MINUTES OF 336TH MEETING OF REGISTRATION BOARD HELD ON 4TH TO 6TH JUNE, 2024

Item No.	Detail of Item	Page No
I.	Confirmation of Minutes of 335th meeting of Registration Board…….	2
II.	Division of Pharmaceutical Evaluation & Registration ----------	
	Pharmaceutical Evaluation Cell (PEC) ----------	4-2953
	Registration-I Section ----------	2953-2962
	Registration-II Section ----------	2962-2969
	Post Registration-I Section ----------	2970-2976
	Post Registration-II Section ----------	2976-3079
	Export Facilitation Desk----------	3079-3091
	Import & Vet-I Section ----------	3091-3095
	Import & Vet-II Section ----------	3095-3133
	RRR Section ----------	3133-3212
III.	Division of Biological Evaluation & Research	3212-3328
IV.	Additional Agenda	3329-3528
V.	Division of Quality Assurance & Laboratory Testing	3528-3540
VI.	Any other Item with the permission of Chair	----------

DRUG REGULATORY AUTHORITY OF PAKISTAN
PRIME MINISTER'S NATIONAL HEALTH COMPLEX.
PARK ROAD, CHAK SHEHZAD
ISLAMABAD.

336th meeting of Registration Board was held on 4th to 6th June, 2024 in the Committee Room, Drug Regulatory Authority of Pakistan, Prime Minister's National Health Complex, Park Road, Islamabad.

The meeting was chaired by Dr. Muhammad Fakhruddin Aamir, Chairman,Registration Board, DRAP. The meeting started with recitation of the Holy Verses.

Following members attended the meeting:

1.	Lt. Gen.(R) Prof. Dr. Karamat A. Karmat, (HI-M, SI-M), Former Surgeon General Pakistan, Rawalpindi (On line)	Co-opted Member
2.	Mr. Muhammad Arif Ch, Director, Division of BE&R	Member
3.	Mr. Ajmal Sohail Asif, Director, Division of QA&LT	Member
4.	Ch. Zeeshan Nazir Bajar, Additional Director	Secretary
5.	Mr. Muhammad Aslam, Additional Draftsman, M/o Law &Justice, Islamabad.	Member
6.	Mr. Ghulam Mujtaba, Deputy Director, Rep. of IPO,Islamabad. (Online)	Member
7.	Mr. Imranullah Khan, Senior Drug Analyst. Rep of Director DTL, Govt. of KP	Member
8.	Dr. Muhammad Akram, Animal Husbandry Commissioner, M/o NFS, Islamabad	Member
9.	Mr. M. Ali Tasleem, Deputy Drugs Controller, DTL, Govt. of Punjab	Member
10.	Mirza Mehmood Baig, Director, DTL, Govt. of Baluchistan Quetta	Member
11.	Mr. Iftikhar A. Chaudhary, Hospital Pharmacist, Lahore (Online)	Co-opted Member
12.	Dr. Qurban Ali, Ex-Director General, NVL, Veterinary Expert	Co-opted Member
13.	Mr. Shahrukh Ali, Assistant Director, Rep. of Director,MD&MC Division	Member

Mr. Nadeem Alamgir & Mr. Saqib Zia (Pharma Bureau), Mr. Jalal-ud-Din Zafar (PPMA) and Mr. Amir Ilyas & Mr. Zia ul Haq (PCDA) attended the meeting as observers.

Item No. I. Confirmation of Minutes of 335th meeting of Registration Board

335th meeting of Registration Board was held on 25th April, 2024. Accordingly, draft minutes of the 335th meeting of Registration Board were prepared and circulated among the members through email on 15th May, 2024 for their perusal / approval / comments (if any). As per directions of Chairman Registration, Board members were requested to comment on the agenda item of veterinary products by 17th May, 2024 (09:00 am). While comments on rest of agenda were desired by 20th May, 2024 (09:00 am). Lt. Gen. Karamat A. Karamat (R) through email dated 17th May, 2023 commented *as "Biological portion recommended for approval."* Rest of the members did not comment. Hence minutes of 335th meeting of RB stand approved.

Decision: Registration Board noted the information and unanimously confirmed minutes of 335th meeting of Registration Board.

Item No. I Division of Pharmaceutical Evaluation & Registration

Pharmaceutical Evaluation Cell (PEC)

Sr. No	Name of Evaluator	Title
1.	Mr. Ammar Ashraf Awan	Evaluator PEC-II
2.	Dr. M. Haseeb Tariq	Evaluator PEC-III
3.	Mst. Farzana Raja	Evaluator PEC-IV
4.	Mst. Iqra Aftab	Evaluator PEC-V
5.	Dr. Farhadullah	Evaluator PEC-XI
6.	Mr. Shahid Nawaz	Evaluator PEC-XIII
7.	Ms. Saima Hussain	Evaluator PEC-XV
8.	Ms. Sana Kanwal	Evaluator PEC-XX
9.	Mr. M. Tahir Waqas	Evaluator PEC-XXI
10.	Ms. Maham Misbah	Evaluator PEC-XXIII
11.	Mr. Hafiz Asif Iqbal	Evaluator PEC-XXIV
12.	Ms. Najia Saleem	Evaluator PEC-XXV
13.	Mr. Muneeb Ahmed Cheema	Deputy Director (PE&R)
14.	Mr. Salateen Waseem Philip	Deputy Director (PEC)
15.	Mr. Sarfraz	Assistant Director (PE&R)
16.	Mr. Adil Saeed	Deputy Director (PE&R)

Agenda of Evaluator PEC-II

Case no. 01 Registration applications for local manufacturing of (Human) drugs on Form 5F

a. New cases

1.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Seatle Pvt Ltd. 45 Km, Multan Road, Lahore**
	Name, address of Manufacturing site.	M/s Global Pharmaceuticals Pvt Ltd. Plot # 204-205, Industrial Triangle, Kahuta Road, Islamabad
	Status of the applicant	☐ Manufacturer ☐ Importer ☒ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Dy. No. and date of submission	Dy.No 33020 dated 17-11-2022
	Details of fee submitted	Rs.75,000/- dated 12-10-2022
	The proposed proprietary name / brand name	**Tamdow-S 6/0.4 mg Tablet**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each bilayer modified release tablet contains: Solifenacin succinate…….6mg (Corresponding to 4.5mg of Solifenacin base) Tamsulosin hydrochloride…….0.4mg (Corresponding to 0.37mg of Tamsulosin base)
	Pharmaceutical form of applied drug	Film coated tablets.
	Pharmacotherapeutic Group of (API)	Antimuscarinics/Alpha-blockers
	Reference to Finished product specifications	Innovator
	Proposed Pack size	5's, 10's, 14's, 20's, 28's, 30's, 50's and 100's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Vesomni Tablet by M/s Astellas Pharma Ltd., EMA Approved.
	For generic drugs (me-too status)	Tamsolin -S by M/s Getz Pharma
	GMP status of the Finished product manufacturer	Firm has submitted copy of GMP certificate dated 04- 01-2022.
	Name and address of API manufacturer.	M/s Alphamed Formulations Pvt. Ltd Sy.No.225, Sampanbole Village Shamirpet Mandel, Medchal-Malkajigiri District, Telangana-500 078, India
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification

		of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of Solifenacin Succinate & Tamsulosin HCl is not present in Pharmacopoeia. The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 24 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Tamsulosin HCL Batches: (8000173-039(A), 8000173-045(A), 8000173-046(A)) Solifenacin Succinate Batches: (8000173-039(B), 8000173-045(B), 8000173-046(B))
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical equivalence and CDP Studies data in three dissolution mediums of pH 1.2, 4.5 & 6.8 has been submitted against the Tamsolin-S tablet pf M/s Getz Pharma
	Analytical method validation/verification of product	Method validation studies have submitted including linearity, range, accuracy, precision, specificity.

STABILITY STUDY DATA	
Manufacturer of API	M/s Alphamed Formulations Pvt. Ltd. Sy.No.225, Sampanbole Village Shamirpet Mandel, Medchal-Malkajigiri District, Telangana-500 078, India
API Lot No.	Tamsulosin HCl: AT0018-002 Solifenacin Succinate: AT0019-003
Description of Pack (Container closure system)	Alu-Alu blister packed in unit carton (1×10's)
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH

Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	21L133	21M294	--
Batch Size	110,000 tab	110,000 tab	--
Manufacturing Date	11-2021	12-2021	--
Date of Initiation	29-12-2021	20-01-2022	--
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	NA
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate valid till 30/08/2022.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not submitted
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator(Ammar):

Section#	Observations	Firm's response
3.2.S.4 (Tamsulosin HCl)	• Submitted drug substance specifications of Tamsulosine granules does not include test of dissolution hence it's not evident that the Tamsulosine granules are modified release or otherwise. Justification shall be submitted in this regard. • Submitted COA from both drug substance and drug product manufacturer does not declare the Tamsulosine granules as "modified release". • Justification shall be submitted for using Tamsulosine granules 0.178% w/w% for drug product formulation without establishing its dissolution profile.	

3.2.P.1	• Submitted label claim does not elaborate the immediate release & modified release layer of the dosage form.	
3.2.P.2.2.1	• Justification shall be submitted for performing CDP studies till 12 hours' time point only, whereas the drug product specifications mention the last time point as of 16hrs.	
3.2.P.5	• Justification shall be submitted for applying speed of 100rpm with USP Apparatus II in the dissolution test with reference to the provisions of USP general chapter <1092>.	
3.2.P.8.3	• Documents confirming import of drug substance used for formulation of stability batches, attested by DRAP, shall be submitted.	
	• Dispensed quantity of Tamsulosine HCl granules & Solifenacin granules, shall be justified against the potency determined during drug substance analysis.	

Decision: Deferred for submission of reply to above cited shortcomings

2.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Global Pharmaceuticals (Pvt) Ltd Plot # 204-205, Industrial Triangle, Kahuta Road, Islamabad**
	Name, address of Manufacturing site.	M/s Global Pharmaceuticals (Pvt) Ltd Plot # 204-205, Industrial Triangle, Kahuta Road, Islamabad
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	Firm has submitted copy of GMP Certificate dated 04-01-2022 based on inspection conducted on 03-01-2022.
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter of Grant of section dated 13-06-2017 specifying Tablet (General) Section
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Dy. No. and date of submission	Dy.No 30453 dated 27-10-2022
	Details of fee submitted	Rs.75,000/- dated 24-10-2022

	The proposed proprietary name / brand name	**Soglu-Met XR 10/1000 mg Tablet**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated tablet contains: Empagliflozin……. ….10mg Metformin HCl (as extended release)…...1000mg
	Pharmacotherapeutic Group of (API)	**Metformin HCl:** Biguanide class of Anti-diabetics ATC code: A10BA02 **Empagliflozin:** Sodium-glucose co-transporter 2 (SGLT2) inhibitors. ATC code: A10BK03
	Pharmaceutical form of applied drug	Extended Release Tablet
	Reference to Finished product specifications	Innovator's Specs
	Proposed Pack size	Pack Size: 30's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	USFDA Approved.
	For generic drugs (me-too status)	**Brand Name:** Xenglu-Met XR Tab 25/1000mg of M/s Hilton Pharma Pvt Ltd
	Name and address of API manufacturer.	**EMPAGLIFLOZIN :** **Name:** Fuxin Long Rui Pharmaceutical Co.,Ltd. **Address:** Fluoride industrial park, Fuxin city, Liaoning province, 123000, China. **METFORMIN HCl:** **Name:** AARTI DRUGS LIMITED **Address:** Plot No. 211 - 213, Road No.2 G.I.D.C., Sarigam, Dist.: Valsad, Gujarat . INDIA.396155
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions as per Zone IV

		conditions.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted pharmaceutical equivalence of their product against the Reference product Empagen-M XR 10/1000mg Tablets manufactured by Ferozsons Laboratories Limited. Firm has submitted CDP results of their product against the reference product Empagen-M XR 10/1000mg Tablets in 3 dissolution medias.
	Analytical method validation/verification of product	Firm has submitted analytical method validation study reports for drug substance as well as drug product.

Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template.
Module-III Drug Substance:	Firm has submitted detailed drug substance data as per module 3.2.S.
Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions as per Zone IV conditions.
Module-III Drug Product:	Firm has submitted data of drug product as per module 3.2.P.
Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted pharmaceutical equivalence of their product against the Reference product Empagen-M XR 12.5/1000mg Tablets manufactured by Ferozsons Laboratories Limited. Firm has submitted CDP results of their product against the reference product Empagen-M XR 12.5/1000mg Tablets in 3 dissolution medias.
Analytical method validation/verification of product	Firm has submitted analytical method validation study reports for drug substance as well as drug product.

STABILITY STUDY DATA			
API Lot No.	E-20190920-D02-E06-01 MEF/10030953		
Description of Pack (Container closure system)	HDPE Bottles		
Stability Storage Condition	Real time : 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	ST21J027	ST21J028	--
Batch Size	5000 Tablet	5000 Tablet	--
Manufacturing Date	09-2021	09-2021	--
No. of Batches	02		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA	
Reference of previous approval of applications with stability study data of the firm (if any)	Last Product Specific Inspection of the firm was conducted for Promig Plus 375mg/20mg Tablet and Promig Plus 375mg/20mg Tablet, for which the inspection was conducted on 14-03-2019 and the report was presented in 289th meeting of Registration Board. The report confirms following points:

	• The HPLC software is 21CFR compliant. • Firm has demonstrated audit trail reports of testing.
Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Empagliflozin:** Firm has submitted copy of DML issued by NMPA of China. **Metformin HCl:** Firm has submitted copy of GMP Certificate (23064344) dated 15-03-2023 issued by Food And Drug Control Administration India.
Documents for the procurement of API with approval from DRAP (in case of import).	**Empagliflozin:** Firm has submitted copy of commercial invoice cleared on 10-01-2020 specifying 1.5Kg of Empagliflozin. The invoice is cleared by AD (I&E) DRAP, with Invoice No HN19120501-H. **Metformin HCl:** Firm has submitted copy of License to import issued on 05-08-2020 specifying 1000KG of Metformin HCl. The invoice is cleared by AD (I&E) DRAP, with Invoice No EXP/302/20-21.
Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record for product testing.
Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted certificate of 21 CFR compliance for the HPLC system along with audit trail report for product testing.
Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC[II]:

Sr.#	Section#	Observation	Firm's response
1.	**3.2.S.1.3**	➢ In contrary to the innovator drug product literature from the US FDA & EMA, the section declares the solubility of Empagliflozin in water as "practically insoluble". Justification shall be submitted in this regard.	Firm has referred to the drug substance eanalytuical procedure submitted by m/s global Pharma wherein solubility of Empagliflozin ha sbeen declared as "Very slightly soluble".
3.	**3.2.S.4.2**	Drug substance analytical procedure of Metformin HCl is not as per the latest monograph of USP for Metformin HCl.	Revised analytical method submitted.
4.	**3.2.S.4.3**	Analytical method verification studies shall be submitted from M/s Global Pharmaceuticals for Metformin HCl for the analytical method as per latest monograph of USP.	Submitted.
7.	**3.2.P.3.5**	Submitted process validation protocol does not include details of in-process test by way of Assay at the drug layering stage, applied to confirm that desired content for Empagliflozin has been achieved via active coating.	We will revise the protocol and will follow the same for validation of 1st three commercial batches after registration.
9.	**3.2.P.8.3**	• As per submitted analytical record the Assay & Dissolution analysis has been	Assay & Dissolution analysis has been performed on

			performed at different wavelength than that specified in the submitted drug product analytical procedure. • Justification shall be submitted on basis of performance based evidence for adding 5% overage of "Empagliflozin" in the applied batch formulation. • Evidence of availability of facility of HDPE packaging of tablets.	wavelength specified in submitted drug product analytical control procedure i.e. 261nm for Metformin HCI and 210nm for Empagliflozin. We have performed analysis / acquisition on Hitachi HPLC at said dual wavelengths but system generates the report on single auto maximum average wavelength that display on the chromatogram i.e. 225nm and has no link with mentioned areas. All the area mentioned is of those dual wavelengths. System generated instrument method report is submitted. Additon of 5% overage of "Empagliflozin" in the applied batch formulation was done to compensate the coating loss during active coating.

Decision: Registration Board approved the applications of Soglu-Met XR 10/1000 mg Tablet, Soglu-Met XR 25/1000 mg Tablet, Soglu-Met XR 5/1000mg Tablet & Soglu-Met XR 12.5/1000mg Tablet.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

6.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Dynatis Pakistan Pvt Ltd. Plot No.710, Sundar Industrial Estate, Raiwind Road, Lahore**
	Name, address of Manufacturing site.	M/s Dynatis Pakistan Pvt Ltd. Plot No.710, Sundar Industrial Estate, Raiwind Road, Lahore

	Details of fee submitted	Rs.75,000/- dated 18-10-2022
	The proposed proprietary name / brand name	**OEM Co-Pack Oral Rehydration Salts+zinkup 20mg Oral Dispersible Tablet**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Sachet Contains: Sodium Chloride…1.3gm Potassium Chloride…0.75gm Sodium Citrate…1.45gm Glucose…6.75gm Each Oral Dispersible Tablet Contains: Zinc Sulphate Monohydrate 54.9mg Eq. to Elemental Zinc…20mg
	Pharmacotherapeutic Group of (API)	**OEM Sachet:**

		BP Specifications. **Zinkup 20mg Oral Dispersible Tablet:** USP specifications.
	Reference to Finished product specifications	USP
	The status in reference regulatory authorities	Recommende din WHO EML
	For generic drugs (me-too status)	Not available
	Proposed Pack size	As per SRO

Evaluation by PEC[II]:

Sr.#	Section#	Observation	Firm's response
1.	**1.3.4**	➢ Latest GMP inspection report of the drug product manufacturer, conducted within last three years shall be submitted,	
3.	**1.6.5**	➢ Valid GMP certificates of drug substance manufacturers shall be submitted.	
4.	**3.2.S.3**	Details shall be submitted as per CTD guidance document for all Drug substances of ORS Sachet.	
5.	**3.2.S.4**	Detailed analytical procedures and specifications for the testing of drug substance shall be provided from Drug substance manufacturer for all Drug substances of ORS Sachet.	
7	**3.2.S.4.4**	➢ COA of drug substance from the drug substance manufacturer shall be submitted for all Drug substances of ORS Sachet.	
8.	**3.2.S.7.3**	Stability studies data as per Zone IV conditions shall be submitted for all Drug substances of ORS Sachet.	
9.	**3.2.S.4.1 (Zinc Sulphate)**	Details of drug substance specifications and analytical procedure shall be submitted form drug substance manufacturer.	
10.	**3.2.S.4.2 (Zinc Sulphate)**	Submitted Assay method for Zinc sulphate is different form that recommended by USP monograph.	
11.	**3.2.S.4.3 (Zinc Sulphate)**	Analytical method verification studies for Assay analysis of Zinc suilphate shall be submitted as per the method recommended in USP monograph.	
12.	**3.2.S.5 (Zinc Sulphate)**	As per USP monograph reference standard of Zinc sulphate is required for Assay analysis, while frim has not submitted any such document.	
13.	**3.2.S.7.3 (Zinc Sulphate)**	Stability studies data of three batches shall be submitted as per Zone IV conditions with testing as per USP monograph.	
14.	**3.2.P.5.2**	Analytical method for the Assay of Potassium and Soidum in ORS sachet is not as per BP monograph.	
15.	**3.2.P.5.3**	Analytical method verification studies for ORS sachet shall be submitted as per BP monograph.	

Decision: Deferred for submission of reply to the above cited shortcomings.

7.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Venus Pharma. 23 km, Multan Road, Lahore**

Evaluation by PEC[II]:

Section#	Observation	Firm's response
3.2.S.1.3	➢ In contrary to the innovator drug product literature from the US FDA & EMA, the section declares the solubility of Empagliflozin in water as "practically insoluble". Justification shall be submitted in this regard.	Empagliflozin is slightly soluble in water as per literature from USFDA and EMA, there was an error in DMF from drug substance manufacturer.
3.2.P.1	• Justification shall be submitted for the seal coating applied on Metformin HCl core, while referring to the innovator drug product formulation. • Justification shall be submitted for proposed quantity of Arginine in the formulation. • Justification shall be submitted on basis of performance based evidence for adding 20% overage of "Empagliflozin" & "Linagliptin" in the applied batch formulation. • Justification shall be submitted for not including Arginine in the applied formulation as used by the innovator drug product. • Clarification shall be submitted for the excipient used for the extended release profile of Metformin HCl core.	• Seal coat is applied to metformin core to avoid contact of IR layer of Empagliflozin and Linagliptin. If no seal coat is applied then the drug will bound to extended release matrix of metformin and will retard the release profile of IR layer. • Since the drugs are applied in the IR layer via coating process, so process loss is mandatory because of coating exhaust air. It is kept at optimum of 20% overage, but in commercial batches we will further optimize it to reduce the overage percentage. • We have manufactured our trials without arginine and our formulation is stable because each drug coat is

		separated via a seal coat which is avoiding direct contact of drug from each other, same has been observed in Real time /Accelerated stability studies. • For extended release profile HPMC 4000grade is used and final release profile is comparable with that of innovator. CDP results have been attached.
3.2.P.3.5	➢ Submitted Process validation protocol shall include test of Dissolution at the compression stage of Metformin HCl core tablet as in-process test.	Updated Process validation protocol including test of Dissolution at the compression stage of Metformin HCI core tablet as in-process test (page no:14) is **attached** for your reference.
3.2.P.5.1	➢ Submitted specifications declared as "In house specifications" shall be justified with reference to the "Guidance Document Regarding Application of Drug Product Specifications" published vide letter "No. 9-2/2022-PEC ➢ Justification shall be submitted for variation in the sampling time points for dissolution test of Metformin HCl from that recommended by the innovator drug product literature approved by US FDA.	CDP of Metformin HCL has been done as per recommended by the drug product literature by USFDA while dissolution test in stability reports has been performed as per USP.

Decision: Registration Board approved the applications of Exempa-Lin Met 12.5/2.5/1000 mg Tablet, Exempa-Lin Met 5/2.5/1000 mg Tablet, Exempa-Lin Met 25/5/1000 mg Tablet & Exempa-Lin Met 10/5/1000 mg Tablet

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Evaluation by PEC[II]:

Sr.#	Section#	Observation	Firm's response
2	**3.2.S.1.3**	➢ In contrary to the innovator drug product literature from the US FDA & EMA, the section declares the solubility of Empagliflozin in water as "insoluble". Justification shall be submitted in this regard.	Supplier stated that "Empagliflozin has a certain degree of hydrophobicity, and ils & solubility in water and buffer solution is relatively small. During the dissolution process. particle aggregation is prone to which further prolong the dissolution occur, time of the sample, redhuce solubility and cause the detection results to fluctuate at the edge of the limit. Therefore, the limit was slightly relaxed at that time. Later, during the testing process, we paid attention to removing agglomerated particles from the samples, ensuring that the solubility limit of the sample in water was consistent with the innovator drug product literature.
3.	**3.2.S.4**	➢ Analytical method verification studies of drug substances shall be submitted from M/s Genix Pharmaceuticals	Submitted

Decision: Registration Board approved the applications of Emlit 10/5 mg Tablet & Emlit 25/5 mg Tablet.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Evaluation by PEC[II]:

Sr.#	Section#	Observation	Firm's response
1.	**1.3**	➢ Submit evidence of approval of required manufacturing facility of "Eye/Ear solution" section from Licensing Division.	Firm has submitted copy of letter for grant of additional section including Ear/Eye Drops –II (General) section issued by Secretary CLB dated 25-10-2023
2.	**1.5.6**	➢ Submit evidence of availability of USP monograph for applied formulation as Finished drug product specifications have been claimed as per USP,	We have followed BP monograph for product testing , there was the typographical mistake.
3.	**2.3.R**	➢ Submitted batch manufacturing record does not include details of the sterilisation process.	Submitted
4.	**3.2.P.1**	➢ Clarification shall be submitted regarding the maintenance of sterility of multi dose formulation since applied formulation does not contain any preservative.	We used specifalized botlle in which protective cap an dpullcove ris used as per innovator. Horizon already use this type of bottle in our product Tobrazon-D eye drops.
5.	**3.2.P.3.3**	➢ Submitted manufacturing process flow does not include any details for the sterility of applied formulation.	Submitted
6.	**3.2.P.3.4**	➢ Sterilisation has not been identified as Critical step in the manufacturing procedure.	Submitted
7.	**3.2.P.5.1**	➢ Submitted drug product specifications have been referred to BP monograph while section 1.5.6 declare it as per USP.	We have followed BP monograph for product testing , there was the typographical mistake.
8.	**3.2.P.7**	➢ Details of the material of construction of the container closure system shall be submitted.	LDPE bottle has been used.
9.	**3.2.P.8.3**	➢ Details of the available stability chambers shall be submitted. ➢ Justification shall be submitted for submitting stability studies data of two batches only.	• Firm has submitted copy of License to import issued by AD I&E DRAP dated 10-05-2022 for Cyclosporine 5gm.

			➢ Commercial invoice for the drug import shall be submitted.	• Firm has referred to CTD guidance document for selection of batch sizes. • Details of stability chamber submitted.

Decision: Approved. The firm shall submit fee of Rs. 7,500/- for correction/pre-approval change as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021, before issuance of registration letter.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Evaluation by PEC[II]:

Sr.#	Section#	Observation	Firm's response
1.	**1.3.**	➢ Latest GMP inspection report conducted within last three years, of the drug product manufacturer shall be submitted.	Firm has submitted copy of GMP inspection report conducted on 11-12-2020 recommending grant of cGMP certificate
3.	**3.2.S.1.3**	➢ In contrary to the innovator drug product literature from the US FDA & EMA, the section declares the solubility of Empagliflozin in water as "practically insoluble". Justification shall be submitted in this regard.	Firm has submitted revised section of the DMF form drug substance manufacturer declaring solubility as "very slightly soluble.
6.	**3.2.P.5.1**	The USFDA review documents of innovator product i.e., Synjardy declares the dissolution specifications as "NLT Q in 20 minutes", while you have applied dissolution limits of NLT Q in 30minutes. Justification shall be submitted in this regard.	Limit of NLT Q in 30 minutes is selected from the FDA dissolution list. However, the dissolution specifications of innovator's product "Synjardy" was also considered and followed. The dissolution of product was achieved to the limit of NLT 80% (Q) in less than 20 minutes. However as per FDA dissolution method database the limit of 30 minutes was selected.

Decision: Registration Board approved the applications of Empazin M 5/850 mg Tablet, Empazin M 12.5/500 mg Tablet & Empazin M 5/500 mg Tablet.

Evaluation by PEC[II]:

Sr.#	Section#	Observation	Firm's response
3.	**3.2.S.4.1**	➢ In contrary to the innovator drug product literature from the US FDA & EMA, the section declares the solubility of Empagliflozin in water as "practically insoluble". Justification shall be submitted in this regard.	During the review of Empagliflozin, we have already noticed that the solubility does not comply with USFDA and EMA standards. We raised a query to the drug substance manufacturer dated March, 27 2024 regarding the solubility discrepancy. the manufacturer has acknowledged their mistake and provided a revised Certificate of Analysis (COA)

			to ensure compliance. Additionally, the manufacturer has provided a statement letter Drug substance COA from M.s tabros Pharma also declares the solubility in water as practically insoluble.
4.	**3.2.P.3.5**	➢ Justification shall be submitted for not considering "Dissolution test" for Metformin HCl as critical quality attribute at the compression stage of Metformin HCl extended release core tablet. ➢ Submitted process validation protocol does not include details of in-process test by way of Assay at the drug layering stage, applied to confirm that desired content for Empagliflozin has been achieved via active coating.	➢ We considered the dissolution test for Metformin HCl as a critical quality attribute during the compression stage and had already mentioned it in the Pharmaceutical development phase. However, it was mistakenly omitted from the process validation. We have now incorporated the dissolution test for Metformin HCI at the compression stage. The revised Process Validation protocol has been submitted. ➢ The process validation protocol has been revised to include in-process details specifically the assay of empagliflozin at the drug layering stage
5.	**3.2.P.5.1**	• Submitted specifications declared as "Tabros specifications" shall be justified with reference to the "Guidance Document Regarding Application of Drug Product Specifications" published vide letter "No. 9-2/2022-PEC	Firm has submitted revised drug product specifications referreing it as per innovator.
6.	**3.2.P.5.3**	• Justification shall be submitted that how the regarding the declaration of "stability indicating method" and "specificity" of the applied method without the performance of "Peak Purity Test (e.g., using diode array detector) to establish that analyte chromatographic peak is not attributable to more than one component.	We have a limited number of HPLCs equipped with a photodiode array detector. Unfortunately, all validation was performed using only a UV detector. We acknowledge the comments of the competent authority and are providing all evidence, such as chromatograms, and have performed peak purity analysis using the diode array detector.

Decision: Registration Board approved the applications of Elzanor XR 12.5/1000 mg Tablet , Elzanor XR 5/1000 mg Tablet & Elzanor XR 25/1000 mg Tablet.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

	The proposed proprietary name / brand name	**ELM XR 12.5/2.5/1000 mg Tablet**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Film Coated Tablet Contains: Empagliflozin (as Immediate release layer)…12.5mg Linagliptin (as Immediate release layer) …2.5mg Matformin Hcl (as extended release core)…1000mg
	Pharmacotherapeutic Group of (API)	**Linagliptin:** Biguanide class of Anti-diabetics ATC code: A10BA02 **Empagliflozin:** Sodium-glucose co-transporter 2 (SGLT2) inhibitors. ATC code: A10BK03 **Metformin HCl:** Biguanide class of Anti-diabetics ATC code: A10BA02
	Reference to Finished product specifications	Innovator's Specs
Evaluation by PEC[II]:		

Sr.#	Section#	Observation	Firm's response
2.	**3.2.S.1.3**	➢ In contrary to the innovator drug product literature from the US FDA & EMA, the section declares the solubility of Empagliflozin in water as "practically insoluble". Justification shall be submitted in this regard.	Firm has submitted revised section of the DMF form drug substance manufacturer declaring solubility as "very slightly soluble.
3.	**3.2.P.3.5**	➢ Submitted Process validation protocol shall include test of Dissolution at the compression stage of Metformin HCl core tablet as in-process test.	Firm has submitted revised prodcess validation protocol.

Decision: Registration Board approved the applications of ELM XR 5/2.5/1000 mg Tablet, ELM XR 25/5/1000 mg Tablet, ELM XR 10/5/1000 mg Tablet & ELM XR 12.5/2.5/1000 mg Tablet.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

32.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Horizon Healthcare (Pvt) Ltd. Plot No. 33, Sundar Industrial Estate, Lahore**
	Name, address of Manufacturing site.	M/s Horizon Healthcare (Pvt) Ltd. Plot No. 33, Sundar Industrial Estate, Lahore
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Application Form Dy. No / Tracking ID & date of submission	Form 5F: Dy.No 2555 dated 26-01-2023
	Details of fee submitted	Rs.30,000/- dated 20-01-2023
	The proposed proprietary name / brand name	**Emjuremet 12.5/500 mg Tablet**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated tablet contains: Empagliflozin ……. …. 12.5mg Metformin HCl…...500mg
	Pharmacotherapeutic Group of (API)	**Metformin HCl:** Biguanide class of Anti-diabetics ATC code: A10BA02 **Empagliflozin:** Sodium-glucose co-transporter 2 (SGLT2) inhibitors. ATC code: A10BK03
	Reference to Finished product specifications	Innovator's Specs

Evaluation by PEC[II]:

Sr.#	Section#	Observation	Firm's response
1.	**1.6.5**	➢ Valid DML/GMP certificate of the drug substance manufacturer of Metformin HCl shall be submitted.	Submitted
2.	**3.2.S.1.3**	➢ In contrary to the innovator drug product literature from the US FDA & EMA, the section declares the solubility of Empagliflozin in water as "practically insoluble". Justification shall be submitted in this regard.	Firm has submitted revised section of DMF

3.	**3.2.S.4**	➢ Submit drug substance analytical procedure of Empagliflozin form drug substance manufacturer. ➢ Justification shall be submitted for declaring specifications of Metformin HCl as " In-House" in section 3.2.S.4.1	Submitted. The word "In house" in section 3.2.S.4.1 clause (b) was typographically written wrong. We have performed the metformin HCl drug substance as per B.P specifications so we have this section to B.P. specifications.
4.	**3.2.S.4.4**	➢ Manufacturing site declared on COA of Metformin HCl from drug substance manufacturer is different from that mentioned in section 1.6.5 & 3.2.S.2.1	Firm has submitted revised section 1.6.5 & 3.2.S.2.1
5.	**3.2.P.2.2.1**	➢ Justification shall be submitted for not performing Pharmaceutical equivalence and CDP studies against the innovator drug product	We have performed CDP and Pharmaceutical equivalence studies against competitor brand as per DRAP guidelines.
6.	**3.2.P.3.2**	Innovator drug product literature states as under: "To combine the low amount of Empagliflozin with the relatively high quantity of metformin hydrochloride, a wet granulation process with granulation liquid containing Empagliflozin was chosen." • In contrast to above cited reference, applied formulation has been formulated by granulating dry mix of Metformin HCl & Empagliflozin with binder solution. Justification shall be submitted in this regard.	In the CTD flow chart layout the dry granulation manufacturing method was written typographically wrong. We have adopted the wet granulation processing method to combine the low quantity of empagliflozin with high quantity of Metformin HCl. The filled batch manufacturing record has been attached as evidence.
7.	**3.2.P.5.3**	• Analytical method validation studies for the Dissolution method shall be submitted, particularly specificity parameter for the dual wavelength applied.	Submitted
8.	**3.2.P.8.3**	• Firm has submitted copy of clearance certificate issued by AD I&E DRAP, Peshawar, in name of M/s Weatherfolds Pharmaceuticals, Hattar Pakistan. Justification shall be submitted in this regard	We have loan the material from M/S Weather folds Pharmaceuticals, Hattar Pakistan. The loan letter has been submitted

Decision: Approved. The firm shall submit fee of Rs. 7,500/- for each strength correction/pre-approval change as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021, before issuance of registration letter.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**

• **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Remarks of Evaluator:

Section no.	Observations	Firm's response
1.5.2	Submitted label claim shall be elaborated with respect to the release profile of Empagliflozin and Metformin HCl.	Firm has submitted elaborated label claim for extended release core of Metfromin HCl
1.6.5	Submit valid GMP certificate/DML of the drug substance manufacturer of Metformin HCl, issued by the relevant regulatory authority.	Firm has submitted GMP certificate issued by Food and Drugs Control Administration, Gujarat, India valid till 20-08-2025.
2.3.R.1.1	• As per innovator drug product literature, a layer film coating is established between the Metformin HCl core and Active coating of Empagliflozin active coating layer. • The submitted product development record does not reflect performance of dissolution for Metformin HCl before proceeding for seal & active coating step. Justification shall be submitted for proceeding further without establishing the Dissolution profile of Metformin HCl. • The submitted product development record does not reflect performance of Uniformity of dosage units test by way of Assay for Empagliflozin before proceeding for final film coating step. Justification shall be submitted for proceeding further without establishing the content of Empagliflozin. • Submitted BMR declare dispensing of Empagliflozin as per 100% content of desired label claim. Justification shall be submitted that how dispensed quantity will produce 100% content of Empagliflozin, when it is being included by way of Active coating and how the wastage of coating solution will be compensated.	A seal coat or barrier coating is applied over the tablet core to protect against water penetration into the tablet from the active coatings to follow. When we go through the literature review, we found barrier coating was mentioned optional in World Intellectual Property Organization/Patent Cooperation Treaty (WIPO/PCT) patent WO2017093419 A1 and in our developed product Metformin HCI core doesn't show any interaction with active coating 2. In response to query # 2.3.R.1.1, it is stated that all the parameters which lead to the wastage of solution were closely monitored by increasing the distance of gun from the core bed. 2. Decreasing the spray speed of the gun and proper atomization of the gun, so that its mist doesn't touch the base and sides of the pan resulting in wastage of the solution. 3. By optimizing the temperature. Suction pressure of the exhaust pump was kept low so that solution may not be exhausted out before it touches the bed. Moreover, the tablet loss for the in process testing was almost 6-8% of the total trial size (1500 tablets) before it reaches to the stage of active coating. Whereas active coating solution of

		empagliflozin was made for minimum 1500 tablets which compensated to the meager loss found during the coating process, thus resulting in 100% content of empagliflozin in the process. Morcover, the tablet loss for the in process testing was almost 6-8% of the total trial size (1500 tablets) before it reaches to the stage of active coating. Whereas active coating solution of empagliflozin was made for minimum 1500 tablets which compensated to the meager loss found during the coating process, thus resulting in 100 % content of empagliflozin in the process. Firm has aslo submitted in process analysis sheets for the trial batches.
3.2.S.5	COAs of reference/working standard used for the analysis of drug substances by M/s Wilson, shall be submitted.	Submitted
3.2.P.2.2.1	Justification shall be submitted for performing dissolution test of Metformin HCl on one time point only in pharmaceutical equivalence studies.	Firm has submitted new Pharmaceutical equivalence studies wherein Dissolution of Mtformin HCl has been performed for complete extended release profile.
3.2.P.5.1	In contrast to the innovator drug product literature firm has proposed one-time dissolution limits for Metformin HCl. Justification shall be submitted in this regard.	Firm has submitted revised drug product specifications wherein Dissolution of Mtformin HCl has been declared for complete extended release profile.
3.2.P.5.3	Justification shall be submitted that how the "specificity" of the applied method has been inferred without the performance of "Peak Purity Test (e.g., using diode array detector) to establish that analyte chromatographic peak is not attributable to more than one component".	Firm has submitted COA oftrial batches wherein Dissolution of Mtformin HCl has been performed for complete extended release profile.
3.2.P.5.4	Submitted COA of trial batches declare dissolution results for Metformin HCl at only one-time point only. Justification shall be submitted in this regard.	

Decision: Registration Board approved the applications of EMP-MET XR 5/1000mg Tablet, Emp-Met XR 25/1000 mg Tablet, Emp-Met XR 12.5/1000 mg Tablet & Emp-Met XR 10/1000 mg Tablet.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

	The proposed proprietary name / brand name	**Pentom 100mg Capsule**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Capsule Contains: Pentosan Polysulfate Sodium…100mg
	Pharmacotherapeutic Group of (API)	Urologicals, other urologicals, ATC code: G04BX15
	Reference to Finished product specifications	Innovator's Specs

Evaluation by PEC[II]:

Sr. No.	Section #.	Deficiencies	Firm's response
1.	**1.6.5**	Valid GMP certificate or Drug Manufacturing License of the drug	Firm has submitted License validity certificate for drug substance

		substance manufacturer shall be submitted, issued by the relevant regulatory authority.	manufacturer issued by Directorate of Drug Control Chennai, India declaring validity of License upto 09-06-2024.
2.	**3.2.S.4.1**	Justification shall be submitted for the Assay limits of 95.0% 105.0% for the drug substance.	Firm has submitted revised drug substance specifications with Assay limits of 98-102%
3.	**3.2.S.4.2**	Evidence of availability of HPLC equipped with RI detector shall be submitted.	Shimadzu HPLC equipped with RID detector and auto injector is installed in Genome Pharmaceutical Quality control laboratory.
4.	**3.2.S.4.3**	• Composition of "placebo solution", used in the performance of specificity test shall be clarified. • Specificity test has been performed without spiking impurities or exposing the test solution to stress conditions. This performance shall be justified with reference to ICH Q2 (R1) guidelines and USP chapter <1225>.	Firm has submitted forced degradation studies.
5.	**3.2.S.5**	Clarification shall be submitted regarding Assay limits of 95.0% 105.0% for the working standard.	Firm has submitted revised COA of working standard
6.	**3.2.P.2.2.1**	Following shall be established for the sake of Pharmaceutical equivalence: • The starting material used to manufacture the proposed PPS should be the same as that used to manufacture the drug substance for the reference product. • The molecular weight distribution between the proposed PPS and the drug substance in the reference product should be comparable. Moreover, the overall structural properties or characteristic fingerprints of the proposed PPS, including (but not limited to) the degree of sulfation, sodium content, Raman and IR spectra, should be equivalent to that of the drug substance in the reference product. • Equivalence of monosaccharide building block composition and chain branching of the proposed PPS should be equivalent to the drug substance in the reference	Firm has submitted following characterisation studies from the drug substance manufacturer performed against reference product Elmiron: • The structural confirmation of (Pentosan Polysulphate sodium) PPS is achieved by HNMR, CMR, UV, FTIR spectroscopic techniques. • Molecular weight determination for three batches of Pentosan Polysulfate Sodium along with reference product • Sulfate content by conductometric titration

		product, with respect to the molecular properties, including (but not limited to) xylose units, sulfation pattern, glucuronic acid groups, linkages, and anomeric configurations.	
7.	**3.2.P.5.2**	Analytical method applied for the analysis of dissolution sample has not been mentioned.	Submitted
8.	**3.2.P.5.3**	Specificity test has been performed without spiking impurities or exposing the test solution to stress conditions. This performance shall be justified with reference to ICH Q2 (R1) guidelines and USP chapter <1225>.	Firm has submitted forced degradation studies.
9.	• Submitted BMR declares the content of "Pentosan Polysulfate sodium as 111mg per capsule, whereas the label claim of applied product is 100mg per capsule. Clarification shall be submitte n this regard.		• Drug substance was dispensed by potency adjustment on as is basis since Pentosan polysulphate sodium contains 10% water (max)

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

	Name and address of API manufacturer.	M/s AARTI DRUGS LIMITED, Plot No. E-21/22, M.I.D.C, Tarapur, Maharashtra, India
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5% RH for 60 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 06 months Batches:(KM-1102215, KM-1102315, KM-1102415)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure and its verification studies, batch analysis and justification of specification,

		reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Comparative dissolution profile has been established against the Clebex capsule of M/s Getz Pharma in three buffer mediums i.e., ph1.2, pH 4.5 & ph 6.8 with acceptable results.
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.

