As per facts mentioned in minutes of 313<sup>rd</sup> and 316<sup>th</sup> 327<sup>th</sup> meeting of Registration Board, it is submitted that the firm on 10.10.2011 requested for transfer of registration of their registered products from existing facility i.e. M/s Grays Pharmaceuticals Plot No. 442 Street No. 7 Sect I-9/s2 Industrial Area Islamabad to their new licensed manufacturing facility i.e. M/s Grays Pharmaceuticals Plot No. 2 Street N-3 National

Industrial Zone Rawat, which was granted DML vide approval No. 1-7/2008-Lic dated 22.06.2008. Accordingly, the request of the firm was considered in 233rd meeting of Registration Board held on 15.06.2012 wherein the Board decided to accede the request of for transfer of registrations to M/s Grays Pharmaceuticals Rawat from M/s Grays Pharmaceuticals Islamabad subject to fulfillment of latest fee requirements and confirmation of sections. As per decision of the Board the firm submitted the requisite fee. However, the letter of transfer of registration to new facility couldn't be issued. The registration letters of other products based on approval of 233rd meeting of Registration Board had been issued after approval by the Board in above mentioned meetings but these above products were deferred for confirmation of renewal submission and PRV approvals if any. Now the firm has submitted above applications in light the decision of the Authority in its 180th meeting.

| viii. Latest GMP inspection report.   | v. The firm has submitted copies of approval of change of specs and copies of request submitted for grant of pharmacopeial specs.   |
|   | vi. The firm has submitted copy of request dated 19.07.2022 to DRAP Lahore for GMP inspection/ certificate.   |

#### **Proceedings:**

The Board was apprised as per date of registration the renewal due date was 23.07.2023. and on the due date was Sunday which is an official holiday hence the firm can submit the fee on 24<sup>th</sup> July 2023. However, it was submitted on 02.08.2023 with single fee in DRAP R&I. Moreover, the Ashura holidays were notified by the Government 28-29<sup>th</sup> July 2023 (Friday & Saturday). Moreover, the Chinese Premier arrived in Islamabad on 31<sup>st</sup> July 2023 and remained here till 2<sup>nd</sup> July 2023 and there no local holiday announcement for Government Offices including DRAP. Hence the stance of the firm is not justified. The RRR section has checked from the B&A Division regarding the submission of fee specifically renewal submission fee/ challan generation from and it was found that challan were created and even the fee was submitted in the month of July till the due date i.e. 24.07.2023.

#### **Decision in 331<sup>st</sup> meeting of Registration Board:**

**Keeping in view the position narrated above. Registration Board directed the firm to submit differential fee before next meeting. In case of non-compliance, proceedings for suspension of registration shall be initiated under Rule 27 of Drug (LR&A) Rules 1976 and under section 42 of Drug Act 1976.**

Accordingly, above decision of the Board was communicated to the firm vide letter No.F.3-11/2023-RRR (M-331) dated 11<sup>th</sup> December, 2023. The reply of the firm with reference to the aforesaid letter is reproduced verbatim.

#### **Now firm reply as under:**

*Reference to the letter No.F.3-11/2023-RRR (M-331) dated 11<sup>th</sup> December, 2023 reached to us on 14<sup>th</sup> December, 2023 on our address 49-Km Multan Road Lahore the firm has requested as under: I am writing to appeal against the decision mad regarding renewal of registration of drugs Act 1976 and rules framed there under, The decision, as it stands appears to be disproportionately harsh and fails to align with the principles of justice due to the absence of a fair hearing and inadequate representation of our case. Upon careful consideration of the circumstances it is evident that our side of the case was not effectively presented or advocated for during the proceedings. We believe that key aspects of our situation were not adequately communicated leading to an unfair and unjust conclusion. Moreover, I which to emphasize that we have diligently fulfilled our obligations by depositing the standard fee hence indication our compliance with the prescribed regulations. As such the intimation of section 42, pertaining to non-compliance, appears to be erroneous in our case. Our primary plea is to request a waiver of the fine imposed which we firmly believe is unjustified and disproportionate given our adherence to the prescribed standards and regulations the imposition of the this fine under the circumstances appears to be arbitrary and not in line with the intended purpose of the regulations. We respectfully request a reconsideration of the decision, emphasizing our commitment to complying with all regulations and providing any necessary documentation or evidence to support our position. Furthermore, we seek and opportunity for a fair and comprehensive hearing where our case can be properly presented allowing for adjust and informed decisions to be made. I trust that your esteemed office/ board will carefully review the details provided and grant us the opportunity to present our case in a fair and unbiased setting your understanding and reconsideration in this matter will be highly appreciated.*

**Decision in 336<sup>th</sup> meeting:**

Keeping in view the response of the firm as recorded above with reference to DRAP letter No.F.3-11/2023-RRR (M-331) dated 11<sup>th</sup> December, 2023, Registration Board decided to give opportunity of personal hearing to the firm under section 42 of the Drug Act 1976. Accordingly letter of personal hearing was issued vide DRAP letter No. F.No.3-4/2024-RRR(M-336) dated 24.07.2024.

**Proceedings of the Board:**

In compliance to DRAP letter DRAP letter No. F.No.3-4/2024-RRR(M-336) dated 24.07.2024 for personal hearing, Mr. Kashif Hussain, CEO of M/s Liven Pharmaceuticals (Pvt) Ltd.49-km, Multan Road, Lahore appeared before the Registration Board on behalf of the firm but could not produce any evidence that they have submitted they have submitted renewal application within time.

**Decision:**

**Keeping in view the submitted documents and personnel hearing to the firm, Registration Board after detailed deliberation suspended the registration of above products under rule 27 of Drug (Licensing, Registering & Advertising) Rules 1976 read with section 42 of the Drug Act 1976, due to non-submission of required fee for renewal of registration as the renewal of registration applications were submitted after the due date but within sixty days.**

**In case the firm submits the required fee, the case shall be placed before the Registration Board for consideration and till then the registrations of above products shall remain suspended.**

**Case No. 6      USE OF METHYLENE CHLORIDE IN FORMULATIONS OF PHARMACEUTICAL PRODUCTS**

Secretary, Provincial Quality Control Board (PQCB), Primary & Secondary Healthcare Department, Government of the Punjab Lahore, has requested to clarify that either the use of methylene chloride is permissible as solvent in coating material of tablets. In this regard he has referred DRAP Circular No. F-286-DRB/ 2018 (PE&R) dated 28.05.2019 which was issued to all pharmaceutical manufacturers to refrain from using banned excipients and solvents in the formulations of pharmaceutical products to avoid any public health risk. He further informed that PQCB in its 281<sup>st</sup> meeting dated 06.06.2024 discussed the matter and decided to take clarification from DRAP regarding use of methylene chloride and other solvents in the coating material in tablets or in formulation of pharmaceutical products. As per tables and list, guidance for industry, ICH Q3C, Revision 3, the methylene chloride/dichloromethane is included in class 2 of solvents and its use in pharmaceutical products is limited because of its inherent toxicity.

It is submitted that Registration Board in its 286<sup>th</sup> meeting held on 14<sup>th</sup> -16<sup>th</sup> November 2018, deliberated that methylene chloride and sodium cyclamate (sweetener) are banned excipients as per USFDA regulations 21 CFR 700.19 and thus the Board decided to prohibit the use of both excipients in the formulations of pharmaceutical products. Accordingly, a circular was issued on 28.05.2019 vide No. F-286-DRB/ 2018 (PE&R) to comply with aforesaid directions of Registration Board to refrain from to refrain from using banned excipients and solvents in the formulations of pharmaceutical products to avoid any public health risk.

As the reliance of above decision of the Registration Board for banning the use of methylene chloride, was on USFDA regulations 21 CFR 700.19, hence the same is reproduced as under:

***§ 700.19 Use of methylene chloride as an ingredient of cosmetic products.***

*(a) Methylene chloride has been used as an ingredient of aerosol cosmetic products, principally hair sprays, at concentrations generally ranging from 10 to 25 percent. In a 2-year animal inhalation study sponsored by the National Toxicology Program, methylene chloride produced a significant increase in benign and malignant tumors of the lung and liver of male and female mice. Based on these findings and on estimates of human exposure from the customary use of hair sprays, the Food and Drug Administration concludes that the use of methylene chloride in cosmetic products poses a significant cancer risk to consumers, and that the use of this ingredient in cosmetic products may render these products injurious to health.*

*(b) Any cosmetic product that contains methylene chloride as an ingredient is deemed adulterated and is subject to regulatory action under sections 301 and 601(a) of the Federal Food, Drug, and Cosmetic Act.*

*[54 FR 27342, June 29, 1989]*

Therefore, the above regulation of USFDA bans the use of methylene in cosmetic products only. That, in accordance with ICH Guideline for Residual Solvents Q3C(R9) and USFDA Guidance for Industry Q3C - Tables and List, residual solvents have been classified into 3 classes based on risk assessment and their possible risk to human health:

- Class 1 solvents: Solvents to be avoided
- Class 2 solvents: Solvents to be limited
- Class 3 solvents: Solvents with low toxic potential

As per above classification, Methylene Chloride (also known as Dichloromethane) is a Class 2 solvent and the permitted daily exposure of Methylene Chloride is 6mg/day (600ppm). That Organic volatile chemicals have been used widely in the manufacture of drug substances or excipients, or in the preparation of drug products. Methylene chloride is one of the volatile organic solvent which is used as an effective reaction and re-crystallization solvent in the extraction of several pharmaceutical compounds especially in the production of antibiotics and vitamins also been used as a **carrier for tablet coatings**. Since there is no therapeutic benefit from residual solvents, all residual solvents should be removed to the extent possible to meet product specifications, good manufacturing practices, or other quality-based requirements. Drug products should contain no higher levels of residual solvents than can be supported by safety data. Residual solvents have been classified by the International Council for Harmonisation of Technical Requirements for Pharmaceuticals for Human Use (ICH) based on their possible risk to human health with their residual limits in Q3C (R9) Guideline (Impurities: Guideline for Residual Solvents) [https://database.ich.org/sites/default/files/ICH\\_Q3C%28R9%29\\_Guideline\\_MinorRevision\\_2024\\_2024\\_Approved.pdf](https://database.ich.org/sites/default/files/ICH_Q3C%28R9%29_Guideline_MinorRevision_2024_2024_Approved.pdf) and said guidelines, methylene chloride/ dichloromethane is classified as Class 2 solvent with permitted daily exposure of 6mg/day (600ppm).

That same clarification was being requested by Ms Getz Pharma Karachi regarding the use of methylene chloride for coating of tablet, and as reference they had submitted approvals of TGA and MHRA wherein methylene chloride is part of approved formulation as excipient of Co-amoxiclav Tablets. They had also referred decision of Registration Board in its 331<sup>st</sup> meeting held on 31<sup>st</sup> October to 2<sup>nd</sup> November 2023 wherein the Board approved registration of fortecin tablets range containing amoxicillin sodium and clavulanic acid in the name of M/s The Searle Company Ltd. by way of Contract Manufacturing at M/s CSH Pharmaceuticals (Pvt) Ltd. Lahore wherein methylene chloride was being used as solvent for final coating based on approval of Therapeutic Goods Administration(TGA) Australia. The Board further imposed a condition that test for residual solvents will be integral part of finished product specifications and there will be no residue of methylene chloride in the finished pharmaceutical product.

That The Medicine and Healthcare Products Regulatory Agency (MHRA) of United Kingdom has also allowed use of methylene chloride as an ingredient in film coating material for amoxicillin sodium and clavulanic acid tablets (<https://mhraproducts4853.blob.core.windows.net/docs/edde90a55360b361538948427048d38e68ab093a>). It is noteworthy that MHRA UK is regulatory member of ICH and TGA Australia is included as observer and both of the regulatory agencies have been declared as the one of the Reference Regulatory Authorities (RRA) by the Registration Board for the purpose of determination the safety and efficacy of drug product formulations applied for registration.

Hence, keeping in view the request of Secretary, Provincial Quality Control Board (PQCB), Primary & Secondary Healthcare Department, Government of the Punjab Lahore, matter is placed before the Registration Board for discussion in light of ICH Q3C guideline (Impurities: Guidelines for Residual Solvents) and practices of Reference Regulatory Authorities regarding use of methylene chloride in pharmaceuticals products especially for coating of tablets.

**Decision:**

**Registration deliberated the matter at length regarding the use of organic solvents in manufacturing of drugs products constituted following committee which will give recommendation in light of International guidelines including ICH Q3C (Impurities: Guidelines for Residual Solvents):**

- i. **Mr. Muneeb Ahmed Cheema, Secretary, Registration Board, DRAP Islamabad.**
- ii. **Directors of Drug Testing Laboratories of Punjab, Sindh, KPK and Baluchistan, AJK and Gilgit Baltistan.**
- iii. **Representative from division of PE&R as coordinator**

**The above committee shall convene a meeting at the earliest and present its recommendations before the forthcoming meeting of Registration Board.**

**Case No. 1 M/s Punjab Medical Services, 1st Floor, 6 - Judicial Colony (Extension) Shahrah Nazria e Pakistan Lahore**

The firm has requested for issuance of renewal of registration through CMS Tracking ID: NM5-W9E-3VD7. Details are as under:

|        | 1.  | Submitted drug product analytical method declares use of Montelukast Dicyclohexylamine reference standard for Assay test, while COA of “Montelukast sodium” working standard has been submitted in section 3.2.P.6. Justification shall be submitted in this regard.           | Montelukast sodium working standard is used for routine. The working standard of montelukast sodium is already reference standard of montelukast Dicyclohexylamine. |
|        | Decision: Approved<br><br>Registration Board directed the firm to use reference/working standard as per USP monograph for batch analysis of commercial batches.   |  |   |

|  | Sr. No  | Shortcomings  |
|  | 1.  | Justification shall be submitted for claiming innovator specifications, since Pharmacopoeial monograph is available for applied formulation in International Pharmacopoeia.   |
|  | 2.  | Results of CDP in three dissolution mediums shall be justified along with literacy reference for the solubility profile of applied formulation since the submitted limits are in contrary to the provision of Pharmacopoeia general monographs for immediate release formulations.                          |
|  | 3.  | Justification shall be submitted for the dissolution limits and parameters adopted for finished drug product analysis.  |
|  | 4.  | Justification shall be submitted that how the “specificity” of the applied drug product analytical method has been inferred without the performance of “Peak Purity Test (e.g., using diode array detector) to establish that analyte chromatographic peak is not attributable to more than one component”. |
|  | 5.  | Submitted chromatograms does not declare the wavelength of UV detector upon which analysis has been performed.  |
| Minutes for 339th meeting of Registration Board (6th August to 8th August, 2024)   |   |   |
| Readable copy of the commercial invoice attested by DRAP I & E office shall be submitted for evidence of import of drug substance. |   |   |

|        | Section                                       | Observations  | Reply of the firm  |
|        | 3.2.S.7                                       | The stability data of API has been submitted at zone IV while the storage condition mentioned on material safety data sheet of agomelatine is 2-8° degree Celsius. Justify with reference of storage. | As per available DMF of drug substance the stability condition of real time is 30 to 65 ° degree Celsius and drug substance is stable at this temperature and MSDS is not authentic and requirement of CTD but the stability study is mandatory document.  |
|        | 3.2.P.3                                       | The innovator brand has chosen dry granulation method while your formulation has been prepared by wet granulation. Please justify.  | The innovator contains Maize starch that contains 5 to 10% moisture content and in formulation sticking and powder flowing issues that leads to weight variation problem observed so we chosen the wet granulation technique, in commercial batches we will make sure to manufacture the product with dry granulation. |

|           | <p><b>Evaluation Remarks:</b></p> <p><b>Section 3.2.S.7:</b> In the material safety data sheet of Glycopyrronium bromide, the storage conditions of API specify to Keep refrigerated &amp; to store under an inert atmosphere. clarify the stability studies conducted at Zone IV and also provide arrangement along with documented evidence that manufacturing facility of your firm possess equipment &amp; instrument in warehouses and dispensing area for confirmation of inert atmosphere for container of API.</p> <p><b>Reply of the firm:</b> In accordance with the current edition of United States Pharmacopeia (USP–NF 2024) the storage condition for Glycopyrronium is at room temperature (evidence attached for your reference). Additionally, stability data of Glycopyrronium bromide performed by the API manufacturer indicates that the API is stable under 30°C (data is enclosed with this letter for your perusal).</p> <p><b>Section 3.2.P.5:</b> Submit evidence of Halogen Moisture analyzer in your Laboratory to perform test for measuring moisture content.</p> <p><b>Reply of the firm:</b> We have performed moisture content test by using Karl fisher equipment that is used to determine moisture content in FP or API. It is our in-house test to verify the control of drug product or substance from moisture level.</p> <p><b>Section 3.2.P.7:</b> Provide details of inhaler device used for your drug product (Source of inhaler, its construction material and other details including COA to confirm the deliver dose flow rate)</p> <p><b>Reply of the firm:</b> One BDD07 DPI device is packed in a PE bag, and 500 units are packed in one carton. Storage condition: Sealed and stored in a dry place. Expire date: 36 months.</p> |              |

| <p><b>Evaluation Remarks:</b></p> <p>The case was deferred in 336th meeting of Registration Board for submission of reply to the following shortcomings, for which the response has been submitted as follows:</p> |  |   |
| Sr.<br>N<br>o.   | Observations / Shortcomings  | Response of the Firm  |
| i.   | Label claim needs to be corrected as per Innovator / Reference Product.  | Firm have submitted revised label claim. Fee for revision of label claim has not been submitted.  |
| ii.  | 2.3.P.3.1 Please provide GMP Certificate of FPP Manufacturer (not older than 03 Years).  | Submitted   |
| iii.   | 3.2.P.2.2.1 (c) Comparative Dissolution Study Results have not been submitted, rather only protocol has been enclosed in this section. Please clarify.   | Submitted   |
| iv.  | As mentioned in 3.2. P. 5.6 Justification of Specifications as well as claimed USP Monograph recommends Dissolution Analysis to be performed on Acid Stage as well as Buffer Stage, whereas 3.2. P.5.4 Batch Analysis and 3.2.P.8 Stability Study Data Results show that Dissolution Test have been performed on single stage. Please justify. | Firm have submitted that they have used USP Test 1 for Dissolution, wherein the dissolution is performed at both acid and Buffer stage, but calculation is done at buffer stage only. |
| v.   | The submitted Audit Trails Reports are for Esomeprazole 20mg Capsules. Please justify.   | The firm have again submitted Audit Trails Reports for Esomeprazole 20mg Capsules.  |

**Previous Decision:** Registration Board referred the case to Expert Working Group on Veterinary Drugs in M-320 for comments regarding immunological relevance and need of applied strains in Pakistan.

**Recommendation of Sub-committee:** After deliberation, the Sub-committee on Veterinary Drugs decided that Multicomponent composition is relevant and vaccine is required to control related poultry diseases found in Pakistan.

**Product is Recommended.**

**Decision: -**

On the basis of recommendations of Sub-committee on Veterinary Drugs, Registration Board after detailed deliberation approved the product subject to compliance to current Import Policy for finished drugs and provision of legalized GMP certificate along with legalized CoPP.

|             | <b>Previous Decision:</b> Registration Board referred the case to Expert Working Group on Veterinary Drugs in M-320 for comments regarding immunological relevance and need of applied strains in Pakistan. |  |  |

**Recommendation of Sub-committee:**

After deliberation, the Sub-committee on Veterinary Drugs decided that Infectious bronchitis virus (IBV) is avian coronavirus and is ubiquitous in most parts of the world where poultry are reared. It spreads very rapidly in non-protected birds and exists in the form of many different antigenic or genotypic types, commonly referred to as variants. Antibodies to several European IBV variants have been demonstrated in Pakistan; **Vaccine could be useful for control of IBV in Pakistan. Product is Recommended.**

**Decision: -**

On the basis of recommendations of Sub-committee on Veterinary Drugs, Registration Board after detailed deliberation approved the product subject to compliance to current Import Policy for finished drugs and provision of legalized GMP certificate along with legalized CoPP.

**Previous Decision:** Registration Board referred the case to Expert Working Group on Veterinary Drugs in M-320 for comments regarding immunological relevance and need of applied strains in Pakistan.

**Recommendation of Sub-committee:**

After deliberation, the Sub-committee on Veterinary Drugs decided that IBV and ND pose major economic threat worldwide, especially due to reduced egg quality and quantity in layer chickens and predisposition to bacterial infections in broilers. IBV initially targets the epithelium of the respiratory tract, but depending on the viral strain it can also infect other organs, mostly the reproductive tract and the kidneys. New IBV variants, resulting in different genotypes, serotypes and pathotypes, are continuously reported; similarly, ND is evolving to bring up new genotypes, now Genotype VII prevails much in the country. Evolving viruses therefore need similarly approach for their control; **product is therefore Recommended.**

**Decision: -**

On the basis of recommendations of Sub-committee on Veterinary Drugs, Registration Board after detailed deliberation approved the product subject to compliance to current Import Policy for finished drugs and provision of legalized GMP certificate along with legalized CoPP.

**Previous Decision:** Registration Board referred the case to Expert Working Group on Veterinary Drugs in M-320 for comments regarding immunological relevance and need of applied strains in Pakistan.

**Recommendation of Sub-committee:**

After deliberation, the Sub-committee on Veterinary Drugs decided that H9 is low-path Avian influenza (AI); In Pakistan vaccination is opted for the control of AI and ND. **Vaccine is a dual virus vaccine and is Recommended.**

**Decision: -**

On the basis of recommendations of Sub-committee on Veterinary Drugs, Registration Board after detailed deliberation approved the product subject to compliance to current Import Policy for finished drugs and provision of legalized GMP certificate along with legalized CoPP.

**Decision(M-336):** Registration Board, after detailed deliberation, referred the product to Ministry of National Food Security & Research, Islamabad for comments regarding the need of vaccine, prevalence of disease and immunological relevance of the strain in Pakistan.

Moreover, the Board advised BE&R Division to ask the applicant to submit following data;

- Notrised COPP indicating free sale status, details of manufacturer and MA Holder.
- Submission of specifications, analytical procedures and COAs as per official pharmacopoeia.
- Detail about pack size of the applied product and stability data of that pack size at recommended time intervals.

