**Above mentioned performance of PE&R Division was presented before the Registration Board and the Board acknowledged and appreciated the efforts of all the officers of PE&R Division. The Board admired the continuous rising performance of the PE&R Division due to extraordinary efforts of the officers and staff of the Division. The Board after thorough deliberations, recommended that above performance report be presented before the Authority for its perusal and issuance of appreciation letters and honoraria to the officers of PE&R Division.**

#### **Case No. 1: Submission of replies of deferred applications of Form-5 and Form-5A of Human Drugs**

The dead line for submission of Form-5 and Form-5A of Human Drugs was 07<sup>th</sup> March, 2019. Thereafter, Form-5F (CTD) was implemented. Registration Board observed that firms are submitting replies of applications of Form-5 and Form-5A of Human Drugs deferred in various registration board meetings after lapse of long time which is creating hurdle in reducing the pendency of current registration applications. The Board deliberated the matter in details and decided that replies of applications of Form-5 and Form-5A of Human Drugs deferred in various Registration Board meetings shall be submitted in R&I section of DRAP till 31<sup>st</sup> December, 2024. Replies of such applications submitted after said date shall not be entertained and all such applications shall be considered as disposed off and the applicant firm may submit fresh application on Form-5F which will be considered on its turn in queue of Form 5F. The Board further directed to issue a circular to stakeholders for information and compliance of the decision.

#### **Case No. 2: Stability data submitted for applications applied on Form 5/5D.**

Registration Board in its **320<sup>th</sup>** meeting considered the case of “Applications submitted on Form 5 / 5-D requiring submission of stability data” and decided as under:

“Registration Board deliberated the matter in detail and observed that these applications are pending for submission of stability data/product development data by the applicants since many years. Keeping in view the pendency, the Board deliberated the matter in detail and also took opinion of PPMA and then decided that the firms shall initiate the product development and stability studies of submitted applications and intimate to Pharmaceutical Evaluation Cell (PEC) regarding procurement of raw material, initiation of product development and initiation of stability studies, by 31st December 2022. For all those applications for which Pharmaceutical Evaluation Cell will not receive any intimation regarding initiation of product development and stability studies, will be placed before the Board for decision”

The above decision of the Board was notified vide letter No. No. 320-DRB/ 2022(PE&R) dated 17-10-2022. Later, Pakistan Pharmaceutical Manufacturer’s Association through its Chairman (North) vide its letter No. PPMNAM-03312022 dated 30-12-2022 requested for Extension in Time for Submission of Stability Data of Form 5/5D.

Registration Board in its 324<sup>th</sup> meeting considered the request of PPMA and decided as under:

“Registration Board while considering the above cited request of PPMA reiterated that that the numerous applications are pending for submission of stability data/product development data by the applicants since many years causing by an un due backlog for the PE&R Division. Board also discussed that previously, opinion of PPMA was also taken while giving an opportunity to the firms to submit an intimation regarding initiation of product development & stability studies had been given to firms for submission of any had already been given a time period till by 31st December 2022. Keeping in view the above deliberation Board decided to refer the case to Authority for seeking guidance regarding timelines for submission of Stability Data of Form 5 / Form 5-D Files.”

The matter was placed before the Authority in its 161<sup>st</sup> meeting held on 5-6 April, 2023 and the Authority decided as follow:

“The Authority noted that the numerous applications are pending for submission of stability data/product development data by the applicants since many years resulting in an un due backlog for the PE&R & BE&R Division. The applicants had failed to submit the requisite data after lapse of agreed deadline. Accordingly, the Authority advised the Registration Board to dispose of the cases on merit.”

As per available record, a list of stability data submitted till 31st December, 2022 was placed before the Board in its 329<sup>th</sup> meeting and the Board decided as under:

“Registration Board discussed the decision of Authority in detail and after through deliberations decided in line with decision of the Authority to consider only those registration applications for which stability study data has been submitted till 31st December, 2022. Stability study data shall be processed as per its queue. Registration Board further decided that all those registration applications requiring stability study data (applied on Form5/Form 5D) for which the requisite data has not been submitted till 31st December, 2022, shall be considered as disposed off and the applicant firms shall submit its product development and stability data on Form-5F which will be considered on its turn in queue of Form 5F.”

It is submitted that various firm have submitted stability data after 31<sup>st</sup> December 2022 keeping in view the previous decision of registration Board taken in its 320<sup>th</sup> meeting held on 29<sup>th</sup> -31<sup>st</sup> August 2022. However, the matter was finally decided by Registration Board in its 329<sup>th</sup> meeting held on 6<sup>th</sup> to 8<sup>th</sup> June, 2023.

The matter was placed before the authority and the Authority in its 184<sup>th</sup> meeting held on 26<sup>th</sup> June, 2024 decided as follow:

**“The Authority decided that only those registration applications shall be considered by the Registration Board for which stability data has been submitted by the pharmaceutical firm on or before 30<sup>th</sup> June, 2023.”**

As per available record, a list of stability data submitted till 30<sup>th</sup> June, 2023 is as follow:

**Deliberations:** Registration Board discussed the compliance of decision of Authority in detail along with the presented list. The Board also directed the division to revisit the list in consultation with the observers/representatives of the PPMA and Pharma Buerue during the days of current meeting of the Board so that list could be updated with minimum omissions/errors. Accordingly as per received evidence, list was updated as presented above.

**Decision:** Registration Board, in compliance to the decision of 184<sup>th</sup> meeting of Authority decided to endorse the above list of registration applications for whome stability study data has been submitted till 30<sup>th</sup> June, 2023. Stability study data shall be processed as per the dates mentioned in the last column of the table. Registration Board further decided that all those registration applications requiring stability study data (applied on Form5/Form 5D) for which the requisite data has not been submitted till 30<sup>th</sup> June, 2023, shall be considered as disposed off and the applicant firms may apply afresh on Form-5F which will be considered on its turn in queue of Form 5F.

#### Agenda of Mr. Ammar Ashraf Awan

**Remarks of Evaluator:**

| Sr.# | Section# | Observation  | Firm's response  |
|------|----------|--|--|
| 1.   | 1.3.3    | Details of product manufactured in the plastic ampoules section (BFS Technology) of M/s Hudson pharma shall be submitted.  | Submitted  |
| 2.   | 1.5.2    | Label claim in terms of complete salt form of Ipratropium shall be submitted i.e., Ipratropium bromide as monohydrate.   | Firm has submitted revised label claim as under:<br>Each ampoule contains:<br>Ipratropium Bromide .....0.5mg (as 0.5218mg Ipratropium Bromide monohydrate)<br>Salbutamol Sulfate.....3.0125mg eq. To Salbutamol base 2.5mg |
| 3.   | 1.6.5    | Valid DML/GMP certificate shall be submitted for the M/s Via Livelli, 1 26852 Casaletto Lodigiano (Frazione Mairano) (LO), Italy.  | Submitted  |
| 4.   | 3.2.S.4  | <ul style="list-style-type: none"> <li>Clarification shall be submitted regarding the claimed specifications for Ipratropium bromide by drug substance manufacturer, whether it is USP, BP, Ph. Eur. or IP.</li> </ul> | We (Hudson Pharma Private Limited) are following BP specs. However, Drug substance manufacturer is performing testing as per mentioned Pharmacopoeial specifications i.e. USP, BP and IP depend on                         |

|    |             |   |   |
|----|-------------|---|---|
|    |             |   | vendor requirements. Which is enclosed for your reference.  |
|    |             | <ul style="list-style-type: none"> <li>Drug substance details submitted in section 3.2.S for Ipratropium is from M/s Olon S.p.A whereas COAs, have been submitted from M/s Sifavitor. Justification shall be submitted in this regard.</li> </ul>   |   |
|    |             | <p>Firm has submitted following justification from M/s Olon s.p.a:</p> <p>“Infa Group Spa and its affiliates Labochim Spa and Sifavitor Srl have been acquired in May 2016 by Olon Spa.<br/>Beginning January 1st, 2017 Labochim Spa and Sifavitor Srl will be merged by incorporation into Olon Spa All the documents including, but not limited to: Certificate of Analysis, Label, Invoice,<br/>Packing List will be retaining the Brand Name, Logo, Plant Address of Labochim and Sifavitor in order to facilitate the change process. The layout of each document is available and will be supplied upon request. The Manufacturing Licenses and the GMP certificates will be available reissued in the new name Olon Spa within first quarter of 2017.<br/>All DMFs and CEPs will be promptly updated and submitted to the Regulatory Authorities in order to reflect the name change.”</p> |   |
| 5. | 3.2.P.1     | <p>Submitted master formulation shall be justified for quantities of Ipratropium bromide and Salbutamol sulphate per batch, with reference to the equivalency factors of salt forms.</p> <p>Submitted master formulation shall declare the contents of Ipratropium bromide in terms of Ipratropium bromide as monohydrate.</p>  | Submitted   |
| 6. | 3.2.P.2.1   | Submitted formulation development data declares the use of Ipratropium bromide anhydrous form, whereas Innovator drug product has used Ipratropium bromide monohydrate form. Justification shall be submitted in this regard.   | There is a typographical error in part P.2 (PD report). Basically it is Ipratropium bromide monohydrate instead of Ipratropium bromide anhydrous form.  |
| 7. | 3.2.P.2.2.1 | Justification shall be submitted for not including test of sterility, particulate matter and Uniformity of dosage units in the Pharmaceutical equivalence studies.  | Not submitted   |
| 8. | 3.2.P.3.2   | Details of sterilization procedure adopted for the applied formulation shall be submitted.  | Sterilization procedure is carried out through 3 step filtration  |
| 9. | 3.2.P.5.1   | <ul style="list-style-type: none"> <li>Justification shall be submitted for not including test of Leachables and Net fill weight, with reference to USP general chapter &lt;5&gt;.</li> </ul>   | <ul style="list-style-type: none"> <li>Firm has submitted general “Container qualification studies for LDPE” and “Analytical report for the Leachability testing for plastic packaging”</li> <li>USP general chapter &lt;1664&gt; recommends testing the final drug product for leachables</li> </ul> |

|   |  |  |   |  |
|---|--|--|---|--|
| 10.   | 3.2.P.6  | <ul style="list-style-type: none"> <li>• Date of manufacturing of working standards is subsequent to the date of batch release of drug product.</li> <li>• Justification shall be submitted for use of BP grade working standard of Ipratropium Bromide for analysis of drug product as per USP monograph.</li> </ul>  | <ul style="list-style-type: none"> <li>• Not submitted</li> <li>• The testing methods for Ipratropium Bromide raw material are outlined in the British Pharmacopoeia (BP), whereas the testing procedures for the finished drug product are specified in the United States Pharmacopeia (USP). To standardize the working standard for drug product testing, a BP grade reference standard is utilized. The acceptance of both BP and USP standards ensures compatibility and compliance throughout the manufacturing process.</li> </ul>   |  |
| 11.   | 3.2.P.8.3  | <ul style="list-style-type: none"> <li>• Justification for not performing tests of “Leachable”, “Net fill weight” &amp; “Water Loss” during drug product stability studies, with reference to USP general chapter &lt;5&gt;.</li> <li>• Justification shall be submitted for not performing stability studies as per conditions recommended for semi-permeable containers by ICH Q1 guidelines.</li> <li>• As per submitted analytical record chromatographic conditions and concentration of standard and sample solution applied for the Assay test during stability studies are not as per the recommendations of USP monograph of “Ipratropium Bromide and Albuterol Sulfate Inhalation Solution”. Justification shall be submitted in this regard.</li> </ul> | <ul style="list-style-type: none"> <li>• Firm has referred to general report of “Analytical report for the Leachability testing for plastic packaging” while USP general chapter &lt;1664&gt; recommends testing the final drug product for leachables.</li> <li>• Firm has submitted water loss studies performed during stability studies on basis of initial weight of filled ampoules, whereas submitted drug product specifications does not include any limits for filled weight of ampoules.</li> <li>• Kindly note that the stability studies as per guideline of ICH Q1 for semi permeable condition is submitted wherein chromatographic conditions and concentration of standard and sample solution applied for assay test are as per the recommendations of USP monograph of Ipratropium Bromide and Albuterol Sulfate Inhalation Solution.</li> </ul> |  |
| <b>Decision: Approved. Firm shall submit full fee of registration for revision of stability studies data, before issuance of registration letter.</b> |  |  |   |  |

| Sr.# | Section#  | Observation  | Firm's response  |
|------|-----------|--|--|
| 1.   | 1.6.5     | Valid DML/GMP certificate of the drug substance manufacturer of drug substance shall be submitted.   | Submitted  |
| 2.   | 3.2.S.1.3 | Declaration of solubility of Empagliflozin in water as "practically insoluble" shall be justified with reference to the innovator drug product literature. | Firm has submitted a "Statement letter" from M/s Fuxin Long Rui as under:<br>"We Fuxin Long Rui Pharmaceutical Co., Ltd. (123000, Fluoride Industrial Park, Fumeng County (Yi Ma Tu), Fuxin City, Liaoning Province, China) guarantee that Empagliflozin has a certain degree of hydrophobicity, and its solubility in water and buffer solution is relatively small. During the |

|   |   |  |  |   |  |
|---|---|--|--|---|--|
|   |   |  |  | <p>dissolution process, particle aggregation is prone to occur, which further prolongs the dissolution time of the sample, reduces solubility, and causes the detection results to fluctuate at the edge of the limit. Therefore, the limit was slightly relaxed at that time. Later, during the testing process, we paid attention to removing agglomerated particles from the sample, ensuring that the solubility limit of the sample in water was consistent with the innovator drug product literature. At present, the COA specification for the product has been revised, but DMF has not been updated in a timely manner, resulting in inconsistency between the both. We will submit the updated files immediately.”</p> |  |

**Evaluation by PEC<sup>II</sup>:**

| Sr.# | Section#  | Observation  | Firm's response  |
|------|-----------|--|--|
| 1.   | 1.3.4     | ➤ Latest GMP inspection report of the drug product manufacturer, conducted within last three years shall be submitted,   | Copy of inspection report dated 03-11-2022 concludes satisfactory level of compliance.   |
| 2.   | 1.6.5     | ➤ Valid DML/GMP certificate of the drug substance manufacturer of Metformin HCl shall be submitted.  | Submitted  |
| 3.   | 3.2.S.1.3 | ➤ In contrary to the innovator drug product literature from the US FDA & EMA, the section declares the solubility of Empagliflozin in water as "practically insoluble". Justification shall be submitted in this regard. | The solubility of Empagliflozin is practically insoluble in water as per manufacturer's certificate of analysis. Moreover, we comply with manufacture's certificate of analysis (COA). The Board was intimated regarding the declaration from drug substance manufacturer of Empagliflozin in other cases regarding solubility profile submitted |
| 4.   | 3.2.S.4   | ➤ Submit drug substance analytical procedure of Empagliflozin from drug substance manufacturer.<br>➤ Justification shall be submitted for declaring specifications of Metformin HCl as "In-House" in section 3.2.S.4.1   | Submitted.<br>Metformin HCl is already verified on HPLC as per United States Pharmacopeia (USP) monograph. Moreover, specifications, analytical method and analytical method verification (AMV) I submitted.   |
| 5.   | 3.2.P.3.2 | Innovator drug product literature states as under:<br>"To combine the low amount of Empagliflozin with the relatively high quantity of metformin hydrochloride, a  | To combine the low amount of Empagliflozin with relatively high quantity of Metformin HCl geometric mixing of Empagliflozin with Metformin   |

|  |                  |   |  |
|--|------------------|---|--|
|  |                  | <p>wet granulation process with granulation liquid containing Empagliflozin was chosen.”</p> <ul style="list-style-type: none"> <li>In contrast to above cited reference, applied formulation has been formulated by granulating dry mix of Metformin HCl &amp; Empagliflozin with binder solution. Justification shall be submitted in this regard.</li> </ul> | <p>HCl is performed to ensure the homogeneous mixing of Empagliflozin.</p> <p>Moreover, we commit that manufacturing of commercial batches are according to innovator and submit stability data to Drug Regulatory Authority of Pakistan (DRAP) after charged on stability.</p>  |
|  | <b>3.2.P.5.2</b> | <ul style="list-style-type: none"> <li>Justification shall be submitted for adopting UV Spectrophotometric method for Assay test of Metformin HCl in drug product.</li> </ul>   | <p>We have validated the drug product method for both API's as per ICH Q2R1 Guidelines i.e. Empagliflozin by HPLC Metformin HCl by UV</p> <p>We have performed specificity parameter by making placebo and there is no interference observed during method Validation. Empagliflozin is not detectable due to its lowest concentration (0.05ppm) with respect to Metformin HCl (10ppm), that's why Metformin HCl determination is on UV.</p> |

**Decision: Registration Board approved the applications of Empaglif-M 12.5/1000 mg Tablet, Empaglif-M 12.5/500 mg Tablet & Empaglif-M 5/500 mg Tablet.**

|  |   |  |
|--|---|--|
|  | For generic drugs (me-too status)   | --   |
|  | Proposed Pack size  | As per SRO   |
|  | Detail of certificates attached (CoPP, Freesale certificate, GMP certificate) | <p><b>CoPP:</b> Firm has submitted original legalized CoPP (No. 00000118-07-22) issued by Federal Agency for Medicines and Health Products of Belgium dated 18-07-2022. The certificate declares that Product is not actually on market in the exporting country.</p> <p><b>GMP:</b> Firm has submitted legalized copy of GMP certificate issued by competent authority of Spain, declaring GMP compliant status of Capsule (soft shell, Hormone) section.</p> |
|  | Details of letter of authorization / sole agency agreement                    | Firm has submitted legalized "Letter of Authorization" from M/s Besins Healthcare S.A., Rue Washington 80, 1050 Ixelles, Belgium in name of M/s AGP Limited. B-23, S.I.T.E. Karachi for the applied product.   |

#### Evaluation by PEC<sup>II</sup>:

| Sr.# | Observation  | Firm's response  |
|------|--|--|
| 1.   | Submitted COPP does not endorse the Free sale status of applied product in Exporting country i.e., "Belgium". Justification shall be submitted in this regard or else submit Free sale certificate or CoPP declaring free sale status of applied product in country of origin.                       | Firm has referred to the approval of applied product in Finland with same manufacturer and Market Authorisation holder. Vaginal route'.  |
| 2.   | Section 1.5.7 declares the route of administration of applied product as "oral and vaginal" while submitted CoPP declares "Vaginal route" only.  | The route of administration for Utrogestan 300mg Capsule is only. There is a typographical error in the section 1.5. 7.  |
| 3.   | Justification shall be submitted for not including "Quantitative rupture test" in drug product specifications.   | The Quantitative Rupture Test requirement for soft gelatin capsules is guided by different pharmacopeias. This test is not mandatory in European Pharmacopoeia, However, as per USP, if a soft gelatin capsule passes the disintegration test, it may not be necessary to perform the rupture test. Compliance with the disintegration test can allow for the omission of the rupture test. The Finished Product specification of Utrogestan contains Disintegration test as per European Pharmacopoeia. |
| 4.   | Evidence of approval of applied formulation with claimed routes of administration from any of the reference regulatory authority, adopted by Registration Board in its 275 <sup>th</sup> meeting, shall be submitted since provided reference product has been declared as "Discontinued" by US FDA. | The applied formulation with claimed route is also registered and available in Finland with the brand name of 'Lugesteron'.  |

**Decision: Approved as per policy of Inspection of Manufacturer abroad.**

|                                       | For generic drugs (me-too status)   | Glucophage Tablet by Martin Dow   |
|                                       | Proposed Pack size  | As per SRO  |
| <b>Evaluation by PEC<sup>3</sup>:</b> |   |   |
| <b>Sr. No</b>                         | <b>Shortcomings</b>   | <b>Response by the firm</b>   |
| 1.                                    | Submit valid GMP certificate / inspection report of drug product manufacturer.  |   |
| 2.                                    | Submit specifications and analytical method of API from API manufacturer as well as drug product manufacturer in section 3.2.S.4.1 and 3.2.S.4.2 for drug substances.   |   |
| 3.                                    | Submit verification studies of the analytical method of API performed by drug product manufacturer in section 3.2.S.4.3.  |   |
| 4.                                    | Submit COA of reference / working standard actually used in analysis of drug substance, since the submitted COA specifies that the standard can be used till June 2020 while API testing was performed in April 2021. |   |

|     |  |  |
|-----|--|--|
| 5.  | Source of API claimed in section 3.2.S.2.1 is Aarti Drugs Limited, Mumbai while the stability study data of API is provided for Aarti Tarapur Site   |  |
| 6.  | Submit report of comparative dissolution profile studies as per FDA guidelines including result of individual unit at each time point for each dissolution medium along with %RSD values.  |  |
| 7.  | Justify why test for uniformity of dosage unit is not included in drug product specification.  |  |
| 8.  | USP monograph has specified 3 different tests for dissolution, you are required to specify the type of dissolution test for your drug product.   |  |
| 9.  | The raw data sheets of stability studies show UV absorbance values of 800 and above. Clarification is required how such high UV absorbance values can be achieved and used in the studies. |  |
| 10. | Submit valid GMP certificate of API manufacturer   |  |
| 11. | Submit documents for procurement of API including DRAP clearance certificate.  |  |

**Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings.**

| <b>Evaluation by PEC<sup>3</sup>:</b> |   |   |
| <b>Sr. No</b>                         | <b>Shortcomings</b>   | <b>Response by the firm</b>   |
| 1.                                    | Revise your label claim as per the innovator's product along with submission of requisite fee.  |   |
| 2.                                    | Submit specifications and analytical method of API from API manufacturer as well as drug product manufacturer in section 3.2.S.4.1 and 3.2.S.4.2 fir both drug substances.  |   |
| 3.                                    | Justify the performance of specificity test for naproxen API in the light of ICH Q2 guidelines.   |   |
| 4.                                    | Submit COA of relevant batch of API from API manufacturer as well as product manufacturer in section 3.2.S.4.4 for both drug substances   |   |
| 5.                                    | Justify why particle size distribution test is not performed by drug product manufacturer for naproxen API since particle size is a critical quality attribute for the applied product.   |   |
| 6.                                    | Submit real time stability study data of esomeprazole API till claimed shelf life since the submitted data is till 6 months only.   |   |
| 7.                                    | Submit quantity of esomeprazole added in drug product per unit keeping in view salt factor and magnesium content etc.   |   |
| 8.                                    | Justify why pharmaceutical equivalence and CDP studies are not conducted against innovator's product.   |   |
| 9.                                    | Submit details of dissolution parameters used in comparative dissolution profile studies.   |   |
| 10.                                   | USFDA review documents reveals that for acid stage testing of naproxen tablet, 475ml dissolution medium is to be used with 75rpm paddle speed, while you have used 100rpm paddle speed. Clarification is required in this regard.                                     |   |
| 11.                                   | USFDA review documents reveals that for buffer stage testing of naproxen tablet, 900ml of 0.05 M phosphate buffer pH 7.4 dissolution medium is to be used with 75rpm paddle speed, while you have used 100rpm paddle speed. Clarification is required in this regard. |   |
| 12.                                   | Submit valid GMP certificate of both API manufacturer   |   |
| 13.                                   | Submit documents for procurement of both API including DRAP clearance certificate.  |   |
| 14.                                   | Submit complete analytical record of stability testing of all batches including chromatograms for assay and dissolution test for each time point with proper separators.  |   |

**Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings.**

| <b>DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA</b>   |   |   |
| 1.   | Reference of previous approval of applications with stability study data of the firm (if any)   | <ul style="list-style-type: none"> <li>Medasia Pharma is a new license facility hence no such inspection has been conducted.</li> </ul> |
| 2.   | Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.   | GMP certificate No. DC-I/A-I/WHO-GMP/2019/203 dated 07/2-19 valid till three years  |
| 3.   | Documents for the procurement of API with approval from DRAP (in case of import).   | <ul style="list-style-type: none"> <li><b>Not Provided</b></li> </ul>   |
| 4.   | Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.                           | Submitted   |
| 5.   | Compliance Record of HPLC software 21CFR & audit trail reports on product testing   | <b>Not Submitted</b>  |
| 6.   | Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)   | <b>Not Submitted</b>  |
| <b>Evaluation by PEC:</b>  |   |   |
| <p>Following Documents are found deficient:</p> <ol style="list-style-type: none"> <li>Provide valid GMP certificate of API manufacturer.</li> <li>In the standard testing method for assay testing of API Moxifloxacin HCL (USP) the preparation of diluent and Mobile Phase is not done as specified in the USP monograph.</li> <li>USP Specified test namely Microbial Enumeration test and enantiomeric impurity are performed by DS manufacturer in COA but not in stability test reports of API batches.</li> <li>Specifications of excipients are not mentioned. The excipients used are different from the innovator Product (MHRA), therefore, submit compatibility studies .</li> <li>The CDP and test reports are un-signed.</li> <li>Uniformity of content test is USP specified test but is not performed during stability of Drug Product.</li> <li>The HPLC conditions (Injection volume and flow rate) are different from the ones specified in USP in assay testing of Drug Product.</li> <li>Chromatograms supporting the stability studies are not submitted for every point of stability testing.</li> <li>Compliance Record of HPLC software 21CFR &amp; audit trail reports on product testing &amp; Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) is not submitted.</li> <li>BMR of trial batches is not submitted.</li> <li>Specify the API Lot No being used in trial batches along with Documents for the procurement of API with approval from DRAP (in case of import).</li> </ol> |   |   |
| <b>Decision of 323<sup>rd</sup> meeting of Registration Board: Registration Board deferred the case for submission of reply to the above cited shortcomings within six (06) months.</b>  |   |   |
| <b>Submission by the firm:</b>   |   |   |
| Sr. No   | Reason for deferment  | Response by the firm  |
| 1.   | Provide valid GMP certificate of API manufacturer.  | Submitted.  |
| 2.   | In the standard testing method for assay testing of API Moxifloxacin HCL (USP) the preparation of diluent and Mobile Phase is not done as specified in the USP monograph. | Submitted.  |

|     |   |   |
|-----|---|---|
| 3.  | USP Specified test namely Microbial Enumeration test and enantiomeric impurity are performed by DS manufacturer in COA but not in stability test reports of API batches.  | The enantiomeric test and microbial enumeration test is not included in stability specifications as its values are constant and do not change with temperature. |
| 4.  | Specifications of excipients are not mentioned. The excipients used are different from the innovator Product (MHRA), therefore, submit compatibility studies.   | Firm has submitted that all excipients are pharmacopoeial. Moreover, results of stability studies evident that the formulation is compatible.                   |
| 5.  | The CDP and test reports are un-signed.   | Submitted.  |
| 6.  | Uniformity of content test is USP specified test but is not performed during stability of Drug Product.   | This test is included in shelf life and release specifications however it is not part of stability specification.   |
| 7.  | The HPLC conditions (Injection volume and flow rate) are different from the ones specified in USP in assay testing of Drug Product.   | <b>Not submitted.</b>   |
| 8.  | Chromatograms supporting the stability studies are not submitted for every point of stability testing   | Submitted.  |
| 9.  | Compliance Record of HPLC software 21CFR & audit trail reports on product testing & Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) is not submitted. | HPLC system is not 21 CFR compliant. Record of data logger is submitted.  |
| 10. | BMR of trial batches is not submitted.  | Submitted.  |
| 11. | Specify the API Lot No being used in trial batches along with Documents for the procurement of API with approval from DRAP (in case of import).   | Firm has submitted <b>non</b> attested commercial invoice.  |

**Decision: Deferred for following:**

- **Clarification since the HPLC conditions (Injection volume and flow rate) are different that specified in USP in assay testing of Drug Product.**
- **Documents for the procurement of API with approval from DRAP.**

|  | Module-II (Quality Overall Summary)  | Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product. |
|  | Module-III Drug Substance:   | Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.  |
|  | Stability Studies of Drug Substance (Conditions & duration of Stability studies)         | Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at $40^{\circ}\text{C} \pm 2^{\circ}\text{C} / 75\% \pm 5\% \text{ RH}$ for 6 months. The real time stability data is conducted at $30^{\circ}\text{C} \pm 2^{\circ}\text{C} / 65 \pm 5\% \text{ RH}$ for 36 months.  |
|  | Module-III Drug Product:   | Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.                   |
|  | Pharmaceutical Equivalence and Comparative Dissolution Profile                           | Firm has submitted results of pharmaceutical equivalence for their product against Dexamethasone Injection from Hospira UK Limited  |
|  | Analytical method validation/verification of product                                     | Firm has submitted report of verification studies of analytical method for the drug substance and product.  |

| 1.   | Submit IR spectra for characterization of drug substance in section 3.2.S.3   | Submitted  |         |
| 2.   | Submit COA of the relevant batch of API used in the development for three stability batches in section 3.2.S.4.4.                               | Submitted  |         |
| 3.   | Specify details including the expiry date and manufacturer of the product against which pharmaceutical studies are conducted                    | Dexamthasone Injection 3.3mg/ml by Hospira UK Limited. Batch No FDT258   |         |
| 4.   | Submit valid GMP certificate of API manufacturer  | Not submitted  |         |
| 5.   | The submitted API clearance specify dexamethasone base while the product contains dexamtheasone sodium phosphate. Clarify                       | No justification is submitted  |         |
| 6.   | The submitted API clearance is dated 28-11-2017 while your batches have been manufactured in January 2017                                       | No justification is submitted  |         |
| 8.   | Submit copy of BMR of all batches   | Submitted.   |         |
| <b>Decision of 336<sup>th</sup> RB meeting:</b> Deferred for following:  |   |  |         |
| <ul style="list-style-type: none"><li>Valid GMP certificate of API manufacturer.</li><li>Clarification since the submitted API clearance specify dexamethasone base while the product contains dexamtheasone sodium phosphate.</li></ul> |   |  |         |

| <ul style="list-style-type: none"> <li>Clarification since the submitted API clearance is dated 28-11-2017 while the batches have been manufactured in January 2017.</li> </ul>   |   |   |
|---|---|---|
| <b>Response by the firm:</b>  |   |   |
| Sr. No  | Reason for deferment  | Response by the firm  |
| 1.  | Valid GMP certificate of API manufacturer.  | GMP certificate of API manufacturer has issue date October 2015 and was valid till October 2020. The new certificate shall be collected on commercial order of API.   |
| 2.  | Clarification since the submitted API clearance specify dexamethasone base while the product contains dexamethasone sodium phosphate. | Firm has submitted that they are using dexamethasone in two already registered products, Tobra-D and Ophth Dex. The assistant mistakenly attach COA of Dexamethasone instead of dexamethasone sodium phosphate.   |
| 3.  | Clarification since the submitted API clearance is dated 28-11-2017 while the batches have been manufactured in January 2017.         | Firm has submitted that they are using dexamethasone in two already registered products, Tobra-D and Ophth Dex. The assistant mistakenly attach clearance certificate of 24-11-2016 instead of required certificate. Firm has now submitted another copy of commercial invoice cleared dated 01-12-2016. The new submitted invoice has the same invoice number as that of previously submitted invoice as well as Bank contract number. |
| <b>Decision: Registration Board decided to defer the case for following:</b> <ul style="list-style-type: none"> <li>Verification of the submitted clearance certificate / cleared invoice from DRAP Karachi office.</li> <li>Valid GMP certificate of API manufacturer.</li> <li>Clarification since the submitted API clearance is dated 28-11-2017 while the batches have been manufactured in January 2017.</li> </ul> |   |   |

| S.#  | Observations communicated  | Response by the firm  |              |
| 1.   | Provide results of analysis of relevant batch(es) of Drug Substance used during product development and stability studies, along with Certificate of Analysis (CoA) of the | The firm has submitted that API lot used in stability studies procured from Rajasthan Antibiotics while provided DMF was from Metrochem. We are         |              |

|    |   |  |
|----|---|--|
|    | same batch from Drug Substance manufacturer.  | submitting DMF from Rajasthan antibiotics and COAs accordingly.  |
| 2. | Details of applicant batch number and comparator product batch number used for pharmaceutical equivalence studies are required.   | Revised pharmaceutical equivalence report has been submitted.  |
| 3. | Data of commercial batches with different batch numbers was given in process validation reports, batch analysis of finished product and stability studies.  | We do not perform process validation on all manufactured batches. We performed stability study and process validation on different batches however we are submitting revised batch analysis of stability batches.            |
| 4. | Pharmaceutical equivalence of the applied drug shall be established with the innovator product and results of all the quality tests (mentioned in any official pharmacopoeia or section 3.2.P.5.1 of this application) of the developed formulation and the innovator product should be submitted and discussed as per requirements of section 3.2.P.2. | The firm has submitted we used market leader product (Risek 40mg Injection) of GETZ pharma which was approved by DRAP.   |
| 5. | Justification is required for using UV spectrophotometric method in place of HPLC method for assay testing of Delka 40mg Injection IV.  | The firm has submitted that since product is of in-house specifications and in-house validated method is applied for testing which is UV-visible spectrophotometer. Validation of analytical method is provided in module 3. |
| 6. | Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.   | Response not submitted against this point.   |
| 7. | Evidence of procurement of drug substance with approval from DRAP is required.  | Response not submitted against this point.   |

#### **Decision of 316<sup>th</sup> meeting of RB:**

Deferred for submission of following:

- Scientific justification of manufacturing of applied formulation by way of lyophilization using pre-lyophilized omeprazole sodium from M/s Rajasthan Antibiotics, India.
- Justification of adopting UV-visible spectrophotometric method for assay testing of applied formulation.
- Approval of API/ DML/GMP certificate of API manufacturer (Rajasthan antibiotics) issued by concerned regulatory authority of country of origin.
- Evidence of procurement of drug substance with approval from DRAP.
- Submission of Pharmaceutical equivalence studies against innovator/reference product, manufactured by way of lyophilization.

#### **Response by the firm:**

The applied product to be manufactured by the contract manufacturer has already been approved by Registration Board. The details of the already approved product are as follows:

|                            |  |
|----------------------------|--|
| Applicant firm             | M/s Bio-next Pharmaceuticals. Plot No. 50, Street No. S-10, RCCI, Rawat            |

Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product. |
| Module-III Drug Substance:  | Firm has submitted detailed data for both drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.                                       |
| Stability Studies of Drug Substance (Conditions & duration of Stability studies)    | Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 36 months.  |
| Module-III Drug Product:  | Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and  |

|   |   |  |   |                 |
|---|---|--|---|-----------------|
|   |   | process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability. |   |                 |
|   | Pharmaceutical Equivalence and Comparative Dissolution Profile  | Firm has submitted results of pharmaceutical equivalence for all the quality tests for their product against the comparator i.e. Kinz injection of Sami Pharma   |   |                 |
|   | Analytical method validation/verification of product  | Firm has submitted verification studies of the drug substance and validation studies of the drug product.  |   |                 |
| STABILITY STUDY DATA  |   |  |   |                 |
| Manufacturer of API   |   | Mallinckrodt Pharmaceuticals SpecGx LLC 3600 North Second Street St. Louis, Missouri   |   |                 |
| API Lot No.   |   | 1909000314   |   |                 |

| 6. | Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) | Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers. |
|----|---|---|

#### Evaluation by PEC:

- Submit differential fee for the registration of applied product, since the notification for revision of fee vide SRO No. F.7-11/2012-B&A/DRA was published on 7<sup>th</sup> May 2021 while this application was received in R&I section of DRAP after 7<sup>th</sup> May 2021.
- Submit contract manufacturing agreement between contract giver and contract acceptor.
- Submit data in section 3.2.S.4.1 and 3.2.S.4.2 as per the guidance document approved by Registration Board which specifies that “Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required.”
- Submit data of verification of analytical procedure of drug substance in section 3.2.S.4.3 as per the guidance document approved by Registration Board which specifies that “*Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted*”.
- Submit data of batch analysis of drug substance in section 3.2.S.4.4 as per the guidance document approved by Registration Board which specifies that “*Provide results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (CoA) of the same batch from Drug Substance / /Active Pharmaceutical Ingredient manufacture*” since the submitted COA is for the batch manufactured in December 2020 while the drug product batches were manufactured in 2018 and 2019.
- Provide COA of reference standard which is actually used in the analysis of drug substance in section 3.2.S.5.
- Justify your master formulation without any solvent / diluent, further justify how you are using sodium chloride as solvent.
- Justify your master formulation which is significantly different from the innovator product in terms of quantitative composition where you have used sodium citrate, sodium chloride and citric acid anhydrous in 29.71%, 6.34% and 36.03% respectively, since the innovator product specifies sodium citrate, sodium chloride and citric acid anhydrous in 0.94%, 0.2% and 1.26% respectively.
- Justify why pharmaceutical equivalence was performed against the comparator product instead of innovator / reference product.
- Justify why the pharmaceutical equivalence study does not include complete testing of the drug product and the comparator product including the tests recommended by innovator product as well as the tests recommended in general monographs of official pharmacopoeia.
- Justify how you are not performing terminal sterilization for your product.
- Specify the container closure system whether available in amber color glass ampoule or otherwise.
- Justify why the specifications of the drug product (section 3.2.P.5.1) does not contain complete tests as recommended by innovator product as well as the tests recommended in general monographs of official pharmacopoeia.
- Justify the pH of your product between 3 to 4.5 since the pH of the innovator product is 3.5 to 3.7. Revise your specifications along with submission of requisite fee.
- Justify your analytical method for assay testing of the drug product which is based on UV analysis, since the analytical method of drug substance manufacturer as well as innovator / reference product is based on HPLC method.
- Justify your validation studies of the drug product in the light of ICH guidelines, since your analysis and reporting of the results is not exactly in line with the ICH recommendations.
- Justify why the stability study data of three different batches is submitted from those for which batch analysis is provided in section 3.2.P.5.4.
- You have submitted that the drug substance manufacturer is Mallinckrodt Pharmaceuticals SpecGx LLC 3600 North Second Street St. Louis, Missouri, but the drug substance used in the manufacturing of 3 batches of drug product is from any other source. Justification is required in this regard.

- Justify significant difference in the batch size of your products ranging from 15,000 to 50,000 ampoules. Justify your response in the light of the minimum and maximum capacity of your manufacturing equipments.
- Justify the pH of batch A-608 where the pH value exceed 3.70 to 3.78 during stability studies, since the maximum pH limit defined by innovator product is 3.70.
- Provide raw data sheets to justify the calculation of results for assay testing at each time point during the stability testing of each batch. Submit complete data with proper separators and in a sequence along with raw data sheets.
- Submit reference of previous approval of applications with stability study data of the firm instead of mentioning not applicable.
- Submit valid GMP certificate of the drug substance manufacturer.
- Submit documents for the procurement of API with approval from DRAP for the relevant batch of API which is used in the manufacturing of stability batches.
- Submit Batch Manufacturing Record of three batches for which stability study data is submitted.
- Submit copy of batch manufacturing record of 3 stability batches.

**Decision of 323<sup>rd</sup> RB meeting: Registration Board deferred the case for submission of reply to the above cited shortcomings within six months.**

**Response by the firm:**

The applied product to be manufactured by the contract manufacturer has already been approved by Registration Board. The details of the already approved product are as follows:

|                            |  |
|----------------------------|--|

| Module-II (Quality Overall Summary)   | Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product. |
| Module-III Drug Substance:  | Firm has submitted detailed data for both drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.                                       |
| Stability Studies of Drug Substance (Conditions & duration of Stability studies)    | Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 36 months.  |
| Module-III Drug Product:  | Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.                   |
| Pharmaceutical Equivalence and Comparative Dissolution Profile                      | Firm has submitted results of pharmaceutical equivalence for all the quality tests for their product  |

|  |   |   |                 |
|--|---|---|-----------------|
|  |   | against the comparator i.e. Kinz injection of Sami Pharma   |                 |
|  | Analytical method validation/verification of product  | Firm has submitted verification studies of the drug substance and validation studies of the drug product.   |                 |
| STABILITY STUDY DATA   |   |   |                 |
| Manufacturer of API  | Mallinckrodt Pharmaceuticals SpecGx LLC 3600 North Second Street St. Louis, Missouri  |   |                 |
| API Lot No.  |   |   |                 |

| No. of Batches   | 03  |   |                 |
| DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA  |   |   |                 |
| 1.   | Reference of previous approval of applications with stability study data of the firm (if any)   |   |                 |
| 2.   | Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.                         |   |                 |
| 3.   | Documents for the procurement of API with approval from DRAP (in case of import).   | Firm has submitted copy of commercial invoice dated 10-01-2020 specifying import of 0.05Kg nalbuphine hydrochloride. The invoice is <b>not</b> attested by AD (I&E) DRAP Field office. Firm has also submitted copy of Form 3 and form 7. |                 |
| 4.   | Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc. | Firm has submitted complete record of testing of all batches along with raw data sheets, COA and summary data sheets.   |                 |
| 5.   | Compliance Record of HPLC software 21CFR & audit trail reports on product testing   | NA  |                 |
| 6.   | Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)                         | Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.   |                 |
| Evaluation by PEC:   |   |   |                 |
| The product development and stability study data of the contract manufacturer was considered by Registration Board in its 323 <sup>rd</sup> meeting and deferred for submission of following documents: <ul style="list-style-type: none"><li>• Submit contract manufacturing agreement between contract giver and contract acceptor.</li><li>• Submit data in section 3.2.S.4.1 and 3.2.S.4.2 as per the guidance document approved by Registration Board which specifies that “Copies of the Drug substance specifications and analytical procedures</li></ul> |   |   |                 |

used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required.”