STABILITY STUDY DATA

Manufacturer of API	M/s AARTI DRUGS LIMITED, Plot No. E-21/22, M.I.D.C, Tarapur, Maharashtra, India		
API Lot No.	Ceb/10040077		
Description of Pack (Container closure system)	Alu-PVC		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 06 months Accelerated: 06 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	20CRn010	21CRn007	21CRn008
Batch Size	2000 capsules	2000 capsules	2000 capsules
Manufacturing Date	12-2020	07-2021	07-2021
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document. (New Section)
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	--
3	Documents for the procurement of API with approval from DRAP (in case of import).	• Copy of letter No.14850/2020/DRAP-AD-VIII (I&E) dated 16/10/2020 is submitted wherein the permission to import different APIs including for the purpose of test/analysis and stability studies is granted. • AirWay Bill No. 176-26046624 Dated: 21/12/2020
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	• HPLC system digital log has been submitted excluding for the intial time point analysis.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator[II]:

Section#	Observations	Firm's response

1.6.5	Valid GMP certificate issued by the relevant regulatory authority shall be submitted for the drug substance manufacturer.	Submitted GMP certificate is of another site of AARTI drugs ltd (PLOT NO. W-60(B)W-61(B)W-62(B)W-71(B)W-72(B)W-73(B),MIDC, Tarapur Thane, India), instead of the site (Plot No. E-21/22, M.I.D.C, Tarapur, Maharashtra, India) from which drug substance has been imported.
3.2.S.6	Drug substance is of USP standard whereas reference standard of BP grade has been submitted.	As the drug substance is available in both USP and BP and have same specifications and analytical procedure. Drug product is available only in BP so we chosen BP standard and used it for analysis.
3.2.P.2.2.1	Pharmaceutical equivalence of the applied drug shall be established with the innovator / reference / comparator product and results of all the quality tests (mentioned in any official pharmacopoeia or section 3.2.P.5.1 of this application) of the developed formulation and the innovator / reference / comparator product shall be submitted.	• Firm has submitted Pharmaceutical equivalence report against the Celebrex capsule of M/s Getz, wherein instead of dissolution test of batch release, CDP study results have been submitted.
3.2.P.3.5	Submitted process validation protocol does not include sampling plan.	Process validation protocol including sampling plan has been submitted.
3.2.P.8.3	• Documents for the procurement of API with approval from DRAP (in case of import) shall be submitted. • Raw data sheets for complete stability studies shall be submitted. • Submitted analytical record does not reflect the performance of system suitability test during Assay analysis as recommended by BP monograph of Celcoxib capsules.	• Firm has submitted copy of commercial invoice# SAMP/1002//20-21-23/10/2020 frrom M/s AARTI drugs ltd., in the name of islam Pharma for the 2.5 Kg of Celecoxib. The submitted invoice is not attested by DRAP I&E office. • Firm has also submitted copy of Air WayBill. • Firm has performed system suitability test by establishing the RSD of standard replicates, while BP monograph recommends performance of system suitability with the help of impurity standards.

Decision of 321st meeting: Deferred for submission of valid GMP certificate issued by the relevant regulatory authority for the drug substance manufacturer.

Firm's response: Firm has submitted GMP certificate issued by FDA Maharashtra, india valid upto 27-05-2025.

Decision: Approved with innovator's specifications.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

42.	**Name and address of manufacturer/ Applicant**	**"M/s Genix Pharma (Pvt.) Ltd., 44,45-B, Korangi Creek Road, Karachi, 75190, Pakistan.**
	Brand Name + Dosage Form + Strength	Laxetil Solution.

	Composition	Each 5ml Contains: Lactulose ……..… 3.335g OR Each 15ml Contains: Lactulose ……10g
	Diary No. Date of R & I & fee	Duplicate Dossier
	Pharmacological Group	Laxative
	Type of Form	Form 5
	Finished product Specification	USP specifications
	Pack size & Demanded Price	120ml, 240ml, 300ml, 400ml: As per PRC
	Approval status of product in Reference Regulatory Authorities.	Approved in US-FDA
	Me-too status	Lactusure Syrup of Medisure Laboratories Pakistan.
	GMP status	**Conclusion:** In the light of inspected areas, facilities status of equipment and hygiene and sanitation of area and equipment, control procedures and documentations, internal and external inspection and audit reports safety of the workers, stability protocols and data, product development, recalls and complaints handling & other CGMP issues, M/s Genix Pharma Pvt. Ltd Karachi was considered at a **satisfactory level of compliance with cGMP guidelines as of today**. The management was also suggested to further strengthen stability and analytical sections."
	Remarks of the Evaluator	Submit source & stability studies of applied of three batches conducted by manufacturer of API.
	Decision of 291st meeting of Registration Board.	Deferred for submission of COA, GMP of API manufacturer and stability studies of three batches of API conducted in accordance with zone IV-A conditions.
	Submission by the firm.	• Firm has submitted GMP certificate for ***M/s Lacsa (pty) Limited, 72 Ballantrae Road, Merebank, Durban, 4052, Kwa-Zulu Natal, South Africa*** issued by SAPHRA dated 02-06-2023 wherein active substance Lactulose by chemical synthesis is mentioned. It is further mentioned that the standard of Good Manufacturing Practice (GMP) applicable to this manufacturing plant are at least equivalent to those laid down in the EU (=GMP of WHO/ICH Q7). • Firm has also submitted real time and accelerated stability studies of three batches for the active substance. Real time conditions are 30˚C ± 2˚C / 65% ± 5%RH for 48 months and accelerated condition are 40°C ± 2°C / 75% ± 5%RH for 6 months. Batches (P2246, P2247 & P2248). • They also submitted COA of the drug substance.
	Remarks of the Evaluator.	Fee verification is required as it was not mentioned in the agenda. In case of fee for local registration is submitted, differential fee for import shall be submitted.
	Decision of 331st meeting: Deferred for following; • Evidence of submission of dossier along with its verification from R&I Section. • Evidence of submission of fee for instant application its verification from Budget & Accounts Division.	
	Firm's response: Incharge R&I has verified the submission of instant application vide Diary no. 24656 dated 15-12-2017. Firm has also submitted copy of deposit slip no. 0577513 for submission of Rs. 20,000/- fee.	
	Decision: Approved. Firm shall submit differential fee for imported source of bulk drug before issuance of registration letter.	

43.	**Name and address of manufacturer / Applicant**	**M/s Glitz Pharma Plot No 265. Industrial Triangle. Kahuta Road, Islamabad**
	Brand Name +Dosage Form + Strength	Arostein 225mg Sachet
	Composition	Each Sachet Contains

		Erdostetine…225mg
	Diary No. Date of R& I & fee	Dy No. 16040: 07-03-2019 PKR 20,000/-: 07-03-2019

	The proposed proprietary name / brand name	**PYTOL-X Tablet (665 mg)**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Extended release tablet contains: Paracetamol … 665mg USP Specs.
	Pharmaceutical form of applied drug	Tablet
	Pharmacotherapeutic Group of (API)	Analgesic
	Reference to Finished product specifications	USP Specifications
	Proposed Pack size	As per SRO
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	OSTEOMOL 665 PARACETAMOL modified release Film **Coated tablet** TGA Australia.
	For generic drugs (me-too status)	Panadol-XR M/s GSK Paksitan Limited, Karachi.
	Name and address of API manufacturer.	**Paracetamol (B.P):** M/s Citi Pharma Limited, 3km, Head Balloki Road, Bhai Pheru, Dist. Kasur, Paksitan DML No. 000512 GMP Certificate No .(Not legible) issued on 19-03-2019
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for both drug substance data related to nomenclature, structure, general properties, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 60 months. **(Batch No. PGP14-37, PGP14-38, PGP14-39)**
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.

	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical Equivalence have been established against Panadol Extended Release 665mg Tablets by performing quality tests including Identification, weight variation, Hardness, Assay, Dissolution. CDP has been performed against the same brand that is Panadol Extended Release 665mg Tablets Batch No. 2S6L manufacturing date December 2021 in, Acid media (0.1N HCl), acetate buffer pH 4.5 & Phosphate Buffer pH 6.8. The F2 values are found satisfactory.
	Analytical method validation/verification of product	Firm has submitted report of verification studies of analytical method of drug substance. Firm has submitted report of verification of analytical method for the drug product.

STABILITY STUDY DATA

Manufacturer of API	**Paracetamol:** M/s Citi Pharma Limited, 3km, Head Balloki Road, Bhai Pheru, Dist. Kasur, Paksitan DML No. 000512 GMP Certificate No.(Not legible) issued on 19-03-2019		
API Lot No.	**PGP21-549**		
Description of Pack (Container closure system)	The proposed pack size of PYTOL-X Tablet 665 mg is 2x 10's in Alu—Alu Blister/Aluminum File.

No. of Batches	02		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	• Not Submitted
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Paracetamol:** M/s Citi Pharma Limited, 3km, Head Balloki Road, Bhai Pheru, Dist. Kasur, Paksitan DML No. 000512 **GMP Certificate No.(Not legible)** issued on 19-03-2019
3.	Documents for the procurement of API with approval from DRAP (in case of import).	**Not Required**
4.	Data of stability batches will be supported by attested respective documents like	Firm has submitted complete record of testing of all batches along with summary data sheets , however, the chromatograms, raw data sheets are not submitted at every point of

	chromatograms, Raw data sheets, COA, summary data sheets etc.	sampling/testing.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Following Documents are found deficient:

1. The GMP certificate of API manufacturer is issued on 19-03-2019, therefore, provide updated legible copy of GMP certificate of API manufacture in the light of guidance document.
2. Firm has applied for extended release un-coated tablets while the innovator Product OSTEOMOL 665 PARACETAMOL is modified release Film Coated tablet , therefore, submit evidence of un-coated tablet (Paracetamol 665mg) in Relevant Regulatory authorities.
3. Compatibility studies of the Drug Substance(s) with excipients shall be provided if the qualitative composition of the formulation is not similar to innovator / reference product.
4. Provide Proposed Pack Size of Product.
5. The chromatograms, raw data sheets are not submitted at every point of sampling/testing.
6. Justification shall be submitted for same reading throughout the stability studies of both chambers as per submitted data logger record.

Reply of the Firm :

Sr No	Deficiencies/Short-coming	Answers
1	Provide updated legible copy of GMP certificate of API manufacturer.	Updated GMP Copy of API manufacturer has been attached here
2	Evidence of approval of applied formulation in reference regulatory authorities as defined by the registration Board shall be submitted. As the applied formulation in reference regulatory authorities is approved as "Film coated" tablets while the applicant has applied as un-coated tablets.	It is a typographical mistake to written in composition, Product has been formulated as film coated tablet In process testing record at film stage, filled BMR has been attached here
3	Compatibility studies of the Drug Substance(s) with excipients shall be provided if the qualitative composition of the formulation is not similar to innovator/ reference product.	Qualitative Composition of Pytol-x is same as Innovator Product so Compatibility studies has been not performed Formulation of reference product has been attached here.
4	The chromatograms, raw data sheets shall be submitted for every point of sampling/testing during stability study.	chromatograms, raw data sheets for every point of sampling/testing during stability study has been attached here
5	Justification shall be submitted for same reading (Temperature & Humidity) throughout the stability studies of both chambers as per submitted data logger record.	Stability chamber 21 CFR Compliance software Audit trail has been attached here which shows all changes with date and time

Decision: Registration Board deferred the case for following reasons:

i. The applicant shall submit detail of measures adopted by other countries (whether RRA or non-RRA) to mitigate the risk of toxicity associated with over-dose of above-mentioned product.

ii. The applicant shall also submit detail of practicable measures which will be adopted after grant of marketing authorization to prevent the risk of toxicity associated with over-dose of above-mentioned product.

Firm's response: Firm has submitted documenst regarding Measures adopted to mitigate the risk of toxicity associated with over dose of paracetamol from TGA Australia & Finland along with commitment to adopt same measures. Frm has also submitted to the conditions of approval for Panadl extend 665mg tablets granted b registration Board in its 331st meeting.

Decision: Keeping in view the approval status of product in different Reference Regulatory Authorities, WHO Maturity Level-4 (WLA; WHO Listed Authority) Authorities and PICs member countries, Registration Board approved the instant application along with following conditions as approved previously by registration board in its 331st meeting for applied formulation:

a) Manufacturer will place first three production batches of the product on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.

b) Manufacturer will perform process validation of first three batches of the product as per the commitment submitted in the registration application.

c) Complete finished product specifications (in tabulated form) will be annexed with the registration letter.

d) To mitigate the risk due to toxicity associated with overdose of Paracetamol Extend Tablet 665mg, registration letter will be issued with following additional conditions/ statements:

"Following conditions should appear on label of the product in bold and conspicuous manner:

- **For adults, the highest recommended dose of Panadol Extend Tablet 665mg is 1.3 g and the maximum daily dose is 4 g (i.e., 2 tablets 3 times a day with highest dose of 6 tablets a day).**
- **Paracetamol Extend Tablet 665mg should not be used as an alternative to Panadol/ Paracetamol Tablet 500mg without prior consultation with Physician/ Pharmacist."**

e) Above-mentioned conditions will also be included in advertisement of the product and for this purpose, recommendation will be forwarded to Pharmacy Services Division, DRAP.

f) To ensure compliance with the above-mentioned conditions, the applicant will be advised to conduct training programmes for the health care providers and submit biannual compliance reports to PE&R Division subsequent to issuance of registration.

45.	**Name and address of manufacturer/ Applicant**	**M/s Nabiqasim Industries (Pvt.) Ltd. 17/24, Korangi Industrial Area, Korangi, Karachi.**
	Brand Name + Dosage Form + Strength	**CARB 40/5 Tablets**
	Composition	Each film coated tablet contains: Telmisartan ……40mg Amlodipine as Besylate….5mg
	Diary No. Date of R & I & fee	Dy. No. dated 29-11-2010, Rs. 8,000/- dated 29-11-2010 (Challan photocopy dated 12-10-2010), Dy. No. dated 17-01-2017, Differential fee Rs. 12,000/- dated 03-01-2017 submitted vide deposit slip No.0569397 dated 01-12-2016. "Duplicate dossier, verification of R & I for initial and differential fee submission along with fee challans required".
	Pharmacological Group	Anti-hypertensive
	Type of Form	Form-5
	Finished product Specification	Manufacturer specifications
	Pack size & Demanded Price	10's & 14's, As per SRO
	Approval status of product in Reference Regulatory Authorities	(USFDA approved) TWYNSTA® 40/5 mg, 40/10 mg, 80/5 mg, 80/10 mg uncoated bi-layer tablet Boehringer Ingelheim International GmbH.
	Me-too status	Tiocardis-AM Tablet 40mg/5mg of M/s Atco laboratories, Karachi. Registration No. 098764
	GMP status	Panel inspection for grant of cGMP certificate conducted on 27-05-2022 with conclusion as: Based on the people met, documents reviewed and considering the observations made, panel recommends the grant of GMP certificate in favor of M/s Nabi Qasim Indsutries (Pvt.) Ltd. Korangi Industrial Area, Karachi.
	Remarks of the Evaluator (PEC-XVII)	• Firm revised the label claim as: Each uncoated bi-layered tablet contains: Telmisartan ……40mg Amlodipine as Besylate….5mg, along with revision of composition/master formulation and manufacturing outlines.

		• Firm revised finished drug product specifications as per official monograph (USP). • Tablet (General) Section available as per DML renewal letter No.F.2-20/85-Lic (Vol-V) dated 27-04-2020. • With regard to availability of bi-layered compression machine, the firm replied as: We have the machine/equipment ZPW23 II (I.D # NQFC-P & M-TCM2) for the manufacturing of bi-layered tablets and are manufacturing several bi-layered tablets in this section. The firm provided copy of purchase invoice for ZPW23 compression machine and Good Declaration (GD-I) certificate. • The firm has submitted fee of Rs: 7500/- vide online deposit slip No.9226887964 for revision of finished drug product specifications. • The firm submitted remaining fee of Rs: 22,500/- vide online deposit slip No.933234663.
	Decision of 321st meeting: Deferred for verification of R & I record of initial submission of registration application as the same could not be verified by the R & I Section	
	Firm's response: The case was referred by Inchareg PEC to R&I section for confirmation of original submission of application from record, to which Assitant Director Admin-IV has replied as under: "It is intimated that the firm has submitted the original acknowledgenment receipts shoiwng original R&I sign/stamp of product Carb 5/40 tab. Dated 29-11-2010. The firm has also attached the acknowledgement receipts of other strengths of same product i.e., 5/20, 10/20, 10/40 and 5/80 as sane date having the same original sign / stamp. However, entry could not be made in R&I register, inadvertently. Through the R&I sign / stamp of product Carb 5/40 tab are same and authentic please."	
	Decision: Registration Board considering the declaration from R&I section regarding submission of the registration application decided to approve the instant application as per following label claim: **"Each uncoated bi-layered tablet contains:** **Telmisartan ……40mg** **Amlodipine as Besylate….5mg"**

Date of Initiation	01-01-2022	01-01-2022	01-01-2022
No. of Batches	03		

REQUEST OF EXEMPTION FROM ON SITE INSPECTION		
Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not provided
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Not submitted M/s Anugraha Chemicals, No. D-47 to D-50, C-62 & C-63, KSSIDC Industrial Estate, Doddaballapur, Bengaluru, Karnataka, India.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not submitted Quantity received 1kg as mentioned in CoA of API by drug product manufacturer. Date of received 12-2021.

4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Incomplete submission as raw data sheets, summary data sheets, content uniformity data and dissolution data not provided.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not Submitted

Previous decision: Registration Board in its 326th meeting d deferred the case for clarification / submission of following points to which firm has responded as mentioned below against each.

Firm's response:

Sr. No.	Section	Observation	Reply by the firm
1.	**1.5.2**	• The strength/label claim provided is not in accordance with the innovators product that is: each 5ml syrup contains: ondansetron (as hydrochloride dihydrate) ……. 4 mg	Firm has submitted revised label claim as under: **EACH 5ML SYRUP CONTAINS:** Ondansetron (As hydrochloride dihydrate) ……. 4 mg
2.	**1.5.4**	• The pack size mentioned as 3×10's	Revised pack size declared is as per SRO.
3.	**1.5.10**	• The applied dosage form mentioned as: white color round shaped film-coated tablet, packed in alu-alu blisters (1×10's) and further packed in printed unit cartons along with a patient information leaflet.	Firm has submitted revised dosage form as oral syrup.
4.	**1.6.5 (B)**	• No evidence of approval of manufacturing facility of api by concerned regulatory body submitted.	Submitted Copy of License issued by Drug Control Department Govt. of Karnataka valid upto 13-02-2025.
8.	3.2.S.4.1	• Specifications for drug substance provided by the drug product manufacturer has two different values for residue on ignition test. clarification shall be submitted.	Firm has susbmitted revised sepcifications as per USP monograph.
9.	3.2.S.4.2	• Analytical procedure (signed) for the drug substance by the drug product manufacturer shall be submitted.	Submitted
10.	3.2.S.7.3	• Incomplete long term stability studies summary data sheets (only for 6 & 9 months) for the drug substance have been submitted by the firm.	Firm has submitted stability study data as per Zone Iva.
11.	3.2.P.1	• description & composition of the drug product part is not provided.	Submitted.
12.	3.2.P.2.1	• The sub-parts, 3.2.p.2.1.1 (drug substance) & 3.2.p.2.1.2 (excipients), under components of the drug product are not submitted. compatibility studies of the drug substance(s) with excipients not provided as qualitative composition	Submitted

		of the formulation is not similar to innovator / reference product.	
13.	3.2.P.2.2.1	• The API quantity given without considering salt factor of the api. as evident from the trial batches bmr attached at 2.3.r.1, the quantity of api has been dispensed/mentioned without salt factor calculation.	Firm has submitted revised calculations as per theroatical factor and determined potency
14.	3.2.P.2.2.1	• In formulation development, the quantity given per bottle (60ml) is 0.04gm, which comes out to be 0.67mg/ml or 3.35mg/5ml while the applied composition is 4mg/5ml.	
15.	3.2.P.2.2.1	• The firm has mentioned that pharmaceutical equivalence conducted against market's comparator product namely onseron 4mg/5ml oral solution. however, summarized test results of pharmaceutical equivalene submitted is against zofran 4mg/5ml oral solution.	Firm has submitted pharmacueitcal equivalence studies against Onseron Syrup of M.s Horizon Pharma.
16.	3.2.P.2.5	• The microbiological enumeration tests & tests for specified micro-organisms declared as "not applicable". however, the same are given in usp official monograph of ondansetron oral solution as microbial enumeration tests <61> and tests for specified microorganisms <62>.	Firm has submitted revised drug product specifications as per USP monograph.
17.	3.2.P.3.2	• in batch formula, for 1000 l batch size, the quantity of ondansetron hcl given as 0.4kg and also without considering salt factor calculation. with this quantity, composition/strength of product comes out to be 2mg/5ml of ondansetron hcl while the applied composition is 4mg/5ml of ondansetron (as hcl dihydrate).	Firm has submitted revised calculations as per theroatical factor and determined potency
19.	3.2.P.5.1	• in drug product specifications, the deliverable volume specification mentioned as "in-house". however, the same is given in official monograph (usp) for ondansetron oral solution under usp general chapter <698> deliverable volume.	Firm has referred that limits were selected in accordance with USP general chapter <698>.
20.	3.2.P.5.2	• analytical procedure of drug product not provided by the firm. the firm has submitted extract of usp for ondansetron oral solution.	Submitted detailed drug product analyhticalprocedure.
21.	3.2.P.5.4	• coa of 03 trial batches submitted in which the assay for trial batch t-03	Firm has submitted rectified COA.

		given as 100.20%, while coa of same batch has assay result as 101.49%.	
22.	3.2.P.8.1	• in the stability summary and conclusions, the firm has stated that trial batches were kept under real time stability conditions in stability chambers on 01-01-2022 and under accelerated stability conditions on 13-05-2021.	Firm has submitted revised stability summary sheets.
23.	3.2.P.8.3	• in the stability study data, the mfg. and exp. date of t-02 batch mentioned as 01-2023 and 01-2024 respectively. while stability studies dated provided from 01-01-2022 to 01-06-2022.	
24.	3.2.P.8.3	• provide raw data sheets, summary data sheets, audit trial reports and digital data logger record for temperature & humidity monitoring of stability chambers (both real and accelerated) in support of stability studies performed of the trial batches.	Submitted
25.	3.2.P.8.3	• the wavelength mentioned in chromatogram/hplc reports submitted is 328nm, however, as per analytical procedures submitted and official monograph of the product, the wave length for assay determination is 216nm.	Firm hassubmitted analytical record as per chromaytogrpahic conditions in USP monograph.
26.	3.2.P.8.3	• the time intervals among the chromatograms/hplc reports of standard and samples analysis, mostly vary from 1-3minutes. while the runtime for each analysis is 15 minutes, with retention time of peaks for all standards and samples as 3.770-3.774 (approx. 3.77). clarification and scientific justification is required in this regard, as to how such intervals among chromatograms possible, with aforementioned peak retention times and run time of the analysis performed.	Firm has referred the said time as time for processing for printing of chromatograms.
27.	3.2.R.1.1	• the bmr of trial batches (t-01, t-02 & t-03) submitted are blank bmrs, having no details of actual execution of production/manufacturing of the trial batches, such as personnel signatures, in-process checks, reconciliation record, time intervals for different manufacturing steps, quantities dispensed etc.	Submitted.

28.		approval of api/ dml/gmp certificate of api manufacturer issued by concerned regulatory authority of country of origin.	Submitted.
29.		documents for the procurement of api with approval from drap (in case of import)	Firm has submitted copy of commercial invoice attested by AD I&E DRAP Karachi, dated 18-11-2021.
30.		compliance record of hplc software 21cfr & audit trail reports on product testing.	Not submitted
31.		record of digital data logger for temperature and humidity monitoring of both stability chambers.	Submitted.

Decision: Approved with innovator's specifications. The firm shall submit fee of Rs. 7,500/- for correction/pre-approval change as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021, before issuance of registration letter.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

47.	Name and address of manufacturer / Applicant	M/s Usawa Pharmaceuticals. 146 S.I.Z. Risalpur, KPK, Pakistan **contract manufacturing by** M/s Bio Labs Pvt Ltd. Plot # 145, Industrial Triangle, Kahuta Road, Islamabad
	Brand Name +Dosage Form + Strength	Awacol 1MIU IV Injection
	Composition	Each Vial Contains: Colistimethate Sodium (Lyophilized Powder) ……1MIU
	Diary No. Date of R& I & fee	Dy. No.12455 dated 06.03.2019 Rs. 50,000/- dated 05.03.2019
	Pharmacological Group	Antibiotic (polymyxin)
	Type of Form	Form 5
	Finished Product Specification	The firm has claimed USP specifications.
	Pack size & Demanded Price	1's; As per SRO
	Approval status of product in Reference Regulatory Authorities.	Colistimethate Sodium 1 Million I.U. Powder for Solution for Injection (lyophilized powder in glass vial). Approved by **MHRA**
	Me-too status	Colistat powder for Injection. Reg. No. 76160
	GMP status	M/s Usawa Pharmaceuticals was inspected on 08.01.2019, wherein satisfactory level of GMP was reported M/s Usawa Pharmaceuticals was inspected on 08.07.2021, 15.07.2021, 30.07.2021 and 03.08.2021 wherein renewal of DML / regularization of layout plan, grant of additional section as well as change in section was recommended
	Remarks of the Evaluator.	• The drug product specifications have not been evaluated.
		• Did not provide chemical name of the API at serial No. 03. Later on, submitted it. • Had mentioned Colistimethate Sodium eq. to Colistimethate and mentioned its weight as 85.68mg in master formula. Then, mentioned

		Colistimethate Sodium…1MIU and revised 85.68mg to 90mg (for 7% water contents and 4%overage). Then, revised Colistimethate Sodium…90mg (for 7% water contents and 4%overage to Colistimethate Sodium…80mg. But the label claim in the revised documents is Colistimethate Sodium eq. to Colistimethate….1MIU. Then, once again submitted the label claim "Each Vial Contains: Colistimethate Sodium (Lyophilized Powder)…1MIU" shall be considered. • Also mentioned water for injection, and lyophilization process. • Added packing process to the manufacturing outlines. • Revised brand Awacol 11MU to Awacol 1MIU. • Submitted Rs. 7500 (challan- 557752858924)
	Decision of 321st meeting: Registration Board deferred the case for submission of batch manufacturing details of most recent commercial batch from M/s Bio Labs Pvt Ltd., for applied formulation to confirm the fact whether Colistimethate injection is formulated from pre-lyophilised drug substance or otherwise.	
	Firm's response: Firm has submitted BMRs form M/s Bio labs wherein applied formulation has been manufactured by way of lyophilization.	
	Decision: Approved as per following label claim: **Each Lyophilized Vial Contains:** **Colistimethate Sodium …… 1MIU**	
48.	**Name and address of manufacturer / Applicant**	**M/S Health Care Pharmaceuticals 40-Km,Lahore Road Multan**
	Brand Name +Dosage Form + Strength	LEXO 120mg Capsule
	Composition	Each Capsule contains: Fexofenadine HCl……....120mg
	Diary No. Date of R& I & fee	Dy.No.26400 ;(09-12-2019);Rs.20,000/-
	Pharmacological Group	Antihistamine
	Type of Form	Form -5
	Finished product Specification	USP
	Pack size & Demanded Price	10's and 20's; As per PRC
	Approval status of product in Reference Regulatory Authorities.	Could not be confirmed
	Me-too status	Exo Capsule English Pharmaceuticals
	GMP status	New License (DML 000905) (Inspection Date: 28/06/2019)
	Evaluation by PEC	Reference product could not be confirmed
	Decision of 294th meeting: Deferred for evidence of approval of applied formulation in reference regulatory authorities / agencies which were adopted by the Registration Board in its 275th meeting.	
	Firm's response: Firm has submitted revised composition as following against the reference mentioned hereafter: "Each Film Coated Tablet Contains: Fexofenadine HCl…120mg" Approval status of product in Reference Regulatory Authorities: Approved by TGA of Australia Me-too status: Fanoxin Tablets 120mg "M/s Jawa Pharmaceutical (Pvt) Ltd, Lahore (Reg.#052778)	
	Decision: Approved as per following label claim: **"Each Film Coated Tablet Contains:** **Fexofenadine HCl…120mg"** **The firm shall submit fee of Rs. 30,000/- for correction/pre-approval change in product dosage form as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021, before issuance of registration letter.**	
49.	**Name and address of manufacturer / Applicant**	**M/S Health Care Pharmaceuticals 40-Km,Lahore Road Multan**

	Pack size & Demanded Price	20g tube & as per SRO
	Approval status of product in Reference Regulatory Authorities.	(MHRA Approved)
	Me-too status	Miconit Oral Gel 2% of M/s Bio-Labs (Reg. # 054776)
	GMP status	New License (DML 000905) (Inspection Date: 28/06/2019)
	Evaluation by PEC	
	Decision of 293rd meeting: Deferred for the revision of label claim as per innovator’s.	
	Firm’s response: Firm has submitted following revised label claim as per Innovator: **“**Each gm contains: Miconazole …….. 20mg”	
	Decision: Approved as per following label claim: **“Each gm contains:** **Miconazole …….. 20mg”** **The firm shall submit fee of Rs. 7,500/- for correction/pre-approval change in product label claim as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021, before issuance of registration letter.**	
51.	**Name and address of manufacturer / Applicant**	**Simz Pharmaceuticals (Pvt) Ltd., 574-575, Sunder Industrial Estate, Raiwind Road, Lahore Contract manufactured by Friends Pharma (Pvt) Ltd, 31-Km,**

		Ferozepur Road, Lahore
	Brand Name +Dosage Form + Strength	**Sunday Injection 5mg/1ml**
	Composition	Each ml contains:- Cholecalciferol (vitaminD3)……5mg (vitamin-D analogue)
	Diary No. Date of R& I & fee	Dy No. 9399 31-7-2013 PKR 50000/- (31-7-2013)
	Pharmacological Group	Vitamin
	Type of Form	Form 5
	Finished product Specifications	
	Pack size & Demanded Price	1ml ampoule As per SRO
	Approval status of product in Reference Regulatory Authorities	VITAMIN D3GOOD (ANSM France approved)
	Me-too status	Vitamin D3injection by Ameer Pharma
	GMP status	
	Remarks of the Evaluator	Reminder 02-05-2018 Letter 04-4-2018 •Latest GMP inspection report of the manufacturer which should have been conducted within a period of last 1 year. •Description of container closure has not been submitted. •Detail of already registered products on contract manufacturing. •Evidence of approval of manufacturing facility / section of the manufacturer by Licensing division •The application on Form 5 has been submitted by M/s Friends Pharma, while the applicant is M/s Simz Pharma.
	Previous Decision 284	Registration Board in its 284th meeting decided as under: Registration Board deferred the case for further deliberation
	Evaluation by PEC AD(PEC-XII)	Deficiencies already communicated to the firm, further product is approved in ANSM France and in Me-Too 600,000 IU(15mg) of cholecalciferol has used according to the Registered product Data.
	Previous Decision (295)	Deferred for submission of followings: • Latest GMP inspection report of the manufacturer which should have been conducted within a period of last 1 year. • Description of container closure has not been submitted. • Detail of already registered products on contract manufacturing. • Evidence of approval of manufacturing facility / section of the manufacturer by Licensing division • The application on Form 5 has been submitted by M/s Friends Pharma, while the applicant is M/s Simz Pharma.

	Evaluation by PEC AD	

S#	Query	Response
1.	Latest GMP inspection report of the manufacturer	Last inspection report dated 08/3/2019 panel recommended renewal of DML.
2.	Description of container closure has not been submitted.	The container is 1 ml glass ampoule
3.	Detail of already registered products on contract manufacturing	Firm claims that No registered product is there on contract
4.	Evidence of approval of manufacturing facility / section of the manufacturer by Licensing division	The general lyophilized injection and liquid injection(General) is present
5.	The application on Form 5 has been submitted by M/s Friends Pharma, while the applicant is M/s Simz Pharma	The application on Form 5 has been submitted by the applicant M/s Simz Pharma instead of M/s Friends Pharma

	Decision of 312th meeting: Deferred for evaluation of the applied formulation with reference to the Pharmacopoeial monographs available for "Cholecalciferol injection".
	Firm's response: Firm has submitted that no pharmacopoeial monograph is available so kindly grant us the registration on Innovator specifcations.
	Decision: Approved with innovator's specifications. The firm shall submit fee of Rs. 7,500/- for correction/pre-approval change in product specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021, before issuance of registration letter.

52.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Inventor Pharma (Pvt.) Ltd. Plot No K/196 S.I.T.E. (SHW) Phase II, Karachi, Pakistan.**
	Name, address of Manufacturing site.	M/s Inventor Pharma (Pvt.) Ltd. Plot No K/196 S.I.T.E. (SHW) Phase II, Karachi, Pakistan.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	--
	Evidence of approval of manufacturing facility	--
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)

	Dy. No. and date of submission	Dy. No 20056 dated 13-07-2022
	Details of fee submitted	Rs.30,000/- dated 01-03-2022
	The proposed proprietary name / brand name	**TERB-IN-H CREAM 10gm**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each gram contains: Terbinafine hydrochloride……10mg
	Pharmacotherapeutic Group of (API)	Anti-Fungal ((D01BA02)
	Pharmaceutical form of applied drug	A smooth white colored cream filled in Alu Tubes.
	Reference to Finished product specifications	JP Specs

	Proposed Pack size	1 x 10g
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Lamisil 1% Cream (MHRA Approved)
	For generic drugs (me-too status)	TERBIMAX CREAM 10mg of M/s Mexitech Pharma (Pvt) Ltd.
	Name and address of API manufacturer.	**Terbinafine Hydrochloride**: Cipla-Kurkumbh Cipla Limited. ***Address:*** Plot No. D-22, MIDC Industrial Area, Kurkumbh Village, Taluka-Daund, District-Maharashtra, India. Tel. No. +91 -22-25754354
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted pharmaceutical equivalence of their product against the innovator's product TERBIMAX CREAM 10mg of M/s Mexitech Pharma (Pvt) Ltd.
	Analytical method validation/verification of product	Firm has submitted analytical method validation study reports for drug substance as well as drug product.

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	N/A
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	--
3.	Documents for the procurement of API with approval from DRAP (in case of import).	--
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record for product testing.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted certificate of 21 CFR compliance for the HPLC system along with audit trail report for product testing.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator: Following shall be submitted:

- Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.
- Documents for the procurement of API with approval from DRAP (in case of import).
- GMP status of the firm
- Evidence of approval of manufacturing facility

Decision of 331st meeting: Registration Board deferred the case for submission of reply to the above cited shortcomings.

Firm's response: Firm has submitted following:

- GMP certificate no. NEW-WHO-GMP/CERT/KD/103280/2021/11/37083 issued by FDA Maharashtra valid upto 15-08-2024.
- Copy of commercial invoice attested by AD I&E DRAP, Karachi dated 22-06-2021 for 1Kg of Terbinafine HCl.
- Copy of GMP certificate issued by Additional Director DRAP, Karachi issued on basis of inspection conducted on 13-09-2022 declaring availability Cream/Ointment (geenral) section

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**

• **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of Azithromycin is present in USP. The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical

		procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 36 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (200407021,200407022,200407023)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	
	Analytical method validation/verification of product	Method verification studies have submitted including accuracy, precision, specificity etc for drug product and drug susbatnce.

STABILITY STUDY DATA			
Manufacturer of API	M/s Hebei Guolong Pharmaceuticals Co., LTD China		
API Lot No.	220207001		
Description of Pack (Container closure system)	Alu-Alu blister packed in unit carton (1×10's)		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 2, 4, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	T-61	T-62	T-63
Batch Size	1500 Tablet	1500 Tablet	1500 Tablet
Manufacturing Date	08-2021	08-2021	08-2021
Date of Initiation	20-08-2021	20-08-2021	20-08-2021
No. of Batches	03		

Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Submitted
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Submitted

4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	

Previous Decision: Registration Board in its 321st meeting d deferred the case for clarification / submission of following points to which firm has responded as mentioned below against each.

Remarks of Evaluator:

Sr. No.	Observations	Response by the firm
1	Provide analytical method verification studies including specificity, precision and accuracy for drug substance performed by drug product manufacturer.	Submitted
2	Since the excipients used in the formulation are different from the innovator's / reference product, therefor compatibility studies of excipients with drug substance are required along with the relevant documents.	Firm has submitted drug excipient compaitibility studies.
3	Details of section 3.2.P.4 have not been provided in the submitted dossier.	Submitted.
4	Justification is required since you have not performed UNIFORMITY OF DOSAGE UNITS as described in official monograph of USP. Therefore, you are required to submit revised specifications along with the applicable fee.	Firm has submitted revised drug product specifications, without submission of applicable fee.
5	Submit detail analytical method used for drug product instead of submitted copy of USP monograph.	Submitted.
6	Provide complete protocols for analytical method verification studies for drug product including details of preparations and concentrations of all the standard solutions in mg/mL used in accuracy and repeatability studies.	Submitted.
7	Provide COA of reference standard actually used in the product development.	Submitted.
8	Submit stability study data along with raw data sheets in a proper sequence with separators to segregate the stability data for each time point for all the three batches.	Firm has submitted re-organized stability studies data.
9	Justification is required since at 3rd month time point of stability studies (accelerated) for batch number T61 and T62 and T63, the retention time and peak of chromatogram is exactly same for sample analysis.	Firm has submitted chromatograms for stability analysis of each trial batch.
10	Submit stability study data in section 3.2.P.8.3 as per the checklist approved by Registration Board in its 296th meeting and	Firm has submitted following:

	the CTD guidance document, which includes the following: o Reference of previous approval of applications with stability study data of the firm (if any) o Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin. o Documents for the procurement of API with approval from DRAP (in case of import). o Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc. o Compliance Record of HPLC software 21CFR & audit trail reports on product testing. Record of Digital data logger for temperature and humidity monitoring of both stability chambers.	• GMP certiifcat issued by State Food And Drug Administtration China valid upto 14-11-2025. • Copy of commercial invoice attested by AD I&E DRAP, Karachi dated 18-07-2021 for 10 Kg of Azithromycin. • Analytical record for stability studies. • Data logger for stability chambers.
10	Provide complete batch manufacturing record along with the calculations for potency adjustment considering the assay value of Azithromycin Dihydrate as per submitted COA.	Submitted
11	Provide data of pharmaceutical equivalence and comparative dissolution profile against reference / innovator's product along with the relevant documents.	Firm has submitted Pharmaceutical Equivalence and CDP studies against the Zetamax tablet of M/s Pfizer.
12	Scientific justification is required since as per USP monograph of Azithromycin Tablet, the injection volume is 100uL while as per submitted dossier the injection volume Is 20uL. Moreover, provide evidence of use of column oven having capacity to maintain the column temperature at 50°C as per USP requirement.	Firm has submitted revised analytical procedure as per USP monograph declaring that earlier it was mistakenly written

Decision: Approved with innovator's specifications. The firm shall submit fee of Rs. 7,500/- for correction/pre-approval change as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021, before issuance of registration letter.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

54.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Fortune Pharma Private Limited Plot # K/201,S.I.T.E (SHW) Phase-II, Karachi**
	Name, address of Manufacturing site.	M/s Fortune Pharma Private Limited Plot # K/201,S.I.T.E (SHW) Phase-II, Karachi
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)

	Details of fee submitted	Rs.75,000/- dated 13-07-2022
	The proposed proprietary name / brand name	**MetroWel Infusion**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each 100ml contains: Metronidazole …..…… 500 mg
	Pharmaceutical form of applied drug	Sterile Solution for intravenous infusion
	Pharmacotherapeutic Group of (API)	Nitro-imidazole Antimicrobials
	Reference to Finished product specifications	BP
	Proposed Pack size	As per SRO
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	MHRA UK approved formulation
	For generic drugs (me-too status)	Flagyl Infusion of Sanofi Aventis
	Name and address of API manufacturer.	M/s Hubei Hong Yuan Pharmaceuticals technology Co. Ltd. Address: 126 # Dabeishan Road, Industrial and Economic Development Zone Luotian County, Huanggang Cirt, Hubei, China
	Evaluation by PEC:	
	The applied product to be manufactured by M/s Vision Pharmaceuticals Plot # 22,23, Industrial Triangle, Kahuta Road, Islamabad has already been approved by Registration Board in its 331st meeting based on the data of same batches of drug product as submitted in the instant case. The details of the already approved product are as follows:	

Applicant firm	M/s Well & Well Pharma (Pvt) Ltd. Plot No.7 Street S-8 National Industrial Zone RCCI Rawat
Manufacturer firm	M/s Vision Pharmaceuticals Plot # 22,23, Industrial Triangle, Kahuta Road, Islamabad
Brand Name	MetroWel Infusion

	Decision of 333rd meeting: Deferred for the clarification of applying in two different container/closure systems as the same formulation is already registered in glass vial.
	Firm's response: We M/s Indus Pharma (Pvt) Ltd Hereby, would like to clarify that we currently hold registration for the aforementioned product in glass vials. However, we have submitted an application for the same formulation in a different container ciosure system specifically BFS as separate drug product requiring new Registration on applied container closure as part of our business expansion strategy. This is to meet the marketing demand Furthermore, the formulation applied in a similar container is also available internationally.
	Decision: Registration Board while considering the approval of applied formulation by reference regulatory authorities i.e., US FDA in Plastic container closure system approved the instant application as separate registration.