**Recommendation of Sub-committee:**

After deliberation, the Sub-committee on Veterinary Drugs decided that It is a live attenuated virus vaccine for avian Infectious Bronchitis developed from a field strain belongs to the unique IBV Genotype variant 2. It provides early protection against variant 2 field viruses found in Europe, the Middle East, Asia, Gulf States and the Africa. **Product is Recommended.**

**Decision: -**

On the basis of recommendations of Sub-committee on Veterinary Drugs, Registration Board after detailed deliberation approved the product subject to compliance to current Import Policy for finished drugs and provision of legalized GMP certificate along with legalized CoPP.

|   | Description                                      | Brucellosis in cattle, water buffalo, and bison is caused almost exclusively by <i>Brucella abortus/ melitensis</i> . It is occasionally isolated from seropositive cows but does not appear to cause clinical signs and is not transmitted between cows. Infection spreads rapidly and causes many abortions in a herd of unvaccinated cattle. In a herd in which disease is endemic, an infected cow typically aborts only once after exposure. Subsequent gestations and lactations appear normal; however, organisms can still be shed in the placenta, amniotic fluid, and milk.<br><br>Live attenuated <i>Brucella melitensis</i> strain Rev.1 (Rev.1 vaccine) is th |                   |                              |                        |             |                          |             |   |              |   |             |                     |               |

|   |   |
|---|---|
|   | most effective vaccine against caprine and ovine brucellosis. Although these two vaccines provide good immunity for animals against brucellosis, the expense of persistent serological responses is one of the main problems of both vaccines.                                    |

|  | The status in reference regulatory authorities                                   | Oncaspar Injection 3,750 IU / 5ml vial of M/s Sigma Tau (USFDA approved).  |
|  | For generic drugs (me-too status)  | Pegaspargase (Peg-L-Asparaginase of LDS (Reg#105067)   |
|  | Module-II (Quality Overall Summary)  | Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance. |
|  | Name, address of drug substance manufacturer                                     | DMF Holder Address:<br>M/s Chanzhou Qianhong Bio-Pharma Co, Ltd., No.192, Huanghe West Road, Xinbei District, Changzhou, Jiangsu, China.<br>Name and Address of the manufacturer:<br>M/s Chanzhou Qianhong Bio-Pharma Co, Ltd., No.192, Huanghe West Road, Xinbei District, Changzhou, Jiangsu, China.   |
|  | Module-III Drug Substance:   | Firm has submitted detailed drug substance data for both sources related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.                     |
|  | Stability Studies of Drug Substance (Conditions & duration of Stability studies) | Gennova Biopharmaceuticals limited do not intend to store the API manufactured. It is immediately transfer for fill finish activities. Hence formal stability study for Pegaspargase Bulk is not intended as there is no change in the composition of Bulk and Finished product. Its only containerization process.<br>Hence, we have carried out hold time study for bulk and finished product stability study is reflective for API stability as well. |

|  |   |
|--|---|
| Module-III Drug Product:                                       | Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability. |
| Pharmaceutical Equivalence and Comparative Dissolution Profile | Firm has submitted data of Pharmaceutical Equivalence: Hamsyl 3750 IU /5ml Injection and reference product Oncaspar by Sigma Tau Corporation, USA.  |
| Analytical method validation / verification of product         | The firm has submitted relevant data including analytical method validation for the drug product including the impurities.  |
| Container closure system of the drug product                   | Pegaspargase Injection is filled in USP Type I Glass vial. One such labelled vial is placed in Plastic Tray and which is packed in Monocarton along with leaflet.<br>Primary packaging materials conform to specifications.   |

|   |  |

|---|---|---|
| <p>Remarks of Evaluator:</p> <p>The submitted original CoPP is not legalized however, the firm has submitted undertaking that we will submit legalized original copy of CoPP after attestation. Meanwhile, we request you to please include our product in DRB meeting.</p> |   |   |
| <b>Evaluation by BE&amp;R:</b>  |   |   |
| Sr.No.  | Decision of 324 <sup>th</sup> meeting   | Response by the firm  |
| 138.  | Submission of Phase I, II, III clinical study data for the proposed indication since already submitted study is a pharmacokinetic comparison of applied product with reference product. | <p>Hamsyl is a pegylated version of native- asparaginase. Hamsyl was approved as an 'Orphan drug' in India in the second line of treatment of relapsed Acute Lymphoblastic Leukemia (ALL). This approval was based on a bioequivalency study (PK) against the reference product (Oncaspar) in patients with ALL in India. The serum asparaginase activity (&gt; 100 IU/L) has been considered as a surrogate marker for efficacy<sup>1</sup> and has been used for the approval of asparaginase formulations worldwide. For instance, <i>Erwinia asparaginase</i> US-FDA approval was based on the nadir serum asparaginase activity &gt;100 IU/L.</p> <p>Hamsyl was found to be 'Bioequivalent' to Oncaspar. Importantly, both drugs maintained a</p>  |

|  |   |   |  |
|--|---|---|--|
|  |   | <p>nadir serum L-asparaginase activity&gt; 100 IU/L. The secondary endpoints of the study included comparison of the L• asparaginase antibodies response profile and changes in L-asparagine and glutamine amino acids levels. No statistically significant differences were observed in the secondary endpoints. Based on these results, Hamsyl was approved and Phase III study was waived off.</p> <p>Hamsyl has been available in India for therapeutic use since 2014. Various independent investigators have published their experience of treatment with Hamsyl as retrospective studies with no new significant concerns.</p> |  |
| 2.   | Details of pharmaceutical comparison with reference product Oncaspar Injection 3750 IU / 5ml. | The firm has submitted comparability evaluation report of Oncaspar (ON3066X2) and Hamsyl injection (3750 IU/vial) for the identified critical quality attributes.   |  |
| 3.   | Legalization of CoPP  | <p><b>CoPP:</b> Firm has submitted original Legalized CoPP certificate<br/>(CoPP/CERT/PD/1108776/2022/11/41643/204858) dated 02-07-2015 issued by Food &amp; Drug Administration, M.S. Bandra-Kurla Complex, Bandra (E), Mumbai – 400 051, Maharashtra, India.</p> <p>The applied product is available for free sale in the market of exporting country. The facilities and operations conform to WHO-GMP.</p> <p><u>The CoPP is valid till 09-07-2025.</u></p>   |  |
| <p><b>Decision: Registration Board decided to refer the case to Pharmacy Services Division for opinion on firm's justification for exemption of Phase III clinical study data.</b></p> |   |   |  |

The subject matter was placed before Clinical Studies Committee (CSC) in its 50<sup>th</sup> meeting held on 11<sup>th</sup> July 2024. The Committee decided the case as follows:

*The CSC after detailed deliberation and discussion advised to forward following decision to the BE&R Division:*

- i. *The CSC notified and work under the Bio-Study Rules, 2017 for Clinical Trial Oversight in the country and instant application is not for the conduct of any clinical trial / study hence its not the mandate of CSC.*
- ii. *However, the Committee is of the view that Pharmacokinetic study is one of the parts of the Phases of the Clinical Trials and can't substitute Phase-I, II and III studies, as already mentioned in the Registration Board. Moreover, Registration Board may decide the application as per merit of the case.*

**Decision:**

- Registration board after detailed deliberation decided on the recommendation of pharmacy services division deferred the case and give the final opportunity to submit the complete pharmacokinetic studies as it is the parts of the phases of the clinical studies.

**CASE NO .139 APPROVAL OF DILUENT FOR ALREADY REGISTERED BIOLOGICAL PRODUCT “TEYLOVAC VACCINE” I.E., INTEND TO IMPORT FROM TURKEY BY M/S HUZAIFA INTERNATIONAL, SARGODHA.**

M/s. **Huzaifa International, commercial area aziz bhatti town, Sargodha** submitted the request of for registration of subject product alongwith solvent as mentioned below: -

| <b>TEYLOVAC Vaccine</b>  |  |
|--|--|
| Live attenuated Freeze dried Theileria Annulata cells based                  |  |
| vaccine with diluent   |  |
| Each dose of vaccine contains Theileria annulata..... $1 \times 10^7$ cells; |  |
|  |  |

| <b>Composition of Diluent for Teylovac vaccine;</b> |                |
|---|----------------|
| Each 10 ml diluent contains will be;                |                |
|   |                |
| NaCl  | 115 mg         |
| KCl   | 1.92 mg        |
| Na <sub>2</sub> HPO <sub>4</sub> .2H <sub>2</sub> O | 16.54 mg       |
| KH <sub>2</sub> PO <sub>4</sub>                     | 9.23 mg        |
| Phenol red  | 8.46 mg        |
| Deionized Water                                     | q.s upto 10 ml |

manufactured by; **M/S Vetel Animal Health Products S.A., Address: Organize Sanayi Bolgesi, Petrol Mah.14 Cad. No.1/1, Adiyaman, Turkey.**

**Case History:**

The above product was discussed in M-307<sup>th</sup> of RB with solvent and Registration Board referred the case to Expert Working Group (EWG) on Veterinary Drugs. Then it was placed in M-313<sup>rd</sup> of RB with recommendation of EWG and approved for grant of registration. The registration letter was issued on request of firm after codal formalities on 20<sup>th</sup> May, 2024, without solvent because its composition was not presented on Free Sale certificate of country of origin (that doesn't contain composition of solvent) as per following details of the product: -

| <i>Regn. No.</i> | <i>Name of Drug and Composition</i> | <i>Packing</i> | <i>MRP</i> | <i>Approved Shelf Life</i> |
|------------------|-------------------------------------|----------------|------------|----------------------------|
|------------------|-------------------------------------|----------------|------------|----------------------------|

|        |  |                             |                  |  |
|--------|--|-----------------------------|------------------|--|
| 120502 | TEYLOVAC Vaccine<br>Theileria Annulata vaccine.<br>Each dose vaccine contains: -<br>Theileria annulata.....1x10 <sup>7</sup><br>cells. | 4 doses<br>vaccine<br>vial. | Decontrolle<br>d | 60-months.<br>(-196°C) in liquid<br>nitrogen tank. |
|--------|--|-----------------------------|------------------|--|

**(As per Innovator's Specs.)**

Now, the firm has requested to issue the approval of registration of diluent of 10ml as combo pack and submitted following documents: -

1. Application on the form-5A;
2. Free Sale certificate presenting the composition of solvent;
3. Challan Slip of 15000/-
4. Scanned copy of Agency agreement;
5. Undertaking.

#### **Decision**

**Registration Board after detailed deliberation approved the diluent as per free sale certificate and issuance of letter in conjunction with registration certificate of TEYLOVAC Vaccine Reg. no. 120502.**

#### **CASES OF DD-III (Ms. HALEEMA SHARIF)**

#### **Imported Human Biologicals from Non-Reference Countries:**

| Module-V Clinical   | Efficacy and Safety of Insulin Glargine Injection in the Treatment of Type 2 Diabetes Mellitus by Multi-centre, randomised, Open, Parallel and Lantus referenced Phase III Clinical Study with following conclusion:  |

### **Conclusion**

The main efficacy indicator HbA1c, secondary efficacy indicator FPG and 2hr-GLU changes

relative to baseline of Insulin Glargine Injection group and the Lantus □ group, all had no

significant difference. The incidence of hypoglycemia of the two groups were also similar,

clearly demonstrated that the Insulin Glargine Injection developed by Tonghua Dongbao

Pharmaceutical Co., Ltd was equivalent in terms of safety and efficacy of the marketed innovator

Lantus□.

| Stability Studies of Drug Substance<br>(Conditions & duration of Stability studies) | <p>The stability studies of three commercial batches of insulin Glargine GL201512007, GL201512008 and GL201512009 for 6 months at (2 - 8°C) under accelerated conditions and for 36 months at below -15°C under long term conditions have been completed.</p> <p>(Insulin Glargine is sensitive to temperature. The storage temperature of the drug substance is usually at below -15°C. So, the accelerated test is conducted at between 2°C to 8°C)</p> |
| Module-III Drug Product:  | Firm has submitted details drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process, Characterization, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.                                 |
| Analytical method validation of Product   | Firm has submitted analytical method validation report of insulin injection Assay.  |
| Container closure system of the drug product  | The insulin glargine injection, will be filled into a cartridge made of neutral borosilicate glass tubing, with a brominated butyl rubber plunger and an aluminum plastic cap.  |
| Stability study data of drug product, shelf life and storage conditions             | Firm has submitted stability study data of 3 batches. The real time stability study data is conducted at 05°C ± 3°C for 36 months.  |
| Module-IV Non-Clinical  | <p>Firm has submitted following:</p> <p>Single dose toxicity studies</p> <p>Repeat dose toxicity studies</p>  |
| Module-V Clinical   | Firm has submitted Multicenter, randomisedized, open, parallel and positive drug controlled safety and efficacy studies in 578 subjects with following findings:  |

Insulin Glargine Injection group and the Lantus® group, the baseline at selection, body weight at 24<sup>th</sup> week, BMI, systolic blood pressure, diastolic blood pressure are basically similar; the two groups had no significant statistical difference after 24 weeks treatment.

The heart rate of Insulin Glargine Injection group and the Lantus® group at baseline selection and 24 weeks of treatment are similar; after 24 weeks of treatment, the average heart rate of the Insulin Glargine Injection group was 77.01 (8.62) beats/minute which decreased 0.69(9.29) beats/minute comparing to the baseline, the average heart rate of Lantus® group was 78.60 (9.21) beats/minute and increased 1.25(10.1) beats/minute comparing to the baseline, the heart rates of the two groups were in the normal range with good index, although there was a statistical significance between the two groups (P=0.034) but no clinical significance.

Remarks of Evaluator

- Clarification for difference in address of importer in Form 5F, DSL & Sole agency agreement is required.

**Decision: Keeping in view the legalized CoPP indicating product availability in the country of origin. Registration Board approved the product subject to compliance to the current Import Policy for finished drugs and the clarification as per the remarks of evaluator.**

| Container closure system of the drug product                            | 2 ml USP Type – 1 Flint ampoule   |
| Stability study data of drug product, shelf life and storage conditions | Firm has submitted stability study data of 3 batches. The accelerated stability study data is conducted at $25^{\circ}\text{C} \pm 2^{\circ}\text{C}$ , RH $60 \pm 5\%$ for 6 months. The real time stability study data is conducted at $5 \pm 3^{\circ}\text{C}$ the real time stability study data as per ICH guidelines.  |
| Module-IV Non-Clinical  | Study Report for Toxicology (4.2.3) is presented with title “Determination of potency of the test item Tetanus Antitoxin-1500 IU after administration subcutaneously in Mice.”  |
| Module-V Clinical   | Under 5.3 Clinical Study Report section, Report of Post-Marketing Experience (5.3.6) is presented with title “Safety of Equine Tetanus Antitoxin For Prophylactic Use In Ethiopia: A Multicenter Retrospective Study (TAT-Safe)”.   |
|   | <b>Conclusion:</b>  |
|   | VINS Bioproducts Limited’s equine tetanus antitoxin (TAT) is safe and well tolerated in adult patients with tetanus-prone wounds for prophylactic use in Ethiopia.  |
| Remarks of Evaluator  | <ul style="list-style-type: none"> <li>Evidence of ICH/WHO/EMA guideline that single dose and repeat dose toxicity is not required for this product.</li> <li>Finished product specifications in the light of decision of 267th Registration Board meeting.</li> </ul>  |

**Decision: Keeping in view the legalized CoPP indicating product availability in the country of origin. Registration Board approved the product subject to compliance to the current Import Policy for finished drugs and the clarification as per the remarks of evaluator.**

**Human Biological Local Manufacture:**

|  |   |
|--|---|
| GMP Status   | GMP Inspection by FID dated 17.01.2023, concluded that firm is operating at good level of current GMP |
| Undertakings that the applied product is exclusively for export purpose and the proposed names/ label/ colour do not resemble with already registered brands in importing country. | Provided  |

Detail of the products is given below:

| Sr. No. | Name of Drug(s) with composition   | RRA Status  | Dy. No. /Fee with date  |
|---------|--|---|---|
| I       | II   | III   | IV  |
| 1.      | <b>ADALIMAB (adalimumab) solution for injection 40mg/0.8mL</b><br>Each vial contains:<br>Adalimumab ..... 40mg | Humira Solution for Injection<br>40mg/0.8mL<br><br>(M/s AbbVie Inc., USA.<br>USFDA Approved). | Dy No. 7894 R&I<br><br>20March 2020<br><br>Fee challan of Rupee<br>75000/-(Slip No.,<br>1621789964) is submitted<br>by firm |

The application is evaluated and the following deficiencies are observed:

- i. Evidence of section approval of required manufacturing facility is required.
- ii. Either valid GMP certificate of Source of API or any web link of issuing authority to verify the GMP status of source of API is required.
- iii. Either CoPP of finished product manufactured from applied bulk in country of origin or CoPP copy if it is confirmed from official website of issuing authority.

**Decision: Registration Board Deferred the case for provision of the following:**

- i. Evidence of section approval of required manufacturing facility.
- ii. Either valid GMP certificate of Source of API or any web link of issuing authority to verify the GMP status of source of API.
- iii. Either CoPP of finished product manufactured from applied bulk in country of origin or CoPP copy if it is confirmed from official website of issuing authority.

| Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit | Each ml contains:<br>Heparin Sodium.....1000 IU  |
| Dosage form of applied drug   | Liquid Injection   |
| Pharmacotherapeutic Group of (API)  | Heparin Sodium injection comes under the category of anticoagulant which is indicated for both the prevention and treatment of thrombotic events such as deep vein thrombosis (DVT) and pulmonary embolism (PE) as well as atrial fibrillation (AF). Heparin is also used to prevent excess coagulation during procedures such as cardiac surgery, extracorporeal circulation, or dialysis, including continuous renal replacement therapy.                              |
| Reference to Finished product specifications  | BP Specifications  |
| Proposed Pack size  | 1's x 5mL vial   |
| Proposed unit price   | Retail price as per SRO  |
| Shelf Life  | 24 months  |
| Storage Conditions  | Store below 30 °C  |
| The status in reference regulatory authorities                                      | Heparin Sodium Solution for injection 1000IU/ml is Registered in the country of the origin Spain.<br>Drug Name: HEPARIN SODIUM, API: HEPARIN SODIUM, Strength: 10,000 IU/ml. Dosage Form: INJECTABLE; INJECTION, Company Name: FRESENIUS KABI USAHeparin Injection 5000 IU/5ml of M/s Leo, Heparin Sodium Injection, USFDA approved.   |
| For generic drugs (me-too status)   | Heparin Injection 5000 IU/5ml of M/s Leo/Zam Zam Pharma  |
| Module-II (Quality Overall Summary)   | The applicant has submitted the Quality Overall Summary in accordance with WHO. The information has been summarized related to nomenclature, structure, general properties, Manufacturers, description of manufacturing process and controls, Characterization, impurities, specifications analytical procedures, batch analysis and justification of specifications, reference standard, container closure system stability studies of drug substance and drug product. |
| Name, address of drug substance manufacturer  | <b>M/s Gland Chemicals Pvt Limited.</b><br>Manufacturing Address: Fact.No,30A, II <sup>nd</sup> Phase, KIADB Industrial  |

|  |  |   |
|--|--|---|
|  |  | Area, Malur-563160, Kolar Dist, Karnataka INDIA   |
|  | Module-III Drug Substance:   | The applicant has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specifications, reference standard, container closure system and stability studies of drug substance. |
|  | Stability Studies of Drug Substance (Conditions & duration of Stability studies) | The applicant has submitted stability data of 3 batches at long term conditions at $25^{\circ}\text{C} \pm 2^{\circ}\text{C}$ / 60% RH $\pm 5\%$ for 12 months. The accelerated stability data is conducted at $40^{\circ}\text{C} \pm 2^{\circ}\text{C}$ / 75% RH $\pm 5\%$ for 06 months.   |
|  | Module-III Drug Product:   | The applicant has submitted the data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability. |
|  | Analytical method validation/verification of product                             | The applicant has submitted the details of analytical method validation.  |
|  | Container closure system of the drug product                                     | Standard pack size of Heparin Sodium is 500 MU. Heparin Sodium is packed in the Low-density polythene bag. The sealing is done thermally by a machine. The sealed bag is kept in HDPE drums   |
|  | Stability study data of drug product, shelf life and storage conditions          | The applicant has submitted study data of 3 batches of heparin injection at accelerated and real time conditions. The real time stability data is conducted at $30^{\circ}\text{C} \pm 2^{\circ}\text{C}$ / 65% RH $\pm 5\%$ for 24 months and accelerated stability data is conducted at $40^{\circ}\text{C} \pm 2^{\circ}\text{C}$ / 75% RH $\pm 5\%$ for 06 months   |
|  | Remarks  | Non- clinical and Clinical trial data are not submitted by the firm. The same is not required as Registration Board in its 271st meeting considered that Heparin Sodium Injection is non-rDNA pharmacopoeial product hence, revised its decision of 260th meeting and granted the approvals on the basis of valid legalized CoPP & availability in country of origin.   |
| Decision (M-324): Keeping in view valid Free Sale Certificate indicating product availability in country of origin; Registration Board approved the product subject to compliance of current Import Policy for finished drugs. The firm shall submit valid legalized GMP Certificate before issuance of Registration Letter.   |  |   |
| <p>Product Specific Inspection for grant of Registration as per letter No. F.No.115/2016-AD (BD)(M-334) dated 9th May 2024 has been carried out by following panel:</p> <ol style="list-style-type: none"> <li>Dr. Sayed Zia Husnain (Additional Director, CALSD), DRAP, Islamabad.</li> <li>Ms. Haleema Sharif (Deputy Director, BE&amp;R), DRAP, Islamabad.</li> </ol> <p>The conclusion of the inspection report is as under:</p> |  |   |

**GENERAL REMARKS:** Based on virtual inspection conducted, documents reviewed, virtual interview of the management and technical person conducted, panel of inspectors is of the view to **not recommend** the facility of M/s Stanex Drugs & Chemicals PVT. LTD Address: 112, IDA, Phase-3, Cherlapally.500051. TS, Cherlapally Village, Kapra Mandal, Medchal- Malkajgiri District, Telangana State, India for product specific Inspection, due to following reason.