- Submit data of verification of analytical procedure of drug substance in section 3.2.S.4.3 as per the guidance document approved by Registration Board which specifies that “*Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted*”.
- Submit data of batch analysis of drug substance in section 3.2.S.4.4 as per the guidance document approved by Registration Board which specifies that “*Provide results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (CoA) of the same batch from Drug Substance / /Active Pharmaceutical Ingredient manufacture*” since the submitted COA is for the batch manufactured in December 2020 while the drug product batches were manufactured in 2018 and 2019.
- Provide COA of reference standard which is actually used in the analysis of drug substance in section 3.2.S.5.
- Justify your master formulation without any solvent / diluent, further justify how you are using sodium chloride as solvent.
- Justify your master formulation which is significantly different from the innovator product in terms of quantitative composition where you have used sodium citrate, sodium chloride and citric acid anhydrous in 29.71%, 6.34% and 36.03% respectively, since the innovator product specifies sodium citrate, sodium chloride and citric acid anhydrous in 0.94%, 0.2% and 1.26% respectively.
- Justify why pharmaceutical equivalence was performed against the comparator product instead of innovator / reference product.
- Justify why the pharmaceutical equivalence study does not include complete testing of the drug product and the comparator product including the tests recommended by innovator product as well as the tests recommended in general monographs of official pharmacopoeia.
- Justify how you are not performing terminal sterilization for your product.
- Specify the container closure system whether available in amber color glass ampoule or otherwise.
- Justify why the specifications of the drug product (section 3.2.P.5.1) does not contain complete tests as recommended by innovator product as well as the tests recommended in general monographs of official pharmacopoeia.
- Justify the pH of your product between 3 to 4.5 since the pH of the innovator product is 3.5 to 3.7. Revise your specifications along with submission of requisite fee.
- Justify your analytical method for assay testing of the drug product which is based on UV analysis, since the analytical method of drug substance manufacturer as well as innovator / reference product is based on HPLC method.
- Justify your validation studies of the drug product in the light of ICH guidelines, since your analysis and reporting of the results is not exactly in line with the ICH recommendations.
- Justify why the stability study data of three different batches is submitted from those for which batch analysis is provided in section 3.2.P.5.4.
- You have submitted that the drug substance manufacturer is Mallinckrodt Pharmaceuticals SpecGx LLC 3600 North Second Street St. Louis, Missouri, but the drug substance used in the manufacturing of 3 batches of drug product is from any other source. Justification is required in this regard.
- Justify significant difference in the batch size of your products ranging from 15,000 to 50,000 ampoules. Justify your response in the light of the minimum and maximum capacity of your manufacturing equipments.
- Justify the pH of batch A-608 where the pH value exceed 3.70 to 3.78 during stability studies, since the maximum pH limit defined by innovator product is 3.70.
- Provide raw data sheets to justify the calculation of results for assay testing at each time point during the stability testing of each batch. Submit complete data with proper separators and in a sequence along with raw data sheets.
- Submit reference of previous approval of applications with stability study data of the firm instead of mentioning not applicable.
- Submit valid GMP certificate of the drug substance manufacturer.

- Submit documents for the procurement of API with approval from DRAP for the relevant batch of API which is used in the manufacturing of stability batches.
- Submit Batch Manufacturing Record of three batches for which stability study data is submitted.
- Submit copy of batch manufacturing record of 3 stability batches.

**Decision of 333<sup>rd</sup> RB meeting: Registration Board deferred the case for submission of reply to the above cited shortcomings.**

**Response by the firm:**

The applied product to be manufactured by the contract manufacturer has already been approved by Registration Board. The details of the already approved product are as follows:

|                            |  |
|----------------------------|--|
| Applicant firm             | M/s Focus & Rulz Pharmaceuticals (Pvt) Ltd44 - Industrial Triangle, Kahuta Road, Islamabad |

**DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA**

|    |   |   |
|----|---|---|
| 1. | Reference of previous approval of applications with stability study data of the firm (if any)   |   |
| 2. | Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.                         |   |
| 3. | Documents for the procurement of API with approval from DRAP (in case of import).   | Firm has submitted copy of commercial invoice dated 10-01-2020 specifying import of 0.05Kg nalbuphine hydrochloride. The invoice is <b>not</b> attested by AD (I&E) DRAP Field office. Firm has also submitted copy of Form 3 and form 7. |
| 4. | Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc. | Firm has submitted complete record of testing of all batches along with raw data sheets, COA and summary data sheets.   |
| 5. | Compliance Record of HPLC software 21CFR & audit trail reports on product testing   | NA  |
| 6. | Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)                         | Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.   |

**Evaluation by PEC:**

The product development and stability study data of the contract manufacturer was considered by Registration Board in its 323<sup>rd</sup> meeting and deferred for submission of following documents:

- Submit differential fee for the registration of applied product, since the notification for revision of fee vide SRO No. F.7-11/2012-B&A/DRA was published on 7<sup>th</sup> May 2021 while this application was received in R&I section of DRAP after 7<sup>th</sup> May 2021.
- Submit contract manufacturing agreement between contract giver and contract acceptor.
- Submit data in section 3.2.S.4.1 and 3.2.S.4.2 as per the guidance document approved by Registration Board which specifies that “Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required.”
- Submit data of verification of analytical procedure of drug substance in section 3.2.S.4.3 as per the guidance document approved by Registration Board which specifies that “*Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed*”

*by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted”.*

- Submit data of batch analysis of drug substance in section 3.2.S.4.4 as per the guidance document approved by Registration Board which specifies that “Provide results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (CoA) of the same batch from Drug Substance // Active Pharmaceutical Ingredient manufacture” since the submitted COA is for the batch manufactured in December 2020 while the drug product batches were manufactured in 2018 and 2019.
- Provide COA of reference standard which is actually used in the analysis of drug substance in section 3.2.S.5.
- Justify your master formulation without any solvent / diluent, further justify how you are using sodium chloride as solvent.
- Justify your master formulation which is significantly different from the innovator product in terms of quantitative composition where you have used sodium citrate, sodium chloride and citric acid anhydrous in 29.71%, 6.34% and 36.03% respectively, since the innovator product specifies sodium citrate, sodium chloride and citric acid anhydrous in 0.94%, 0.2% and 1.26% respectively.
- Justify why pharmaceutical equivalence was performed against the comparator product instead of innovator / reference product.
- Justify why the pharmaceutical equivalence study does not include complete testing of the drug product and the comparator product including the tests recommended by innovator product as well as the tests recommended in general monographs of official pharmacopoeia.
- Justify how you are not performing terminal sterilization for your product.
- Specify the container closure system whether available in amber color glass ampoule or otherwise.
- Justify why the specifications of the drug product (section 3.2.P.5.1) does not contain complete tests as recommended by innovator product as well as the tests recommended in general monographs of official pharmacopoeia.
- Justify the pH of your product between 3 to 4.5 since the pH of the innovator product is 3.5 to 3.7. Revise your specifications along with submission of requisite fee.
- Justify your analytical method for assay testing of the drug product which is based on UV analysis, since the analytical method of drug substance manufacturer as well as innovator / reference product is based on HPLC method.
- Justify your validation studies of the drug product in the light of ICH guidelines, since your analysis and reporting of the results is not exactly in line with the ICH recommendations.
- Justify why the stability study data of three different batches is submitted from those for which batch analysis is provided in section 3.2.P.5.4.
- You have submitted that the drug substance manufacturer is Mallinckrodt Pharmaceuticals SpecGx LLC 3600 North Second Street St. Louis, Missouri, but the drug substance used in the manufacturing of 3 batches of drug product is from any other source. Justification is required in this regard.
- Justify significant difference in the batch size of your products ranging from 15,000 to 50,000 ampoules. Justify your response in the light of the minimum and maximum capacity of your manufacturing equipments.
- Justify the pH of batch A-608 where the pH value exceed 3.70 to 3.78 during stability studies, since the maximum pH limit defined by innovator product is 3.70.
- Provide raw data sheets to justify the calculation of results for assay testing at each time point during the stability testing of each batch. Submit complete data with proper separators and in a sequence along with raw data sheets.
- Submit reference of previous approval of applications with stability study data of the firm instead of mentioning not applicable.
- Submit valid GMP certificate of the drug substance manufacturer.
- Submit documents for the procurement of API with approval from DRAP for the relevant batch of API which is used in the manufacturing of stability batches.
- Submit Batch Manufacturing Record of three batches for which stability study data is submitted.
- Submit copy of batch manufacturing record of 3 stability batches.

**Decision of 331<sup>st</sup> RB meeting: Registration Board deferred the case for submission of reply to the above cited shortcomings.**

**Response by the firm:**

The applied product to be manufactured by the contract manufacturer has already been approved by Registration Board. The details of the already approved product are as follows:

|                            |  |

|    |   |   |
|----|---|---|
| 1. | Reference of previous approval of applications with stability study data of the firm (if any)   | Not submitted   |
| 2. | Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.                         | Firm has submitted copy of GMP certificate issued by Additional Director DRAP, Lahore dated 02-09-2020. The GMP certificate was granted based on inspection dated 22-06-2020. |
| 3. | Documents for the procurement of API with approval from DRAP (in case of import).   | Firm has submitted copy of delivery note for 5Kg Ciprofloxacin hydrochloride dated 11-06-2020 from Pharmagen.   |
| 4. | Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc. | Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.  |
| 5. | Compliance Record of HPLC software 21CFR & audit trail reports on product testing   | Not submitted by the firm   |
| 6. | Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)                         | Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.                                     |

#### **Evaluation by PEC:**

- Submit GMP certificate / inspection report of the drug product manufacturer.
- Submit data in section 3.2.S.4.1 as per the guidance document approved by Registration Board which specifies that “Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required.” You have only submitted the specifications of API from the drug product manufacturer.
- Provide verification studies of drug substance from drug product manufacturer.
- Submit COA of reference standard / working standard actually used in the analysis of drug substance.
- Submit API stability data till complete shelf life since the real time stability data is only for 12 months.
- Justify why the qualitative composition of your product is different from that of innovator’s product.
- Provide description of pharmaceutical development as per the CTD guidance document which specifies that “A brief information on the pharmaceutical development shall be included. This information specifies the justification of formulation and method of manufacturing. It is also important that critical quality attributes (CQAs) and Critical Process Parameters (CPP) shall be discussed”.
- Submit information in section 3.2.P.2.1.1 as per the CTD guidance document which specifies that “Discussion shall be provided for the key physicochemical characteristics (e.g. water content, solubility, particle size distribution, polymorphic or solid state form) of the Drug Substance(s) that can influence the performance of the Drug Product.”
- Justify why pharmaceutical equivalence is conducted against a comparator product instead of performing against the innovator’s product.
- Clarify why you have mentioned not applicable for all section of 3.2.P.4 excipients, while your formulation contains excipients.
- Provide complete analytical method of your drug product instead on attaching copy of an old version of USP monograph.
- Provide verification studies of the analytical method of drug product as per ICH guidelines since all the tests performed are not according to ICH guidelines.
- Provide COA of working standard / reference standard actually used in the analysis of drug product in section 3.2.P.6.
- Provide information in section 3.2.P.8.1 as per the CTD guidance document since you have not submitted any information in this section.
- Provide information in section 3.2.P.8.2 as per the CTD guidance document.

| <b>Decision of 323<sup>rd</sup> RB meeting: Registration Board deferred the case for submission of reply to the above cited shortcomings within six months.</b>  |  |
| <b>Response by the firm:</b>   |  |
| <b>Deficiencies</b>  | <b>Response by the firm</b>  |
| Submit GMP certificate / inspection report of the drug product manufacturer  | Submitted  |
| Submit data in section 3.2.S.4.1 as per the guidance document approved by Registration board which specifies that Copies of the drug substance specification and analytical procedures used for routine testing of the drug substance /active pharmaceutical ingredient by both drug substance & drug product manufacturer is required .you have only submitted the specifications of API from the drug product manufacturer .   | Submitted  |
| Provide verification studies of drug substance from drug product manufacturer.   | Submitted  |
| Submit COA of reference standard / working standard actually used in the analysis of drug substance.   | Submitted  |
| Submit API stability data till complete shelf life since the real time stability data is only for 12 month.  | Submitted  |
| Justify why the qualitative composition of your product is different from that of innovator's product.   | Submitted  |
| Provide description of pharmaceutical development as per the CTD guidance document which specifies that A brief information on the pharmaceutical development shall be included this information specifies the justification of formulation and method of manufacturing it is also important that critical quality attributes (CQAs) and critical process parameters (CCP) shall be discussed  | Submitted  |
| Submit information in section 3.2.P.1.1 as per the CTD guidance document which specifies that discussion shall be provided for the key physicochemical characteristics (e.g. water content, solubility, and particle size distribution, polymorphic or solid state form) of the drug substance (s) that can influence performance of the drug product.   | Submitted  |
| Justify why pharmaceutical equivalence is conducted against a comparator product instead of performing against the innovator's product.  | As Product specifications are of USP specification so the Pharmaceutical equivalence studies were performed against the same USP specification comparator product. |

|   |  |
|---|--|
| Clarify why you have mentioned not applicable for all section of 3.2.P.4 excipients, while your formulation contains excipients   | Section 3.2.P.4 is revised.  |
| Provide complete analytical method of your drug product instead on attaching copy of an old version of USP monograph.   | Complete analytical method of the drug product is submitted  |
| Provide verification studies of the analytical method of drug product as per ICH guidelines since all the tests performed are not according to ICH guidelines.  | Submitted  |
| Provide COA of working standard /reference standard actually used in the analysis of drug product in section 3.2.P.6.   | Submitted  |
| Provide information in section 3.2.P.8.1 as per the CTD guidance document since you have not submitted any information in this section  | Submitted  |
| Provide information in section 3.2.P.8.2 as per CTD guidance document   | Submitted  |
| Justify why dissolution test is not performed in stability studies  | Dissolution data was performed in stability studies but the test was skipped unintentionally in the documentation of stability data.   |
| USP monograph specifies that the retention time for ciprofloxacin is 6.4-10.8 min , while in your submitted analytical record the retention time of ciprofloxacin is below 6.4 minutes  | Testing was performed as per specified method of Ciprofloxacin tablet USP monograph and RT of peak obtained was about 6.2minutes. No change was done to adjust the retention time. |
| USP monograph specifies the use of ciprofloxacin ethylenediamine analog in standard solution as system suitability solution and that the relative retention times for ciprofloxacin ethylenediamine analog and ciprofloxacin are 0.7 and 1.0 respectively, while your analysis does not show any other peak within the relative retention times of 0.7 and 1.0. | For stability testing, system suitability solution was not used. After registration, we will use system suitability solution and will follow the method as per the USP monograph.  |
| Submit evidenced of column oven having capacity to maintain column temperature at 30°   | Evidence of Column oven is Submitted   |
| Submit reference of previous approval of applications with stability study data of the film (if any )   | Submitted  |
| Provide stability study data in a proper sequence using separators to segregate the data of each time point and each batch along with relevant raw data sheets.   | Submitted  |
| Provide proper raw data sheets showing calculation of results of assay Instead of just submitting results without any calculation.  | Submitted  |
| Submit compliance record of HPLC software 21CFR & audit trail reports on product testing.   | Submitted  |
| <b>Decision: Approved.</b>  |  |

| 5. | Compliance Record of HPLC software 21CFR & audit trail reports on product testing                                       | Not submitted by the firm   |
| 6. | Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) | Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers. |

#### **Evaluation by PEC:**

- Submit GMP certificate / inspection report of the drug product manufacturer.
- Submit data in section 3.2.S.4.1 as per the guidance document approved by Registration Board which specifies that “Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required.” You have only submitted the specifications of API from the drug product manufacturer.
- Provide verification studies of drug substance from drug product manufacturer.
- Submit COA of reference standard / working standard actually used in the analysis of drug substance.
- Submit API stability data till complete shelf life since the real time stability data is only for 12 months.
- Justify why the qualitative composition of your product is different from that of innovator’s product.
- Provide description of pharmaceutical development as per the CTD guidance document which specifies that “A brief information on the pharmaceutical development shall be included. This information specifies the justification of formulation and method of manufacturing. It is also important that critical quality attributes (CQAs) and Critical Process Parameters (CPP) shall be discussed”.
- Submit information in section 3.2.P.2.1.1 as per the CTD guidance document which specifies that “Discussion shall be provided for the key physicochemical characteristics (e.g. water content, solubility, particle size distribution, polymorphic or solid state form) of the Drug Substance(s) that can influence the performance of the Drug Product.”
- Justify why pharmaceutical equivalence is conducted against a comparator product instead of performing against the innovator’s product.
- Clarify why you have mentioned not applicable for all section of 3.2.P.4 excipients, while your formulation contains excipients.
- Provide complete analytical method of your drug product instead on attaching copy of an old version of USP monograph.
- Provide verification studies of the analytical method of drug product as per ICH guidelines since all the tests performed are not according to ICH guidelines.
- Provide COA of working standard / reference standard actually used in the analysis of drug product in section 3.2.P.6.
- Provide information in section 3.2.P.8.1 as per the CTD guidance document since you have not submitted any information in this section.
- Provide information in section 3.2.P.8.2 as per the CTD guidance document.
- Justify why dissolution test is not performed in stability studies.
- USP monograph specifies that the retention time for ciprofloxacin is 6.4 - 10.8min, while in your submitted analytical record the retention time of ciprofloxacin is below 6.4 minutes.
- USP monograph specifies the use of Ciprofloxacin Ethylenediamine Analog in standard solution as system suitability solution and that The relative retention times for ciprofloxacin ethylenediamine analog and ciprofloxacin are 0.7 and 1.0, respectively, while your analysis does not show any other peak within the relative retention time of 0.7 and 1.0.
- Submit evidenced of column oven having capacity to maintain column temperature at 30°.
- Submit Reference of previous approval of applications with stability study data of the firm (if any).

| <ul style="list-style-type: none"> <li>• Provide stability study data in a proper sequence using separators to segregate the data of each time point and each batch along with relevant raw data sheets.</li> <li>• Provide proper raw data sheets showing calculation of results of assay instead of just submitting results without any calculation.</li> <li>• Submit Compliance Record of HPLC software 21CFR &amp; audit trail reports on product testing.</li> </ul> |  |

| <b>Decision of 323<sup>rd</sup> RB meeting: Registration Board deferred the case for submission of reply to the above cited shortcomings within six months.</b>  |  |
| <b>Response by the firm:</b>   |  |
| <b>Deficiencies</b>  | <b>Response by the firm</b>  |
| Submit GMP certificate / inspection report of the drug product manufacturer  | Submitted  |
| Submit data in section 3.2.S.4.1 as per the guidance document approved by Registration board which specifies that Copies of the drug substance specification and analytical procedures used for routine testing of the drug substance /active pharmaceutical ingredient by both drug substance & drug product manufacturer is required .you have only submitted the specifications of API from the drug product manufacturer .   | Submitted  |
| Provide verification studies of drug substance from drug product manufacturer.   | Submitted  |
| Submit COA of reference standard / working standard actually used in the analysis of drug substance.   | Submitted  |
| Submit API stability data till complete shelf life since the real time stability data is only for 12 month.  | Submitted  |
| Justify why the qualitative composition of your product is different from that of innovator's product.   | Submitted  |
| Provide description of pharmaceutical development as per the CTD guidance document which specifies that A brief information on the pharmaceutical development shall be included this information specifies the justification of formulation and method of manufacturing it is also important that critical quality attributes (CQAs) and critical process parameters (CCP) shall be discussed  | Submitted  |
| Submit information in section 3.2.P.1.1 as per the CTD guidance document which specifies that discussion shall be provided for the key physicochemical characteristics (e.g. water content, solubility, and particle size distribution, polymorphic or solid state form) of the drug substance (s) that can influence performance of the drug product.   | Submitted  |
| Justify why pharmaceutical equivalence is conducted against a comparator product instead of performing against the innovator's product.  | As Product specifications are of USP specification so the Pharmaceutical equivalence studies were performed against the same USP specification comparator product. |
| Clarify why you have mentioned not applicable for all section of 3.2.P.4 excipients, while your formulation contains excipients  | Section 3.2.P.4 is revised.  |
| Provide complete analytical method of your drug product instead on attaching copy of an old version of USP monograph.  | Complete analytical method of the drug product is submitted  |
| Provide verification studies of the analytical method of drug product as per ICH guidelines since all the tests performed are not according to ICH guidelines.   | Submitted  |
| Provide COA of working standard /reference standard actually used in the analysis of drug product in section 3.2.P.6.  | Submitted  |

|   |  |
|---|--|
| Provide information in section 3.2.P.8.1 as per the CTD guidance document since you have not submitted any information in this section  | Submitted  |
| Provide information in section 3.2.P.8.2 as per CTD guidance document   | Submitted  |
| Justify why dissolution test is not performed in stability studies  | Dissolution data was performed in stability studies but the test was skipped unintentionally in the documentation of stability data.   |
| USP monograph specifies that the retention time for ciprofloxacin is 6.4-10.8 min , while in your submitted analytical record the retention time of ciprofloxacin is below 6.4 minutes  | Testing was performed as per specified method of Ciprofloxacin tablet USP monograph and RT of peak obtained was about 6.2minutes. No change was done to adjust the retention time. |
| USP monograph specifies the use of ciprofloxacin ethylenediamine analog in standard solution as system suitability solution and that the relative retention times for ciprofloxacin ethylenediamine analog and ciprofloxacin are 0.7 and 1.0 respectively, while your analysis does not show any other peak within the relative retention times of 0.7 and 1.0. | For stability testing, system suitability solution was not used. After registration, we will use system suitability solution and will follow the method as per the USP monograph.  |

#### **Evaluation by PEC<sup>3</sup>:**

| <b>Sr. No</b> | <b>Shortcomings communicated</b>   | <b>Response by the firm</b> |
|---------------|--|-----------------------------|
| 1.            | Submit specifications and analytical method of the drug substance from both API manufacturer as well as product manufacturer in section 3.2.S.4.1 and 3.2.S.4.2.   |                             |
| 2.            | Submit COA of relevant batch of API from both API manufacturer as well as drug product manufacturer.   |                             |
|               | Submit COA of reference standard / working standard actually used in the analysis of API.  |                             |
| 3.            | Provide details about the particle size of API as well as mannitol used for the product development.   |                             |
| 4.            | CDP studies show negligible drug release in 15 minutes while innovator's product literature reveals that the drug product release more than 85% within 10-15 inutes. Clarification is required in this regard. |                             |
| 5.            | Submit evidence of import of API including clearance certificate.  |                             |
| 6.            | Submit BMR of three stability batches.   |                             |

**Decision of 336<sup>th</sup> RB meeting: Registration Board deferred the case for submission of reply to the above cited shortcomings.**

#### **Response by the firm:**

| <b>Sr. No</b> | <b>Shortcomings communicated</b>   | <b>Response by the firm</b>  |
|---------------|--|--|
| 1.            | Submit specifications and analytical method of the drug substance from both API manufacturer as well as product manufacturer in section 3.2.S.4.1 and 3.2.S.4.2. | Submitted  |
| 2.            | Submit COA of relevant batch of API from both API manufacturer as well as drug product manufacturer.   | Submitted  |
|               | Submit COA of reference standard / working standard actually used in the analysis of API.  | Submitted  |
| 3.            | Provide details about the particle size of API as well as mannitol used for the product development.   | Submitted  |
| 4.            | CDP studies show negligible drug release in 15 minutes while innovator's product literature reveals that the drug product release more than 85% within 10-       | The dissolution recovery (or drug release) of Montelukast oral granules (Lumont sachet) has been found to be negligible within 15 minutes. This is because the innovator of Singulair Oral Granules employed the surfactant Sodium Dodecyl Sulfate (SDS) as a dissolution medium, which is recommended by the US Phanuacopoeia for routine |

|                            |   |  |
|----------------------------|---|--|
|                            | 15 inutes. Clarification is required in this regard.              | dissolution testing of Montelukast Oral Granules, but not as CDP medium.<br>The comparative dissolution media recommended by the FDA BCS are 0.1N HCl (pH 1.2), Acetate Buffer (pH 4.5), and Phosphate Buffer (pH 6.8). Therefore, during the CDP study in these media, according to the DRAP Minutes of the 293 <sup>rd</sup> Meeting of the Registration Board (6th -8th January, 2020 the use of any surfactant is not acceptable.<br>Consequently, the firm did not use any surfactant, which explains why our drug release is negligible within 15 minutes. |
| 5.                         | Submit evidence of import of API including clearance certificate. | Submitted.   |
| 6.                         | Submit BMR of three stability batches.                            | Submitted.   |
| <b>Decision: Approved.</b> |   |  |

| Module-II (Quality Overall Summary)   | Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product. |
| Name, address of drug substance manufacturer  | Farmabios S.p.A. Via Pavia, 1 27027 Gropello Cairoli, (PV) Italy  |
| Module-III Drug Substance:  | Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.  |
| Stability Studies of Drug Substance (Conditions & duration of Stability)            | The accelerated stability study data is conducted at 40°C ±2°C / 75% ± 5% RH for 6 months.  |

|   |  |
|---|--|
| studies)  | The real time stability data is conducted at $25^{\circ}\text{C} \pm 2^{\circ}\text{C}$ and $60\% \pm 5\%$ for 48 months.  |
| Module-III Drug Product:  | Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation report, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability. |
| Pharmaceutical Equivalence and Comparative Dissolution Profile          | Comparative analysis Studies against the reference product of Caelyx injection has been submitted.   |
| Analytical method validation/verification of product                    | Firm has submitted analytical method verification studies of the drug product.   |
| Container closure system of the drug product                            | AGRABLOC 12.5 mg/50 ml IV Concentrate Solution For Infusion is packed with the following primary packaging materials: - 50 ml colorless Type I glass vial - 20 mm bromobutyl red rubber stopper - 20 mm flip-off cover<br>AGRABLOC is supplied as 1 vial with a PIL in box containing approved text, batch number and expiration date.   |
| Stability study data of drug product, shelf life and storage conditions | Firm has submitted stability study data of 3 batches.<br>The accelerated stability study data is conducted at $40 \pm 2^{\circ}\text{C}$ , $75\% \pm 5\%$ R.H for 6 months.<br>The real time stability study data is conducted at $30 \pm 2^{\circ}\text{C}$ , $75\% \pm 5\%$ R.H for 24 months.   |

#### Remarks of Evaluator<sup>II</sup>:

| Section# | Observations   | Firm's response   |
|----------|--|---|
| 1.3.3    | Submit original valid legalized GMP certificate of drug product manufacturer and COPP of applied product issued by relevant regulatory authority of country of origin. | <ul style="list-style-type: none"> <li>Firm has submitted copy of GMP certificate no. IT-API/249/H/2022 issue in name of M/s Farmabios S.p.A on basis of inspection conducted on 01-10-2021 by competent authority of Italy, wherein API manufacturing activity of Tirofiban has been endorsed.</li> <li>Firm has submitted original, legalized CoPP certificate (No. 2023/3145) dated 25-07-2023 issued by Turkish Medicines and Medical Devices Agency. The CoPP confirms free sale status of the product in exporting country as well as GMP status of the manufacturing site through periodic inspection every year.</li> <li>The name of importing country on CoPP is mentioned as Pakistan. Furthermore, the CoPP was valid till 24-07-2025.</li> <li>Firm has submitted original legalized GMP certificate no. TR/GMP/2023/150 issued by Turkish Medicine &amp; Medical Devices Agency covering manufacturing operations of Sterile products.</li> </ul> |
| 1.3.5    | Copy of valid DSL of the applicant shall be submitted.   | Firm has submitted copy of DSL as per following details:<br><b>License No:</b> 0311<br><b>Address:</b> 246-B, Block 6, P.E.C.H.S, Karachi, Pakistan   |

|             |  |   |
|-------------|--|---|
|             |  | <b>Validity:</b> 30-01-2028<br><b>Status:</b> by way of wholesaler<br><b>Address of Godown:</b> N/A   |
| 3.2.P.2.1   | Submit drug-excipient compatibility studies since qualitative composition of applied formulation is different from that of the innovator drug product. Moreover Clarification shall be submitted regarding inclusion of mannitol in master formulation since innovator drug product does not contain it. | Agrabloc formulaton differs from the original prioduct formulation by two excipients, the buffer system and the substance used for isotonic adjustment. However, although the buffer is differen the pH range of the solution has not changed. Likewise the osmolality of the solution did not show a significant difference with the use of mannitol instead of sodium chloride. Another confirmation is that the 24 month stability test results show that th prdouct retains the same properties as at time of manufacture.  |
| 3.2.P.2.2.1 | Justification shall be submitted for the limit & results of pH test applied in Pharmaceutical equivalence studies with reference to pharmacopoeial monograph.  | Agrabloc and original product's pH is same.   |
| 3.2.P.3.3   | Justification shall be submitted for not performing terminal sterilization.  | Terminal sterilization cannot be applied to solution-type products that are not resistant to autoclave temperature in the final primary packaging the drug solution is sterilized by passing through a suitable bacteria retaining filter after preparation. When the filter integrity test records made before and after this filtration process confirm the performance of the filtration process it is proven that the solution has been fully sterilised at this point. The portion of the manufacturing process from thi s point until the fully closed finished product will be viewed as an aseptic processin. In other words, aseptic filling and closure will ensure sterility for all vials of the series produced depending on the adequacy of the measures taken at the facility.<br><br>"In accordance with the general section titled "Methods for the Preparation of Sterile Products", validation studies accordance (including with sterility assurance level study) of the aseptic processes cesses (filling and closing steps) of this product after Sterile filtration are carried out at regular intervals (separately for each dosage form and volume) according to the relevant procedure. |
| 3.2.P.8.3   | <ul style="list-style-type: none"> <li>Long term stability studies on Zone-IV conditions till claimed shelf life shall be submitted for three batches</li> </ul>   | Firm has submitted long term stability studies data of three batches of applied product at Zone-IVb conditions for 24 months.   |

**Decision of 330<sup>th</sup> meeting:** Registration Board deferred the case for submission of reply to the above cited shortcomings.

**Firm's response:**

|           |  | study) of the aseptic processes cesses (filling and closing steps) of this product after Sterile filtration are carried out at regular intervals (separately for each dosage form and volume) according to the relevant procedure. |
| 3.2.P.8.3 | <ul style="list-style-type: none"> <li>Long term stability studies on Zone-IV conditions till claimed shelf life shall be submitted for three batches</li> </ul> | Firm has submitted long term stability studies data of three batches of applied product at Zone-IVb conditions for 24 months.  |

**Decision of 331<sup>st</sup> meeting:** Deferred for clarification of applied dosage form and formulation with reference to the innovator drug product

**Firm's response:** Firm has submitted that applied dosage form is "Liquid Concentrate solution for injection" and further stated that Agrabloc formulaton differs from the original prioduct formulation by two excipients, the buffer system and the substance used for isotonic adjustment. However, although the buffer is different, the pH range of the solution has not changed. Likewise, the osmolality of the solution did not show a significant difference with the use of mannitol instead of sodium chloride. Another confirmation is that the 24 month stability test results show that the prdouct retains the same properties as at time of manufacture.

**Decision of 336<sup>th</sup> RB meeting:** Deferred for submission of clarification on scientific grounds for variation in excipients from the innovatr drug product and rationale for use of Mannitol for the intended role in the formulation.

**Response by the firm:**

With reference to your letter of the 336th DRB meeting regarding deficiency documents for our product "Agrabloc" (Tirofiban 12.5mg/50ml) Concentrate solution for infusion. We have submitted this query already and still asked the same for further clarification. Submission of clarification on scientific grounds for variation in excipients from the innovator drug product and rationale for use of Mannitol for the intended role in the formulation.

During the period of patent protection for the original product, a group of generic equivalents were uthorized in various countries with a different buffer system from the original product and these products continued to be on the market with the same formula after the patent protection of the original product ended. Among these generic products, one of them (TIROFIBAN JUNO), for which explicit formula information is given in the short product information, has the same concentrated formula as AGRABLOC

The AGRABLOC formulation differs from the original product formulation by two excipients: the buffer system and the substance used to adjust isotonicity. However, although the buffer is different, the pH range of the solution has not changed. In other words, the use of different substances did not change the effect (performance) of the buffer effect on product stability in the 24th month stability test results. / Likewise, the osmolality of the solution did not show a significant difference with the use of mannitol instead of sodium chloride.

In conclusion, both the original formulation and the generic alternative formulation of tirofiban have been in use for a long time. This is an important confirmation that AGRABLOC components are compatible. Another confirmation is that the 24-month stability test results show that the product retains its properties at the date of manufacture.

**Decision:** Approved as per Policy for inspection of Manufacturer abroad.

| Module-III Drug Substance:  | Firm has submitted detailed drug substance data for both sources related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.                   |
| Stability Studies of Drug Substance<br>(Conditions & duration of Stability studies) | Firm has submitted stability study data of 3 batches of API at accelerated as well as real time conditions. The real time stability data is conducted at 30 °C±2. The stability study data is till 36 months.  |
| Module-III Drug Product:  | Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.  |
| Pharmaceutical Equivalence and Comparative Dissolution Profile                      | Firm has submitted pharmaceutical equivalence Euflexxa   |
| Analytical method validation/verification of product                                | Firm has submitted analytical method validation studies for the applied product.   |
| Container closure system of the drug product  | Pre-filled syringe   |
| Stability study data of drug product, shelf life and storage conditions             | Firm has submitted stability study data of 3 batches<br>The accelerated stability study data is conducted at   |
|   | 25°C ±2°C / 60% ± 5% RH for 6 months. The real time stability study data is conducted at 5°C ±3°C / 65% ± 5% RH. The real time stability study data for 3 batches is for 36 months only.   |

**Evaluation by PEC:**

- The submitted COPP does not clarify the description of applied product whether pre-filled syringe or otherwise. Also the strength is mentioned only as Each ml contains Sodium hyaluronate .... 10mg
- Valid authorisation letter from manufacturer s required since submitted NOC was valid till 09-11-2022.
- Firm has submitted legalized **GMP** certificate (No. 2020-D1-3554) dated 23-10-2020 issued by Ministry of Food and Drug Safety, South Korea in name of M/s Shin Poong Pharmaceutical Co., Ltd. 7, Wonsi-ro, Danwon-gu, Ansan-si, Gyeonggi-do, Republic of Korea wherein pre-filled syringe dosage form has not been mentioned.
- Justification shall be submitted for performing stability studies as per refrigerating conditions since the reference product Hyalgan approved by ANSM of France recommends storage condition of store below 25°C.

**Decision of 333<sup>rd</sup> meeting of Registration Board:** Registration Board deferred the case for submission of reply to the above cited shortcomings.

**Submission by the firm:**

| Sr. No | Reason for deferment   | Response by the firm  |
|--------|--|---|
| 1.     | The submitted COPP does not clarify the description of applied product whether pre-filled syringe or otherwise. Also the strength is mentioned only as Each ml contains Sodium hyaluronate .... 10mg   | Firm has submitted copy of CoPP certificate (No. 2024-D1-0199) dated 08-02- 2024 issued by Ministry of Food and Drug Safety, South Korea for Hyal Forte Injection (pre-filled syringe). The CoPP confirms free sale status of the product in exporting country as well as GMP status of the manufacturing site through periodic inspection every 3 years. |
| 2.     | Valid authorisation letter from manufacturer s required since submitted NOC was valid till 09-11-2022.   | Firm has submitted copy of NOC from M/s Shin Poong Pharmaceutical Co., Ltd. which authorises M/s Gene-Tech Laboratories B-246, Block 6, P.E.C.H.S, Karachi,Pakistan to register their products in Pakistan. The authorization letter is issued on 29-01-2024.   |
| 3.     | Firm has submitted legalized <b>GMP</b> certificate (No. 2020-D1-3554) dated 23-10-2020 issued by Ministry of Food and Drug Safety, South Korea in name of M/s Shin Poong Pharmaceutical Co., Ltd. 7, Wonsi-ro, Danwon-gu, Ansan-si, Gyeonggi-do, Republic of Korea wherein pre-filled syringe dosage form has not been mentioned. | Firm has submitted copy of GMP certificate (No. 2024-D1-0201) dated 08-02-2024 issued by Ministry of Food and Drug Safety, South Korea in name of M/s Shin Poong Pharmaceutical Co., Ltd. 7, Wonsi-ro,Danwon-gu, Ansan-si, Gyeonggi-do, Republic of Korea wherein pre-filled syringe dosage form has been mentioned in injections.                        |
| 4.     | Justification shall be submitted for performing stability studies as per refrigerating conditions since the reference product Hyalgan approved by ANSM of France recommends storage condition of store below 25°C.   | Firm has <b>not</b> submitted any written justification instead a chart is submitted which does not specify any product.  |

**Decision of 336<sup>th</sup> RB meeting: Deferred for following:**

- **Justification for performing stability studies as per refrigerating conditions since the reference product Hyalgan approved by ANSM of France recommends storage condition of store below 25°C.**

**Response by the firm:**

We, Shin Poon Pharm. Co., Ltd., would like to justify the reason of performing stability studies as per refrigerating conditions since the reference product recommends storage condition of store below 25°C.

While developing the product, our R&D team found a potential risk of viscosity reduction due to an increase in temperature. Therefore, we conducted stability studies as per refrigerating conditions and set the storage condition as 2~8°C.

**Decision: Registration Board deferred for clarification as the product is not stable at/below 25<sup>o</sup> C, since the reference product recommends the storage condition below 25<sup>o</sup> C**

**Case No. 04      Miscellaneous case**

| <b>Case Referred back by Drugs Appellate Board</b>  |  |
|---|--|
| Additional Director, Legal Affairs has forwarded the decision of 166 <sup>th</sup> sitting of Drugs Appellate Board held on 5 <sup>th</sup> June 2024. The case details are as under:   |  |
| Appeal No   | 23/2024  |
| Appellant   | M/s Pharma Health Pakistan (Pvt.) Limited, Lahore  |
| Appeal preferred against the decision of:   | Registration Board   |
| Decision Appealed Against:  | Against the decision rendered by Drug Registration Board in its 329 <sup>th</sup> held on 6 <sup>th</sup> to 8 <sup>th</sup> June, 2023 regarding product "E Dol 2mg Tablet" |
| Date of the issuance of the decision:   | 11/01/2024   |
| Date of the Appeal received:  | 09/03/2024   |
| Appellant represented by:   | Ms. Samra Ahsan, Manager Regulatory, Affairs   |
| <p>1. The Drug Registration Board in its 329<sup>th</sup> Meeting held on 06<sup>th</sup> to 08<sup>th</sup> of June, 2023 ('Impugned Decision') rejected the Appellant's application for registration of 'E Dol 2mg Tablet' on the ground that "it is neither approved by any reference regulatory authorities/ agencies which were adopted by the Registration Board in its 275<sup>th</sup> Meeting nor approved previously by the Registration Board."</p> <p>2. Ms. Samra Ahsan appearing on behalf of the Appellant contended that the Subject Drug is an international registered brand of Bayer PLC with the brand name Progynova 2mg, further that a generic of the said drug has already been registered by the Registration Board by the name and style of 'Progens Tablet 2mg in favor of Dson Research Laboratories Pvt. Limited, having Registration No. 071383. The Appellant further contended that the subject drug is approved by the MHRA and submitted documentary evidence in this regard.</p> <p>3. The Board prima facie finds credence in Appellant's claim and is of the opinion that the matter should be reviewed afresh by the Registration Board in light of the Appellant's contentions which do not seem to have been taken into consideration by the Registration Board.</p> <p>4. For the reasons as provided above, the instant Appeal is allowed and the matter is remanded back to the Registration Board. The Appellant is directed to file a detailed representation with the Registration Board, placing all details of Subject Drug's approval by Reference Regulatory Authorities and previous registration (if any) by the Registration Board. The Registration Board shall decide the application through a well-reasoned and speaking order and shall be free to seek all necessary information from the Appellant as it deems fit in accordance with the laws.</p> |  |
| <b>History of the case</b>  |  |
| The case was presented in 329 <sup>th</sup> meeting of Registration Board wherein the following decision was made   |  |
| <b>Name and address of manufacturer / Applicant</b>   | <b>M/s Pharma Health Pakistan Pvt Ltd. 17-Km, Ferozepur Road, Lahore</b>   |
| Brand Name +Dosage Form + Strength  | E Dol 2mg Tablet   |
| Composition   | Each Gram Contains:<br>Estradiol Valerate...2mg  |
| Diary No. Date of R& I & fee  | Dy No. 17253: 07-03-2019   |

|  |   |
|--|---|
|  | PKR 20,000/-: 06-03-2019  |
| Pharmacological Group  | Estrogens   |
| Type of Form   | Form 5  |
| Finished Product Specification   | Firm has claimed in house specification   |
| Pack size & Demanded Price   | As per SRO  |
| Approval status of product in Reference Regulatory Authorities.  | Could not be confirmed  |
| Me-too status  | Could not be confirmed  |
| GMP status   |   |
| Remarks of the Evaluator <sup>3</sup> .  | <ul style="list-style-type: none"> <li>• Latest GMP inspection report conducted within a period of last three years.</li> <li>• Clarification is required since on some pages of Form 5, tablet dosage form is written while the label claim specifies that it is a topical dosage form.</li> <li>• Evidence of required manufacturing facility / section approval letter from Licensing Division.</li> <li>• Evidence of approval of applied formulation in reference regulatory authorities/agencies which were adopted by the Registration Board in its 275th meeting.</li> <li>• Evidence of applied formulation/drug already approved by DRAP (generic / me-too status) alongwith registration number, brand name and name of firm.</li> </ul> |
| <p><b>Decision:</b> Registration Board decided to reject the application since the applied product is neither approved by any reference regulatory authorities/agencies which were adopted by the Registration Board in its 275th meeting nor approved previously by Registration Board.</p> <p>Moreover, firm has also not submitted any clinical evidence to establish safety and efficacy of the applied formulation.</p>   |   |
| <p><b>Evaluation:</b></p> <p>As per the submissions of the firm, the reference of RRA approval has been verified from MHRA with following details:</p> <ul style="list-style-type: none"> <li>• Name: Progynova® 2 mg Tablets</li> <li>• Label claim: Each sugar coated tablet contains: Estradiol valerate... 2mg</li> <li>• RRA: MHRA, UK</li> </ul> <p>Moreover, following me-too status is also verified:</p> <ul style="list-style-type: none"> <li>• Name: Progens Tablets 2mg</li> <li>• Registration No: 71303</li> <li>• Company: Dyson Research Laboratories (Pvt.) Ltd</li> </ul> |   |
| <p><b>Decision of 339<sup>th</sup> meeting of Registration Board: Registration decided to convey the decision of Appellate Board to the applicant for compliance.</b></p>  |   |

#### Agenda of Mst. Farzana Raja

#### Case no. 01      Registration applications for local manufacturing of (Human) drugs a.                  New cases

|      |   |   |
|------|---|---|
| 139. | Name, address of Applicant / Marketing Authorization Holder | M/s Wilson's Pharmaceuticals.<br>387-388, I-9, Industrial Area, Islamabad   |
|      | Name, address of Manufacturing site.                        | M/s Wilson's Pharmaceuticals.<br>387-388, I-9, Industrial Area, Islamabad   |
|      | Status of the applicant                                     | <input checked="" type="checkbox"/> Manufacturer<br><input type="checkbox"/> Importer<br><input type="checkbox"/> Is involved in none of the above (contract giver) |

|   |   |

| 5. | 3.2.S.7.3   | Submit drug substance stability studies of 3 batches till shelf life.  | Drug substance stability studies of 3 batches till shelf life submitted.   |
| 6. | 3.2.P.2.2.1 | Details of product against which pharmaceutical equivalence and Comparative dissolution conducted.   | Details of product against which pharmaceutical equivalence and Comparative dissolution conducted submitted.   |
| 7. | 3.2.P.5.2   | Justification to be provided for the selection of dissolution parameters including dissolution media buffer (6.8) volume of dissolution medium, rpm and type of USP apparatus.   | Vonoprazan is a highly soluble drug substance based on ICH Q6A, which states that the drug substance should be considered highly soluble if it meets following two conditions:<br>1. The dissolution profile of all strengths of the dosage form should be rapid i.e. Dissolution >80 % in 15 minutes at pH 1.2, 4.5 & 6.8.<br>2. The highest drug product's strength is soluble in 250mL or less of aqueous media over the pH range of 1.2 to 6.8 at 37°C ± 1°C.<br>As per ICH Q6A, for dosage forms having drug substances falls in above conditions will be considered as highly soluble drugs and do not require development of discriminatory dissolution method / parameters. Generally, a single time point with one medium is acceptable.<br>Comparative Dissolution Study by Genome the 'P-CAB Tablets' against the Innovator Product<br>'Takecab Tablets' Vonoprazan release more than 85% in all three mediums within 15minutes at 50 RPM. Also, the solubility of Vonoprazan is very high throughout the physiological pH range (1.2 to 6.8). The lowest solubility of Vonoprazan is found to be in pH 6.8 as compared to solubility in pH 1.2 (about 16.5mg/ml) & pH 4.5 (8.1mg/ml) i.e. is about 4.7 mg/ml which is greater than the highest |

|    |         |   |   |
|----|---------|---|---|
|    |         |   | <p>strength divided by 250 (20mg/250=0.08mg/ml), so we selected dissolution medium having pH 6.8 as a worst-case scenario.</p> <p>In light of above discussion and high solubility of drug substance, discriminatory dissolution parameters are not required for Vonoprazan Tablets 10mg and 20mg. Therefore, generalized lowest 50 RMP with 900ml medium (Most common volume as per USP &lt;1092&gt;) was selected for release and stability studies of the drug product.</p> <p>As per Comparative Dissolution Study by Genome the 'P-CAB Tablets' against the Innovator Product 'Takecab Tablets' Vonoprazan release more than 85% in all three mediums within 15minutes.</p> <p>Therefore, we selected the time point i.e. 15 minutes for dissolution</p> <p><b><i>However as per USFDA review report Medium used for dissolution medium is Acetate buffer pH 4.5 while firm used phosphate buffer pH 6.8</i></b></p> |
| 8. | 3.2.P.8 | Initiation date of stability studies not mentioned. | Submitted.  |

**Previous Decision (M-336):** Deferred for clarification of use of phosphate buffer i.e pH 6.8 as dissolution medium while from Innovator product review documents it is evident that Acetate buffer pH 4.5 is used as dissolution medium

**Reply:** Vonoprazan is a highly soluble drug substance based on ICH Q6A, which states that the drug substance should be considered highly soluble if it meets following two conditions:

1. The dissolution profile of all strengths of the dosage form should be rapid i.e. Dissolution >80 % in 15 minutes at pH 1.2, 4.0 & 6.8.
2. The highest drug product's strength is soluble in 250mL or less of aqueous media over the pH range of 1.2 to 6.8 at 37°C ± 1°C.