57.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Caraway Pharmaceuticals Plot # 12, Street N-3, National industrial Zone, Rawat, Islamabad**
	Name, address of Manufacturing site.	M/s Caraway Pharmaceuticals. Plot # 12, Street N-3, National industrial Zone, Rawat, Islamabad
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)

	GMP status of the firm	GMP certificate issued on basis of inspection conducted on 09-03-2020
	Evidence of approval of manufacturing facility	GMP certificate issued on basis of inspection conducted on 09-03-2020 declares availability of Tablet general section.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Dy. No. and date of submission & Details of fee submitted	Dy.No 24077 dated 25-08-2022 Rs.30,000/- dated 23-08-2022
	The proposed proprietary name / brand name	**Terb-C 250mg Tablet**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Uncoated Tablet Contains: Terbinafine HCl …..250mg
	Pharmaceutical form of applied drug	Uncoated tablet
	Pharmacotherapeutic Group of (API)	Anti fungal agent
	Reference to Finished product specifications	USP specification
	Proposed Pack size	As per SRO
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Lamisil tablet Approved by US FDA
	For generic drugs (me-too status)	Lamisil tablet of Novartis Reg. 013209
	Name and address of API manufacturer.	M/s Saptagir Laboratories Pvt Ltd Sy.no parts of 27, 46 & 50 to 56, Ananthasagar (Vill) chegunta (Mandal), Medak (Dist.), Telanga, India-502 247
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH and the real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis,

		justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical Equivalence Studies against the Lamisil tablet of M/s Novartis has been submitted
	Analytical method validation/verification of product	Firm has submitted verification studies of the drug substance and the drug product.
	Stability studies	Firm has submitted stability studies data of three batches at both accelerated and long term conditions.

STABILITY STUDY DATA

Manufacturer of API	M/s Saptagir Laboratories Pvt Ltd Sy.no parts of 27, 46 & 50 to 56, Ananthasagar (Vill) chegunta (Mandal), Medak (Dist.), Telanga, India-502 247

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	N/A
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	--
3.	Documents for the procurement of API with approval from DRAP (in case of import).	--
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator[II]:

Decision of 335th meeting: Registration Board deferred the case for submission of reply to the below cited shortcomings.

Firm's response:

Section #	Observations	Firm's response

1.3	Latest GMP inspection report of the drug product manufacturer shall be submitted, conducted within last three years.	Firm ha ssubmitted panel inspection report dated 22-02-2022 recommending renewal of DML.
1.5.2	Label claim for strength of Terbinafine shall be submitted as per Innovator drug product as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.	Firm has submitted following revised label claim: Each Tablet Contains: Terbinafine HCl eq. to Terbinafine …..250mg
3.2.S.4.4	Submit COA of Terbinafine HCl of relevant batch used for manufacturing of drug product stability batches, from the drug substance manufacturer & drug product manufacturer.	Submitted.
3.2.P.2.2.1	Submit CDP studies in three dissolution mediums of pH 1.2, 4.5 & 6.8 performed against the reference product.	Suubmitted against Lamisil 250mg tablet.
3.2.S.7	• Long term stability studies data for shall be submitted till claimed shelf life.	Submitted
3.2.P.8.3	Submit following: • Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin. • Documents for the procurement of API with approval from DRAP (in case of import). • Data of stability batches supported by respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc. • Compliance Record of HPLC software 21CFR & audit trail reports on product testing • Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	• GMP certificate valid till 20-02-2024 issued by DCA, Government of Telangana. • Copy o fcommercial invoice attested by AD I&E DRAP, Islamabad dated 30-04-2021. • Analytical record for drug product stability studies along with audit tril nad data logger record for stability batches.

Decision: Approved as per following label claim:
"Each Tablet Contains:
Terbinafine HCl eq. to Terbinafine …….. 250mg"

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

The firm shall submit fee of Rs. 7,500/- for correction/pre-approval change in label claim as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021, before issuance of registration letter.

58.	Name, address of Applicant / Importer	GlaxoSmithKline Pakistan Limited,35 Dockyard Road, West Wharf, Karachi 74000, Pakistan
	Details of Drug Sale License of importer	License No: 1180 Address: F-268 S.I.T.E. Karachi Validity: 19.02.2022 Status: License to stock, exhibit for sale, distribute and sell by way of whole-sale. Renewal: Firm has submitted an acknowledgement receipt of renewal dated 01.02.2022

	Name of exporting country	India
	Detail of certificates attached (CoPP, Free sale certificate, GMP certificate)	CoPP: Firm has submitted original, legalized Export CoPP certificate (No.04) dated 14.05.2022 issued by Food and Drug Administration, India. Firm has also submitted original, legalized Australian CoPP certificate (No.21/1171) dated 21/10/2021 issued by Department of Health, Therapeutic Goods Administration for evidence of product approval in SRA markets and confirmation of Free sale. The CoPP confirms GMP status of the manufacturing site through periodic inspection every year. According to the CoPP, the exporting country is Australia and the name and address of applicant is GlaxoSmithKline Australia Pty Ltd. 1061 Mountain Highway BORONIA VIC 3155 Australia and importing requesting country is Pakistan.
	Details of letter of authorization / sole agency agreement	Firm has submitted sole agency confirmation from Piramal Pharma Limited. The letter states that the Product License Holder and manufacturer i.e., M/s. Piramal Pharma Limited authorizes GlaxoSmithKline Pakistan Limited as their sole agency for supply and distribution of Kozenis 150mg Tablet in Pakistan.
	Status of the applicant	☐ Manufacturer ☒ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☒ New Drug Product (NDP) ☐ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	For imported products, specify one the these	☒ Finished Pharmaceutical product import ☐ Buk import and local repackaging ☐ Buk import and local repackaging for export purpose only
	Dy. No. and date of submission	Dy. No. 205211 dated 10/09/2021
	Details of fee submitted	PKR 75,000/-: 24.06.2021
	The proposed proprietary name / brand name	**Kozenis (Tafenoquine) 150mg Tablets**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each tablet contains 188.2mg of tafenoquine succinate (equivalent to 150mg of tafenoquine)
	Pharmaceutical form of applied drug	Tablets
	Pharmacotherapeutic Group of (API)	Antimalarial (106635-81-8)
	Reference to Finished product specifications	The product is an originator brand. GSK Specs.
	Proposed Pack size	The pack contains 2 tablets
	Proposed unit price	NA – The supply will primarily be made through a supranational agency (e.g., UNICEF) or through direct procurement by the Government authorities or through a tender.
	The status in reference regulatory authorities	Krintafel (USFDA Approved), Kozenis (TGA Approved) Firm has submitted evidence of product approval in reference regulatory authorities dated 10.09.2021
	For generic drugs (me-too status)	NA

	Module-II (Quality Overall Summary)	Firm has submitted QOS as per ICH M4 CTD with justification for a new drug (originator brand)
	Name, address of drug substance manufacturer	Piramal Pharma Limited Survey Numbers 7-70, 70/1 and 70/2 Digwal Village Kohir Mandal Sangareddy District 502 321 Telangana India
	Module-III Drug Substance:	Firm has submitted detailed drug substance data comprising of General Information, Structure, Manufacture, Characterisation, Control of Drug Substance, Reference Standards or Materials, Container Closure System, Stability.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of API at accelerated as well as real time conditions. The real time stability data is conducted at for up to 48 months at 30°C/75% RH or for up to 6 months and accelerated at 40°C/75% RH.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted Clinical Study Reports comprising of Reports of Biopharmaceutic Studies, Bioavailability (BA) Study Reports, Comparative BA and Bioequivalence (BE) Study Reports, Reports of Studies Pertinent to Pharmacokinetics using Human Biomaterials.
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	Child-resistant aluminum foil blister strip
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches of API at accelerated as well as real time conditions. The real time stability data is conducted at for up to 48 months at 30°C/75% RH or for up to 6 months and accelerated at 40°C/75% RH.
Evaluation by PEC:		
Decision of 317th meeting: Deferred for following: • Evaluation & presentation of complete details regarding Pharmacological, Pharmacodynamic & clinical indications, contra-indications etc of the applied product. • Approval and availability status of the product in reference regulatory authorities and other countries with malaria prevalence. • Opinion of Directorate of Malaria Control regarding tentative rollout plan of the drug product.		

Firm's response:
Opinion of the Directorate of Malaria Control (DoMC)-Pakistan on the use of tafenoquine 150mg tablet, with expert commentary on its registration:

The Directorate of Malaria Control (DoMC)-Pakistan enthusiastically supports and propose a rollout plan for tafenoquine 150mg tablet, informed by extensive international and Pakistan- based research findings. Studies such as those conducted by LIanos-Cuentas et al. (2019) and Commons et al. (2018) have demonstrated the remarkable efficacy of tafenoquine in preventing relapse of Plasmodium vivax malaria, thereby offering a promising solution to the challenges posed by this form of the disease.

Research efforts in Pakistan, such as the work of Khan et al. (2020), have provided valuable insights into the epidemiology of malaria in the region and underscored the urgent need for innovative treatment approaches. Additionally, studies by Malik et al. (2017) have highlighted the burden of P. vivax malaria in Pakistan and emphasized the importance of effective radical cure strategies.

Tafenoquine's unique single-dose regimen and long-lasting efficacy represent significant advancements in simplifying treatment protocols and enhancing patient adherence, as underscored by research by Dow et al. (2020). These attributes offer a remarkable opportunity to streamline malaria control efforts in Pakistan, as supported by findings from local studies such as those conducted by Khattak et al. (2018).

However, it is essential to **consider potential side effects** associated with tafenoquine. While generally well-tolerated, adverse effects such as gastrointestinal disturbances, headache, and dizziness have been reported in clinical trials, as documented in studies by LIanos-Cuentas et al. (2019) and Dow et al. (2020), Close monitoring and prompt management of adverse reactions are crucial to ensure the safe and effective use of tafenoquine in malaria control programs.

Furthermore, **international research papers**, including the work of White et al. (2018) and Baird (2018), have provided critical insights into the efficacy, safety profile, and side effect profile of tafenoquine in diverse malaria-endemic settings. Their findings underscore the importance of comprehensive risk-benefit assessments and vigilant pharmacovigilance measures in the registration and deployment of tafenoquine.

While acknowledging the importance of addressing potential side effects, including adverse effects and cost considerations, we draw confidence from research efforts such as those by Lacerda et al. (2019) and the insights gained from both Pakistan-based and international studies. The Directorate is committed to supporting initiatives aimed at monitoring drug interactions, ensuring affordability, and fostering collaboration, as advocated by White et al. (2018), to safeguard the effectiveness of tafenoquine in combating malaria in Pakistan and globally.

In **CONCLUSION**, the Directorate of Malaria Control (DoMC)-Pakistan firmly believes that the introduction of tafenoquine 150mg tablet holds great promise in advancing our fight against malaria, as evidenced by compelling findings from international and Pakistan-based research endeavors. We stand ready to champion its integration into malaria control programs in Pakistan and are committed to realizing its full potential in improving health outcomes for Individuals at risk of malaria.

PROPOSED ROLLOUT PLAN

Keeping in view the importance of Tafenoquine in the radical cure of vivax malaria and elimination of malaria from Pakistan, the Tafenoquine must be introduced for routine management of vivax malaria. The introduction of Tafenoquine will be linked to WHO recommendations for its use in adult and pediatric vivax cases and approval for use in Pakistan by DRAP

As discussed earlier, prescription of Tafenoquine is linked with the G6PD mandatory testing. Currently the Directorate of Malaria Control Pakistan (DoMC)-Pakistan has launched a G6PD testing pilot project in 9 high malaria burden districts across 4 provinces through the support of Asia Pacific Malaria Elimination Network (APMEN) and Malaria Medicines Venture (MMV). A very comprehensive training program for Provincial Master Trainers and selected Health Facilities focal persons for the use of G6PD analyzers was conducted here in Islamabad during January 07-09, 2024.

Following are some **salient features** of Tafenoquine rollout plan in Pakistan

1. As Tafenoquine is linked to G6PD testing, in initial phase, after approval, Tafenoquine piloting will be done in the districts where G6PD testing is already available.

2. Updating the national treatment guidelines to include Tafenoquine in the routine vivax malaria case management.

3. Expansion of G6PD testing and relevant trainings to all the tertiary and secondary level health facilities across Pakistan followed by availability of Tafenoquine in these health facilities.

4. Further expansion of G6PD testing and relevant trainings to all the primary healthcare facilities across Pakistan coupled with Tafenoquine availability.

5. Prohibition on the over-the-counter sale of Tafenoquine in Pakistan.

7. Involving private sector and provision of Tafenoquine to only those health facilities where G6PD testing is available and being routinely conducted.

- Firm has also referred to the Krintafel tabket approved by US FDA.

Decision: Registration Board while considering the opinion of the "Directorate of Malaria Control (DoMC)-Pakistan" and approval of applied formulation in US FDA decided to approve the instant application.

Furthermore, Registration Board, keeping in view the sensitivity of the product specially in G6PD deficient patients, decided to:

- **restrict the dispensing/sale of the instant product to "Hospital only" having facilities of G6PD testing as condition of registration letter.**
- **issue an advisory to the Health Care Commissions in the light of proposed rollout plan for Pakistan to ensure the G6PD testing and relevant trainings to all the health facilities across Pakistan where Tafenoquine is being dispensed.**

59.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Pharmedic Laboratories Pvt Ltd. 16-km, Multan Road Lahore, Pakistan**
	Name, address of Manufacturing site.	M/s Pharmedic Laboratories Pvt Ltd. 16-km, Multan Road Lahore, Pakistan
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	Copy of GMP certificate issued on the basis of inspection conducted on 04-02-2020.
	Evidence of approval of manufacturing facility	Copy of GMP certificate issued on the basis of inspection conducted on 04-02-2020 declares availability of Tablet General Section
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)

	Dy. No. and date of submission & Details of fee submitted	Dy.No 23832 dated 23-08-2022 Rs.30,000/- dated 20-06-2022
	The proposed proprietary name / brand name	**Jargin Duo 12.5/500 mg Tablet**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Film Coated Tablet Contains: Empagliflozin…12.5mg Metformin HCl …..500mg
	Pharmacotherapeutic Group of (API)	Antidiabetic combination
	Pharmaceutical form of applied drug	Film coated tablet.
	Reference to Finished product specifications	Innovator's specifications.
	Proposed Pack size	As per SRO
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Trijardy by Boehringer Ingelheim Pharmaceuticals, Inc. is USFDA Approved.
	For generic drugs (me-too status)	Diampa-M 5/500 of M/s Getz pharma
	Name and address of API manufacturer.	**Metformin Hydrochloride** M/s Aarti Drugs Limited, Plot no. 211-213, Road no. 2, G.I.D.C., Sarigam Valsad, Gujarat India. **Empagliflozin** M/s Zhejiang Tianyu Pharmaceutical Co., Ltd., No. 15, Donghai 5th Avenue, Zhejiang Provinceal Chemical and medical Rw Materials Base Linhai Zone, Taizhou City, Zhejiang province, China.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, Solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module-III Drug Substance:	The firm as submitted detail of nomenclature, structure, general properties, solubility's, physical form, manufacturers, description of manufacturing process and controls, tests for impurity, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Submitted for both drug substances as per Zone IV conditions
	Module-III Drug Product:	The firm has submitted detail of manufacturers, description of manufacturing process and controls, specifications, analytical procedure and its validation studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical Equivalence has been established against the Diampa-M 12.55/500 of M/s Getz

		pharma along with CDP studies wherein values f2 are in the acceptable range.
	Analytical method validation/verification of product	Method validation studies have submitted including linearity, range, accuracy, precision, specificity.

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	N/A
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	--
3.	Documents for the procurement of API with approval from DRAP (in case of import).	--
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	N/A.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted.

Remarks of Evaluator:

Decision: Registration Board deferred the case for submission of reply to the below cited shortcomings.

Firm's response:

Section #	**Observations**	**Firm's response**

1.6.5	Submit valid DML/GMP certificate of drug substance manufacturers, issued by relevant regulatory authority of country of origin.	Valid GMP certificate till 20-06-2026 issued by Food & Drugs Control Administration Gujarat, India has been submitted.
3.2.S.1.3	Justify the declaration of solubility of Empagliflozin as "Practically insoluble in water" with reference to the innovator drug product literature	It is a typographic error, Empagliflozin is slightly soluble in water.
3.2.S.4.1	Justify the variation in drug substance specifications between drug substance manufacturer and M/s Pharmedic laboratories for Empagliflozin	Firm has submitted revised drug substance specifications.
3.2.S.4.3	Analytical method verification studies of drug substances shall be submitted from M/s Pharmedic laboratories.	Submitted
3.2.S.4.4	• Submit COA of relevant batch of Metformin HCl & Empagliflozin used for preparation for drug product trial batches, from drug substance manufacturer. • Submitted COA of Empagliflozin form M./s Pharmedic Laboratories declare drug substance manufacturer as M/s Shanghai YST Pharma Co. Ltd, China whereas 3.2.S part has been submitted from M/s Zhejiang Tianyu Pharmaceutical Co., Ltd. Justification shall be submitted in this regard.	Firm has submitted COA of relevant batch drug substance. The submitted invoice attested by AD I&E Lahore dated 24-06-2021 is from M/s Shanghai YST Pharma Co. Ltd, China while the COA of drug substance is from M/s Zhejiang Tianyu Pharmaceutical Co., Ltd
3.2.S.7.3	Long term stability studies data of Empagliflozin shall be submitted till claimed shelf life as per Zone IV conditions.	Submitted
3.2.P.5.1	Justification shall be submitted for dissolution limits of 30 minutes with reference to the innovator drug product literature.	Firm has submitted revised drug product specifications.
3.2.P.5.4	Justification shall be submitted for not performing "Uniformity of Dosage Unit" test by way of "Content Uniformity" for Empagliflozin.	Firm has ubsmitted revised raw data sheets with performance of content uniformity test.
3.2.P.8.3	Submit following: • Documents for the procurement of API with approval from DRAP (in case of import). • Compliance Record of HPLC software 21CFR & audit trail reports on product testing • Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted copy of comemrial invoice no. YST21121 attested by AD I&E DRAP, Lahore dated 24-06-2021 for 181gm of Empagliflozin. The invoice is from M/s Shanghai YST Pharma Co. Ltd, China while the COA of drug substance is from M/s Zhejiang Tianyu Pharmaceutical Co., Ltd. Data logger record submitted.

Decision: Deferred for clarification regarding manufacturer of drug substance used for manufacturing of drug product stability batches since submitted copy of commercial invoice is from M/s Shanghai YST Pharma Co. Ltd, China while the COA of drug substance is from M/s Zhejiang Tianyu Pharmaceutical Co., Ltd.

P.8**	Documents confirming import of API, approved by DRAP I&E office shall be submitted. cord of HPLC software 21CFR & audit trail uct testing shall be submitted.	tted that they have procured the sample of API . Firm has submitted FedEx courier slip in this f commercial invoice no. HY181115-1 (not AP), has been submitted for 0.5 Kg of Azilsart.

Decision of 307th meeting: Registration Board deferred all three applied strengths of Azilsart 40mg tablet (Azilsartan), Azilsart 20mg tablet (Azilsartan) & Azilsart 10mg tablet (Azilsartan) for following reasons:

- Status of the applied formulation in reference regulatory authorities other than PMDA of Japan.
- Comparative evaluation of the indications, dosage other clinical particulars between "Azilsartan Kamedoxomil tablet" & "Azilsartan tablet".

Firm's response:

- The applied molecule is available only in PMDA of Japan as azilva tablet.
- Moreover, firm has submitted following comparison:

S. No.	COMPARATIVE EVALUATION OF STUDY OF CLINICAL DATA		
	Clinical DATA	**Azilsartan**	**Azilsartan Medoxomil**
1	**Metabolism**	Directly enter as an active. No need of conversion from inactive to active form. Does not require hepatic metabolism by CYP2C9. Thus more effective in patients with hepatic compromise.	Azilsartan medoxomil is a pro-drug. It absorbs in gut and biotransforms in liver converting it into its active metabolite azilsartan by enzyme CYP2C9.
2	**Indication**	For the treatment of hypertension	For thr treatment of Hypertension
3	**Dosage**	20 mg - 80 mg	40 mg - 80 mg
4	**Pharmacokinetics:**		
	Bioavailability	60% approximately	60%
	Elimination half-life	11 hours	11 hours
	Peak plasma concentration	1.5 to 3 hours	2 to 3 hours
5	**Adverse effects**	orthostatic hypotension, nausea, muscle spasm, dizziness, asthenis, fatigue, cough, diarrhea	ypotension/orthostatic hypotension, ausea, diarrhea, fatigue, muscle spasm, postural dizziness,

Decision of 312th meeting: Registration Board deferred for further deliberations upon strength of applied formulations wrt USFDA approved formulation.

Firm's response:

- In Pakistan 40 and 80 mg is registered as Azilsartan Medoxomil while USFDA also launched 20 mg strength as Edarbi.
- 10 mg Azilsartan tablet is for children while 20mg is starting dose for Adults.
- Azilva Tablet is available in 3 strength 10, 20 and 40 as Azilsartan.

Sr.#	PARAMETERS	AZILSARTAN	AZILSARTAN MEDOXOMIL
1	**Metabolism**	Directly enter as an active. No need of conversion from inactive to active form. Does not require hepatic metabolism by CYP2C9. Thus, more effective in patients with hepatic compromise.	Azilsartanmedoxomil is a pro-drug. It absorbs in gut and bio transforms in liver converting it into its active metabolite azilsartan by enzyme CYP2C9.
2	**Indication**	For the treatment of hypertension	For the treatment of Hypertension
3	**Tablet Strength**	10,20 and 40 (Azilva Japan) Applied strength (10.20 and 40)	20,40 and 80 (Edarbi USA) Registered strength (40 and 80)
4	**Dosage**	20 mg - 80 mg (Adult) 10mg(children)	40 mg - 80 mg
5	**Drug Interaction**	Azilsartan base has no such type of Hyperkalemia No dosage adjustments required in hepatic and renal compromised patients	1. Since the use of potassium supplements and potassium-containing salt substitutes with an angiotensin II receptor antagonist (e.g., azilsartanmedoxomil) can increase the potential for hyperkalemia, some clinicians have suggested that concomitant administration of these agents with azilsartan medoxomil should be avoided. 2.AzilsartanKmedoxomil is converted into active Azilsartan by Liver Enzyme (Cytochrome P450 (CYP) 2C9

			3. Should be used with caution with NSAID and other Potassium Drugs
6	**Residual Solvents in Raw Material**	Class 1 Solvents: Dichloromethane Class 3: Ethanol, Isopropanol	Class 1 solvents: Dichloromethane Class 2 Tetrahydrofuran Class 3 Solvents: Methanol, Acetone, Ethyl Acetate

- Azilsartan innovator is AZILVA available in 10mg, 20mg and 40mg.
- Azilsartan medoxomil innovator is available as EDARBI 20mg, 40mg and 80mg.

Decision of 313rd meeting: Registration Board approved Azilsart 40mg Tablet & Azilsart 20mg Tablet as per Innovator's specifications.

- Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.
- Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.
- Moreover, Registration Board deferred the application of Azilsart 10 mg tablets for further deliberation upon the indication & dosage of 10mg strength in paediatric population.

Firm's response: Firm has submitted a research article titled as "Pharmacokinetics of a Single Dose of Azilsartan in Pediatric Patients: A Phase 3, Open-Label, Multicenter Study" which concludes as under:
"In line with previous population PK data, our study suggests that pediatric patients weighing less than 50 kg may have approximately 2-fold greater exposure to Azilsartan than those weighing at least 50 kg at the same dose, whose exposure to Azilsartan is comparable to that in healthy adults. Azilsartan treatment was feasible, with no u5nexpected safety signals observed in this study in pediatric patients with hypertension. A larger phase 3 study is ongoing to explore specific efficacy in this patient group."

Decision of 316th meeting: Deferred for submission of complete "PIL/SMPc" of the innovator drug product**.**

Firm's response:

The Patient Information Leaflet (PIL) for Azilva Tablet 10mg/20mg/40mg is exclusively available in Japanese language. We have included the complete PIL as **Annexure-1.** The indications and dosage information provided below are transcribed from the original PIL found on the product packaging. Sections that have been translated are highlighted in yellow within the PIL copy.

Highlight # 1

効能・効果
高血圧
Efficacy/effect
Hypertension

Highlight # 2

用法・用量
通常、成人にはアジルサルタンとして20mgを1日1回経口投与する。年齢、症状により適宜増減されるが、1日最大投与量は40mgである。
Dosage/usage
The usual adult dose is 20mg of Azilsartan administer orally once a day. The dosage may be adjusted as appropriate depending on age and symptoms but maximum daily dose should be 40mg

A copy of Drug Information sheet is also attached as **Annexure-2.** As per drug information sheet Dosing schedule for Azilsartan shall be as follows:

Dosing schedule (How to take this medicine)

- Your dosing schedule prescribed by your doctor is((to be written by a healthcare professional))
- Adults: In general, take 20 mg of the active ingredient at a time, once a day. The dosage may be adjusted according to the age or symptoms, but should not exceed 40 mg a day.
  Children aged 6 years old or over: In general, start taking 2.5 mg of the active ingredient at a time, once a day, for children weighing less than 50 kg and 5 mg of the active ingredient at a time, once a day, for children weighing 50 kg or over. The dosage may be adjusted according to the age, weight or symptoms, but should not exceed 20 mg a day for children weighing less than 50 kg and 40 mg a day for children weighing 50 kg or over.

This preparation contains 10 mg of the active ingredient in a tablet. Strictly follow the instructions.

- If you miss a dose, take the missed dose as soon as possible. However, wait at least 8 hours to take the next dose. You should never take two doses at one time.
- If you accidentally take more than your prescribed dose, consult with your doctor or pharmacist.
- Do not stop taking this medicine unless your doctor instructs you to do so.

Decision: Approved with innovator's specifications. The firm shall submit fee of Rs. 7,500/- for correction/pre-approval change in product specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021, before issuance of registration letter.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

	Proposed Pack size	As per SRO
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Levofloxacin Tablet 250mg Approved US FDA
	For generic drugs (me-too status)	Leflox tablet 500mg of M/s Getz Pharma
	Name and address of API manufacturer.	Zhejiang East-Asia Pharmaceutical Co., Ltd. Address: Economic Development Zone of Sanmen County, Zhejiang 317100, P.R. China.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, Solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, verification of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted pharmaceutical equivalence of their product against the innovator's product Leflox Tablet 500mg manufactured by Getz Pharma Pakistan. Firm has submitted CDP results of their product against the Leflox Tablet 500mg in 3 dissolution medias. i.e., Acidic media (pH 1.2), Acetate buffer

		(pH 4.5), Phosphate buffer (pH 6.8). The values for f2 are in the acceptable range.
	Analytical method validation/verification of product	Firm has submitted analytical method verification study reports for drug substance as well as drug product.

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP Certificate dated 29-07-2021 issued by Sanmen market supervision Administration people,s Republic of China valid for 5 years till 28-07-2026.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of import invoice having batch number DC-004-2009013 and Invoice number LEV201103-L specifying 200Kg of Levofloxacin Hemihydrate attested by AD I&E DRAP dated 25-11-2020 in name of M/s Fahmir Pharma. Firm has also submitted loan letter from M/s Fahmir Pharma for 0.7 Kg of Levofloxacin.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record for product testing. Data of stability batches supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted audit trail report for product testing.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator:

Decision of 333rd meeting: Registration Board deferred the applications of AG-FLOX 500mg Tablet & AG-FLOX 250mg Tablet for submission of reply to above cited shortcomings.

Firm's response:

Section no.	Observations	Firm's response

1.6.5	Submit valid DML/GMP certificate issued by the relevant regulatory authority of country of origin.	Submitted
3.2.S.3.1	Copies of the IR spectrum of drug substance, performed by M/s AGM pharmaceuticals shall be submitted.	Submitted
3.2.S.4.2	Analytical procedure from drug substance ,manufacturer shall be submitted.	Submitted
3.2.S.4.3	• Clarification shall be submitted regarding the "placebo solution" used in the performance of specificity parameter in analytical method verification studies of drug substance. • Submitted analytical method verification studies declare the concentration of Ciprofloxacin in performance of accuracy parameter. Justification shall be submitted in this regard.	Firm has referred diluent solution as placebo. Firm has submitted corrected analytical method verification studies.
3.2.S.4.4	Submitted COA of drug substance from M/s AGM Pharmaceuticals is not signed.	Signed COA is submitted
3.2.S.5	• Submitted COA of working standard is not from the same drug substance manufacturer. Justification shall be submitted in this regard. • Submitted COA of working standard does not declare the Assay value.	Firm has submitted COA of working standard.
3.2.S.7.3	Submitted stability reports shall be signed and stamped form drug substance manufacturer.	Submitted
3.2.P.2.2.1	Justification shall be submitted for not performing CDP and Pharmaceutical Equivalence studies against the innovator drug product. Summited results of CDP shall be justified against the solubility profile of Levofloxacin across the physiological pH range along with literary reference.	Firm has submitted that the selected market brand leader for performance of CDP studies.
3.2.P.3.5	Limits of dissolution test presented in process validation protocol are different form that recommended by USP monograph.	Revised process validation protocol has been submitted.
3.2.P.5.4	Submitted COAs of drug product trial batches from M/s AGM Pharmaceuticals are not signed.	Signed COAs submitted
3.2.P.8.3	• Documents confirming import of drug substance with approval of DRAP I&E office shall be submitted. • Run time of submitted chromatograms for Assay analysis shall be justified against the recommendations of USP monograph. • Raw data sheet for dissolution test performed during stability studies, shall be submitted. • Complete batch ,manufacturing record for stability batches shall be submitted.	Firm has submitted copy of import invoice having batch number DC-004-2009013 and Invoice number LEV201103-L specifying 200Kg of Levofloxacin Hemihydrate attested by AD I&E DRAP dated 25-11-2020 in name of M/s Fahmir Pharma. Firm has also submitted loan letter from M/s Fahmir Pharma for 0.7 Kg of Levofloxacin. Firm has submitted BMRs and raw data sheets for dissolution test.

Decision: Registration Board approved the applications of AG-FLOX 250mg Tablet & AG-FLOX 500mg Tablet. The firm shall submit fee of Rs. 7,500/- for correction/pre-approval change as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021, before issuance of registration letter.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**

Decision of 333rd meeting: Deferred for submission of reply to below cited shortcomings.

Firm's response:

Section no.	Observations	Firm's response
1.6.5	Submit valid DML/GMP certificate issued by the relevant regulatory authority of country of origin.	Submitted
3.2.S.4.2	• Reference shall be submitted for the limits for test of optical rotation. • Justification shall be submitted for not including test of Ethanol in drug substance specifications by M.s AGM Pharmaceuticals.	Firm has submitted revised drug substance analytical procedure.
3.2.S.4.3	• Clarification shall be submitted regarding the "placebo solution" used in the performance of specificity parameter in analytical method verification studies of drug substance.	Firm has referred diluent solution as placebo.
3.2.P.2.2.1	• Justify the limits of dissolution test applied in Pharmaceutical Equivalence studies.	Firm has referred to the USP monograph
3.2.P.3.5	• Limits of Assay test presented in process validation protocol are different form that recommended by USP monograph. • Submitted process validation protocol does not include Dissolution test at any stage of sampling.	Revised process validation protocol is submitted.
3.2.P.5.2	• Limits of dissolution test shall be justified against the USP monograph of Doxycycline hyclate capsule. • UV spectrophotometric parameter applied for dissolution test shall be justified against the USP monograph of Doxycycline hyclate capsule. • Dissolution parameters applied for dissolution test shall be justified against the USP monograph of Doxycycline hyclate capsule.	Firm has submitted revised analytical procedure as per USP monograph

	• Submitted analytical procedure for Assay test shall be justified against the USP monograph of Doxycycline hyclate capsule.	
3.2.P.5.3	• Analytical method verification studies for Assay test shall be submitted as per USP monograph of Doxycycline hyclate capsule.	Submitted
3.2.P.8.3	• Run time of submitted chromatograms for Assay analysis shall be justified against the recommendations of USP monograph. • Raw data sheet for dissolution test performed during stability studies, shall be submitted. • Complete batch ,manufacturing record for stability batches shall be submitted.	Firm has also submitted loan letter from M/s Fahmir Pharma for 0.7 Kg of Levofloxacin. Firm has submitted BMRs and raw data sheets for dissolution test.

Decision: Approved. The firm shall submit fee of Rs. 7,500/- for correction/pre-approval change i as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021, before issuance of registration letter.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

65.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s** AGM Pharmaceuticals Eminabad Road, G.T. Road, Gujranwala, Pakistan
	Name, address of Manufacturing site.	M/s AGM Pharmaceuticals Eminabad Road, G.T. Road, Gujranwala, Pakistan
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	New DML issued on 10-11-2021
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter of grant of section dated 10-11-2021 specifying Tablet (General) section, Capsule (General) and Dry Powder Injectable (Cephalosporin).
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy.No 27252 dated 20-11-2023
	Details of fee submitted	Rs 30,000/- dated 13-11-2023
	The proposed proprietary name / brand name	**AG-CIP 500mg Tablet**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated tablet contains Ciprofloxacin HCl equivalent to Ciprofloxacin…….. 500mg
	Pharmacotherapeutic Group of (API)	Antibiotic (flouroquinolone)
	Pharmaceutical form of applied drug	Film coated Tablet
	Reference to Finished product specifications	USP Specifications
	Proposed Pack size	As per SRO
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Approved by MHRA of UK

	For generic drugs (me-too status)	Novidate 500mg Tablet of M/s Sami Pharma (Reg.No. 011837)
	Name and address of API manufacturer.	Citi Pharma (Pvt) Ltd 3.5 Kilometer, Head Balloki Road, Phool Nagar, Kasur-55050 Punjab, Pakistan.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, Solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, verification of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted pharmaceutical equivalence of their product against the Novidat Tablet 500mg manufactured by Sami Pharma Pakistan. Firm has submitted CDP results of their product against the = Novidat Tablet 500mg in 3 dissolution medias. i.e Acidic media (pH 1.2), Acetate buffer (pH 4.5), Phosphate buffer (pH 6.8).
	Analytical method validation/verification of product	Firm has submitted analytical method verification study reports for drug substance as well as drug product including accuracy, precision, specificity etc

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	--
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP Certificate (No.31/2023-DRAP (AD-54697225495) dated 09-03-2023 issued by Drug Regulatory Authority of Pakistan valid for 3 years till 02-03-2026.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of local invoice having batch number CPH2112137 and invoice number CP21-10721 specifying 5 Kg of Ciprofloxacin HCl
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record for product testing. Data of stability batches supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	N/A
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator:

Decision of 333rd meeting: Deferred for submission of reply to above cited shortcomings.

Firm's response:

Section no.	Observations	Firm's response
1.6.5	Submit valid DML/GMP certificate issued by the relevant regulatory authority of country of origin.	Submitted
3.2.S.4.3	• Clarification shall be submitted regarding the "placebo solution" used in the performance of specificity parameter in analytical method verification studies of drug substance.	Firm has submitted that the selected market brand leader for performance of CDP studies.
3.2.P.2.2.1	• Justification shall be submitted for not performing Pharmaceutical equivalence and CDP studies against the innovator drug product • Summited results of CDP shall be justified against the solubility profile of Ciprofloxacin across the physiological pH range along with literary reference.	Firm has submitted that the selected market brand leader for performance of CDP studies.
3.2.P.8.3	• Retention time of for Ciprofloxacin in Assay analysis shall be justified against the USP monograph.	Firm has submitted raw data sheets and BMRs.

	• Raw data sheet for dissolution test performed during stability studies, shall be submitted. • Complete batch ,manufacturing record for stability batches shall be submitted.	
Decision: Approved. The firm shall submit fee of Rs. 7,500/- for correction/pre-approval change as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021, before issuance of registration letter. • **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.** • **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

DOCUMENTS / DATA PROVIDED BY THE APPLICANT		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has submitted reference of last onsite panel inspection for instant dosage form conducted during last two years i.e. EMPOLI (Empagliflozin) 10mg & 25mg Tablets which was presented in 290th meeting of the registration board & hence approved & registered by registration board Date of inspection: 13th June 2019. The inspection report confirms following points The HPLC software is 21CFR Compliant. • Audit trail on the testing reports is available. • Adequate monitoring and control are available for stability chamber. Chambers are controlled and monitored through software having alarm system for alerts as well.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	The firm has submitted copy of GMP certificate No. FJ20160009 issued by Food and Drug Administration of china valid till 22-02-2021. As per Chinese Government website no more GMP certificates are being issued after December 2019.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	The firm has submitted copy of commercial invoice (Invoice# WIS200028 MAR 18, 2020 with received quantity i.e. 300 g) for the purchase of Baloxavir Marboxil by M/s Fujian Jinsahn Zhundian Pharmaceutical Co., Ltd attested by Assistant Director (I & E) DRAP, dated 25-03-2020.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	The Firm has submitted audit trail record of product testing of HPLC for all test intervals.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).	The firm has submitted record of data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).

Remarks of Evaluator:

Sr. No.	Observations communicated	Response by the firm
1.	Submit differential fee for the registration of applied product since the applied product since the application was received in R&I section of DRAP after 7th May 2021.	Differential fee deposit slip # 5700633630 of Rs. 25,000/- has been submitted.
2.	The reference product literature showed that the structure and absolute stereochemistry of Baloxavir marboxil is verified by single crystal x-ray determination. The submitted COA from drug substance manufacturer does not contain this test.	The structure and absolute stereochemistry of Baloxavir Marboxil is verified by single crystal x-ray determination is mentioned on COA as polymorphic form, i.e: form I. Revised COA and XPRD Spectra is attached for your reference.
3.	Give a detailed account on polymorphic form of drug substance used in drug product development since several polymorphic forms of drug substance are possible as per reference literature.	Description of polymorphic form of material is defined in DMF (*3.2.S.3.1.9 summary*) as material is polymorphic form I.

4.	Elaborate the test of "Microbial limit Test" mentioned in certificate of analysis of Baloxavir Marboxil.	Microbial examination of non-sterile products is performed as per following USP method given in the texts on Microbial Enumeration Test <*61*>, Tests for Specified Microorganisms <62> and Microbiological examination of non-sterile products (*acceptance criteria for pharmaceutical preparations and substances for pharmaceutical use*) <*1111*>. As per pharmacopeia the acceptance criteria for non-sterile pharmaceutical products based on the total aerobic microbial count (*TAMC*), total yeast and molds count (*TYMC*) and objectionable microorganisms which must be absent and these are called as Microbial Limit Tests. We followed the same practice and set restricted microbiological limits as per SAMI's Specs, that is TAMC: NMT 100 cfu/g, TYMC: NMT 10 cfu/g as well as absence of pathogenic organisms including E. Coli, Salmonella, S. Aureus in our raw material.
5.	The submitted acceptance criteria for release and shelf life specifications are same. Scientific justification is required for adopting such acceptance criteria.	We develop the product specifications according to the general monograph of USP and from the chemistry reviews of USFDA, EMA. In addition, ICH Q6A states that the acceptance criteria are the same from release throughout shelf life of product. Therefore, we have also set the same specification limits for release and shelf life.
6.	The submitted process validation protocol does not describe the critical process steps and controls in defined ranges.	Existing protocol captures the required information and describes critical process parameters along with process controls. However, to make this more elaborative, we have revised these sections and version 2 of protocol is attached.
7.	Since the strategy for product development is planned according to identified QTPP which is based on evaluation of the innovator/reference product therefore, justify the authenticity of product development studies for applied formulation without comparison with innovator/reference product.	The innovator of Baloxavir Marboxil Tablet i.e. XOFLUZA 40mg & 20mg Tablets, already published a detailed characterization of API (*Baloxavir Marboxil*) in FDA chemistry review as well product assessment report of European Medicine Agency (*EMA*). This part of QTPP was derived from FDA chemistry review & EMA assessment report. Appearance of API, its solubility, pKa, partition coefficient, stereoisomerism and polymorphic form etc. were mentioned in detail by the innovator, therefore, all these required details are gathered from literature data. As the reference finished product is presented as immediate-release film-coated tablets for oral administration containing 20mg or 40mg of Baloxavir Marboxil as the active substance, therefore, we have designed our product same as reference product to ensure pharmaceutical equivalency. Product dissolution parameters and other related specification are already disclosed by the manufacturer of the reference product. Due to

		poor solubility of API, to ensure reproducible dissolution results, we have selected micronized grade of API for development of our product as suggested by the reference brand in FDA chemistry review. Due to unavailability of innovator samples, the dissolution profile in different pH mediums i.e., pH 1.2, 4.5 and 6.8 buffers as recommended in WHO for CDP is checked and the release profile found similar to that of innovator product "Xofluza Tablet" in FDA chemistry review publically available. Information related to product packaging, storage and labeling were also gathered from the above mentioned product assessment reports i.e. FDA chemistry review as well product assessment report of European Medicine Agency.

Decision of 316th meeting: Registration Board decided to defer the case for submission of pharmaceutical equivalence and CDP studies with innovator / reference product.

