Address: 1) Corso Europa,6 - 24030 Valbrembo (BG) - ITALY 2) Viale S. Pietro Martire,1054 - 45030 Pontecchio Polesine (RO) - ITALY 3) Via Zona artigianale, 262 - 45030 Pontecchio Polesine (RO) - ITALY.  LOA Validity: 31/12/2025	Brand: Milestone Generic: Haematology/ histology/ cytology_ Histology/cytology reagents_IVD Reagents (Cluster_9)  MD Group: Cluster Class-A  <b>Shelf Life:</b> not applicable	Approved
	Description of Milestone, Generic: Haematology/ histology/ cytology_ Histology/cytology reagents_IVD Reagents (Cluster_9)  <b>FineFIX</b> The Formalin Substitute: FineFIX is a patented formalin-free and water-based concentrate fixative. When diluted with ethanol, its formulation of low toxicity additives overcomes the drawbacks commonly associated with the use of pure ethanol or ethanol-based fixatives (e.g. significant tissue shrinkage, vacuolization and pyknotic nuclei). FormSAFE FormSAFE is an innovative prefilled container designed to prevent formalin exposure when working with biopsies. The formalin layer is protected by a specially designed floating shield fluid, engineered to be nonmiscible with formalin, ensuring a constant barrier against toxic fumes.			

	<p><b>JFC Solution</b> High Performance Xylene-Free Processing Solution JFC Solution is an innovative, patented solution composed of a mixture of ethanol, isopropanol and a long chain hydrocarbon.</p> <p><b>MCC</b> Milestone Cryoembedding Compound MCC is a proprietary formulation specifically developed for optimal support during cryotomy of dissected tissues down to -40°C. Being water soluble, MCC doesn't leave residue on the slides, eliminating nonspecific background staining. Additionally, MCC will not dull cryostat knives.</p> <p><b>MileGREEN</b> The Xylene Substitute MileGREEN is a solvent, consisting of iso-paraffins and replaces xylene both at the clearing and mounting process. Moreover, it can be used for cleaning purposes for paraffin contaminated items, for example in HistosMATE module.</p> <p><b>MileONE</b> Dehydration Solution for Tissue Processing MileONE is a Milestone alcoholbased solution designed to grant consistent processing of normal and high-fat content tissues like breast, brain, fatty colon and skin.</p> <p><b>MileTWO</b> Clearing Solution for Green Tissue Processing MileTWO, a xylene-free solution, ensures optimal preservation of fat cell integrity and maintains nuclear and cytoplasmic morphology during the clearing step.</p> <p><b>MoLDECALCIFIER.</b> EDTA Based Decalcifying Solution For enhanced decalcification, the process with EDTA is best carried out at a pH value of 7.2-7.4. Milestone has developed an innovative, pure unbuffered 10% EDTA solution, based on a stoichiometric mixture of bibasic or tribasic EDTA to reach this pH value without the addition of an acid/base buffer.</p> <p><b>Synergy</b> Embedding represents one of the most critical bottlenecks in the histology workflow. This time-consuming procedure is carried out manually, and it is therefore operator dependent. Synergy technology eliminates the need to reopen the cassettes and reorient the tissues.</p>