As per ICH Q6A, for dosage forms having drug substances falls in above conditions will be considered as highly soluble drugs and do not require development of discriminatory dissolution method / parameters. Generally, a single time point with one medium is acceptable.

During *Comparative Dissolution Study* of 'P-CAB 20mg Tablets' manufactured by Genome Pharmaceuticals versus the Innovator Product 'Takecab 20mg Tablets', Vonoprazan release was observed to be more than 85% in all three mediums within 15minutes at 50 RPM. Also, the solubility of Vonoprazan is very high throughout the physiological pH range (1.2 to 6.8). The lowest solubility of Vonoprazan is found to be in pH 6.8 as compared to solubility in pH 1.2 (about 16.5mg/ml) & pH 4.5 (about 8.1mg/ml) i.e. is about 4.7 mg/ml which is greater than the highest strength divided by 250ml (20mg/250ml=0.08mg/ml), so we selected dissolution medium having pH 6.8 as a worst-case scenario.

Moreover, we developed our product early in 2021 and after successful development the batches were charged on stability in March, 2021 and 6 months stability was completed on August, 2021. Till that there was no dissolution method available in USFDA website. While the innovator report NDA 215152 for Voquenza Triple Pack was published on 05-03-2022.

After Publication we tested our product, P-CAB 20mg Tablets, during 18<sup>th</sup> month Stability Studies on August 2022

|   |   |   |
|---|---|---|
| as per FDA Dissolution Medium and results are in limit.   |   |   |
| Further, we have revised the Specification and Method of Analysis. Documents are attached for your kind consideration.  |   |   |

|   | Name and address of API manufacturer.   | M/s CTX Lifesciences PVT, LTD<br>Address: Block no. 251-252 Sachin- Magdalla Road<br>GIDC, Sachin Surat, Gujrat, India  |
|   | Module-II (Quality Overall Summary)   | Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product. |
|   | Module-III Drug Substance:  | Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubility's, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.  |
|   | Stability Studies of Drug Substance<br>(Conditions & duration of Stability studies)   | Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at $40^{\circ}\text{C} \pm 2^{\circ}\text{C} / 75\% \pm 5\%\text{RH}$ for 6 months. The real time stability data is conducted at $30^{\circ}\text{C} \pm 2^{\circ}\text{C} / 65\% \pm 5\%\text{RH}$ for 72 months.  |
|   | Module-III Drug Product:  | Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.                   |
|   | Pharmaceutical Equivalence and Comparative Dissolution Profile  | Firm has submitted pharmaceutical equivalence of their product against the Onseron Solution 4mg/5ml of by M/s Indus Pharma. performing quality tests Identification, Appearance, pH, Assay.   |
|   | Analytical method validation/verification of product  | Firm has submitted analytical method verification study reports for as drug product.  |

**DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA**

|    |   |   |
|----|---|---|
| 1. | Reference of previous approval of applications with stability study data of the firm (if any)   |   |
| 2. | Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.                         | Copy of GMP certificate No. 22063346 issued by Food & Drugs Control Administration, Gujrat valid till 29/05/2025.   |
| 3. | Documents for the procurement of API with approval from DRAP (in case of import).   | Firm has submitted copy Commercial Invoice # EI/3012100703, dated; 22-12-2021 cleared by DRAP (Karachi) dated: 05-01-2022 specifying Ondansetron Hydrochloride batch # 21ON000044 |
| 4. | Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc. | Firm has submitted complete record of testing of all batches, raw data sheets, COA and summary data sheets.   |
| 5. | Compliance Record of HPLC software 21CFR & audit trail reports on product testing   | Firm has submitted certificate of 21 CFR compliance for the HPLC system along with audit trail report for product testing.  |
| 6. | Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)                         | Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.   |

**Evaluation by PEC:**

| S.No | Section               | Shortcoming   |
|------|-----------------------|---|
| 1.   | 2.3.R.1.1             | <ul style="list-style-type: none"> <li>As mixing is a critical step and batch is prepared in beaker by hand mixer than how it is ensured that uniform mixing is done.</li> <li>Scientific rationale for selecting the batch size of 40 bottles for manufacturing of trial batches, along with the submission of complete record of no. of bottles used in analytical testing of trial batches of finished product at different time points of stability studies.</li> </ul> |
| 2.   | 3.2.S.4.3             | Submitted analytical method verification report by drug product manufacturer of drug substance shows different concentration than submitted analytical testing method of assay of drug substance.   |
| 3.   | 3.2.P.2.1.1           | Compatibility studies of the Drug Substance(s) with Sucralose shall be provided as the qualitative composition of the formulation is not similar to innovator / reference product.  |
| 4.   | 3.2.P.5.1 & 3.2.P.5.4 | Deliverable volume is not part of specification as specified in USP monograph.. Clarification is required.  |
| 5.   | 3.2.P.5.2             | Concentration of sample preparation is not as per USP monograph. Clarification is required.   |
| 6.   | 3.2.P.4.4             | Composition of the Drug Product includes Sorbitol. In light of DRAP's letter/advisory No.F.3-41/2023-QC dated 01-12-2023, applicant shall submit CoA's by respective vendor(s) as well as in-house batch analysis results, including test results for EG and DEG impurities.  |

**Previous Decision (M-336):** Registration Board deferred the case for submission of reply to the above cited shortcomings and evaluation by PE&R Division.

**Evaluation by PEC:**

| 2.                     | 3.2.S.4.3             | Submitted analytical method verification report by drug product manufacturer of drug substance shows different concentration than submitted analytical testing method of assay of drug substance.   | Analytical method verification report by drug product manufacturer is attached   |                        |  |  |  |                 |          |             |       |            |            |           |            |
| 3.                     | 3.2.P.2.1.1           | Compatibility studies of the Drug Substance(s) with Sucralose shall be provided as the qualitative composition of the formulation is not similar to innovator / reference product.  | Formulation of Ondonix oral solution 4mg/5ml is qualitatively similar with reference except sodium saccharine/ Sucralose. Innovator is using Sodium Saccharine while we used sucralose to meet our quality target product profile. Therefore, drug Compatibility study protocol & Report are attached  |                        |  |  |  |                 |          |             |       |            |            |           |            |
| 4.                     | 3.2.P.5.1 & 3.2.P.5.4 | Deliverable volume is not part of specification as specified in USP monograph.. Clarification is required.  | Deliverable volume test has been included in specification, and the test is conducted at initial time point Report attached  |                        |  |  |  |                 |          |             |       |            |            |           |            |
| 5.                     | 3.2.P.5.2             | Concentration of sample preparation is not as per USP monograph.  | As per USP monograph, preparation of sample solution is volume of sample eq. to 9mg of ondansetron in 100ml flask. As per our product label claim i.e. 4mg ondansetron/5ml, if we take sample volume eq. to 9mg of ondansetron so  |                        |  |  |  |                 |          |             |       |            |            |           |            |

|    |           |  |   |
|----|-----------|--|---|
|    |           | Clarification is required.   | required sample volume will be 11.25ml, practically it is not possible to take 11.25ml quantitatively with accuracy. That's why we take 10ml sample which is eq.to 8mg of ondansetron and 9mg of ondansetron hydrochloride. |
| 6. | 3.2.P.4.4 | Composition of the Drug Product includes Sorbitol. In light of DRAP's letter/advisory No.F.3-41/2023-QC dated 01-12-2023, applicant shall submit CoA's by respective vendor(s) as well as in-house batch analysis results, including test results for EG and DEG impurities. | Analytical report of Sorbitol M/s 'Genix Pharma along with Vendors COA are attached   |

**Decision: Approved.**

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

#### Evaluation by PEC-V:

The application has been evaluated in the light of CTD guidance document and found deficient for information/ documents as mentioned against each section.

| S. No | Sections  | Observations/Deficiencies/ Short-comings   |
|-------|-----------|--|
| 1.    | 1.3.5     | Submit valid GMP inspection report/ GMP certificate of the manufacturing unit issued within the last three years.  |
| 2.    | 3.2.P.2.1 | a) Clarification is required for the use of surfactant in the formulation.<br>b) Justify the use of fumed silicon dioxide instead of colloidal form.   |
| 3.    | 3.2.P.5.1 | The weight of coated tablet is 165mg whereas, total quantity of film coating material in section 3.2.P.1 is 5.97 mg. Justification is required.  |
| 4.    | 3.2.8.3   | a) Provide the results/calculation sheets for system suitability as per USP.<br>b) Provide relative retention time for leflunomide related compound B, leflunomide related compound A, leflunomide related compound C, and leflunomide.<br>c) Provide resolution results for leflunomide related compound C and leflunomide. |
| 5.    | 3.2.8.3   | a) Reference of previous approval of applications with stability study data of the firm (if any).<br>b) Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.<br>c) Documents for the procurement of API with approval from DRAP (in case of import).      |

**Previous Decision(M-336): Registration Board deferred the case for submission of reply to the above cited shortcomings.**

| S. No | Sections  | Observations/Deficiencies/ Short-comings  | Firms Response   |  |
|-------|-----------|---|--|--|
| 1.    | 1.3.5     | Submit valid GMP inspection report/ GMP certificate of the manufacturing unit issued within the last three years.   | GMP certificated submitted dated:3 <sup>rd</sup> August 2022.  | Submitted  |
| 2.    | 3.2.P.2.1 | a) The USFDA inactive database provides the maximum potency per unit of amaranth as 0.01mg whereas , you have used 0.073mg. Justification/clarification is required . | a) At the time of dossier submission i.e Faburary-2023, no safe limit for amaranth color was available on the USFDA inactive ingredient database | The limit of amaranth in oral film coated tablet as per USFDA inactive database is 0.01mg whereas, the limit provided by firm is |

|  |  |   |  |                                       |
|--|--|---|--|---------------------------------------|
|  |  | <p>b) Clarification is required for the use of surfactant in the formulation.</p> <p>c) Justify the use of fumed silicon dioxide instead of colloidal form.</p> | <p>and as per reference Annexure I it can be seen that the inactive data base was updated on 24-April-2024. Also, according to the newly updated database the allowable FDA safe limit for amaranth color in oral tablets is 0.48mg/MDE and the quantity of Amaranth color used in our formulation is 0.073mg per tablet, which falls well within the allowable limit</p> <p>b) Sodium lauryl sulfate is added as a surfactant. It is an anionic surfactant that act as a wetting or solubilizing agent. Hence, it enhances the dissolution. As far as the safety and efficacy of the product is concerned, the maximum allowed FDA safe limit of sodium lauryl sulfate in oral tablet film coated is 40mg/MDE. Whereas, the quantity of sodium lauryl sulfate used in our formulation is 5.00mg/tablet i.e. 3.03% which is well within the safe limit defined by FDA. Also, Leflunomide 10mg tablet Manufactured by Medac Gesellschaft für klinische Spezialpräparate mbH Fehlandstr.3, 20354 Hamburg Germany, also contains sodium lauryl sulphate in its formulation.</p> | <p>of uncoated tablet i.e 0.48mg.</p> |
|--|--|---|--|---------------------------------------|

|    |           |   |  |   |
|----|-----------|---|--|---|
|    |           |   | a) Both fumed silicon dioxide and colloidal silicon dioxide are same material.   |   |
| 3. | 3.2.P.5.1 | The weight of coated tablet is 165mg whereas, total quantity of film coating material in section 3.2.P.1 is 5.97 mg. Justification is required.   | <p>The weight of core tablet is 160mg<br/> The weight of coated tablet is 160mg + 5.97mg = 165.97mg<br/> The Average weight of coated tablet specified in BMR is 165mg <math>\pm</math> 5%.<br/> Therefore, the average weight of coated tablet i.e 165.97mg is well within the specified limit.</p> <p>Also 0.97mg is the amount of extra film coating material taken in order to compensate the process loss faced during the coating operation.</p> |   |
| 4. | 3.2.P.8.3 | <p>a) Provide the results/calculation sheets for system suitability as per USP.</p> <p>b) Provide relative retention time for leflunomide related compound B, leflunomide related compound A, leflunomide related compound C, and leflunomide.</p> <p>c) Provide resolution results for leflunomide related compound C and leflunomide.</p> | Submitted.   |   |
| 5. | 3.2.P.8.3 | <p>a) Reference of previous approval of applications with stability study data of the firm (if any).</p> <p>b) Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.</p> <p>c) Documents for the procurement of API with approval from DRAP (in case of import).</p>      | Submitted.   | The GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin validity is 28-02-2021. |

| 11. | 3.2.P.2.2.1 | b) Submit CDP at three pH 1.2, pH 4.5 and pH 6.8.  |
| 12. | 3.2.P.4     | Provide control of excipients as per DRAP CTD guidance document.   |
| 13. | 3.2.P.5.1   | a) Submit copy of the drug product specification(s) including tests, acceptance criteria and reference to analytical procedure as per USP, instead of providing analytical test method with it.  |
| 14. | 3.2.P.5.2   | a) Submit detailed analytical procedures used for testing the drug product in relevant section.<br>b) Clarification is required which dissolution USP test firm has adopted Test 1, Test 2 ,Test 3,Test 4 ,Test 5 or Test 6.   |
| 15. | 3.2.P.6     | Submit COA of primary reference standard.  |
| 16. | 3.2.P.8.3   | a) Submit date of initiation of stability on stability summary data sheets.<br>b) Submit stability summary data sheets as per DRAP CTD guidance document.<br>c) Provide following supporting documents along with stability data sheets<br>✓ Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.<br>✓ Documents for the procurement of API with approval from DRAP (in case of import).<br>✓ Compliance Record of HPLC software 21CFR & audit trail reports on product testing.                      |
| 17. | 3.2.P.8.3   | c) Provide supporting documents of stability for initial testing.<br>d) Submit justification for not performing system suitability before assay at each time point.  |

**Previous Decision(M-336): Registration Board deferred the case for submission of reply to the above cited shortcomings.**

| S. No | Sections  | Observations/Deficiencies/ Short-comings   | Firms Response   | Evaluation Remarks |
|-------|-----------|--|--|--------------------|
| 1.    | 1.3.5     | Provide GMP inspection report/ GMP certificate of the manufacturing unit issued within the last three years.   | Applied for issuance of GMP.   |                    |
| 2.    | 2.3.R.1.1 | Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3.       | Submitted.   |                    |
| 3.    | 3.2.S.1.1 | Clarification is required whether its atorvastatin calcium or atorvastatin calcium trihydrate as the chemical name and structural formula does not mention trihydrate. | It is Atorvastatin Calcium Trihydrate , copy of structural formula and chemical name Attached. |                    |

|     |           |  |   |   |
|-----|-----------|--|---|---|
| 4.  | 3.2.S.1.3 | Provide the polymorphic form of the drug substance.  | The firm has submitted field of the invention of polymorphic forms.   | The submitted document doesnot mention the polymorphic form used in drug product.   |
| 5.  | 3.2.S.4.1 | <p>e) The reference for drug substance manufacturer mentions both USP and in house. Clarification is required.</p> <p>f) Submit whether propylene glycol has been used as a solvate in manufacturing of API. If yes, then assay specs. should be as per USP.</p> <p>g) The acceptance criteria for assay as per USP is “<b>98.0%–102.0% on the anhydrous and solvent-free basis</b>” whereas, your specifications do not mention solvent free. Clarification is required.</p> <p>h) Submit specification of drug substance by drug product manufacturer.</p> | <p>We wrote to Drug substance manufacturer and new <b>CoA has been submitted</b> for your kind consideration.</p> <p><b>b)</b> Propylene glycol has not been used as solvate in manufacturing of API.</p> <p><b>c)</b> We wrote to Drug substance manufacturer and new <b>CoA has been submitted</b> for your kind consideration.</p> | <p>Firm has submitted COAs instead of specifications.</p> <p>The specification of drug substance by drug product manufacturer provided.</p> |
| 6.  | 3.2.S.4.2 | Submit analytical method of drug substance by drug product manufacturer.   | Submitted.  |   |
| 7.  | 3.2.S.4.3 | Submit analytical method verification report performed by drug product manufacturer.   | Submitted.  |   |
| 8.  | 3.2.S.4.4 | <p>d) The manufacturing date of drug substance is different on COA of drug substance (24-06-2021) and COA of drug product manufacturer (March 2021).</p> <p>e) Justification is required for not performing test of calcium (by AAS ) and enantiomeric purity by drug product manufacturer.</p> <p>f) Justification is required for performance of LOD instead of water content.</p>   | <p>It was a typographical mistake corrected CoA is submitted for your kind consideration.</p> <p>It was a typographical mistake corrected CoA is submitted for your kind consideration.</p>   |   |
| 9.  | 3.2.S.7.3 | The stability data of drug substance is of 36 months whereas, retest date is of 4 years. Submit stability data of 48 months at long term condition as per Zone IVa/IVb.  | Stability data of 48 months submitted by the firm.  |   |
| 10. | 3.2.P.2.1 | a) The innovator product applied the factor on the basis of anhydrous drug substance whereas, you have applied factor which is on trihydrate form. Justification is required.  | a )<br>The end quantity is same either calculated by atorvastatin calcium or Atorvastatin   |   |

|     |             |   |   |   |
|-----|-------------|---|---|---|
|     |             | <p>b) Clarification is required for addition of three diluents in the formulation.</p> <p>c) Submit compatibility studies of the Drug Substance(s) with excipients as composition of the formulation is not similar to innovator / reference product. Provide the reference product details, if the excipients are similar.</p> <p>d) Provide the average weight of core and coated tablet.</p> | <p>calcium trihydrate factor basis as the differences of molecular weights of atorvastatin calcium or Atorvastatin calcium trihydrate.</p> <p>b ) Calcium Carbonate is used as diluent. Avicel is diluent and for disintegration Lactose monohydrate is used as diluent and for compaction of tablet</p> <p>c) The excipients are compatible with the drug substance . the excipients are same as of innovator.</p> |   |
| 11. | 3.2.P.2.2.1 | Submit CDP at three pH 1.2, pH 4.5 and pH 6.8.  |   | CDP not submitted by the firm.              |
| 12. | 3.2.P.4     | Provide control of excipients as per DRAP CTD guidance document.  | Submitted.  |   |
| 13. | 3.2.P.5.1   | Submit copy of the drug product specification(s) including tests, acceptance criteria and reference to analytical procedure as per USP, instead of providing analytical test method with it.  | Submitted.  |   |
| 14. | 3.2.P.5.2   | <p>c) Submit detailed analytical procedures used for testing the drug product in relevant section.</p> <p>d) Clarification is required which dissolution USP test firm has adopted Test 1, Test 2 ,Test 3,Test 4 ,Test 5 or Test 6.</p>   | Submitted.  |   |
| 15. | 3.2.P.6     | Submit COA of primary reference standard.   |   | COA of working standard has been submitted. |
| 16. | 3.2.P.8.3   | d) Submit date of initiation of stability on stability summary data sheets.   | Submitted.  |   |

|     |           |   |            |  |
|-----|-----------|---|------------|--|
|     |           | e) Submit stability summary data sheets as per DRAP CTD guidance document.<br>f) Provide following supporting documents along with stability data sheets<br>✓ Approval of API/DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.<br>✓ Documents for the procurement of API with approval from DRAP (in case of import).<br>✓ Compliance Record of HPLC software 21CFR & audit trail reports on product testing. |            |  |
| 17. | 3.2.P.8.3 | a) Provide supporting documents of stability for initial testing.<br>b) Submit justification for not performing system suitability before assay at each time point.   | Submitted. |  |

**Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings.**

#### Agenda Item No. 02:

#### Registration applications for local manufacturing of (Human) drugs on Form 5F

##### a. New cases

|             |   |   |
|-------------|---|---|
| <b>170.</b> | <b>Name, address of Applicant / Marketing Authorization Holder</b>                  | <b>M/s Genix Pharma (Private), Limited 44,45 B,Korangi Creek Road,Karachi, Pakistan.</b>  |
|             | Name, address of Manufacturing site.  | <b>M/s Genix Pharma (Private), Limited 44,45 B,Korangi Creek Road,Karachi, Pakistan.</b>  |
|             | Status of the applicant   | <input checked="" type="checkbox"/> Manufacturer<br><input type="checkbox"/> Importer<br><input type="checkbox"/> Is involved in none of the above (contract giver) |
|             | Application Form Dy. No / Tracking ID & date of submission                          | Form 5F:<br>Dy. No. 10837,02-05-2023  |
|             | Details of fee submitted  | Slip No:41860774488<br>PKR 75000/-  |
|             | The proposed proprietary name / brand name  | Dol-P Tablet 650mg/75mg   |
|             | Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit | <b>Each Film Coated Tablet contains:<br/>Paracetamol...650mg<br/>Tramadol Hydrochloride...75mg</b>  |
|             | Pharmacotherapeutic Group of (API)  | Opioids in combination with non-opioid analgesics<br>ATC Code:N02AJ13   |
|             | Reference to Finished product specifications  | USP   |
|             | The status in reference regulatory authorities                                      | AEMPS Approved.   |
|             | For generic drugs (me-too status)   | New Molecule.   |

|  | Proposed Pack size   | 7's, 10's, 14's, 20's, 28's, 30's   |
|--|--|---|
| <b>Evaluation by PEC-V:</b>  |  |   |
| The application has been evaluated in the light of CTD guidance document and found deficient for information/ documents as mentioned against each section. |  |   |
| S. No  | Sections   | Observations/Deficiencies/ Short-comings  |
| 1.   | 1.3.4  | Submit copy of valid Drug Manufacturing License (DML) issued by Licensing Division, DRAP.   |
| 2.   | 1.3.5  | Submit valid GMP inspection report/ GMP certificate of the manufacturing unit issued within the last three years.   |
| 3.   | 1.5.15 – 1.5.20  | Submit signed undertakings.   |
| 4.   | 1.6.5  | Submit valid DML issued by the relevant regulatory authority of country of origin or valid Good Manufacturing Practice (GMP) certificate of the Tramadol Hydrochloride manufacturer issued by relevant regulatory authority of country of origin.               |
| 5.   | 2.3.R.1.1  | Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3.  |
| <b>Tramadol Hydrochloride</b>  |  |   |
| 6.   | 3.2.S.4.3  | Submit analytical method verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer.  |
| 7.   | 3.2.S.4.4  | Submit justification for any incomplete analyses of the drug substance by drug product manufacturer.  |
| <b>Paracetamol</b>   |  |   |
| 8.   | 3.2.S.4.2  | Submit analytical procedures used for routine testing of the drug substance by drug product manufacturer.   |
| 9.   | 3.2.S.4.3  | Submit analytical method verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer.  |
| 10.  | 3.2.S.4.4  | Provide results of analysis of relevant batch of drug substance used during product development and stability studies. Moreover, submit justification for any incomplete analyses of the drug substance by drug product manufacturer as per requirements of BP. |
| 11.  | 3.2.P.3.2  | A batch formula for proposed commercial batch size shall be provided that includes a list of all components of the drug product to be used in the manufacturing process, their amounts on a per batch basis.  |
| 12.  | 3.2.P.3.5  | Provide process validation protocol of commercial batches.  |
| <b>Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings.</b>   |  |   |
| 171.   | <b>Name, address of Applicant / Marketing Authorization Holder</b> | <b>M/s BJ Pharmaceuticals, 18Km, Mandiali Stop, Lahore.</b>   |
|  | Name, address of Manufacturing site.                               | <b>M/s BJ Pharmaceuticals, 18Km, Mandiali Stop, Lahore.</b>   |

|             | Proposed Pack size  | 14 days starter pack, 28 days starter pack.<br>As per SRO.   |

**Evaluation by PEC-V:**

The application has been evaluated in the light of CTD guidance document and found deficient for information/ documents as mentioned against each section.

| S. No | Sections               | Observations/Deficiencies/ Short-comings  |
|-------|------------------------|---|
| 1.    | 1.1                    | Submit Me too or fee o new molecule.  |
| 2.    | 1.3.4                  | Submit copy of valid Drug Manufacturing License (DML) issued by Licensing Division, DRAP.   |
| 3.    | 1.3.5                  | Submit valid GMP inspection report/ GMP certificate of the manufacturing unit issued within the last three years.   |
| 4.    | 1.6                    | Submit miscellaneous information as per guidance document.  |
| 5.    | 2.3.R.1                | Submit production documentation.  |
| 6.    | 3.2.S.4.1<br>3.2.S.4.2 | Submit copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by Drug Product manufacturer.   |
| 7.    | 3.2.S.4.3              | Submit analytical test method for assay by drug product manufacturer.   |
| 8.    | 3.2.S.4.4              | <p>a) Justification is required for not performing the enantiomeric purity test while analyzing the quality of drug substance by drug product manufacturer. Since, it is the critical test for apremilast because the active substance exhibits stereoisomerism due to presence of a single chiral centre, with the (S)-enantiomer being pharmacologically active.</p> <p>b) A discussion and justification shall be provided for any incomplete analyses of the drug substance / API by Drug Product manufacturer.</p> |
| 9.    | 3.2.P.2.2.1            | The dissolution media as per USFDA is 0.15% SLS and paddle speed is 60 rpm whereas, the test method provided by you mentions SLS 0.3 % and paddle speed 75rpm.  |
| 10.   | 3.2.P.5.1              | <p>a) The weight of tablets of all three strengths of innovator brand increase with empirical ratio as per the review report of USFDA, while the weight of tablet of all three applied strength varies irrespective of their increase quantity of active ingredient.</p> <p>b) The innovator uses UPLC for the test whereas, you have used HPLC.</p> <p>c) The test of degradation products and microbial limits have not been included.</p>  |
| 11.   | 3.2.P.5.3              | <p>a) The detection limit and quantitation limit has not been performed for assay validation.</p> <p>b) The dissolution media as per USFDA is 0.15% SLS and paddle speed is 60 rpm whereas, the test method provided by you mentions SLS 0.3 % and paddle speed 75rpm.</p>  |
| 12.   | 3.2.P.7                | The applied starter pack presentation mentioned in section 3.2.P.7 should be as per the innovator brand the starter, pack is of 2 weeks which consist of 13-tablet blister titration pack containing:(4) 10-mg, (4) 20-mg, and (5) 30-mg tablets with an additional (14) 30mg tablets. Justify the rationality of your starter pack presentation with reference to the innovator.   |

#### Evaluation by PEC-V:

The application has been evaluated in the light of CTD guidance document and found deficient for information/ documents as mentioned against each section.

| S. No | Sections               | Observations/Deficiencies/ Short-comings  |
|-------|------------------------|---|
| 1.    | 1.3.5                  | Submit valid GMP inspection report/ GMP certificate of the manufacturing unit issued within the last three years.   |
| 2.    | 2.3.R.1.1              | Submit production documentation.  |
| 3.    | 3.2.S.3.1              | Submit Elucidation of Structure and other Characteristics.  |
| 4.    | 3.2.S.3.2              | Submit list of Drug Substance / API-related impurities and process-related impurities with acceptance limits.   |
| 5.    | 3.2.S.4.1<br>3.2.S.4.2 | Submit drug substance specifications and analytical procedures used for routine testing of the drug substance by drug product manufacturer.   |
| 6.    | 3.2.S.4.3              | Submit proper report for analytical method verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer.  |
| 7.    | 3.2.S.4.4              | a) Provide results of assay as both anhydrous and as is basis.<br>b) A discussion and justification shall be provided for any incomplete analyses of the drug substance / API by Drug Product manufacturer (e.g. results not tested according to the proposed specification).<br>c) The reference of specifications in section 3.2.S.4.1 is IP whereas, in 3.2.S.4.4 is USP. Justification is required.   |
| 8.    | 3.2.S.4.5              | Submit justification of specifications.   |
| 9.    | 3.2.P.1.1              | Submit description of the dosage form as per guidance document.   |
| 10.   | 3.2.P.2                | a) Submit compatibility studies of the Drug Substance(s) with excipients if the qualitative composition of the formulation is not similar to innovator / reference product or provide the reference product which has similar formulation.<br>b) The test method is not as per USP, justify the pharmaceutical equivalence studies and CDP..<br>c) Submit following documents for CDP:<br>✓ Using the mean dissolution values from both curves at each time interval, calculate the difference factor (f1) and similarity factor (f2) . |
| 11.   | 3.2.P.5.1              | The reference of specs mentioned in this section is USP, whereas, Form 5 F mentions innovators.   |
| 12.   | 3.2.P.5.2              | The analytical method is not as per USP like chromatographic conditions, dissolution ,rpm etc.  |
| 13.   | 3.2.P.5.3              | Submit method verification as per USP.  |
| 14.   | 3.2.P.5.4              | Submit complete analysis of at least two batches.   |
| 15.   | 3.2.P.8.3.             | a) The date of clearance of linezolid is 24-06-22 whereas, the data of manufacturing of batches in stability summary data sheets is 02-04-2022. Justification is required.<br>b) Justify the batch size 990 tablets.  |

|  |  |   |
|--|--|---|
|  |  | c) The injection volume and detector wavelength on chromatograms is different than USP.<br>d) Submit data logger record at long term condition.<br>e) Submit Compliance Record of HPLC software 21CFR & audit trail reports on product testing.<br>f) Submit valid Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.<br>g) Submit dissolution supporting data for stability at each time point. |
|--|--|---|

**Evaluation by PEC-V:**

The application has been evaluated in the light of CTD guidance document and found deficient for information/ documents as mentioned against each section.

| <b>S. No</b> | <b>Sections</b> | <b>Observations/Deficiencies/ Short-comings</b>  |
|--------------|-----------------|--|
| 1.           | 1.3.5           | Provide GMP inspection report/ GMP certificate of the manufacturing unit issued within the last three years.   |
| 2.           | 2.3.R.1.1       | Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3.   |
| 3.           | 3.2.S.1.1       | Clarification is required whether its atorvastatin calcium or atorvastatin calcium trihydrate ,structural formula does not mention trihydrate.   |
| 4.           | 3.2.S.1.3       | Provide the polymorphic form of the drug substance.  |
| 5.           | 3.2.S.4.1       | a) Submit whether propylene glycol has been used as a solvate in manufacturing of API. If yes, then assay specs. should be as per USP.<br>b) The test of assay is missing which as per USP is “ <b>98.0%–102.0% on the anhydrous and solvent-free basis</b> ”.<br>c) Submit evidence of availability of AAS. |
| 6.           | 3.2.S.4.2       | The analytical procedure of drug substance is not as per USP.  |
| 7.           | 3.2.S.4.3       | Submit analytical method verification report performed by drug product manufacturer.   |
| 8.           | 3.2.S.4.4       | a) Provide reference for specifications as the tests and specs differ from section 3.2.S.4.1.  |

|     |             |   |
|-----|-------------|---|
|     |             | b) The COA mentions API should be stored at temperature not exceeding 25C whereas, stability studies at long term has been conducted at 30C.  |
| 9.  | 3.2.S.7.3   | The stability data of drug substance is not readable.   |
| 10. | 3.2.P.2.1   | a) The innovator product applied the factor on the basis of anhydrous drug substance 41.44 mg whereas, you have applied 43.3 mg which is trihydrate form. Justification is required.<br>b) Submit compatibility studies of the Drug Substance(s) with excipients as composition of the formulation is not similar to innovator / reference product. Provide the reference product details, if the excipients are similar.<br>c) Justify the use of flavoring agent methionin in the formulation.<br>d) Provide the average weight of core and coated tablet<br>e) The composition mentioned in 3.2.P.1 differs from formulation mentioned in 3.P.2.1. |
| 11. | 3.2.P.2.2.1 | c) Submit CDP at three pH 1.2, pH 4.5 and pH 6.8.   |
| 12. | 3.2.P.3.5   | Submit process validation protocol of commercial batches.   |
| 13. | 3.2.P.4     | Provide control of excipients as per DRAP CTD guidance document.  |
| 14. | 3.2.P.5.2   | a) Submit detailed analytical procedures used for testing the drug product in relevant section.<br>b) Clarification is required which dissolution USP test firm has adopted Test 1, Test 2 ,Test 3,Test 4 ,Test 5 or Test 6.  |
| 15. | 3.2.P.5.3   | Submit complete analytical method verification report.  |
| 16. | 3.2.P.6     | Submit COA of primary reference standard.   |
| 17. | 3.2.P.8.3   | a) Provide following supporting documents along with stability data sheets<br>✓ Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.<br>✓ Documents for the procurement of API with approval from DRAP (in case of import).<br>✓ Compliance Record of HPLC software 21CFR & audit trail reports on product testing.  |
| 18. | 3.2.P.8.3   | a) Submit justification for not performing system suitability before assay at each time point.<br>b) Submit COA of drug product at each time point.   |

| 1.3.4   | • Submit Valid copy of Drug Manufacturing License (DML)   | • Firm has submitted copy of DML and letter submitted for renewal of DML dated 03-05-2023   |
| 1.3.5   | • Submit valid copy of cGMP certificate / GMP inspection report of manufacturing unit conducted with in last three years  | • Firm has submitted copy of cGMP certificate of the firm based on inspection dated 05-10-2023.   |
| 1.6.5   | • Valid copy of cGMP certificate / DML of the Drug Substance manufacturer issued by relevant regulatory authority of country of origin is required  | • Firm has submitted copy of cGMP certificate of API manufacturer issued by Food and Drugs Control Administration Gujarat State India valid upto 22-11-2025   |
| 2.3.R.1 | • Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3>  | • Copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3> is submitted                                 |
| 3.2.S.4 | • Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance by Drug Product manufacturer is required.<br>• Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance shall be submitted. | • Not submitted<br>• Analytical Method Verification studies performed by the Drug Product manufacturer for drug substance is submitted. However, results specificity and accuracy test is not submitted |
| 3.2.S.7 | • Stability study data of drug substance from M/s Cubic analytical solution is submitted instead of API manufacturer. Stability study data of drug substance at zone VI-A conditions till claimed shelf life shall be submitted   | • Stability study data of drug substance from M/s Cubic analytical solution is submitted again instead of API manufacturer.   |

|         |  |  |
|---------|--|--|
| 3.2.P.2 | • Submit results of drug excipient compatibility study as the qualitative composition of applied product is not similar to reference product | • Not submitted  |
| 3.2.P.5 | • Results of accuracy tests in analytical method verification study is not submitted   | • Results of accuracy tests in analytical method verification study is submitted   |
| 3.2.P.6 | • COA of primary / secondary reference standard including source and lot number shall be provided.   | • COA of primary / secondary reference standard including source and lot number is submitted.  |
| 3.2.P.8 | • Submit documents for the procurement of API with approval from DRAP (in case of import).   | • Firm has submitted copy of clearance certificate dated 03-08-2022 specifying 100Kg Diclofenac Diethylamine. The invoice is cleared by AD (I&E) DRAP. |

**Decision: Deferred for submission of following:**

- i. Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance by Drug Product manufacturer
- ii. Results of specificity and accuracy in analytical method verification studies performed by the Drug Product manufacturer for drug substance
- iii. Stability study data of drug substance from API manufacturer at zone VI-A conditions till claimed shelf life
- iv. Results of drug excipient compatibility study

**Evaluation by PEC<sup>XI</sup>:**

| Section | Observations   | Firm's Response   |
|---------|--|---|
| 1.6.5   | <ul style="list-style-type: none"> <li>Valid copy of cGMP certificate / DML of the Drug Substance manufacturer issued by relevant regulatory authority of country of origin is required</li> </ul>   | <ul style="list-style-type: none"> <li>Firm has submitted copy of cGMP certificate of API manufacturer issued by Chongqing Drug &amp; Chemical Administration China valid upto 23-08-2026</li> </ul>  |
| 3.2.S.4 | <ul style="list-style-type: none"> <li>Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance by Drug Product manufacturer is required.</li> </ul>   | <ul style="list-style-type: none"> <li>Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance by Drug Product manufacturer is submitted.</li> </ul>   |
| 3.2.S.7 | <ul style="list-style-type: none"> <li>Stability study data of drug substance at real time conditions till claimed shelf life shall be submitted</li> </ul>  | <ul style="list-style-type: none"> <li>Stability study data of drug substance at real time conditions till claimed shelf life is submitted</li> </ul>   |
| 3.2.P.5 | <ul style="list-style-type: none"> <li>Justification shall be submitted for not including test for water content in finished product specification as per innovator's product review document</li> <li>The dissolution specifications of innovator product is NLT Q in 10 minutes while you have selected limit of dissolution specification NLT Q in 30 minutes. Revise your dissolution specifications as per innovator's product review document and submit dissolution data as per revised specifications</li> </ul> | <ul style="list-style-type: none"> <li>The firm submitted that we could not find any mention of water content test for the finished product in the innovator's product review document. The water or moisture content in granules of the finished product (for tablets) should be between 1% and 3% for better and smoother tablet compression process. This moisture content test is a regular part of in-process testing. We checked the moisture content during the in-process stage, and it was 2.3% according to our batch manufacturing record. According to the routine requirements of pharmacopeia, there is no need to test the water or moisture content in the tablet unless the product is highly prone to microbial growth or contains a high amount of water or moisture in the API. Neither of these scenarios applies to delafloxacin meglumine. That's why we did not include the test of water content of the finished product.</li> <li>The firm submitted that we already found out the same issue in past. Therefore, we have manufactured one more trial batch having batch No TF-04. This batch was manufactured on dated: 02-2024. The dissolution test was performed on 10-minutes time point. The results were found satisfactory and passes the limit of NLT Q in 10 minutes. The batch was kept on stability and also passes the 6<sup>th</sup> month's stability data for dissolution test. A complete report of dissolution data is submitted. Firm has also submitted revised finished product specifications.</li> </ul> |
| 3.2.P.8 | <ul style="list-style-type: none"> <li>Submit copy of clearance certificate or commercial invoice for the procurement of API along with approval from DRAP.</li> </ul>   | <ul style="list-style-type: none"> <li>Firm has submitted copy of commercial invoice cleared dated 30-12-2021 specifying 1.5Kg Delafloxacin Meglumine. The invoice is cleared by AD (I&amp;E) DRAP.</li> </ul>  |