*The building is not completely dedicated and self-contained regarding the manufacturing of biological product as required in section 5.2 of schedule B of Drugs (Licensing, Registration & advertising) rules 1976 as the only one production line exists in the factory and being used for production of biological and non-biological products. Facility also share common ware house for storage of Biological (Heparin) and non-biological Pharmaceutical raw materials.*

*On other hand firm claimed that in India Biological product like Heparin and Non-Biological products can be manufactured in same non dedicated facility and their products are also being exported to various countries. Hence stance of the firm is also submitted for perusal of Registration Board as per policy and respective provisions of law.*

**Decision: The registration board on the recommendations of panel as per its inspection report decided to reject the application.**

|--|--|---|
|  | Module-II (Quality Overall Summary)          | <p>Firm has submitted QOS as per ICH guidelines. Firm has summarized information related to introduction, nomenclature, structure, general properties, solubility, physical form, Manufacture: manufacturers, description of manufacturing process and controls, controls of materials, control of critical steps and intermediates, process validation and /or evaluation, manufacturing process development, Elucidation of structure and other characteristics, impurities, specifications, Analytical procedures and its validation, batch analysis, justification of specification , reference standard or materials, container closure system and stability studies of drug substance.</p> <p>The firm has summarized information of drug product including its Description and composition of the drug product, pharmaceutical development, manufacture, batch formula, description of manufacturing process and process control, control of critical steps and intermediates, process evaluation and/or evaluation, control of excipients, control of drug product, specifications, analytical procedures and its validation, batch analysis, characterization of impurities and justification of specification, reference standard, container closure system and stability studies of drug product. The firm has also submitted the non-clinical and clinical overviews and summaries.</p> |
|  | Name, address of drug substance manufacturer | M/s. Harbin Pacific Biopharmaceutical Co., Ltd No.77, Siping Road, Limin Economic and Technological Development Zone, Heilongjiang Province, China.   |
|  | Module-III Drug Substance:                   | <p>Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and process controls. control of materials, control of critical steps and intermediates, Process Validation and/or evaluation, manufacturing process development, characterization, impurities and Elucidation of structure and other characteristics, control of Drug Substance: specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.</p>  |

|  |  |   |
|--|--|---|
|  | Stability Studies of Drug Substance (Conditions & duration of Stability studies) | Bulk solution of human immunoglobulin for intravenous injection is a transitional phase, so the stability studies are inapplicable.   |
|  | Module-III Drug Product:   | Firm has submitted data of drug product including its description, & composition of the drug product, pharmaceutical development, manufacturer, batch formula, description of manufacturing process and process control, control of critical steps and intermediates, process validation and/or evaluation, control of excipients, control of drug product: specifications, analytical procedures, validation of analytical procedures, batch analysis, characterization of impurities, justification of specifications, reference standard or materials, container closure system and stability. |
|  | Analytical method validation/verification of product                             | <p>Firm has submitted analytical methods as per in House Specs.</p> <p>Validation of analytical procedures, process validation, batch analysis and stability studies have been performed.</p>   |
|  | Container closure system of the drug product                                     | Injection vial made of molecule middle borosilicate glass, halogenated butyl rubber stopper for injection (brominated) and aluminum-plastic combination cap.  |
|  | Stability study data of drug product, shelf life and storage conditions          | <p>The studies are performed according to the current ICH stability guidelines. The studies cover long term storage conditions (2°C - 8°C) for 36 months and accelerated storage conditions (25°C±2°C) 60%±5% RH for 6 months.</p> <p>Based on the results from the long term and accelerated stability studies, the proposed shelf life of 36 months at 2°C ± 8°C</p>  |
|  | Module-IV  | Not submitted   |
|  | Module-V   | Not submitted   |

|   |         |  |
|---|---------|--|
|   | Remarks | <p>Firm has not provided stability studies of drug substance with this justification that drug substance stability data is not required in china.</p> <p>Firm has not provided safety and efficacy data with this justification that brands like Gamarrass, HL Globin and our product are being used in china from decades and their safety and efficacy is established for many decades. So Module IV and V are exempted.</p> |
| <p><b>Decision in 334<sup>th</sup> RB meeting:</b></p> <p>Registration Board deferred the product for the following:</p> <p>For submission of Stability studies data of drug substance/evidence of ICH guideline indicating no requirement of stability data for this substance.</p> <p>For submission of safety and efficacy studies of applied formulation/ evidence of ICH guideline indicating no requirement of safety and efficacy data for applied formulation.</p>  |         |  |
| <p><b>Response of firm:</b></p> <p>1. Module IV and Module V have not been submitted.</p> <p>Answer: As per “Form 5-F” and “Guidance document for submission of application on Form 5F(CTD) for registration of Pharmaceutical Drug for Human Use” Module IV and Module V are optional., please find attached the Page No.39 of same Guidance. As per these guidance:</p> <p>Module 4: (Non-clinical/ Safety)</p> <p>For all drug products which are approved in the same combination, strength and dosage form by reference regulatory authorities adapted by Registration Board, the submission of documents in module 4 is optional.</p> <p>Module 5: (Clinical/ efficacy)</p> <p>For all drug products which are approved in the same combination, strength and dosage form by reference regulatory authorities adapted by Registration Board, the submission of documents in module 5 is optional”.</p> <p>Competitors of our product with same combination, strength and dosage form are already registered in all reference countries and with DRAP in many brands.</p> <p>Therefore, on the basis of above explanations you are requested to include our Product Globin Well I.V. Inj. In upcoming Registration Board Meeting for the approval.</p> |         |  |
| <p><b>Decision in 336<sup>th</sup> RB meeting:</b></p>  |         |  |

Registration Board after detailed deliberations deferred the product for submission of required data as per evaluator remarks.

**Response of firm:**

Firm has submitted following:

- i. Globin well is registered and available in country of origin.
- ii. Registered in India from 01-07-2011 to 30-06-2014 as per copy of Registration certificate submitted by the firm.

**Decision: The Registration Board deliberated that the matter in detail and decided to ask the firm to submit the following:**

- **Safety and Efficacy data of the product.**
- OR**
- **The guidelines from country of origin on the basis of which the product was approved.**
- **Periodic Safety Update Report (PSUR) of last 5 years from countries where product has valid market authorization**

**Case No 158: Exemption of Inspection of manufacturing facility Abroad.**

Firm “M/s. Bristol Mayer Biotech Pakistan” for exemption of inspection of manufacturer abroad (India) for product approved in 334<sup>th</sup> RB meeting as the subject manufacturer has GMP certificate issued by Poland and a Weblink that subject products are approved by Authority of Malaysia (PIC/s Participating Authority). Firm has also submitted fee of Rupee 7500/- for each product (slip No. 23404137324, 82866414, 45796706, 97377701030).

In the above context, it is submitted that following products of M/s. Bristol Mayer Biotech Pakistan for the registration of following Human biological was received in BE&R division as per following details:

| Sr. No. | Brand Name | & Name of Manufacturer | Decision of Board (M-334) |
|---------|------------|------------------------|---------------------------|
|---------|------------|------------------------|---------------------------|

|    |                     |   |   |
|----|---------------------|---|---|
| 1. | Endogen HP 75 IU    | M/s. Sanzyme (P) Limited Plot No.8, Sy.No. 542, Koltur (V), Shamirpet (M), MedchalMalkajgiri (D) - 500101, Telangana State, India | Keeping in view valid legalized CoPP indicating product availability in country of origin; Registration Board approved the product subject to compliance of current Import Policy for finished drugs. |
| 2. | Endogen HP 150 IU   |   |   |
| 3. | Pubergen HP 1000 IU |   |   |
| 4. | Pubergen HP 2000 IU |   |   |

In the above case, it is submitted that firm has submitted copy of EUDRA GMDP issued to the manufacturer “M/s. Sanzyme (P) Limited” based upon the inspection 28-04-2017 which was valid for the period of three years & "Due to the restrictions caused by COVID-19, the period of validity of GMP and GDP certificates issued by EEA authorities is automatically extended until the end of 2024".

However, from the EUDRA GMP it is also observed that certificate is not issued to firm for **Biological Section** rather it is issued for following **pharmaceutical sections** (as mentioned under heading of manufacturing operations) only:

|  |
|--|
| Human Medicinal Products   |
| <b>1 MANUFACTURING OPERATIONS</b>  |
| <b>1.1 Sterile products</b>  |
| <i>1.1.1 Aseptically prepared (processing operations for the following dosage forms)</i><br>1.1.1.2 Lyophilisates<br><i>1.1.2 Terminally Sterilised (processing operations for the following dosage forms)</i><br>1.1.2.3 Small volume liquids |
| <b>1.6 Quality control testing</b>   |

It is further submitted that firm has also submitted a Weblink:

(<https://quest3plus.bpfk.gov.my/pmo2/index.php>) that subject products are approved by Authority of Malaysia (PIC/s Participating Authority). The database of authority of Malaysia is assessed by clicking on the above mentioned link and by searching with name of product however approval of above products has not been verifiable.

For the purpose of clarification, a letter was issued on 3<sup>rd</sup> July, 2023 & a meeting was also held with the Technical person of the firm on 29.07.2024. The technical person of the firm informed following.

Follicle stimulating hormone by M/s. sanzyme is registered in Malaysia as Sanzyme FSH. In Pakistan it will be marketed by the Brand Name Endogen HP.

- i. Pubergen HP 1000 IU & Pubergen HP 2000 IU is not registered but other strengths like Pubergen 10000IU, 7500IU, 5000IU.
- ii. The representative of the firm further informed that facility of M/s. Sanzyme is completely dedicated for production of Biologicals like Gonadotropins & Hormones etc.

**Decision: Registration Board after detailed deliberation decided that Virtual GMP inspection will be conducted as per current import policy of DRAP.**

### **CASES OF DD-IV (Ms. ANUM SAEED)**

| Module-II (Quality Overall Summary)          | Firm has summarized information related to nomenclature, structure, general properties, manufacturers, Characterization, impurities, specifications, and justification of specification. Stability of Drug Substance is not provided rather the manufacturer gave the statement that the bulk produced by the manufacturer is directly put into production of finished product continuously and is not stored. So stability related study is not performed on bulk. |
| Name, address of drug substance manufacturer | M/s Hualan Biological Engineering Chongqing Co., Ltd, No.66, Hefang Road, Fuling Chongqing, China.  |
| Module-III Drug Substance:                   | Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, physical form, manufacturers, impurities, specification, batch analysis and justification of specification.   |
| Stability Studies of Drug Substance          | Stability of Drug Substance is not provided rather the manufacturer gave the statement that the bulk produced by the manufacturer is directly put into production of finished product continuously and is not stored. So stability related study is not performed on bulk.  |

|   |   |
|---|---|
| Module-III Drug Product:  | Firm has submitted data of drug product including its description, composition, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, batch analysis, justification of specifications, container closure system and Stability.   |
| Analytical method / Validation / verification of the product            | The specifications & analytical procedures are submitted along with validation of Analytical Procedures.  |
| Container closure system of the drug product                            | The primary container closure system is neutral borosilicate glass vial and bromobutyl rubber stopper.  |
| Stability study data of drug product, shelf life and storage conditions | Firm has submitted stability study data of 3 batches of FPP at accelerated and real time conditions. The real time stability data is conducted at (6±2°C) for 36 months on 3 batches. Accelerated is conducted at (25°C±2°C/60%±10%RH) for 6 months on 3 batches of FPP.  |
| Module-IV Non-Clinical  | The firm has not submitted the Toxicology, genotoxicity, Carcinogenicity data rather gave the justification that in toxicology study, immunoglobulin is a normal component of human body. In animals, single dose toxicity tests are not appropriate because overdose will cause overloading; repeat dose toxicity tests and embryo lethal toxicity studies do not have any practical significance because of the interference of antibodies. The study does not find that the product has effects on the neonatal immune system. Because there is no immunoglobulin, tumorigenesis and mutagenesis in clinical experience, it is not necessary to study the carcinogenesis and mutagenesis in clinical experience, it is not necessary to study the carcinogenesis of the product, especially the study on heterologous organisms. |
| Module-V Clinical   | The firm has not submitted the clinical data.   |
| Remarks of Evaluator  | COPP was valid till December 2020.<br>Original of notarized LOA is required. Previously copy of LOA was provide with the dossier which was expired on August 2023.<br>Description of manufacturing process of drug substance is not provided under Module 2.<br>The product is available in European pharmacopoeia and USP but the manufacturer has developed the product as per Chinese Pharmacopoeia.<br>Detail of number of plasma donors of human plasma, plasma collection and tests conducted along with specifications followed is required.<br>Protein composition by Zone Electrophoresis is not conducted in method of analysis.<br>B-19 NAT testing in detail required as the product is plasma derived.<br>Virus removal/inactivation procedure is not provided.  |

|   |  |  |
|---|--|--|
|   |  | <p>Summary of product Characteristics is not attached in dossier.</p> <p>IgA residue test is not mentioned in method of analysis.</p> <p>Monograph of standard pharmacopoeia to be followed is required.</p> <p>DSL is not provided.</p> <p>COA not attached.</p> <p>Complete tests are not performed in stability studies as mentioned in method of analysis.</p> <p>Module 5 i.e. Clinical data is not provided.</p> |
| <b>Decision: Registration board decided to defer the application for clarification of all points mentioned in remarks of Evaluator.</b> |  |  |

| Module-II (Quality Overall Summary)  | Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product |
| Name, address of drug substance manufacturer                                     | <b>M/s. Hetero Biopharma Limited</b><br><b>Address: Sy. No. 458 (Part), TSIIC - Formulation SEZ, Polepalle Village, Jadcherla Mandal Mahabubnagar District – 509301, Telangana State, India</b>  |
| Module-III Drug Substance:   | Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.  |
| Stability Studies of Drug Substance (Conditions & duration of Stability studies) | Firm has submitted stability study data of 9 batches (i.e. preclinical, clinical and commercial batches) of FDS at accelerated and real time conditions. The real time stability data is conducted at (-20°C±5°C) for 36 months on preclinical, clinical and commercial batches.<br>Accelerated study is conducted at (5±3°C) for 6 months on same preclinical clinical and commercial batches of FDS  |
| Module-III Drug Product:   | -Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and Stability.     |

|   |   |
|---|---|
| Pharmaceutical Equivalence and Comparative Dissolution Profile          | <p>Summary of Comparative Analysis of our product ADIMAC (Adalimumab) Macter international ltd. against the innovator product HUMIRA (AbbVie Inc.);</p> <ol style="list-style-type: none"> <li>1. Identification by SDS PAGE, CBB Stain</li> <li>2. Purity by Weak Cation Exchange Chromatography</li> <li>3. Protein Content by UV-Method @ 280 nm:</li> <li>4. Determination of High Molecular Weight Impurities by Size Exclusion HPLC</li> </ol>  |
| Analytical method validation/verification of product                    | The specifications & analytical procedures are submitted along with validation of Analytical Procedures   |
| Container closure system of the drug product                            | 3 ml USP type 1 clear glass vials accompanied with 13 mm slit less grey butyl rubber stopper and aluminum flip off seal.  |
| Stability study data of drug product, shelf life and storage conditions | <p>Firm has submitted long term stability study data of 3 batches at <math>5\pm 3^{\circ}\text{C}</math> for 06 months. The accelerated stability study data is conducted at <math>25\pm 2^{\circ}\text{C}</math> &amp; <math>60\pm 5\%\text{RH}</math> for 6 months.</p> <p>Shelf life: The intended shelf life for adimac injection in vial at <math>5^{\circ}\text{C} \pm 3^{\circ}\text{C}</math> is therefore designated to be two (02) years.</p>   |
| Storage Conditions  | Store in a refrigerator ( $2^{\circ}\text{C}$ to $8^{\circ}\text{C}$ ).   |
| Module 4  | <p>Firm has submitted following data:</p> <p><b>i. In-vitro Studies</b></p> <p><b>Primary Pharmacodynamics</b></p> <ol style="list-style-type: none"> <li>1. Fab-mediated activities</li> <li>2. Neutralization of TNF-<math>\alpha</math> by L929 cytotoxic assay</li> <li>3. Inhibition of soluble TNF- <math>\alpha</math> induced IL-8 Secretion in HUVEC</li> <li>4. tmTNF-<math>\alpha</math> binding assay by using CHOK1 cells</li> <li>5. TNF-<math>\alpha</math> binding assay by ELISA</li> <li>6. Fc<math>\gamma</math>R Binding</li> <li>7. CDC (Complement dependent cytotoxicity) assay</li> <li>8. Antibody dependent cell mediated cytotoxicity (ADCC) assay</li> </ol> <p><b>Secondary Pharmacodynamics</b></p> <p><b>Safety Pharmacology</b></p> <p><b>Pharmacodynamic Drug Interaction.</b></p> <p><b>ii. In-vivo Studies</b></p> <ol style="list-style-type: none"> <li>1. Single Dose Toxicity Study of Adalimumab in Wistar Rats Following Intravenous Administration.</li> <li>2. Single Dose Toxicity Study of Adalimumab in Wistar Rats Following Subcutaneous Administration.</li> <li>3. Single Dose Toxicity Study of Adalimumab in Swiss Albino Mice Following Intravenous Administration.</li> <li>4. Single Dose Toxicity Study of Adalimumab in Swiss Albino Mice Following Subcutaneous Administration.</li> <li>5. 28-Day Repeated Dose Toxicity Study of Adalimumab in Wistar Rats with 14 Days Recovery Period Following Weekly Subcutaneous Administration.</li> <li>6. 28-Day Repeated Dose Toxicity Study of Adalimumab in New Zealand White Rabbits with 14 Days Recovery Period Following Weekly Subcutaneous Administration</li> </ol> |

|          |   |
|----------|---|
| Module 5 | <p>Firm has submitted following data:</p> <p>PHASE I: Prospective, Randomized, Multi Center, Comparative, Parallel, single dose; To compare the pharmacokinetic and pharmacodynamic characteristics of Hetero Adalimumab with Reference-Adalimumab (Adalimumab, AbbVie Inc.)</p> <p>PHASE III: A Prospective, Randomized, Multiple-Dose, Multi-Center, Comparative, Parallel group Clinical Study to Evaluate the Efficacy, Safety, Immunogenicity, and Pharmacokinetics of Subcutaneous Injection of Adalimumab (Test Product, Hetero) and Reference Medicinal Product (Reference product, AbbVie) Concomitantly Administered with Methotrexate in Patients with Rheumatoid Arthritis</p> <p>A Phase IV: Multi-Centric Post Marketing Study Evaluating the Safety, Immunogenicity and Efficacy of the Marketed Formulation of Hetero – Adalimumab Study Indication(s): Rheumatoid Arthritis (RA), Juvenile Idiopathic Arthritis (JIA), Axial Spondyloarthritis (AS), Psoriatic Arthritis (PsA), Psoriasis, Paediatric Plaque Psoriasis, Hidradenitis Suppurativa (HS), Crohn's disease, Paediatric Crohn's disease, Ulcerative Colitis and Uveitis</p> |
|----------|---|

**Data as per guidelines of 278th meeting of Registration Board;  
For Bulk Concentrate Import, Local formulation Filling:**

|   |  |
|---|--|
| The firm shall provide legalized GMP certificate of biological drug substance manufacturer abroad (who will provide concentrate / ready to fill bulk of biological drug to Pakistani manufacturers for further processing) as an evidence that the manufacturer is an authorized manufacturer of biological drug in the country of origin.              | <p>GMP Issue Date: June-13-2022</p> <p>GMP Valid Date : June-11-2025</p> <p>Firm has submitted the legalized GMP issued by Drug Control Administration Government Of Telangana India</p> |
| The firms shall provide legalized free sale certificate/CoPP either from country of origin or by any reference regulatory authority as adopted by Registration Board of finished product as evidence that the final product has been manufactured by same concentrate/ready to fill bulk after submission of data to the concerned regulatory authority | Firm has submitted legalized COPP (3049930/TS/2022) & FSC Valid till June-11-2025 issued by Drug Control Administration Government Of Telangana India                                    |
| The firm shall provide the lot release certificate of the finished product manufactured by same bulk concentrate/ ready to fill from country of export (If applicable)  | Not Applicable   |
| The firm shall provide the 6 months accelerated and real time stability studies for drug substance  | Submitted  |
| The firm shall provide the agreement with the source (of bulk concentrate/ready to fill) that if there shall be any critical change in manufacturing process, biological systems used to manufacture, etc. the firm shall inform DRAP immediately along with relevant documents   | Submitted  |

|   |  |
|---|--|
| Regular monitoring through pharmacovigilance reporting system shall be observed through proper pharmacovigilance cell of the manufacturer and report will be forwarded to the National Pharmacovigilance Centre, Division of Pharmacy Services and Biological Division of DRAP. In case of any severe adverse event, immediate mandatory reporting procedure shall be followed. | Firm have submitted undertaking & SOP as detailed in 278th meeting of Registration Board by the local manufacturer   |
| The firm shall inform DRAP if there shall be any adverse event or ADR reporting from the country of manufacture of concentrate/ready to fill bulk and finished product as required vide Rules 30 of Drug (LR&A) Rule.   | Firm has submitted undertakings as detailed in 278th meeting of Registration Board by the local manufacturer.  |
| If any of the conditions is not fulfilled or public health risk reported at any stage, the drug registration shall stand cancelled with immediate effect.   | Firm has submitted undertakings as detailed in 278th meeting of Registration Board by the local manufacturer.  |
| All the provisions as contained in the Drugs Act, 1976 and rules made there under including provisions of Lot Release certification from National Control Laboratory for Biologicals shall be strictly adhered to   | Firm has submitted undertakings as detailed in 278th meeting of Registration Board by the local manufacturer.  |
| Pharmaceutical Equivalence and Comparative Dissolution Profile  | Comparative Analysis study of applied product ADIMAC (Adalimumab) Macter international ltd. against the innovator product HUMIRA (AbbVie Inc.) has been submitted by firm  |
| Analytical method validation/verification of product  | The specifications & analytical procedures are submitted along with validation of Analytical Procedures  |
| Container closure system of the drug product  | 3 ml USP type 1 clear glass vials accompanied with 13 mm slit less grey butyl rubber stopper and aluminum flip off seal.   |
| Documents for the procurement of API with approval from DRAP  | Submitted  |
| Stability study data of drug product, shelf life and storage conditions   | Firm has submitted long term stability study data of 3 batches at $5\pm 3^{\circ}\text{C}$ for 06 months. The accelerated stability study data is conducted at $25\pm 2^{\circ}\text{C}$ & $60\pm 5\% \text{RH}$ for 6 months.<br>Shelf life: The intended shelf life for adimac injection in vial at $5^{\circ}\text{C} \pm 3^{\circ}\text{C}$ is therefore designated to be two years. |
| Module IV   | Submitted, Detail given above  |
| Module V  | Submitted, Detail given above  |