Firm's response: Frim has submitted CDP studies in three physiological pH dissolution medium of ph 1.2, pH 4.5 & pH 6.8 sand pharmaceutical equibvalence report against the reference product of Xofluza 40mg tablet of M/s Shionogi Pharma Co., ltd. Osaka Japan.

Decision: Approved with innovator's specifications.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	New DML
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of certificate No. 3-26/2019-Addl Dir (QA&LT-I)-56 dated 22.08.2022 issued by DRAP Islamabad is submitted valid till 13.04.2024.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	**Tamsulosin HCl SR pellets 0.2%** Batch No.: TMS365 Mfg date: 01.04.2022 Exp date: 01.2025 Quantity: 15Kg Invoice No.: 60009 Invoice date: 09.05.2022 Local purchase
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record for product testing.

5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has stated that their HPLC system is not CFR 21 compliant.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator:

Sr. No.	Section	Observation	Reply
1.	3.2.P.2.2.1	In CDP, Analytical raw data sheets are submitted. The data is not understandable. Time intervals are mentioned as 5 10 15 20 30 minutes; pharmacopoeia gives different time intervals. Data of only Maytam is mentioned in sheets. Details of CDP are required clearly describing the comparison of results in 3 pH media at different time intervals.	The firm vide letter No. nil dated 18.10.2023 has stated that CDP was performed using USP Apparatus II and they are submitting updated data. Firm has submitted revised summary sheets of comparative dissolution profile done at 3 different physiological pH. The results are comparable to comparator product. Supporting data is not submitted, only summary sheets are submitted.
2.	3.2.P.5	It is not mentioned which dissolution test of USP will be used for your applied product. (test 1 or test 2 or test 3…. or test 10)	The firm has submitted that USP Test 2 will be used.
3.	3.2.P.5.2	In analytical procedures Dissolution is not mentioned. Clarify.	The firm has stated that it was a typographic mistake.
4.	3.2.P.5.4	In batch analysis, results of dissolution are provided at 8h time point only. Why sampling intervals as per USP are not followed?	The firm has stated that it was a typographic mistake and they have followed USP test 2 for their product.
5.	3.2.P.8	In chromatograms provided, sample name in all is "UNKNOWN001" it is not possible to identify which chromatogram is of RS and which is of drug product. Further in every chromatogram there are 2 to 3 major peaks. Which one is of the drug substance? Justify. In calculations values are mentioned around 0.9 under heading AUC, how does this value correspond to the area of curve in each chromatogram? If test is done on UV, then why pharmacopoeial method is not followed for test and analysis? (value of 0.9 corresponds to UV absorption)	• The firm has stated that sample name UNKNOWN001 is by default in system and cannot be changed. In sample description details of sample are given, the firm has submitted a copy of chromatogram with description Tamsulosin HCl 0.4mg capsule std 1 0 month. It has 2 major peaks of almost equal height even though chromatogram appears of std. The peak marked as of drug substance has less area than preceding peak. • Justification for peaks, firm has stated that peak of interest is recognized by considering retention time. • Retention time is determined by comparison for peaks obtained of working standard and also peak having maximum AUC, rest of the peaks are minor and ignored. • Calculations 0.9 show ratio between peaks of API and internal standard. • Test done on HPLC not on UV.

Decision of 331st meeting: Registration Board deferred the case for submission of clarification regarding unidentified peak in submitted chromatograms of assay having area more than the peak identified as drug substance.
Firm's reposne: Each chromatogram will have two major peaks as per USP method wherein each peak is of the Tamsulosin.
Decision: The board after detail delebration and keeping in view the reply submitted by the firm, deferred for submission of clarification in detail and also for the submission of complete analytical record for identification of the peaks exhibited in chromatograms of Assay analysis to be reviewed by the board.

68.	Name and address of manufacturer/ Applicant	M/s Wimits Pharmaceuticals (Pvt.) Ltd, Plot No. 129, Sundar Industrial Estate, Raiwind Road, Lahore
	Brand Name + Dosage Form + Strength	Telmisin-A 5/40 mg tablet
	Composition	Each tablet contains: Amlodipine as Besylate…….5mg Telmisartan……..40mg
	Diary No. Date of R & I & fee	Dy.No 29718; 05-09-2018;Rs.20,000 (05-09-2018)
	Pharmacological Group	Angiotensin- II Receptor Antagonist /Calcium Channel Blocker
	Type of Form	Form- 5
	Finished product Specification	Manufacturers
	Pack size & Demanded Price	10's, 14's, 28's & as per SRO
	Approval status of product in Reference Regulatory Authorities	USFDA Approved as bilayered
	Me-too status	Amtas 5mg + 40mg Tablet of M/s Getz Pharma (Reg.# 066943)
	GMP status	Last GMP inspection was conducted on 03-11-2017 and the report concludes satisfactory GMP compliance.
	Previous Remarks of the Evaluator	General tablet section is available in the firm as mentioned in the submitted section approval letter. Manufacturing facility needs to be confirmed. The official monograph for the applied formulation is available in USP.
	Previous decision	Deferred in 293rd DRB meeting for the following: Evidence of purchase of required manufacturing equipment i.e. tablet bi- layered machine as reference product is a bi- layer tablet.
	Evaluation by PEC- XIII	• Firm has submitted purchase slip of ZP-33 Rotary Tablet Press Machine (Bi- layered) from Munawar Bhatti Engineering Works, Lahore at Rs. 35,32,500/-. • But firm has not revised the master formulation as bi-layered tablet and requisite fees needs to be submitted for revision of formulation.
	Decision of 296th meeting: Deferred for following reasons: • Revision of formulation as per reference product i.e bi- layered tablet. • Submission of requisite fees for revision of formulation. • Submission of IQ, OQ and PQ documents.	
	Firm's response: Firm has submitted following: • IQ, OQ & PQ Report of ZP-33 Rotary Tablet Press Machine (Bi- layered) manufactured by Munawat Bhatti Engineering works.	
	Decision: Approved with USP specifications as per following label claim: **Each uncoated bilayer tablet contains:** **Amlodipine as Besylate ……. 5mg** **Telmisartan …….. 40mg**	

	The firm shall submit fee of Rs. 30,000/- for correction/pre-approval change in product label claim to bi-layer tablet, as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021, before issuance of registration letter.	
69.	Name and address of manufacturer/ Applicant	M/s Wimits Pharmaceuticals (Pvt.) Ltd, Plot No. 129, Sundar Industrial Estate, Raiwind Road, Lahore

	Reference to Finished product specifications	USP

Evaluation by PEC[II]:

Section#	Observation	Firm's response
1.3	➢ Latest GMP inspection report of the drug product manufacturer conducted within last three years shall be submitted.	Submitted

1.6.5	➢ Valid DML/GMP certificate of the drug substance manufacturer shall be submitted.	Submitted
3.2.P.1	• Justify the role of ethanol in the applied formulation • Justify the proposed quantity of ketorolac tromethamine 33mg per ampoule against the label claim of 30 mg per ampoule.	• Ethanol is being used as solution stabilizer in very small amount that is in permissible limit. • To ensure the extractable volume of 1 ml, 1.1 ml is filled in each ampoule.
3.2.P.3.3	Justify the performance of terminal sterilization by autoclave while ethanol is used in the formulation	We are conducting terminal sterilization of said productat low temperature 112°C, to meet sterility criteria and ur product stable as per recommended shelf life.
3.2.P.5.1	• Evidence of availability of equipment for the performance of "Particulate Matter In Injections" test shall be submitted	Submitted.
3.2.P.5.3	Performance of specificity parameter shall be submitted in analytical method verification studies.	Submitted
3.2.P.5.4	➢ Submitted batch analysis COA does not include performance of sterility test. ➢ Batch analysis certificates are submitted for different batches form that submitted in section 3.2.P.8.3	Firm has submitted COA along with sterility test performance.
3.2.P.8.3	Following shall be submitted: ➢ Documents for the procurement of API with approval from DRAP (in case of import). ➢ Compliance Record of HPLC software 21CFR & audit trail reports on product testing ➢ Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Decision: Approved.

• Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.

	The proposed proprietary name / brand name	**UFI-S 6/0.4 mmg Tablet**

	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each bilayer modified release tablet contains: Solifenacin succinate…….6mg (Corresponding to 4.5mg of Solifenacin base) Tamsulosin hydrochloride…….0.4mg (Corresponding to 0.37mg of Tamsulosin base)
	Pharmaceutical form of applied drug	Film coated tablets.
	Pharmacotherapeutic Group of (API)	Antimuscarinics/Alpha-blockers
	Reference to Finished product specifications	Innovator

Remarks of Evaluator(Ammar):

Section#	Observations	Firm's response
3.2.S.4 (Tamsulosine HCl)	• Submitted drug substance specifications of Tamsulosine granules does not include test of dissolution hence it's not evident that the Tamsulosine granules are modified release or otherwise. Justification shall be submitted in this regard. • Submitted COA from both drug substance and drug product manufacturer does not declare the Tamsulosine granules as "modified release". • Justification shall be submitted for using Tamsulosine granules 0.178% w/w% for drug product formulation without establishing its dissolution profile.	
3.2.P.1	• Submitted label claim does not elaborate the immediate release & modified release layer of the dosage form.	
3.2.P.2.2.1	• Justification shall be submitted for performing CDP studies till 12 hours' time point only, whereas the drug product specifications mention the last time point as of 16hrs.	
3.2.P.5	• Justification shall be submitted for applying speed of 100rpm with USP Apparatus II in the dissolution test with reference to the provisions of USP general chapter <1092>.	
3.2.P.8.3	• Documents confirming import of drug substance used for formulation of stability batches, attested by DRAP, shall be submitted.	
	• Dispensed quantity of Tamsulosine HCl granules & Solifenacin granules, shall be justified against the potency determined during drug substance analysis.	

Decision: Deferred for submission of reply to above cited shortcomings

EVALUATION OF DATA	
Proposed Pack size	10 or 50ampoule/box
Proposed unit price	19.5/ampoule
The status in reference regulatory authorities	LAVOISIER POTASSIUM CHLORIDE 10% (0.10 g/ml) approved by ANSM of France
For generic drugs (me-too status)	Could not be confirmed
Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template.
Name, address of drug substance manufacturer	M/s Hebei Tiangcheng Pharmaceutical Co., Ltd. No. 18, Jinguang Street, Economic & Technological Devleopment Zone, Cangzhou, Hebei Province, China.
Module-III Drug Substance:	Firm has submitted detailed drug substance data as per Module 3.2.S.
Module-III Drug Product:	Firm has submitted data of drug product as per Module 3.2.P.

Pharmaceutical Equivalence	Firm hs submitted comapartive analysis report against Potassium chloride Lavoisier 10% (1gm/10ml) injection of CDM Lavoisier, France.
Analytical method validation/verification of product	Firm has submitted analytical method verification studies for the applied product.
Container closure system of the drug product	Borosilicate Glass ampoule
Stability study data of drug product, shelf life and storage conditions	Firm has submitted long term stability data of 3 batches for 36 months at 30±2°C, 65±5%RH and 6 months at 40°C±75%RH for three batches.

Evaluation by PEC[II]:

Section no.	Observations	Firm's response
1.3	• Submit Original, Legalized and valid COPP for the applied product since submitted COPP was valid till 09-12-2023.	Firm has submitted scanned copy of CoPP (No. 20240122) valid till 21-05-2025 issued by Hebei Province Drug Administration. The certificate confirms the free sale status of the product along with GMP status of the manufacturer. Moreover firm has stated that original legalized and valid COpp will b esubmitted as soosn as received form China.

Decision: Approved with Innovator's specifications as per Policy for inspection of Manufacturer abroad. Firm shall submit original legalied CoPP before issuance of registration letter along with fee of The firm shall submit fee of Rs. 7,500/- for correction/pre-approval change in product specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.

Analytical method validation/verification of product	Firm has submitted analytical method verification studies for the applied product.
Container closure system of the drug product	PVC/PE Blister
Stability study data of drug product, shelf life and storage conditions	Firm has submitted long term stability data of 3 batches for 24 months at 30±2°C, 65±5%RH and 6 months at 40°C±75%RH for three batches.

Evaluation by PEC[II]:

Section no.	Observations	Firm's response
1.3	• Submit Original, Legalized and valid COPP for the applied product.	
1.5.1	• Submitted strength in submitted CPP and section1.5.2 is as "Each vial contains Leucovorin calcium 100mg" whereas the innovator drug product approved by US FDA contains Leucovorin calcium eq. 100mg base/vial. Justification shall be submitted for the variation in label claim and strength from the innovator drug product.	

Decision: Deferred for submission of reply to above cited shortcomings.

EVALUATION OF DATA	
Proposed Pack size	500ml
Proposed unit price	As per SRO
The status in reference regulatory authorities	USFDA Approved. Lactated Ringer's in Plastic Container by Baxter healthcare
For generic drugs (me-too status)	Ringe Lac Lactated Ringer solution by Otsuka Pakistan
Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template.
Name, address of drug substance manufacturer	Sodium Lactate: M/s Anhui Hongye Pharmaceutical Co., Ltd., China Sodium Chloride, Potassium Chloride, Calcium Chloride dihydrate: M/s Tianjin Haiguang Pharmaceutical Co. Ltd., China
Module-III Drug Substance:	Firm has submitted detailed drug substance data as per Module 3.2.S.

Module-III Drug Product:	Firm has submitted data of drug product as per Module 3.2.P.
Pharmaceutical Equivalence	Firm has submitted Pharmaceutical equivalene report againstseveral brands of Sodium Lactate Ringer's injection solution including of the M/s Shandong Hualu Pharmaceutical Co., Ltd.
Analytical method validation/verification of product	Firm has submitted analytical method verification studies for the applied product.
Container closure system of the drug product	Polypropylene infusion bottle
Stability study data of drug product, shelf life and storage conditions	Firm has submitted long term stability data of 3 batches for 36 months at 30±2°C, 35±5%RH and 6 months at 40°C±25%RH for three batches.

Evaluation by PEC[II]:

Section no.	Observations	Firm's response
1.3	• Submit Original, Legalized and valid COPP for the applied product since submitted COPP was valid till 09-08-2023.	
1.3.4	• Submit valid DSL of the applicant.	
1.5.2	• The quantity of active ingredient shall be stated in terms of the equivalent amount of Calcium chloride dihydrate.	
3.2.P.2.2.1	Justification shall be submitted for not performing Pharmaceutical equivalence studies against the innovator drug product.	

Decision: Deferred for submission of reply to above cited shortcomings.

	Module-III Drug Substance:	Submitted.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	• 36 months real time stability data at 30˚C ± 2˚C / 65% ± 5%RH of 03 batches • 06 month accelerated stability data 40˚C ± 2˚C / 75% ± 5%RH of 03 batches
	Module-III Drug Product:	Submitted.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical equivalence has been established by conducting all the quality tests against the reference product, Fosmicn-S manufactured by M/s Meiji Seka Kaisha ltd, Japan.
	Analytical method validation/verification of product	Analyticl method validation studies are submitted.
	Container closure system of the drug product	Injection vials made up of molded soda lime glass, rubber stopper and aluminium -plastic laminated cap
	Stability study data of drug product, shelf life and storage conditions	• 24 months real time stability data at 30˚C ± 2˚C / 75% ± 5%RH of 03 batches • 06 month accelerated stability data 40˚C ± 2˚C / 75% ± 5%RH of 03 batches

Evaluation by PEC-I:

- The product in reference country in approved with a primary packaging of 100ml glass bottle while the volume of vial of the applied product is 30ml.
- The firm has submitted Original, legalized and vlaid CoPP (certificate No. 20210024) issued by Liaoning Medical Products Administration valid till 07/01/2023. The product is available for free sale in the market of exporting country. The facilities and operations conform to Chinese-GMP.
- Analytical method verification studies for API performed by drug product manufacturer are not submitted. The firm has stated that the API testing was conducted as per Chinese Pharmacopoeia therefore verification studies are not required. Moreover, the official monograph for API is present in British Pharmacopoeia.

Decision of 308th meeting:

Deferred for of following points;

- Clarification since the product in reference country in approved with a primary packaging of 50ml glass bottle while the volume of vial of the applied product is 30ml.
- Submission of analytical method validation/verification studies of drug substance performed by drug product manufacturer**.**

Evaluation by PEC-I:

- The firm has provided the following reference of the product which is approved with 30ml volume of the vial which is in-lined with the volume of the vial of the applied product.
  Ivozfo (Fosfomycin for injection) (2g, 4g, 8g) by M/s Verity Pharmaceuticals, Ontario, Health Canada Approved.
  IVOZFO™ (fosfomycin for injection) is supplied in clear type-I glass vials with a rubber stopper (bromobutyl rubber) and pull-off cap containing 2 g (in 30 mL vial), 4 g (in 30 mL vial) or 8 g (in 50 mL vial) of fosfomycin, respectively, in packs of 10 vials each.
  https://health-products.canada.ca/dpd-bdpp/info.do?lang=en&code=97819 (accessed on 12/11/2021 at 7pm)
- As per MHRA, Water for Injections and Glucose Infusion 50 mg/ml (5 %) or Glucose Infusion 100 mg/ml (10 %) may be used as solvent for the reconstitution and dilution while according to HealthCanada, 5% dextrose solution must be used. Whereas both the authorities recommend that Sodium chloride containing solvents must not be used.

- Reconstitution: (MHRA, Ireland & Health Canada)
  Shake the vial prior to the reconstitution to loosen up the powder. Reconstitute the 2 g or 4 g vials with 20ml solvent.
- Dilution (MHRA, Ireland & Health Canada)
  Transfer the reconstituted contents of **2 g vials** into an infusion container with further **30 ml** of solvent.
  Transfer the reconstituted contents of **4 g vials** into an infusion container with further **80 ml** of solvent.
- The frim has submitted analytical method validation studies for Fosfomycin including precision, accuracy, linearity and specificity. The validation studies for impurities have also been submitted.
- As per the provided data, the in-use after reconstitution with 5% and 10% dextrose solution for 12 hours.
- The applied product is developed and tested according to In-House specifications while the official monograph of the product is available in J.P. The comparison of In-house and J.P specificaytions are given below.

Test	**Limits defined by J.P**	**In-house limits**
pH	6.5-8.5	6.5-8.5
Fosfomycin sodium diol (impurity A)	Test not performed	≤ 1%
Clarity of solution	Clear and colorless	Clear and colorless Should not be more pronounced than the reference suspension 1. Any color produced should not be more intense than reference solution yellow 1.
Water	≤ 4%	≤ 2%
Bacterial endotoxins	Less than 0.025EU/mg	Less than 0.033EU/mg
Visible particles	clear and free from foreign insoluble matters (foreign insoluble matter)	Absent
Particulate matter	≤ 6000/container (≥10um) ≤ 600/container (≥25um)	≤ 6000/container (≥10um) ≤ 600/container (≥25um)
Weight variation	Should meet the requirement <6.02>	±5%
Assay	90-110% Cylinder plate method Test Organism: Proteus Sp.	90-110% Cup plate method Test Organism: Micrococcus Luteus Nephelometry test (parallel lines method) Test Organism: Escheritia Coli

Decision of 313th meeting: The Board deliberated that the specifications limits as defined by Japanese Pharmacopoeia are more stringent and tighter than the established In-House specification as well as the method used for the testing of the applied product are also different from the method developed In-House. Therefore, the Board decided to defer the case and directed the firm to submitted all the relevant data according to the monograph present in Japanese Pharmacopoeia.

Firm's response: Firm has submitted as under:
"Our manufacturer has adapted JP (JPXVIII) specification according to the Pakistan DRAP requirements for Fosfomycin sodium 2.0gm." Firm has also provided following documents:

Undertaking letter from manufacturer confirming JP Spec. (JPXVIII).
2. JP Product Specification of Fosfomycin Sodium for Injection.
3. 3 latest batches Signed/Stamp Certificate of Analysis (COA) of Fosfomycin Sodium 2.0 gm as per JP Spec.
4. Updated product development, Description of dosage form with Formulation Development (Pharmaceutical Equivalence).
5. Analytical method of Fosfomycin sodium for injection (JP).
6. Detail JPXVIII Specification & testing method
7. Stability data (Accelerated/Long Term) that fall within parameters of JP Spec.

Decision: Approved with JP specifications as per Policy for inspection of Manufacturer abroad. Firm shall submit original legalied CoPP before issuance of registration letter along with fee of The firm shall submit fee of Rs. 7,500/- for correction/pre-approval change in product specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.

Evaluation by PEC-I:

- The firm has provided the following reference of the product which is approved with 30ml volume of the vial which is in-lined with the volume of the vial of the applied product.
  Ivozfo (Fosfomycin for injection) (2g, 4g, 8g) by M/s Verity Pharmaceuticals, Ontario, Health Canada Approved.
  IVOZFO™ (fosfomycin for injection) is supplied in clear type-I glass vials with a rubber stopper (bromobutyl rubber) and pull-off cap containing 2 g (in 30 mL vial), 4 g (in 30 mL vial) or 8 g (in 50 mL vial) of fosfomycin, respectively, in packs of 10 vials each.
  https://health-products.canada.ca/dpd-bdpp/info.do?lang=en&code=97819 (accessed on 12/11/2021 at 7pm)

- As per MHRA, Water for Injections and Glucose Infusion 50 mg/ml (5 %) or Glucose Infusion 100 mg/ml (10 %) may be used as solvent for the reconstitution and dilution while according to HealthCanada, 5% dextrose solution must be used. Whereas both the authorities recommend that Sodium chloride containing solvents must not be used.
- Reconstitution: (MHRA, Ireland & Health Canada)
  Shake the vial prior to the reconstitution to loosen up the powder. Reconstitute the 2 g or 4 g vials with 20ml solvent.
- Dilution (MHRA, Ireland & Health Canada)
  Transfer the reconstituted contents of **2 g vials** into an infusion container with further **30 ml** of solvent.
  Transfer the reconstituted contents of **4 g vials** into an infusion container with further **80 ml** of solvent.
- The firm has submitted analytical method validation studies for Fosfomycin including precision, accuracy, linearity and specificity. The validation studies for impurities have also been submitted.
- The firm has submitted stability data with the following details;
  24 months real time stability data at 30˚C ± 2˚C / 75% ± 5%RH of 03 batches
  06 month accelerated stability data 40˚C ± 2˚C / 75% ± 5%RH of 03 batches
  Batches: 4190406, 4190407, 4190408
- As per the provided data, the in-use after reconstitution with 5% and 10% dextrose solution for 12 hours.
- The applied product is developed and tested according to In-House specifications while the official monograph of the product is available in J.P. The comparison of In-house and J.P specificaytions are given below.

Test	**Limits defined by J.P**	**In-house limits**
pH	6.5-8.5	6.5-8.5
Fosfomycin sodium diol (impurity A)	Test not performed	≤ 1%
Clarity of solution	Clear and colorless	Clear and colorless Should not be more pronounced than the reference suspension 1. Any color produced should not be more intense than reference solution yellow 1.
Water	≤ 4%	≤ 2%
Bacterial endotoxins	Less than 0.025EU/mg	Less than 0.033EU/mg
Visible particles	clear and free from foreign insoluble matters (foreign insoluble matter)	Absent
Particulate matter	≤ 6000/container (≥10um) ≤ 600/container (≥25um)	≤ 6000/container (≥10um) ≤ 600/container (≥25um)
Weight variation	Should meet the requirement <6.02>	±5%
Assay	90-110% **Cylinder plate method** Test Organism: Proteus Sp.	90-110% **Cup plate method** Test Organism: Micrococcus Luteus **Nephelometry test (parallel lines method)** Test Organism: Escheritia Coli

Decision of 313th meeting: The Board deliberated that the specifications limits as defined by Japanese Pharmacopoeia are more stringent and tighter than the established In-House specification as well as the method used for the testing of the applied product are also different from the method developed In-House. Therefore, the Board decided to defer the case and directed the firm to submitted all the relevant data according to the monograph present in Japanese Pharmacopoeia.

Firm's response: Firm has submitted as under:
"Our manufacturer has adapted JP (JPXVIII) specification according to the Pakistan DRAP requirements for Fosfomycin sodium 2.0gm." Firm has also provided following documents:

Undertaking letter from manufacturer confirming JP Spec. (JPXVIII).
2. JP Product Specification of Fosfomycin Sodium for Injection.
3. 3 latest batches Signed/Stamp Certificate of Analysis (COA) of Fosfomycin Sodium 2.0 gm as per JP Spec.
4. Updated product development, Description of dosage form with Formulation Development (Pharmaceutical Equivalence).

5. Analytical method of Fosfomycin sodium for injection (JP). 6. Detail JPXVIII Specification & testing method 7. Stability data (Accelerated/Long Term) that fall within parameters of JP Spec.		
Decision: Approved with JP specifications as per Policy for inspection of Manufacturer abroad. Firm shall submit original legalied CoPP before issuance of registration letter along with fee of The firm shall submit fee of Rs. 7,500/- for correction/pre-approval change in product specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.		
303.	**Name, address of Applicant / Importer**	**M/s Gene-Tech Laboratories. B-246, Block 6, P.E.C.H.S, Karachi, Pakistan**

	Name of exporting country	Turkey
	Detail of certificates attached (CoPP, Free sale certificate, GMP certificate) • Firm has submitted original, legalized copy of CoPP certificate (No. 2020/2988) dated 13-10-2020 issued by Republic of Turkey Ministry of health and medical education. The CoPP confirms free sale status of the product in exporting country as well as GMP status of the manufacturing site through periodic inspection every year. • The name of importing country on CoPP is mentioned as Pakistan. Furthermore, the CoPP was valid till 13-10-2022. • Firm has submitted GMP certificate no. 06244 issued by Turkish Medicine & Medical Devices Agency.	
	Details of letter of authorization / sole agency agreement • Firm has submitted copy of letter of authorization from TÜM EKİP İLAÇ A.Ş; Company. The letter shows that the manufacturer appoints M/s Gene-Tech Laboratories to register and market their products in Pakistan.	
	Status of the applicant	☐ Manufacturer ☒ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	For imported product s, specify one the these	☒ Finished Pharmaceutical product import ☐ Buk import and local repackaging ☐ Buk import and local repackaging for export purpose only
	Dy. No. and date of submission	Dy.No 21170 dated 03-08-2021
	Details of fee submitted	Rs.100,000/- dated 24-03-2021 & Rs.50,000/- dated 05-07-2021
	The proposed proprietary name / brand name	**Agrabloc 12.5mg/50ml Concentrate Solution for**

		Infusion
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each 50ml Vial Contains: Tirofiban as hydrochloride monohydrate…12.5mg
	Pharmaceutical form of applied drug	Injection
	Pharmacotherapeutic Group of (API)	B01AC17 Platelet aggregation inhibitors, except heparin
	Reference to Finished product specifications	In house
	Proposed Pack size	12.5mg/50ml, 1 vial per box
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Aggrastat 250mcg/ml injection approved by MHRA of UK
	For generic drugs (me-too status)	Agraban 12.5mg/50ml of M/s Pharmasol (Reg.106293)
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Name, address of drug substance manufacturer	Farmabios S.p.A. Via Pavia, 1 27027 Gropello Cairoli, (PV) Italy
	Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	The accelerated stability study data is conducted at 40^{o}C ±2^{o}C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 25^{o}C ± 2^{o}C and 60% ± 5% for 48 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation report, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Comparative analysis Studies against the reference product of Caelyx injection has been submitted.
	Analytical method validation/verification of product	Firm has submitted analytical method verification studies of the drug product.
	Container closure system of the drug product	AGRABLOC 12.5 mg/50 ml IV Concentrate Solution For Infusion is packed with the following primary packaging materials: - 50 ml colorless Type I glass vial - 20 mm bromobutyl red rubber stopper - 20 mm flip-off cover AGRABLOC is supplied as 1 vial with a PIL in box

		containing approved text, batch number and expiration date.
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches. The accelerated stability study data is conducted at 40 ± 2°C, 75 % ± 5 % R.H for 6 months. The real time stability study data is conducted at 30 ± 2°C, 75 % ± 5 % R.H for 24 months.

Remarks of Evaluator[II]:

Section#	Observations	Firm's response
1.3.3	Submit original valid legalized GMP certificate of drug product manufacturer and COPP of applied product issued by relevant regulatory authority of country of origin.	• Firm has submitted copy of GMP certificate no. IT-API/249/H/2022 issue din name of M/s Farmabios S.p.A on basis of inspection conducted on 01-10-2021 by competent authority of Italy, wherein API manufacturing activity of Tirofiban has been endorsed. • Firm has submitted original, legalized CoPP certificate (No. 2023/3145) dated 25-07-2023 issued by Turkish Medicines and Medical Devices Agency. The CoPP confirms free sale status of the product in exporting country as well as GMP status of the manufacturing site through periodic inspection every year. • The name of importing country on CoPP is mentioned as Pakistan. Furthermore, the CoPP was valid till 24-07-2025. • Firm has submitted original legalized GMP certificate no. TR/GMP/2023/150 issued by Turkish Medicine & Medical Devices Agency covering manufacturing operations of Sterile products.
1.3.5	Copy of valid DSL of the applicant shall be submitted.	Firm has submitted copy of DSL as per following details: **License No:** 0311 **Address:** 246-B, Block 6, P.E.C.H.S, Karachi, Pakistan **Validity:** 30-01-2028 **Status:** by way of wholesaler **Address of Godown:** N/A
3.2.P.2.1	Submit drug-excipient compatibility studies	Agrabloc formulaton differs

	since qualitative composition of applied formulation is different from that of the innovator drug product. Moreover Clarification shall be submitted regarding inclusion of mannitol in master formulation since innovator drug product does not contain it.	from the original prioduct formulation by two excipients, the buffer system and the substance used for isotonic adjustment. However, although the buffer is differen the pH range of the solution has not changed. Likewise the osmolality of the solution did not show a significant difference with the use of mannitol instead of sodium chloride. Another confirmation is that the 24 month stability test results show that th prdouct retains the same properties as at time of manufacture.
3.2.P.2.2.1	Justification shall be submitted for the limit & results of pH test applied in Pharmaceutical equivalence studies with reference to pharmacopoeial monograph.	Agrabloc and original product's pH is same.
3.2.P.3.3	Justification shall be submitted for not performing terminal sterilization.	Terminal sterilization cannot be applied to solution-type products that are not resistant to autoclave temperature in the final primary packaging the drug solution is sterilized by passing through a suitable bacteria retaining filter after preparation. When the filter integrity test records made before and after this filtration process confirm the performance of the filtration process it is proven that the solution has been fully sterilised at this point. The portion of the manufcaturing process from thi s point until the fully closed finished product will be viewed as an aseptic processin. In other words, aseptic filling and closure will ensure sterility for all vials of the series produced depending on the adequacy of the measures taken at the facility. "In accordance with the general section titled "Methods for the Preparation of Sterile Products", validation studies accordance (including with sterility assurance level study) of the aseptic processes cesses (filling and closing steps) of this product after Sterile filtration are carried out at regular intervals (separately for each dosage form and volume) according to the

		relevant procedure.
3.2.P.8.3	• Long term stability studies on Zone-IV conditions till claimed shelf life shall be submitted for three batches	Firm has submitted long term stability studies data of three batches of applied product at Zone-IVb conditions for 24 months.

Decision of 330th meeting: Registration Board deferred the case for submission of reply to the above cited shortcomings.

Firm's response:

Decision of 331st meeting: Deferred for clarification of applied dosage form and formulation with reference to the innovator drug product

Firm's response: Firm has submitted that applied dosage form is "Liquid Concentrate solution for injection" and further stated that Agrabloc formulaton differs from the original prioduct formulation by two excipients, the buffer system and the substance used for isotonic adjustment. However, although the buffer is different, the pH range of the solution has not changed. Likewise, the osmolality of the solution did not show a significant difference with the use of mannitol instead of sodium chloride. Another confirmation is that the 24 month stability test results show that the prdouct retains the same properties as at time of manufacture.

Decision: Deferred for submission of clarification on scientific grounds for variation in excipients from the innovatr drug product and rationale for use of Mannitol for the intended role in the formulation.

	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers,

		description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Name, address of drug substance manufacturer	M/s Shandong New Time Pharmaceutical Co., Ltd., No.1, North Outer Ring Road, Feixian County, Shandong Province, China
	Module-III Drug Substance:	Firm has submitted detailed drug substance data for both sources related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has comparative studies against Ultane liquid for Inhalation of M/s Abbvie Inc.
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	Type III amber glass bottle
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches The accelerated stability study data is conducted at 40ºC ±2ºC / 75% ± 5% RH for 6 months. The real time stability study data is conducted at 30ºC ±2ºC / 75% ± 5% The real time stability study data for 3 batches is for 36 months only.

Evaluation by PEC:

Section no.	Observations	Firm's response
3.2.P.8.3	• Justification shall be submitted for Not performing test of all the Organic Impurities, as recommended by USP monograph during drug product stability studies.	

Decision of 333rd meeting: Deferred for submission of reply to the above cited shortcoming.

Firm's response: Firm has submitted stability studies of three batchesfor both accelerated and longterm conditions as per Zone-IVb, wherein tests of related substances have been performed.

Decision: Approved as per Policy for inspection of Manufacturer abroad.

Case no. 04 Registration applications considered on priority against Export facilitation:

Deputy Director PRV/EFD has informed that DRAP Authority in its 133rd meeting held on 13th April 2022, decided to grant registration on priority basis to the pharmaceutical i.e one molecule for each 100,000 USD worth of export of medicines (to a maximum of 15 such molecules) during a fiscal year. In compliance to the aforementioned decision of the authority, the following firm have achieved the benchmark of more than 100,000 USD during the fiscal Year 2021-2022 and submitted their applications for priority consideration in lieu of export facilitation for Registration Board please.

	Reference to Finished product specifications	Innovator/ Specifications
	Proposed Pack size	1 x 1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	TAD 600mg/4ml of M/s Biomedica Foscama Industria Chimico-Farmaceutica S.p.A Via Morolense, 87 – 03013 Ferentino (Frosinone) Italy.
	For generic drugs (me-too status)	N/A
	Name and address of API manufacturer.	Hunan Flag Bio-Technology Co., Ltd., No.7 West Lixiang Road, Changsha National Economic & Technical Development Zone, Changsha, Hunan, China
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and

		justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH. The real time stability data is conducted at 30°C ± 2°C / 75% ± 5%.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted pharmaceutical equivalence of their product against the product tad 600mg injection by M/s Biomedica, Italy
	Analytical method validation/verification of product	Firm has submitted analytical method validation study reports for drug substance as well as drug product.

STABILITY STUDY DATA

Manufacturer of API	Hunan Flag Bio-Technology Co., Ltd., No.7 West Lixiang Road, Changsha National Economic & Technical Development Zone, Changsha, Hunan, China		
API Lot No.	FG02202011048		
Description of Pack (Container closure system)	Glass Vial		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 24 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6,9 12,18,24 (Months)		
Batch No.	LG-001	LG-002	LG-003
Batch Size	5000 Vials	5000 Vials	5000 Vials
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not applicable
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	--

3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice cleared on 28-01-2021 specifying 20Kg of L-Glutathione reduced. The invoice is cleared by AD (I&E) DRAP, Lahore.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record for product testing.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator:

Section #	Observations	Firm's response
1.6.5	Submit valid DML/GMP certificate of drug substance manufacturer, issued by relevant regulatory authority of country of origin.	Firm ha ssubmitted Business License Enterprises issued by Changsha City Administration for Industry and Commerce.
3.2.S	Submitted import documents are for L-Glutathione reduced whereas this section declares drug substance as Glutathione sodium. Clarification shall be submitted in this regard.	Firm has submitted revised 3.2.S part forL- Glutathione reduced
3.2.P.2.5	Submit compaitibility study of the drug product with reconstitution diluent.	Submitted
3.2.P.5.2	Evidence of availability of Atomic absorption spectrophotemter shal be submitted for performance of test of sodium content.	Submitted

Decision: Registration Board Deferred all the similar formulation/products for seeking opinion from Heads of Oncology Department of NOORI Hospital, Islamabad, KRL Hospital, Islamabad and PIMS.

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not applicable
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP Certificate (No. 002) issued by Republic of China. The certificate specifies that the firm is operating at satisfactory level of GMP compliance.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice cleared on 14-10-2019 specifying 2Kg of Colistimethate sodium. The invoice is cleared by AD (I&E) DRAP, Lahore.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record for product testing.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not applicable as assay is performed by Bio- Assay
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator:

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Deputy Director PRV/EFD has informed that DRAP Authority in its 133rd meeting held on 13th April 2022, decided to grant registration on priority basis to the pharmaceutical i.e one molecule for each 100,000 USD worth of export of medicines (to a maximum of 15 such molecules) during a fiscal year. In compliance to the aforementioned decision of the authority, the following firm have achieved the benchmark of more than 100,000 USD during the fiscal Year 2021-2022 and submitted their applications for priority consideration in lieu of export facilitation for Registration Board please.,

Manufacturing Date	01-2023	01-2023	01-2023
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has been inspected for verification of stability study data for following products. a) Dexpro (Dexlansoprazole) 30 and 60mg Capsule approved in 285th meeting of Registration Board. b) Neovel 800mg Tablet approved in 288th meeting of Registration Board. c) Serbica 20mg Capsule approved in 290th meeting of Registration Board.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP Certificate from DCA Andhra Pradesh valid upto 13-11-2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted clearance certificate no. E-4254486529183 for 50gm of Tofacitinib dated 26-01-2023.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record for product testing.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	N/A
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator:

Section #	Observations	Firm's response
1.6.5	Submit valid DML/GMP certificate of drug substance manufacturers, issued by relevant regulatory authority of country of origin.	Firm has submitted copy of GMP Certificate from DCA Andhra Pradesh valid upto 13-11-2023.
3.2.S.4.3	Analytical method verification studies of drug substances shall be submitted from M/s Seraph pharma	Submitted
3.2.S.7.3	Long term stability studies data of Empagliflozin shall be submitted till claimed shelf life as per Zone IV conditions.	Submitted
3.2.P.8.3	Submit analytical record for the stability studies of the drug product.	Submitted

Decision: Registration Board approved the applications of Toproz 10mg Tablet & Toproz 5mg Tablet.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Deputy Director PRV/EFD has informed that DRAP Authority in its 133rd meeting held on 13th April 2022, decided to grant registration on priority basis to the pharmaceutical i.e one molecule for each 100,000 USD worth of export of medicines (to a maximum of 15 such molecules) during a fiscal year. In compliance to the aforementioned decision of the authority, the following firm have achieved the benchmark of more than 100,000 USD during the fiscal Year 2021-2022 and submitted their applications for priority consideration in lieu of export facilitation for Registration Board please.

312.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Ferozsons Laboratories Limited, P.O. Ferozsons, Amangarh, Nowshera, Khyber Pakhtunkhwa-Pakistan**

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Last Product Specific Inspection of the firm was conducted for Empagen Tablets 10mg, for which the inspection was conducted on 25-01-2019 and the report was presented in 294th meeting of Registration Board. The report confirms following points: • The HPLC software is 21CFR compliant. • Firm has demonstrated audit trail reports of testing.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Dapagliflozin Propanediol Monohydrate:** Firm has submitted copy of GMP Issued dated 24-08-2020 valid up to 23-08-2023 issued by National Medical Products Administration. **Metformin Hydrochloride:** Firm has submitted copy of GMP (Certificate No. 23064344) valid up to 20-06-2026 issued by Food and Drug Control

		Administration Gujarat- India.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	**Dapagliflozin Propanediol Monohydrate:** Firm has submitted copy of Form 6 # 00607/2020 DRAP(P)/2665 cleared on 30-07-2020 specifying 0.152 kg. The Form 6 is cleared by AD (I&E) DRAP, Peshawar. **Metformin Hydrochloride:** Firm has submitted copy of commercial invoice bearing Diary No.270 cleared on 11-02-2021 specifying 4000.00 kg. The invoice is cleared by AD (I&E) DRAP, Peshawar.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record for product testing.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted certificate of 21 CFR compliance for the HPLC system along with audit trail report for product testing.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted pharmaceutical equivalence of their product against the innovator's product Synjardy XR manufactured by Bohringer Ingelheim. Firm has submitted CDP results of their product against the innovator's product Synjardy XR in 3 dissolution medias.
	Analytical method validation/verification of product	Firm has submitted analytical method validation study reports for drug substance as well as drug product.

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has referred to PSI report of Glucovance tablet approved in 293rd meeting.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Metformin HCI:** **Merck Santé** Copy of GMP certificate No. 21MPP078HFR01 issued by EUDRA valid till 17/11/2024 **Empagliflozin:** **Fuxin Long Rui Pharmaceutical Co., Ltd..**
3.	Documents for the procurement of API with approval from DRAP (in case of import).	**Metformin HCI:** Firm has submitted copy of commercial invoice cleared on 22-02-202. The invoice is cleared by AD (I&E) DRAP. **Empagliflozin:**
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record for product testing along with chromatograms, Raw data sheets, COA, summary data sheets etc.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted certificate of 21 CFR compliance for the HPLC system along with audit trail report for product testing.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator:

Section #	Observations	Firm's response
1.6.5	Submit valid DML/GMP certificate of drug substance manufacturer of Empagliflozin, issued by relevant regulatory authority of country of origin.	Firm has submitted cpy of DML issued by NMPA.