**Decision: Approved. Registration Board further decided that Registration letter will be issued after submission of following:**

| Module-II (Quality Overall Summary)  | Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product. |
| Module III (Drug Substance)  | Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.   |
| Stability Studies of Drug Substance (Conditions & duration of Stability studies) | Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 72 months.  |
| Module-III (Drug Product):   | Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability study. |
| Pharmaceutical Equivalence and Comparative Dissolution Profile                   | Firm has submitted pharmaceutical equivalence of their product against the product Acemox tablets 250mg by M/s Vega Pharmaceuticals Pvt. Ltd.<br>CDP has been performed against a comparator product AZM 250mg tablet by M/s Ethical Laboratories in HCl buffer pH 1.2, acetate buffer pH 4.5, Phosphate Buffer pH 6.8.   |

|  |  |   |              |
|--|--|---|--------------|
|  | Analytical method validation/verification of product   | Firm has submitted analytical method verification studies including Accuracy, Precision, and Specificity.   |              |

However no UV method has been submitted</li> <li>Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) is not submitted</li> </ul> |

Previous Decision (M-336<sup>th</sup>-DRB): Deferred for submission of following:

- Copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3>
- Analytical procedures used for routine testing of the Drug substance by Drug Product manufacturer
- Complete analytical procedure for all the tests by drug substance manufacturer for submitted specifications
- Justification for not performing the test for total titratable amine, carbonate content, limit of soluble oligomers, limit of allylamine, residue on ignition, limit of chloride, swell index in batch analysis of drug substance by drug product manufacturer as per drug substance manufacturer
- Justification for not performing the test for microbial purity, titratable amines, soluble oligomers in finished in batch analysis of drug product
- Analytical method for applied drug product

**Firm's Response:**

| S No. | Deferment Reason  | Firm's Response  |
|-------|---|--|
| 1     | Copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3>  | Copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3> is submitted  |
| 2     | Analytical procedures used for routine testing of the Drug substance by Drug Product manufacturer   | Analytical procedures used for routine testing of the Drug substance by Drug Product manufacturer is submitted   |
| 3     | Complete analytical procedure for all the tests by drug substance manufacturer for submitted specifications   | Complete analytical procedure for all the tests by drug substance manufacturer for submitted specifications is not submitted   |
| 4     | Justification for not performing the test for total titratable amine, carbonate content, limit of soluble oligomers, limit of allylamine, residue on ignition, limit of chloride, swell index in batch analysis of drug substance by drug product manufacturer as per drug substance manufacturer | Firm has submitted revised batch analysis of drug substance in which test for total titratable amine, carbonate content, limit of soluble oligomers, limit of allylamine, residue on ignition, limit of chloride, swell index has been incorporated. However, firm submitted that they rely on COA of supplier |
| 5     | Justification for not performing the test for microbial purity, titratable amines, soluble  | Firm has submitted revised batch analysis of drug product in which the test for titratable amines and soluble oligomers has been performed   |

|   |   |   |
|---|---|---|
|   | oligomers in finished in batch analysis of drug product |   |
| 6 | • Analytical method for applied drug product            | • Analytical method for applied drug product is submitted |

**Decision: Deferred for clarification for not performing the test for total titratable amine, carbonate content, limit of soluble oligomers, limit of allylamine, residue on ignition, limit of chloride, swell index in batch analysis of drug substance by drug product manufacturer**

Previous Decision (M-331<sup>st</sup>-DRB): Deferred for submission of following:

- Differential fee Rs. 25000/- for contract manufacturing application
- Submit your label claim as per reference formulation along with submission of applicable fee
- Valid GMP certificate / DML of the Drug Substance manufacturer issued by relevant regulatory authority of country of origin
- Clarification for use of 5ml sterile water for injection while innovator product recommends the use of 2.5ml water for injection
- Complete testing of the applied drug product and the reference product in pharmaceutical equivalence including the tests recommended by USP monograph
- Documents of relevant batches for procurement of API with approval from DRAP
- Clarification as the analysis date of API by drug product manufacturer [COA of API (*Q011712039*, Q011801001)] is subsequent to the manufacturing date of trial batches
- Clarification as manufacturing date of trial batch DI-659 is prior to the import of API (as per submitted stability summary sheet and commercial invoice)
- Clarification for submission of new BMR with change of brand name

| 1.6.5   | Submit valid GMP certificate of the Drug Substance manufacturer issued by relevant regulatory authority of country of origin.  | <b><i>GMP certificate is not submitted</i></b>   |               |
| 2.3.R.1   | Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3>         | Firm has submitted Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3>  |               |
| 3.2.S.4.1. - 3.2.S.4.2                            | Submit signed analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer. | Firm have submitted analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by Drug Product manufacturer. <b><i>However, analytical procedures used for routine testing of the Drug substance / Active Pharmaceutical Ingredient by Drug substance manufacturer is not submitted.</i></b> |               |

|            |   |  |
|------------|---|--|
| 3.2.S.4.3  | Clarify whether the Analytical Method Verification studies of drug substance have been performed by drugs substance manufacturer or drug product manufacturer   | <i>No clarification is submitted</i>   |
| 3.2.S.6    | Description of the container closure system(s) for the shipment and storage of the API including materials of construction of each primary packaging component and other information on the container closure system(s) (e.g. suitability studies) may be submitted.  | <i>No details submitted</i>  |
| 3.2.S.7    | The submitted stability study is performed by M/s CTX Lifesciences while the manufacturer of drug substance is Anugraha Chemicals, clarification is required?   | <i>No clarification is submitted</i>   |
| 3.2.P.1    | You have not performed the tests of identification, bacterial endotoxin test and particulate matter in pharmaceutical equivalence, justify?   | <i>No justification is submitted</i>   |
| 3.2.p.3.3. | Submit the flowchart of manufacturing outline since the submitted manufacturing outline is not clearly visible.   | <i>No reply submitted</i>  |
| 3.2.P.5.1  | <ul style="list-style-type: none"> <li>You have not mentioned the tests of identification, bacterial endotoxin test and particulate matter, justify?</li> <li>Revise your specifications in line with USP specifications along with submission of applicable fee</li> </ul>   | <i>No justification is submitted</i>   |
| 3.2.P.5.3  | Analytical Method Verification studies of drug product is same as that of drug substance. Clarification is required   | <i>No clarification is submitted</i>   |
| 3.2.P.7    | Specify the container closure system of your product including details whether ampoule or vial, filled volume and type of glass, since both ampoule and vials and different volumes have been mentioned in different sections   | <i>No details are submitted</i>  |
| 3.2.P.8.3  | <ul style="list-style-type: none"> <li>The stability batches have been manufactured on 01-2021 while the stability chromatograms are acquired in 2019, justify?</li> <li>COA of 3<sup>rd</sup> month stability study data not submitted?</li> <li>The ph values given in stability data sheet and raw data sheet is different at all time point?</li> <li>COA and raw data sheet at 6<sup>th</sup> month time point is not submitted</li> </ul> | <ul style="list-style-type: none"> <li><i>No justification is submitted</i></li> <li><i>COA of 3<sup>rd</sup> month stability study data not submitted</i></li> <li><i>No clarification is submitted</i></li> <li><i>Firm has submitted raw data sheet at 6<sup>th</sup> month time point. However, COA at 6<sup>th</sup> month time point is still not submitted</i></li> </ul> |
|            | <ul style="list-style-type: none"> <li>Audit trail reports on product testing is not submitted</li> <li>Submit documents for the procurement of API with approval from DRAP (in case of import).</li> </ul>   | <i>No document/record is submitted</i>   |

|  |  |  |
|--|--|--|
|  | <ul style="list-style-type: none"> <li>• Submit record of Digital data logger for temperature and humidity monitoring of stability chambers (accelerated)</li> </ul> |  |
|  | <ul style="list-style-type: none"> <li>• In submitted reply the BMR shows that batch size is 1500 ampoule, while raw data sheet shows 2000 ampoule</li> </ul>        |  |

Decision: Deferred for following:

- Submission of valid GMP certificate / DML of the Drug Substance manufacturer issued by relevant regulatory authority of country of origin.
- Submission of Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by Drug substance manufacturer
- Clarification is required since the submitted stability study is performed by M/s CTX Lifesciences while the manufacturer of drug substance is Anugraha Chemicals.
- Justification for not including the tests of identification, bacterial endotoxin test and particulate matter in product specifications.
- Clarification for submission of same Analytical Method Verification studies for drug product as that of drug substance.
- Specify the container closure system of your product including details whether ampoule or vial, filled volume and type of glass, since both ampoule and vials and different volumes have been mentioned in different sections
- Justification since the stability batches have been manufactured on 01-2021 while the stability chromatograms are acquired in 2019.
- Clarification since the pH values given in stability data sheet and raw data sheet is different at all-time point.
- Submission of COA and raw data sheet at 6<sup>th</sup> month time point.
- Submission of documents for the procurement of API with approval from DRAP (in case of import).
- Submit record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)

Previous Decision (M-331<sup>st</sup>-DRB): Deferred for submission of following:

- Chromatograms for the Assay analysis performed during stability studies of all three batches
- Clarification since the pH values given in stability data sheet and raw data sheet is different at all-time point.
- COA and raw data sheet at 6<sup>th</sup> month time point.
- Documents for the procurement of API with approval from DRAP (in case of import).
- Fee of Rs. 7,500/- for correction/pre-approval change/ in product specifications, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021

#### Firm's Response:

The firm has submitted revised stability data including details of drug substance manufacturer, Module III (Drug Substance), Stability Studies of Drug Substance, Module-III (Drug Product), Pharmaceutical equivalence, Analytical method validation/verification of product. The details of reply are given below:

|   |  |
|---|--|
| Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit | Each 2ml ampoule contains:<br>Ondansetron hydrochloride dihydrate eq. to Ondansetron.....4mg             |
| Pharmaceutical equivalence and comparative dissolution profile                      | Firm has submitted pharmaceutical equivalence of their product against the product Zofran Inj by M/s GSK |
| <b>STABILITY STUDY DATA</b>   |  |
| Manufacturer of API   | M/s Anugraha Chemicals No D-47 to D-50, C-62 and C-63, KSS DC, Industrial Estate, Doddaballapur, India   |
| API Lot No.   | AOND-23005   |
| Description of Pack (Container closure system)                                      | Clear, colourless or almost colourless, solution filled in type-I glass ampoule.                         |
| Stability Storage Condition   | Real time: 30°C ± 2°C / 65% ± 5% RH<br>Accelerated: 40°C ± 2°C / 75% ± 5% RH                             |
| Time Period   | Real time: 06 months<br>Accelerated: 06 months   |
| Frequency   | Accelerated: 0, 3, 6 (Months)<br>Real Time: 0, 3, 6, (Months)  |

|  |   |               |               |
|--|---|---------------|---------------|
| Batch No.  | T004  | T005          | T006          |

Previous Decision (M-321<sup>st</sup>-DRB): Deferred for following:

- Submission of valid GMP certificate / DML of the Drug Substance manufacturer issued by relevant regulatory authority of country of origin.
- Submission of Copies of the Drug substance specifications and analytical procedures used for testing of the Drug substance by Drug substance manufacturer.
- Submission of results of specificity test in Analytical Method Verification studies of drug substance performed by the Drug Product manufacturer.
- Clarification since Batch number of drug substance mentioned in batch analysis by drug product manufacturer (201507019) is different from the batch number mentioned by drug substance manufacturer given in batch analysis (210507019)
- Submission of results of repeatability (method precision) test in method verification studies for drug product
- Clarification since results of dissolution test were included at initial time point, 3<sup>rd</sup> month time point and 6<sup>th</sup> month time point of real time and accelerated stability study in stability summary sheets which were neither included in specifications and not performed previously.
- Clarification for considering same standard peak area value for the calculation of Assay results at all-time points of stability studies for all three batches.
- Submission of documents for the procurement of API with approval from DRAP (in case of import).
- Submit record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).

**Firm's Response:**

The firm has submitted revised stability data including details of drug substance manufacturer, Module III (Drug Substance), Stability Studies of Drug Substance, Module-III (Drug Product), Pharmaceutical equivalence, Analytical method validation/verification of product. The details of reply are given below:

| Module-II (Quality Overall Summary)  | Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.     |
| Name, address of drug substance manufacturer                                     | Intas Pharmaceuticals Ltd., Plot No. 2702/A, GIDC Estate, Ankleshwar-393 002, District: Bharuch, Gujarat State India.  |
| Module-III Drug Substance:   | Firm has submitted detailed drug substance data for both sources related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.                       |
| Stability Studies of Drug Substance (Conditions & duration of Stability studies) | Firm has submitted stability study data of 3 batches of API at accelerated as well as real time conditions. The accelerated study is conducted at $40 \pm 2^{\circ}\text{C}/75 \pm 5\% \text{RH}$ for 6 months and the real time stability study is conducted at $25 \pm 2^{\circ}\text{C}/60 \pm 5\% \text{RH}$ till 24 months.<br>(Batches: 71203715, 71204715, 71204915)  |
| Module-III Drug Product:   | Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability study |
| Pharmaceutical Equivalence and Comparative Dissolution Profile                   | Pharmaceutical equivalence has been established against the reference product ADRIAMYCIN RD 10 mg/vial injection by performing quality tests (Description, Identification, pH, Assay, particulate matter, reconstitution time).  |
| Analytical method validation/verification of product                             | Firm has submitted analytical method validation studies including specificity, precision, linearity and range, accuracy and solution stability for the applied product.  |
| Container closure system of the drug product                                     | 5ml 20mm Flint Tubular-USP Type-I Glass vial with Rubber stopper 20mm Grey Bromo Butyl Slotted Siliconised by Silicon & Alu. Seal Lacq.20mm F/O Top Red Plain  |

|  | Stability study data of drug product, shelf life and storage conditions   | <p>Firm has submitted stability study data of 3 batches. The accelerated stability study data is conducted at 40° C ± 2° C / 75% ± 5% RH for 06 months and real time stability study is conducted at 30° C ± 2° C / 75% ± 5% RH for 36 months.</p> <table border="1" data-bbox="770 293 1361 436"> <thead> <tr> <th>Batches</th><th>Mfg date</th><th>Batch size</th></tr> </thead> <tbody> <tr> <td>NN7196</td><td>May 2017</td><td>18160 vials</td></tr> <tr> <td>NN7232</td><td>Jun 2017</td><td>18160 vials</td></tr> <tr> <td>NN7233</td><td>Jun 2017</td><td>18160 vials</td></tr> </tbody> </table> | Batches | Mfg date | Batch size | NN7196 | May 2017 | 18160 vials | NN7232 | Jun 2017 | 18160 vials | NN7233 | Jun 2017 | 18160 vials |

|-----------|--|---|
|           | <ul style="list-style-type: none"> <li>• Provide information including type of diluent, its composition, quantity or volume, specifications and regulatory status in Pakistan for the diluent which is to be provided along with the applied drug</li> </ul>   | <p>total acceptable daily intake for methyl-, ethyl-, and propyl parabens at up to 10 mg/kg body weight and official monograph available in BP.</p> <ul style="list-style-type: none"> <li>• However as per Innovator Literature, for Doxorubicin Hydrochloride for Injection particularly used as solubilizing agent which improved or give rapid dissolution of powder in final lyophilized product. Methyl paraben was used in formulation to improve solubilization by reducing the gel formation during reconstitution. Being generic drug of existing Innovator all excipients used as per Innovator and comply as per generic drug definition.</li> <li>• No information provided</li> </ul>   |
| 3.2.P.2   | <ul style="list-style-type: none"> <li>• Submit details of comparator product including name of manufacturer, Batch No#, manufacturing date, expiry date etc. against which pharmaceutical equivalence is submitted</li> <li>• Justify why the pharmaceutical equivalence study does not include complete testing of the drug product and the innovator/comparator product including the tests recommended by BP (Bacterial endotoxin, Water)</li> </ul> | <ul style="list-style-type: none"> <li>• Information not provided</li> <li>• Pharmaceutical equivalence was proved on the basis of enclosed comparison of important physicochemical characteristic of innovator product and drug product. Also the proposed Drug product contains same active substance and excipient in similar quantity as that of innovator product. Complete testing as per the any specific pharmacopeia is not necessary during product development as we develop product for global supply with different pharmacopeia. As the results of critical Physicochemical parameters are similar and comparable, therefore both the drug product and innovator product are pharmaceutically equivalent.</li> <li>• Moreover Naprod ensure to perform complete analysis of drug product inline with the BP pharmacopoeia during release of every batch &amp; Submitted stability study.</li> </ul> |
| 3.2.P.5.4 | <ul style="list-style-type: none"> <li>• In batch analysis the manufacturing date mentioned on COA of one batch No. NN7233 is Jun 2017 while batch release date is October 2017, clarify the gap between manufacturing date and batch release date.</li> </ul>   | <ul style="list-style-type: none"> <li>• Please Note that the batch was manufactured in the end of June 2017. Subsequently the Mother batch was released in July-2017 as per the common pharmacopoeia grades (IP/BP).</li> <li>• Refer enclosed COA of mother batch with common IP/BP pharmacopoeia. Then this batch was charged on the stability study in August 2017.</li> <li>• Later as per export requirement, we have packed and released some quantity from same mother batch as per only BP specification in October-2017.</li> <li>• Since we are proposing the BP grade for finished product in Pakistan registration, we have submitted the same finished product COA which was released as per BP in October-2017 as per Pakistan requirement</li> </ul>  |
| 3.2.P.8   | <ul style="list-style-type: none"> <li>• Batch release date mentioned in COA of drug product is subsequent to date of initiation of stability study mentioned in stability summary sheets, clarify</li> <li>• The manufacturing date mentioned on COA of batch No. NN7233 is Jun 2017 and batch release date is October 2017 while date of initiation of stability study is 24-08-2017, clarify?</li> </ul>  | <ul style="list-style-type: none"> <li>• Naprod had manufactured and initially released batch as per common pharmacopoeia (IP/BP) &amp; then charged for stability study to meet domestic as well as export registration requirements.</li> <li>• Later as per Export requirement, we have released some quantity from these batches to export market as per BP pharmacopoeia grade. Since we are proposing the BP grade for finished product in Pakistan registration, we have submitted the same finished product COA which were released subsequently.</li> </ul>  |

|  |  |   |
|--|--|---|
|  |  | <ul style="list-style-type: none"> <li>Hence COA of these batches have subsequent release date, after stability initiation date.</li> </ul> |
|--|--|---|

**Remarks of Evaluator:** Registration Board was apprised regarding an e. mail received to Director PE&R Division from M/s Miles International India (authorized exclusive representative for the export of products manufactured by Naprod Life Sciences for the Pakistan region), wherein firm has requested to not consider any product registration applications made by any other party other than LDS as they will not be able to supply these products in the future.

Previous Decision (M-324-DRB): Deferred for the Verification of “Sole Agency Agreement” between M/s. Al Habib Pharmaceuticals, Plot # 81, Block B, SMCHS, Karachi & M/s Naprod Life Sciences Pvt. Ltd. Factory: G-17/1, M.I.D.C., Tarapur, Boisar, Dist. Thane-401 506, India.

**Response of the Firm:**

Firm has submitted Original Notarized Authorization Letter Dated: 14<sup>th</sup> July, 2023

“We (NAPROD LIFE SCIENCES PVT LTD, India) having address at (304. Town Center-1, Andheri Kurla Road, Andheri (E), Mumbai) do hereby authorize M/s Al Habib Pharmaceuticals having address at Plot following 81, BLOCK B SMCHS, 74400, Karachi Pakistan, As a sole agent and distribution of following drugs only.

Regarding our email Dated June 6<sup>th</sup> 2023 about the Clarification of Mile International India as an exporter of Naprod Life Sciences Pvt Ltd beside the below mentioned products.

We are again giving a firm undertaking that Al-Habib Pharmaceuticals, Karachi is an Authorize Distributor and sole agent for the following Drugs.

| S.No | Generics                      | Brand Name    |
|------|-------------------------------|---------------|
| 8.   | Capecitabine 500mg TAB        | NAPROCAP -500 |
| 9.   | Methotrexate 2.5mg TAB        | ALLTREX       |
| 10.  | Doxorubicin HCl for inj 50mg  | NAPRODOX 50   |
| 11.  | Leucovorin Calcium inj. 300mg | CAFONATE      |
| 12.  | Fluorouracil inj. 500mg       | FLUONCO       |
| 13.  | Bicalutamide 50mg TAB         | MACABI        |
| 14.  | Doxorubicin HCl for inj 10mg  | NAPRODOX 10   |

Previous Decision (M-336<sup>th</sup>-DRB): Deferred for verification of “Sole Agency Agreement” between M/s. Al Habib Pharmaceuticals, Plot # 81, Block B, SMCHS, Karachi & M/s Naprod Life Sciences Pvt. Ltd. Factory: G-17/1, M.I.D.C., Tarapur, Boisar, Dist. Thane-401 506, India through email”.

**Decision: Approved as per Policy for inspection of Manufacturer abroad.**

**Registration Board further decided that Registration letter will be issued after submission of following:**

- i. Valid, original, legalized CoPP certificate
- ii. Valid copy of Drug Sale License

| The status in reference regulatory authorities                                   | Fluorouracil 500mg/10ml (50mg/ml) Injection by Accord Healthcare USFDA Approved   |
| For generic drugs (me-too status)  | Flurosol Injection 500mg/10ml by M/s Pharmasol (Pvt) Ltd (Reg. No# 107202)  |
| Module-II (Quality Overall Summary)  | Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product. |
| Name, address of drug substance manufacturer                                     | Nantong Jinghua Pharmaceutical Co., Ltd., No.20, 3 Haibin Road, Yanhai Economic Development Zone, Rudong, Nantong, Jiangsu, China.  |
| Module-III Drug Substance:   | Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.   |
| Stability Studies of Drug Substance (Conditions & duration of Stability studies) | Firm has submitted stability study data of 3 batches of API at accelerated as well as real time conditions. The accelerated study is conducted at $40\pm 2^{\circ}\text{C}/75\pm 5\%\text{RH}$ for 6 months and the real time stability study is conducted at $25\pm 2^{\circ}\text{C}/60\pm 5\%\text{RH}$ till 48 months.<br>(Batches: FLU2012001-RD, FLU2012002-RD, FLU2012003-RD)  |
| Module-III Drug Product:   | Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability study              |
| Pharmaceutical Equivalence and Comparative Dissolution Profile                   | Pharmaceutical equivalence has been established against the reference product Fluorouracil Injection 50mg/ml by M/s Accord Pharmaceutical Ltd., by performing quality tests (Description, pH, Assay, particulate matter, bacterial endotoxin, test for urea, test for related substances).  |

|  | Analytical method validation/verification of product  | Firm has submitted analytical method verification studies including specificity, precision, linearity and range, accuracy for the applied product.  |         |          |            |                        |          |             |                       |          |             |                         |          |             |

The accelerated stability study is conducted at 40°C/75%RH and data of 6 months has submitted. The real time stability study is conducted at 30°C±2°C/75%±5%RH. The real time stability study data of 24 months has been submitted.<br>Batch no. NT1160,NT1161,NT1162 |

#### Evaluation by PEC:

| S.no. | Observations/Deficiencies/ Short-comings  | Reply of the Firm  |
|-------|---|--|
| 1.    | Drug substance Bicalutamide is a racemate mixture, please provide the detail along with quantitative results, that which enantiomeric form of API has been used in the manufacturing of drug product. | Bicalutamide is racemic mixture i.e. a mixture of equal quantities (50:50) of two enantiomers.as single enantiomeric form is not used, enantiomeric purity is not applicable.<br><i>CASODEX is a racemate with its antiandrogenic activity being almost exclusively exhibited by the R-enantiomer of bicalutamide; the S-enantiomer is essentially inactive.</i> |
| 2.    | Justify for keeping the water content limit NMT 7.0% comparing the water content of active ingredient NMT 0.2%.   | Firm replied that our product complies with the current USP monograph of bicalutamide tablet 50mg ,drug product monograph in USP does not contain water content test ,hence the limit of water content was given in-house based on the water content of API ,excipients and manufacturing process.   |
| 3.    | justify, for submitting the validation report of 150mg strength instead of applied 50mg strength.   | Submitted  |

Registration Board was apprised regarding an e. mail received to Director PE&R Division from M/s Miles International India (authorized exclusive representative for the export of products manufactured by Naprod Life Sciences for the Pakistan region), wherein firm has requested to not consider any product registration applications made by any other party other than LDS as they will not be able to supply these products in the future.

#### Decision of 324<sup>th</sup> meeting of Registration Board:

Deferred for following:

- Verification of “Sole Agency Agreement” between M/s. Al Habib Pharmaceuticals, Plot # 81, Block B, SMCHS, Karachi & M/s Naprod Life Sciences Pvt. Ltd. Factory: G-17/1, M.I.D.C., Tarapur, Boisar, Dist. Thane-401 506, India.
- Scientific justification regarding declaration of Bicalutamide as racemic mixture i.e. a mixture of equal quantities (50:50) of two enantiomers.

#### Response of the Firm:

- **Verification of “Sole Agency Agreement” between M/s. Al Habib Pharmaceuticals, Plot # 81, Block B, SMCHS, Karachi & M/s Naprod Life Sciences Pvt. Ltd. Factory: G-17/1, M.I.D.C., Tarapur, Boisar, Dist. Thane-401 506, India.**

Firm has submitted Original Notarized Authorization Letter Dated: 14<sup>th</sup> July, 2023

“We (NAPROD LIFE SCIENCES PVT LTD, India) having address at (304. Town Center-1, Andheri Kurla Road, Andheri (E), Mumbai) do hereby authorize M/s Al Habib Pharmaceuticals having address at Plot following 81, BLOCK B SMCHS, 74400, Karachi Pakistan, as a sole agent and distribution of following drugs only. Regarding our email Dated June 6<sup>th</sup> 2023 about the Clarification of Mile International India as an exporter of Naprod Life Sciences Pvt Ltd beside the below mentioned products.

We are again giving a firm undertaking that Al-Habib Pharmaceuticals, Karachi is an Authorize Distributor and sole agent for the following Drugs.

| S.No | Generics                      | Brand Name    |
|------|-------------------------------|---------------|
| 15.  | Capecitabine 500mg TAB        | NAPROCAP -500 |
| 16.  | Methotrexate 2.5mg TAB        | ALLTREX       |
| 17.  | Doxorubicin HCl for inj 50mg  | NAPRODOX 50   |
| 18.  | Leucovorin Calcium inj. 300mg | CAFONATE      |
| 19.  | Fluorouracil inj. 500mg       | FLUONCO       |
| 20.  | Bicalutamide 50mg TAB         | MACABI        |
| 21.  | Doxorubicin HCl for inj 10mg  | NAPRODOX 10   |

- **Scientific justification regarding declaration of Bicalutamide as racemic mixture i.e. a mixture of equal quantities (50:50) of two enantiomers.**

Firm replied that drug substance is a racemic mixture of S-enantiomer and R-enantiomer in a ratio of 50:50, as the review literature of innovator product also claimed that the drug substance is racemic mixture of both enantiomers.

Previous Decision (M-336<sup>th</sup>-DRB): Deferred for verification of “Sole Agency Agreement” between M/s. Al Habib Pharmaceuticals, Plot # 81, Block B, SMCHS, Karachi & M/s Naprod Life Sciences Pvt. Ltd. Factory: G-17/1, M.I.D.C., Tarapur, Boisar, Dist. Thane-401 506, India through email.

**Decision: Approved as per Policy for inspection of Manufacturer abroad.**

**Registration Board further decided that Registration letter will be issued after submission of following:**

- Valid, original, legalized CoPP certificate**
- Valid copy of Drug Sale License**

Remarks of AD (PECXX):

USFDA approved Box warning for methotrexate tablet is as follows:

**METHOTREXATE tablets, for oral use**  
Initial U.S. Approval: 1953

**WARNING: EMBRYO-FETAL TOXICITY,  
HYPERSENSITIVITY REACTIONS, and SEVERE ADVERSE  
REACTIONS**

*See full prescribing information for complete boxed warning.*

- Methotrexate Tablets can cause embryo-fetal toxicity, including fetal death. For non-neoplastic diseases, Methotrexate Tablets are contraindicated in pregnancy. For neoplastic diseases, advise patients of reproductive potential of the potential risk to a fetus and to use effective contraception. (4, 5.1, 8.1, 8.3)
- Methotrexate Tablets are contraindicated in patients with a history of severe hypersensitivity reactions to methotrexate, including anaphylaxis. (4, 5.2)
- Serious adverse reactions, including death, have been reported with methotrexate. Closely monitor for adverse reactions of the bone marrow, gastrointestinal tract, liver, lungs, skin, and kidneys. Withhold or discontinue Methotrexate Tablets as appropriate. (5.3, 5.4, 5.5, 5.6, 5.7, 5.8)

Decision of 336<sup>th</sup> meeting of Registration Board:

Registration Board deferred the case for submission of reply to the above cited shortcomings.

**Reply by the firm:**

| Sr. No. | Section | Observation  | Reply submitted by the firm.   |
|---------|---------|--|--|
| 1.      | 1.3.4   | Valid copy of GMP certificate of the applicant shall be submitted.   | Firm has submitted copy of GMP certificate No. F.3-3/2018-Addl. Dir. (QA&LT-I)-70 dated 24-11-2022.  |
| 2.      | 1.5.2   | This section has not mentioned film coating while the reference product is film coated tablet. Clarification shall be submitted.       | Firm has submitted that the product is film coated as mentioned in FPP's COA and test protocol.<br>However, neither revised label claim is provided nor any fee is submitted by the firm.  |
| 3.      | 1.6.5   | Valid copy of GMP certificate of the drug substance manufacturer issued by relevant/concerned regulatory authority shall be submitted. | Firm has submitted copy of GMP certificate No. IT/E/API/10/2019 rev. 1 issued by AIFA Italy in the name of M/s Zhejiang Huahai Pharmaceutical Co., Ltd., Chuannan, Diqiao, Linhai, Zhejiang China valid till 13-03-2022.<br><i>The submitted certificate is not valid.<br/>Furthermore, the source of drug substance</i> |

|     |           |   |  |
|-----|-----------|---|--|
|     |           |   | <i>mentioned in the dossier was M/s Zhejiang Tianyu Pharmaceutical Co., Ltd., Jiangkou Development Zone, Huangyan, Taizhou City instead of M/s Zhejiang Huahai Pharmaceutical Co., Ltd.</i>  |
| 4.  | 3.2.S.4.1 | <ul style="list-style-type: none"> <li>Specifications of the drug substance by the drug product manufacturer shall be submitted.</li> </ul>   | <i>Not submitted.</i><br>They only stated that kindly refer to page No. 59 of DMF of API manufacturer.   |
| 5.  | 3.2.S.4.2 | <ul style="list-style-type: none"> <li>Analytical procedures of the drug substance by the drug product manufacturer shall be submitted.</li> <li>Analytical procedures of the drug substance submitted by the drug substance manufacturer are completely different from USP. Clarification shall be submitted.</li> </ul> | <i>Not submitted.</i><br>They only stated that kindly refer to page No. 60-64 of DMF of API manufacturer. Firm has submitted Equivalence study for comparing In-house HPLC assay and related substances analytical method to USP for losartan potassium.           |
| 6.  | 3.2.S.4.3 | Analytical method verification studies of the drug substance performed by the drug product manufacturer shall be submitted.   | Firm has submitted that refer to page No. 65-260 page of DMF of API manufacturer. <i>Firm was asked to provide Analytical method verification studies of the drug substance performed by the drug product manufacturer, however, they didn't provide the same.</i> |
| 7.  | 3.2.S.4.4 | Submitted COA from drug substance manufacturer has mentioned that it complies USP specifications while the analytical procedures are completely different from USP. Clarification shall be submitted.   | Firm has stated that it is responded at serial No. 4 and it is the same query.   |
| 8.  | 3.2.S.5   | COA/details of the working standard used during the development studies shall be submitted.   | Submitted.   |
| 9.  | 3.2.P.5.2 | <ul style="list-style-type: none"> <li>Dissolution test by the finished product has mentioned UV method while official monograph has mentioned HPLC method. Clarification shall be submitted.</li> </ul>  | Firm has submitted that for this product they follow dissolution test 1. According to official monograph, test 1 should be performed on UV method. <i>Dissolution test 1 in the official monograph has mentioned both the UV and HPLC method.</i>                  |
| 10. | 3.2.P.2.2 | Justification shall be submitted for not performing CDP & PE studies against the innovator product.   | Firm has submitted that innovator's brand i.e. Cozzar in 25mg is not available in the market, therefore, alternate and well established brand A2A of Wilson pharma was used as reference.  |
| 11. | 3.2.P.8   | <ul style="list-style-type: none"> <li>Justification shall be submitted for using UV method for dissolution while official monograph</li> </ul>   | Already justifies at point No. 09.   |

|  |  |   |   |  |
|--|--|---|---|--|
|  |  | <p>has mentioned HPLC method.</p> <ul style="list-style-type: none"> <li>Documents for the procurement of API with approval from DRAP shall be submitted.</li> <li>Reference of previous approval of applications with stability study data of the firm (if any) shall be submitted.</li> <li>Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) shall be submitted.</li> <li>Compliance Record of HPLC software 21CFR &amp; audit trail reports on product testing shall be submitted.</li> </ul> | <p>Firm has submitted proforma invoice and DHL slip only.<br/><i>However, no clearance certificate attested by DRAP is submitted by the firm for procurement of API.</i></p> <p>N/A</p> <p>Submitted.</p> <p>Submitted.</p> |  |
|--|--|---|---|--|

**Decision: Registration Board deferred the instant case and decided to give last chance to the applicant for submission the following deficiencies;**

- **Submission of 7500/- fee for revision of label claim in 1.5.2 as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.**
- **Valid copy of GMP certificate of the drug substance manufacturer issued by relevant/concerned regulatory authority shall be submitted.**
- **Specifications of the drug substance by the drug product manufacturer shall be submitted.**
- **Analytical procedures of the drug substance by the drug product manufacturer shall be submitted.**
- **Analytical method verification studies of the drug substance performed by the drug product manufacturer shall be submitted.**
- **Documents for the procurement of API with approval from DRAP shall be submitted.**

|   |  |   |
|---|--|---|
|   |  | Firm has submitted copy of License No. Zhe 20190003 issued by Zhejiang Food and Drug Administration in the name of M/s Zhejiang Xianju County Sunshine Biological Products Co., Ltd., valid till 25-03-2024.  |
|   | Module-II (Quality Overall Summary)  | Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product. |
|   | Module-III Drug Substance:   | Firm has submitted detailed drug substance data related to its nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis (B. No. 5260-201201, mfg. date 07-12-2020) and justification of specification, reference standard, container closure system and stability studies of drug substance.        |
|   | Stability Studies of Drug Substance<br>(Conditions & duration of Stability studies)  | Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at $40^{\circ}\text{C} \pm 2^{\circ}\text{C} / 75\% \pm 5\% \text{ RH}$ for 6 months. The real time stability data is conducted at $30^{\circ}\text{C} \pm 2^{\circ}\text{C} / 65\% \pm 5\% \text{ RH}$ for 36 months. Batches: (17-200305001, 17-200305002 & 17-200305003)           |
|   | Module-III Drug Product:   | Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.       |
|   | Pharmaceutical Equivalence and Comparative Dissolution Profile   | Firm has submitted pharmaceutical equivalence of their product against the innovator's product <b>Proluton Depot</b> . Medipharma (Pvt.) Ltd., 108-Kotlakhpat Industrial Estate Lahore. Licencee of Bayer Pharma AG, Germany. Limited   |
|   | Analytical method validation/verification of product   | Firm has submitted analytical method validation study reports for drug substance as well as drug product.   |
| <b>STABILITY STUDY DATA</b>                       |  |   |
| Manufacturer of API                               | <b>Zhejiang Xianju Yangguang Bioproducts Co., Ltd.</b><br><b>Address:</b> Dongyi Road, Modern Industrial Zone, Xianju Country Zhejiang, China                        |   |

| DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA  |   |  |  |
| 1.   | Reference of previous approval of applications with stability study data of the firm (if any)   | Products dossier on CTD format of firm has been already approved thus no inspection conducted regarding stability studies of the applied product.<br>Firm has submitted the Audit trail reports and Temperature, Humidity record of Data logger of stability chamber for both Accelerated and Real time studies. |  |
| 2.   | Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.                         | Firm has submitted copy of GMP Certificate & DML of API Supplier. The certificate specifies that the firm is operating at satisfactory level of GMP compliance.  |  |
| 3.   | Documents for the procurement of API with approval from DRAP (in case of import).   | Firm has submitted copy of commercial invoice cleared on 04-03-2021 specifying 25.0Kg of Hydroxyprogesterone Caproate. The invoice is cleared by AD (I&E) DRAP, Lahore.  |  |
| 4.   | Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc. | Firm has submitted analytical record for product testing.  |  |
| 5.   | Compliance Record of HPLC software 21CFR & audit trail reports on product testing   | Firm has submitted certificate of 21 CFR compliance for the HPLC system along with audit trail report for product testing.   |  |
| 6.   | Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)                         | Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.  |  |

Decision of 335<sup>th</sup> meeting of Registration Board: Deferred for following;

- Valid copy of DML of the applicant shall be submitted.
- Revision of label with submission of full fee as per reference product.
- Analytical procedures of the drug substance from drug substance manufacturer shall be submitted.
- Real time and accelerated stability data of the drug substance for the same batches as per zone Iva shall be submitted.
- Justification shall be submitted for using final concentration of 0.02mg/ml in the submitted raw data sheets while BP monograph has mentioned 0.05/ml.
- Approval of API/ DML/GMP certificate (valid) of API manufacturer issued by concerned regulatory authority of country of origin shall be submitted.

**Reply by the firm:**

| S. No. | Observation   | Reply submitted by the firm   |
|--------|---|---|
| 1.     | Valid copy of DML of the applicant shall be submitted.  | Firm has submitted copy of DML No. 000300 w.e.f. 25-12-2020.  |
| 2.     | Revision of label with submission of full fee as per reference product.   | Firm has submitted fee of 30,000/- vide slip No. 8336119978 dated 30-07-2024.   |
| 3.     | Analytical procedures of the drug substance from drug substance manufacturer shall be submitted.                        | Submitted.  |
| 4.     | Real time and accelerated stability data of the drug substance for the same batches as per zone Iva shall be submitted. | Submitted.  |
| 5.     | Justification shall be submitted for using final concentration of 0.02mg/ml in the                                      | Firm has submitted that USP Chapter 621 explain about the chromatography where it allows some variation according to your |

|    |  |   |
|----|--|---|
|    | submitted raw data sheets while BP monograph has mentioned 0.05/ml   | system, where it states system suitability is compulsory and system suitability is integral part of chromatography, and validation/verification is necessary if you make variation. So we use this concentration from 0.05mg/ml to 0.02mg/ml according to our system. They further stated that we also performed verification studies. They further stated that BP general chapter of chromatography also allow variation according to your system but make sure the system suitability and verification or revalidation of method. |
| 6. | Approval of API/ DML/GMP certificate (valid) of API manufacturer issued by concerned regulatory authority of country of origin shall be submitted. | Submitted.  |

**Decision: Approved.**

| 1.   | Reference of previous approval of applications with stability study data of the firm (if any)   | NA   |                 |  |
| 2.   | Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.   | Copy of GMP certificate No. Drugs (3) Pb. 2021/3124 dated 25-06-2021 for M/s. Saurav Chemicals Limited, Bhagwanpura, Derabassi – Barwala Road, Mohali District Punjab India issued by Food & Drugs Administration, Punjab is submitted by the firm.<br>GMP certificate is valid till 25-06-2023. |                 |  |
| 3.   | Documents for the procurement of API with approval from DRAP (in case of import).   | Firm has submitted copy of invoice No. SCL/2019-20/087 dated 25-07-2019 mentioning 15kg of ketorolac Tromethamine USP with B. No. KTM180021 attested by Assistant Director I&E, DRAP, Islamabad dated 02-08-2019.  |                 |  |
| 4.   | Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.   | Submitted.   |                 |  |

|    |   |                |
|----|---|----------------|
| 5. | Compliance Record of HPLC software 21CFR & audit trail reports on product testing                                       | Not submitted. |
| 6. | Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) | Submitted.     |

**Remarks of Evaluator:**

| Sr. No. | Section Number | Observations  | Firm's Response |
|---------|----------------|---|-----------------|
| 1.      | 1.4.3          | Valid copy of GMP certificate of the contract acceptor shall be submitted.  |                 |
| 2.      | 1.6.5          | Valid GMP certificate of API manufacturer issued by regulatory body of country shall be submitted.  |                 |
| 3.      | 2.3            | Table for literature references has mentioned USP for drug substance. Revised table for literature references with correct information regarding the drug substance with applicable fee shall be submitted.   |                 |
| 4.      | 3.2.S.4.3      | Analytical method validation studies performed by the drug substance manufacturer for assay test on HPLC has mentioned run time of 40 minutes. While the submitted chromatograms by the drug product manufacturer for method verification has run time of 12.5 minutes only. Justification shall be submitted.  |                 |
| 5.      | 3.2.P.1        | Qualitative composition of the applied formulation is different from the innovator product. Innovator has used Ethanol while the applied formulation has no ethanol. Applied formulation has used Citric acid anhydrous as preservative while the innovator has no citric acid. Justification shall be submitted.   |                 |
| 6.      | 3.2.P.2.3      | Justification of not performing terminal sterilization of the drug product shall be submitted.  |                 |
| 7.      | 3.2.P.5.2      | Analytical procedures submitted by the firm has mentioned 0.06mg/ml ketorolac Tromethamine concentration for both standard and sample preparation. While USP has mentioned 0.05mg/ml ketorolac Tromethamine concentration for both standard and sample preparation. Justification shall be submitted.   |                 |
| 8.      | 3.2.P.8        | <ul style="list-style-type: none"> <li>Analytical procedures submitted by the finished product manufacturer as well as USP has mentioned injection volume of 100µl while the submitted chromatograms for the stability data reflects 20µl injection volume.</li> <li>Compliance Record of HPLC software 21CFR &amp; audit trail reports on product testing shall be submitted.</li> </ul> |                 |

Decision of 331 meeting of Registration Board:

Registration Board deferred the case for submission of reply to the above cited shortcomings.