**Bio-similarity studies of the finished product of same source (bulk concentrate or ready to fill) manufactured from country of origin.**

| <b>WHO Biosimilarity Guidelines</b>                       | <b>Data Submitted by M/s SAMI Pharmaceutical (Pvt) Ltd.</b>  |   |  |
|---|--|---|--|
| Quality Comparison<br>Physicochemical<br>Characterization | Regular Human Insulin produced by Bioton S.A. has been compared with and the reference drug, Humulin® R, produced by Eli Lilly and Company |   |  |
|   | <b>Category</b>  | <b>Quality Attributes</b>                     | <b>Analytical methods</b>  |
|   | Primary structure  | Amino acid sequence                           | Peptide mapping  |
|   |  |   | Edman method of the peptide N-terminal sequencing  |
|   | Higher order structure   | Secondary, tertiary and quaternary structures | Far UV Circular Dichroism spectra (far UV CD)<br>Fourier Transformed Infra-Red spectra (FTIR)<br>Near UV Circular Dichroism (near UV CD) |

|                           |  |                              |  |
|---------------------------|--|------------------------------|--|
|                           |  |                              | Nuclear Magnetic Resonance analysis (NMR)  |
|                           | Hydrophobicity   | Hydrophobic variants         | Near UV Circular Dichroism (near UV CD)<br>Nuclear Magnetic Resonance analysis (NMR) |
|                           | Size heterogeneity   | HMW impurities               | Size exclusion chromatography  |
|                           | In-solution particle size homogeneity  | Average size                 | Laser diffraction  |
|                           | <i>In-Vitro</i> Biofunctionality   | Receptor binding assay       | Surface Plasmon Resonance (SPR)  |
|                           |  | Cell-based bioactivity assay | INSR/IGF-1R receptor phosphorylation assay   |
| Biological Activity       | <p>Cell based Bioactivity Assay – Surface Plasmon Resonance (SPR)</p> <p>Receptor binding studies were carried out on IR-A and IR-B insulin receptors with the use of SPR method. First level of biological activity studies was executed by the assessment of tyrosine phosphorylation and dephosphorylation of IR-A and IR-B insulin receptors.</p> <p>The second level of biological activity studies was achieved in three studies on metabolic activity in mouse 3T3-L1 cells: measuring of glycogen formation in adipocytes, measuring of lipolysis rate and pharmacodynamic evaluation of glucose uptake.</p>   |                              |  |
| Immunochemical properties | <p>For determination of HCP a specific ELISA method was developed using antibodies obtained by the immunogenization of rabbits by <i>E. coli</i> strain used during the drug substance manufacturing process. The application of specific antibodies ensured the selectivity of the method. During the validation process, the LOQ and LOD were set to 1.25 ppm and 0.625 ppm respectively. Analysis of samples revealed that HCP levels in the final drug substance were, in most cases, below the limit of detection. In 9 out of 101 cases, results were higher than 1.0 ppm and the highest value equals 1.7 ppm. We have set an upper limit for HCP at 10 ppm for dry substance.</p>  |                              |  |
| Impurities                | <p>Process-related impurities/Product-related impurities:</p> <ul style="list-style-type: none"> <li>• <i>E. coli</i> proteins (HCP) from the host cells</li> <li>• Residual DNA from the host cells</li> <li>• Carboxypeptidase B (specific enzyme used for insulin precursor digestion)</li> <li>• Zinc (used in the insulin precipitation step)</li> <li>• Inorganic residues determined by Sulphated ash method</li> <li>• Related proteins – insulin derivatives formed as side-products or degradation products during manufacture, determined by HPLC according to Ph. Eur.</li> <li>• HMWP include insulin oligomers and protein impurities with molecular masses greater than that of insulin determined by HPLC in accordance with Ph. Eur.</li> </ul> |                              |  |

|   |   |   |
|---|---|---|
|   | <ul style="list-style-type: none"><li>• A21-desamido insulin – product-related substance identified in the chromatogram in the system for related proteins and human insulin assay based on the Ph. Eur.</li><li>• Single chain precursor – residual protein that has not undergone the enzymatic digestion, specific to the particular step</li></ul>  |   |
| Stability Studies   | The firm has submitted stability studies.   |   |
| Non-clinical Comparison<br>I. <i>In-vitro</i> Studies<br>II. <i>In-vivo</i> Studies<br>a) Biological / Pharmacodynamic activity<br>b) Non- clinical Studies | <p>The principles of pharmacodynamic in vitro studies on insulin products are set out in ICH guidelines<sup>2,3</sup>. Considering these guidelines, the following set of in vitro pharmacodynamic studies was adopted for comparison of Biological Product with Comparator:</p> <ul style="list-style-type: none"><li>• Binding to IR-A and IR-B (SPR)</li><li>• Tyrosine phosphorylation/dephosphorylation of IR-A and IR-B</li><li>• Glycogen formation in adipocytes</li><li>• Lipolysis rate</li><li>• Glucose uptake</li></ul> <p>An indirect evaluation of Biological Product vs. Comparator was performed including the recommended in vitro studies. Receptor binding studies were carried out on IR-A and IR-B insulin receptors with the use of SPR method. First level of biological activity studies was executed by the assessment of tyrosine phosphorylation and dephosphorylation of IR-A and IR-B insulin receptors.</p> <p>The second level of biological activity studies was achieved in three studies on metabolic activity in mouse 3T3-L1 cells: measuring of glycogen formation in adipocytes, measuring of lipolysis rate and pharmacodynamic evaluation of glucose uptake.</p> <p>Evaluation of Biological Product and Comparator biological attributes was indirect in such a way that instead of the composite products, their particular components were used for comparison.</p> <p>Both Biological Product and Comparator are biphasic isophane insulin injections including human insulin and protamine sulphate complex suspended in a solution of insulin of the same species. Reasoning on the Biological Product and Comparator similarity of the kinetics of binding to IR-A and IR-B is based on the comparison of their components represented by Gensulin N and Humulin N (isophane insulin) and Gensulin R and Humulin R (soluble insulin). The same set of products represented Biological Product and Comparator in the tyrosine phosphorylation and dephosphorylation.</p> |   |
| Clinical Studies  | A double blind, randomized crossover clinical trial with administration of a single subcutaneous dose to compare the pharmacokinetics (PK) and pharmacodynamics (PD) of two recombinant regular human insulins, the test drug being the Regular Human Insulin produced by Bioton S.A. and the reference drug, Humulin® R, produced by Eli Lilly and Company, packaged and registered by Eli Lilly do Brasil Ltda, using euglycemic and hyperinsulinemic CLAMP technique in patients with Type 1 Diabetes  |   |

| Biological Activity       | <p>Cell based Bioactivity Assay – Surface Plasmon Resonance (SPR)</p> <p>Receptor binding studies were carried out on IR-A and IR-B insulin receptors with the use of SPR method. First level of biological activity studies was executed by the assessment of tyrosine phosphorylation and dephosphorylation of IR-A and IR-B insulin receptors.</p> <p>The second level of biological activity studies was achieved in three studies on metabolic activity in mouse 3T3-L1 cells: measuring of glycogen formation in adipocytes, measuring of lipolysis rate and pharmacodynamic evaluation of glucose uptake.</p>  |   |   |
| Immunochemical properties | <p>For determination of HCP a specific ELISA method was developed using antibodies obtained by the immunogenization of rabbits by <i>E. coli</i> strain used during the drug substance manufacturing process. The application of specific antibodies ensured the selectivity of the method. During the validation process, the LOQ and LOD were set to 1.25 ppm and 0.625 ppm respectively. Analysis of samples revealed that HCP levels in the final drug substance were, in most cases, below the limit of detection. In 9 out of 101 cases, results were higher than 1.0 ppm and the highest value equals 1.7 ppm. We have set an upper limit for HCP at 10 ppm for dry substance.</p> |   |   |
| Impurities                | <p>Process-related impurities/Product-related impurities:</p> <ul style="list-style-type: none"> <li>• E. coli proteins (HCP) from the host cells</li> <li>• Residual DNA from the host cells</li> </ul>  |   |   |

|   |   |
|---|---|
|   | <ul style="list-style-type: none"> <li>• Carboxypeptidase B (specific enzyme used for insulin precursor digestion)</li> <li>• Zinc (used in the insulin precipitation step)</li> <li>• Inorganic residues determined by Sulphated ash method</li> <li>• Related proteins – insulin derivatives formed as side-products or degradation products during manufacture, determined by HPLC according to Ph. Eur.</li> <li>• HMWP include insulin oligomers and protein impurities with molecular masses greater than that of insulin determined by HPLC in accordance with Ph. Eur.</li> <li>• A21-desamido insulin – product-related substance identified in the chromatogram in the system for related proteins and human insulin assay based on the Ph. Eur.</li> <li>- Single chain precursor – residual protein that has not undergone the enzymatic digestion, specific to the particular step</li> </ul>  |
| Stability Studies   | The firm has submitted stability studies.   |
| Non-clinical Comparison<br>III. <i>In-vitro</i> Studies<br>IV. <i>In-vivo</i> Studies<br>c) Biological / Pharmacodynamic activity<br>d) Non- clinical Studies | <p>The principles of pharmacodynamic in vitro studies on insulin products are set out in ICH guidelines<sup>2,3</sup>. Considering these guidelines, the following set of in vitro pharmacodynamic studies was adopted for comparison of Biological Product with Comparator:</p> <ul style="list-style-type: none"> <li>• Binding to IR-A and IR-B (SPR)</li> <li>• Tyrosine phosphorylation/dephosphorylation of IR-A and IR-B</li> <li>• Glycogen formation in adipocytes</li> <li>• Lipolysis rate</li> <li>• Glucose uptake</li> </ul> <p>An indirect evaluation of Biological Product vs. Comparator was performed including the recommended in vitro studies. Receptor binding studies were carried out on IR-A and IR-B insulin receptors with the use of SPR method. First level of biological activity studies was executed by the assessment of tyrosine phosphorylation and dephosphorylation of IR-A and IR-B insulin receptors.</p> <p>The second level of biological activity studies was achieved in three studies on metabolic activity in mouse 3T3-L1 cells: measuring of glycogen formation in adipocytes, measuring of lipolysis rate and pharmacodynamic evaluation of glucose uptake.</p> <p>Evaluation of Biological Product and Comparator biological attributes was indirect in such a way that instead of the composite products, their particular components were used for comparison.</p> <p>Both Biological Product and Comparator are biphasic isophane insulin injections including human insulin and protamine sulphate complex suspended in a solution of insulin of the same species. Reasoning on the Biological Product and Comparator similarity of the kinetics of binding to IR-A and IR-B is based on the comparison of their components represented by Gensulin N and Humulin N (isophane insulin) and Gensulin R and Humulin R (soluble insulin). The same set of products represented Biological Product and Comparator in the tyrosine phosphorylation and dephosphorylation.</p> |

| Stability study data of drug product   | Firm has submitted stability study data of 03 batches. The accelerated stability study data is conducted at 40±2°C/75%RH±5%for6months.The realtimestabilitystudy data is conducted at 25±2°C/60%±5RH for 36 months.   |

|   |                      |  |
|---|----------------------|--|
|   | Remark sof Evaluator | Non- clinical and Clinical trial data are not submitted by the firm. Registration Board in its 271 <sup>st</sup> meeting considered that Heparin Sodium Injection is non-rDNA pharmacopoeial product, hence, revised its decision of 260 <sup>th</sup> meeting and granted the approvals on the basis of valid legalized CoPP & availability in country of origin. |
| <p><b>Previous Decision:</b> Keeping in view the availability of product in country of origin as per submitted CoPP and Heparin Injection being non-rDNA pharmacopoeial product; Registration Board approved the product as per current Import Policy for finished drugs (M-320).</p>   |                      |  |
| <p><b>Evaluation by BE&amp;R:</b> Initially, the applied product was considered and approved in 320<sup>th</sup> meeting of Registration Board. After that, the panel comprising of Mr. Muhammad Kashif and Mr. Faisal Shehzad conducted virtual GMP inspection on 10-04-2023 &amp; 11-04-2023 and concluded as following:</p>  |                      |  |
| <p><i>“Based on the proceedings of virtual inspection, documents reviewed and videos of the unit seen, and considering the fact that Heparin sodium is a polysaccharide (no killed/attenuated organism in final product), the panel has concluded that the firm has adequate systems to manufacture heparin sodium and appeared to comply with the cGMP requirements. <b>However, the panel also observed during virtual inspection documentary review that the manufacturer</b></i></p>  |                      |  |
| <p><i><b>does not hold CoPP for applied strength of 25000 IU in China. Hence, the panel recommended that the provisions under DRAP Act, 2012 and relevant rules must be checked for grant of registration for such biological drugs. The importing firm may also be directed to update DRAP for inclusion of manufacturing of any other biological drug in bulk production and / or filling area by the manufacturer along with their NRA approval, QRM report and re- validation of cleaning, if added in future.”</b></i></p>   |                      |  |
| <p>During further processing of the case, it was observed that the product is not licensed to be placed on the market for use in China. Recently, the firm has submitted that our product is manufactured under license of Ministry of Health of China. The product is also being exported and registered with health authorities of Republic of the Philippines, Uzbekistan and Bolivia. Copies of registration certificates for these countries have been provided.</p>   |                      |  |
| <p><b>Decision of 332<sup>nd</sup> DRB Meeting:</b></p> <p><i>“Registration Board deferred the case for evidence of availability of product in the country of origin or in RRA or in any three eastern European countries from same manufacturer.”</i></p>  |                      |  |
| <p><b>Remarks:</b></p> <ol style="list-style-type: none"> <li>The firm has submitted GMP Certificate duly legalized from China Council for the Promotion of International Trade China Chamber of International Commerce.</li> <li>The firm has also submitted document regarding “Explanation of Pharmaceutical GMP Compliance Inspection Conclusion in Hebei Province People’s Republic of China” wherein the Inspector namely “M/s Hebei Province Pharmaceutical Professional Inspector Corps (South District) conducted a pharmaceutical GMP and submitted following response:</li> </ol> <p><i>“The inspection conclusion is that the enterprise’s F3 production line is in compliance with the requirements of the “Good Manufacturing Practice of Medical Products” of the People’s Republic of China. Please refer to Pharmaceutical GMP Compliance Inspection Conclusion in Hebei Province People’s Republic of China issued on 4<sup>th</sup> April 2023.”</i></p> |                      |  |
| <p><b>Decision of 334<sup>th</sup> Registration Board Meeting:</b> Registration Board deferred the case for evidence of availability of product in the country of origin or in RRA or in any three eastern European countries from same manufacturer.”</p>  |                      |  |

Now the firm has submitted following clarification from the manufacturer Hebei Changshan Biochemical Pharmaceutical Co. Ltd.:

“We Hebei Changshan Biochemical Pharmaceutical Co. Ltd have applied for the registration of Heparin Sodium Injection 5ML:25000IU through agent in Pakistan M/s Safemed Technologies located at APT. 3, 2<sup>nd</sup> Floor Retoon Palaza, Sector G 15/1, Islamabad.

In P.R China, Heparin Sodium Injection is registered in 5000IU/1ML, THE STRENGTH IS SAME.As per requirement of various countries including Pakistan, We have also been manufacturing Heparin Sodium Injection 5ml:25000IU, and exporting to various countries 01)Bolivia, 02)Uzbekistan, 03)Philippines, 04)Yemen.

We certify that HEPARIN SODIUM INJECTION 5ML:25000IU IS BEING MANUFACTURED IN THE SAME SECTION AND ALSO MEETS THE SAME GMP COMPLIANCE AND WITH SAME MANUFACTURING LICENSE.”

**Decision: The Board accepted the clarification submitted by the firm and approved the product with direction to BE&R Division for issuance of registration letter as the panel has already conducted the virtual GMP inspection.**

#### Deferred case of 5<sup>th</sup> PRV Meeting.

**Case No.4.** M/s Novartis Pharma (Pakistan) Limited, Karachi has applied for the change of Manufacturing Site and Marketing Authorization Holder of their already registered biological product as per following details:

| Sr. No. | Reg. No. and date                 | Brand Name and Composition  | Existing Marketing Authorization Holder & Manufacturer  | Demanded New Manufacturing Site   |
|---------|-----------------------------------|---|---|---|

| Undertaking that provided information/ documents are true & correct.   | Submitted  |  |

Registration Board in its 307<sup>th</sup> and 316<sup>th</sup> meetings delegated its power/Functions for Change of Manufacturing Site and Marketing Authorization Holder of imported drugs to the Chairman Registration Board.

**Decision of 5<sup>th</sup> PRVC Meeting:** After detailed deliberation, on the recommendation of the Committee, the Chairman Registration Board decided to defer the application for seeking the clarification of the following:

- Provide any evidence for the existing Manufacturer and Marketing Authorization Holder address.
- Marketing Authorization Holder in CoPP is different from the existing approved Marketing Authorization Holder.

Now the firm has submitted old CoPP and the detail of the product is as under:

| Reg. No. and date                 | Brand Name and Composition  | Existing Marketing Authorization Holder(MAH) & Manufacturer  | Demanded New Manufacturing Site and(MAH)   |
|-----------------------------------|---|--|--|

## Division of Quality Assurance & Laboratory Testing

|                    |   |
|--------------------|---|
| Agenda Item No. 01 | Complaint of M/s Brookes Pharma (Pvt.)Ltd , Karachi for manufacturing and sale of Alleged counterfeit of their Product “Pyodine solution” by various manufacturer throughout the country. |
|--------------------|---|

### BACK GROUND:

1. M/s Brookes Pharma (Pvt.) Ltd has launched complaints for manufacturing and sale of Alleged counterfeit of their Product “Pyodine solution” by various manufacturer throughout the country. Further M/s Brookes Pharma filed writ petition No.2073/2024 before the honorable Islamabad High Court. Honorable High Court passed disposed of the petition with following orders and also requested for personal appearance before Director QA/LT

- *“The petitioner is aggrieved by inaction of the respondents in taking action against the sale and distribution of counterfeit products.*
- *The learned counsel for the petitioner states that the petitioner is a licensed producer of pyodine solution. He states that centerfield versions of the said products are being sold and in such regard complaints have been made by the petitioner on 24-05-2024 and 29-05-2024 to the respondents to take action pursuant to section 30 of the Drugs Regulatory Authority of Pakistan Act ,2023. but no action has been taken by the respondents.*
- *Let a copy of this petition along with the annexures be sent to the respondents, who will treat as a part of already filed and decide the same in accordance with law through a reasoned order within period of two weeks.*
- *The petition is disposed of in the above terms.”*

### PROCEEDS AND DECISION OF 242<sup>ND</sup> Meeting of DRB:

#### (Item No. X Change of brand name of registered drugs.)

- Drugs are registered with brand names. Due to various reasons names are changed after grant of registration due to any of following reasons:
  - a. Due to resemblance with already registered drug, manufacturer applies for change of name. No fee is charged for this purpose.
  - b. Due to any business / commercial reason. Fee is charged.
  - c. One manufacturer / registration holder grants No Objection Certificate to another for change of brand name. Fee is charged for such cases but in some cases one manufacturer apply for change of name but another did not apply for same for much time and thus product remain without name till that time.
- **Decision:** Registration Board discussed scenarios for change of brand name and decided as follows:  
Brand names of already registered drugs will be changed due to resemblance with another brand name.
- In future, change of brand names of both manufacturers / importers due to grant of No Objection Certificate will be processed simultaneously. However, for those cases in which brand name for

one manufacturer / importer has already been changed then brand name of another registration holder will be decided on priority.

- Registration Board decided that if brand names of two products resemble, then later registration holder is bound to propose alternate names for approval as one of condition of registration. But in some cases, later registration holder do not propose alternate names. The Board decided that in such cases DRAP will issue one reminder with 15 days time period and then manufacturing of the product will be stopped after approval of Chairman, Registration Board. Stoppage of manufacturing will be till approval of new brand name.
- Registration Board also decided that if packing material of two products resemble, then later registration holder is bound to change packing material / design as one of condition of registration. But in some cases, later registration holder avoids to change packing design. Thus Board decided that in such cases DRAP will advise the manufacturer / importer to change the pack design with one reminder with 15 days' time period and then manufacturing of the product will be stopped after approval of Chairman, Registration Board. Stoppage of manufacturing will be till approval of new pack design.

### **Proceeds of QA/LT:**

2. In compliance to orders of honorable Islamabad High Court passed in writ petition No 2073/2024, received in DRAP on 12-07-2024, DRAP has initiated the response and directions were passed on to all DRAP field offices for taking the necessary action under the law to address the complaints of the applicant regarding manufacturing and sales of allegedly counterfeit products of "Pyodine Solution".

3. Upon request of the firm, QA/LT division of DRAP has also provided an opportunity vide letter No.Dy.162-2024-DDLT dated 22-07-2024 to the applicant, M/s Brooks Pharma (Pvt.) Ltd. Karachi through their authorized representative to personally appear and submit their stance along with the proofs and evidences. Mr. Arif Hussain Siddique along with Council appeared before Director QA/LT and presented physical samples of many manufacturers and claimed that they have close resemblance with their product and immediate action / cognizance along with manufacturing stoppage and sale restriction, seizure of marketed stock be taken immediately.

4. DRAP field offices have already started market surveillance and also issued explanation letter to all alleged manufacturers of counterfeit products. Reports along with explanation letter of eight manufacturers have been received from DRAP, Lahore office one from DRAP, Karachi and three from DRAP, Islamabad.

5. Director QA/LT appraised representative of firm that market surveillance has been started, once the reports from all field offices along with explanation of alleged counterfeit product will be received, then the matter will be placed before the upcoming meeting of competent forum, i-e Drug Registration Board to be held on 6,7 and 8 August 2024 under Drug Act 1976, DRAP Act 2012 and rules made thereunder. It was also observed from the provided evidenced that all the alleged counterfeit Products were found registered by Drug Registration Board and any complain of registered product would be presented before Drug registration board after conduct of thorough investigation by DRAP field offices/ Federal Inspector of Drugs for consideration and decision.

6. Representative of Brookes Pharma also requested for opportunity of personal hearing before Drug Registration Board in forthcoming meeting to be held on 6 -8 August 2024. Director QA/LT agreed to provide applicant with personal hearing on 08-08-2024, before Drug Registration Board.

7. The details of Alleged countrified products of “Pyodine Solution” of M/s Brookes Pharma, Karachi, as provided by firm is as under,

Resemblance Status of Pyodine Solution

8. The replies/explanation letters as submitted by different alleged manufacturer submitted to F.I. Ds which are forwarded to QA/LT division, are as under;

**REGISTERED**

Use of the name and product as per  
the Drugs (T&E) Rules, 1976

Ref. No. IP/17/2024

Dated: 18.07.2024

To,  
**Federal Inspector of Drugs**  
Lahore,

Subject: **Reply of The Letter "Counterfeit" Product, Pyodine Solution(Reg No 009528)**

Dear Sir,

In the Context of the subject caption above vide **letter No. 1860/2024-DRAP(L-IV) dated 11.07.2024** regarding the manufacturing of counterfeit Pyodine Solution.

We M/s Irza Pharma (Pvt) Limited is law abiding unit and never ever involved in any kind of illicit activity as mentioned in the subject. The proof is attached as comparison of the label of our Product (WONDSEPTIC Solution 7.5% Both 50ml as well as 450ml).

