020
No. of Batches	03		

Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate issued by DCA valid till 17/01/2024.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Copy of letter No.759/2020DRAP-AD (I&E) dated 13/01/2020 is submitted wherein the permission to import Nebivolol HCl for the purpose of test/analysis and stability studies is granted.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted
Remarks of Evaluator:		

S.no.	Sections	Observations/Deficiencies/ Short-comings
1.	3.2.S.4.2	Submit data of verification of analytical procedure of drug substance in section 3.2.S.4.3 as per the guidance document approved by Registration Board which specifies that "Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted". Since you have only submitted the requisite information provided by drug substance manufacturer.
2.	3.2.S.4.4	Justify how you have calculate the potency of nebivolol without HCl as mentioned in the COA of drug substance comparing the COA of drug substance by drug substance manufacturer calculated the assay on anhydrous basis only.
3.	3.2.P.2.2.1	Justify for not performing the test of content uniformity by HPLC and water content test while establishing the pharmaceutical equivalence aginst the reference product, since these test are included in the specification of innovator brand of USFDA. Justify for not performing the pharmaceutical equivalence and comparative dissolution against the innovator brand/brand leador approved in Pakistan.
4.	3.2.P.5.1	Justify for not including the test of water content in the release specification of drug product, since these test are included in the specification of innovator brand. Clarification is required that in assay either you have quantified the nebivolol or nebivolol HCl, since the calculated % is of nebivolol HCl, while the main peak in the chromatogram represent the nebivolol without HCl. Sample preparation for assay is more general rather than specific, without the clarity that transfer quantity of the sample equivalent to 50mg represent either the quantity of nebivolol or nebivolol HCl. Justify for adapting the acceptance criteria of dissolution NLT 80% within 45 minutes comparing the results of CDP in 0.01N HCl medium which was more than 80% within 15minutes and the acceptance criteria of innovator brand approved in USFDA.
5.	3.2.R.1.1	Justify for taking the strength of tablet with HCl factor for calculation of dispensed quantity of powder as revealed from the batch manufacturing record since you have taken the potency of drug substance without HCl on as is basis.

Decision of 324th meeting of Registration Board:
Decision: Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.

Response of the Firm:

S.no.	Sections	Observations/Deficiencies/ Short-comings	Response of the Firm
1.	3.2.S.4.2	Submit data of verification of analytical procedure of drug substance in section 3.2.S.4.3 as per the guidance document approved by Registration Board which specifies that "Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted". Since you have only submitted the	Firm submitted the analytical method verification report of drug substance performed by drug product manufacturer. However, the official monograph of drug substance is present in EP 11.0 and the applicant imported in-house complied drug substance.

		requisite information provided by drug substance manufacturer.	
2.	3.2.S.4.4	Justify how you have calculate the potency of nebivolol without HCl as mentioned in the COA of drug substance comparing the COA of drug substance by drug substance manufacturer calculated the assay on anhydrous basis only.	Firm replied it is an error which was rectified and correct COA of drug substance by drug product manufacturer has submitted.
3.	3.2.P.2.2.1	Justify for not performing the test of content uniformity by HPLC and water content test while establishing the pharmaceutical equivalence against the reference product, since these test are included in the specification of innovator brand of USFDA.	Firm submitted the analytical procedure instead of pharmaceutical equivalence report including the test of content uniformity by HPLC and water content test.
4.	3.2.P.5.1	Justify for not including the test of water content in the release specification of drug product, since these test are included in the specification of innovator brand.	Firm submitted the revised analytical procedure of drug along with specification.
5.	3.2.P.5.1	Sample preparation for assay is more general rather than specific, without the clarity that transfer quantity of the sample equivalent to 50mg represent either the quantity of nebivolol or nebivolol HCl.	Firm revised the sample preparation procedure in which 50mg is the quantity of nebivolol.
6.	3.2.P.5.1	Clarification is required that in assay either you have quantified the nebivolol or nebivolol HCl, since the calculated % is of nebivolol HCl, while the main peak in the chromatogram represent the nebivolol without HCl.	Firm replied that We have used Nebivolol HCl raw material in production of our trial batches as per Innovator's specifications not Nebivolol base as it is evident from our COA of raw material attached here but since international and our claim is Nebivolol as HCl (Nebivolol base) that's why we had used only Nebivolol in our chromatograms. The peak in chromatograms is of Nebivolol HCl but to justify our claim in product we write only Nebivolol on it which is also evident from the assay of standard which we use as 90.53%. The pictures of reference products to justify our claim are attached herewith along with some supporting data.
7.	3.2.P.5.2	Justify for adapting the acceptance criteria of dissolution NLT 80% within 45 minutes comparing the results of CDP in 0.01N HCl medium which was more than 80% within 15minutes and the acceptance criteria of innovator brand approved in USFDA.	Firm claimed that they submitted the updated documents but the submitted analytical procedure again specified the same acceptance i.e. criteria NLT 80% within 45 minutes.
8.	3.2.R.1.1	Justify for taking the strength of tablet with HCl factor for calculation of dispensed quantity of powder as revealed from the batch manufacturing record since you have taken the potency of drug substance without HCl on as is basis.	Firm replied that In trial BMR we have taken the potency of drug substance with HCl on as is basis, the potency given in COA is on as is basis with HCl.

Decision of 329th meeting of Registration Board:
Deferred for submission of following shortcomings:
Submit the revised acceptance criteria of dissolution in line with innovator product along with performance report of dissolution testing of stability batches in accordance with the revised acceptance criteria.
Pharmaceutical equivalence report including all the quality test as per the revised specification of finished product.

Response of the Firm:
Submit the revised acceptance criteria of dissolution in line with innovator product along with performance report of dissolution testing of stability batches in accordance with the revised acceptance criteria.
Firm submitted the revised dissolution acceptance criteria in line with innovator product along with revised CDP report but did not submit the performance report of dissolution testing of stability batches in accordance with the revised acceptance criteria.
Pharmaceutical equivalence report including all the quality test as per the revised specification of finished product.
Firm did not submit pharmaceutical equivalence report including all the quality test as per the revised specification of finished product.

Decision: Deferred for submission of following:

- **Submit performance report of dissolution testing of stability batches in accordance with the revised acceptance criteria.**
- **Submit pharmaceutical equivalence report including all the quality test as per the revised specification of finished product.**

	Details of fee submitted	PKR 30,000/-: dated 24/11/2021
	The proposed proprietary name / brand name	Nevol 5mg Tablet
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each tablet contains: Nebivolol HCl equivalent to Nebivolol…..5mg
	Pharmaceutical form of applied drug	White colored, round shaped, biconvex uncoated tablets with both sides plain.
	Pharmacotherapeutic Group of (API)	Beta blocking agent, selective
	Reference to Finished product specifications	Manufacturer's Specification
	Proposed Pack size	1×10's , 3x 10's and 2x 7's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Bystolic tablets, Allergen, USA
	For generic drugs (me-too status)	Nabil 5mg Tablet by M/s Getz Pharma, Reg. No. 061345
	GMP status of the Finished product manufacturer	Last GMP was granted on 09/06/2020 GMP is in Renewal Process

	Name and address of API manufacturer.	Name: Jiangsu Weiqida Pharmaceutical Co., Ltd. Old Name: Shanghai Shyndec Pharmaceutical (Haimen) Co., Ltd Address: No.1, Linjiang Avenue, Nantong, China
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of Nebivolol HCl is not present in Pharmacopeia. The firm has submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, Test for Impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 12 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: (NEB5-TR002, NEB5-TR003, NEB5-TR004)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand leader that is Nebil 5mg tablet by Getz Pharma (Pvt) Ltd. by performing quality tests (Identification, Assay, Dissolution, Uniformity of dosage form). CDP has been performed against the same brand that is Nebil 5mg tablet by Getz Pharma (Pvt) Ltd.in Acid media (pH 1.2), pH 4.5 & Phosphate Buffer (pH 6.8). The values for f1 and f2 are in the acceptable range.
	Analytical method validation/verification of product	Method validation studies have submitted including Specificity, linearity, accuracy, precision (repeatability and Intermediate), Limit of Detection, Limit of Quantification, Robustness.

Remarks of Evaluator:

S.n	Sections	Observations/Deficiencies/ Short-comings
1.	3.2.S.4.2	Submit data of verification of analytical procedure of drug substance in section 3.2.S.4.3 as per the guidance document approved by Registration Board which specifies that "Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted". Since you have only submitted the requisite information provided by drug substance manufacturer.
2.	3.2.S.4.4	Justify how you have calculate the potency of nebivolol without HCl as mentioned in the COA of drug substance comparing the COA of drug substance by drug substance manufacturer calculated the assay on anhydrous basis only.
3.	3.2.P.2.2.1	Justify for not performing the test of content uniformity by HPLC and water content test while establishing the pharmaceutical equivalence against the reference product, since these test are included in the specification of innovator brand of USFDA. Justify for not performing the pharmaceutical equivalence and comparative dissolution against the innovator brand/brand leador approved in Pakistan.
4.	3.2.P.5.1	Justify for not including the test of water conent in the release specification of drug product, since these test are included in the specification of innovator brand.

		Clarification is required that in assay either you have quantified the nebivolol or nebivolol HCl, since the calculated % is of nebivolol HCl, while the main peak in the chromatogram represent the nebivolol without HCl. Sample preparation for assay is more general rather than specific, without the clarity that transfer quantity of the sample equivalent to 50mg represent either the quantity of nebivolol or nebivolol HCl. Justify for adapting the acceptance criteria of dissolution NLT 80% within 45 minutes comparing the results of CDP in 0.01N HCl medium which was more than 80% within 15minutes and the acceptance criteria of innovator brand approved in USFDA.
5.	3.2.R.1.1	Justify for taking the strength of tablet with HCl factor for calculation of dispensed quantity of powder as revealed from the batch manufacturing record since you have taken the potency of drug substance without HCl on as is basis.

Decision of 324th meeting of Registration Board:

Decision: Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.

Response of the Firm:

S.no.	Sections	Observations/Deficiencies/ Short-comings	Response of the Firm
1.	3.2.S.4.2	Submit data of verification of analytical procedure of drug substance in section 3.2.S.4.3 as per the guidance document approved by Registration Board which specifies that "Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted". Since you have only submitted the requisite information provided by drug substance manufacturer.	Firm submitted the analytical method verification report of drug substance performed by drug product manufacturer. However, the official monograph of drug substance is present in EP 11.0 and the applicant imported in-house complied drug substance.
2.	3.2.S.4.4	Justify how you have calculate the potency of nebivolol without HCl as mentioned in the COA of drug substance comparing the COA of drug substance by drug substance manufacturer calculated the assay on anhydrous basis only.	Firm replied it is an error which was rectified and correct COA of drug substance by drug product manufacturer has submitted.
3.	3.2.P.2.2.1	Justify for not performing the test of content uniformity by HPLC and water content test while establishing the pharmaceutical equivalence against the reference product, since these test are included in the specification of innovator brand of USFDA.	Firm submitted the analytical procedure instead of pharmaceutical equivalence report including the test of content uniformity by HPLC and water content test.
4.	3.2.P.5.1	Justify for not including the test of water content in the release specification of drug product, since these test are included in the specification of innovator brand.	Firm submitted the revised analytical procedure of drug along with specification.

5.	3.2.P.5.1	Sample preparation for assay is more general rather than specific, without the clarity that transfer quantity of the sample equivalent to 50mg represent either the quantity of nebivolol or nebivolol HCl.	Firm revised the sample preparation procedure in which 50mg is the quantity of nebivolol.
6.	3.2.P.5.1	Clarification is required that in assay either you have quantified the nebivolol or nebivolol HCl, since the calculated % is of nebivolol HCl, while the main peak in the chromatogram represent the nebivolol without HCl.	Firm replied that We have used Nebivolol HCl raw material in production of our trial batches as per Innovator's specifications not Nebivolol base as it is evident from our COA of raw material attached here but since international and our claim is Nebivolol as HCl (Nebivolol base) that's why we had used only Nebivolol in our chromatograms. The peak in chromatograms is of Nebivolol HCl but to justify our claim in product we write only Nebivolol on it which is also evident from the assay of standard which we use as 90.53%. The pictures of reference products to justify our claim are attached herewith along with some supporting data.
7.	3.2.P.5.2	Justify for adapting the acceptance criteria of dissolution NLT 80% within 45 minutes comparing the results of CDP in 0.01N HCl medium which was more than 80% within 15minutes and the acceptance criteria of innovator brand approved in USFDA.	Firm claimed that they submitted the updated documents but the submitted analytical procedure again specified the same acceptance i.e. criteria NLT 80% within 45 minutes.
8.	3.2.R.1.1	Justify for taking the strength of tablet with HCl factor for calculation of dispensed quantity of powder as revealed from the batch manufacturing record since you have taken the potency of drug substance without HCl on as is basis.	Firm replied that In trial BMR we have taken the potency of drug substance with HCl on as is basis, the potency given in COA is on as is basis with HCl.

Decision of 329th meeting of Registration Board:

Deferred for submission of following shortcomings:

Submit the revised acceptance criteria of dissolution in line with innovator product along with performance report of dissolution testing of stability batches in accordance with the revised acceptance criteria.

Pharmaceutical equivalence report including all the quality test as per the revised specification of finished product.

Response of the Firm:

Submit the revised acceptance criteria of dissolution in line with innovator product along with performance report of dissolution testing of stability batches in accordance with the revised acceptance criteria.

Firm submitted the revised dissolution acceptance criteria in line with innovator product along with revised CDP report but did not submit the performance report of dissolution testing of stability batches in accordance with the revised acceptance criteria.

Pharmaceutical equivalence report including all the quality test as per the revised specification of finished product.

Firm did not submit pharmaceutical equivalence report including all the quality test as per the revised specification of finished product.

Decision: Deferred for submission of following:

- **Submit performance report of dissolution testing of stability batches in accordance with the revised acceptance criteria.**

• **Submit pharmaceutical equivalence report including all the quality test as per the revised specification of finished product.**

7.	3.2.P.5.2	Justify for adapting the acceptance criteria of dissolution NLT 80%	Firm claimed that they submitted the updated documents but the submitted analytical

		within 45 minutes comparing the results of CDP in 0.01N HCl medium which was more than 80% within 15minutes and the acceptance criteria of innovator brand approved in USFDA.	procedure again specified the same acceptance i.e. criteria NLT 80% within 45 minutes.
8.	3.2.R.1.1	Justify for taking the strength of tablet with HCl factor for calculation of dispensed quantity of powder as revealed from the batch manufacturing record since you have taken the potency of drug substance without HCl on as is basis.	Firm replied that In trial BMR we have taken the potency of drug substance with HCl on as is basis, the potency given in COA is on as is basis with HCl.

Decision of 329th meeting of Registration Board:

Deferred for submission of following shortcomings:

Submit the revised acceptance criteria of dissolution in line with innovator product along with performance report of dissolution testing of stability batches in accordance with the revised acceptance criteria.

Pharmaceutical equivalence report including all the quality test as per the revised specification of finished product.

Response of the Firm:

Submit the revised acceptance criteria of dissolution in line with innovator product along with performance report of dissolution testing of stability batches in accordance with the revised acceptance criteria.

Firm submitted the revised dissolution acceptance criteria in line with innovator product along with revised CDP report but did not submit the performance report of dissolution testing of stability batches in accordance with the revised acceptance criteria.

Pharmaceutical equivalence report including all the quality test as per the revised specification of finished product.

Firm did not submit pharmaceutical equivalence report including all the quality test as per the revised specification of finished product.

Decision: Deferred for submission of following:

- **Submit performance report of dissolution testing of stability batches in accordance with the revised acceptance criteria.**
- **Submit pharmaceutical equivalence report including all the quality test as per the revised specification of finished product.**

	Pharmacotherapeutic Group of (API)	NSAIDS
	Pharmaceutical form of applied drug	White to off white sustained release pellets filled in hard gelatin capsules
	Reference to Finished product specifications	BP (Diclofenac Prolonged-release Capsules Diclofenac Prolonged-release Capsules contain Diclofenac Sodium. They are formulated so that the medicament is released over a period of several hours.)
	Proposed Pack size	As per SRO
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Diclofenac sodium 100mg Modified Release capsule (Each capsule contains diclofenac sodium 100mg in a modified release formulation (25mg in the form of enteric coated release pellets and 75mg in the form of sustained release pellets) Glenwood GmbH Pharmazeutische Germany HPRA approved
	For generic drugs (me-too status)	Phologen SR 100mg Capsule (Reg.no.009129) of M/s. Brookes Pharma, Karachi
	Name and address of API manufacturer.	Vision Pharmaceuticals (Pvt.) Ltd. Plot # 22-23, Industrial Triangle, Kahuta Road, Islamabad-Pakistan.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 48 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of

		excipients, control of drug product, specifications, analytical procedures, verification of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted pharmaceutical equivalence & CDP studies of their product against the Phologen SR 100mg Capsule (Reg.no.009129) of M/s. Brookes Pharma, Karachi
	Analytical method validation/verification of product	Firm has submitted analytical method verification study reports for drug substance as well as drug product.

STABILITY STUDY DATA

Manufacturing Date	08-2022	08-2022	08-2022
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	N/A
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP Certificate (No. F.3-26/2019-Addl.Dir.(QA & LT1)-56) dated 22-08-2022 issued by Drug Regulatory Authority of Pakistan. The certificate specifies that the firm is operating at satisfactory level of GMP compliance.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	--
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record for product testing.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator:

S.no.	Section	Observations/Deficiencies/ Short-comings

1.	1.5.2	Submit the correct label claim of applied product in accordance with the label claim of reference product along with the requisite fee.
2.	3.2.S.4.2	Justify for including the Acid resistance stage in the dissolution test of sustained release pellets by the drug substance manufacturer. Submit specification and detailed analytical procedure of drug substance by drug product manufacturer.
3.	3.2.S.4.3	Submit analytical method verification report of drug substance performed by drug product manufacturer.
4.	3.2.S.4.4	Justify for specifying the results of acid resistance stage in the dissolution test of sustained release pellets. COA of drug substance contain note "pellets will remain intact, during buffer stage due to sugar free nature", clarification is required regarding this statement for the sustained release pellets.
5.	3.2.P.1	Please explain the role of empty gelatin capsule in the potency of finished drug product, since you have mentioned in the master formulation that the quantity of diclofenac sodium SR pellets used 80.40% and 19.60% of empty gelatin shell has taken to make 100%.
6.	3.2.P.5.2	Submit detailed procedure how you have performed uniformity of dosage unit test while quality analysis of drug product. Justify for including the Acid resistance stage in the dissolution test of sustained release pellets by the drug product manufacturer.
7.	3.2.P.6	Justify of using USP complied working standard of diclofenac sodium for the analysis of BP complied drug product and how the drug substance manufacturer provide USP complied working standard when they are supplied in house specified diclofenac sodium pellets.
8.	3.2.P.8	According to the analytical method verification report absorbance value of sample and standard solution was around 0.3 while the obtained absorbance value during assay performance of stability batches were around 0.6, clarify the variation observed in the absorbance value obtained.
9.	2.3.R.1.1	Provide detailed calculation of weight of pellet filled per capsule considering the potency of diclofenac pellets.

The label claim / formulation of RRA (HPRA) approved formulation is as follows: Difene 100 mg Dual Release Capsule/modified release capsule

Each capsule contains:

Diclofenac sodium 100mg in a modified release formulation (25mg in the form of enteric coated release pellets and 75mg in the form of sustained release pellets)

While firm claimed to comply BP specification. However, in BP available formulation is "Diclofenac Sustained Release capsule" Hence clarification regarding applied specification is required.

 The above mentioned RRA approved formulation contains both type of pellets 25mg in the form of enteric coated release pellets and 75mg in the form of sustained release pellets) while manufacturing process flow diagram provided by firm revealed that "Neutral pellets /drug pellets prepared by extrusion Spheronization loaded into Fluid bed Bottom/Wruster coater drug layering is done by using solution or suspension that is sprayed by peristaltic pump with hot air stream generating dry and highly spherical particles After Drug lavering Seal coating. Delayed Release/Entenc coating done through this technique Similarly Sustained Release Modified release/Extended release and immediate release Coating generally employed to improve the dissolution rates and hence improve the bioavailability of poorly soluble drugs Screening is done on the final product, such as particle size and size distribution, other physical parameter also checked such as bulk density, moisture content."

Hence it is evident that contrary to RRA approved formulation whole proportion of Drug was formulated to be sustained release and delayed release (by way of enteric coating) simultaneously. Hence applied formulation need to be justified in light of RRA approved formulation. Furthermore, following drug release pattern need to be justified accordingly:

- Acid medium (0.1 M HCl)
- NMT 10% 0.1 M HCl after 120 min
- Buffer medium (pH 6.8)
- 30-65% of labelled amount of Diclofenac sodium pellets should be released after 3 hours
- NLT 70% of labelled amount of Diclofenac sodium pellets should be released after 8 hours

Decision of 333rd meeting of Registration Board:
Registration Board deferred the case for submission of reply to the above cited shortcomings

Response of the Firm:

S.no.	Observations/Deficiencies/ Short-comings	Response of the Firm
1.	Submit the correct label claim of applied product in accordance with the label claim of reference product along with the requisite fee.	Firm submitted the amended label claim without the requisite fee: Each capsule contains: Diclofenac Sodium SR pellets equivalent to Diclofenac sodium…100mg
2.	Justify for including the Acid resistance stage in the dissolution test of sustained release pellets by the drug substance manufacturer.	Firm in their reply stated that "Either sustained release pellets or Delayed release pellets, these have to pass from acid medium, its interval is about from 30 minutes to 2 hours, to review pellets behaviour its dissolution in acid medium is verified.
3.	Submit specification and detailed analytical procedure of drug substance by drug product manufacturer.	Submitted
4.	Submit analytical method verification report of drug substance performed by drug product manufacturer.	Submitted
5.	Justify for specifying the results of acid resistance stage in the dissolution test of sustained release pellets. COA of drug substance contain note "pellets will remain intact, during buffer stage due to sugar free nature", clarification is required regarding this statement for the sustained release pellets.	Firm replied that "Either sustained release pellets or Delayed release pellets, these have to pass from acid medium, its interval is about from 30 minutes to 2 hours, to review pellets behaviour its dissolution in acid medium is verified".
6.	Please explain the role of empty gelatin capsule in the potency of finished drug product, since you have mentioned in the master formulation that the quantity of diclofenac sodium SR pellets used 80.40% and 19.60% of empty gelatin shell has taken to make 100%.	Firm submitted the amended master formulation table with the claim that there is no role of hard gelatin capsule in potency adjustment.
7.	Submit detailed procedure how you have performed uniformity of dosage unit test while quality analysis of drug product.	In their reply firm submitted the content of general chapter of USP ⟨905⟩ UNIFORMITY OF DOSAGE UNIT instead of submitting the actual procedure of uniformity of dosage unit test adopted by the firm.
8.	Justify for including the Acid resistance stage in the dissolution test of sustained release pellets by the drug product manufacturer.	Firm replied that BP monograph for Diclofenac SR pellets states that follow the manufacturer specs. Our source for Diclofenac SR pellets is vision pharma, they include acid resistance stage in dissolution test, so, we follow them. However, the BP monograph of Diclofenac Prolonged-release Capsules stated that "Diclofenac prolonged release capsule from different manufacturer, whilst complying with the requirements of the monograph, are not interchangeable unless otherwise justified and authorized.
9.	Justify of using USP complied working standard of diclofenac sodium for the analysis of BP complied drug product and how the drug substance manufacturer provide USP complied working standard	In their reply firm stated that the quality parameters of DICLOFENAC SODIUM in both BP and USP are same so they used USP reference standard for testing of BP complied product.

	when they are supplied in house specified diclofenac sodium pellets.	
10.	According to the analytical method verification report absorbance value of sample and standard solution was around 0.3 while the obtained absorbance value during assay performance of stability batches were around 0.6, clarify the variation observed in the absorbance value obtained.	Firm replied that final concentration was not same, double final concentration double absorbance found. They performed the method verification with 20µg/ml. However, the reply is in contradiction to the observed value of absorbance i.e. the obtained absorbance value in verification report was around 0.3 while the obtained absorbance value during assay performance of stability batches were around 0.6. Further, the assay procedure adopted for verification studies is also not in accordance with BP monograph.
11.	Provide detailed calculation of weight of pellet filled per capsule considering the potency of diclofenac pellets.	Submitted

Decision: Deferred for submission of following:

- **Submit the reference of applied formulation either the drug product complied BP specification (Diclofenac Prolonged-release Capsules) or the composition of capsule is in accordance with reference product i.e. Each capsule contains: Diclofenac sodium 100mg in a modified release formulation (25mg in the form of enteric coated release pellets and 75mg in the form of sustained release pellets).**
- **Justify of using USP complied working standard of diclofenac sodium for the analysis of BP complied drug product and how the drug substance manufacturer provide USP complied working standard when they are supplied in house specified diclofenac sodium pellets.**
- **According to the analytical method verification report absorbance value of sample and standard solution was around 0.3 while the obtained absorbance value during assay performance of stability batches were around 0.6, clarify the variation observed in the absorbance value obtained.**
- **The assay procedure adopted for verification studies is also not in accordance with BP monograph, clarification is required in this regard.**

Submit data as per the guidance document approved by Registration Board which specifies that "Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted". Further justify how the analysis of drug substance was conducted without performing verification studies of the analytical method of drug substance.	Not submitted
3.	Submit COA of reference standard actually used in the analysis of drug substance in section 3.2.S.5.	Not submitted

4.	COA of USP complied drug substance is submitted in section 3.2.S.4.4 while the stability data of EP complied drug substance has given in relevant section; clarification is required in this regard. Submit stability data of drug substance till the claimed re-test date, since you have submitted the long term data of only 24 months.	submitted
5.	Justify the formulation which is different in terms of qualitative composition from that of innovator product.	Not submitted
6.	Provision of details including batch number, expiry date and name of manufacturer of the innovator product along with pharmaceutical equivalence was performed.	Not submitted
7.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin, since the submitted GMP certificate is expired. Documents for the procurement of API with approval from DRAP (in case of import). Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not submitted
8.	Provide Batch Manufacturing Record (BMR) of three stability batches.	Submitted

Decision: Deferred for submission of following:

- **Submit data as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required."**
- **Submit data as per the guidance document approved by Registration Board which specifies that "Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted". Further justify how the analysis of drug substance was conducted without performing verification studies of the analytical method of drug substance.**
- **Submit COA of reference standard actually used in the analysis of drug substance in section 3.2.S.5.**
- **Justify the formulation which is different in terms of qualitative composition from that of innovator product.**
- **Provision of details including batch number, expiry date and name of manufacturer of the innovator product along with pharmaceutical equivalence was performed.**
- **Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin, since the submitted GMP certificate is expired.**
- **Documents for the procurement of API with approval from DRAP (in case of import).**
- **Compliance Record of HPLC software 21CFR & audit trail reports on product testing**

948.	**Oral liquid syrup section (general) is approved vide letter No. F. 1-25/2008-Lic dated 17-09-2021.**

	The proposed proprietary name / brand name	SetBiz 5mg/5ml syrup.
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each 5ml contains; Cetirizine dihydrochloride 5mg (B.P Specifications)
	Pharmaceutical form of applied drug	Oral liquid.
	Pharmacotherapeutic Group of (API)	R06AE07 Antihistamine
	Reference to Finished product specifications	BP Specification
	Proposed Pack size	60ml,90ml,120ml,450ml
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	USFDA APPROVED
	For generic drugs (me-too status)	Citzin Syrup, NovaMed Pharmaceuticals, Reg. No. 063620.
	GMP status of the Finished product manufacturer	New license issued dated 14-09-2021 w.e.f. 13-09-2021.
	Name and address of API manufacturer.	Oral liquid syrup section (general) is approved vide letter No. F. 1-25/2008-Lic dated 17-09-2021.
	Module-II (Quality Overall Summary)	M/s Sreekara Organics India Plot No. 159/A, S.V. Co-op. Ind. Estate, IDA Bollaram, Jinnaram (M), Sangareddy Dist-502325, Telangana, India.
	Module III (Drug Substance)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Stability studies	Official monograph of Cetirizine Hydrochloride is present in B.P. Firm has submitted detail of nomenclature, structure, general properties, solubility, manufacturers, description of manufacturing process and controls, tests for impurities & related substances, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Module-III (Drug Product):	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months.

		The real time stability data is conducted at 30°C ± 2°C / 65 ± 5% RH for 60 months. Batches:(CZ/V/00411,CZ/V/00511& CZ/V/00611)
	Pharmaceutical equivalence and comparative dissolution profile	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Analytical method validation/verification of product	Pharmaceutical Equivalence is established against the Citzin syrup manufactured by NovaMed pharmaceuticals Lahore by performing quality tests (Identification, filled volume, leakage teat, pH and Assay). Results of both the products are similar. CDP is not applicable.

STABILITY STUDY DATA			
Manufacturer of API	M/s Sreekara Organics India Plot No. 159/A, S.V. Co-op. Ind. Estate, IDA Bollaram, Jinnaram (M), Sangareddy Dist-502325, Telangana, India.		
API Lot No.	CTZ03521		
Description of Pack (Container closure system)	An amber glass bottle containing an-off white colored syrupy liquid with pleasant flavour, sealed with aluminum pp cap and packed in specific unitcarton.		
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	RD-CS-001	RD-CS-001	RD-CS-001
Batch Size	500 bottles.	500 bottles.	500 bottles.
Manufacturing Date	09-2022	09-2022	09-2022
Date of Initiation	28-09-2022.	28-09-2022.	28-09-2022.
No. of Batches	03		

Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has submitted copy of approval of PolyBiz syrup in 322 minutes of meeting.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate #L.Dis.No:82408/TS/2022 issued by Drug Control Administration Government of Telangana issued on 15-03-2022and valid until 14-03-2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted that the cetirizine dihydrochloride material of quantity 500g was obtained via loan from British Pharmaceuticals Lahore. Copy of documents already submitted in DRAP on dated 14-02-2023. Copy of Form 3, 5 ,7 from & invoice (invoice# ZHI-CI/5465/0621) dated: 26-06-2021 cleared by DRAP Lahore office dated 12-07-2021

		specifying import 100Kg Cetirizine 2HCl(Batch# CTZ03521)
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	The firm has submitted Data of stability batches supported by attested respective documents like chromatograms, raw data sheets, COA, summary data sheets etc
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	The firm has submitted Compliance Record of HPLC software 21CFR & audit trail reports on product testing.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	The firm has submitted Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).

Remarks OF Evaluator:

S.no.	Sections	Observations/Deficiencies/ Short-comings
1.	3.2.S.7	Justify for not including the test of pH determination and loss on drying test while performing the stability studies of drug substance.
2.	3.2.P.1	Formulation contain preservative, so preservative effectiveness studies to be performed as per recommendations of pharmacopoeia and shall be submit.
3.	3.2.P.2.2.1	Justify for performing the pharmaceutical equivalence against the comparator product instead of brand leader/ innovator / reference product.
4.	3.2. P.4	Submit the analysis report/COA of excipients propylene glycol and sorbitol, which includes the results of impurity testing related to the presence of ethylene glycol and diethylene glycol, in compliance of notification issued by DRAP vide No. F.6-30/2022-QA dated 21-10-2022.
5.	3.2.P.5.2	Justify for not adopting the assay procedure as recommended in BP monograph of Cetirizine Oral solution, since the conc. of sample and standard solution specified in the assay method is different from the concentrations of solution mentioned in BP. Further the validation studies were also performed keeping the conc. of sample and standard solution 0.1% while BP recommends 0.002% conc. for both solutions in assay testing, then justify how the method comply BP specification.
6.	3.2.P.8	Submit the updated stability data of drug product, since you have submitted only three-month stability data. Approval of API/ DML/ valid GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.

Decision of 327th meeting of Registration Board:

Registration Board deferred the case for submission of reply to the above cited shortcomings.

Reply of the Firm:

S.no.	Sections	Observations/Deficiencies/ Short-comings	Reply of the Firm
1.	3.2.S.7	Justify for not including the test of pH determination and loss on drying test while performing the stability studies of drug substance.	Firm replied that pH and Loss on Drying test is included in the specification and routine testing but by the manufacturer this test was skipped during stability studies of drug substance.
2.	3.2.P.1	Formulation contain preservative, so preservative effectiveness studies to be performed as per recommendations of pharmacopoeia and shall be submit.	Firm submitted preservative effectiveness test report.

3.	3.2.P.2.2 .1	Justify for performing the pharmaceutical equivalence against the comparator product instead of brand leader/ innovator / reference product.	Firm replied that comparative product sample was available at that time of trial batch manufacturing, so they use that sample for pharmaceutical equivalence.
4.	3.2. P.4	Submit the analysis report/COA of excipients propylene glycol and sorbitol, which includes the results of impurity testing related to the presence of ethylene glycol and diethylene glycol, in compliance of notification issued by DRAP vide No. F.6-30/2022-QA dated 21-10-2022.	COAs of propylene glycol and sorbitol in which results of impurity test of DEG and EG is included.
5.	3.2.P.5.2	Justify for not adopting the assay procedure as recommended in BP monograph of Cetirizine Oral solution, since the conc. of sample and standard solution specified in the assay method is different from the concentrations of solution mentioned in BP. Further the validation studies were also performed keeping the conc. of sample and standard solution 0.1% while BP recommends 0.002% conc. for both solutions in assay testing, then justify how the method comply BP specification.	Firm replied that "All chromatographic conditions as described in BP monograph was followed for the testing of product, sample and standard concentration was set for the easiness for the analyst and method was verified on the same concentration was set for the easiness for the analyst and method was verified on the same concentration as well.
6.	3.2.P.8	Submit the updated stability data of drug product, since you have submitted only three-month stability data.	Submitted
7.	Approval of API/ DML/ valid GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.		Firm submitted the copy of letter by DCA (Government of Telangana) in which it is certified that License No. 40/MD/AP/2012/B/G renewed 18/10/2022 and validity would get expired by 17/10/2027.

Decision of 333rd meeting of Registration Board:

Deferred for submission of following shortcomings:

Scientific justification for not performing critical tests of pH determination and loss on drying loss on drying during the stability studies.

Justify for not performing the assay of drug product in accordance with BP monograph of Cetirizine Oral solution.

Response of the Firm:

Scientific justification for not performing critical tests of pH determination and loss on drying during the stability studies.

Firm submitted the revised stability data of drug substance including the test of pH determination and loss on drying.

Justify for not performing the assay of drug product in accordance with BP monograph of Cetirizine Oral solution.

Firm submitted the revised analytical procedure of drug product in accordance with BP monograph along with performance report at 16 month of stability study.

Decision: Approved.

• **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.** • **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Not submitted
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not submitted
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Sr.no.	Observations/Deficiencies/ Short-comings	Response of the Firm
1.	Submit Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by Drug Product manufacturer (M/s. Medicraft Pharmaceuticals (Pvt.) Ltd.)"	submitted
2.	Validation of analytical procedures Submit data of analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer. Batch Analysis Report	Submitted
3.	Provide results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (CoA) of the same batch from Drug Substance / /Active Pharmaceutical Ingredient manufacture.	Firm submitted the batch analysis report of drug substance by drug product manufacturer.
4.	Submit real time stability study data of three batches of the drug substance as per the conditions of zone IV-A since the submitted stability data of drug substance is conducted at 25°C ± 2°C/60% RH ±5%.	Not submitted
5.	Submit data in section 3.2.P.2.1.2 as per the guidance document approved by Registration Board and available on DRAP website which specifies that "List of all components of the dosage form, and their amount on a per unit basis (including overages*, if any), the function	Firm submitted the requisite details of section 3.2.P.2.1.2.

	of the components, and a reference to their quality standards (e.g. compendial monographs or manufacturer's specifications). *Overages are not acceptable unless fully justified* If the Drug product is formulated using an active moiety, then the composition for the active ingredient shall be clearly indicated (e.g. "1 mg of active ingredient base = 1.075 mg active ingredient hydrochloride").	
6.	Provide information including type of diluent, its composition, quantity or volume, specifications (as applicable) and regulatory status in Pakistan (as applicable) for the diluent which is to be provided along with the applied drug.	Firm submitted the information related to the diluents.
7.	Provide information specify the justification of formulation and method of manufacturing. It is important that critical quality attributes (CQAs) and Critical Process Parameters (CPP) shall also be discussed.	submitted
8.	Justify the master formulation containing 1gm of sterile mixture of Meropenem and sodium carbonate for manufacturing of 1gm meropenem for injection, since the drug substance contains meropenem blended with 6.2% to 7.9% of sodium carbonate (as is basis).	submitted
9.	Submit data of Pharmaceutical equivalence of the applied drug with the innovator / reference/ comparator product and results of all the quality tests (mentioned in any official pharmacopoeia or section 3.2.P.5.1 of this application) of the developed formulation and the innovator / reference / comparator product shall be submitted and discussed".	Firm submitted Pharmaceutical equivalence report performed against the product Meronem Injection of M/s. Pfizer Pharmaceuticals.
10.	Compatibility studies for the dry powder for injections with its diluent shall be performed as per the instructions provided in individual label of the drug product.	Firm submitted the requisite details.
11.	Submit data in section 3.2.P.2.2.1 as per the guidance document approved by Registration Board and available on DRAP website which specifies that "*The selection and optimization of the manufacturing process described in 3.2.P.3.3, in particular its critical aspects, shall be explained. Any specific manufacturing process development shall be provided e.g., sterilization shall be explained and justified. Where relevant, justification for the selection of aseptic processing or other sterilization methods over terminal sterilization shall be provided".*	Submitted
12.	Justify the use of 10ml type-II glass vial for the applied drug product since as per the innovator's product Meropenem for injection is supplied in 20 mL and 30 mL injection vials	Firm submitted the reply that 20ml glass vial is used for 500mg and 30ml is used for 100mg.

	containing sufficient meropenem to deliver 500 mg or 1 gram for intravenous administration, respectively.	
13.	Provide the composition for the drug substance with clearly indicated the quantity of its base form and quantity of sodium carbonate along with the amount of sodium (as is basis).	Submitted
14.	Justify the master formulation containing 1gm of sterile mixture of Meropenem and sodium carbonate for manufacturing of 1gm meropenem for injection, since the drug substance contains meropenem blended with 6.2% to 7.9% of sodium carbonate (as is basis).	Submitted the master formulation.
15.	Provide control of critical steps and intermediates for the applied drug product in section 3.2.P.3.4, since the submitted document contains various variation in terms of weight and fill volume and does not cover all the critical steps involved in the manufacturing.	Submitted the requisite information of section 3.2.P.3.4.
16.	• Variation has been observed regarding the sterilization process of vial in the process validation protocol. Clarification is required either the dry heat has been used for sterilization of vials or sterilized in autoclave. • The process validation protocols did not contain any steps to ensure the sterilization of vials and rubber stopper is adequately performed, further the time and temperature of sterilization cycle is also not validated. Justification is required in this regard. • The process validation protocols did not define any critical steps, justify how your process validation protocols can be considered acceptable. • In process validation protocol container description specified that Type-I 2ml clear glass vial has been used clarification is required regarding the variation of container closure system of the applied product. • According to the process validation data sheet bulk solution has been prepared after mixing in manufacturing tank while the manufacturing process given in previous sections revealed that ready to fill active material has been imported and only filling of active material in their respective container has been done by drug product manufacturer clarification is required regarding this variation of manufacturing procedure.	Firm submitted the revised process validation protocol.
17.	• Justify why the test of content of sodium and loss on drying is not mentioned in the specifications of the drug product • Justification is required for including volume variation test in the dry powder injectable product specification.	Firm submitted the revised specification of drug product in which test of content of sodium and loss on drying is included. Further claimed that they follow USP specification for drug product.

	• In section 1.5.6 applicant claimed USP specification for drug product while in - house specification has been claimed in section 3.2.P.5.2 clarification is required in this regard.	
18.	As per the submitted master formulation 1000mg per vial quantity has been filled while the weight variation limit specified is 1.445gm±3% per vial justification is required regarding the disparity in filled weight of active material.	Firm submitted the revised master formulation along with calculation of filled weight.
19.	• As per the submitted procedure of assay, sample solution has been prepared in mobile phase in which 50mg of meropenem has been dissolved initially while according to the USP "*Constitute a container of Meropenem for Injection with a volume of water corresponding to the quantity of solvent specified in the labeling, and dilute with water".* Justify how your method could be considered as complying with USP monograph. • The USP monograph under the assay method specifies that sample should be hold for 1-2 hours at 25± 1°C before testing, while your method does not mention the same. Justify how your method could be considered as complying with USP monograph. • Provide the detailed procedure used for determination of content of sodium as per USP along with the evidence of availability of atomic absorption spectrophotometer. • Justify why the formula for calculation of assay contents of meropenem is different than that mentioned in USP monograph.	Firm submitted the revised analytical procedure in compliance of USP monograph of Meropenem Injection.
20.	• Submit data of analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer. • Provide the data of verification studies along with the raw data sheet reflecting the sample, standard and placebo preparation procedure for performance of precision, specificity and accuracy parameters.	Submitted
21.	Scientific justification for not performing the test of sodium content and loss on drying for the analysis of all three batches of drug product.	Firm submitted the batch analysis report
22.	As per the batch analysis certificate manufacturing date of Batches MP01, MP02, MP03 are 03-2019,04-2019 and 05-2019 respectively while the section approval was granted on 14th October, 2020.Clarification is required regarding the manufacturing of batches prior section approval, further specify where the manufacturing of these batches was	Firm did not clarify the manufacturing dates of trial batches , since, initially the manufacturing date of trial batches of both 500mg and 1000mg was the year 2019, later firm submitted the revised stability data in which date of manufacturing of three trial batches were 03-2021.

	carried out.	
23.	Provide COA of primary / secondary reference standard including source and lot number.	submitted
24.	Stability Following clarification is required regarding the date of manufacturing of batches for product development and stability studies: • As per the batch analysis certificate, manufacturing date of Batches MP01, MP02, MP03 are 03-2019,04-2019 and 05-2019 respectively while as per stability data sheets same batches has been manufactured on MP01: 03-2021, MP02:04-2021, MP03:05-2021.Clarification is required in this regard.	Firm clarified that the trial batches of 500mg is ME-01,ME-02,ME-03,while the trial batches of 1000mg is MP-01,MP-02,MP-03.
25.	Justify why the test of content of sodium and loss on drying has not been performed during the stability studies of drug product.	Firm submitted the revised stability data in which both of these tests are included.
26.	Provide details that which lot number of drug substance has been used in manufacturing of each batch of drug product. Also provide documents confirming evidence of import of each lot of drug substance used in manufacturing of these batches of drug product.	Not submitted
27.	Provide data of stability batches properly arranged and supported by respective documents including analytical report / COA, raw data sheet and respective chromatograms separately for each time point.	Submitted
28.	Provide Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted
29.	Documents for the procurement of API with approval from DRAP (in case of import).	Not submitted
30.	• Provide compliance Record of HPLC software 21CFR & audit trail reports on product testing. • Provide Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).	Submitted
31.	Executed Production Documents Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2. P.8.	Submitted

Decision of 331st meeting of Registration Board:
Deferred for submission of following shortcomings:

- Submit stability study data of three batches of the drug substance as per the zone IV-a conditions.
- Clarification regarding the manufacturing dates of trial batches, since initially year 2019 was mentioned on batch analysis certificates of all three trial batches later firm submitted the revised stability data in which date of manufacturing of three trial batches were 03-2021.

- Provide details that which lot number of drug substance has been used in manufacturing of each batch of drug product. Also provide documents confirming evidence of import of each lot of drug substance used in manufacturing of these batches of drug product.

Response of the Firm:

- **Submit stability study data of three batches of the drug substance as per the zone IV-a conditions.**

Firm submitted the stability data of three batches of the drug substance as per the zone IV-a conditions.

- **Clarification regarding the manufacturing dates of trial batches, since initially year 2019 was mentioned on batch analysis certificates of all three trial batches later firm submitted the revised stability data in which date of manufacturing of three trial batches were 03-2021.**

Firm replied that in 2019 their carbapenem section was ready for inspection but the inspection process of our section was under process and during this period we got the raw material on loan basis and processed our trial batches. Later, they were told that it will not be approved because they don't have a section approval letter and proof of import is also required, so they stopped the work on previous trial batches and initiated new studies after the section approval. After section approval we imported the raw material from Shenzhen Haibin Pharmaceuticals China, via DHL.

Further firm claimed that the old stability documents were withdrawn and previous working was nullified so they used the same batch number ME01, ME02, ME03 for 500mg of their new trial batches.

- Provide details that which lot number of drug substance has been used in manufacturing of each batch of drug product. Also provide documents confirming evidence of import of each lot of drug substance used in manufacturing of these batches of drug product.

Firm replied that the Batch no. 8MT2102165 is used in all three batches of finished product stability, which was imported from China via DHL and DHL invoice has been submitted by the Firm.

The DHL invoices submitted by the firm were not verifiable.

Decision of 333rd meeting of Registration Board:

Deferred for evidence of procurement/import of drug substance with approval of DRAP I&E Office, since the submitted DHL courier receipt is not verifiable.

Reply of the Evaluator:

M/s Medicraft Pharmaceutical Pvt. Ltd Peshawar has submitted original letter from DHL Express Islamabad which states as under:

"Dear customer,

It is to inform you that we have received your request to verify consignment details. Please note that we only retain tracking record for last 3 months and after six months Airway bill numbers are reused for consignment anywhere in the world. We retain very limited details for old consignment and after checking we can confirm that the provided details of consignment are correct. It was a consignment delivered in Peshawar in year 2021. Consignment Airways Bill number was 2867971820 and its origin was China. Consignor of the consignment was Shenzhen Haibin Pharmaceutical Co. and was consigned to Medicraft Pharmaceuticals Pvt. Ltd. Delivery of consignment was made in Peshawar City. Declared contents of the consignment were ***Meropenem****.*

Unfortunately, we have no further details available in the system and that we are not authorized by global teams to stamp old Airway bills.

We hope this response is sufficient and will conclude the matter."

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Manufacturing Date	03-2021	03-2021	03-2021
Date of Initiation	24-03-2021	24-03-2021	24-03-2021
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Not submitted
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not submitted
4.	Data of stability batches will be supported by attested respective documents like	submitted

	chromatograms, Raw data sheets, COA, summary data sheets etc.	
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Sr.no.	Observations/Deficiencies/ Short-comings	Response of the Firm
1.	Submit Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by Drug Product manufacturer (M/s. Medicraft Pharmaceuticals (Pvt.) Ltd.)"	submitted
2.	Validation of analytical procedures Submit data of analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer. Batch Analysis Report	Submitted
3.	Provide results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (CoA) of the same batch from Drug Substance / /Active Pharmaceutical Ingredient manufacture.	Firm submitted the batch analysis report of drug substance by drug product manufacturer.
4.	Submit real time stability study data of three batches of the drug substance as per the conditions of zone IV-A since the submitted stability data of drug substance is conducted at 25°C ± 2°C/60% RH ±5%.	Not submitted
5.	Submit data in section 3.2.P.2.1.2 as per the guidance document approved by Registration Board and available on DRAP website which specifies that "List of all components of the dosage form, and their amount on a per unit basis (including overages*, if any), the function of the components, and a reference to their quality standards (e.g. compendial monographs or manufacturer's specifications). *Overages are not acceptable unless fully justified* If the Drug product is formulated using an active moiety, then the composition for the active ingredient shall be clearly indicated (e.g. "1 mg of active ingredient base = 1.075 mg active ingredient hydrochloride").	Firm submitted the requisite details of section 3.2.P.2.1.2.
6.	Provide information including type of diluent, its composition, quantity or volume, specifications (as applicable) and regulatory status in Pakistan (as applicable) for the diluent	Firm submitted the information related to the diluents.

	which is to be provided along with the applied drug.	
7.	Provide information specify the justification of formulation and method of manufacturing. It is important that critical quality attributes (CQAs) and Critical Process Parameters (CPP) shall also be discussed.	submitted
8.	Justify the master formulation containing 1gm of sterile mixture of Meropenem and sodium carbonate for manufacturing of 1gm meropenem for injection, since the drug substance contains meropenem blended with 6.2% to 7.9% of sodium carbonate (as is basis).	submitted
9.	Submit data of Pharmaceutical equivalence of the applied drug with the innovator / reference/ comparator product and results of all the quality tests (mentioned in any official pharmacopoeia or section 3.2.P.5.1 of this application) of the developed formulation and the innovator / reference / comparator product shall be submitted and discussed".	Firm submitted Pharmaceutical equivalence report performed against the product Meronem Injection of M/s. Pfizer Pharmaceuticals.
10.	Compatibility studies for the dry powder for injections with its diluent shall be performed as per the instructions provided in individual label of the drug product.	Firm submitted the requisite details.
11.	Submit data in section 3.2.P.2.2.1 as per the guidance document approved by Registration Board and available on DRAP website which specifies that "*The selection and optimization of the manufacturing process described in 3.2.P.3.3, in particular its critical aspects, shall be explained. Any specific manufacturing process development shall be provided e.g., sterilization shall be explained and justified. Where relevant, justification for the selection of aseptic processing or other sterilization methods over terminal sterilization shall be provided".*	Submitted
12.	Justify the use of 10ml type-II glass vial for the applied drug product since as per the innovator's product Meropenem for injection is supplied in 20 mL and 30 mL injection vials containing sufficient meropenem to deliver 500 mg or 1 gram for intravenous administration, respectively.	Firm submitted the reply that 20ml glass vial is used for 500mg and 30ml is used for 100mg.
13.	Provide the composition for the drug substance with clearly indicated the quantity of its base form and quantity of sodium carbonate along with the amount of sodium (as is basis).	Submitted
14.	Justify the master formulation containing 1gm of sterile mixture of Meropenem and sodium carbonate for manufacturing of 1gm meropenem for injection, since the drug substance contains meropenem blended with 6.2% to 7.9% of sodium carbonate (as is basis).	Submitted the master formulation.

15.	Provide control of critical steps and intermediates for the applied drug product in section 3.2.P.3.4, since the submitted document contains various variation in terms of weight and fill volume and does not cover all the critical steps involved in the manufacturing.	Submitted the requisite information of section 3.2.P.3.4.
16.	• Variation has been observed regarding the sterilization process of vial in the process validation protocol. Clarification is required either the dry heat has been used for sterilization of vials or sterilized in autoclave. • The process validation protocols did not contain any steps to ensure the sterilization of vials and rubber stopper is adequately performed, further the time and temperature of sterilization cycle is also not validated. Justification is required in this regard. • The process validation protocols did not define any critical steps, justify how your process validation protocols can be considered acceptable. • In process validation protocol container description specified that Type-I 2ml clear glass vial has been used clarification is required regarding the variation of container closure system of the applied product. • According to the process validation data sheet bulk solution has been prepared after mixing in manufacturing tank while the manufacturing process given in previous sections revealed that ready to fill active material has been imported and only filling of active material in their respective container has been done by drug product manufacturer clarification is required regarding this variation of manufacturing procedure.	Firm submitted the revised process validation protocol.
17.	• Justify why the test of content of sodium and loss on drying is not mentioned in the specifications of the drug product • Justification is required for including volume variation test in the dry powder injectable product specification. • In section 1.5.6 applicant claimed USP specification for drug product while in - house specification has been claimed in section 3.2.P.5.2 clarification is required in this regard.	Firm submitted the revised specification of drug product in which test of content of sodium and loss on drying is included. Further claimed that they follow USP specification for drug product.
18.	As per the submitted master formulation 1000mg per vial quantity has been filled while the weight variation limit specified is 1.445gm±3% per vial justification is required regarding the disparity in filled weight of active material.	Firm submitted the revised master formulation along with calculation of filled weight.

19.	• As per the submitted procedure of assay, sample solution has been prepared in mobile phase in which 50mg of meropenem has been dissolved initially while according to the USP "*Constitute a container of Meropenem for Injection with a volume of water corresponding to the quantity of solvent specified in the labeling, and dilute with water".* Justify how your method could be considered as complying with USP monograph. • The USP monograph under the assay method specifies that sample should be hold for 1-2 hours at 25± 1°C before testing, while your method does not mention the same. Justify how your method could be considered as complying with USP monograph. • Provide the detailed procedure used for determination of content of sodium as per USP along with the evidence of availability of atomic absorption spectrophotometer. • Justify why the formula for calculation of assay contents of meropenem is different than that mentioned in USP monograph.	Firm submitted the revised analytical procedure in compliance of USP monograph of Meropenem Injection.
20.	• Submit data of analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer. • Provide the data of verification studies along with the raw data sheet reflecting the sample, standard and placebo preparation procedure for performance of precision, specificity and accuracy parameters.	Submitted
21.	Scientific justification for not performing the test of sodium content and loss on drying for the analysis of all three batches of drug product.	Firm submitted the batch analysis report
22.	As per the batch analysis certificate manufacturing date of Batches MP01, MP02, MP03 are 03-2019,04-2019 and 05-2019 respectively while the section approval was granted on 14th October, 2020.Clarification is required regarding the manufacturing of batches prior section approval, further specify where the manufacturing of these batches was carried out.	Firm did not clarify the manufacturing dates of trial batches , since, initially the manufacturing date of trial batches of both 500mg and 1000mg was the year 2019, later firm submitted the revised stability data in which date of manufacturing of three trial batches were 03-2021.
23.	Provide COA of primary / secondary reference standard including source and lot number.	submitted
24.	Stability Following clarification is required regarding the date of manufacturing of batches for product development and stability studies: • As per the batch analysis certificate, manufacturing date of Batches MP01, MP02, MP03 are 03-2019,04-2019 and 05-2019 respectively while as per stability data	Firm clarified that the trial batches of 500mg is ME-01,ME-02,ME-03,while the trial batches of 1000mg is MP-01,MP-02,MP-03.

	sheets same batches has been manufactured on MP01: 03-2021, MP02:04-2021, MP03:05-2021.Clarification is required in this regard.	
25.	Justify why the test of content of sodium and loss on drying has not been performed during the stability studies of drug product.	Firm submitted the revised stability data in which both of these tests are included.
26.	Provide details that which lot number of drug substance has been used in manufacturing of each batch of drug product. Also provide documents confirming evidence of import of each lot of drug substance used in manufacturing of these batches of drug product.	Not submitted
27.	Provide data of stability batches properly arranged and supported by respective documents including analytical report / COA, raw data sheet and respective chromatograms separately for each time point.	Submitted
28.	Provide Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted
29.	Documents for the procurement of API with approval from DRAP (in case of import).	Not submitted
30.	• Provide compliance Record of HPLC software 21CFR & audit trail reports on product testing. • Provide Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).	Submitted
31.	Executed Production Documents Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2. P.8.	Submitted

Decision of 331st meeting of Registration Board:

Deferred for submission of following shortcomings:

- Submit stability study data of three batches of the drug substance as per the zone IV-a conditions.
- Clarification regarding the manufacturing dates of trial batches, since initially year 2019 was mentioned on batch analysis certificates of all three trial batches later firm submitted the revised stability data in which date of manufacturing of three trial batches were 03-2021.
- Provide details that which lot number of drug substance has been used in manufacturing of each batch of drug product. Also provide documents confirming evidence of import of each lot of drug substance used in manufacturing of these batches of drug product.

Response of the Firm:

- Submit stability study data of three batches of the drug substance as per the zone IV-a conditions.

Firm submitted the stability data of three batches of the drug substance as per the zone IV-a conditions.

- Clarification regarding the manufacturing dates of trial batches, since initially year 2019 was mentioned on batch analysis certificates of all three trial batches later firm submitted the revised stability data in which date of manufacturing of three trial batches were 03-2021.

Firm replied that in 2019 their carbapenem section was ready for inspection but the inspection process of our section was under process and during this period we got the raw material on loan basis and processed our trial batches. Later, they were told that it will not be approved because they don't have a section approval letter and proof of import is also required, so they stopped the work on previous trial batches and initiated new studies after

the section approval. After section approval we imported the raw material from Shenzhen Haibin Pharmaceuticals China, via DHL.
Further firm claimed that the old stability documents were withdrawn and previous working was nullified so they used the same batch number MP01, MP02, MP03 for 1000mg of their new trial batches.

- Provide details that which lot number of drug substance has been used in manufacturing of each batch of drug product. Also provide documents confirming evidence of import of each lot of drug substance used in manufacturing of these batches of drug product.

Firm replied that the Batch no. 8MT2102165 is used in all three batches of finished product stability, which was imported from China via DHL and DHL invoice has been submitted by the Firm.

Decision of 333rd meeting of Registration Board:
Deferred for evidence of procurement/import of drug substance with approval of DRAP I&E Office, since the submitted DHL courier receipt is not verifiable.

Reply of the Evaluator:
M/s Medicraft Pharmaceutical Pvt. Ltd Peshawar has submitted original letter from DHL Express Islamabad which states as under:
"Dear customer,
It is to inform you that we have received your request to verify consignment details. Please note that we only retain tracking record for last 3 months and after six months Airway bill numbers are reused for consignment anywhere in the world. We retain very limited details for old consignment and after checking we can confirm that the provided details of consignment are correct. It was a consignment delivered in Peshawar in year 2021. Consignment Airways Bill number was 2867971820 and its origin was China. Consignor of the consignment was Shenzhen Haibin Pharmaceutical Co. and was consigned to Medicraft Pharmaceuticals Pvt. Ltd. Delivery of consignment was made in Peshawar City. Declared contents of the consignment were ***Meropenem****.*
Unfortunately, we have no further details available in the system and that we are not authorized by global teams to stamp old Airway bills.
We hope this response is sufficient and will conclude the matter."

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Central Licensing Board in 278th meeting held on 10th &11th December,2020 has considered and approved additional section "Liquid Ampoule (SVP) General Section" of M/s Islam Pharmaceuticals, Sialkot.

951.	Name, address of Applicant / Marketing Authorization Holder	M/s Islam Pharmaceuticals 7KM Pasrur Road Sialkot
	Name, address of Manufacturing site.	M/s Islam Pharmaceuticals 7KM Pasrur Road Sialkot
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)

No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document. (New Section)
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. SN20190340 issued by CFDA valid till 24/02/2024.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	• Copy of letter No.14850/2020/DRAP-AD-VIII (I&E) dated 16/10/2020 is submitted wherein the permission to import different APIs including Diclofenac sodium for the purpose of test/analysis and stability studies is granted. • AirWay Bill No.607PVG91267326 Dated 22/12/2020
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator:

S.no.	Sections	Observations/Deficiencies/ Short-comings

1.	3.2.S.4.4	Justify for not importing/using the sterile API for manufacturing of injection, since the results of sterility test and Bacterial Endotoxin test is not included in the COA of drug substance by both drug substance manufacturer and drug product manufacturer.
2.	3.2.P.1	• Clarify the role of benzyl alcohol in the applied formulation. • According to the literature of innovator brand the recommended quantity of Sodium metabisulphite is 2 mg per 3 ml and Benzyl alcohol is 120 mg per 3 ml, while the quantity of both excipients used in the applied formulation is different from the recommended quantity by the innovator, scientifically rationalize the quantity of both excipients used in the applied formulation.
3.	3.2.P.2.2.1	Justify for not performing the test of osmolality, particulate matter,sterility and Bacterial Endotoxin test while establishing the pharmaceutical equivalence against the reference product.
4.	3.2.P.3.3	Justify for prefering the aseptic filling procedure over terminal sterilization in the manufacturing procedure of drug product.
5.	3.2.P.5.1	• Submit reference of specification of pH test. • Justify for not including the test of osmolality in the finished product specification since it is the critical parameter in the injectable formulation.
6.	3.2.P.8	• Submit the updated stability data of drug product, since you have submitted only three-month stability data. • Clarify the volume of glass ampoule use for primary packaging of drug product, since it is mentioned 1ml on stability data sheet while the applied formulation is of 3ml.
7.	2.3.R.1.1	Submit minimum handling capacity of the equipment used in the formulation of trail batches.

Decision of 327th meeting of Registration Board:
Registration Board deferred the case for submission of reply to the above cited shortcomings.