**Reply submitted by the firm:**

| Sr. No. | Section Number | Observations   | Firm's Response   |
|---------|----------------|--|---|
| 1.      | 1.4.3          | Valid copy of GMP certificate of the contract acceptor shall be submitted.                         | Copy of GMP certificate No. F.3-19/2019-Addl. Dir. (QA & LT-I)-77 dated 28-12-2023 issued on the basis of inspection conducted on 09-10-2023 is submitted by the firm |
| 2.      | 1.6.5          | Valid GMP certificate of API manufacturer issued by regulatory body of country shall be submitted. | Firm has submitted copy of GMP certificate No. Drugs (3) Pb. 2023/3217 dated 14-09-2023 for M/s. Saurav Chemicals Limited, Bhagwanpura,                               |

|    |           |   |  |
|----|-----------|---|--|
|    |           |   | Derabassi – Barwala Road, Mohali District Punjab India issued by Food & Drugs Administration, Punjab is submitted by the firm.<br>GMP certificate is valid till 13-09-2025.<br><i>However, date on the GMP certificate is overwritten.</i>   |
| 3. | 2.3       | Table for literature references has mentioned USP for drug substance. Revised table for literature references with correct information regarding the drug substance with applicable fee shall be submitted.   | Firm has submitted revised table for literature references without submission of applicable fee.   |
| 4. | 3.2.S.4.3 | Analytical method validation studies performed by the drug substance manufacturer for assay test on HPLC has mentioned run time of 40 minutes. While the submitted chromatograms by the drug product manufacturer for method verification has run time of 12.5 minutes only. Justification shall be submitted.    | Firm has submitted that USP has not specify the run time for the drug substance but mention the retention time of ketorolac is about 08 to 12 minutes so in the submitted chromatograms the peak of ketorolac has the RT as per USP monograph.   |
| 5. | 3.2.P.1   | Qualitative composition of the applied formulation is different from the innovator product. Innovator has used Ethanol while the applied formulation has no ethanol. Applied formulation has used Citric acid anhydrous as preservative while the innovator has no citric acid. Justification shall be submitted. | Firm has submitted that they have used same ingredients except ethanol according to well establish study on use of ethanol in injections describe that containing organic vehicles such as ethanol have a certain degree of toxicity , which can easily cause irritation upon injection, thereby due avoid any adverse/harmful effect we replace them with citric acid.                      |
| 6. | 3.2.P.2.3 | Justification of not performing terminal sterilization of the drug product shall be submitted.  | Firm has submitted that the preparation of ketorolac is done by membrane filtration followed by terminal sterilization.<br><i>However, in the initially submitted dossier, there was no terminal sterilization of the said preparation. When they were asked for Justification of not performing terminal sterilization they now stated that they are performing terminal sterilization.</i> |
| 7. | 3.2.P.5.2 | Analytical procedures submitted by the firm has mentioned 0.06mg/ml ketorolac Tromethamine concentration for both standard and sample preparation. While USP has mentioned 0.05mg/ml ketorolac Tromethamine concentration for both standard and sample preparation. Justification shall be submitted.             | Firm has submitted that as per product label claim 30mg/ml, the concentration could be 0.048mg/ml which is nominally 0.05mg/ml. however, analysis was performed with manual injector with fixed loop of 20µl instead of 100µl hence the higher concentration of 0.06mg/ml was preferred.   |
| 8. | 3.2.P.8   | <ul style="list-style-type: none"> <li>Analytical procedures submitted by the finished product manufacturer as well as USP has mentioned injection volume of 100µl while the submitted</li> </ul>   | Firm has submitted that at time they have performed analysis with the Shimadzu isocratic manual injector and it has fixed loop of 20µl and we didn't used 100µl.   |

| Module-II (Quality Overall Summary)            | Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance. The firm has summarized information of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation/verification of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability. |
| Module III (Drug Substance)                    | Firm has submitted detailed data for drug substance related to its nomenclature, structure, general properties, solubility, physical form, manufacturer, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis (B. No. KTM180021, Mfg. date 15-08-18) and justification of specification, reference standard, container closure system and stability studies of drug substance.  |
| Stability studies (Drug substance)             | Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at $40^{\circ} \pm 2^{\circ} \text{C} / 75\% \pm 5\% \text{RH}$ for 6 months. The real time stability data is conducted at $30^{\circ}\text{C} \pm 2^{\circ} \text{C} / 65\% \pm 5\% \text{RH}$ for 60 months. (Batch No. KTM06130016, KTM06130017 & KTM06130018)  |
| Module-III (Drug Product):                     | Firm has submitted detail of the drug product including its description and composition, pharmaceutical development, manufacturer, description of manufacturing process and controls, specifications, analytical procedure, verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.   |

|  |   |  |                 |                 |
|--|---|--|-----------------|-----------------|
|  | Pharmaceutical equivalence and comparative dissolution profile  | Firm has performed pharmaceutical equivalence against the product Toradol Ampoule 30mg, B. No. C2436, Mfg. date 01, 2020 by Barrett Hodgson by performing quality tests (Description, Identification, pH, Assay, Sterility, Bacterial endotoxin.)  |                 |                 |
|  | Analytical method validation/verification of product  | Method verification studies have submitted including linearity, range, accuracy, precision, specificity.   |                 |                 |
| STABILITY STUDY DATA                           |   |  |                 |                 |

| 6.      | 3.2.P.2.3      | Justification of not performing terminal sterilization of the drug product shall be submitted.  |                             |
| 7.      | 3.2.P.5.2      | Analytical procedures submitted by the firm has mentioned 0.06mg/ml ketorolac Tromethamine concentration for both standard and sample preparation. While USP has mentioned 0.05mg/ml ketorolac Tromethamine concentration for both standard and sample preparation. Justification shall be submitted.   |                             |
| 8.      | 3.2.P.8        | <ul style="list-style-type: none"> <li>Analytical procedures submitted by the finished product manufacturer as well as USP has mentioned injection volume of 100µl while the submitted chromatograms for the stability data reflects 20µl injection volume.</li> <li>Compliance Record of HPLC software 21CFR &amp; audit trail reports on product testing shall be submitted.</li> </ul> |                             |

Decision of 333<sup>rd</sup> meeting of Registration Board:

Registration Board deferred the case for submission of reply to the above cited shortcomings within six months.

**Reply submitted by the firm:**

| Sr. No. | Section Number | Observations   | Firm's Response by the firm   |
|---------|----------------|--|---|
| 1.      | 1.4.3          | <ul style="list-style-type: none"> <li>Valid copy of GMP certificate of the contract acceptor shall be submitted.</li> </ul> | Copy of GMP certificate No. F.3-19/2019-Addl. Dir. (QA & LT-I)-77 dated 28-12-2023 issued on the basis of |

|    |           |   |   |
|----|-----------|---|---|
|    |           | <ul style="list-style-type: none"> <li>Valid copy of GMP certificate/last inspection report and DML of the applicant shall be submitted as submitted DML is from 15-06-2011.</li> </ul>   | <p>inspection conducted on 09-10-2023 is submitted by the firm.</p> <p><i>No response is submitted by the firm against this point.</i></p>  |
| 2. | 1.6.5     | Valid GMP certificate of API manufacturer issued by regulatory body of country shall be submitted.  | <p>Firm has submitted copy of GMP certificate No. Drugs (3) Pb. 2023/3217 dated 14-09-2023 for M/s. Saurav Chemicals Limited, Bhagwanpura, Derabassi – Barwala Road, Mohali District Punjab India issued by Food &amp; Drugs Administration, Punjab is submitted by the firm.</p> <p>GMP certificate is valid till 13-09-2025.</p> <p><i>However, date on the GMP certificate is overwritten.</i></p>   |
| 3. | 2.3       | Table for literature references has mentioned USP for drug substance. Revised table for literature references with correct information regarding the drug substance with applicable fee shall be submitted.   | Firm has submitted revised table for literature references without submission of applicable fee.  |
| 4. | 3.2.S.4.3 | Analytical method validation studies performed by the drug substance manufacturer for assay test on HPLC has mentioned run time of 40 minutes. While the submitted chromatograms by the drug product manufacturer for method verification has run time of 12.5 minutes only. Justification shall be submitted.    | Firm has submitted that USP has not specify the run time for the drug substance but mention the retention time of ketorolac is about 08 to 12 minutes so in the submitted chromatograms the peak of ketorolac has the RT as per USP monograph.  |
| 5. | 3.2.P.1   | Qualitative composition of the applied formulation is different from the innovator product. Innovator has used Ethanol while the applied formulation has no ethanol. Applied formulation has used Citric acid anhydrous as preservative while the innovator has no citric acid. Justification shall be submitted. | Firm has submitted that they have used same ingredients except ethanol according to well establish study on use of ethanol in injections describe that containing organic vehicles such as ethanol have a certain degree of toxicity , which can easily cause irritation upon injection, thereby due avoid any adverse/harmful effect we replace them with citric acid.                                 |
| 6. | 3.2.P.2.3 | Justification of not performing terminal sterilization of the drug product shall be submitted.  | <p>Firm has submitted that the preparation of ketorolac is done by membrane filtration followed by terminal sterilization.</p> <p><i>However, in the initially submitted dossier, there was no terminal sterilization of the said preparation. When they were asked for Justification of not performing terminal sterilization they now stated that they are performing terminal sterilization.</i></p> |
| 7. | 3.2.P.5.2 | Analytical procedures submitted by the firm has mentioned 0.06mg/ml ketorolac Tromethamine concentration for both standard and sample preparation. While USP has mentioned 0.05mg/ml ketorolac  | Firm has submitted that as per product label claim 30mg/ml, the concentration could be 0.048mg/ml which is nominally 0.05mg/ml. however, analysis was performed with manual injector with   |

|   |   |   |   |
|---|---|---|---|
|   |   | Tromethamine concentration for both standard and sample preparation. Justification shall be submitted.  | fixed loop of 20µl instead of 100µl hence the higher concentration of 0.06mg/ml was preferred.  |
| 8.  | 3.2.P.8   | <ul style="list-style-type: none"> <li>Analytical procedures submitted by the finished product manufacturer as well as USP has mentioned injection volume of 100µl while the submitted chromatograms for the stability data reflects 20µl injection volume.</li> <li>Compliance Record of HPLC software 21CFR &amp; audit trail reports on product testing shall be submitted.</li> </ul> | <p>Firm has submitted that at time they have performed analysis with the Shimadzu isocratic manual injector and it has fixed loop of 20µl and we didn't used 100µl.</p> <p>Submitted.</p> |
| <b>Decision: Registration Board deferred the instant case and decided to give last chance to the applicant for submission of for following deficiencies;</b> <ul style="list-style-type: none"> <li><b>Clarification regarding the overwriting the date on submitted GMP certificate of the drug substance.</b></li> <li><b>Submission of valid GMP certificate of the drug substance manufacturer issued by relevant / concerned regulatory authority.</b></li> <li><b>Submission of 7500/- fee for pre-registration variation as per notification No.F.7-11/2012-B&amp;A/DRAP dated 07-05-2021.</b></li> <li><b>Scientific justification for difference in the qualitative composition of the applied formulation and innovator product.</b></li> <li><b>Justification for performing terminal sterilization as in the initially submitted application has not mentioned any terminal sterilization.</b></li> </ul> |   |   |   |

Decision: Deferred for following:

- Firm will submit full fee of 30,000/- for pre-approval changes/corrections in registration application as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.
- Table for literature references with correct information regarding both the drug substance and drug product with applicable fee shall be submitted.
- Copies of executed BMR's shall be submitted.
- Justification shall be submitted regarding the newly submitted analytical record for the drug substance wherein the concentration of the test solution and concentration of the reference solution are completely different from each other's.
- Pictorial evidence of the innovator product with visible details of batch number, manufacturing date, expiry date etc. shall be submitted.
- Justification shall be submitted regarding registration status of the reference product against which Pharmaceutical equivalence studies have been performed.
- Justification shall be submitted regarding the previously submitted analytical record wherein the analytical procedures were completely different from the official monograph of BP.
- Justification shall be submitted regarding the API lot number in the stability data sheet as it is changed from the *batch analysis provided in 3.2.S.4.4. i.e. DK15-2111042a, Mfg. date 11-2021.*
- Approval of API/ DML/GMP certificate (Valid) of API manufacturer issued by concerned regulatory authority of country of origin shall be submitted.
- Documents for the procurement of API with approval from DRAP (in case of import) shall be submitted.
- Compliance Record of HPLC software 21CFR & audit trail reports on product testing shall be submitted.

**Reply submitted by the firm:**

| S. No. | Observation  | Reply by the firm   |
|--------|--|---|
| 1.     | Firm will submit full fee of 30,000/- for pre-approval changes/corrections in registration application as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.   | Not submitted.  |
| 2.     | Table for literature references with correct information regarding both the drug substance and drug product with applicable fee shall be submitted.  | Submitted with fee of 7500/- vide slip No. 914179842424 dated 09-01-2024.   |
| 3.     | Copies of executed BMR's shall be submitted.   | Submitted.  |
| 4.     | Justification shall be submitted regarding the newly submitted analytical record for the drug substance wherein the concentration of the test solution and concentration of the reference solution are completely different from each other's. | No justification is submitted by the firm.  |
| 5.     | Pictorial evidence of the innovator product with visible details of batch number, manufacturing date, expiry date etc. shall be submitted.   | Not submitted.  |
| 6.     | Justification shall be submitted regarding registration status of the reference product against which Pharmaceutical equivalence studies have been performed.  | Firm has submitted that PE studies are performed against the product Ciloquine 3mg/ml drops. The mentioned product has registration from Australian Board of registration.<br><i>Firm was asked to provide pictorial evidence, however, they failed to show the same.</i>   |
| 7.     | Justification shall be submitted regarding the previously submitted analytical record wherein the analytical procedures were completely different from the official monograph of BP.   | Firm has submitted that they are submitting BP monograph of the product as reference of the product specifications. By mistake the specification of ciprofloxacin HCl ophthalmic solution as per USP specifications were mentioned in the testing method.<br><i>Firm was asked some other question, however, they didn't respond to the original query.</i> |
| 8.     | Justification shall be submitted regarding the API lot number in the stability data sheet as it is changed from the <i>batch analysis provided in 3.2.S.4.4. i.e. DK15-2111042a, Mfg. date 11-2021.</i>  | Firm has submitted new COA and stability data sheets.<br><i>However, the newly submitted COA has different number than the previously mentioned COA and is also different from the COA submitted in 3.2.S.4.4.</i>  |
| 9.     | Approval of API/ DML/GMP certificate (Valid) of API manufacturer issued by concerned regulatory authority of country of origin shall be submitted.   | Firm has submitted copy of GMP certificate No. SY31052018 issued dated 25-05-2016 valid till 24-05-2021.<br><i>GMP certificate is not valid.</i>  |
| 10.    | Documents for the procurement of API with approval from DRAP (in case of import) shall be submitted.   | Firm has submitted copy of invoice No. ZJ10032019-S dated 20-03-2019 mentioning 50kgs of Ciprofloxacin HCl attested by Assistant Director, DRAP, Karachi dated 28-03-2019.  |

|   |   |   |
|---|---|---|
|   |   | <i>However, initially the same document was submitted by the firm without attestation from DRAP.</i>  |
| 11.   | Compliance Record of HPLC software 21CFR & audit trail reports on product testing shall be submitted. | Not submitted.  |
| <b>Decision: Registration Board decided to give a last chance to submit the reply of shortcomings. The Board further decided to request the QA&amp;LT, Division for detailed evaluation of the firm and also evaluate the product development, clearance documents of the firm.</b> |   |   |

|   | Details of fee submitted  | PKR 30,000/- vide slip No. 94389054 dated: 03/02/2022.  |
|   | The proposed proprietary name / brand name  | Sulfadene Cream 1% w/w.   |
|   | Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit                   | Each gram contains:<br>Silver sulfadiazine.....10mg   |
|   | Pharmacotherapeutic Group of (API)  | Sulfonamides.<br>(D06BA)  |
|   | Pharmaceutical form of applied drug   | Topical cream.  |
|   | Reference to Finished product specifications  | USP specification.  |
|   | Proposed Pack size  | 15gm.   |
|   | Proposed unit price   | Rs. 150/15gm Aluminum tube.   |
|   | The status in reference regulatory authorities  | Silvadene 1% (Silver Sulfadiazine) cream, USFDA approved.   |
|   | For generic drugs (me-too status)   | Quench 1% cream, Ferozsons laboratory, Reg. No. 013090.   |
|   | Name and address of API manufacturer.   | Srikem Laboratories (Pvt.) Limited, Taloja, Navi Mumbai Plot No. 17/24, 17/22, 17/23, 17/13 M.I.D.C Talaj-410 208, Taluka Panvel. Dist. Raigad (Maharashtra) India. |

|  |   |
|--|---|
| Module-II (Quality Overall Summary)                            | Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted. |
| Module III (Drug Substance)                                    | Firm has submitted details of the drug substance including its nomenclature, structure, general properties, physical form, manufacturers, description of manufacturing process and controls, tests for impurity & related substances, specifications, analytical procedures and its verification, batch analysis (214001015, Mfg. date 08-2021) and justification of specification, reference standard, container closure system and stability studies of drug substance.     |
| Stability studies (Conditions & duration of Stability studies) | Stability study conditions:<br>Real time: 30°C ± 2°C / 65% ± 5%RH for 24 months<br>Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months<br>Batches: 194001001, 194001002 & 194001003.  |
| Module-III (Drug Product):                                     | Firm has submitted details of the drug product including its description, composition, pharmaceutical development, manufacture, batch formula, manufacturing process and process control, process validation protocols, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.                        |
| Pharmaceutical equivalence and comparative dissolution profile | Firm has submitted pharmaceutical equivalence studies of their product against Dermazin by performing identification, pH, fill volume and drug release. However, drug release has mentioned limit of 75% - 133% and no details of the comparator product are submitted.   |
| Analytical method validation/verification of product           | Not submitted.  |

#### STABILITY STUDY DATA

|  |  |
|--|--|
| Manufacturer of API                            | Srikem Laboratories (Pvt.) Limited, Taloja, Navi Mumbai Plot No. 17/24, 17/22, 17/23, 17/13 M.I.D.C Taloj-410 208, Taluka Panvel. Dist. Raigad (Maharashtra) India.. |
| API Lot No.                                    | Not mentioned.   |

Decision OF 333<sup>rd</sup> meeting of Registration Board: Deferred for following:

- Firm will submit full fee of 30,000/- for submission of different data at different times.
- Table for literature references with correct information regarding both the drug substance and drug product with applicable fee shall be submitted.
- Justification shall be submitted regarding the analytical procedures as the assay method used by the USP monograph and drug substance manufacturer is by HPLC while the assay method provided by the drug product manufacturer is by titration.
- Analytical method verification of the drug substance performed by the drug product manufacturer shall be submitted.
- Clarification shall be submitted regarding the exact results of the analytical method verification studies submitted by the drug product manufacturer as that of the drug substance manufacturer.
- Analytical record of the drug substance shall be submitted.
- Approval of API/ DML/GMP certificate (Valid) of API manufacturer issued by concerned regulatory authority of country of origin shall be submitted.
- Documents for the procurement of API with approval from DRAP (in case of import) shall be submitted.
- Compliance Record of HPLC software 21CFR & audit trail reports on product testing shall be submitted.

**Reply submitted by the firm:**

| S. No. | Observation   | Reply submitted by the firm  |
|--------|---|--|
| 1.     | Firm will submit full fee of 30,000/- for submission of different data at different times.  | Not submitted.   |
| 2.     | Table for literature references with correct information regarding both the drug substance and drug product with applicable fee shall be submitted.   | Submitted with fee of 7500/- vide slip No. 3786025038 dated 08-01-2024.  |
| 3.     | Justification shall be submitted regarding the analytical procedures as the assay method used by the USP monograph and drug substance manufacturer is by HPLC while the assay method provided by the drug product manufacturer is by titration. | No justification is submitted by the firm. They only submitted USP monograph and the analytical procedures by FPP. |
| 4.     | Analytical method verification of the drug substance performed by the drug product manufacturer shall be submitted.   | Submitted.   |
| 5.     | Clarification shall be submitted regarding the exact results of the analytical method verification studies submitted by the drug  | No clarification is submitted by the firm against this point.  |

|   |  |   |
|---|--|---|
|   | product manufacturer as that of the drug substance manufacturer.   |   |
| 6.  | Analytical record of the drug substance shall be submitted.  | Not submitted.  |
| 7.  | Approval of API/ DML/GMP certificate (Valid) of API manufacturer issued by concerned regulatory authority of country of origin shall be submitted. | Not submitted.<br>Firm has stated that they had ordered the drug substance as sample for R&D. the supplier had provided GMP certificate that was valid at the time of sample shipment. We will collect the new GMP of the drug substance manufacturer when we commercially order the purchase order of the drug substance after the registration of the drug product. |
| 8.  | Documents for the procurement of API with approval from DRAP (in case of import) shall be submitted  | Firm has submitted copy of invoice No. SS-281-2018 dated 28-12-2018 attested by assistant Director, DRAP, Karachi dated 03-01-2019  |
| 9.  | Compliance Record of HPLC software 21CFR & audit trail reports on product testing shall be submitted.  | Not submitted.  |
| <b>Decision: Registration Board decided to reject the instant application.</b><br><b>The Board after observing the casual behaviour of the firm further decided to refer the case to QA&amp;LT, Division of detailed evaluation of the firm and also evaluate the product development, clearance documents of the firm.</b> |  |   |

**Case 03: Registration applications Imported (Human) drugs deferred cases on Form 5F**

|    |   |  |
|----|---|--|
| 1. | <ul style="list-style-type: none"> <li>Notarized agreement shall be submitted.</li> <li>Address of the marketing authorization holder mentioned in 1.4 and that mentioned in sole distribution agreement are different. Clarification shall be submitted.</li> </ul>  | <p>Firm has once again submitted coloured copy of agency agreement.</p> <p>Firm has submitted that SPAL is manufacturer, as per India FDA rule this is third party manufacturing product so license holder is SPAL. They further submitted that they also shared a letter for relationship between Zydus and SPAL.<br/><i>As per submitted CoPP certificate (certificate No. 3474593/TS/2022 dated 21-10-2022 issued by Drugs Control Administration Telangana for cisplatin concentrate for solution for infusion BP 50mg/50ml valid till 24-08-2025 is submitted. The document also confirms that the applied product strength is actually on the market in exporting country. However, as per COPP certificate the product license holder is M/s SPAL Pvt. Ltd., India.</i></p> |
| 2. | Valid, notarized and legalized copy of GMP certificate of the manufacturer shall be submitted.  | <p>Coloured copy of GMP certificate No. 109200/TS/2023 dated 28-03-2023 issued by Drugs Control Administration, Telangana in the name of M/s SPAL Private Limited valid till 26-03-2024 is submitted.<br/><i>GMP certificate is submitted is coloured copy.</i></p>  |
| 3. | <ul style="list-style-type: none"> <li>Notarized and legalized copy of CoPP certificate shall be submitted.</li> <li>Submitted CoPP has mentioned M/s SPAL Pvt. Ltd., India as product license holder while the agreement of the M/s Wellociti is with M/s Zydus Healthcare Limited. Clarification shall be submitted.</li> </ul> | <p><i>Not submitted.</i></p> <p>Firm has submitted that SPAL is manufacturer, as per India FDA rule this is third party manufacturing product so license holder is SPAL. They further submitted that they also shared a letter for relationship between Zydus and SPAL.</p>  |
| 4. | Section 1.4.1 has mentioned domestic and export sales while the sole distribution agreement has mentioned in Pakistan only. Clarification shall be submitted.   | <p>Firm has submitted that agreement between Zydus and Wellociti is for Pakistan sale only. SPAL is contract manufacturer of Zydus for domestic as well as export.<br/><i>Section 1.4.1 from the applicant had mentioned domestic and export sales while agency agreement was for Pakistan only.</i></p>   |
| 5. | BP monograph has mentioned injection volume of 20µl while the specifications submitted by both the drug substance and drug product manufacturer has mentioned 10µl. clarification shall be submitted.   | Firm has submitted that 20µl injection volume was mentioned for related substances and for assay it was mentioned as 10µl. they also submitted BP monograph for the same.  |
| 6. | Qualitative composition of the applied formulation is different from innovator with respect to mannitol. Clarification shall be submitted.  | <p>Firm has submitted that SPAL has chosen Neocorp as reference product which does not contain mannitol in its composition. SPAL product is similar to Neocorp which is the innovator. So, the composition of the applied formulation which was applied in module 3.2.P.1 does not contain mannitol. They also submitted pictures of Neocorp product.<br/>However, the language is other than English that could not be read.</p>  |

|   |  |   |
|---|--|---|
| 7.  | Justification shall be submitted for not performing uniformity of content, sterility and bacterial endotoxin test in PE studies. | Firm has submitted that PE studies only contains the information regarding the test vs RLD qualitative information. Therefore, uniformity of content, sterility and bacterial endotoxin test will not be reflected in the PE studies. |

Based on the people met, documents reviewed and observations made during the detailed inspection, M/S Welmark Pharmaceuticals situated at Plot No.122 Block B phase v industrial estate hattar pakistan, has **ample surplus capacity** in the manufacturing and quality control laboratory for the purpose of manufacturing on contract basis as summarized above.

#### SIGNATURES OF INSPECTORS

| FIRM'S REPRESENTATIVES                            | INSPECTOR  |
|---|--|
| Mr. Ashfaq ur Rahman<br>(Production Manager)      | Mr. Faisal Shehzad,<br>Additional Director, DRAP Peshawar. |
| Mr. Hamid Shah<br>(Quality Control Manager)       | Mr. Atiq Ul Bari<br>FID DRAP, Peshawar.                    |
| Mr. Waheed Anjum<br>(Quality Assurance In-Charge) |  |

Decision of 321<sup>st</sup> meeting of Registration Board:

Registration Board deliberated upon the above presented capacity assessment report of M/s Welmark Pharmaceuticals and referred the case back to the panel for confirmation of following from the firm:

- No. of registered products of M/s Welmark Pharmaceuticals being analyzed on HPLC.
- No. of registered products of M/s Welmark Pharmaceuticals having pharmacopoeial monographs but are being tested on in-house methods.

Moreover, keeping in view already registered products and present testing capacity, the Board directed M/s Welmark Pharmaceuticals to add 02 more HPLC systems in their Quality Control laboratory.

Registration Board deferred following cases of contract manufacturing from M/s Welmark Pharmaceuticals. Plot #122 Phase 5, Block B, Industrial Estate, Hattar, Pakistan till compliance of above cited points.

**As per decision of the registration Board, Chairman registration Board vide letter No. F.15-1/2022-PEC dated 15-08-2023 has assigned Additional Director, DRAP, Peshawar to nominate an officer for confirmation of above points including addition of 02 more HPLCs.**

*In response to the above said letter, Additional Director (QALT), Islamabad vide No. F.167. Add. Dir. (QALT) dated 30-07-2024 forwarded the report and conveyed that the undersigned inspected M/s Wellmark Pharmaceuticals, plot No. 122, phase 5, Block B, Industrials Estate, Hatter on 11-07-2024.*

*The establishment has now 4 HPLCs with addition of 2 HPLCs **and are functional and tests / analysis are being performed as evident from log books** (Annexure-A). Moreover, the establishment is conducting test / analysis as per Official Compendium testing procedures for majority of their products except for few for which testing methods are not in Official Compendium and they have the innovator / in-house method (Annexure-B).*

#### Annex A:

|   |     |
|---|-----|
| Total number of products                                | 140 |
| Number of products tested by Pharmacopoeial method      | 107 |
| Number of products tested by Innovator's specifications | 33  |
| Number of products tested by In-House specifications    | 0   |

#### Accordingly following cases are placed before the Board for consideration;

|      | Reference to Finished product specifications  | Innovator's specification   |
|      | Proposed Pack size  | As per SRO  |
|      | Proposed unit price   | As per SRO  |
|      | The status in reference regulatory authorities                                      | USFDA Approved  |
|      | For generic drugs (me-too status)   | Lotetab Eye Drops of M/s. Helix Pharma Pvt. Ltd. (Reg.no.092853)  |

**Evaluation by PEC-XV:**

| S.no. | Section   | Observations/Deficiencies/ Short-comings  | Response of the Firm   |
|-------|-----------|---|--|
| 1.    | 3.2.S.4.1 | Justify for not using the sterile Loteprednol Etabonate drug substance, since it is used in the | Firm replied that Sterility tests confirm that ophthalmic suspension is sterile. We have performed the sterility test in our product and |

|    |           |  |   |
|----|-----------|--|---|
|    |           | manufacturing of ophthalmic suspension.  | stability documents verify product sterility (Attached as Annex-1). Further the execution of the filling was carried out under Laminar Flow and the finished product was subjected to terminal sterilization through Pak Electron Beam (pvt) Ltd. Reference documents are attached as Annex-I.<br>However, the clarification is needed regarding the procedure of terminal sterilization adopted for the ophthalmic solution, since the submitted manufacturing procedure and Batch manufacturing record did not reflect any such step in the manufacturing of applied product. |
| 2. | 3.2.S.4.3 | Submit analytical method verification report of both drug substance performed by drug product manufacturer.  | Submitted   |
| 3. | 3.2.S.7   | Submit complete real time stability data of drug substance till claimed re-test date, since you have only submitted the data of 18 months.   | Submitted   |
| 4. | 3.2.P.2   | Formulation contain preservative, so preservative effectiveness studies to be performed as per recommendations of pharmacopoeia and shall be submit.   | Submitted   |
| 5. | 3.2.P.8.1 | Justify the performance of stability studies at $30^{\circ}\text{C} \pm 2^{\circ}\text{C} / 65\% \pm 5\%\text{RH}$ and $40^{\circ}\text{C} \pm 2^{\circ}\text{C} / 75\% \pm 5\%\text{RH}$ being a product packed in LDPE (semi permeable) container, while ICH guidelines recommend performing stability studies at $30^{\circ}\text{C} \pm 2^{\circ}\text{C} / 35\% \pm 5\%\text{RH}$ and $40^{\circ}\text{C} \pm 2^{\circ}\text{C} / \text{NMT } 25\% \text{RH}$ for products packed in semi permeable containers. Further, neither you have performed the water loss study of applied product while performing the stability study as recommended by ICH guidelines for drug product packaged in semi-permeable membrane, justify how you have complied the ICH standard of performing stability study of drug product packed in semi-permeable containers. | Firm replied that "In accordance with ICH Guidelines we adopted alternative approach to conduct stability studies at higher humidity levels. This allowed us to access the product stability under more rigorous condition that is $30^{\circ}\text{C} \pm 2^{\circ}\text{C}/65\% \pm 5\% \text{RH}$ and $40^{\circ}\text{C} \pm 2^{\circ}\text{C}/75\% \pm 5\% \text{RH}$ IICH Guideline QIA (R2) is attached. Furthermore, we determined water loss at the reference relative humidity through calculated measurements attached.  |

**Decision: Deferred for clarification regarding the procedure adopted for terminal sterilization of drug product along with the approval letter from DRAP for outsourcing the terminal sterilization procedure from the third party i.e. *Pak Electron Beam (pvt) Ltd.***

|-------|--------------------|--|
| 1.    | <b>1.5.2</b>       | Innovator label claim is “ <i>Each film-coated tablet contains 24.3 mg sacubitril and 25.7 mg valsartan (as sacubitril valsartan sodium salt complex)</i> ”, while the label claim mentioned by you is “ <i>Each film-coated tablet contains 24mg sacubitril and 26mg valsartan</i> ”, same difference is observed in other 2 strengths, so clarification is required in this regard   |
| 2.    | <b>3.2.S.4.1</b>   | <ul style="list-style-type: none"> <li>Justify for adopting different specification of drug substance by drug product manufacturer from that recommended by the drug substance specifically with reference to acceptance limit of water content and assay.</li> <li>Further, please provide the reference of acceptance criteria of pH, since the test of pH is not included in the specification of drug substance manufacturer.</li> </ul> |
| 3.    | <b>3.2.S.4.2</b>   | Justify for not following the same procedure for analysis of enantiomer of valsartan and sacubitril as specified by the drug substance manufacturer. Similarly, adopted assay procedure of drug substance by drug product manufacturer is also not in accordance with the assay method of drug substance manufacturer, clarification is required in this regard.   |
| 4.    | <b>3.2.S.4.3</b>   | Justify for performing the validation studies on assay method different from that specified in section 3.2.S.4.2.  |
| 5.    | <b>3.2.S.4.4</b>   | Justify for not performing the enantiomeric purity test by the drug product manufacturer while analysis of drug substance, as evident from the batch analysis report.  |
| 6.    | <b>3.2.S.7</b>     | Stability data of 12 months has been submitted by the drug substance manufacturer, while the innovator literature revealed that the proposed re-test period of 36 months is suggested for innovator product, in this regard clarify for submitting the stability data of only 12 months.   |
| 7.    | <b>3.2.P.2.2.1</b> | Justify for not performing all the quality test while establishing the pharmaceutical equivalence against the innovator product.   |
| 8.    | <b>3.2.P.5.2</b>   | Justify for not adopting the acceptance criteria of dissolution test as recommended by the innovator brand, further dissolution conditions are also not in accordance with innovator product.  |
| 9.    | <b>3.2.P.5.4</b>   | Justify for submitting the same assay validation report for all strength despite the fact that all strength has different weight per tablet, which is crucial for sample preparation.  |
| 10.   | <b>3.2.P.5.5</b>   | Justify the obtained weight of tablet i.e. 204.91mg, as mentioned in the batch analysis report of drug product, when the weight of uncoated tablet as per the composition table given in section 3.2.P.1 is 205.0mg per tablet. Same clarity is required in other two strengths.   |
| 11.   | <b>3.2.P.8</b>     | Submit updated stability of drug product, since you have submitted stability data of only three months.  |
| 12.   | <b>3.2.R.1.1</b>   | Submit detailed calculation of dispensed weight of active per tablet.  |

**Decision of 336<sup>th</sup> meeting of Registration Board:**

Registration Board deferred the case for submission of reply to the above cited shortcomings.

**Response of the Firm:**

| S.no. | Observations/Deficiencies/ Short-comings  | Response of the Firm  |
|-------|---|---|
| 1.    | Innovator label claim is “ <i>Each film-coated tablet contains 24.3 mg sacubitril and 25.7 mg valsartan (as sacubitril valsartan sodium salt complex)</i> ”, while the label claim mentioned by you is “ <i>Each film-coated tablet contains 24mg sacubitril and 26mg valsartan</i> ”, same difference is observed in other 2 strengths, so clarification is required in this regard  | Firm claimed that it was a typographical mistake, now they are submitting the corrected version of Form 5-F.  |
| 2.    | Justify for adopting different specification of drug substance by drug product manufacturer from that recommended by the drug substance specifically with reference to acceptance limit of water content and assay.   | Firm submitted the amended specification of drug substance in accordance with the specification of drug substance manufacturer.   |
| 3.    | Further, please provide the reference of acceptance criteria of pH, since the test of pH is not included in the specification of drug substance manufacturer.   | Firm submitted the response of drug substance manufacturer i.e. The pH was established according to batches testing result.   |
| 4.    | <ul style="list-style-type: none"> <li>Justify for not following the same procedure for analysis of enantiomer of valsartan and sacubitril as specified by the drug substance manufacturer. Similarly, adopted assay procedure of drug substance by drug product manufacturer is also not in accordance with the assay method of drug substance manufacturer, clarification is required in this regard.</li> <li>Justify for performing the validation studies on assay method different from that specified in section 3.2.S.4.2.</li> </ul> | Firm replied that “Performing the validation study on the assay method is the same as that specified in section 3.2. S.4.2. The assay test method in section 3.2.S.4.2 and 3.2.S.4.3.2 is the same. There is a little difference between them, including that addition of the system suitability requirement and optimization of the procedure for the item assay in section 3.2. S.4.3.2. It has no effect on the product testing.”  |
| 5.    | Justify for not performing the enantiomeric purity test by the drug product manufacturer while analysis of drug substance, as evident from the batch analysis report.   | Firm submitted the revised analysis report in which result of enantiomeric purity test is included along with the results of other test.  |
| 6.    | Stability data of 12 months has been submitted by the drug substance manufacturer, while the innovator literature revealed that the proposed re-test period of 36 months is suggested for innovator product, in this regard clarify for submitting the stability data of only 12 months.  | Firm replied that “The retest date for API is proposed to 48 months. 48 months stability data for the batches 57317080101-03 under the condition of 25±2°C and 60±5%RH has been included in page 364-366/366 of DMF (Sacubitril Valsartan 2019022C OP A02), please check. No stability data under the condition of 30±2°C and 60±5%RH (Zone IVA) is available so far. 36 months stability data for the batches 57319010802-04 under the condition of 30±2°C and 75±5%RH (Zone IV-B) is attached as Annex 1, please check. |
| 7.    | Justify for not performing all the quality test while establishing the pharmaceutical equivalence against the innovator product.  | Firm submitted a revised pharmaceutical equivalence report including the results of all the test specified in the specification of drug product.  |
| 8.    | Justify for not adopting the acceptance criteria of dissolution test as recommended by the innovator brand, further dissolution conditions are also not in accordance with innovator product.   | Firm submitted the revised method and acceptance criteria of dissolution test which is in accordance with innovator product.  |

|  |  |   |
|--|--|---|
| 9.   | Justify for submitting the same assay validation report for all strength despite the fact that all strength has different weight per tablet, which is crucial for sample preparation.  | <p>Firm replied that “This is with reference to the query letter received regarding the product Sacubitril / Valsartan tablet range, please find below response for point 3.2.P.5.4 regarding Assay Validation report:</p> <p>1. Analytical Method Validation was performed and submitted for Assay test was for strength Sacubitril / valsartan 24/26 mg with considering the fact that final sample concentration of assay sample for all strengths are approximately same i.e.</p> <p>Sacubitril / valsartan 24/26 mg mg/ml<br/> Sacubitril / valsartan 49 / 51 mg mg/ml<br/> Sacubitril / valsartan 97 / 103 mg mg/ml<br/> Sacubitril (0.038 mg/ml) Valsartan (0.041 - Sacubitril (0.038 mg/ml) Valsartan (0.041<br/> Sacubitril (0.039 mg/ml) Valsartan (0.041<br/> However, due to difference in weight per tablet, additionally we have performed and being submitted Analytical Method Validation for strengths Sacubitril / valsartan 49/ 51 mg and Sacubitril / valsartan 97/103 mg as both strengths are dose proportional and same AMV can be applied to both these strengths.<br/> Attachment: Analytical Method Validation Sacubitril / valsartan (49/51 mg &amp; 97/103 mg)”</p> |
| 10.  | Justify the obtained weight of tablet i.e. 204.91mg, as mentioned in the batch analysis report of drug product, when the weight of uncoated tablet as per the composition table given in section 3.2.P.1 is 205.0mg per tablet. Same clarity is required in other two strengths. | <p>Firm replied that “This is with reference to the query letter received regarding the product Sacubitril / Valsartan tablet range, please find below response for point 3.2.P.5.5 regarding average weight of tablet in batch analysis report of drug product: Although the weight of uncoated tablet as per the composition given in section 3.2.P.1 is 205.0 mg / tablet, however, average weight of coated tablet mentioned in batch analysis report of drug product Sacubitril / valsartan 24/26 mg is 204.9 mg/tablet which is slightly on lower side in comparison with uncoated tablet but within tolerance limits as covered in drug product specifications i.e. 201.56-222.78 mg/tab. Same is followed for other two strengths as well i.e. Sacubitril / Valsartan tablet 49/51 mg and Sacubitril / Valsartan tablet 97/103 mg.</p>  |
| 11.  | Submit updated stability of drug product, since you have submitted stability data of only three months.  | Firm submitted the stability data of drug product till 6 <sup>th</sup> month.   |
| 12.  | Submit detailed calculation of dispensed weight of active per tablet.  | Submitted   |
| <b>Decision: Deferred for providing the reference adopted for setting acceptance limit of weight variation of coated tablet along with scientific justification of getting the obtained weight of coated tablet on the lower side comparing the theoretical weight of uncoated tablet.</b> |  |   |

**Evaluation by PEC (XV):**

| S.no. | Sections         | Observations/Deficiencies/ Short-comings   |
|-------|------------------|--|
| 1.    | <b>1.5.2</b>     | Innovator label claim is " <i>Each film-coated tablet contains 24.3 mg sacubitril and 25.7 mg valsartan (as sacubitril valsartan sodium salt complex)</i> ", while the label claim mentioned by you is " <i>Each film-coated tablet contains 24mg sacubitril and 26mg valsartan</i> ", same difference is observed in other 2 strengths, so clarification is required in this regard   |
| 2.    | <b>3.2.S.4.1</b> | <ul style="list-style-type: none"> <li>Justify for adopting different specification of drug substance by drug product manufacturer from that recommended by the drug substance specifically with reference to acceptance limit of water content and assay.</li> <li>Further, please provide the reference of acceptance criteria of pH, since the test of pH is not included in the specification of drug substance manufacturer.</li> </ul> |
| 3.    | <b>3.2.S.4.2</b> | Justify for not following the same procedure for analysis of enantiomer of valsartan and sacubitril as specified by the drug substance manufacturer. Similarly, adopted assay procedure of drug substance by drug product manufacturer is also not in accordance with the assay method of drug substance manufacturer, clarification is required in this regard.   |
| 4.    | <b>3.2.S.4.3</b> | Justify for performing the validation studies on assay method different from that specified in section 3.2.S.4.2.  |

|     |                    |  |
|-----|--------------------|--|
| 5.  | <b>3.2.S.4.4</b>   | Justify for not performing the enantiomeric purity test by the drug product manufacturer while analysis of drug substance, as evident from the batch analysis report.  |
| 6.  | <b>3.2.S.7</b>     | Stability data of 12 months has been submitted by the drug substance manufacturer, while the innovator literature revealed that the proposed re-test period of 36 months is suggested for innovator product, in this regard clarify for submitting the stability data of only 12 months. |
| 7.  | <b>3.2.P.2.2.1</b> | Justify for not performing all the quality test while establishing the pharmaceutical equivalence against the innovator product.   |
| 8.  | <b>3.2.P.5.2</b>   | Justify for not adopting the acceptance criteria of dissolution test as recommended by the innovator brand, further dissolution conditions are also not in accordance with innovator product.  |
| 9.  | <b>3.2.P.5.4</b>   | Justify for submitting the same assay validation report for all strength despite the fact that all strength has different weight per tablet, which is crucial for sample preparation.  |
| 10. | <b>3.2.P.5.5</b>   | Justify the obtained weight of tablet i.e. 204.91mg, as mentioned in the batch analysis report of drug product, when the weight of uncoated tablet as per the composition table given in section 3.2.P.1 is 205.0mg per tablet. Same clarity is required in other two strengths.         |
| 11. | <b>3.2.P.8</b>     | Submit updated stability of drug product, since you have submitted stability data of only three months.  |
| 12. | <b>3.2.R.1.1</b>   | Submit detailed calculation of dispensed weight of active per tablet.  |

**Decision of 336<sup>th</sup> meeting of Registration Board:**

Registration Board deferred the case for submission of reply to the above cited shortcomings.