The color scheme is different to the **Brooks Product**. Therefore we M/s Irza Pharma (Pvt) Ltd. is not involved in any violation of DRAP rules and Regulation.

We do believe in the independent and isolated color scheme which should not match to the color schem of any product available in the market. Moreover some highlighted differences are.

Dear Sir,

Subject: - COUNTERFEITS PRODUCT PYODINE SOLUTION  
(REG.NO.009528).

Immense thanks for your letter No.1863/2024/DRAP(L-IV) dated 11-07-2024, on the said subject, received by us via WHATSAPP on 12-07-2024, the original yet not received.

The matter of manufacture and sale (MARKETING) of COUNTERFEIT DRUGS is frequent and it seems the market is FLOODED with such drugs (Medicine), which indeed needs remedial measures to be adopted by the learned DRAP.

So as to precisely reply your above esteemed letter dated 11-07-2024, you are requested to supply to us an attested photocopy of letter No.BPL/RA/2024/360 dated 29-05-2024 of our friends M/S Brooks Pharma (Pvt) Limited, Karachi, mentioned in first line of your above referred letter dated 11-07-2024.

It is also requested to extend the time to reply to your above letter up to fifteen days beyond the date we receive an attested copy of the letter requested as above, from your good person.

Yours Truly

**Subject:- RE: Counterfeit Product Pyodine Solution Reg.No. 009528**

Respected Sir,

In reference to your letter No. 1864/2024 DRAP(L-IV) dated 11-07-2024 regarding counterfeit Product Pyodine Solution, It is stated that our Product Septodine 10% was registered in 17<sup>th</sup> July, 2008. It was applied for registration in 2004. It is stated that we are given a legal brand name from DRAP. We have not changed the name after registration. The first four alphabets do not resemble with Pyodine, brand name, as per requirement of DRAP. So it cannot be claimed that our brand name resembles with Pyodine.

It is further stated that our packing design does not resemble with the brand Pyodine. It is therefore requested that kindly accept our explanation and be obliged.

Subject: -Purported Counterfeit Japodon-

Dear Sir,

Reference to your office letter no. 1866/2024-DRAP (L-IV) dated 11-07-2024, we want to submit as follows.

- 1- Sir, we got registration of our product Japodon 10% Solution with Reg. No. 096512 on 31<sup>st</sup> May 2019 via DRAP Letter No. F.15-2/2016-Reg-V (M-257).
- 2- Sir, we are manufacturing the said drug strictly in accordance with the design/pattern/Style of label on submitted along with our registration letter/application.
- 3- Sir, now vide your above said letter we have come to know that our design resembles to some extent to a product manufactured by M/S Brookes Pharma, Karachi.
- 4- Sir, our Product's label is not resembling with product manufactured by M/S Brookes Pharma, Karachi (Label of our Product Japodon 10% Solution is attached for your kind review).
- 5- In Sha Allah, you will always find us inclined to cooperate with DRAP and his officers when and where some mistake will be highlighted in future as well.

Thanking You

12<sup>th</sup> July 2024

Mr. Abdul Rashid Shaikh  
Federal Inspector of Drugs  
Lahore

Subject: COUNTERFEITS PRODUCT "PYODINE SOLUTION"

Dear Sir:

Reference to your letter No. 1869/2024-DRAP (L-IV) dated 11<sup>th</sup> July 2024 regarding the subject cited above. This is for your kind information that the color combination and design of our Product *Pyosep Solution* Registration No. 040624 is entirely different from the product of complainant, and further this is to inform you that we didn't manufacture this registered product from the last two and half years just because of its pricing issue.

The last batch we manufactured two and a half year back is already expired and there is not even a single unit of this product is available in market.

We never produce any product which matches with competitor's products and at the same time, we assure you that we are not going to produce similar packaging as of competitor's product as mentioned above.

Thanks and Regards,

Subject: Explanation regarding my product Povidone-I Solution, Registration number: 025552

Dear Sir,

Respectfully, it is stated that I have received this letter No. 1861/2024-DRAP(L-IV) on 18-07-2024 in which my product Povidone Iodine has been rendered counterfeit.

Sir this is a baseless allegation from such Big company, which is also the brand leader of the market.

Sir we are a small factory, with very limited products on the list and we have no malafide intentions to copy or make any counterfeit drug products.

Sir I would like to state some differences among the products, which are visible to the naked eye,

|           | M/s Brookes (Pvt.) Ltd.                 | NBS Pharma                                       |
|-----------|---|--|
| REG. Name | Pyodine with ® logo                     | Povidone-I Solution with no ® logo               |
| REG. No.  | 009528                                  | 025552   |
| LABEL     | Not overlapped                          | Overlapped label                                 |
| LABEL     | Background pictures                     | No Background picture                            |
| LABEL     | No 'SOL' stated                         | Clearly visible 'SOL' with distinguished picture |
| LABEL     | Brooke's logo                           | NBS Logo with Yellow sun                         |
| LABEL     | No Barcode                              | Visible 2D Barcode, opening to company profile.  |
| CAP       | Nothing is printed                      | NBS printed on top                               |
| BOTTLE    | HDPE printed with some groove in bottom | ARR printed with no groove                       |

Sir, I hope above mentioned difference between both products are enough to clarify our position in this regard.

Subject: Complaint Regarding Pyogon (Povidone-Iodine) Manufactured By Glorious Laboratories

With reference to your telephonic direction, we are pleased to inform you that we are using this color scheme and design since 2016 and do not imitated any product label available in the market. However we are justifiable to inform that certain people are imitating our Pyogon label color scheme and design. It is pertinent to mention that certain manufacturer changes their labeling to disgrace our leading products and some are instituting fake complaints. Glorious Laboratories has its own ethical standard and does not believe in such activities

2. We are enclosing herewith the labels of Pyodine manufactured by Brooks Laboratories whose product Pyodine is available in different color scheme Label and design as per their web side information. We have downloaded label with different color scheme and design for one registered. Product We do not know that why the complained and what is there latest color scheme and label design in question. Our brand name address manufacturing and expiry date are all readable in chocolate color scheme with our own design, which we are using since 2016. Whereas Pyodine is available in Brown Red and other different color scheme each scheme is entirely different from the other for our product. However, if they have changed their color scheme in the recent past which is similar to our product we are unaware of it.

3. in the light above submission and documentary evidence, it is evident that the compliant does not hold any legal or ethical grounds, and there for requested that the same may be ignored.

Thanks and Regard

Plant Manager Glorious laboratories

Islamabad

Ref. No.: GP/FID/07/2024-01 (Islamabad)  
Date: July 23, 2024

Madam Saadia Mahwish  
Federal Inspector of Drugs-1,  
QALT DRAP, Islamabad

Subject: GOVID SOLUTION (M/s Glitz Pharma) RESEMBLANCE CASE WITH  
PYODINE SOLUTION (M/s Brooks Pharma)

Respected Madam,

I am writing to bring into your attention a concerning issue regarding a discrepancy in the Packaging and labeling resemblance of *Govid Solution* manufactured by Glitz Pharma with *Pyodine Solution* manufactured by Brooks Pharma. Govid is registered with the DRAP under Glitz Pharma registration Number 038607, while Pyodine is registered with DRAP by Brooks Pharma with registration number 009528, indicating compliance with regulatory authorities. We have not been manufacturing Govid Solution since 2021 because of Cost Impact.

Upon careful observation and comparison, it has come to attention that there exists a significant dissimilarity in the packaging, labeling, and even in the appearance of both medicines.

On review, it is evident that there are several notable differences between these two products:

- 1- The registered product name from DRAP of povidone iodine solution is Govid solution of Glitz Pharma whereas the trade name of Brooks Pharma is Pyodine.
- 2- Govid solution label is in dark brown in color whereas Brooks Pyodine are in light brown orange in color.
- 3- Govid solution labels is in simple text whereas Brooks Pyodine label with some different type of germicidal sketches.
- 4- Design of labels are clearly different with each other.
- 5- Text and font sizes are not match.
- 6- Govid solution bottle embossed with Glitz Pharma on the bottom of bottle and brooks Pyodine have no such company name.
- 7- Design and size of bottle also do not match with each other.
- 8- The Glitz Pharma product, Govid, features an embossed design with the Glitz Pharma name prominently displayed on the bottle.

Page 1 of 2

Head Office: 205, Muhammadia Plaza, College Road, Rawalpindi, Pakistan.  
Tel: + 92-51-5542849, 5552613 Fax: 5552487  
E-mail: info@glitzpharma.net  
Web: www.glitzpharma.net

Plant: Plot No. 265, Industrial Triangle  
Kahuta Road, Islamabad, Pakistan.  
Tel: 92-51-4491310  
Fax: 92-51-4491268

- 9- In contrast, the Brooks Pharma product, Pyodine, does not have any such embossing or distinctive branding elements.
- 10- The design of the bottles varies significantly, which may affect consumer recognition and preference.
- 11- The color schemes and printing styles used for labeling are also different, contributing to a unique market presence for each product.

Given these differences in branding, design, and regulatory registration, it is clear that the two products are not similar in the context of their presentation and market identity.

Thanks & Regards  
Muhammad Ashfaq  
Manager Regulatory Affairs

**GOVID SOLUTION MANUFACTURED BY GLITZ PHARMA**

**INSTRUCTIONS:**  
Store in a dark and cool place.  
Keep the cap tightly closed.  
Keep out of the reach of children.  
Do not drink.

450ml  
(Approx.)  
Solution

**GOVID  
SOLUTION 10%  
(Povidone-Iodine)**

**TOPICAL ANTISEPTIC GERMICIDE  
Bactericidal-Fungicidal-Virucidal**

- Long Acting.
- Less Irritant.
- Less Staining Intensity.

**FOR EXTERNAL USE ONLY**

**GLITZ PHARMA**

**گووید سلوشن 10% (پوویڈون-آئیوڈین)**

Each 100 ml contains:  
Povidone-iodine U.S.P. 10g  
equivalent to 1g available iodine (1% w/v)  
Product specs: USP

**INDICATIONS & EFFECTS:**  
Used for the prevention and treatment of skin surface and mucous membrane infections due to both gram & gram-negative bacteria, viruses, protozoa, spores and yeasts.  
De-grease the skin surface prior to injection and hyper-alimentation procedures.  
For pre and post-operative washing of hospital equipment.  
Used as disinfectant and antiseptic for the treatment of contaminated wounds and pre-operative preparation of the skin, mucous membranes and surgical equipment.  
For pre and post-operative cleaning apply directly.  
For cut or wounds wash the area and apply dressing if necessary.

**CAUTION:**  
Discontinue treatment if irritation/sensitivity develops.

**PRECAUTIONS:**  
Avoid applying to deeper burns or deep cuts due to the risk of systemic absorption which may lead to metabolic acidosis, hypernatremia, renal impairment and hypothyroidism.  
Avoid vaginal applications to the breast feeding mothers and women as it may lead to the absorbed iodine concentration in the breast milk and may lead to hyper-thyroidism in the baby.

Subject: Resemblance of SEPTIWEL SOLUTION LABEL color scheme.

Respected Madam.

Kindly refer to our telephonic conversation over the matter of resemblance of color scheme of our product label

SEPTIWEL 10% SOLUTION W/V (POVIDONE IODIDE).

With M/S BROOKS PHARMA product brand name

PYODINE 10% SOLUTION W/V (POVIDONE IODIDE).

We hereby declare;

- That that product is not being Manufactured for 03 years due to construction work in factory.
- That The management has already decided to change the color scheme of our product packaging after Manufacturing is re-started. And
- That new Packaging scheme will be intimated to your office as finalized.

We do acknowledge your kind coordination over the matter.

Regards'

  
Ahmad Usman,  
P.M.

To,  
M/S KHALID MEHMOOD  
Federal Inspector of Drugs-II  
DRAP ISLAMABAD.

Respected Sir,

Reference to Letter No. F.01-01/2024-FID-II DATED 23-07-2024 regarding the purported counterfeit Pydine solution manufactured by M/S CORTEX PHARMACEUTICAL in resemblance with the Pydine Solution manufactured by M/S Brookes Pharmaceuticals(Pvt) Ltd, Karachi.

It is to mention here that we are manufacturer licensed by Central Licensing Board of Drug Regulatory Authority of Pakistan (DRAP) and our product with brand name Pydine is a registered product from Drug Registration Board. Therefore, if Registration Board considers it as purported counterfeit product then we will immediately apply for change of name of our product as per requirement of rules & laws.

**Subject:** Counterfeits Product Pyodine Solution (Reg.No.009528)

Respected Sir,

Kindly refer to the Letter.No.1929/2024-DRAP (L-IV) dated 11.07.2024

(Received on 25/07/2024), it is submitted that we have not received your letter, No. 1865/2024-DRAP (L-IV) dated 11.07.2024(Surprisingly the date mentioned on both referred letters is 11.07.2024).

It is incorrect to say that Hoover Pharmaceuticals (Pvt.) Ltd is involved to manufacture any counterfeit product in particular to the alleged drug Povidern Solution. The product Povidern having registration no.094559 has been properly registered with the DRAP and the concerned department of DRAP has given us the name of product after thorough and careful consideration.

Kindly note the difference of phonic effect and the spelling in our product and the product of complainant.

Complainant Product

## HOOVER PHARMACEUTICALS (PVT) LTD.

You can find that there is a difference in 7 figures regarding sequence/spelling of alphabet in the name of both brands. Further our Product Name Povidone is logically based on two terms.

POVI from POVIDONE

DERM from SKIN

So there is no question that we have copied/looked the name of the product of complainant. Therefore the complaint is baseless and may kindly be filed in the interest of justice.

Best Regards,

  
For Hoover Pharmaceutical (PVT) Ltd

### Proceedings and decision of 339<sup>th</sup> meeting of Registration Board:

M/s Brooks Pharma (Pvt.) Ltd. Karachi (Complainant) through representative Dr. Arif Hussain Siddique along with Council Mr. Umar Hameed Advocate appeared before Board for personal hearing/representation and presented physical samples /Bottles of allegedly counterfeit Pyodine manufacturers along with list of 26 alleged counterfeit Pyodine Products and urged their claim that these products have close resemblance and imitation with their product Pyodine.

Board after hearing the arguments of the firm in details and after thorough discussing and deliberation decided and nominated Director QA/LT to review each individual claimed counterfeit product in comparison with Pyodine for resemblance of packs for lookalike imitation of label which may deceive the patients. The Shortlisted reviewed imitation product cases on individual basis would be presented by QA/LT division before next Board meeting for consideration and further decision of the Board.

6. It is further submitted that the Board Sample portion was received in broken form, and letter was issued to area FID Quetta to investigate this matter and fix the responsible person for packing and delivering broken sample, the reply of which is still pending.

7. PQCB Quetta was also requested vide letter No.F.No.13-09/2023-QC dated 10-07-2023 and reminder dated 12-08-2023 to provide details of proceeding and results of DTL Quetta / NIH (if any) regarding this Batch of Paracet Infusion 100 ml batch No. CIJ170. No reply has been received from PQCB Quetta.

**Proceedings and decision of Registration Board:**

**Board deliberated the case in detail and decided not to accede firm's request of appellant testing and decided to issue showcase notice to firm for suspension /cancelation of subject cited drug to M/s Standpharm Pakistan (Pvt) Ltd, Lahore and personal hearing before Registration Board.**

|                               |  |
|-------------------------------|--|
| <b>Agenda Item No.<br/>03</b> | <b>REQUEST FOR APPROVAL TO DISPOSE OF EXPIRED DRUGS/SAMPLES OF BOARD PORTION OF PRODUCTS PRESENT IN SAMPLE STORAGE ROOM.</b> |
|-------------------------------|--|

**Background:**

The sample room for the storage of Board portion of samples sent by the relevant Federal Inspectors of Drugs was shifted from second floor, TF Complex, G9/4 building to current DRAP building in the month of March 2024. The sample room in the new DRAP building has reached its maximum capacity limit. The sample room at TF complex had samples that date back decades and since the establishment of the said room, no samples have ever been disposed of. A significant number of samples have expired and need to be disposed of to free up space for new samples. For the said purpose, a proper disposal mechanism for disposal of expired samples and samples whose fate have been decided by the Board is necessary to maintain compliance with current regulatory guidelines and ensure effective use of already scarce resources.

**Proposed Disposal Plan:**

It is proposed that the Registration Board may constitute a committee having representation from the divisions of QA&LT, PE&R and Admin & HR. The division of QA&LT will provide the record of expired samples to the committee and the committee will devise a mechanism for the disposal of said samples.

**Proceedings and decision of the Board:**

The Board after thorough deliberations decided to constitute a committee that will decide the mechanism for destruction of expired samples present in the sample storage room and will also devise an SOP for the same purpose. Moreover, the committee will apprise the Board regarding its proceedings and progress on regular basis. The said committee will constitute of following members:

- i. Add. Director QA&LT (Convener of the committee) or nominee of the director QA/LT.
- ii. Mr. Muhammad Asad Abrar, Director, DTL Bahawalpur.
- iii. Mr. Shahid Nawaz, Assistant Director, PE&R Division.
- iv. Deputy Director, Admin, HR & Logistics.

|----------------------|--|
| <b>Agenda Item 3</b> | <b>MANUFACTURE AND SALE OF SUBSTANDARD MANADOL SUSPENSION (PARACETAMOL) BATCH NO. 4MD-005 MANUFACTURED BY M/S MASFA INDUSTRIES (PVT.) LTD LAHORE</b> |
|----------------------|--|

1. FID-III, DRAP, Lahore dated 10-09-2014 took the sample from M/s Masfa Industries (Pvt.) Ltd Lahore. CDL vide report No. LHR230/214 dated 02-10-2014 declared the sample as substandard on the basis of assay test i.e. 70.15% (Limit 95% – 105%). Thereafter, the firm challenged the test/analysis report and requested for appellate testing. Appellate laboratory vide their test report No. 020MNHSR/2014 declared the sample as of substandard for assay (54.7%) and description, as the glass bottle was having undissolved masses which do not disperse even on shaking.
2. Accordingly, a show-cause notice was issued dated 24-11-2015. Registration Board in its 257<sup>th</sup> meeting dated 24-25/03/2016 decided to suspend the registration of Manadol suspension (Paracetamol) for 6 months and to conduct the PSI from the following panel;
  - a. Director DTL Punjab, Lahore.
  - b. Area FID.
  - c. ADC, Lahore.
3. The report from DRAP office Lahore dated 27-12-2016 was received and the case was presented before the Registration Board in its 266<sup>th</sup> meeting held on 07-02-2017 and board decided as under;
  - a. QA Division should consider the GMP issues of the firm M/s Masfa Industries (Pvt.) Ltd, Lahore, like use of old bottles in syrup manufacturing instead of new ones as it is violation of GMP.
  - b. The firm M/s Masfa Industries (Pvt.) Ltd, Lahore, shall submit accelerated and real time stability studies of 03 batches for 06 months of the product Manadol suspension.
  - c. The registration of the product Manadol Suspension, Reg. No. 071558 will remain suspended till the submission of stability studies by firm M/s Masfa Industries (Pvt.) Ltd, Lahore, for consideration of Registration Board.
4. The above decision of the Registration board was issued on 2-05-2017 and in response the firm submitted a reply which was presented before registration Board in its 274<sup>th</sup> meeting. The Registration Board after detailed discussion, deliberation and necessary evaluation of stability studies submitted by the firm decided that firm M/s Masfa Industries (Pvt.) Ltd., Lahore will resubmit the stability studies as per decision of the Registration Board in its 266<sup>th</sup> meeting dated 07<sup>th</sup> February, 2017. The registration of the product Manadol Suspension, Reg. No. 071558 will remain suspended till the submission of stability studies by firm M/s Masfa Industries (Pvt.) Ltd, Lahore, as per decision of the Registration Board.
5. The firm on 06-09-2018 submitted their reply wherein they have enclosed the accelerated and real time stability studies of 03 batches for 06 months, Purchase invoice of raw material, HPLC chromatograms for assay determination, Stability chamber study data, Storage condition for long term and accelerated condition. Provided data was evaluated by QC section and was not accepted and accordingly, letter was issued to the firm dated 26-10-2018.
6. The case is now placed before Registration Board for guidance on the matter as the product is suspended since March 2016.

**Decision: Registration Board decided to conduct the product specific inspection for verification of manufacturing and testing facilities of the said product and submit report within 15 working days for consideration of the board.**

|  | Module-II (Quality Overall Summary)   | Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product. |

|   |   |   |
|---|---|---|
|   | Module-III Drug Substance:  | Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.<br>Batch No. TMS365                             |
|   | Stability Studies of Drug Substance<br>(Conditions & duration of Stability studies)                                     | Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at $40^{\circ}\text{C} \pm 2^{\circ}\text{C}$ / $75\% \pm 5\%$ RH for 6 months. The real time stability data is conducted at $30^{\circ}\text{C} \pm 2^{\circ}\text{C}$ / $65\% \pm 5\%$ RH for 36 months.<br>Batch No. TMS205T, TMS206, TMS208.                                |
|   | Module-III Drug Product:  | Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability. |

| 4.  | Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc. | Firm has submitted analytical record for product testing.  |  |
| 5.  | Compliance Record of HPLC software 21CFR & audit trail reports on product testing   | Firm has stated that their HPLC system is not CFR 21 compliant.  |  |
| 6.  | Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)                         | Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.  |  |
| Remarks of Evaluator:   |   |  |  |
| Sr. No.   | Section   | Observation  | Reply  |
| 1.  | 3.2.P.2.2.1   | In CDP, Analytical raw data sheets are submitted. The data is not understandable.<br>Time intervals are mentioned as 5 10 15 20 30 minutes; pharmacopoeia gives different time intervals. Data of only Maytam is mentioned in sheets.<br>Details of CDP are required clearly describing the comparison of results in 3 pH media at different time intervals. | The firm vide letter No. nil dated 18.10.2023 has stated that CDP was performed using USP Apparatus II and they are submitting updated data.<br>Firm has submitted revised summary sheets of comparative dissolution profile done at 3 different physiological pH. The results are comparable to comparator product. |

|  |           |  |  |
|--|-----------|--|--|
|  |           |  | Supporting data is not submitted, only summary sheets are submitted.   |
| 2.   | 3.2.P.5   | It is not mentioned which dissolution test of USP will be used for your applied product. (test 1 or test 2 or test 3.... or test 10)   | The firm has submitted that USP Test 2 will be used.   |
| 3.   | 3.2.P.5.2 | In analytical procedures Dissolution is not mentioned. Clarify.  | The firm has stated that it was a typographic mistake.   |
| 4.   | 3.2.P.5.4 | In batch analysis, results of dissolution are provided at 8h time point only. Why sampling intervals as per USP are not followed?  | The firm has stated that it was a typographic mistake and they have followed USP test 2 for their product.   |
| 5.   | 3.2.P.8   | <p>In chromatograms provided, sample name in all is “UNKNOWN001” it is not possible to identify which chromatogram is of RS and which is of drug product. Further in every chromatogram there are 2 to 3 major peaks. Which one is of the drug substance? Justify.</p> <p>In calculations values are mentioned around 0.9 under heading AUC, how does this value correspond to the area of curve in each chromatogram?</p> <p>If test is done on UV, then why pharmacopoeial method is not followed for test and analysis? (value of 0.9 corresponds to UV absorption)</p> | <ul style="list-style-type: none"> <li>• The firm has stated that sample name UNKNOWN001 is by default in system and cannot be changed. In sample description details of sample are given, the firm has submitted a copy of chromatogram with description Tamsulosin HCl 0.4mg capsule std 10 month. It has 2 major peaks of almost equal height even though chromatogram appears of std. The peak marked as of drug substance has less area than preceding peak.</li> <li>• Justification for peaks, firm has stated that peak of interest is recognized by considering retention time.</li> <li>• Retention time is determined by comparison for peaks obtained of working standard and also peak having maximum AUC, rest of the peaks are minor and ignored.</li> <li>• Calculations 0.9 show ratio between peaks of API and internal standard.</li> <li>• Test done on HPLC not on UV.</li> </ul> |
| <b>Decision of 331<sup>st</sup> meeting:</b> Registration Board deferred the case for submission of clarification regarding unidentified peak in submitted chromatograms of assay having area more than the peak identified as drug substance. |           |  |  |
| <b>Firm's Response:</b> Each chromatogram will have two major peaks as per USP method wherein each peak is of the Tamsulosin.  |           |  |  |

**Decision of 336<sup>th</sup> meeting:** The Board after detail deliberation and keeping in view the reply submitted by the firm, deferred for submission of clarification in detail and also for the submission of complete analytical record for identification of the peaks exhibited in chromatograms of Assay analysis to be reviewed by the board.