Remarks of Evaluator:

S.no.	Sections	Observations/Deficiencies/ Short-comings	Response of the Firm
1.	Justify for not importing/using the sterile API for manufacturing of injection, since the results of sterility test and Bacterial Endotoxin test is not included in the COA of drug substance by both drug substance manufacturer and drug product manufacturer. Firm replied that "since applied product is liquid injection and to be manufactured through aseptic filling procedure (sterilization through filtration method) so it is not necessary to use sterile API. However, Reference of USP general test <1211> sterility assurance stated that *The preparation of sterile products encompass a wide range of materials including active pharmaceutical ingredients (small and large molecules), excipients, solvents (usually water), process gases and processing aids, all of which contribute to the microbiological quality attributes of the product. Depending upon the product being manufactured, this can require consideration of bacterial, endotoxin, and particulate contamination. Specific microbiological quality testing requirements for inactive and active ingredients testing is often specified in a relevant USP–NF monograph. Requirements for microbiological testing for total aerobic bacteria, yeast and mold counts, and specified organisms are given in Microbial Enumeration Tests and Tests for Specified Microorganisms, and the recommended but non-mandatory enumeration targets for microbiological testing are given in Microbiological Examination of Nonsterile Products: Acceptance Criteria for Pharmaceutical Preparations and Substances for Pharmaceutical Use. Some specific products may require other testing for specified organisms, including viruses, as a requirement of their regulatory approval. Requirements for bacterial endotoxin testing in injectable products are covered, which describes qualification of Limulus amebocyte lysate testing for acceptable levels of bacterial endotoxin. Raw material specifications must be appropriate to ensure that the manufacturing process consistently results, as demonstrated through process validation, in products conforming to the microbiological critical quality attributes.*		
2.	3.2.P.1	Clarify the role of benzyl alcohol in the applied formulation.	Firm replied that "Benzyl alcohol is used as solvent (to enhance the solubility of drug substance) reference Handbook of pharmaceutical excipients 7th Edition by

			RayMond C Rowe a. It is also the part of innovator formulation. In literature of "Voltarol injection" which is MHRA approved, only the qualitative composition of injection is given and it does not mention quantities of excipients reference document is attached as annexure-IB.
3.	3.2.P.1	According to the literature of innovator brand the recommended quantity of Sodium metabisulphite is 2 mg per 3 ml and Benzyl alcohol is 120 mg per 3 ml, while the quantity of both excipients used in the applied formulation is different from the recommended quantity by the innovator, scientifically rationalize the quantity of both excipients used in the applied formulation.	Firm replied that in literature of "Voltarol injection" which is MHRA approved, only the qualitative composition of injection is given and it does not mention quantities of excipients. As per FDA document, limit of inactive ingredients for approved drug products, the maximum limit of benzyl alcohol in intramuscular injection is 144 mg and in our formulation it is 126mg. Limit of sodium metabisulphite is 40mg and in our formulation it is 9.98mg. *However, the USFDA Inactive ingredient database do not mentioned the maximum potency per unit dose of benzyl alcohol and sodium metabisulphite in the IM/IV liquid injection.*
4.	3.2.P.2.2.1	Justify for not performing the test of osmolality, particulate matter,sterility and Bacterial Endotoxin test while establishing the pharmaceutical equivalence against the reference product.	Firm replied that *All the tests including sterility, bacterial endotoxin, particulate matter were performed (mentioned in report under section 3.2.P.5.4 batch analysis) but were not added to pharmaceutical equivalence report. Pharmaceutical equivalence study report containing test results for particulate matter, Bacterial Endotoxin and sterility test* is submitted.
5.	3.2.P.3.3	Justify for preferring the aseptic filling procedure over terminal sterilization in the manufacturing procedure of drug product.	Firm replied that "*According to an article published in Journal of Pharmaceutical Sciences, Vol. 90, 541-544 (2001) Wiley-Liss, Inc. and the American Pharmaceutical Association, "A known impurity "1-(2,6-diclorophenyl) indolin-2-one" is formed in the production of a parenteral dosage form of Diclofenac sodium if terminally sterilized by autoclave" research article is attached as annexure-III".* Due to above reason we preferred aseptic filling over terminal sterilization.
6.	3.2.P.5.1	Submit reference of specification of pH test.	Firm replied that "At the time of product development we searched for reference of pH but did not found any authentic document, then we tested different brands of diclofenac sodium injection and found the pH around 8.3, so we set 8.3 as our target pH and adjusted the limits ± 0.5 of target pH (Limit: 7.8 – 8.8). Later on we got another reference "Handbook of Pharmaceutical

			Manufacturing Formulations Sterile Products" by Sarfaraz K. Niazi, Pharmaceutical Scientist, Inc. Deerfield, Illinois, USA, published in 2009 which gives the range of pH of diclofenac sodium injection from 8.0 – 9.0. Initial results of our stability batches and after 03 and 06-month stability studies are well within the limit which is given in above mentioned book.
7.	3.2.p.5.1	Justify for not including the test of osmolality in the finished product specification since it is the critical parameter in the injectable formulation.	Firm replied that "Osmolality test was performed on product development stage so it was not reported in finish product specification. Osmolality test results and revised finish product specifications after addition of osmolality test are submitted".
8.	3.2.P.8	Submit the updated stability data of drug product, since you have submitted only three-month stability data.	Stability data for 03 and 06 month of drug product was submitted by the firm.
9.	3.2.P.8	Clarify the volume of glass ampoule use for primary packaging of drug product, since it is mentioned 1ml on stability data sheet while the applied formulation is of 3ml.	In stability sheets 1ml glass ampoule is written by typographic mistake, corrected stability sheets are attached
10.	2.3.R.1.1	Submit minimum handling capacity of the equipment used in the formulation of trail batches.	Firm submitted the data of Minimum handling capacity of the equipment used for trial batches

Decision of 330th meeting of Registration Board:

Deferred for the submission of following shortcomings:

- Scientific rationale for not performing terminal sterilization, with reference to the innovator product.
- Justify the quantitative composition of Sodium metabisulphite and Benzyl alcohol with reference to the innovator product, sinec the submitted reply has not verified from *USFDA Inactive ingredient database.*

Reply of the Firm:

- **Scientific rationale for not performing terminal sterilization, with reference to the innovator product.**

Firm replied that "Diflo injection 75mg/3ml was sterilized by filtration method and stability data (Accelerated and Long term stability study) submitted which gives satisfactory results of all parameters including sterility test. Further, firm commit they will terminally sterilize the commercial batched of applied product and submit undertaking accordingly.

- **Justify the quantitative composition of Sodium metabisulphite and Benzyl alcohol with reference to the innovator product, since the submitted reply has not verified from *USFDA Inactive ingredient database***

Firm replied that they developed applied product as per MHRA approved voltarol injection which only gives qualitative composition and it does not mention qualities of excipients, applied product stability study results are satisfactory of both accelerated and long term condition.

However, the PIL of voltarol injection available on MHRA website clearly mentioned that "*This medicine contains 120mg benzyl alcohol per 3ml ampoule which is equivalent to 40mg/ml. Benzyl alcohol may cause allergic reactions."*

Decision of 331st meeting of Registration Board:

Registration Board deferred the case for submission of stability studies data for three new batches, manufactured with revised formulation as per innovator drug product along with fee of registration i.e. Rs. 30,000 for submission of new stability studies data, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.

Response of the Firm:
Firm in compliance of above decision of Registration Board submitted the stability study data of three new trial batches, manufactured with revised formulation as per innovator drug product. Stability data sheets, raw data sheets, Batch manufacturing Record, chromatograms, audit trail reports and data loggers are submitted along with requisite fee of 30,000/- deposited vide slip no. 16617669066.

Batch No.	23ARn010	23ARn011	23ARn012
Batch Size	1800 ampoules	1800 ampoules	1800 ampoules
Manufacturing Date	11-2023	11-2023	11-2023
Date of Initiation	14-12-2023	14-12-2023	14-12-2023
No. of Batches	03		

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

CASES OF FINISHED IMPORT RECEIVED ON FORM 5-F:

952.	**Name, address of Applicant / Importer**	**M/s Al-Habib Pharmaceuticals, Plot #81, block B, SMCHS, Karachi.**
	Details of Drug Sale License of importer	**DSL No**.: 0230 **Address**: Al-Habib Pharmaceuticals, 81-B, block B, SMCHS, Karachi. **Godown:** 1. Plot No. 393/7 & 393/8 Sector 7-A K I A Karachi Validity: 18/05/2024 Status: Drug License by way of wholesale
	Name and address of marketing authorization holder (abroad)	**KOREA UNITED PHARM. INC.** Address: 25-23, Nojanggongdan-gil, Jeondong-myeon, Sejong-si, Korea
	Name, address of manufacturer(s)	**KOREA UNITED PHARM. INC.** Address: 25-23, Nojanggongdan-gil, Jeondong-myeon, Sejong-si, Republic of Korea
	Name of exporting country	Republic of Korea
	Detail of certificates attached (CoPP, Freesale certificate, GMP certificate)	**CoPP:** Original legalized CoPP (certificate No. 2022-GI-0421) dated March 24,2022 issued by Daejeon Regional Food and Drug Administration. The applied product is available for free sale in exporting country. The facilities and operations conform to WHO-GMP.
	Details of letter of authorization / sole agency agreement	Notarized copy of sole agency agreement is submitted whereby M/s KOREA UNITED PHARM. INC authorizes M/s Al-Habib Pharmaceuticals to Import and commercialize products Leucovorin Calcium 200mg/20ml Solution for injection.
	Status of the applicant	☐ Manufacturer ☒ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)

	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	For imported products, specify one the these	☒ Finished Pharmaceutical product import ☐ Bulk import and local repackaging ☐ Bulk import and local repackaging for export purpose only
	Dy. No. and date of submission	Dy. No. 11124 dated 09-05-2022
	Details of fee submitted	PKR 150,000 Dated: 18-04-2022
	The proposed proprietary name / brand name	**KU Nyrin (Leucovorin Calcium) 200mg injection**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each 20ml Vial contains: **Leucovorin Calcium ……. 220mg (As Folinate 200mg)**
	Pharmaceutical form of applied drug	Injection
	Pharmacotherapeutic Group of (API)	Folic Acid Analogs (Adjuvant Therapy for Cancer) (V03AB)
	Reference to Finished product specifications	USP Specifications
	Proposed Pack size	10 Vials/Box
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	**Leucovorin Calcium 200mg by FRESENIUS KABI USFDA**
	For generic drugs (me-too status)	Not Confirmed from the available data
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Name, address of drug substance manufacturer	Zhejiang Davi Pharmaceutical Co., Ltd. No.818, Xinzhu Road Street Avenue, Economy Development Zone, Huzhou City, Zhejiang Province, China
	Module-III Drug Substance:	Firm has submitted detailed drug substance data for both sources related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of API at accelerated as well as real time conditions. The real time stability data is conducted at 25°C ± 3°C/60 RH. The stability study data is till 24 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its

		description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical equivalence has been established against the reference product **Ferbon Injection by Samjin Pharm. Co., Ltd.**
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	1. 20 mL Amber Type I Glass Vial 2. 22 mm Gray chlorobutyl rubber stoppers 3. Green aluminum/plastic flip-off caps
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches for 36 months' real time stability data at 5 ± 2 ºC; 06 month accelerated stability data 25 ± 2 ºC; HR 60 ± 5%. of 03 batches

Evaluation by PEC:

S.no.	Sections	Observations/Deficiencies/ Short-comings
1.	Provide evidence of me-too status of applied strength, since you have not submitted the requisite information.	
2.	**3.2.S.4.1**	Submit specification of drug substance by both drug substance manufacturer and drug product manufacturer.
3.	**3.2.S.4.2**	Submit detailed method of analysis of the drug substance both by drug substance manufacturer and drug product manufacturer instead of referring to USP monograph.
4.	**3.2.S.4.3**	Submit analytical method verification report of drug substance performed by drug product manufacturer, as per the CTD guidance document approved by Registration Board.
5.	**3.2.S.4.4**	Justify for not including the result of water content test in the COA of drug substance , since the water content test is recommended by USP.
6.	**3.2.S.5**	Provide certificate of analysis of reference standard /working standard used for testing of the drug substance.
7.	**3.2.P.1**	Justify for using preservative in the formulation of applied product, since the innovator/reference product was not using the preservative in their formulation.
8.	**3.2.P.2.2.1**	Submit data of Pharmaceutical equivalence of the applied drug with the innovator / reference/ comparator product and results of all the quality tests (mentioned in any official pharmacopoeia or section 3.2.P.5.1 of this application) of the developed formulation and the innovator / reference / comparator product shall be submitted and discussed".
9.	**3.2.P.2.2.2**	Provide scientific justification for use of 3% overage in the formulation.
10.	**3.2.P.3.3**	Provide details regarding the method of sterilization of the drug product because, during manufacturing of drug product neither you have performed terminal sterilization nor the filling has been done in aseptic conditions.
11.	**3.2.P.5.3**	You have submitted the analytical method validation report of strength 50mg/5ml Nyrin Injection instead of 200mg/20ml strength, submit the verification report of applied strength
12.	**3.2.P.5.4**	Justify for adjusting the pH of injection towards the higher value i.e. 8.1 as reflected from the submitted batch analysis report, while the reference product approved in USFDA recommends to adjust at 7.8.

13.	**2.3. R.1.1**	Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product under section 2.3.R.1.1, for which stability studies data is provided in Module 3 section 3.2. P.8.

Decision of 331st Meeting of Registration Board:
Registration Board deferred the case for submission of reply to the above cited shortcomings.

Response of the Firm:

S.no.	Observations/Deficiencies/ Short-comings	Response of the Firm
1.	Submit specification of drug substance by both drug substance manufacturer and drug product manufacturer.	Firm submitted the requisite documents.
2.	Submit detailed method of analysis of the drug substance both by drug substance manufacturer and drug product manufacturer instead of referring to USP monograph.	Firm submitted the requisite documents.
3.	Submit analytical method verification report of drug substance performed by drug product manufacturer, as per the CTD guidance document approved by Registration Board.	Firm submitted the requisite documents.
4.	Justify for not including the result of water content test in the COA of drug substance , since the water content test is recommended by USP.	Amended COA of drug substance containing water determination test is submitted by the firm.
5.	Provide certificate of analysis of reference standard /working standard used for testing of the drug substance.	Submitted
6.	Justify for using preservative in the formulation of applied product, since the innovator/reference product was not using the preservative in their formulation.	Firm submitted the letter of justification from **KOREA UNITED PHARM. INC.**Address: 25-23, Nojanggongdan-gil, Jeondong-myeon, Sejong-si, Republic of Korea, in which the firm stated that Nyrin Injection 200mg/20ml was developed as generic products to the originator product Calcium Folinate 10mg/ml Injection manufactured by M/s. Hospira which contained preservative. The preservative in Nyrin Injection is controlled according to pharmacopeia (Between 80.0% and 120.0%). No significant changes were observed as a result of the long term and accelerated stability test.
7.	Submit data of Pharmaceutical equivalence of the applied drug with the innovator / reference/ comparator product and results of all the quality tests (mentioned in any official pharmacopoeia or section 3.2.P.5.1 of this application) of the developed formulation and the innovator / reference / comparator product shall be submitted and discussed".	Firm submitted pharmaceutical equivalence report against the generic product Ferbon Injection of M/s. Samjin Pharma Co. Ltd.
8.	**Provide scientific justification for use of 3% overage in the formulation**. Firm replied that "The overage was added to the formulation to compensate with any loss during the manufacturing process. When it was prepared, all raw materials including active substance was 3% over-filled to compensate actual volume.	

	<table><tr><th>Manufacturing Step</th><th>Overage (%)</th><th>Justification</th></tr><tr><td>Preparation</td><td>3%</td><td>API and Excipients should be increased by 3% from the amount approved to compensate actual volume.</td></tr><tr><td>Filling</td><td>3%</td><td>The preparation solution should be increased by 3% to compensate actual volume.</td></tr></table> The Volume variation test after the filling process is performed. The PV report show the result of Volume variation after the filling process (Filling volume: 20.6 mL/V), and the result is suitable in specification (Specification: 20.30-20.90 mL/V). Since overfilling is done after over weighing (overage) for all raw materials, there is no effect to the concentration of the finished product.	
9.	Provide details regarding the method of sterilization of the drug product because, during manufacturing of drug product neither you have performed terminal sterilization nor the filling has been done in aseptic conditions.	Firm replied that with the Media Fill validation protocol that preparation process, filtration process, filling process and sealing process in the process for vial Injection is always performed within the acceptable contamination limit by simulating the aseptic process according to regular revalidation of the SVP filling workplace.
10.	You have submitted the analytical method validation report of strength 50mg/5ml Nyrin Injection instead of 200mg/20ml strength, submit the verification report of applied strength	Firm submitted the analytical method verification report of strength 200mg/20ml.
11.	Justify for adjusting the pH of injection towards the higher value i.e. 8.1 as reflected from the submitted batch analysis report, while the reference product approved in USFDA recommends to adjust at 7.8.	Firm submitted the letter of justification from **KOREA UNITED PHARM. INC.**Address: 25-23, Nojanggongdan-gil, Jeondong-myeon, Sejong-si, Republic of Korea, in which the Manufacturer Abroad stated that pH of Nyrin Injection 200mg/20ml is controlled according to Leucovorin Calcium Injection in USP is between pH :6.5-8.5.
12.	Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product under section 2.3.R.1.1, for which stability studies data is provided in Module 3 section 3.2. P.8.	Submitted

Decision: Approved as per Policy for inspection of Manufacturer abroad and verification of local storage facility.

953.	Name, address of Applicant / Marketing Authorization Holder	**Innovegic Pharmaceuticals** **Plot # C-19, Second Floor, Main Road, RCCI, Industrial Area, Rawat, Islamabad.**

	Details of fee submitted	PKR 150,000/-: dated 14-01-2022
	The proposed proprietary name / brand name	Telisin injection 8.5ml:0.85mg
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial contains: 1mg of terlipressin acetate equivalent to 0.85mg of terlipressin
	Pharmaceutical form of applied drug	Solution for injection
	Pharmacotherapeutic Group of (API)	Posterior Pituitary Lobe hormone(Vasopressin and analogues)
	Reference to Finished product specifications	Innovator's Specification
	Proposed Pack size	5x8.5ml
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Glycopressin injection by Ferring Pharmaceuticals, UK.
	For generic drugs (me-too status)	Europress Injection by M/s Rotex Medica Pharmaceuticals ,Islamabad
	Name and address of API manufacturer.	Chinese Peptide Company No.69,12th Street,HEDA Zhejiang,310018 China
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form,

		manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies of Drug Substance	Stability study conditions: Real time: 2-8°C for 18 months Accelerated: 25°C ± 2°C / 60% ± 5%RH for 6 months Batches: (18082701, 18090601, 18120702)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Stability studies of Drug Product	Stability study conditions: Real time: 2-8°C for 36 months Accelerated: 25°C ± 2°C / 60% ± 5%RH for 6 months Batches: (T190707, T190708, T190709)
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical equivalence performed against RMP Glycylpressin of M/s. Ferring Pharmaceuticals.
	Analytical method validation/verification of product	Firm has submitted verification studies of the drug substance and the drug product.

Remarks OF Evaluator:

S.no.	Sections	Observations/Deficiencies/ Short-comings
1.	1.3.3	• Submit valid original and legalized Certificate of Pharmaceutical Product (CoPP) / Free Sale certificate and GMP certificate of the Manufacturer issued by relevant regulatory authority in the country of origin and name of exporting country, since you have submitted the copy of CoPP/ Free sale certificate. • Further, submit letter of authorization/sole agent agreement from Product license holder i.e. M/s. ADOH B.V. Godfried Bomansstraat 31 6543 JA Nijmegen, The Netherland. Furthermore, clarify the route of shipment of applied product in Pakistan along with legalized requisite document.
2.	3.2.S.4.1	Justify for not adopting the BP specification for the analysis of drug substance when the monograph of drug substance is available in BP.
3.	3.2.S.4.2	Please clarify the analytical method used for analysis of amino acid, since the submitted procedures of amino acid analysis are not in accordance with the reference general chapter of amino acid i.e.2.2.56 as mentioned in BP monograph of terlipressin.
4.	3.2.S.4.4	Please submit the English translated copy of COA of drug substance by drug substance manufacturer.
5.	3.2.S.5	Provide certificate of analysis of reference standard /working standard used for testing of the drug substance.
6.	3.2.P.1	Scientific justification is required for using overage of active ingredient in the formulation along with overfilling of quantity per vial.
7.	3.2.P.2.2 .1	Provide pharmaceutical equivalence report in which comparative quality analysis of both tested product and reference product should be presented in the tabulated form.
8.	2.3.R.1. 1	Please clarify the fill volume range mentioned in BMR i.e. between 9.12g-9.30g with reference to the label claim of applied product which is 0.85mg Terlipressin (base free) contains in 8.5ml solution.

Decision of 331st meeting of Registration Board:
Registration Board deferred the case for submission of reply to the above cited shortcomings.

Response of the Firm:

S.no.	Sections	Short-comings	Response of the Firm
1.	1.3.3	Submit valid original and legalized Certificate of Pharmaceutical Product (CoPP) / Free Sale certificate and GMP certificate of the Manufacturer issued by relevant regulatory authority in the country of origin and name of exporting country, since you have submitted the copy of CoPP/ Free sale certificate.	Firm submit the original legalized CoPP (certificate no. 20230131) issue dated 25-10-2023 by Hainan Provincial Medical Products Administration and valid till 24-10-2025.
2.	1.3.3	Further, submit letter of authorization/sole agent agreement from Product license holder i.e. M/s. ADOH B.V. Godfried Bomansstraat 31 6543 JA Nijmegen, The Netherland. Furthermore, clarify the route of shipment of applied product in Pakistan along with legalized requisite document.	Firm not submitted the reply of this query.
3.	3.2.S.4.1	Justify for not adopting the BP specification for the analysis of drug substance when the monograph of drug substance is available in BP.	Firm replied that the proposed specification of drug substance is equivalent or stricter than BP monograph of Terlipressin.
4.	3.2.S.4.2	Please clarify the analytical method used for analysis of amino acid, since the submitted procedures of amino acid analysis are not in accordance with the reference general chapter of amino acid i.e.2.2.56 as mentioned in BP monograph of terlipressin.	Firm replied that the specification and analytical procedure of analysis of amino acid is established as per the specification and analytical procedure listed in CEP of terlipressin, which has been approved by EMA. Since the analytical procedure listed in Ph. Eur. 2.2.56 are the general procedure which are not established for the specific product, so the proposed analytical procedure is not exactly same as the method in Ph. Eur. 2.2.56. The proposed method is specific for the Terlipressin manufactured by Chinese Peptide Company and also the proposed analytical procedure has been fully validated for the use.
5.	3.2.S.4.4	Please submit the English translated copy of COA of drug substance by drug substance manufacturer.	Submitted
6.	3.2.S.5	Provide certificate of analysis of reference standard /working standard used for testing of the drug substance.	Submitted

7.	3.2.P.1	Scientific justification is required for using overage of active ingredient in the formulation along with overfilling of quantity per vial. Firm replied that there is no overage in the proposed drug product. The filling weight is determined on analysis on RMP and extractable study. Firstly, the analysis on RMP shows that the filling volume of RMP is about 9ml, so we firstly designed a filling volume of 9ml equivalent to 9.03g, to achieve the quantitative equivalence with the RMP. Secondly, according to USP <1151>, each container of an injection is filled with a volume in slight excess of the labelled size, a series of extractable quantity studies were performed. The study result demonstrated that when control the filling weight above 9.03g (i.e.9ml) the actual available extractable amount can satisfy the labelled amount (8.5ml, equal to 8.53g). The concentration of terlipressin in terlipressin solution for injection is 0.1mg/ml, thus the quantity of terlipressin in each vial should be 0.9mg (calculated on anhydrous, acetic acid free-base). Compared to label amount of 0.85mg, there is about 6% overfill. However, the manufacturer should follow the general guidance of USP <1151> on the target volume i.e. 8.5 ml as per the label claim of drug product instead of targeting the filled volume of reference pack of RMP.	
8.	3.2.P.2.2.1	Provide pharmaceutical equivalence report in which comparative quality analysis of both tested product and reference product should be presented in the tabulated form.	Firm submitted the pharmaceutical equivalence report performed against the product GLYCYLPRESSIN (batch no. N00043C).
9.	2.3.R.1.1	Please clarify the fill volume range mentioned in BMR i.e. between 9.12g-9.30g with reference to the label claim of applied product which is 0.85mg Terlipressin (base free) contains in 8.5ml solution.	Firm replied that in order to achieve the quantitative equivalence with the RMP and ensure the sufficient extractable quantity (i.e. 0.85mg terlipressin) of terlipressin solution for injection, the minimum filling weight is determined to be 9.03g I.e. the lower limit of action level is 9.03g.

Decision of 333rd meeting of Registration Board:

Deferred for following:

- Clarification is required regarding the product license holder, since the earlier submitted documents revealed that the Product license holder is M/s. ADOH B.V. Godfried Bomansstraat 31 6543 JA Nijmegen, The Netherland and the recently submitted CoPP specified that the product license holder is Hainan poly pharma Co. Ltd., China.
- Submit letter of authorization/sole agent agreement from Product license holder. Furthermore, clarify the route of shipment of applied product in Pakistan along with legalized requisite document.
- Justify the target fill volume for applied product with reference to the label claim and allowable "Excess Volume in injections" as per USP General Chapter <1151>.

Response of the Firm:

- **Clarification is required regarding the product license holder, since the earlier submitted documents revealed that the Product license holder is M/s. ADOH B.V. Godfried Bomansstraat 31 6543 JA Nijmegen, The Netherland and the recently submitted CoPP specified that the product license holder is Hainan poly pharma Co. Ltd., China.**

Firm replied that the product License holder is M/s. Hainan Poly Pharma Co. Ltd., China. After completing the manufacturing of submission batches for Terlipressin solution for injection, we applied for registrations in several markets, including the Netherlands and China. At the time of the initial submission in Pakistan, only the Netherlands market was approved, so the CoPP they submitted was applied from the Netherlands. According to the rules governing medicinal products in the European Union, volume 2A.

The marketing Authorization holder must be established within EEA. &quot: so in the CoPP that they applied from the Netherlands, ADOH (established within the EEA) is embodied as the MAH, and the Hainan Poly is embodied as the Manufacturer. Therefore, the earlier submitted documents revealed that the Product license holder is M/s. ADOH B.V. Godfried Bomansstraat 31 6543 JA Nijmegen.

Then, at the time of providing the recent CoPP, Terlipressin solution for injection was already approved in China, so we applied the CoPP IN China in order to reply to the Pakistan Agency as early as possible. The

recent CoPP was based on the product approved in China, so Hainan Poly was reflected as the MAH in the CoPP.

- **Submit letter of authorization/sole agent agreement from Product license holder. Furthermore, clarify the route of shipment of applied product in Pakistan along with legalized requisite document.**

Firm submitted copy of sole agent Authorization letter in which it is specify that M/s. Hainan Poly Pharm. Co. Ltd., Guilinyang Economic Development Area, Haikou, Hainan Province, 571127, China have duly authorized M/s. Innovegic Pharmaceuticals to act as the agent for the registration, sale, and marketing of product Terlipressin Injection in Pakistan.

- **Justify the target fill volume for applied product with reference to the label claim and allowable "Excess Volume in injections" as per USP General Chapter <1151>.**

Firm replied that the fill volume of applied product is 9ml(i.e.9.03g), also conform to the requirement as listed in USP General Chapter <1151>.

Recommended Excess Volume		
Labeled Size	**For Mobile Liquids**	**For Viscous Liquids**
0.5 mL	0.10 mL	0.12 mL
1.0 mL	0.10 mL	0.15 mL
2.0 mL	0.15 mL	0.25 mL
5.0 mL	0.30 mL	0.50 mL
10.0 mL	0.50 mL	0.70 mL
20.0 mL	0.60 mL	0.90 mL
30.0 mL	0.80 mL	1.20 mL
50.0 mL or more	2%	3%

Labelled size of the applied product is 8.5ml based on the information given in the above table 0.5ml of the excess volume should be proposed, therefore the fill volume 9ml of the applied product conform to the requirement of USP General Chapter <1151> (8.5ml +0.5ml=9ml).

Decision: Approved as per Policy for inspection of Manufacturer abroad and verification of local storage facility.

Evaluation by PEC:

Sr. no.	Observations/Deficiencies/ Short-comings	Response of the Firm
1.	Submit data of analytical Method verification studies under section 3.2.S.4 including specificity, accuracy and repeatability (method precision) since you have submitted validation studies GC method for determination of residual solvent of Sunitinib Malate.	Firm has submitted the reply of this query.
2.	Scientific justification is required that how the applied product will be pharmaceutically equivalent to the innovator product i.e. sutent in which the granules are filled in capsules, while in the applied product dry powder mixture of	Firm has not submitted the reply of this query.

	active material and excipient are filled in capsules.	
3.	All quality test which have been included in the finished product specification was not performed during pharmaceutical equivalence studies, clarification is required in this regard.	Firm has not submitted the reply of this query.
4.	Assay limits mentioned in the pharmaceutical equivalence data is in percentage without the clarification that either it is the quantification of salt or its base form. While the acceptance criteria specified in the finished product specification was content of sunitinib per capsule :22.50mg to 27. 50mg.Justification is required regarding the disparity in acceptance criteria of assay of drug product.	Firm has not submitted the reply of this query.
5.	As per the chromatographic condition specified in the procedure of dissolution testing under section 3.2.P.2: wavelength of UV detector was 230nm, column temperature 25°C and retention time is 2 min (as per chromatograms) while the chromatographic condition specified under section 3.2.P.5.2: wavelength of UV detector is 430nm, column temperature 30°C and retention time is approx.6.0 minutes. Justification is required regarding the variation in chromatographic condition despite using the same dissolution medium i.e.0.1M HCl +0.5% sodium lauryl sulphate.	Firm has not submitted the reply of this query.
6.	According to the FDA's Dissolution guidance document 2018 (same document has been referred for innovator product) the standard dissolution testing condition for sunitinib malate capsule should be *"Paddle Method (USP apparatus 2) • Stirring rate = 50 RPM • 500 mL of 0.1N HCl in aqueous medium • No surfactant in medium • 37±0.5°C"*. While the dissolution condition specified by the drug product manufacturer under section 3.2.P.2 and 3.2.P.5.2 was different from the said FDA's guidance document. Scientific justification is required in this regard.	Firm has not submitted the reply of this query.
7.	Justify the dissolution specification NLT 70% of the labelled amount of sunitinib is dissolved in 60 minutes since the acceptance criteria as per the FDA dissolution database for the innovator product is "*for immediate release solid oral drug products containing a high solubility drug substance the dissolution criterion is Q=80% in 30 minutes".*	Firm has not submitted the reply of this query.

8.	Same comparative dissolution profile data has been submitted for sunitix 25 capsule and sunitix 12.5 capsule, clarification is required in this regard.	Firm has not submitted the reply of this query.
9.	• Detailed analytical method validation report is required mentioning the concentration of test solutions and their individual results along with the results of mean value. • Analytical method validation protocol specified assay method for capsule containing granules while the manufacturing process of drug product evident that capsule containing dry powder mixture of active material and excipient has been prepared. Justification is required that how the validation studies performed on assay method of capsule containing granules be applied on capsule containing dry powder mixture of active and excipients.	Firm has submitted the revised analytical method validation for drug product.
10.	Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product under section 2.3.R.1.1, for which stability studies data is provided in Module 3 section 3.2. P.8.	Firm submitted BMR, according to which 269.19 gm of sunitinib Malate having potency of 99.3% has been for manufacturing of 8,000 capsule.
11.	Firm has already had registration of sunitinib Malate Capsule imported from Germany and details are as follows: Product License Holder: Aqvida GmbH Kaiser-Wilhelm-Strabe 89 20355 Hamburg Germany. Manufacturer: M/s Combino Pharm (Malta) Ltd. HF 60, Hal Far Industrial Estate, Hal Far, Birzebbugia, BBG3000, Malta. Sunitinib Aqvida 12.5mg hard capsule (Reg.no.103778) Sunitinib Aqvida 25mg hard capsule (Reg.no.103779) Sunitinib Aqvida 50mg hard capsule (Reg.no.103780)	

Decision of 322nd meeting of Registration Board:

Deferred for submission of following:

- *Scientific justification is required that how the applied product will be pharmaceutically equivalent to the innovator product i.e. sutent in which the granules are filled in capsules, while in the applied product dry powder mixture of active material and excipient were filled in capsules.*
- *Submission of pharmaceutical equivalence report in which all the quality parameters of drug product specification should be included.*
- *Justification is required regarding the disparity in acceptance criteria of assay of drug product, assay limits mentioned in the pharmaceutical equivalence data is in percentage without the clarification that either it is the quantification of salt or its base form. While the acceptance criteria specified in the finished product specification was content of sunitinib per capsule :22.50mg to 27. 50mg.*
- *Scientific justification is required for using dissolution condition different from the dissolution parameters recommended in USFDA's innovator brand review report.*
- *Justify the dissolution specification NLT 70% of the labelled amount of sunitinib is dissolved in 60 minutes since the acceptance criteria as per the FDA dissolution database for the innovator product is "for immediate release solid oral drug products containing a high solubility drug substance the dissolution criterion is Q=80% in 30 minutes".*
- *Same comparative dissolution profile data has been submitted for sunitix 25 capsule and sunitix 12.5 capsule, clarification is required in this regard.*

Response of the Firm:
Scientific justification is required that how the applied product will be pharmaceutically equivalent to the innovator product i.e. sutent in which the granules are filled in capsules, while in the applied product dry powder mixture of active material and excipient were filled in capsules.

Firm replied that as per *GUIDELINE THE INVESTIGATION OF BIOEQUIVALENCE* (Doc. Ref.: CPMP/EWP /QWP/1 401/98 Rev. 1/ Corr**) (EMA guidelines) Medicinal products are pharmaceutically equivalent if they contain the same amount of the same active substance(s) in the same dosage forms that meet the same or comparable standards.
We have manufactured Sunitix Capsule is identical as oral capsule dosage form as reference product (Sutent Capsule). Sunitix Capsule contains Sunitinib Malate equivalent Sunitinib which is identical Sutent Capsule which contains Sunitinib Malate equivalent Sunitinib.
An open label, balanced, randomized, two-treatment, two-sequence, two- period, crossover oral bioequivalence study of single dose of Sunitix Capsule (Each capsule contains Sunitinib Malate equivalent Sunitinib) of Beacon Pharmaceuticals Limited with Sutent Capsule (Each capsule contains Sunitinib Malate equivalent Sunitinib) of Pfizer Limited already performed. There was no serious adverse effect reported during study period & clinically safe as a single oral dose administration. Based on Pharmacokinetic Variables & statistical evaluation, it was observed that for both the test & reference product are bioequivalent.

Submission of pharmaceutical equivalence report in which all the quality parameters of drug product specification should be included.

Firm submitted the revised pharmaceutical equivalence report in which all the quality test was included in line with drug product specification.

Justification is required regarding the disparity in acceptance criteria of assay of drug product, assay limits mentioned in the pharmaceutical equivalence data is in percentage without the clarification that either it is the quantification of salt or its base form. While the acceptance criteria specified in the finished product specification was content of sunitinib per capsule :22.50mg to 27. 50mg.

Firm submitted the revised pharmaceutical equivalence report in which the assay limit is specified both in percentage and in mg.

As per the chromatographic condition specified in the procedure of dissolution testing under section 3.2.P.2: wavelength of UV detector was 230nm, column temperature 25°C and retention time is 2 min (as per chromatograms) while the chromatographic condition specified under section 3.2.P.5.2: wavelength of UV detector is 430nm, column temperature 30°C and retention time is approx.6.0 minutes. Justification is required regarding the variation in chromatographic condition despite using the same dissolution medium i.e.0.1M HCl +0.5% sodium lauryl sulphate.

Firm replied that "We have four (04) strength of Sunitinib Capsule and developed in different time as in-house method. In that time the molecule was not available in FDA and till now not available in pharmacopoeia. Recently we observed that assay, dissolution, impurity chromatographic conditions are not harmonized. We take initiative and harmonized these methods and solved the different chromatographic conditions. So there have some variations in previous condition with current condition. In future it will be inline."
Scientific justification is required for using dissolution condition different from the dissolution parameters recommended in USFDA's innovator brand review report.

Justify the dissolution specification NLT 70% of the labelled amount of sunitinib is dissolved in 60 minutes since the acceptance criteria as per the FDA dissolution database for the innovator product is "for immediate release solid oral drug products containing a high solubility drug substance the dissolution criterion is Q=80% in 30 minutes".

Firm submitted the revised dissolution with the claimed of in line to innovator product sutent capsule of USFDA, but the revised dissolution conditions and acceptance criteria is still not in accordance with innovator product.

Dissolution condition of applied product	Dissolution condition of Innovator's Formulation
Apparatus USP II (Paddle System) Dissolution medium: 0.1N HCl Volume: 500ml RPM: 50 Temperature: 37°C ± 0.5°C Dissolution Time: 60 minutes Acceptance Criteria: NLT 70% of the labeled amount of sunitinib is dissolved in 60 minutes.	Apparatus USP II (Paddle System) Dissolution medium: 0.1M HCl Volume: 900ml Temperature: 37°C ± 0.5°C Dissolution acceptance criteria : NLT Q in 30 minutes.

Same comparative dissolution profile data has been submitted for sunitix 25 capsule and sunitix 12.5 capsule, clarification is required in this regard.

Firm replied that This is referring to Bioequivalence study completed for product with higher strength, bio waiver for bioequivalence is acceptable for lower strength based on bioequivalence study on higher strength, dissolution testing of both higher and lower strength and proportional similarity of the formulations between lower strength and higher strength.

Decision of 329th meeting of Registration Board:

Deferred for the submission of following shortcomings:

- Submit the revised dissolution conditions along with dissolution acceptance criteria in line with innovator product. Further the dissolution performance report of stability batches which are in accordance with revised acceptance criteria.
- Submit separate comparative dissolution profile data of both strength of sunitix 25mg and 12.5mg capsules

Response of the Firm:

Submit the revised dissolution conditions along with dissolution acceptance criteria in line with innovator product. Further the dissolution performance report of stability batches which are in accordance with revised acceptance criteria.

Firm submitted the dissolution conditions along with acceptance criteria in-line with innovator product. Further, submitted the validation report of dissolution method. Further, submmittd the commitment letter on the letter head of M/s Beacon Pharmaceuticals Limited, in which it is stated that "We have four strengths of sunitinib capsule and developed in different time as in-house method. In that time the molecule was not available in FDA and till now not available in pharmacopeia. Recently we observed that assay, dissolution, impurity chromatographic conditions are not harmonized. We take initiative and harmonized these methods and solved the different chromatographic conditions in line to innovator product.

Submit separate comparative dissolution profile data of both strengths of sunitix 25mg and 12.5mg capsules

Firm submitted the CDP REPORT of sunitix capsule 25mg performed against sutent 25mg capsule of Pfizer Pharma.

Decision of 331st meeting of Registration Board:

Deferred for submission of performance report of dissolution test in accordance with revised dissolution procedure and acceptance criteria.

Response of the Firm:

Firm submitted performance report of dissolution test in accordance with revised dissolution procedure and acceptance criteria.

Decision: Approved as per Policy for inspection of Manufacturer abroad and verification of local storage facility.

	sunitix 12.5 capsule, clarification is required in this regard.	
9.	Detailed analytical method validation report is required mentioning the concentration of test solutions and their individual results along with the results of mean value. Analytical method validation protocol specified assay method for capsule containing granules while the manufacturing process of drug product evident that capsule containing dry powder mixture of active material and excipient has been prepared. Justification is required that how the validation studies performed on assay method of capsule containing granules be applied on capsule containing dry powder mixture of active and excipients.	Firm has submitted the revised analytical method validation for drug product.
10.	Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product under section 2.3.R.1.1, for which stability studies data is provided in Module 3 section 3.2. P.8.	Firm submitted BMR, according to which 269.19 gm of sunitinib Malate having potency of 99.3% has been for manufacturing of 8,000 capsule.
11.	Firm has already had registration of sunitinib Malate Capsule imported from Germany and details are as follows: Product License Holder: Aqvida GmbH Kaiser-Wilhelm-Strabe 89 20355 Hamburg Germany. Manufacturer: M/s Combino Pharm (Malta) Ltd. HF 60, Hal Far Industrial Estate, Hal Far, Birzebbugia, BBG3000, Malta. Sunitinib Aqvida 12.5mg hard capsule (Reg.no.103778) Sunitinib Aqvida 25mg hard capsule (Reg.no.103779) Sunitinib Aqvida 50mg hard capsule (Reg.no.103780)	

Decision of 322nd meeting of Registration Board:
Deferred for submission of following:

- *Scientific justification is required that how the applied product will be pharmaceutically equivalent to the innovator product i.e. sutent in which the granules are filled in capsules, while in the applied product dry powder mixture of active material and excipient were filled in capsules.*
- *Submission of pharmaceutical equivalence report in which all the quality parameters of drug product specification should be included.*
- *Justification is required regarding the disparity in acceptance criteria of assay of drug product, assay limits mentioned in the pharmaceutical equivalence data is in percentage without the clarification that either it is the quantification of salt or its base form. While the acceptance criteria specified in the finished product specification was content of sunitinib per capsule :22.50mg to 27. 50mg.*
- *Scientific justification is required for using dissolution condition different from the dissolution parameters recommended in USFDA's innovator brand review report.*
- *Justify the dissolution specification NLT 70% of the labelled amount of sunitinib is dissolved in 60 minutes since the acceptance criteria as per the FDA dissolution database for the innovator product is "for immediate release solid oral drug products containing a high solubility drug substance the dissolution criterion is Q=80% in 30 minutes".*
- *Same comparative dissolution profile data has been submitted for sunitix 25 capsule and sunitix 12.5 capsule, clarification is required in this regard.*

Response of the Firm:
Scientific justification is required that how the applied product will be pharmaceutically equivalent to the innovator product i.e. sutent in which the granules are filled in capsules, while in the applied product dry powder mixture of active material and excipient were filled in capsules.

Firm replied that as per *GUIDELINE THE INVESTIGATION OF BIOEQUIVALENCE* (Doc. Ref.: CPMP/EWP /QWP/1 401/98 Rev. 1/ Corr**) (EMA guidelines) Medicinal products are pharmaceutically equivalent if they contain the same amount of the same active substance(s) in the same dosage forms that meet the same or comparable standards.
We have manufactured Sunitix Capsule is identical as oral capsule dosage form as reference product (Sutent Capsule). Sunitix Capsule contains Sunitinib Malate equivalent Sunitinib which is identical Sutent Capsule which contains Sunitinib Malate equivalent Sunitinib.
An open label, balanced, randomized, two-treatment, two-sequence, two- period, crossover oral bioequivalence study of single dose of Sunitix Capsule (Each capsule contains Sunitinib Malate equivalent Sunitinib) of Beacon Pharmaceuticals Limited with Sutent Capsule (Each capsule contains Sunitinib Malate equivalent Sunitinib) of Pfizer Limited already performed. There was no serious adverse effect reported during study period & clinically safe as a single oral dose administration. Based on Pharmacokinetic Variables & statistical evaluation, it was observed that for both the test & reference product are bioequivalent.

Submission of pharmaceutical equivalence report in which all the quality parameters of drug product specification should be included.

Firm submitted the revised pharmaceutical equivalence report in which all the quality test was included in line with drug product specification.

Justification is required regarding the disparity in acceptance criteria of assay of drug product, assay limits mentioned in the pharmaceutical equivalence data is in percentage without the clarification that either it is the quantification of salt or its base form. While the acceptance criteria specified in the finished product specification was content of sunitinib per capsule :22.50mg to 27. 50mg.

Firm submitted the revised pharmaceutical equivalence report in which the assay limit is specified both in percentage and in mg.

As per the chromatographic condition specified in the procedure of dissolution testing under section 3.2.P.2: wavelength of UV detector was 230nm, column temperature 25°C and retention time is 2 min (as per chromatograms) while the chromatographic condition specified under section 3.2.P.5.2: wavelength of UV detector is 430nm, column temperature 30°C and retention time is approx.6.0 minutes. Justification is required regarding the variation in chromatographic condition despite using the same dissolution medium i.e.0.1M HCl +0.5% sodium lauryl sulphate.

Firm replied that "We have four (04) strength of Sunitinib Capsule and developed in different time as in-house method. In that time the molecule was not available in FDA and till now not available in pharmacopoeia. Recently we observed that assay, dissolution, impurity chromatographic conditions are not harmonized. We take initiative and harmonized these methods and solved the different chromatographic conditions. So there have some variations in previous condition with current condition. In future it will be inline."
Scientific justification is required for using dissolution condition different from the dissolution parameters recommended in USFDA's innovator brand review report.

Justify the dissolution specification NLT 70% of the labelled amount of sunitinib is dissolved in 60 minutes since the acceptance criteria as per the FDA dissolution database for the innovator product is "for immediate release solid oral drug products containing a high solubility drug substance the dissolution criterion is Q=80% in 30 minutes".

Firm submitted the revised dissolution with the claimed of in line to innovator product sutent capsule of USFDA, but the revised dissolution conditions and acceptance criteria is still not in accordance with innovator product.

Dissolution condition of applied product	Dissolution condition of Innovator's Formulation
Apparatus USP II (Paddle System) Dissolution medium: 0.1N HCl	Apparatus USP II (Paddle System) Dissolution medium: 0.1M HCl

Volume: 500ml RPM: 50 Temperature: 37°C ± 0.5°C Dissolution Time: 60 minutes Acceptance Criteria: NLT 70% of the labeled amount of sunitinib is dissolved in 60 minutes.	Volume: 900ml Temperature: 37°C ± 0.5°C Dissolution acceptance criteria : NLT Q in 30 minutes.

Same comparative dissolution profile data has been submitted for sunitix 25 capsule and sunitix 12.5 capsule, clarification is required in this regard.

Firm replied that This is referring to Bioequivalence study completed for product with higher strength, bio waiver for bioequivalence is acceptable for lower strength based on bioequivalence study on higher strength, dissolution testing of both higher and lower strength and proportional similarity of the formulations between lower strength and higher strength.

Decision of 329th meeting of Registration Board:

Deferred for the submission of following shortcomings:

- Submit the revised dissolution conditions along with dissolution acceptance criteria in line with innovator product. Further the dissolution performance report of stability batches which are in accordance with revised acceptance criteria.
- Submit separate comparative dissolution profile data of both strength of sunitix 25mg and 12.5mg capsules

Response of the Firm:

Submit the revised dissolution conditions along with dissolution acceptance criteria in line with innovator product. Further the dissolution performance report of stability batches which are in accordance with revised acceptance criteria.

Firm submitted the dissolution conditions along with acceptance criteria in-line with innovator product. Further, submitted the validation report of dissolution method. Further, submmittd the commitment letter on the letter head of M/s Beacon Pharmaceuticals Limited, in which it is stated that "We have four strengths of sunitinib capsule and developed in different time as in-house method. In that time the molecule was not available in FDA and till now not available in pharmacopeia. Recently we observed that assay, dissolution, impurity chromatographic conditions are not harmonized. We take initiative and harmonized these methods and solved the different chromatographic conditions in line to innovator product.

Submit separate comparative dissolution profile data of both strengths of sunitix 25mg and 12.5mg capsules

Firm submitted the CDP REPORT of sunitix capsule 12.5mg performed against sutent 12.5mg capsule of Pfizer Pharma.

Decision of 331st meeting of Registration Board:

Deferred for submission of performance report of dissolution test in accordance with revised dissolution procedure and acceptance criteria.

Response of the Firm:

Firm submitted performance report of dissolution test in accordance with revised dissolution procedure and acceptance criteria.

Decision: Approved as per Policy for inspection of Manufacturer abroad and verification of local storage facility.

	Reference to Finished product specifications	In house
	Proposed Pack size	28's
	Proposed unit price	As per current pricing policy of DRAP
	The status in reference regulatory authorities	Sutent 50mg capsule

	For generic drugs (me-too status)	Sutent (Pfizer Laboratories)
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Name, address of drug substance manufacturer	Nanjing First Pharmaceuticals Co. Ltd. China Room No.2303,Technical Garden B Place Industrial University No.5 Xinmofang Road, Nanjing, China
	Module-III Drug Substance:	Firm has submitted detailed drug substance data for both sources related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted long term stability study data of 3 batches of drug substance at 25°C ± 2°C / 60 ± 5% RH for 36 months. The accelerated stability data is conducted at 40°C ± 2°C / 75 ± 5% RH for 6 months
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Comparative analysis Studies against the reference product Sutent 50mg capsule (Pfizer Laboratories) has been submitted
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	HDPE bottle (each contains 28 capsules)
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches. Accelerated stability studies have been conducted at 40°C±2°C and 75%±5% RH for 6 months. Real time stability studies conducted at 30°C±2°C and 65% ± 5% for 36 months
Evaluation by PEC:		

Sr.no.	Observations/Deficiencies/ Short-comings	Response of the Firm
1.	Submit valid certificate of Good Manufacturing Practices of drug product manufacturer, since the submitted document has been expired in 2021.	Firm submitted the GMP certificate no. DA/6-110/06/6751 dated 23rd March,2023 issued by Directorate General of Drug Administration, Dhaka, Bangladesh and valid for 2 years.
2.	Submit data of analytical Method verification studies under section 3.2.S.4 including specificity, accuracy and repeatability (method precision) since you have submitted validation studies GC method for determination of residual solvent of Sunitinib Malate.	Firm submitted the analytical verification data of drug substance.
3.	Scientific justification is required that how your applied product be equivalent to innovator product as the sutent brand is the capsule filled with granules, while the applied product is the capsule filled with dry powder mixture of active material and excipient.	Firm replied that as per *GUIDELINE THE INVESTIGATION OF BIOEQUIVALENCE* (Doc. Ref.: CPMP/EWP /QWP/1 401/98 Rev. 1/ Corr**) (EMA guidelines) Medicinal products are pharmaceutically equivalent if they contain the same amount of the same active substance(s) in the same dosage forms that meet the same or comparable standards. We have manufactured Sunitix Capsule is identical as oral capsule dosage form as reference product (Sutent Capsule). Sunitix Capsule contains Sunitinib Malate equivalent Sunitinib which is identical Sutent Capsule which contains Sunitinib Malate equivalent Sunitinib. An open label, balanced, randomized, two-treatment, two-sequence, two- period, crossover oral bioequivalence study of single dose of Sunitix Capsule (Each capsule contains Sunitinib Malate equivalent Sunitinib) of Beacon Pharmaceuticals Limited with Sutent Capsule (Each capsule contains Sunitinib Malate equivalent Sunitinib) of Pfizer Limited already performed. There was no serious adverse effect reported during study period & clinically safe as a single oral dose administration. Based on Pharmacokinetic Variables & statistical evaluation, it was observed that for both the test & reference product are bioequivalent.
4.	*According to the FDA's Dissolution guidance document 2018 (same document has been referred for innovator product) the standard dissolution testing condition for sunitinib malate capsule should be "Paddle Method (USP apparatus 2) • Stirring rate = 50 RPM • 500 mL of 0.1N HCl in aqueous medium • No surfactant in medium • 37±0.5°C". While the dissolution medium specified by the drug product manufacturer under section 3.2.P.2 and 3.2.P.5.2 was different from the said FDA's guidance document in term of use of surfactant. Scientific justification is required for using different dissolution medium from that of innovator product approved in USFDA.* *Justify the dissolution specification NLT 70% of the labelled amount of sunitinib is dissolved in 60 minutes in light of FDA dissolution database and innovator product's review literature. Since the acceptance criteria as per the FDA dissolution database refer to FDA's dissolution guidance 2018 in which it is recommended that "for immediate release solid oral drug products containing a high solubility drug substance the dissolution criterion is Q=80% in 30 minutes", further, the innovator product approved in FDA also recommend Q at 30 minutes.* Firm submitted the revised dissolution with the claimed of in line to innovator product sutent capsule of USFDA along with revised CDP report.	

	Dissolution condition of applied product	Dissolution condition of Innovator's Formulation
	Apparatus USP II (Paddle System) Dissolution medium: 0.1N HCl Volume: 900ml RPM: 50 Temperature: 37°C ± 0.5°C Dissolution Time: 30 minutes Acceptance Criteria: NLT 80% of the labeled amount of sunitinib is dissolved in 30 minutes.	Apparatus USP II (Paddle System) Dissolution medium: 0.1M HCl Volume: 900ml Temperature: 37°C ± 0.5°C Dissolution acceptance criteria : NLT Q in 30 minutes.
5.	All quality test which have been included in the finished product specification was not performed during pharmaceutical equivalence studies, clarification is required in this regard.	Firm submitted the revised pharmaceutical equivalence report in which all the quality test was included in line with drug product specification.
6.	Assay limits mentioned in the pharmaceutical equivalence data is in percentage without the clarification that either it is the quantification of salt form or its base form. While the acceptance criteria specified in the finished product specification was content of sunitinib per capsule i.e.45.0mg to 55.0m. Justification is required regarding the disparity in acceptance criteria of assay of drug product in various sections.	Firm submitted the revised pharmaceutical equivalence report in which the assay limit is specified both in percentage and in mg.
7.	Detailed analytical method validation report is required mentioning the concentration of test solutions and their individual results along with the results of mean value.	Firm has submitted the revised analytical method validation for drug product.
8.	Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product under section 2.3.R.1.1, for which stability studies data is provided in Module 3 section 3.2. P.8.	Submitted

Decision of 333rd meeting of Registration Board:
Deferred for submission of performance report of dissolution test in accordance with revised dissolution procedure and acceptance criteria.

Response of the Firm:
Firm submitted performance report of dissolution test in accordance with revised dissolution procedure and acceptance criteria.

Decision: Approved as per Policy for inspection of Manufacturer abroad and verification of local storage facility.

Evaluation by PEC:

Therapeutic indications TAGRISSO as monotherapy is indicated for:

- the adjuvant treatment after complete tumour resection in adult patients with stage IB-IIIA non-small cell lung cancer (NSCLC) whose tumours have epidermal growth factor receptor (EGFR) exon 19 deletions or exon 21 (L858R) substitution mutations.
- the first-line treatment of adult patients with locally advanced or metastatic NSCLC with activating EGFR mutations.
- the treatment of adult patients with locally advanced or metastatic EGFR T790M mutation-positive NSCLC.

S.no.	Section	Observations/Deficiencies/ Short-comings
1.	1.3.4	Submit product specific letter of authorization from the Product License Holder, since the submitted authorization letter was not specified the product.
2.	1.3.5	The applied product is in L01 group i.e. cytotoxic drug and as per decision of Registration Board in its 282nd meeting, "*The manufacturing of cytotoxic drug shall be carried out in a dedicated or self-contained facilities and manufacturer shall provide safety and protective measures for workers and personnel which remain in direct contact or are involved in close handling of these drug*" Accordingly evidence of self-contained or dedicated facility of manufacturer abroad shall be submitted.
3.	3.2.S.2.1	Provide the complete manufacturing address of drug substance manufacturer, since you have only specified the title of drug substance manufacturer.
4.	3.2.S.4.1-3.2.S.4.2	Submit the specification and detailed analytical procedure of drug substance by drug product manufacturer.
5.	3.2.S.4.3	Provide analytical method validation report performed by drug product manufacturer.
6.	3.2.S.4.4	Provide batch analysis report of drug substance by the drug product manufacturer.
7.	3.2.S.5	Provide certificate of analysis of reference standard /working standard used for testing of the product.
8.	3.2.S.7	Submit stability data of drug substance performed both at accelerated and long term conditions till the claimed re-test period, since you have only submitted the data of 2 time points i.e. 1st and 3rd month.

9.	3.2.P.2.6	Innovator product claimed that tablets are formulated to be dispersible, when dosing of whole tablets is not possible, tablets may be administered as an aqueous dispersion. Reference to the innovator claim, did the applied formulation also dispersed in the similar manner as of innovator product. Further, did you performed the study for Use of Tablet Dispersion and impact of dispersion preparation on physiochemical properties of the final dosage form were assessed while formulation development.
10.	Conclusion of CDP report stated that test/applied formulation is the product of M/s. Beacon Pharmaceuticals, (Faridpur,sreepur,gazipur) Bangladesh, validation protocol claims that the Tasso tablet i.e. the applied product is of M/s. Julphar Bangladesh Ltd.(Gazipur,Sreepur) while the product license holder is M/s. Jenphar Bangladesh Ltd. (Vill-Faridpur, PS-Sreepur Dis-Gazipur).Clarification is required regarding the disparity observed related to the manufacturer of drug product in different section of CTD dossier, further, submitted the complete address of drug product manufacturer, since all three mentioned manufacturer have same address.	
11.	3.2.P.5.1	Justify the dissolution acceptance limit i.e. NLT 80% (Q) within 45 minutes adopted for the applied product comparing the acceptance limit of innovator product i.e. NLT (Q) within 30minutes.
12.	3.2.P.5.4	Submitted analytical method validation report is of Osimertinib 80mg Tablet of M/s. Julphar Bangladesh Ltd. while the applied product is Tasso 80 mg Tablet of M/s. Jenphar Bangladesh Ltd., clarification is required in this regard.
13.	2.3.R.1.1	Provide copy of Batch Manufacturing Record (BMR) of all the batches of drug product for which stability studies data is provided in Module 3 section 3.2. P.8.

Decision of 333rd meeting of Registration Board:
Deferred for submission of reply to above cited shortcomings.

Response of the Firm:

S.no.	Observations/Deficiencies/ Short-comings	Response of the Firm
1.	Submit product specific letter of authorization from the Product License Holder, since the submitted authorization letter was not specified the product.	Firm submitted the product specific Letter of authorization from the product License Holder.
2.	The applied product is in L01 group i.e. cytotoxic drug and as per decision of Registration Board in its 282nd meeting, "*The manufacturing of cytotoxic drug shall be carried out in a dedicated or self-contained facilities and manufacturer shall provide safety and protective measures for workers and personnel which remain in direct contact or are involved in close handling of these drug*" Accordingly evidence of self-contained or dedicated facility of manufacturer abroad shall be submitted.	Firm submitted a letter mentioning that they have separate oncology manufacturing facility without any GMP certificate or inspection report.
3.	Provide the complete manufacturing address of drug substance manufacturer, since you have only specified the title of drug substance manufacturer.	Firm submitted the complete address of API manufacturer "M/s. Shengda Pharmaceuticals Co. Ltd., Block H, Zhigu Industrial Park, Yintian Road, Xixiang, Baoan, Shenzhen China".
4.	Submit the specification and detailed analytical procedure of drug substance by drug product manufacturer.	Submitted
5.	Provide analytical method validation report performed by drug product manufacturer.	Submitted
6.	Provide batch analysis report of drug substance by the drug product manufacturer.	Submitted

7.	Provide certificate of analysis of reference standard /working standard used for testing of the product.	Submitted
8.	Submit stability data of drug substance performed both at accelerated and long term conditions till the claimed re-test period, since you have only submitted the data of 2 time points i.e. 1st and 3rd month.	Firm submitted the stability data of drug substance till the re-test period of 24 months.
9.	Innovator product claimed that tablets are formulated to be dispersible, when dosing of whole tablets is not possible, tablets may be administered as an aqueous dispersion. Reference to the innovator claim, did the applied formulation also dispersed in the similar manner as of innovator product. Further, did you performed the study for Use of Tablet Dispersion and impact of dispersion preparation on physiochemical properties of the final dosage form were assessed while formulation development.	Firm submitted SmPC of the applied product in which the tablet aqueous dispersion preparation has been given. Further submit the tablet dispersion comparative study of applied product.
10.	**Conclusion of CDP report stated that test/applied formulation is the product of M/s. Beacon Pharmaceuticals, (Faridpur,sreepur,gazipur) Bangladesh, validation protocol claims that the Tasso tablet i.e. the applied product is of M/s. Julphar Bangladesh Ltd.(Gazipur,Sreepur) while the product license holder is M/s. Jenphar Bangladesh Ltd. (Vill-Faridpur, PS-Sreepur Dis- Gazipur).Clarification is required regarding the disparity observed related to the manufacturer of drug product in different section of CTD dossier, further, submitted the complete address of drug product manufacturer, since all three mentioned manufacturer have same address.** Firm replied that Manufacturer of the product is M/s. Jenphar Bangladesh Limited **(Vill-Faridpur, PS-Sreepur Dis- Gazipur)** a changed name from M/s. Julphar Bangladesh Ltd. With same address. Further applicant replied that Manufacturer has performed CDP of the applied product with innovator as well as local Me-Too available products in Bangladesh, if the conclusion of CDP report of other company is mistakenly attached then please ignore it.	
11.	Justify the dissolution acceptance limit i.e. NLT 80% (Q) within 45 minutes adopted for the applied product comparing the acceptance limit of innovator product i.e. NLT (Q) within 30minutes.	Firm replied that in submitted CDP the dissolution profile showed the dissolution results greater than 93% of all three medias after 30 minutes which meets the acceptance criteria NLT 80%(Q), where manufacturer of the product decided the time of dissolution 45minutes where results are greater than 100%. However, according to general chapter of USP <1092> "*During product development, the collection of complete dissolution profile data is recommended from biobatches and stability batches at specified intervals, such as 10, 15, 20, 30, 40, 50, and 60 min or 15, 20, 30, 45, and 60 min, because these data are used to establish the dissolution acceptance criterion/criteria. From the dissolution profile data, a Q value of 80% should be set at the first time point where the average dissolution is at least 85%. However, this time point should not be less than 15 min".*
12.	Submitted analytical method validation report is of Osimertinib 80mg Tablet of M/s. Julphar Bangladesh Ltd. while the applied product is Tasso 80 mg Tablet of M/s.	Firm submitted change of company name letter from Julphar to Jenphar in the reply of this query.

	Jenphar Bangladesh Ltd., clarification is required in this regard.	

Decision: Deferred for submission/clarification of following:

- **Justify for adopting the dissolution acceptance limit NLT 80% (Q) within 45 minutes for the applied product comparing the acceptance limit of innovator product i.e. NLT (Q) within 30minutes, when the dissolution profile showed the dissolution results greater than 85% of all three medias within 30 minutes. Since USP general chapter <1092> recommends that "*From the dissolution profile data, a Q value of 80% should be set at the first time point where the average dissolution is at least 85%".***
- **Submitted analytical method validation report is of Osimertinib 80mg Tablet of M/s. Julphar Bangladesh Ltd. while the applied product is Tasso 80 mg Tablet of M/s. Jenphar Bangladesh Ltd., clarification is required in this regard.**

	The proposed proprietary name / brand name	Tirofiban Hydrochloride Injection 5mg/100ml
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each 100mL contains: Tirofiban Hydrochloride (calculated based on Tirofiban)5mg
	Pharmaceutical form of applied drug	Injection.
	Pharmacotherapeutic Group of (API)	Anti-Platelet
	Reference to Finished product specifications	Innovator's Specification
	Proposed Pack size	1x100ml neutral borosilicate glass infusion bottle
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	USFDA Approved (AGGRASTAT Injection)
	For generic drugs (me-too status)	Not confirmed in the applied volume i.e.100ml
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Name, address of drug substance manufacturer	Xi'an Wanlong Pharmaceutical Co. Ltd. No.2 Yongan Road, Yangling Agricultural Hi-tech Industrial Demonstration Zone Shaanxi China
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance. Drug substance monograph is present in USP.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 three batches of Tirofiban hydrochloride Injection instead of Tirofiban hydrochloride API.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical

		procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical equivalence study has been performed against the innovator product AGGRASTAT Injection (Batch no. C856260) which includes quality test (Appearance, pH , Assay, Citric Acid and sodium citrate content, sodium chloride content and related substance test.)
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	100ml- neutral borosilicate glass Infusion bottle
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 following batches The accelerated stability study data is conducted at 40ºC ±2ºC / 75% ± 5% RH for 6 months. The real time stability study data is conducted at 30ºC ±2ºC / 65% ± 5% RH. B171001,B171002,B171003

Evaluation by PEC:

S.no.	Sections	Observations/Deficiencies/ Short-comings
1.	1.3	Submit valid original and legalized Certificate of Pharmaceutical Product (CoPP) / Free Sale certificate and GMP certificate of the Manufacturer issued by relevant regulatory authority in the country of origin and name of exporting country, since the submitted documents are invalid.
2.	1.4	Submit valid drug sale license of VIZ Remedies Pakistan LLP ,since you have submitted the expired DSL.
3.	3.2.S.7	Submit stability data of three batches of drug substance performed at long term stability conditions till the claimed re-test date since you have submitted the data of only 12 months.
4.	3.2.P.3	Justify the use of activated carbon in the manufacturing procedure of sterile preparation to remove the bacterial endotoxin in the light of guidance documents of reference agencies.
5.	3.2.P.5.1	Justify how the labelled amount of tirofiban will be quantify, since the assay method given in section 3.2.P.5.2 calculate the quantity of tirofiban hydrochloride instead of labelled quantity of tirofiban without the salt factor.
6.	3.2.P.5.4	Justify for using the excipient sodium chloride in the product name along with tirofiban hydrochloride.