**Response of the firm:**

| S.no. | Observations/Deficiencies/ Short-comings  | Response of the Firm   |
|-------|---|--|
| 1.    | Innovator label claim is “ <i>Each film-coated tablet contains 24.3 mg sacubitril and 25.7 mg valsartan (as sacubitril valsartan sodium salt complex)</i> ”, while the label claim mentioned by you is “ <i>Each film-coated tablet contains 24mg sacubitril and 26mg valsartan</i> ”, same difference is observed in other 2 strengths, so clarification is required in this regard  | Firm claimed that it was a typographical mistake, now they are submitting the corrected version of Form 5-F.   |
| 2.    | Justify for adopting different specification of drug substance by drug product manufacturer from that recommended by the drug substance specifically with reference to acceptance limit of water content and assay.   | Firm submitted the amended specification of drug substance in accordance with the specification of drug substance manufacturer.  |
| 3.    | Further, please provide the reference of acceptance criteria of pH, since the test of pH is not included in the specification of drug substance manufacturer.   | Firm submitted the response of drug substance manufacturer i.e. The pH was established according to batches testing result.  |
| 4.    | <ul style="list-style-type: none"> <li>Justify for not following the same procedure for analysis of enantiomer of valsartan and sacubitril as specified by the drug substance manufacturer. Similarly, adopted assay procedure of drug substance by drug product manufacturer is also not in accordance with the assay method of drug substance manufacturer, clarification is required in this regard.</li> <li>Justify for performing the validation studies on assay method different from that specified in section 3.2.S.4.2.</li> </ul> | Firm replied that “Performing the validation study on the assay method is the same as that specified in section 3.2. S.4.2. The assay test method in section 3.2.S.4.2 and 3.2.S.4.3.2 is the same. There is a little difference between them, including that addition of the system suitability requirement and optimization of the procedure for the item assay in section 3.2. S.4.3.2. It has no effect on the product testing.” |

|     |  |   |
|-----|--|---|
| 5.  | Justify for not performing the enantiomeric purity test by the drug product manufacturer while analysis of drug substance, as evident from the batch analysis report.  | Firm submitted the revised analysis report in which result of enantiomeric purity test is included along with the results of other test.  |
| 6.  | Stability data of 12 months has been submitted by the drug substance manufacturer, while the innovator literature revealed that the proposed re-test period of 36 months is suggested for innovator product, in this regard clarify for submitting the stability data of only 12 months. | Firm replied that “The retest date for API is proposed to 48 months. 48 months stability data for the batches 57317080101-03 under the condition of 25±2°C and 60±5%RH has been included in page 364-366/366 of DMF (Sacubitril Valsartan 2019022C OP A02), please check. No stability data under the condition of 30±2°C and 60±5%RH (Zone IVA) is available so far. 36 months stability data for the batches 57319010802-04 under the condition of 30±2°C and 75±5%RH (Zone IV-B) is attached as Annex 1, please check.   |
| 7.  | Justify for not performing all the quality test while establishing the pharmaceutical equivalence against the innovator product.   | Firm submitted a revised pharmaceutical equivalence report including the results of all the test specified in the specification of drug product.  |
| 8.  | Justify for not adopting the acceptance criteria of dissolution test as recommended by the innovator brand, further dissolution conditions are also not in accordance with innovator product.  | Firm submitted the revised method and acceptance criteria of dissolution test which is in accordance with innovator product.  |
| 9.  | Justify for submitting the same assay validation report for all strength despite the fact that all strength has different weight per tablet, which is crucial for sample preparation.  | <p>Firm replied that “This is with reference to the query letter received regarding the product Sacubitril / Valsartan tablet range, please find below response for point 3.2.P.5.4 regarding Assay Validation report:</p> <p>1. Analytical Method Validation was performed and submitted for Assay test was for strength Sacubitril / valsartan 24/26 mg with considering the fact that final sample concentration of assay sample for all strengths are approximately same i.e.</p> <p>Sacubitril / valsartan 24/26 mg mg/ml<br/> Sacubitril / valsartan 49 / 51 mg mg/ml<br/> Sacubitril / valsartan 97 / 103 mg mg/ml<br/> Sacubitril (0.038 mg/ml) Valsartan (0.041 - Sacubitril (0.038 mg/ml) Valsartan (0.041<br/> Sacubitril (0.039 mg/ml) Valsartan (0.041</p> <p>However, due to difference in weight per tablet, additionally we have performed and being submitted Analytical Method Validation for strengths Sacubitril / valsartan 49/ 51 mg and Sacubitril / valsartan 97/103 mg as both strengths are dose proportional and same AMV can be applied to both these strengths.</p> <p>Attachment: Analytical Method Validation Sacubitril / valsartan (49/51 mg &amp; 97/103 mg)”</p> |
| 10. | Justify the obtained weight of tablet i.e. 204.91mg, as mentioned in the batch analysis report of drug product, when the weight of uncoated tablet as per the composition table given in section 3.2.P.1 is 205.0mg per tablet. Same clarity is required in other two strengths.         | Firm replied that “This is with reference to the query letter received regarding the product Sacubitril / Valsartan tablet range, please find below response for point 3.2.P.5.5 regarding average weight of tablet in batch analysis report of drug product: Although the weight of uncoated tablet as per the composition given in section  |

|     |   |  |
|-----|---|--|
|     |   | 3.2.P.1 is 205.0 mg / tablet, however, average weight of coated tablet mentioned in batch analysis report of drug product Sacubitril / valsartan 24/26 mg is 204.9 mg/tablet which is slightly on lower side in comparison with uncoated tablet but within tolerance limits as covered in drug product specifications i.e. 201.56-222.78 mg/tab. Same is followed for other two strengths as well i.e. Sacubitril / Valsartan tablet 49/51 mg and Sacubitril / Valsartan tablet 97/103 mg. |
| 11. | Submit updated stability of drug product, since you have submitted stability data of only three months. | Firm submitted the stability data of drug product till 6 <sup>th</sup> month.  |
| 12. | Submit detailed calculation of dispensed weight of active per tablet.                                   | Submitted  |

**Decision: Deferred for providing the reference adopted for setting acceptance limit of weight variation of coated tablet along with scientific justification of getting the obtained weight of coated tablet on the lower side comparing the theoretical weight of uncoated tablet.**

**Evaluation by PEC (XV):**

| S.no. | Observations/Deficiencies/ Short-comings   | Response of the firm   |
|-------|--|--|
| 1.    | Since firm has claimed USP specifications. Justify the declared label claim in terms of Colistimethate | The label claim given by the DRAP for cmyate IMIU Injection, was followed for the abovementioned strengths for the harmonization of all the strengths of (registration letter of cmyate IMIU Injection is as attached). However, |

|    |  |   |
|----|--|---|
|    | sodium instead of Colistimethate base activity as recommended by USP.  | the Assay results were calculated as Colistine base activity as defined in USP.<br>But the firm has declared the label claim with reference to the quantity of colistimethate sodium instead of colistimethate base activity.   |
| 2. | Manufacturing procedure of drug substance did not include the step of sterilization neither the document revealed regarding the manufacturing under aseptic condition, clarify the sterilization procedure adopted during manufacturing, since, the drug substance is used in the preparation of injectable dosage form. | Firm replied that “As defined in the manufacturing procedure the of sterilization of API is assured by sequential "Ultra filtration and Nano filtration technology". Since the API is sensitive to heat so heat sterilization of the product is not suitable.”  |
| 3. | Assay method specified in section 3.2.S.4.2 is not in accordance with the USP general chapter <81> <i>antibiotics—microbial assays</i> , specifically with reference to concentration of standard and sample solution and the calculation of sample potency determination, clarification is required in this regard.     | The USP general chapter <81> provides the general guidelines for the microbiological assay of substances, > however product specific adjustments in the procedure are allowed by the USP (Ref: General Notice 6.30). Therefore, API manufacturer has adopted USP Chapter <81> for the procedure and dilution and concentrations are adjusted in accordance with the product requirement. 1, Moreover the standard analytical procedure is validated as per USP and ICH guidelines. So the procedure used by API manufacturer is justifiable.<br>However as per General chapter of USP “ <i>It is acceptable to adjust the median concentration to optimize zone sizes if the data remain in the linear range</i> ”. then firm has to provide reasons to change the conc of solutions and the limits of adjustment which is considered while adjusting the conc. as per General notices of USP. Further, provide complete calculation of petency dertermination as per the USP general chapter <81>. |
| 4. | Justify for performing verification studies on assay method different from that recommended by USP general chapter <81> <i>antibiotics—microbial assays</i> .  | Firm replied that, “In The USP general chapter <81> provides the general guidelines for the microbiological assay of substances, however product specific adjustments in the procedure are allowed by the USP. Therefore, API manufacturer has adopted USP Chapter <81> for the procedure and dilution and concentrations are adjusted in accordance with the product requirement. Moreover, the standard analytical procedure is validated as per USP and ICH guidelines. So the procedure used by API manufacturer is justifiable”.<br>Please justify the adjusted concentration of solutions in the light of allowable limits of USP.  |
| 5. | Submitted CoA does not clarify the potency whether in terms of CBA or IU of CMS.   | Firm replied that “The CoA is in accordance with USP and the limit defined by the USP is as follows:<br>"Colistimethate Sodium has a potency equivalent to not less than 390 µg of colistin per mg".<br>From the above label claim it is evident that the potency is defined in terms of colistin base activity.  |
| 6. | Justification of declared label claim in terms of Colistimethate sodium instead of Colistimethate base activity as recommended by USP as the firm claimed USP specifications for finished drug product.  | Firm replied that “The limit defined by the USP is in the monograph "Colistimethate for Injection" is"Colistimethate for Injection contains an amount of Colistimethate Sodium equivalent to not less than 90.0 percent and not more than 120.0 percent of the labeled amount of colistin"  |

|     |  |  |
|-----|--|--|
|     |  | <p>The limit given the CoA of finished product by drug product manufacturer is "90% to 120%" which is the limit of colistin base activity.</p> <p>However, the label claim specified by the drug product manufacturer needs to be amended in accordance with the colistin base activity as per USP.</p>  |
| 7.  | <ul style="list-style-type: none"> <li>Justify dispensed quantity of Colistimethate Sodium against the determined potency in terms of Colistimethate base activity (CBA).</li> <li>Provide the calculation which rationalize the adopted filled weight quantity of colistimethate sodium per vial.</li> </ul>  | <p>Firm replied that the dispensed weight is calculated in accordance with the innovator's product "COLOMYCIN 2 million International Units (IU) of Powder for solution for injection".</p> <p>But the firm has not submitted the calculation of dispensed quantity of Colistimethate Sodium against the determined potency in terms of Colistimethate base activity (CBA).</p>  |
| 8.  | Submit the detail of manufacturer, brand name and Registration no. in case of local manufacturer of reference/comparator product against which pharmaceutical equivalence has been established.  | Firm replied that "Comparative study was performed with the following product: Product name: Colistin Injection By M/s Biopharmaceutica".  |
| 9.  | Justify for not performing content uniformity test and test of <i>Free colistin under Colistimethate Sodium while performing the pharmaceutical equivalence against the comparator product</i> .   | <p>Firm replied that "The uniformity of dosage is performed at each stability interval. Therefore, in equivalence study content uniformity was not performed. Moreover, the "free colistin test is given by USP in "raw material monograph. For finished product the USP do not defines the free colistin test".</p> <p>However, the "<i>Free colistin test</i>" is included in the USP monograph of finished drug product, further, the pharmaceutical equivalence study should include all the test of specification of drug product.</p>  |
| 10. | Justify for not including the test of <i>Free colistin under Colistimethate Sodium</i> in the specification of drug product.   | <p>Firm replied that "The "free colistin test is given by USP in "raw material monograph and this test were performed for the raw material by the Aulton Pharmaceutical for finished product the USP do not defines the free colistin test".</p> <p>However, the test of free colistin is included in the USP monograph of drug product "Colistimethate for Injection"</p>   |
| 11. | Justify for adopting the microbial assay procedure which is not completely as per USP monograph for "Colistimethate for Injection", general chapter "Antibiotics Microbial Assays <81>", particularly the volume of base layer is different, volume of bacterial layer is not same neither the standard dilutions preparation and assay calculation/analysis is in accordance with the said USP chapter. | <p>Firm replied that "The USP general chapter &lt;81&gt; provides the general Assay guidelines for the microbiological assay of substances, rdance The procedure adopted was same as USP, however the dilution was prepared as defined by the assay of API manufacturer. Moreover, the standard analytical and procedure is validated as per USP and ICH guidelines. So, the procedure used by API manufacturer is nation, justifiable.</p> <p>Firm has not complied the requirements mentioned in the USP General Chapter &lt;81&gt; particularly, the volume of base layer is different, volume of bacterial layer is not same neither the standard dilutions preparation and assay calculation/analysis. Further the firm submitted the raw data sheets of potency calculation of drug product, which shows that the median concentration of 5.20 is prepared for analysis while the USP recommends 1 µg/mL. Firm has to submit the adjustment limit which is considered for changing the concentration of solutions.</p> |

|     |  |  |
|-----|--|--|
| 12. | Further, clarify the culture medium in which seed layer has been prepared.   | Firm replied that “for seed layering USP <81> defined "Medium 1" was used. However for further validation specie specific medium "SB Medium" was also used.  |
| 13. | <ul style="list-style-type: none"> <li>Please provide detailed report of verification studies including the sample and standard solution preparation method and complete potency calculations.</li> <li>How can the verification report of all three applied strength is same despite the initial reconstituted solution of each strength has different concentration, which ultimately change the required quantity of Buffer B.6 to achieve the concentration recommended in the general chapter “Antibiotics Microbial Assays &lt;81&gt;”.</li> </ul> | Not submitted the reply of this query.   |
| 14. | Submitted batch analysis report does not clarify the potency whether in terms of CBA or IU of CMS.   | Firm replied that “In CoA the limits are given according to USP ie: "Colistimethate for Injection contains an amount of Colistimethate Sodium equivalent to not less than 90.0 percent and not more than 120.0 percent of the labeled amount of colistin".                                     |
| 15. | Description of product mentioned in the stability data sheets specify that the product is crystalline powder, while the general properties given in the documents of drug substance manufacturer revealed that the ready to fill material is amorphous in nature.  | Firm replied that “As the powder is ready to fill material, so the specification of finished product given by Aulton report Pharmaceuticals are "White to slightly yellow powder filled in glass vials', which is in accordance with USP and API manufacturer specification”.                  |
| 16. | Provide the COA of Mueller-Hinton Agar with the facts that the composition of the media in accordance with Media 9 i.e. the recommended media for colistimethate as per USP.   | Firm submitted the documents which did not mentioned the composition of Mueller-Hinton Agar.   |
| 17. | Provide calculation detail of dispensed weight of colistimethate sodium per vial. Since the submitted BMR did not contain the same information.  | Firm replied that “The weight/vial is calculated in accordance with the innovator's product "COLOMYCIN 2 million International Units (IU) Powder for solution for injection".<br>But the query is relevant to submission of calculation of dispensed weight of colistimethate sodium per vial. |

#### **Decision of 336<sup>th</sup> meeting of Registration Board:**

Deferred for submission of following:

- Revised label claim in terms of Colistimethate base activity as recommended by USP since the firm claimed USP specifications for finished drug product.
- Justify the adjusted concentration of both standard and sample solution of drug substance in the light of allowable limits of USP.
- Submit pharmaceutical equivalence report including the test of content uniformity and free colistin test, since both of these test is the part of USP Monograph of “Colistimethate for injection”.
- Firm has not complied the requirements mentioned in the USP General Chapter <81> particularly, the volume of base layer is different, volume of bacterial layer is not same neither the standard dilutions preparation and assay calculation/analysis. Further the firm submitted the raw data sheets of potency calculation of drug product, which shows that the median concentration of 5.20 is prepared for analysis while the USP recommends 1 µg/mL. Firm has to submit the adjustment limit which is considered for

| <p>changing the concentration of solutions along with clarification regarding the said changes in the assay procedure of drug product.</p> <ul style="list-style-type: none"> <li>• Please provide detailed report of verification studies including the sample and standard solution preparation method and complete potency calculations.</li> <li>• How can the verification report of all three applied strengths is same despite the initial reconstituted solution of each strength has different concentration, which ultimately change the required quantity of Buffer B.6 to achieve the concentration recommended in the general chapter “Antibiotics Microbial Assays &lt;81&gt;”.</li> <li>• Provide the COA or other document of Mueller-Hinton Agar which confirm the composition of this medium.</li> <li>• Provide calculation detail of dispensed weight of colistimethate sodium per vial. Since the submitted BMR did not contain the same information.</li> </ul> |  |   |
|---|--|---|
| <b>Response of the Firm:</b>  |  |   |
| <b>Sr.no.</b>   | <b>Decision of 336<sup>th</sup> meeting of RB</b>  | <b>Response of the Firm</b>   |
| 1.  | Revised label claim in terms of Colistimethate base activity as recommended by USP since the firm claimed USP specifications for finished drug product.  | Firm submitted the revised label claim as per USP i.e. as follows:<br>Each vial contains:<br>Colistimethate Sodium eq. to 68mg Colistin base activity.  |
| 2.  | Justify the adjusted concentration of both standard and sample solution of drug substance in the light of allowable limits of USP.   | Firm replied that “initially the concentrations were selected as per specification of API manufacturer, however we are hereby submitting the results of analysis as per USP specification using the same concentration as mentioned in the USP.   |
| 3.  | Submit pharmaceutical equivalence report including the test of content uniformity and free colistin test, since both of these test is the part of USP Monograph of “Colistimethate for injection”.   | Firm submitted the revised pharmaceutical equivalence report in which the result of free colistin test is included in the report.   |
| 4.  | Firm has not complied the requirements mentioned in the USP General Chapter <81> particularly, the volume of base layer is different, volume of bacterial layer is not same neither the standard dilutions preparation and assay calculation/analysis. Further the firm submitted the raw data sheets of potency calculation of drug product, which shows that the median concentration of 5.20 is prepared for analysis while the USP recommends 1 µg/mL. Firm has to submit the adjustment limit which is considered for changing the concentration of solutions along with clarification regarding the said changes in the assay procedure of drug product. | Firm replied that “initially the concentrations were selected as per specification of API manufacturer, however we are hereby submitting the results of analysis as per USP specification using the same concentration as mentioned in the USP.<br>The analysis was performed as per USP specification with the same base layer as well as bacterial layer and the median concentration of 1 µg/mL in accordance with USP”. |
| 5.  | <ul style="list-style-type: none"> <li>• Please provide detailed report of verification studies including the sample and standard solution preparation method and complete potency calculations.</li> <li>• How can the verification report of all three applied strengths is same despite the initial reconstituted solution of each strength has different concentration, which ultimately change the required quantity of Buffer B.6 to achieve the</li> </ul>  | Firm submitted the verification study report.<br>Verification report of each strength is submitted. The concentration details are also provided. Initial concentration of every strength is different from the other strength, however the final concentration of all the strength is same i.e. 1 µg/mL in accordance with USP.   |

|    |   |  |
|----|---|--|
|    | concentration recommended in the general chapter “Antibiotics Microbial Assays <81>”.   |  |
| 6. | Provide the COA or other document of Mueller-Hinton Agar which confirm the composition of this medium.  | Firm submitted the COA of Mueller-Hinton Agar which confirm the composition of this medium.      |
| 7. | Provide calculation detail of dispensed weight of colistimethate sodium per vial. Since the submitted BMR did not contain the same information. | Firm submitted the calculation regarding the dispensed weight of colistimethate sodium per vial. |

**Decision: Approved.**

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

**Evaluation by PEC (XV):**

| S.no. | Observations/Deficiencies/ Short-comings   | Response of the firm   |
|-------|--|--|
| 1.    | Since firm has claimed USP specifications. Justify the declared label claim in terms of Colistimethate sodium instead of Colistimethate base activity as recommended by USP. | The label claim given by the DRAP for cmyate IMIU Injection, was followed for the abovementioned strengths for the harmonization of all the strengths of (registration letter of cmyate IMIU Injection is as attached). However, the Assay results were calculated as Colistine base activity as defined in USP. |

|    |  |   |
|----|--|---|
|    |  | But the firm has declared the label claim with reference to the quantity of colistimethate sodium instead of colistimethate base activity.  |
| 2. | Manufacturing procedure of drug substance did not include the step of sterilization neither the document revealed regarding the manufacturing under aseptic condition, clarify the sterilization procedure adopted during manufacturing, since, the drug substance is used in the preparation of injectable dosage form. | Firm replied that "As defined in the manufacturing procedure the of sterilization of API is assured by sequential "Ultra filtration and Nano filtration technology". Since the API is sensitive to heat so heat sterilization of the product is not suitable."  |
| 3. | Assay method specified in section 3.2.S.4.2 is not in accordance with the USP general chapter <81> <i>antibiotics—microbial assays</i> , specifically with reference to concentration of standard and sample solution and the calculation of sample potency determination, clarification is required in this regard.     | The USP general chapter <81> provides the general guidelines for the microbiological assay of substances, > however product specific adjustments in the procedure are allowed by the USP (Ref: General Notice 6.30). Therefore, API manufacturer has adopted USP Chapter <81> for the procedure and dilution and concentrations are adjusted in accordance with the product requirement. 1, Moreover the standard analytical procedure is validated as per USP and ICH guidelines. So the procedure used by API manufacturer is justifiable.<br>However as per General chapter of USP <i>"It is acceptable to adjust the median concentration to optimize zone sizes if the data remain in the linear range"</i> . then firm has to provide reasons to change the conc of solutions and the limits of adjustment which is considered while adjusting the conc. as per General notices of USP. Further, provide complete calculation of potency determination as per the USP general chapter <81>. |
| 4. | Justify for performing verification studies on assay method different from that recommended by USP general chapter <81> <i>antibiotics—microbial assays</i> .  | Firm replied that, "In The USP general chapter <81> provides the general guidelines for the microbiological assay of substances, however product specific adjustments in the procedure are allowed by the USP. Therefore, API manufacturer has adopted USP Chapter <81> for the procedure and dilution and concentrations are adjusted in accordance with the product requirement. Moreover, the standard analytical procedure is validated as per USP and ICH guidelines. So the procedure used by API manufacturer is justifiable".<br>Please justify the adjusted concentration of solutions in the light of allowable limits of USP.  |
| 5. | Submitted CoA does not clarify the potency whether in terms of CBA or IU of CMS.   | Firm replied that "The CoA is in accordance with USP and the limit defined by the USP is as follows:<br>"Colistimethate Sodium has a potency equivalent to not less than 390 µg of colistin per mg".<br>From the above label claim it is evident that the potency is defined in terms of colistin base activity.  |
| 6. | Justification of declared label claim in terms of Colistimethate sodium instead of Colistimethate base activity as recommended by USP as the firm claimed USP specifications for finished drug product.  | Firm replied that "The limit defined by the USP is in the monograph "Colistimethate for Injection" is "Colistimethate for Injection contains an amount of Colistimethate Sodium equivalent to not less than 90.0 percent and not more than 120.0 percent of the labeled amount of colistin"<br>The limit given the CoA of finished product by drug product manufacturer is "90% to 120%" which is the limit of colistin base activity.  |

|     |  |  |
|-----|--|--|
|     |  | However, the label claim specified by the drug product manufacturer needs to be amended in accordance with the colistin base activity as per USP.  |
| 7.  | <ul style="list-style-type: none"> <li>Justify dispensed quantity of Colistimethate Sodium against the determined potency in terms of Colistimethate base activity (CBA).</li> <li>Provide the calculation which rationalize the adopted filled weight quantity of colistimethate sodium per vial.</li> </ul>  | <p>Firm replied that the dispensed weight is calculated in accordance with the innovator's product "COLOMYCIN 2 million International Units (IU) of Powder for solution for injection".</p> <p>But the firm has not submitted the calculation of dispensed quantity of Colistimethate Sodium against the determined potency in terms of Colistimethate base activity (CBA).</p>  |
| 8.  | Submit the detail of manufacturer, brand name and Registration no. in case of local manufacturer of reference/comparator product against which pharmaceutical equivalence has been established.  | Firm replied that "Comparative study was performed with the following product: Product name: Colistim Injection By M/s Biopharmaceutica".  |
| 9.  | Justify for not performing content uniformity test and test of <i>Free colistin under Colistimethate Sodium while performing the pharmaceutical equivalence against the comparator product</i> .   | <p>Firm replied that "The uniformity of dosage is performed at each stability interval. Therefore, in equivalence study content uniformity was not performed. Moreover, the "free colistin test is given by USP in "raw material monograph. For finished product the USP do not defines the free colistin test".</p> <p>However, the "<i>Free colistin test</i>" is included in the USP monograph of finished drug product, further, the pharmaceutical equivalence study should include all the test of specification of drug product.</p>  |
| 10. | Justify for not including the test of <i>Free colistin under Colistimethate Sodium</i> in the specification of drug product.   | <p>Firm replied that "The "free colistin test is given by USP in "raw material monograph and this test were performed for the raw material by the Aulton Pharmaceutical for finished product the USP do not defines the free colistin test".</p> <p>However, the test of free colistin is included in the USP monograph of drug product "Colistimethate for Injection"</p>   |
| 11. | Justify for adopting the microbial assay procedure which is not completely as per USP monograph for "Colistimethate for Injection", general chapter "Antibiotics Microbial Assays <81>", particularly the volume of base layer is different, volume of bacterial layer is not same neither the standard dilutions preparation and assay calculation/analysis is in accordance with the said USP chapter. | <p>Firm replied that "The USP general chapter &lt;81&gt; provides the general Assay guidelines for the microbiological assay of substances, rdance The procedure adopted was same as USP, however the dilution was prepared as defined by the assay of API manufacturer. Moreover, the standard analytical and procedure is validated as per USP and ICH guidelines. So, the procedure used by API manufacturer is nation, justifiable.</p> <p>Firm has not complied the requirements mentioned in the USP General Chapter &lt;81&gt; particularly, the volume of base layer is different, volume of bacterial layer is not same neither the standard dilutions preparation and assay calculation/analysis. Further the firm submitted the raw data sheets of potency calculation of drug product, which shows that the median concentration of 5.20 is prepared for analysis while the USP recommends 1 µg/mL. Firm has to submit the adjustment limit which is considered for changing the concentration of solutions.</p> |
| 12. | Further, clarify the culture medium in which seed layer has been prepared.   | Firm replied that "for seed layering USP <81> defined "Medium 1" was used. However for further validation specie specific medium "SB Medium" was also used.  |
| 13. | <ul style="list-style-type: none"> <li>Please provide detailed report of verification studies including the</li> </ul>   | Not submitted the reply of this query.   |

|     |   |  |
|-----|---|--|
|     | <p>sample and standard solution preparation method and complete potency calculations.</p> <ul style="list-style-type: none"> <li>How can the verification report of all three applied strength is same despite the initial reconstituted solution of each strength has different concentration, which ultimately change the required quantity of Buffer B.6 to achieve the concentration recommended in the general chapter “Antibiotics Microbial Assays &lt;81&gt;”.</li> </ul> |  |
| 14. | Submitted batch analysis report does not clarify the potency whether in terms of CBA or IU of CMS.  | Firm replied that “In CoA the limits are given according to USP ie: "Colistimethate for Injection contains an amount of Colistimethate Sodium equivalent to not less than 90.0 percent and not more than 120.0 percent of the labeled amount of colistin".                                     |
| 15. | Description of product mentioned in the stability data sheets specify that the product is crystalline powder, while the general properties given in the documents of drug substance manufacturer revealed that the ready to fill material is amorphous in nature.   | Firm replied that “As the powder is ready to fill material, so the specification of finished product given by Aulton report Pharmaceuticals are "White to slightly yellow powder filled in glass vials', which is in accordance with USP and API manufacturer specification”.                  |
| 16. | Provide the COA of Mueller-Hinton Agar with the facts that the composition of the media in accordance with Media 9 i.e. the recommended media for colistimethate as per USP.  | Firm submitted the documents which did not mentioned the composition of Mueller-Hinton Agar.   |
| 17. | Provide calculation detail of dispensed weight of colistimethate sodium per vial. Since the submitted BMR did not contain the same information.   | Firm replied that “The weight/vial is calculated in accordance with the innovator's product "COLOMYCIN 2 million International Units (IU) Powder for solution for injection".<br>But the query is relevant to submission of calculation of dispensed weight of colistimethate sodium per vial. |

#### **Decision of 336<sup>th</sup> meeting of Registration Board:**

Deferred for the submission of following:

- Revised label claim in terms of Colistimethate base activity as recommended by USP since the firm claimed USP specifications for finished drug product.
- Justify the adjusted concentration of both standard and sample solution of drug substance in the light of allowable limits of USP.
- Submit pharmaceutical equivalence report including the test of content uniformity and free colistin test, since both of these test is the part of USP Monograph of “Colistimethate for injection”.
- Firm has not complied the requirements mentioned in the USP General Chapter <81> particularly, the volume of base layer is different, volume of bacterial layer is not same neither the standard dilutions preparation and assay calculation/analysis. Further the firm submitted the raw data sheets of potency calculation of drug product, which shows that the median concentration of 5.20 is prepared for analysis while the USP recommends 1 µg/mL. Firm has to submit the adjustment limit which is considered for changing the concentration of solutions along with clarification regarding the said changes in the assay procedure of drug product.
- Please provide detailed report of verification studies including the sample and standard solution preparation method and complete potency calculations.
- How can the verification report of all three applied strengths is same despite the initial reconstituted solution of each strength has different concentration, which ultimately change the required quantity of

| <p>Buffer B.6 to achieve the concentration recommended in the general chapter “Antibiotics Microbial Assays &lt;81&gt;”.</p> <ul style="list-style-type: none"> <li>• Provide the COA or other document of Mueller-Hinton Agar which confirm the composition of this medium.</li> <li>• Provide calculation detail of dispensed weight of colistimethate sodium per vial. Since the submitted BMR did not contain the same information.</li> </ul> |  |   |
|--|--|---|
| <b>Response of the Firm</b>  |  |   |
| <b>Sr.no.</b>  | <b>Decision of 336<sup>th</sup> meeting of RB</b>  | <b>Response of the Firm</b>   |
| 1.   | Revised label claim in terms of Colistimethate base activity as recommended by USP since the firm claimed USP specifications for finished drug product.  | Firm submitted the revised label claim as per USP i.e. as follows:<br>Each vial contains:<br>Colistimethate Sodium eq. to 102mg Colistin base activity.   |
| 2.   | Justify the adjusted concentration of both standard and sample solution of drug substance in the light of allowable limits of USP.   | Firm replied that “ initially the concentrations were selected as per specification of API manufacturer, however we are hereby submitting the results of analysis as per USP specification using the same concentration as mentioned in the USP.  |
| 3.   | Submit pharmaceutical equivalence report including the test of content uniformity and free colistin test, since both of these test is the part of USP Monograph of “Colistimethate for injection”.   | Firm submitted the revised pharmaceutical equivalence report in which the result of free colistin test is included in the report.   |
| 4.   | Firm has not complied the requirements mentioned in the USP General Chapter <81> particularly, the volume of base layer is different, volume of bacterial layer is not same neither the standard dilutions preparation and assay calculation/analysis. Further the firm submitted the raw data sheets of potency calculation of drug product, which shows that the median concentration of 5.20 is prepared for analysis while the USP recommends 1 µg/mL. Firm has to submit the adjustment limit which is considered for changing the concentration of solutions along with clarification regarding the said changes in the assay procedure of drug product. | Firm replied that “initially the concentrations were selected as per specification of API manufacturer, however we are hereby submitting the results of analysis as per USP specification using the same concentration as mentioned in the USP.<br>The analysis was performed as per USP specification with the same base layer as well as bacterial layer and the median concentration of 1 µg/mL in accordance with USP”. |
| 5.   | <ul style="list-style-type: none"> <li>• Please provide detailed report of verification studies including the sample and standard solution preparation method and complete potency calculations.</li> <li>• How can the verification report of all three applied strengths is same despite the initial reconstituted solution of each strength has different concentration, which ultimately change the required quantity of Buffer B.6 to achieve the concentration recommended in the general chapter “Antibiotics Microbial Assays &lt;81&gt;”.</li> </ul>  | Firm submitted the verification study report. Verification report of each strength is submitted. The concentration details are also provided. Initial concentration of every strength is different from the other strength, however the final concentration of all the strength is same i.e. 11 µg/mL in accordance with USP.   |
| 6.   | Provide the COA or other document of Mueller-Hinton Agar which confirm the composition of this medium.   | Firm submitted the COA of Mueller-Hinton Agar which confirm the composition of this medium.   |

|    |   |  |
|----|---|--|
| 7. | Provide calculation detail of dispensed weight of colistimethate sodium per vial. Since the submitted BMR did not contain the same information. | Firm submitted the calculation regarding the dispensed weight of colistimethate sodium per vial. |
|----|---|--|

**Decision: Approved.**

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

| 5. | Submitted CoA does not clarify the potency whether in terms of CBA or IU of CMS.   | Firm replied that “The CoA is in accordance with USP and the limit defined by the USP is as follows:<br>“Colistimethate Sodium has a potency equivalent to not less than 390 µg of colistin per mg”.<br>From the above label claim it is evident that the potency is defined in terms of colistin base activity.   |
| 6. | Description of applied product is different from the innovator product, since the innovator product is white to slightly yellow lyophilized cake and the applied product is white to slightly yellow powder, clarify how the applied product is similar to innovator product/reference product.                      | Applied formulation is available in lyophilized powder form in the reference product approved in Health Canada.  |

|     |   |   |
|-----|---|---|
| 7.  | Justification of declared label claim in terms of Colistimethate sodium instead of Colistimethate base activity as recommended by USP as the firm claimed USP specifications for finished drug product. | Firm replied that "The limit defined by the USP is in the monograph "Colistimethate for Injection" is "Colistimethate for Injection contains an amount of Colistimethate Sodium equivalent to not less than 90.0 percent and not more than 120.0 percent of the labeled amount of colistin"<br>The limit given the CoA of finished product by drug product manufacturer is "90% to 120%" which is the limit of colistin base activity.<br>However, the label claim specified by the drug product manufacturer needs to be amended in accordance with the colistin base activity as per USP. |
| 8.  | Justify dispensed quantity of Colistimethate Sodium against the determined potency in terms of Colistimethate base activity (CBA).  | Firm replied that the dispensed weight is calculated in accordance with the innovator's product "COLOMYCIN 2 million International Units (IU) of Powder for solution for injection". But the firm has not submitted the calculation of dispensed quantity of Colistimethate Sodium against the determined potency in terms of Colistimethate base activity (CBA).   |
| 9.  | Provide the calculation which rationalize the adopted filled weight quantity of colistimethate sodium per vial i.e. 360mg of colistimethate sodium.   | Firm replied that the dispensed weight is calculated in accordance with the innovator's product "COLOMYCIN 2 million International Units (IU) of Powder for solution for injection". But the firm has not submitted the calculation of dispensed quantity of Colistimethate Sodium against the determined potency in terms of Colistimethate base activity (CBA).   |
| 10. | Submit the detail of manufacturer, brand name and Registration no. in case of local manufacturer of reference/comparator product against which pharmaceutical equivalence has been established.         | Firm submitted the details.   |
| 11. | Justify for not performing content uniformity test and test of <i>Free colistin under Colistimethate Sodium while performing the pharmaceutical equivalence against the comparator product.</i>         | Firm replied that "The uniformity of dosage is performed at each stability interval. Therefore, in equivalence study content uniformity was not performed. Moreover, the "free colistin test is given by USP in "raw material monograph. For finished product the USP do not defines the free colistin test".<br>However, the " <i>Free colistin test</i> " is included in the USP monograph of finished drug product, further, the pharmaceutical equivalence study should include all the test of specification of drug product.  |
| 12. | Justify for not including the test of <i>Free colistin under Colistimethate Sodium</i> in the specification of drug product.  | Firm replied that "The "free colistin test is given by USP in "raw material monograph and this test were performed for the raw material by the Aulton Pharmaceutical for finished product the USP do not defines the free colistin test".<br>However, the test of free colistin is included in the USP monograph of drug product "Colistimethate for Injection"   |

|     |  |  |
|-----|--|--|
| 13. | Justify for adopting the microbial assay procedure which is not completely as per USP monograph for “Colistimethate for Injection”, general chapter “Antibiotics Microbial Assays <81>”, particularly the volume of base layer is different, volume of bacterial layer is not same neither the standard dilutions preparation and assay calculation/analysis is in accordance with the said USP chapter.   | Firm replied that “The USP general chapter <81> provides the general Assay guidelines for the microbiological assay of substances, rdnace The procedure adopted was same as USP, however the dilution was prepared as defined by the assay of API manufacturer. Moreover, the standard analytical and procedure is validated as per USP and ICH guidelines. So, the procedure used by API manufacturer is nation, justifiable. Firm has not complied the requirements mentioned in the USP General Chapter <81> particularly, the volume of base layer is different, volume of bacterial layer is not same neither the standard dilutions preparation and assay calculation/analysis. Further the firm submitted the raw data sheets of potency calculation of drug product, which shows that the median concentration of 5.20 is prepared for analysis while the USP recommends 1 µg/mL. Firm has to submit the adjustment limit which is considered for changing the concentration of solutions. |
| 14. | Further, clarify the culture medium in which seed layer has been prepared.   | Firm replied that “for seed layering USP <81> defined "Medium 1" was used. However for further validation specie specific medium "SB Medium" was also used.  |
| 15. | <ul style="list-style-type: none"> <li>Please provide detailed report of verification studies including the sample and standard solution preparation method and complete potency calculations.</li> <li>How can the verification report of all three applied strength is same despite the initial reconstituted solution of each strength has different concentration, which ultimately change the required quantity of Buffer B.6 to achieve the concentration recommended in the general chapter “Antibiotics Microbial Assays &lt;81&gt;”.</li> </ul> | Not submitted the reply of this query.   |
| 16. | Submitted batch analysis report does not clarify the potency whether in terms of CBA or IU of CMS.   | Firm replied that “In CoA the limits are given according to USP ie: "Colistimethate for Injection contains an amount of Colistimethate Sodium equivalent to not less than 90.0 percent and not more than 120.0 percent of the labeled amount of colistin".   |
| 17. | Clarify on which batches you have performed in-use stability studies in the year 2021, because the trail batches on which stability study has been performed were manufactured in 01-2022.   | Firm replied that it was a typographic mistake , in-use stability was performed on the same stability batches.   |
| 18. | Description of product mentioned in the stability data sheets specify that the product is crystalline powder, while the general properties given in the documents of drug substance manufacturer revealed that the ready to fill material is amorphous in nature.  | Firm replied that “As the powder is ready to fill material, so the specification of finished product given by Aulton report Pharmaceuticals are "White to slightly yellow powder filled in glass vials', which is in accordance with USP and API manufacturer specification”.  |

|     |  |   |
|-----|--|---|
| 19. | Provide the COA of Mueller-Hinton Agar with the facts that the composition of the media in accordance with Media 9 i.e. the recommended media for colistimethate as per USP. | Firm submitted the documents which did not mentioned the composition of Mueller-Hinton Agar.  |
| 20. | Provide calculation detail of dispensed weight of colistimethate sodium per vial. Since the submitted BMR did not contain the same information.                              | Firm replied that "The weight/vial is calculated in accordance with the innovator's product "COLOMYCIN 2 million International Units (IU) Powder for solution for injection". But the query is relevant to submission of calculation of dispensed weight of colistimethate sodium per vial. |

Decision of 336<sup>th</sup> meeting of Registration Board:

Deferred for the submission of following:

- Revised label claim in terms of Colistimethate base activity as recommended by USP since the firm claimed USP specifications for finished drug product.
- Description of applied product is different from the innovator product, since the innovator product is white to slightly yellow lyophilized cake and the applied product is white to slightly yellow powder, clarify how the applied product is similar to innovator product/reference product.
- Justify the adjusted concentration of both standard and sample solution of drug substance in the light of allowable limits of USP.
- Submit pharmaceutical equivalence report including the test of content uniformity and free colistin test, since both of these test is the part of USP Monograph of "Colistimethate for injection".
- Firm has not complied the requirements mentioned in the USP General Chapter <81> particularly, the volume of base layer is different, volume of bacterial layer is not same neither the standard dilutions preparation and assay calculation/analysis. Further the firm submitted the raw data sheets of potency calculation of drug product, which shows that the median concentration of 5.20 is prepared for analysis while the USP recommends 1 µg/mL. Firm has to submit the adjustment limit which is considered for changing the concentration of solutions along with clarification regarding the said changes in the assay procedure of drug product.
- Please provide detailed report of verification studies including the sample and standard solution preparation method and complete potency calculations.
- How can the verification report of all three applied strengths is same despite the initial reconstituted solution of each strength has different concentration, which ultimately change the required quantity of Buffer B.6 to achieve the concentration recommended in the general chapter "Antibiotics Microbial Assays <81>".
- Provide the COA or other document of Mueller-Hinton Agar which confirm the composition of this medium.
- Provide calculation detail of dispensed weight of colistimethate sodium per vial. Since the submitted BMR did not contain the same information.