**Remarks of Evaluator:** Firm has submitted analytical chromatograms with following declaration:

- 1<sup>st</sup> peak at retention time 3.850 is of Methyl paraben that was used along with Propyl paraben as an internal working standard just on trial basis.
- 2<sup>nd</sup> peak at retention time of 7.240 is of Propyl paraben which was used as internal working standard.
- 3<sup>rd</sup> peak at retention time of 7.840 is of Tamsulosin.

Firm has submitted that result was found satisfactory by using propyl paraben as internal working standard so you are requested to ignore peak of Methyl paraben because it has no effect on our stability data

**Decision: Approved.**

**Applications submitted on Form 5F by way of contract manufacturing**

**Evaluation by PEC:**

| Section# | Observations | Firm's response |
|----------|--------------|-----------------|
|----------|--------------|-----------------|

|                    |   |   |
|--------------------|---|---|
| <b>1.3</b>         | Evidence of approval of manufacturing facility of “Liquid Injection Ampoule (general) section” from Licensing division of DRAP shall be submitted.  | <i>Firm has not submitted any approval letter from Licensing Division for required manufacturing facility of “Liquid Injection Ampoule (general) section”</i>   |
| <b>1.6.5</b>       | Valid DML/GMP certificate of the drug substance manufacturer shall be submitted.  | Submitted   |
| <b>3.2.S.4</b>     | Drug substance specifications, analytical procedure and analytical method verification studies shall be submitted from drug product manufacturer.   | Submitted   |
| <b>3.2.P.1</b>     | Justification shall be submitted for the use of Citric acid monohydrate as preservative in the single dose injectable preparation.<br>Justification shall be submitted for the proposed quantity of “Ondansetron as HCl dihydrate” 4.20mg/ml against the label claim. | Citric acid monohydrate is a widely used multiple excipient in pharmaceutical formulations. It serves multiple functions, including acting as a preservative to ensure the stability and safety of injectable medications. In the case of Vomfran Injection (4 mg per 2 ml), which shares the same formulation as Zofran Injection. Citric acid monohydrate is included as preservative.<br>Citric acid, as an antimicrobial preservative, contributes creating to creating an environment that is less conducive to microbial growth. The acidic environment inhibits the proliferation of bacteria, yeast, and mold, thereby reducing the risk of contamination<br>The based ensuring tolerance on decision key more limits to for round consistent considerations excipient off the and that; citric quantities. accurate acid rounding value dosing. off from to This 0.50 0.46 mg mg minor to 0.50 simplifies adjustment mg the for falls accurate measurement within dispensing acceptable process. |
| <b>3.2.P.2.2.1</b> | Pharmaceutical equivalence studies have been submitted against the Zofran 8mg/4ml whereas the applied formulation is 4mg/2ml.   | <i>Firm has submitted Biowaiver guidelines while applied formulation is Injectable.</i>   |
| <b>3.2.P.3.2</b>   | Submitted manufacturing method is for the dry powder injection vials, while the submitted product is of liquid injection ampoule.   | Firm has submitted revised manufacturing method.  |

|                  |  |  |
|------------------|--|--|
| <b>3.2.P.3.5</b> | Submitted process validation protocol does not include details of terminal sterilisation. Justification shall be submitted for not performing terminal sterilisation.  | <i>Ondansetron is known to be sensitive to high temperatures. which can potentially degrade the active pharmaceutical ingredient (APS). Terminal sterilization typically involves exposure in temperatures around 121°C for 15-20 minutes which could compromise the stability and potency of Ondansetron. By utilizing aseptic filling the product is processed and filled in a sterile environment, thus avoiding the thermal stress associated with terminal sterilisation.</i> |
| <b>3.2.P.5.2</b> | Submitted drug product analytical procedure for Assay test does not include details of system suitability as recommended by USP monograph.   | Firm has submitted revised analytical procedure <i>but no evidence for performance of system suitability has been submitted.</i>   |
| <b>3.2.P.8.3</b> | <ul style="list-style-type: none"> <li>Justification shall be submitted for not performing sterility test during stability studies.</li> <li>Raw data sheets including details of sample and standard solution preparation and calculation formula applied for the Assay results , shall be submitted.</li> </ul>        | Firm has submitted revised stability summary sheets with same dates, incorporating the sterility test, while no microbial reports have been submitted as evidence.   |
|                  | <ul style="list-style-type: none"> <li>Justification shall be submitted for dispensing 5% excess drug substance for the formulation of stability batches, as evident from submitted BMRs.</li> <li>Justification shall be submitted for not performing terminal sterilisation as evident from submitted BMRs.</li> </ul> | <i>Not submitted.</i>  |

**Decision: Registration Board decided to deferred the application for confirmation of approval of required manufacturing facility of “Liquid Injection Ampoule (general) section” in name of M/s Swiss Pharmaceuticals(Pvt.) Ltd. A/159, S.I.T.E. Super Highway Karachi.**

|  |  |   |
|--|--|---|
|  | Module-II (Quality Overall Summary)  | Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product. |
|  | Module-III Drug Substance:   | Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.   |
|  | Stability Studies of Drug Substance (Conditions & duration of Stability studies)   | Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at $40^{\circ}\text{C} \pm 2^{\circ}\text{C} / 75\% \pm 5\% \text{ RH}$ for 12 Months. The real time stability data is conducted at $30^{\circ}\text{C} \pm 2^{\circ}\text{C} / 65\% \pm 5\% \text{ RH}$ for 36 Months.   |
|  | Module-III Drug Product:   | Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.       |
|  | Pharmaceutical Equivalence and Comparative Dissolution Profile   | Firm has submitted pharmaceutical equivalence of their product against the comparator product Tygacil 50mg Injection manufactured by Pfizer Pakistan.   |
|  | Analytical method validation/verification of product   | Firm has submitted analytical method verification study reports for drug substance as well as drug product.   |
| <b>STABILITY STUDY DATA</b>                    |  |   |

| Manufacturing Date  | 04-2022   | 04-2022   | 04-2022    |
| Date of Initiation  | 10-04-2022  | 10-04-2022  | 10-04-2022 |
| No. of Batches  | 03  |   |            |
| DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA   |   |   |            |
| 1.  | Reference of previous approval of applications with stability study data of the firm (if any)   | N/A   |            |
| 2.  | Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.                         | Firm has submitted GMP Certificate No. CQ20180031 issued by CFDA, China.  |            |
| 3.  | Documents for the procurement of API with approval from DRAP (in case of import).   | Firm has not provided documents for the procurement of API having approval from DRAP.   |            |
| 4.  | Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc. | Firm has submitted analytical record for product testing.   |            |
| 5.  | Compliance Record of HPLC software 21CFR & audit trail reports on product testing   | Not Submitted. The Firm have mentioned that their HPLC system is not 21 CFR compliant.  |            |
| 6.  | Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)                         | Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers. |            |
| Remarks of Evaluator:   |   |   |            |
| The following deficiencies / shortcomings have been communicated to the firm: -   |   |   |            |
| i. Please confirm the name of your Firm (along with its supporting evidence) as the same has been mentioned as “M/s Biogen Life Sciences” whereas the name mentioned on submitted copy of DML is “M/s Biogen Pharmaceuticals”.                  |   |   |            |
| ii. Please provide label claim as per the innovator’s product. The mentioned label claim is not as per innovator’s product.   |   |   |            |
| iii. Please provide details of Column used for Analysis of Finished Pharmaceutical Product. Furthermore, the chromatographic conditions (specifically Injection volume and System Suitability) are not as per USP. Please justify.              |   |   |            |
| iv. In Section 2.3.S.7.1, Please justify the stability studies of the drug substance conducted as per zone IV-A conditions, since as per API manufacturer as well as USP the storage conditions is to store the drug substance from 2°C to 8°C. |   |   |            |

|       |   |
|-------|---|
| v.    | In Section 2.3.S.7.1 (b), the proposed storage condition of API is mentioned as “Store below 30°C” and Expiry period as “3 years”, however the same has been mentioned as “Store between 2°C to 8°C” and “02 years” by API Manufacturer in Section 3.2.S.7.1. Please justify.             |
| vi.   | In Section 3.2.P.1, composition has been mentioned as Tigecycline only whereas list of excipients as per innovator include Lactose monohydrate, Hydrochloric acid and Sodium hydroxide (for pH adjustment) as well. Please justify the reason for not using the same in your formulation. |
| vii.  | Please provide details (along with supporting evidence) of Reference / Innovator’s pack used for Pharmaceutical Equivalence.  |
| viii. | Section 3.2.P.8, please justify, with supporting evidence, the reason for not conducting Bacterial Endotoxin Test and Sterility Test at the end of 6 <sup>th</sup> Month Accelerated & Real Time Stability Study Testing.   |
| ix.   | Please provide documents for the procurement of API having approval from DRAP (for submitted copy of Invoice KSDS20210411 dated 10 <sup>th</sup> September 2021).   |
| x.    | Section 2.3.R.1.1 Please provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 Section 3.2.P.8.3.   |
| xi.   | Please provide details of the lyophilizer installed in your premises including details of the minimum and maximum capacity of the equipment.  |
| xii.  | Please provide evidence of availability of Auto sampler in HPLC, wherein 10°C temperature conditions could be maintained.   |

**Decision of 330<sup>th</sup> meeting of Registration Board:**

**Registration Board deferred the case for submission of reply to the above cited shortcomings.**

| <b>Sr. No.</b> | <b>Decision of 330<sup>th</sup> meeting of Registration Board</b>   | <b>Response of The Firm</b>   |
|----------------|---|---|
| i.             | Please confirm the name of your Firm (along with its supporting evidence) as the same has been mentioned as “M/s Biogen Life Sciences” whereas the name mentioned on submitted copy of DML is “M/s Biogen Pharmaceuticals”. | Firm has submitted copy of Change of Title (vide letter No. F.1-2/2019-Lic dated 18 <sup>th</sup> March 2021) to “M/s Biogen Life Sciences”.  |
| ii.            | Please provide label claim as per the innovator’s product. The mentioned label claim is not as per innovator’s product.   | The firm have submitted that it was as “ <b>drafting error</b> ” and submitted <b>revised label claim</b> as follows:<br><br><b>TYGAGEN 50mg Injection</b><br><b>Each vial contains:</b><br><b>Tigecycline lyophilized powder ... 50mg</b><br><br><b>(USP Specifications)</b> |

|  |   |
|--|---|
| <p>iii. Please provide details of Column used for Analysis of Finished Pharmaceutical Product. Furthermore, the chromatographic conditions (specifically Injection volume and System Suitability) are not as per USP. Please justify.</p>  | <p><b>Fee for revision of label claim has not been submitted.</b></p> <p>The firm have submitted that the error was due to a “<b>typing mistake</b>” and submitted <b>revised chromatographic conditions</b> as follows:</p> <p>Mode: LC<br/> Detector: UV 248nm<br/> Column: 4.6-mm x 15-cm; 5µm packing L1<br/> Column Temperature: 30°C<br/> Flow rate: 1ml/min<br/> Injection: 20µl</p> |
| <p>iv. In Section 2.3.S.7.1, Please justify the stability studies of the drug substance conducted as per zone IV-A conditions, since as per API manufacturer as well as USP the storage conditions is to store the drug substance from 2°C to 8°C.</p>   | <p>The firm have submitted that it was a “<b>Typographic mistake</b>” and submitted <b>revised 2.3.7.S.3 a) Conclusion of the Stability Studies</b> as follows:</p>   |
| <p>v. In Section 2.3.S.7.1 (b), the proposed storage condition of API is mentioned as “Store below 30°C” and Expiry period as “3 years”, however the same has been mentioned as “Store between 2°C to 8°C” and “02 years” by API Manufacturer in Section 3.2.S.7.1. Please justify.</p>              | <p><i><b>The Long Term and accelerated stability study data suggests that the drug substance is stable for 24Months when stored below 2-8°C.</b></i></p> <p>The firm have submitted that it was a “<b>Typographic mistake</b>” and submitted <b>revised 2.3.7.S.1.</b></p>  |
| <p>vi. In Section 3.2.P.1, composition has been mentioned as Tigecycline only whereas list of excipients as per innovator include Lactose monohydrate, Hydrochloric acid and Sodium hydroxide (for pH adjustment) as well. Please justify the reason for not using the same in your formulation.</p> | <p>The firm have submitted that they have imported Tigecycline as <b>Tigecycline Lyophilized ready to fill Powder.</b></p>  |
| <p>vii. Please provide details (along with supporting evidence) of Reference / Innovator’s pack used for Pharmaceutical Equivalence.</p>   | <p>Firm has referred to TIGBIO 50mg Injection Batch No. L-409 of M/s Bio-Labs Pharma. <b>However, no supporting evidence of the claim has been submitted.</b></p>   |
| <p>viii. Section 3.2.P.8, please justify, with supporting evidence, the reason for not conducting Bacterial Endotoxin Test and Sterility Test at the end of 6th Month Accelerated &amp; Real Time Stability Study Testing.</p>   | <p>The firm have submitted that they perform Bacterial Endotoxin Test and Sterility Test at initial testing interval and at the end of 24<sup>th</sup> Month Real Time Stability Study Testing.</p>   |
| <p>ix. Please provide documents for the procurement of API having approval from DRAP (for submitted copy of Invoice KSDS20210411 dated 10th September 2021).</p>   | <p>The firm has submitted as follows: -</p> <p><i>“The API was imported in Sep, 2021 for Trials/R&amp;D Studies. <b>There was no strict rule of ADC Clearance by DRAP in our notice at that time. Therefore, the process of ADC Clearance of API was over looked by us. We</b></i></p>  |

|   |  |

| <p><b>Report on investigation of genuineness / authenticity of data submitted for registration of TYGAGEN 50mg Injection (Tigecycline) by M/s Biogen Life Sciences, Rawalpindi.</b></p> <p><b>Reference No:</b> F.15-1/2022-PEC dated 14<sup>th</sup> May, 2024.</p> <p><b>Investigation Date:</b> 10<sup>th</sup> July, 2024.</p> <p><b>Investigation Site:</b> Factory premises of M/s M/s Biogen Life Sciences, 8-KM, Chakbeli Road, Rawat, Rawalpindi.</p> <p><b>Background:</b></p> <p>The case was placed before Registration Board in its 331<sup>st</sup> Meeting and the Board approved the following panel for on-site investigation to confirm genuineness / authenticity of product development and stability data as the data submitted in reply to the shortcoming communicated in 330<sup>th</sup> meeting has multiple drafting / typographical errors.</p> <p><b>Composition of Panel:</b></p> <ol style="list-style-type: none"> <li>1. Dr. Ghazanfar Ali Khan, Additional Director (QA&amp;LT Field Office) Islamabad.</li> <li>2. Mr. Muhammad Tahir Waqas, Deputy Director (PEC), DRAP Islamabad.</li> </ol> <p><b>Scope of investigation:</b></p> |  |

Investigation to confirm genuineness / authenticity of product development & stability data and associated documents, import of API, quality, specification, test analysis, facilities etc.

#### Tools for Investigation:

The investigation was conducted by using a structured questionnaire of DRAP. For objective evidence physical inspection of the facilities for manufacturing and quality control, material used and retained, personnel involved, ongoing studies, printed data and integrity and security of data in respective databases were also audited. The details of investigation may be summarized as under:

#### Detail of Investigation:

| Q. No. | Question  | Observation by Panel  |
|--------|---|---|
| 1.     | Do you have documents confirming the import API including approval from DRAP?   | The firm have shown receipt of DHL Import for the said API.   |
| 2.     | What was the rationale behind selecting the particular manufacturer of API?   | Firm informed that they have selected API's manufacturer on the basis of vendor evaluation and qualification (desktop). The criteria include: <ul style="list-style-type: none"> <li>• Vendor should compile the specification with respect to critical tests.</li> <li>• Vendor should have accreditation from government body and having valid license.</li> <li>• Supplier facility and operation meets the requirements as documented in the Audit Report.</li> <li>• Timely Supply of the products from the vendor.</li> </ul> |
| 3.     | Do you have documents confirming the import of API reference standard and impurity standards?                             | Firm does not have documents confirming the import of API reference standard and impurity standards.  |
| 4.     | Do you have certificate of Analysis of the API, reference standards and impurity standards?                               | Firm have copy of COA of Tigecycline (Lyophilized powder) Batch No. Ti210402 by M/s Fuan Pharmaceutical Group Chongqing Bosen Pharmaceutical Co., Ltd, China, only.   |
| 5.     | Do you have GMP certificate of API manufacturer issued by regulatory authority of country of origin?                      | Firm have GMP certificate of API manufacturer issued by regulatory authority of country of origin.  |
| 6.     | Do you use API manufacturer method of testing for testing API?  | Firm have used API manufacturer's method of testing for testing API.  |
| 7.     | Do you have stability studies reports on API?   | Firm have stability studies reports on API.   |
| 8.     | If yes, whether the stability testing has been performed as per SIM method and degradation products have been quantified? | Tests for Impurities & Residual Solvents have been included.  |

|     |   |   |
|-----|---|---|
| 9.  | Do you have method for quantifying the impurities in the API?   | No  |
| 10. | Do you have some remaining quantities of the API, its reference standard and impurities standards?                    | Firm does not have remaining quantities of the API and claimed that the Stability Studies have been concluded.  |
| 11. | Have you used pharmaceutical grade excipients?  | Not applicable. Firm have claimed that no excipients have been used, since ready to fill lyophilized powder will be used for filling only.              |
| 12. | Do you have documents confirming the import of the used excipients?   | N/A   |
| 13. | Do you have test reports and other records on the excipients used?  | N/A   |
| 14. | Do you have written and authorized protocols for the development of applied product?                                  | Firm have written and authorized protocols for the development of applied product.  |
| 15. | Have you performed Drug-excipients compatibility studies?   | N/A   |
| 16. | Have you performed comparative dissolution studies?   | N/A   |
| 17. | Do you have product development (R&D) section?  | Firm have shown product development (R&D) section.  |
| 18. | Do you have necessary equipment available in product development section for development of applied product?          | Firm have used equipment available in production area for development of applied product.   |
| 19. | Are the equipment in product development section qualified?   | N/A   |
| 20. | Do you have proper maintenance / calibration / re-qualification program for the equipment used in PD section?         | N/A   |
| 21. | Do you have qualified staff in product development section with proper knowledge and training in product development? | Firm have trained & qualified staff of 02 Pharmacists, 01 Chemist and 01 Microbiologist involved in Product Development (R&D).                          |
| 22. | Have you manufactured three stability batches for the stability studies of applied product as required?               | Three (03) stability batches have been manufactured for 04-2022 for the stability studies of applied product having batch size of 500 vials each.       |
| 23. | Do you have any criteria for fixing the batch size of stability batches?  | Batch size fixation based on ICH / Regulatory authority guidelines and the production capacity of area equipment and facilities in manufacturing areas. |
| 24. | Do you have complete record of production of stability batches?   | Firm have shown record of production of stability batches.  |

|     |   |   |
|-----|---|---|
| 25. | Do you have protocols for stability testing of stability batches?   | Firm have shown protocols for stability testing of stability batches.   |
| 26. | Do you have developed and validated the method for testing of stability batches?  | Firm have shown method verification studies for testing of stability batches.   |
| 27. | Do you have method transfer studies in case when the method of testing being used by your firm is given by any other lab?                       | Not applicable.   |
| 28. | Do you have documents confirming the qualification of equipment / instruments being used in the test and analysis of API and the finished drug? | Firm have shown documents confirming the qualification of equipment / instruments being used in the test and analysis of API and the finished drug.   |
| 29. | Is your method of analysis stability indicating?  | Degradation products have not been quantified in the Finished Product Testing.  |
| 30. | Is your HPLC software 21CFR Compliant?  | NO, HPLC systems are not 21 CFR compliant.  |
| 31. | Can you show Audit trail reports on stability study testing?  | N/A, since HPLC systems are not 21 CFR compliant.<br><br>Firm have shown manual entries / log books for test / analysis of stability batches.   |
| 32. | Do you have some remaining quantities of degradation products and stability batches?  | Firm does not have remaining quantities of stability batches.   |
| 33. | Do you have stability batches kept on stability testing?  | Firm does not have stability batches kept on stability testing.   |
| 34. | Do you have valid calibration status for the equipment used in production and analysis?   | Firm have calibration records for the equipment used in production and analysis.  |
| 35. | Do proper and continuous monitoring and control are available for stability chamber?  | <p>01 Real Time Stability Chamber:</p> <ul style="list-style-type: none"> <li>○ Model No: SC-1000</li> <li>○ Model: MZ Enterprise</li> <li>○ QC Equipment No: BLS-QC-016</li> </ul> <p>01 Accelerated Time Stability Chamber:</p> <ul style="list-style-type: none"> <li>○ Model No: SC-MIL</li> <li>○ Model: Bio-base Driver</li> <li>○ QC Equipment No: BLS-QC-017</li> </ul> <p>Furthermore, manual data loggers were used for temperature monitoring.</p> |

|     |  |  |
|-----|--|--|
| 36. | Do related manufacturing area, equipment, personnel and utilities be rated as GMP compliant? | Related manufacturing area, equipment, personnel and utilities are as per cGMP compliance. |
|-----|--|--|

**CONCLUSION:**

**On the basis of risk based approach the genuineness / authenticity of product development / stability data submitted by the firm for registration of TYGAGEN 50mg Injection (Tigecycline) by M/s Biogen Life Sciences, Rawalpindi, is verifiable to satisfactory level.**

**The related manufacturing area, equipment, personnel and utilities are as per cGMP compliance.**

**Additionally, the firm was advised to set up cold storage facility (2°C - 8°C) for storage of commercial consignments of API (Tigecycline Lyophilized Powder).**

Submitted for consideration of Board, please.