Decision of 326th meeting of Registration Board:

Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.

Response of the Firm:

S.no.	Observations/Deficiencies/ Short-comings	Response of the Firm
1.	Submit valid original and legalized Certificate of Pharmaceutical Product (CoPP) / Free Sale certificate and GMP certificate of the Manufacturer issued by relevant regulatory authority in the country of origin and name of exporting country, since the submitted documents are invalid.	Firm replied that they submitted original and legalized CoPP at the time of registration. However due to its expiration, renewed CoPP has been requested to the principal manufacturer.
2.	Submit valid drug sale license of VIZ Remedies Pakistan LLP ,since you have submitted the expired DSL.	Firm submitted the copy of DSL no. 0324 which is valid till 14/03/2028.

3.	Submit stability data of three batches of drug substance performed at long term stability conditions till the claimed re-test date since you have submitted the data of only 12 months.	Firm submitted the stability data of 36 months of three batches performed at long term conditions.
4.	Justify the use of activated carbon in the manufacturing procedure of sterile preparation to remove the bacterial endotoxin in the light of guidance documents of reference agencies.	Firm in their reply submitted a document, which only stated the quality parameters used for the analysis of activated charcoals INSTEAD of providing reference from international standard to rationalize the use of activated charcoal for sterilizing the injectable solution..
5.	Justify how the labelled amount of tirofiban will be quantify, since the assay method given in section 3.2.P.5.2 calculate the quantity of tirofiban hydrochloride instead of labelled quantity of tirofiban without the salt factor.	Firm clarify that they quantify the quantity of tirofiban by using external standard method, the obtained assay is for tirofiban hydrochloride, then the results will multiply by conversion coefficient (0.8899) to obtain labelled amount of Tirofiban.
6.	Justify for using the excipient sodium chloride in the product name along with tirofiban hydrochloride.	Firm replied that the role of sodium chloride in this formulation is as "Osmotic Pressure Modifier".

Decision of 333rd meeting of Registration Board:

Deferred for submission of following shortcomings:

- Submit valid original and legalized Certificate of Pharmaceutical Product (CoPP) / Free Sale certificate and GMP certificate of the Manufacturer issued by relevant regulatory authority in the country of origin and name of exporting country, since the submitted documents are invalid.
- Justify the use of activated carbon in the manufacturing procedure of sterile preparation to remove the bacterial endotoxin in the light of guidance documents of reference agencies.

Response of the Firm:

- **Submit valid original and legalized Certificate of Pharmaceutical Product (CoPP) / Free Sale certificate and GMP certificate of the Manufacturer issued by relevant regulatory authority in the country of origin and name of exporting country, since the submitted documents are invalid.**

Firm replied that the valid original and legalized Certificate of Pharmaceutical Product (CoPP) were submitted at the time of submission of registration application.

- **Justify the use of activated carbon in the manufacturing procedure of sterile preparation to remove the bacterial endotoxin in the light of guidance documents of reference agencies.**

Firm submitted guidance document of PMDA, Japan "Guidance on the Manufacture of Sterile Pharmaceutical Products by Aseptic Processing" but the submitted documents did not contain any material relevant to the use of activated charcoal carbon in the manufacturing procedure of sterile preparation to remove the bacterial endotoxin. Further, firm submitted the patent documents of tirofiban hydrochloride as a proof of use of activated carbon instead of tirofiban hydrochloride injection.

Decision:Deferred for submission of relevant guidance document of reference agencies which clearly recommends the usage of activated carbon in the manufacturing procedure of sterile preparation for removal of bacterial endotoxin.

	Name, address of drug substance manufacturer	M/s. Mac Chem Products (India) Pvt. Ltd. N-211/2/10.Tarapur MIDC,Biosar,District Thane, India
	Module-III Drug Substance:	Firm has submitted detailed drug substance data for both sources related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of API at accelerated as well as real time conditions. The real time stability data is conducted at 30ºC ± 2ºC,60%±5% RH (60 months) and accelerated time stability study conducted at 40°C±2°C,75%±5% RH (6 months) of following batches: BCL0211001,BCL0211002,BCL0211003
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical equivalence has established against the innovator product casodex 50mg Tablet (M/s. AstraZeneca Pvt. Ltd.) Batch no. 60022647. Comparative dissolution has performed in all three recommended physiological medium against the innovator brand.
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	Alu foil & PVC film coated with PVDC Blister foil.
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches of 10,000 tablets batch size. The accelerated stability

		study is conducted at 40°C/75%RH and data of 6 months has submitted. The real time stability study is conducted at 30°C±2°C/75%±5%RH. The real time stability study data of 24 months has been submitted. Batch no. NT1160,NT1161,NT1162

Evaluation by PEC:

S.no.	Observations/Deficiencies/ Short-comings	Reply of the Firm
1.	Drug substance Bicalutamide is a racemate mixture, please provide the detail along with quantitative results, that which enantiomeric form of API has been used in the manufacturing of drug product.	Bicalutamide is racemic mixture i.e. a mixture of equal quantities (50:50) of two enantiomers.as single enantiomeric form is not used, enantiomeric purity is not applicable. *CASODEX is a racemate with its antiandrogenic activity being almost exclusively exhibited by the R-enantiomer of bicalutamide; the S-enantiomer is essentially inactive.*
2.	Justify for keeping the water content limit NMT 7.0% comparing the water content of active ingredient NMT 0.2%.	Firm replied that our product complies with the current USP monograph of bicalutamide tablet 50mg ,drug product monograph in USP does not contain water content test ,hence the limit of water content was given in-house based on the water content of API ,excipients and manufacturing process.
3.	justify, for submitting the validation report of 150mg strength instead of applied 50mg strength.	Submitted

Registration Board was apprised regarding an e. mail received to Director PE&R Division from M/s Miles International India (authorized exclusive representative for the export of products manufactured by Naprod Life Sciences for the Pakistan region), wherein firm has requested to not consider any product registration applications made by any other party other than LDS as they will not be able to supply these products in the future.

Decision of 324th meeting of Registration Board:

Deferred for following:

- Verification of "Sole Agency Agreement" between M/s. Al Habib Pharmaceuticals, Plot # 81, Block B, SMCHS, Karachi & M/s Naprod Life Sciences Pvt. Ltd. Factory: G-17/1, M.I.D.C., Tarapur, Boisar, Dist. Thane-401 506, India.
- Scientific justification regarding declaration of Bicalutamide as racemic mixture i.e. a mixture of equal quantities (50:50) of two enantiomers.

Response of the Firm:

- **Verification of "Sole Agency Agreement" between M/s. Al Habib Pharmaceuticals, Plot # 81, Block B, SMCHS, Karachi & M/s Naprod Life Sciences Pvt. Ltd. Factory: G-17/1, M.I.D.C., Tarapur, Boisar, Dist. Thane-401 506, India.**

Firm has submitted Original Notarized Authorization Letter Dated: 14th July, 2023

"We (NAPROD LIFE SCIENCES PVT LTD, India) having address at (304. Town Center-1, Andheri Kurla Road, Andheri (E), Mumbai) do hereby authorize M/s Al Habib Pharmaceuticals having address at Plot following 81, BLOCK B SMCHS, 74400, Karachi Pakistan, as a sole agent and distribution of following drugs only. Regarding our email Dated June 6th 2023 about the Clarification of Mile International India as an exporter of Naprod Life Sciences Pvt ltd beside the below mentioned products.

We are again giving a firm undertaking that Al-Habib Pharmaceuticals, Karachi is an Authorize Distributor and sole agent for the following Drugs.

S.No	Generics	Brand Name
15.	Capecitabine 500mg TAB	NAPROCAP -500
16.	Methotrexate 2.5mg TAB	ALLTREX
17.	Doxorubicin HCl for inj 50mg	NAPRODOX 50
18.	Leucovorin Calcium inj. 300mg	CAFONATE
19.	Fluorouracil inj. 500mg	FLUONCO

20.	Bicalutamide 50mg TAB	MACABI
21.	Doxorubicin HCl for inj 10mg	NAPRODOX 10

- **Scientific justification regarding declaration of Bicalutamide as racemic mixture i.e. a mixture of equal quantities (50:50) of two enantiomers.**

Firm replied that drug substance is a racemic mixture of S-enantioner and R-enantiomer in a ratio of 50:50, as the review literature of innovator product also claimed that the drug substance is racemic mixture of both enantiomers.

Decision: Deferred for verification of "Sole Agency Agreement" between M/s. Al Habib Pharmaceuticals, Plot # 81, Block B, SMCHS, Karachi & M/s Naprod Life Sciences Pvt. Ltd. Factory: G-17/1, M.I.D.C., Tarapur, Boisar, Dist. Thane-401 506, India through email.

		☐ Export sale ☐ Domestic and Export sales
	For imported products, specify one the these	☒ Finished Pharmaceutical product import ☐ Bulk import and local repackaging ☐ Bulk import and local repackaging for export purpose only
	Dy. No. and date of submission	Dy.no. 12290 dated 20-05-2022
	Details of fee submitted	PKR 100,000/-: 06-04-2021 Deposit Slip No.2073006 PKR 50,000/- Deposit Slip No: 3515278800
	The proposed proprietary name / brand name	**Doxycycline Capsules 100mg**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each capsule contains 100mg doxycycline base as doxycycline hyclate.
	Pharmaceutical form of applied drug	Capsules
	Pharmacotherapeutic Group of (API)	API: Doxycycline Therapeutic classification: Tetracycline Antibiotics. ATC code: A01AB22
	Reference to Finished product specifications	BP Specification
	Proposed Pack size	10 capsules per blister, 10 blisters per box, 200 boxes per carton.
	Proposed unit price	Rs.1200 per 10 blister box
	The status in reference regulatory authorities	**(MHRA** Approved).
	For generic drugs (me-too status)	NA
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Name, address of drug substance manufacturer	Name of the manufacturer(s): Hebei Dongfeng Pharmaceutical Co., Ltd. Address of API manufacture: No.365, Guan yuan West Street, Yongnian District, Handan City, Hebei Province, Chin
	Module-III Drug Substance:	Firm has submitted detailed drug substance data for both sources related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability	Firm has submitted stability study data of 3 batches of API at accelerated as well as real time conditions. The real time

	studies)	stability data is conducted at 30ºC ± 2ºC and 65%+5 RH. The stability study data is till 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted Pharmaceutical Equivalence studies report and the test report Doxycycline Capsules 100mg are highly consistent and meet statutory standards (BP).
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	Doxycycline Hyclate is packed in inner clear and outer black LDPE bag individually tied with plastic seal strip then packed in fibre/HMHDPE drum and sealed with locking seal.
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches The accelerated stability study data is conducted at 40ºC ±2ºC / 75% ± 5% RH for 6 months. The real time stability study data is conducted at 30ºC ±2ºC / 65% ± 5% RH. The real time stability study data of 3 batches is for 36 months

Evaluation by PEC:

Sr.no.	Sections	Observations/Deficiencies/ Short-comings
1.	**1.3.3**	Submit valid original and legalized Certificate of Pharmaceutical Product (CoPP) / Free Sale certificate and GMP certificate of the Manufacturer issued by relevant regulatory authority in the country of origin and name of exporting country, since you have submitted the copy of CoPP/ Free sale certificate.
2.	**3.2.S.4.1-3.2.S.4.2**	Submit specification and detailed analytical procedure of drug substance used by drug product manufacturer.
3.	**3.2.S.4.3**	Submit data of verification of analytical procedure of drug substance in section 3.2.S.4.3 as per the guidance document approved by Registration Board which specifies that *"Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted".*
4.	**3.2.S.5**	Provide certificate of analysis of reference standard /working standard used for testing of the drug substance.
5.	**3.2.P.2.2.1**	Submit results of Comparative Dissolution Profile (CDP) in section 3.2.P.2.2.1 to comply the decision of 293rd meeting of Registration Board, which states that "Where applicable the results of comparative dissolution profile conducted in three BCS media across the physiological pH range along with calculation of similarity factor *f*2 should be submitted and discussed."
6.	**3.2.P.5.1**	Justify for not including the test of dissolution in the specification of drug product, since the dissolution test is the part of BP monograph of doxycycline capsule.
7.	**3.2.P.5.2-3.2.P.5.3**	Justify how the product comply BP specification when the given assay procedure is different from the assay method specified in BP monograph. Further the verification studies has also been performed on assay procedure different from the method given in BP monograph.
8.	**3.2.P.6**	Provide certificate of analysis of reference standard /working standard used for testing of the drug product.

9.	**3.2.P.8**	Justify for not including the dissolution test in the stability studies of drug product since the dissolution test is recommended in BP monograph.

Decision of 331st meeting of Registration Board:
Registration Board deferred the case for submission of reply to the above cited shortcomings.

Response of the Firm:

Sr.no.	Observations/Deficiencies/ Short-comings	Response of the Firm
1.	Submit valid original and legalized Certificate of Pharmaceutical Product (CoPP) / Free Sale certificate and GMP certificate of the Manufacturer issued by relevant regulatory authority in the country of origin and name of exporting country, since you have submitted the copy of CoPP/ Free sale certificate.	Submitted
2.	Submit specification and detailed analytical procedure of drug substance used by drug product manufacturer.	Submitted
3.	Submit data of verification of analytical procedure of drug substance in section 3.2.S.4.3 as per the guidance document approved by Registration Board which specifies that *"Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted".*	Submitted
4.	Provide certificate of analysis of reference standard /working standard used for testing of the drug product.	Not submitted
5.	Submit results of Comparative Dissolution Profile (CDP) in section 3.2.P.2.2.1 to comply the decision of 293rd meeting of Registration Board, which states that "Where applicable the results of comparative dissolution profile conducted in three BCS media across the physiological pH range along with calculation of similarity factor *f*2 should be submitted and discussed."	Firm submitted the CDP report performed against the product Vibramycin Capsule of M/s. Pfizer Inc.
6.	Justify for not including the test of dissolution in the specification of drug product, since the dissolution test is the part of BP monograph of doxycycline capsule.	Firm submitted revised specification and analytical procedure of drug product. However the acceptance criteria of dissolution test is not in accordance with BP.
7.	Justify how the product comply BP specification when the given assay procedure is different from the assay method specified in BP monograph. Further the verification studies has also been performed on assay procedure different from the method given in BP monograph.	Firm submitted revised analytical verification report.
8.	Provide certificate of analysis of reference standard /working standard used for testing of the drug product.	Not submitted
9.	Justify for not including the dissolution test in the stability studies of drug product since the dissolution test is recommended in BP monograph.	Revised stability data submitted in which results of dissolution test was included but the acceptance criteria of dissolution test is not in accordance with BP.

Decision: Deferred for submission of following:

• **Justify for not adopting acceptance criteria of dissolution test of drug product in accordance with BP monograph of doxycycline capsule.** • **Provide certificate of analysis of reference standard /working standard used for testing of the drug substance and drug product.**

Evaluation by PEC:

S.no.	Observations/Deficiencies/ Short-comings
1.	Evidence of approval / registration / marketing status of the applied formulation in the same composition, salt form and dosage form in any one of the reference regulatory authority specified by Registration Board in its 275th meeting for further evaluation of your application.

Decision of 326th meeting of Registration Board:

Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.

Response of the Firm:

Firm submitted the evidence of approval status of applied product in the reference regulatory agencies and details are as follows:

Firm submitted the evidence of RRA of CBGMEB (Netherland) https://www.geneesmiddeleninformatiebank.nl/ords/f?p=111:3::SEARCH:::P0_DOMAIN,P0_LANG,P3_RVG1:H,EN,120396 product Sodium benzyl penicillin Sandoz 500,000 IU, powder for solution for injection or infusion (Sandoz B.V. Sodium benzylpenicillin Sandoz® 500,000, 1,000,000, 5,000,000, 10,000,000 IU, powder for solution for injection or infusion).

Sodium benzylpenicillin Sandoz 500,000 IU, powder for solution for injection or infusion approved in the reference country CBGMEB (Netherland) with the label claim:

Each vial contains 500,000 IU (equivalent to approximately 0.3 g) 0.3 g, 300 mg benzylpenicillin as sodium salt. Each vial contains 19.3 mg sodium.

After the submission of above reference, application has been evaluated and shortcoming letter has been communicated to the firm. Later the applicant submits their response which is as under:

S.no.	Observations/Deficiencies/ Short-comings along with their reply from the Firm
1.	**According to the composition of finished product given in section 3.2.P.1 299.5 mg of benzyl penicillin sodium equivalent to benzyl penicillin 0.5 mega powder for injection is filled per vial while the reference product approved in CBGMEB (Netherland) claimed that Each vial contains 500,000 IU (equivalent to approximately 0.3 g) 0.3 g, 300 mg benzyl penicillin as sodium salt. Each vial contains 19.3 mg sodium. Comparing the label claim/ strength justify how the applied product is similar to the reference product.** Firm replied that "for International units and mass value following ratios apply: 1mg benzyl penicillin sodium is equivalent to 1670IU benzyl penicillin. 500,000 IU benzyl penicillin is equivalent to about 300mg benzyl penicillin. In general, 300mg benzyl penicillin sodium is considered to be equivalent to 500,000 IU Benzyl penicillin.

	The difference between the 299mg in our product with 300mg in the reference product may be because of rounding off. However the quantity of sodium content per vial is still not been addressed by the applicant.
2.	**Submit data of verification of analytical procedure of drug substance in section 3.2.S.4.3 as per the guidance document approved by Registration Board which specifies that *"Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted".* Since you have submitted the validation report of drug substance manufacturer.** Firm submitted the assay verification report of drug substance in accordance with BP monograph.
3.	**Details of Type and Quantity of diluents used for reconstitution for Benzyl Penicillin 0.5 Mega and 1 Mega is required.** Firm submitted the details of diluent and quantity of diluent used for reconstitution of applied product.
4.	**According to the pharmaceutical equivalence report content of penicillin has calculated while the BP recommends quantification of benzyl penicillin content, justification is required in this regard.** **In continuation of point 3, Clarification is required that content of Penicillin is calculated in the assay of Drug product comparing the assay criteria of BP monograph in which the assay results are based on the quantity of Benzyl Penicillin.** In the response of above two queries, firm replied that "We, Reyoung Pharmaceutical Co., Ltd.(No.1 Ruiyang Road, Yiyuan County, Shandong, Province.P.R. China), hereby clarify that: In the monograph of current British Pharmacopeia, the product under registration is named as Benzylpenicilin for Injection as it mentioned in the Definition. Which is an aseptic filled product with sterile Benzylpenicillin Sodium. The strength of the product is expressed as per the content of penicillin (or Benzylpenicillin) (C16H18N2O4S) in Benzylpenicillin Sodium (C16H17N2NaO4). The content of penicillin is the same with content of benzylpenicillin. It's just a different way of writing. According to the requirements of DRAP and the description of BP monograph, we have revised the content in pharmaceutical equivalence report to be unified as "Benzyl penicillin". According to the Manufacturer Abroad that it is just a difference in written statement as writing *content of penicillin* is similar in meaning to the statement *content of Benzyl penicillin*, despite the fact that penicillin is broader term and the benzyl penicillin is one its variant.
5.	**Assay procedure followed while performing the validation studies is different from the recommended assay procedure given in BP monograph of benzyl penicillin sodium injection, justification is required in this regard.** Firm claimed that "We performed all the validation studies according to BP 2018 monograph, BP2018 is the latest version prior to submission of registration dossier, all of the assay procedure validation items are consistent with BP2018".
6.	**Justify for not including the bacterial endotoxin test in the stability studies of drug product since the BET is recommended in BP monograph.** Firm submitted the stability studies of drug product in which again bacterial endotoxin test is not included.

Decision: Deferred for submission of following:

- **Clarify the composition of applied drug product relating the reference product particularly with respect to the content of sodium, since the mentioned label claim of applied product did not specify the sodium content.**
- **Clarification is required for quantify the content of Penicillin in the assay of Drug product comparing the assay criteria of BP monograph which gives the limit of Benzyl Penicillin.**
- **Justify for not including the bacterial endotoxin test in the stability studies of drug product since the BET is recommended in BP monograph.**

The real time stability study data is conducted at 30°C ±2°C / 65% ± 5% RH. The real time stability study data of 36 months has submitted.

S.no.	Sections	Observations/Deficiencies/ Short-comings
1.	Submit evidence of approval status of applied formulation in the approved reference regulatory agencies in the same strength i.e. 1,000,000 IU.	
2.	Clarify the strength of applied formulation, since you have applied for benzyl penicillin sodium injection 1,000,000 IU while the CoPP is of benzyl penicillin sodium for injection 1 mega. Please submit the conversion/equivalent calculation from 1,000,000 IU to 1 mega.	
3.	3.2.S.4.1-3.2.S.4.2	Submit copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by the drug product manufacturer as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required". Analytical procedure of drug substance by drug substance manufacturer is different from the procedure specified in EP monogragh,Justify how the raw material comply EP specification as claimed in the batch analysis report.
4.	3.2.S.4.3	Submit data of verification of analytical procedure of drug substance in section 3.2.S.4.3 as per the guidance document approved by Registration Board which specifies that *"Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted".* Since you have submitted the validation report of drug substance manufacturer.
5.	3.2.P.1	According to the composition of finished product given in section 3.2.P.1 599mg equivalent to benzyl penicillin 1mega powder for injection is filled per vial while the reference product approved in MHRA claimed that Each vial contains Benzylpenicillin sodium 600 mg (1 mega unit). Comparing the label claim/ strength justify how the applied product is similar to the reference product.
6.	3.2.P.1 (c)	Provide details of type and quantity of diluents used for reconstitution for of applied product.
7.	3.2.P.2.2.1	According to the pharmaceutical equivalence report content of penicillin has calculated while the BP recommends quantification of benzypenicillin content, justification is required in this regard.
8.	3.2.P.5.1	Clarify the content of penicillin in term of benzyl penicillin as recommended by BP monograph.
9.	3.2.P.5.3	Assay procedure followed while performing the validation studies is different from the recommended assay procedure given in BP monograph of benzypenicillin sodium injection, justification is required in this regard.
10.	3.2.P.8	Justify for not including the bacterial endotoxin test in the stability studies of drug product since the BET is recommended in BP monograph.

Decision of 326th meeting of Registration Board:
Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.

Evaluation by PEC:

S.no.	Sections	Observations/Deficiencies/ Short-comings
1.		Submit evidence of approval status of applied formulation in the approved reference regulatory agencies in the same strength i.e. 1,000,000 IU. Firm submitted the reply in which they stated "As a generic drug product with many years of production experience, Benzyl penicillin sodium for injection has been registered in many countries and obtained registration qualification, which is consistent with the formulation registered in Pakistan this time". (As a reference they attached registration certificate of Ghana and Nigeria) However, the reference product approved in MHRA Benzylpenicillin Sodium 600 mg powder for solution for injection / infusion contains: Benzyl penicillin Sodium 600 mg powder for solution for injection / infusion: Each vial contains 600 mg benzylpenicillin as sodium salt. Each vial contains 38.6 mg of sodium. Further the conversion details are mentioned in the SmPC of reference formulation is For international units (IU) and mass values, the following ratios apply: 1 mg benzylpenicillin sodium is equivalent to 1670 IU benzylpenicillin. 1 million IU benzylpenicillin is equivalent to 598.9 mg benzylpenicillin sodium. In general, 600 mg benzylpenicillin sodium is considered to be equivalent to 1 million IU benzylpenicillin.
2.		Clarify the strength of applied formulation, since you have applied for benzyl penicillin sodium injection 1,000,000 IU while the CoPP is of benzyl penicillin sodium for injection 1 mega. Please submit the conversion/equivalent calculation from 1,000,000 IU to 1 mega. Firm replied that 1,000,000 IU is equivalent to 1Mega.
3.	3.2.S.4.1	Submit copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by the drug product manufacturer as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required". Firm submitted the specification of drug substance by drug product manufacturer which is in accordance with BP.
4.	3.2.S.4.2	Analytical procedure of drug substance by drug substance manufacturer is different from the procedure specified in EP monograph, justify how the raw material comply EP specification as claimed in the batch analysis report. Firm submitted the analytical procedure of drug substance by drug product manufacturer which is inaccordance with EP monograph.
5.	3.2.S.4.3	Submit data of verification of analytical procedure of drug substance in section 3.2.S.4.3 as per the guidance document approved by Registration Board which specifies that *"Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted".* Since you have submitted the validation report of drug substance manufacturer. Firm replied that we will submit later.
6.	3.2.P.1	According to the composition of finished product given in section 3.2.P.1 599mg equivalent to benzyl penicillin 1mega powder for injection is filled per vial while the reference product approved in MHRA claimed that Each vial contains Benzyl penicillin sodium 600 mg (1 mega unit). Comparing the label claim/ strength justify how the applied product is similar to the reference product. Firm submitted the calculation as followings: Potency of Benzyl Penicillin Sodium= 1670 IU/mg (Each 1mg of C16H17N2NaO4S is equivalent to 1670 penicillin units, prescribed in pharmacopeia. Quantity per vial= 1,000,000IU/1670 IU/mg =598.8mg=599mg Fill weight may vary based on potency of active ingredient.

		The difference between the "599mg" in our product with "600mg" in the reference product may be because of rounding.
7.	3.2.P.1 (c)	Provide details of type and quantity of diluents used for reconstitution for of applied product. Firm replied that the reconstitution diluent are water for injection and 0.9% sodium chloride.
8.	3.2.P.2.2.1	According to the pharmaceutical equivalence report content of penicillin has calculated while the BP recommends quantification of benzyl penicillin content, justification is required in this regard. Firm did not submit the relevant reply.
9.	3.2.P.5.1	Clarify that either the content of penicillin is calculated in the assay of drug product comparing the assay criteria BP monograph in which the assay results are based on the quantity of benzyl penicillin. Firm did not submit the relevant reply.
10.	3.2.P.5.3	Assay procedure followed while performing the validation studies is different from the recommended assay procedure given in BP monograph of benzyl penicillin sodium injection, justification is required in this regard. Firm submitted the reply that it was a writing error and they have submitted the revised analytical procedure in accordance with BP. However, the revised analytical procedure was also not in accordance with BP as evident from the submitted report.
11.	3.2.P.8	Justify for not including the bacterial endotoxin test in the stability studies of drug product since the BET is recommended in BP monograph. Firm submitted the revised stability summary sheets in which Bacterial endotoxin test were included and the assay results are related to quantification of penicillin instead of Benzyl penicillin.

Decision of 329th meeting of Registration Board:

Deferred for the submission of following shortcomings/justifications:

- Submit data of verification of analytical procedure of drug substance in section 3.2.S.4.3 as per the guidance document approved by Registration Board which specifies that *"Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted".* Since you have submitted the validation report of drug substance by drug substance manufacturer.
- Justify the assay testing of drug product comparing the assay test in BP monograph, wherein the assay of benzypenicillin is recommended while the firm performed the assay of penicillin**.**

Response of the Firm:

- **Submit data of verification of analytical procedure of drug substance in section 3.2.S.4.3 as per the guidance document approved by Registration Board which specifies that *"Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted".* Since you have submitted the validation report of drug substance by drug substance manufacturer.**

Firm submitted the verification report of drug substance performed by drug product manufacturer.

- **Justify the assay testing of drug product comparing the assay test in BP monograph, wherein the assay of benzyl penicillin is recommended while the firm performed the assay of penicillin.**

In the response of above query, firm replied that "We, Reyoung Pharmaceutical Co., Ltd.(No.1 Ruiyang Road, Yiyuan County, Shandong, Province.P.R. China), hereby clarify that: In the monograph of current British Pharmacopeia, the product under registration is named as Benzylpenicilin for Injection as it mentioned in the Definition. Which is an aseptic filled product with sterile Benzylpenicillin Sodium. The strength of the product is expressed as per the content of penicillin (or Benzylpenicillin) (C16H18N2O4S) in Benzylpenicillin Sodium (C16H17N2NaO4). The content of penicillin is the same with content of benzylpenicillin. It's just a different

way of writing. According to the requirements of DRAP and the description of BP monograph, we have revised the content in pharmaceutical equivalence report to be unified as "Benzyl penicillin". According to the Manufacturer Abroad that it is just a difference in written statement as writing *content of penicillin* is similar in meaning to the statement *content of Benzyl penicillin*, despite the fact that penicillin is broader term and the benzyl penicillin is one of its variant.		
Decision: Deferred for clarity regarding the results of assay of applied drug product comparing the declared label of BP monograph of Benzylpenicillin for Injection i.e. "95.0 to 105.0% of the content of benzylpenicillin stated on the label". Further, Clarify the composition of applied drug product relating the reference product particularly with respect to the content of sodium, since the mentioned label claim of applied product did not specify the sodium content.

• (270 and 320 mg Iodine/mL) CT imaging of the head and body.
• (270 and 320 mg Iodine/mL) excretory urography.
• (270 mg Iodine/mL) peripheral venography.
• (320 mg Iodine/mL) coronary computed tomography angiography (CCTA) to assist in the diagnostic evaluation of patients with suspected coronary artery disease. Pediatric patients less than 12 years of age
• (270 mg Iodine/mL) CT imaging of the head and body.
• (270 mg Iodine/mL) excretory urography.
Evaluation by PEC:
Firm has to be submit requisite fee for imported product, since the Me-Too of 50ml is available in the record.

S.no.	Sections	Observations/Deficiencies/ Short-comings
1.	Submit valid original and legalized Certificate of Pharmaceutical Product (CoPP) / Free Sale certificate and GMP certificate of the Manufacturer issued by relevant regulatory authority in the country of origin and name of exporting country, since the submitted CoPP is invalid.	
2.	3.2.S.4.1-3.2.S.4.2	Submit copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required".
3.	3.2.S.4.3	Submit data of verification of analytical procedure of drug substance in section 3.2.S.4.3 as per the guidance document approved by Registration Board which specifies that *"Analytical Method Verification studies including specificity,*

		accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted".
4.	3.2.S.4.3	Submit batch analysis report of drug substance in section 3.2.S.4.4 as per the guidance document approved by Registration Board which specifies that *"Provide results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (CoA) of the same batch from Drug Substance / /Active Pharmaceutical Ingredient manufacture. A discussion and justification shall be provided for any incomplete analyses of the drug substance / API by Drug Product manufacturer (e.g. results not tested according to the proposed specification)".*
5.	3.2.S.5	Submit COA of reference standards in section 3.2.S.5 as per the guidance document approved by Registration Board which specifies that *"For testing of Pharmacopeial Drug Substance, the use of primary reference standard is recommended, however for non-pharmacopeial Drug Substance, a secondary reference standard provided by the Drug Substance manufacturer is acceptable. COA of primary / secondary reference standard including source and lot number shall be provided".*
6.	3.2.S.6	Submit details of container closure system of drug substance in section 3.2.S.6 as per the guidance document approved by Registration Board which specifies that "*Description of the container closure system(s) for the shipment and storage of the API including materials of construction of each primary packaging component. Other information on the container closure system(s) (e.g. suitability studies) may be submitted".*
7.	3.2.S.7	Submit data in section 3.2.S.7 as per the guidance document approved by Registration Board which specifies that "The protocols used and the results of the accelerated and long-term stability studies shall be summarized. Proposed storage conditions / statement and re-test period (or shelf-life, as appropriate) shall also be submitted". Since you have submitted the compatibility results of Iodixanol with excipient.
8.	3.2.P.2.2.1	Submit details regarding batch number, manufacturing and expiry date of your as well as the comparator product used in pharmaceutical equivalence studies.
9.	3.2.P.5.3	Submit data of verification of assay procedure of drug product in section 3.2.P.5.3 as per the guidance document approved by Registration Board which specifies that "*All the officially recognized compendial methods for assay, dissolution and impurities (as applicable) are required to be verified and verification shall include a demonstration of specificity, repeatability (method precision) and accuracy".*

Decision of 326th meeting of Registration Board:
Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.

Response of the Firm:

S.no.	Sections	Observations/Deficiencies/ Short-comings	Response of the Firm
1.	Submit valid original and legalized Certificate of Pharmaceutical Product (CoPP) / Free Sale certificate and GMP certificate of the Manufacturer issued by relevant regulatory authority in the country of origin and name of exporting country, since the submitted CoPP is invalid.		Firm submitted the copy of CoPP certificate no.20230045 issue dated 13-02-2023 by Biejing Municipal Medical Product Administration, which is valid till 12-02-2025.
2.	3.2.S.4.1-3.2.S.4.2	Submit copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug	Firm submitted the specification and analytical procedure of drug substance by drug product manufacturer i.e. M/s. Beijing Beilu Pharmaceutical Co., Ltd, while drug substance

		substance /Active Pharmaceutical Ingredient as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required".	specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by drug substance manufacturer i.e. M/s. GE Healthcare As. has not been submitted.
3.	3.2.S.4.3	Submit data of verification of analytical procedure of drug substance in section 3.2.S.4.3 as per the guidance document approved by Registration Board which specifies that *"Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted".*	Firm replied that "Bielu analyzes API according to USP compendial method. So Bielu Pharmaceuticals did not conduct methodological validation.
4.	3.2.S.4.3	Submit batch analysis report of drug substance in section 3.2.S.4.4 as per the guidance document approved by Registration Board which specifies that *"Provide results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (CoA) of the same batch from Drug Substance / /Active Pharmaceutical Ingredient manufacture. A discussion and justification shall be provided for any incomplete analyses of the drug substance / API by Drug Product manufacturer (e.g. results not tested according to the proposed specification)".*	Firm submitted Batch analysis report of drug substance only by drug product manufacturer.
5.	3.2.S.5	Submit COA of reference standards in section 3.2.S.5 as per the guidance document approved by Registration Board which specifies that *"For testing of Pharmacopeial Drug Substance, the use of primary reference standard is*	Firm has not submitted the COA of reference standard of iodixanol.

		recommended, however for non-pharmacopeial Drug Substance, a secondary reference standard provided by the Drug Substance manufacturer is acceptable. COA of primary / secondary reference standard including source and lot number shall be provided".	
6.	3.2.S.6	Submit details of container closure system of drug substance in section 3.2.S.6 as per the guidance document approved by Registration Board which specifies that "*Description of the container closure system(s) for the shipment and storage of the API including materials of construction of each primary packaging component. Other information on the container closure system(s) (e.g. suitability studies) may be submitted".*	Firm submitted the requisite details.
7.	3.2.S.7	Submit data in section 3.2.S.7 as per the guidance document approved by Registration Board which specifies that "The protocols used and the results of the accelerated and long-term stability studies shall be summarized. Proposed storage conditions / statement and re-test period (or shelf-life, as appropriate) shall also be submitted". Since you have submitted the compatibility results of Iodixanol with excipient.	Firm submitted the stability data of drug substance submitted by drug product manufacturer (M/s. Biejing Bielu Pharmaceuticals Co. Ltd., China instead of M/s. GE Health care, Norway) till 18 months while the claimed shelf life mentioned on the document is 36 months.
8.	3.2.P.2.2.1	Submit details regarding batch number, manufacturing and expiry date of your as well as the comparator product used in pharmaceutical equivalence studies.	Firm submitted the details of reference product i.e. Reference preparation Manufacturing: GE Healthcare As Expiry date: 36 months.
9.	3.2.P.5.3	Submit data of verification of assay procedure of drug product in section 3.2.P.5.3 as per the guidance document approved by Registration Board which specifies that "*All the officially recognized compendial methods for assay, dissolution and impurities (as applicable) are required to be verified and verification shall include a demonstration of specificity,*	Firm submitted the analytical method validation report of assay procedure of drug product.

		repeatability (method precision) and accuracy".	

Decision of 333rd meeting of Registration Board:
Deferred for submission of following shortcomings:

- Submit specification and analytical procedure of drug substance used for analysis by drug substance manufacturer.
- Provide analytical verification report of drug substance performed by drug product manufacturer.
- Submit Certificate of analysis of API from drug substance manufacturer.
- Submit complete stability data of drug substance conducted at both accelerated and long term condition till the claimed re-test date, performed by the drug substance manufacturer.

Response of the Firm:
Previously firm submitted the registration application claiming drug substance manufacturer of their applied product was GE Healthcare A.S. Lindesnesveien208, N0-4551 Lindesnes, Norway and accordingly submit the requisite documents of drug substance part. Now in this reply firm change the source of API from G.E.Healthcare, Norway to M/s. Zhejiang Starry Pharmaceuticals Co. Ltd. No.1 Starry Road of Xianju Modern Industrial Centralization Zone, Xianju Zhejiang, China without any clarification/justification and only submitted the reply of queries on the basis of which case was deferred in 333rd meeting of Registration Board, instead of submitting complete new dossier in accordance with new source of API along with requisite fee.

Decision: Deferred for clarification regarding the change of source of API Manufacturer from M/s. G.E. Healthcare, Norway to M/s. Zhejiang Starry Pharmaceuticals Co. Ltd. No.1 Starry Road of Xianju Modern Industrial Centralization Zone, Xianju Zhejiang, China. Further, submit complete product part of module-3 in-line with new source of API manufacturer along with requisite fee.

Other information on the container closure system(s) (e.g. suitability studies) may be submitted".*	Firm submitted the requisite details.
7.	3.2.S.7	Submit data in section 3.2.S.7 as per the guidance document approved by Registration Board which specifies that "The protocols used and the results of the accelerated and long-term stability studies shall be summarized. Proposed storage conditions / statement and re-test period (or shelf-life, as appropriate) shall also be submitted". Since you have submitted the compatibility results of Iodixanol with excipient.	Firm submitted the stability data of drug substance submitted by drug product manufacturer (M/s. Biejing Bielu Pharmaceuticals Co. Ltd., China instead of M/s. GE Health care, Norway) till 18 months while the claimed shelf life mentioned on the document is 36 months.
8.	3.2.P.2.2.1	Submit details regarding batch number, manufacturing and expiry date of your as well as the comparator product used in pharmaceutical equivalence studies.	Firm has not submitted the requisite information.
9.	3.2.P.5.3	Submit data of verification of assay procedure of drug product in section 3.2.P.5.3 as per the guidance document approved by Registration Board which specifies that "*All the officially recognized compendial methods for assay, dissolution and impurities (as applicable) are required to be verified and verification shall include a*	Firm submitted the analytical method validation report of assay procedure of drug product.

		demonstration of specificity, repeatability (method precision) and accuracy".	
10.	3.2.P.8	Provide details/ batch numbers of stability batches of applied formulation, since the batch no. mentioned on the stability summary sheets is same as for 50ml.	Firm submitted the stability data of iohexol instead of stability data of iodixanol (100ml).

Decision of 333rd meeting of Registration Board:

Deferred for submission of following shortcomings:

- Submit specification and analytical procedure of drug substance used for analysis by drug substance manufacturer.
- Provide analytical verification report of drug substance performed by drug product manufacturer.
- Submit Certificate of analysis of API from drug substance manufacturer.
- Submit complete stability data of drug substance conducted at both accelerated and long term condition till the claimed re-test date performed by the drug substance manufacturer.
- Submit details regarding batch number, manufacturing and expiry date of your as well as the comparator product used in pharmaceutical equivalence studies.
- Submit stability data of drug product (100ml volume size) performed at both accelerated and long term condition till the claimed shelf life.

Response of the Firm:

Previously firm submitted the registration application claiming drug substance manufacturer of their applied product was GE Healthcare A.S. Lindesnesveien208, N0-4551 Lindesnes, Norway and accordingly submit the requisite documents of drug substance part. Now in this reply firm change the source of API from G.E.Healthcare, Norway to M/s. Zhejiang Starry Pharmaceuticals Co. Ltd. No.1 Starry Road of Xianju Modern Industrial Centralization Zone, Xianju Zhejiang, China without any clarification/justification and only submitted the reply of queries on the basis of which case was deferred in 333rd meeting of Registration Board, instead of submitting complete new dossier in accordance with new source of API along with requisite fee.

Decision: Deferred for clarification regarding change of source of API Manufacturer from M/s. G.E. Healthcare, Norway to M/s. Zhejiang Starry Pharmaceuticals Co. Ltd. No.1 Starry Road of Xianju Modern Industrial Centralization Zone, Xianju Zhejiang, China. Further, submit complete product part of module-3 in-line with new source of API manufacturer along with requisite fee.

966.	Name, address of Applicant / Importer	M/s. M&M Pharma Javaid Plaza, Opposite Pepsi Gate.2, Gurumangat Road, Gulberg-II District Lahore

	The proposed proprietary name / brand name	UNIPILL Tablet 1.5mg
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each tablet contains: Levonorgestrel…..1.5mg
	Pharmaceutical form of applied drug	Tablet
	Pharmacotherapeutic Group of (API)	Progestogens
	Reference to Finished product specifications	BP specification
	Proposed Pack size	As per SRO
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	USFDA Approved
	For generic drugs (me-too status)	Not confirmed
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers,

		description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Name, address of drug substance manufacturer	M/s. Qinhuangdao Zizhu Pharmaceutical Co. Ltd. No.10 Longhai Road, Economic and Technological Development Zone, Qinhuangdao City, Hebei Province, China.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug product instead of stability data of drug substance.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	submitted. Pharmaceutical Equivalence established against the comparator product of Plan B One-Step (Levonorgestrel) Tablet 1.5mg of M/s. Gedeon Richter Ltd., Budapest , Hungary and comparative dissolution studies has also conduct against the same comparator product.
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	Alu-PVDC COATED PVC foil blisters
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches The accelerated stability study data is conducted at 40ºC ±2ºC / 75% ± 5% RH for 6 months. The real time stability study data is conducted at 30ºC ±2ºC / 65% ± 5% RH. The real time stability study data of 60 months has submitted.

Evaluation by PEC:

S.no.	Sections	Observations/Deficiencies/ Short-comings
1.	Submit original ,valid and legalized CoPP of drug product, since you have submitted the copy of CoPP.	
2.	Submit valid Drug Sale License of ,since the submitted DSL was expired on 19-10-2022.	

3.	3.2.S.4.2	Justify for performance of assay using UV Spectrophotometer while the EP recommends Potentiometric titration method for assay testing of drug substance.
4.	3.2.S.7	Submit stability data of drug substance performed at accelerated and long term stability conditions till the claimed shelf life/re-test period, since the submitted data in section 3.2.S.7 is of drug product instead of drug substance.
5.	3.2.P.1	According to the WHO assessment report of applied product lactose monohydrate is of bovine origin. Please submit the details related to the originating source of lactose monohydrate .
6.	3.2.P.5.2	Justify for keeping the detection wavelength 243nm in the chromatographic condition of dissolution testing of drug product comparing the detection wavelength recommended in the BP monograph of levonorgestrel tablet i.e.220nm.
7.	3.2.P.8	Justify the variation observed in acceptance criteria of dissolution while performing the stability data of drug product. As evident from the submitted stability data, at certain time points the acceptance criteria of dissolution has set at Qvalue-75% of the active substance release in 60 min while at other time points dissolution criteria has kept at NLT 80% in 30minutes.

Decision of 326th meeting of Registration Board:
Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.

Response of the Firm:

S.no.	Observations/Deficiencies/ Short-comings	Reply of the Firm
1.	Submit original ,valid and legalized CoPP of drug product, since you have submitted the copy of CoPP.	Firm submitted the copy of CoPP certificate no. DCD/SPL.CELL-I/CR-338/2022-23 dated 03-03-2023 certifying authority is drug control department Bangalore India with the validity of 28-06-2023. Further applicant commit that they submit original CoPP duly attested will be submitted within a period of one month time.
2.	Submit valid Drug Sale License of ,since the submitted DSL was expired on 19-10-2022.	Submitted
3.	Justify for performance of assay using UV Spectrophotometer while the EP recommends Potentiometric titration method for assay testing of drug substance.	Firm replied that "The assay method for Levonorgestrel API as per the European Pharmacopoeia is by using Potentiometric method. Please note that the USP has mentioned UV spectrophotometry method for the analysis of assay. We have selected UV spectrophotometry method as mentioned in USP over potentiometric method for better control on the variables, thereby improving the accuracy and repeatability. This UV spectrophotometry method is also assessed and improved by WHO pre-qualification team". However, drug substance manufacturer claimed EP specification for drug substance in the submitted dossier"
4.	Submit stability data of drug substance performed at accelerated and long term stability conditions till the claimed shelf life/re-test period, since the submitted data in section 3.2.S.7 is of drug product instead of drug substance.	Submitted
5.	According to the WHO assessment report of applied product lactose monohydrate is of	Manufacturer Abroad submitted Regulatory Information sheet for confirmation of

	bovine origin. Please submit the details related to the originating source of lactose monohydrate .	originating source of Lactose monohydrate i.e. Bovine source.
6.	Justify for keeping the detection wavelength 243nm in the chromatographic condition of dissolution testing of drug product comparing the detection wavelength recommended in the BP monograph of levonorgestrel tablet i.e.220nm.	M/s. HLL Lifecare Limited replied that the analytical method for the dissolution analysis of Levonorgestrel in the Levonorgestrel tablets developed in-house in HLL and is taken from the Levonorgestrel tablets monograph Levonorgestrel tablet monograph of BP with change in detection wavelength from 220nm to 243nm. It is observed that at 220nm blank peaks and interference near to main principal peak and more disturbances observed in base line. Due diligence supported by technical evidences were carried out during method development for the determination of appropriate wavelength for Levonorgestrel in the dissolution media. This methodology also includes spectral scanning by UV spectrophotometer as well as by HPLC in the range 200-400nm. It was observed that at 243nm there was no interference observed from diluent or any other base line disturbances.
7.	Justify the variation observed in acceptance criteria of dissolution while performing the stability data of drug product. As evident from the submitted stability data, at certain time points the acceptance criteria of dissolution has set at Qvalue-75% of the active substance release in 60 min while at other time points dissolution criteria has kept at NLT 80% in 30minutes.	M/s. HLL Lifesciences replied that the initial set acceptance criteria of dissolution for release and shelf life for Levonorgestrel 1.5mg Tablet was "not less than 75%(Q) in 60 minutes". The dissolution limit was later revised for both release and shelf life based on the dissolution profile of biobatch as recommended by the WHO PQ team for the product during dossier assessment in September,2016. The revised dissolution acceptance criteria i.e. not less than 80%(Q) IN 30minutes was made effective from the 12th month real time stability study onward.

Decision OF 331st Meeting of Registration Board:

Deferred for the submission of following shortcomings:

- According to the submitted documents drug substance complied EP specification, while you have performed the assay test in accordance with USP specification according to your submitted reply, so, clarification is required in this regard.
- Justify for not adopting the same detection wavelength for the assay of drug product as recommended in the BP monograph of Levonorgestrel tablet.

Response of the Firm:

- **According to the submitted documents drug substance complied EP specification, while you have performed the assay test in accordance with USP specification according to your submitted reply, so, clarification is required in this regard.**

Applicant submitted the following response of Manufacturer Abroad:

HLL Reply: The assay method for Levonorgestrel API as per the European Pharmacopoeia is by using Potentiometric method. Please note that the US Pharmacopoeia has mentioned UV Spectrophotometry method for the analysis of assay. We have selected UV spectrophotometry method as mentioned in USP over potentiometric method for better control on the variables, thereby improving the accuracy and repeatability. This UV Spectrophotometry method is also assessed and approved by WHO pre-qualification team.

- **Justify for not adopting the same detection wavelength for the assay of drug product as recommended in the BP monograph of Levonorgestrel tablet.**

Applicant submitted the following response of Manufacturer Abroad:

It is observed that at 220 nm, blank peaks had interference near to main principal peak and more disturbances observed in base line. Due diligence supported by technical evidences were carried out during method development for the determination of appropriate wavelength for Levonorgestrel in the dissolution media. This methodology also includes spectral scanning by UV spectrophotometer as well as by HPLC in the range of 200-400 nm. It was observed that at 243 nm, there was no interferencesobserved from diluent or any other base line disturbances, hence it was concluded that, 243 nm is the most appropriate wavelength for the analysis of Levonorgestrel tablets for dissolution. Method is fully validated as per the ICH Q2 (R1) guidelines.

Decision: Approved with BP specification as per Policy for inspection of Manufacturer abroad.Further, the address of Marketing Authorization Holder will be as per the *WHO-PQ RECOMMENDED SUMMARY OF PRODUCT CHARACTERISTICS* i.e. M/s. HLL Lifecare Limited (A Government of India Enterprise) Unipill Block Kanagala Belagavi (District) Karnataka India.

The real time stability study data is conducted at 30ºC ±2ºC / 65% ± 5% RH. The real time stability study data of 2 batches is for 12 months while the stability study data for 3rd batch is for 9 months only.

Evaluation by PEC:

S.no.	Observations/Deficiencies/ Short-comings
2.	Evidence of approval / registration / marketing status of the applied formulation in the same composition, salt form and dosage form in any one of the reference regulatory authority specified by Registration Board in its 275th meeting for further evaluation of your application.

Decision of 326th meeting of Registration Board:
Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.

Reply of the Firm:
Firm submitted the evidence of approval status of applied formulations in the following in reference regulatory agencies:

No.	Brand name	Country	MA Holder / Manufacturer	Formulation
I	Ketosteril	RMS Portugal CMS Belgium (BE), Denmark (DK), Spain (ES),	Fresenius Kabi Deutschland GmbH	Ketovaline Calcium 86 mg Lysine Acetate 105 mg Histidine 38 mg Threonine 53 mg

		Finland (FI), Croatia (HR), Italy (IT), Netherlands (NL), Norway (NO), Sweden (SE), Slovenia (SI)		Tryptophan 23 mg Isoleucine Calcium, Alfa-, Keto- 67 mg Leucine Calcium, Alfa-, Keto- 101 mg Phenylalanine Calcium, Alfa-Keto- 68 mg Hydroxymethionine Calcium, Alfa - 59 mg Tyrosine 30 mg
2	KETOSTERIL	Romania	FRESENIUS KABI DEUTSCHLAND GMBH - GERMANIA	Ketovaline Calcium 86 mg Lysine Acetate 105 mg Histidine 38 mg Threonine 53 mg Tryptophan 23 mg Isoleucine Calcium, Alfa-, Keto- 67 mg Leucine Calcium, Alfa-, Keto- 101 mg
3	Ketosteril Tabletten	Germany	FRESENIUS KABI DEUTSCHLAND GMBH - GERMANIA	Ketovaline Calcium 86 mg Lysine Acetate 105 mg Histidine 38 mg Threonine 53 mg Tryptophan 23 mg Isoleucine Calcium, Alfa-, Keto- 67 mg Leucine Calcium, Alfa-, Keto- 101 mg Phenylalanine Calcium, Alfa-Keto- 68 mg Hydroxymethionine Calcium, Alfa - 59 mg Tyrosine 30 mg

After the confirmation of approval status of applied formulation in the above given reference agencies, complete dossier has been evaluated and accordingly shortcoming letter has communicated to the firm. Firm submitted following reply in response of the shortcoming letter:

S.no.	Sections	Observations/Deficiencies/ Short-comings	Response of the Firm
Clarification is required related to the strength of tablet i.e. 0.63g mentioned in the relevant section, since the innovator product do not mention the strength of tablet as it is a combination product. In the response of above query firm submitted the clarification letter from the Finished Product Importer i.e. Hebei tiancheng pharmaceutical Co. Ltd. No. 18, Jinguang street, economic and technological development zone, cangzhou city, Hebei province, china, in which they stated that "The Applied Product (Compound α-Ketoacid Tablets, manufactured by Hebei Tiancheng Pharmaceutical Co., Ltd.) contains ten active substances the formulation of which is consistent with that of the Innovator Drug (Ketosteril). The formulation of Applied Product and Ketosteril are shown in the table below.			

No.	Ingredients	Each tablet contains:

		Applied Product	Ketosteril
1	α-Ketoleucine calcium	101mg	101mg
2	α-Ketovaline calcium	86mg	86mg
3	α-ketophenylalanine calcium	68mg	68mg
4	D L-α-ketoisoleucine calcium	67mg	67mg
5	D L-α-hydroxymethionine calcium	59mg	59mg
6	L-lysine acetate	105mg	105mg
7	L-threonine	53mg	53mg
8	L-tryptophan	23mg	23mg
9	L-histidine	38mg	38mg
10	L-tyrosine	30mg	30mg
Total		630mg	630mg

The strength of the finished product is specified as the weight (or potency) or content of the active substances as per the regulation of NMPA (National Medical Product Administration, China). Due to the Applied Product contains more active substances, the strength is specified as the weight of the active substances, 0.63g, in the dossier.

1.	1.5.6	Justify how you have claimed USP specification for the applied formulation when the official monograph is not present in USP.	Firm replied that the specification of applied is in-House standard.

Lysine Acetate

Justify for using API complying in-house specification when the official monograph of lysine acetate is present in USP.

Firm replied that The specifications of Lysine Acetate are ChP. For the amino acids such as Lysine Acetate, Chinese manufacturer can only purchase the APIs complied with ChP. Based on the stability results, the APIs complied with ChP can ensure the quality of the finished product.

Applied specification of L-Lysine Acetate	USP specification of L-Lysine acetate
Identification Infrared Absorption IR spectrum of the sample should be concordant with standard.	Identification Infrared Absorption IR spectrum of the sample should be concordant with standard.

Residual Solvent	NA

2.	3.2.P.2.2.1	Submit data of Pharmaceutical equivalence of the applied drug with the innovator / reference/ comparator product and results of all the quality tests (mentioned in any official pharmacopoeia or section 3.2.P.5.1 of this application) of the developed formulation and the innovator / reference / comparator product shall be submitted and discussed".	Firm submitted the pharmaceutical equivalence report in which all the quality parameters are included as per the specification of finished product. Further, the applied product (Compound α, -ketoacid Tablets) is a generic drug, the reference product is Ketosteril from Fresenius. The dosage forms, route of administration and active substances of applied product (Compound α, -ketoacid Tablets) is identical with those of Innovator drug. The quality between the applied product and reference product is comparable.
3.	3.2.P.2.2.1	Justify for not performing the comparative dissolution profiling study of individual amino acids.	Firm replied that "According to the specification for Compound Alpha-Ketoacid Tablets published by the Chinese NMPA, only the dissolution test for ketoanalogue calcium is required. Therefore, manufacturer instead of carrying out dissolution study of individual amino acid, performed comparative dissolution study of each ketoanalogue calcium".
4.	3.2.P.5.2	Justify for not including the dissolution profiling of individual amino acids in the release specification of finished drug product.	Firm replied that "According to the specification for Compound Alpha-Ketoacid Tablets published by the Chinese NMPA, only the dissolution test for ketoanalogue calcium is required, dissolution for each amino acid is not required".
5.	3.2.P.8	Submit complete stability data of drug product till the claimed shelf , since you have only submitted the detail of stability batches.	Firm submitted the stability data of batches 11101401,11101402,1110140 performed both at accelerated and long term conditions. However, the stability data is not on the letter head of manufacturer, without owned/signed by any technical personnel neither the stability conditions were mentioned on individual stability table of each batches.

Decision of 330th meeting of Registration Board:
Deferred for submission of detailed analytical procedure of dissolution testing of individual amino acid used in the formulation along with the stability data of drug product which includes the result of dissolution testing of each amino acid included in the applied formulation. Further, Comparative dissolution profiling data which includes the release profiling study of all the amino acids used in the applied formulation.

Response of the Firm:
Firm in their reply submitted the COA of innovator product i.e. Ketosteril Tablet in which the results of dissolution profiling of only calcium ketoanaolgue has been mentioned, which reflect that innovator product has also not performed the dissolution testing of individual amino acid used in the formulation.

Decision: Approved as per Policy for inspection of Manufacturer abroad and verification of local storage facility.

Registration Application Withdrawal Request by M/s. Citi Pharma Pvt. Ltd., Kasur:

M/s. Citi Pharma Pvt. Ltd. requested for withdrawal of registration application of following products vide letter no. CP/FM/2024/001 dated 01-01-2024 and letter no. CP/FM/2024/002 dated 01-01-2024, which were defer in 323rd meeting of Registration Board. In their letter firm stated that "we citi Pharma Pvt. Ltd. writing to inform you about a situation regarding the misalignment of documents related to a product that was submitted to DRAP Pakistan. Due to this issue, I would like to formally request the withdrawal of the following products from the system.

1. **Roxime Injection 250mg**
2. **Roxime Injection 750mg**
3. **Roxime Injection 1.5g**
4. **Citi-Pime Injection 500mg**
5. **Citi-Pime Injection 1g**
6. **Citi-Pime Injection 2g**

Detail of the case of above-mentioned products presented in 323rd meeting of Registration Board is as under:

968.	Name, / Marketing Authorization Holder address of Applicant	M/s Citi Pharma Private Limited Lahore
	Name, address of Manufacturing site.	M/s Citi Pharma Private Limited Lahore Factory: 3 K.M, Head Balloki Road, Phool Nagar, Distt. Kasur
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No.23136 dated 16/08/2022
	Details of fee submitted	PKR 30,000/-: dated 27/05/2022
	The proposed proprietary name / brand name	Citi-Pime Injection IV/IM
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Sterile Powder of Cefepime HCL and Arginine Eq. to Cefepime 2g
	Pharmaceutical form of applied drug	Intra-venous / Intra-muscular Injection
	Pharmacotherapeutic Group of (API)	Broad-spectrum cephalosporin antibiotic
	Reference to Finished product specifications	USP
	Proposed Pack size	1×1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Maxipime Injection 2g by M/s Hospira Inc. USA, USFDA Approved.
	For generic drugs (me-too status)	Maxum Injection 2g (Reg.no. 090510) of M/s. Curexa Health (Pvt.) Ltd. Plot No. 517, Sunder Industrial Estate, Lahore
	GMP status of the Finished product manufacturer	New license granted on 21/09/2021 Cephalosporin section approved.

	Name and address of API manufacturer.	M/s Kopran Research Laboratories Ltd India
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of Cefepime HCL and Arginine Eq. to Cefepime is present in USP. The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls,specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH CEIV/IB1203011 36 MONTH CEIV/IB1203012 12 MONTH CEIV/IB1203013 Not submitted Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: CEIV/IB1203011/ CEIV/IB1203012/ CEIV/IB1203013
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand leader that is Maxum Injection 2g by Highnoon pharmaceuticals performing quality tests (Identification, pH , Assay, Constituted Solution, Uniformity of dosage form,sterility,BET).
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.

STABILITY STUDY DATA	
Manufacturer of API	M/s Kopran Research Laboratories Ltd India
API Lot No.	CFM-2104004
Description of Pack (Container closure system)	One clear glass vial 15ml with LDPE ampoule of WFI or 1% Lidocaine along with leaflet in unit carton.

Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	Cef-P-001 (on covering page) TC008-01 (on stability data sheet) TC006 (on audit trail report)	Cef-P-001 (on covering page) TC008-01 (on stability data sheet) TC006 (on audit trail report)	Cef-P-001 (on covering page) TC008-01 (on stability data sheet) TC006 (on audit trail report)
Batch Size	1000 Vials	1000 Vials	1000 Vials
Manufacturing Date	09-2021	09-2021	09-2021
Date of Initiation	26-09-2021	26-09-2021	26-09-2021
No. of Batches	03		

Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Not submitted
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not submitted
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator:

Deficiencies/ Short-comings
• Submit specifications as well as analytical method of the drug substance from the drug product manufacturer in section 3.2.S.4.1 and 3.2. S.4.2. • Submit data in section 3.2.S.4.3 as per the guidance document approved by Registration Board which specifies that "Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted" • Submit complete long-term stability data of all three batches of drug substance, complete data of batch no. CEIV/B1203011 has only been submitted in section 3.2. S.7. • Submit data in section 3.2.P.1 (c) as per the decision of 293rd meeting of Registration Board, which states that "Provide information including type of diluent, its composition, quantity or volume, specifications (as applicable) and regulatory status in Pakistan (as applicable) for the diluent which is to be provided along with the applied drug".

- Justify why pharmaceutical equivalence was performed against comparator product instead of using innovator / reference product.
- Submit data in section 3.2.P.2.3 (Manufacturing process development) as per the decision of 293rd meeting of Registration Board, which states that "The selection and optimization of the manufacturing process described in 3.2.P.3.3, in particular its critical aspects, shall be explained. Any specific manufacturing process development shall be provided e.g., sterilization shall be explained and justified. Where relevant, justification for the selection of aseptic processing or other sterilization methods over terminal sterilization shall be provided". Since the submitted flow diagram of manufacturing procedure is of different drug product (cefotaxime sodium) instead of cefepime.
- Submit the data of compatibility studies in section 3.2.P.2.6 as per the decision of 293rd meeting of Registration Board, which states that "*Compatibility studies for the dry powder for injections and dry powder for suspension should be performed as per the instructions provided in individual label of the drug product*"
- Batch formula mentioned in section 3.2.P.3.1 evident that only the active ingredient is the part of batch formula, while manufacturing procedure specified in section 3.2.P.3.3 stated that "solution has been prepared in 50-liter pyrogen free water by dissolving the 1.5kg Citi-Taxime 250mg IM and later add propylene glycol, sodium chloride and sodium hydroxide. Clarification is required either the applied product is dry powder for injection or a solution for injection as evident from the detail manufacturing procedure given in section 3.2. P.3.3.
- Provide complete analytical procedure used for routine testing of drug product since submitting the copy of USP monograph did not fulfil the requirement of section 3.2. P.5.2.
- Analytical method of drug product verified in section 3.2.P.5.3 is different from that specified in USP monograph. Justify, for using different analytical method for verification studies.
- Scientific justification for not performing test of completeness and clarity of solution, bacterial endotoxin test, testing of pH, water determination test and sterility test during the batch release of the drug product
- Provide COA of primary / secondary reference standard including source and lot number in section 3.2. P.6.
- According to the stability data, stability study has performed in the year 2022 whereas the submitted chromatograms and audit trail reports were of 2021, clarification required in this regard.
- Provide details that which lot number of drug substance has been used in manufacturing of each batch of drug product. Also provide documents confirming evidence of import of each lot of drug substance used in manufacturing of these batches of drug product.
- Provide data of stability batches properly arranged and supported by respective documents including analytical report / COA, raw data sheet and respective chromatograms separately for each time point.
- Provide Reference of previous approval of applications with stability study data of the firm (if any)
- Documents for the procurement of API with approval from DRAP (in case of import).
- Provide Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).
- In-use stability studies of reconstituted injection are required along with proposed in-use storage statement and in-use shelf-life.
- Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2. P.8.3.

Decision of 323rd meeting of Registration Board:
Deferred for submission of reply of above-cited shortcomings within six month.