#### Response of the Firm:

| Sr.no. | Decision of 336 <sup>th</sup> meeting of RB   | Response of the Firm  |
|--------|---|---|
| 1.     | Revised label claim in terms of Colistimethate base activity as recommended by USP since the firm claimed USP specifications for finished drug product.   | Firm submitted the revised label claim as per USP i.e. as follows:<br>Each vial contains:<br>Colistimethate Sodium eq. to 153mg Colistin base activity. |
| 2.     | Description of applied product is different from the innovator product, since the innovator product is white to slightly yellow lyophilized cake and the applied product is white to slightly yellow powder, clarify how the applied product is similar to innovator product/reference product. | Firm has not submitted the reply of this query.   |

|    |  |  |
|----|--|--|
| 3. | Justify the adjusted concentration of both standard and sample solution of drug substance in the light of allowable limits of USP.   | Firm replied that “ initially the concentrations were selected as per specification of API manufacturer, however we are hereby submitting the results of analysis as per USP specification using the same concentration as mentioned in the USP.   |
| 4. | Submit pharmaceutical equivalence report including the test of content uniformity and free colistin test, since both of these test is the part of USP Monograph of “Colistimethate for injection”.   | Firm submitted the revised pharmaceutical equivalence report in which the result of free colistin test is included in the report.  |
| 5. | Firm has not complied the requirements mentioned in the USP General Chapter <81> particularly, the volume of base layer is different, volume of bacterial layer is not same neither the standard dilutions preparation and assay calculation/analysis. Further the firm submitted the raw data sheets of potency calculation of drug product, which shows that the median concentration of 5.20 is prepared for analysis while the USP recommends 1 µg/mL. Firm has to submit the adjustment limit which is considered for changing the concentration of solutions along with clarification regarding the said changes in the assay procedure of drug product. | Firm replied that “initially the concentrations were selected as per specification of API manufacturer, however we are hereby submitting the results of analysis as per USP specification using the same concentration as mentioned in the USP. The analysis was performed as per USP specification with the same base layer as well as bacterial layer and the median concentration of 1 µg/mL in accordance with USP”. |
| 6. | <ul style="list-style-type: none"> <li>Please provide detailed report of verification studies including the sample and standard solution preparation method and complete potency calculations.</li> <li>How can the verification report of all three applied strengths is same despite the initial reconstituted solution of each strength has different concentration, which ultimately change the required quantity of Buffer B.6 to achieve the concentration recommended in the general chapter “Antibiotics Microbial Assays &lt;81&gt;”.</li> </ul>  | Firm submitted the verification study report. Verification report of each strength is submitted. The concentration details are also provided. Initial concentration of every strength is different from the other strength, however the final concentration of all the strength is same i.e. 1µg/mL in accordance with USP.  |
| 7. | Provide the COA or other document of Mueller-Hinton Agar which confirm the composition of this medium.   | Firm submitted the COA of Mueller-Hinton Agar which confirm the composition of this medium.  |
| 8. | Provide calculation detail of dispensed weight of colistimethate sodium per vial. Since the submitted BMR did not contain the same information.  | Firm submitted the calculation regarding the dispensed weight of colistimethate sodium per vial.   |

**Decision: Approved.**

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

| 2.    | <b>3.2. P.5.1</b>                                    | <b>Validation of analytical procedures:</b><br>You have submitted the validation studies of assay method of transic injection by spectrophotometer while according to the BP monograph of tranexamic acid injection assay has been performed via potentiometric titration, clarification is required in this regard.   |
| 3.    | <b>3.2. P.8</b>                                      | <b>Stability</b> <ul style="list-style-type: none"> <li>As per the submitted stability data, stability studies of all three batches has been initiated in the year 2015 and 2016 despite that firm has submitted only 6 months' data of real time stability study for all three batches. Submit the remaining real time stability data of all three batches.</li> <li>Submitted raw data sheets reflect that the assay of drug product has been performed via UV spectrophotometer while according to BP, assay of the drug product has been performed by potentiometric titration. Justify, how your product complies BP specification.</li> <li>Submit compliance Record of HPLC software 21CFR &amp; audit trail reports on product testing.</li> </ul> |
| 5.    | <b>2.3. R.1.1</b>                                    | Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2. P.8.3.  |
| 6.    | <b>Amendment in QOS (Module 2) for above points.</b> |  |

**Decision of 322<sup>nd</sup> meeting of Registration Board:**

Registration Board deferred the case for submission of reply to the above cited shortcomings within six months.

**Response of the Firm:**

Firm replied that they have manufactured new batches of applied product and conduct development studies/stability studies according to BP monograph. Development studies / stability data of new batches till date indicates that product tested as per BP monograph of Tranexamic Acid Injection. However, the stability study of new batches was submitted without requisite fee. New stability batches were developed using the API from same source but the procurement date was different from the previous stability batches, accordingly commercial invoice duly attested from DRAP officer has been submitted by the firm.

| S.no. | Observations/Deficiencies/ Short-comings  | Response of the Firm   |
|-------|---|--|
| 1.    | Provide analytical Method Verification studies including specificity, accuracy and repeatability performed by the Drug Product manufacturer.  | Submitted  |
| 2.    | You have submitted the validation studies of assay method of transic injection by spectrophotometer while according to the BP monograph of tranexamic acid injection assay has been performed via potentiometric titration, clarification is required in this regard.   | Firm has submitted new dossier with stability study data complying BP monograph of Tranexamic Acid Injection. They have submitted verification studies of applied product in compliance of BP monograph. |
| 3.    | <ul style="list-style-type: none"> <li>As per the submitted stability data, stability studies of all three batches has been initiated in the year 2015 and 2016 despite that firm has submitted only 6 months' data of real time stability study for all three batches. Submit the remaining real time stability data of all three batches.</li> <li>Submitted raw data sheets reflect that the assay of drug product has been performed via UV spectrophotometer while according to BP, assay of the drug product has been performed by potentiometric titration. Justify, how your product complies BP specification.</li> <li>Submit compliance Record of HPLC software 21CFR &amp; audit trail reports on product testing.</li> </ul> | Firm submitted new stability data in compliance of BP specification.   |
| 4.    | Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2. P.8.3.   | BMR of new stability batches are submitted by the firm.  |

**Decision: Approved. Applicant shall submit full registration fee for submitting new development data and stability data of new batches , prescribed vide S.R.O 496 (I)/2023 dated 17-04-2023 before issuance of registration letter.**

- Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

| 6. | Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)                         | Submitted  |

Remarks of the Evaluator:

| Sr.no. | Section no.  | Observations  | Firm's response  |
|--------|--------------|---|--|
| 1.     | 3.2. S.4.3   | Provide analytical Method Verification studies including specificity, accuracy and repeatability performed by the Drug Product manufacturer.  | Firm submitted the analytical method verification studies of drug substance performed by drug product manufacturer.  |
| 2.     | 3.2. P.2     | Justification is required regarding the use of NaOH and HCl for pH adjustment as the innovator/reference product has not been used any excipient for pH adjustment.   | Firm has submitted that no any excipient "NaOH or HCl" is used to set the pH in Hemarest 250mg/5ml injection as its pH is auto set at target i.e. 7.3 and stays within the pH range mentioned in BP (6.5-8.0). However, both the excipients are mentioned in BMR because they can be used to set pH to the target point if pH fluctuates.  |
| 3.     | 3.2. P.2.2.1 | Justify the process of terminal sterilization via autoclave at 121°C for 15minutes with reference to degradation occurred in the accelerated stability studies conducted at 40°C as claimed in pharmaceutical development section. If the degradation of product start at 40°C then how the product will bear the temperature of 121°C during terminal sterilization. | Firm has replied that Hemarest 250mg/5ml is stable at 121°C for 15minutes and testing report of finished product is also submitted that shows the impurities/degradable substances (after sterilization at 121°C for 15 min) are within the specified limits. However, the degradation at 40°C and 75% Relative humidity is the result of long-term impact of temperature and humidity i.e. 6 months.  |
| 4.     | 3.2. P.2.2.1 | Justify the degradation of your product during accelerated stability studies because as per the innovator /reference product, the drug product remains stable during the accelerated stability studies conducted at 40 ° C, relative humidity 75%, 6 months and no overage has been used in their formulation.  | Firm has submitted the reply that we have worked over the formulation of this product to make it more effective and stable and based on the various trials we have added 2.0% overage. The overage used is for covering the loss during different steps of manufacturing process therefore the quantity of API i.e. Tranexamic Acid is 270.3mg/5.3ml. Furthermore, the reason behind filling behind filling of 5.3ml volume of solution in injection instead of exact 5ml is to obtain the extractable |

|    |            |   |  |
|----|------------|---|--|
|    |            |   | volume of 5ml according to label claim and is in accordance of USP 43 recommendation for excess volume.  |
| 5. | 3.2. P.5.1 | You have submitted the validation studies of assay method of transic injection by spectrophotometer while according to the BP monograph of tranexamic acid injection assay has been performed via potentiometric titration, clarification is required in this regard.                               | Firm has stated that Hemarest injection (Tranexamic acid) 250mg/5ml is BP specification product. For our finished product we have developed the alternative method on UV spectrophotometer as alternative method after parallel equivalency testing because the availability of raw data in the form of spectra is better than titration method. After development of method successful analytical method validation was performed in accordance with the requirement of ICH Q2(R1) and united states pharmacopoeia <1225>.<br>BP allows to adapt the alternative method if equivalent accuracy with pharmacopoeial method is evident under clause “Test and Assays” of BP General chapter “General Notices” which states that “The analyst is not precluded from employing alternative methods, including methods of micro-analysis, in-any assay or test if it is known that the method used will gave a result of equivalent accuracy.<br>Limit detection and quantitation limit parameters are not performed according to the ICH guidelines and pharmacopeial recommended chapters. |
| 6. | 3.2. P.8.3 | As per the submitted stability data, stability studies of all three batches has been initiated in the year 2015 and 2016 despite that firm has submitted only 6 months data of real time stability study for all three batches. Submit the remaining real time stability data of all three batches. | Firm has submitted the stability data till the claimed shelf life.   |
| 7. | 3.2. P.8.3 | Submitted raw data sheets reflect that the assay of drug product has been performed via UV spectrophotometer while according to BP, assay of the drug product has been performed by potentiometric titration. Justify, how your product complies BP specification.                                  | BP allows to adapt the alternative method if equivalent accuracy with pharmacopoeial method is evident under clause “Test and Assays” of BP General chapter “General Notices” which states that “The analyst is not precluded from employing alternative methods, including methods of micro-analysis, in-any assay or test if it is known that the method used will gave a result of equivalent accuracy.   |
| 8. | 2.3. R.1.1 | Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2. P.8.3.   | Firm has submitted only batch manufacturing order instead of batch manufacturing record.<br>In Batch manufacturing order 0.0.30L of hydrochloric acid and 0.0.30L of sodium hydroxide dispensed for pH adjustment.   |

**Decision of 316<sup>th</sup> meeting of Registration Board:**

Deferred for scientific justification of applying alternative method from that recommended by BP monograph of “Tranexamic acid injection”, for the drug product Assay test during stability studies.

**Response of the Firm:**

|   |   |   |
|---|---|---|
| <p>Firm replied that they have manufactured new batches of applied product and conduct development studies/stability studies according to BP monograph. Development studies / stability data of new batches till date indicates that product tested as per BP monograph of Tranexamic Acid Injection. However, the stability study of new batches was submitted without requisite fee. New stability batches were developed using the API from same source but the procurement date was different from the previous stability batches, accordingly commercial invoice duly attested from DRAP officer has been submitted by the firm.</p>   |   |   |
| <p><b>Decision: Approved. Applicant shall submit full registration fee for submitting new development data and stability data of new batches, prescribed vide S.R.O 496 (I)/2023 dated 17-04-2023 before issuance of registration letter.</b></p> <ul style="list-style-type: none"> <li>• <b>Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.</b></li> <li>• <b>Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.</b></li> </ul> |   |   |

| S.no.   | Section   | Observations/Deficiencies/ Short-comings  | Reply  |             |
| 1.  | 3.2.S.4.1-3.2.S.4.2   | Submit specification and analytical procedure used for analysis of both drug substances by drug product manufacturer.   | Firm submitted the specification and analytical procedure of both drug substance.  |             |
| 2.  | 3.2.S.4.1   | Justify for using in-house complied drug substance (sitagliptin phosphate) for the manufacturing of drug product when the official monograph of sitagliptin phosphate is available in the USP.  | Firm replied that This is a mistake from the procurement department though the parameters are similar to USP still we undertake that for commercial product manufacturing we will use USP monograph API. |             |
| 3.  | 3.2.S.4.3   | Submit analytical method verification report of both drug substance performed by the drug product manufacturer.   | Firm submitted the same validation/verification report of drug substance as submitted for drug product.  |             |

|    |           |  |  |  |
|----|-----------|--|--|--|
| 4. | 3.2.S.4.4 | Submit batch analysis report of both drug substance by drug product manufacturer.  | Submitted  |  |
| 5. | 3.2.S.7   | Stability data of sitagliptin phosphate specified that the drug substance complied USP specification while the other sections of drug substance part claimed that the in-house complied sitagliptin phosphate has been used in the manufacturing of drug product.  | Firm replied that “The accelerated stability study of sitagliptin phosphate specified that the drug substance complied USP is in API manufacturer DMF, we have communicated the matter to the API manufacturer to address the subject, and we will communicate to the DRAP as will received their reply”.  |  |
| 6. | 3.2.P.5.1 | Specify the acceptance criteria of dissolution test in term of Q value, since the BP monograph of applied product recommends the acceptance limit of dissolution test in terms of Q value.   | Firm replied that “The acceptance criteria of dissolution test in term of Q value are 80% in the BP monograph of applied product”.<br>Dissolution acceptance limit need to be changed in accordance with BP monograph.   |  |
| 7. | 3.2.P.5.2 | Justify for not adopting the same assay procedure as recommended by the BP monograph of Metformin and Sitagliptin Tablets, since the submitted method is different from the procedure given in official monograph of BP.   | Firm replied that “The method adopted in the assay was that for dissolution of tablet due to isocratic mode and give good results for both drug substances. We undertake to use gradient method in future for the assay of combination tablets”<br>Firm has not adopted BP specification for the applied product, since the assay procedure acquired by the firm is not in accordance with BP monograph. |  |
| 8. | 3.2.P.5.3 | Assay procedure verified is not in accordance with BP Monograph, justify how the applied product complied BP specification.  | Firm replied that “Sir please consider it valid. The same BP dissolution method in isocratic mode was used for the method verification of both substances and is well within the range of acceptance criteria”.<br>Firm has not adopted BP specification for the applied product, since the assay procedure acquired by the firm is not in accordance with BP monograph.                                 |  |
| 9. | 3.2.P.8   | Submit documents for the procurement of API including copy of commercial invoice attested by AD (I&E) DRAP. Provide details that which lot number of drug substance has been used in manufacturing of each batch of drug product. Also provide documents confirming evidence of import of each lot of drug substance used in manufacturing of these batches of drug product. | Firm submitted Form-6 of both drug substance.  |  |
| 10 | 2.3.R.1.1 | Provide Batch Manufacturing Record (BMR) of all stability batches.   | Submitted.   |  |

#### **Decision of 335<sup>th</sup> meeting of Registration Board:**

Deferred for submission of following shortcomings:

- Submit PKR 7500/- pre-registration variation fee for revision of specification, prescribed vide S.R.O 496 (I)/2023 dated 17-04-2023.
- Submit analytical method verification report of both drug substances performed by the drug product manufacturer, since in the reply you have submitted the same verification report as submitted for drug product.
- Clarify the ambiguity related to the specification of drug substance, since the documents supplied by the drug substance manufacturer shows disparity in the specification claim of drug substance in their various sections.
- Revise the dissolution acceptance limit in accordance to the BP Monograph of applied product.

| Module-II (Quality Overall Summary)   | Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product. |
| Module-III Drug Substance:  | Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.   |

|   |   |  |             |             |
|---|---|--|-------------|-------------|
|   | Stability Studies of Drug Substance<br>(Conditions & duration of Stability studies)           | Firm has submitted stability study data of 3 batches of drug substance (sitagliptin phosphate) at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 36 months.<br>Firm has submitted stability study data of 3 batches of drug substance (Metformin Hydrochloride) at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 36 months. |             |             |
|   | Module-III Drug Product:  | Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, verification of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.  |             |             |
|   | Pharmaceutical Equivalence and Comparative Dissolution Profile                                | Firm has submitted pharmaceutical equivalence against the comparator product Sitaglu Met 50/500mg of Hilton Pharma (PVT) Ltd. Further, submitted comparative dissolution against the same above mentioned comparator product in all three medias.  |             |             |
|   | Analytical method validation/verification of product  | Firm has submitted analytical method verification study reports for drug substance as well as drug product.  |             |             |

| 2. | Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.                         | Firm has submitted copy of GMP Certificate of both API manufacturers.   |
| 3. | Documents for the procurement of API with approval from DRAP (in case of import).   | Firm submitted the copy of commercial invoice without attested from DRAP.   |
| 4. | Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc. | Firm has submitted analytical record for product testing.   |
| 5. | Compliance Record of HPLC software 21CFR & audit trail reports on product testing   | Submitted   |
| 6. | Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)                         | Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers. |

Remarks of Evaluator:

| S.no. | Section             | Observations/Deficiencies/ Short-comings  | Reply   |  |
|-------|---------------------|---|---|--|
| 1.    | 3.2.S.4.1-3.2.S.4.2 | Submit specification and analytical procedure used for analysis of both drug substances by drug product manufacturer.   | Firm submitted the specification and analytical procedure of both drug substance.   |  |
| 2.    | 3.2.S.4.1           | Justify for using in-house complied drug substance (sitagliptin phosphate) for the manufacturing of drug product when the official monograph of sitagliptin phosphate is available in the USP.  | Firm replied that This is a mistake from the procurement department though the parameters are similar to USP still we undertake that for commercial product manufacturing we will use USP monograph API.  |  |
| 3.    | 3.2.S.4.3           | Submit analytical method verification report of both drug substance performed by the drug product manufacturer.   | Firm submitted the same validation/verification report of drug substance as submitted for drug product.   |  |
| 4.    | 3.2.S.4.4           | Submit batch analysis report of both drug substance by drug product manufacturer.   | Submitted   |  |
| 5.    | 3.2.S.7             | Stability data of sitagliptin phosphate specified that the drug substance complied USP specification while the other sections of drug substance part claimed that the in-house complied sitagliptin phosphate has been used in the manufacturing of drug product. | Firm replied that "The accelerated stability study of sitagliptin phosphate specified that the drug substance complied USP is in API manufacturer DMF, we have communicated the matter to the API manufacturer to address the subject, and we will communicate to the DRAP as will received their reply".   |  |
| 6.    | 3.2.P.5.1           | Specify the acceptance criteria of dissolution test in term of Q value, since the BP monograph of applied product recommends the acceptance limit of dissolution test in terms of Q value.  | Firm replied that "The acceptance criteria of dissolution test in term of Q value are 80% in the BP monograph of applied product".<br>Dissolution acceptance limit need to be changed in accordance with BP monograph.  |  |
| 7.    | 3.2.P.5.2           | Justify for not adopting the same assay procedure as recommended by the BP monograph of Metformin and Sitagliptin Tablets, since the submitted method is different from the procedure given in official monograph of BP.  | Firm replied that "The method adopted in the assay was that for dissolution of tablet due to isocratic mode and give good results for both drug substances. We undertake to use gradient method in future for the assay of combination tablets".<br>Firm has not adopted BP specification for the applied product, since the assay procedure acquired by the firm is not in accordance with BP monograph. |  |
| 8.    | 3.2.P.5.3           | Assay procedure verified is not in accordance with BP Monograph, justify how the applied product complied BP specification.   | Firm replied that "Sir please consider it valid. The same BP dissolution method in isocratic mode was used for the method verification of both substances and is well within the range of acceptance criteria".   |  |

|    |           |  |   |  |
|----|-----------|--|---|--|
|    |           |  | Firm has not adopted BP specification for the applied product, since the assay procedure acquired by the firm is not in accordance with BP monograph. |  |
| 9. | 3.2.P.8   | Submit documents for the procurement of API including copy of commercial invoice attested by AD (I&E) DRAP. Provide details that which lot number of drug substance has been used in manufacturing of each batch of drug product. Also provide documents confirming evidence of import of each lot of drug substance used in manufacturing of these batches of drug product. | Firm submitted Form-6 of both drug substance.   |  |
| 10 | 2.3.R.1.1 | Provide Batch Manufacturing Record (BMR) of all stability batches.   | Submitted.  |  |

**Decision of 335<sup>th</sup> meeting of Registration Board:**

Deferred for submission of following shortcomings:

- Submit PKR 7500/- pre-registration variation fee for revision of specification, prescribed vide S.R.O 496 (I)/2023 dated 17-04-2023.
- Submit analytical method verification report of both drug substances performed by the drug product manufacturer, since in the reply you have submitted the same verification report as submitted for drug product.
- Clarify the ambiguity related to the specification of drug substance, since the documents supplied by the drug substance manufacturer shows disparity in the specification claim of drug substance in their various sections.
- Revise the dissolution acceptance limit in accordance to the BP Monograph of applied product.
- Revise the assay procedure of applied product in accordance with the BP Monograph of “Metformin and Sitagliptin Tablet” and accordingly submit the performance report of next time point of long term stability studies.
- Submit analytical verification report of drug product, which is performed in accordance with the “Metformin and Sitagliptin Tablet”

**Response of the Firm:**

| Sr.no. | Decision of 335 <sup>th</sup> meeting of Reg. Board  | Response of the Firm   |
|--------|--|--|
| 1.     | Submit PKR 7500/- pre-registration variation fee for revision of specification, prescribed vide S.R.O 496 (I)/2023 dated 17-04-2023.   | Firm submitted the requisite fee PKR 7500/- of pre-registration variation via fee challan no.2910214155.   |
| 2.     | Submit analytical method verification report of both drug substances performed by the drug product manufacturer, since in the reply you have submitted the same verification report as submitted for drug product.           | Submitted  |
| 3.     | Clarify the ambiguity related to the specification of drug substance, since the documents supplied by the drug substance manufacturer shows disparity in the specification claim of drug substance in their various sections | Firm replied that The specification of Sitagliptin phosphate monohydrate is established on the basis of ICH guidelines and corresponding USP chapters. |
| 4.     | Revise the dissolution acceptance limit in accordance to the BP Monograph of applied product.  | Firm revised the acceptance limit of dissolution test in accordance with BP monograph.   |

|    |  |  |
|----|--|--|
| 5. | Revise the assay procedure of applied product in accordance with the BP Monograph of “Metformin and Sitagliptin Tablet” and accordingly submit the performance report of next time point of long term stability studies. | Firm revised the assay method in accordance with BP and accordingly submit the performance report of next time point of long term stability studies. |
| 6. | Submit analytical verification report of drug product, which is performed in accordance with the “Metformin and Sitagliptin Tablet”  | Submitted  |

**Decision: Approved.**

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Remarks of Evaluator:

| S.no. | Observations/Deficiencies/ Short-comings   | Response of the Firm   |
|-------|--|--|
| 1.    | Section 1.6.5(a) specify that M/s. Shankus Pharmaceuticals, Plot No 9,10,11 Milan Industrial Estate, Santej, Ta: Kalol, Gujarat, India is the drug substance manufacturer, while the GMP certificate of M/s. Flax Laboratories (Pvt.) Limited Raigad, India has been submitted in section 1.6.5(b). Further, according to section 3.2.S.2.1 drug substance manufacturer is M/s. Sawati Spentose Pvt. Ltd A-1/2111, Phase III, G.I.D.C, Vapi, Gujarat - 396 195, INDIA, clarify the disparities observed regarding the drug substance manufacturer. | Firm has not submitted the reply of this query.  |
| 2.    | Submit specification and analytical procedure used for analysis of drug substance by drug product manufacturer.  | Firm has not submitted the specification and analytical procedure of drug substance by drug product manufacturer.  |
| 3.    | Mobile phase ratio used by drug product manufacturer during verification studies of assay method was different from the mobile phase ratio recommended by USP monograph of fluticasone propionate, justification is required in this regard.   | Firm replied that “As per general Monograph of BP, change in mobile phase allowed and our Mobile phase is within the limit”<br>However, the firm has submitted only the statement without any calculations with reference to the allowable adjustment limit of mobile phase. |
| 4.    | Formulation contain preservative, so preservative effectiveness studies to be performed as per recommendations of pharmacopoeia and shall be submit.   | Firm has not submitted the reply of this query.  |

|     |  |  |
|-----|--|--|
| 5.  | Justify for not performing all the quality test in accordance with BP monograph of fluticasone propionate nasal spray while establishing the pharmaceutical equivalence against the comparator product..   | Firm has not submitted the reply of this query.  |
| 6.  | Justify for not including the test of uniformity of delivered dose, test of number of deliveries per container and leak test as recommended by the BP monograph of fluticasone propionate nasal spray. Further, clarify the stated amount of assay test either it is amount actuation from the valve or otherwise.   | Firm has not submitted the reply of this query.  |
| 7.  | Justify for not adopting the analytical procedure of drug product in accordance with the BP monograph of fluticasone propionate nasal spray as evident from the submitted procedure in the relevant section.   | Firm replied that “As per general Monograph of BP, change in mobile phase allowed and our Mobile phase is within the limit”<br>However, the firm has submitted only the statement without any calculations with reference to the allowable adjustment limit of mobile phase. |
| 8.  | Please specify the details of spray configuration/no. of actuation with reference to the filled volume.  | Firm replied that 120 Spray = 14ml+0.2ml.  |
| 9.  | Justify for not performing the stability of drug product at alternate condition recommended in ICH guidelines for drug product packaged in plastic containers.   | Firm has not submitted the reply of this query.  |
| 10. | Justify for not including all the quality test recommended by the BP monograph of fluticasone propionate nasal spray while performing the stability of drug product.   | Firm has not submitted the reply of this query.  |
| 11. | Submit documents for the procurement of API including copy of commercial invoice attested by AD (I&E) DRAP. Provide details that which lot number of drug substance has been used in manufacturing of each batch of drug product. Also provide documents confirming evidence of import of each lot of drug substance used in manufacturing of these batches of drug product. | Firm has submitted procurement document of API without attested by AD (I&E) DRAP   |
| 12. | Provide Batch Manufacturing Record (BMR) of all stability batches.   | Submitted.   |

#### Decision of 335<sup>th</sup> meeting of Registration Board:

Deferred for submission of following shortcomings:

- Section 1.6.5(a) specify that M/s. Shankus Pharmaceuticals, Plot No 9,10,11 Milan Industrial Estate, Santej, Ta: Kalol, Gujarat, India is the drug substance manufacturer, while the GMP certificate of M/s. Flax Laboratories (Pvt.) Limited Raigad, India has been submitted in section 1.6.5(b). Further, according to section 3.2.S.2.1 drug substance manufacturer is M/s. Sawati Spentose Pvt. Ltd A-1/2111, Phase III, G.I.D.C, Vapi, Gujarat - 396 195, INDIA, clarify the disparities observed regarding the drug substance manufacturer.
- Submit specification and analytical procedure used for analysis of drug substance by drug product manufacturer.
- Justify the change in mobile phase ratio while performing the assay of drug substance drug product in the light of allowable adjustment limit of mobile phase as mentioned in the general chapters of USP.
- Justify for not performing all the quality test in accordance with BP monograph of fluticasone propionate nasal spray while establishing the pharmaceutical equivalence against the comparator product.

- Justify for not including the test of uniformity of delivered dose, test of number of deliveries per container and leak test as recommended by the BP monograph of fluticasone propionate nasal spray. Further, clarify the stated amount of assay test either it is amount actuation from the valve or otherwise.
- Justify for not performing the stability of drug product at alternate condition recommended in ICH guidelines for drug product packaged in plastic containers.
- Justify for not including all the quality test recommended by the BP monograph of fluticasone propionate nasal spray while performing the stability of drug product.

Shankus Pharmaceuticals, Plot No 9,10,11 Milan Industrial Estate, Santej, Ta: Kalol, Gujarat, India is the drug substance manufacturer, while the GMP certificate of M/s. Flax Laboratories (Pvt.) Limited Raigad, India has been submitted in section 1.6.5(b). Further, according to section 3.2.S.2.1 drug substance manufacturer is M/s. Sawati Spentose Pvt. Ltd A-1/2111, Phase III, G.I.D.C, Vapi, Gujarat - 396 195, INDIA, clarify the disparities observed regarding the drug substance manufacturer. | In their reply firm submitted the GMP certificate of M/s. Sawati Spentose Pvt. Ltd A-1/2111, Phase III, G.I.D.C, Vapi, Gujarat - 396 195, INDIA, without any clarification.  |
| 2.     | Submit specification and analytical procedure used for analysis of drug substance by drug product manufacturer.  | Submitted  |
| 3.     | Justify the change in mobile phase ratio while performing the assay of drug substance drug product in the light of allowable adjustment limit of mobile phase as mentioned in the general chapters of USP.   | Submitted the reply in the light of allowable adjustment limit of mobile phase as mentioned in the general chapters of USP.  |
| 4.     | Justify for not performing all the quality test in accordance with BP monograph of fluticasone propionate nasal spray while establishing the pharmaceutical equivalence against the comparator product.  | Firm replied that the test for uniformity of delivered mass is for the solution whereas the product Medison Nasal Spray is suspension.   |
| 5.     | Justify for not including the test of uniformity of delivered dose, test of number of deliveries per container and leak test as recommended by the BP monograph of fluticasone propionate nasal spray. Further, clarify the stated amount of assay test either it is amount actuation from the valve or otherwise.   | Firm submitted the revised specification of drug product in which they include test of uniformity of delivered dose and test of number of deliveries per container along with all other parameters. Further, firm clarify that the test of the assay is the stated amount of actuation from the valve. |
| 6.     | Justify for not performing the stability of drug product at alternate condition recommended in ICH guidelines for drug product packaged in plastic containers.   | Firm submitted the water loss study as recommended in ICH guidelines as an alternative approach of performing stability study for drug product packaged in plastic containers.   |
| 7.     | Justify for not including all the quality test recommended by the BP monograph of fluticasone propionate nasal spray while performing the stability of drug product.   | Firm claimed that they performed all the quality test while performing the stability of drug product, however the stability data did not include the test of uniformity of delivered dose and test of number of deliveries per container as recommended by BP.   |

**Decision: Deferred for submitting revised pharmaceutical equivalence report in accordance with the revised specification of drug product. Further, justify for not including all the quality test recommended by the BP monograph of fluticasone propionate nasal spray while performing the stability of drug product,**

**since the stability data did not include the test of uniformity of delivered dose and test of number of deliveries per container.**

| Remarks of Evaluator: |   |   |
| S.no.                 | Observations/Deficiencies/ Short-comings  | Response of the Firm  |
| 1.                    | Section 1.6.5(a) specify that M/s. Sawati Spentose Pvt. Ltd A-1/2111, Phase III, G.I.D.C, Vapi, Gujarat - 396 195, INDIA is the drug substance manufacturer, while the GMP certificate of M/s. Flax Laboratories (Pvt.) Limited Raigad, India has been submitted in section 1.6.5(b).Clarify for submitting the GMP certificate of M/s. FLAX Laboratories instead of M/s. Sawati Spentose Pvt. Ltd. | Firm has not submitted the reply of this query.   |
| 2.                    | Submit specification and analytical procedure used for analysis of drug substance by drug product manufacturer.   | Firm has not submitted the specification and analytical procedure of drug substance by drug product manufacturer.   |
| 3.                    | Justify for performing verification studies on assay method different from the assay procedure recommended by the USP monograph of Mometasone Furoate.  | Firm replied that "Method is as per BP not USP". However the drug substance manufacturer complied USP specification for drug substance as per the submitted documents in the relevant section.  |
| 4.                    | Justify for not including the test of optical rotation while quality analysis of drug substance by drug product manufacturer.   | Firm submitted the revised quality analysis report of drug substance in which test of optical rotation is included.   |
| 5.                    | Submit the amended label claim specifying the delivered volume containing the quantity of mometasone Furoate  | Firm replied " <i>Each spray = 0.1ml Mometasone Furoate = 50mcg</i> ".<br>However, the label claim of innovator product is " <i>Each actuation of the pump delivers a metered spray containing 100 mcg or 100 microliter of aqueous suspension of mometasone furoate monohydrate equivalent to 50 mcg (0.05% w/w) mometasone furoate calculated on the anhydrous basis.</i> " |
| 6.                    | Formulation contain preservative, so preservative effectiveness studies to be performed as per recommendations of pharmacopoeia and shall be submit.  | Firm has not submitted the reply of this query.   |
| 7.                    | Submit the analysis report/COA of excipients glycerine which includes the results of impurity testing related to the presence of ethylene glycol and diethylene glycol, in compliance of notification issued by DRAP vide letter No. F.3-6/2024-QC dated 30th January,2024.   | Firm has not submitted the reply of this query.   |
| 8.                    | Justify for not performing all the quality test in accordance with BP monograph of Mometasone Furoate aqueous nasal spray while establishing the  | Firm has not submitted the reply of this query.   |

|    |  |   |
|----|--|---|
|    | pharmaceutical equivalence against the comparator product.   |   |
| 9. | Provide the reference of label claim mentioned in the pharmaceutical equivalence table   | Firm has not submitted the reply of this query.   |
| 10 | Justify for not including the test of uniformity of delivered dose, test of number of deliveries per container and leak test as recommended by the BP monograph of Mometasone Furoate aqueous nasal spray. Further, clarify the stated amount of assay test either it is amount actuation from the valve or otherwise.   | Firm has not submitted the reply of this query.   |
| 11 | Justify for not adopting the analytical procedure of drug product in accordance with the BP monograph of Mometasone Furoate aqueous nasal spray as evident from the submitted procedure in the relevant section.   | Firm has not submitted the reply of this query.   |
| 12 | Please specify the details of spray configuration/no. of actuation with reference to the filled volume.  |   |
| 13 | Justify for not performing the stability of drug product at alternate condition recommended in ICH guidelines for drug product packaged in plastic containers.   | Firm has not submitted the reply of this query.   |
| 14 | Justify for not including all the quality test recommended by the BP monograph of Mometasone Furoate aqueous nasal spray while performing the stability of drug product.   | Firm has not submitted the reply of this query.   |
| 15 | Submit documents for the procurement of API including copy of commercial invoice attested by AD (I&E) DRAP. Provide details that which lot number of drug substance has been used in manufacturing of each batch of drug product. Also provide documents confirming evidence of import of each lot of drug substance used in manufacturing of these batches of drug product. | Firm has submitted procurement document of API without attested by AD (I&E) DRAP.   |
| 16 | Provide Batch Manufacturing Record (BMR) of all stability batches.   | Submitted BMR reflects that 14ml filled in each bottle<br>Label claim <i>Each spray contains: Mometasone Furoate...50mcg (Each bottle contains 120 sprays).</i> |

Decision of 335<sup>th</sup> meeting of Registration Board:

Deferred for submission of following shortcomings:

- Section 1.6.5(a) specify that M/s. Sawati Spentose Pvt. Ltd A-1/2111, Phase III, G.I.D.C, Vapi, Gujarat - 396 195, INDIA is the drug substance manufacturer, while the GMP certificate of M/s. Flax Laboratories (Pvt.) Limited Raigad, India has been submitted in section 1.6.5(b). Clarify for submitting the GMP certificate of M/s. FLAX Laboratories instead of M/s. Sawati Spentose Pvt. Ltd.
- Submit specification and analytical procedure used for analysis of drug substance by drug product manufacturer.
- Justify for adopting the BP specification for USP complied drug substance, since the drug substance manufacturer claimed USP specification for drug substance.

- Formulation contain preservative, so preservative effectiveness studies to be performed as per recommendations of pharmacopoeia and shall be submit.
- Submit the analysis report/COA of excipients glycerine which includes the results of impurity testing related to the presence of ethylene glycol and diethylene glycol, in compliance of notification issued by DRAP vide letter No. F.3-6/2024-QC dated 30th January,2024.
- Justify for not performing all the quality test in accordance with BP monograph of Mometasone Furoate aqueous nasal spray while establishing the pharmaceutical equivalence against the comparator product.
- Provide the reference of label claim mentioned in the pharmaceutical equivalence table.
- Justify for not including the test of uniformity of delivered dose, test of number of deliveries per container and leak test as recommended by the BP monograph of Mometasone Furoate aqueous nasal spray. Further, clarify the stated amount of assay test either it is amount actuation from the valve or otherwise.
- Justify for not adopting the analytical procedure of drug product in accordance with the BP monograph of Mometasone Furoate aqueous nasal spray as evident from the submitted procedure in the relevant section.
- Justify for not performing the stability of drug product at alternate condition recommended in ICH guidelines for drug product packaged in plastic containers.
- Justify for not including all the quality test recommended by the BP monograph of Mometasone Furoate aqueous nasal spray while performing the stability of drug product.

**Response of the Firm:**

**Evaluation by PEC (XV):**

| S.no. | Sections  | Observations/Deficiencies/ Short-comings   |
|-------|-----------|--|
| 1.    | 3.2.S.4.3 | Submit analytical method verification report of drug substance performed by drug product manufacturer.   |
| 2.    | 3.2.P.5.1 | Adapt the acceptance limit of dissolution in term of Q, since the USP monograph specify the limit with Q value i.e. NLT 80% (Q) of the labeled amount of tranexamic acid dissolved.  |
| 3.    | 3.2.P.5.2 | Justify how USP specification be applied on the strength of 500mg tablet considering the sample preparation procedure of assay recommended in USP monograph of Tranexamic acid tablet in which crushed powder of tablet equivalent to 650mg tranexamic acid is taken for sample preparation. |
| 4.    | 3.2.P.5.3 | Rationalize the spiked concentration of active taken while performing the accuracy parameter of verification studies of drug product specifically with reference to the applied strength.  |

**Decision of 336<sup>th</sup> meeting of Registration Board:**

Registration Board deferred the case for submission of reply to the above cited shortcomings.

**Response of the Firm:**

| S.no. | Observations/Deficiencies/ Short-comings   | Response of the Firm  |
|-------|--|---|
| 1.    | Submit analytical method verification report of drug substance performed by drug product manufacturer.   | Submitted   |
| 2.    | Adapt the acceptance limit of dissolution in term of Q, since the USP monograph specify the limit with Q value i.e. NLT 80% (Q) of the labeled amount of tranexamic acid dissolved.  | Firm submitted the revised acceptance limit of dissolution in term of Q i.e. NLT 80% (Q) of the labeled amount of tranexamic acid dissolved within 60 minutes.  |
| 3.    | Justify how USP specification be applied on the strength of 500mg tablet considering the sample preparation procedure of assay recommended in USP monograph of Tranexamic acid tablet in which crushed powder of tablet equivalent to 650mg tranexamic acid is taken for sample preparation. | Firm replied that they have taken 822.12mg of crushed powder of tablet which is eq. to 650mg of Tranexamic Acid (same as USP concentration i.e. 2.6mg/ml)<br>$632.4\text{mg}/500\text{mg} \times 650 = 822.12\text{mg}$<br>Note.<br>632.4mg of tablet weight Eq. 500mg of Tranexamic Acid hence 822.12mg of tablet weight eq. 650mg of Tranexamic Acid. |
| 4.    | Rationalize the spiked concentration of active taken while performing the accuracy parameter of verification studies of drug product specifically with reference to the applied strength.  | Firm replied that As per USP monograph final concentration of sample is 2.6mg/ml. So, we prepare the accuracy sample in the range of 50%-150%. So, we prepare, 2.6mg/ml for 100% concentration, 1.3mg/ml for 50% concentration, 3.9mg/ml for 150% concentration.  |

**Decision: Approved.** Applicant shall submit PKR 7500/- pre-registration variation fee for change in specification of drug product, prescribed vide S.R.O 496 (I)/2023 dated 17-04-2023 before issuance of registration letter.

- Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.
- Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.

**Export Facilitation:** Applications was received through letter No.F.1-76/2019-PR-I (EFD) "M/s Pharmedic Laboratories (Pvt.) Ltd. have achieved benchmark OF USD 1576776.335 as defined in the Board's decision during fiscal year 2020-2021. In this regard, please find the (1 molecule) 05 products applications submitted by the firm."