3.2.S.1.3	Justify the declaration of solubility of Empagliflozin as "Practically insoluble in water" with reference to the innovator drug product literature	Firm has submitted a "Statement letter" from M/s Fuxin Long Rui as under: "We Fuxin Long Rui Pharmaceutical Co., Ltd. (123000, Fluoride Industrial Park, Fumeng County (Yi Ma Tu), Fuxin City, Liaoning Province, China) guarantee that Empagliflozin has a certain degree of hydrophobicity, and its solubility in water and buffer solution is relatively small. During the dissolution process, particle aggregation is prone to occur, which further prolongs the dissolution time of the sample, reduces solubility, and causes the detection results to fluctuate at the edge of the limit. Therefore, the limit was slightly relaxed at that time. Later, during the testing process, we paid attention to removing agglomeratedparticles from the sample, ensuring that the solubility limit of the sample in water was consistent with the innovator drug product literature. At present, the COA specification for the product has been revised, but DMF has not been updated in a timely manner, resulting in inconsistency between the both. We will submit the updated files immediately."
3.2.S.4.3	Analytical method verification studies of Metformin HCl shall be submitted as per potentiometric method recommended by Eur. Ph monograph.	Submitted.
3.2.P.3.2	Justification shall be submitted along with performance based data for, used of 100% excess of Active coating solution of Empagliflozin.	Empagliflozin is immediate release and being coated on the Mtformin HCl, extended release core. During coating process loss of material occurs that needs to be compensated with the help of excess quantity to finally obtain Empagliflozin label claim.
3.2.P.3.3	Submit details for in-process testing including dissolution test to establish dissolution profile of Metformin HCl at core stage.	Firm has submitted COAs for the analysis of core tablet declaing dissolution results.
3.2.P.5.2	Submitted analytical method validation record of applied product also mentions Sacubitril in acceptance criteria of resolution.	Frim has submitted revised analytical method validation study report.
3.2.P.8.3	Following shall be submitted: • Documents confirming import of Empagliflozin i.e., Commercial	Submitted •

		invoice, attested by AD I&E DRAP shall be submitted. • Analytical record for Assay test performed for stability studies shall be submitted. • Stability studies data for 6th month time point shall be submitted.	

Decision: Registration Board approved the applications of Empaphage-M XR 25mg+1000mg Tablet, Empaphage-M XR 12.5mg+1000mg Tablet, Empaphage-M XR 10mg+1000mg Tablet & Empaphage-M XR 5mg+1000mg Tablet.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Deputy Director PRV/EFD has informed that DRAP Authority in its 133rd meeting held on 13th April 2022, decided to grant registration on priority basis to the pharmaceutical i.e one molecule for each 100,000 USD worth of export of medicines (to a maximum of 15 such molecules) during a fiscal year. In compliance to the aforementioned decision of the authority, the following firm have achieved the benchmark of more than 100,000 USD during the fiscal Year 2021-2022 vide diary no. 2419 (R&I) dated 06-02-2024 and submitted their applications for priority consideration in lieu of export facilitation for Registration Board please.

EVALUATION OF DATA	
GMP status of the firm	Firm has submitted copy of GMP certificate No.51/2023-DRAP (K) dated 26-07-2023 based on inspection conducted on 22-05-2023.
Evidence of approval of manufacturing facility	Firm has submitted copy of letter of grant of section dated 27-04-2020 specifying tablet (General) section.
Proposed Pack size	10's, 25's, 50's & 100's
Proposed unit price	As per SRO

The status in reference regulatory authorities	Tarlige Tablets (Mirogabalin) of M/s Daiichi Sankyo, Japan approved by Pharmaceuticals and Medical Devices Agency (PMDA) of Japan
For generic drugs (me-too status)	**N/A**
Name and address of API manufacturer.	Shandong Kehui Pharmaceutical Co., Ltd. Address: No.9a1, Tianheng Road, Gaoqing City, Shandong Province, China
Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template.
Module-III Drug Substance:	Firm has submitted detailed drug substance data as per module 3.2.S.
Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions as per conditions for drug substance to be stored at freezing conditions.
Module-III Drug Product:	Firm has submitted data of drug product as per module 3.2.P.
Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted pharmaceutical equivalence of their product against the reference Tarlige tablet manufactured by Daiichi Sankyo Japan. Firm has submitted CDP results of their product against the reference product Tarlige tablet 2.5mg manufactured by Daiichi Sankyo Japan in 3 dissolution medias.
Analytical method validation/verification of product	Firm has submitted analytical method validation study reports for drug substance as well as drug product.

EVALUATION OF DATA

GMP status of the firm	Firm has submitted copy of GMP certificate No.51/2023-DRAP (K) dated 26-07-2023 based on inspection conducted on 22-05-2023.
Evidence of approval of manufacturing facility	Firm has submitted copy of letter of grant of section dated 27-04-2020 specifying tablet (General) section.
Proposed Pack size	10's, 25's, 50's & 100's
Proposed unit price	As per SRO
The status in reference regulatory authorities	Tarlige Tablets (Mirogabalin) of M/s Daiichi Sankyo, Japan approved by Pharmaceuticals and Medical Devices Agency (PMDA) of Japan
For generic drugs (me-too status)	**N/A**
Name and address of API manufacturer.	Shandong Kehui Pharmaceutical Co., Ltd. Address: No.9a1, Tianheng Road, Gaoqing City, Shandong Province, China
Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template.
Module-III Drug Substance:	Firm has submitted detailed drug substance data as per module 3.2.S.
Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions as per conditions for drug substance to be stored at freezing conditions.
Module-III Drug Product:	Firm has submitted data of drug product as per module 3.2.P.

Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted pharmaceutical equivalence of their product against the reference Tarlige tablet manufactured by Daiichi Sankyo Japan. Firm has submitted CDP results of their product against the reference product Tarlige tablet 2.5mg manufactured by Daiichi Sankyo Japan in 3 dissolution medias.
Analytical method validation/verification of product	Firm has submitted analytical method validation study reports for drug substance as well as drug product.

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

Reference of previous approval of applications with stability study data of the firm (if any)	Last Product Specific Inspection of the firm was conducted for SOVIR-C Tablet 400mg (Sofosbuvir), for which the inspection was conducted on 27-10-2020 and the report was presented in 297th meeting of Registration Board. The report confirms following points: • The HPLC software is 21CFR compliant. • Firm has demonstrated audit trail reports of testing.

Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of DML no Lu20220020, valid till 26-06-2027
Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of License to import issued by AD I&E DRAP, Karachi dated 21-11-2022 for 350gm of Mirogabalin besylate
Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record for product testing.
Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Evaluation by PEC^{II}:

Sr.#	Section#	Observation	Firm's response
1.	**3.2.P.8.3**	Following shall be submitted: • Long term stability studies data till 6th month time point. • Documents confirming import of drug substance approved by DRAP I&E Office i.e., clearance certificate or attested commercial ionvoice.	Submitted

Decision: Registration Board approved the applications of Mirogab 15mg Tablet, Mirogab 10mg Tablet, Mirogab 5mg Tablet & Mirogab 2.5mg Tablet.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Deputy Director PRV/EFD has informed that DRAP Authority in its 133rd meeting held on 13th April 2022, decided to grant registration on priority basis to the pharmaceutical i.e one molecule for each 100,000 USD worth of export of medicines (to a maximum of 15 such molecules) during a fiscal year. In compliance to the aforementioned decision of the authority, the following firm have achieved the benchmark of more than 100,000 USD during the fiscal Year 2021-2022 and submitted their applications for priority consideration in lieu of export facilitation for Registration Board please.

324.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s PharmEvo Private Limited., Plot # A-29, North Western Industrial Zone, Port Qasim, Karachi.**

	The proposed proprietary name / brand name	**Prato Plus Inhalation Solution**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each 2.5ml Contains: Ipratropium Bromide…0.5mg Salbutamol Sulphate …… 3mg eq. to Sulbutamol Base …… 2.5mg
	Pharmacotherapeutic Group of (API)	Salbutamol and Ipratropium bromide for obstructive airway disease ATC code: R03A L02
	Pharmaceutical form of applied drug	Nebuliser Solution Clear colourless sterile solution, filled in LDPE ampoule, free from any external particles.
	Reference to Finished product specifications	USP
	Proposed Pack size	Pack Size:5x2ml
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	MHRA Approved
	For generic drugs (me-too status)	Combihale respules by Hudson Pharma Private Limited (Reg.#090971)
	Name and address of API manufacturer.	**Ipratropium:** Olon S.p.A. Via Livelli, 1 26852 Casaletto Lodigiano (Frazione Mairano) (LO), Italy. **Salbtamol:** Cipla Limited-Patalganga, Plot No.A-33, A-42, A-2 Patalganga Industrial Area, District-Raigad (Maharashtra), INDIA.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance	Firm has submitted stability study data of 3 batches

	(Conditions & duration of Stability studies)	of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 24 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence	Pharmaceutical Equivalence is performed against Combivent manufactured by Boehringer Ingelheim.
	Analytical method validation/verification of product	Firm has submitted analytical method validation study reports for drug substance as well as drug product.

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Last Product Specific Inspection of the firm was conducted for Livabel Respules 0.63mg, for which the inspection was conducted on 11th October 2017 and the report was presented in 275th meeting of Registration Board. The report confirms following points: The HPLC software is 21CFR compliant. • Firm has demonstrated audit trail reports of testing.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP Certificate (No. IT-API/129/H/2019) dated 01-08-2019 issued by AIFA Italian Medicine Agency. The certificate specifies that the firm is operating at satisfactory level of GMP compliance. Firm has submitted copy of GMP ceritifcate issued bu FDA Maharashtra for Cipla Limited-Patalganga valid

		till 16-02-2025
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice cleared on 05-04-2017 specifying 1900Kg of Ipratropium Bromide. The invoice is cleared by AD (I&E) DRAP, Karachi dated 07-04-2017 Firm has submitted copy of commercial invoice cleared on 05-10-2016 specifying 1200gm of Ipratropium Bromide. The invoice is cleared by AD (I&E) DRAP, Karachi.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record for product testing.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted certificate of 21 CFR compliance for the HPLC system along with audit trail report for product testing.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator:

Sr.#	Section#	Observation	Firm's response
1.	**1.3.3**	Details of product manufactured in the plastic ampoules section (BFS Technology) of M/s Hudson pharma shall be submitted.	Not submitted
2.	**1.5.2**	Label claim in terms of complete salt form of Ipratropium shall be submitted i.e., Ipratropium bromide as monohydrate.	Firm has submitted revised label claim as under: Each ampoule contains: Ipratropium Bromide ……0.5mg (as 0.5218mg Ipratropium Bromide monohydrate) Salbutamol Sulfate……..3.0125mg eq. To Salbutamol base 2.5mg
3.	**1.6.5**	Valid DML/GMP certificate shall be submitted for the M/s Via Livelli, 1 26852 Casaletto Lodigiano (Frazione Mairano) (LO), Italy.	Sumitted
4.	**3.2.S.4**	• Clarification shall be submitted regarding the claimed specifications for Ipratropium bromide by drug substance manufacturer, whether it is USP, BP, Ph. Eur. or IP.	We (Hudson Pharma Private Limited) are following BP specs. However, Drug substance manufacturer is performing testing as per mentioned Pharmacopoeial specifications i.e. USP, BP and IP depend on vendor requirements. Which is enclosed for your reference.
		• Drug substance details submitted in section 3.2.S for Ipratropium is from M/s Olon S.p.A whereas COAs, have been submitted from M/s Sifavitor. Justification shall be submitted in this regard.	
	Firm has submitted following justification from M/s Olon s.p.a:		

	"Infa Group Spa and its affiliates Labochim Spa and Sifavitor Srl have been acquired in May 2016 by Olon Spa. Beginning January 1st, 2017 Labochim Spa and Sifavitor Srl will be merged by incoporation into Olon Spa All the documents including, but not limited to: Certificate of Analysis, Label, Invoice, Packing List will be retaining the Brand Name, Logo, Plant Address of Labochim and Sifavitor in order to facilitate the change process. The layout of each document is available and will be supplied upon request. The Manufacturing Licenses and the GMP certificates will be available reissued in the new name Olon Spa within first quarter of 2017. All DMFs and CEPs will be promptly updated and submitted to the Regulatory Authorities in order to reflect the name change."		
5.	**3.2.P.1**	Submitted master formulation shall be justified for quantities of Ipratropium bromide and Salbutamol sulphate per batch, with reference to the equivalency factors of salt forms. Submitted master formulation shall declare the contents of Ipratropium bromide in terms of Ipratropium bromide as monohydrate.	Submitted
6.	**3.2.P.2.1**	Submitted formulation development data declares the use of Ipratropium bromide anhydrous form, whereas Innovator drug product has used Ipratropium bromide monohydrate form. Justification shall be submitted in this regard.	There is a typographical error in part P.2 (PD report). Basically it is Ipratropium bromide monohydrate instead of Ipratropium bromide anhydrous form.
7.	**3.2.P.2.2.1**	Justification shall be submitted for not including test of sterility, particulate matter and Uniformity of dosage units in the Pharmaceutical equivalence studies.	Not submitted
8.	**3.2.P.3.2**	Details of sterilisation procedure adopted for the applied formulation shall be submitted.	Sterilization procedure is carried out through 3 step filtration
9.	**3.2.P.5.1**	• Justification shall be submitted for not including test of Leachables and Net fill weight, with reference to USP general chapter <5>.	• Firm has submitted general "Container qualification studies for LDPE" and "Analytical report for the Leachability testing for plastic packaging" • USP general chapter <1664> recommends testing the final drug product for leachables
10.	**3.2.P.6**	• Date of manufacturing of working standards is subsequent to the date of batch release of drug product. • Justification shall be submitted for use of BP grade working standard of Ipratropium Bromide for analysis of drug product as per USP monograph.	• Not submitted • The testing methods for Ipratropium Bromide raw material are outlined in the British Pharmacopoeia (BP), whereas the testing procedures for the finished drug product are specified in the United States Pharmacopeia (USP). To standardize the working standard for drug product testing, a BP grade reference standard is utilized. The

			acceptance of both BP and USP standards ensures compatibility and compliance throughout the manufacturing process.
11.	**3.2.P.8.3**	• Justification for not performing tests of "Leachable", "Net fill weight" & "Water Loss" during drug product stability studies, with reference to USP general chapter <5>. • Justification shall be submitted for not performing stability studies as per conditions recommended for semi-permeable containers by ICH Q1 guidelines. • As per submitted analytical record chromatographic conditions and concentration of standard and sample solution applied for the Assay test during stability studies are not as per the recommendations of USP monograph of "Ipratropium Bromide and Albuterol Sulfate Inhalation Solution". Justification shall be submitted in this regard.	• Firm has referred to general report of "Analytical report for the Leachability testing for plastic packaging" while USP general chapter <1664> recommends testing the final drug product for leachables. • Firm has submitted water loss studies performed during stability studies on basis of initial weight of filled ampoules, whereas submitted drug product specifications does not include any limits for filled weight of ampoules. • Firm has submitted revised drug product analytical procedure without justifying the deviation of stability study performance from USP monograph.

Decision: Approved. The firm shall submit fee of Rs. 7,500/- for correction/pre-approval change in label claim as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021, before issuance of registration letter.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**

Deputy Director PRV/EFD has informed that DRAP Authority in its 133rd meeting held on 13th April 2022, decided to grant registration on priority basis to the pharmaceutical i.e one molecule for each 100,000 USD worth of export of medicines (to a maximum of 15 such molecules) during a fiscal year. In compliance to the aforementioned decision of the authority, the following firm have achieved the benchmark of more than 100,000 USD during the fiscal Year 2021-2022 and submitted their applications for priority consideration in lieu of export facilitation for Registration Board please.

Firm has submitted revised label claim as under: Each ampoule contains: Ipratropium Bromide ……0.5mg (as 0.5218mg Ipratropium Bromide monohydrate) Salbutamol Sulfate……..3.0125mg eq. To Salbutamol base 2.5mg
14.	**1.6.5**	Valid DML/GMP certificate shall be submitted for the M/s Via Livelli, 1 26852 Casaletto Lodigiano (Frazione Mairano) (LO), Italy.	Sumitted
15.	**3.2.S.4**	Clarification shall be submitted regarding the claimed specifications for Ipratropium bromide by drug substance manufacturer, whether it is USP, BP, Ph. Eur. or IP.	We (Hudson Pharma Private Limited) are following BP specs. However, Drug substance manufacturer is performing testing as per mentioned Pharmacopoeial specifications i.e. USP, BP and IP depend on vendor requirements. Which is enclosed for your reference.
		Drug substance details submitted in section 3.2.S for Ipratropium is from M/s Olon S.p.A whereas COAs, have been submitted from M/s Sifavitor.	

		Justification shall be submitted in this regard.	
	Firm has submitted following ustification from M/s Olon s.p.a: "Infa Group Spa and its affiliates Labochim Spa and Sifavitor Srl have been acquired in May 2016 by Olon Spa. Beginning January 1st, 2017 Labochim Spa and Sifavitor Srl will be merged by incoporation into Olon Spa All the documents including, but not limited to: Certificate of Analysis, Label, Invoice, Packing List will be retaining the Brand Name, Logo, Plant Address of Labochim and Sifavitor in order to facilitate the change process. The layout of each document is available and will be supplied upon request. The Manufacturing Licenses and the GMP certificates will be available reissued in the new name Olon Spa within first quarter of 2017. All DMFs and CEPs will be promptly updated and submitted to the Regulatory Authorities in order to reflect the name change."		
16.	**3.2.P.1**	Submitted master formulation shall be justified for quantities of Ipratropium bromide and Salbutamol sulphate per batch, with reference to the equivalency factors of salt forms. Submitted master formulation shall declare the contents of Ipratropium bromide in terms of Ipratropium bromide as monohydrate.	Submitted
17.	**3.2.P.2.1**	Submitted formulation development data declares the use of Ipratropium bromide anhydrous form, whereas Innovator drug product has used Ipratropium bromide monohydrate form. Justification shall be submitted in this regard.	There is a typographical error in part P.2 (PD report). Basically it is Ipratropium bromide monohydrate instead of Ipratropium bromide anhydrous form.
18.	**3.2.P.2.2.1**	Justification shall be submitted for not including test of sterility, particulate matter and Uniformity of dosage units in the Pharmaceutical equivalence studies.	Not submitted
19.	**3.2.P.3.2**	Details of sterilisation procedure adopted for the applied formulation shall be submitted.	Sterilization procedure is carried out through 3 step filtration
20.	**3.2.P.5.1**	• Justification shall be submitted for not including test of Leachables and Net fill weight, with reference to USP general chapter <5>.	• Firm has submitted general "Container qualification studies for LDPE" and "Analytical report for the Leachability testing for plastic packaging" • USP general chapter <1664> recommends testing the final drug product for leachables
21.	**3.2.P.6**	• Date of manufacturing of working standards is subsequent to the date of batch release of drug product. • Justification shall be submitted for use of BP grade working standard of Ipratropium Bromide for analysis of drug product as per USP monograph.	• Not submitted • The testing methods for Ipratropium Bromide raw material are outlined in the British Pharmacopoeia (BP), whereas the testing procedures for the finished

				drug product are specified in the United States Pharmacopeia (USP). To standardize the working standard for drug product testing, a BP grade reference standard is utilized. The acceptance of both BP and USP standards ensures compatibility and compliance throughout the manufacturing process.
	22.	**3.2.P.8.3**	• Justification for not performing tests of "Leachable", "Net fill weight" & "Water Loss" during drug product stability studies, with reference to USP general chapter <5>. • Justification shall be submitted for not performing stability studies as per conditions recommended for semi-permeable containers by ICH Q1 guidelines. • As per submitted analytical record chromatographic conditions and concentration of standard and sample solution applied for the Assay test during stability studies are not as per the recommendations of USP monograph of "Ipratropium Bromide and Albuterol Sulfate Inhalation Solution". Justification shall be submitted in this regard.	• Frim has referred to general report of "Analytical report for the Leachability testing for plastic packaging" while USP general chapter <1664> recommends testing the final drug product for leachables. • Firm has submitted water loss studies performed during stability studies on basis of initial weight of filled ampoules, whereas submitted drug product specifications does not include any limits for filled weight of ampoules. • Firm has submitted revised drug product analytical procedure without justifying the deviation of stability study performance from USP monograph.

Decision: Approved. The firm shall submit fee of Rs. 7,500/- for correction/pre-approval change in label claim as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021, before issuance of registration letter.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**

326.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s. Pharmatec Pakistan (Private) Limited D-86/A, S.I.T.E.,Karachi-75700**

	Details of fee submitted	Rs.30,000/- dated 17-08-2023
	The proposed proprietary name / brand name	**Vacutec 24/26mg Tablets**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated tablet contains: Sacubitril……..24.3mg

		Valsartan……..25.7mg (as Sacubitril Valsartan sodium salt complex)
	Pharmacotherapeutic Group of (API)	Angiotensin Receptor Neprilysin Inhibitor (ARNI)
	Reference to Finished product specifications	Innovator Specifications.

EVALUATION OF DATA	
GMP status of the firm	Firm has submitted copy of GMP Certificate based on inspection conducted on 11-10-2021
Evidence of approval of manufacturing facility	Firm has submitted copy of GMP Certificate based on inspection conducted on 11-10-2021 specifying Tablet general section
Proposed Pack size	7's,10's,14's,20's,28's & 30's
Proposed unit price	As per DPC and SRO.
The status in reference regulatory authorities	Approved by MHRA of UK
For generic drugs (me-too status)	Savesto 49/51mg Tablet by Getz Pharma Pakistan (Pvt.) Limited, Reg. No. 093111
Name and address of API manufacturer.	M/s. Zhejiang Tianyu Pharmaceutical Co., Ltd. No.15, Donghai 5th Avenue, Zhejiang Provincial Chemical and Medical Raw Materials Base Linhai Zone, Taizhou City, China.
Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template.
Module-III Drug Substance:	Firm has submitted detailed drug substance data as per module 3.2.S.
Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions as per Zone IV conditions.
Module-III Drug Product:	Firm has submitted data of drug product as per module 3.2.P.
Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical Equivalence have been established against the comparator product that is Savesto 100 Tablets 24/26mg Getz Pharmaceutical (Pvt.) Ltd. CDP has been performed against the comparator product that is Savesto 24/26mg Tablets Getz Pharmaceutical (Pvt.) Ltd., in Acid media (pH 1.2), Acetate Buffer (pH 4.5) & Phosphate Buffer (pH 6.8). The values for f1 and f2 are in the acceptable range.
Analytical method validation/verification of product	Firm has submitted analytical method validation study reports for drug substance as well as drug product.

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

Reference of previous approval of applications with stability study data of the firm (if any)	N/A
Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	--
Documents for the procurement of API with approval from DRAP (in case of import).	--
Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record for product testing.
Compliance Record of HPLC software 21CFR & audit trail reports on product testing	N/A
Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Evaluation by PEC^{II}:

- Drug product stability studies data for 6th month time point shall be submitted.
- Documents confirming of procurement of drug substance with the approval of DRAP shall be submitted since submitted documents are of Famotidine.
- Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.

Firm's response:

- Fluconazole API manufactured by VIRUPAKSHA ORGANICS LTD. India has been Borrowed from M/s Seraph Pharmaceuticals. Complete documets with following details are attached 1. Loan agreement for the drug substance between M/s Solaris Life Sciences and M/s Seraph Pharmaceuticals 2. Clearance certificate no. 294168686527426 in name of M/s Seraph pharma dated October 7, 2022,
- Valid DL of drug substance manufacturer has been submitted.

Decision: Approved. Registration Board **authorized its Chairman for issuance of Registration Letter upon submission of 6th month stability study data.**

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

	The proposed proprietary name / brand name	**Cardi-A 10mg Tablets**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Uncoated Tablet Contains; Amlodipine besylate (equivalent to Amlodipine) 10mg
	Pharmacotherapeutic Group of (API)	Calcium Channel Blockers (CCBs)
	Reference to Finished product specifications	USP

EVALUATION OF DATA

GMP status of the firm	New DML granted on 17-01-2024
Evidence of approval of manufacturing facility	Firm has submitted letter of grant of DML declaring grant of Tablet general Section also
Proposed Pack size	As per SRO
Proposed unit price	As per SRO
The status in reference regulatory authorities	Norvasc 10mg tabletsManufacturer:M/s Pfizer Laboratories Limited (USFDA Approved)
For generic drugs (me-too status)	Norvasc 10mg tablets Manufacturer:M/s Pfizer Laboratories Limited
Name and address of API manufacturer.	Aurore Life sciences (Pvt.) Ltd. Plot # 68, 69, 2nd Floor, Jubilee Heights, Besides Shilparamam, Madhapur, Hyderabad, Telangana, India
Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template.
Module-III Drug Substance:	Firm has submitted detailed drug substance data as per module 3.2.S.
Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance as per zone IV-A conditions.
Module-III Drug Product:	Firm has submitted data of drug product as per module 3.2.P.
Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted pharmaceutical equivalence and CDP studies of their product against the Norvasc tablet

Analytical method validation/verification of product	Firm has submitted analytical method validation study reports for drug substance as well as drug product.		
STABILITY STUDY DATA			
API Lot No.	1000141191		
Description of Pack (Container closure system)	Alu-Alu foil		
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH

Evaluation by PEC[II]:

Section#	Observation	Firm's response
1.6.5	➢ Valid DML/GMP certificate of the drug substance manufacturer shall be submitted, issued by the relevant regulatory authority of country of origin.	
2.3.R	➢ Complete batch manufacturing record of stability batches shall be submitted.	
3.2.S.4	➢ Drug substance specifications and analytical procedure shall be submitted from the drug substance manufacturer.	
3.2.S.4.3	➢ Clarification shall be submitted regarding the composition of placebo solution, applied for the performance of specificity parameter in analytical method verification studies.	
3.2.S.7.3	Long term stability studies data of drug substance shall be submitted till claimed shelf life.	
3.2.P.5.1	Justification shall be submitted for not incluing test of Antimicrobial/preservative effectiveness studies in drug product specifications as required by the USP general chapter <51>, since applied formulation contains preservative.	
3.2.P.5.3	➢ Sample preparation method applied for the performance of precision and recovery parameter in analytical method verification studies are not as recommended by the USP monograph. ➢ Detailed results shall be submitted along withdetails of blank and placebo solution preparation for the performance of specificity parameter.	

	➢ System suitability parameter performance is not as recommended by the USP monograph.	
3.2.P.6	COA of reference/working standard used for the analysis of the drug product stability batches shall be submitted since submitted COA declares expiry date prior to the manufacturing dates of the stability batches.	
3.2.P.8.3	• Sample and standard preparation as evident form the submitted raw data sheets as per USP monograph of Tobramycin Ointment, since it recommends use of Derivatized standard solution, Derivatized sample solution, and Blank solution while firm has used simple standad and sample solution. • Peak heights reported in the submitted chromatogrmas does not co-relate with the scale of the graph. • Systems suitability has not been perfomed as required by the USP monograph of Tobramycin Ointment. • Justification shall be submitted for not performing Antimicrobial/preservative effectiveness studies during stability studies, as required by the USP general chapter <51>, since applied formulation contains preservative.	

Decision: Deferred for submission of reply to above cited shortcomings.

➢ CLB in its 292nd meeting held on 04-10-2023 has approved grant of additional sections including Suppository Section, in name of M/s Genix pharma (Pvt.) Ltd. 44, 45B, Korangi creek road, Karachi

EVALUATION OF DATA

GMP status of the firm	cGMP certificate issued on basis of inspection conducted on 06-06-2023
Evidence of approval of manufacturing facility	Firm has submitted letter of issuance of additional section declaring grant of Suppository section.
Proposed Pack size	1's, 5's, 10's, 20's.
Proposed unit price	As per SRO
The status in reference regulatory authorities	Approved by HPRA of Ireland
For generic drugs (me-too status)	N/A
Name and address of API manufacturer.	M/s. Pharmagen Private Limited, Kot Nabi Bukshwala, 34 Km Ferozepur Road, Lahore
Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template.

Module-III Drug Substance:	Firm has submitted detailed drug substance data as per module 3.2.S.
Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance as per zone IV-A conditions.
Module-III Drug Product:	Firm has submitted data of drug product as per module 3.2.P.
Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted pharmaceutical equivalence of their product against the reference product Tipol suppository of Clonmel Healthcare Ltd, Ireland.
Analytical method validation/verification of product	Firm has submitted analytical method validation study reports for drug substance as well as drug product.

STABILITY STUDY DATA

API Lot No.	00510911/269/2023		
Description of Pack (Container closure system)	Aluminium foil		
Stability Storage Condition	Real time: 5°C ± 3°C Accelerated: 30°C ± 2°C / 65% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	23SB-498-01	23SB-499-02	23SB-500-03
Batch Size	100 suppositories	100 suppositories	100 suppositories
Manufacturing Date	09-2023	09-2023	09-2023
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

Reference of previous approval of applications with stability study data of the firm (if any)	N/A
Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	GMP certificate issued by DRAP Lahore, on basis of inspection conducted on 18-11-2022
Documents for the procurement of API with approval from DRAP (in case of import).	Locally purchased.
Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record for product testing.
Compliance Record of HPLC software 21CFR & audit trail reports on product testing	N/A
Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of data logger for temperature and humidity monitoring of real time stability studies and manual record for the accelerated stability chambers.

Decision of 335th meeting: Registration Board deferred the case for submission of reply to the above cited shortcomings.

Firm's response:

Sr.#	Section#	Observation	Firm's response
1.	**3.2.P.5.1**	Justification shall be submitted for not including following tests in drug product specifications, as recommended by USP General chapter <4 > & <1004>:	We followed the testing specification as per USP monograph of"Acetaminophen Suppositories" and these tests

		• Uniformity of Dosage units • Softening time of lipophilic suppositories • Drug Release test	are not mentioned in USP monograph. USP monograph is attached for your reference
2.	**3.2.P.2.2.1**	Justification shall be submitted for not performing comparative studies for drug release test against the innovator/reference product.	Paracetamol Suppository is USP compliant product. The firm performed performance tests according to USP Monograph. However, the comparative analysis of both reference and applied product (Test product) had already submitted with its dossier.
3.	**3.2.P.8.3**	• Submit justification for performing stability studies at following conditions, instead of the recommended conditions of Zone IV for General products: Real time: 5°C ± 3°C Accelerated: 30°C ± 2°C / 65% ± 5%RH • Justification shall be submitted for the proposed batch size against the number of units required for the complete stability studies till claimed shelf life.	• As per route of administration of suppositories. It melts at 37°C of body temperah1re and it is not possible to evaluate the accelerated study at 40°C so that's why we performed Accelerated study at 30°C and 65%RH and Real time study at 5°C ±°3c. USP monograph is attached in which storage condition is mentioned for your reference mentioned storage temperature. • The Criterion for fixation of batch size is based on the minimum requirements of samples being used for the stability analysis of products. • Selected batch size was sufficient enough for stability time points and to allow the process capability to establish and obtain quality product.

Decision: Registration Board approved the applications of KARMOL Suppository (500mg), KARMOL Suppository (1000mg), KARMOL Suppository (125mg) & KARMOL Suppository (250mg).

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Evaluation by PEC[II]:

Section#	Observations	Firm's responser
1.5.9	Submit evidence of approval of applied formulation in reference regulatory authorities/agencies which were adopted by the Registration Board in its 275th meeting since submitted reference is of Soft gelatin capsule, while applied formulation is of suppository.	Artesunate suppository is widely available in many RRA countries recognized by DRAP. Health Canada recommends the use of Artesunate suppository for prevention and treatment of malaria. Artesunate suppository is also available in France by Medicale Pharmaceuticals, by Catalent (Eberbach, Germany) and packed and distributed by Scanpharm (Birkerod, Denmark). WHO is also the

		part of RRA, recognized and approved by DRAP. In February 2018, the first WHO-prequalified artesunate rectal suppository is available for the markets. It was developed against WHO recommended comparator product, manufactured by Catalent (Eberbach, Germany).
3.2.P.1	Clarification shall be submitted regarding applied formulation whether, soft gelatin capsule or suppository since cover letter and section 1.5.2 declares applied formulation as suppository while the composition, specifications and stability data submitted in module 3.2.P is for soft gelatin capsule.	The artesunate rectal dosage form, though appearing as a soft gelatin capsule, is unequivocally a suppository intended for rectal administration. Its formulation, design, and WHO prequalification status substantiate this classification, ensuring optimal therapeutic outcomes. This design aligns with the functional requirements of a rectal suppository, which is essential for effective treatment in scenarios where oral administration is not feasible. Despite its soft gelatin appearance, the product's formulation ensures it functions as a suppository. Rectal administration of artesw1ate is critical in managing severe malaria, especially in patients unable to take oral medications. The rectal route provides rapid absorption and onset of action, essential for treating life-threatening conditions.
3.2.P.2.2.1	Details of the innovator product against which CDP & PE studies are performed i.e. name of manufacturer, batch number, manufacturing date, expiry date etc. shall be submitted with pictorial evidence.	We have performed PE against the Brand Artesunate Suppository ofM/s Cipla

Decision: Registration Board approved the applications of Genart suppository (100mg), Genart suppository (200mg) & Genart suppository (50mg)

Case no. 06 Registration applications of Human drugs applied on Form 5

CLB in its 270th meeting held on 23rd may, 2019 has considered & approved the grant of DML by the way of formulation with following 8 sections:
1. Tablet section (general)
2. Capsule section (general)
3. Sachet section (general)
4. Dry suspension section (general)
5. Cream and ointment (general) section
6. Oral liquid syrup/suspension(general) section
7. External application
8. Liquid repacking section.

Now the applicant has applied for following molecules/products against each section:

Extension in implementation timelines of SRO 713(I)/2018

The Authority in its 72nd meeting discussed regarding the "Extension in implementation timelines of SRO 713(I)/2018 and decided as follows:-
1. Allowed those companies, for which panel for inspection has been constituted before 07-03-2019, to submit registration applications on Form 5 instead of Form 5F for initial 10 molecules per section only.
2. The exemption will remain valid till 31-12-2019.
3. No further exemption will be granted in any case.
4. Inspectors / panel members are advised to formally report every visit. Concerned Division were advised to specify a timeline for conducting/ concluding panel inspection.

a) Details of issuance of DML are as follow:

Name of Firm	Date of issuance of panel inspection letter	Date of issuance of DML	Date of Submission of applications
M/s Healthcare Pharmaceuticals Multan	31st January 2019	28th June 2019	November and December 2019

The submission of following applications on foirm-5 are in line with the decision of Authority

Decision: Registration Board noted the fact that cut off date for submission of registration applications of Human Drugs on Fomr 5, 5D or 5A was 07th March, 2019 and thereafter the prescribed form for submission of registration applications of Human Drugs is Form 5F, as per Drugs (Licensing, Registering & Advertising) Rules, 1976. Since the above presented applications have not been submitted on prescribed Form 5F as per Drugs (Licensing, Registering & Advertising) Rules, 1976, hence Board decided to disposed off above applications.

Case no. 08 Priority as per Authority Decision of 129th meeting for Invalid Registration.

- Priority on the basis of decision of 129th meeting of the Authority wherein the Authority decided that "The Authority acceded to the request of firms for out-of-queue submission and consideration of registration dossiers on CTD Format (5F) in regard to cancelled products due to late submission of renewals."

	Evaluation by PEC:	
	The applied product to be manufactured by M/s Global Pharmaceuticals Pvt Ltd Plot # 204-205, Industrial Triangle, Kahuta Road, Islamabad, Pakistan has already been approved by Registration Board in its 316th meeting based on the data of same batches of drug product as submitted in the instant case. The details of the already approved product in 316th meeting are as follows: Applicant firm: M/s Benson Pharmaceuticals Plot No. 3, Main Road, National Industrial Zone, RCCI, Rawat. Manufacturer firm: M/s Global Pharmaceuticals Pvt Ltd Plot # 204-205, Industrial Triangle, Kahuta Road, Islamabad Brand Name: PIPRABEN Injection 4.5g Injection	
	Decision: Registration Board noted the correction in minutes and approved the instant application of Synibac 4.5gm Injection. • **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.** • **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**	

Following case was presented and approved on 335th meeting of Registration Board while the one of the strength i.e, **Flutrolz 250mcg/50mcg DPI Capsule** could not be mentioned in the decision, inadvertently.

505.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Horizon Healthcare (Pvt.) Ltd. Plot no. 35-A, Small Industrial Estate, Taxila, Pakistan.**
	Name, address of Manufacturing site.	M/s Horizon Healthcare (Pvt.) Ltd. Plot no. 35-A, Small Industrial Estate, Taxila, Pakistan
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale

		☐ Export sale ☐ Domestic and Export sales
	Evidence of approval of required manufacturing facility	Firm has submitted copy of section approval letter issued by Secretary CLB wherein grant of following sections has been declared: • Dry Powder for In11alation Section • Solution for Inhalation Section • Ear/Eye Drops-II (General) Section
	GMP status of the Finished product manufacturer	Last inspection report dated 16.08.2022 concluded good level of cGMP compliance.
	Dy. No. and date of submission Details of fee submitted	Tracking ID# J6N-SR4-HVQJ, 29-01-2024 Rs.30,000/- dated 25-09-2023
	The proposed proprietary name / brand name	**Flutrolz 250mcg/50mcg DPI Capsule**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each capsule contains: Fluticasone Propionate … 250mcg Salmeterol (as xinafoate) … 50mcg Each delivered dose (the dose that leaves the mouthpiece of the inhaler) contains 231mcg of Fluticasone Propionate 47mcg of Salmeterol (as xinafoate)
	Pharmaceutical form of applied drug	DPI (dry powder Inhaler) Capsule
	Pharmacotherapeutic Group of (API)	Budesonide Belongs to Glucocorticoids, and Formoterol Fumarate is a long-acting and selective sympathomimetic beta-receptor agonist with bronchodilator activity.
	Reference to Finished product specifications	As per innovator's specs.
	Proposed Pack size	As per SRO
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	"ADVAIR DISKUS" 500/50 mcg (fluticasone propionate 500 mcg and salmeterol 50 mcg inhalation powder) (US-FDA Approved)
	For generic drugs (me-too status)	Forsonide 500mcg/50mcg DPI Capsule of Pharm-Evo (Pvt.) Ltd. (Reg # 114402)
	Name and address of API manufacturer.	**Salmeterol Xinafoate:** VAMSI LABS LTD. An ISO-9001-2015 and WHO-GMP Company A-14/15, MIDC Area, Chincholi, Solapur-413255, Maharashtra (INDIA). **Formoterol Fumarate:** VAMSI LABS LTD. An ISO-9001-2015 and WHO-GMP Company A-14/15, MIDC Area, Chincholi, Solapur-413255, Maharashtra (INDIA).
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to structure, general properties, Manufacturers, description of manufacturing process and controls, Characterization, Impurities, Specifications, Analytical procedures, Validation of analytical procedure, batch analysis and justification of specification, reference standard, container closure system and stability studies of both drug substances and drug product is submitted.
	Module III (Drug Substance)	The firm has submitted details of General information, General properties, Manufacturers, description of manufacturing process and

		process controls, Characterization, Impurities, Control of drug substance, Reference standard or materials container closure system and stability studies of both drug substances.
	Stability studies	**Stability study conditions:** **Fluticasone Propionate** Real time: 30˚C ± 2˚C / 65% ± 5% RH for 48 months Accelerated: 40˚C ± 2˚C / 75% ± 5% RH for 6 months **Salmeterol Xinafoate:** Real time: 30˚C ± 2˚C / 65% ± 5% RH for 60 months Accelerated: 40˚C ± 2˚C / 75% ± 5% RH for 6 months
	Module-III (Drug Product):	The firm has submitted detail of Drug Products including Description and composition of drug product, Pharmaceutical Development, Manufacturing process development, Microbiological attribution, Manufacturer, Master formulations, Description of Manufacturing Process and Process Controls, Control of Critical Steps and Intermediates, Process Validation and/ or Evaluation, Control of Excipients with specification and Analytical methods, Control of Drug Products including Finished product specifications and test methods, validation of Analytical methods, Batch analysis , reference standard, Container closure and stabilities studies.
	Pharmaceutical equivalence	Pharmaceutical Equivalence have been established against the Reference product that is Seretide Diskus 250mcg/50mcg (Powder for Inhalation) of GSK
	Analytical method validation/verification of product	Analytical method verification studies of both drug substances and Analytical Method Validation Studies have been submitted including Introduction, Verification/Validation of Assay method, Specificity, Accuracy, Precision, Linearity concentration and peak range.

<tr><td>Reference of previous approval of applications with stability study data of the firm (if any)</td><td>Firm has referred to onsite inspection report of this product:

XETINE 10mg Tablet, (Vortioxetine as Hydrobromide)

which was conducted on dated 06-07-2020 and was presented in 313th meeting of Registration Board held on 16-18 Nov, 2021.
Registration Board decided to approve registration of
XETINE 10mg Tablet, (Vortioxetine as Hydrobromide)
by M/s. Horizon Healthcare (Pvt) Ltd. Plot No. 35-A,
Small industrial Estate, Taxila, Pakistan. Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months.
Following observations were reported in the report:
i. The HPLC software is 21 CFR compliant.
ii. Audit trail on the testing reports of XETINE 10mg Tablet, is available.
iii. Adequate monitoring and control are available for stability chamber. Chamber are controlled and monitored through software having alarm system for alerts as well.</td></tr>
<tr><td>Approval of API/DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.</td><td>GMP certificate of M/s VAMSI LABS LTD. is submitted, issued by FDA valid upto: 04-10-2024</td></tr>
<tr><td>Documents for the procurement of API with approval from DRAP (in case of import).</td><td>Copy of Clearance Certificate approved by DRAP attested by AD I&E, has been submitted.