Remarks OF Evaluator:

Sr.no.	Section	Observations/Shortcomings	Reply of the Firm
1.	3.2.S.4.1 3.2. S.4.2	Submit specifications as well as analytical method of the drug substance from the drug product manufacturer in section 3.2.S.4.1 and 3.2. S.4.2.	Firm has not submitted the specifications and analytical procedure of drug substance by drug product manufacturer.
2.	3.2. S.4.3	Submit data in section 3.2.S.4.3 as per the guidance document approved by Registration Board which specifies that "Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted"	Firm has not submitted the analytical method verification report of drug substance performed by drug product manufacturer.
3.	3.2. S.7	Submit complete long-term stability data of all three batches of drug substance, since only the complete data of batch no. CEIV/B1203011 has been submitted in section 3.2. S.7.	Firm has not submitted the long-term stability data of batch no. CEIV/B1203013.
4.	3.2. P.2.6	Submit the data of compatibility studies in section 3.2.P.2.6 as per the decision of 293rd meeting of Registration Board, which states that "*Compatibility studies for the dry powder for injections and dry powder for suspension should be performed as per the instructions provided in individual label of the drug product*"	Firm has not submitted the reply in response of this query.
5.	3.2. P.3.1	Batch formula mentioned in section 3.2.P.3.1 evident that only the active ingredient is the part of batch formula, while manufacturing	Firm has submitted the amended document in which cefepime HCl with L-arginine is mentioned as the only active ingredient. However, the information regarding the quantity of dry powder filled per vial has not been given. Further, the flow chart of manufacturing process

		procedure specified in section 3.2.P.3.3 stated that "solution has been prepared in 50-liter pyrogen free water by dissolving the 1.5kg Citi-Taxime 250mg IM and later add propylene glycol, sodium chloride and sodium hydroxide. Clarification is required either the applied product is dry powder for injection or a solution for injection as evident from the detail manufacturing procedure given in section 3.2. P.3.3.	submitted in the reply of section 3.2.P.3.3 is of ceftriaxone.
6.	3.2.P.5.2	Provide complete analytical procedure used for routine testing of drug product since submitting the copy of USP monograph did not fulfil the requirement of section 3.2. P.5.2.	Firm again submit the copy of monograph of USP in section 3.2.P.5.2 and in section 3.2.P.4.2 submit the analytical procedure of cefotaxime injection.
7.	3.2.P.5.3	Analytical method of drug product verified in section 3.2.P.5.3 is different from that specified in USP monograph. Justify, for using different analytical method for verification studies.	Firm has not given the reply in response of this query.
8.	3.2.P.5.4	Scientific justification for not performing test of completeness and clarity of solution, bacterial endotoxin test, testing of pH, water determination test and sterility test during the batch release of the drug product	firm has submitted batch analysis report of three trail batches TRA-001, TRA-002, TRA-003 which were not the batch numbers of trial batches used for stability studies as evident from the submitted stability data sheets. Further, the test of completeness and clarity of solution, bacterial endotoxin test, testing of pH, water determination test and sterility test was not been included in batch analysis report nor given any justification. Furthermore, the firm submitted the same batch analysis report for cefepime 500mg injection and cefepime 1gm injection.
9.	3.2.P.6	Provide COA of primary / secondary reference standard including source and lot number in section 3.2. P.6.	Firm has submitted the reply in response of this query.
10.	3.2.P.8	Submit the stability data sheet of cefepime injection, since the	Firm stated that rectified and corrected stability data sheets are submitted.

		submitted sheets are of ceftriaxone.	
11.	3.2.P.8	According to the document submitted in section 3.2. P.8 batch no. Cef-P-004, Cef-P-005and Cef-P-006 has been manufactured on 09-2021, while the dossier submitted in R&I of DRAP on 13th May,2022i.e. after 8 months of manufacturing of trial batches, clarification is required how you have submitted the stability data of real time study till 24month.	Firm stated that rectified and corrected stability data sheets are submitted. However, the firm submitted the raw data sheets of batch no. TC006-01, TC006-02, TC006-03.
12.		1. Provide details that which lot number of drug substance has been used in manufacturing of each batch of drug product. Also provide documents confirming evidence of import of each lot of drug substance used in manufacturing of these batches of drug product. 2. Provide data of stability batches properly arranged and supported by respective documents including analytical report / COA, raw data sheet and respective chromatograms separately for each time point. 3. Provide Reference of previous approval of applications with stability study data of the firm (if any) 4. Documents for the procurement of API with approval from DRAP (in case of import). 5. Provide compliance Record of HPLC software 21CFR &	Firm has only submitted the chromatograms and 21 CFR audit trail report of instant product. Remaining documents has not been provided by the firm.

		audit trail reports on product testing. 6. Provide Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated). 7. In-use stability studies of reconstituted injection is required along with proposed in-use storage statement and in-use shelf-life. 8. Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2. P.8.3.	

Decision of 321st meeting of Registration Board:

- Specifications as well as analytical method of the drug substance from the drug product manufacturer in section 3.2.S.4.1 and 3.2. S.4.2.
- Analytical method verification report of drug substance performed by drug product manufacturer.
- Long-term stability data of batch no. CEIV/B1203013 of drug substance till the claimed shelf life/re-test period.
- Compatibility study data of drug product with its diluent under the requirement of section 3.2.P.2.6.
- Complete batch formula along with quantity of filled weight per vial in section 3.2.P.3.
- Complete analytical procedure used for routine testing of applied drug product in section 3.2. P.5.2.
- Analytical method verification report of assay testing of drug product, in compliance of USP monograph of Cefepime Injection.
- Clarification regarding the trial batches which were actually manufactured for the stability study of applied product.
- Batch analysis report of all three trial batches, in which all the quality test should be included that are specify in USP monograph of Cefepime injection.
- Provide details that which lot number of drug substance has been used in manufacturing of each batch of drug product. Also provide documents confirming evidence of import of each lot of drug substance used in manufacturing of these batches of drug product.
- Provide data of stability batches properly arranged and supported by respective documents including analytical report / COA, raw data sheet and respective chromatograms separately for each time point.
- Documents for the procurement of API with approval from DRAP (in case of import).
- Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2. P.8.3.

Reply of the Firm:

Sr.no.	Decision of Registration Board	Response of Firm
1.	Specifications as well as analytical method of the drug substance from the drug product manufacturer in section 3.2.S.4.1 and 3.2. S.4.2.	Firm submitted the specification and analytical procedure of drug substance by drug substance manufacturer instead from drug product manufacturer.
2.	Analytical method verification report of drug substance	Firm submitted the analytical verification report from which it is evident that the performance of accuracy

	performed by drug product manufacturer.	parameter did not cover the range of conc of sample and standard solution recommended in the USP monograph.
3.	Long-term stability data of batch no. CEIV/B1203013 of drug substance till the claimed shelf life/re-test period.	submitted
4.	Compatibility study data of drug product with its diluent under the requirement of section 3.2.P.2.6.	submitted
5.	Complete batch formula along with quantity of filled weight per vial in section 3.2.P.3.	Not submitted
6.	Complete analytical procedure used for routine testing of applied drug product in section 3.2. P.5.2.	Submitted
7.	Analytical method verification report of assay testing of drug product ,in compliance of USP monograph of Cefepime Injection	Firm submitted the analytical verification report from which it is evident that the performance of accuracy parameter did not cover the range of conc of sample and standard solution recommended in the USP monograph.
8.	Clarification regarding the trial batches which were actually manufactured for the stability study of applied product.	Firm submitted the batch analysis report of three trial batches (TC006-001,TC006-002,TC006-003), Further the stability data sheet of real time stability study and COA of individual time points were of trial batches TC007-001,TC007-02,TC007-03.
9.	• Provide details that which lot number of drug substance has been used in manufacturing of each batch of drug product. Also provide documents confirming evidence of import of each lot of drug substance used in manufacturing of these batches of drug product. • Documents for the procurement of API with approval from DRAP (in case of import).	Firm submitted the form-6 bearing the dy.no. 6176 dated 16-04-2021 and the stamp of concerned officer on the same document was of dated 22-04-2021, further the name of drug mentioned on the document was cefepime instead of cefepime L-Arginine. Firm submitted the commercial invoice bearing the dy.no. 6017/2021 DRAP dated 22-04-2021 and the stamp of concerned officer on the same document was of dated 22-04-2021, further the name of drug mentioned on the document was cefepime instead of cefepime L-Arginine.
10.	Provide data of stability batches properly arranged and supported by respective documents including analytical report / COA, raw data sheet and respective chromatograms separately for each time point.	As per the submitted raw data sheets and chromatograms it is evident that firm has not applied the chromatographic condition with reference to mobile phase program, injection volume and sample conc. as recommended by USP.
11.	Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2. P.8.3	Not submitted

Decision of 323rd meeting of Registration Board:

Deferred for submission of following:

- **Specifications as well as analytical method of the drug substance from the drug product manufacturer in section 3.2.S.4.1 and 3.2. S.4.2.**
- **Manufacturer will provide analytical method verification studies for drug substance by drug product manufacturer as per USP including specificity, accuracy and precision before the issuance of registration letter.**
- **Complete batch formula along with quantity of filled weight per vial in section 3.2.P.3.**
- **Analytical method verification report of assay testing of drug product, in compliance of USP monograph of Cefepime Injection.**
- **Clarification regarding the trial batches which were actually manufactured for the stability study of applied product.**
- **Clarification required for not applied the same chromatographic condition for assay testing of drug product as recommended by USP monograph of cefepime injection, as evident from the submitted raw data sheets and chromatograms of stability batches.**
- **Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2. P.8.3**

Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has not submitted the requisite document.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Form-6 grant permission for license to import from M/s. Kopran Research laboratories, India vide Dy. No. 6176 Dated: 16-04-2021. Invoice attested vide Dy.no. 6017/2021 DRAP dated: 22-04-2021in which exporter was M/s. Kopran Research laboratories, India
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Raw data sheets and chromatograms attached.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks OF Evaluator:

Sr.no.	Observations/Shortcomings	Reply of the Firm
1.	Submit specifications as well as analytical method of the drug substance from the drug product manufacturer in section 3.2.S.4.1 and 3.2. S.4.2.	Firm has not submitted the specifications and analytical procedure of drug substance by drug product manufacturer.
2.	Submit data in section 3.2.S.4.3 as per the guidance document approved by Registration Board which specifies that "Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted"	Firm has not submitted the analytical method verification report of drug substance performed by drug product manufacturer.
3.	Submit complete long-term stability data of all three batches of drug substance, since only the complete data of batch no. CEIV/B1203011 has been submitted in section 3.2. S.7.	Firm has not submitted the long-term stability data of batch no. CEIV/B1203013.
4.	Submit the data of compatibility studies in section 3.2.P.2.6 as per the decision of 293rd meeting of Registration Board, which states that "*Compatibility studies for the dry*	Firm has not submitted the reply in response of this query.

	powder for injections and dry powder for suspension should be performed as per the instructions provided in individual label of the drug product"	
5.	Batch formula mentioned in section 3.2.P.3.1 evident that only the active ingredient is the part of batch formula, while manufacturing procedure specified in section 3.2.P.3.3 stated that "solution has been prepared in 50-liter pyrogen free water by dissolving the 1.5kg Citi-Taxime 250mg IM and later add propylene glycol, sodium chloride and sodium hydroxide. Clarification is required either the applied product is dry powder for injection or a solution for injection as evident from the detail manufacturing procedure given in section 3.2. P.3.3.	Firm has submitted the amended document in which cefepime HCl with L-arginine is mentioned as the only active ingredient. However, the information regarding the quantity of dry powder filled per vial has not been given. Further, the flow chart of manufacturing process submitted in the reply of section 3.2.P.3.3 is of ceftriaxone.
6.	Provide complete analytical procedure used for routine testing of drug product since submitting the copy of USP monograph did not fulfil the requirement of section 3.2. P.5.2.	Firm again submit the copy of monograph of USP in section 3.2.P.5.2 and in section 3.2.P.4.2 submit the analytical procedure of cefotaxime injection.
7.	Analytical method of drug product verified in section 3.2.P.5.3 is different from that specified in USP monograph. Justify, for using different analytical method for verification studies.	Firm has not given the reply in response of this query.
8.	Scientific justification for not performing test of completeness and clarity of solution, bacterial endotoxin test, testing of pH, water determination test and sterility test during the batch release of the drug product	firm has submitted batch analysis report of three trail batches TRA-001, TRA-002, TRA-003 which were not the batch numbers of trial batches used for stability studies as evident from the submitted stability data sheets. Further, the test of completeness and clarity of solution, bacterial endotoxin test, testing of pH, water determination test and sterility test was not been included in batch analysis report nor given any justification. Furthermore, the firm submitted the same batch analysis report for cefepime 500mg injection and cefepime 1gm injection.
9.	Provide COA of primary / secondary reference standard including source and lot number in section 3.2. P.6.	Firm has submitted the reply in response of this query.
10.	Submit the stability data sheet of cefepime injection, since the submitted sheets are of ceftriaxone.	Firm stated that rectified and corrected stability data sheets are submitted.
11.	According to the document submitted in section 3.2. P.8 batch no. Cef-P-004, Cef-P-005and Cef-P-006 has been manufactured on 09-2021, while the dossier submitted in R&I of DRAP on 13th May,2022i.e. after 8 months of manufacturing of trial batches, clarification is required how you have	Firm stated that rectified and corrected stability data sheets are submitted. However, the firm submitted the raw data sheets of batch no. TC006-01, TC006-02, TC006-03.

	submitted the stability data of real time study till 24month.	
12.	9. Provide details that which lot number of drug substance has been used in manufacturing of each batch of drug product. Also provide documents confirming evidence of import of each lot of drug substance used in manufacturing of these batches of drug product. 10. Provide data of stability batches properly arranged and supported by respective documents including analytical report / COA, raw data sheet and respective chromatograms separately for each time point. 11. Provide Reference of previous approval of applications with stability study data of the firm (if any) 12. Documents for the procurement of API with approval from DRAP (in case of import). 13. Provide compliance Record of HPLC software 21CFR & audit trail reports on product testing. 14. Provide Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated). 15. In-use stability studies of reconstituted injection is required along with proposed in-use storage statement and in-use shelf-life. 16. Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2. P.8.3.	Firm has only submitted the chromatograms and 21 CFR audit trail report of instant product. Remaining documents has not been provided by the firm.

Decision of 321st meeting of Registration Board:

- Specifications as well as analytical method of the drug substance from the drug product manufacturer in section 3.2.S.4.1 and 3.2. S.4.2.
- Analytical method verification report of drug substance performed by drug product manufacturer.
- Long-term stability data of batch no. CEIV/B1203013 of drug substance till the claimed shelf life/re-test period.
- Compatibility study data of drug product with its diluent under the requirement of section 3.2.P.2.6.
- Complete batch formula along with quantity of filled weight per vial in section 3.2.P.3.
- Complete analytical procedure used for routine testing of applied drug product in section 3.2. P.5.2.
- Analytical method verification report of assay testing of drug product, in compliance of USP monograph of Cefepime Injection.
- Clarification regarding the trial batches which were actually manufactured for the stability study of applied product.
- Batch analysis report of all three trial batches, in which all the quality test should be included that are specify in USP monograph of Cefepime injection.

- Provide details that which lot number of drug substance has been used in manufacturing of each batch of drug product. Also provide documents confirming evidence of import of each lot of drug substance used in manufacturing of these batches of drug product.
- Provide data of stability batches properly arranged and supported by respective documents including analytical report / COA, raw data sheet and respective chromatograms separately for each time point.
- Documents for the procurement of API with approval from DRAP (in case of import).
- Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2. P.8.3.

Reply of the Firm:

Sr.no.	Decision of Registration Board	Response of Firm
1.	Specifications as well as analytical method of the drug substance from the drug product manufacturer in section 3.2.S.4.1 and 3.2. S.4.2.	Firm submitted the specification and analytical procedure of drug substance by drug substance manufacturer instead from drug product manufacturer.
2.	Analytical method verification report of drug substance performed by drug product manufacturer.	Firm submitted the analytical verification report from which it is evident that the performance of accuracy parameter did not cover the range of conc of sample and standard solution recommended in the USP monograph.
3.	Long-term stability data of batch no. CEIV/B1203013 of drug substance till the claimed shelf life/re-test period.	submitted
4.	Compatibility study data of drug product with its diluent under the requirement of section 3.2.P.2.6.	submitted
5.	Complete batch formula along with quantity of filled weight per vial in section 3.2.P.3.	Not submitted
6.	Complete analytical procedure used for routine testing of applied drug product in section 3.2. P.5.2.	Submitted
7.	Analytical method verification report of assay testing of drug product ,in compliance of USP monograph of Cefepime Injection	Firm submitted the analytical verification report from which it is evident that the performance of accuracy parameter did not cover the range of conc of sample and standard solution recommended in the USP monograph.
8.	Clarification regarding the trial batches which were actually manufactured for the stability study of applied product.	Firm submitted the batch analysis report of three trial batches (TC007-001,TC007-002,TC007-003).
9.	• Provide details that which lot number of drug substance has been used in manufacturing of each batch of drug product. Also provide documents confirming evidence of import of each lot of drug substance used in manufacturing of these batches of drug product. • Documents for the procurement of API with approval from DRAP (in case of import).	Firm submitted the form-6 bearing the dy.no. 6176 dated 16-04-2021 and the stamp of concerned officer on the same document was of dated 22-04-2021, further the name of drug mentioned on the document was cefepime instead of cefepime L-Arginine. Firm submitted the commercial invoice bearing the dy.no. 6017/2021 DRAP dated 22-04-2021 and the stamp of concerned officer on the same document was of dated 22-04-2021, further the name of drug mentioned on the document was cefepime instead of cefepime L-Arginine.
10.	Provide data of stability batches properly arranged and supported by respective documents including analytical report / COA, raw data sheet and respective	As per the submitted raw data sheets and chromatograms it is evident that firm has not applied the chromatographic condition with reference to mobile phase gradient program,

	chromatograms separately for each time point.	injection volume and sample conc. as recommended by USP.
11.	Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2. P.8.3	Not submitted

Decision of 323rd meeting of Registration Board:
Deferred for submission of following:

- **Specifications as well as analytical method of the drug substance from the drug product manufacturer in section 3.2.S.4.1 and 3.2. S.4.2.**
- **Manufacturer will provide analytical method verification studies for drug substance by drug product manufacturer as per USP including specificity, accuracy and precision before the issuance of registration letter.**
- **Complete batch formula along with quantity of filled weight per vial in section 3.2.P.3.**
- **Analytical method verification report of assay testing of drug product, in compliance of USP monograph of Cefepime Injection.**
- **Clarification regarding the trial batches which were actually manufactured for the stability study of applied product.**
- **Clarification required for not applied the same chromatographic condition for assay testing of drug product as recommended by USP monograph of cefepime injection, as evident from the submitted raw data sheets and chromatograms of stability batches.**
- **Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2. P.8.3**

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	No previous inspection of the firm has been conducted for verification of stability studies.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Not submitted
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not submitted
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not submitted

Remarks of Evaluator:

S.no.	Section	Description
1	**2.3.P.1**	Provide summarized information (including type of diluent, its composition, quantity or volume, specifications (as applicable) and regulatory status in Pakistan (as applicable) for the diluent which is to be provided along with the applied drug product.
2	**2.3.P.2.6**	Compatibility studies for the dry powder for injections and dry powder for suspension shall be performed as per the instructions provided in individual label of the drug product.
3	**2.3.R.1.1**	**Executed Production Documents** Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3

4	**3.2.S.4**	• Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted. • Provide results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (CoA) of the same batch from Drug Substance / /Active Pharmaceutical Ingredient manufacture. • COA of primary / secondary reference standard including source and lot number shall be provided.
5	**3.2.S.7**	• Significant change in accelerated stability studies of Drug substance manufacturer batch no 16130701, 16130801,16130802 (948 µg/mg to 868 µg/mg, 951 µg/mg to 878 µg/mg and 848 µg/mg to 880 µg/mg respectively). • Justification shall be submitted for not including Sterility and endotoxin testing in stability studies data
6	**3.2.P.3**	• Standard manufacturing procedure for Citi-Taxime 250 mg IM has been provided. Justification required. Furthermore, in Standard manufacturing procure preparation of solution, filtration and filling of liquid (1.00 to 1.20 ml) mentioned for Citi-Taxime. Justification shall be submitted. • The process validation protocols do not contain any steps to ensure the sterilization of vials and rubber stopper is adequately performed, further the time and temperature of sterilization cycle is also not validated. Justification is required in this regard.
7	**3.2.P.5**	• In Method validation protocol no. QC/CEPH/MVD/007, issue date 20-11-2021, Testing procedure use is UV spectrophotometer at wavelength of 245nm. However, In official monograph USP its method on HPLC. • Method validation report for Roxime 250 mg injection (SAP/P/260), procedure use is UV spectrophotometer at wavelength of 245nm. However, In official monograph USP its method on HPLC. • Detailed analytical procedures used for testing the drug product shall be provided.
8	**3.2.P.7**	Please provide detail of the container closure systems, description of the primary container closure systems, including materials of construction, unit count or fill size, container size or volume shall be provided. Please also provide USP type of glass vials.
9	**3.2.P.8**	• Stability study record of real time batch no. TRI009-003 shall be provided. • In 3.2. P.5. Method validation protocol and report is provided of UV spectrophotometer method. However, in stability studies HPLC chromatograms are provided, which are not in accordance with USP official monograph. As in USP monograph Orcinol in water containing 1.5 mg per mL has been used as internal standard and the resolution, *R*, between the analyte and internal standard peaks is not less than 3.5. However, in provided chromatograms there is no peak of Orcinol. Justification required. • Documents for the procurement of API with approval from DRAP shall be provided. • Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) shall be submitted. • Please provide Certificate of analysis of API which is actually used in manufacturing of product. • Submit compliance record of HPLC software 21CFR & audit trail reports on product testing for each analysis performed during the study. • Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.

		• Documents for the procurement of API with approval from DRAP (in case of import). • Summary of additional stability studies (if applicable) e.g. in-use studies for drug products which are to be reconstituted before use, along with proposed in-use storage statement and in-use shelf-life shall be provided.

Decision of 323rd meeting of Registration Board: Registration Board deferred the case for submission of reply to the above cited shortcomings within six (06) months.

S.no.	Section	Description
1	**2.3.P.1**	Provide summarized information (including type of diluent, its composition, quantity or vol specifications (as applicable) and regulatory status in Pakistan (as applicable) for the diluent w is to be provided along with the applied drug product.
2	**2.3.P.2.6**	Compatibility studies for the dry powder for injections and dry powder for suspension sha performed as per the instructions provided in individual label of the drug product.
3	**2.3.R.1.1**	**Executed Production Documents** Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for w stability studies data is provided in Module 3 section 3.2.P.8.3
4	**3.2.S.4**	• Analytical Method Verification studies including specificity, accuracy and repeatal (method precision) performed by the Drug Product manufacturer for both compendial as as non-compendial drug substance(s) shall be submitted. • Provide results of analysis of relevant batch(es) of Drug Substance performed by Drug Pro manufacturer used during product development and stability studies, along with Certifica Analysis (CoA) of the same batch from Drug Substance / /Active Pharmaceutical Ingre manufacture. • COA of primary / secondary reference standard including source and lot number sha provided.
5	**3.2.S.7**	• Significant change in accelerated stability studies of Drug substance manufacturer batc 16130701, 16130801,16130802 (948 µg/mg to 868 µg/mg, 951 µg/mg to 878 µg/mg and µg/mg to 880 µg/mg respectively). • Justification shall be submitted for not including Sterility and endotoxin testing in stal studies data
6	**3.2.P.3**	• Standard manufacturing procedure for Citi-Taxime 250 mg IM has been prov Justification required. Furthermore, in Standard manufacturing procure preparatio solution, filtration and filling of liquid (1.00 to 1.20 ml) mentioned for Citi-Tax Justification shall be submitted.

		• The process validation protocols do not contain any steps to ensure the sterilization of and rubber stopper is adequately performed, further the time and temperature of steriliz cycle is also not validated. Justification is required in this regard.
7	**3.2.P.5**	• In Method validation protocol no. QC/CEPH/MVD/007, issue date 20-11-2021, Te procedure use is UV spectrophotometer at wavelength of 245nm. However, In of monograph USP its method on HPLC. • Method validation report for Roxime 250 mg injection (SAP/P/260), procedure use is spectrophotometer at wavelength of 245nm. However, In official monograph USP its me on HPLC. • Detailed analytical procedures used for testing the drug product shall be provided.
8	**3.2.P.7**	Please provide detail of the container closure systems, description of the primary container clo systems, including materials of construction, unit count or fill size, container size or volume be provided. Please also provide USP type of glass vials.
9	**3.2.P.8**	• Stability study record of real time batch no. TRI009-003 shall be provided. • In 3.2. P.5. Method validation protocol and report is provided of UV spectrophotom method. However, in stability studies HPLC chromatograms are provided, which are n accordance with USP official monograph. As in USP monograph Orcinol in water conta 1.5 mg per mL has been used as internal standard and the resolution, *R*, between the an and internal standard peaks is not less than 3.5. However, in provided chromatograms the no peak of Orcinol. Justification required. • Documents for the procurement of API with approval from DRAP shall be provided. • Record of Digital data logger for temperature and humidity monitoring of stability cham (real time and accelerated) shall be submitted. • Please provide Certificate of analysis of API which is actually used in manufacturin product. • Submit compliance record of HPLC software 21CFR & audit trail reports on product te for each analysis performed during the study. • Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regul authority of country of origin. • Documents for the procurement of API with approval from DRAP (in case of import). • Summary of additional stability studies (if applicable) e.g. in-use studies for drug pro which are to be reconstituted before use, along with proposed in-use storage statement an use shelf-life shall be provided.

Decision of 323rd meeting of Registration Board: Registration Board deferred the case for submission of reply to the above cited shortcomings within six (06) months.

5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not submitted

Remarks of Evaluator:

S.no.	Section	Description
1	**1.5.4**	Justification shall be provided for pack size of 1.5 g IM/IV injection (10 ml). However, as per innovator its dilution is required with 15 ml water for injection.
2	**2.3.P.1**	Provide summarized information (including type of diluent, its composition, quantity or volume, specifications (as applicable) and regulatory status in Pakistan (as applicable) for the diluent which is to be provided along with the applied drug product.
3	**2.3.P.2.6**	Compatibility studies for the dry powder for injections and dry powder for suspension shall be performed as per the instructions provided in individual label of the drug product.
4	**2.3.R.1.1**	**Executed Production Documents** Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3
5	**3.2.S.4**	• Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted. • Provide results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (CoA) of the same batch from Drug Substance / /Active Pharmaceutical Ingredient manufacture. • COA of primary / secondary reference standard including source and lot number shall be provided.
6	**3.2.S.7**	• Significant change in accelerated stability studies of Drug substance manufacturer batch no 16130701, 16130801,16130802 (948 µg/mg to 868 µg/mg, 951 µg/mg to 878 µg/mg and 848 µg/mg to 880 µg/mg respectively). • Justification shall be submitted for not including Sterility and endotoxin testing in stability studies data
7	**3.2.P.3**	• Standard manufacturing procedure for Citi-Taxime 250 mg IM has been provided. Justification required. Furthermore, in Standard manufacturing procure preparation of solution, filtration and filling of liquid (1.00 to 1.20 ml) mentioned for Citi-Taxime. Justification shall be submitted. • The process validation protocols do not contain any steps to ensure the sterilization of vials and rubber stopper is adequately performed, further the time and temperature of sterilization cycle is also not validated. Justification is required in this regard.
8	**3.2.P.5**	• In Method validation protocol no. QC/CEPH/MVD/007, issue date 20-11-2021, Testing procedure use is UV spectrophotometer at wavelength of 245nm. However, In official monograph USP its method on HPLC. • Method validation report for Roxime 250 mg injection (SAP/P/260), procedure use is UV spectrophotometer at wavelength of 245nm. However, In official monograph USP its method on HPLC. • Detailed analytical procedures used for testing the drug product shall be provided.
9	**3.2.P.7**	Please provide detail of the container closure systems, description of the primary container closure systems, including materials of construction, unit count or fill size, container size or volume shall be provided. Please also provide USP type of glass vials.
10	**3.2.P.8**	• Stability study record of real time batch no. TRI009-003 shall be provided. • In 3.2. P.5. Method validation protocol and report is provided of UV spectrophotometer method. However, in stability studies HPLC chromatograms are provided, which are not in accordance with USP official monograph. As in USP monograph Orcinol in water containing 1.5 mg per mL has been used as internal standard and the resolution, *R*, between the analyte and internal standard peaks is not less than 3.5. However, in provided chromatograms there is no peak of Orcinol. Justification required. • Documents for the procurement of API with approval from DRAP shall be provided. • Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) shall be submitted.

		• Please provide Certificate of analysis of API which is actually used in manufacturing of product. • Submit compliance record of HPLC software 21CFR & audit trail reports on product testing for each analysis performed during the study. • Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin. • Documents for the procurement of API with approval from DRAP (in case of import). • Summary of additional stability studies (if applicable) e.g. in-use studies for drug products which are to be reconstituted before use, along with proposed in-use storage statement and in-use shelf-life shall be provided.

Decision of 323rd meeting of Registration Board: Registration Board deferred the case for submission of reply to the above cited shortcomings within six (06) months.

Decision: Registration Board aceeded to the request of M/s Citi Pharma(Pvt.) Ltd. 3- Km, Head Balloki Road, Phool Nagar, Kasur. (DML No. 000512) for withdrawal of their above mentioned applications and declared them as disposed off.

PREVIOUSLY DEFERRED CASES OF FORM-5

974.	Name and address of manufacturer / Applicant	M/s Wnsfield Pharmaceuticals. Plot no. 122, Phase V, Block A, Industrial Estate Hattar.
	Brand Name +Dosage Form + Strength	Orliwin 120mg capsule
	Diary No. Date of R& I & fee	Each capsule contains: Orlistat (50.0% pellets)……..120mg
	Composition	Dy. No.1522; 28-03-2017; Rs.20,000/- (27-03-2017)
	Pharmacological Group	Lipase Inhibitor
	Type of Form	Form 5
	Finished product Specification	U.S.P.
	Pack size & Demanded Price	As per SRO
	Approval status of product in Reference Regulatory Authorities.	Approved in USFDA
	Me-too status	Orlis 120mg capsule of M/s Ferozsons
	GMP status	DML Renewal Inspection Date: 18th January, 2018
	Previous remarks of the Evaluator.	Source of pellets is not provided by the firm.
	Previous decision(s)	●Deferred for source of pellets, along with stability studies data, GMP certificate of supplier and differential fee in case of import of pellets. (M-279)
	Evaluation by PEC	●The firm has submitted Source of pellets: M/s Vision Pharmaceuticals COA of Orlistat IR Pellets 50.0% Stability study datasheet of 3 batches certificate granted based on inspection conducted on 26-01-2018.
	Decision of 282nd meeting of Registration Board	**Deferred for further deliberation upon requirement of accelerated stability study data of Orlistat pellets**
	Response of the Firm	Firm replied that "Our product Orlistat 120mg Capsule was deferred in DRB 282 Meeting due to further deliberation upon requirement of accelerated stability study data of Oristat pellets".In this regard we're submitting the Stability Data Sheets Along with DML, and COA of Orlistat Pellets by M/s Alphamed Formulations Private Limited India."We would further bring into your notice that this is the same source from where the registration holder companies of Orlistat Capsule in Pakistan, are already importing Orlistat Pellets. For reference we have attached the image of Import Data"

		However, previously firm claimed that their source of pellets is M/s. Vision Pharmaceuticals, Now they are submitting DML, COA and stability data performed at real time condition of Orlistat Pellets by M/s Alphamed Formulations Private Limited India., while the point of discussion is relevant to **accelerated stability study data of Orlistat pellets.**
	Decision: Deferred for submission of stability study data of Orlistat pellets performed at accelerated conditions.	
975.	Name and address of manufacturer / Applicant	M/S Lisko Pakistan (Pvt) Ltd. L-10-D Block-21 Shaheed Rashid Minhas Road, F.B. Industrial Area, Karachi
	Brand Name +Dosage Form + Strength	Telsart HCT 80mg/25mg Tablet
	Composition	Each tablet contains: Telmisartan USP …….80mg Hydrochlorothiazid……..25mg
	Diary No. Date of R& I & fee	Dy.No.13655; 28-08-2017; Rs.20,000/- (25-08-2017)
	Pharmacological Group	Antihypertensive(Angiotensin II Receptor Antagonist, Thiazide Diuretic)
	Type of Form	Form 5
	Finished product Specifications	USP
	Pack size & Demanded Price	10's, 14's, ; As per SRO
	Approval status of product in Reference Regulatory Authorities	Micardis HCT of (USFDA Approved)
	Me-too status (with strength and dosage form)	Teli-H Tabletsof M/S Wilson's Pharmaceuticals
	GMP status	Last GMP inspection is conducted on 24-4-2018 & report concludes that overall firm has satisfactory level of GMP compliance.
	Remarks of the Evaluator	• Evidence of double compression machine not found.
	Decision of 283rd meeting of Registration Board	Registration board deferred the case for Evidence of double compression Machine verified by FID. Moreover, Registration Board deferred the case as FID has reported for not having stability chamber for conducting Real time stability studies.
	Response of the Firm	Firm submitted certificate of availability of more than two functional stability chamber and the certificate is attested by the area FID. Further firm submitted the copy of routine GMP inspection reprt dated 15th February,2024 in which it was noted that firm has Bi-Layered tablets compression and Co-blistering facility in all section including general tablets,penicillin section and Cephalosporin section.
	Decision: Approved.	
976.	Name and address of manufacturer / Applicant	M/s Lisko Pakistan Pvt Ltd. L-10-D, Block 21, Shaheed Rashid Minhas Road, F.B. Industrial Area, Karachi
	Brand Name +Dosage Form + Strength	Telsart Plus Tablet 40/12.5mg
	Composition	Each tablet contains: Telmisartan...40mg Hydrochlorothiazide…....12.5mg
	Diary No. Date of R& I & fee	Dy. No. 13671, 28-08-2017, Rs. 20,000/- 25-08-2017
	Pharmacological Group	Antihypertensive
	Type of Form	Form-5
	Finished product Specification	Manufacturer specifications
	Pack size & Demanded Price	14's & 28's
	Approval status of product in Reference Regulatory Authorities.	Approved by MHRA of Uk

	Me-too status	Velmon-H 40/12.5mg Tablet of M/s Martin Dow Ltd. Karachi (Reg.#081160)
	GMP status	Latest GMP inspection conducted on 24-04-2018 and the report concludes satisfactory level of GMP compliance.
	Remarks of the Evaluator.	
	Decision of 283rd meeting of Registration Board	Registration Board deferred the case as FID has reported for not having stability chamber for conducting Real time stability studies.
	Response of the Firm	Firm submitted certificate of availability of more than two functional stability chamber and the certificate is attested by the area FID. Further firm submitted the copy of routine GMP inspection reprt dated 15th February,2024 in which it was noted that firm has Bi-Layered tablets compression and Co-blistering facility in all section including general tablets,penicillin section and Cephalosporin section.
	Decision: Approved.	
977.	Name and address of manufacturer / Applicant	M/s Jawa Pharmaceuticals Pvt Ltd 112/10, Quaid-e-Azam Industrial Area, Kot Lakhpat, Lahore
	Brand Name +Dosage Form + Strength	Lemex Injection 150mg
	Diary No. Date of R& I & fee	(Duplicate Dossier) Dy. No. 2284 dated 16/06/2011 Rs. 8,000/- (Photocopy fee challan) Dy. No. dated 16/12/2015 Rs. 12,000/- (Photocopy fee challan) (Receipt of application verified by R&I)
	Composition	Each ml contains: - Clindamycin ……. 150mg
	Pharmacological Group	Lincosamide (Antibiotic)
	Type of Form	Form-5
	Finished Product Specification	USP
	Pack Size & Demanded Price	4 x 1ml's
	Approval Status of Product in Reference Regulatory Authorities	Could not be confirmed
	Me-too Status	Cleocin Injection by Mediceena Pharma (Clindamycin Phosphate) (Reg No. 028815)
	GMP Status	Panel inspection for renewal of DML conducted on 15-12-2020,16-12-2020,26-01-2021 concluded with the following remarks: "The panel recommends the renewal of Drug Manufacturing License to M/s. Jawa Pharmaceuticals (Pvt.) Ltd., Lahore by way of formulation"
	Remarks of the Evaluator.	Approval status of applied formulation could not be confirmed in Reference Regulatory Agencies.
	Decision of 308th meeting of Registration Board	Deferred for evidence of approval of applied formulation in reference regulatory authorities/agencies which were adopted by Registration Board in its 275th meeting.
	Response of the Firm	Firm submitted the evidence of approval of applied product in MHRA, but the reference product is clindamycin phosphate with the pack size of 2ml,4ml &6ml ,while the applied product clindamycin base and demanded pack size was 1ml.
	Decision: Approved with following label claim; **Each ml contains: -** **Clindamycin Phosphate ……. 150mg** **Registration letter will be issued after Submission of differential fee of Rs. 30,000/- for correction/pre-approval change in composition (correction/change of salt form of the drug**	

	substance), as per notification No.F.7-11/2021-B&A/DRAP dated 13-07-2021 shall be submitted.	
978.	Name and address of manufacturer / Applicant	M/s Jawa Pharmaceuticals Pvt Ltd 112/10, Quaid-e-Azam Industrial Area, Kot Lakhpat, Lahore
	Brand Name +Dosage Form + Strength	Jawaflox Dry Suspension
	Diary No. Date of R& I & fee	(Duplicate Dossier) Dy. No.5265 dated 11/05/2011 Rs. 8,000/- (Photocopy fee challan) Dy. No. dated 16/12/2015 Rs. 12,000/- (Photocopy fee challan) (Receipt of application verified by R&I)
	Composition	Each 5ml contains: - Ciprofloxacin HCl ……. 250mg
	Pharmacological Group	Fluoroquinolone
	Type of Form	Form-5
	Finished Product Specification	USP
	Pack Size & Demanded Price	60 ml, As per SRO
	Approval Status of Product in Reference Regulatory Authorities	Ciproxin 250mg/5ml granules and solvent for oral suspension by Bayer (MHRA Approved)
	Me-too Status	Novidat Dry Powder for Suspension by Sami Pharma
	GMP Status	Panel inspection for renewal of DML conducted on 15-12-2020,16-12-2020,26-01-2021 concluded with the following remarks: "The panel recommends the renewal of Drug Manufacturing License to M/s. Jawa Pharmaceuticals (Pvt.) Ltd., Lahore by way of formulation"
	Remarks of the Evaluator.	• Justify the formulation containing ciprofloxacin as hydrochloride since the reference formulation approved by MHRA contains ciprofloxacin base. • Provide source of granules of ciprofloxacin since granulation process is not mentioned in method of manufacturing.
	Decision of 308th meeting of Registration Board	Deferred for the Revision of formulation as the reference formulation by MHRA contains Ciprofloxacin base, while the applied formulation contains ciprofloxacin as hydrochloride. Accordingly, firm has to submit the revised Form-5, master formulation and manufacturing method along with requisite fee.
	Response of the Firm	Firm again submitted the master formulation and label claim of formulation containing ciprofloxacin hydrochloride along with fee of Rs.7500/-
	Decision: Approved	
979.	Name and address of manufacturer/ Applicant	M/s Jawa Pharmaceuticals Pvt. Ltd. 112/10, Quaid-e-Azam Industrial Area, Kot Lakhpat, Lahore.
	Brand Name + Dosage Form + Strength	JASTINE SYRUP (Ebastine 5mg/5ml)
	Composition	Each 5ml contains: Ebastine…...5mg
	Diary No. Date of R & I & fee	Dy. No. 274 dated 24-03-2009, Rs. 8,000/- dated Challan (not provided) Dy. No. 267 dated 16-12-2015 Differential fee Rs. 12,000/- vide challan No.0523895 dated 10-12-2015 (Photocopy), (Duplicate dossier, R & I cover letter copy of initial submission not provided Verification of initial and differential fee submissions along with challans required)
	Pharmacological Group	Other antihistamines for systemic use
	Type of Form	Form 5
	Finished product Specification	Manufacturer specifications

	Pack size & Demanded Price	As per SRO
	Approval status of product in Reference Regulatory Authorities	Ebastel oral solution 1mg/ml of Almirall, (AEMPS – CIMA Spain Approved)
	Me-too status	Fystine Liquid Syrup of M/s Fynk Pharmaceuticals, Lahore. (Reg. # 077173)
	GMP status	Inspection for ground check/inspection of NOC for quota allocation of controlled substances conducted on 17-02-2022 submitted as evidence of GMP status of the firm.
	Remarks of the Evaluator (PEC-XVII)	• Provide evidence of approval of relevant section by Licensing Division, DRAP Islamabad. • Provide DRAP R & I stamped cover letter of initial submission of application form along with fee challan. • Product is non-pharmacopoeia and firm has claimed manufacturer specifications. • For above revision, submit applicable fee as per notifications 7-11/2012-B&A/DRAP dated 07-05-2021 & 13-07-2021.
	Decision of 321st meeting of Registration Board	Deferred for following: Verification of DRAP R & I record of initial submission of registration application along with fee.
	Response of the Firm	Firm submitted a copy of covering letter of initial submission of registration application stamped with R&I receiving along with copy of fee challan of Rs.8,000/-.
	Decision: Approved. Fee shall be verified as per the decision taken by the Registration Board in its 285th meeting.	
980.	Name and address of manufacturer/ Applicant	M/s Glitz Pharma, Plot No 2610. Industrial Triangle, Kahuta Road, Islamabad.
	Brand Name + Dosage Form + Strength	Esglit tablet 5mg
	Composition	Each film- coated tablet contains: Escitalopram Oxalate Eq. to Escitalopram….....5mg
	Diary No. Date of R & I & fee	Dy.No.2090 dated 16-01-2019 Rs.20,000/- Dated 17-01-2019
	Pharmacological Group	Anti- depressant
	Type of Form	Form- 5
	Finished product Specification	USP
	Pack size & Demanded Price	10's, 20's, 14's, 50's, 100's & As per SRO
	Approval status of product in Reference Regulatory Authorities	MHRA Approved
	Me- too status	Rize- plus tablet 5 mg of M/s Werrick Pharmaceuticals Islamabad (Reg.# 068875)
	GMP status	The firm was inspected on 16.01.2019. The panel recommended the grant of GMP certificate.
	Remarks of the EvaluatorXIII	• Methylene chloride has been used in the applied coating solution. • Firm has general tablet section as mentioned in the submitted GMP inspection report.
	Decision of 296th meeting of Registration Board	Deferred as a banned excipient Methylene chloride has been used in the applied coating solution.
	Response of the Firm	Firm submitted a revised formulation of applied product excluding methylene chloride without requisite fee.
	Decision: Approved **Registration letter will be issued after Submission of differential fee of Rs. 7500/- for correction/pre-approval change in composition (correction/change of salt form of the drug substance), as per notification No.F.7-11/2021-B&A/DRAP dated 13-07-2021 shall be submitted**	

Agenda of Evaluator PEC-XX

Priority consideration on account of Export Facilitation:

In pursuance of decision of 133rd meeting of the Authority held on 13th April 2022, wherein it was decided that for each 100,000 USD worth of export of medicine during a fiscal year, one molecule will be considered on priority subject to fulfilment of all prescribed requirements
Following registration application of firm may be considered on priority in light of Export Facilitation Policy as communicated vide letter No.F.1-6/2019-PR-I (EFD) dated 02.06.2023:

981.	Name, address of Applicant / Marketing Authorization Holder	M/s Sami Pharmaceuticals Pvt Ltd F-95,Off Hub River Road, S.I.T.E Karachi
	Name, address of Manufacturing site.	M/s Sami Pharmaceuticals Pvt Ltd F-95,Off Hub River Road, S.I.T.E Karachi
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	Firm has provided GMP certificate dated 03.08.2022 based on inspection dated May 16,17,20,23 and 24, 2022 valid for 2 years from the date of issue
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter for Regularization of existing facility dated 22-06-2018 specifying Tablet (General) section.
	Status of application	☒ New Drug Product (NDP) ☐ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 9816 (R&I) DRAP, dated 12/04/2023
	Details of fee submitted	PKR 75,000/- Dated 24-02-2023
	The proposed proprietary name / brand name	Bemdo-Ez 180/10mg Tablet
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated tablet contains: Bemedoic acid ……..….180mg Ezetimibe……10mg
	Pharmacotherapeutic Group of (API)	Lipid modifying agent
	Pharmaceutical form of applied drug	Film coated tablet
	Reference to Finished product specifications	Innovator's specification
	Proposed Pack size	7's, 10's, 14's, 20's, 28's and 30's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Nustendi 180/10mg tablet MHRA Approved
	For generic drugs (me-too status)	Not available
	Name and address of API manufacturer.	Bempedoic Acid: Metrochem API Pvt. Ltd. Unit IV, Plot No 34B, 40B & 60B, J.N Pharma, City , Thanam (V), Prawada (M), Visakhapatnam, Dist-531021, Andhra Pradesh, India Ezetimibe USP:

		Ind-Swift Laboratories Ltd, village Bhagwanpur, Barwala Road, Derabassi, District S.A.S. Nagar Punjab.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Bempedoic acid: Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 75% ± 5% RH for 12 months. Batches: HAN-P/21003 HAN-P/21004 HAN-P/21005 Ezetimibe : Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 75% ± 5% RH for 48 months. Batches: 1366020002 1366020003 1366020004
	Module-III Drug Product:	The firm has submitted detail of manufacturers, description of manufacturing process and controls, process validation studies, specifications, analytical procedure and validation studies batch analysis and justification of specification, container closure system and stability studies of drug product.

	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical equivalence was determined against Nexlizet tablet (Batch No 1855166) by M/s Esperion Therapeutics Inc (Exp date 11/2022) Quality parameters such as appearance, average weight, DT dissolution, assay, uniformity of dosage unit, microbial limit and impurity were compared. CDP has been performed against the same brand that is Nexlizet tablet (Batch No 1855166) by M/s Esperion Therapeutics Inc (Exp date 11/2022) in Acid media (pH 1.0-1.2) in Acetate Buffer (pH 4.5) & Phosphate Buffer (pH 6.8). The values for f1 and f2 are in the acceptable range.
	Analytical method validation study of product	Firm has submitted analytical method validation study reports for drug substance as well as drug product.

STABILITY STUDY DATA			
Manufacturer of API	Bempedoic Acid: Metrochem API Pvt. Ltd. Unit IV, Plot No 34B, 40B & 60B, J.N Pharma, City , Thanam (V), Prawada (M), Visakhapatnam, Dist-531021, Andhra Pradesh, India Ezetimibe USP: Ind-Swift Laboratories Ltd, village Bhagwanpur, Barwala Road, Derabassi, District S.A.S. Nagar Punjab.

No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not applicable

2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Bempedoic acid: Firm has submitted copy of GMP Certificate E-1862189/DD/DCA/VSP/2022 issued by Govt. of Andhra Pradesh Drug control administration dated 14-11-2022. Valid till 1 year from the date of issue. Ezetimibe USP: Firm has submitted copy of GMP Certificate No. Drugs (1) Pb./2022/13143 issued by Food & Drugs Administration Punjab dated 06-12-2022. Valid till 2 years from the date of issue.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Bempedoic acid: Provided copy of commercial invoice (Invoice# DE/22-23/0031 dated 30th April 2022, with received quantity i.e. 3Kg) for the purchase of Bempedoic acid from Metrochem API Pvt Ltd and License from DRAP dated 16/05/2022 (batch no. HAN-PM/22003) Ezetimibe USP: Provided copy of commercial invoice (Invoice# 9100019689 dated 29th Feb 2020, with received quantity i.e. 20Kg) for the purchase of Ezetimibe USP from Ind-Swift Laboratories Ltd, buyer name mentioned as Hilton Pharma, Karachi (loan agreement provided) (batch no. L385039002)
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Provided
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Provided

Remarks of Assessor:

Sr.#	Observations	Reply	Remarks
1.	3.2.P.5.1& 3.2.P.8 The finished product release specifications include tests for appearance, dimensions, identity (HPLC), assay (HPLC), impurities (HPLC) dissolution (HPLC), uniformity of dosage units (ph. eur.), water content (kf), microbial limits (ph. eur.) https://www.ema.europa.eu/en/documents/assessment-report/nustendi-epar-public-assessment-report_en.pdf However, water content (KF) not performed under finished product specification and stability data	Initially we have found the FDA Chemistry Report of Nexlizet (bempedoic acid and ezetimibe) 180 mg/10mg tablets which does not mention the water content test. On query we searched and found the EMA Assessment Report on Nustendi (bempedoic acid and ezetimibe) 180 mg/10mg, mentioning the water content test.	Water content test has been included under finished product specification Moreover performance /results are provided.

		We have performed the water content test on our product on same lab scale batches after 18months at long term stability conditions i.e. 30°C/75%. Results are given below:	
2.	2.3.R.1.1 Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3	Provided	Complied
3.	3.2.S.5 COA of primary / secondary reference standard including source and lot number to be provided	Provided	Complied
4.	3.2.P.8 Documents for the procurement of both API attested by DRAP to be provided.	Commercial invoices and license to import API have been provided	Clearance certificate of both API from DRAP yet to be provided

Water content test results.

Product Name	Batch Number	Water content %
Bempedoic Acid 180mg+ Ezetimibe 10mg Tablet (SAMI product)	Lab-01	3.22%
	Lab-02	3.51%
	Lab-03	3.27%
Nexlizet (bempedoic acid and ezetimibe) 180 mg/10mg tablets. (Innovator product)	1855166	3.10%

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

8	Complete batch manufacturing record of three stability batches	Provided
9	Record of comparative dissolution data	Not provided
10.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted GMP certificate No 1690/DDC/Solara/WHO-GMP/U-II/2021-2022/1074 dated 03.02.2022 in the name of Solara Active Pharma Sciences Ltd valid till 03.12.2024.
11.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted commercial invoice No 1105300028 dated 01.02.2020 wherein quantity of Lurasidone HCl was mentioned as 2Kg Batch No PLHP200001. Cleared by DRAP I&E Karachi dated 18.02.2020
12.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted all documents related to stability data i.e Chromatograms, Raw data sheets, COA, summary data sheets for 2 batches
13	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Complied
14	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Complied .
Remarks of Assessor (DD PEC XX): Box warning by USFDA for approved product as follows:		

WARNING: INCREASED MORTALITY IN ELDERLY PATIENTS WITH DEMENTIA-RELATED PSYCHOSIS; AND SUICIDAL THOUGHTS AND BEHAVIORS

Increased Mortality in Elderly Patients with Dementia-Related Psychosis

Elderly patients with dementia-related psychosis treated with antipsychotic drugs are at an increased risk of death. LATUDA is not approved for the treatment of patients with dementia-related psychosis *[see Warnings and Precautions (5.1)]*.

Suicidal Thoughts and Behaviors

Antidepressants increased the risk of suicidal thoughts and behavior in pediatric and young adults in short-term studies. Closely monitor all antidepressant-treated patients for clinical worsening, and for emergence of suicidal thoughts and behaviors *[see Warnings and Precautions (5.2)]*.

CLOSE

S.No	Observations	Reply	Remarks
1.	Analytical method validation studies of Drug Substance by Drug product manufacturer to be provided	Provided	Complied

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not applicable
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has provided copy of GMP certificate dated 12/03/2020 issued by Jiangxi API Engineering Technology Research Center valid till 11th March 2025.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Provided copy of commercial invoice (Invoice# JXS210448 dated 13th April 2021, with received quantity i.e. 2Kg) for the purchase of Mirabegron from Jiangxi Synergy Pharmaceutical Co., Ltd and clearance certificate from DRAP dated 21/04/2021 (batch no. 20200603V)
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Provided
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Provided

Remarks of Assessor:

Sr.#	Observation	Reply	Remarks
	2.3.R.1.1 Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3	Provided	Complied
	3.P.2.1.1 Compatibility of the Drug Substance(s) with excipients (Polyethylene oxide and Silicon dioxide fumed) to be provided since said excipients are not found in innovator/reference product	Compatibility studies were performed against said excipients by performing stress studies. No degradation and peak interference with principal peak was observed	Complied

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Following registration application of firm may be considered on priority in light of Export Facilitation Policy as communicated vide letter No.F.1-6/2019-PR-I (EFD) dated 02.06.2023:

985.	Name, address of Applicant / Marketing Authorization Holder	M/s Sami Pharmaceuticals Pvt Ltd F-95,Off Hub River Road, S.I.T.E Karachi
	Name, address of Manufacturing site.	M/s Sami Pharmaceuticals Pvt Ltd F-95,Off Hub River Road, S.I.T.E Karachi
	Status of the applicant	☒ Manufacturer

		☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	Firm has provided GMP certificate dated 30.8.2019 based on inspection dated 28.08.2019 valid for 1 year from the date of issue
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter for Regularization of existing facility dated 22-06-2018 specifying Tablet (General) section.
	Status of application	☒ New Drug Product (NDP) ☐ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 35846 (R&I) DRAP, dated 09/12/2022
	Details of fee submitted	PKR 75,000/- Dated 22-06-2022
	The proposed proprietary name / brand name	Trela 100mg Tablet
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated tablet contains: Trelagliptin Succinate eq to Trelagliptin ……..……..….100mg
	Pharmacotherapeutic Group of (API)	Antidiabetic (Dipeptidyl peptidase 4 inhibitor)
	Pharmaceutical form of applied drug	Film coated tablet
	Reference to Finished product specifications	Innovator's specification
	Proposed Pack size	7's, 10's, 14's and 20's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	PMDA (Japan) Approved
	For generic drugs (me-too status)	OWT Tablet 100mg by PharmEvo Karachi (Reg No 117985)
	Name and address of API manufacturer.	Anhui Haikang Pharmaceutical Co Ltd No 21 Huancheng West Road Anqing Anhui China
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard,

		container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 36 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches:(20180606, 20180613, 20180620)
	Module-III Drug Product:	The firm has submitted detail of manufacturers, description of manufacturing process and controls, process validation studies, specifications, analytical procedure and validation studies batch analysis and justification of specification, container closure system and stability studies of drug product.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical equivalence was determined against Zafatek 100mg tablet (Batch No 522026) by M/s Takeda Pharmaceutical (Exp date 05/2025) Quality parameters such as appearance, average weight, hardness dissolution, DT, assay, microbial limit and impurity were compared. CDP has been performed against the same brand that is Zafatek 100mg tablet (Batch No 522026) by M/s Takeda Pharmaceutical in Acid media (pH 1.0-1.2) in Acetate Buffer (pH 4.5) & Phosphate Buffer (pH 6.8). The % drug release in all three mediums is more than 85% in 15 min hence f2 value is not calculated.
	Analytical method validation study of product	Firm has submitted analytical method validation study reports for drug substance as well as drug product.

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not applicable

2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted GMP certificate No F.3-26/2019-Addl.Dir (QA&LT-I)-56 dated 22.08.2022 based on inspection dated 14.06.2022 valid till 13.06.2024.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not applicable However, firm has submitted invoice No 60007 dated 18.05.2022 wherein 30Kg clarithromycin taste Masked micro pellets 27.5% (Batch No CTM0644) was purchased
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has recently installed HPLC software 21CFR, in future stability studies shall be performed using HPLC software 21CFR.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted.

Remarks of Assessor (PEC-XX):

Sr.#	Observations	Reply/ Updated status	Remarks
1	3.2.P.8 In use stability data (reconstituted form) to be provided as per guidance document by EMA. (https://www.ema.europa.eu/en/documents/scientific-guideline/note-guidance-use-stability-testing-human-medicinal-products en.pdf)	Firm has provided chromatograms only for in use stability study	In use stability data (reconstituted form) to be provided wherein all pharmacopoeial quality parameters will be tested and results should be shown in summary data sheet for each batch.
2	3.2.P.2 Provide Drug excipients compatibility study report for sodium citrate dehydrate, being qualitatively different from innovator product.	It is evidence from the stability studies that product is compatible with the excipients and Drug Product is stable throughout the stability studies.	Not Complied Drug excipients compatibility study report for sodium citrate dehydrate yet to be provided
3	3.2.P.2.2.1 Provide image/snapshot/picture of Innovator Pack against which pharmaceutical equivalence study was performed. It should reveal, brand name, manufacturer, batch no. and expiry date	Provided	Complied
4	3.2.P.4 Deliverable volume testing has not been mentioned under finished product specification and stability study	Deliverable volume testing has been incorporated in stability testing	Complied

5	3.2.P.4 Results of specificity and accuracy has not been provided under analytical method verification study of Drug Product	Results of specificity (against standard, blank and placebo) and accuracy yet to be provided.	Not Complied
6	3.2.P.7 Provide details about container closure system (description of the primary container closure systems, including materials of construction, unit count or fill size, container size or volume)	Material of construction of plastic bottle yet to be provided	Not Complied
7	3.2.S.4 Method used for analysis of API from Finished Product Manufacturer to be provided along with analytical method validation studies.	Analytical Method used for analysis of API/pellets yet to be provided	Not Complied
8	3.2.S.4 Drug substance (micro pellets) manufacturer performed Dissolution testing as mentioned in analytical method/CoA while same has not been provided under CoA of clarithromycin granules from Drug product manufacturer.	Dissolution testing has been performed as provided in CoA of clarithromycin granules from Drug product manufacturer.	Complied
9	2.3.R.1.1 Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3	Provided	Complied

Decision 330th meeting: Deferred for following::
Drug excipients compatibility study report for sodium citrate being qualitatively different from innovator product.
Results of specificity (against standard, blank and placebo) and accuracy to be provided under analytical method verification study of Drug Product
Method used for analysis of API from Finished Product Manufacturer to be provided
Provide details about container closure system (Material of construction of plastic bottle)
In use stability data (reconstituted form) of all pharmacopoeial quality parameters summarized in data sheet for each batch.

Reply:

Sr.#	Observations	Updated status	Remarks
1	Drug excipients compatibility study report for sodium citrate being qualitatively different from innovator product	It was typographic error Mono sodium citrate has been used in formulation instead of sodium citrate dehydrate and formulation is as per innovator	Complied Said ingredient Mono sodium citrate is found in MHRA approved product
2.	Results of specificity (against standard, blank and placebo) to be provided under analytical method verification study of Drug Product	Provided	Complied
3	Method used for analysis of API from Finished Product Manufacturer to be provided	Provided As per USP 43	Complied

4.	Details about container closure system (Material of construction of plastic bottle)	Amber colored PET Bottle	Complied
5	In use stability data (reconstituted form) of all pharmacopoeial quality parameters summarized in data sheet for each batch	In use stability data of two batches T1 and T2 for 0 and Day 7 has been provided	Complied
Decision: Approved. • **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.** • **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Remarks of Assessor (DD PECXX):

Label claim of RRA approved formulation (Ventolin 200 microgram, powder for inhalation, hard capsule) is as follows:

Each capsule contains 241 microgram salbutamol sulphate equivalent to 200 microgram salbutamol
Firm has not provided information regarding potency adjustment (salt form)

3.2.P.5 Applied formulation is available in BP monograph while specifications/ acceptance criteria of quality parameters tested (assay, uniformity of delivered dose, particle size distribution) were not as per BP monograph. Moreover, water content has not been determined as mentioned in BP.

3.2.S.4 Detailed analytical procedures for the testing of drug substance to be provided by Drug product manufacturer
3.2.S.4 Provide results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (COA) of the same batch from Drug Substance / API manufacture.
3.2.S.4 Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer to be provided
3.2.P.2 In Pharmaceutical equivalence study identification and Assay was mentioned for Budesonide and Formoterol instead of salbutamol. Moreover, batch no of both Test product and Reference product to be provided.
3.2.P.2 Batch formula for proposed commercial batch size should be provided that includes a list of all components of the drug product to be used in the manufacturing process, their amounts on a per batch basis, and a reference to their quality standards.
3.2.P.2 Detailed Analytical method validation studies of Drug product is not provided
3.2.P.2 Detailed Analytical testing method of Drug Product to be provided.
3.2.P.2 Description of Packaging (Container closure system) is to be provided, also provide details of metered dose inhalation device /ROTAHALER (name, model, manufacturer, shelf life) provided in pack.
3.2.P.8 Documents for the procurement of API to be submitted.
3.2.P.8 Compliance Record of HPLC software 21CFR & audit trail reports and record of Digital data logger for temperature and humidity monitoring is not submitted.

Decision 326th meeting: Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.
Registration Board further advised to submit the registration status of previously registered products for "Sachet (general) section.

Sr.#	Observation	Reply	Remarks
1.	Label claim of RRA approved formulation (Ventolin 200 microgram, powder for inhalation, hard capsule) is as follows: Each capsule contains 241 microgram salbutamol sulphate equivalent to 200 microgram salbutamol Firm has not provided information regarding potency adjustment (salt form)	Master formulation has been resubmitted wherein quantity of salt form (salbutamol sulphate) is mentioned as 241 microgram/capsule.	
2.	Applied formulation is available in BP monograph while specifications/ acceptance criteria of quality parameters tested (assay, uniformity of delivered dose, particle size distribution) were not as per BP monograph. Moreover, water content has not been determined as mentioned in BP.	Specification and analytical method of salbutamol sulphate as per BP has been submitted.	Results/ Performance report of critical quality attributes such as particle size distribution and aerodynamic assessment of particles is provided (as per BP) however, Results/

			Performance report of uniformity of delivered dose is still required.
3.	Detailed analytical procedures for the testing of drug substance to be provided by Drug product manufacturer	Analytical procedures for the testing of drug substance (as per BP) is provided by Drug product manufacturer	Complied
4.	Provide results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (COA) of the same batch from Drug Substance / API manufacture.	CoA of relevant batch (Batch No SS-0060721) is provided from both Drug Substance and Drug Product manufacturer	Complied
5.	Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer to be provided	Not provided	Results of Analytical method verification studies of Drug substance is still required from Drug product manufacturer.
6.	In Pharmaceutical equivalence study identification and Assay was mentioned for Budesonide and Formoterol instead of salbutamol. Moreover, batch no of both Test product and Reference product to be provided.	Not provided	Pharmaceutical equivalence study against Ventolin DPI (Batch No 52341) by GSK is provided including quality parameters such as standard weight, DT, Identification, content uniformity, content of delivered dose, assay.