**Decision: Approved.**  
**Registration Board further decided that the Registration Letter will be issued after submission of:**

- **Requisite fee for pre-registration revision / correction of data / typographic errors.**

#### DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

|   |   |   |
|---|---|---|
| 1 | Reference of previous approval of applications with stability study data of the firm (if any)                           | <b>Not provided.</b>  |
| 2 | Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin. | Copy of Notice of GMP Inspect results of Jiangsu Province No.83/2020 has been enclosed.   |
| 3 | Documents for the procurement of API with approval from DRAP (in case of import).                                       | Copy of Invoice No. YST19187C dated Dec.19,2019 for import of 4Kgs Telmisartan, cleared by AD(I&E) Lahore vide No. 2399/2020-DRAP dated 14-02-2020, has been submitted. |
| 4 | Data of stability batches will be supported by attested respective  | Firm has submitted analytical record for product testing.   |

|   |   |   |
|---|---|---|
|   | documents like chromatograms, Raw data sheets, COA, summary data sheets etc.  |   |
| 5 | Compliance Record of HPLC software 21CFR & audit trail reports on product testing                                       | Firm has submitted audit trail reports on product testing. <b>However, Compliance Record of HPLC software 21CFR has not been submitted.</b> |
| 6 | Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) | Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.   |

**Remarks of Evaluator:**

The following deficiencies / shortcomings have been communicated to the firm:

| <b>Deficiencies / Shortcomings</b>  | <b>Response of the firm</b>  |
|---|--|
| i. Please provide valid GMP status of the firm (FPP Manufacturer). The enclosed copy of GMP Certificate was valid for two years from the date of inspection (04-02-2020).   | The firm have submitted that they have applied for renewal of GMP and are waiting for Inspection.  |
| ii. Please provide valid evidence of approval of manufacturing facility issued by concerned division (Section approval letter).   | Section approval letter has not been submitted.  |
| iii. Please provide valid approval of API/ DML/GMP Certificate of API manufacturer issued by concerned Regulatory Authority of Country of Origin.   | GMP Certificate of API manufacturer issued by concerned Regulatory Authority of Country of Origin has not been submitted.  |
| iv. Please provide evidence of Reference / Innovator's Pack used for Pharmaceutical Equivalence & Comparative Dissolution Study.  | Submitted.   |
| v. 3.2.P.5.2 Please specify the Dissolution Test 1, 2 or 3.   | The firm has mentioned that they have used Dissolution Test 1.<br>Furthermore, the firm have submitted Revised Method of Analysis for Elsart 40mg and 80mg Tablets.  |
| vi. 3.2.P.5.3 Analytical Method has been verified vide Verification Report No. QC/AMV/R/033-01, Effective Date March, 2022, whereas Stability Study was commenced (Initial Testing) in 12-2021 for TEL40-SB001 and 01-2022 for TEL40-SB002 & TEL40-SB003. Please justify. | The firm have submitted that due to unavailability of Reference standard, they were unable to perform verification studies initially, once received, they performed verification studies before third month testing of product on stability. |

|   |   |  |
|---|---|--|
|   | <p>vii. 3.2.P.5.3 USP in its monograph for Telmisartan Tablets recommends ‘Column: 4.0-mm × 4-cm; 5-µm packing L1, Flow rate: 0.7 mL/min’ for Assay Analysis whereas you have used ‘Column: 4.6-mm × 2.5-cm; 10-µm packing C18’, Flow rate: 0.5 mL/min’. Please justify.</p> <p>viii. 3.2.P.6 It has been mentioned that Working Standard has been used for analytical testing. Please provide evidence / traceability of the mentioned Working Standard against the USP Reference Standard.</p> <p>ix. Description of Pack (Container closure system) has been mentioned as ‘Alu-PVC Blisters’ as well as ‘Alu-Alu Blisters’ on separate instances within the application dossier. Please clarify.</p> <p>x. Please provide Compliance Record of HPLC software 21CFR.</p> <p>xi. | The status in reference regulatory authorities                                      | Telmisartan 80mg Tablets of M/s Brillpharma (Ireland) Limited, Health Products Regulatory Authority (Ireland) Approved.   |
| For generic drugs (me-too status)   | TASMI Tablets 80mg of M/s Getz Pharma (Pvt.) Limited.   |
| Name and address of API manufacturer.   | M/s Jiangsu Zhongbang Pharmaceutical Co., Ltd. 36 Shuanggao Rd., Gaochun, Nanjin, Jiangsu, China.   |
| Module-II (Quality Overall Summary)   | Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product. |
| Module-III Drug Substance:  | Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing  |

|   |   |   |              |              |
|---|---|---|--------------|--------------|
|   |   | process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.  |              |              |
|   | Stability Studies of Drug Substance<br>(Conditions & duration of Stability studies) | Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 Months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 36 Months.  |              |              |
|   | Module-III Drug Product:  | Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability. |              |              |
|   | Pharmaceutical Equivalence and Comparative Dissolution Profile                      | Firm has submitted pharmaceutical equivalence of their product against TASMI Tablets 80mg of M/s Getz Pharma (Pvt.) Limited by performing quality tests (Assay, Dissolution, and Uniformity of dosage unit).<br><br>Firm has submitted CDP results of their product against TASMI Tablets 80mg of M/s Getz Pharma (Pvt.) Limited in 03 dissolution media.   |              |              |
|   | Analytical method validation/verification of product                                | Method verification / validation studies have been submitted for drug substance as well as drug product.  |              |              |
| STABILITY STUDY DATA                              |   |   |              |              |

- **Requisite fee for pre-registration correction / Typographical Mistake.**
- **Relevant documents as required for points (i) (ii) and (iii) mentioned above.**
- **Data of submitted batches as per revised Method of Analysis.**

The firm have submitted response for **ELSART 20mg and 40mg Tablets** as follows:

| Sr. No. | Decision of 335 <sup>th</sup> Meeting  | Firm's Response  |
|---------|--|--|
| i.      | Requisite fee for pre-registration correction / Typographical Mistake  | Elsart 40mg Tablet:<br>Challan No. 92915312<br>Elsart 80mg Tablet:<br>Challan No. 6411392198                         |
| ii.     | Please provide valid GMP status of the firm (FPP Manufacturer). The enclosed copy of GMP Certificate was valid for two years from the date of inspection (04-02-2020). | <b>Firm states that they have applied for renewal of GMP and their inspection is awaited.</b>                        |
| iii.    | Please provide valid evidence of approval of manufacturing facility issued by concerned division (Section approval letter).  | <b>Not provided.</b>   |
| iv.     | Please provide valid approval of API/DML/GMP Certificate of API manufacturer issued by concerned Regulatory Authority of Country of Origin.                            | Copy of letter for Pannel Inpsection has been submitted.<br>API Manufacturer's verification link has been submitted. |
| v.      | Data of submitted batches as per revised Method of Analysis.   | <b>Not Submitted.</b>  |

**The Firm have claimed that the revised Method of Analysis (MOA) was submitted only to address some typographical errors and not due to technical changes in testing conditions so the query regarding submission of data as per revised MOA was unjustified and have requested to consider previously submitted data as per USP.**

**Decision of 339<sup>th</sup> meeting of the board: Deferred**

**Registration Board did not accede to the request of the firm and decided that the firm shall submit requisite data as decided in 335<sup>th</sup> Meeting of Registration Board for ELSART 20mg and 40mg Tablets.**

#### Evaluation by PEC (XXI):

The following deficiencies / shortcomings have been communicated to the firm:

| Sr. No. | Observations  | Firm's response  |
|---------|---|--|
| i.      | <b>Ertugliflozin L-Pyroglutamic acid:</b> Please provide approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin. Liaoning Fuxin Management Committee for Fluoride Industrial Development Zone is not the concerned regulatory authority of country of origin. | Firm have submitted copy of Pharmaceutical Production License number LIAO 20150233, Classification code: Dh, issued by Lioning Province Drug Admistration, China.      |
| ii.     | <b>Metformin Hydrochloride:</b> Please provide valid approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin. The enclosed GMP Certificate was valid until <b>12-03-2024</b> .   | Firm have submitted copy of Pharmaceutical Production License number Lu20160126, Classification code: AhDh, issued by Shandong Medical Products Administration, China. |
| iii.    | 3.2.P.8 Significant Change (>5%) have been observed at 06 <sup>th</sup> Month (Real Time)   | Firm have submitted justification as follows: -  |

|     |  |   |
|-----|--|---|
|     | testing interval from initial test results of Metformin, Batch No. 060B22. Please justify.     | <ul style="list-style-type: none"> <li>When working with small batch sizes, there may be instances where variability in results is obtained due to the limited sample size available for analysis.</li> <li>In the case of small batch sizes, it is important to acknowledge that the results obtained from the stability testing may not fully reflect the true stability profile of the product.</li> <li>Despite the challenges, all other parameters were satisfactory that shows variation is not as significant.</li> </ul> |
| iv. | Please provide evidence of GMP status of the firm (FPP Manufacturer), not older than 03 years. | Firm have submitted copy of GMP Certificate, issued based on inspection conducted on 22 <sup>nd</sup> February, 2023.   |

**Decision of 336<sup>th</sup> Meeting: Registration Board while considering the significant change in Assay results of Ertugliflozin, reported in the submitted Accelerated stability studies of Batch no. 060B22 decided to defer the case for submission of stability studies of newly formulated batches.**

The firm have submitted following response for **TUGLIF-M 2.5/1000mg Tablets** and **TUGLIF-M 7.5/1000mg Tablets**:

*“We have Export Purpose Registration of TUGLIF-M 2.5/1000mg and TUGLIF-M 7.5/1000mg Tablets, therefore, commercial batches for Export were manufactured last year & kept on stability. We are enclosing stability reports of those commercial batches to fulfil the requirement of submission of stability studies of newly formulated batches.”*

The firm have submitted Stability Study Reports (Summary Sheets) as follows:

| Product(s)                     | Batch Details                             | Kept on Stability | Completed Intervals                            |
|--------------------------------|---|-------------------|--|
| TUGLIF-M<br>2.5/1000mg Tablets | 001F91<br>35,000 Tablets<br>Mfg. Aug-2023 | 21-Dec-2023       | Accelerated: 06 Months<br>Real Time: 06 Months |
| TUGLIF-M<br>7.5/1000mg Tablets | 001F92<br>35,000 Tablets<br>Mfg. Aug-2023 | 21-Dec-2023       | Accelerated: 06 Months<br>Real Time: 06 Months |

**Decision: Deferred.**

**Registration Board did not accede to the request of the firm and decided that the firm shall submit requisite data as decided in 336<sup>th</sup> Meeting of Registration Board for TUGLIF-M 2.5/1000mg Tablets and TUGLIF-M 7.5/1000mg Tablets.**

**Agenda of Ms. Najia Saleem**

**Case no. 01 Registration applications for local manufacturing of (veterinary) drugs**

**a. Deferred cases (local)**

|  | The status in reference regulatory authorities                                      | USFDA Approved  |
|  | For generic drugs (me-too status)   | Travop ophthalmic solution 0.004% by Alza Reg. # 081621   |

**Remarks of the Evaluator:**

| S.no. | Sections            | Observations/Deficiencies/ Short-comings  |
|-------|---------------------|---|
| 1.    | 3.2.S.4.1-3.2.S.4.2 | Submit specification and analytical procedure used for analysis of drug substance by drug product manufacturer.   |
| 2.    | 3.2.S.4.3           | Submit data of verification of analytical procedure of drug substance in section 3.2.S.4.3 as per the guidance document approved by Registration Board which specifies that “Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted”. Since you have only submitted the requisite information provided by drug substance manufacturer. |
| 3.    | 3.2.P.1             | Justify for not including the anti-microbial/preservative in the applied formulation since the innovator product used preservative in their formulation.  |
| 4.    | 3.2.P.2.2.1         | Since the applied formulation contain Zinc Chloride then how the ophthalmic solution having pH value above 6 be acceptable, when the USP monograph of “ <b>Travoprost Ophthalmic Solution</b> ” recommends that <i>If labeled to contain zinc chloride as an ingredient the acceptance range of pH is between 5.5–5.9.</i>  |
| 5.    | 3.2.P.3.2           | Storage condition of filled product is up to temperature 30°C as mentioned in the description of manufacturing procedure under section 3.2.P.3.2, justify for keeping the storage temperature above then the recommended temperature as per USP monograph i.e. Store between 2° and 25°.  |
| 6.    | 3.2.P.3.2           | Justify, how you maintain the sterility of drug product using non-sterile drug substance and without performing terminal sterilization.   |
| 7.    | 3.2.P.5.1           | Acceptance limit of Assay test and pH is not in accordance with USP Monograph of Travoprost Ophthalmic solution, justification is required in this regard.  |

|  |           |  |
|--|-----------|--|
| 8.   | 3.2.P.8   | <ul style="list-style-type: none"> <li>• Provide detailed method and calculation formula for water loss test of the drug product, since ICH guidelines recommend using a particular ratio of water loss for calculation purpose.</li> <li>• Justify for adapting the acceptance criteria of assay test and pH limit different from the recommended acceptance range in the USP monograph of travoprost ophthalmic solution.</li> <li>• According to the chromatogram main peak eluted at retention time of about 7.40 minutes, while the peak area considered while calculating the assay was mentioned against the retention time of 1.6minutes in the table given below the chromatogram, clarify the ambiguity regarding the peak area and retention time pf main peak.</li> <li>• Justify for submitting the same chromatogram and raw data sheets at every time point of each stability batches.</li> <li>• Reference of previous approval of applications with stability study data of the firm (if any)</li> <li>• Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin, since the submitted GMP certificate is expired.</li> <li>• Documents for the procurement of API with approval from DRAP (in case of import).</li> <li>• Compliance Record of HPLC software 21CFR &amp; audit trail reports on product testing</li> </ul> |
| 9.   | 3.2.R.1.1 | Provide Batch Manufacturing Record (BMR) of three stability batches.   |
| <b>Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings.</b> |           |  |

**PREVIOUSLY DEFERRED CASES OF FORM 5-F:**

|            |   |   |

#### DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

|    |   |  |
|----|---|--|
| 1. | Reference of previous approval of applications with stability study data of the firm (if any)   | The firm has not submitted any document.   |
| 2. | Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.                         | Firm has submitted copy of GMP Certificate no. WC-0494 issuing date 26-02-2021 and valid until three years from the date of issue. |
| 3. | Documents for the procurement of API with approval from DRAP (in case of import).   | NA   |
| 4. | Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc. | Firm has submitted analytical record for product testing.  |
| 5. | Compliance Record of HPLC software 21CFR & audit trail reports on product testing   | Not submitted  |

|    |   |               |
|----|---|---------------|
| 6. | Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) | Not submitted |
|----|---|---------------|

**Remarks of Evaluator:**

| S.no. | Section             | Observations/Deficiencies/ Short-comings   |
|-------|---------------------|--|
| 1.    | 3.2.S.4.1-3.2.S.4.2 | Submit data as per the guidance document approved by Registration Board which specifies that “Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required.”  |
| 2.    | 3.2.S.4.3           | Submit data as per the guidance document approved by Registration Board which specifies that “Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted”. Further justify how the analysis of drug substance was conducted without performing verification studies of the analytical method of drug substance. |
| 3.    | 3.2.S.5             | Submit COA of reference standard actually used in the analysis of drug substance in section 3.2.S.5.   |
| 4.    | 3.2.S.7             | COA of USP complied drug substance is submitted in section 3.2.S.4.4 while the stability data of EP complied drug substance has given in relevant section; clarification is required in this regard.<br>Submit stability data of drug substance till the claimed re-test date, since you have submitted the long term data of only 24 months.  |
| 5.    | 3.2.P.1             | Justify the formulation which is different in terms of qualitative composition from that of innovator product.   |
| 6.    | 3.2.P.2.2.1         | Provision of details including batch number, expiry date and name of manufacturer of the innovator product along with pharmaceutical equivalence was performed.  |
| 7.    | 3.2.P.8             | Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin, since the submitted GMP certificate is expired. Documents for the procurement of API with approval from DRAP (in case of import). Compliance Record of HPLC software 21CFR & audit trail reports on product testing  |
| 8.    | 2.3.R.1.1           | Provide Batch Manufacturing Record (BMR) of three stability batches.   |

**Decision of 333rd meeting of Registration Board:**

Registration Board deferred the case for submission of reply to the above cited shortcomings

**Response of the Firm:**

| S.no. | Observations/Deficiencies/ Short-comings   | Response of the Firm |
|-------|--|----------------------|
| 1.    | Submit data as per the guidance document approved by Registration Board which specifies that “Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required.”  | Not submitted        |
| 2.    | Submit data as per the guidance document approved by Registration Board which specifies that “Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted”. Further justify how the analysis of drug substance was conducted without performing verification studies of the analytical method of drug substance. | Not submitted        |

|    |   |               |

| 8. | Provide Batch Manufacturing Record (BMR) of three stability batches.  | Submitted     |

**Decision OF 336<sup>th</sup> meeting of Registration Board:**

Deferred for submission of following:

- Submit data as per the guidance document approved by Registration Board which specifies that “Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required.”
- Submit data as per the guidance document approved by Registration Board which specifies that “Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted”. Further justify how the analysis of drug substance was conducted without performing verification studies of the analytical method of drug substance.
- Submit COA of reference standard actually used in the analysis of drug substance in section 3.2. S.5.
- Justify the formulation which is different in terms of qualitative composition from that of innovator product.
- Provision of details including batch number, expiry date and name of manufacturer of the innovator product along with pharmaceutical equivalence was performed.
- Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin, since the submitted GMP certificate is expired.
- Documents for the procurement of API with approval from DRAP (in case of import).
- Compliance Record of HPLC software 21CFR & audit trail reports on product testing

**Response of the Firm:**

**Sr.no.                      Decision of 336<sup>th</sup> meeting of  
Registration Board**

**Response of the Firm**

|    |  |   |
|----|--|---|
| 1. | Submit data as per the guidance document approved by Registration Board which specifies that “Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required.”  | Firm submitted the specification and analytical procedure of drug substance by both drug substance manufacturer and drug product manufacturer.  |
| 2. | Submit data as per the guidance document approved by Registration Board which specifies that “Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted”. Further justify how the analysis of drug substance was conducted without performing verification studies of the analytical method of drug substance. | Firm submitted the analytical verification report of drug substance performed by drug product manufacturer.   |
| 3. | Submit COA of reference standard actually used in the analysis of drug substance in section 3.2.S.5.   | Firm submit the COA of working standard of Pantoprazole sodium.   |
| 4. | Justify the formulation which is different in terms of qualitative composition from that of innovator product.   | Firm submitted review documents of innovator product as an evidence that the qualitative composition of both applied product and innovator product (Protonix 40mg Tablet) is similar. |
| 5. | Provision of details including batch number, expiry date and name of manufacturer of the innovator product along with pharmaceutical equivalence was performed.  | Firm submitted the detail of comparator product Neege Tablet 40mg ,batch no. 001H, Mfg. date 02-2022, Exp. Date 01-2025 of M/s. Sami Pharmaceuticals, Karachi.                        |
| 6. | Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin, since the submitted GMP certificate is expired.  | Firm submitted the GMP certificate of API manufacturer which was expired in the Feb,2024.   |
| 7. | Documents for the procurement of API with approval from DRAP (in case of import).  | Not submitted   |

|  |   |
|--|---|
| <b>8.</b>  | Compliance Record of HPLC software Not submitted<br>21CFR & audit trail reports on product testing. |
| <b>Decision: Deferred for following submissions:</b> <ul style="list-style-type: none"> <li>• Documents for the procurement of API with approval from DRAP.</li> <li>• Compliance Record of HPLC software 21CFR &amp; audit trail reports on product testing.</li> </ul> |   |

|--|---|--|

**Decision: Deferred for submission of following:**

- **Valid copy of cGMP certificate / DML of the Drug Substance manufacturer issued by relevant regulatory authority of country of origin is required**
- **Copies of analytical procedures used for routine testing of Sofosbuvir and Velpatasvir by Drug Product manufacturer.**
- **Results of accuracy and specificity test of Sofosbuvir in analytical method verification studies**
- **Justification for not performing the test for residue on ignition, in batch analysis of drug substance velpatasvir by drug product manufacturer as per drug substance manufacturer**
- **Detailed results of CDP studies of the applied drug with the innovator / reference / comparator product**
- **Revised finished product specifications**
- **Analytical procedure for all the tests given in finished product specifications**
- **Clarification of applying HPLC method for Assay analysis of applied formulation in stability study while submitted for assay is UV Spectrophotometric.**

Previous Decision (M-336<sup>th</sup>-DRB): Deferred for submission of following:

- Valid copy of cGMP certificate / DML of Drug Substance manufacturer for sodium bicarbonate issued by relevant regulatory authority of country of origin
- Complete drug substance part of module 3 for sodium bicarbonate used in the applied formulation
- Justification as you have mentioned the use of sodium bicarbonate as inactive ingredient (buffer), while innovator product review document uses it as the active ingredient in the formulation
- Justification for selecting the dissolution specifications i.e. NLT Q in 30min in finished product specifications instead of NLT Q in 15min as per innovator product review document
- Justification for selecting different limit of pH test (6.5-8.0) in finished product specifications than USP monograph (7.5-8.5)
- Documents for the procurement of API with approval from DRAP (in case of import).