3.2.P.5.2	• Evidence of availability of emission spectrophotometer shall be submitted, required for the analysis of Fluticasone in drug product as per USP monograph.	Submitted

- Upon observation regarding product development prior to the section approval firm has referred to the panel inspection report dated 10-08-2022 & 16-08-2022, wherein availability of Copley Dry Powder Inhaler (required for testing of DPI products) & R&D lab has been declared.
- Following details of Drug delivery device to be accompanied with applied product has been submitted:

Name: Rotazone Inhaler Device
Manufactured by Shanghai Harui Aerosol Co.LtD No 222,yuanchun road Pudong new district shanghai,201399,P.R.China

Decision of 335th meeting: Registration Board approved the applications of Flutrolz 500mcg/50mcg DPI Capsule & Flutrolz 100mcg/50mcg DPI Capsule.

- Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.
- Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.

Decision of 336th meeting: Registration Board noted the correction in minutes and approved the instant application of Flutrolz 250mcg/50mcg DPI Capsule

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Agenda of Evaluator PEC-III

Case No. 01 Registration applications of cases of New Section / New License

M/s Naeem Pharmaceuticals, Rahim Yar Khan. (New License)
Firm has been granted new license dated 26-10-2023 for following sections:

- Tablet (General) section
- Liquid injection vial (General) section
- Liquid injection ampoule (general) section
- Capsule (Cephalosporin) section
- Dry powder for injection (cephalosporin) section
- Dry powder for suspension (cephalosporin) section
- Cream / ointment (General) section
- Eye drops (General) section.

The details of applications of the firm is as under:

	Considered in M-335		**Currently applied**	
Section	**No of Molecules**	**No of products**	**No of Molecules**	**No of products**

Tablet (General) section	4	6	3	3
Liquid injection vial (General) section	1	1	4	4
Liquid injection ampoule (general) section	3	3	3	3
Capsule (Cephalosporin) section	1	2	2	4
Dry powder for injection (cephalosporin) section			3	12
Dry powder for suspension (cephalosporin) section	1	2	2	5
Cream / ointment (General) section				
Eye drops (General) section.			3	3

Firm has applied for following applications

Dry powder for suspension (cephalosporin) section

508.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Naeem Pharmaceuticals (SMC-Pvt) Ltd. Plot No. 95-A, Industrial Estate, K.L.P Road, Rahim Yar Khan.**

M/s Seraph Pharmaceuitcal, Islamabad (New Section)

M/s Seraph Pharmaceuitcal, Islamabad has been granted new section by CLB vide letter dated 06-03-2024 for following sections:

a) Liquid Syrup (General) section in place of Tablet I (General) section.

Moreover, the letter also specifies that the Registration Board may take the decision of the registration of drugs granted for Tablet-I (General) section.
Firm has applied for following applications

552.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Seraph Pharmaceuitcal Plot # 210, Industrial Triangle, Kahuta road, Islamabad.**
	Name, address of Manufacturing site.	M/s Seraph Pharmaceuitcal Plot # 210, Industrial Triangle, Kahuta road, Islamabad.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Application Form Dy. No / Tracking ID & date of submission	Form 5F: Tracking ID. J81-GM5-SBZS: 23-04-2024
	Details of fee submitted	PKR 75,000/- : 21-03-2024
	The proposed proprietary name / brand name	**LIOREX 5mg/5ml Oral Solution**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each 5ml contains: Baclofen ……5mg
	Pharmacotherapeutic Group of (API)	AntiSpasmodic agent
	Reference to Finished product specifications	BP
	The status in reference regulatory authorities	**MHRA** Approved
	For generic drugs (me-too status)	NA
	Proposed Pack size	As per SRO

Evaluation by PEC[3] :

Sr. No	Shortcomings communicated	Response by the firm
1.	Central Licensing Board has granted Liquid syrup (General) section in place of Tablet-I (General) section. Clarify how the manufacturing of tablets will be carried out in your facility furthermore also specify the status of products registered in this section.	Initially, we had two tablet sections, Tablet I and Tablet II, within our facility. Recognizing that Tablet I was underutilized, our management made the strategic decision to convert it into a liquid syrup section. Subsequently, we applied for and received approval for this conversion (please refer to the attached approval letter for verification). Additionally, Tablet II section is already operational, and a capacity assessment conducted by DRAP confirms that it meets our production requirements (Capacity assessment report dated 08-03-2024 was conducted after syrup section approval).
2.	Justify the manufacturing of stability batches before the approval of section from Central Licensing Board.	We already have well equipped Research and Development department established within our facility which are supporting to syrup dosage form development (the section approval letter is attached. And syrup section inspection report is also attached which was conducted on 07th December 2023 and we started the product development after this date.)
3.	Submit 6 months stability study data	Stability data will be completed in June 2024, we will submit 6th month data immediately after analysis.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Registration Board further decided that registration letter will be issued after submission of 6th month stability study data.**

Initially, we had two tablet sections, Tablet I and Tablet II, within our facility. Recognizing that Tablet I was underutilized, our management made the strategic decision to convert it into a liquid syrup section. Subsequently, we applied for and received approval for this conversion (please refer to the attached approval letter for verification). Additionally, Tablet II section is already operational, and a capacity assessment conducted by DRAP confirms that it meets our production requirements (Capacity

		assessment report dated 08-03-2024 was conducted after syrup section approval).
2.	Justify the manufacturing of stability batches before the approval of section from Central Licensing Board.	We already have well equipped Research and Development department established within our facility which are supporting to syrup dosage form development (the section approval letter is attached. And syrup section inspection report is also attached which was conducted on 07th December 2023 and we started the product development after this date.)
3.	Submit 6 months stability study data	Stability data will be completed in June 2024, we will submit 6th month data immediately after analysis.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Registration Board further decided that registration letter will be issued after submission of 6th month stability study data.**

Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	TR-CEP-69	TR-CEP-70	TR-CEP-71
Batch Size	1719 vials	1719 vials	1719 vials
Manufacturing Date	09-2021	09-2021	09-2021
Date of Initiation	17-09-2021	17-09-2021	17-09-2021
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of AD attested commercial invoice dated 13-08-2021 specifying 10kg ceftizoxime.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	NA
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Sr. No	Shortcomings communicated	Response by the firm
1.	Evidence of approval of applied formulation in reference regulatory authorities which were adopted by Registration Board in its 275th meeting.	The product is discontinued in FDA without specifying the reason.
2.	Submit specifications as well as analytical method of the drug substance from the drug product manufacturer in section 3.2.S.4.1 and 3.2.S.4.2.	Submitted.

3.	Submit data in section 3.2.S.4.3 as per the guidance document approved by Registration Board	Analyical method verification studies performed on drug product shall be same as performed for drug substance since no excipient is used.
4.	Submit COA of reference standard used in the analysis of drug substance.	Submitted.
5.	Submit stability study data of 3 batches of API as per zone IV-A conditions.	Submitted.
6.	Specify the fill weight of the product per vial.	Submitted.
7.	Submit preservative effectiveness studies	Submitted
8.	Submit microbial attributes of the drug product	Submitted
9.	Submit compatibility studies in section 3.2.P.2.6	Submitted
10.	Submit GMP certificate of API manufacturer since the submitted GMP certificate specifies different name and address.	Copy of Manufacturing License of API manufacturer issued by NMPA China valid till 26-10-2025.
11.	Submit BMR of three stability batches.	Submitted

Decision: The Board deferred that case for submission of valid RRA reference of applied product or submission of following as per decidion of 179th meeting of the Authority;

i. **Evidence that the product/ formulation has never been withdrawn/ deregistered/ unlicensed on safety reasons by any RRA/ML4 NRA.**
ii. **Evidence that the manufacturer has established pharmacovigilance verified by the Division of Pharmacy Services of DRAP according to the procedures/ guidelines of DRAP.**
iii. **Evidence that the international pharmacovigilance data of subject product/ formulation do not show any critical ADR reports according to the UPSALA database.**
iv. **Evidence that the product maintains the characteristics on which the marketing authorization was granted and are normally in the form of post-marketing surveillance, or assessment of therapeutic value or treatment strategies.**

	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Film Coated Extended Release Tablet Contains: Empagliflozin (Immediate Release)…5mg Linagliptin (Immediate Release)…2.5mg Metformin Hcl (Extended Release)…1000mg
	Pharmaceutical form of applied drug	Film coated tablet
	Pharmacotherapeutic Group of (API)	Anti Diabetic
	Reference to Finished product specifications	As per innovator's specifications
	Proposed Pack size	As per SRO
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Trijardy XR Tablet (**USFDA** Approved)
	For generic drugs (me-too status)	NA
	Name and address of API manufacturer.	**Empagliflozin:** Fuxin Long Rui Pharmaceutical Co. Ltd Fluoride Industrial Park, Fumeng County Fuxin City, Liaoning Province, China

		Metformin hydrochloride: Abhilasha Pharma Pvt. Ltd. No. 1408,1409, G.I.D.C. Estate, Ankleshwar- 393 002, Gujarat India **Linagliptin:** Fuxin Long Rui Pharmaceutical Co. Ltd Fluoride Industrial Park, Fumeng County Fuxin City, Liaoning Province, China
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for both drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	**Empagliflozin:** Firm has submitted stability study data of 3 batches of drug substance as [er zone IV-A conditions. **Metformin hydrochloride:** Firm has submitted stability study data of 3 batches of drug substance as per zone IV-A conditions. **Linagliptin:** Firm has submitted stability study data of 3 batches of drug substance as [er zone IV-A conditions.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for the quality tests for their product against the innovator's i.e. Trijardy XR Tablet. Firm has submitted CDP studies in 3 medium against the innovator's i.e. Trijardy XR Tablet.
	Analytical method validation/verification of product	Firm has submitted report of verification studies of analytical method of drug substance. Firm has submitted report of verification of analytical method for the drug product.
STABILITY STUDY DATA		
Manufacturer of API	**Empagliflozin:** Fuxin Long Rui Pharmaceutical Co. Ltd Fluoride Industrial Park, Fumeng County Fuxin City, Liaoning Province, China	

	Metformin hydrochloride: Abhilasha Pharma Pvt. Ltd. No. 1408,1409, G.I.D.C. Estate, Ankleshwar- 393 002, Gujarat India **Linagliptin:** Fuxin Long Rui Pharmaceutical Co. Ltd Fluoride Industrial Park, Fumeng County Fuxin City, Liaoning Province, China		
API Lot No.	**Empagliflozin:** H-E-20211005-D04-E06-01 **Metformin hydrochloride:** MET/061/21 **Linagliptin:** L-20190305-D01-L09-08		
Description of Pack (Container closure system)	Alu-Alu blister		
Stability Storage Condition	Real time : 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	22SB-031-001	22SB-032-002	22SB-033-003
Batch Size	3000 Tablets	3000 Tablets	3000 Tablets
Manufacturing Date	05-2022	05-2022	05-2022
Date of Initiation	21-06-2022	21-06-2022	21-06-2022
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has referred to previous inspection for authenticity of stability data of their product conducted by the panel on the basis of which Registration Board in 287th meeting dated 03rd & 04th January, 2019 decided to approve registration of Mac-Fenid Tablet 267mg & Mac-Fenid Tablet 801mg.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Empagliflozin:** Firm has submitted cipy of DML no. 20150233 issued by State Food and Drug Administration valid upto 17-11-2027. **Metformin HCl:** Firm has submitted copy of GMP certificate issued by Food & Drugs Control Administration Gujrat State India valid till 28-08-2025. **Linagliptin:** Firm has submitted cipy of DML no. 20150233 issued by State Food and Drug Administration valid upto 17-11-2027.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	**Empagliflozin:** Firm has submitted copy of commercial invoice cleared dated 12-01-2022 for import of 30kg of Empagliflozin. The invoice is attested by AD (I&E) DRAP. **Metformin HCl:** Firm has submitted copy of commercial invoice cleared dated 07-02-2022 for import of 500kg of Metformin HCl. The invoice is attested by AD (I&E) DRAP. **Linagliptin:** Firm has submitted copy of commercial invoice cleared dated 04-03-2020 for import of 1.5kg of Linagliptin. The invoice is attested by AD (I&E) DRAP.
4.	Data of stability batches will be supported by attested respective documents like	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.

	chromatograms, Raw data sheets, COA, summary data sheets etc.	
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted audit trail record of product testing of HPLC.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

- The me-too status of the product is not available while the firm has only submitted 30,000 fee for registration.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Registration Board further decided that registration letter will be issued after submission of 45,000/- balance fee as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.**

563.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Macter International Limited. F-216, S.I.T.E, Karachi, Pakistan**

Date of Initiation	27-06-2022	27-06-2022	27-06-2022
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has referred to previous inspection for authenticity of stability data of their product conducted by the panel on the basis of which Registration Board in 287th meeting dated 03rd & 04th January, 2019 decided to approve registration of Mac-Fenid Tablet 267mg & Mac-Fenid Tablet 801mg.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Empagliflozin:** Firm has submitted cipy of DML no. 20150233 issued by State Food and Drug Administration valid upto 17-11-2027. **Metformin HCl:** Firm has submitted copy of GMP certificate issued by Food & Drugs Control Administration Gujrat State India valid till 28-08-2025. **Linagliptin:** Firm has submitted cipy of DML no. 20150233 issued by State Food and Drug Administration valid upto 17-11-2027.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	**Empagliflozin:** Firm has submitted copy of commercial invoice cleared dated 12-01-2022 for import of 30kg of Empagliflozin. The invoice is attested by AD (I&E) DRAP. **Metformin HCl:** Firm has submitted copy of commercial invoice cleared dated 07-02-2022 for import of 500kg of Metformin

		HCl. The invoice is attested by AD (I&E) DRAP. **Linagliptin:** Firm has submitted copy of commercial invoice cleared dated 04-03-2020 for import of 1.5kg of Linagliptin. The invoice is attested by AD (I&E) DRAP.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted audit trail record of product testing of HPLC.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.
Evaluation by PEC:		
• The me-too status of the product is not available while the firm has only submitted 30,000 fee for registration.		
Decision: Approved. • **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.** • **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.** • **Registration Board further decided that registration letter will be issued after submission of 45,000/- balance fee as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.**		

566.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Genix Pharma Pvt Ltd. 44,45-B, Korangi Creek Road, Karachi, 75190, Pakistan**
	Name, address of Manufacturing site.	M/s Genix Pharma Pvt Ltd. 44,45-B, Korangi Creek Road, Karachi, 75190, Pakistan
	Status of the applicant	☐ Manufacturer ☐ Importer ☒ Is involved in none of the above (contract giver)
	GMP status of the firm	Firm has submitted copy of GMP certificate issued on the basis of inspection dated 15-06-2021.
	Evidence of approval of manufacturing facility	Firm has submitted copy of GMP certificate dated 15-06-2021 which specifies Tablet (General) section.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 3129: 02-02-2023
	Details of fee submitted	PKR 75,000/-: 24-01-2023
	The proposed proprietary name / brand name	**EMLIMET XR 2.5/5/1000 mg Tablet**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Film Coated Tablet Contains: Linagliptin…2.5mg Empagliflozin…5mg Metformin Hcl…1000mg

	Pharmaceutical form of applied drug	Film coated tablet
	Pharmacotherapeutic Group of (API)	Anti Diabetic
	Reference to Finished product specifications	As per innovator's specifications
	Proposed Pack size	As per SRO
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Trijardy XR Tablet (**USFDA** Approved)
	For generic drugs (me-too status)	NA
	Name and address of API manufacturer.	**Empagliflozin:** Ruyuan HEC Co. Pharm. Co. Ltd. Xiaba Development Zone, Ruyuan County, Shaoguan City, Guangdong Province, China **Metformin hydrochloride:** Aarti Drugs Limited Plot No. 211 - 213, Road No.2 G.I.D.C., Sarigam, Dist.: Valsad, Gujarat. INDIA. **Linagliptin:** Ruyuan HEC Co. Pharm. Co. Ltd. Xiaba Development Zone, Ruyuan County, Shaoguan City, Guangdong Province, China
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for both drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	**Empagliflozin:** Firm has submitted stability study data of 3 batches of drug substance as [er zone IV-A conditions. **Metformin hydrochloride:** Firm has submitted stability study data of 3 batches of drug substance as [er zone IV-A conditions. **Linagliptin:** Firm has submitted stability study data of 3 batches of drug substance as [er zone IV-A conditions.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.

	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for the quality tests for their product against the innovator's i.e. Trijardy XR Tablet. Firm has submitted CDP studies in 3 medium against the innovator's i.e. Trijardy XR Tablet.
	Analytical method validation/verification of product	Firm has submitted report of verification studies of analytical method of drug substance. Firm has submitted report of verification of analytical method for the drug product.

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has referred to onsite inspection report of their product "WYMLY Tablets 25mg (Tenofovir Alafenamide)", which was conducted on 09-04-2018, and was presented in 281st meeting of Registration Board held on 11-13th April, 2018. Registration Board decided to approve registration of WYMLY Tablets 25mg (Tenofovir Alafenamide)", by M/s. Genix Pharma (Pvt.) Ltd., Karachi. Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for 26 weeks. Following observations were reported in the report: • The HPLC software is 21CFR complaint and having certificates of compliance by USFDA. • Audit trail on the testing reports of WYMLY Tablets 25mg (Tenofovir Alafenamide) is available. • Adequate monitoring and control are available for stability chamber. Chamber are controlled and monitored through software having alarm system for

		alerts as well.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	
3.	Documents for the procurement of API with approval from DRAP (in case of import).	
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted audit trail record of product testing of HPLC.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Sr. No	Shortcomings communicated	Response by the firm
1.	Revise your label claim as per the innovator's product along with submission of requisite fee.	Firm has submitted following revised label claim along with submission of 75,000 fee. Each Film Coated Extended Release Tablet Contains: Linagliptin (Immediate Release)…2.5mg Empagliflozin (Immediate Release)…5mg Metformin HCl (Extended Release)…1000mg
2.	Submit data in section 3.2.S.4.1 and 3.2.S.4.2 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required."	Submitted.
3.	Submit verification studies of analytical method of each drug substance performed by drug product manufacturer.	Submitted.
4.	Specify details including the expiry date and manufacturer of the product against which pharmaceutical equivalence studies and CDP studies are conducted	Submitted.
5.	Submit valid GMP certificate of each API manufacturer	Submitted.
6.	Submit documents confirming import of each API	Submitted.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 4040: 13-02-2023
	Details of fee submitted	PKR 75,000/-: 31-01-2023
	The proposed proprietary name / brand name	**EMLIMET XR 5/25/1000 mg Tablet**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Film Coated Tablet Contains: Linagliptin…5mg Empagliflozin…25mg Metformin Hcl…1000mg
	Pharmaceutical form of applied drug	Film coated tablet
	Pharmacotherapeutic Group of (API)	Anti Diabetic
	Reference to Finished product specifications	As per innovator's specifications
	Proposed Pack size	As per SRO
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Trijardy XR Tablet (**USFDA** Approved)
	For generic drugs (me-too status)	NA
	Name and address of API manufacturer.	**Empagliflozin:** Ruyuan HEC Co. Pharm. Co. Ltd. Xiaba Development Zone, Ruyuan County, Shaoguan City, Guangdong Province, China **Metformin hydrochloride:** Aarti Drugs Limited Plot No. 211 - 213, Road No.2 G.I.D.C., Sarigam, Dist.: Valsad, Gujarat. INDIA. **Linagliptin:** Ruyuan HEC Co. Pharm. Co. Ltd. Xiaba Development Zone, Ruyuan County, Shaoguan City, Guangdong Province, China
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for both drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical

		procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	**Empagliflozin:** Firm has submitted stability study data of 3 batches of drug substance as [er zone IV-A conditions. **Metformin hydrochloride:** Firm has submitted stability study data of 3 batches of drug substance as [er zone IV-A conditions. **Linagliptin:** Firm has submitted stability study data of 3 batches of drug substance as [er zone IV-A conditions.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for the quality tests for their product against the innovator's i.e. Trijardy XR Tablet. Firm has submitted CDP studies in 3 medium against the innovator's i.e. Trijardy XR Tablet.
	Analytical method validation/verification of product	Firm has submitted report of verification studies of analytical method of drug substance. Firm has submitted report of verification of analytical method for the drug product.

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has referred to onsite inspection report of their product "WYMLY Tablets 25mg (Tenofovir Alafenamide)", which was conducted on 09-04-2018, and was presented in 281st meeting of Registration Board held on 11-13th April, 2018. Registration Board decided to approve registration of WYMLY Tablets 25mg (Tenofovir Alafenamide)", by M/s. Genix Pharma (Pvt.) Ltd., Karachi. Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for 26 weeks. Following observations were reported in the report: • The HPLC software is 21CFR complaint and having certificates of compliance by USFDA. • Audit trail on the testing reports of WYMLY Tablets 25mg (Tenofovir Alafenamide) is available. • Adequate monitoring and control are available for stability chamber. Chamber are controlled and monitored through software having alarm system for alerts as well.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	
3.	Documents for the procurement of API with approval from DRAP (in case of import).	
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted audit trail record of product testing of HPLC.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Sr. No	Shortcomings communicated	Response by the firm
1.	Revise your label claim as per the innovator's product along with submission of requisite fee.	Firm has submitted following revised label claim along with submission of 75,000 fee. Each Film Coated Extended Release Tablet Contains: Linagliptin (Immediate Release)….5mg Empagliflozin (Immediate Release)…25mg Metformin HCl (Extended Release)…1000mg
2.	Submit data in section 3.2.S.4.1 and 3.2.S.4.2 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical	Submitted.

	Ingredient by both Drug substance & Drug Product manufacturer is required."	
3.	Submit verification studies of analytical method of each drug substance performed by drug product manufacturer.	Submitted.
4.	Specify details including the expiry date and manufacturer of the product against which pharmaceutical equivalence studies and CDP studies are conducted	Submitted.
5.	Submit valid GMP certificate of each API manufacturer	Submitted.
6.	Submit documents confirming import of each API	Submitted.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Case No. 03 Priority as per Authority Decision of 129th meeting for Invalid Registration

Priority on the basis of decision of 129th meeting of the Authority wherein the Authority decided that "The Authority acceded to the request of firms for out-of-queue submission and consideration of registration dossiers on CTD Format (5F) in regard to cancelled products due to late submission of renewals."

M/s Hisun has submitted following applications for the products which were cancelled due to late submission of renewals. The details of cancellation letter of the firm is tabulated below:

Sr. No	Registration No	Brand Name	Date & File No of cancellation of Registration
1.	051063	Predcort syrup Each ml contains: Prednisolone……..15mg	F.No.3-5/2021-RRR (M-312) 08-12-2021
2.	056474	Pizosun Syrup Each 5ml contains: Pizotifen (as hydrogen maleate)……0.25mg	F.No.3-8/2022-RRR (M-317) 05-07-2022
3.	056480	Brosun Suspension Each 5ml contains: Ibuprofen…….100mg	F.No.3-8/2022-RRR (M-317) 05-07-2022
4.	056477	Cetsun Syrup Each 5ml contains: Cetirizine 2HCl……5mg	F.No.3-8/2022-RRR (M-317) 05-07-2022
5.	056486	Cetsun 10mg Tablet Each tablet contains: Cetirizine 2HCl……10mg	F.No.3-8/2022-RRR (M-317) 05-07-2022

570.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Hisun Pharmaceutical Industries Plot No. 37-A, R-2, Industrial Estate Gadoon Amazai District Swabi.**

Evaluation by PEC:

Sr. No	Shortcomings communicated	Response by the firm
1.	Submit letter of cancellation of registration of your already registered product, since you have applied for out of queue consideration of this product based on the reason that it has been cancelled due to non submission of renewal in time.	
2.	Submit evidence of requisite manufacturing facility i.e. Liquid syrup (steroid) section from Licensing Division DRAP.	
3.	Submit valid GMP certificate / inspection report of the srug product manufacturer.	
4.	Submit details including IR spectra for characterization of API in section 3.2.S.3.	
5.	Submit data in section 3.2.S.4.1 and 3.2.S.4.2 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required."	
6.	Submit verification studies of analytical method of drug substance performed by drug product manufacturer.	
7.	Submit COA of relevant batch of API from API manufacturer as well as from drug product manufacturer.	
8.	Submit COA of reference standard used in the analysis of drug substance.	
9.	Submit stability study data of 3 batches of drug substance, since the submitted data sheets are not of the API manufacturer.	
10.	Submit drug-excipient compatibility studies since the excipient used in your formulation are qualitatively different from the innovator's product.	
11.	Submit preservative effectiveness studies	
12.	Justify why pH test is not included in the drug product specification	
13.	The specifications of the drug product are different from USP monograph, justification is required in this regard.	
14.	Submit analytical method of drug product testing in section 3.2.P.5.2.	
15.	Submit valid GMP certificate of each API manufacturer	
16.	Submit documents confirming import of each API	
17.	Submit stability study data in a propoer sequence along with separators to identify different batches and time points as required in the CTD guidance document.	
18.	Submit compliance Record of HPLC software 21CFR & audit trail reports on product testing	

19.	Submit record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	
20.	Submit BMR of three stability batches.	

Proceedings: Registration Board noted that The DRAP Authority in its180th meeting held on 07th March 2024 decided as under:

"The Authority observed that similar matter has already been decided in previous meeting in different perspectives and there is a need to adopt a uniform approach for disposing of all such cases where registration has become invalid on administrative grounds. Given the fact that manufacturing site, machinery and formulation remain the same, the Authority decide that instant and all such applications in future:

i. Shall be considered out-of-queue and

ii. Shall be exempted form submission of registration dossier on Form 5F in exercise of Authority's power under Rule 26 of the Drugs (Licensing, Registering & Advertising (Rules, 1976 amended via SRO 713 (1) /2018 dated 08th June, 2018.

Since, DRAP Authority has decided to exempt such applications from submission of Form5-F, therefore the Board decided to evaluate the instant case as per the requirements of Form 5.

Decision: Registration Board deliberated the matter and in light of the decision of 180th meeting of the authority decided to defer the case for evidence of requisite manufacturing facility from Licensing Division within 1 month.

1.	Submit letter of cancellation of registration of your already registered product, since you have applied for out of queue consideration of this product based on the reason that it has been	

	cancelled due to non submission of renewal in time.	
2.	Submit valid GMP certificate / inspection report of the srug product manufacturer.	
3.	Submit details including IR spectra for characterization of API in section 3.2.S.3.	
4.	Submit data in section 3.2.S.4.1 and 3.2.S.4.2 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required."	
5.	Submit verification studies of analytical method of drug substance performed by drug product manufacturer.	
6.	Submit COA of relevant batch of API from API manufacturer as well as from drug product manufacturer.	
7.	Submit COA of reference standard used in the analysis of drug substance.	
8.	Submit drug-excipient compatibility studies since the excipient used in your formulation are qualitatively different from the innovator's product.	
9.	Submit preservative effectiveness studies	
10.	Justify why pH test is not included in the drug product specification	
11.	Submit analytical method of drug product testing in section 3.2.P.5.2.	
12.	Submit valid GMP certificate of each API manufacturer	
13.	Submit documents confirming import of each API	
14.	Submit stability study data in a propoer sequence along with separators to identify different batches and time points as required in the CTD guidance document.	
15.	Submit compliance Record of HPLC software 21CFR & audit trail reports on product testing	
16.	Submit record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	
17.	Submit BMR of three stability batches.	

Proceedings: Registration Board noted that The DRAP Authority in its180th meeting held on 07th March 2024 decided as under:

"The Authority observed that similar matter has already been decided in previous meeting in different perspectives and there is a need to adopt a uniform approach for disposing of all such cases where registration has become invalid on administrative grounds. Given the fact that manufacturing site, machinery and formulation remain the same, the Authority decide that instant and all such applications in future:

i. Shall be considered out-of-queue and

ii. Shall be exempted form submission of registration dossier on Form 5F in exercise of Authority's power under Rule 26 of the Drugs (Licensing, Registering & Advertising (Rules, 1976 amended via SRO 713 (1) /2018 dated 08th June, 2018.

Since, DRAP Authority has decided to exempt such applications from submission of Form5-F, therefore the Board decided to evaluate the instant case as per the requirements of Form 5. **Decision: Registration Board deliberated the matter and in light of the decision of 180th meeting of the authority decided to approve the product.**		
573.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Hisun Pharmaceutical Industries Plot No. 37-A, R-2, Industrial Estate Gadoon Amazai District Swabi.**

Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 1, 2, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	P5001	P5002	P5003

Batch Size	2000 Tablets	2000 Tablets	2000 Tablets
Manufacturing Date	10-2021	10-2021	10-2021
Date of Initiation	25-10-2021	27-10-2021	29-10-2021
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not applicable since it is a newly established license.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Not submitted
3.	Documents for the procurement of API with approval from DRAP (in case of import).	
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted stability study data of 3 batches
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	NA
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Sr. No	Shortcomings	Response by the firm
1.	Name of the applicant / manufacturer mentioned in section 1.3.1 and 1.3.2 is "City Pharmaceuticals Laboratories" while the name of the firm mentioned on DML is "City Pharmaceutical Laboratories". Correction in the name is required along with submission of full fee of registration.	
2.	Submit valid GMP certificate / inspection report of drug product manufacturer.	
3.	Submit section approval letter from Licensing Division for the requisite manufacturing facility	
4.	Specify the exact brand name applied, since PARACETAMOL 500mg Tablet is mentioned in section 1.5.3 while Ferodol Tablet is mentioned on covering letter and rest of the application.	
5.	Submit GMP certificate of the drug substance manufacturer in section 1.6.5 (b).	
6.	Submit details in section 3.2.S.3 "Characterization" as per the CTD guidance document.	
7.	Submit discussion on the potential for isomerism and identification of stereochemistry, studies performed to identify potential polymorphic forms and particle size distribution of the Drug substance, since these parameters may impact the quality, safety or efficacy of the drug product in section 3.2.S.3.	
8.	Submit list of Drug Substance / API-related impurities and process-related impurities along with acceptance limits in section 3.2.S.3.	
9.	Submit specifications of drug substance from drug substance manufacturer in section 3.2.S.4.1, since you have submitted a document for analytical method in this section with header of	

	pharmagen limited however this method is not the actual method of the drug substance manufacturer.	
10.	Submit specifications of the drug substance from drug product manufacturer in section 3.2.S.4.1	
11.	Submit analytical procedure of the drug substance from drug substance manufacturer in section 3.2.S.4.2.	
12.	Submit analytical procedure of the drug substance from drug product manufacturer in section 3.2.S.4.2.	
13.	Submit verification studies of the analytical procedure for testing of drug substance performed by drug product manufacturer in section 3.2.S.4.3.	
14.	Justify the submission of COA of Batch No. 00510911/078/2020 in which the result of solubility is 619mg/Tab, result of water content is 5 min, result of sulphated ash (acceptance criteria NMT 0.1%) is 99.03% and result of melting point is 98.99%.	
15.	API manufacturer has specified the test of loss on drying in the drug substance specifications while you have mentioned water contents. Clarify how you can adopt different specifications from that specified by the drug substance manufacturer.	
16.	API manufacturer has specified the assay limit 99.0 – 101%, while you have mentioned the assay limit as 98 – 102%. Clarify how you can adopt different specifications from that specified by the drug substance manufacturer.	
17.	Submit evidence of procurement of USP reference standard used for analysis of drug substance as you have submitted the certificate of USP reference standard in section 3.2.S.5	
18.	The specifications of drug substance have been claimed as "BP" while the reference standard of "USP" has been used. Clarification is required in this regard.	
19.	The COA of working standard from pharmegn limited submitted in section 3.2.S.5 specifies use before 01 February 2018 while you have performed API testing in September 2021 justify how this COA can be used.	
20.	Submit stability study data of commercial batch of API performed by pharmagen since the submitted stability data is of a lab scale batch (25gm).	
21.	Submit clear readable copy of API stability study datam since the submitted data sheets are not readable.	
22.	Submit API stability study data for 3 batches.	
23.	Justify the CDP results at various time points where drug release at later time point is less than the drug release at earlier time point for a single unit. Justification is required in this regard.	
24.	Qualitative composition of your product is different from the innovator's product while compatibility studies are not performed. Clarification is required in this regard.	
25.	Justify the process validation protocols without identifying the critical quality attributes. Furthermore, the wet granulation and drying steps are not covered in this protocols. Moreover, clarify how the temperature and drying time will be selected and which type of dryer is used for the performance of the same.	
26.	BP has recommended that the concentration of sample solution in dissolution test shall be 0.00075% w/v of paracetamol, while your mehod specifies that the concentration of sample solution	

	is 0.011mg/ml. Justification is required how such change in dissolution method can be utilized.	
27.	Justify how you have claimed BP specifications while you have not included the test of related substances as specified in BP monograph.	
28.	Submit report of verification studies of the analytical procedure of the drug product in section 3.2.P.5.3.	
29.	Submit batch analysis certificate of three batches of drug product in section 3.2.P.5.4.	
30.	Submit evidence of procurement of USP reference standard Lot No K2M244 which is used for the analysis of drug product.	
31.	Section 3.2.P.7 specifies that the container closure system of the product is Alu-Alu blister while in stability data sheets the container closure system is mentioned as Alu PVC blister. Clarification is required in this regard.	
32.	You have mentioned that your firm is a new license in section 3.2.P.8.3. Justification is required in this regard.	
33.	Submit readable copy of GMP certificate of the API manufacturer.	
34.	The commercial invoice of API manufacturer specifies the batch number 00510911-12/078/2021 which have been tempered / changed by hand to convert 2021 into 2020. Provide actual copy of invoice along with written justifications for making changes in the invoice of API manufacturer.	
35.	Submit COA of batch number 00510911-12/078/2021.	
36.	The absorbance of standard and sample solution as submitted in validation studies are in the range of 0.5, while the absorance of the sample and standard solution (having same concentration) in stability studies is in the range of 0.7. Submit scientific justification how such significant change in the absorbance values can exist.	
37.	Justify the calculation of assay results using single value of sample and standard solution absorbance.	
38.	Submit proper BMR of the three stability batches since very brief document is submitted which does not specify performance of each and every step in the manufacturing.	

Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings.

576.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Pharmevo Private Limited Plot # A-29, North Western Industrial Zone, Port Qasim, Karachi**

	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	Firm has submitted copy of GMP certificate of the firm based on inspection dated 23-06-2022.
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter of grant of sections dated 21-02-2018. The letter specifies Tablet (General) section Revised.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)

	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 29092: 13-10-2022
	Details of fee submitted	PKR 30,000/- : 11-08-2022
	The proposed proprietary name / brand name	**ZILSAR 80mg Tablet**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Tablet Contains: Azilsartan Medoxomil (as Potassium)…80mg
	Pharmaceutical form of applied drug	Angiotensin Receptor Blocker
	Pharmacotherapeutic Group of (API)	Uncoated tablet
	Reference to Finished product specifications	Innovator's
	Proposed Pack size	7's, 10's, 14's, 20's, 21's, 28's, 30's, 56's, 84's, 100's, 122's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Edarbi Tablet (**USFDA** Approved)
	For generic drugs (me-too status)	Aziltec Tablet 40mg by Nabiqasim
	Name and address of API manufacturer.	AMI Lifesciences Pvt Ltd. Block No.82/B, ECP Road, AT & Post. Karakhadi-391 450 Taluka- Padra, District-Vadodara Gujarat, INDIA
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 25°C ± 2°C / 60% ± 5% RH for 6 months. The real time stability data is conducted at 5°C ± 3°C for 24 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.

	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted pharmaceutical equivalence of their product against the innovator's product Edarbi Tablet Firm has submitted CDP results of their product against the innovator's product Edarbi Tablet in 3 dissolution medias.
	Analytical method validation/verification of product	Firm has submitted analytical method validation study reports for drug substance as well as drug product.

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Product specific inspection for Empagin XR Tablet has been conducted on 05-12-2019 and the case was approved in 293rd meeting.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate issued by Food and Drug Control Administration Gujrat State India valid till 17-04-2025.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice cleared dated 01-12-2020 specifying 1.6Kg Azilsartan medoxomil potassium. The invoice is cleared by AD (I&E) DRAP.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record for product testing.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted certificate of 21 CFR compliance for the HPLC system
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:
Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Date of Initiation	01-2017	01-2017	01-2017
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	NA

2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate issued by CFDA China valid till 28-10-2020.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice clared dated 28-11-2017 specifying dexamethasone base raw material
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Evaluation by PEC:

Sr. No	Shortcomings communicated	Response by the firm
1.	Submit IR spectra for characterization of drug substance in section 3.2.S.3	Submitted
2.	Submit COA of the relevant batch of API used in the development for three stability batches in section 3.2.S.4.4.	Submitted
3.	Specify details including the expiry date and manufacturer of the product against which pharmaceutical studies are conducted	Dexamthasone Injection 3.3mg/ml by Hospira UK Limited. Batch No FDT258
4.	Submit valid GMP certificate of API manufacturer	Not submitted
5.	The submitted API clearance specify dexamethasone base while the product contains dexamtheasone sodium phosphate. Clarify	No justification is submitted
6.	The submitted API clearance is dated 28-11-2017 while your batches have been manufactured in January 2017	No justification is submitted
8.	Submit copy of BMR of all batches	Submitted.

Decision: Deferred for following:

- **Valid GMP certificate of API manufacturer.**
- **Clarification since the submitted API clearance specify dexamethasone base while the product contains dexamtheasone sodium phosphate.**
- **Clarification since the submitted API clearance is dated 28-11-2017 while the batches have been manufactured in January 2017.**

November 2022 – February 2023

Sr. No	Shortcomings communicated	Response by the firm
1.	Submit GMP certificate / inspection report conducted within last three years.	
	Submit reference of specifications of the drug product, since you have mentioned "None" in section 1.5.6.	
2.	Submit specifications and analytical method of the drug substance from both API manufacturer as well as product manufacturer in section 3.2.S.4.1 and 3.2.S.4.2.	

3.	Submit verification studies of the analytical method of drug substance performed by drug product manufacturer.	
4.	Submit signed and stamped stability study data sheets of API from API manufacturer.	
5.	Justify why the verification studies does not include test for specificity and repeatability.	
6.	Submit raw data sheets for assay testing during stability studies	
7.	Submit analytical record for dissolution testing.	
8.	Submit GMP certificate of API manufacturer	
9.	Submit Documents for the procurement of API with approval from DRAP.	
10.	Submit Compliance Record of HPLC software 21CFR & audit trail reports on product testing	
11.	Submit Record of Digital data logger for temperature and humidity monitoring of stability chambers	

Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings.

601.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Swat Pharmaceuticals. Valley Road, sherari Gulkada No. 3, Saidu Sharif, Swat.**
	Name, address of Manufacturing site.	M/s Swat Pharmaceuticals. Valley Road, sherari Gulkada No. 3, Saidu Sharif, Swat.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Application Form Dy. No / Tracking ID & date of submission	Form 5F: Dy. No. 5257: 23-02-2023
	Details of fee submitted	PKR 30,000/- : 15-07-2022
	The proposed proprietary name / brand name	**SWAFLU 150mg Capsule**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Capsule Contains: Fluconazole…150mg
	Pharmacotherapeutic Group of (API)	Antifungal
	Reference to Finished product specifications	JP
	The status in reference regulatory authorities	**MHRA** Approved
	For generic drugs (me-too status)	Flozex Capsule by Martin Dow
	Proposed Pack size	As per SRO

Evaluation by PEC[3] :

Sr. No	Shortcomings communicated	Response by the firm
1.	Submit GMP certificate / inspection report conducted within last three years.	
2.	Submit specifications and analytical method of the drug substance from both API manufacturer as well as product manufacturer in section 3.2.S.4.1 and 3.2.S.4.2.	

3.	Submit verification studies of the analytical method of drug substance performed by drug product manufacturer.	
4.	Justify the adaptation of JP method for your drug product since JP method is for 50mg and 100mg capsule while your applied formulation is 150mg capsule.	
5.	Justify why your dissolution test as well as assay test is different from JP.	
6.	Justify why the verification studies does not include test for specificity and repeatability.	
7.	Submit GMP certificate of API manufacturer	
8.	Submit Documents for the procurement of API with approval from DRAP.	
9.	Submit Compliance Record of HPLC software 21CFR & audit trail reports on product testing	
10.	Submit Record of Digital data logger for temperature and humidity monitoring of stability chambers	

Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings.

	Details of fee submitted	PKR 30,000/- : 25-10-2022
	The proposed proprietary name / brand name	**ONDEX 8mg Tablet**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each tablet contains: Ondansetron HCl……8mg
	Pharmacotherapeutic Group of (API)	Antiemetics
	Reference to Finished product specifications	USP
	The status in reference regulatory authorities	Zofran Tablet (**USFDA** Approved and discontinued for reasons other than safety and efficacy as per Drugs@FDA database)
	For generic drugs (me-too status)	Onset 8mg Tablet by Pharmedic
	Proposed Pack size	As per SRO

Evaluation by PEC[3] :

Sr. No	Shortcomings communicated	Response by the firm
1.	Submit evidence of approval of requisite manufacturing facility / section approval of drug product manufacturer.	

2.	Submit GMP certificate / inspection report conducted within last three years.	
3.	Revise label claim as per innovator's product along with submission of 30,000 fee for correction of formulation / label claim.	
4.	Submit specifications and analytical method of the drug substance from both API manufacturer as well as product manufacturer in section 3.2.S.4.1 and 3.2.S.4.2.	
5.	Submit verification studies of the analytical method of drug substance performed by drug product manufacturer.	
6.	Submit master formulation in section 3.2.P.1.	
7.	Justify the performance of CDP studies only in acidified water pH 6.0.	
8.	Justify how drug dissolution of a single tablet in a basket at a later time point is less than the dissolution at earlier time point.	
9.	Submit batch formula in section 3.2.P.3.2.	
10.	Justify why the calculation formula for dissolution test in your method is entirely different from that specified in USP.	
11.	Submit stability study data of the drug product in section 3.2.P.8.3 as per guidance document in proper sequence for each time point along with separators i.e. summary sheet, rawa data sheet, relevant analytical record.	
12.	Submit data as per 6 points checklist as specified in the CTD guidance document.	

Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings.

603.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Genix Pharma Pvt Ltd. 44,45-B, Korangi Creek Road, Karachi.**

	Details of fee submitted	PKR 75,000/- : 28-10-2022
	The proposed proprietary name / brand name	**ONDONIX 4mg Tablet**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each orally disintegrating tablet contains: Ondansetron……4mg
	Pharmacotherapeutic Group of (API)	Antiemetics
	Reference to Finished product specifications	USP

	The status in reference regulatory authorities	Zofran ODT Tablet (**USFDA** Approved and discontinued for reasons other than safety and efficacy as per Drugs@FDA database)
	For generic drugs (me-too status)	NA
	Proposed Pack size	As per SRO

Evaluation by PEC[3] :

Sr. No	Shortcomings communicated	Response by the firm
1.	Submit verification studies of the analytical method of drug substance performed by drug product manufacturer.	Submitted
2.	Submit COA of relevant batch of API from both API manufacturer and drug product manufacturer.	Submitted
3.	The innovator's product used ondansetron base while your module 3.2.S as well as COA of API specifies that you have used ondansetron HCl. Clarify how your product could be considered as genric product.	We acknowledge the discrepancy in developing the product in ondansetron HCL intead of base and we are currently implementing the corrective measures to ensure compliance with reference product. We will submit the data of said product after its correction is done.

Decision: Deferred for submission of data of revised batches of drug product manufactured as per the innovator's product.

604.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Jawa Pharmaceuticals (Pvt) Ltd 112/10 Quaid-e-Azam Industial Area Kot Lakhpat Lahore.**
	Name, address of Manufacturing site.	M/s Jawa Pharmaceuticals (Pvt) Ltd 112/10 Quaid-e-Azam Industial Area Kot Lakhpat Lahore.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Application Form Dy. No / Tracking ID & date of submission	Form 5F: Dy. No. 4045: 13-02-2023
	Details of fee submitted	PKR 30,000/- : 26-01-2023
	The proposed proprietary name / brand name	**JOXETINE 20mg Capsule**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Capsule contains: Fluoxetine HCL eq. to Fluoxetine……20mg
	Pharmacotherapeutic Group of (API)	Selective Serotonin Reuptake Inhibitors
	Reference to Finished product specifications	USP
	The status in reference regulatory authorities	USFDA Approved
	For generic drugs (me-too status)	Rise Capsule by Werrick
	Proposed Pack size	As per SRO

Evaluation by PEC[3] :

Sr. No	Shortcomings communicated	Response by the firm
1.	Submit GMP certificate / inspection report of drug product manufacturer.	

2.	Clarify how specificity test was performed during verification studies of analytical method of drug substance.	
3.	Your master formulation specifies 20mg fluoxetine hydrochloride per capsule. While your label claim specifies 20mg Fluoxetine base per capsule. Justify how your formulation supports your label claim.	
4.	The chromatograms for assay specify the run time for 35 minutes, while consecutive HPLC run for standard are acquired after 30 – 32 minutes. Justify how HPLC analysis of subsequent standard can be performed even prior to the completion of initial run.	
5.	The USP specifies that for calculation of assay, the formula also utilizes the ratio of molecular weight of fluoxetine and fluoxetine HCl (i.e. 309.33 / 345.79 = 0.89), while your analysis and raw data sheets does not use this ratio to calculate the assay results. Clarify how your method can be considered compliant to USP and further how your results can be considered accurate.	
6.	If USP specified formula is used, the assay result of your analysis falls below 90% at all time points. Clarification is required in this regard.	
7.	The dissolution analysis as per USP is to be performed using UV detector at 226nm while your analysis has been performed at 227nm. Clarification is required in this regard.	
8.	The HPLC chromatograms of standard run for assay test and sample run for dissolution test are exactly same and also conducted at exactly same time having same date and time acquired. Clarification is required in this regard.	
9.	Submit Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	
10.	Submit clearance certificate / ADC cleared commercial invoice as evidence of import of drug substance from the specified source.	
11.	You have been allowed by DRAP Lahore office to import 100gm Fluoxetine HCl on 20-03-2020. While as per your batch sizes more than 350gm API is required to manufacture batches of specified batch size. Clarification is required in this regard.	
12.	Submit Batch Manufacturing Record of three stability batches.	

Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings.

605.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Caraway Pharmaceuticals Plot # 12, Street N-3, National industrial Zone, Rawat, Islamabad.**
	Name, address of Manufacturing site.	M/s Caraway Pharmaceuticals Plot # 12, Street N-3, National industrial Zone, Rawat, Islamabad.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Application Form Dy. No / Tracking ID & date of submission	Form 5F: Dy. No. 34815,: 01-12-2022
	Details of fee submitted	PKR 30,000/- : 24-11-2022
	The proposed proprietary name / brand name	**TERB-C Topical Solution 1% w/w**

	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Gram contains: Terbinafine Hydrochloride……10mg
	Pharmacotherapeutic Group of (API)	Anti-Fungal
	Reference to Finished product specifications	JP
	The status in reference regulatory authorities	Lamisil 1% cutaneous solution (**Sweeden** Approved)
	For generic drugs (me-too status)	Terbisil Lotion by Saffron
	Proposed Pack size	As per SRO

Evaluation by PEC[3] :

Sr. No	Shortcomings communicated	Response by the firm
1.	Submit API specificaions and analytical procedure of drug substance manufacturer in section 3.2.S.4.1 and 3.2.S.4.2.	Submitted.
2.	The applied formulation is applied and approved by reference regulatory authorities as 1% w/w topical solution while your master formulation specifies purified water as "Q.S". Clarification is required in this regard.	Submitted.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

606.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Pearl Pharmaceuticals. Plot No. 204, Street No.1, I-10/3, Islamabad.**
	Name, address of Manufacturing site.	M/s Pearl Pharmaceuticals. Plot No. 204, Street No.1, I-10/3, Islamabad.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Application Form Dy. No / Tracking ID & date of submission	Form 5F: Dy. No. 2253,: 24-01-2023
	Details of fee submitted	PKR 30,000/- : 16-01-2023
	The proposed proprietary name / brand name	**TERBIPEARL 1% w/w Lotion**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Gram contains: Terbinafine Hydrochloride……10mg
	Pharmacotherapeutic Group of (API)	Anti-Fungal
	Reference to Finished product specifications	JP
	The status in reference regulatory authorities	Lamisil 1% cutaneous solution (**Sweeden** Approved)
	For generic drugs (me-too status)	Terbisil Lotion by Saffron
	Proposed Pack size	As per SRO

Evaluation by PEC[3] :

Sr. No	Shortcomings communicated	Response by the firm
1.	Submit evidence of required manufacturing facility / section approval from Licensing Division, since your letter for renewal of DML does not specify Lotion (General) section.	Our steroid Lotion section was approved in 2011 since then we are manufacturing general product in the same section like scabipearl lotion clindapearl lotion and Dixidil lotion.
2.	Submit GMP certificate of the drug product manuafcturer.	Submitted
3.	Submit API specificaions and analytical procedure of drug substance manufacturer in section 3.2.S.4.1 and 3.2.S.4.2.	Submitted
4.	Clarify how specificity test was performed in analytical method verification studies. Further also justify your test in the light of ICH Q2 guidelines.	No clarification is submitted.
5.	Specify why complete testing is not performed in pharmaceutical evaluation studies.	Submitted.
6.	Justify why you have not included test of pH in your drug product specifications.	pH test is now included in specification
7.	Submit evidence of import of API (AD attested invoice or clearance certificate), since you have only submitted copy of commercial invoice without clearance from DRAP.	Firm has submitted copy of clearance certificate dated 07-06-2021.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

	The status in reference regulatory authorities	**MHRA Approved**
	For generic drugs (me-too status)	Otsuzol Infusion by Otsuka Pharma
	Name and address of API manufacturer.	Hubei Hongyuan Pharmaceutical Technology Co., Ltd. No. 3, Hongyuan Road, Fengshan Town, Luotian County, Huanggang City, Hubei Province China.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65 ± 5% RH for 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for the quality tests for their product against the comparator product 'Otsuzol Injection by Otsuka Pharma."
	Analytical method validation/verification of product	Firm has submitted report of verification of analytical method for the drug substance.

		Firm has submitted report of verification of analytical method for the drug product.

STABILITY STUDY DATA

Manufacturer of API	Hubei Hongyuan Pharmaceutical Technology Co., Ltd. No. 3, Hongyuan Road, Fengshan Town, Luotian County, Huanggang City, Hubei Province China.		
API Lot No.	0182110063		
Description of Pack (Container closure system)	Polypropylene		
Stability Storage Condition	Real time : 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 1, 2, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	T-001	T-002	T-003
Batch Size	133 liters	133 liters	133 liters
Manufacturing Date	01-2022	01-2022	01-2022
Date of Initiation	27-01-2022	27-01-2022	27-01-2022
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not applicable since it is a newly established license.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (No. HB20180424) of Hubei Hongyuan Pharmaceutical Technology Co., Ltd. issued by China Food and Drug Administration. The certificate is valid till 30-07-2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice cleared by AD (I&E) DRAP dated 04-01-2022. The invoice declare purchase of 2Kg Metronidazole.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted stability study data of 3 batches along with water loss test at each time point. Firm has submitted analytical report at each stability testing interval.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	NA
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Sr. No	Shortcomings communicated	Response by the firm
1.	Justify why the test of sulphated ash is not specified in the drug substance specification although this tet is recommended in BP monograph.	*Sulphated ash test was not mentioned in BP 2022.* **Firm has not submitted any relevant response.**
2.	Provide COA of reference standard actually used in the analysis of drug substance in section 3.2.S.5.	**Firm has not submitted any response.**
3.	Provide description of pharmaceutical development as per the CTD guidance	*Copy attached for master formulation and method of manufacturing in detail and proper information*

	document which specifies that "A brief information on the pharmaceutical development shall be included. This information specifies the justification of formulation and method of manufacturing. It is also important that critical quality attributes (CQAs) and Critical Process Parameters (CPP) shall be discussed".	*as per the CTD guidance regarding justification of formulation. And method of manufacturing.* **Firm has not submitted any relevant response.**
4.	You have mentioned "not applicable" for drug substance in section 3.2.P.2.1.1. Justify why you have mentioned not applicable and also provide information as per the CTD guidance document which specifies that "Discussion shall be provided for the key physicochemical characteristics (e.g. water content, solubility, particle size distribution, polymorphic or solid state form) of the Drug Substance(s) that can influence the performance of the Drug Product."	*The compatibility of the drug substance with excipients listed in 3.2.P.1 should be discussed. Additionally, key physicochemical characteristics (e.g., water content, solubility, and particle size distribution, polymorphic or solid state form) of the drug substance that can influence the performance of the drug product should be discussed. For combination products, the compatibility of drug substances with each other should be discussed as per the CTD guidance.* **Firm has not submitted any relevant response.**
5.	Provide information regarding excipients added in the formulation in section 3.2.P.2.1.2.	*The choice of excipients listed in 3.2.P.1, their concentration, and their characteristics that can influence the drug product performance should be discussed relative to their respective functions.* **Firm has not submitted any relevant response.**
6.	Justify why pharmaceutical equivalence is conducted against a comparator product instead of performing against the innovator's product.	*We have studied our comparator product & found that they have the same active ingredients, the same dosage form and are identical in strength, quality, purity, and identity.* **Firm has not submitted any relevant response.**
7.	Justify why complete tests as mentioned in BP monograph is not performed in pharmaceutical equivalence studies.	*Skip testing is the performance of specified tests at release on pre-selected batches and / or at predetermined intervals, rather than on a batch-to-batch basis with the understanding that those batches not being tested still must meet all acceptance criteria established for that product. This represents a less than full schedule of testing and should therefore be justified and presented to and approved by the regulatory authority prior to implementation.* **Firm has not submitted any relevant response.**
8.	Provide microbiological attributes of the drug product in section 3.2.P.2.5.	*Our product is compatible with drug container made of polypropylene of pharmaceutical grade and heat resistant and we can easily sterilize our product at 121°C for 30 minutes to make our product properly sterile.* **Firm has not submitted any relevant response.**
9.	Provide details how terminal sterilization method was validated for PP bottles.	***Terminal sterilization method was validated for PP bottles was validated from external agency.***
10.	Clarify why you have mentioned not applicable for all section of 3.2.P.4 excipients, while your formulation contains excipients.	**Firm has not submitted any response.**
11.	Justify why the assay test mentioned in your analytical method is completely different from that spcifed in latest edition of BP monograph in terms of sample solution preparation, media in which sample solution	*Our analytical method is BP 2022* **Firm has not submitted any relevant response.**

	is to be diluted and the calculation formula and procedure.	
12.	Provide verification studies of the analytical method of drug product in section 3.2.P.5.3 instead of providing process validation report.	*We have submitted verification studies of the analytical method of drug product in section 3.2.P.5.3.* **Firm has submitted process validation report instead of analytical method verification.**
13.	Provide COA of working standard / reference standard actually used in the analysis of drug product in section 3.2.P.6 instad of providing COA of the drug substance commercial lot.	**Firm has submitted COA of the drug substance commercial lot as COA of working standard.**
14.	Provide details of the container closure system of the applied product.	*Our sterile product is filled in polypropylene container properly sealed and sterilized. Polypropylene plastic is of pharmaceutical grade and provide strength to the container and .polypropylene is heat resistant and we can easily sterilize our product at 121c. to make our product sterile*
15.	Describe your container closure system in detail whether it contains Eurocap or not along with evidence of this facility (if applicable).	*Firm has both facility of manufacturing the simple cap & Eurocap.*
16.	Provide information in section 3.2.P.8.1 as per the CTD guidance document since you have not submitted any information in this section.	**Firm has not submitted any response.**
17.	Provide information in section 3.2.P.8.2 as per the CTD guidance document since you have mentioned "not applicable" in this section.	**Firm has not submitted any response.**
18.	The assay results of batch T-001 at batch analysis stage (section 3.2.P.5.4) shows 100% results while the initial stability results (section 3.2.P.8.3) performed on the same day show 104%. Justify how significant difference in results exists on the same date.	*Assay limits are 95-110% in BP 2022.* **Firm has not submitted any relevant response.**
19.	The stability data sheet for batch T001 shows that the assay result at initial time point for accelerated and real time studies are different. Clarification is required in this regard.	**Firm has not submitted any response.**
20.	Specify whether the bottles placed in stability chambers were with Europcap or not.	*Bottles placed in stability chamber were with simple cap not with Euro CAP.*
21.	Provide total capacity of each stability chamber and details of number of bottles of each product placed in the stability chambers. Also provide details how many bottles of the applied product are placed in real time and accelerated stability chamber.	*65 bottles in real stabilty chamber.* *80 bottles in accelerated stabilty chamber.*
22.	Justify why the assay testing procedure adopted during the stability studies is completely different from BP monograph.	*All the test acceptance criteria of all assay tests in pharmaceutical complies BP 2022.* **Firm has not submitted any relevant response. The assay method of the firm is different from BP monograph in terms of sample solution preparation, media in which sample solution is to be diluted and the calculation formula and procedure.**

23.	Justify the performance of stability studies at 30°C ± 2°C / 65% ± 5%RH and 40°C ± 2°C / 75% ± 5%RH being a product packed in PP (semi permeable) container, while ICH guidelines recommend performing stability studies at 30°C ± 2°C / 35% ± 5%RH and 40°C ± 2°C / NMT 25% RH for products packed in semi permeable containers.	*We have submitted the stability studies at 30°C ± 2°C / 65% ± 5%RH and 40°C ± 2°C / 75% ± 5%RH being a product packed in PP (semi permeable) container.* **Firm has not submitted any relevant response.**
24.	Justify why you have not perfoemed test of water loss during the stability studies.	**Firm has not submitted any response.**

Decision of 323rd meeting of RB:

Deferred for following submissions:

- Scientific justification why the test of sulphated ash is not specified in the drug substance specification although this tet is recommended in BP monograph.
- COA of reference standard actually used in the analysis of drug substance.
- Description of pharmaceutical development of the applied product as per the CTD guidance document.
- Submission of details of drug substance in section 3.2.P.2.1.1 of Module 3.
- Submission of information regarding excipients added in the formulation in section 3.2.P.2.1.2.
- Pharmaceutical equivalence studies against the innovator's product.
- Submission of microbiological attributes of the drug product in section 3.2.P.2.5.
- Scientific justification for performing validation studies of terminal sterilization procedure from external agency only.
- Submission of details of excipients used in the formulation in section 3.2.P.4.
- Scientific justification for performing assay test of drug product which is completely different from that spcifed in latest edition of BP monograph in terms of sample solution preparation, media in which sample solution is to be diluted and the calculation formula and procedure.
- Report of verification studies of the analytical method of drug product in section 3.2.P.5.3.
- Scientific justification for using commercial lot of API as working standard without any standardization.
- Submission of requisite information in section 3.2.P.8.1 and 3.2.P.8.2 as per the CTD guidance document.
- Scientific justification for the assay results of batch T-001 at batch analysis stage (section 3.2.P.5.4) which shows 100% results while the initial stability results (section 3.2.P.8.3) performed on the same day show 104%.
- Scientific justification for having different results at accelerated and real time conditions for batch T001.
- Scientific justification why test of water loss is not performed during the stability studies.
- Batch size of drug product stability batches in terms of no. of units.

Response by the firm:

Sr. No	Reason for deferment	Response by the firm
1.	Scientific justification why the test of sulphated ash is not specified in the drug substance specification although this tet is recommended in BP monograph.	Firm has submitted complete method of testing from API manufacturer which includes test for sulphated ash.
2.	COA of reference standard actually used in the analysis of drug substance.	Firm has submitted COA of working standard.
3.	Description of pharmaceutical development of the applied product as per the CTD guidance document.	Firm has submitted report of pharmaceutical development.
4.	Submission of details of drug substance in section 3.2.P.2.1.1 of Module 3.	Firm has submitted details of drug substance in 3.2.P.1.1 section
5.	Submission of information regarding excipients added in the formulation in section 3.2.P.2.1.2.	Firm has submitted information regarding excipients.

6.	Pharmaceutical equivalence studies against the innovator's product.	Firm has submitted pharmaceutical equivalence studies against Flagyl infusion.
7.	Submission of microbiological attributes of the drug product in section 3.2.P.2.5.	Firm has submitted microbiological attributes of the drug product in section 3.2.P.2.5.
8.	Scientific justification for performing validation studies of terminal sterilization procedure from external agency only.	Firm has submitted process validation procotocols and report of performance by Ashrafsons
9.	Submission of details of excipients used in the formulation in section 3.2.P.4.	Firm has submitted details of excipients in section 3.2.P.4
10.	Scientific justification for performing assay test of drug product which is completely different from that spcifed in latest edition of BP monograph in terms of sample solution preparation, media in which sample solution is to be diluted and the calculation formula and procedure.	Firm has submitted raw data sheets as well as detailed method along with verification studies report as per BP monograph. Report of testing at 12, 18 and 24 months as per BP is also submitted.
11.	Report of verification studies of the analytical method of drug product in section 3.2.P.5.3.	Firm has submitted report of verification studies of the analytical method of drug product in section 3.2.P.5.3.
12.	Scientific justification for using commercial lot of API as working standard without any standardization.	Firm has submitted COA of working standard of API.
13.	Submission of requisite information in section 3.2.P.8.1 and 3.2.P.8.2 as per the CTD guidance document.	Firm has submitted details in section 3.2.P.8.1 and 3.2.P.8.2.
14.	Scientific justification for the assay results of batch T-001 at batch analysis stage (section 3.2.P.5.4) which shows 100% results while the initial stability results (section 3.2.P.8.3) performed on the same day show 104%.	We have performed batch analysis testing at the batch release stage. Another testing was also performed before placing the batches in stability chamber. That test was used as initial time point for stability studies.
15.	Scientific justification for having different results at accelerated and real time conditions for batch T001.	Th initial stability results are same, the mistake was due to different results at batch release and initial stability since two different tests were performed.
16.	Scientific justification why test of water loss is not performed during the stability studies.	Firm has submitted report of water loss studies.
17.	Batch size of drug product stability batches in terms of no. of units.	1330 vial each

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Registration Board further decided that registration letter will be issued after submission of 7,500 fee for correction in specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.**

Date of submission of stability study data: 11-10-2021

STABILITY STUDY DATA

Manufacturer of API	**Esomeprazole:** Metrochem API Pvt Ltd Unit-I Plot No. 62/C/6, Pipeline Road, Phase-I IDA Jeedimetla Mandal, Malkajgiri Telangana India. **Naproxen:** Divi's Laboratories Limited, Unit-II, Annavaram Visakhapatnam Andhra Pradesh India		
API Lot No.	**Esomeprazole:** ESM/1906234 **Naproxen:** 2-M-B-2050818		
Description of Pack (Container closure system)	Alu-Alu blister foil with unit carton		
Stability Storage Condition	Accelerated: 40°C ± 2°C / 75% ± 5%RH Real Time: 30°C ± 2°C / 65% ± 5%RH		
Time Period	Accelerated: 6 Months Real Time: 6 Months		
Frequency	Real Time: 0,3 & 6 (months) Accelerated: 0,3, 6 (months)		
Batch No.	ENS-PB-02	ENS-PB-03	ENS-PB-04
Batch Size	1000 Tablet	1000 Tablet	1000 Tablet
Manufacturing Date	10-2020	10-2020	10-2020
Date of Initiation	02-11-2019	02-11-2019	02-11-2019
No. of Batches	03		

DOCUMENTS / DATA PROVIDED BY THE APPLICANT

1.	Reference of previous approval of applications with stability study data of the firm	Last PSI was conducted for Detox Tablet, for which the inspection was conducted on 31-12-2021 & 11-01-2021 and the report was presented in 293rd meeting of Registration Board. The report confirms following points: • The HPLC software is not 21CFR compliant. • Yes audit trail can be seen from the software and were shown by the firm on screen
2.	Certificate of Analysis of API from both API Manufacturer and Finished Product manufacturer.	Firm has submitted copy of COA of the drug substance from both API Manufacturer and Finished Product manufacturer.
3.	Method used for analysis of API from both API Manufacturer and Finished Product manufacturer	Firm has submitted copy of method used for analysis of API from both API Manufacturer and Finished Product manufacturer
4.	Stability study data of API from API manufacturer	**Esomeprazole:** Firm has submitted stability study data of 3 batches of drug substance as per refrigerating conditions **Naproxen:**

5.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Esomeprazole:** Firm has submitted copy of GMP certificate issued by DCA Telangana India issued on 22-04-2020 **Naproxen:** Firm has submitted copy of GMP certificate dated 26-06-2021 issued by DCA Government of Andhra Pradesh.
6.	Documents for the procurement of API with approval from DRAP (in case of import).	**Esomeprazole:** Firm has submitted copy of commercial invoice cleared dated 02-07-2019 specifying 15Kg API. The invoice is cleared by AD (I&E) DRAP. **Naproxen:** Firm has submitted copy of commercial invoice cleared dated 12-02-2019 specifying 6.5Kg API. The invoice is cleared by AD (I&E) DRAP.
7.	Protocols followed for conduction of stability study	Firm has submitted protocols followed for conduction of stability study
8.	Method used for analysis of FPP	Firm has provided detailed method for analysis of FPP
9.	Drug-excipients compatibility studies (where applicable)	Firm has used same excipients as that of the innovator's product therefore compatibility studies are not required
10.	Complete batch manufacturing record of three stability batches.	Firm has provided Batch Manufacturing Record for all the batches
11.	Record of comparative dissolution data (where applicable)	Not submitted
12.	Data of 03 batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted documents like chromatograms, raw data sheets, COA, summary data sheets for the stability studies
13.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	Submitted
14.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted
Evaluation by PEC:		
• CDP studies are not provided by the firm		
Decision of 333rd meeting of RB: Deferred for submission of comparative dissolution profile (CDP) studies with innovator / reference product.		
Response by the firm: Firm has submitted result of CDP studies conducted against innovator's product Vomovo Tablet		
Decision: Approved with Innovator's specifications. • **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.** • **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.** • **Firm shall submit 7,500/- fee for revision of specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.**		

624.	Name, address of Applicant / Marketing Authorization Holder	**M/s Radiant Pharma (Pvt) Ltd. 43-E, Sunder Industrial Estate, Sunder Raiwind Road Lahore.**
	Name, address of Manufacturing site.	M/s Neutro Pharma (Pvt) 9.5 K.M. Sheikhupura Road, Lahore.

	Status of the applicant	☐ Manufacturer ☐ Importer ☒ Is involved in none of the above (contract giver)
	GMP status of the firm	Firm has submitted copy of GMP certificate dated 11-07-2019 issued on the basis of inspection dated 28-02-2019.
	Evidence of approval of manufacturing facility	
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No 9833 dated 18-04-2022
	Details of fee submitted	PKR 50,000/- Dated 10-03-2021
	The proposed proprietary name / brand name	**C-LEXIN 500mg Capsule**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Capsule Contains: Cefalexin as Monohydrate…500mg
	Pharmaceutical form of applied drug	Hard gelatin capsule
	Pharmacotherapeutic Group of (API)	Cephalosposin
	Reference to Finished product specifications	BP
	Proposed Pack size	1x12's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	USFDA Approved
	For generic drugs (me-too status)	Ceporex Capsule by GSK
	Name and address of API manufacturer.	Pharmagen Limited 34-KM, Ferozepur Road Lahore.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real

		time stability data is conducted at 30°C ± 2°C / 65 ± 5% RH for 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for their product against Ceporex Capsule of GSK Firm has submitted results of CDP for their product against Ceporex Capsule of GSK
	Analytical method validation/verification of product	Firm has submitted report of verification studies of analytical method for the drug substance and product.

STABILITY STUDY DATA			
Manufacturer of API	Pharmagen Limited 34-KM, Ferozepur Road Lahore.		
API Lot No.	00214/023/2019		
Description of Pack (Container closure system)	Glass Vials		
Stability Storage Condition	Real time : 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 1, 2, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	001	002	003
Batch Size	5000 Capsule	5000 Capsule	5000 Capsule
Manufacturing Date	02-2020	02-2020	02-2020
Date of Initiation	17-02-2020	20-02-2020	24-02-2020
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	
3.	Documents for the procurement of API with approval from DRAP (in case of import).	
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	

6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Sr. No	Shortcomings communicated	Response by the firm
1.	Submit Balance fee i.e. 25,000 since only 50,000 fee is submitted.	
2.	Name of the applicant is mentioned as Neutro Pharma, while fee is submitted by Radiant Pharma. Correction is required in Form 5F along with full fee of registration.	
3.	Submit GMP certificate / inspection report of the drug product manufacturer conducted within a period of last 3 years	
4.	Submit evidence of approval of required section from Licensing Division DRAP.	
5.	Submit specifications and analytical procedures of the drug substance from both API manufacturer as well as drug product manufacturer in section 3.2.S.4.1 and 3.2.S.4.2	
6.	Submit verification studies of the analytical method of drug substance performed by drug product manufacturer in section 3.2.S.4.3.	
7.	Submit COA of reference standard actually used in the analysis of drug substance.	
	Justify why the composition is qualitatively different from the innovator's product	
11.	Submit comprehensive report of validation studies of the analytical method of drug product since you have submitted raw data without any summarized results.	
13.	Submit stability study data as per 6 points checklist provided in CTD guidance document in section 3.2.P.8.3 with proper tagging and data	
14.	Submit approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	
15.	Documents for the procurement of API with approval from DRAP (in case of import).	

Decision of 331st meeting of RB: Registration Board deferred the case for submission of reply to the above cited shortcomings.

Response by the firm:

Sr. No	Shortcomings	Response by the firm
1.	Submit Balance fee i.e. 25,000 since only 50,000 fee is submitted.	Firm has submitted 25000 fee
2.	Name of the applicant is mentioned as Neutro Pharma, while fee is submitted by Radiant Pharma. Correction is required in Form 5F along with full fee of registration.	Firm has revised Form 5F
3.	Submit GMP certificate / inspection report of the drug product manufacturer conducted within a period of last 3 years	Firm has submitted copy of GMP certificate issued on the basis of inspection dated 14-04-2022.
4.	Submit evidence of approval of required section from Licensing Division DRAP.	Firm has submitted copy of letter of renewal of DML dated 04-07-2022

		specifying Capsule (Cephalosporin) section.
5.	Submit specifications and analytical procedures of the drug substance from both API manufacturer as well as drug product manufacturer in section 3.2.S.4.1 and 3.2.S.4.2	Submitted by the firm
6.	Submit verification studies of the analytical method of drug substance performed by drug product manufacturer in section 3.2.S.4.3.	Submitted by the firm
7.	Submit COA of reference standard actually used in the analysis of drug substance.	Submitted by the firm
	Justify why the composition is qualitatively different from the innovator's product	Firm has sumitted evidence of MHRA approved product having similar qualitative composition
11.	Submit comprehensive report of validation studies of the analytical method of drug product since you have submitted raw data without any summarized results.	Submitted by the firm
13.	Submit stability study data as per 6 points checklist provided in CTD guidance document in section 3.2.P.8.3 with proper tagging and data	Submitted by the firm
14.	Submit approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate issued on the basis of inspection dated 18-11-2022.
15.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of sales tax invoice dated 19-05-2019 specifying 25Kg API.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

625.	Name, address of Applicant / Marketing Authorization Holder	**M/s Radiant Pharma (Pvt) Ltd. 43-E, Sunder Industrial Estate, Sunder Raiwind Road Lahore.**
	Name, address of Manufacturing site.	M/s Neutro Pharma (Pvt) 9.5 K.M. Sheikhupura Road, Lahore.
	Status of the applicant	☐ Manufacturer ☐ Importer ☒ Is involved in none of the above (contract giver)
	GMP status of the firm	Firm has submitted copy of GMP certificate dated 11-07-2019 issued on the basis of inspection dated 28-02-2019.

3.	Documents for the procurement of API with approval from DRAP (in case of import).	
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Sr. No	Shortcomings communicated	Response by the firm
1.	Submit Balance fee i.e. 25,000 since only 50,000 fee is submitted.	
2.	Name of the applicant is mentioned as Neutro Pharma, while fee is submitted by Radiant Pharma. Correction is required in Form 5F along with full fee of registration.	
3.	Submit GMP certificate / inspection report of the drug product manufacturer conducted within a period of last 3 years	
4.	Submit evidence of approval of required section from Licensing Division DRAP.	
5.	Submit specifications and analytical procedures of the drug substance from both API manufacturer as well as drug product manufacturer in section 3.2.S.4.1 and 3.2.S.4.2	
6.	Submit verification studies of the analytical method of drug substance performed by drug product manufacturer in section 3.2.S.4.3.	
7.	Submit COA of reference standard actually used in the analysis of drug substance.	
8.	Justify why the qualitative composition of applied product is different from that of innovator's product	
9.	Submit pharmaceutical equivalence studies against the innovator product.	
10.	The analytical method of drug product in section 3.2.P.5.2 specifies UV method for assay testing of drug product. Clarification is required in this regard.	
11.	Submit comprehensive report of validation studies of the analytical method of drug product since you have submitted raw data without any summarized results.	
12.	Justify the consistent increase in assay value i.e. from 100% at initial time point to 104% at 6th month for all batches.	
13.	Submit stability study data as per 6 points checklist provided in CTD guidance document in section 3.2.P.8.3 with proper tagging and data	
14.	Submit approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	
15.	Documents for the procurement of API with approval from DRAP (in case of import).	

Decision of 331st meeting of RB: Registration Board deferred the case for submission of reply to the above cited shortcomings.

Response by the firm:

Sr. No	Shortcomings communicated	Response by the firm
1.	Submit Balance fee i.e. 25,000 since only 50,000 fee is submitted.	Firm has submitted 25,000 fee
2.	Name of the applicant is mentioned as Neutro Pharma, while fee is submitted by Radiant Pharma. Correction is required in Form 5F along with full fee of registration.	Firm has submitted revised form 5F
3.	Submit GMP certificate / inspection report of the drug product manufacturer conducted within a period of last 3 years	Firm has submitted copy of GMP certificate issued on the basis of inspection dated 14-04-2022.
4.	Submit evidence of approval of required section from Licensing Division DRAP.	Firm has submitted copy of letter of renewal of DML dated 04-07-2022 specifying liquid injection ampoule / vial (General) section.
5.	Submit specifications and analytical procedures of the drug substance from both API manufacturer as well as drug product manufacturer in section 3.2.S.4.1 and 3.2.S.4.2	Submitted by the firm
6.	Submit verification studies of the analytical method of drug substance performed by drug product manufacturer in section 3.2.S.4.3.	Submitted by the firm
7.	Submit COA of reference standard actually used in the analysis of drug substance.	Submitted by the firm
8.	Justify why the qualitative composition of applied product is different from that of innovator's product	No justification is submitted
9.	Submit pharmaceutical equivalence studies against the innovator product.	Firm has submitted pharmaceutical equivalence against Dicloran injection
10.	The analytical method of drug product in section 3.2.P.5.2 specifies UV method for assay testing of drug product. Clarification is required in this regard.	No clarification is submitted instead a new method is submitted
11.	Submit comprehensive report of validation studies of the analytical method of drug product since you have submitted raw data without any summarized results.	Submitted by the firm
12.	Justify the consistent increase in assay value i.e. from 100% at initial time point to 104% at 6th month for all batches.	No justification is submitted
13.	Submit stability study data as per 6 points checklist provided in CTD guidance document in section 3.2.P.8.3 with proper tagging and data	Not submitted
14.	Submit approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Not submitted
15.	Documents for the procurement of API with approval from DRAP (in case of import).	Not submitted

Decision: Approved with Innovator's specifications.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Firm shall submit 7,500/- fee for revision of specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.**

DOCUMENTS / DATA PROVIDED BY THE APPLICANT

1.	Reference of previous approval of applications with stability study data of the firm	Last PSI was conducted for Eflozin Tablet, for which the inspection was conducted on 27-09-2019 and the report was presented in 292nd meeting of Registration Board. The report confirms following points: • The HPLC software is not 21CFR compliant. • Yes audit trail can be seen from the software and were shown by the firm on screen
2.	Certificate of Analysis of API from both API Manufacturer and Finished Product manufacturer.	Firm has submitted copy of COA of the drug substance from both API Manufacturer and Finished Product manufacturer.
3.	Method used for analysis of API from both API Manufacturer and Finished Product manufacturer	Firm has submitted copy of method used for analysis of API from both API Manufacturer and Finished Product manufacturer

4.	Stability study data of API from API manufacturer	**Empagliflozin:** Firm has submitted stability study data of 3 batches of drug substance as per zone II conditions **Metformin:** Firm has submitted stability study data of 3 batches of drug substance as per zone IV-B conditions
5.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Empagliflozin:** Firm has submitted copy of DML issued by CFDA China valid till 20-12-2022. **Metformin:** Firm has submitted copy of GMP certificate issued by CFDA China valid till 22-11-2021
6.	Documents for the procurement of API with approval from DRAP (in case of import).	**Empagliflozin:** Firm has submitted copy of commercial invoice cleared dated 30-01-2020 specifying 10Kg Empagliflozin. The invoice is cleared by AD (I&E) DRAP. **Metformin:** Firm has submitted copy of commercial invoice cleared dated 16-06-2020 specifying 3000Kg Metformin. The invoice is cleared by AD (I&E) DRAP.
7.	Protocols followed for conduction of stability study	Firm has submitted protocols followed for conduction of stability study
8.	Method used for analysis of FPP	Firm has provided detailed method for analysis of FPP
9.	Drug-excipients compatibility studies (where applicable)	Firm has used same excipients as that of the innovator's product therefore compatibility studies are not required
10.	Complete batch manufacturing record of three stability batches.	Firm has provided Batch Manufacturing Record for all the batches
11.	Record of comparative dissolution data (where applicable)	Firm has submitted CDP results of their product against Xenglu-Met tablet of Hilton Pharma
12.	Data of 03 batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted documents like chromatograms, raw data sheets, COA, summary data sheets for the stability studies
13.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	Submitted
14.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Evaluation by PEC:

- Submit stability study data of empagliflozin API as per zone IV-A conditions.

Decision of 333rd meeting of RB:

Deferred for following submissions:

- Stability study data of empagliflozin API as per zone IV-A conditions.
- Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.

Response by the firm:

- Firm has submitted stability study data of empagliflozin API as per zone IV-A conditions.
- However, GMP certificate of API manufacturer is not submitted

Decision: Approved with Innovator's specifications.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**

• **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.** • **Firm shall submit 7,500/- fee for revision of specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.**

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has referred to their last product specific inspection conducted for "Empazon 10mg & 25mg Tablet", which was conducted on 1st June, 2021, and was presented in 307th meeting of Registration Board. The report confirms following points: • The HPLC software is 21CFR Compliant. • Firm has demonstrated Audit trail reports of testing.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate issued by Drugs Control Administration Government of Andhra Pradesh dated 18-02-2022. The certificate was valid till 1 year. Firm has submitted copy of GMP certificate issued by Drugs Control Administration Government of Andhra Pradesh India dated 20-06-2022. The certificate is valid for 3 years.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice cleared by AD (I&E) DRAP dated 24-02-2022. The invoice specifies 1kg Roxadustat.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted record of testing of all batches along with raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted audit trail reports
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC[3]:

Sr. No	Shortcomings communicated	Response by the firm
1.	Specify the exact polymorphic form of the drug substance used in the development of this product.	
2.	Specify the concentration of each solution used in the verification studies of the analytical method of drug substance.	
3.	Justify the results of CDP studies in which the	

	drug product shows more than 85% release in 0.1N HCl and 4.5pH buffer in 30 minutes, since the innovator's product review reveals that very less drug release is observed in 0.1N HCl and 4.5 buffer.	
4.	Provide image / snapshot of the pack of the reference product against which pharmaceutical equivalence and CDP studies were conducted.	
5.	Provide scientific rationale for selection of dissolution parameters and acceptance criteria.	
6.	Provide BMR for the three stability batches.	

Decision of 330th meeting of RB: Registration Board deferred the case for submission of reply to the above cited shortcomings and evaluation by PE&R Division.

Response by the firm:

Sr. No	Shortcomings	Response by the firm
1.	Specify the exact polymorphic form of the drug substance used in the development of this product.	Crystalline Form A
2.	Specify the concentration of each solution used in the verification studies of the analytical method of drug substance.	Submitted by the firm
3.	Justify the results of CDP studies in which the drug product shows more than 85% release in 0.1N HCl and 4.5pH buffer in 30 minutes, since the innovator's product review reveals that very less drug release is observed in 0.1N HCl and 4.5 buffer.	For the performance of CDP studies two standard solutions are prepared by same media and established dissolution method submitted is with same media which show release more than 85% in 30 mins. Updated CDP report which is calculated against established method standard solution show result less than release.
4.	Provide image / snapshot of the pack of the reference product against which pharmaceutical equivalence and CDP studies were conducted.	Submitted by the firm
5.	Provide scientific rationale for selection of dissolution parameters and acceptance criteria.	Selected based on USP Chapter <711> and chapter <1094>
6.	Provide BMR for the three stability batches.	Submitted by the firm

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65 ± 5% RH for 24 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process

		control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for the quality tests for their product against Evrenzo tablet 50mg manufactured by M/s Astellas Pharma Ltd. Firm has submitted results of CDP for their product against Evrenzo tablet 50mg manufactured by M/s Astellas Pharma Ltd in 3 dissolution medium.
	Analytical method validation/verification of product	Firm has submitted verification studies of the drug substance and the drug product.

STABILITY STUDY DATA

Manufacturer of API	Dr. Reddy's Laboratories Limited Chemical Technical operations Unit-VI, APIIC Industrial Estate, Pydibhimavaram village, Ranasthalam Mandal, Srikakulam District 532409, Andhra Pradesh, India.		
API Lot No.	AFPH007658		
Description of Pack (Container closure system)	Alu-Alu blister		
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	RDM-001	RDM-002	RDM-003
Batch Size	1500 Tablet	1500 Tablet	1500 Tablet
Manufacturing Date	06-2022	06-2022	06-2022
Date of Initiation	06-06-2022	06-06-2022	06-06-2022
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has referred to their last product specific inspection conducted for "Empazon 10mg & 25mg Tablet", which was conducted on 1st June, 2021, and was presented in 307th meeting of Registration Board. The report confirms following points: • The HPLC software is 21CFR Compliant. • Firm has demonstrated Audit trail reports of testing.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate issued by Drugs Control Administration Government of Andhra Pradesh dated 18-02-2022. The certificate was valid till 1 year. Firm has submitted copy of GMP certificate issued by Drugs Control Administration Government of Andhra Pradesh India dated 20-06-2022. The certificate is valid for 3 years.