7.	Batch formula for proposed commercial batch size should be provided that includes a list of all components of the drug product to be used in the manufacturing process, their amounts on a per batch basis, and a reference to their quality standards	Batch formula for 1200 caps is provided included amount of all component used in formulation.	Complied
8.	Detailed Analytical method validation studies of Drug product is not provided	Not provided	Results of Analytical method validation study of Drug product is still required.
9.	Detailed Analytical testing method of Drug Product to be provided	Provided	Complied
10.	Description of Packaging (Container closure system) is to be provided, also provide details of metered dose inhalation device /ROTAHALER (name, model, manufacturer, shelf life) provided in pack.	Not provided	Not complied
11.	Documents for the procurement of API to be submitted.	Firm provided license to import drug issued by DRAP (dated 22.11.2021) wherein salbutamol sulphate (10g) has been mentioned moreover batch certification from API manufacturer is provided wherein salbutamol sulphate (Batch No SS-0060721) is mentioned	Clearance certificate from DRAP (I&E) is required.
12.	Compliance Record of HPLC software 21CFR & audit trail reports and record of Digital data logger for temperature and humidity monitoring is not submitted.	Record of Digital data logger for temperature and humidity monitoring is provided	

Finished product specification to be corrected as "BP" along with fee of Rs 7500/-
Also submit the registration status of previously registered products for "Sachet (general) section

Decision: Approved.

- **Before issuance of Registration letter, results of Analytical method validation study of Drug product to be provided. Moreover, finished product specification to be corrected as "BP" along with fee of Rs 7500/-**
- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Remarks of Assessor (DD PECXX):

Label claim of RRA approved formulation (SPIRIVA 18 microgram, inhalation powder, hard capsule) is as follows:

Each capsule contains 22.5 microgram tiotropium bromide monohydrate equivalent to 18 microgram tiotropium.

The delivered dose (the dose that leaves the mouthpiece of device) is 10 microgram tiotropium.

Firm has not provided information regarding potency adjustment (salt form) and delivered dose.

The finished product specifications include acceptable tests and limits for appearance, identity (HPLC and ultra violet), assay, content uniformity, water content, degradation products, mean delivered dose, uniformity of delivered dose, aerodynamic particle size, foreign particulate matter, amorphous content and microbial purity.
https://www.tga.gov.au/sites/default/files/auspar-tiotropium-190613.pdf

while firm has mentioned finished product specifications including weight variation, identification, uniformity of delivered dose, particle size distribution, and Assay only. same have been tested during stability studies as well. Tests like content uniformity, water content, mean delivered dose, foreign particulate matter, amorphous content and microbial purity to be performed.

As per Public assessment report of Tiogiva 18mcg Inhalation Powder (MHRA approved) quality parameters such as dissolution testing, particle size distribution and delivered dose testing to be compared while firm has performed tests such as Identification, Assay and standard weight only

	Name of exporting country	India
	Detail of certificates attached (CoPP, Freesale certificate, GMP certificate)	CoPP: Original legalized CoPP (certificate No. CoPP/CERT/KD/83894/2019/11/27844/143353) valid till 03-04-2022 issued by Food and Drug Administration Mahrashtra Estate Mumbai for Methotrexate Tablets 2.5mg . The CoPP confirms free sale status of the product in exporting country as well as GMP status of the manufacturing site through periodic inspection every year. GMP: Firm has submitted GMP certificate No. NEW-WHO-GMP/CERT/KD/80691/2019/11/27530 issued by Food and Drug Administration Mahrashtra Estate Mumbai. Valid till 03.04.2022
	Details of letter of authorization / sole agency agreement	Firm has submitted Original Authorization letter from Naprod Life Sciences Pvt. Ltd. The letter species that the manufacturer appoints M/s Al-Habib Pharmaceuticals, Plot #81, block B, SMCHS, Karachi as a sole agent and distributor to register their products in Pakistan .
	Status of the applicant	☐ Manufacturer ☒ Importer

		☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	For imported products, specify one the these	☒ Finished Pharmaceutical product import ☐ Buk import and local repackaging ☐ Buk import and local repackaging for export purpose only
	Dy. No. and date of submission	Dy. No. 5224: 24-02-2022
	Details of fee submitted	PKR 150,000/-: 26-01-2022
	The proposed proprietary name / brand name	ALLTREX (Methotrexate) 2.5mg Tablets
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Tablet contains: Methotrexate ……. 2.5 mg
	Pharmaceutical form of applied drug	Tablets
	Pharmacotherapeutic Group of (API)	Anti-Metabolite (L04AX03)
	Reference to Finished product specifications	BP
	Proposed Pack size	As per Policy
	Proposed unit price	As per Policy
	The status in reference regulatory authorities	Methotrexate Orion 2.5 mg tablets by Orion Pharma UK MHRA approved
	For generic drugs (me-too status)	Methotrexate Tablet 2.5mg by Werrick Pharmaceuticals (025084)
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Name, address of drug substance manufacturer	Mac Chem Products (India) Pvt. Ltd. N-211/2/10. MIDC, Boisar Thane 401506 MAHARASHTRA state India. GMP: Firm has submitted GMP certificate No. NEW-WHO-GMP/CERT/KD/74238/2018/11/24897 by Food and Drug Administration Mahrashtra Estate Mumbai. Valid till 10.09.2021
	Module-III Drug Substance:	Firm has submitted detailed drug substance data for both sources related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of

		manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Stability study conditions: Real time: 30°C ± 2°C / 75% ± 5%RH for 60 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: MTX0213042, MTX0213043, MTX0213044,
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical equivalence has been established against the reference product (Methotrexate Tabs 2.5mg Mfg. By Orion Pharma, UK). Quality parameters such as Disintegration time, hardness, dissolution, average weight, thickness etc were compared. Firm has submitted Comparative Dissolution Profile for the applied product as follows Test Product Naprod Methotrexate tablet 2.5mg Reference product Orion methotrexate tablet 2.5mg Medium Water,Acid media (pH 1.0-1.2) in Acetate Buffer (pH 4.5) & Phosphate Buffer (pH 6.8). On the basis of similarity factor (f2) result i.e NLT 50 of dissolution profile of API in test product and reference product, both products are similar.
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	Alu-Alu Blister
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches 24 months real time stability data at 30°C ± 2°C / 75% ± 5%RH of 03 batches 06 month accelerated stability data 40°C ± 2°C / 75% ± 5%RH of 03 batches

		NT8132. NT8133, NT8134

Remarks of AD (PECXX):

USFDA approved Box warning for methotrexate tablet is as follows:

METHOTREXATE tablets, for oral use
Initial U.S. Approval: 1953

WARNING: EMBRYO-FETAL TOXICITY, HYPERSENSITIVITY REACTIONS, and SEVERE ADVERSE REACTIONS

See full prescribing information for complete boxed warning.

- **Methotrexate Tablets can cause embryo-fetal toxicity, including fetal death. For non-neoplastic diseases, Methotrexate Tablets are contraindicated in pregnancy. For neoplastic diseases, advise patients of reproductive potential of the potential risk to a fetus and to use effective contraception. (4, 5.1, 8.1, 8.3)**
- **Methotrexate Tablets are contraindicated in patients with a history of severe hypersensitivity reactions to methotrexate, including anaphylaxis. (4, 5.2)**
- **Serious adverse reactions, including death, have been reported with methotrexate. Closely monitor for adverse reactions of the bone marrow, gastrointestinal tract, liver, lungs, skin, and kidneys. Withhold or discontinue Methotrexate Tablets as appropriate. (5.3, 5.4, 5.5, 5.6, 5.7, 5.8)**

Sr.#	Observation	Reply	Remarks
1.	RRA approved formulations are Methotrexate sodium/disodium (eq to Methotrexate) while applied product is in base form. Clarify it or provide reference regarding applied formulation (base form) in any reference country.	Relevant reference is provided by the firm as follows: MHRA approved product Methotrexate tablet 2.5mg by Sandoz Ltd	Verified MHRA approved product Methotrexate tablet 2.5mg by Sandoz Ltd is also approved in base form. Each tablet contains methotrexate 2.5 mg
2.	Compatibility of the Drug Substance(s) with excipients (Sodium Lauryl Sulphate, sodium starch glycolate, colloidal silicon dioxide) is not provided	Excipients used in formulation do not influence physicochemical property of Drug product and are routinely used in pharmaceutical industry	Sodium starch glycolate is found in RRA (MHRA) approved formulation By Cipla (EU) Limited However Compatibility of the Drug Substance(s) with Sodium Lauryl Sulphate and colloidal silicon dioxide is required.
	Registration Board was apprised regarding an e. mail received to Director PE&R Division form M/s Miles International India (authorized exclusive representative for the export of products manufactured by Naprod Life Sciences for the Pakistan region), wherein firm has requested to not consider any product registration applications made by any other party other than LDS as they will not be able to supply these products in the future.		

Decision 324th meeting: Deferred for verification of "Sole Agency Agreement" between M/s. Al Habib Pharmaceuticals, Plot # 81, Block B, SMCHS, Karachi & M/s Naprod Life Sciences Pvt. Ltd. Factory: G-17/1, M.I.D.C., Tarapur, Boisar, Dist. Thane-401 506, India.

Updated status:
Firm has submitted Original Notarized Authorization Letter Dated: 14th July, 2023 wherein it has been mentioned that:
"We (NAPROD LIFE SCIENCES PVT LTD, India) having address at (304. Town Center-1, Andheri Kurla Road, Andheri (E), Mumbai) do hereby authorize M/s Al Habib Pharmaceuticals having address at Plot following 81, BLOCK B SMCHS, 74400, Karachi Pakistan, As a sole agent and distribution of following drugs only.
Regarding our email Dated June 6th 2023 about the Clarification of Mile International India as an exporter of Naprod Life Sciences Pvt ltd beside the below mentioned products.
We are again giving a firm undertaking that Al-Habib Pharmaceuticals, Karachi is an Authorize Distributor and sole agent for the following Drugs."

Sr. #	Observations	Reply	Remarks
1.	Since applied formulation is not approved by any Reference Regulatory Authority hence provide safety and efficacy data regarding applied formulation in the light of decision of 128th meeting of Authority.	Mentioned below	
2.	Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3	Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided	Complied
3.	Provide reference wherein formulation/ingredients of Betnovate-N Lotion by GSK has been mentioned against which applied formulation has been developed.	Formulation/ingredients related data of Betnovate-N lotion by GSK is not available.	
4.	Analytical method validation studies of Drug Substance to be provided from Finished Product Manufacturer.	Analytical method validation studies of both Drug Substances have been provided including parameters such as accuracy, precision (repeatability) specificity and Range.	Complied
5.	Provide image/snapshot/picture of comparator Pack against which pharmaceutical equivalence study was performed. It should reveal, brand name, manufacturer, batch no. and expiry date	Image/snapshot/picture of Innovator pack is provided:	Complied

	Neither Drug substance manufacturer nor Drug product manufacturer had performed it.	Betnovate-N Lotion by GSK (Batch No NW5X) Exp date: 04/2023	
6.	Documents for the procurement of API wherein Lot No/Batch No was mentioned.	Documents for the procurement of API yet to be provided wherein Lot No/Batch No clearly mentioned	Not complied

Response to query No. 1 :

In respect of "evidence of approval status in RRA" we would like to explain you that this product is marketed by a well reputed multinational company in Pakistan namely M/s. Glaxosmith Kline under the brand name Betnovate-N Lotion [Betamethasone 0.1% w/v (as Betamethasone valerate BP) + Neomycin sulphate 0.5% w/v]. This product is not marketed in SRA countries due to the fact that the condition for use is not very much common/pandemic in reference countries that's why the multinational manufacturer, M/s. Glaxosmith Kline is marketing this product in Pakistan rather in reference countries due to public interest.

Moreover, internationally the same strength in "Cream" dosage form is marketed in UK by Chemidex Pharma Limited, Trading as Essential Generics, Chemidex House, 7 Egham Business Village, Crabtree Road, Egham, Surrey TW20 8RB, United Kingdom therefore, it is confirmed that both ingredients in their respective strengths are safe irrespective of the dosage form and not withdrawn from market due to safety, efficacy and quality reasons.

Decision 331st meeting: Registration Board deferred the application for further deliberations regarding the confirmation of reply submitted by the applicant".

Reply:

Betnovate-N Lotion [Betamethasone 0.1% w/v (as Betamethasone valerate BP) + Neomycin sulphate 0.5% w/v] is marketed by a well reputed multinational company in Pakistan namely M/s. Glaxosmith Kline-GSK but not in SRA countries due to the fact that this product is indicated in certain skin conditions that is highly prevalent in Pakistan as compare to other countries, because of the hot and humid climate favoring bacterial growth, overcrowding and poor hygiene in some areas. There is a dire need of this formulation in lotion dosage form in our country. It is essential to market the said product in lotion form, in Pakistan due to the fact that this product is needed by patients suffering from inflammatory and pruritic manifestations of steroid responsive dermatoses where secondary bacterial infection is present, suspected, or likely to occur that affects larger body areas. The dosage form of lotion is of immense importance due to its attribute of greater spreadability and absorption thus, it provides faster relief of symptoms. Currently, the formulation is marketed in cream dosage form which is insufficient to be applied on largely affected areas of the body.

Moreover, the prescriber has only one choice to prescribe for the said skin condition i.e. Betnovate-N Lotion, and thus did not get chance to switch over the product by prescribing other brands as the formulation is only available in cream dosage form.

Following key points have been highlighted below for concise comparison between both dosage forms:

S.no.	Lotion	Cream
	Greater spreadability, suitable for the application on large affected areas	Difficult to spread, not suitable for the a large affected areas
	Faster absorption	Slower absorption
	Fast symptom relief	Delayed relief
	More permeable	Less permeable

Decision: The Board deferred that case for submission of valid RRA reference of applied product or submission of following as per decidion of 179th meeting of the Authority;

i. **Evidence that the product/ formulation has never been withdrawn/ deregistered/ unlicensed on safety reasons by any RRA/ML4 NRA.**
ii. **Evidence that the manufacturer has established pharmacovigilance verified by the Division of Pharmacy Services of DRAP according to the procedures/ guidelines of DRAP.**
iii. **Evidence that the international pharmacovigilance data of subject product/ formulation do not show any critical ADR reports according to the UPSALA database.**
iv. **Evidence that the product maintains the characteristics on which the marketing authorization was granted and are normally in the form of post-marketing surveillance, or assessment of therapeutic value or treatment strategies.**

Remarks of Assessor (DD PEC XX): Box warning by USFDA for approved product as follows:		

WARNING: INCREASED MORTALITY IN ELDERLY PATIENTS WITH DEMENTIA-RELATED PSYCHOSIS; AND SUICIDAL THOUGHTS AND BEHAVIORS

Increased Mortality in Elderly Patients with Dementia-Related Psychosis

Elderly patients with dementia-related psychosis treated with antipsychotic drugs are at an increased risk of death. LATUDA is not approved for the treatment of patients with dementia-related psychosis *[see Warnings and Precautions (5.1)]*.

Suicidal Thoughts and Behaviors

Antidepressants increased the risk of suicidal thoughts and behavior in pediatric and young adults in short-term studies. Closely monitor all antidepressant-treated patients for clinical worsening, and for emergence of suicidal thoughts and behaviors *[see Warnings and Precautions (5.2)]*.

CLOSE

Sr.#	Observation	Reply	Remarks
1.	The finished product specification and stability testing includes quality parameter of microbiological testing and water content as per public assessment report of innovator product while same has not been performed by the applicant. (microbial test performed at initial time point only) https://www.ema.europa.eu/en/documents/assessment-report/latuda-epar-public-assessment-report_en.pdf	water content test was performed during development studies but not incorporated in specification. Now the firm has provided revised specification including water content test and microbiological testing along with performance reports.	Complied Fee of Rs 7500/- to be submitted on account of pre-registration variation
2.	Stability data including summary data sheet, COA, raw data sheet and chromatograms for 6th month and onward (both accelerated and real time) to be provided.	Provided	Complied
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not provided	Not complied

Decision 329th meeting: Deferred for following submissions:
Submission of documents for the procurement of API with approval from DRAP
Submission of fee for pre-approval variation in finished product specification as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.

Reply:
Firm has provided fee of Rs 7500/- dated 24.08.2023 on account of pre-registration variation.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

	GMP status of the firm	Firm has submitted copy of GMP certificate dated 03.06.2019 based on inspection dated 20-05-2019
	Evidence of approval of manufacturing facility	Not provided
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 24967 dated 02/09/2022
	Details of fee submitted	PKR 75,000/- dated 07/04/2022
	The proposed proprietary name / brand name	Nefcon 1mg/ml eye drops
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each ml contains: Nepafenac ……1mg (0.1%)
	Pharmacotherapeutic Group of (API)	NSAID, Ant inflammatory
	Pharmaceutical form of applied drug	Eye drops
	Reference to Finished product specifications	Innovator's specification
	Proposed Pack size	5ml
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Nevanac eye drops MHRA approved
	For generic drugs (me-too status)	Neplo ophthalmic solution Alza Pharmaceutical 081620
	Name and address of API manufacturer.	M/s Flax Laboratories, Plot No B-29/I, MIDC Mahad. Village Birwadi, Mahad, District Raigad India
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.

	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, specifications, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 24 months. Batch No: NEP/MS/18/001, NEP/MS/18/002, NEP/MS/18/003
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical Equivalence study was performed against reference product i.e Nevanac 0.1% Eye drops (Batch No 12) by Novartis Pharmaceuticals against Test product PD 01 Quality parameters compared were description, volume, identification and assay
	Analytical method validation of product	Not provided

STABILITY STUDY DATA			
Manufacturer of API	M/s Flax Laboratories, Plot No B-29/I, MIDC Mahad. Village Birwadi, Mahad, District Raigad India		
API Lot No.	NEP/MS/21/003		
Description of Pack (Container closure system)	LDPE bottle with polystyrene cap		
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	T-15	T-16	T-17
Batch Size	500 bottles	500 bottles	500 bottles
Manufacturing Date	July 2021	July 2021	July 2021

Date of Initiation	12.07.2021	12.07.2021	12.07.2021
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not provided
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has provided copy of GMP certificate No 6097475 issued by Food and Drug Administration Maharashtra state valid till 12.01.2022.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of Form 6 wherein 60 g Nepafenac (Batch No NEP/MS/21/003) was mentioned (Lic No 00649/2021-DRAP CRS/2291 dated 23-06-2021
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Provided
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not provided
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not provided

Remarks of Assessor:

S.No	Observations	Reply	Remarks
1	Provide valid Good Manufacturing Practice (GMP) certificate of the Drug Substance / API manufacturer issued by concerned regulatory authority of country of origin to be provided.	Not provided	Not complied
2	Provide Elucidation of structure and other characteristics (NMR, MS, IR spectrum)	Provided	Complied
4.	3.2.S.4 Method used for analysis of API from Finished Product Manufacturer to be provided along with analytical method validation studies.	Provided	Complied
5.	Provide certificate of analysis of relevant batch (NEP/MS/21/003) of Drug Substance(s) used in product development by both Drug Substance and Drug Product manufacturer.	Provided	Complied
6.	3.2.P.2 Suitability /Quality testing of the container closure system used for the storage, transportation (shipping) and use of the FPP (e.g. choice of materials, protection from moisture and light, compatibility of the materials with the FPP) to be provided	Provided	Complied
7.	3.2.P.2.2.1 Provide Pharmaceutical Equivalence against reference/comparator product wherein	Nevanac 0.1% Eye drops (Batch No 25463) by Novartis	Image/snapshot/picture

	all quality parameters (as per Innovator) should be compared. Also provide image/snapshot/picture of comparator product Pack against which pharmaceutical equivalence study was performed. It should reveal, brand name, manufacturer, batch no. and expiry date		of innovator product yet to be provided
8.	Quality test such as osmolality /osmolarity, viscosity and sterility test have not been included under finished product specification	osmolality /osmolarity and sterility test have been mentioned mentioned under finished product specification	Viscosity test and performance report of sterility test is still required.
9.	3.2.P.5 Analytical Method Validation studies of Drug Product by the Drug Product manufacturer to be provided	Provided	Specificity parameter has not been studied.
10.	3.2.P.8 Sterility test, viscosity and osmolality /osmolarity have not been performed during stability studies.	Osmolality /osmolarity and sterility test have been provided under stability studies	Viscosity test and performance report of sterility test is still required.
11.	3.2.P.8 Provide Compliance Record of HPLC software 21CFR & audit trail reports on product testing. Provide Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) is Provided	

Decision 331st meeting:
Decision: Deferred for following:
a) Valid Good Manufacturing Practice (GMP) certificate of the Drug Substance / API manufacturer
b) Provide details of reference against which pharmaceutical equivalence study was performed. It should reveal, brand name, manufacturer, batch no. and expiry date
c) Viscosity test and performance report of sterility test to be provided
d) Results of specificity parameter under Analytical Method Validation studies of Drug Product to be provided.

Reply:
Firm has provided copy of GMP certificate No 6111950 issued by Food and Drug Administration Maharashtra state valid till 13.03.2024.
Details of reference against which pharmaceutical equivalence study was performed is provided as follows:
Nevanac 0.1% Eye drops (Batch No 25463) by Novartis
Exp date 05-2023
Result of viscosity test and performance report of microbial test has been provided.
Result of specificity parameter under Analytical Method Validation studies of Drug Product is provided.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Administrative Portion			
	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.	
	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Not provided	
	Documents for the procurement of API with approval from DRAP (in case of import).	Not provided	
	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted	
	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not provided	
	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not provided	
Remarks of Assessor (DD PECXX): 1.6.5 Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin 3.2.S.4 Provide results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (COA) of the same batch from Drug Substance / API manufacture. 3.2.S.4 Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer to be provided 3.2.S.4 Detailed analytical procedures for the testing of drug substance to be provided by Drug product manufacturer. 3.2.P.2 Batch formula for proposed commercial batch size should be provided that includes a list of all components of the drug product to be used in the manufacturing process, their amounts on a per batch basis, and a reference to their quality standards. 3.P.2.1.1Compatibility of the Drug Substance(s) with excipients (Crospovidone, Microcrystalline cellulose) is not provided since said excipients are not found in innovator/reference product. 3.2.P.8 Documents for the procurement of API to be submitted. 3.2.P.8 Compliance Record of HPLC software 21CFR & audit trail reports and record of Digital data logger for temperature and humidity monitoring is not submitted.			
Decision: Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.			

Remarks: Now the firm has submitted reply as follows:

Sr.#	Observation	Reply	Remarks
1.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Not provided	Not complied
2.	Batch formula for proposed commercial batch size should be provided that includes a list of all components of the drug product to be used in the manufacturing process, their amounts on a per batch basis, and a reference to their quality standards.	Batch formula has been submitted for proposed commercial batch size i.e 10,000 tablets	Complied
3.	Compatibility of the Drug Substance(s) with excipients (Crospovidone, Microcrystalline cellulose) is not provided since said excipients are not found in innovator/reference product	Not provided	Not complied Later on firm provided reference of USFDA approved formulation i.e Levaquin wherein said ingredients have been used in formulation.
4.	Documents for the procurement of API to be submitted.	Commercial invoice has been submitted (No 156322) dated 22.04.2022 batch No DC-004-200312 2.5KG API was imported.	Approval from DRAP to be provided
5.	Compliance Record of HPLC software 21CFR & audit trail reports and record of Digital data logger for temperature and humidity monitoring is not submitted.	Provided	Compliance Record of HPLC software 21CFR & audit trail reports yet to be provided
6.	Detailed analytical procedures for the testing of drug substance to be provided by Drug product manufacturer	Provided	Complied
7.	Provide results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of	Provided	Complied

	Analysis (COA) of the same batch from Drug Substance / API manufacture.		
8.	Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer to be provided	Provided	HPLC chromatograms for different parameters tested (specificity, accuracy and repeatability etc) during verification study have not been provided. Moreover, Results of specificity parameter has not been provided
Remarks:	The reply submitted against above mentioned shortcoming was found unsatisfactory.		

Decision 329th meeting: Deferred for following:
Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.
Submission of approval from DRAP for procurement of API.
Results of specificity parameter under Analytical Method Verification studies of Drug substance

Reply:
Firm has provided copy of DML No (Zhe 200003122) dated 10.06.2021 issued by Zhejiang Medical Product Administration, expiry date 07.10.2024
Procurement document of API, cleared by (I&E) DRAP still required.
Analytical Method Verification studies of Drug substance is provided including results of specificity parameter.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

The firm as submitted detail of nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, tests for impurity (A, B & unspecified), specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 48 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: DC-004-1512001,DC-004-1512002,DC-004-1512003
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls,

		impurities, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.		
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand leader that is Tavanic 500 mg tablet by sanofi aventis by performing quality tests (Identification, Assay, Dissolution, Disintegration time). CDP has been performed against the same brand that is Tavanic 500 Tablet by sanofi Aventis (Batch No CRD0020) in Acid media (pH 1.0-1.2) & Phosphate Buffer (pH 6.8) against Test product (Batch No T001). The values for f1 and f2 are in the acceptable range. CDP of Levotel 500mg tablet has not been performed in acetate buffer and phosphate buffer medium (instead Levotel 250mg was mentioned)		
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.		
STABILITY STUDY DATA				
Manufacturer of API		M/s Zhejiang, East-Asia Pharmaceutical Co., Ltd ,address, Coastal Industrial City, Pubagang town, Sanmen county, Zhejiang, China.		
API Lot No.		Not provided		
Description of Pack (Container closure system)		Alu-Alu blister packed in unit carton		
Stability Storage Condition		Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period		Real time: 6 months Accelerated: 6 months		
Frequency		Accelerated: 0, 3,6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.		T-001	T-002	T-003
Batch Size		1000 tab	1000 tab	1000 tab
Manufacturing Date		5-2022	5-2022	5-2022
Date of Initiation		24-05-2022	24-05-2022	24-05-2022
No. of Batches		03		
Administrative Portion				
	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.		
	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Not provided		
	Documents for the procurement of API with approval from DRAP (in case of import).	Not provided		

	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not provided
	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not provided

Remarks of Assessor (DD PECXX):
1.6.5 Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin
3.2.S.4 Provide results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (COA) of the same batch from Drug Substance / API manufacture.
3.2.S.4 Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer to be provided
3.2.S.4 Detailed analytical procedures for the testing of drug substance to be provided by Drug product manufacturer.
3.2.P.2 Batch formula for proposed commercial batch size should be provided that includes a list of all components of the drug product to be used in the manufacturing process, their amounts on a per batch basis, and a reference to their quality standards.
3.P.2.1.1Compatibility of the Drug Substance(s) with excipients (Crospovidone, Microcrystalline cellulose) is not provided since said excipients are not found in innovator/reference product.
3.2.P.2 Submit revised CDP report for Levotel tablet 500mg since CDP of Levotel 500mg tablet has not been performed in acetate buffer and phosphate buffer medium (instead Levotel 250mg was mentioned)
3.2.P.8 Documents for the procurement of API to be submitted.
3.2.P.8 Compliance Record of HPLC software 21CFR & audit trail reports and record of Digital data logger for temperature and humidity monitoring is not submitted.

Decision: Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.

Remarks: Now the firm has submitted reply as follows:

Sr.#	Observation	Reply	Remarks
1.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Not provided	Not complied
2.	Batch formula for proposed commercial batch size should be provided that includes a list of all components of the drug product to be used in the manufacturing process, their amounts on a per batch basis, and a reference to their quality standards.	Batch formula has been submitted for proposed commercial batch size i.e 10,000 tablets	Complied
3.	Submit revised CDP report for Levotel tablet 500mg	Not provided	Not complied

	since CDP of Levotel 500mg tablet has not been performed in acetate buffer and phosphate buffer medium (instead Levotel 250mg was mentioned)		
4.	Compatibility of the Drug Substance(s) with excipients (Crospovidone, Microcrystalline cellulose) is not provided since said excipients are not found in innovator/reference product	Not provided	Not complied Later on firm provided reference of USFDA approved formulation i.e Levaquin wherein said ingredients have been used in formulation.
5.	Documents for the procurement of API to be submitted.	Commercial invoice has been submitted (No 156322) dated 22.04.2022 batch No DC-004-200312 2.5KG API was imported.	Approval from DRAP to be provided
6.	Compliance Record of HPLC software 21CFR & audit trail reports and record of Digital data logger for temperature and humidity monitoring is not submitted.	provided	Compliance Record of HPLC software 21CFR & audit trail reports yet to be provided
7.	Detailed analytical procedures for the testing of drug substance to be provided by Drug product manufacturer	Provided	Complied
8.	Provide results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (COA) of the same batch from Drug Substance / API manufacture.	Provided	Complied
9.	Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer to be provided	Provided	HPLC chromatograms for different parameters tested (specificity, accuracy and repeatability etc) during verification study have not been provided. Moreover Results of specificity parameter has not been provided
Remarks:	The reply submitted against above mentioned shortcoming was found unsatisfactory.		

Decision 329th meeting: Deferred for following:

Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin. Submission of approval from DRAP for procurement of API. Results of specificity parameter under Analytical Method Verification studies of Drug substance		
Reply: Firm has provided copy of DML No (Zhe 200003122) dated 10.06.2021 issued by Zhejiang Medical Product Administration, expiry date 07.10.2024 Procurement document of API, cleared by (I&E) DRAP still required. Analytical Method Verification studies of Drug substance is provided including results of specificity parameter.		
Decision: Approved. • **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.** • **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

	Stability studies	Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 12 months

		Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: B#00510011/003/2014, B#00510011/004/2014, B#00510011/005/2014
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand leader that is Ciproxin 500 mg tablet (Batch No C122) by Bayer Pharma by performing quality tests (Identification, Assay, Dissolution, Average weight) against Test product (Batch No C-T001) CDP has been performed against the same brand that is Ciproxin 500 Tablet by Bayer Pharma in Acid media (pH 1.0-1.2) & Phosphate Buffer (pH 6.8). The values for f1 and f2 are in the acceptable range.
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.

STABILITY STUDY DATA			
Manufacturer of API	M/s Pharmagen Limited. 34-Km, Ferozepur Road, Lahore, Pakistan.		
API Lot No.	00510011/178/2021		
Description of Pack (Container closure system)	Alu-Alu blister packed in unit carton		
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 2, 4, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	T-001	T-002	T-003
Batch Size	1000 tab	1000 tab	1000 tab
Manufacturing Date	10-2021	10-2021	10-2021
Date of Initiation	20-10-2021	20-10-2020	20-10-2021
No. of Batches	03		

Administrative Portion		
	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.
	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. 129/2020 dated 02.09.2020 based on inspection dated 22.06.2020 valid till Two Years issued by DRAP.

	Documents for the procurement of API with approval from DRAP (in case of import).	Not applicable (drug substance is from local source)
	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not provided
	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not provided

Remarks of Assessor (DD PECXX):
1.6.5 Valid Approval of API/ DML/GMP certificate of API manufacturer issued by DRAP.
3.2.S.4 Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer to be provided
3.2.S.4 Detailed analytical procedures for the testing of drug substance to be provided by Drug product manufacturer.
3.2.S.4 In USP monograph specification of Drug Substance included test "Residue on Ignition" (NMT 0.1%) while same has not been performed by firm.
3.2.P.2: Potency adjustment of Drug substance as provided in Batch formula, need to be justified. Since quantity of Drug substance mentioned as 593.64 mg for 500mg tablet and 296.82mg for 250mg tablet.
3.P.2.1.1Compatibility of the Drug Substance(s) with excipient (Sodium starch glycolate) is not provided since said excipients are not found in innovator/reference product.
3.2.P.8 Compliance Record of HPLC software 21CFR & audit trail reports and record of Digital data logger for temperature and humidity monitoring is not submitted.

Decision 326th meeting : Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.

S.No	Observations	Reply	Remarks
1	Valid Approval of API/ DML/GMP certificate of API manufacturer issued by DRAP.	Not provided	Valid GMP certificate of M/s Pharmagen is still required
2	Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer to be provided	Provided	Complied
3	Detailed analytical procedures for the testing of drug substance to be provided by Drug product manufacturer	Provided	Analytical procedures for the testing of drug substance is provided (as per USP)
4	In USP monograph specification of Drug Substance included test "Residue on Ignition" (NMT 0.1%) while same has not been performed by firm.	Firm has provided result of Residue on Ignition" test performed as per USP.	Complied
5	Potency adjustment of Drug substance as provided in Batch formula, need to be justified. Since quantity of Drug substance	Firm has justified quantity of API mentioned in batch	Justified

	mentioned as 593.64 mg for 500mg tablet and 296.82mg for 250mg tablet	formula w,.r.t to potency adjustment (salt factor and water content)	
6	Compatibility of the Drug Substance(s) with excipient (Sodium starch glycolate) is not provided since said excipients are not found in innovator/reference product.	Not provided	Not complied
7	Compliance Record of HPLC software 21CFR & audit trail reports and record of Digital data logger for temperature and humidity monitoring is not submitted.	Not provided	

Decision: Approved.

- **Before issuance of registration letter firm will submit:**

a) **Valid GMP certificate of API manufacturer issued by DRAP**

b) **Compatibility of the Drug Substance(s) with excipient (Sodium starch glycolate)**

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application..**

Batch Size		5000 Tab	5000 Tab
Manufacturing Date		02-2022	02-2022
Date of Initiation		19-02-2022	19-02-2022
No. of Batches		02	
Administrative Portion			
	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has referred to onsite inspection report of their product: EMPAZON 10mg Tablets, EMPAZON 25mg Tablets (Empagliflozin) Dayzol 30mg Capsules, Dayzol 60mg Capsules (Dexlansoprazole) which was conducted on 1st June, 2021 and was presented in 307th meeting of Registration Board held on 08-10th June , 2021. Registration Board decided to approve registration of EMPAZON 10mg Tablets, EMPAZON 25mg Tablets (Empagliflozin) Dayzol 30mg Capsules, Dayzol 60mg Capsules (Dexlansoprazole) by M/s. Horizon Healthcare (Pvt) Ltd. Lahore. Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months. Following two observations were reported in the report: The HPLC software is 21 CFR compliant. Audit trail on the testing reports of EMPAZON 10mg and 25mg Tablets, Dayzol 30mg and 60mg Capsules is available. Adequate monitoring and control are available for stability chamber. Chamber are controlled and	

		monitored through software having alarm system for alerts as well. Verification of performance of dissolution test at buffer stage pH 5.5 for Dayzol Capsules 30mg and 60mg. Performance of dissolution test for EMPAZON 10mg and 25mg Tablets with revised specifications i.e not less than 80% (Q) in 15minutes at initial and 01-month time point.
	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm had provided copy of GMP Certificate of Citi Pharma Limited 3.5km, Head Balloki Road, Bhai Pheru, Distt Kasur Pakistan (Dated 17.12.2022) GMP Valid upto: Two years
	Documents for the procurement of API with approval from DRAP (in case of import).	N/A
	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted
Remarks of EvaluatorXX: Firm has submitted specification of hardness as follows: Hardness NLT 4Kp Upper limit to be defined as USFDA recommends that hardness for chewable tablets be kept low (<12 kp). A higher hardness value (>12 kp) may be considered if justified.		
Decision 323rd meeting: Deferred for comparison of instant formulation against the innovator product for qualitative composition and manufacturing method applied by firm for masking the bitter effect of drug substance		

Reply:
Firm has provided manufacturing process flow diagram and comparison of instant formulation against the innovator product as follows:

Pytol-C ChewableTablet	Panadol Chewable Tablet (TGA approved)
Mannitol	Mannitol
Ethyl cellulose	Ethyl cellulose
Maize starch	Maize starch
Saccharin sodium	Saccharin sodium
Cherry Flavor	Cherry Flavor
Stearic acid	Stearic acid

Also provided organoleptic study which shows Pytol-C tablet is not bitter in taste.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Good Manufacturing Practice (GMP) certificate of the Drug Substance / API manufacturer issued by China Food and Drug Administration (No SD20180660) valid till 08.02.2023 is provided	Complied
	CoA from Drug Product manufacturer is not as per USP. The Assay limit as per USP (44) is 825ug/mg to 911ug/mg (on anhydrous basis) while assay result mentioned in CoA from Drug product manufacturer is 538 ug/mg (on anhydrous basis)	CoA of Drug substance as per USP is submitted from Drug product manufacturer wherein assay result is mentioned as 893 ug/mg (anhydrous basis) which falls within limit (825ug/mg to 911ug/mg) as per USP. The assay result obtained as 519ug/mg (on as is basis)	Complied
	Following tests are not mentioned in CoA of Drug Substance (both from Drug Product manufacturer and Drug Substance manufacturer): crystallinity, water determination. Moreover, acceptance criteria for impurity testing is not as per USP.	CoA of Drug substance as per USP (both from Drug Product manufacturer and Drug Substance manufacturer) wherein crystallinity and water determination tests were mentioned	Complied
	The L-arginine, at an approximate concentration of 725 mg/g of cefepime, is added in reference product (USFDA approved) to control the pH of the	The ratio of L Arginine and cefepime activity	Complied

	constituted solution at 4.0–6.0. Calculation of arginine quantity in bulk powder to be provided.	has been provided as under: Sterile arginine : cefepime activity 0.707 : 1 In total quantity (cefepime HCl with L arginine) of 1.707g, quantity of L arginine used = 0.707g (i.e 707mg/g or 39.94%)	
	Provide results of analysis of relevant batch(es) of Drug Substance (Batch No 1011AJ89DB) performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (COA) of the same batch from Drug Substance / API manufacture	CoA of Drug substance provided from Drug Substance (from Drug product manufacturer) is provided with batch No of 1011A18906	CoA of Drug substance of Batch No 1011AJ89DB, to be provided from Drug Product manufacturer
	In use stability data (reconstituted form) to be provided as per guidance document by EMA. (https://www.ema.europa.eu/en/documents/scientific-guideline/note-guidance-use-stability-testing-human-medicinal-products en.pdf)	In use stability data (reconstituted with WFI) for period of 24 hours (at 30°C ± 2°C / 65% ± 5%RH) is provided, for all three stability batches	Complied
	In stability testing Pharmacopoeial tests like BET, sterility test, water determination and uniformity of dosage unit has not been performed.	Stability study report is provided wherein pharmacopoeial quality parameters like BET, sterility test, water determination and uniformity of dosage unit, were tested	Complied
	Compliance Record of HPLC software 21CFR & audit trail reports on product	Provided	Complied
	Provide information including type of diluent, its composition, quantity or volume, specifications Regulatory status of diluent in Pakistan is required with details of manufacturer and Registration No.	Sterile water for injection is used for reconstitution. Details mentioned below: Aquakan 5ml Reg No:111993 by Jaskan pharmaceutical	Complied

	Perform suitability testing of proposed container closure system (Ph.Eur type II glass vial) as per pharmacopeia	Tests and specifications of Type II glass vial is provided (including pharmacopoeial tests of hydrolytic resistance i.e glass surface test and glass grain tests)	Complied
	Justify selection of that particular comparator product. Moreover pharmaceutical equivalence study against Jaspime 500mg injection has not been performed (instead Jaspime 1000mg injection was used against Cefstar 500 mg Injection)	Innovator product is not available in Pakistan hence Maxum 1.0gm Injection Curexa Health Pvt LTD, Batch No 2180120 was selected for pharmaceutical equivalence study.	Justified
	Compatibility studies of drug product with diluent is not provided.	No any incompatibility is recorded with diluent.	
	Calculation regarding potency adjustment (salt factor and assay result of drug substance) has not been provided in Batch formula/ master formula.	Calculation provided including assay result, LOD and Arginine content.	Calculation regarding potency adjustment (salt factor) is not provided. Moreover, batch formula/master formula to be updated for clarification of quantity used after potency adjustment.

Decision 326th meeting:
Deferred for following reasons:

- CoA of Drug substance of Batch No 1011AJ89DB, to be provided from Drug Product manufacturer
- Calculation regarding potency adjustment (salt factor) is to be provided. Moreover, batch formula/master formula to be updated for clarification of quantity used after potency adjustment.

Reply:
Firm has provided CoA of relevant batch (No 1011AJ89DB) from Drug product manufacturer
Calculation regarding potency adjustment w.r.t to Arginine content and water content has been provided however salt factor yet to be calculated.

Decision: Approved.

- **Before issuance of registration letter firm will submit Batch Formula wherein potency adjustment of API w.r.t salt factor should be provided.**
- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**

• **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Remarks of Assessor (DD PECXX):

Label claim of RRA approved formulation (Symbicort® Turbohaler® 200 micrograms/6 micrograms/ powder for inhalation) is as follows:

Each delivered dose (the dose that leaves the mouthpiece) contains: budesonide 160 micrograms/inhalation and formoterol fumarate dihydrate 4.5 micrograms/inhalation.
Each metered dose contains: budesonide 200 micrograms/inhalation and formoterol fumarate dihydrate 6 micrograms/inhalation.
Firm has not provided information regarding delivered dose

3.2.P.2 In reference product quantity of Lactose monohydrate used is 730microgram while in applied formulation the quantity of Lactose monohydrate used was 50mg. justify it

3.2.P.2 In reference product Lactose monohydrate is the only excipient been used while firm used other excipients as well such as Talcum powder, Macragol 100, Povidone, Aerosil 200 . justify it, also provide Drug-Excepient compatibility studies of said excipients.
3.2.P.2 The container closure system of reference product, is an inspiratory flow-driven, multidose powder inhaler containing metered doses which is made of different plastic materials, while the applied formulation is primarily pre-dispensed in unit dose hard capsules. Justification shall be submitted for pharmaceutical equivalence of the applied product against the reference product with respect to change in primary container closure system, compatibility of applied formulation with the hard gelatin capsule.

3.2.P.5 Specification of Dug Product did not include water content test which is critical quality parameters for DPI.
3.2.P.2 Pharmaceutical equivalence study to be performed including all quality parameters, Moreover, name batch no and manufacturer of both Test product and Reference product to be provided.
3.2.P.2 Batch formula for proposed commercial batch size should be provided that includes a list of all components of the drug product to be used in the manufacturing process, their amounts on a per batch basis, and a reference to their quality standards.
3.2.P.2 Potency adjustment (salt factor) calculation was not provided for Formoterol fumarate dihydrate in Batch formula.
3.2.P.2 Detailed Analytical testing method of Drug Product to be provided.
3.2.P.2 Description of Packaging (Container closure system) is to be provided, also provide details of metered dose inhalation device (name, model, manufacturer and shelf life) provided in pack.
3.2.P.8 Documents for the procurement of API to be submitted.
3.2.P.8 Compliance Record of HPLC software 21CFR & audit trail reports and record of Digital data logger for temperature and humidity monitoring is not submitted.
3.2.S.4 Detailed analytical procedures for the testing of drug substance to be provided by Drug product manufacturer
3.2.S.4 Provide results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (COA) of the same batch from Drug Substance / API manufacture.
3.2.S.4 Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer to be provided
3.2.S.4 CoA of Drug Substance Formoterol fumarate dihydrate particle size distribution test was not performed which is critical quality attribute in applied formulation i.e DPI.

Decision 326th meeting: Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.
Registration Board further advised to submit the registration status of previously registered products for "Sachet (general) section

Reply:

Sr.#	Section	Observations	Reply	Remarks
1.		Label claim of RRA approved formulation (Symbicort® Turbohaler® 200 micrograms/6 micrograms/ powder for inhalation) is as follows: Each delivered dose (the dose that leaves the mouthpiece) contains: budesonide 160 micrograms/inhalation and formoterol fumarate dihydrate 4.5 micrograms/inhalation. Each metered dose contains: budesonide 200 micrograms/inhalation and formoterol fumarate dihydrate 6 micrograms/inhalation. Firm has not provided information regarding delivered dose	Firm has provided content of active ingredients emitted from the mouthpiece of DPI as follows: Budesonide 155 micrograms/inhalation delivered Formoterol fumarate dihydrate 4.2 micrograms/inhalation delivered Firm also provided detail of sampling apparatus (for determining content of active ingredients emitted from mouth piece)	Delivered dose of both ingredients is different from RRA approved formulation.

2.	3.2.P.2	In reference product quantity of Lactose monohydrate used is 730microgram while in applied formulation the quantity of Lactose monohydrate used was 50mg. justify it	Firm has submitted revised master formulation wherein quantity of Lactose monohydrate mentioned as 20mg	In reference product quantity of Lactose monohydrate used is 730microgram quantity mentioned yet to be justified
3.	3.2.P.2	In reference product Lactose monohydrate is the only excipient been used while firm used other excipients as well such as Talcum powder, Macragol 100, Povidone, Aerosil 200 . justify it, also provide Drug-Excipient compatibility studies of said excipients	In the earlier provided formulation excipients other than lactose monohydrate have been mentioned mistakenly. Corrected formulation is provided complying with reference product	Revised formulation as per reference product has been submitted which is qualitatively similar to reference product.
4.	3.2.P.2	The container closure system of reference product, is an inspiratory flow-driven, multidose powder inhaler containing metered doses which is made of different plastic materials, while the applied formulation is primarily pre-dispensed in unit dose hard capsules. Justification shall be submitted for pharmaceutical equivalence of the applied product against the reference product with respect to change in primary container closure system, compatibility of applied formulation with the hard gelatin capsule.	Applied formulation is hard gelatin capsule containing powder for inhalation along with revolizer for Administration. It contains a container closure system in which capsule is placed and inhaled from mouth piece by inspiration, this is in accordance to reference product which is inspiratory flow driven.	Justification yet to be submitted for pharmaceutical equivalence of the applied product against the reference product with respect to change in primary container closure system, compatibility of applied formulation with the hard gelatin capsule.
5.	3.2.P.5	Specification of Dug Product did not include water content test which is critical quality parameters for DPI.	Specification of Drug product has been submitted wherein water content test is included.	Quality tests such as uniformity of delivered dose and aerodynamic assessment of fine particles have not been performed
6.	3.2.P.2	Pharmaceutical equivalence study to be performed including all quality parameters, Moreover, name batch no and manufacturer of both Test product and Reference product to be provided.	Pharmaceutical equivalence study has been performed against comparator product: Combivair 200mcg/6mcg capsule B.No: 230519 Exp date: 07/2023 Quality parameters compared included:	Quality tests such as uniformity of delivered dose, aerodynamic assessment of fine particles and microbial contamination have not been performed

			Water content, content uniformity, assay	
7.	3.2.P.2	Batch formula for proposed commercial batch size should be provided that includes a list of all components of the drug product to be used in the manufacturing process, their amounts on a per batch basis, and a reference to their quality standards.	Provided	Complied
8.	3.2.P.2	Potency adjustment (salt factor) calculation was not provided for Formoterol fumarate dihydrate in Batch formula	Potency adjustment/salt factor calculation for Formoterol fumarate dihydrate has been provided in batch formula.	Complied
9.	3.2.P.2	Detailed Analytical testing method of Drug Product to be provided.	Not provided	Not complied
10.	3.2.P.2	Description of Packaging (Container closure system) is to be provided, also provide details of metered dose inhalation device (name, model, manufacturer and shelf life) provided in pack.	Detail of container closure system is provided as follows: 10 rotacap /blister (aluminium foil) Inhalation device: Name: WRLflo Model: WRL-00753 Manufacturer: Winbrain Shelf life: 5 years.	
11.	3.2.P.8	Documents for the procurement of API to be submitted.	Firm has provided copy of commercial invoice dated 26.10.2021 wherein Formoterol fumarate dihydrate EP (5gm) Batch No. FF-0090821 and Budesonide EP Batch No BDS-0510921 is mentioned .Approved by DRAP (I&E) Peshawar dated 9-11-2021	Complied
12.	3.2.P.8	Compliance Record of HPLC software 21CFR & audit trail reports and record of Digital data logger for temperature and humidity monitoring is not submitted.	Record of Digital data logger for temperature and humidity monitoring is provided	
13	3.2.S.4	Detailed analytical procedures for the testing of drug	Analytical procedures for the testing of	Complied

		substance to be provided by Drug product manufacturer	Formoterol fumarate dihydrate is submitted as per BP. Analytical procedures for the testing of Budesonide is submitted as per Ph.Eur	
14	3.2.S.4	Provide results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (COA) of the same batch from Drug Substance / API manufacture.	Certificate of Analysis (COA) of relevant batches of both Drug Substances have been provided by Drug Substance manufacturer Formoterol fumarate dihydrate Batch No. FF-0090821 and Budesonide Batch No BDS-0510921	Certificate of Analysis (COA) of relevant batches to be provided from Drug product manufacturer as well
15	3.2.S.4	Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer to be provided	Analytical Method Verification studies of Formoterol fumarate dihydrate and Budesonide has not been provided by Drug Product manufacturer	Not complied
16	3.2.S.4	CoA of Drug Substance Formoterol fumarate dihydrate particle size distribution test was not performed which is critical quality attribute in applied formulation i.e DPI.	CoA of Formoterol fumarate dihydrate is provided wherein particle size distribution test has been included.	Complied

Also provide registration status of previously registered products for "Sachet (general) section

Decision 333rd meeting: Registration Board deferred the application for following shortcomings;
Justify quantity of Lactose monohydrate i.e 20mg per unit dose (rotacap) with reference to RRA approved formulation wherein quantity of Lactose monohydrate is mentioned as 730microgram per delvered dose.
Perform quality tests such as uniformity of delivered dose and aerodynamic assessment of fine particles under finished product specification as well as pharmaceutical equivalence study.
Provide detailed Analytical testing method of Drug Product.
Provide CoA of relevant batches of both Drug Substances used in product development from Drug Product manufacturer.
Provide Analytical Method Verification studies of both drug substances by the Drug Product manufacturer.

Reply:
There was typographic mistake in mentioning quantity of Lactose monohydrate, the correct quantity is 730mcg per unit dose in line with RRA. Master formula with correct quantity is submitted.
Results of aerodynamic assessment of fine particles have been submitted along with results and performance report for aerodynamic assessment of particles and uniformity of delivered dose.
Detailed Analytical testing method of Drug Product has been provided
CoA of relevant batches of both Drug Substances Formoterol fumarate dihydrate (Batch No. FF-009082) and Budesonide (Batch No BDS-0510921) has been provided
Analytical Method Verification studies of both drug substances have been provided by Drug Product manufacturer.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application**

	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference

		standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical Equivalence study was performed against Lipirex 10mg Tablet by Highnoon Laboratories Ltd (B.No PD T-25) Firm has submitted CDP results against the Lipirex 10mg Tablet by Highnoon Laboratories Ltd in acidic medium (0.1NHCl), acetate buffer (Ph 4.5) and Phosphate Buffer (pH 6.8). The values for f1 and f2 are in the acceptable range.
	Analytical method Validation study	Only Summarized tabulated results have been provided instead of detailed Analytical method Validation study of Drug Product

STABILITY STUDY DATA			
Manufacturer of API	M/s Morepen Laboratories Ltd Malkumajra, Nalagarh Road, Distt Solan, H.P, 173 205 India		
API Lot No	ATC 7063		
Description of Pack (Container closure system)	Alu-Alu blister with unit carton		
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3,6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	T-25	T-26	T-27
Batch Size	1200 tablets	1200 tablets	1200 tablets
Manufacturing Date	02/22	02/22	02/22
Date of Initiation	16-02-2022	16-02-2022	16-02-2022
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA	
Reference of previous approval of applications with stability study data of the firm (if any)	Not applicable
Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Not provided
Documents for the procurement of API with approval from DRAP (in case of import).	Commercial invoice (No M/BE/2021-2022/0058) Dated 02-01-2022 wherein Atorvastatin calcium 1Kg Batch No ATC 7063 has been mentioned. Approval from DRAP (I&E) is required
Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted

	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not provided
	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not provided

Remarks of Assessor:

Sr.#	Observations
1.	Provide updated GMP status of finished product manufacturer
2.	Valid approval of Drug Substance/Drug Manufacturing License (DML)/Good Manufacturing Practice (GMP) certificate of the Drug Substance / API manufacturer issued by concerned regulatory authority of country of origin to be provided
3.	3.2.S.4 Clarify specifications of Drug Substance. Since CoA (from DS manufacturer) and analytical method of Drug Substance (by Drug Product manufacturer) were not according to USP (as claimed by DS manufacturer). Moreover submit analytical method verification studies of Drug substance accordingly.
4.	3.2.S.4 Provide CoA of relevant batch (ATC 7063) by finished product manufacturer
5.	3.2.P.2.2.1 Provide details of comparator product i.e Lipirex 10mg Tablet such as Exp. Date, Batch no. etc
6.	3.2.P.5 Provide detailed analytical testing method adopted for analysis of Drug product.
7.	3.2.P.8 Justification to be provided for selection of dissolution parameters i.e dissolution medium (0.01 M HCl), rpm (50), sampling time (30min) as mentioned under stability study
8.	3.2.P.8 Provide documents for the procurement of API with approval from DRAP.

Decision: Deferred for submission of above mentioned shortcomings.

1010.	Name, address of Applicant / Marketing Authorization Holder	M/s Jawa Pharmaceuticals Pvt Ltd 112/10 Quaid-e-azam Industrial Estate, Kot Lakhpat Lahore

	Batch Size	5000 Sachet	5000 Sachet	5000 Sachet
	Manufacturing Date	08/21	08/21	08/21
	Date of Initiation			
	No. of Batches	03		
	DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA			
	Reference of previous approval of applications with stability study data of the firm (if any)	Not applicable		
	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has provided copy of GMP certificate No I/151-2Drug-I-2019/4138-Drug-I-7839 dated 22-10-2019 valid till 2 years. Issued by FDA , Haryana		
	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has provided permission for import of API Strontium Ranelate (3000gm) vide letter No 633/2020/DRAP-AD-CD(I&E) dated 13-01-2020 From Assistant Director (I&E) DRAP , Lahore Documents/commercial invoice for procurement of Drug to be provided		
	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Summary data sheets and chromatograms are submitted		

	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not provided
	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Provided

Remarks of Assessor:

Sr.#	Observations
1.	Provide updated GMP status of finished product manufacturer
2.	Valid approval of Drug Substance/Drug Manufacturing License (DML)/Good Manufacturing Practice (GMP) certificate of the Drug Substance / API manufacturer issued by concerned regulatory authority of country of origin to be provided
3.	2.3.R.1.1 Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3
4.	3.2.S.4 The active substance specification includes tests for identity, LOD, related substances, heavy metals, pH, strontium content, particle size and assay. https://www.ema.europa.eu/en/documents/scientific-discussion/protelos-epar-scientific-discussion_en.pdf While quality parameters such as pH and particle size have not been performed neither by Drug substance nor Drug product manufacturer.
5.	3.2.S.4 Provide results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (COA) of the same batch from Drug Substance / API manufacture
6.	3.2.S.7 Submit stability data of Drug substance up to shelf life. Since already submitted (Real time) stability data was up to 9 months
7.	3.2.P.2.2.1 Pharmaceutical equivalence study and CDP to be provided against innovator/comparator product by performing all quality tests. Also Provide details of comparator product such as Exp. Date, Batch no. etc
8.	3.2.P.5 Justify selection criteria of chromatographic condition particularly wavelength i.e 239nm while Drug Substance manufacturer adjusted it as 306nm while analysing Drug substance.
9.	3.2.P.5 The specification for the finished product includes tests for characterization, average mass, uniformity of mass, pH, microbial quality, identification (organic part and strontium), assay (HPLC), degradation products, assay of strontium and dissolution. https://www.ema.europa.eu/en/documents/scientific-discussion/protelos-epar-scientific-discussion_en.pdf however, tests like pH ,microbial quality, assay of strontium and dissolution have not been performed by Drug Product manufacturer.
10.	3.2.P.8 Provide documents for the procurement of API with approval from DRAP. Also clarify Lot/Batch No of API that was imported.
11.	3.2.P.8 Provide Raw data sheets, and COA for both Real time and Accelerated stability data of all 3 batches. Moreover during stability study quality parameters such as pH ,microbial quality, assay of strontium and dissolution have not been assessed.

Decision: Deferred for submission of above mentioned shortcomings.

Remarks of Assessor:

Sr.#	Observations	Reply	Remarks
1.	Provide updated GMP status of finished product manufacturer	Firm again provided copy of GMP certificate No 146/2018-DRAP (AD-612094-790) dated 28-08.2018 based on inspection dated 26.04.2018	Updated GMP status is required
2.	Valid approval of Drug Substance/Drug Manufacturing License (DML)/Good Manufacturing Practice (GMP) certificate of the Drug Substance / API manufacturer issued by concerned regulatory authority of country of origin to be provided	Firm has provided copy of GMP certificate No DD011S220000011dated 31.01.2024 valid till1 year. Issued by DCA, Karnataka	
3.	2.3.R.1.1 Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3	Provided	
4.	3.2.S.4 The acceptance criteria for quality tests such as Residue on ignition, chloride and water content is not as per USP. Clarify it	CoA of Drug substance has been revised as per USP	
5.	3.2.S.4 Provide analytical verification study performed by Drug Product manufacturer.	Provided	
6.	3.2.S.4 Provide results of analysis of relevant batch (AOND-22006)	CoA of relevant batch (AOND-22006) has been	

	of Drug Substance performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (COA) of the same batch from Drug Substance / API manufacture	provided by both Drug substance and Drug product manufacturers	
7.	3.2.P.2.2.1 Provide details of comparator product such as Exp. Date, Batch no. etc against which Pharmaceutical equivalence study was performed.	Provided as follows: Zofran Injection (GSK pharma). Batch No: T0720 Mfg date: 10-2021 Exp date: 09-2023	
8.	3.2.P.2. The quantity of excipients as provided in reference product (MHRA approved) by JCSH Pharma Ltd is 14.4 mg of sodium as sodium chloride and sodium citrate. Justify the quantities of sodium chloride and sodium citrate mentioned in Batch formula.	*14.4 mg sodium is produced from 36 mg of sodium chloride whereas sodium citrate is used only for Ph adjustment*.	Justified
9.	3.2.P.8 Provide documents for the procurement of API with approval from DRAP.	*API was directly received through DHL, slip attached dated 15.10.2021*	

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application**

Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3,6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	T-01	T-02	T-03
Batch Size	1500 Cap	1500 Cap	1500 Cap
Manufacturing Date	06/21	06/21	06/21
Date of Initiation	08-06-2021	08-06-2021	08-06-2021
No. of Batches	03		
DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA			
Reference of previous approval of applications with stability study data of the firm (if any)	Not applicable		
Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Not provided		

	Documents for the procurement of API with approval from DRAP (in case of import).	Not provided
	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Provided
	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Provided

Remarks of Assessor:

Sr.#	Observations
1.	Provide updated GMP status of finished product manufacturer
2.	Provide valid Good Manufacturing Practice (GMP) certificate of the Drug Substance / API manufacturer issued by relevant drug regulatory authority.
3.	3.2.P.2.2.1 Submit Pharmaceutical Equivalence study against reference product i.e Lyrica 75mg capsule by Upjohn UK Ltd. Also provide details of reference product (Exp. Date, Batch no. etc)
4.	3.2.P.2.2.1 Perform CDP against all three mediums (pH 1.2, 4.5 and 6.8) and submit results accordingly. As firm provided results of CDP performed in phosphate buffer (Ph 6.8) only.
5.	3.2.P.5 Justification to be provided for selection of dissolution parameters i.e dissolution medium (0.06 N HCl and volume of dissolution medium (900ml) etc since dissolution parameters mentioned in "USFDA guidance document on Dissolution Testing and Acceptance Criteria for Immediate-Release Solid Oral Dosage Form Drug Products Containing High Solubility Drug Substances" recommends dissolution medium as "500 mL of 0.1N HCl in aqueous medium"), acceptance criteria NLT 80% in 30 min.
6.	3.2.P.8 Provide documents for the procurement of API with approval from DRAP.
7.	3.2.P.8 Provide raw data sheets of stability data (both accelerated and real time) containing results /calculations of dissolution and assay.

Decision: Deferred for submission of above mentioned shortcomings.

Remarks of Assessor:

Firm has taken the dissolution specification from FDA assessment report of innovator "Motegrity tablet" NDA 210166 which specify following dissolution parameters:

Apparatus	USP Apparatus 2 (Paddle)
Speed	50 rpm
Dissolution media	0.1 N Hydrochloric Acid
Volume	900 mL
Time	10, 20, 30, and 45 min
Temperature	37 ± 0.5 °C
Specifications	NL 80% (Q) in 20 minutes

Firm took above mentioned specification and tested accordingly from initial stage to onward.

Sr.#	Observations	Reply	Remarks
1.	Provide updated GMP status of finished product manufacturer	Firm has provided updated GMP status i.e GMP certificate based on inspection dated 04.06.2022 valid till three years.	Complied
2.	Provide valid Good Manufacturing Practice (GMP) certificate of the Drug Substance / API manufacturer issued by relevant Drug regulatory authority .	Firm has provided copy of GMP certificate No 4138-Drug-2022/6790 dated 07-09-2022 valid till 17-11-2022 issued by FDA, Haryana Valid till two years from the date of issue.	Complied
3.	3.2.S.7 Provide stability data of Drug Substance (both Accelerated and Real time) of 3 batches.	Stability study has been provided of following conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 60months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches:(LA-PPD-SF-18-001, LA-PPD-SF-18-002 and LA-PPD-SF-18-003)	Complied
4.	3.2.P.2.2.1 Submit Pharmaceutical Equivalence study against reference product i.e Resolor tablet 2mg by Janssen Italy (Batch No LBL7N00). Also provide details of reference product (Exp. date)	Firm has submitted Pharmaceutical Equivalence study report against the Resolor tablet 2mg by Takeda pharma, Japan (Batch No LBL7N00). Quality parameters	Complied

		comparted were DT, Avg weight, LOD, Dissolution and Assay.	

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application**

Remarks of Assessor:
Fee submitted for 40mg Artemether injection instead of 80mg injection as verified from online database (https://e.dra.gov.pk/)
a) 2.3.P.6 COA of primary / secondary reference standard including source and lot number to be provided.
b) 3.2.S.2.1: Clarify API/DS manufacturer, whether Micro Orgo Chem, Gujrat India or Calyx Chemical and Pharmaceuticals Ltd. Since procurement documents and CoA bearing name i.e Calyx Chemical and Pharmaceuticals Ltd while analytical method validation study report and stability data bearing name of manufacturer as Micro Orgo Chem, Gujrat India
c) 3.2.S.4 Analytical method verification study of Drug Substance to be performed by Drug Product manufacturer.
d) 3.2.S.7 Stability data of 3 batches at accelerated and real time conditions (as per zone IV-A)
e) 3.2.P.2 Provide details of container closure system (Glass ampoule) such as glass type and suitability testing/Quality testing (as per relevant pharmacopeia) to be submitted

f) 3.2.P.2.2.1 Provide Pharmaceutical equivalence study and details of comparator/Reference product such as Exp. Date, Batch no. etc against which Pharmaceutical equivalence study was performed.

g) 3.2.P.8 Provide loan agreement for borrowing API from M/s Newton Healthcare Pvt Ltd, Karachi. Moreover approval from I&E DRAP is required.