Firms Response:

| S No. | Deferment Reason   | Firm's Response   |
|-------|--|---|
| 1     | Valid copy of cGMP certificate / DML of Drug Substance manufacturer for sodium bicarbonate issued by relevant regulatory authority of country of origin  | Firm has submitted copy of cGMP certificate of API manufacturer (Sodium Bicarbonate) issued by Head of Inspectorate MHRA UK valid upto 27-09-2024   |
| 2     | Complete drug substance part of module 3 for sodium bicarbonate used in the applied formulation  | Complete drug substance part of module 3 for sodium bicarbonate is submitted  |
| 3     | Justification as you have mentioned the use of sodium bicarbonate as inactive ingredient (buffer), while innovator product review document uses it as the active ingredient in the formulation | The firm submitted that we have quantitatively added sodium bicarbonate according to innovator's formulation, where it was mentioned as buffer. We have now revised our formulation and updated sodium bicarbonate as an API to ensure compliance with innovator (revised |

|   |  |   |
|---|--|---|
|   |  | <p>formulation is submitted). We have already test and reported the sodium bicarbonate content in the drug product at the finished stage and during stability studies both accelerated and real time.</p>   |
| 4 | <ul style="list-style-type: none"> <li>Justification for selecting the dissolution specifications i.e. NLT Q in 30min in finished product specifications instead of NLT Q in 15min as per innovator product review document</li> </ul> | <ul style="list-style-type: none"> <li>The firm submitted that the dissolution parameters (i.e., dissolution medium, volume of dissolution medium, dissolution apparatus, RPM, and sampling time) are taken from the FDA dissolution database. The FDA dissolution database specifies a maximum 30-minute sampling time. However, during pharmaceutical equivalence studies, it has been observed that more than 90% dissolution is achieved in 15 minutes. Therefore, we have revised the product specifications and updated the sampling time from 30 minutes to 15 minutes. Revised product specifications and method of analysis is submitted.</li> </ul>   |
| 5 | <ul style="list-style-type: none"> <li>Justification for selecting different limit of pH test (6.5-8.0)in finished product specifications than USP monograph (7.5-8.5)</li> </ul>  | <ul style="list-style-type: none"> <li>The firm submitted that we are following the innovator's specifications because the product monograph for omeprazole/sodium bicarbonate powder for oral suspension is no longer official. Moreover, the product described in the deleted USP monograph is a compounded omeprazole/sodium bicarbonate suspension. We are adhering to the innovator's specifications (Zegerid (omeprazole/sodium bicarbonate) powder for oral suspension), which is provided in unit dose packets. We follow the innovator's prescribing information for reconstitution and determining the pH of reconstituted sachet. Therefore, our concentration differs from the compounded suspension that is why our pH limits differ from those in the obsoleted USP monograph.</li> </ul> |

|   |   |  |
|---|---|--|
| 6 | Documents for the procurement of API with approval from DRAP (in case of import). | <ul style="list-style-type: none"> <li>• Firm has submitted copy of form 5 issued dated 19-04-2022 specifying Sodium Bicarbonate. The form 5 is cleared by AD (I&amp;E) DRAP. Firm has also submitted invoice, packing list, DHL documents for procurement of 6kg sodium bicarbonate.</li> <li>• Firm has also submitted proforma invoice, and courier documents for procurement of 100gm omeprazole.</li> </ul> |
|---|---|--|

**Decision: Approved with innovator's specifications.**

**Registration Board further decided that Registration letter will be issued after submission of following:**

- i. Fee of Rs. 7,500/- for correction/pre-approval change/ in product specifications, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021**

| Previous Decision (M-336 <sup>th</sup> -DRB): Deferred for submission of following: |   |   |

- Valid copy of cGMP certificate / DML of Drug Substance manufacturer for sodium bicarbonate issued by relevant regulatory authority of country of origin
- Complete drug substance part of module 3 for sodium bicarbonate used in the applied formulation
- Justification as you have mentioned the use of sodium bicarbonate as inactive ingredient (buffer), while innovator product review document uses it as the active ingredient in the formulation
- Justification for selecting the dissolution specifications i.e. NLT Q in 30min in finished product specifications instead of NLT Q in 15min as per innovator product review document
- Justification for selecting different limit of pH test (6.5-8.0) in finished product specifications than USP monograph (7.5-8.5)
- Documents for the procurement of API with approval from DRAP (in case of import).

**Firm's Response:**

| S No. | Deferment Reason   | Firm's Response  |
|-------|--|--|
| 1     | <ul style="list-style-type: none"> <li>• Valid copy of cGMP certificate / DML of Drug Substance manufacturer for sodium bicarbonate issued by relevant regulatory authority of country of origin</li> </ul>  | <ul style="list-style-type: none"> <li>• Firm has submitted copy of cGMP certificate of API manufacturer (Sodium Bicarbonate) issued by Head of Inspectorate MHRA UK valid upto 27-09-2024</li> </ul>  |
| 2     | <ul style="list-style-type: none"> <li>• Complete drug substance part of module 3 for sodium bicarbonate used in the applied formulation</li> </ul>  | <ul style="list-style-type: none"> <li>• Complete drug substance part of module 3 for sodium bicarbonate is submitted</li> </ul>   |
| 3     | <ul style="list-style-type: none"> <li>• Justification as you have mentioned the use of sodium bicarbonate as inactive ingredient (buffer), while innovator product review document uses it as the active ingredient in the formulation</li> </ul> | <ul style="list-style-type: none"> <li>• The firm submitted that we have quantitatively added sodium bicarbonate according to innovator's formulation, where it was mentioned as buffer. We have now revised our formulation and updated sodium bicarbonate as an API to ensure compliance with innovator (revised formulation is submitted). We have already test and reported the sodium bicarbonate content in the drug product at the finished stage and during stability studies both accelerated and real time.</li> </ul>   |
| 4     | <ul style="list-style-type: none"> <li>• Justification for selecting the dissolution specifications i.e. NLT Q in 30min in finished product specifications instead of NLT Q in 15min as per innovator product review document</li> </ul>           | <ul style="list-style-type: none"> <li>• The firm submitted that the dissolution parameters (i.e., dissolution medium, volume of dissolution medium, dissolution apparatus, RPM, and sampling time) are taken from the FDA dissolution database. The FDA dissolution database specifies a maximum 30-minute sampling time. However, during pharmaceutical equivalence studies, it has been observed that more than 90% dissolution is achieved in 15 minutes. Therefore, we have revised the product specifications and updated the sampling time from 30 minutes to 15</li> </ul> |

|   |  |  |
|---|--|--|
|   |  | minutes. Revised product specifications and method of analysis is submitted.   |
| 5 | <ul style="list-style-type: none"> <li>Justification for selecting different limit of pH test (6.5-8.0) in finished product specifications than USP monograph (7.5-8.5)</li> </ul> | <ul style="list-style-type: none"> <li>The firm submitted that we are following the innovator's specifications because the product monograph for omeprazole/sodium bicarbonate powder for oral suspension is no longer official. Moreover, the product described in the deleted USP monograph is a compounded omeprazole/sodium bicarbonate suspension. We are adhering to the innovator's specifications (Zegerid (omeprazole/sodium bicarbonate) powder for oral suspension), which is provided in unit dose packets. We follow the innovator's prescribing information for reconstitution and determining the pH of reconstituted sachet. Therefore, our concentration differs from the compounded suspension that is why our pH limits differ from those in the obsolete USP monograph.</li> </ul> |
| 6 | Documents for the procurement of API with approval from DRAP (in case of import).  | <ul style="list-style-type: none"> <li>Firm has submitted copy of form 5 issued dated 19-04-2022 specifying Sodium Bicarbonate. The form 5 is cleared by AD (I&amp;E) DRAP. Firm has also submitted invoice, packing list, DHL documents for procurement of 6kg sodium bicarbonate.</li> <li>Firm has also submitted proforma invoice, and courier documents for procurement of 100gm omeprazole.</li> </ul>   |

**Decision: Approved with innovator's specifications.**

**Registration Board further decided that Registration letter will be issued after submission of following:**

- i. Fee of Rs. 7,500/- for correction/pre-approval change/ in product specifications, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021

| DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA |   |   |             |             |

|     |   |   |
|-----|---|---|
| 1.  | Reference of previous approval of applications with stability study data of the firm (if any)   | N/A   |
| 2.  | Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.                         | Firm has submitted copy of GMP Certificate No. (189/2022-DRAP(AD-99778029213) dated 22/10/2022 issued by Drug Regulatory Authority of Pakistan. The certificate specifies that the firm is operating at satisfactory level of GMP compliance. |
| 3.  | Documents for the procurement of API with approval from DRAP (in case of import).   | Firm has submitted copy of commercial invoice cleared on 20-07-2022 specifying 18.5000Kg of clarithromycin. The invoice is cleared by dawn Shaigan Pharmaceuticals Pvt. Ltd.  |
| 4.  | Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc. | Firm has submitted analytical record for product testing.   |
| 5.  | Compliance Record of HPLC software 21CFR & audit trail reports on product testing   | Firm has submitted certificate of 21 CFR compliance for the HPLC system along with audit trail report for product testing.  |
| 6.  | Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)                         | Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.   |
| 43. | <b>Name, address of Applicant / Marketing Authorization Holder</b>  | <b>M/s Shaigan Pharmaceuticals Pvt Ltd., 14-Km Adyala Road, Post Office Dahgal, Rawalpindi Pakistan.</b>  |
|     | Name, address of Manufacturing site.  | M/s Shaigan Pharmaceuticals Pvt Ltd., 14-Km Adyala Road, Post Office Dahgal, Rawalpindi Pakistan.   |
|     | Status of the applicant   | <input checked="" type="checkbox"/> Manufacturer<br><input type="checkbox"/> Importer<br><input type="checkbox"/> Is involved in none of the above (contract giver)   |
|     | GMP status of the firm  | Firm has submitted copy of GMP certificate dated 28-12-2021 based on inspection conducted on 24/11/2021   |
|     | Evidence of approval of manufacturing facility  | Oral Dry Powder Suspension (General) granted vide DRAP approval 1-18/92-Lic-Vol-III dated 13.01.2022.   |

| Reference to Finished product specifications                                     | USP   |
| Proposed Pack size   | 1's (60ml)  |
| Proposed unit price  | As per SRO  |
| The status in reference regulatory authorities                                   | Clarithromycin 125mg/5ml Dry Suspension Sandoz B.V., Veluwezoom 22, 1327 AH Almere Netherland   |
| For generic drugs (me-too status)  | Klaricid 125mg/5ml Dry Suspension Abbott Laboratories (Pakistan) Ltd.   |
| Name and address of API manufacturer.  | Surge Laboratories (Private) Limited Pakistan<br>10th KM, Faisalabad Road Bikhi, District Sheikhpura –Pakistan.   |
| Module-II (Quality Overall Summary)  | Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product. |
| Module-III Drug Substance:   | Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.   |
| Stability Studies of Drug Substance (Conditions & duration of Stability studies) | Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at $40^{\circ}\text{C} \pm 2^{\circ}\text{C}$ / $75\% \pm 5\%$ RH for 6 months. The real time stability data is conducted at $30^{\circ}\text{C} \pm 2^{\circ}\text{C}$ / $65\% \pm 5\%$ RH for 24 months.  |
| Module-III Drug Product:   | Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.       |
| Pharmaceutical Equivalence and Comparative Dissolution Profile                   | Firm has submitted pharmaceutical equivalence of their product against the innovator's product Klaricid 125mg/5ml Suspension manufactured by Abbott Laboratories Pakistan Limited<br>Firm has submitted CDP results of their product against the innovator's product Klaricid 125mg/5ml Suspension in 3 dissolution medias.   |

|  |   |   |             |
|--|---|---|-------------|
|  | Analytical method validation/verification of product  | Firm has submitted analytical method validation study reports for drug substance as well as drug product.   |             |

| Under 1.6.5 (a) you have mentioned M/s Surge Laboratories (Pvt) Limited, Pakistan as API manufacturer, however as per record the aforesaid manufacturer is manufacturing bulk Clarithromycin Granules. You are hereby advised to submit the name and address of API manufacturer rather source of half finished product manufacturer. | The firm has submitted GMP certificate of Zhejiang Better Pharmaceutical Co., Ltd Sanjiang Road, Paojinag Industrial Zone, Shaoxing city, Zhejiang China being API manufacturer.   |                    |  |                          |   |               |  |              |  |                                      |                                      |                    |                    |             |             |         |         |             |             |                         |                         |                    |                   |
| Under 1.6.5 (b) the approval of manufacturing facility of Clarithromycin API is required rather bulk Clarithromycin Granules.   | As mentioned above   |                    |  |                          |   |               |  |              |  |                                      |                                      |                    |                    |             |             |         |         |             |             |                         |                         |                    |                   |
| The drug substance i.e., Clarithromycin API information need to be submitted under 2.3.S and 3.2.S as required under DRAP guidance document.  | The firm has submitted the drug substance data.  |                    |  |                          |   |               |  |              |  |                                      |                                      |                    |                    |             |             |         |         |             |             |                         |                         |                    |                   |
| The manufacturing of Clarithromycin taste masked granules needs to be included in the Drug Product Modules being the part of drug product manufacturing.  | The firm submitted that manufacturing of clarithromycin taste masked granules copied as it is from DMF as the manufacturer mentioned it in drug product module.  |                    |  |                          |   |               |  |              |  |                                      |                                      |                    |                    |             |             |         |         |             |             |                         |                         |                    |                   |
| 3.2. P.1 Justification for adding Citric acid and titanium dioxide in the in the formulation as the granules manufacturer has already added the same in the formulation. Moreover, the composition of plastic bottle along with description and composition of cap needs to be elaborated.  | <p>The clarithromycin taste masked granules manufacturer has added citric acid and titanium dioxide in granules and we (FPP manufacturers) added citric acid as acidifier to stabilize the pH of the suspension according to the specifications described in USP monograph of Clarithromycin for oral suspension. Titanium dioxide is added as whitening agent to improve the texture of reconstituted suspension. The same has been used by the Innovator as given in the table#1 The dry suspension is packed in a high-density polyethylene (HDPE) bottle with a child-lock cap (PP and LDPE) and an induction seal.</p> <p><b>Table #1</b></p> <table> <tr> <th colspan="2"><b>Ingredients</b></th></tr> <tr> <th><b>Reference Product</b></th><th><b>Test Product Clarithromycin (DS)</b></th></tr> <tr> <td><b>Biaxin</b></td><td></td></tr> <tr> <td><b>( DS)</b></td><td></td></tr> <tr> <td>Clarithromycin taste masked granules</td><td>Clarithromycin taste masked granules</td></tr> <tr> <td><b>Citric acid</b></td><td><b>Citric acid</b></td></tr> <tr> <td>Aerosil 200</td><td>Aerosil 200</td></tr> <tr> <td>Sucrose</td><td>Sucrose</td></tr> <tr> <td>Xanthan gum</td><td>Xanthan gum</td></tr> <tr> <td><b>Titanium dioxide</b></td><td><b>Titanium dioxide</b></td></tr> <tr> <td>Fruit punch flavor</td><td>Strawberry flavor</td></tr> </table> | <b>Ingredients</b> |  | <b>Reference Product</b> | <b>Test Product Clarithromycin (DS)</b> | <b>Biaxin</b> |  | <b>( DS)</b> |  | Clarithromycin taste masked granules | Clarithromycin taste masked granules | <b>Citric acid</b> | <b>Citric acid</b> | Aerosil 200 | Aerosil 200 | Sucrose | Sucrose | Xanthan gum | Xanthan gum | <b>Titanium dioxide</b> | <b>Titanium dioxide</b> | Fruit punch flavor | Strawberry flavor |

| The following information is submitted by M/s Surge Laboratories (Private) Limited Pakistan, 10th KM, Faisalabad Road Bikhi, District Sheikhpura: |  |                 |  |  |             |           |                                       |   |   |                |   |   |             |   |   |                         |   |   |                                    |   |   |                   |   |   |                |    |    |                                   |   |   |             |                        |  |

|  |   |
|--|---|
| Copies of DRAP attested invoices for purchase of Clarithromycin API along with Certificate of analysis   | The firm has submitted the CoA of clarithromycin API for batch No. A042111121 Mfg date 27.11.2021 for 532Kg, however DRAP attested invoice is not submitted.  |
| Composition of Clarithromycin granules needs to be submitted in table format indicating quantities per dosage unit and function of each excipient with its reference to standard   | The manufacturer has submitted Composition of Clarithromycin granules   |
| Description of container closure system.   | The manufacturer has submitted the description of CCS for primary, secondary and tertiary packing.  |
| Name of the reference/ branded product keeping in view the generic taste masked pellets have been developed.   | The manufacturer has submitted that they had developed the formulation keeping view innovator brand i.e. Biaxin Suspension manufactured by Abbott Labs USA.   |
| Justification that the choice excipients is in line with the reference/ innovator product. In case different excipients have been used then justify and submit compatibility studies as well.  | The firm has submitted comparative statement w.r.t innovator product. The additional excipients include HPMC-5, PEG, Talcum Powder, Mg Stearate, Ethanol, acetone. The firm has also submitted compatibility study reports.   |
| Optimization studies (if any) for confirming final the quantities of excipients.   | The firm didn't respond to the query  |
| Pharmaceutical equivalence studies   | The equivalence submitted is with granules of Zhejinag Zongtong Pharmaceutical Pvt Limited. China rather innovator.   |
| Comparative dissolution studies in physiological media.  | Since CDP is only applicable to finished formulation and manufacturer is producing Taste masked API and it is not the powder for oral suspension ready to use (Excipients shall be added to manufacture a finished formulation i.e. Powder for oral Suspension) hence CDP is not applicable for Taste masked API  |
| Manufacturing process development data along with the explanation of manufacturing enteric coated granules. This should be justified with experimental data or with reference literature which indicates that clarithromycin is degradable in gastric pH/ medium. The data of initial trials conducted (wherein 5:3 ratio uncoated granules were good for coating) will be valuable document for review. | The manufacturer submitted that the product has been developed by preparing uncoated granules by granulation and then seal/ barrier coating and then enteric coating. The API clarithromycin is not degradable in acid media but we have to coat it by means of entering coating materials to get its taste masking. This taste making is required to achieve taste masked behaviour of the final dosage form which is suspension for seven days after reconstitution. If we do not enteric coat then taste masking is not achieved which results in very bitter unacceptable taste of the suspension. We have different reference COA which also shows dissolution in both acid and buffer media. COA's are attached for your reference. |
| Commercial batch formula with quantities of raw materials used.  | The firm submitted the batch formula  |
| Manufacturing process flow chart indicating input materials and In-process test.   | The firm submitted the Manufacturing process flow chart   |

|   |  |
|---|--|
| Process qualification protocol and process performance qualification report with results of three commercial scale batches.   | The firm didn't submit the data and indicated it as restricted part of DMF   |
| Under specifications, justification is required for mentioning pH limits 3.5-7.0, however USP limits are 4.0-5.4.   | The pH limits in the specifications (3.5-7.0) are of taste masked granules which will be used as a raw material for suspension along with other ingredients added by the suspension manufacturer will prepare suspension, its pH should be as per USP monograph (4.0-5.4). So the pH mentioned by the supplier of clarithromycin taste masked granules has no link with pharmacopoeia reference.   |
| Justification for dissolution specifications for granules in two media and their limits.  | The manufacturer submitted that the product has been developed by preparing uncoated granules by granulation and then seal/barrier coating and then enteric coating. The API clarithromycin is not degradable in acid media but we have to coat it by means of entering coating materials to get its taste masking. This taste making is required to achieve taste masked behaviour of the final dosage form which is suspension for seven days after reconstitution. If we do not enteric coat then taste masking is not achieved which results in very bitter unacceptable taste of the suspension. We have different reference COA which also shows dissolution in both acid and buffer media. COA's are attached for your reference. |
| Justification for assigning LOD specifications NMT 5% however as per pharmacopoeia the specs are NMT 2%. Clarification is also required that in the manufacturing process at step: Drying and Unloading of Coated Granules of Clarithromycin you are drying the granules at 45-55°C till to get LOD NMT 2% however the specs are assigned NMT 5%. | The LOD limits mentioned are of raw material i.e. taste masked granules used. When the manufacturer will prepare suspension its LOD should be as per USP i.e. 2%   |
| Justification for conducting heavy metals test.   | Drug product development when specifications were defined, the test was pharmacopeial requirement, hence test was included, however the test is no more required and test will be excluded.  |
| Justification for not specifying the tests for impurities in specifications.  | The manufacturer submitted that they are USP grade API.  |
| Clarification required as Class III solvents are being used in the manufacturing process however their residual limits are not specified in the final specifications.   | The manufacturer submitted that they are residual solvents are controlled by GC, however no testing data submitted.  |
| Copies of monographs of the excipients as per pharmacopeial reference mentioned in dossier  | The firm submitted that data for excipients.   |
| Certificate of analysis of reference standards.   | Details of USP RS submitted.   |

|   |   |
|---|---|
| Evidence of availability of Gas Chromatograph for testing benzene in Acrypol 934 and EG/PEG in PEG 6000 and other quality tests required testing using Gas Chromatograph of other excipients.       | The firm submitted CoA's for testing of EG/PEG in PEG 6000 and other quality tests required testing using Gas Chromatograph of other excipients |
| Details of PEG batches recently purchased/imported and tested for DEG/EG impurities in compliance to DRAP directives. CoA need to submitted as evidence.  | As mentioned above.   |
| Copy of approval of quota allocation from Control Drugs Division of DRAP for import/ purchase of acetone for batch No. K3587937 Mfg Date 08-2018 and Exp date 12-2022 GRN No: 19120035.             | The firm submitted the copy of approval of 75000/- litre purchase of Acetone issued by Ministry of Narcotic control dated 31.05.2019            |
| Stress testing study data as the API has been exposed to 80°C during the manufacturing process form almost 10-12 hours for two times and also at 45-55°C for attaining the desired moisture limits. | The firm didn't submit the stress testing data rather referred to impurities as mentioned in USP monograph                                      |
| Stability data of last three batches under ongoing stability program.   | The firm submitted requisite data.  |
| <b>Decision: Registration Board decided to approve registration of "CLATHRO 125mg/5ml Dry Suspension" and "CLATHRO 250mg/5ml Dry Suspension"</b>  |   |

#### Agenda of Ms. Maham Misbah

Following three cases of M/s Rotex Pharma (Pvt) Ltd, Plot No. 206 & 207, Industrial Triangle, Kahuta Road, Islamabad. (DML No. 000651) were discussed during 336<sup>th</sup> meeting of Registration Board held on 4<sup>th</sup> to 6<sup>th</sup> June, 2024. However, the decisions against the cases were inadvertently not recorded in the minutes. The three cases and the decision against each are re-submitted for consideration by the Board, please.