3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice cleared by AD (I&E) DRAP dated 24-02-2022. The invoice specifies 1kg Roxadustat.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted record of testing of all batches along with raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted audit trail reports
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC[3]:

-

Sr. No	Shortcomings communicated	Response by the firm
1.	Specify the exact polymorphic form of the drug substance used in the development of this product.	
2.	Specify the concentration of each solution used in the verification studies of the analytical method of drug substance.	
3.	Justify the results of CDP studies in which the drug product shows more than 85% release in 0.1N HCl and 4.5pH buffer in 30 minutes, since the innovator's product review reveals that very less drug release is observed in 0.1N HCl and 4.5 buffer.	
4.	Provide image / snapshot of the pack of the reference product against which pharmaceutical equivalence and CDP studies were conducted.	
5.	Provide scientific rationale for selection of dissolution parameters and acceptance criteria.	
6.	Provide BMR for the three stability batches.	

Decision of 330th meeting of RB: Registration Board deferred the case for submission of reply to the above cited shortcomings and evaluation by PE&R Division.

Response by the firm:

Sr. No	Shortcomings	Response by the firm
1.	Specify the exact polymorphic form of the drug substance used in the development of this product.	Crystalline Form A
2.	Specify the concentration of each solution used in the verification studies of the analytical method of drug substance.	Submitted by the firm
3.	Justify the results of CDP studies in which the drug product shows more than 85% release in 0.1N HCl and 4.5pH buffer in 30 minutes, since the innovator's product review reveals that very less drug release is observed in 0.1N HCl and 4.5 buffer.	For the performance of CDP studies two standard solutions are prepared by same media and established dissolution method submitted is with same media which show release more than 85% in 30 mins. Updated CDP report which is calculated against established method standard solution show result less than release.
4.	Provide image / snapshot of the pack of the reference product against which pharmaceutical equivalence and CDP studies	Submitted by the firm

	were conducted.	
5.	Provide scientific rationale for selection of dissolution parameters and acceptance criteria.	Selected based on USP Chapter <711> and chapter <1094>
6.	Provide BMR for the three stability batches.	Submitted by the firm

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Evaluation by PEC:

Sr. No	Shortcomings communicated	Response by the firm
1.	Evidence of approval of applied formulation in reference regulatory authorities which were adopted by Registration Board in its 275th meeting	
2.	Submit label claim of applied product in line with the reference product along with submission of requiste fee.	
3.	Submit specifications as well as analytical method of the drug substance from the drug product manufacturer in section 3.2.S.4.1 and 3.2.S.4.2.	
4.	Submit data in section 3.2.S.4.3 as per the guidance document approved by Registration Board	
5.	Submit COA of relevant batch of drug substance used in product development and	

	stability studies from both drug substance as well as drug product manufacturer in section 3.2.S.4.4.	
6.	Specify whether the drug substance used is compacted or micronized	
7.	Submit COA of reference standard used in the analysis of drug substance.	
8.	Submit drug excipient compatibility studies, since your qualitative composition is different from that of reference product.	
9.	Submit report of pharmaceutical equivalence and CDP studies.	
	Submit preservative effectiveness studies	
10	Submit microbial attributes of the drug product	
10.	Submit compatibility studies in section 3.2.P.2.6	
11.	Justify why your analytical procedure is different from USP monograph.	
12	Submit stability study data of drug product in section 3.2.P.8 as per the 6 points checklist specified in the CTD guidance document. Moreover, the stability data shall be submitted in proper sequence with tagging to differentiate between data of each time point and batch.	
13	Submit BMR of three stability batches.	

Decision of 335th meeting of Registration Board:
Registration Board deferred the case for submission of reply to the above cited shortcomings.

Response by the firm:

Sr. No	Reason for deferment	Response by the firm
1.	Evidence of approval of applied formulation in reference regulatory authorities which were adopted by Registration Board in its 275th meeting	Firm has submitted reference of Duricef 125mg/5ml suspension from USFDA. The product is discontinued, however the drugs@FDA database specifies that **Federal Register determination that product was not discontinued or withdrawn for safety or effectiveness reasons** However the FDA approved product contains cefadroxil hemihydrate instead of cefadroxil monohydrate.
2.	Submit label claim of applied product in line with the reference product along with submission of requiste fee.	Firm has submitted revised label claim along with submission of 30,000 fee for correction as under: Each 5ml Reconstituted Suspension Contains: Cefadroxil as Monohydrate…125mg
3.	Submit specifications as well as analytical method of the drug substance from the drug product manufacturer in section 3.2.S.4.1 and 3.2.S.4.2.	Submitted.
4.	Submit data in section 3.2.S.4.3 as per the guidance document approved by Registration Board	Submitted
5.	Submit COA of relevant batch of drug substance used in product development and stability studies from both	Firm has submitted COA of Batch No 002230/050/2020 from drug substance

	drug substance as well as drug product manufacturer in section 3.2.S.4.4.	manufacturer and drug product manufacturer.
6.	Specify whether the drug substance used is compacted or micronized	Cefadroxil micronized
7.	Submit COA of reference standard used in the analysis of drug substance.	Submitted.
8.	Submit drug excipient compatibility studies, since your qualitative composition is different from that of reference product.	Submitted.
9.	Submit report of pharmaceutical equivalence and CDP studies.	Firm has submitted pharmaceutical equivalence and CDP studies against Duricef suspension.
	Submit preservative effectiveness studies	Submitted.
10	Submit microbial attributes of the drug product	Submitted.
10.	Submit compatibility studies in section 3.2.P.2.6	Firm has submitted drug-excipient compatibility studies **instead** of compatibility studies with the diluent in section 3.2.P.2.6
11.	Justify why your analytical procedure is different from USP monograph.	Firm has submitted their method and claimed it to be exactly as per USP however the column used by firm is 25cm x 4.6mm x 5um while USP recommends 25cm x 4mm.
12	Submit stability study data of drug product in section 3.2.P.8 as per the 6 points checklist specified in the CTD guidance document. Moreover, the stability data shall be submitted in proper sequence with tagging to differentiate between data of each time point and batch.	Submitted by the firm. Firm has also submitted following: 1. Copy of GMP certificate of API manufacturer issued on the basis of inspection dated 08-01-2019. 2. Firm has submitted copy of proforma invoice dated 30-04-2021. 3. Copy of HPLC compliance certificate 4. Record of digital data logger.
13	Submit BMR of three stability batches.	Submitted.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

4.	Submit COA of relevant batch of drug substance used in product development and stability studies from	

	both drug substance as well as drug product manufacturer in section 3.2.S.4.4.	
5.	Specify whether the drug substance used is compacted or micronized	
6.	Submit COA of reference standard used in the analysis of drug substance.	
7.	Submit drug excipient compatibility studies, since your qualitative composition is different from that of reference product.	
8.	Submit report of pharmaceutical equivalence and CDP studies.	
9.	Submit preservative effectiveness studies	
	Submit microbial attributes of the drug product	
10	Submit compatibility studies in section 3.2.P.2.6	
10.	Justify why your analytical procedure is different from USP monograph.	
11.	Submit stability study data of drug product in section 3.2.P.8 as per the 6 points checklist specified in the CTD guidance document. Moreover, the stability data shall be submitted in proper sequence with tagging to differentiate between data of each time point and batch.	
12	Submit BMR of three stability batches.	

Decision of 335th meeting of Registration Board: Registration Board deferred the case for submission of reply to the above cited shortcomings.

Response by the firm:

Sr. No	Reason for deferment	Response by the firm
1.	Submit label claim of applied product in line with the reference product along with submission of requiste fee.	Firm has submitted revised label claim along with submission of 30,000 fee for correction as under: Each 5ml Reconstituted Suspension Contains: Cefadroxil as Monohydrate…250mg
2.	Submit specifications as well as analytical method of the drug substance from the drug product manufacturer in section 3.2.S.4.1 and 3.2.S.4.2.	Submitted.
3.	Submit data in section 3.2.S.4.3 as per the guidance document approved by Registration Board	Submitted
4.	Submit COA of relevant batch of drug substance used in product development and stability studies from both drug substance as well as drug product manufacturer in section 3.2.S.4.4.	Firm has submitted COA of Batch No 002230/050/2020 from drug substance manufacturer and drug product manufacturer.
5.	Specify whether the drug substance used is compacted or micronized	Cefadroxil micronized
6.	Submit COA of reference standard used in the analysis of drug substance.	Submitted.
7.	Submit drug excipient compatibility studies, since your qualitative composition is different from that of reference product.	Submitted.
8.	Submit report of pharmaceutical equivalence and CDP studies.	Firm has submitted pharmaceutical equivalence and CDP studies against Duricef suspension.
9.	Submit preservative effectiveness studies	Submitted.
	Submit microbial attributes of the drug product	Submitted.

10	Submit compatibility studies in section 3.2.P.2.6	Firm has submitted drug-excipient compatibility studies **instead** of compatibility studies with the diluent in section 3.2.P.2.6
10.	Justify why your analytical procedure is different from USP monograph.	Firm has submitted their method and claimed it to be exactly as per USP however the column used by firm is 25cm x 4.6mm x 5um while USP recommends 25cm x 4mm.
11.	Submit stability study data of drug product in section 3.2.P.8 as per the 6 points checklist specified in the CTD guidance document. Moreover, the stability data shall be submitted in proper sequence with tagging to differentiate between data of each time point and batch.	Submitted by the firm. Firm has also submitted following: 1. Copy of GMP certificate of API manufacturer issued on the basis of inspection dated 08-01-2019. 2. Firm has submitted copy of proforma invoice dated 30-04-2021. 3. Copy of HPLC compliance certificate 4. Record of digital data logger.
12	Submit BMR of three stability batches.	Submitted.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

	Submit microbial attributes of the drug product	Submitted
10	Submit compatibility studies in section 3.2.P.2.6	Firm has submitted drug excipient compatibility studies **instead** of compatibility with recommended diluent.

10.	Submit stability study data of drug product in section 3.2.P.8 as per the 6 points checklist specified in the CTD guidance document. Moreover, the stability data shall be submitted in proper sequence with tagging to differentiate between data of each time point and batch.	Submitted by the firm. Firm has also submitted following: 1. Copy of GMP certificate of API manufacturer issued on the basis of inspection dated 08-01-2019. 2. Firm has submitted copy of proforma invoice dated 30-04-2021. 3. Copy of HPLC compliance certificate 4. Record of digital data logger.
11.	Submit BMR of three stability batches.	Submitted.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

637.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Curatech Pharma pvt Ltd 35-Km, Multan Road, Lahore**

Description of Pack (Container closure system)	Glass bottle		
Stability Storage Condition	Real time : 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	TR-CEP-15	TR-CEP-16	TR-CEP-17
Batch Size	600 bottles	600 bottles	600 bottles
Manufacturing Date	07-2021	07-2021	07-2021
Date of Initiation	26-07-2021	26-07-2021	26-07-2021
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate of Pharmagen issued on the basis of inspection dated 22-06-2020.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	

Evaluation by PEC:

Sr. No	Shortcomings communicated	Response by the firm
1.	Evidence of approval of applied formulation in reference regulatory authorities which were adopted by Registration Board in its 275th meeting	
2.	Submit label claim of applied product in line with the reference product along with submission of requiste fee.	
3.	The method of analysis of the drug substance of Pharmagen Limited submitted in section 3.2.S.4.2 is different from BP as well as USP monograph. Justification is required in this regard.	
4.	Submit specifications as well as analytical method of the drug substance from the drug product manufacturer in section 3.2.S.4.1 and 3.2.S.4.2.	
5.	Submit data in section 3.2.S.4.3 as per the guidance document approved by Registration Board	
6.	Submit COA of relevant batch of drug substance used in product development and stability studies from both drug substance as well as drug product manufacturer in section 3.2.S.4.4.	
7.	Specify whether the drug substance used is cephradine or cephradine monohydrate	
8.	Justify how cephradine plain is used to manufacture cephradine suspension instead of using cephradine micronized.	
9.	Submit COA of cephalexin reference standard which is also required in the analysis of drug substance.	
	Justify how same stability study data of cephradine API used for manufacturing of Injection and capsule is used.	
10	Submit drug excipient compatibility studies, since your qualitative composition is different from that of reference product.	
10.	Submit report of pharmaceutical equivalence studies.	
11.	Submit compatibility studies in section 3.2.P.2.6	
12	Justify why your analytical procedure is different from USP monograph.	

13	Submit stability study data of drug product in section 3.2.P.8 as per the 6 points checklist specified in the CTD guidance document. Moreover, the stability data shall be submitted in proper sequence with tagging to differentiate between data of each time point and batch.	
14	Submit BMR of three stability batches.	

Decision of 335th meeting of Registration Board:
Registration Board deferred the case for submission of reply to the above cited shortcomings.

Response by the firm:

Sr. No	Shortcomings communicated	Response by the firm
1.	Evidence of approval of applied formulation in reference regulatory authorities which were adopted by Registration Board in its 275th meeting	Firm has submitted that Cephradine 125mg/5ml Suspension is registered / Approved in USFDA Orange Book Edition 44. However, this product is listed under **Discontinued Drug Product List**.
2.	Submit label claim of applied product in line with the reference product along with submission of requiste fee.	Firm has submitted revised label claim along with submission of 30,000 fee for correction as under: Each 5ml of reconstituted suspension contains: Cephradine as Monohydrate…….125mg
3.	The method of analysis of the drug substance of Pharmagen Limited submitted in section 3.2.S.4.2 is different from BP as well as USP monograph. Justification is required in this regard.	Our API manufacturer is testing the drug substance using both USP and BP. Firm has again submitted its specifications.
4.	Submit specifications as well as analytical method of the drug substance from the drug product manufacturer in section 3.2.S.4.1 and 3.2.S.4.2.	Submitted.
5.	Submit data in section 3.2.S.4.3 as per the guidance document approved by Registration Board	Submitted.
6.	Submit COA of relevant batch of drug substance used in product development and stability studies from both drug substance as well as drug product manufacturer in section 3.2.S.4.4.	Firm has submitted copy of COA of Batch # 00203/081/2021 from both API manufacturer as well as product manufacturer.
7.	Specify whether the drug substance used is cephradine or cephradine monohydrate	Cephradine monohydrate
8.	Justify how cephradine plain is used to manufacture cephradine suspension instead of using cephradine micronized.	We have used cephradine micronized.
9.	Submit COA of cephalexin reference standard which is also required in the analysis of drug substance.	Submitted.
10	Justify how same stability study data of cephradine API used for manufacturing of Injection and capsule is used.	Seprate stability data of both substances is submitted by the firm.
10.	Submit drug excipient compatibility studies, since your qualitative composition is different from that of reference product.	Submitted.
11.	Submit report of pharmaceutical equivalence studies.	Firm has submitted pharmaceutical equivalence along with Velosef suspension.
12	Submit compatibility studies in section 3.2.P.2.6	Firm has submitted drug-excipient compatibility studies instead of compatibility studies with recommended diluent.

13	Justify why your analytical procedure is different from USP monograph.	We are testing as per USP.
14	Submit stability study data of drug product in section 3.2.P.8 as per the 6 points checklist specified in the CTD guidance document. Moreover, the stability data shall be submitted in proper sequence with tagging to differentiate between data of each time point and batch.	Submitted by the firm. Firm has also submitted following: 1. Copy of GMP certificate of API manufacturer issued on the basis of inspection dated 08-01-2019. 2. Firm has submitted copy of proforma invoice dated 30-04-2021. 3. Copy of HPLC compliance certificate 4. Record of digital data logger.
15	Submit BMR of three stability batches.	Submitted.

Decision: The Board deferred that case for submission of valid RRA reference of applied product or submission of following as per decidion of 179th meeting of the Authority;

i. **Evidence that the product/ formulation has never been withdrawn/ deregistered/ unlicensed on safety reasons by any RRA/ML4 NRA.**
ii. **Evidence that the manufacturer has established pharmacovigilance verified by the Division of Pharmacy Services of DRAP according to the procedures/ guidelines of DRAP.**
iii. **Evidence that the international pharmacovigilance data of subject product/ formulation do not show any critical ADR reports according to the UPSALA database.**
iv. **Evidence that the product maintains the characteristics on which the marketing authorization was granted and are normally in the form of post-marketing surveillance, or assessment of therapeutic value or treatment strategies.**

	Justify how same stability study data of cephradine API used for manufacturing of Injection and capsule is used.	Seprate stability data of both substances is submitted by the firm.
8.	Submit drug excipient compatibility studies, since your qualitative composition is different from that of reference product.	Submitted.
9.	Submit report of pharmaceutical equivalence as well as CDP studies.	Firm has submitted pharmaceutical equivalence and CDP studies along with Velosef Capsule.
10	Justify why your analytical procedure is different from USP monograph.	We are testing as per USP.
10.	Submit stability study data of drug product in section 3.2.P.8 as per the 6 points checklist specified in the CTD guidance document. Moreover, the stability data shall	Submitted by the firm. Firm has also submitted following:

	be submitted in proper sequence with tagging to differentiate between data of each time point and batch.	1. Copy of GMP certificate of API manufacturer issued on the basis of inspection dated 08-01-2019. 2. Firm has submitted copy of proforma invoice dated 30-04-2021. 3. Copy of HPLC compliance certificate 4. Record of digital data logger.
11.	Submit BMR of three stability batches.	Submitted.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Manufacturing Date	06-2021	06-2021	06-2021
Date of Initiation	02-07-2021	02-07-2021	02-07-2021
No. of Batches	03		
DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA			

1.	Reference of previous approval of applications with stability study data of the firm (if any)	
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate of Pharmagen issued on the basis of inspection dated 22-06-2020.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	

Evaluation by PEC:

Sr. No	Shortcomings communicated	Response by the firm
	Submit label claim of applied product in line with the reference product along with submission of requiste fee.	
1.	The method of analysis of the drug substance of Pharmagen Limited submitted in section 3.2.S.4.2 is different from BP as well as USP monograph. Justification is required in this regard.	
2.	Submit specifications as well as analytical method of the drug substance from the drug product manufacturer in section 3.2.S.4.1 and 3.2.S.4.2.	
3.	Submit data in section 3.2.S.4.3 as per the guidance document approved by Registration Board	
4.	Submit COA of relevant batch of drug substance used in product development and stability studies from both drug substance as well as drug product manufacturer in section 3.2.S.4.4.	
5.	Specify whether the drug substance used is cephradine or cephradine monohydrate	
6.	Justify how cephradine plain is used to manufacture cephradine capsule instead of using cephradine compacted.	
7.	Submit COA of cephalexin reference standard which is also required in the analysis of drug substance.	
	Justify how same stability study data of cephradine API used for manufacturing of Injection and capsule is used.	
8.	Submit drug excipient compatibility studies, since your qualitative composition is different from that of reference product.	
9.	Submit report of pharmaceutical equivalence as well as CDP studies.	
10	Justify why your analytical procedure is different from USP monograph.	
10.	Submit stability study data of drug product in section 3.2.P.8 as per the 6 points checklist specified in the CTD guidance document. Moreover, the stability data shall be submitted in proper sequence with tagging to differentiate between data of each time point and batch.	

11.	Submit BMR of three stability batches.	

Decision of 335th meeting of Registration Board:
Registration Board deferred the case for submission of reply to the above cited shortcomings.

Response by the firm:

Sr. No	Shortcomings communicated	Response by the firm
	Submit label claim of applied product in line with the reference product along with submission of requiste fee.	Firm has submitted revised label claim along with submission of 30,000 fee for correction as under: Each capsule contains: Cephradine as Monohydrate…….500mg
1.	The method of analysis of the drug substance of Pharmagen Limited submitted in section 3.2.S.4.2 is different from BP as well as USP monograph. Justification is required in this regard.	Our API manufacturer is testing the drug substance using both USP and BP. Firm has again submitted its specifications.
2.	Submit specifications as well as analytical method of the drug substance from the drug product manufacturer in section 3.2.S.4.1 and 3.2.S.4.2.	Submitted.
3.	Submit data in section 3.2.S.4.3 as per the guidance document approved by Registration Board	Submitted.
4.	Submit COA of relevant batch of drug substance used in product development and stability studies from both drug substance as well as drug product manufacturer in section 3.2.S.4.4.	Firm has submitted copy of COA of Batch # 00204/081/2021 from both API manufacturer as well as product manufacturer.
5.	Specify whether the drug substance used is cephradine or cephradine monohydrate	Cephradine monohydrate
6.	Justify how cephradine plain is used to manufacture cephradine capsule instead of using cephradine compacted.	We have used cephradine compacted.
7.	Submit COA of cephalexin reference standard which is also required in the analysis of drug substance.	Submitted.
	Justify how same stability study data of cephradine API used for manufacturing of Injection and capsule is used.	Seprate stability data of both substances is submitted by the firm.
8.	Submit drug excipient compatibility studies, since your qualitative composition is different from that of reference product.	Submitted.
9.	Submit report of pharmaceutical equivalence as well as CDP studies.	Firm has submitted pharmaceutical equivalence and CDP studies along with Velosef Capsule.

Description of Pack (Container closure system)	Glass vials
Stability Storage Condition	Real time : 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH
Time Period	Real time: 6 months Accelerated: 6 months
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)

Batch No.	TR-CEP-10	TR-CEP-11	TR-CEP-12
Batch Size	1100 vials	1100 vials	1100 vials
Manufacturing Date	07-2021	07-2021	07-2021
Date of Initiation	09-07-2021	09-07-2021	09-07-2021
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate of Pharmagen issued on the basis of inspection dated 22-06-2020.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not submitted
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Evaluation by PEC:

Sr. No	Shortcomings communicated	Response by the firm
1.	Submit label claim of applied product in line with the reference product along with submission of requiste fee.	
2.	Submit valid GMP certificate / inspection report of the srug product manufacturer.	
3.	Submit data in section 3.2.S.4.1 and 3.2.S.4.2 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required."	
4.	Specify whether the drug substance is cephradine or cephradine monohydrate.	
5.	Submit verification studies of analytical method of drug substance performed by drug product manufacturer.	
6.	Submit COA of relevant batch of API from API manufacturer as well as from drug product manufacturer.	
7.	Submit COA of reference standard used in the analysis of drug substance.	
8.	Submit evidence of requisite storage facility to store cephradine at refrigerated conditions within the raw material warehouse.	
9.	Submit data in section 3.2.P.1 as per CTD guidance document.	

10.	Submit pharmaceutical equivalence in section 3.2.P.2.2.1	
11.	Submit data of compatibility of the drug product in section 3.2.P.2.5.	
12.	Submit microbiological attributes in section 3.2.P.2.6.	
13.	Submit proper fill weight per vial for the applied product and also complete calculation how that fill weight is equivalent to the content of cephradine as per the label claim.	
14.	Submit stability study data of drug product in section 3.2.P.8 as per the 6 points checklist specified in the CTD guidance document. Moreover, the stability data shall be submitted in proper sequence with tagging to differentiate between data of each time point and batch.	
15.	Submit BMR of three stability batches.	

Decision of 335th meeting of Registration Board:
Registration Board deferred the case for submission of reply to the above cited shortcomings.

Response by the firm:

Sr. No	Reason for deferment	Response by the firm
1.	Submit label claim of applied product in line with the reference product along with submission of requiste fee.	Firm has submitted revised label claim along with submission of 30,000 fee for correction as under: Each vial contains: Cephradine (with L-arginine) …….1g
2.	Submit valid GMP certificate / inspection report of the drug product manufacturer.	Firm has submitted copy of GMP certificate issued on the basis of inspection dated 19-02-2020.
3.	Submit data in section 3.2.S.4.1 and 3.2.S.4.2 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required."	Submitted.
4.	Specify whether the drug substance is cephradine or cephradine monohydrate.	Our drug substance is Cephradine (with L-arginine)
5.	Submit verification studies of analytical method of drug substance performed by drug product manufacturer.	Submitted.
6.	Submit COA of relevant batch of API from API manufacturer as well as from drug product manufacturer.	Firm has submitted COA of Batch # 00401/004/2021 from both API manufacturer as well as product manufacturer.
7.	Submit COA of reference standard used in the analysis of drug substance.	Submitted.
8.	Submit evidence of requisite storage facility to store cephradine at refrigerated conditions within the raw material warehouse.	Firm has submitted copy of purchase invice from Varioline Intercool and data logger record.
9.	Submit data in section 3.2.P.1 as per CTD guidance document.	Submitted.
10.	Submit pharmaceutical equivalence in section 3.2.P.2.2.1	Firm has submitted pharmaceutical equivalence studies with Velosef Injection.

	Name, address of Manufacturing site.	M/s Mass Pharma Pvt Ltd. 17-km, Ferozepur Road, Lahore
	Status of the applicant	☐ Manufacturer ☐ Importer ☒ Is involved in none of the above (contract giver)
	GMP status of the firm	Firm has submitted copy of GMP certificate of M/s Mass Pharma dated 14-12-2020 based on the inspection dated 23-09-2020.

	Evidence of approval of manufacturing facility	Firm has submitted copy of letter of grant of additional section to M/s Mass Pharma dated 18-12-2017. The letter specifies Soft gelatin capsule section.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 31571: 03-11-2022
	Details of fee submitted	PKR 75,000/-: 06-09-2022
	The proposed proprietary name / brand name	**MCUTANE 20mg Softgel Capsule**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Softgel Capsule Contains: Isotretinoin…20mg
	Pharmaceutical form of applied drug	Sterile white to off white powder filled in transparent glass vials
	Pharmacotherapeutic Group of (API)	Retinoids
	Reference to Finished product specifications	BP
	Proposed Pack size	30's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	USFDA Approved
	For generic drugs (me-too status)	Arynoin capsule by Mass pharma
	Name and address of API manufacturer.	Chongqing Huapont Schengchem Pharmaceutical Co. Ltd., No. 666 Rongjun Road, Nanjin Avenue Hechuan District Chongqing China
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for both drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development,

		manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for the quality tests for their product against the comparator i.e. Maxinoin capsule by Maxitech pharma Firm has submitted result of CDP studies against the comparator i.e. Maxinoin capsule by Maxitech pharma
	Analytical method validation/verification of product	Firm has submitted report of verification of analytical method for the drug substance. Firm has submitted report of verification of analytical method for the drug product.

STABILITY STUDY DATA

Manufacturer of API	Chongqing Huapont Schengchem Pharmaceutical Co. Ltd., No. 666 Rongjun Road, Nanjin Avenue Hechuan District Chongqing China		
API Lot No.	20210117		
Description of Pack (Container closure system)	Alu-alu blister		
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	C237	C285	C293
Batch Size	48195 Capsule	48195 Capsule	48195 Capsule
Manufacturing Date	01-2021	03-2021	03-2021
Date of Initiation			
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (No. CQ20180013) issued by CFDA China. The certificate is valid till 06-06-2023
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice cleared dated 11-02-2021 specifying import of 20Kg Isotretinoin. The invoice is cleared by AD (I&E) DRAP.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record for stability batches
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	NA

6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Sr. No	Shortcomings communicated	Response by the firm
1.	Submit API stability studies data as per zone IV-A conditions.	
2.	Submit data of initiation of stability studies of all batches	
3.	Provide COA of reference standard used in the stability studies.	

Decision of 331st meeting of Registration Board:
Registration Board deferred the case for submission of reply to the above cited shortcomings.

Response by the firm:

Sr. No	Shortcomings communicated	Response by the firm
1.	Submit API stability studies data as per zone IV-A conditions.	Submitted
2.	Submit data of initiation of stability studies of all batches	Submitted
3.	Provide COA of reference standard used in the stability studies.	The BP method used A (1%, 1cm) value and no reference standard is used due to degradable nature of isotretinoin within months.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

		manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted pharmaceutical equivalence of their product against the innovator's product Edarbi 40mg Tablet Firm has submitted CDP results of their product against the innovator's product Edarbi Tablet 40mg in 3 dissolution medias.
	Analytical method validation/verification of product	Firm has submitted analytical method validation study reports for drug substance as well as drug product.

STABILITY STUDY DATA			
Manufacturer of API	CTX Lifesciences Pvt Ltd. Block No. 251-252, Sachin Magdalla Road G.I.D.C, Sachin Surat Gujrat India		
API Lot No.	21AK000004		
Description of Pack (Container closure system)	Alu-alu Blister		
Stability Storage Condition	Real time : 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	RD/PR21-091/T1/S1	RD/PR21-091/T1/S2	RD/PR21-091/T1/S2
Batch Size	2000 Tablet	2000 Tablet	2000 Tablet
Manufacturing Date	09-2021	09-2021	09-2021
Date of Initiation	08-09-2021	08-09-2021	08-09-2021
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of Retention of License (No. G/25/1723) dated 29-01-2021 issued by Food and Drugs Control Administration Gujrat State India. The certificate specifies that the license to manufacture has been retained from 24/01/2021 to 23/01/2026.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record for product testing.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted certificate of 21 CFR compliance for the HPLC system

6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Sr. No	Shortcomings communicated	Response by the firm
1.	Submit data in section 3.2.S.4.1 and 3.2.S.4.2 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required."	
2.	The innovator's product recommends that the storage conditions for drug substance is from 2 to 8 degree and the same is also mentioned in section 3.2.S.7.1, however the stability study data of drug substance is conducted as per Zone IV-A conditions. Clarification is required in this regard.	
3.	As per the product review documents issued by USFDA, the drug product is practically insoluble in acidic and neutral aqueous solutions and is unstable in aqueous solution between pH 1 and pH 7. Data from other manufacturers as well as innovator's product shows very less drug release in 0.1 N HCl as well as 4.5 phosphate acetate buffer. Justify your results showing more than 60% results at 45 minutes in both of these medias. Clarification is required in this regard.	
4.	Justify the dissolution specifications NLT 75%(Q) without specifying any time.	
5.	Your standard solution concentration is 0.06mg/ml, while the limit of quantitation is 0.13417mg/ml. Justify how your standard solution can be quantified when its concentration is far below the limit of quantitation.	
6.	Submit readable copy of AD attested commercial invoice or clearance certificate	
7.	Submit valid copy of GMP certificate of the drug substance manufacturer.	

Decision of 335th meeting of Registration Bord:
Registration Board deferred the case for submission of reply to the above cited shortcomings.

Response by the firm:

Sr. No	Reason for deferment	Response by the firm
1.	Submit data in section 3.2.S.4.1 and 3.2.S.4.2 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug	Submitted

	substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required."	
2.	The innovator's product recommends that the storage conditions for drug substance is from 2 to 8 degree and the same is also mentioned in section 3.2.S.7.1, however the stability study data of drug substance is conducted as per Zone IV-A conditions. Clarification is required in this regard.	Upon Query to API manufacturer, it was informed that stability studies was performed on 5°C± 3°C & 25°C ± 2°C, 60% RH ± 5% accordingly the storage condition is 2-8°C. However, there was an error in stability reports. Firm has now submitted new stability data conducted at 5°C± 3°C & 25°C ± 2°C, 60% RH ± 5%
3.	As per the product review documents issued by USFDA, the drug product is practically insoluble in acidic and neutral aqueous solutions and is unstable in aqueous solution between pH 1 and pH 7. Data from other manufacturers as well as innovator's product shows very less drug release in 0.1 N HCl as well as 4.5 phosphate acetate buffer. Justify your results showing more than 60% results at 45 minutes in both of these medias. Clarification is required in this regard.	Formulation contain mannitol which is solublizer for poorly water soluble compounds, mannitol is the substance giving enhancing release profile. Moreover same released profile is observed with innovator product i.e. Edarbi. Mannitol is also used by the Innovator's product in its formulation.
4.	Justify the dissolution specifications NLT 75%(Q) without specifying any time.	Firm has now submitted testing method which contains 45 minutes time point for dissolution.
5.	Your standard solution concentration is 0.06mg/ml, while the limit of quantitation is 0.13417mg/ml. Justify how your standard solution can be quantified when its concentration is far below the limit of quantitation.	Standard solution concentration is 0.06mg/ml while the correct limit of quantitation is 0.00658mg/ml. However there was small error in AMV Report.
6.	Submit readable copy of AD attested commercial invoice or clearance certificate	Firm has submittedcopy of commercial invoice cleared dated 28-06-2021. However the invoice is not readable to identify the batch number of API and other details.
7.	Submit valid copy of GMP certificate of the drug substance manufacturer.	Firm has submitted copy of GMP certificate issued by Food & Drugs Control Administration Gujrat state India valid till 29-05-2025.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

651.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Novamed Pharmaceuticals (Pvt) Ltd 28-Km, Ferozepur Road Lahore.**

6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Evaluation by PEC:

Sr. No	Shortcomings communicated	Response by the firm
1.	Evidence of me-too status, since you hve selected the product status as generic product and also submitted 30,000 fee as a generic product.	
2.	Submit data in section 3.2.S.4.1 and 3.2.S.4.2 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required."	
3.	Submit COA of the relevant batch of API used in the development for three stability batches in section 3.2.S.4.4.	
4.	Specify why module 3.2.S and DMF are separately submitted as different documents	
5.	Specify details including the expiry date and manufacturer of the product against which pharmaceutical studies are conducted	
6.	Justify why in vitro binding and dissolution studies are not conducted under the product development, since both these studies are recommended in the public assessment reports	
7.	Submit clearance certificate as evidence of import of API	

Decision of 333rd meeting of Registration Board:
Deferred for submission of reply to the above cited shortcoming.

Response by the firm:

Sr. No	Shortcomings communicated	Response by the firm
1.	Evidence of me-too status, since you hve selected the product status as generic product and also submitted 30,000 fee as a generic product.	Firm has submitted 45,000 differential fee.
2.	Submit data in section 3.2.S.4.1 and 3.2.S.4.2 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required."	Suubmitted
3.	Submit COA of the relevant batch of API used in the development for three stability batches in section 3.2.S.4.4.	Submitted
4.	Specify why module 3.2.S and DMF are separately submitted as different documents	No response submitted
5.	Specify details including the expiry date and manufacturer of the product against which pharmaceutical studies are conducted	Submitted.
6.	Justify why in vitro binding and dissolution studies are not conducted under the product development, since both these studies are recommended in the public assessment reports	The product specifications adopted for Cholestyramine 4g Sachet are USP. Dissolution test is not included in USP monograph of "Cholestyramine for oral suspension". Pharmaceutical equivalence is performed between test product (Cholestyramine 4g Sachet) and reference product (Questran 4g Sachet), both the test and reference product are tested for description, identification, average weight, assay, microbiological enumeration test and test for specified microorganism according to USP monograph. Both the products comply with the specifications of USP for all the above mentioned tests. The formulation of test and reference product is same in this way both the test and reference products are interchangeable. Alternative to in vitro binding studies, USP Assay method is also based upon exchange capacity of Cholestyramine resin against sodium glycocholate, in this method cholestyramine resin acts as adsorbent and sodium glycocholate as adsorbate. In this way we are testing binding of bile salt with cholestyramine during test of assay and all the results are within specified limits of USP
7.	Submit clearance certificate as evidence of import of API	AD cleared invoice / clearance certificate is not submitted

Decision: Approved.

Sr. No	Shortcomings communicated	Response by the firm
1.	Submit evidence of resuisite manufacturing facility approval by Licensing Division, DRAP and Central Licensing Board.	
2.	Submit complete label claim in section 1.5.2 as per the recommendations laid down in CTD guidance document along with submission of requisite fee.	
3.	Submit evidence of approval of applied formulation in reference regulatory authorities in section 1.5.9 as per the recommendations laid down in CTD guidance document instead of submitting SmPC of a product without specifying the regulatory authority which has approved that product.	
4.	The label claim submitted in the proposed label design in section 1.5.11 i.e. "Each Spray Contains: Mometasone Furoate…50mcg" is non scientific and does not provide the actual information.	
5.	Submit information is section 1.6.5 as per the CTD guidance document since you have only submitted GMP certificate of API manufacturer in that section.	

Decision of 331st meeting of Registration Board:
Registration Board deferred the case for submission of reply to the above cited shortcomings.

Response by the firm:

Sr. No	Shortcomings communicated	Response by the firm
1.	Submit evidence of resuisite manufacturing facility approval by Licensing Division, DRAP and Central Licensing Board.	Firm has submitted copy of letter of renewal of DML dated 16-05-2024 specifying Nasal spray section (steroid) Regularization.
2.	Submit complete label claim in section 1.5.2 as per the recommendations laid down in CTD guidance document along with submission of requisite fee.	Submitted
3.	Submit evidence of approval of applied formulation in reference regulatory authorities in section 1.5.9 as per the recommendations laid down in CTD guidance document instead of submitting SmPC of a product without specifying the regulatory authority which has approved that product.	MHRA approved

4.	The label claim submitted in the proposed label design in section 1.5.11 i.e. "Each Spray Contains: Mometasone Furoate…50mcg" is non scientific and does not provide the actual information.	Correct label claim submitted
5.	Submit information is section 1.6.5 as per the CTD guidance document since you have only submitted GMP certificate of API manufacturer in that section.	Submitted

Decsion: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

658.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Getz Pharma Pvt Ltd. 29-30, Sector 27, Korangi Industrial Area, Karachi.**
	Name, address of Manufacturing site.	M/s Saffron Pharmaceuticals (Pvt) Ltd. 19 Km Sheikhupura Road, Faislabad.
	Status of the applicant	☐ Manufacturer ☐ Importer ☒ Is involved in none of the above (contract giver)
	GMP status of the firm	Firm has submitted copy of GMP certificate of M/s Saffron Pharma dated 12-11-2020 based on the inspection dated 11-11-2020.
	Evidence of approval of manufacturing facility	Not submitted
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 10718: 28-04-2022
	Details of fee submitted	PKR 75,000/-: 15-03-2022
	The proposed proprietary name / brand name	**METASONE Nasal Spray 50mcg**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Spray Contains: Mometasone Furoate…50mcg
	Pharmaceutical form of applied drug	
	Pharmacotherapeutic Group of (API)	Decongestant and other nasal preparations for topical use.
	Reference to Finished product specifications	BP
	Proposed Pack size	As per SRO
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Not submitted
	For generic drugs (me-too status)	Nasomet Aqueous Nasal Spray by Sante

	Name and address of API manufacturer.	Flax Laboratories, Plot No. B-29/1, MIDC Mahad Village Birwadi Mahad District Raigad Maharashtra India.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for both drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 24 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	
	Analytical method validation/verification of product	Firm has submitted report of verification of analytical method for the drug substance. Firm has submitted report of verification of analytical method for the drug product.

No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	
3.	Documents for the procurement of API with approval from DRAP (in case of import).	
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	

6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	

Evaluation by PEC:

Sr. No	Shortcomings communicated	Response by the firm
1.	Justify how manufacturing of omeprazole capsule is applied under section approved for general antibiotics	We are manufacturing general drugs in this section only
2.	Your submitted label claim does not specify the pellets, revise your label claim as per follow along with submission of full fee of registration: Each Capsule Contains: Omeprazole (as enteric coated pellets)…40mg	Firm has revised label claim without submission of fee
3.	Submit specifications and analytical procedures of the drug substance manufacturer in section 3.2.S.4.1 and 3.2.S.4.2 since you have only submitted a copy of USP monograph.	Not submitted
4.	The submitted verification studies of the drug substance from drug product manufacturer does not specify the exact concentration of solution used in system suitability, and precision studies. Moreover, the concentrations specified in linearity studies are different from the concentration of standard solution specified in USP monograph. Clarification is required in this regard.	Not submitted
5.	Justify the fill weight of 179.05mg pellets per capsule.	Submitted
6.	Specify the total weight of the capsule including the weight of hard gelatin capsule.	Submitted
7.	Submit pharmaceutical equivalence of your product against the innovator / reference product.	Firm has submitted PE studies against Risek capsule by Getz Pharma
8.	Justify your CDP studies in which you have studied only 45 mins time point at 6.8pH phosphate buffer. Perform complete CDP studies as per the applicable international guidelines and analytical method as specified in USP and submit summarized complete results.	Not submitted
9.	Submit process validation protocols	Submitted
10.	Specify the exact dissolution test for your drug product specifications, since USP has mentioned two different tests for dissolutionin which acceptance criteria as well as analytical methods are different.	Dissolution test-2
11.	Submit detailed analytical method of the drug product which is available and implemented in your QC department instead of submitting copy of USP monograph.	Submitted
12.	The submitted verification studies of the drug product do not specify the exact concentration of solution used in system suitability, and precision studies. Moreover, the concentrations specified in linearity studies are different from	Submitted

	the concentration of standard solution specified in USP monograph. Clarification is required in this regard.	
13.	Provide the result of stability studies as per the format specified in the CTD guidance document since your stability data summary sheets does not provide various information i.e. mfg date, exp date, container closure system, stability initiation date, API lot number used in manufacturing of batches etc.	Not submitted
14.	Provide detailed description of your product including color and size of the capsule shell as well as color of pellets in case the shells are transparent.	Submitted
15.	Submit stability study data in section 3.2.P.8.3 as per the 6 points checklist provided in the CTD guidance document: The checklist includes following points: o Reference of previous approval of applications with stability study data of the firm (if any) o Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin. o Documents for the procurement of API with approval from DRAP (in case of import). o Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc. o Compliance Record of HPLC software 21CFR & audit trail reports on product testing Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not submitted

Decision of 331st meeting of Registration Board:

Deferred for following submissions:

- Rs. 30,000/- for correction/pre-approval change in product label claim as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.
- Specifications and analytical procedures of the drug substance manufacturer in section 3.2.S.4.1 and 3.2.S.4.2.
- Clarification for verification studies of the drug substance from drug product manufacturer which does not specify the exact concentration of solution used in system suitability, and precision studies. Moreover, the concentrations specified in linearity studies are different from the concentration of standard solution specified in USP monograph.
- Result of stability studies as per the format specified in the CTD guidance document since submitted stability data summary sheets does not provide information including mfg date, exp date, container closure system, stability initiation date, API lot number used in manufacturing of batches etc.
- Stability study data in section 3.2.P.8.3 as per the 6 points checklist provided in the CTD guidance document.