Reply:

COA of primary / secondary reference standard including source and lot number is provided. API/DS manufacturer is Calyx Chemical and Pharmaceuticals Ltd, as clarified by the firm. Summary of Analytical method verification study of Drug Substance performed by Drug Product manufacturer, has been provided. Firm has submitted stability study data of 3 batches of both drug substances at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 48 months MO/ARM/0901, MO/ARM/0902, MO/ARM/0903 Firm provided protocol/SOP for testing glass vial/ampoule (USP type I). Firm has provided pharmaceutical equivalence study report against comparator product Arthenate injection 80mg/ml by City Pharmaceutical Lab (Batch No I-071) quality parameters compared were appearance, Ph and assay Loan agreement for borrowing API (2kg) from M/s Newton Healthcare Pvt Ltd, Karachi. However, approval from I&E DRAP/clearance certificate is required for procurement of API.
Remarks: Name of manufacturer mentioned on procurement documents and CoA of Drug substance as Calyx Chemical and Pharmaceuticals Ltd while analytical method validation study report and stability data bearing name of Micro Orgo Chem, Gujrat India. Status of Micro Orgo Chem, Gujrat India yet to be clarified Suitability testing/Quality testing (as per relevant pharmacopeia) yet to be provided Approval of Procurement documents i.e Commercial Invoice No Exp-078/T dated 28.02.2022 (in the name of M/s Newton Healthcare Pvt Ltd, Karachi) by I&E, DRAP to be provided. Fee submitted for 40mg Artemether injection instead of 80mg injection as verified from online database (https://e.dra.gov.pk/)
Decision: Deferred for following requirements: **a) Status of Micro Orgo Chem, Gujrat India to be clarified since name mentioned on development data (analytical method validation study report and stability data) as Micro Orgo Chem, Gujrat India.** **b) Provide suitability testing/Quality testing (as per USP) to be submitted.** **c) Approval of Procurement documents by I&E, DRAP to be provided.**

	Proposed Pack size	100mlx1's Vial
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	metronidazole 5mg/ml MHRA approved
	For generic drugs (me-too status)	Flagyl Infusion 500mg/100ml Regn No.005102 Manufacturer: Sanofi-Aventis Pakistan Limited.
	Name and address of API manufacturer.	Hubei Hong Yuan Pharmaceutical Technology Co., Ltd 1.No 126 Dabieshan Road, Industrial and Economic Development Zone Luotian country Huanggang city, Hubei province China.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	The firm submitted detail of nomenclature, structure, general properties, solubility, physical form, manufacturers, tests for single/total impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of both drug substances at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 60 months 070101, 070102, 070103
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Not provided
	Analytical method validation/verification of product	Firm has submitted analytical method validation study reports for drug product.
STABILITY STUDY DATA		

Manufacturer of API	Hubei Hong Yuan Pharmaceutical Technology Co., Ltd 1.No 126 Dabieshan Road, Industrial and Economic Development Zone Luotian country Huanggang city, Hubei province China.		
API Lot No.	0182301200		
Description of Pack (Container closure system)	100ml glass vial		
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	MD-TB-001	MD-TB-002	MD-TB-003
Batch Size	300 vials	300 vials	300 vials
Manufacturing Date	05-2023	05-2023	05-2023
Date of initiation	09/05/2023	09/05/2023	09/05/2023
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not provided
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No: HB20180424 dated 31.07.2018 valid till 30.07.2023 issued by China Food and Drug Administration
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has provided copy of clearance certificate dated 08.03.2023 wherein metronidazole (500kg) Batch No 0182301200 was mentioned, in the name of M/s Ophth pharma (Pvt) Ltd.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Provided
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Provided
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Provided

Remarks of Assessor:
2.3.P.6 COA of primary / secondary reference standard including source and lot number to be provided.
3.2.S.4 Analytical method verification study of Drug Substance to be performed by Drug Product manufacturer.
3.2.P.2 Provide details of container closure system (Glass vial) such as glass type and suitability testing/Quality testing (as per relevant pharmacopeia) to be submitted.

3.2.P.2.2.1 Provide Pharmaceutical equivalence study and details of comparator/Reference product such as Exp. Date, Batch no. etc against which Pharmaceutical equivalence study was performed.

3.2.P.5: Clarify assay method (along with chromatographic conditions) of finished product adopted by product manufacturer since same assay method (HPLC) has not been found in BP.
3.2.P.8 Provide loan agreement for borrowing API from M/s M/s Ophth pharma (Pvt) Ltd.

Reply:
COA of primary / secondary reference standard including source and lot number is provided.
Summary of Analytical method verification study of Drug Substance performed by Drug Product manufacturer has been provided.

Firm provided protocol/SOP for testing glass vial/ampoule (USP type I) Firm has provided pharmaceutical equivalence study report against comparator product Flagyl infusion 500mg/100ml by Snofi Aventis Pakistan Limited (Batch No AL1012) quality parameters compared were appearance, Ph and assay Assay method for metronidazole infusion is spectrophotometric in BP 2022 while HPLC method is adopted as HPLC from USP monograph. I think HPLC method is more efficient method. Loan agreement for borrowing API (2kg) from M/s OPHTH pharma Pvt Ltd, Karachi.
Remarks: Firm claimed BP specification, all quality parameters/acceptance limit were as per BP However assay method adopted as per USP (i.e HPLC). Suitability testing/Quality testing (as per relevant pharmacopeia) yet to be provided.
Decision: Approved. • **Before issuance of registration letter firm will submit analytical testing method of product as per BP along with performance report.** • **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.** • **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application**

1018.	Name, address of Applicant / Marketing Authorization Holder	M/s Abbott Laboratories Pakistan Ltd, opposite Radio Pakistan Transmission centre Hyderabad Road Karachi
	Name, address of Manufacturing site.	M/s Abbott Laboratories Pakistan Ltd, opposite Radio Pakistan Transmission centre Hyderabad Road Karachi
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	GMP certificate based on Inspection dated 09.03.2023 valid till two years.
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter for renewal of DML dated 15-06-2021 specifying Tablet (General) section..
	Status of application	☒ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No 13177 dated 29-05-2023
	Details of fee submitted	PKR 30,000/- Dated 31/01/2023
	The proposed proprietary name / brand name	Equasis Tablet 50mg
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each tablet contains: Vildagliptin……..50mg
	Pharmacotherapeutic Group of (API)	Anti hyperglycemic agent
	Pharmaceutical form of applied drug	Oral tablet
	Reference to Finished product specifications	Not provided
	Proposed Pack size	10’s , 28’s
	Proposed unit price	As per DPC

	The status in reference regulatory authorities	Galvus 50mg tablet by M/s Novartis Pharmaceutical UK Ltd MHRA Approved
	For generic drugs (me-too status)	Galvus 50mg tablet by M/s Novartis, Reg No 059038
	Name and address of API manufacturer.	M/s Lee Pharma Limited Survey No 30P, 31P,32P, 34P & 35P, Plot No 22A and 22B Denotified area-APSEZ, Lalam Koduru Village, Rambilli Mandal, Visakhapatnam District, Andhra Pradesh, India
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance (VNFP17001, VNFP17002 and VNFP17003) at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 75% ± 5% RH for 48 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical equivalence was determined against Galvus 50mg tablet by M/s Novartis Farmaceutica S.A Spain M.A Holder in Pakistan : Novartis Pharma Pakistan Limited Batch No BWY 84 Quality parameters such as Appearance, uniformity of dosage, water by KF, identification, disintegration time, dissolution assay, and related substances against Test product (Batch No 422004XZ)

		Firm has submitted CDP results of their product against the same innovator product Galvus 50mg tablet by M/s Novartis Farmaceutica S.A Spain in Acid media (pH 1.0-1.2) in Acetate Buffer (pH 4.5) & Phosphate Buffer (pH 6.8). The f2 value was not required since more than 85% drug release within 15 min.
	Analytical method validation/verification of product	Firm has submitted analytical method validation study reports for drug substance as well as drug product.

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not applicable
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Not provided
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not provided
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Provided
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Provided

Remarks of Assessor:

Sr.#	Observations

1.	Valid Good Manufacturing Practice (GMP) certificate of the Drug Substance / API manufacturer issued by concerned regulatory authority of country of origin to be provided
2.	2.3.R.1.1 Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2. P.8.3. Moreover, clarify stability batch size.
3.	3.2.S.4 Method used for analysis of API from Finished Product Manufacturer to be provided along with analytical method validation studies.
4.	3.2.P.5 Finished product specification to be mentioned on Form5F along with prescribed fee.
5.	3.2.P.5 Analytical Method Validation studies was performed by Abbott HealthCare Pvt Ltd, Mumbai, although method has been test method has been transferred from Abbott HealthCare Pvt Ltd, Mumbai to Abbott Karachi Pakistan yet validation studies to be performed at manufacturing site.
6.	3.2.P.8 Provide document for procurement of API with Clearance from DRAP.

Decision 330th meeting: Registration Board deferred the case for submission of reply to the above cited shortcomings

Reply:

Sr.#	Observations	Reply	Remarks
1.	Valid Good Manufacturing Practice (GMP) certificate of the Drug Substance / API manufacturer issued by concerned regulatory authority of country of origin to be provided	Firm has provided copy of GMP certificate No E-2083809/dd/dca/vsp/2023 issued by DCA Andhra Pradesh valid till 21-06-2024	Complied
2.	2.3.R.1.1 Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2. P.8.3. Moreover, clarify stability batch size.	Batch Manufacturing Record (BMR) for all the batches (100,000 tab) of drug product for which stability studies data is provided .	Complied
3.	3.2.S.4 Method used for analysis of API from Finished Product Manufacturer to be provided along with analytical method validation studies.	Method used for analysis of API from Finished Product Manufacturer has been provided API test method yet to be validated in QC laboratory. We ensure to complete this activity before commercial batch release activities for subject product.	Analytical method validation studies of Drug substance yet to be provided
4.	3.2.P.5 Finished product specification to be mentioned on Form5F along with prescribed fee.	Fee of Rs. 7500/- is provided dated for finished product specification to be mentioned on Form5F as “as per innovator specification”	Complied
5.	3.2.P.5 Analytical Method Validation studies was performed by Abbott	The R&D Lab in Abbott Pakistan has tested the	Analytical Method Validation studies of

	HealthCare Pvt Ltd, Mumbai, although method has been test method has been transferred from Abbott HealthCare Pvt Ltd, Mumbai to Abbott Karachi Pakistan yet validation studies to be performed at manufacturing site.	Registration Batches following test method transfer activity, which were assessed to be simple in nature hence test method transfer approach is sufficient at this stage. We ensure to carry out this activity at the time of commercial batch manufacturing and QC testing.	Drug Product to be carried out at manufacturing site i.e Abbott Karachi Pakistan
6.	3.2.P.8 Provide document for procurement of API with Clearance from DRAP.	Firm has provided commercial invoice (No 4017/LP/2021-22) dated 28.02.2022 for Vildagliptin batch No VNFP22013U4 (65Kg) cleared by DRAP (I&E) Karachi 06.01.2022	Complied
7.	3.2.P.8 Stability data including summary data sheet, COA, raw data sheet and chromatograms for 6th month and onward (both accelerated and real time) to be provided.	Stability data including summary data sheet, COA, raw data sheet and chromatograms for 9 months	Complied

Decision 331st meeting: Deferred for following reasons:
API test method to be validated at product manufacturing site i.e M/s Abbott Laboratories Pakistan Ltd, Hyderabad Road Karachi.
Analytical Method Validation studies of Drug Product to be carried out at manufacturing site i.e M/s Abbott Laboratories Pakistan Ltd, Hyderabad Road Karachi.

Reply: Firm has provided Analytical Method Validation studies of Drug Product carried out at manufacturing site i.e M/s Abbott Laboratories Pakistan Ltd, Hyderabad Road Karachi. However Analytical Method Validation studies of API will be submitted shortly

Decision: Approved.

- **Before issuance of registration letter firm will submit analytical method validation study of API carried out by finished product manufacturer at manufacturing site i.e M/s Abbott Laboratories Pakistan Ltd, Hyderabad Road Karachi**
- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application**

Evaluation by PEC (XX):

Sr.#	Observations	Reply	Remarks
1.	Provide updated GMP status of finished product manufacturer.	Firm again submitted copy of GMP certificate of the firm based on inspection dated 11-11-2021.	Updated GMP status is required.
2.	Provide updated GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin	Firm has provided copy of GMP certificate No 22073413 valid till 03/07/2024 issued by Food and Drug Control Administration, Gujrat	
3.	Provide analytical method validation studies of Drug substance from Drug product manufacturer.	Provided	
4.	The product specification includes tests for appearance, identity, assay, related substances, dissolution, uniformity of dosage units, average weight, water content, hardness, friability, breakability, microbial quality As per public assessment report of CBG-MEB (Netherland Medicine Evaluation Board). However, tests like "related substances" and "water content" has not been performed/controlled.	Firm has provided revised finished product specification however water content test has not been mentioned	Water content test to be included in finished product specification along with performance report Along with fee
5.	Justify selection of wavelength (ʎ max) for assay of Drug Product i.e 281nm while Drug substance manufacturer adopted analytical wavelength (ʎ max) as 220nm.	Firm has submitted revised method of analysis wherein ʎ max is mentioned as 220nm.	Fee is required
6.	Perform Analytical method validation study of Drug Product (including linearity and robustness).	Provided	
7.	Provide documents for the procurement of API (21NB0001)with approval from DRAP.	Only license to import is provided	

Decision: Approved.

- **Before issuance of registration letter firm will submit fee of Rs 7500/- on account of pre-registration variation as per S.R.O 496(I)12023 dated 17th April, 2023**
- **Before issuance of registration firm will perform water content test and report will be submitted accordingly.**
- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application**

Date of Initiation	16-04-2022	16-04-2022	16-04-2022
No. of Batches	03		
DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA			

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not applicable
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has provided copy of GMP certificate No 22043267 dated 18/04/2022 issued by Food and Drug Control Administration Gujrat state India valid till 17th April 2025
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Provided copy of commercial invoice (Invoice# Exp/I/21-22/0500 dated 30th November 2021, with received quantity i.e. 0.325Kg) for the purchase of Vonoprazan fumarate from Ami Life Sciences Pvt Ltd and clearance certificate from DRAP dated 30/12/2021 (batch no. VPF30100921)
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Provided
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Provided

Remarks of Assessor:

Sr.#	Observations
	3.2.P.5 Dissolution medium used in USFDA approved formulation VOQUEZNA for evaluation of release profile of vonoprazan tablet was 0.05M acetate buffer (pH 4.5) while dissolution medium used by the firm is 0.1NHCl. .Justification to be provided for selection of dissolution medium.

Reply:
It is submitted that the M/s Wilson's Pharmaceuticals had conducted the dissolution of Vonoprazan tablets 10mg & 20mg Dated April 2022 with 0.1N HCl as mentioned in registration application, whereas the FDA has approved dissolution medium acetate buffer pH 4.5 dated 01-11-2023 for Voquezna Tablet
It is pertinent to mention here that the product vonoprazan fumarate is not a compendial product and its dissolution method was also not available in any Pharmacopoeia as well as in any reference literature at that time. As per literature review the product was equally soluble in all 3 pH mediums i.e.1.2, 4.5 & 6.8.
Due to high release of vonoprazan in all mediums we have selected 0.1N HCl as dissolution medium.

Decision: Approved.

- **Before issuance of registration letter firm will submit revised dissolution method in line with innovator i.e USFDA approved formulation VOQUEZNA.**
- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application**

	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 24 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches:(VPF/30021020, VPF/30031020, VPF/30041020)
	Module-III Drug Product:	The firm has submitted detail of manufacturers, description of manufacturing process and controls, process validation studies, specifications, analytical procedure and validation studies batch analysis and justification of specification, container closure system and stability studies of drug product.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical equivalence was determined against Voniza 20mg tablet by M/s Hilton Pharmaceutical (Lot No 144815) Quality parameters such as identification, dissolution, Content uniformity, DT and assay etc were compared. CDP has been performed against the same brand that is Voniza 20mg tablet by M/s Hilton Pharmaceutical in Acid media (pH 1.0-1.2) in Acetate Buffer (pH 4.5) & Phosphate Buffer (pH 6.8). The values for f1 and f2 are in the acceptable range.
	Analytical method validation/verification of product	Firm has submitted analytical method validation study reports for drug substance as well as drug product.

STABILITY STUDY DATA			
Manufacturer of API	Ami Life Sciences Pvt Ltd Block No 82/B ECP road AT& POST Karakhadi,-391 450 Dist-Vadora Gujrat state India.

Description of Pack (Container closure system)	Alu-Alu Blister packaging		
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	Trial 01	Trial 02	Trial 03
Batch Size	1500 tab	1500 tab	1500 tab

Manufacturing Date	05-2022	05-2022	05-2022
Date of Initiation	30-05-2022	30-05-2022	30-05-2022
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not applicable
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has provided copy of GMP certificate No 22043267 dated 18/04/2022 issued by Food and Drug Control Administration Gujrat state India valid till 17th April 2025
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Provided copy of commercial invoice (Invoice# Exp/I/21-22/0500 dated 30th November 2021, with received quantity i.e. 0.325Kg) for the purchase of Vonoprazan fumarate from Ami Life Sciences Pvt Ltd and clearance certificate from DRAP dated 30/12/2021 (batch no. VPF30100921)
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Provided
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Provided

Remarks of Assessor:

Sr.#	Observations
	3.2.P.5 Dissolution medium used in USFDA approved formulation VOQUEZNA for evaluation of release profile of vonoprazan tablet was 0.05M acetate buffer (pH 4.5) while dissolution medium used by the firm is 0.1NHCl. .Justification to be provided for selection of dissolution medium.

Reply:
It is submitted that the M/s Wilson's Pharmaceuticals had conducted the dissolution of Vonoprazan tablets 10mg & 20mg Dated April 2022 with 0.1N HCl as mentioned in registration application, whereas the FDA has approved dissolution medium acetate buffer pH 4.5 dated 01-11-2023 for Voquezna Tablet
It is pertinent to mention here that the product vonoprazan fumarate is not a compendial product and its dissolution method was also not available in any Pharmacopoeia as well as in any reference literature at that time. As per literature review the product was equally soluble in all 3 pH mediums i.e.1.2, 4.5 & 6.8.
Due to high release of vonoprazan in all mediums we have selected 0.1N HCl as dissolution medium.

Decision: Approved.

- **Before issuance of registration letter firm will submit revised dissolution method in line with innovator i.e USFDA approved formulation VOQUEZNA.**
- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application**

Evaluator PEC-XXI

Agenda Item No. 01:

Priority Applications of Human Drugs (Locally Manufactured) applied on Form - 5F on the basis of Export Facilitation.

The following dossiers have been evaluated reference to the letter No. F.1-6/2019-PR-II (EFD) dated 13th September 2023 from Deputy Director (PR-II/EFD) wherein it has been stated that DRAP Authority in its 133rd meeting held on 13th April 2022, decided to grant registration on priority basis to the pharmaceutical i.e. one molecule for each 100,000 USD worth of export of medicines (to a maximum of 15 such molecules) during a fiscal year. In compliance to the aforementioned decision of the authority, the following firm (M/s Martin Dow Marker Limited, Quetta) have achieved the benchmark of export of more than 100,000 USD during the fiscal year 2022 - 2023 and have submitted their applications for priority consideration in lieu of export facilitation for Registration Board please.

1031.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Martin Dow Marker Limited 7, Jail Road, Quetta.**
	Name, address of Manufacturing site.	M/s Martin Dow Marker Limited 7, Jail Road, Quetta.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	-
	Evidence of approval of manufacturing facility	Firm has submitted copy of Renewal of DML Letter vide No. F. 4-2/86-Lic(Vol-VII)(Pt) dated 17th June 2021, mentioning Tablet (General) Section.
	Status of application	☒ New Drug Product (NDP) ☐ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 9495 dated 10 APR 2023
	Details of fee submitted	PKR 75,000/- Dated 01-03-2023 (Challan / Receipt # 0827478891)
	The proposed proprietary name / brand name	**VERICIGUAT 2.5mg Tablets**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Film-Coated Tablet contains: Vericiguat … 2.5mg (Innovator's Specifications)
	Pharmacotherapeutic Group of (API)	C01DX22, Other vasodilators used in cardiac diseases.
	Pharmaceutical form of applied drug	White to off white color, round, biconvex shaped film coated Tablets.
	Reference to Finished product specifications	Innovator's Specifications

	Proposed Pack size	As per SRO
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	VERQUVO 2.5mg Tablets, USFDA Approved.
	For generic drugs (me-too status)	N/A
	Name and address of API manufacturer.	M/s Nantong Chanyoo Pharmatech Co., Ltd., No.2 Tonghai Si Road, Yangkou Chemical Industrial Park, Rudong Coastal Economic Development Zone, Nantong, Jiangsu, China.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 Months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for **06 Months**.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted pharmaceutical equivalence of their product against VERQUVO 2.5mg Tablets by performing quality tests (Assay and Dissolution). Firm has submitted CDP results of their product against VERQUVO 2.5mg Tablets in 03 dissolution media.
	Analytical method validation/verification of product	Method verification / validation studies have been submitted for drug substance as well as drug product.

STABILITY STUDY DATA			
Manufacturer of API	M/s Nantong Chanyoo Pharmatech Co., Ltd., China.

No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has referred to their product GLUCOVANCE Tablets 1000mg/5mg discussed in 293rd Meeting of Registration Board (6th – 8th January, 2020).
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Enclosed GMP Certificate is not from the concerned Regulatory Authority of Country of Origin and is not verifiable.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Copy of Commercial Invoice No. CYI21312 dated OCT 15, 2021 for import of 1.5Kgs VERICIGUAT, Batch No. PIVCG-2110001, cleared by AD(I&E) DRAP Quetta vide No. 958/DRAP(Q) dated 12-11-2021 has been submitted. **However, enclosed clearance was issued with remarks "Restricted Consumption".**
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record for product testing.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted.

Remarks of Evaluator:
The following deficiencies / shortcomings have been communicated to the firm:

Sr. No.	Observations	Firm's response
i.	Please provide valid approval of API/ DML/GMP Certificate of API manufacturer issued by concerned Regulatory Authority of Country of Origin.	Copy of GMP Certificate issued by Nantong Chemical & Medical Industry Assoication, China. **However, the same cannot be verified since it's not from concerned Regulatory Authority of Country of Origin.**
ii.	Please provide valid GMP status of the firm (FPP Manufacturer).	Copy of GMP Certificate has been submitted based on Inspection conducted on 15th and 16th of January 2024.
iii.	2.3.S.4.4 a) Please provide COA of API Manufacturer for Batch SYVCG-210601.	Submitted
iv.	2.3.S.7.1 a) Please provide information regarding proposed Shelf Life of API / Drug Substance as the completed testing intervals for Long-Term Stability Study is 06 Months.	Firm has submitted **12 Months** (Long Term) Stability Study Data Sheets from API Manufacturer. Moreover, the proposed Shelf Life as per submitted COA of API is also 12 Months.
v.	In Sections 2.3.P.2.1.1 and 3.2.P.2.1.1, it has been mentioned that *'API-Excipient compatibility is not required to be established as evidence is provided (**Takecab 10mg Film Coated Tablet**) that the excipients are present in the comparator product*'. Please clarify.	Firm has submitted that the excipients used are as per Innovator's formulation (Verquvo Tablet) and the product is found physically and chemically stable during stability studies.
vi.	2.3.P.2.2.1 Please provide evidence of Reference / Innovator's Pack used for Pharmaceutical Equivalence and CDP.	Submitted
vii.	2.3.P.5.6 Justification of Specifications, it has been mentioned that ***'Specifications are based on MDM Specifications***', however reference to Finished Pharmaceutical Specifications have been claimed **'As per Innovator's Specs**" in Application Form. Please justify.	Firm has submitted that the specifications are based on **Innovator's specifications.**
viii.	Please provide approval for utilization / consumption of the enclosed Commercial Invoice No. CYI21312 dated OCT 15, 2021 for import of 1.5Kgs VERICIGUAT, Batch No. PIVCG-2110001, cleared by AD(I&E) DRAP Quetta vide No. 958/DRAP(Q) dated 12-11-2021, since the same was issued with remarks "Restricted Consumption".	Firm has submitted copy of said invoice with remarks from AD (I&E), DRAP Quetta as '*Physically verified in the premises, permitted to consume'.*

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**

• **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.** **The firm shall submit GMP of API manufacturer issued by concerned Regulatory Authority of Country of Origin before issuance of registration letter.**

Remarks of Evaluator:
The following deficiencies / shortcomings have been communicated to the firm:

Sr. No.	Observations	Firm's response
i.	Please provide valid approval of API/ DML/GMP Certificate of API manufacturer issued by concerned Regulatory Authority of Country of Origin.	Copy of GMP Certificate issued by Nantong Chemical & Medical Industry Assoication, China. **However, the same cannot be verified since it's not from concerned Regulatory Authority of Country of Origin.**

ii.	Please provide valid GMP status of the firm (FPP Manufacturer).	Copy of GMP Certificate has been submitted based on Inspection conducted on 15th and 16th of January 2024.
iii.	2.3.S.4.4 a) Please provide COA of API Manufacturer for Batch SYVCG-210601.	Submitted
iv.	2.3.S.7.1 a) Please provide information regarding proposed Shelf Life of API / Drug Substance as the completed testing intervals for Long-Term Stability Study is 06 Months.	Firm has submitted **12 Months** (Long Term) Stability Study Data Sheets from API Manufacturer. Moreover, the proposed Shelf Life as per submitted COA of API is also 12 Months.
v.	2.3.P.2.2.1 Please provide evidence of Reference / Innovator's Pack used for Pharmaceutical Equivalence and CDP.	Submitted
vi.	2.3.P.5.6 Justification of Specifications, it has been mentioned that ***'Specifications are based on MDM Specifications***', however reference to Finished Pharmaceutical Specifications have been claimed **'As per Innovator's Specs**" in Application Form. Please justify.	Firm has submitted that the specifications are based on **Innovator's specifications.**
vii.	Please provide approval for utilization / consumption of the enclosed Commercial Invoice No. CYI21312 dated OCT 15, 2021 for import of 1.5Kgs VERICIGUAT, Batch No. PIVCG-2110001, cleared by AD(I&E) DRAP Quetta vide No. 958/DRAP(Q) dated 12-11-2021, since the same was issued with remarks "Restricted Consumption".	Firm has submitted copy of said invoice with remarks from AD (I&E), DRAP Quetta as '*Physically verified in the premises, permitted to consume'.*

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

The firm shall submit GMP of API manufacturer issued by concerned Regulatory Authority of Country of Origin before issuance of registration letter.

Agenda Item No. 02: Deferred Cases of Previous Meetings

1034.	**Name, address of Applicant / Marketing Authorization Holder**	Bio-Labs(Pvt.) Ltd., Plot No. 145, Industrial Triangle Kahuta Road, Islamabad.
	Name, address of Manufacturing site.	Bio-Labs(Pvt.) Ltd., Plot No. 145, Industrial Triangle Kahuta Road, Islamabad.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract

		giver)
	GMP status of the firm	Firm has submitted copy of GMP Certificate dated 28-02-2022 issued based on inspection conducted on 03-08-2021.
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter of grant of section dated 24-03-2007 specifying Tablet (General) section.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 17611 dated 16 JUN 2022
	Details of fee submitted	PKR 30,000/- Dated 03-02-2022 (Challan / Receipt # 6773937439)
	The proposed proprietary name / brand name	**VORTIX 5mg Tablet**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film-coated tablet contains: Vortioxetine HBr eq. to Vortioxetione … 5mg (Innovator's Specification)
	Pharmacotherapeutic Group of (API)	N06AX26, Other antidepressants.
	Pharmaceutical form of applied drug	Round shaped biconvex film coated tablets
	Reference to Finished product specifications	Innovator's Specification
	Proposed Pack size	2 x 7's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	TRINTELLIX Tablet 5mg of TAKEDA PHARMS USA (USFDA Approved).
	For generic drugs (me-too status)	VRONTIL 5mg Tablet of M/s Genix Pharma, Karachi.
	Name and address of API manufacturer.	Lianyungang Jari Pharmaceutical Co. Ltd. Room 1216, Shimao Plaza, Xinbei district, Changzhou, China.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of

		drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 Months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 24 Months. Batches 20140401, 20140402 and 20140403.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted pharmaceutical equivalence of their product against VORNEU Tablet 5mg manufactured by Hilton Pharma (Pvt) Ltd. by performing quality tests (Identification, Assay, Dissolution, and Uniformity of dosage form). Firm has submitted CDP results of their product VORNEU Tablet 5mg manufactured by Hilton Pharma (Pvt) Ltd., in 03 dissolution media.
	Analytical method validation/verification of product	Method verification / validation studies have been submitted for drug substance as well as drug product respectively.

STABILITY STUDY DATA			
Manufacturer of API	Lianyungang Jari Pharmaceutical Co. Ltd., China.

Date of Initiation	20-07-2021	20-07-2021	20-07-2021
No. of Batches	03		
DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA			

1.	Reference of previous approval of applications with stability study data of the firm (if any)	The Firm has referred to their Product Specific Inspection conducted for Empaglif 10mg Tablet (Empagliflozin) & Empaglif 25mg Tablet (Empagliflozin) presented in 296th meeting of Registration Board.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Enclosed GMP is not issued by concerned regulatory authority of country of origin
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of Clearance for Commercial Invoice No. 21YX0033L dated 29.04.2021, cleared by AD (I&E) DRAP, Islamabad on 21-06-2021, specifying 0.3Kg of Vortioxetine Hydrobromide.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record for product testing.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted certificate of 21 CFR compliance for the HPLC system along with audit trail report for product testing.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator:

WARNING: SUICIDAL THOUGHTS AND BEHAVIORS

Antidepressants increased the risk of suicidal thoughts and behavior in pediatric and young adult patients in short-term studies. Closely monitor all antidepressant-treated patients for clinical worsening, and for emergence of suicidal thoughts and behaviours. TRINTELLIX is not approved for use in pediatric patients.

The following observations / shortcomings were communicated to the applicant and their response was received as follows:

Observations / Shortcomings	Response of the applicant
• Please provide evidence of test for 'identification of Polymorphic form' and 'Microbial Contamination' of API by drug substance manufacturer, since the same has not been included in 3.2.S.4.1 Specifications of API Manufacturer.	**The firm has submitted that the same has bee requested from API Manufacturer and will b shared after received from API Manufacturer**
• Please provide evidence of Reference / Innovator's Pack used for Pharmaceutical Equivalence and CDP.	The firm has submitted evidence for VORNE 5mg Tablet B. No. 138718.
• 2.3.P.3.3 The enclosed Manufacturing Process Flow Chart is a general flow for tablet section. Please provide the same specific for manufacturing of applied drug product.	Submitted.
• 3.2.P.8 A 'Significant change' (5% change in assay from its initial value) has occurred between initial and 3 months' testing at the accelerated as well as real time storage conditions of Batch No. VRT 21-075. Please justify.	**The firm has submitted revised stability da summary sheet stating that there was 'Typographic error' in submitted stabili summary sheet, in which result of dissolutio were written in assay.**
• Please provide approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin (i.e. CFDA).	**Not submitted**

• Please provide GMP of applicant (FPP Manufacturer).	Firm has submitted copy of GMP Certificate dated 28-02-2022 issued based on inspection conducted on 03-08-2021 valid till 02-08-2023. Furthermore, the firm has stated that they have applied for renewal of GMP Certificate as well.
• Please provide summary of consumption of material (API) imported v/s consumed for manufacturing of Stability Batches / QC testing of each applied strength.	Submitted

Decision of 331st Meeting:
Registration Board deferred the case for submission of reply to the following shortcomings: -

- **Evidence of test for 'identification of Polymorphic form' and 'Microbial Contamination' of API by drug substance manufacturer, since the same has not been included in 3.2.S.4.1 Specifications of API Manufacturer.**
- **Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin (i.e. CFDA).**
- **Submission of prescribed fee for pre-registration variation as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.**

Remarks of Evaluator: The firm have submitted as follows: -

Shortcomings	Firm's Submission
• Evidence of test for 'identification of Polymorphic form' and 'Microbial Contamination' of API by drug substance manufacturer, since the same has not been included in 3.2.S.4.1 Specifications of API Manufacturer.	Firm has submitted **revised Section 3.2.S.4** (Method of Analysis) specifying Tests for Identification of Crystal Form and Microbial Limits.
• Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin (i.e. CFDA).	Firm has submitted GMP Audit Report, Ref. No. Nil, issued by Lianyungang Drug Administration. **However, the same cannot be verified online.**
• Submission of prescribed fee for pre-registration variation as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.	Firm has submitted Fee of PKR 7,500/- vide Challan No. 27737355316 for VORTIX 5mg Tablets.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

The firm shall submit GMP of API manufacturer issued by concerned Regulatory Authority of Country of Origin before issuance of registration letter.

• Please provide GMP of applicant (FPP Manufacturer).	Firm has submitted copy of GMP Certifica dated 28-02-2022 issued based on inspectio conducted on 03-08-2021 valid till 02-08-202 Furthermore, the firm has stated that they hav applied for renewal of GMP Certificate as wel
• Please provide summary of consumption of material (API) imported v/s consumed for manufacturing of Stability Batches / QC testing of each applied strength.	Submitted

Decision of 331st Meeting:

Registration Board deferred the case for submission of reply to the following shortcomings: -

- **Evidence of test for 'identification of Polymorphic form' and 'Microbial Contamination' of API by drug substance manufacturer, since the same has not been included in 3.2.S.4.1 Specifications of API Manufacturer.**
- **Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin (i.e. CFDA).**
- **Submission of prescribed fee for pre-registration variation as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.**

Remarks of Evaluator: The firm have submitted as follows: -

Shortcomings	Firm's Submission
• Evidence of test for 'identification of Polymorphic form' and 'Microbial Contamination' of API by drug substance manufacturer, since the same has not been included in 3.2.S.4.1 Specifications of API Manufacturer.	Firm has submitted **revised Section 3.2.S.4** (Method of Analysis) specifying Tests for Identification of Crystal Form and Microbial Limits.
• Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin (i.e. CFDA).	Firm has submitted GMP Audit Report, Ref. No. Nil, issued by Lianyungang Drug Administration. **However, the same cannot be verified online.**
• Submission of prescribed fee for pre-registration variation as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.	Firm has submitted Fee of PKR 7,500/- vide Challan No. 4260757861 for VORTIX 15mg Tablets.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

The firm shall submit GMP of API manufacturer issued by concerned Regulatory Authority of Country of Origin before issuance of registration letter.

1037.	**Name, address of Applicant / Marketing Authorization Holder**	Bio-Labs(Pvt.) Ltd., Plot No. 145, Industrial Triangle Kahuta Road, Islamabad.
	Name, address of Manufacturing site.	Bio-Labs(Pvt.) Ltd., Plot No. 145, Industrial Triangle Kahuta Road, Islamabad.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	Firm has submitted copy of GMP Certificate dated 28-02-2022 issued based on inspection conducted on 03-08-2021.
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter of grant of section dated 24-03-2007 specifying Tablet (General) section.

	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 17612 dated 16 JUN 2022
	Details of fee submitted	PKR 30,000/- Dated 03-02-2022 (Challan / Receipt # 50756815)
	The proposed proprietary name / brand name	**VORTIX 20mg Tablet**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film-coated tablet contains: Vortioxetine HBr eq. to Vortioxetione … 20mg (Innovator's Specification)
	Pharmacotherapeutic Group of (API)	N06AX26, Other antidepressants.
	Pharmaceutical form of applied drug	Round shaped biconvex film coated tablets
	Reference to Finished product specifications	Innovator's Specification
	Proposed Pack size	2 x 7's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	TRINTELLIX Tablet 20mg of TAKEDA PHARMS USA (USFDA Approved).
	For generic drugs (me-too status)	VRONTIL 20mg Tablet of M/s Genix Pharma, Karachi
	Name and address of API manufacturer.	Lianyungang Jari Pharmaceutical Co. Ltd. Room 1216, Shimao Plaza, Xinbei district, Changzhou, China.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 Months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for

		24 Months. Batches 20140401, 20140402 and 20140403.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted pharmaceutical equivalence of their product against VORNEU Tablet 20mg manufactured by Hilton Pharma (Pvt) Ltd. by performing quality tests (Identification, Assay, Dissolution, and Uniformity of dosage form). Firm has submitted CDP results of their product VORNEU Tablet 20mg manufactured by Hilton Pharma (Pvt) Ltd., in 03 dissolution media.
	Analytical method validation/verification of product	Method verification / validation studies have been submitted for drug substance as well as drug product respectively.

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	The Firm has referred to their Product Specific Inspection conducted for Empaglif 10mg Tablet (Empagliflozin) & Empaglif 25mg Tablet (Empagliflozin) presented in 296th meeting of Registration Board.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Enclosed GMP is not issued by concerned regulatory authority of country of origin

3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of Clearance for Commercial Invoice No. 21YX0033L dated 29.04.2021, cleared by AD (I&E) DRAP, Islamabad on 21-06-2021, specifying 0.3Kg of Vortioxetine Hydrobromide.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record for product testing.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted certificate of 21 CFR compliance for the HPLC system along with audit trail report for product testing.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator:

WARNING: SUICIDAL THOUGHTS AND BEHAVIORS

Antidepressants increased the risk of suicidal thoughts and behavior in pediatric and young adult patients in short-term studies. Closely monitor all antidepressant-treated patients for clinical worsening, and for emergence of suicidal thoughts and behaviours. TRINTELLIX is not approved for use in pediatric patients.

The following observations / shortcomings were communicated to the applicant and their response was received as follows:

Observations / Shortcomings	Response of the applicant
• Please provide evidence of test for 'identification of Polymorphic form' and 'Microbial Contamination' of API by drug substance manufacturer, since the same has not been included in 3.2.S.4.1 Specifications of API Manufacturer.	**The firm has submitted that the same has bee requested from API Manufacturer and will b shared after received from API Manufacturer**
• Please provide evidence of Reference / Innovator's Pack used for Pharmaceutical Equivalence and CDP.	The firm has submitted evidence for VORNE 20mg Tablet B. No. 138698.
• 2.3.P.3.3 The enclosed Manufacturing Process Flow Chart is a general flow for tablet section. Please provide the same specific for manufacturing of applied drug product.	Submitted.
• Please provide approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin (i.e. CFDA).	**Not submitted**
• Please provide GMP of applicant (FPP Manufacturer).	Firm has submitted copy of GMP Certifica dated 28-02-2022 issued based on inspectio conducted on 03-08-2021 valid till 02-08-202 Furthermore, the firm has stated that they hav applied for renewal of GMP Certificate as wel
• Please provide summary of consumption of material (API) imported v/s consumed for manufacturing of Stability Batches / QC testing of each applied strength.	Submitted

Decision of 331st Meeting:

Registration Board deferred the case for submission of reply to the following shortcomings: -

- **Evidence of test for 'identification of Polymorphic form' and 'Microbial Contamination' of API by drug substance manufacturer, since the same has not been included in 3.2.S.4.1 Specifications of API Manufacturer.**

1.	Reference of previous approval of applications with stability study data of the firm (if any).	Nil

2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. ZJ20190145 issued by China Food & Drugs Administration is submitted.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Copy of Commercial Invoice No. 2020APE4256 dated 13 April 2020 is submitted. However approval from DRAP is not submitted.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator:

The following deficiencies / shortcomings have been communicated to the firm: -

i. Latest GMP Inspection Report (not older than 03 years) is required.

ii. In Analytical Procedure for Levomark 250mg Film Coated Tablet (Document # SAP-106), under test for Dissolution, Medium has been mentioned as 0.1N HCl as well as 0.01N HCl. Clarification is required.

iii. In Stability Study Protocol for Levomark 250mg Film Coated Tablet (Document # SSP-024), the Objective has been stated as "to carry out stability of Levomark 250mg film coated Tablet (Loratadine)". Clarification is required.

iv. Evidence of approval from DRAP (concerned Assistant Director I&E) for procurement of Levofloxacin hemihydrate, API Lot No. KY-LFA-M20190968E is required.

v. Trial Batches were manufactured and placed on Stability in April 2020, however the application for Registration has been filed in February 2023 (with 06 Months Stability Data). Reason for delayed submission is sought.

Decision of 327th Meeting:
Registration Board deferred the case for submission of reply to the above cited shortcomings.

Remarks of Evaluator: The firm has submitted as follows:

Shortcomings	Firm's Submission
Latest GMP Inspection Report (not older than 03 years) is required.	Copy of GMP Certificate No. 38/2023-DRAP(AD-27101426183-965) dated 06-04-2023 valid for 03 years from the date of inspection (28-03-2023) has been submitted.
In Analytical Procedure for Levomark 250mg Film Coated Tablet (Document # SAP-106), under test for Dissolution, Medium has been mentioned as 0.1N HCl as well as 0.01N HCl. Clarification is required.	**Typographic Mistake. Firm has submitted revised Analytical Procedure for dissolution mentioning 0.1N HCl Medium.**
In Stability Study Protocol for Levomark 250mg Film Coated Tablet (Document # SSP-024), the Objective has	**Typographic Mistake. Firm has submitted revised Objective of Stability Study Protocol.**

been stated as "to carry out stability of Levomark 250mg film coated Tablet (Loratadine)". Clarification is required.	
Evidence of approval from DRAP (concerned Assistant Director I&E) for procurement of Levofloxacin hemihydrate, API Lot No. KY-LFA-M20190968E is required.	Firm has submitted copy of Letter from AD(I&E) Lahore (Ref. No. 17133/2019/DRAP-AD-CD(I&E) dated 26-12-2019) for Permission to Import APIs, mentioning 3.805 Kgs Levofloxacin Hemihydrate.
Trial Batches were manufactured and placed on Stability in April 2020, however the application for Registration has been filed in February 2023 (with 06 Months Stability Data). Reason for delayed submission is sought	Firm has submitted that ***"dossier of Levomark 250mg film coated tablet was initially submitted to DRAP in January 2021 but unfortunately the file was misplaced and receiving was also lost from our regulatory staff".*** **However, no supporting evidence regarding above claim has been submitted.**

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

The firm shall submit full Fee for pre-registration corrections / Typographical Mistakes before issuance of registration letter.

1.	Reference of previous approval of applications with stability study data of the firm (if any).	The firm has referred to their Inspection of Canazin 100mg & 300mg Tablets (Canagliflozin) conducted on 14th March, 2019 and discussed and approved in 289th meeting of Registration Board held on 14th – 16th May, 2019.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP Certificate No. GD20180909 issued by China Food and Drug Administration valid till 05/12/2023 has been submitted.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Copy of Invoice No. CESU210802JZ dated 02-08-2021 cleared on 11/08/2021 by AD (I&E) DRAP Karachi for 200Kgs of Cefoperazone

		Sodium and Sulbactum Sodium (1:1) has been submitted.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted.

Remarks of Evaluator:

The deficiencies / shortcomings were communicated to the firm and their response is received as follows: -

Sr. No.	Deficiencies / shortcomings communicated	Response of the Firm
i.	In 1.5.10 Dosage form of applied drug, b) Description of Dosage Form, it is mentioned as "A white to yellowish orange, sterile crystalline powder, filled and sealed in 20ml clear glass vial with Red color plastic flip off seal". However, the same has been mentioned as "A white to off-white sterile crystalline powder, filled and sealed in 8ml clear glass vial with blue color plastic flip off seal in rest of the dossier". Please clarify	The firm have submitted revised section 1.5.10 Dosage form of applied drug, b) Description of Dosage Form as "A white to off-white sterile crystalline powder, filled and sealed in 8ml clear glass vial with blue color plastic flip off seal in rest of the dossier".
ii.	In 2.3.S.4 Control of the Drug Substance, 2.3.S.4.1 (a) Drug Substance specifications of the Drug Product Manufacturer, the standard specification and reference number has been mentioned as "USP 43" whereas the Tests are conducted as per "In-House" Specifications. Please clarify	The firm have submitted revised section 2.3.S.4 Control of the Drug Substance, 2.3.S.4.1 (a) Drug Substance specifications of the Drug Product Manufacturer as "In-House".
iii.	In 2.3.S.4.5 Justification of Specifications, it is stated that "Cefoperazone sodium and Sulbactum sodium being In-House product is analysed as per Manufacturers Specifications", however the official monograph of Cefoperazone Sodium and Sulbactam Sodium for Injection is present in Japanese Pharmacopoeia. Please justify the reason for not adopting the same	The firm have submitted that the product mentioned in Japanese Pharmacopeia Monograph is freeze lyophilized solution while they are manufacturing product by direct filling of powder aseptically into final container hence both are considered as different products and have different product specifications.
iv.	In 2.3.P.5.4 Batch Analysis, a) Description of the Batches, date of Manufacturing of Batch "TR-3/PB 500mg Inj" is mentioned as "12 – 2019". Please clarify	The firm have submitted revised section 2.3.P.5.4 Batch Analysis, a) Description of the Batches, date of Manufacturing of Batch "TR-3/PB 500mg Inj" as "10 – 2021".
v.	Pharmaceutical Equivalence have been established against "2Sum 500mg Injection by M/s Healthtek (Pvt.) Ltd". Please justify the reason for not establishing the same against Reference / Innovator / Originator Product	The firm have submitted that the innovator Product Magnex 500mg Injection (Cefoperazone + Sulbactum) by Pfizer (Japan) was not available in Pakistan hence they have established Pharmaceutical Equivalence against

		"2Sum 500mg Injection by M/s Healthtek (Pvt.) Ltd".

Decision of 329th Meeting:
Registration Board Referred to Expert Working Group for the review of specifications Cefoperazone Sodium & Sulbactam Sodium for Injection (JP Specifications).
- **Registration Board further decided that firm shall submit full fee of registration for revision of the data submitted in registration application before issuance of Registration letter.**

Remarks of Evaluator: The firm has submitted as follows:-

Shortcomings	Firm's Submission
Registration Board Referred to Expert Working Group for the review of specifications Cefoperazone Sodium & Sulbactam Sodium for Injection (JP Specifications).	Firm has requested to approve their product PARABAC 500mg Injection as per **Innovator's Specifications** while referring to "**Case No. 5 Cefoperazone Sodium & Sulbactam Sodium for Injection (JP Specifications)" of 329th Meeting of Registration Board**, wherein it was decided as under: - **"Decision: Registration Board while considering the above presented information noted the fact that JP monograph of "Cefoperazoene + Sulbactam dry powder for injection" is particular for the drug product manufactured by way of "Freeze-dried (Lyophilized) from solutions in final container while the products being manufactured by using "ready to fill" powder may have different quality profile hence after thorough deliberation, Board decided as under:** **i. Registration applications of "Cefoperazoene + Sulbactam dry powder for injection" may be approved either with Innovator's specifications or Japanese Pharmacopoeia specifications, as per the submission of the applicant.** **ii. Registration applications in instant meeting may also be decided accordingly."**
Registration Board further decided that firm shall submit full fee of registration for revision of the data submitted in registration application before issuance of Registration letter.	**Firm has submitted PKR 30,000/- vide Challan No. 4320879352 as Fee for revised data submission.**

Decision: Approved as per Innovator's Specification.

• **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.** • **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

		CBPI00718C	Sep. 2018

Remarks of Evaluator:
The following deficiencies / shortcomings have been communicated to the firm: -

i. The Firm has submitted **Scanned Copy** of legalized & notarized CoPP Certificate No. 4429584/TS/2023 dated 08-08-2023 issued by Drugs Control Administration, Telangana State for Carboplatin Concentrate for Solution for Infusion BP 450mg/45ml (CARBO SPAL-L 450), valid up to 05/10/2025. **Please provide Original legalized & notarized document for the same.**

ii. Finished product specifications have been claimed as "BP" whereas in section 3.2.P.2.1 Specifications No. FPIN018-S-02, Effective 30-04-2021, Reference for Identification, Assay and Related Substances by HPLC has been claimed as "In-House". Please justify.

iii. Firm has submitted **Photocopy** of notarized 'Authorization Letter' issued by M/s SP Accure Labs Private Limited. **Please provide Original notarized document for the same.**

iv. **"Annex 1"** claimed to be enclosed with above 'Authorization Letter' has not been submitted in application dossier.

v. The name of firm as mentioned on 'Authorization Letter' and information provided by FPP Manufacturer throughout the application dossier states its name as "**M/s SP Accure Labs Private Limited".** However, the name of FPP Manufacturer as evident from documents issued by Regulatory Authority of country of origin specifies it as **M/s SPAL Private Limited.** Please justify / provide supporting documents for change of name to 'M/s SP Accure Labs Private Limited' issued by concerned authorities.

vi. The label claim has been mentioned throughout the application dossier as "Each **ml Vial** contains…", whereas the proposed pack size is **45ml Vial**. Please justify.

Decision of 333rd Meeting: Deferred for submission of reply to above cited shortcomings.

Remarks of Evaluator: The firm has submitted as follows:

Shortcomings	Firm's Submission
The Firm has submitted **Scanned Copy** of legalized & notarized CoPP Certificate No. 4429584/TS/2023 dated 08-08-2023 issued by Drugs Control Administration, Telangana State for Carboplatin Concentrate for Solution for Infusion BP 450mg/45ml (CARBO SPAL-L 450), valid up to 05/10/2025. **Please provide Original legalized & notarized document for the same.**	**Scanned Copy has been submitted again.**
Finished product specifications have been claimed as "BP" whereas in section 3.2.P.2.1 Specifications No. FPIN018-S-02, Effective 30-04-2021, Reference for Identification, Assay and Related Substances by HPLC has been claimed as "In-House". Please justify.	Firm has submitted that all the tests of BP have been included in Finished Product Specifications with **Additional In-house Testing Specs.**
Firm has submitted **Photocopy** of notarized 'Authorization Letter' issued by M/s SP Accure Labs Private Limited. **Please provide Original notarized document for the same.**	**Scanned Copy has been submitted again.**

"Annex 1" claimed to be enclosed with above 'Authorization Letter' has not been submitted in application dossier.	**Scanned Copy has been submitted.**
The name of firm as mentioned on 'Authorization Letter' and information provided by FPP Manufacturer throughout the application dossier states its name as "**M/s SP Accure Labs Private Limited".** However, the name of FPP Manufacturer as evident from documents issued by Regulatory Authority of country of origin specifies it as **M/s SPAL Private Limited.** Please justify / provide supporting documents for change of name to 'M/s SP Accure Labs Private Limited' issued by concerned authorities.	Firm has submitted **a Photocopy of Letter** vide No. L.Dis.No. 22156/E(M)/TS/2017 dated 8/11/2017 from Drug Control Administration, Telangana, **stating that the company name (SP Accure Labs Pvt. Ltd and SPAL Private Limited) is one and the same. Further stating full form of SPAL is SP Accure Labs**.
The label claim has been mentioned throughout the application dossier as "Each **ml Vial** contains…", whereas the proposed pack size is **45ml Vial**. Please justify.	Firm has mentioned Label Claim as: **Each mL vial contains:** Carboplatin … 10mg (BP Specs) **While our claimed vial is 45mL (total filled volume in 1's vial).**

Decision: Approved as per Policy for inspection of Manufacturer abroad.

The firm shall submit the following before issuance of registration letter: -

- **Fee for pre-registration correction of Label Claim as:**
  Each 45mL vial contains:
  Carboplatin … 10mg
  (BP Specs)

- **Original Notarized Certificate of Pharmaceutical Product (CoPP).**
- **Original Notarized Letter of Authorization (LoA).**

	Name, address of Manufacturing site.	M/s Next Pharmaceutical Products (Pvt.) Ltd. Plot No. 44 A-B, Sunder Industrial Estate, Lahore.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Application Form Dy. No / Tracking ID & date of submission	Form 5F: Dy. No. 36502 dated 15 DEC 2022
	Details of fee submitted	PKR 30,000/- dated 10-11-2022 Challan / Receipt # 0318977794
	The proposed proprietary name / brand name	**ERASTU 5/100mg Tablet**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated Tablet contains: Ertugliflozin (as L-Pyroglutamic acid) … 5mg Sitagliptin (as Phosphate Monohydrate) … 100mg

	Pharmacotherapeutic Group of (API)	A10BD24, blood glucose lowering drugs, excl. insulins, combinations of oral blood glucose lowering drugs.
	Reference to Finished product specifications	Innovator's Specifications
	The status in reference regulatory authorities	STEGLUJAN Tablet 5/100mg (EMA Approved).
	For generic drugs (me-too status)	ERTUVIA-S Tablets 5/100mg of M/s Ferozsons Laboratories Ltd.
	Proposed Pack size	As per SRO
	Proposed unit price	As per SRO

Evaluation by PEC (XXI):

- **Ertugliflozin L-Pyroglutamic acid**: Please provide approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin. Liaoning Fuxin Management Committee for Fluoride Industrial Development Zone is not the concerned regulatory authority of country of origin.
- **Sitagliptin Phosphate Monohydrate:** Please provide approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin. Medical and Chemical Industry Association is not the concerned regulatory authority of country of origin.
- 3.2.S.7 **Sitagliptin Phosphate Monohydrate:** Real Time Stability Study Data have been submitted for 06 Months only whereas claimed Shelf Life of API, as evident from submitted COA, is 03 Years. Please justify / provide complete data as per claimed shelf life.
- The Supporting Data of Pharmaceutical Equivalence and CDP in section 3.2.P.2.2.1 as well as Analytical Method Validation in section 3.2.P.5.3 and Stability Studies Data in section 3.2.P.8 has been submitted for "**ErtuSita 5-100mg Tablet**" whereas application dossier has been submitted for "ERASTU 5/100mg Tablet". Please clarify.
- 3.2.P.8 Please provide Stability Study Data along with attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc., for **06th Month Testing Interval** of all 03 Trials.

Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings.

Agenda of Evaluator PEC-XXIII

Case no. 01 Registration applications of categories to be considered on priority

b. Export facilitation

DD (PRV/EFD) vide letter No. F.1-6/2019-PR-I (EFD) dated 26-05-2023 has informed that M/s Scilife Pharma Pvt Ltd, Plot No. FD-57/58-A2, Korangi Creek Industrial Park, Karachi has achieved benchmark of USD 100,000 during fiscal year 2021-2022 and requested for priority consideration of following molecules:

1058.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Scilife Pharma Pvt Ltd. Plot No. FD-57/58-A2, Korangi Creek Industrial Park, Karachi**
	Name, address of Manufacturing site.	M/s Scilife Pharma Pvt Ltd. Plot No. FD-57/58-A2, Korangi Creek Industrial Park, Karachi
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)

	GMP status of the firm	Firm has submitted copy of GMP Certificate No. 29/2021-DRAP(K) issued on the basis of inspection conducted on 01-03-2021.
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter of renewal of DML dated 18-06-2021 specifying Tablet (General) section.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy.No 29611 dated 18-10-2022.
	Details of fee submitted	PKR 30,000/- Deposit Slip No. 73155335581
	The proposed proprietary name / brand name	**TUGLIF 5mg Tablet**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Film Coated Tablet Contains: Ertugliflozin as Ertugliflozin L-Pyroglutamic Acid…5mg
	Pharmacotherapeutic Group of (API)	Blood glucose lowering drugs, excluding insulins, sodium-glucose co-transporter 2 (SGLT2) inhibitors
	Pharmaceutical form of applied drug	Round film coated tablet plain from both sides
	Reference to Finished product specifications	Manufacturer's Specifications
	Proposed Pack size	10's, 14's, 28's, 30's
	Proposed unit price	As per Drug Pricing Committee (DPC)/SRO
	The status in reference regulatory authorities	Steglatro Tablet 5mg (USFDA, TGA Australia Approved)
	For generic drugs (me-too status)	Ertuget Tablet 5mg of M/s Getz Pharma Pvt Ltd, (Reg.No. 110368) & Ertuvia Tablet 5mg of M/s Ferozsons Laboratories, Ltd. (Reg.No. 110362)
	Name and address of API manufacturer.	Fuxin Long Rui Pharmaceutical Co. Ltd. Fluoride Industrial Park, Fumeng County (Yi Ma Tu, Fuxin City, Liaoning Province 123000, P.R. China.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturer, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturer, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers,

		description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted pharmaceutical equivalence of their product against the comparator product Ertuvia Tablet 5mg of M/s Ferozsons Laboratories, Ltd. (Reg.No. 110362). Firm has submitted CDP results of their product against the comparator product Ertuvia Tablet 5mg in 3 dissolution medias. The value for similarity factor is in the acceptable range.
	Analytical method validation/verification of product	Firm has submitted analytical method validation study reports for drug product.

STABILITY STUDY DATA

Manufacturer of API	Fuxin Long Rui Pharmaceutical Co. Ltd. Fluoride Industrial Park, Fumeng County (Yi Ma Tu, Fuxin City, Liaoning Province 123000, P.R. China.		
API Lot No.	L-IG-20211005-D01-IG06-03		
Description of Pack (Container closure system)	Alu-Alu Blister		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 75% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	007B22	008B22	009B22
Batch Size	5000 Tablet	5000 Tablet	5000 Tablet
Manufacturing Date	01-2022	01-2022	01-2022
Date of Initiation	02-02-2022	02-02-2022	02-02-2022
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Product Specific Inspection of the firm was conducted for Tablets Glusimet XR 50/500mg and Tablets

		Glusimet XR 50/1000mg, for which the inspection was conducted on 16-07-2020 and the report was presented in 296th meeting of Registration Board. The report confirms following points: i. The HPLC software is 21CFR compliant. ii. Firm has demonstrated audit trail reports of testing.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of License No. 20150233 valid till 17-11-2027
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice cleared on 01-12-2021 specifying import of 1kg of Ertugliflozin L-Pyroglutamic Acid. The invoice is cleared by AD (I&E) DRAP, Karachi.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record for product testing.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted certificate of 21 CFR compliance for the HPLC system along with audit trail report for product testing.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator[xxiii]:

Sr. No.	Sections	Observations/Deficiencies/ Short-comings	Reply of applicant
1.	**1.6.5**	Valid Drug Manufacturing License issued by the relevant regulatory authority of country of origin or Valid Good Manufacturing Practice (GMP) certificate of the Drug Substance manufacturer issued by relevant regulatory authority of country of origin or CEP certificate shall be submitted as the already submitted GMP certificate of drug substance manufacturer was valid till 23-08-2023 and cannot be verified from database of country of origin.	Firm has submitted copy of API manufacturer's License No. 20150233 valid till 17-11-2027 issued by Liaoning Provincial Food and Drug Administration.
2.	**2.3.R.1.1**	Copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3 shall be submitted.	Submitted.
3.	**3.2.S.4.3**	Raw data and chromatograms for analytical method verification and analytical method verification protocol of raw material by drug product manufacturer shall be submitted.	Submitted.
4.	**3.2.S.7**	Long term stability studies of the Drug substance shall be submitted as per Zone-IVa conditions.	Submitted.
5.	**3.2.P.2.2.1 & 3.2.P.5**	Justification shall be submitted regarding the acceptance criteria of disintegration test i.e. NMT 30 minutes in the light of review literature of innovator brand approved in TGA/USFDA since the review report of innovator brand reveals that disintegration limits for the	Disintegration time limit has been revised in the light of review literature of innovator brand.

		reference product shall be more stringent than those given in European Pharmacopeia for coated tablets.	

Decision: Approved.
• Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.
• Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.
Registration Board further decided that registration letter will be issued after submission of following:
Fee of PKR7500/- for revision of specifications as per notification No.496(I)/2023 dated 17-04-2023.

1059.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Scilife Pharma Pvt Ltd.** **Plot No. FD-57/58-A2, Korangi Creek Industrial Park, Karachi**

Remarks of Evaluator[xxiii]:

Sr. No.	Sections	Observations/Deficiencies/ Short-comings	Reply of applicant
1.	**1.6.5**	Valid Drug Manufacturing License issued by the relevant regulatory authority of country of origin or Valid Good Manufacturing Practice (GMP) certificate of the Drug Substance manufacturer issued by relevant regulatory authority of country of origin or CEP certificate shall be submitted as the already submitted GMP certificate of Ertugliflozin LPGA drug substance manufacturer was valid till 23-08-2023 and cannot be verified from database of country of origin.	Copy of valid DML submitted.
2.	**2.3.R.1.1**	Copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3 shall be submitted.	Submitted
3.	**3.2.S.4.3**	Analytical method verification protocol, report and supportive data (including chromatograms) for both raw materials by drug product manufacturer shall be submitted, as the already submitted report is for finished drug instead of raw materials.	Submitted

4.	**3.2.S.7**	Long term stability studies of both drug substances shall be submitted as per Zone-IVa conditions.	Submitted
5.	**3.2.P.2.2.1 & 3.2.P.5**	Justification shall be submitted regarding the acceptance criteria of disintegration test i.e. NMT 30 minutes in the light of review literature of innovator brand approved in TGA/USFDA since the review report of innovator brand reveals that disintegration limits for the reference product shall be more stringent than those given in European Pharmacopeia for coated tablets.	Current specifications meet pharmacopoeia requirement however, for stringent limit, the specifications are revised.
6.	**3.2.P.8**	Documents for the procurement of Sitagliptin API with approval from DRAP shall be submitted.	Submitted.
7.	**3.2.P.8**	Justify the difference in batch size of stability batches.	Applicant has submitted following justification: "As per the Guidance Document for Submission of Application on Form 5-F (CTD) for Registration of Pharmaceutical Drug Products for Human Use one of the criteria for selection of size of batches for OSDs is 5000 units following which we have manufactured our first trial batch on 5000 units However, keeping in consideration that we have a diversity of products containing Ertugliflozin ie. Tuglif Tablet range, Tuglif-M Tablet range & Tuglif-S Tablet range we have reduced the batch size of 2 batches to 3000 units after complete calculation that it would be sufficient enough to perform complete testing till the claimed shelf life However, based on the query raised on subject product, we assure to keep it similar in future product developments."
8.	**3.2.P.8**	Record of Digital data logger for temperature and *humidity monitoring* of stability chambers (real time and accelerated) shall be provided for the at least 6 months during the course of stability studies.	Submitted.

Decision: Approved.

• Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application. **• Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.** **Registration Board further decided that registration letter will be issued after submission of following:** **Fee of PKR7500/- for revision of specifications as per notification No.496(I)/2023 dated 17-04-2023.**		
1061.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Scilife Pharma Pvt Ltd.** **Plot No. FD-57/58-A2, Korangi Creek Industrial Park, Karachi**

	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	Firm has submitted copy of GMP Certificate No. 29/2021-DRAP(K) issued on the basis of inspection conducted on 01-03-2021.
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter of renewal of DML dated 18-06-2021 specifying Tablet (General) section.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy.No 34701 dated 30-11-2022.
	Details of fee submitted	PKR 30,000/- Deposit Slip No. 6330474107
	The proposed proprietary name / brand name	**TUGLIF-S 15/100mg Tablet**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Film Coated Tablet Contains: Ertugliflozin as Ertugliflozin L-Pyroglutamic Acid…15mg Sitagliptin Phosphate Monohydrate as Sitagliptin…100mg
	Pharmacotherapeutic Group of (API)	Blood glucose lowering drugs, excluding insulins, Combinations of oral blood glucose lowering drugs
	Pharmaceutical form of applied drug	Round film coated tablet plain from both sides
	Reference to Finished product specifications	Innovator's Specifications
	Proposed Pack size	7's, 14's, 28's & 30's
	Proposed unit price	As per Drug Pricing Committee (DPC)/SRO
	The status in reference regulatory authorities	Steglujan Tablet 15/100mg (USFDA Approved)
	For generic drugs (me-too status)	Trevia R2 Tablet 15/100mg of M/s Getz Pharma Pvt Ltd (Reg. No. 110367)
	Name and address of API manufacturer.	Ertugliflozin: Fuxin Long Rui Pharmaceutical Co. Ltd. Fluoride Industrial Park, Fumeng County (Yi Ma Tu, Fuxin City, Liaoning Province 123000, P.R. China.

		Sitagliptin: Fuxin Long Rui Pharmaceutical Co. Ltd. Fluoride Industrial Park, Fumeng County (Yi Ma Tu, Fuxin City, Liaoning Province 123000, P.R. China.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturer, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substances. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturer, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Ertugliflozin LPGA: Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 36 months. Sitagliptin Phosphate Monohydrate: Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.

	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted pharmaceutical equivalence of their product against the comparator product Trevia R2 Tablet 15/100mg of M/s Getz Pharma Pvt Ltd (Reg. No. 110367). Firm has submitted CDP results of their product against the comparator product Trevia R2 Tablet 15/100mg in 3 dissolution medias. The value for similarity factor is in the acceptable range.
	Analytical method validation/verification of product	Firm has submitted analytical method validation study reports for drug product.

STABILITY STUDY DATA

Manufacturer of API	Fuxin Long Rui Pharmaceutical Co. Ltd. Fluoride Industrial Park, Fumeng County (Yi Ma Tu, Fuxin City, Liaoning Province 123000, P.R. China.		
API Lot No.	Ertugliflozin LPGA: L-IG-20211005-D01-IG06-03 Sitagliptin: H-GWC-20201223-D04-GWC04-11		
Description of Pack (Container closure system)	Alu-Alu Blister		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)

Batch Size	5000 Tablet	3000 Tablet	3000 Tablet
Manufacturing Date	02-2022	02-2022	02-2022
Date of Initiation	24-03-2022	24-03-2022	24-03-2022
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Product Specific Inspection of the firm was conducted for Tablets Glusimet XR 50/500mg and Tablets Glusimet XR 50/1000mg, for which the inspection was conducted on 16-07-2020 and the report was presented in 296th meeting of Registration Board. The report confirms following points: iii. The HPLC software is 21CFR compliant. iv. Firm has demonstrated audit trail reports of testing.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of License No. 20150233 valid till 17-11-2027
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice cleared on 01-12-2021 specifying import of 1kg of Ertugliflozin L-Pyroglutamic Acid. The invoice is cleared by AD (I&E) DRAP, Karachi. Sitagliptin Phosphate Monohydrate: Firm has submitted copy of commercial invoice cleared on 16-06-2021 specifying import of 200kg of

		Sitagliptin Phosphate Monohydrate. The invoice is cleared by AD (I&E) DRAP, Karachi.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record for product testing.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted certificate of 21 CFR compliance for the HPLC system along with audit trail report for product testing.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator[xxiii]:

Sr. No.	Sections	Observations/Deficiencies/ Short-comings	Reply of applicant
1.	**1.6.5**	Valid Drug Manufacturing License issued by the relevant regulatory authority of country of origin or Valid Good Manufacturing Practice (GMP) certificate of the Drug Substance manufacturer issued by relevant regulatory authority of country of origin or CEP certificate shall be submitted as the already submitted GMP certificate of Ertugliflozin LPGA drug substance manufacturer was valid till 23-08-2023 and cannot be verified from database of country of origin.	Copy of valid DML submitted.
2.	**2.3.R.1.1**	Copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3 shall be submitted.	Submitted
3.	**3.2.S.4.3**	Analytical method verification protocol, report and supportive data (including chromatograms) for both raw materials by drug product manufacturer shall be submitted, as the already submitted report is for finished drug instead of raw materials.	Submitted
4.	**3.2.S.7**	Long term stability studies of both drug substances shall be submitted as per Zone-IVa conditions.	Submitted
5.	**3.2.P.2.2.1 & 3.2.P.5**	Justification shall be submitted regarding the acceptance criteria of disintegration test i.e. NMT 30 minutes in the light of review literature of innovator brand approved in TGA/USFDA since the review report of innovator brand reveals that disintegration limits for the reference product shall be more stringent than those given in European Pharmacopeia for coated tablets.	Current specifications meet pharmacopoeia requirement however, for stringent limit, the specifications are revised.
6.	**3.2.P.8**	Documents for the procurement of Sitagliptin API with approval from DRAP shall be submitted.	Submitted.
7.	**3.2.P.8**	Justify the difference in batch size of stability batches.	Applicant has submitted following justification: "As per the Guidance Document for Submission of Application on Form 5-

				F (CTD) for Registration of Pharmaceutical Drug Products for Human Use one of the criteria for selection of size of batches for OSDs is 5000 units following which we have manufactured our first trial batch on 5000 units However, keeping in consideration that we have a diversity of products containing Ertugliflozin ie. Tuglif Tablet range, Tuglif-M Tablet range & Tuglif-S Tablet range we have reduced the batch size of 2 batches to 3000 units after complete calculation that it would be sufficient enough to perform complete testing till the claimed shelf life However, based on the query raised on subject product, we assure to keep it similar in future product developments."
	8.	**3.2.P.8**	Record of Digital data logger for temperature and *humidity monitoring* of stability chambers (real time and accelerated) shall be provided for the at least 6 months during the course of stability studies.	Submitted.

Decision: Approved.
• Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.
• Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.
Registration Board further decided that registration letter will be issued after submission of following:
Fee of PKR7500/- for revision of specifications as per notification No.496(I)/2023 dated 17-04-2023.

c. Import applications of priority categories defined by Registration Board in its 257th meeting

i. Human (Form5F)

1062.	**Name, address of Applicant / Importer**	**M/s Revive Healthcare, Office 503, 5th Floor, 6 Main Gulberg Jail Road, Lahore.**

		Medchal-Malkagiri District, Telangana State- 500101, India.
	Name, address of manufacturer(s)	**M/s SPAL Pvt, Ltd,** Plot No. 12, Biotech Park, Phase-II, Laalgadi Malakpet (V), Shamirpet (M), Medchal-Malkagiri District, Telangana State- 500101, India.
	Name of exporting country	India
	Detail of certificates attached (CoPP, Free sale certificate, GMP certificate)	**CoPP:** Firm has submitted copy of legalized CoPP certificate (No. 2858071/TS/2022) dated 06-05-2022 issued by Drugs Control Administration, Vengalraonagar, Hyderabad, India for BSLF SPAL-L 60 Injection. The CoPP confirms free sale status of the product in exporting country as well as GMP status of the manufacturing site through periodic inspection every 01 year. Validity of the CoPP is till 22-06-2024. **The name of importing country on CoPP is mentioned as Pakistan.** **GMP certificate:** Firm has submitted copy of legalized **GMP** certificate (L.Dis.No.44736/STORES/2021) dated 30-01-2021 issued by Drugs Control Administration, Government of Telangana, Hyderabad, India in name of M/s SPAL Pvt, Ltd, Plot No. 12, Biotech Park, Phase-II, Laalgadi Malakpet (V), Shamirpet (M), Medchal-Malkagiri District, Telangana State-500101. The certificate is valid for three years from the date of issue in respect of four products.
	Details of letter of authorization / sole agency agreement	Firm has submitted copy of notarized Authorization letter from M/s SP Accure Labs Pvt Ltd Plot No. 12, Biotech Park, Phase-II, Laalgadi Malakpet (V), Shamirpet (M), Medchal-Malkagiri District, Telangana State- 500101, India which authorises M/s Revive Healthcare, Office 503, 5th Floor, 6 Main Gulberg Jail Road, Lahore as exclusive distributor for products manufactured by M/s SP Accure Labs Pvt Ltd. The Authorization letter is dated 07-06-2022.
	Status of the applicant	☐ Manufacturer ☒ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☒ New Drug Product (NDP) ☐ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	For imported products, specify one the these	☒ Finished Pharmaceutical product import ☐ Buk import and local repackaging ☐ Buk import and local repackaging for export purpose only

	Dy. No. and date of submission	Dy. No 18244 dated 19-07-2023
	Details of fee submitted	Rs.75,000/- dated 04-07-2023
	The proposed proprietary name / brand name	**BSLF SPAL-L 60 Injection**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each ml vial contains 6mg of Busulfan
	Pharmaceutical form of applied drug	Concentrate for solution for IV infusion
	Pharmacotherapeutic Group of (API)	Antineoplastic agent (L01AB01)
	Reference to Finished product specifications	Innovator's specifications
	Proposed Pack size	10ml x 1's
	Proposed unit price	As per PRC/SRO
	The status in reference regulatory authorities	Busulfex (Busulfan) Injection, for intravenous use USFDA Approved Busulfan 6 mg/ml concentrate for solution for infusion by Accord Healthcare, UK (MHRA Approved).
	For generic drugs (me-too status)	Not applicable since the applied product is a new drug
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturer, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Name, address of drug substance manufacturer	M/s Shilpa Medicare Limited, Unit II, Raichur Industrial Growth Centre, Plot No.s 33, 33A, 40-47, Wadloor Road, Chicksugar Village, Raichur, Karnataka, 584134, India.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data for both sources related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 25°C ± 2°C / 60% ± 5% RH for 60 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation report, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials,

		container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted pharmaceutical equivalence of their product against the reference product Busulfex Injection 60mg/10ml by Otsuka America Pharmaceutical, MD 20850.
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	10mL tubular clear 20mm collar flat bottom vial (USP Type I) with 20mm grey flurotech coated chlorobutyl rubber stopper and sealed with 20mm aluminium flip off seal of purple color.
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches The accelerated stability study data is conducted at 25ºC ±2ºC / 60% ± 5% RH for 6 months. The real time stability study data is conducted at 5ºC ±3ºC. The real time stability study data for 3 batches is for 24 months only. In use stability study was performed with diluents 0.9% sodium chloride (USP) and 5% dextrose (USP) for safety assurance prior to IV infusion.

Remarks of Evaluator [xxiii]:

Sr. No.	Sections/ Modules	Observations/Deficiencies/ Short-comings	Reply of applicant
1.	**1.4.1**	Applicant has applied under New Drug Product with PKR 75,000/- according to Module 1.4.1 and fee challan whereas the generic drug in the applied dosage form has already been approved by the RB in its 324th meeting. Submit PKR 75,000 differential fee.	Our applied product is a "New Drug Product" The product Busulfan Injection 60mg is approved in 324th minutes of RB but the registration letter has not been issued to date. So our applied product is a New Drug Product.
2.	**1.3.3**	Copy of legalized CoPP is submitted. Original, Valid, legalized & notarized CoPP shall be submitted.	**CoPP:** Firm has again submitted ***scanned copy*** of legalized CoPP certificate (No. 4429589/TS/2023) dated 08-08-2023 issued by Drugs Control Administration, Vengalraonagar, Hyderabad, India for BSLF SPAL-L 60 Injection. The CoPP confirms free sale status of the product in exporting country as well as GMP status of the manufacturing site through periodic inspection every 01 year. Validity of the CoPP is till 16-10-2025.
3.		• Sole agency agreement letter between importer and manufacturer abroad is a copy. Original, notarized, valid sole agency agreement shall be submitted. • Sole agency agreement is between M/s SP Accure Labs Private Ltd	• Copy of Sole agency agreement letter has been submitted again. • Firm has submitted a Photocopy of Letter vide No. L.Dis.No. 22156/E(M)/TS/2017 dated 8/11/2017 from

			and M/s Revive Healthcare whereas the name of principal manufacturer on CoPP and GMP certificate is M/s SPAL Pvt Ltd. Clarify the legal name of the manufacturer abroad with documentary evidence and submit CoPP/sole agency agreement accordingly, as the case may be.	Drug Control Administration, Telangana, stating that the company name (SP Accure Labs Pvt. Ltd and SPAL Private Limited) is one and the same. Further stating that full form of SPAL is SP Accure Labs.
	4.	**3.2.P.1**	Details of diluent including brand name, manufacturer's name, specifications, pack size, container closure system and registration number shall be submitted.	We have not applied the product as combo-pack or with accompanying diluent. So required information regarding this section is not needed
	5.	**3.2.S.5 & 3.2.P.6**	Drug substance complies USP and IH specifications whereas the reference standard used by drug substance manufacturer is EP Reference standard. Justify.	Assay limit of Busulfan in monograph of EP is more stringent than USP. So substance manufacturer (Shilpa Medicare) procured and used EP reference standard for testing.

Decision: Approved with Innovator's specifications as per Policy for inspection of Manufacturer abroad. Registration Board further decided that registration letter will be issued after submission of following:
i. Original, Valid, CoPP,
ii. Original, Valid, notarized letter of authorization to I&V Section,
iii. Differential fee of Rs. 75000/- as the applied product is not yet registered in Pakistan.

Case no. 02 Registration applications for local manufacturing of (Human) drugs

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of License No. 20150233 valid till 17-11-2027
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not submitted.

4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record for product testing.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted certificate of 21 CFR compliance for the HPLC system along with audit trail report for product testing.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator[xxiii]:

Sr. No.	Sections	Observations/Deficiencies/ Short-comings	Reply of applicant
1.	**3.2.P.5.1**	Specifications do not include content of Ertugliflozin LPGA and LPGA. Justify.	Applicant has submitted revised specifications. *Fee shall be submitted for revision in specifications*
2.	**3.2.P.8**	Results of real time and accelerated stability studies for six-month time point shall be submitted.	Submitted
3.	**3.2.P.8**	Documents for the procurement of API with approval from DRAP shall be submitted **including ADC-attested invoice/clearance certificate.**	*ADC attested invoice / clearance certificate is not submitted.*

Decision: Approved.

• Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.

• Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.

Registration Board further decided that registration letter will be issued after submission of following:

Fee of PKR7500/- for revision of specifications as per notification No.496(I)/2023 dated 17-04-2023.

	Details of fee submitted	PKR 30,000/- : DS No. 778441198
	The proposed proprietary name / brand name	OTOMYCIN-D Ear drops
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each ml Contains: Tobramycin…3mg Dexamethasone…1mg
	Pharmacotherapeutic Group of (API)	Corticosteroids, moderately potent, combinations with antibiotics
	Reference to Finished product specifications	USP Specifications
	Proposed Pack size	5ml
	The status in reference regulatory authorities	Not submitted for ear drops
	For generic drugs (me-too status)	Arodex ear drops (Reg. No. 78661) of M/s Jaens Pharmaceutical Industries Pvt Ltd

Evaluation by PEC (No XXIII):

Sections	Observations/Deficiencies/ Short-comings
--------	The reference product is eye drops instead of ear drops. Moreover, finished product specifications are given as USP whereas in USP, ophthalmic suspension preparation monograph is available instead of otic suspension. Justification shall be submitted for the pharmaceutical form of the applied formulation. If the product is otic preparation, prescribed fee shall be submitted for change in specifications from USP to other, as the case may be.
----------	GMP certificate of drug product manufacturer for ear drops (steroidal) section shall be submitted.
3.2.S.4.2	Analytical procedure submitted is just monograph of both APIs and not a step by step procedure used in the lab by the applicant for raw material analysis.
3.2.S.4.3	Raw data and chromatograms of Analytical method verification of both APIs conducted by drug product manufacturer shall be submitted.
3.2.S.5	In-house method of analysis is given. The method of analysis must be validated according to ICH guidelines and report and associated data of validation shall be submitted.
3.2.P.8	Stability studies have not been conducted according to Zone Iva conditions. The complete stability studies report and associated data shall be submitted as per Zone Iva conditions.
3.2.P.8	Approval of API/ DML/GMP certificate of APIs manufacturers issued by concerned regulatory authority of country of origin shall be submitted. Documents for the procurement of API with approval from DRAP (in case of import) shall be submitted including clearance certificates issued by DRAP.

Decision: Deferred for submission of satisfactory response to above-cited shortcomings.

	For generic drugs (me-too status)	Not available

Evaluation by PEC (No….):

Sections	Observations/Deficiencies/ Short-comings
----------	Clarify the enantiomer of API.
1.5.2	The reference product contains 30mg, 60mg, 90mg equivalent base of Cinacalcet HCl. The label claim shall be changed according to the reference product along with full fee of registration.
1.5.8	Me-too for Cinacalcet 90mg is not available. It shall be applied as a new drug product and differential fee of Rs. 45000/- shall be submitted.
----------	The yield of stability batches given in BMRs is as low as 48% percent. E.g. 16 packs of 30's were placed for stability studies of Cinacalcet 30mg. Justify. Also justify how this quantity is sufficient to conduct testing of stability batches throughout the proposed shelf life of the drug product.
3.2.S.4.3	Raw data and chromatograms of Analytical method verification of API conducted by drug product manufacturer shall be submitted.
3.2.P.5	The dissolution specifications are given as NLT 70 % after 15 minutes and NLT 80% (Q) after 45minutes. Justification shall be submitted. The method of analysis must be validated according to ICH guidelines and report and *associated data* of validation shall be submitted.
3.2.P.2.2.1	CDP is performed using UV Visible spectrophotometer instead of HPLC. Justify. Provide complete details of the product (including brand name, strength, manufacturer's name) against which pharmaceutical equivalence and CDP is conducted.
3.2.P.8	Material imported against clearance certificate issued by DRAP dated 18-07-18 specifying 2kg API has previously been utilized in stability batches and data of the same was presented in 296th meeting of RB. Complete consumption details of the imported material shall be submitted as it has been used in the manufacturing of current and previous stability batches for all three strengths.

Decision: Deferred for submission of satisfactory response to above-cited shortcomings.

4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record for product testing.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted certificate of 21 CFR compliance for the HPLC system along with audit trail report for product testing.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.
1071.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Helix Pharma Pvt Ltd.** **Plot No. A-56, S.I.T.E, Karachi, Pakistan**
	Name, address of Manufacturing site.	M/s Helix Pharma Pvt Ltd. Plot No. A-56, S.I.T.E, Karachi, Pakistan
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	Firm has submitted copy of GMP certificate No. 02/2021-DRAP (K) dated 25-01-2021 based on evaluation conducted on 29-10-2020.
	Evidence of approval of manufacturing facility	Not submitted.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy.No 29330 dated 17-10-2022.
	Details of fee submitted	PKR 75,000/- DS No. 40068456
	The proposed proprietary name / brand name	ERTULIX 5mg Tablet
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Film Coated Tablet Contains: Ertugliflozin (as Ertugliflozin L-Pyroglutamic Acid)……5mg
	Pharmacotherapeutic Group of (API)	Blood glucose lowering drugs, excluding insulins, sodium-glucose co-transporter 2 (SGLT2) inhibitors
	Pharmaceutical form of applied drug	Oblong biconvex film coated tablet with score line on one side
	Reference to Finished product specifications	Manufacturer's Specifications
	Proposed Pack size	10's, 14's, 20's, 28's &30's
	Proposed unit price	As per Drug Pricing Committee (DPC)/SRO
	The status in reference regulatory authorities	Steglatro Tablet 5mg (MHRA & USFDA Approved)

	For generic drugs (me-too status)	Ertuvia Tablet 15mg of M/s Ferozsons Laboratories Ltd (Reg. No. 110362)
	Name and address of API manufacturer.	Chifeng Arker Pharmaceutical Technology Co. Ltd. No. 8 Mysun Street, Hongshan Economic Development Zone, Chifeng, Inner Mongolia, China.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturer, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance. Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturer, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted pharmaceutical equivalence of their product against the innovator's product Steglatro 5mg Tablet MSD Sub Merck. Firm has submitted CDP results of their product against the innovator's product Steglatro 5mg

		Tablet in 3 dissolution medias. The value for similarity factor is in the acceptable range.
	Analytical method validation/verification of product	Firm has submitted analytical method validation study reports for drug product.

STABILITY STUDY DATA

Manufacturer of API	Chifeng Arker Pharmaceutical Technology Co. Ltd. No. 8 Mysun Street, Hongshan Economic Development Zone, Chifeng, Inner Mongolia, China.		
API Lot No.	D84-210601		
Description of Pack (Container closure system)	Alu-Alu Blister		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	TR-122	TR-123	TR-124
Batch Size	1000 Tablet	1000 Tablet	1000 Tablet
Manufacturing Date	11-2021	11-2021	11-2021
Date of Initiation	24-12-2021	24-12-2021	24-12-2021
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Not submitted.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice cleared on 16-08-2021 specifying 735grams of Ertugliflozin L-Pyroglutamic Acid. The invoice is cleared by AD (I&E) DRAP, Karachi.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record for product testing.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted certificate of 21 CFR compliance for the HPLC system along with audit trail report for product testing.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator[xxiii]:

Sr. No.	Sections	Observations/Deficiencies/ Short-comings	Response of applicant
1.	**1.3.5**	Firm has submitted copy of approval letter of regularization of building layout plan for various sections including tablet (general) section dated 28-12-2020. Approval letter of the	Applicant has submitted report of inspection for DML renewal conducted on 29-10-2020.

		tablet (general) section needs to be submitted or panel inspection report conducted for renewal of DML or grant of GMP certificate.	
2.	**1.3.5**	GMP inspection report/ GMP certificate of the manufacturing unit issued within the last three years shall be submitted.	Submitted on the basis of inspection conducted on 01-08-2023 specifying Tablet (general) section.
3.	**3.2.S.4.4**	Batch analysis report of the relevant batch of API used in stability studies shall be submitted from drug substance and drug product manufacturer.	Submitted.
4.	**3.2.P.5**	As the applied specifications are Manufacturer's Specifications, the applicant shall submit analytical method validation studies according to ICH Q2 guidelines.	Submitted.
3.	**3.2.P.8**	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Submitted.
4.		Provide complete consumption record of the imported raw material as the material is used in a range of trial products.	Submitted.
5.		Executed BMRs and stability data sheets of 15mg strength shall be submitted	Submitted.

Decision: Approved.

• Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.

• Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.

1072.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Genix Pharma (Pvt) Ltd Plot No. 44-45-B, Korangi Creek Road, Karachi**
	Name, address of Manufacturing site.	M/s Genix Pharma (Pvt) Ltd Plot No. 44-45-B, Korangi Creek Road, Karachi
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Application Form Dy. No / Tracking ID & date of submission	Form 5F: Dy. No. 968: 11-01-2023
	Details of fee submitted	PKR 75,000/- : DS No. 9624721088
	The proposed proprietary name / brand name	**AMPRID INJCETION 5mg/2mL**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each 2mL vial Contains: Amisulpride……..5mg
	Pharmacotherapeutic Group of (API)	Antipsychotics; Benzamides
	Reference to Finished product specifications	Innovator's Specifications
	Proposed Pack size	2ml vial
	The status in reference regulatory authorities	USFDA Approved
	For generic drugs (me-too status)	New drug

Evaluation by PEC (No…XXIII):

Sr. No.	Sections	Observations/Deficiencies/ Short-comings	Response of applicant
	1.3.5	Evidence of availability of SVP section and its approval from DRAP shall be submitted.	Firm has submitted Letter No. F.2-12/93-Lic (Vol-V) dated 20-09-2021 for DML renewal wef 22-09-2020 specifying Liquid injection (Ampule, vial, infusion) (General) section. Firm has also submitted that a number of SVP and LVP products have been registered in its name.
	------	Valid GMP certificate of the drug product manufacturer shall be submitted.	GMP certificate issued on the basis of evaluation conducted on 06-06-2023 is submitted specifying Liquid injection (Ampule, vial, infusion) (General) section.
	3.2.R.1	The innovator's product literature states that the product is subject to photodegradation. What steps were taken during manufacturing and testing of drug product to prevent/minimize photodegradation.	The innovator product literature showed "Protect from light BARHEMSYS is subject to photodegradation," therefore Manufacturing and Testing Operations were carried out at light with low lux level along with strict temperature and humidity control to maintain the integrity of the subjected product.
	3.2.S.4.3	Analytical method verification of drug substance by drug product manufacturer shall be submitted.	Submitted.
	3.2.P.8	Documents for the procurement of API with approval from DRAP shall be submitted and approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin shall be submitted.	Firm has submitted copy of commercial invoice cleared on 17-02-2021 specifying import of 5kg of Amisulpride. The invoice is cleared by AD (I&E) DRAP, Karachi. Applicant has also submitted Form 6 and GMP certificate of API manufacturer i.e. M/s Sun Pharmaceuticals Industries Ltd, Madhya Pradesh, India.
	3.2.P.8	Gap between the initiation of stability studies and manufacturing of stability batches is two months. Justify.	Justified according to the stability study protocol of the applicant.

Decision: Approved.

• Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.

• Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.

1073.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Pharmevo Private Limited Plot # A-29, North Western Industrial Zone, Port Qasim, Karachi**

	Details of fee submitted	PKR 30,000/- : DS No.: 652192266025
	The proposed proprietary name / brand name	**NEWS-GOR Syrup 0.25mg/5mL**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each 5ml Syrup Contains: Pizotifen (as Hydrogen Malate)…0.25mg
	Pharmacotherapeutic Group of (API)	Analgesics (Anti migraine)
	Reference to Finished product specifications	Innovator's Specifications
	Proposed Pack size	60ml, 90ml, 120ml
	The status in reference regulatory authorities	Sanomigran Elixir (MHRA Approved)
	For generic drugs (me-too status)	Pizosrch 0.25mg/5ml Syrup of M/s Medisearch Pharmacal (Pvt) Ltd (Reg. No. 113334)

Evaluation by PEC (No.XXIII):

Sr. No.	Module/Section	Observations/Deficiencies/ Short-comings
1.		DML of applicant was issued/renewed on 18-02-2018. DML renewal due in 2023 shall be submitted.
2.	3.2.P.1	The reference product is an *elixir* with the following excipients: Raspberry flavour 50969, maraschino flavour, methyl hydroxybenzoate, propyl hydroxybenzoate, citric acid (anhydrous), disodium phosphate (anhydrous), maltitol liquid, ethanol 96% and purified water. However, the master formulation of applied product contains the following excipients and applicant has claimed that it is a syrup: Sorbitol solution at 70 % (non-crystallizing), Glycerol, Propylene glycol (PG), Saccharin sodium, Methyl Paraben sodium, Propyl Paraben sodium, Chocolate Liquid flavor, Sodium Citrate and Purified water. i. Justify the use of qualitatively different excipients than the reference product and submit excipient compatibility studies. ii. Also clarify whether the applied and reference products are syrups or elixirs with clear scientific rationale. iii. Composition of the Drug Product includes Glycerine/Glycerol, Sorbitol and Propylene Glycol. In light of DRAP's letter/advisory No.F.3-41/2023-QC dated 01-12-2023, applicant shall submit following details for the three excipients: • Vendor name, specifications, CoAs by respective vendor(s) as well as in-house batch analysis results, including test results for EG and DEG impurities.
3.	3.2.R.1 & 3.2.P.1	Submit data in section 3.2.P.1 and BMRs as per the guidance document approved by Registration Board and available on DRAP website which specifies that "If the Drug product is formulated using an active moiety, then the composition for the active ingredient shall be clearly indicated

		(e.g. "1 mg of active ingredient base = 1.075 mg active ingredient hydrochloride)".
4.	3.2.P.5.3	Analytical Method Validation report of drug product with results and associated data of "Robustness" shall be submitted.

Decision: Deferred for submission of satisfactory response to above-cited shortcomings.

1075.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Nicholas Pharmaceuticals. Plot No. 34, St. No. SS-02, National Industrial Zone, Rawat, Islamabad.**
	Name, address of Manufacturing site.	M/s Nicholas Pharmaceuticals. Plot No. 34, St. No. SS-02, National Industrial Zone, Rawat, Islamabad.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Application Form Dy. No / Tracking ID & date of submission	Form 5F: Dy.No.1828: 19-01-2023
	Details of fee submitted	PKR 30,000/-: Deposit Slip No.50487151953
	The proposed proprietary name / brand name	**NOOPEM 2gm Powder for Solution for infusion**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial contains: Meropenem as Trihydrate……2gm (Blended with sodium bicarbonate)
	Pharmacotherapeutic Group of (API)	Carbapenems
	Reference to Finished product specifications	USP Specifications
	Proposed Pack size	As per SRO
	The status in reference regulatory authorities	MHRA Approved
	For generic drugs (me-too status)	New drug. Me-too is not available.

Evaluation by PEC (No…XXIII):

Sr. No.	Module/Section	Observations/Deficiencies/ Short-comings
1.	1.5.8	Submit differential fee since the applied formulation is not yet registered in Pakistan. Me-too is not available
2.		Valid GMP certificate of the applicant shall be submitted.
3.	2.3.R.1.1	Justify the supply of 2g finished product in 20mL glass vial as the required concentration is 50mg/ml for IV infusion and 1mg/ml to 20mg/ml for IV injection, according to reference product literature. Also submit factor
4.	3.2.S.4.1	CoA of drug substance states that the material conforms to USP specifications. Specifications of drug substance in 3.2.S.4.1 shall be submitted according to USP along with requisite fee.
5.	3.2.S.4.4	CoA by drug product manufacturer does not include test for sodium content. Complete CoA with test results of all tests given in USP/ CoA of drug substance manufacturer, shall be submitted.
6.	3.2.P.1	Submit data in section 3.2.P.1 as per the guidance document approved by Registration Board and available on DRAP website which specifies that "If the Drug product is formulated using an active moiety, then the composition for the active ingredient shall be clearly indicated

		(e.g. "1 mg of active ingredient base = 1.075 mg active ingredient hydrochloride)".
7.	3.2.P.2.2.1	Pharmaceutical equivalence is conducted against Meronem 1g injection of M/s Pfizer Pakistan Ltd, Karachi. The reference product differs in terms of fill weight. Justification shall be submitted in this regard.
8.	3.2.P.2.6	Compatibility studies shall be submitted for drug product with 0.9% NaCl solution and 5% dextrose solution which are the diluents to be used for solution for **infusion**, according to the reference product literature.
9.	3.2.P.5.2	Atomic absorption spectroscope with sodium hollow cathode lamp is required for testing content for sodium. Evidence of availability of the required instruments shall be submitted.
10.	3.2.P.8	Valid DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin shall be submitted.
11.	3.2.P.8	Firm shall submit certificate of 21 CFR compliance and audit trail reports for the HPLC system used in analysis.

Decision: Deferred for submission of satisfactory response to above-cited shortcomings.

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Not submitted for relevant unit of API manufacturer.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of clearance certificate dated 05-04-2023 specifying 1kg of Isotretinoin. The certificate is issued by AD (I&E) DRAP, Islamabad.
4.	Data of stability batches will be supported by attested respective documents like	Firm has submitted analytical record for product testing.

	chromatograms, Raw data sheets, COA, summary data sheets etc.	
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted certificate of 21 CFR compliance for the HPLC system along with audit trail report for product testing.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator[xxiii]:

Sr. No.	Sections	Observations/Deficiencies/ Short-comings	Reply of applicant
1.	**2.3.S.4.4 & 3.2.S.4.4**	CoAs of three batches of API are submitted i.e. 2009065, IST-20230706 (generated by Chongqing Huapont Pharm. Co. Ltd) and HBPL/ISO/22-23/007 (generated by Horster Biotek). Clarification shall be submitted regarding the manufacturer of drug substance along with submission of following: • CoA (from manufacturer and applicant) of the batch of drug substance used in the manufacturing of stability batches. • Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Batch No. of API used in the manufacturing of stability batches is HBPL/ISO/22-23/007 manufcatured by M/s Horster Biotek Pvt Ltd Khasra No. 259, Plot No. 1&2, Sukhliya Sanwer RD Industrial Area Indore – 452015(India). CoAs (from manufacturer and applicant) are subnmitted. Approval of API/ DML/GMP certificate of *relevant site* of API manufacturer issued by concerned regulatory authority of country of origin.
2.	**3.2.P.8**	Results and raw data of real time and accelerated stability studies of FPP shall be submitted for 6 month time point	Submitted.
3.	**3.2.P.8**	Documents for the procurement of API with approval from DRAP (in case of import) shall be submitted.	Submitted.

Decision of 335th meeting of RB: Deferred for submission of valid DML/GMP certificate of drug substance manufacturer issued by the relevant authority of country of origin.

Reply of applicant: Applicant has submitted copy of DML retention certificate of M/s Horster Biotek Pvt Ltd Khasra No. 259, Plot No. 1&2, Sukhliya Sanwer RD Industrial Area Indore – 452015(India) valid till 20-11-2027 issued by the relevant authority of country of origin..

Remarks of Evaluator[xxiii]:

Decision: Approved.
• Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.
• Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.

No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted.

2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP Certificate (No. DCD/SPL.CI-I/CR-1884/18-19 dated 16-02-2019 issued by Drugs Control Department, Government of Karnataka. The certificate specifies that the firm is operating at satisfactory level of GMP compliance. The certificate was valid for one year from the date of issue.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not submitted.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record for product testing.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has not submitted certificate of 21 CFR compliance for the HPLC system and audit trail report for product testing.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator[xxiii]:

Sr. No.	Sections	Observations/Deficiencies/ Short-comings
1.	**1.3.4**	DML of M/s Winlet Pharmaceuticals (Pvt) Ltd is dated 21-02-2018. Copy of valid DML issued by Licensing Division of DRAP shall be submitted.
2.	**1.3.5**	GMP inspection report/ GMP certificate of the manufacturing unit/ contract acceptor issued within the last three years shall be submitted.
3.	**3.2.S.4**	Analytical method verification of drug substance conducted by drug product manufacturer shall be submitted.
4.	**3.2.S.7**	Real time stability studies report is submitted for 36 months at 30C and 65% RH. The shelf life assigned to the commercial batches of Ondansetron hydrochloride is 5 years. Real time stability studies data shall be submitted for the complete shelf life of the drug substance.
5.	**3.2.P.1**	According to the submitted composition, the quantity of Ondensteron as HCl is 50mg/25ml whereas the label claim is 4mg/5ml. Clarify and submit requisite fee in case of any change in quantity of API.
6.	**3.2.P.1**	Applicant shall submit adjustment of salt factor and water content.
7.	**3.2.P.2.2.1**	Manufacturer's name and registration number of reference product (Onseron Syrup) shall be submitted.
8.	**3.2.P.2.2.1**	Applicant shall submit and discuss results of Identification test, microbial enumeration tests and tests for specified microorganisms for applied and reference/comparator product.
9.	**3.2.P.2**	Provide details of formulation of reference/innovator product approved in RRA against which applicant has conducted formulation development. If excipients of applied formulation are different from reference product, provide drug-excipient compatibility studies.
10.	**3.2.P.4**	The drug product composition includes glycerine. Applicant shall submit analysis report/CoA of glycerine which includes the results of impurity testing related to the presence of ethylene glycol and diethylene glycol in compliance to DRAP's notification No. F.6-30/2022-QA dated 21-10-2022.

11.	**3.2.P.5.1**	Specifications of drug product shall include test for absence of E.coli and test for Enterobacteriaceae as given in USP monograph.
12.	**1.6.5, 3.2.P.8**	Approval of API/ *valid DML/ valid GMP certificate* of API manufacturer issued by concerned regulatory authority of country of origin shall be submitted.
13.	**3.2.P.8**	Documents for the procurement of API with approval from DRAP along with CoA(s) of relevant batches shall be submitted.
14.	**3.2.P.8**	Applicant shall submit results and supporting documents of Identification test, microbial enumeration tests and tests for specified microorganisms conducted during stability studies of drug product.
15.	**3.2.P.8**	Applicant shall submit certificate of 21 CFR compliance for the HPLC system and audit trail report for product testing.

Decision of 331st meeting of RB: Registration Board deferred the case for submission of reply to the above cited shortcomings.

Response of applicant:

Sr. No.	Sections	Observations/Deficiencies/ Short-comings	Reply of applicant
1.	**1.3.4**	DML of M/s Winlet Pharmaceuticals (Pvt) Ltd is dated 21-02-2018. Copy of valid DML issued by Licensing Division of DRAP shall be submitted.	Receiving of DML renewal application submitted in Licensing Division of DRAP dated 06-02-2023 is submitted.
2.	**1.3.5**	GMP inspection report/ GMP certificate of the manufacturing unit/ contract acceptor issued within the last three years shall be submitted.	GMP certificate No. 248/2022-DRAP (AD-0835218-1099) issued on the basis of evaluation conducted on 25-11-2022 is submitted.
3.	**3.2.S.4**	Analytical method verification of drug substance conducted by drug product manufacturer shall be submitted.	Submitted
4.	**3.2.S.7**	Real time stability studies report is submitted for 36 months at 30C and 65% RH. The shelf life assigned to the commercial batches of Ondansetron hydrochloride is 5 years. Real time stability studies data shall be submitted for the complete shelf life of the drug substance.	Submitted
5.	**3.2.P.1**	According to the submitted composition, the quantity of Ondensteron as HCl is 50mg/25ml whereas the label claim is 4mg/5ml. Clarify and submit requisite fee in case of any change in quantity of API.	Applicant has submitted complete calculations including adjustment of salt factor. Applicant has also clarified that the fill weight is 50mL in 60mL bottle. API quantity is not changed. The applied label claim is correct.
6.	**3.2.P.1**	Applicant shall submit adjustment of salt factor and water content.	Submitted
7.	**3.2.P.2.2.1**	Manufacturer's name and registration number of reference product (Onseron Syrup) shall be submitted.	M/s Indus Pharma Pvt Ltd, Karachi. Reg. No. 058677
8.	**3.2.P.2.2.1**	Applicant shall submit and discuss results of Identification test, microbial enumeration tests and tests for specified microorganisms for applied and reference/comparator product.	Submitted

9.	**3.2.P.2**	Provide details of formulation of reference/innovator product approved in RRA against which applicant has conducted formulation development. If excipients of applied formulation are different from reference product, provide drug-excipient compatibility studies.	*PL/ Marketing Authorization number of MHRA approved product used as reference shall be submitted along with composition of the applied product.*
10.	**3.2.P.4**	The drug product composition includes glycerine. Applicant shall submit analysis report/CoA of glycerine which includes the results of impurity testing related to the presence of ethylene glycol and diethylene glycol in compliance to DRAP's notification No. F.6-30/2022-QA dated 21-10-2022.	CoA of glycerine Batch No. 0800, Mfg dtae 23-09-2022, Expiry 24-09-2024 from vendor (OleoCorp) is submitted. This batch was manufactured after the manufacturing of stability batches. CoA/test report generated by manufacturer is also not submitted. ***Reply is not satisfactory***
11.	**3.2.P.5.1**	Specifications of drug product shall include test for absence of E.coli and test for Enterobacteriaceae as given in USP monograph.	Submitted
12.	**1.6.5, 3.2.P.8**	Approval of API/ *valid DML/ valid GMP certificate* of API manufacturer issued by concerned regulatory authority of country of origin shall be submitted.	GMP certificate dated 10/04/2023 and valid till one year from the date of issue is submitted.
13.	**3.2.P.8**	Documents for the procurement of API with approval from DRAP along with CoA(s) of relevant batches shall be submitted.	Firm has submitted clearance certificate dated 22-10-2020 specifying import of 5kg Ondensetron HCl by M/s Winlet. The clearance certificate is issued by AD (I&E) DRAP, Lahore. Batch No. of imported batch is AOND-20013, Mfg 09-2020, Exp 08-2025. Batch No. of API used for manufacturing of stability batches is different. ***Clarification shall be submitted by the applicant.***
14.	**3.2.P.8**	Applicant shall submit results and supporting documents of Identification test, microbial enumeration tests and tests for specified microorganisms conducted during stability studies of drug product.	Submitted
15.	**3.2.P.8**	Applicant shall submit certificate of 21 CFR compliance for the HPLC system and audit trail report for product testing.	Submitted

Remarks of Evaluator[xxiii]: Response of applicant is not satisfactory.

Decision: Registration Board decided to defer the application for the following reasons:

i. **Submission of CoA/test report of relevant batch of Glycerin generated by manufacturer,**
ii. **Clarification regarding the batch of glycerin used in the manufacturing of stability batches,**
iii. **Clarification regarding the batch of API used in the manufacturing of stability batches,**
iv. **Marketing Authorization number of MHRA approved product used as reference shall be submitted along with composition of the applied product. If excipients of applied formulation are different from reference product, drug-excipient compatibility studies shall also be submitted.**

1089.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s AGM Pharmaceuticals, Eminabad Road, GT Road, Gujranwala.**
	Name, address of Manufacturing site.	M/s AGM Pharmaceuticals, Eminabad Road, GT Road, Gujranwala.

	Evidence of approval of manufacturing facility	Firm has submitted copy of letter of grant of section dated 11-11-2021 specifying Tablet (General) section, Capsule (general) section and Dry Powder Injection (Cephalosporin) section.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No 22609 dated 14-09-2023
	Details of fee submitted	PKR 30,000/- Dated 24-03-2023
	The proposed proprietary name / brand name	**F-ZOLE 150mg Capsule** **FLUZONE 150mg Capsule** **FLU-GM 150mg Capsule**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each capsule contains: Fluconazole……150mg
	Pharmacotherapeutic Group of (API)	Antimycotics For Systemic Use
	Pharmaceutical form of applied drug	Hard gelatin capsule filled with white to off white powder
	Reference to Finished product specifications	BP
	Proposed Pack size	1's, 4's, 10's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Azocan 150mg capsule (MHRA Approved)
	For generic drugs (me-too status)	Fantizol Capsule of M/s Apex Pharmaceuticals (Pvt) Ltd, Karachi (Reg.No. 073551)
	Name and address of API manufacturer.	Horster Biotek Pvt, Ltd. Khasra No. 259, Plot No. 1&2, Gram Sukhlia, Sanwer Road, Industrial Area, Indore M.P, India.

	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturer, specifications, analytical procedures and its verification, batch analysis and justification of specification, container closure system and stability studies of drug substance. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, container closure system and stability studies of drug product.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturer, specifications, analytical procedures and its verification, batch analysis and justification of specification, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 48 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, verification of analytical procedures, batch analysis, justification of specifications, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted pharmaceutical equivalence of their product against the innovator's product Diflucan Capsule 150mg manufactured by M/s Pfizer Pakistan Ltd. Firm has submitted CDP results of their product against the innovator's product Diflucan Capsule 150mg in three dissolution media. The similarity factor is in the acceptable range.
	Analytical method validation/verification of product	Firm has submitted analytical method verification study reports for drug substance as well as drug product.

STABILITY STUDY DATA	
Manufacturer of API	Horster Biotek Pvt, Ltd. Khasra No. 259, Plot No. 1&2, Gram Sukhlia, Sanwer Road, Industrial Area, Indore M.P, India.

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Following five products were approved in 330th meeting of RB: Cetec 10 mg Tablet AG-Zole 40mg Capsule AG-Zole 20mg Capsule Pirogm 20mg Capsule Ag-CIP 250mg Tablet
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP Certificate (No. INDBGMP202211255) dated 30-11-2022 issued by Food and Drugs Control Administration Madhya Pradesh, India. The certificate specifies that the firm is operating at satisfactory level of GMP compliance.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted loan letter from M/s Fahmir Pharma Pvt Ltd, Lahore dated 29-11-2021 specifying 1Kg loan of Fluconazole. Firm has also submitted clearance certificate dated 19-11-2020 specifying import of 25kg Fluconazole. The clearance certificate is issued by AD (I&E) DRAP, Lahore.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record for product testing.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted certificate of 21 CFR compliance for the HPLC system along with audit trail report for product testing.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator[xxiii]:

Sr. No.	Sections	Observations/Deficiencies/ Short-comings	Reply of applicant
1.	**3.2.S.5 & 3.2.P.6**	The submitted CoA of reference standard in 3.2.S.5 is not legible. CoA of reference standard including source and lot number shall be submitted.	CoA of Fluconazole USP raw material is submitted *whereas COA of reference standard is required.*
2.	**2.3.R.1.1**	Provide copies of filled BMRs of all three stability batches of drug product.	Submitted.

Decision of 333rd meeting of RB: Deferred for submission of CoA of reference/working standard used for analysis of stability batches along with details of source/grade and lot number of primary reference standard against which it was standardized.

Sr. No.	Sections	Reason of deferment	Reply of applicant
1	**3.2.S.5 & 3.2.P.6**	Deferred for submission of CoA of reference/working standard used for analysis of stability batches along with details of source/grade and lot number of primary reference standard against which it was standardized.	Applicant has submitted CoA of working standard of Fluconazole (USP) of Batch No. HBPL/FCZ/20-21/001/WS, Mfg date 10/10/2020, Expiry date 09/10/2024 by M/s Horster Boitek Pvt Ltd, India.

Remarks of Evaluator[xxiii]:. Details of source/grade and lot number of primary reference standard against which the working standard was standardized shall be submitted.

Decision: Approved.

• Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.

• Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.

Registration Board further decided that registration letter will be issued after submission of following:

Details of source/grade and lot number of primary reference standard against which the working standard was standardized.

	The proposed proprietary name / brand name	KT-Zole Lotion
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each mL contains: Ketoconazole……20mg
	Pharmacotherapeutic Group of (API)	Antifungals For Topical Use
	Reference to Finished product specifications	BP Specifications
	Proposed Pack size	30 ml ,60ml, 100ml & 120ml
	The status in reference regulatory authorities	Nizoral Shampoo; MHRA approved
	For generic drugs (me-too status)	Ketowin Lotion by M/s Shaigan

Evaluation by PEC [(xxiii)] :

Sr. No.	Sections	Observations/Deficiencies/ Short-comings	Response of applicant
1.		Applied dosage form is lotion whereas reference product is a shampoo. Excipients of applied product are qualitatively the same as reference product. Clarify the dosage form.	Medicated shampoo based scalp lotion
2.	**1.5.2** **3.2.P.1**	Label claim of reference product is Ketoconazole 2% w/w whereas applicant has submitted label claim as w/v. Clarify.	Label claim revised.
3.		Executed BMRs of stability batches shall be submitted.	Submitted
4.	**3.2.P.8**	Documents for procurement of API shall be submitted along with approval of API from relevant country of origin	Submitted
5.	**3.2.P.8**	Long term stability studies of the Drug substance shall be submitted as per Zone-IVa conditions for 6 month time point.	Submitted

Decision: Approved with following label claim:
"Each gram contains:
Ketoconazole……20mg"

• Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.
• Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.

1093.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Bio-Labs(Pvt) Ltd. Plot 145, Industrial Triangle, Kahuta Road, Islamabad.**
	Name, address of Manufacturing site.	M/s Bio-Labs(Pvt) Ltd. Plot 145, Industrial Triangle, Kahuta Road, Islamabad.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Application Form Dy. No / Tracking ID & date of submission	Form 5F: Dy. No. THN-M1A-Y7WA: 19-03-2024
	Details of fee submitted	PKR 30,000/- DS No. 494423944
	The proposed proprietary name / brand name	Hydrosone 2.5% Lotion
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each mL contains: Hydrocortisone……25mg
	Pharmacotherapeutic Group of (API)	Corticosteroid
	Reference to Finished product specifications	USP Specifications
	Proposed Pack size	30ml, 60ml, 120ml
	The status in reference regulatory authorities	Could not be verified
	For generic drugs (me-too status)	Lacticare HC 2.5% Lotion by M/s GSK (Reg. No. 019739)

Evaluation by PEC [(xxiii)] :

Sr. No.	Sections	Observations/Deficiencies/ Short-comings
1.	**1.5.9**	Submit evidence of approval of applied formulation in reference regulatory authority as the formulation has been discontinued in USFDA.
2.	**---------**	As the applied product is a steroidal preparation, evidence of separate dispensing facility verified by DRAP shall be submitted along with GMP certificate of the relevant section.
3.	**3.2.P.5.1**	Hydrocortisone acetate lotion monograph is available in USP whereas the applied formulation contains Hydrocortisone. How have you assigned USP specifications to the finished product? Justify with evidence.
4.	**3.2.P.8**	Documents for procurement of API shall be submitted along with approval of API from relevant country of origin
5.	**3.2.P.8**	Long term stability studies of the Drug substance shall be submitted as per Zone-IVa conditions for 6 month time point.

Decision: Deferred for submission of satisfactory response to above-cited shortcomings.

Case no. 04 Registration applications of drugs for which stability study data is submitted

a. New cases/ Verification of stability study data/ Exemption from onsite verification of stability data

DD (PRV/EFD) vide letter No. F.1-6/2019-PR-I (EFD) dated 28-02-2023 has informed that M/s Tabros Pharma Pvt Ltd, Karachi has achieved benchmark of USD 100,000 during fiscal year 2021-2022 and requested for priority consideration of following molecule(s):

1094.	**Name and address of manufacturer / Applicant**	**M/s Tabros Pharma Pvt Ltd. L-20/B,Sector-22, Federal B Industrial Area, Karachi**
	Brand Name +Dosage Form + Strength	Zontiv-CD 40/12.5mg Tablet
	Composition	Each film coated tablet contains: Azilsartan medoxomil potassium equivalent to Azilsartan Medoxomil……40mg Chlorthalidone.....12.5mg
	Diary No. Date of R& I & fee	Dy.No.378 dated 29-12-2014 (Duplicate dossier), Rs.20,000/- Deposit Slip No.0143752 (Copy), Rs.30,000/- Deposit Slip No. 0275691 (Copy).
	Pharmacological Group	Angiotensin II receptor blockers (ARBs) and diuretics
	Type of Form	Form 5D
	Finished product Specifications	Innovator's specifications
	Pack size & Demanded Price	14's, As per DPC/SRO
	Approval status of product in Reference Regulatory Authorities	Edarbylcor Tablet (USFDA Approved)
	Me-too status	Not available
	GMP status	Copy of report of GMP inspection conducted on 05/12/2016 concludes that overall GMP compliance level was good.

DOCUMENTS / DATA PROVIDED BY THE APPLICANT

Sr. No.	Documents To Be Provided	Status

15.	Reference of previous approval of applications with stability study data of the firm	Firm has referred to onsite inspection report of their product BAXIB (Apixaban) 2.5mg and 5mg Tablets which was conducted on 05th January, 2021 and was presented in 297th meeting of Registration Board held on 12-15th January, 2021. According to the report following points were confirmed. • The firm has 21 CFR compliant HPLC software • The firm has audit trail reports available • The firm possesses stability chambers with adequate monitoring and control.
16.	Certificate of Analysis of API from both API Manufacturer and Finished Product manufacturer.	Azilsartan Medoxomil Potassium : Copy of CoA of Batch No. 20AK00007 from M/s CTX Lifesciences (Pvt) Ltd, India is submitted. Copy of CoA of Batch No. 20AK00007 from M/s Tabros Pharma (Pvt) Ltd is submitted. Chlorthalidone: Copy of CoA of Batch No. 20003CT6RII from M/s IPCA Laboratories Ltd, India is submitted. Copy of CoA of Batch No. 20003CT6RII from M/s Tabros Pharma (Pvt) Ltd is submitted.
17.	Method used for analysis of API from both API Manufacturer and Finished Product manufacturer	Submitted
18.	Stability study data of API from API manufacturer	Azilsartan Medoxomil Potassium: The firm has submitted copy of **accelerated, 06 Months** (25°C ± 2°C & 60±5%RH) & **long term, 48 Months** (5°C ± 3°C) stability study reports of 03 batches. Chlorthalidone: The firm has submitted copy of **accelerated, 06 Months** (30°C ± 2°C & 65±5%RH) & **long term, 60 Months** (40°C ± 2°C, 75±5%RH) stability study reports of 03 batches.
19.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Azilsartan Medoxomil Potassium: Copy of GMP Certificate No. 22063346 for M/s CTX Lifesciences Pvt Ltd. Block No. 251/P, 252/P, 253 to 255, 256/P, 258/P, 276/P, 277/P, 278/P, 279 to 282, 283/P, 284/P GIDC, Sachin, Surat, Gujarat, issued by Food and Drug Administration Gujarat, India, valid till 29-05-2025 is submitted. Chlorthalidone: Copy of GMP Certificate No. V/25&28/I.C./I-53/2022/49 for M/s IPQA Laboratories Limited, PO Sejavta, Ratlam, Madhya Pradesh, issued by Food and Drug Administration Madhya Pradesh valid till 31-12-2026 is submitted.
20.	Documents for the procurement of API with approval from DRAP (in case of import).	Azilsartan Medoxomil Potassium: Copy of Form-6, Form 7, Copy of Commercial Invoice No. EI/3002100489 dated 13-01-2020 cleared by ADC (Karachi) dated 25-11-2020 are submitted. Chlorthalidone: Copy of Form-6, Form 7, Copy of Commercial Invoice No. MEG2021/1633335 dated 24-02-2021 cleared by ADC (Karachi) dated 15-03-2021 are submitted.
21.	Protocols followed for conduction of stability study	Submitted
22.	Method used for analysis of FPP	Submitted

23.	Drug-excipients compatibility studies (where applicable)	Not applicable as the excipients used by the applicant and innovator are same.
24.	Complete batch manufacturing record of three stability batches.	Submitted
25.	Record of comparative dissolution data (where applicable)	Firm has submitted pharmaceutical equivalence of their product against the innovator's product Edarbyclor Tablet of M/s Takeda Pharmaceutical Company Limited. Firm has submitted CDP results of their product against the innovator's product Edarbyclor Tablet in 3 dissolution medi. The value for similarity factor is in the acceptable range.
26.	Data of 03 batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
27.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	Submitted
28.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

1095.	**Name and address of manufacturer / Applicant**	**M/s Tabros Pharma Pvt Ltd. L-20/B,Sector-22, Federal B Industrial Area, Karachi**
	Brand Name +Dosage Form + Strength	Zontiv-CD 40/25mg Tablet
	Composition	Each film coated tablet contains: Azilsartan medoxomil potassium equivalent to Azilsartan Medoxomil……40mg Chlorthalidone.....25mg
	Diary No. Date of R& I & fee	Dy.No.8518 dated 12-07-2017 (Duplicate dossier), Rs.20,000/- Deposit Slip No.0143750 (Copy), Rs.30,000/- Deposit Slip No. 0275690 (Copy).
	Pharmacological Group	Angiotensin II receptor blockers (ARBs) and diuretics
	Type of Form	Form 5D
	Finished product Specifications	Innovator's specifications
	Pack size & Demanded Price	14's, As per DPC/SRO
	Approval status of product in Reference Regulatory Authorities	Edarbylcor Tablet (USFDA Approved)
	Me-too status	Not available
	GMP status	Copy of report of GMP inspection conducted on 05/12/2016 concludes that overall GMP compliance level was good.

STABILITY STUDY DATA	
Manufacturer of API	Azilsartan Medoxomil Potassium: M/s CTX Lifesciences Pvt Ltd. Block No. 251/P, 252/P, 253 to 255, 256/P, 258/P, 276/P, 277/P, 278/P, 279 to 282, 283/P, 284/P GIDC, Sachin, Surat, Gujarat, issued by Food and Drug Administration Gujarat, India. Chlorthalidone: M/s IPQA Laboratories Limited, PO Sejavta, Ratlam, Madhya Pradesh, India.

API Lot No.	Azilsartan Medoxomil Potassium : 20AK00007 Chlorthalidone: 20003CT6RII		
Description of Pack (Container closure system)	Alu-Alu foil		
Stability Storage Condition	Real time : 30˚C ± 2˚ C / 65% ± 5% RH Accelerated: 40˚C ± 2˚C / 75% ± 5% RH		
Time Period	Real time: 6 months Accelerated:6 months		
Frequency	Accelerated: 0,,3,6 (month) Real Time: 0,3,6 (month)

Date of Initiation	17-12-2021	17-12-2021	17-12-2021
No. of Batches	03		
Date of Submission of stability data	Dy No. 23117 Dated 16-08-2022		

DOCUMENTS / DATA PROVIDED BY THE APPLICANT

Sr. No.	Documents To Be Provided	Status
1.	Reference of previous approval of applications with stability study data of the firm	Firm has referred to onsite inspection report of their product BAXIB (Apixaban) 2.5mg and 5mg Tablets which was conducted on 05th January, 2021 and was presented in 297th meeting of Registration Board held on 12-15th January, 2021. According to the report following points were confirmed. • The firm has 21 CFR compliant HPLC software • The firm has audit trail reports available • The firm possesses stability chambers with adequate monitoring and control.
2.	Certificate of Analysis of API from both API Manufacturer and Finished Product manufacturer.	Azilsartan Medoxomil Potassium : Copy of CoA of Batch No. 20AK00007 from M/s CTX Lifesciences (Pvt) Ltd, India is submitted. Copy of CoA of Batch No. 20AK00007 from M/s Tabros Pharma (Pvt) Ltd is submitted. Chlorthalidone: Copy of CoA of Batch No. 20003CT6RII from M/s IPCA Laboratories Ltd, India is submitted. Copy of CoA of Batch No. 20003CT6RII from M/s Tabros Pharma (Pvt) Ltd is submitted.
3.	Method used for analysis of API from both API Manufacturer and Finished Product manufacturer	Submitted
4.	Stability study data of API from API manufacturer	Azilsartan Medoxomil Potassium: The firm has submitted copy of **accelerated, 06 Months** (25°C ± 2°C & 60±5%RH) & **long term, 48 Months** (5°C ± 3°C) stability study reports of 03 batches. Chlorthalidone: The firm has submitted copy of **accelerated, 06 Months** (30°C ± 2°C & 65±5%RH) & **long term, 60 Months** (40°C ± 2°C, 75±5%RH) stability study reports of 03 batches.

5.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Azilsartan Medoxomil Potassium: Copy of GMP Certificate No. 22063346 for M/s CTX Lifesciences Pvt Ltd. Block No. 251/P, 252/P, 253 to 255, 256/P, 258/P, 276/P, 277/P, 278/P, 279 to 282, 283/P, 284/P GIDC, Sachin, Surat, Gujarat, issued by Food and Drug Administration Gujarat, India, valid till 29-05-2025 is submitted. Chlorthalidone: Copy of GMP Certificate No. V/25&28/I.C./I-53/2022/49 for M/s IPQA Laboratories Limited, PO Sejavta, Ratlam, Madhya Pradesh, issued by Food and Drug Administration Madhya Pradesh valid till 31-12-2026 is submitted.
6.	Documents for the procurement of API with approval from DRAP (in case of import).	Azilsartan Medoxomil Potassium: Copy of Form-6, Form 7, Copy of Commercial Invoice No. EI/3002100489 dated 13-01-2020 cleared by ADC (Karachi) dated 25-11-2020 are submitted. Chlorthalidone: Copy of Form-6, Form 7, Copy of Commercial Invoice No. MEG2021/1633335 dated 24-02-2021 cleared by ADC (Karachi) dated 15-03-2021 are submitted.
7.	Protocols followed for conduction of stability study	Submitted
8.	Method used for analysis of FPP	Submitted
9.	Drug-excipients compatibility studies (where applicable)	Not applicable as the excipients used by the applicant and innovator are same.
10.	Complete batch manufacturing record of three stability batches.	Submitted
11.	Record of comparative dissolution data (where applicable)	Firm has submitted pharmaceutical equivalence of their product against the innovator's product Edarbyclor Tablet of M/s Takeda Pharmaceutical Company Limited. Firm has submitted CDP results of their product against the innovator's product Edarbyclor Tablet in 3 dissolution medi. The value for similarity factor is in the acceptable range.
12.	Data of 03 batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
13.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	Submitted
14.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator[xxiii]:

Sr. No.	Observations/Deficiencies/ Short-comings	Reply of applicant
1.	Copy of Valid Drug Manufacturing License and approval of tablet (general) section of M/s Tabros Pharma Pvt Ltd shall be submitted.	Copy of letter No. F.2-5/87-Lic (Vol-III) dated 30-06-2020 indicating renewal of Tablet (General/ General Antibiotic) section of DML No. 000106 by way of formulation w.e.f. 07-01-2020 is submitted.

	2.	Report of DML renewal/GMP inspection of the applicant within last three years shall be submitted, specifying tablet (general) section.	Firm has submitted copy of GMP Inspection report on the basis of inspection conducted on 12-12-2023 specifying tablet (general) section. The report specifies that the firm is operating at satisfactory level of GMP compliance.	
	3.	Long term stability studies of Azilsartan raw material shall be submitted for 24-month time point.	Submitted	

Decision: Approved.

• Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.

• Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.