Remarks of Evaluator:

| S.no. | Sections    | Observations/Deficiencies/ Short-comings  |
|-------|-------------|---|
| 1.    | 3.2.S.4.2   | Submit data of verification of analytical procedure of drug substance in section 3.2.S.4.3 as per the guidance document approved by Registration Board which specifies that "Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted". Since you have only submitted the requisite information provided by drug substance manufacturer.   |
| 2.    | 3.2.S.4.4   | Justify how you have calculate the potency of nebivolol without HCl as mentioned in the COA of drug substance comparing the COA of drug substance by drug substance manufacturer calculated the assay on anhydrous basis only.  |
| 3.    | 3.2.P.2.2.1 | Justify for not performing the test of content uniformity by HPLC and water content test while establishing the pharmaceutical equivalence against the reference product, since these test are included in the specification of innovator brand of USFDA.<br>Justify for not performing the pharmaceutical equivalence and comparative dissolution against the innovator brand/brand leader approved in Pakistan.   |
| 4.    | 3.2.P.5.1   | Justify for not including the test of water content in the release specification of drug product, since these test are included in the specification of innovator brand.<br>Clarification is required that in assay either you have quantified the nebivolol or nebivolol HCl, since the calculated % is of nebivolol HCl, while the main peak in the chromatogram represent the nebivolol without HCl.<br>Sample preparation for assay is more general rather than specific, without the clarity that transfer quantity of the sample equivalent to 50mg represent either the quantity of nebivolol or nebivolol HCl.<br>Justify for adapting the acceptance criteria of dissolution NLT 80% within 45 minutes comparing the results of CDP in 0.01N HCl medium which was more than 80% within 15minutes and the acceptance criteria of innovator brand approved in USFDA. |
| 5.    | 3.2.R.1.1   | Justify for taking the strength of tablet with HCl factor for calculation of dispensed quantity of powder as revealed from the batch manufacturing record since you have taken the potency of drug substance without HCl on as is basis.  |

| Decision of 324th meeting of Registration Board:   |             |   |   |
|--|-------------|---|---|
| Decision: Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months. |             |   |   |
| Response of the Firm:  |             |   |   |
| S.no.  | Sections    | Observations/Deficiencies/ Short-comings  | Response of the Firm  |
| 1.   | 3.2.S.4.2   | Submit data of verification of analytical procedure of drug substance in section 3.2.S.4.3 as per the guidance document approved by Registration Board which specifies that “Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted”. Since you have only submitted the requisite information provided by drug substance manufacturer. | Firm submitted the analytical method verification report of drug substance performed by drug product manufacturer.<br>However, the official monograph of drug substance is present in EP 11.0 and the applicant imported in-house complied drug substance.  |
| 2.   | 3.2.S.4.4   | Justify how you have calculate the potency of nebivolol without HCl as mentioned in the COA of drug substance comparing the COA of drug substance by drug substance manufacturer calculated the assay on anhydrous basis only.  | Firm replied it is an error which was rectified and correct COA of drug substance by drug product manufacturer has submitted.   |
| 3.   | 3.2.P.2.2.1 | Justify for not performing the test of content uniformity by HPLC and water content test while establishing the pharmaceutical equivalence against the reference product, since these test are included in the specification of innovator brand of USFDA.   | Firm submitted the analytical procedure instead of pharmaceutical equivalence report including the test of content uniformity by HPLC and water content test.   |
| 4.   | 3.2.P.5.1   | Justify for not including the test of water content in the release specification of drug product, since these test are included in the specification of innovator brand.  | Firm submitted the revised analytical procedure of drug along with specification.   |
| 5.   | 3.2.P.5.1   | Sample preparation for assay is more general rather than specific, without the clarity that transfer quantity of the sample equivalent to 50mg represent either the quantity of nebivolol or nebivolol HCl.   | Firm revised the sample preparation procedure in which 50mg is the quantity of nebivolol.   |
| 6.   | 3.2.P.5.1   | Clarification is required that in assay either you have quantified the nebivolol or nebivolol HCl, since the calculated % is of nebivolol HCl, while the main peak in the chromatogram represent the nebivolol without HCl.   | Firm replied that We have used Nebivolol HCl raw material in production of our trial batches as per Innovator’s specifications not Nebivolol base as it is evident from our COA of raw material attached here but since international and our claim is Nebivolol as HCl (Nebivolol base) that’s why we had used only Nebivolol in our chromatograms. The peak in chromatograms is of Nebivolol HCl but to justify our |

|    |           |   |  |
|----|-----------|---|--|
|    |           |   | claim in product we write only Nebivolol on it which is also evident from the assay of standard which we use as 90.53%. The pictures of reference products to justify our claim are attached herewith along with some supporting data. |
| 7. | 3.2.P.5.2 | Justify for adapting the acceptance criteria of dissolution NLT 80% within 45 minutes comparing the results of CDP in 0.01N HCl medium which was more than 80% within 15minutes and the acceptance criteria of innovator brand approved in USFDA. | Firm claimed that they submitted the updated documents but the submitted analytical procedure again specified the same acceptance i.e. criteria NLT 80% within 45 minutes.   |
| 8. | 3.2.R.1.1 | Justify for taking the strength of tablet with HCl factor for calculation of dispensed quantity of powder as revealed from the batch manufacturing record since you have taken the potency of drug substance without HCl on as is basis.          | Firm replied that In trial BMR we have taken the potency of drug substance with HCl on as is basis, the potency given in COA is on as is basis with HCl.   |

**Decision of 329<sup>th</sup> meeting of Registration Board:**

Deferred for submission of following shortcomings:

Submit the revised acceptance criteria of dissolution in line with innovator product along with performance report of dissolution testing of stability batches in accordance with the revised acceptance criteria.

Pharmaceutical equivalence report including all the quality test as per the revised specification of finished product.

**Response of the Firm:**

**Submit the revised acceptance criteria of dissolution in line with innovator product along with performance report of dissolution testing of stability batches in accordance with the revised acceptance criteria.**

Firm submitted the revised dissolution acceptance criteria in line with innovator product along with revised CDP report but did not submit the performance report of dissolution testing of stability batches in accordance with the revised acceptance criteria.

**Pharmaceutical equivalence report including all the quality test as per the revised specification of finished product.**

Firm did not submit pharmaceutical equivalence report including all the quality test as per the revised specification of finished product.

**Decision of 336<sup>th</sup> meeting of Registration Board:**

Deferred for submission of following:

- Submit performance report of dissolution testing of stability batches in accordance with the revised acceptance criteria.
- Submit pharmaceutical equivalence report including all the quality test as per the revised specification of finished product.

**Response of the Firm:**

- **Submit performance report of dissolution testing of stability batches in accordance with the revised acceptance criteria.**

Firm submitted the comparative dissolution profile data of drug product along with the reference product Nebil 2.5mg Tablet of M/s. Getz Pharma, but the case was deferred for submission of performance report of dissolution testing of stability batches in accordance with the revised acceptance criteria.

- **Submit pharmaceutical equivalence report including all the quality test as per the revised specification of finished product.**

|   |   |   |
|---|---|---|
| Firm submit pharmaceutical equivalence report including all the quality test as per the revised specification of finished product.  |   |   |
| <b>Decision: The Registration Board deferred the application as last chance to submit the reply for the shortcomings already communicated. their submitted responses were still deemed unsatisfactory after evaluation.</b> |   |   |

|    |           | 80% within 15minutes and the acceptance criteria of innovator brand approved in USFDA.   |
| 5. | 3.2.R.1.1 | Justify for taking the strength of tablet with HCl factor for calculation of dispensed quantity of powder as revealed from the batch manufacturing record since you have taken the potency of drug substance without HCl on as is basis. |

**Decision of 324th meeting of Registration Board:**

Decision: Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.

**Response of the Firm:**

| S.no. | Sections    | Observations/Deficiencies/ Short-comings  | Response of the Firm  |
|-------|-------------|---|---|
| 1.    | 3.2.S.4.2   | Submit data of verification of analytical procedure of drug substance in section 3.2.S.4.3 as per the guidance document approved by Registration Board which specifies that “Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted”. Since you have only submitted the requisite information provided by drug substance manufacturer. | Firm submitted the analytical method verification report of drug substance performed by drug product manufacturer. However, the official monograph of drug substance is present in EP 11.0 and the applicant imported in-house complied drug substance. |
| 2.    | 3.2.S.4.4   | Justify how you have calculate the potency of nebivolol without HCl as mentioned in the COA of drug substance comparing the COA of drug substance by drug substance manufacturer calculated the assay on anhydrous basis only.  | Firm replied it is an error which was rectified and correct COA of drug substance by drug product manufacturer has submitted.   |
| 3.    | 3.2.P.2.2.1 | Justify for not performing the test of content uniformity by HPLC and water content test while establishing the pharmaceutical equivalence against the reference product, since these test are included in the specification of innovator brand of USFDA.   | Firm submitted the analytical procedure instead of pharmaceutical equivalence report including the test of content uniformity by HPLC and water content test.   |
| 4.    | 3.2.P.5.1   | Justify for not including the test of water content in the release specification of drug product, since these test are included in the specification of innovator brand.  | Firm submitted the revised analytical procedure of drug along with specification.   |
| 5.    | 3.2.P.5.1   | Sample preparation for assay is more general rather than specific, without the clarity that transfer quantity of the sample equivalent to 50mg represent either the quantity of nebivolol or nebivolol HCl.   | Firm revised the sample preparation procedure in which 50mg is the quantity of nebivolol.   |
| 6.    | 3.2.P.5.1   | Clarification is required that in assay either you have quantified the nebivolol or nebivolol HCl, since  | Firm replied that We have used Nebivolol HCl raw material in production of our trial batches as per Innovator’s specifications not  |

|    |           |   |   |
|----|-----------|---|---|
|    |           | the calculated % is of nebivolol HCl, while the main peak in the chromatogram represent the nebivolol without HCl.  | Nebivolol base as it is evident from our COA of raw material attached here but since international and our claim is Nebivolol as HCl (Nebivolol base) that's why we had used only Nebivolol in our chromatograms. The peak in chromatograms is of Nebivolol HCl but to justify our claim in product we write only Nebivolol on it which is also evident from the assay of standard which we use as 90.53%. The pictures of reference products to justify our claim are attached herewith along with some supporting data. |
| 7. | 3.2.P.5.2 | Justify for adapting the acceptance criteria of dissolution NLT 80% within 45 minutes comparing the results of CDP in 0.01N HCl medium which was more than 80% within 15minutes and the acceptance criteria of innovator brand approved in USFDA. | Firm claimed that they submitted the updated documents but the submitted analytical procedure again specified the same acceptance i.e. criteria NLT 80% within 45 minutes.  |
| 8. | 3.2.R.1.1 | Justify for taking the strength of tablet with HCl factor for calculation of dispensed quantity of powder as revealed from the batch manufacturing record since you have taken the potency of drug substance without HCl on as is basis.          | Firm replied that In trial BMR we have taken the potency of drug substance with HCl on as is basis, the potency given in COA is on as is basis with HCl.  |

**Decision of 329<sup>th</sup> meeting of Registration Board:**

Deferred for submission of following shortcomings:

Submit the revised acceptance criteria of dissolution in line with innovator product along with performance report of dissolution testing of stability batches in accordance with the revised acceptance criteria.

Pharmaceutical equivalence report including all the quality test as per the revised specification of finished product.

**Response of the Firm:**

**Submit the revised acceptance criteria of dissolution in line with innovator product along with performance report of dissolution testing of stability batches in accordance with the revised acceptance criteria.**

Firm submitted the revised dissolution acceptance criteria in line with innovator product along with revised CDP report but did not submit the performance report of dissolution testing of stability batches in accordance with the revised acceptance criteria.

**Pharmaceutical equivalence report including all the quality test as per the revised specification of finished product.**

Firm did not submit pharmaceutical equivalence report including all the quality test as per the revised specification of finished product.

**Decision of 336<sup>th</sup> meeting of Registration Board:**

Deferred for submission of following:

- Submit performance report of dissolution testing of stability batches in accordance with the revised acceptance criteria.
- Submit pharmaceutical equivalence report including all the quality test as per the revised specification of finished product.

**Response of the Firm:**

- **Submit performance report of dissolution testing of stability batches in accordance with the revised acceptance criteria.**

Firm submitted the comparative dissolution profile data of drug product along with the reference product Nebil 2.5mg Tablet of M/s. Getz Pharma, but the case was deferred for submission of performance report of dissolution testing of stability batches in accordance with the revised acceptance criteria.

- **Submit pharmaceutical equivalence report including all the quality test as per the revised specification of finished product.**

Firm submit pharmaceutical equivalence report including all the quality test as per the revised specification of finished product.

**Decision: The Registration Board deferred the application for last chance to submit reply to the communicated shortcomings as their submitted responses were still deemed unsatisfactory after evaluation.**

| 1.                          | Reference of previous approval of applications with stability study data of the firm (if any)   | Not submitted   |            |
| 2.                          | Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.   | Not submitted   |            |
| 3.                          | Documents for the procurement of API with approval from DRAP (in case of import).   | Firm submitted the letter related to submission of sample of carboxymethyl cellulose sodium to M/s. Ophth Pharma from Rasheedsons for evaluation purpose.   |            |
| 4.                          | Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.   | Submitted   |            |
| 5.                          | Compliance Record of HPLC software 21CFR & audit trail reports on product testing   | NA  |            |
| 6.                          | Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)   | Submitted   |            |
| S.n o.                      | Observations/Deficiencies/ Short-comings  | Reply of the Firm   |            |
| 1                           | Justify the finished product specifications as “USP specifications” since the drug product monograph is only available in BP Pharmacopoeia. Revise your specifications along with submission of requisite fee.  | Firm submitted the revised finished product specification from USP specification to BP specification in section 3.2.P.5., however in module 1 section 1.5.6 firm again claimed USP specification for drug product.  |            |
| 2                           | Submit specifications as well as analytical method of the drug substance from the drug product manufacturer as well as drug substance manufacturer in section 3.2.S.4.1 and 3.2.S.4.2.  | Firm only submit the copy of USP monograph of carboxymethyl cellulose sodium. Specification and analytical procedure by drug substance manufacturer has not been submitted by the firm.   |            |
| 3                           | Submit data in section 3.2.S.4.3 as per the guidance document approved by Registration Board which specifies that “Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted” Further specify how the | Firm submitted the analytical method verification report without any detail regarding the assay procedure which has been verified and clarity related quantification data of precision and accuracy parameter (either the quantify amount was of carboxymethyl cellulose sodium or only the sodium content) |            |

|   |   |  |
|---|---|--|
|   | testing of drug substance was carried out without performing verification studies.  |  |
| 4 | <ul style="list-style-type: none"> <li>• Provide details including batch number, expiry date and name of manufacturer of the product along with pharmaceutical equivalence was performed.</li> <li>• Perform all the test which are included in the BP monograph of carmellose sodium ophthalmic drops to establish pharmaceutical equivalence with the reference product.</li> </ul> | Firm submitted the pharmaceutical equivalence report performed against the optheez eye drop of M/s. Barrett & Hodgson and only identification and pH and osmolality test has been included in the report. Assay has not performed while the performance of pharmaceutical equivalence. |
| 5 | According to the batch analysis report of finished product you have adopted in-house specification for the testing of drug product since the monograph of applied product is present in BP pharmacopeia. Revise the specification of drug product in compliance to BP monograph and accordingly submit the revised analytical procedure and verification report.                      | Firm submitted the analytical verification report from which it is evident that the performance of accuracy parameter did not cover the range of conc of sample and standard solution recommended in the BP monograph.   |
| 6 | Provide COA of the reference standard / working standard actually used in the analysis of drug product in section 3.2.P.6.  | Firm submitted the COA of working standard with USP claim, while the claimed specification of finished product is BP.  |
| 7 | Provide detail about the container closure system and performance report of water loss study  | Firm informed that the primary container closure system is plastic bottle and did not submit the report of water loss study.   |
| 8 | Submit documents for the procurement of API including copy of commercial invoice attested by AD (I&E) DRAP. Provide details that which lot number of drug substance has been used in manufacturing of each batch of drug product. Also provide documents confirming evidence of import of each lot of drug substance used in manufacturing of these batches of drug product.          | Firm submitted the letter related to submission of sample of carboxymethyl cellulose sodium to M/s. Ophth Pharma from Rasheedsons for evaluation purpose.  |
| 9 | Provide data of stability batches properly arranged and supported by respective documents including analytical report / COA, raw data sheet and respective chromatograms separately for each time point.  | As per the submitted raw data sheets it is evident that firm has not performed the assay testing as recommended by BP monograph with reference to sample and standard conc.  |
| 1 | Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2. P.8.3.   | Submitted.   |

**Decision of 323<sup>rd</sup> meeting of Registration Board:**

Deferred for the submission of following:

- Fee of Rs. 7,500/- for correction/pre-approval change/ in product specifications, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.
- Submit detailed analytical method of the drug substance from the drug product manufacturer as well as drug substance manufacturer in section 3.2.S.4.2.
- Performed verification study on the assay method of drug substance in accordance with USP monograph by drug product manufacturer.
- Pharmaceutical Equivalence report against the innovator/reference product and performed all the quality test as recommended by the BP monograph.

| <ul style="list-style-type: none"> <li>Analytical method verification report of drug product including specificity, accuracy and precision (repeatability) parameter.</li> <li>Submitted COA of working standard is of USP grade, whereas drug product specifications have been claimed as per BP monograph.</li> <li>Water loss study of drug product, since the primary container of drug product is LDPE bottles.</li> <li>API procurement document including copy of commercial invoice attested by AD (I&amp;E) DRAP.</li> <li>Scientific justification for non-compliance of BP monograph while performing the assay testing of drug product during stability studies as evident from submitted raw data sheets.</li> </ul> |  |  |

| <b>Response of the Firm:</b>  |  |  |
| <b>Sr.no.</b>   | <b>Decision of 323<sup>rd</sup> meeting of Registration Board</b>  | <b>Response of the Firm</b>  |
| 1.  | Fee of Rs. 7,500/- for correction/pre-approval change/ in product specifications, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.                                    | Firm submitted the fee of Rs. 7,500/- for correction/pre-approval change/ in product specifications, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021                                    |
| 2.  | Submit detailed analytical method of the drug substance from the drug product manufacturer as well as drug substance manufacturer in section 3.2.S.4.2.                            | Submitted  |
| 3.  | Performed verification study on the assay method of drug substance in accordance with USP monograph by drug product manufacturer.  | Submitted  |
| 4.  | Pharmaceutical Equivalence report against the innovator/reference product and performed all the quality test as recommended by the BP monograph.                                   | Firm submitted the pharmaceutical equivalence report performed against the reference product Celluvis Eye Drop of M/s. Allergan Pharmaceuticals Ireland (Batch no. FDT258).                          |
| 5.  | Analytical method verification report of drug product including specificity, accuracy and precision (repeatability) parameter.   | Firm submitted the analytical verification report of drug product.   |
| 6.  | Submitted COA of working standard is of USP grade, whereas drug product specifications have been claimed as per BP monograph.  | Submitted  |
| 7.  | Water loss study of drug product, since the primary container of drug product is LDPE bottles  | Firm submitted the water loss study of drug product. However, firm submitted the water loss study of only trial batch TB-101 while water loss study of remaining two batches is still not submitted. |
| 8.  | API procurement document including copy of commercial invoice attested by AD (I&E) DRAP.   | Firm submitted the copy of commercial invoice attested by the DRAP officer.  |
| 9.  | Scientific justification for non-compliance of BP monograph while performing the assay testing of drug product during stability studies as evident from submitted raw data sheets. | Firm replied that they performed the assay in accordance with BP monograph, by mistake the assistant have not attached the file of testing in the CTD file.  |

**Decision: The Registration Board deferred the application for last chance to submit the reply to the communicated shortcomings, as their submitted responses were still deemed unsatisfactory after evaluation.**

| 6. | Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) | Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers. |

**Therapeutic indications:**

Baclofen 5 mg/5 mL Oral Solution is indicated for the relief of spasticity of voluntary muscle resulting from such disorders as: multiple sclerosis, other spinal lesions, e.g. tumours of the spinal cord, syringomyelia, motor neurone disease, transverse myelitis, traumatic partial section of the cord. Baclofen 5 mg/5 mL Oral Solution is also indicated in adults and children for the relief of spasticity of voluntary muscle arising from e.g. cerebrovascular accidents, cerebral palsy, meningitis, traumatic head injury. Patient selection is important when initiating Baclofen 5 mg/5 mL Oral Solution therapy; it is likely to be of most benefit in patients whose spasticity constitutes a handicap to activities and/or physiotherapy. Treatment should not be commenced until the spastic state has become stabilised.

**Posology and method of administration**

Before starting treatment with Baclofen 5 mg/5 mL Oral Solution it is prudent to realistically assess the overall extent of clinical improvement that the patient may be expected to achieve. Careful titration of dosage is essential (particularly in the elderly) until the patient is stabilised. If too high a dose is initiated or if the dosage is increased too rapidly side effects may occur. This is particularly relevant if the patient is ambulant in order to minimise muscle weakness in the unaffected limbs or where spasticity is necessary for support. Adults: The following gradually increasing dosage regimen is suggested, but should be adjusted to suit individual patient requirements. 5mg three times a day for three days 10mg three times a day for three days 15mg three times a day for three days 20mg three times a day for three days Satisfactory control of symptoms is usually obtained with doses of up to 60mg daily, but a careful adjustment is often necessary to meet the requirements of each individual patient. The dose may be increased slowly if required, but a maximum daily dose of more than 100mg is not advised unless the patient is in hospital under MHRA PAR; BACLOFEN 5 MG/5 ML ORAL SOLUTION, PL 06464/2354 13 careful medical supervision. Small frequent dosage may prove better in some cases than larger spaced doses. Also some patients benefit from the use of Baclofen 5 mg/5 mL Oral Solution only at night to counteract painful flexor spasm. Similarly, a single dose given approximately 1 hour prior to performance of specific tasks such as washing, dressing, shaving, physiotherapy, will often improve mobility. Once the maximum recommended dose has been reached, if the therapeutic effect is not apparent within 6 weeks a decision whether to continue with Baclofen 5 mg/5 mL Oral Solution should be taken.

**Remarks of Evaluator:**

| S.no | Observations/Deficiencies/ Short-comings   | Response of the Firm  |
|------|--|---|
| 1.   | Provide the evidence of reference product approved in reference regulatory agencies in the volume size of 60ml,100ml &200ml.   | Firm replied that reference product is available only in 300ml pack size. However for patient compliance and affordability we have requested pack size of 60ml,100ml and 200ml.   |
| 2.   | You have mentioned innovator's specification in section 1.5.6 in module 1 while the drug product monograph is available in BP. Revise the specifications along with submission of requisite fee. | Firm replied they have performed the stability studies as per BP method but they skipped to mention BP specification therefore they have revised the specification as per BP. Requisite fee of Rs.7500/- has submitted vide deposit slip no. 69383266679 dated 19-01-2024.<br>However, the analytical procedure of drug product given in section 3.2.P.5.2 specifically assay procedure is different from method recommended by the BP monograph of Baclofen Oral Solution. |
| 3.   | Drug Substance manufacturer claimed IP specification for the drug substance while you have complied BP specification, clarify for using different specification for                              | Firm replied that drug substance in Drug Master File Claim both IP & BP.  |

|    |   |   |
|----|---|---|
|    | the drug substance from that claimed by drug substance manufacturer.  | However, the monograph of Baclofen drug substance is not present in IP, Eleventh Edition, 2022.   |
| 4. | Submit complete real time stability data of drug substance till claimed re-test date, since you have only submitted the data of 18 months.  | Submitted   |
| 5. | Formulation contain preservative, so preservative effectiveness studies to be performed as per recommendations of pharmacopoeia and shall be submit.  | Submitted   |
| 6. | Submit the analysis report/COA of excipients propylene glycol and sorbitol which includes the results of impurity testing related to the presence of ethylene glycol and diethylene glycol, in compliance of notification issued by DRAP vide letter No. F.3-42/2023-QC dated 1 <sup>st</sup> , December, 2023.                                   | Firm submitted raw material analytical report of Propylene glycol and sorbitol which includes the results of impurity testing related to the presence of ethylene glycol and diethylene glycol including the COA of vendor of raw material Propylene glycol and sorbitol.<br>However COA of sorbitol from raw material manufacturer did include the impurity testing related to the presence of ethylene glycol and diethylene glycol.                                      |
| 7. | Storage condition specified by the reference product and BP monograph of “Baclofen Oral Solution) is “Baclofen oral solution should be stored below 25°C, while the storage condition mentioned by you is store below 30°C, Justify the storage condition recommended by you for your applied product.  | Firm replied that mistakenly it is written as store below 30°C the actual correct storage is store below 25°C. Revised SOP is submitted.  |
| 8. | Justify for not adopting the BP specifications for the drug product when the monograph of Baclofen Oral Solution is present in BP.  | Firm replied they have performed the stability studies as per BP method but they skipped to mention BP specification therefore they have revised the specification as per BP. Requisite fee of Rs.7500/- has submitted vide deposit slip no. 69383266679 dated 19-01-2024.<br>However, the analytical procedure of drug product given in section 3.2.P.5.2 specifically assay procedure is different from method recommended by the BP monograph of Baclofen Oral Solution. |
| 9. | Submit data in section 3.2.P.8.1 as per the guidance document approved by Registration Board which specifies that “Summary of additional stability studies (if applicable) e.g. in-use studies for drug products which are to be reconstituted before use, along with proposed in-use storage statement and in-use shelf-life shall be provided”. | Firm submitted the in-use stability data of 28 days. Stability study has been performed on 30ml pack size, which is not included in the demanded pack size.   |

#### **Decision of 335<sup>th</sup> meeting of Registration Board:**

Deferred for revision of analytical procedure of drug product specifically assay method in accordance with BP monograph of “Baclofen Oral Solution” and submit the performance report in accordance with revised analytical method at next time point of long term stability studies.

#### **Response of the Firm:**

Firm submitted the revised analytical procedure in compliance of BP monograph of “**Baclofen Oral Solution**” and accordingly submit the performance report of next time point of stability study in accordance with revised assay procedure.

**Decision: Approved.**

- Applicant shall submit PKR 7500/- pre-registration variation fee for change in specification of drug product, prescribed vide S.R.O 496 (I)/2023 dated 17-04-2023 before issuance of registration letter.
- Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.
- Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.

| Evaluation by PEC: |  |  |
| S.no.              | Sections   | Observations/Deficiencies/ Short-comings   |
| 1.                 | 1.3  | Submit valid original and legalized Certificate of Pharmaceutical Product (CoPP) / Free Sale certificate and GMP certificate of the Manufacturer issued by relevant regulatory authority in the country of origin and name of exporting country, since the submitted documents are invalid.  |
| 2.                 | 1.4  | Submit valid drug sale license of VIZ Remedies Pakistan LLP ,since you have submitted the expired DSL.   |

|    |           |   |
|----|-----------|---|
| 3. | 3.2.S.7   | Submit stability data of three batches of drug substance performed at long term stability conditions till the claimed re-test date since you have submitted the data of only 12 months.   |
| 4. | 3.2.P.3   | Justify the use of activated carbon in the manufacturing procedure of sterile preparation to remove the bacterial endotoxin in the light of guidance documents of reference agencies.   |
| 5. | 3.2.P.5.1 | Justify how the labelled amount of tirofiban will be quantify, since the assay method given in section 3.2.P.5.2 calculate the quantity of tirofiban hydrochloride instead of labelled quantity of tirofiban without the salt factor. |
| 6. | 3.2.P.5.4 | Justify for using the excipient sodium chloride in the product name along with tirofiban hydrochloride.   |

Decision of 326<sup>th</sup> meeting of Registration Board:

Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.

Response of the Firm:

| S.no. | Observations/Deficiencies/ Short-comings  | Response of the Firm  |
|-------|---|---|
| 1.    | Submit valid original and legalized Certificate of Pharmaceutical Product (CoPP) / Free Sale certificate and GMP certificate of the Manufacturer issued by relevant regulatory authority in the country of origin and name of exporting country, since the submitted documents are invalid. | Firm replied that they submitted original and legalized CoPP at the time of registration. However due to its expiration, renewed CoPP has been requested to the principal manufacturer.   |
| 2.    | Submit valid drug sale license of VIZ Remedies Pakistan LLP ,since you have submitted the expired DSL.  | Firm submitted the copy of DSL no. 0324 which is valid till 14/03/2028.   |
| 3.    | Submit stability data of three batches of drug substance performed at long term stability conditions till the claimed re-test date since you have submitted the data of only 12 months.   | Firm submitted the stability data of 36 months of three batches performed at long term conditions.  |
| 4.    | Justify the use of activated carbon in the manufacturing procedure of sterile preparation to remove the bacterial endotoxin in the light of guidance documents of reference agencies.   | Firm in their reply submitted a document, which only stated the quality parameters used for the analysis of activated charcoals INSTEAD of providing reference from international standard to rationalize the use of activated charcoal for sterilizing the injectable solution.. |
| 5.    | Justify how the labelled amount of tirofiban will be quantify, since the assay method given in section 3.2.P.5.2 calculate the quantity of tirofiban hydrochloride instead of labelled quantity of tirofiban without the salt factor.   | Firm clarify that they quantify the quantity of tirofiban by using external standard method, the obtained assay is for tirofiban hydrochloride, then the results will multiply by conversion coefficient (0.8899) to obtain labelled amount of Tirofiban.                         |
| 6.    | Justify for using the excipient sodium chloride in the product name along with tirofiban hydrochloride.   | Firm replied that the role of sodium chloride in this formulation is as "Osmotic Pressure Modifier".  |

**Decision of 333<sup>rd</sup> meeting of Registration Board:**

Deferred for submission of following shortcomings:

- Submit valid original and legalized Certificate of Pharmaceutical Product (CoPP) / Free Sale certificate and GMP certificate of the Manufacturer issued by relevant regulatory authority in the country of origin and name of exporting country, since the submitted documents are invalid.
- Justify the use of activated carbon in the manufacturing procedure of sterile preparation to remove the bacterial endotoxin in the light of guidance documents of reference agencies.

**Response of the Firm:**

- **Submit valid original and legalized Certificate of Pharmaceutical Product (CoPP) / Free Sale certificate and GMP certificate of the Manufacturer issued by relevant regulatory authority in the country of origin and name of exporting country, since the submitted documents are invalid.**

Firm replied that the valid original and legalized Certificate of Pharmaceutical Product (CoPP) were submitted at the time of submission of registration application.

- **Justify the use of activated carbon in the manufacturing procedure of sterile preparation to remove the bacterial endotoxin in the light of guidance documents of reference agencies.**

Firm submitted guidance document of PMDA, Japan “Guidance on the Manufacture of Sterile Pharmaceutical Products by Aseptic Processing” but the submitted documents did not contain any material relevant to the use of activated charcoal carbon in the manufacturing procedure of sterile preparation to remove the bacterial endotoxin. Further, firm submitted the patent documents of tirofiban hydrochloride as a proof of use of activated carbon instead of tirofiban hydrochloride injection.

**Decision of 336<sup>th</sup> meeting of Registration Board:**

Deferred for submission of relevant guidance document of reference agencies which clearly recommends the usage of activated carbon in the manufacturing procedure of sterile preparation for removal of bacterial endotoxin.

**Response of the Firm:**

Firm replied that the activated carbon is no longer employed in the manufacturing process by the Principal. Therefore, with regard to the manufacturing process, the following documents are enclosed as an evidence:

- i. Manufacturing Process
- ii. Process Validation
- iii. Sterility Report

**Decision: Approved as per Policy for inspection of Manufacturer abroad and verification of local storage facility. Registration Board further decided that the panel shall confirm the manufacturing procedure of drug product, since the applicant claimed that the activated carbon has no longer used in the manufacturing procedure of applied injectable by the Manufacturer Abroad.**

| Module-II (Quality Overall Summary)   | Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch   |

|  |   |   |
|--|---|---|
|  |   | analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.  |
| Name, address of drug substance manufacturer                                     | M/s. Anqiu Lu'an Pharmaceuticals Co. Ltd. No.35 Weixu North Road, Aniqu, Shandog, China |   |
| Module-III Drug Substance:   |   | Firm has submitted detailed drug substance data for both sources related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.                  |
| Stability Studies of Drug Substance (Conditions & duration of Stability studies) |   | Firm has submitted stability study data of 3 batches of API at accelerated as well as real time conditions. The real time stability data is conducted at 30°C ± 2°C and 75%+5 RH. The stability study data is till 36 months.   |
| Module-III Drug Product:   |   | Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability. |
| Pharmaceutical Equivalence and Comparative Dissolution Profile                   |   | Firm has submitted Pharmaceutical Equivalence studies report against the reference product of M/s. Cisen Pharmaceuticals Co. Ltd., China (Paracetamol Injection 1g/100ml), but an incomplete report has been submitted by the firm.   |
| Analytical method validation/verification of product                             |   | Firm has submitted analytical method validation studies for the applied product.  |
| Container closure system of the drug product                                     |   | 100ml type I glass bottle made of low borosilicate glass: Butyl rubber stopper.   |
| Stability study data of drug product, shelf life and storage conditions          |   | Firm has submitted stability study data of 3 batches The accelerated stability study data is conducted at 40°C ±2°C / 75% ± 5% RH for 6 months. The real time stability study data is conducted at 30°C ±2°C / 65% ± 5% RH. The real time stability study data of 3 batches is for 36 months  |

**Evaluation by PEC:**

| S.no. | Section     | Observations/Deficiencies/ Short-comings  |
|-------|-------------|---|
| 1.    | 3.2.S.4.3   | Provide analytical method validation report performed by drug product manufacturer.   |
| 2.    | 3.2.S.4.4   | Provide batch analysis report of drug substance by the drug product manufacturer.   |
| 3.    | 3.2.S.5     | Provide certificate of analysis of reference standard /working standard used for testing of the product.  |
| 4.    | 3.2.P.2.2.1 | Submitted equivalence report did not include the results of applied product of Tianjin KingYork Group Hubei Tianyao Pharmaceutical Co. Ltd. along with quality analysis reports of reference product. Submit the comparison/equivalence report mentioning the quality results of both test and reference product. |
| 5.    | 3.2.P.5.1   | Justify for keeping the pH of drug product between 4.5-6.0 when the innovator recommends pH between 5.0 and 6.3.  |
| 6.    | 3.2.P.5.4   | Assay procedure given in section 3.2.P.5.2 is different from the assay method validated in section 3.2.P.5.4, justification is required in this regard.   |

|    |         |  |
|----|---------|--|
| 7. | 3.2.P.7 | Clarify the disparities observed in the container closure report as the results of few container compatibility test stated that the 2ml type I glass bottle are compatible for the product, further the final conclusion of report claimed that the paracetamol injection 1mg/100ml is stable with the type I glass bottles. |
|----|---------|--|

**Decision of 335<sup>th</sup> meeting of Registration Board:**

Registration Board deferred the case for submission of reply to the above cited shortcomings.

**Response of the Firm:**

| S.no. | Section     | Observations/Deficiencies/ Short-comings   | Response of the Firm   |
|-------|-------------|--|--|
| 1.    | 3.2.S.4.3   | Provide analytical method validation report performed by drug product manufacturer.  | Firm replied that The specification of Paracetamol used by Tianjin Kingyork Group Hubei Tianyao Pharmaceutical Co., Ltd. is consistent with that provided by the manufacturer (Anqiu Lu'an), and all meet the requirements under BP monograph. Therefore, Tianyao has validated the analytical method, please see the following pages for details.   |
| 2.    | 3.2.S.4.4   | Provide batch analysis report of drug substance by the drug product manufacturer.  | Submitted  |
| 3.    | 3.2.S.5     | Provide certificate of analysis of reference standard /working standard used for testing of the product.   | Submitted  |
| 4.    | 3.2.P.2.2.1 | Submitted equivalence report did not include the results of applied product of Tianjin King York Group Hubei Tianyao Pharmaceutical Co. Ltd. along with quality analysis reports of reference product. Submit the comparison/equivalence report mentioning the quality results of both test and reference product. | Firm replied that We have added the test results of Tianjin King York Group Hubei Tianyao Pharmaceutical Co. Ltd. to the Equivalence Report and submit the revised equivalence report .  |
| 5.    | 3.2.P.5.1   | Justify for keeping the pH of drug product between 4.5-6.0 when the innovator recommends pH between 5.0 and 6.3.   | Firm replied that "As described under the monograph for Paracetamol Injection in the Chinese Pharmacopoeia, the pH range is set between 4.5 and 6.5. However, in establishing our product quality standards, we opted for stricter pH control, narrowing the range to 4.5 to 6.0. Through rigorous production and quality testing, we have consistently observed that the pH of our injections falls within a narrower range of approximately 5.5 to 5.9. If necessary, based on future market demands or the need for product quality control, we are fully capable of adjusting the pH range to 5.0 to 6.3, while ensuring that the overall product quality remains compliant with established standards and requirements. |
| 6.    | 3.2.P.5.4   | Assay procedure given in section 3.2.P.5.2 is different from the assay method validated in section 3.2.P.5.4, justification is required in this regard.  | Firm replied that We apologize for the inconvenience caused by our oversight, as we inadvertently submitted an outdated version of the assay method validation report for a different strength. Kindly refer to the enclosed corrected version of the assay method validation report.  |

|    |         |  |  |
|----|---------|--|--|
|    |         |  | We would like to once again apologize for the inconvenience caused by this mistake. and will take necessary measures to ensure the completeness and accuracy of future document submissions.   |
| 7. | 3.2.P.7 | Clarify the disparities observed in the container closure report as the results of few container compatibility test stated that the 2ml type I glass bottle are compatible for the product, further the final conclusion of report claimed that the paracetamol injection 1mg/100ml is stable with the type I glass bottles. | Firm replied that After thorough examination, we regret to find that the Section 3.2.P.7 of the submitted documentation does not contain a specific description of "2ml type I glass." Instead, the relevant section on primary packaging materials only mentions "100ml type II glass bottle." To ensure the completeness and accuracy of the document, we kindly ask your confirmation of this oversight in our submission. We apologize for any inconvenience this may have caused and will take necessary measures to ensure the completeness and accuracy of future document submissions. |

**Decision: Approved as per Policy for inspection of Manufacturer abroad and verification of local storage facility.**

| Module-III Drug Substance:   | Firm has submitted detailed drug substance data for both sources related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, characterization, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance. Forced Degradation Studies                          |
| Stability Studies of Drug Substance (Conditions & duration of Stability studies) | Firm has submitted stability study data of 3 batches of API at accelerated as well as real time conditions. The accelerated and real time stability data are conducted at (-18°C±3°C) and (-70°C±5°C) respectively. The stability study data is till 24 months.  |
| Module-III Drug Product:   | Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, control of critical steps and intermediate products, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability. |
| Pharmaceutical Equivalence and Comparative Dissolution Profile                   | Firm has submitted pharmaceutical equivalence report against the innovator product German Product Cancidas 50mg Merck Sharp & Dhome Ltd.   |
| Analytical method validation/verification of product                             | Firm has submitted analytical method validation studies for the applied product.   |
| Container closure system of the drug product                                     | Type I clear glass vial closed by bromobutyl stoppers. Closed vials are secured by aluminum seal with a plastic flip-off caps.   |

|   |  |
|---|--|
| Stability study data of drug product, shelf life and storage conditions | Firm has submitted stability study data of 4 Three batches of 6500 mL batch size production were tested: 18E032, 18E108 and 18F262 – inverted and upright position. The accelerated stability study data is conducted at 25°C±2°C/60%±5% RH for 6 months. The real time stability study data is conducted at 2-8 °C for 24 months. |
|---|--|

**Evaluation by PEC:**

| S.no. | Observations/Deficiencies/Short-comings  | Response of the Firm   |
|-------|--|--|
| 1.    | Submit valid drug sale license of M/s. Hakimson Impex Pvt. Ltd, Karachi.   | Firm submitted the valid DSL of applicant which is valid till 19/07/2028.  |
| 2.    | Submit valid GMP certificate of Manufacturer Abroad ,since the submitted certificate was expired in 2021.  | Firm submitted the GMP certificate which was based on inspection conducted on 22-03-2019,issue dated 29-03-2021 and validity was for three years.  |
| 3.    | Submit legalized agreement letter between Meraki Global Pte Ltd. Singapore and product License holder i.e. M/s. ANAFARM HELLAS SA., Greece in which Meraki Global has given the marketing rights of applied product by the said product license holder.  | Not submitted.   |
| 4.    | Submit analytical method verification report of drug substance performed by drug product manufacturer, in accordance with the requirement mentioned in the CTD guidance document approved by Registration Board.   | Firm submitted the method transfer for the analytical methods of assay determination, related substances determinations and residual solvents test of Caspofungin Acetate API which are to be transferred from TEVA Laboratories to Anfarm.                    |
| 5.    | Justify the stability conditions adopted for stability studies of drug substance in comparison of stability conditions recommended by innovator product for the drug substance.  | Firm replied that they adopted the reference of innovator product approved in USFDA i.e. Cancidas Powder for concentrate for solution of infusion 50mg/vial. According to the review document of innovator brand storage condition of drug substance is -70°C. |
| 6.    | Scientific justification is required for an overfill of 9.2% of solution of infusion as evident from the submitted composition table in the requisite section.   | Firm replied that the overfill is needed in order to ensure the labelled amount of active in the solution for infusion. Further, the proposed composition is similar to that of reference product i.e. Cancidas.   |
| 7.    | Justify for not using the succinic acid as buffering agent in the developed formulation, since the review document of innovator product highlights the importance of succinic acid in the formulation in order to ensure stability during compounding and reconstitution, as well as suitable osmolality for infusion. It also enables | Firm clarified that the applied formulation is qualitatively similar to the innovator product Cancidas, in which sodium hydroxide or glacial acetic acid are used as pH adjusters and not succinic acid.   |

|     |   |   |
|-----|---|---|
|     | production of a satisfactory cake following lyophilisation  |   |
| 8.  | Submit data of Pharmaceutical equivalence of the applied drug of strength 50mg with the innovator / reference/ comparator product of same strength and results of all the quality tests (mentioned in any official pharmacopoeia or section 3.2.P.5.1 of this application) of the developed formulation and the innovator / reference / comparator product shall be submitted and discussed”. | Firm submitted the comparative study report of applied product against the innovator product Cancidas of Merck Sharp & Dhome.   |
| 9.  | Caspofungin acetate is highly soluble in aqueous media but sensitive to heat, oxygen and extremes of pH, the submitted manufacturing method did not include any of the precautionary measures to avoid the degradation of active substance due to the above said factors, clarification is required in this regard.   | Firm submitted the forced degradation study report of drug product in response of this query.   |
| 10. | Justify for keeping the column temperature uptill 45°C by keeping in view the heat sensitivity of applied product.  | Firm replied that “Kindly note that the keeping time of the drug product at the column temperature until 45°C is so fast that it is not significant as parameter for the heat sensitivity of the drug product”. |

**Decision of 336<sup>th</sup> meeting of Registration Board:**

Deferred for submission of legalized agreement letter between Meraki Global Pte Ltd. Singapore and product License holder i.e. M/s. ANAFARM HELLAS SA., Greece in which Meraki Global has given the marketing rights of applied product by the said product license holder.

**Response of the Firm:**

Firm submit the legalized triparty agreement between M/s. ANAFARM HELLAS SA., Greece, Meraki Global Pte Ltd. Singapore and M/s. Hakimsons (Impex) Pvt. Ltd. In which ANFARM granted Meraki Global the non-exclusive license to use the proprietary information contained in the registration dossier, pertaining to the product in order to obtain the marketing authorization for the products in its own name and on its behalf in the Territory.

**Decision: Approved as per Policy for inspection of Manufacturer abroad and verification of local storage facility.**