Case no. 05 Registration applications for local manufacturing of (Human) drugs (Form-5)

Case no. 06 Registration applications for local manufacturing of (veterinary) drugs

a. Deferred Cases

1131.	Name and address of manufacturer / Applicant	M/s Izfaar Pharmaceuticals (Pvt) Ltd. Plot No. 542 A-B, Sundar Industrial Estate, Lahore, Pakistan. (DML 000800) Veterinary Liquid Injectable Section (General)
	Brand Name +Dosage Form + Strength	MIL-D-FAR INJECTION
	Composition	Each ml Contains: Calcium Gluconate…208.3mg Calcium D-Sacharate…10mg Magnesium Hypophosphite…53.3mg Magnesium Chloride…20mg Boric Acid…43.3mg Dextrose…200mg Vitamin B1…1mg Vitamin B2…0.7mg Vitamin B12…30mcg Nicotinamide…2mg
	Diary No. Date of R& I & fee	Dy.No 31318 dated 12-11-2021 Rs.30,000/- dated 12-11-2021 Fee paid PKR 30,000/-vide Deposit Slip No. 039497054842
	Pharmacological Group	Electrolytes/Minerals/Antidotes/Multivitamins
	Type of Form	Form-5
	Finished Product Specification	Innovator's Specifications
	Pack size & Demanded Price	300ml vial; Decontrolled
	Me-too status	Not found in available record
	GMP status	As above
	Previous remarks of the Evaluator[xxiii].	Firm was advised to provide, inter alia, the following vide letter No. F.2-1/2023/ PEC-DRAP (DD-PEC-XXIII) dated 04-07-2023: "Evidence of applied formulation/drug already approved by DRAP (generic / me-too status) along with registration number, pack size, brand name and name of firm." Reply of applicant was submitted vide letter No. IZF/DRAP-PEC/JUL-23-04 dated 07-07-2023 (Dy No. 17153 dt 10-07-2023), stating **Mil-D Forte Injection (Reg. No. 007629) by M/s Star Laboratories, Lahore** as the me-too product. However, the same could not be confirmed from available database. Firm may be advised to provide some other me-too/ generic.
	Decision of 330th meeting of RB	Deferred for submission of following: • Evidence of applied formulation/drug already approved by DRAP (generic / me-too status) along with

		registration number, pack size, brand name and name of firm. • Evidence of relevant manufacturing facility. The Board further decided that the applicant shall submit response within 1 month after publication of the minutes.
	Reply of Applicant	Reply of applicant was submitted vide Ref. No. IZF/NDR/12-02 dated 13-02-2024. Applicant has stated that there was a typographical error in applied formulation. Instead of Vitamin B2….0.70mg, the composition includes Vitamin B6….0.7mg. Me-too: **Mil-D Forte Injection (Reg. No. 007629) by M/s Star Laboratories, Lahore**
	Remarks of the Evaluator[xxiii].	Applicant shall submit prescribed fee (PKR30,000) for change in composition. Applicant has once again submitted reference of **Mil-D Forte Injection (Reg. No. 007629) by M/s Star Laboratories, Lahore** as the me-too product which cannot be verified from available database. Evidence of relevant manufacturing facility i.e. manufacturing of LVP and its approval from Licensing Division of DRAP is not submitted. Jutify the solubility of hyphophite form in the formulation.
	Decision: Deferred for submission of satisfactory response to above-cited shortcomings.	
1132.	Name and address of manufacturer / Applicant	M/s Izfaar Pharmaceuticals (Pvt) Ltd. Plot No. 542 A-B, Sundar Industrial Estate, Lahore, Pakistan. (DML 000800) Veterinary Liquid Injectable Section (General)
	Brand Name +Dosage Form + Strength	MILFAR-C INJECTION
	Composition	Each ml Contains: Calcium Gluconate…208.3mg Calcium D Sacharate…10mg Magnesium Hypophosphite…53.3mg Magnesium Chloride…20mg Boric Acid…43.3mg Dextrose…200mg
	Diary No. Date of R& I & fee	Dy.No 31322 dated 12-11-2021 Fee paid PKR 30,000/-vide Deposit Slip No.769136104014
	Pharmacological Group	Electrolytes/Minerals/Antidotes
	Type of Form	Form 5
	Finished Product Specification	Innovator's Specifications
	Pack size & Demanded Price	300ml, 450ml glass vial; Decontrolled
	Me-too status	Milphone-C injection (300ml) M/s Star Laboratories, Lahore Reg. No. 003794
	GMP status	As above
	Previous remarks of the Evaluator[xxiii].	• Firm was advised to provide, inter alia, the following vide letter No. F.2-1/2023/ PEC-DRAP (DD-PEC-XXIII) dated 04-07-2023: "Evidence of applied formulation/drug already approved by DRAP (generic / me-too status) **with the applied fill volume** along with registration number, pack size, brand name and name of firm." Reply of applicant was submitted vide letter No. IZF/DRAP-PEC/JUL-23-05 dated 07-07-2023 (Dy No. 17152 dt 10-07-2023), stating **Milfone-C (Reg. No. 003794)** as the me-too product. According to the available office record, the me-too product is available

		in 300ml with different composition than the applied product. Accordingly, revision of pack size, change in master composition and label claim as follows according to product already approved by DRAP is required, along with submission of full fee of registration (PKR 30,000) prescribed vide S.R.O. 496(I)/2023 dated 17-04-2023: "Each ml contains: Calcium Gluconate 65.83mg Calcium D Saccharase 3.33mg Magnesium Hypophosphate 16.67mg Magnesium Chloride 3.33mg Magnesium Hypophosphate 16.67mg Magnesium Chloride 3.33mg Boric Acid 14.1mcg Dextrose 66.67mcg"
	Decision of 330th meeting of RB	**Deferred for submission of following:** • **Confirmation of LVP manufacturing facility** • **Justification of the applied formulation regarding the concentrations of ingredients per ml.**
	Reply of Applicant	Reply of applicant has been submitted vide Ref. No. IZF/NDR/12-02 dated 13-02-2024.
	Remarks of the Evaluator[xxiii].	Applicant has not submitted satisfactory response to above-mentioned shortcomings.
	Decision: Deferred for submission of satisfactory response to above-cited shortcomings.

	Detail of certificates attached	**Free sale:** Registered in Vietnam **for export use only** **GMP certificate:** For Non-Betalactam solutions (injection and Oral) and powder for oral use Issued by Ministry of Agriculture & Rural Development, Socialist Republic of Vietnam No. 17/16/GCN-GMP dt. **20-12-2016** Validity: 5 years (Copy attested by MOFA, Vietnam and Embassy of Pakistan, Vietnam) **Sole Distributor Contract/Agreement** Between the applicant & the **exporter**, M/s HT Pharma Veterinary Import Export Limited Liability Company, 69 Hung Vuong, Thoi Binh Ward, Ninh Kieu District, Can Tho City, Vietnam. (Copy attested by MOFA, Vietnam and Embassy of Pakistan, Vietnam) Dt. 24-09-2020 Validity: 5 years **Contract Agreement:** Confirmation letter No. CL/HT-THQ/2021 dt. 19-02-2021 between the trading company/exporter, M/s HT Pharma Veterinary Import Export Limited Liability Company, 69 Hung Vuong, Thoi Binh Ward, Ninh Kieu District, Can Tho City, Vietnam & manufacturer, M/s ThienQuan Joint Stock Company, 39 Nguyen Huu Cau, Con Khuong, Cai Khe Ward, Ninh Kieu District, Can Tho City, Vietnam that all products of the exporter shall be produced by the manufacturer. (Scanned copy attached)
	Remarks of the Evaluator[xxiii]	• Free Sales Certificate for the applied product in the country of origin attested by the Embassy of Pakistan in that country is required, as the provided FSC states that the applied product is registered in Vietnam for export use only. • Valid legalized GMP certificate of the manufacturer is required. • The address of manufacturer (M/s ThienQuan Joint Stock Company) mentioned on FSC and GMP certificate is different from the address given on Form 5A & contract agreement ((No. THQ-HT/2019 dt 13-12-2019) between manufacturer and distributor abroad (M/s HT Pharma Veterinary Import Export Ltd Liability Company); address of marketing authorization holder in the country of origin needs to be clarified. • Accelerated and Real time stability studies of applied formulation according to Zone IV-A are required • Finished Product Specifications are not provided. • Label is not in accordance with The Drugs (Labelling and Packing) Rules, 1986. • Differential fee of Rs. 75,000 is required. The afore-mentioned shortcomings were communicated to the applicant vide letter No. F.2-1/2023/PEC-DRAP

		(DD-PEC-XXIII) dated 17-07-2023. The reply of the firm was submitted vide Letter No. AHA/22-23/PEC-DRAP/001 dated 20-07-2023 whereby the applicant has submitted the following: • Clarification on their letterhead that the manufacturer abroad has informed them "that applied products are registered in Vietnam for their local and export business". • Scanned, non-legalized copy of valid GMP certificate of the manufacturer dated 28-04-2022 having validity for five years from the date of approval, *for production lines of Non-Beta Lactam in the forms of powder, granule for oral; liquid for oral; solution for injection and production line of Beta lactam in the forms of powder, granule for oral use.* • Clarification that the addresses of manufacturer i.e. M/s ThienQuin Joint Stock Company on GMP and Free Sales Certificate is the factory address whereas the address on Form 5A and contract agreement is the office address of the manufacturer abroad. Further, the applicant has clarified that the name & address of exporter/distributor abroad/marketing authorization holder i.e. M/s HT Pharma Veterinary Import Export Limited Liability Company, 69 Hung Vuong, Thoi Binh Ward, Ninh Kieu District, Can Tho City, Vietnam. • Accelerated and long term stability studies report from the manufacturer. However, the reports are not signed by the manufacturer's representatives/qualified persons. • Finished product specifications containing reference (In-house or pharmacopoeial) for each parameter such as pH, assay etc. However, the applicant has not submitted the final specifications of the finished product i.e. whether the finished product conforms to In-house Specifications or USP, BP, JP Specifications etc. • Revised label • Differential fee of Rs.75000 vide Deposit slip No. 09219320350. Following are still required from the applicant: • Free Sales Certificate for the applied product in the country of origin attested by the Embassy of Pakistan in that country is required, as the initially provided FSC states that the applied product is registered in Vietnam for export use only. Moreover, the clarification against the FSC is provided by the applicant whereas it should be provided by the issuing authority of the Free Sales Certificate. • Legalized copy of valid GMP certificate of the manufacturer. • Signed copy of stability study report of the applied formulation/product • Final specifications of the finished product i.e. whether the finished product conforms to In-house Specifications or USP, BP, JP Specifications etc.
	Decision of 330th meeting of RB:	**Deferred for submission of the following:** • **Free Sales Certificate for the applied product in the country of origin attested by the Embassy of Pakistan in that country as the initially provided FSC states**

		that the applied product is registered in Vietnam for export use only. Moreover, the clarification against the FSC is provided by the applicant whereas it should be provided by the issuing authority of the Free Sales Certificate. • **Legalized copy of valid GMP certificate of the manufacturer.** • **Signed copy of stability study report of the applied formulation/product** • **Final specifications of the finished product i.e. whether the finished product conforms to In-house Specifications or USP, BP, JP Specifications etc. (Product monograph is available in USP).** **The Board further decided that the applicant shall submit the response within 1 month after publication of the minutes.**
	Reply of applicant	Applicant has submitted response vide letter No. AHA/22-23/PEC-DRAP/002 dated 15-01-2024 whereby the following documents are submitted: • Legalized ***copy*** of Free Sales Certificate (406/2023/QLT-CFS dated 06-10-2023) for the applied product in the country of origin attested by the Embassy of Pakistan in that country. Validity of certificate: 2 years • Legalized copy of valid GMP certificates of the manufacturer. (GMP certificate dated 17-10-2023 for production lines of beta lactam in the form of powder for injection and suspension for injection; Validity 5years from date of approval; GMP certificate dated 28-04-2022 for production lines of non beta lactam in the form of powder, granule for oral; liquid for oral; solution for injection and production lines of beta lactam in the form of powder, granule for oral; Validity 5years from date of approval) • Signed copy of stability study report of the applied formulation/product • Final specifications of the finished product i.e. Innovator's Specifications
	Remarks of evaluator[xxiii]

	Remarks of the Evaluator[xxiii]	• Free Sales Certificate for the applied product in the country of origin attested by the Embassy of Pakistan in that country is required, as the provided FSC states that the applied product is registered in Vietnam for export use only. • Valid legalized GMP certificate of the manufacturer is required. • The address of manufacturer (M/s ThienQuan Joint Stock Company) mentioned on FSC and GMP certificate is different from the address given on Form 5A & contract agreement ((No. THQ-HT/2019 dt 13-12-2019) between manufacturer and distributor abroad (M/s HT Pharma Veterinary Import Export Ltd Liability Company); address of marketing authorization holder in the country of origin needs to be clarified. • Accelerated and Real time stability studies of applied formulation according to Zone IV-A are required • Finished Product Specifications are not provided. • Label is not in accordance with The Drugs (Labelling and Packing) Rules, 1986. • Differential fee of Rs. 75,000 is required. The afore-mentioned shortcomings were communicated to the applicant vide letter No. F.2-1/2023/PEC-DRAP (DD-PEC-XXIII) dated 17-07-2023. The reply of the firm was submitted vide Letter No. AHA/22-23/PEC-DRAP/001 dated 20-07-2023 whereby the applicant has submitted the following: • Clarification on their letterhead that the manufacturer abroad has informed them "that applied products are registered in Vietnam for their local and export business". • Scanned, non-legalized copy of valid GMP certificate of the manufacturer dated 28-04-2022 having validity for five years from the date of approval, *for production lines of Non-Beta Lactam in the forms of powder, granule for oral; liquid for oral; solution for injection and production line of Beta lactam in the forms of powder, granule for oral use.* • Clarification that the addresses of manufacturer i.e. M/s ThienQuin Joint Stock Company on GMP and Free Sales Certificate is the factory address whereas the address on Form 5A and contract agreement is the office address of the manufacturer abroad. Further, the applicant has clarified that the name & address of exporter/distributor abroad/marketing authorization holder i.e. M/s HT Pharma Veterinary Import Export Limited Liability Company, 69 Hung Vuong, Thoi Binh Ward, Ninh Kieu District, Can Tho City, Vietnam. • Accelerated and long term stability studies report from the manufacturer. However, the reports are not signed by the manufacturer's representatives/qualified persons. • Finished product specifications containing reference (In-house or pharmacopoeial) for each parameter such as pH, assay etc. However, the applicant has not submitted the final specifications of the finished product i.e. whether the finished product conforms to In-house Specifications or USP, BP, JP Specifications etc.

		• Revised label • Differential fee of Rs.75000 vide Deposit slip No. 528225379. Following are still required from the applicant: • Free Sales Certificate for the applied product in the country of origin attested by the Embassy of Pakistan in that country is required, as the initially provided FSC states that the applied product is registered in Vietnam for export use only. Moreover, the clarification against the FSC is provided by the applicant whereas it should be provided by the issuing authority of the Free Sales Certificate. • Legalized copy of valid GMP certificate of the manufacturer. • Signed copy of stability study report of the applied formulation/product • Final specifications of the finished product i.e. whether the finished product conforms to In-house Specifications or USP, BP, JP Specifications etc.
	Decision of 330th meeting of RB:	**Deferred for submission of the following:** • **Free Sales Certificate for the applied product in the country of origin attested by the Embassy of Pakistan in that country as the initially provided FSC states that the applied product is registered in Vietnam for export use only. Moreover, the clarification against the FSC is provided by the applicant whereas it should be provided by the issuing authority of the Free Sales Certificate.** • **Legalized copy of valid GMP certificate of the manufacturer.** • **Signed copy of stability study report of the applied formulation/product** • **Final specifications of the finished product i.e. whether the finished product conforms to In-house Specifications or USP, BP, JP Specifications etc. (Product monograph is available in USP).** **The Board further decided that the applicant shall submit the response within 1 month after publication of the minutes, .**
	Reply of applicant	Applicant has submitted response vide letter No. AHA/22-23/PEC-DRAP/002 dated 15-01-2024 whereby the following documents are submitted: • Legalized ***copy*** of Free Sales Certificate (406/2023/QLT-CFS dated 06-10-2023) for the applied product in the country of origin attested by the Embassy of Pakistan in that country. Validity of certificate: 2 years • Legalized copy of valid GMP certificates of the manufacturer. (GMP certificate dated 17-10-2023 for production lines of beta lactam in the form of powder for injection and suspension for injection; Validity 5years from date of approval; GMP certificate dated 28-04-2022 for production lines of non beta lactam in the form of powder, granule for oral; liquid for oral; solution for injection and production lines of beta lactam in the form of powder, granule for oral; Validity 5years from date of approval) • Signed copy of stability study report of the applied

		formulation/product • Final specifications of the finished product i.e. Innovator's Specifications

	Me-too status	Exefur Injection M/s SJ&G FazulEllahie Reg. No. 063704 (30ml,50ml,100ml,500ml,1 Liter,2.5 Liter,5 Liter,10 Liter)
	Detail of certificates attached	**Free sale:** Registered in Vietnam **for export use only** **GMP certificate:** For Non-Betalactam solutions (injection and Oral) and powder for oral use and production line of Betalactam in the form of powder for oral use. Issued by Ministry of Agriculture & Rural Development, Socialist

		Republic of Vietnam No. 17/16/GCN-GMP dt. **20-12-2016** Validity: 5 years (Copy attested by MOFA, Vietnam and Embassy of Pakistan, Vietnam) **Sole Distributor Contract/Agreement** Between the applicant & the **exporter**, M/s HT Pharma Veterinary Import Export Limited Liability Company, 69 Hung Vuong, Thoi Binh Ward, Ninh Kieu District, Can Tho City, Vietnam. (Copy attested by MOFA, Vietnam and Embassy of Pakistan, Vietnam) Dt. 24-09-2020 Validity: 5 years **Contract Agreement:** Confirmation letter No. CL/HT-THQ/2021 dt. 19-02-2021 between the trading company/exporter, M/s HT Pharma Veterinary Import Export Limited Liability Company, 69 Hung Vuong, Thoi Binh Ward, Ninh Kieu District, Can Tho City, Vietnam & manufacturer, M/s ThienQuan Joint Stock Company, 39 Nguyen Huu Cau, Con Khuong, Cai Khe Ward, Ninh Kieu District, Can Tho City, Vietnam that all products of the exporter shall be produced by the manufacturer. (Scanned copy attached)
	Remarks of the Evaluator[xxiii]	• Free Sales Certificate for the applied product in the country of origin attested by the Embassy of Pakistan in that country is required, as the provided FSC states that the applied product is registered in Vietnam for export use only. • Valid legalized GMP certificate of the manufacturer is required *for the relevant section/production line i.e. Cephalosporin Injectables* • The address of manufacturer (M/s ThienQuan Joint Stock Company) mentioned on FSC and GMP certificate is different from the address given on Form 5A & contract agreement ((No. THQ-HT/2019 dt 13-12-2019) between manufacturer and distributor abroad (M/s HT Pharma Veterinary Import Export Ltd Liability Company); address of marketing authorization holder in the country of origin needs to be clarified. • Accelerated and Real time stability studies of applied formulation according to Zone IV-A are required • Finished Product Specifications are not provided. • Label is not in accordance with The Drugs (Labelling and Packing) Rules, 1986. • Differential fee of Rs. 75,000 is required. The afore-mentioned shortcomings were communicated to the applicant vide letter No. F.2-1/2023/PEC-DRAP (DD-PEC-XXIII) dated 17-07-2023. The reply of the firm was submitted vide Letter No. AHA/22-23/PEC-DRAP/001 dated 20-07-2023 whereby the applicant has submitted the following: • Clarification on their letterhead that the manufacturer abroad has informed them "that applied products are registered in Vietnam for their local and export business". • Scanned, non-legalized copy of valid GMP certificate of the manufacturer dated 28-04-2022 having validity for

		five years from the date of approval, *for production lines of Non-Beta Lactam in the forms of powder, granule for oral; liquid for oral; solution for injection and production line of Beta lactam in the forms of powder, granule for oral use.* • Clarification that the addresses of manufacturer i.e. M/s ThienQuin Joint Stock Company on GMP and Free Sales Certificate is the factory address whereas the address on Form 5A and contract agreement is the office address of the manufacturer abroad. Further, the applicant has clarified that the name & address of exporter/distributor abroad/marketing authorization holder i.e. M/s HT Pharma Veterinary Import Export Limited Liability Company, 69 Hung Vuong, Thoi Binh Ward, Ninh Kieu District, Can Tho City, Vietnam. • Accelerated and long term stability studies report from the manufacturer. However, the reports are not signed by the manufacturer's representatives/qualified persons. • Finished product specifications containing reference (In-house or pharmacopoeial) for each parameter such as pH, assay etc. However, the applicant has not submitted the final specifications of the finished product i.e. whether the finished product conforms to In-house Specifications or USP, BP, JP Specifications etc. • Revised label • Differential fee of Rs.75000 vide Deposit slip No. 5425865744. Following are still required: • Free Sales Certificate for the applied product in the country of origin attested by the Embassy of Pakistan in that country is required, as the initially provided FSC states that the applied product is registered in Vietnam for export use only. Moreover, the clarification against the FSC is provided by the applicant whereas it should be provided by the issuing authority of the Free Sales Certificate. • Legalized copy of valid GMP certificate of the manufacturer *for the relevant manufacturing facility/production line i.e. Cephalosporin Injectables*. • Signed copy of stability study report of the applied formulation/product • Final specifications of the finished product i.e. whether the finished product conforms to In-house Specifications or USP, BP, JP Specifications etc.
	Decision of 330th meeting of RB:	**Deferred for submission of the following:** • **Free Sales Certificate for the applied product in the country of origin attested by the Embassy of Pakistan in that country as the initially provided FSC states that the applied product is registered in Vietnam for export use only. Moreover, the clarification against the FSC is provided by the applicant whereas it should be provided by the issuing authority of the Free Sales Certificate.** • **Legalized copy of valid GMP certificate of the manufacturer *for the relevant manufacturing facility/production line i.e. Cephalosporin Injectables*.**

		• **Signed copy of stability study report of the applied formulation/product** • **Final specifications of the finished product i.e. whether the finished product conforms to In-house Specifications or USP, BP, JP Specifications etc. (Product monograph is available in USP).** **The Board further decided that the applicant shall submit the response within 1 month after publication of the minutes, .**
	Reply of applicant	Applicant has submitted response vide letter No. AHA/22-23/PEC-DRAP/002 dated 15-01-2024 whereby the following documents are submitted: • Legalized ***copy*** of Free Sales Certificate (406/2023/QLT-CFS dated 06-10-2023) for the applied product in the country of origin attested by the Embassy of Pakistan in that country. Validity of certificate: 2 years • Legalized copy of valid GMP certificates of the manufacturer. (GMP certificate dated 17-10-2023 for production lines of beta lactam in the form of powder for injection and suspension for injection; Validity 5years from date of approval; GMP certificate dated 28-04-2022 for production lines of non beta lactam in the form of powder, granule for oral; liquid for oral; solution for injection and production lines of beta lactam in the form of powder, granule for oral; Validity 5years from date of approval) • Signed copy of stability study report of the applied formulation/product • Final specifications of the finished product i.e. Innovator's Specifications
	Remarks of evaluator[xxiii]	GMP certificate does not clarify whether the production line is dedicated for cephalosporin dosage form as required under LRA Rules 1976.
	Decision: Deferred for submission of legalized, original GMP certificate which specifies that the manufacturer has dedicated production line for manufacturing of Cephalosporin injectables and verification of letter of authorization through e-mail.

Moreover, the clarification against the FSC is provided by the applicant whereas it should be provided by the issuing authority of the Free Sales Certificate. • Legalized copy of valid GMP certificate of the manufacturer along with clarification from the issuing authority whether the facility for manufacturing Beta Lactam drugs is dedicated for the manufacturing of penicillins, as required under The Drugs (L,R,A) Rules, 1976. • Signed copy of stability study report of the applied formulation/product • Final specifications of the finished product i.e. whether the finished product conforms to In-house Specifications or USP, BP, JP Specifications etc.
	Decision of 330th meeting of RB:	**Deferred for submission of the following:** • **Free Sales Certificate for the applied product in the country of origin attested by the Embassy of Pakistan in that country as the initially provided FSC states that the applied product is registered in Vietnam for export use only. Moreover, the clarification against the FSC is provided by the applicant whereas it should be**

		provided by the issuing authority of the Free Sales Certificate. • **Legalized copy of valid GMP certificate of the manufacturer**. • **Signed copy of stability study report of the applied formulation/product** • **Final specifications of the finished product i.e. whether the finished product conforms to In-house Specifications or USP, BP, JP Specifications etc. (Product monograph is available in USP).** **The Board further decided that the applicant shall submit the response within 1 month after publication of the minutes, .**
	Reply of applicant	Applicant has submitted response vide letter No. AHA/22-23/PEC-DRAP/002 dated 15-01-2024 whereby the following documents are submitted: • Legalized ***copy*** of Free Sales Certificate (406/2023/QLT-CFS dated 06-10-2023) for the applied product in the country of origin attested by the Embassy of Pakistan in that country. Validity of certificate: 2 years • Legalized copy of valid GMP certificates of the manufacturer. (GMP certificate dated 17-10-2023 for production lines of beta lactam in the form of powder for injection and suspension for injection; Validity 5years from date of approval; GMP certificate dated 28-04-2022 for production lines of non beta lactam in the form of powder, granule for oral; liquid for oral; solution for injection and production lines of beta lactam in the form of powder, granule for oral; Validity 5years from date of approval) • Signed copy of stability study report of the applied formulation/product • Final specifications of the finished product i.e. Innovator's Specifications
	Remarks of evaluator[xxiii]	GMP certificate does not clarify whether the production line is dedicated for penicillin dosage form as required under LRA Rules 1976.
	Decision: Deferred for submission of legalized, original GMP certificate which specifies that the manufacturer has dedicated production line for manufacturing of *penicillin* oral powders.

(Copy attested by MOFA, Vietnam and Embassy of Pakistan, Vietnam) Dt. 24-09-2020 Validity: 5 years **Contract Agreement:** Confirmation letter No. CL/HT-THQ/2021 dt. 19-02-2021 between the trading company/exporter, M/s HT Pharma Veterinary Import Export Limited Liability Company, 69 Hung Vuong, Thoi Binh Ward, Ninh Kieu District, Can Tho City, Vietnam & manufacturer, M/s ThienQuan Joint Stock Company, 39 Nguyen Huu Cau, Con Khuong, Cai Khe Ward, Ninh Kieu District, Can Tho City, Vietnam that all products of the exporter shall be produced by the manufacturer. (Scanned copy attached)
	Remarks of the Evaluator[xxiii]	• Free Sales Certificate for the applied product in the country of origin attested by the Embassy of Pakistan in that country is required, as the provided FSC states that the applied product is registered in Vietnam for export use only. • Valid legalized GMP certificate of the manufacturer is required. • The address of manufacturer (M/s ThienQuan Joint Stock Company) mentioned on FSC and GMP certificate is different from the address given on Form 5A & contract agreement ((No. THQ-HT/2019 dt 13-12-2019) between manufacturer and distributor abroad (M/s HT Pharma Veterinary Import Export Ltd Liability Company); address of marketing authorization holder in the country of origin needs to be clarified. • Accelerated and Real time stability studies of applied formulation according to Zone IV-A are required • Finished Product Specifications are not provided. • Label is not in accordance with The Drugs (Labelling and Packing) Rules, 1986. • Differential fee of Rs. 75,000 is required. The afore-mentioned shortcomings were communicated to the applicant vide letter No. F.2-1/2023/PEC-DRAP (DD-PEC-XXIII) dated 17-07-2023. The reply of the firm was submitted vide Letter No. AHA/22-23/PEC-DRAP/001 dated 20-07-2023 whereby the applicant has submitted the following: • Clarification on their letterhead that the manufacturer abroad has informed them "that applied products are

		registered in Vietnam for their local and export business". • Scanned, non-legalized copy of valid GMP certificate of the manufacturer dated 28-04-2022 having validity for five years from the date of approval, *for production lines of Non-Beta Lactam in the forms of powder, granule for oral; liquid for oral; solution for injection and production line of Beta lactam in the forms of powder, granule for oral use.* • Clarification that the addresses of manufacturer i.e. M/s ThienQuin Joint Stock Company on GMP and Free Sales Certificate is the factory address whereas the address on Form 5A and contract agreement is the office address of the manufacturer abroad. Further, the applicant has clarified that the name & address of exporter/distributor abroad/marketing authorization holder i.e. M/s HT Pharma Veterinary Import Export Limited Liability Company, 69 Hung Vuong, Thoi Binh Ward, Ninh Kieu District, Can Tho City, Vietnam. • Accelerated and long term stability studies report from the manufacturer. However, the reports are not signed by the manufacturer's representatives/qualified persons. • Finished product specifications containing reference (In-house or pharmacopoeial) for each parameter such as pH, assay etc. However, the applicant has not submitted the final specifications of the finished product i.e. whether the finished product conforms to In-house Specifications or USP, BP, JP Specifications etc. • Revised label • Differential fee of Rs.75000 vide Deposit slip No. 346346776. Following are still required: • Free Sales Certificate for the applied product in the country of origin attested by the Embassy of Pakistan in that country is required, as the initially provided FSC states that the applied product is registered in Vietnam for export use only. Moreover, the clarification against the FSC is provided by the applicant whereas it should be provided by the issuing authority of the Free Sales Certificate. • Legalized copy of valid GMP certificate of the manufacturer. • Signed copy of stability study report of the applied formulation/product • Final specifications of the finished product i.e. whether the finished product conforms to In-house Specifications or USP, BP, JP Specifications etc. (Product monograph is available in USP)
	Decision of 330th meeting of RB:	**Deferred for submission of the following:** • **Free Sales Certificate for the applied product in the country of origin attested by the Embassy of Pakistan in that country as the initially provided FSC states that the applied product is registered in Vietnam for export use only. Moreover, the clarification against the FSC is provided by the applicant whereas it should be provided by the issuing authority of the Free Sales Certificate.**

		• **Legalized copy of valid GMP certificate of the manufacturer.** • **Signed copy of stability study report of the applied formulation/product** • **Final specifications of the finished product i.e. whether the finished product conforms to In-house Specifications or USP, BP, JP Specifications etc. (Product monograph is available in USP).** **The Board further decided that the applicant shall submit the response within 1 month after publication of the minutes, .**
	Reply of applicant	Applicant has submitted response vide letter No. AHA/22-23/PEC-DRAP/002 dated 15-01-2024 whereby the following documents are submitted: • Legalized ***copy*** of Free Sales Certificate (406/2023/QLT-CFS dated 06-10-2023) for the applied product in the country of origin attested by the Embassy of Pakistan in that country. Validity of certificate: 2 years • Legalized copy of valid GMP certificates of the manufacturer. (GMP certificate dated 17-10-2023 for production lines of beta lactam in the form of powder for injection and suspension for injection; Validity 5years from date of approval; GMP certificate dated 28-04-2022 for production lines of non beta lactam in the form of powder, granule for oral; liquid for oral; solution for injection and production lines of beta lactam in the form of powder, granule for oral; Validity 5years from date of approval) • Signed copy of stability study report of the applied formulation/product • Final specifications of the finished product i.e. Innovator's Specifications
	Remarks of evaluator[xxiii]	
	Decision: Approved. Registration Board further decided that registration letter will be issued after submission of following to Registration section: **i. Original, Valid, Legalized Free sales certificate and GMP certificate,** **ii. Original, Valid, notarized letter of authorization/sole agency agreement.**

	Remarks of evaluator[xxiii]	• Review of Sub-committee on Veterinary Drugs is awaited regarding therapeutic requirement keeping in view safety, efficacy and quality parameters.
	Decision: Deferred for review of Sub-committee on Veterinary Drugs is awaited regarding therapeutic requirement keeping in view safety, efficacy and quality parameters.	

Case No. 08
MISCELLANEOUS CASES

Following one application case was considered and approved in 333rd meeting of Registration Board conducted on 19-20th December, 2023 but the decision was recorded incorrect. Presented for the correction in recording of minutes.

1148.	Name and address of manufacturer / Applicant	M/s Linta Pharmaceuticals Plot No. 3, St No. S-5, National Industrial Zone, Rawat, Islamabad (DML No. 000810) Tablet section (General)
	Brand Name +Dosage Form + Strength	DESVEN tablet 50mg
	Composition	Each film coated tablet contains: Desvenlafaxine…..... 50mg
	Diary No. Date of R& I & fee	Dy No. 14608 dated 07-03-2019 Fee paid PKR 20,000/- vide Deposit Slip No. 0792399 dated 06-03-2019.
	Pharmacological Group	Other antidepressants ATC Code N06AX23
	Type of Form	Form 5
	Finished Product Specification	Not provided
	Pack size & Demanded Price	As per SRO
	Approval status of product in Reference Regulatory Authorities.	Extended release tablet (DIN 02535106) is Health Canada approved.

	Me-too status	Desven XR 50mg Tablet (For extended release tablet) Pharmevo (Pvt) Ltd
	GMP status	Last GMP inspection conducted on 10-07-2019
	Previous remarks of the Evaluator[xxiii].	• Latest GMP inspection report conducted within a period of last three years is required. • Finished product specifications are not provided. • Applied product is film coated tablet. Formulation approved in reference regulatory authority (Health Canada) and in Pakistan is extended release tablet. Change in formulation from film coated to extended release tablet along with relevant fee is required.
	Decision of 327th meeting of RB	**Deferred for following:** • **Latest GMP inspection report conducted within last three years.** • **Provision of finished product specifications.** • **Change in formulation from film coated to extended release tablet as available in reference regulatory authority, along with prescribed fee as per notification No.F.7-11/2012- B&A/DRAP dated 13-07-2021.**
	Reply of Applicant	Reply of applicant was submitted vide letter No. LP/RA-081-B/2023 dated 07-07-2023, stating the following: • Inspection of the facility was conducted in 02-2021 wherein the panel had recommended renewal of following five sections: Tablet (General) Capsule (General) Cream/Ointment/Gel (General) Capsule (Cephalosporin) Dry Suspension (Cephalosporin) • Finished product complies Manufacturer's Specifications. • Formulation changed from film coated to extended release tablet as available in reference regulatory authority along with Rs.7500/- fee vide DS No. 05302223173.
	Remarks of the Evaluator[xxiii].	Differential fee (PKR 22,500/-) shall be submitted by applicant as prescribed vide SRO 496(I)/2023 dated 17.04.2023 for pre-registration correction of composition.
	Decision: Approved with following label claim with Manufacturer's specifications: **"Each film coated tablet contains:** **Desvenlafaxine ..... 50mg."** **Applicant shall submit Rs. 22,500/- differential fee for pre-registration correction of composition, before issuance of registration letter.**	

The decision of the Board was erroneously recorded as follows:

"Approved with following label claim with Manufacturer's specifications:

"Each film coated tablet contains:

Desvenlafaxine .....50mg."

Applicant shall submit Rs. 22,500/- differential fee for pre-registration correction ofcomposition, before issuance of registration letter."

Whereas the decision is as follows:

"Approved with following label claim with Manufacturer's specifications:

"Each extended release tablet contains:

Desvenlafaxine .....50mg."

Applicant shall submit Rs. 22,500/- differential fee for pre-registration correction ofcomposition, before issuance of registration letter."

Submitted for consideration by the Board, please.

Decision: Registration Board decided to correct the decision of above case as follows:

"Approved with following label claim with Manufacturer's specifications:
"Each extended release tablet contains:
Desvenlafaxine .....50mg."
Applicant shall submit Rs. 22,500/- differential fee for pre-registration correction of composition, before issuance of registration letter."

Agenda of Evaluator PEC-XXIV

Agenda for applications submitted on Form 5F for Import
Anticancer: Cases marked and evaluated on the basis of decision of 257th meeting of Registration Board.

	Details of fee submitted	PKR 300,000/-: 18-04-2024
	The proposed proprietary name / brand name	**Luvica 140mg Capsule**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each capsule contains: Ibrutinib …….140mg
	Pharmacotherapeutic Group of (API)	Anti-Neoplastic, BTK Inhibitor
	Reference to Finished product specifications	In-House specification
	Detail of certificates attached (CoPP, Free sale certificate, GMP certificate)	Relevant CoPP not submitted.
	Details of letter of authorization / sole agency agreement	Name and address of the Market authorization holder declared on submitted COPP is different form that mentioned in Sole Agency agreement.

EVALUATION OF DATA	
Proposed Pack size	90 Capsules in HDPE container
Proposed unit price	As Per SRO.
The status in reference regulatory authorities	Imbruvica 140mg capsule by M/s Janssen Biotech, USA.
For generic drugs (me-too status)	Not available.
Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template.
Name, address of drug substance manufacturer	Hetro Labs Limited, Unit-I No.10 I.D.A Gaddapotharam Village, Jinnaram Manadal. Sangareddy District-502319 Telangana, INDIA.

Module-III Drug Substance:	Firm has submitted detailed drug substance data as per Module 3.2.S.
Module-III Drug Product:	Firm has submitted data of drug product as per Module 3.2.P.
Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted pharmaceutical equivalence and CDP of their product against Innovtor's Imbruvica 140 mg capsule.
Analytical method validation/verification of product	Firm has submitted analytical method verification studies for the applied product.
Container closure system of the drug product	HDPE container
Stability study data of drug product, shelf life and storage conditions	Submit stability studies data of three batches till claimed shelf at long term stability conditions and at accelerated stability conditions for 6 months. Justification shall be submitted for variation in batch sizes of two submitted stability batches.

Evaluation by PEC (XXIV):

Sr. No.	Section	Observations	Reply of the Firm
1.	**1.3**	Name and address of the Market authorization holder declared on submitted COPP is different form that mentioned in Sole Agency agreement.	Reply of the firm is still irrelevant as the submitted LOA is still same as the previously submitted one.
2**.**	**1.5.6**	Submitted specifications declared as "In house specifications" shall be justified with reference to the "Guidance Document Regarding Application of Drug Product Specifications" published vide letter "No. 9-2/2022-PEC	Firm has stated that they will follow Innovator's specification, however, fee is not submitted for revision of specifications.
3.	**3.2.P.2.2.1**	Comparative dissolution studies in three dissolution mediums i.e., pH 1.23, pH 4.5 & pH 6.8 shall be submitted since firm has provided CDP data for only one medium i.e., pH 6.8.	Firm has attached a document in which principle states "our drug product Imbuvica capsule is USFDA approved and as per recommendations we have performed CDP study in one medium i.e. pH 6.8,and it is not recommended to perform it in three dissolution mediums".
4.	**3.2.P.8.3**	Submit stability studies data of three batches till claimed shelf at long term stability conditions and at accelerated stability conditions for 6 months. Justification shall be submitted for variation in batch sizes of two submitted stability batches.	The principle has provided us commitment letter as per ICH guideline ICH-Q1A(R2) point 2.1.8, and have committed that they will submit the stability data for third batch and onward stability data for batch C2216. we have asked the principle to provide justification regarding variation in batch sizes, we will submit that as provided by the principal.

Decision: Approved with innovator's specifications subject to submission of fee for revision of specification i.e. 7500/-.
Registration letter shall be issued after the submission of the following data/ documents/clarification.

- **Clarification of name of Market Authorization Holder (abroad).**

• **Submit stability studies data of third batch till claimed shelf at long term stability conditions and at accelerated stability conditions for 6 months.**

Local Manufacture

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	N/A
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	GMP certificate issued by Additional Director I&E, DRAP Karachi issued on basis of inspection conducted on 7-10-2022.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Frim has submitted loan letter from M/s Ahson Drug Co. T/1 SITE Tando Adam.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record for product testing.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted certificate of 21 CFR compliance for the HPLC system along with audit trail report for product testing.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator (XXIV):

Sr No.	Observations	Firm's response
1.	Finished product specifications applied in Form 5F are BP Specifications whereas no monograph is available for the applied formulation, furthermore, in testing methods Albarkat Specs. are mentioned, justification shall be submitted in this regard.	Firm has declared it as typing mistake and has submitted finished drug product specifications as Al Barkat specifications.
2.	Drug product analytical method verification studies have not been submitted.	Submitted
3.	Batch size justification shall be submitted against the number of units required to complete the stability studies till claimed shelf life.	Submitted
4.	Compete batch manufacturing record for three stability batches shall be submitted.	
5.	Documents confirming procurement of drug substance.	

Decision of 335th RB meeting: Deferred for submission of following:

- Compete batch manufacturing record for three stability batches
- Documents confirming procurement of drug substance.

Sr. No.	Observations	Reply of the Firm
1.	Compete batch manufacturing record for three stability batches	Submitted.
1.	Documents confirming procurement of drug substance.	Firm has submitted copy of letter indicating the procurement of drug substance from M/s Ahsons Drug Company, Sindh on loan basis.

Decision: Approved with Manufacturer's Specifications subject to submission of fee for revision of specification i.e. 7500/-.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Case No. : Registration applications of New Section of Human drugs on Form 5-F (Local)

The Central Licensing Board in its 278th meeting held on 10th & 11th December, 2020 has considered and approved the grant of following four additional new sections to M/s Wezen Pharmaceuticals, Plot No. 23 & 24, SI, Industrial Estate, Rawat., under DML No.000882(Formulation), vide letter No. F. 1-30/2014-Lic. dated 30th December, 2020.

Sr. No.	Sections
1.	Tablet (General)
2.	**Capsule (General)**
3.	**Sachet (General)**
4.	Ointment/Creams/Gel (General)

Following 03 applications have been submitted by the firm for registration: -

1163.	Name, address of Applicant / Marketing Authorization Holder	M/s Wezen Pharmaceuticals, Plot No. 23 & 24, S-I, Industrial Estate, Rawat. (DML#000882)
	Name, address of Manufacturing site.	M/s Wezen Pharmaceuticals, Plot No. 23 & 24, S-I, Industrial Estate, Rawat.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	Not submitted.
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter of grant of section dated 30-12-2020 specifying Sachet (General) section.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No 26280 dated 31-10-2023
	Details of fee submitted	Rs.30,000/- dated 18-09-2023 Slip # 0292275887
	The proposed proprietary name / brand name	**Riseka 10mg Sachet**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Sachet Contains: Racecadotril…10mg
	Pharmacotherapeutic Group of (API)	Antidarrheal
	Pharmaceutical form of applied drug	white to almost white powder.
	Reference to Finished product specifications	Innovator's Specification
	Proposed Pack size	1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	MHRA Approved.

	For generic drugs (me-too status)	Hidrasec 10mg Sachet of M/s Abbott Laboratories Pakistan Limited.
	Name and address of API manufacturer.	Symed Labs Limited Unit-II :Plot No. 25/B, Phase III, I.D.A, Jeedimetla (Village), Quthbullalpur (Mandal), Medchal-Malkajgiri (Dist) -500 055 Telangana, India.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 12 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted pharmaceutical equivalence of their product against Hidrasec 10mg Sachet of M/s Abbott Laboratories Pakistan Limited. Comparative Dissolution Profile: Not performed.
	Analytical method validation/verification of product	Firm has submitted analytical method validation study reports for drug substance as well as drug product.

STABILITY STUDY DATA	
Manufacturer of API	Symed Labs Limited Unit-II :Plot No. 25/B, Phase III, I.D.A, Jeedimetla (Village), Quthbullalpur (Mandal), Medchal-Malkajgiri (Dist) -500 055 Telangana, India.
API Lot No.	2RAC0480622
Description of Pack (Container closure system)	Sachet
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH

	Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	T-04	T-05	T-06
Batch Size	1500 Sachet	1500 Sachet	1500 Sachet

No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	N/A
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Not submitted.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Drug substance clearance is in the name of M/s Weather fold Pharmaceuticals, Hattar instead of M/s Wezen Pharmaceuticals, Rawat.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record for product testing.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted certificate of 21 CFR compliance for the HPLC system along with audit trail report for product testing.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator (XXIV):

- Renewal status of the DML shall be submitted.
- Latest GMP certificate of the M/s Wezen Pharmaceuticals, Rawat shall be submitted.
- Drug substance clearance is in the name of M/s Weather fold Pharmaceuticals, Hattar instead of M/s Wezen Pharmaceuticals, Rawat, clarification shall be submitted.

Decision of 335th RB meeting: Registration Board deferred the case for submission of reply to the above cited shortcomings.

Sr No.	Observations	Firm's response
1.	Renewal status of the DML shall be submitted.	Receiving of renewal application of DML is submitted, dated:28.03.2023. that is in the due time.
2.	Latest GMP certificate of the M/s Wezen Pharmaceuticals, Rawat shall be submitted.	GMP certificate not submitted, however, inspection report conducted on 03.12.2020 & 04.12.2020 is submitted which covers the Capsule (general) section and Sachet section.
3.	Drug substance clearance is in the name of M/s Weather fold Pharmaceuticals, Hattar instead of M/s Wezen Pharmaceuticals, Rawat, clarification shall be submitted.	Firm has submitted copy of R & I receiving dated 16.02.2023 of a letter with subject Intimation of Material Obtained (Rececadotril 600gm) as Loan for Stability Studies from M/s Weather Folds Pharmaceuticals on 15.12.2022.

4.	Comparative dissolution not performed for granular powder. Justification shall be submitted.	Submitted.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of invoice cleared by DRAP Karachi office dated 21-06-2021 specifying import of 2Kg Tapentadol HCl (batch# TPT/50010121).
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record of stability testing of 3 batches.

5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted.
Remarks of Evaluator PEC (XXIV):		
Decision: Approved. • **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.** • **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**		

Routine case
Local Manufacture

1167.	Name, address of Applicant / Marketing Authorization Holder	M/s High-Q Pharmaceuticals, Plots No. B-64 KDA-1, Karsaz road, Karachi.
	Name, address of Manufacturing site.	M/s High-Q Pharmaceuticals, Plots No. 224 & 225/1, Sector-23, Korangi Industrial Area, Karachi. (DML#000597)
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Application Form Dy. No / Tracking ID & date of submission	Form 5F: Dy. No 28254 dated 05-10-2022
	Details of fee submitted	PKR 30,000/-: dated 30/09/2022
	The proposed proprietary name / brand name	**Ongen 4mg/5ml Syrup**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each 5ml contains: Ondansetron hydrochloride dihydrate ……4mg
	Pharmacotherapeutic Group of (API)	5HT3 Receptor Antagonist
	Reference to Finished product specifications	Innovator's specifications
EVALUATION OF DATA		
GMP status of the firm		Firm has submitted copy of GMP certificate that was valid till 29-06-2023.
Evidence of approval of manufacturing facility		Firm has submitted copy of letter of grant of section dated 17-09-2021 specifying Liquid Syrup (General) section.
Proposed Pack size		As per SRO
Proposed unit price		As per SRO
The status in reference regulatory authorities		Ondansetron hydrochloride Oral syrup 4mg/5ml of M/s Amneal Pharma (USFDA Approved)
For generic drugs (me-too status)		Onseron Syrup of M/s Indus Pharma.
Name and address of API manufacturer.		CTX Life Sciences Pvt. Ltd., Block No. 251/P, 253 to 255, 256/P,258/P,276/P,277,278/P,279 to 282,283/P, 384/P, GIDC, City Sachin, Dist. Surat, Gujrat State, INDIA.

Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template.
Module-III Drug Substance:	Firm has submitted detailed drug substance data as per module 3.2.S.
Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance as per zone IV-A conditions.
Module-III Drug Product:	Firm has submitted data of drug product as per module 3.2.P.
Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted pharmaceutical equivalence of their product against Onseron 4mg/5ml Syrup of M/s Indus Pharma.
Analytical method validation/verification of product	Firm has submitted analytical method validation study reports for drug substance as well as drug product.

STABILITY STUDY DATA

API Lot No.	ON200004		
Description of Pack (Container closure system)	Amber coloured glass bottle.		
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	4ONSPD01/2022	4ONSPD02/2022	4ONSPD03/2022
Batch Size	1000ml (20 bottles)	1000ml (20 bottles)	1000ml (20 bottles)
Manufacturing Date	01-2022	01-2022	01-2022

No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

Reference of previous approval of applications with stability study data of the firm (if any)	N/A
Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (No.22063346) of the firm M/s CTX Life Sciences Pvt. Ltd., Block No. 251/P, 253 to 255, 256/P, 258/P, 276/P, 277, 278/P, 279 to 282, 283/P, 384/P, GIDC, City Sachin, Dist. Surat, Gujrat State, INDIA, issued by FDCA India. The certificate is valid till 29-05-2025.
Documents for the procurement of API with approval from DRAP (in case of import).	Firm has not submitted attested copy of invoice for the procurement of API.
Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record for product testing.

Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted certificate of 21 CFR compliance for the HPLC system
Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC (XXIV):

Sr. No.	Observations	Response of the Firm
1.	Proof of API procurement/import and its clearance from the AD (I&E), DRAP, Karachi is not provided.	Firm has informed that they have received 1kg sample of ondansetron from manufacturer (CTX Lafe Sciences) directly through courier and same batch of material is used for trial of Ongene syrup. Firm has submitted copy of airway bill and tracking details as well.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Cases Of Export Facilitation

Deputy Director (PRV/EFD) vide letter No. F. 1-6/2019-PR-1(EFD) dated 28-02-2023 has informed that M/s Searl Company Limited, Karachi, has reached the benchmark of more than 100,000USD during fiscal year 2020-2021 and requested for the priority consideration of the following molecule: -

1168.	Name, address of Applicant / Marketing Authorization Holder	The Searle Company Limited F-319, S.I.T.E., Karachi, Pakistan.
	Name, address of Manufacturing site.	The Searle Company Limited F-319, S.I.T.E., Karachi, Pakistan.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☒ New Drug Product (NDP) ☐ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 28659 dated: 10/10/2022
	Details of fee submitted	PKR 75,000/-, dated 30/09/2022
	The proposed proprietary name / brand name	Obilet 5mg Tablets
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Obilet 5mg Tablets Each film coated tablet contains: Obeticholic Acid..... 5mg
	Pharmaceutical form of applied drug	Film coated tablet.
	Pharmacotherapeutic Group of (API)	Bile and liver therapy, bile acids and derivatives
	Reference to Finished product specifications	Innovator's Specifications
	Proposed Pack size	As per SRO

	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Approved by UK, with the name of OCALIVA 5mg film-coated tablets
	For generic drugs (me-too status)	Not Available
	GMP status of the Finished product manufacturer	New GMP granted on 05/08/2022. Valid till 04-08-2024 Tablet (General & General Antibiotic) section approved.
	Name and address of API manufacturer.	Obeticholic Acid: Manufacturer: M/s A.R. Life Sciences Private Limited (Unit II) Plot no. 33, S.V. Co-op. Industrial estate, Jeedimetla, Qutubullapur, Medchal Dist. Hyderabad-Telangana state India-500055
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Relevant information has been submitted including Analytical method validation studies & batch analysis.
	Stability studies	OBETICHOLIC ACID: Stability study conditions: Long term: 5°C ± 3°C for 24 months Accelerated: 25°C ± 2°C / 60% ± 5%RH for 6 months
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its validation studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence has been established against the reference product that is "Abeticolic 5 mg tablets" by Dyson Research Laboratories (Pvt.) Limited. CDP has been performed against the same the reference product that is "Abeticolic 5 mg tablets" by Dyson Research Laboratories (Pvt.) Limited.
	Analytical method validation/verification of product	Method validation studies have submitted including system suitability, specificity, linearity, accuracy, precision, robustness, and range

Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Dapagliflozin: Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 24 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted pharmaceutical equivalence & CDP of their product against the test/reference product Farxiga

		Tablets 5mg manufactured by AstraZenica, USA.
	Analytical method validation/verification of product	Firm has submitted analytical method validation study reports for drug substance as well as drug product.

STABILITY STUDY DATA

Manufacturer of API	Fuxin Long Rui Pharmaceutical Co Ltd Fluoride Industrial Park, Fumeng County (Yi Ma Tu), Fuxin City, Liaoning, Province -123000, China		
API Lot No.	DG-20201201-D03-DG06-01		
Description of Pack (Container closure system)	Alu-Alu Blister		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 75% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3 & 6 (Months)		
Batch No.	074DT02	074DT03	074DT04
Batch Size	3000 Tablets / 0.338235 Kg	3000 Tablets / 0.338235 Kg	3000 Tablets / 0.338235 Kg
Manufacturing Date	07-2021	07-2021	07-2021
Date of Initiation	09-08-2021	09-08-2021	09-08-2021
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	N/A
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP Certificate (No. LN210012) inspection dated 21-05-2021 issued by People's Republic of China.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice cleared on 07-05-2021 specifying 400gm of Dapagliflozin Propanediol Monohydrate. The invoice is cleared by AD (I&E) DRAP, Karachi.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record for product testing.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted certificate of 21 CFR compliance for the HPLC system along with audit trail report for product testing.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator (XXIV):

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

1172.	Name, address of Applicant / Marketing Authorization Holder	M/s Searle Pakistan Limited, C-14, Manghopir Road, S.I.T.E., Karachi-75700, Pakistan
	Name, address of Manufacturing site	M/s Searle Pakistan Limited, C-14, Manghopir Road, S.I.T.E., Karachi-75700, Pakistan
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	Firm has submitted copy of GMP certificate dated 15-02-2022 based on inspection conducted on 08-10-2021.
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter of grant of section dated 26-10-2020 specifying Tablet (General) section.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	**Dy. No** 608 dated 06-01-2023
	Details of fee submitted	PKR 30,000/- Dated 19-12-2022
	The proposed proprietary name / brand name	**Disyn Tablets 10mg**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated tablet contains: Dapagliflozin Propanediol Monohydrate Equivalent to Dapagliflozin …..... 10mg
	Pharmacotherapeutic Group of (API)	SGLT2 Inhibitors
	Pharmaceutical form of applied drug	Yellow diamond shaped film coated tablet with both sides plain.
	Reference to Finished product specifications	Innovator's
	Proposed Pack size	2 x 14's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Farxiga Tablets (USFDA Approved)
	For generic drugs (me-too status)	Xiga Tablet 10mg of M/s CCL Pharmaceutical (Pvt) Ltd (Reg.No. 090505)
	Name and address of API manufacturer.	Fuxin Long Rui Pharmaceutical Co Ltd Fluoride Industrial Park, Fumeng County (Yi Ma Tu), Fuxin City, Liaoning, Province -123000, China
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and

		justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 24 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted pharmaceutical equivalence & CDP of their product against the test/reference product Farxiga Tablets 10mg manufactured by AstraZenica, USA.
	Analytical method validation/verification of product	Firm has submitted analytical method validation study reports for drug substance as well as drug product.

Agenda of Evaluator PEC-XXV

Case no. 01 Registration applications for local manufacturing of (veterinary) drugs

a. New Cases

1173.	Name and address of manufacturer / Applicant	M/s Farm Aid Group, Plot # 3/2, Phase I & II, Hattar Industrial Estate, Haripur.
	Brand Name +Dosage Form + Strength	F-Ben 200 Granules
	Composition	Each Kg contains: Albendazole…200gm
	Diary No. Date of R& I & fee	Dy.No 22746 dated 11-08-2022 Rs.30,000/- dated 11-08-2022 (slip No. 784208008)
	Pharmacological Group	Anthelmintic
	Type of Form	Form 5
	Finished product Specifications	As per Innovator's specifications
	Pack size & Demanded Price	10gm, 20gm, 30gm, 50gm, 100gm, 500gm, 1Kg, 5Kg; Decontrolled
	Me-too status	Bendazole Oral Powder of M/s Vetz Pharmaceuticals (Private) Limited., Kotri Sindh. (Reg. No.117214)
	GMP status	cGMP certificate dated 14-10-2022 based on inspection conducted on 15-04-2022.
	Remarks of the Evaluator	**Oral Powder General Veterinary** section confirmed from cGMP certificate dated 14-10-2022 based on inspection conducted on 15-04-2022.
	Decision: Approved.	
1174.	Name and address of manufacturer / Applicant	M/s Farm Aid Group, Plot # 3/2, Phase I & II, Hattar Industrial Estate, Haripur.
	Brand Name +Dosage Form + Strength	F-Doxy Water Soluble Powder
	Composition	Each Kg contains: Doxycycline HCl…200gm Tylosin tartrate…100gm Colistin Sulphate…50MIU Bromhexine HCl…2gm
	Diary No. Date of R& I & fee	Dy.No 23821 dated 23-08-2022 Rs.30,000/- dated 22-08-2022 (slip No. 2981447450)
	Pharmacological Group	Antibacterial

	Type of Form	Form 5
	Finished product Specifications	As per Innovator's specifications
	Pack size & Demanded Price	100gm, 250gm, 500gm, 1Kg; Decontrolled
	Me-too status	Doximax Powder of M/s Nawan Laboratories (Pvt) Ltd., Karachi. (Reg. No. 074019)
	GMP status	cGMP certificate dated 14-10-2022 based on inspection conducted on 15-04-2022.
	Remarks of the Evaluator	**Oral Powder General Veterinary** section confirmed from cGMP certificate dated 14-10-2022 based on inspection conducted on 15-04-2022. **Shortcomings:** The firm shall submit fee Rs. 30,000/- for correction in formulation (salt form) prescribed vide S.R.O. 496(I)/2023 dated 17-04-2023 before issuance of registration letter.
	Decision: Approved. The firm shall submit fee Rs. 30,000/- for correction in formulation (salt form) prescribed vide S.R.O. 496(I)/2023 dated 17-04-2023 before issuance of registration letter.	
1175.	Name and address of manufacturer / Applicant	M/s Farm Aid Group, Plot # 3/2, Phase I & II, Hattar Industrial Estate, Haripur.
	Brand Name +Dosage Form + Strength	FCTC Oral Water Soluble Powder
	Composition	Each Kg contains: Chlortetracycline HCl…200gm
	Diary No. Date of R& I & fee	Dy.No 23822 dated 23-08-2022 Rs.30,000/- dated 22-08-2022 (slip No. 10095866)
	Pharmacological Group	Antibacterial
	Type of Form	Form 5
	Finished product Specifications	As per Innovator's specifications
	Pack size & Demanded Price	100gm, 250gm, 500gm, 1Kg; Decontrolled
	Me-too status	Tetra Shell 20 Water Soluble Powder of M/s Inshal Pharmaceutical Industries, Islamabad. (Reg. No. 075775)
	GMP status	cGMP certificate dated 14-10-2022 based on inspection conducted on 15-04-2022.
	Remarks of the Evaluator	**Oral Powder General Veterinary** section confirmed from cGMP certificate dated 14-10-2022 based on inspection conducted on 15-04-2022.
	Decision: Approved.	
1176.	Name and address of manufacturer / Applicant	M/s Farm Aid Group, Plot # 3/2, Phase I & II, Hattar Industrial Estate, Haripur.
	Brand Name +Dosage Form + Strength	Fagofon 96% Powder
	Composition	Each gram contains: Trichlorfon…960mg
	Diary No. Date of R& I & fee	Dy.No 22749 dated 11-08-2022 Rs.30,000/- dated 10-08-2022 (slip No. 497583244)
	Pharmacological Group	Antiparasitic
	Type of Form	Form 5
	Finished product Specifications	As per Innovator's specifications
	Pack size & Demanded Price	10gm, 20gm, 30gm, 50gm, 100gm, 500gm, 1Kg, 5Kg; Decontrolled
	Me-too status	Ectozone-96 Powder of M/s QAS International, Kamoki, District Gujranwala. (Reg. No. 117073)
	GMP status	cGMP certificate dated 14-10-2022 based on inspection conducted on 15-04-2022.
	Remarks of the Evaluator	**Oral Powder General Veterinary** section confirmed from cGMP certificate dated 14-10-2022 based on inspection

		conducted on 15-04-2022.
	Decision: Approved.	
1177.	Name and address of manufacturer / Applicant	M/s Farm Aid Group, Plot # 3/2, Phase I & II, Hattar Industrial Estate, Haripur.
	Brand Name +Dosage Form + Strength	F-Tet Powder
	Composition	Each Kg contains: Oxytetracycline HCl…30% Florfenicol…30%
	Diary No. Date of R& I & fee	Dy.No 22747 dated 11-08-2022 Rs.30,000/- dated 10-08-2022 (slip No. 28525946889)
	Pharmacological Group	Antibacterial
	Type of Form	Form 5
	Finished product Specifications	As per Innovator's specifications
	Pack size & Demanded Price	10gm, 20gm, 30gm, 50gm, 100gm, 500gm, 1Kg, 5Kg; Decontrolled
	Me-too status	Biofoxy 30% Water Soluble Powder of M/s Bio-Labs (Pvt) Ltd., Islamabad. (Reg. No.117173)
	GMP status	cGMP certificate dated 14-10-2022 based on inspection conducted on 15-04-2022.
	Remarks of the Evaluator	**Oral Powder General Veterinary** section confirmed from cGMP certificate dated 14-10-2022 based on inspection conducted on 15-04-2022.
	Decision: Approved.	
1178.	Name and address of manufacturer / Applicant	M/s Farm Aid Group, Plot # 3/2, Phase I & II, Hattar Industrial Estate, Haripur.
	Brand Name +Dosage Form + Strength	E-Tet Powder
	Composition	Each Kg contains: Oxytetracycline HCl…100gm Erythromycin thiocyanate…150gm
	Diary No. Date of R& I & fee	Dy.No 23826 dated 23-08-2022 Rs.30,000/- dated 22-08-2022 (slip No. 7841241065)

	Me-too status	Fluxim-5% Injection (10ml: Reg. No. 109941; 20ml:109942; and 50ml: 109943) of M/s Univet Pharmaceuticals, Rawalpindi.
	GMP status	
	Remarks of the Evaluator	**Veterinary Liquid Injection (General)** section confirmed vide letter No.F. 1-29/2007-Lic (M-236) dated 23-09-2014. **Shortcomings:** • Latest GMP inspection report conducted within the period of last three years. • Separate registration is granted to separate pack size/fill volume of injectable dosage form. However, multiple pack sizes of injectable dosage form are demanded in a single application. So clarification is required for which pack size/ fill volume you want to apply this dossier. • Firm shall submit fee of Rs.30000/- for correction in formulation (salt form), as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021. • Title of the firm mentioned on DML is "***M/s Izfaar Pharmaceutical Industries***" while "***M/s Izfaar Pharmaceutical Pvt. Ltd."*** is mentioned on form-5 and fee challan; clarify.
	Decision of 330th meeting: Deferred for following: • Latest GMP inspection report conducted within the period of last three years. • Choice of only one pack size. • Revised form-5 along with fee of Rs.30000/- for correction in formulation (salt form) in line with reference product, as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021 • Clarification regarding title of the firm since on DML "*M/s Izfaar Pharmaceutical Industries*" while "*M/s Izfaar Pharmaceutical Pvt. Ltd."* is mentioned on form-5 and fee challan. The Board further decided that the applicant shall submit the response within 1 month after publication of the minutes, otherwise the application shall be placed in the upcoming meeting of the Board for final decision.	
	Updated status: The firm has submitted the following:	

	• GMP certificate based upon evaluation conducted on 02-07-2021 • Demanded pack size: **10ml** • **Me-too/generic status:** Floxon Injection 10ml of M/s Amazon Pharmaceutical (Pvt.) Ltd, Bhimber, AJK. (Reg. No. 119707) • Firm has revised the label claim as following **Each ml contains:** **Flunixin as Meglumine.....50mg** • The firm has submitted fee Rs. 30,000/- dated 21-02-2024 vide challan No. 02936402373 for correction of label claim in line with reference product. • Firm has submitted copy of letter No F. 1-29/2007-Lic dated 09th October, 2017 for change of title from *M/s Izfaar Pharmaceutical Industries*" to "*M/s Izfaar Pharmaceutical Pvt. Ltd"*	
	Decision: Approved with following label claim in 10ml pack size: **Each ml contains:** **Flunixin as Meglumine.....50mg**
